Shanghai, China – February 18, 2016. Semiconductor Manufacturing International Corporation (NYSE: SMI; SEHK: 981) ("SMIC," the "Company," or "our"), one of the leading semiconductor foundries in the world, today announced its consolidated results of operations for the three months ended December 31, 2015.

First Quarter 2016 Guidance:

The following statements are forward looking statements which are based on current expectations and which involve risks and uncertainties, some of which are set forth under "Safe Harbor Statements" below. The Company expects:

- Revenue to increase by 1% to 3% quarter over quarter.
- Gross margin to range from 22% to 25%.
- Non-GAAP operating expenses excluding the effect of employee bonus accrual, government funding and gain from the disposal of living quarters to range from \$121 million to \$126 million.
- Non-controlling interests of our majority-owned subsidiaries to range from positive \$16 million to positive \$18 million (losses to be borne by non-controlling interests).

Dr. Tzu-Yin Chiu, SMIC's Chief Executive Officer and Executive Director commented, "In the fourth quarter of 2015 we achieved record-high revenue of \$610.1 million, a growth of 25.6% year over year and 7.1% quarter over quarter, surpassing our original expectations and guidance. On an annual basis our revenue hit a record high of \$2.24 billion, a growth of 13.5% compared to 2014. In 2015 we also achieved historical highs on all measures of profitability: gross margin, operating profit, and net profit. Despite the inventory correction in the industry during the year, we maintained full utilizations throughout 2015.

To address our 28nm status, we started to book minor 28nm revenue contribution in Q3 2015 and Q4 2015. We are pleased to have announced earlier this week that our high-k metal gate ("HKMG") technology is ready for commercialization with a purchase order from our customer, Leadcore. We target to reach double digit revenue contribution from 28nm in Q4 2016. We believe 28nm will be a long-lived node and is strategic for the long-term growth of SMIC. Our flexible 28nm and 40nm capacity has enabled us to best utilize our capacity and address our customers' needs.

To meet the strong customer demand and address the high utilization, we continue to improve operational efficiency and grow our capacity. By the end of this year we target to increase our Shenzhen fab capacity to approximately 30K 8" wafers per month, our Beijing joint-venture fab to 15K 12" wafers per month, and our Shanghai 12" fab to 20K 12" wafers per month.

Regionally, our China revenue contribution has grown more than 25% YoY in 2015 compared to 2014. Eurasia revenue contribution has grown more than 50% year over year. Meanwhile, North America has declined 9.3% year over year but has begun to recover in the second half of 2015.

With the large opportunities presented to us being in China, we strive to capture the attractive prospects with profitability as our underlying objective. In order to address many of the opportunities at hand, SMIC plans to grow through both organic and inorganic means.

We are optimistic about 2016 given our strategy and execution track record. So far the first half of 2016 looks strong and we stay committed to maintaining sustainable profitability and increasing value for all stakeholders."

About Non-Generally Accepted Accounting Principles (“Non-GAAP”) Financial Measures

To supplement SMIC’s consolidated financial results presented in accordance with IFRS, SMIC uses in this press release non-GAAP operating expenses which consist of total operating expenses as adjusted to exclude the effect of employee bonus accrual, government funding and gain from the disposal of living quarters. This earnings release also includes first quarter 2016 guidance for non-GAAP operating expenses. The presentation of non-GAAP financial measures is not intended to be considered in isolation or as a substitute for the financial information prepared and presented in accordance with IFRS.

SMIC believes that use of these non-GAAP financial measures facilitates investors’ and management’s comparisons to SMIC’s historical performance. The Group’s management regularly uses these non-GAAP financial measures to understand, manage and evaluate the Group’s business and make financial and operational decisions.

The accompanying table has more information and reconciliations of each non-GAAP financial measure to its most directly comparable GAAP financial measure. A reconciliation of non-GAAP guidance measures to corresponding GAAP measures is not available on a forward-looking basis.

Reconciliations of Non-GAAP Financial Measures to Comparable GAAP Measures⁽¹⁾

Non-GAAP operating expenses	(134,616)	(121,365)
-----------------------------	-----------	-----------

Note:

- (1) Non-GAAP operating expenses are defined as operating expenses adjusted to exclude the effect of employee bonus accrual, government funding and gain from the disposal of living quarters. SMIC reviews non-GAAP operating expenses together with operating expenses to understand, manage and evaluate its business and make financial and operational decisions. The Group also believes it is useful supplemental information for investors and analysts to assess its operating performance. However, the use of non-GAAP financial measures has material limitations as an analytical tool. One of the limitations of using non-GAAP financial measures is that they do not

include all items that impact our net profit for the period. In addition, because non-GAAP financial measures are not calculated in the same manner by all companies, they may not be comparable to other similarly titled measures used by other companies. In light of the foregoing limitations, you should not consider the non-GAAP operating expenses in isolation from or as an alternative to operating expenses prepared in accordance with IFRS.

The following table sets forth the reconciliation of the non-GAAP operating expenses to its most directly comparable financial measure presented in accordance with IFRS, for the periods indicated.
