集團執行主席

Dear Shareholders,

On behalf of the board of directors (the "Board") of Media Chinese International Limited (the "Company"), I am pleased to present the annual results of the Company and its subsidiaries (the "Group") for the financial year ended 31 March 2016.

A CHALLENGING OPERATING ENVIRONMENT

The Group experienced a difficult year in 2015/2016 due to the global market uncertainties and challenging operating environment in each of its key markets.

The business environment in Malaysia was tough given the external economic headwinds and the muted local economy. The weakening Malaysian Ringgit ("RM"), plunge in oil and commodity prices and the implementation of Goods and Services Tax in April 2015, had adversely affected the consumer confidence as well as the market sentiment in Malaysia.

各位股東：

本人謹此代表世界華文媒體有限公司(「本公司」)董事會(「董事會」)欣然提呈本公司及其附屬公司(「本集團」)截至2016年3月31日止財政年度之年度業績。

營商環境充滿挑戰

鑑於全球市場充斥不確定因素，而本集團各主要市場營商環境充滿挑戰，2015/2016年度對本集團而言為艱難的一年。

外在經濟逆境加上當地經濟放緩，令馬來西亞營商環境嚴峻。馬來西亞令吉(「馬幣」)貶值、原油及商品價格急跌，以及於2015年4月起徵收商品及服務稅，均對馬來西亞消費者信心及市場氣氛造成不利影響。

Chairman's Statement

According to the Nielsen Advertising Information Services report on Malaysia, the total advertising expenditure (adex) based on rate cards for all media segments (excluding Pay-TV segment) from April 2015 to March 2016 registered a decrease of 10.1% year-on-year to RM7.4 billion. Total adex for the newspaper segment dipped 12.0% to RM4.0 billion from a year ago. The decline in performance of the newspaper segment was attributed to the contractions in the Malay medium segment by 12.2%, the Chinese segment by 9.3% and the English segment by 13.6%.

The Group's business in Hong Kong and Mainland China as well as North America were similarly adversely affected by the weak consumer spending and slowing economic conditions in these regions, which led to advertisers scaling down their spending.

Total gross advertising spending in Hong Kong fell 2.2% during the year under review according to the research data of admanGo. The digital media is getting more popular among advertisers and the Hong Kong market's online advertising expenditure for 2015/2016 reported a growth of 14.4% on the mobile and interactive platforms. On the other hand, advertising expenditure for paid newspapers decreased by 0.3% and spending on magazines dropped 18.4%.

FINANCIAL RESULTS

For the year ended 31 March 2016, the Group registered a total turnover of US\$349,126,000, 18.6% down from the US\$429,140,000 reported in the last year. The decline in revenue was due largely to lower contribution from the Group's publishing and printing segment. Profit before income tax for the year amounted to US\$37,395,000, reflecting a 21.3% decrease when compared to US\$47,501,000 in the earlier year.

The appreciation of US dollar against RM and Canadian dollar during the year caused adverse currency effects of about US\$43,090,000 and US\$8,575,000 on the Group's turnover and profit before income tax respectively.

The advertising market was dragged down by cautious consumer and business spending under difficult retail market conditions in the Group's major operating areas, resulting in a 30.9% decline in profit before income tax of the Group's publishing and printing segment during the current financial year. Meanwhile, profit before income tax for the tour segment reported a notable 65.8% growth, mainly attributed to the Group's continuous efforts on profit margin enhancement and cost controls.

Basic earnings per share for the year was US1.58 cents, a decrease of 15.1% or US0.28 cent from US1.86 cents in the previous financial year. As at 31 March 2016, the Group's net assets stood at US\$218,727,000, 1.2% higher than the previous year's US\$216,105,000; and the Group's net gearing ratio came down to nil, compared to 5.9% as at 31 March 2015.

根據馬來西亞尼爾森廣告監播服務(Nielsen Advertising Information Services)報告，於2015年4月至2016年3月期間，所有媒體分部(不包括收費電視分部)按廣告價目表計算之廣告開支總額按年減少10.1%至74億馬幣。報章分部之廣告開支總額較去年下跌12.0%至40億馬幣。報章分部表現倒退乃因馬來文分部、華文分部及英文分部分別縮減12.2%、9.3%及13.6%所致。

本集團於香港及中國內地以及北美之業務同樣因該等地區消費意欲疲弱及經濟放緩而受到不利影響，導致廣告商削減廣告開支。

根據admanGo之研究數據，回顧年內香港廣告開支總額下跌2.2%。數碼媒體愈來愈受廣告商歡迎，於2015/2016年度，香港市場手機及互動平台方面之網上廣告開支錄得14.4%增長。另一方面，收費報章廣告開支減少0.3%，雜誌廣告開支則下跌18.4%。

財務業績

截至2016年3月31日止年度，本集團錄得總營業額349,126,000美元，較去年之429,140,000美元下跌18.6%。收益下跌主要由於本集團出版及印刷分部貢獻減少。除所得稅前年度溢利為37,395,000美元，較去年之47,501,000美元下跌21.3%。

年內，美元兌馬幣及加拿大元升值，對本集團營業額及除所得稅前溢利分別造成約43,090,000美元及8,575,000美元之負面匯兌影響。

本集團主要營運地區零售市況嚴峻，消費者及商界抱持審慎消費態度，拖累廣告市場，令本集團出版及印刷分部於本財政年度之除所得稅前溢利下跌30.9%。同時，旅遊分部除所得稅前溢利錄得65.8%可觀增長，主要由於本集團持續改善毛利率及控制成本。

年內每股基本盈利為1.58美仙，較上一財政年度之1.86美仙減少15.1%或0.28美元。於2016年3月31日，本集團之資產淨值為218,727,000美元，較去年之216,105,000美元增加1.2%；而本集團之淨資本負債比率則由2015年3月31日之5.9%降至零。

Chairman's Statement

ONGOING ENHANCEMENT OF OUR DIGITAL BUSINESS

Throughout the year, the Group has maintained a resolute focus on engaging with audiences and businesses through upgrading newsroom and technology advancements to enhance our core media businesses. The Group is maintaining and leveraging its strength and scale as a provider of quality, independent and professional journalism across all platforms that we serve. We continue to innovate but stay relevant, and we are ready to take full advantage of new opportunities.

In the 2014/2015 Annual Report, we set out the strategies taken to strengthen our digital ventures which would contribute to the Group's objectives to optimise its core strengths, diversify and expand its business, in order to enhance its positioning further as a global multi-media corporation.

During the year, the Group's publications have successfully established their presence in the digital media sphere by offering refreshed and new design of content through web portals, mobile apps as well as social media platforms. The web portals, news websites and mobile apps have also gained increasing popularity in terms of unique visitors, pageviews and video views. Adding to this, the Group's fast growing e-commerce business through the e-marketplace "Logon" further strengthened the Group's digital portfolio.

We are pleased to report that, circulation of the Group's e-papers in Malaysia has been on an upward trajectory and based on the company's data, *Sin Chew Daily* has achieved a record of 88,313 e-copies as of March 2016, in slightly more than two years since its launch in February 2014. The introduction of digital evening edition has further spurred the growth of e-subscriptions in the second half of the year. This has again demonstrated the newspaper's influence within the Chinese community in Malaysia.

In view of the changing media landscape, the Group has reshaped its business model and gone beyond the traditional advertising and content marketing strategies by rolling out its own digital products. Together with the print publications, our various websites and mobile apps continue to create more commercial opportunities across all platforms by offering integrated marketing solutions, content creation and video advertising on smartphones, tablets as well as mobile devices. This is to better capture readers and provide additional value to the advertisers.

At the same time, the Group will continue to engage with the customers and audiences, especially the new and young market segment, through compelling content and services, which will enable the Group to monetize and optimize its revenue base in the near future.

持續加強數碼業務

年內，本集團一直透過更新新聞中心及提升技術加強核心媒體業務，著眼於與觀眾及業界之溝通。本集團於所有媒體平台均有業務，將繼續維持及善用其提供優質、獨立及專業新聞報導之優勢及規模。我們將繼續創新及緊貼市場，並充分利用新機遇。

於2014/2015年報，我們制定策略加強數碼業務，旨在優化本集團核心優勢、多元化發展及擴充業務，致力鞏固其環球多媒體企業之地位。

年內，本集團出版業務透過門戶網站、手機應用程式以及社交媒體平台，提供更新及全新內容設計，成功將業務範圍拓展至數碼媒體。門戶網站、新聞網站及手機應用程式亦大獲好評，其個別訪客人數、頁面瀏覽量及影片瀏覽量均大幅上升。除此之外，本集團透過電子商務購物平台「熱購」(Logon)快速發展電子商貿業務，進一步加強本集團數碼業務組合。

我們欣然呈報，本集團自2014年2月起於馬來西亞推出電子報兩年多以來，電子報發行量日益增加，而根據公司數據，於2016年3月，發行《星洲日報》電子版本88,313份。引入晚報數碼版本更於下半年推高電子訂閱數量，再次證明報章於馬來西亞華人社區之影響力。

有見媒體生態不斷變化，本集團重塑其業務模型，除傳統廣告及內容營銷策略外，推出數碼產品。連同印刷出版業務，本集團多個網站及手機應用程式繼續透過智能手機、平板電腦及流動裝置，提供整合營銷解決方案、內容創作及影片廣告，於所有媒體平台創造更多商機，藉以吸引更多讀者，為廣告商帶來更大價值。

與此同時，本集團將透過具吸引力之內容及服務，繼續與客戶及觀眾(特別是全新年青市場分部)溝通，將有助本集團於不久將來實現及擴闊其收入基礎。

Chairman's Statement

CORPORATE GOVERNANCE

The Board is committed to practising high standards of corporate governance throughout the Group. Details of our corporate governance initiatives, risk management and internal control policies are set out in the relevant sections of this Annual Report.

AWARDS AND ACCOLADES

As a leading media corporate, the Group continued to strive in providing high standards and top quality journalism with independence, insight and integrity. In the year under review, our publishing arm maintained its record of winning multiple awards which honoured the recipients with the highest publishing standards especially on editorial content, photojournalism, infographics and magazine design. A summary of achievements is set out on pages 26 to 32.

DIVIDENDS

The Board has declared a second interim dividend in lieu of final dividend of US0.600 cents per share payable on 13 July 2016. Together with the first interim dividend of US0.500 cents paid on 23 December 2015, the Group has declared a total of US1.100 cents per ordinary share for the financial year 2015/2016. This represents a dividend payout ratio of about 70% and a yield of 6.0% based on the Company's closing share price on 31 March 2016.

PROSPECTS

With the slower growth rates in most emerging markets, the Group expects 2016/2017 to be highly competitive and challenging in view of the volatile global environment. The sluggish economic conditions compounded by a fluctuating global oil price and volatile currencies is expected to continuously impact various economies and market confidence.

Whilst our key focus would be on strengthening the digital assets, the Group will invest and implement various strategies to expand the footprint and market share of our portfolio, both traditional and digital media assets. We are confident that the strategies put in place would enable us to prevail.

Meanwhile, the Group would also continue to explore new business opportunities, undertake prudent measures and drive further cost efficiencies to deliver greater value for our shareholders.

企業管治

董事會致力於本集團內貫徹實踐最高水平之企業管治。有關企業管治策略、風險管理及內部監控政策詳情載於本年報相關章節。

獎項及殊榮

作為領先媒體企業，本集團繼續致力製作高水平及優質新聞報道，秉承獨立、敏銳及誠信之作風。回顧年內，我們的印刷分部繼續奪得多個獎項，表揚得獎者特別於編採內容、攝影圖片報道、資訊圖表及雜誌設計方面發揮高水平。成就概要載於第26至32頁。

股息

董事會宣派及將於2016年7月13日派付第二次中期股息每股0.600美仙，以代替末期股息。連同已於2015年12月23日派付之第一次中期股息每股0.500美仙，本集團於2015/2016財政年度已宣派股息總額為每股普通股1.100美仙，相當於派息率約70%及以2016年3月31日本公司之收市股價計算，收益率6.0%。

前景

由於大部分新興市場增長放緩，本集團預期2016/2017年度全球經營環境動盪，市場競爭愈趨激烈，挑戰重重。經濟狀況疲弱，加上全球油價及匯率波動，預期將持續影響多個經濟體系及市場信心。

儘管我們主要著眼於加強數碼資產，本集團將投資於傳統及數碼媒體資產，並實施多個策略擴大我們的業務範圍及拓闊業務組合之市場份額。我們相信所實施策略將有助我們迎難而上。

與此同時，本集團亦將繼續探索新商機，採取審慎措施，進一步發揮成本效益，為股東帶來更大價值。

OVERALL REVIEW OF OPERATIONS

For the year ended 31 March 2016, the Group recorded total turnover of US\$349,126,000, a decrease of 18.6% from US\$429,140,000 reported in the previous year. Profit before income tax for the year declined by 21.3% to US\$37,395,000 from last year's US\$47,501,000.

The decline in profit during the year was primarily due to weaker performance of the Group's publishing and printing segment amid the subdued advertising market conditions in the Group's major operating areas, partially offset by improved profitability of its tour segment as well as cost reduction initiatives during the year.

Turnover from the Group's publishing and printing segment dropped 22.4% or US\$76,813,000 to US\$266,421,000 from US\$343,234,000 in last year on the back of declining revenue. Segment profit before income tax decreased by 30.9% or US\$16,486,000 year-on-year to US\$36,802,000.

Turnover of the Group's travel segment amounted to US\$82,705,000, reflecting a year-on-year decrease of 3.7%. Despite the decline in turnover, the travel segment achieved a notable growth in segment profit before income tax of 65.8% or US\$2,480,000 to US\$6,250,000, mainly attributable to margin enhancement and continued efforts on cost containment.

Both Malaysian Ringgit ("RM") and the Canadian dollar ("CAD") weakened against the US dollar during the year under review, resulting in negative currency impact on the Group's turnover and profit before income tax of approximately US\$43,090,000 and US\$8,575,000 or 12.3% and 22.9% respectively for the year ended 31 March 2016.

Basic earnings per share for the year ended 31 March 2016 was US1.58 cents, a decrease of US0.28 cent or 15.1% from US1.86 cents in the previous financial year. As at 31 March 2016, the Group's cash and cash equivalents and net assets per share attributable to owners of the Company amounted to US\$140,950,000 and US12.63 cents, respectively.

Management Discussion and Analysis

SEGMENTAL REVIEW

Publishing and printing

Malaysia and other Southeast Asian countries

During the year, the Malaysian segment was faced with a challenging operating environment weighed down by the adverse global economic uncertainty, currency volatility and weak consumer sentiment — all of which contributed to the market challenges encountered by the domestic economy as well as the media industry in Malaysia.

Turnover for the Group's operations in Malaysia for the financial year ended 31 March 2016 was US\$186,387,000, representing a decline of 25.4% or US\$63,574,000 compared to the previous financial year. However, the decline was largely cushioned by the US\$54,819,000 or 27.2% year-on-year decrease in net operating expenditure due to the effective cost containment strategies. As a consequence, the segment profit before income tax reported a decrease of 18.1% or US\$8,755,000 from US\$48,374,000 to US\$39,619,000. The strengthening of the U.S. dollar against RM resulted in an adverse currency impact of US\$8,575,000 on the segment's result. If the currency impact was excluded, the decline in profit before income tax would be 0.4%.

The Group is the leading news and information providers in Malaysia, operating 4 Chinese language newspapers, 1 tabloid and 15 magazine titles. In terms of the combined circulation copies of the 4 newspaper titles in Malaysia, the Group has maintained its dominant position in the Chinese language segment and reached an aggregate average daily readership of 2.73 million in Peninsular Malaysia during the year. To combat the unrelenting challenges faced by the traditional media, the Group's print media business is now complemented by its growing multi-platform digital products. The Group's digital portfolio comprises the established websites of the Group's publication titles and standalone sites such as an online marketplace "Logon"; an online mobile video portal "Pocketimes"; and a range of mobile sites and apps.

Sin Chew Daily's success is built on its commitment to quality journalism and integrity reporting. During the year, *Sin Chew Daily* underwent a revamp of its content, layout and design that is refreshing and relevant to readers. As the most read daily publication in Malaysia, *Sin Chew Daily* first introduced its e-paper morning edition in February 2014 and subsequently its e-paper evening edition in August 2015. The average daily print circulation of *Sin Chew Daily* was 364,739 copies for the period of January to June 2015 according to the Audit Bureau of Circulation report ("ABC report"). With the concerted efforts taken throughout the year, *Sin Chew Daily* recorded a triple-digit growth in its digital subscription base during the year. This was evidenced by the achievement of a 20% growth over the past year in *Sin Chew Daily's* average daily readership to 1,433,000 readers in Peninsular Malaysia during the period of January to December 2015 (source: Q4 2015 Nielsen Consumer and Media View).

China Press will be celebrating its 70th anniversary in 2016 with a variety of special events to engage with readers and the public. It remains the most popular evening newspaper and continues to command the second-largest readership among all Chinese language newspapers in Malaysia. *China Press* introduced its digital replica in June 2014 to cater to readers' shifting reading habits. The paper had an average daily readership of 933,000 readers during the period of January to December 2015 (source: Q4 2015 Nielsen Consumer and Media View), and an average daily print circulation of 210,053 copies during the period of January to June 2015 (source: ABC report).

Guang Ming Daily, the leading Chinese language community newspaper in the northern region of Peninsular Malaysia, is famous for providing entertainment and lifestyle features and quality regional news. *Guang Ming Daily* embarked on its digital edition in February 2014. This initiative has contributed to a total average daily readership of about 277,000 readers during the period of January to December 2015 (source: Q4 2015 Nielsen Consumer and Media View). It also commanded an average daily print circulation of 87,414 copies during the period of January to June 2015 (source: ABC report).

Nanyang Siang Pau continues to appeal to a premium audience, with a sustainable and strong readership profile of highly educated Chinese business professionals, executives, and managerial readers. *Nanyang Siang Pau* provides comprehensive and in-depth business news that keeps readers abreast of the latest development in the business world.

Management Discussion and Analysis

Life Magazines is the largest Chinese language magazine publisher in Malaysia. In recent years, revenues of the Group's magazine titles and the magazine industry as a whole have come under pressure due to the stiff competition from digital platforms, declining discretionary spending by customers, changing reading habit and cover price increase induced by the introduction of Goods and Services Tax in Malaysia. In view of the changes in the magazines marketplace, Life Magazines has diversified its revenue stream through growing its digital portfolios and expanding its business in events management and exhibitions.

The Group has been actively involved in organising various signature events and activities to engage with readers as well as the community. These include Nanyang Golden Eagle Awards, Sin Chew Business Excellence Awards, Sin Chew Carnival, Bridal Fair, Nanyang Property Fair, entrepreneurship seminars, health forums and cultural events, which further extend the reach and influence of the Group's branding positions throughout Malaysia.

Hong Kong, Taiwan and Mainland China

The Group's Hong Kong, Taiwan and Mainland China publishing and printing operations recorded a total turnover of US\$60,848,000 for the financial year ended 31 March 2016, reflecting a decrease of 12.8% or US\$8,896,000 from US\$69,744,000 in the previous year. The segment reported a loss before income tax of US\$1,821,000 for the year, as against a segment profit before income tax of US\$4,617,000 in the year of 2014/2015. This was mainly attributed to the decline in performance of Group's listed subsidiary, One Media Group, which reported a loss before income tax of US\$1,472,000 for the current year. The continued weakness in the local retail market and subdued consumer sentiment have a profound negative impact on media advertising spending, especially on luxury products, which in turn adversely affected the Group's advertising revenue.

Ming Pao Daily News ("Ming Pao"), the Group's flagship newspaper in Hong Kong, has been widely recognised as one of the most credible and influential newspapers over the years by providing high-standard journalism and comprehensive news reporting across the Greater China region. In the Hong Kong News Awards 2015 organised by The Newspaper Society of Hong Kong, *Ming Pao* won a total of 15 awards including 5 Winner awards, 2 First Runner-up awards and 4 Second Runner-up awards. Adding to this, it was also granted 8 awards in the "Focus at the Frontline 2015" Photo Contest organised by the Hong Kong Press Photographers Association.

The Group has been granted licenses to publish textbooks in both print and digital formats on certain subjects under the curricula of secondary schools in Hong Kong. During the year under review, the Group's education business maintained satisfactory growth in terms of both circulation and market share. Both print and digital textbooks have been well accepted among the secondary schools in Hong Kong given the books' quality content as well as the Group's extensive distribution channels and strong network with the local education community.

One Media Group, the Group's listed subsidiary providing Chinese language lifestyle publications and outdoor media services in the Greater China region, reported a turnover of US\$17,683,000 for the year ended 31 March 2016, representing a year-on-year decline of about 23.4%. The decrease in revenue was due primarily to the weak retail market conditions and reduced consumer spending which led to a cut-back in promotional spending by advertisers, in particular for branded and luxury products. The decline in revenue resulted in One Media Group reporting a loss before income tax of US\$1,472,000 for the year.

North America

Turnover of the Group's publishing and printing operations in North America amounted to US\$19,186,000, reflecting a year-on-year decline of 18.5% or US\$4,343,000. The region's slow economy had a negative impact on the segment's business, in particular its advertising revenue. As a result, the segment reported a loss of US\$996,000 as against a profit before income tax of US\$297,000 a year ago.

Management Discussion and Analysis

Travel and travel related services

For the fiscal year 2015/2016, the Group's travel operations in Hong Kong and North America recorded a total turnover of US\$82,705,000, a slight drop of 3.7% from last year, while segment profit before income tax surged a notable 65.8% or US\$2,480,000 to US\$6,250,000. The improved performance was attributed to product margin enhancement and the rigid cost-containment strategies applied during the year under review.

Digital business

The Group has been successfully leveraging our editorial contents over multiple media platforms and generating audience growth. In recent years, we have deployed the Mobile First Strategy across webs, smartphones, mobiles, tablets and social media. Our digital portfolio ranges from news and entertainment sites providing regularly updated news and entertainment content to specialist sites aimed at targeted specific audiences based on interests and behaviours, etc.

We are providing reliable and up-to-date news on the mobile phone applications in extending our reach to both local and international readers. All our Group publication titles use Facebook, YouTube and other social media to reach our audience. Our news have been quoted, referenced, tweeted and circulated among the Chinese community that we served.

In Malaysia, the Group offers a wide variety of advertisement packages encompassing print, digital, video and electronic commerce platforms to satisfy the needs and expectation of advertisers. The recent introduction of the Group's Consumer Preference Targeting Advertisement packages also started to capture the eyeballs of specific audience groups and the responses received from advertisers have been very encouraging.

In March 2016, the Group expanded its digital footprint by offering the *Sin Chew-The Star* e-paper package in East Malaysia. This package is tailored exclusively for the local community and contains extensive national news coverage as well as comprehensive local news in East Malaysia. The introduction of the *Sin Chew* e-paper activation card has also eased and simplified the subscription process for readers, and is made available at various distribution centers throughout the nation. Working together with its technology partners, *China Press* launched its revamped website in November 2015 and subsequently presented its new smartphone app in March 2016.

To enhance engagement with young readers, the Group also organised various events and roadshows including the formation of Sin Chew E-paper Crew and VJ Search Reality Show to reach the online community while cultivating closer relationship with the youth and students from universities and colleges.

In line with the Group's commitment to develop its bilingual e-commerce business, improvements were made to the Logon e-marketplace to enrich the shopping experience for both e-shoppers and online merchants. This was followed by the launch of the Logon app in June 2015, making it more convenient for e-shoppers to make purchases from our growing online merchant base. We will further strengthen the Logon business model and relevance to our customers in order to achieve sustainable growth in the near future.

In Hong Kong, the ongoing digital revamp and content enhancement for *Ming Pao's* main website, mingpao.com, have been well accepted by the readers. In terms of the number of unique visitors, mingpao.com ranked 3rd and 4th places for its mobile and desktop platforms, respectively, among the digital extension of traditional printed newspapers and digital only platforms in the news/information category in Hong Kong. By March 2016, *Ming Pao's* news apps recorded a total number of cumulative downloads of 732,000. (Source: comScore's ranking report for January 2016). Furthermore, according to the market statistics for social media tracking from Socialbakers, the facebook page of mingpao.com ranked as number 20 out of the top 100 media pages in Hong Kong and 2nd place among the Chinese language newspapers.

Management Discussion and Analysis

During the current financial year, *Ming Pao* has launched two new mobile sites, namely the OL and the finance sites. Besides providing quality content to our readers, these mobile platforms also serve as channels for advertisers to market their products either by placing adverts or through content marketing, which are sources of revenue for the Group. New mobile apps have also been launched including one for *Ming Pao*'s education supplements which is designed to support the print edition's subscription. Another income generating mobile app is the "Money Monday e-mag" which provides content from *Ming Pao*'s finance supplements and is a platform for advertisers to integrate their print and mobile advertising.

With the rapid growth in digital communication and spending, the Group's various digital products and services are expected to become one of the main revenue streams in the future. The Group will continue to adapt to this changing market trend and aims to increase revenue through enhancing our digital resources.

CORPORATE PROPOSAL

Reference is made to the announcements made by the Company dated 4 March 2016, 15 April 2016 and 28 June 2016 whereby the Board of Directors announced that the Company's wholly owned subsidiary, Comwell Investment Limited ("Comwell"), has entered into a memorandum of understanding (the "MOU"), a supplemental MOU and a second supplemental MOU on 4 March 2016, 15 April 2016 and 28 June 2016 respectively with a potential purchaser in relation to the possible disposal of 292,700,000 shares in One Media by Comwell, representing approximately 73.01% of the issued share capital of One Media (the "Possible Transaction"). No formal or legally binding agreement has been entered into between Comwell and the potential purchaser in respect of the Possible Transaction as at the date of this Annual Report.

OUTLOOK

The Group navigated through a progressively more challenging business environment during the year under review, and the Board expects another tough year ahead in 2016/2017 in light of the ongoing economic uncertainties and currency volatility.

The Board remains cautious on the advertising markets in the coming year given the declining consumer and business spending sentiment in the Group's key operating markets. However, the Group will offer more innovative print and digital advertising packages and bundles, with greater value marketing solutions to advertisers. Furthermore, in light of the growing trend of digital marketing and social media usage, the Group will continue to allocate more resources to enhance its various digital platforms in order to attract targeted customers and to increase the Group's revenue base.

Although newsprint prices are likely to remain stable for the next financial year, any further appreciation of US dollar against RM and the CAD would negatively affect the Group's overall performance.

The Group's travel business is expected to continue to face difficult market conditions in the year ahead amid people's growing concerns about safety and security issues in tourist areas, especially in Europe.

Nevertheless, the Group will continue to strengthen its efforts to diversify its revenue stream, to exploit synergistic benefits by unlocking growth potentials of the existing content assets via multiple platforms besides reinforcing its cost-control efforts to achieve operational efficiencies in order to embrace the ever changing market conditions.

PLEDGE OF ASSETS

As at 31 March 2016, general security agreements under which all the assets of certain subsidiaries with net carrying amount of nil (2015: US\$10,484,000) were pledged to certain banks to secure general banking facilities granted to the Group.

CONTINGENT LIABILITIES

As at 31 March 2016, there were several libel suits which involved claims against some companies in the Group. The Group has been strongly contesting those claims. Even though the final outcome of the proceedings is still uncertain as of the date this consolidated financial information is authorised for issue, the directors of the Company are of the opinion that the respective ultimate liability, if any, will not have a material adverse impact upon the Group's financial position.

Management Discussion and Analysis

CAPITAL COMMITMENTS

As at 31 March 2016, the Group's authorised capital expenditure for property, plant and equipment contracted but not provided for in this consolidated financial information amounted to US\$280,000 whereas authorised capital expenditure for property, plant and equipment not contracted and not provided for in this consolidated financial information amounted to US\$938,000.

FINANCIAL GUARANTEE

As at 31 March 2016, the Company issued financial guarantees to banks in favour of certain of its subsidiaries totalling US\$2,579,000 (2015: US\$20,930,000) in connection with general banking facilities granted to those subsidiaries. At 31 March 2016, total facilities utilised amounted to US\$1,109,000 (2015: US\$6,499,000). The directors of the Company do not consider it probable that a claim will be made against the Company under the financial guarantees. The maximum liability of the Company at 31 March 2016 under the financial guarantees was the facility drawn down by its subsidiaries. No provision was therefore made in this respect at 31 March 2016.

EXPOSURE TO FLUCTUATIONS IN EXCHANGE RATES

The Group operates internationally and is exposed to foreign exchange risk arising from various currency exposures, primarily with respect to RM, Renminbi, CAD, HK\$ and US\$. Foreign exchange risk arises from future commercial transactions, recognised assets and liabilities and net investments in foreign operations.

The assets and liabilities of each entity within the Group are mostly denominated in its own functional currency and do not have material impact on the consolidated income statement for the year.

During the year ended 31 March 2016, the Group was particularly exposed to movements in the US\$ to RM exchange rate as a major part of the Group's operations is located in Malaysia, and a decrease in the exchange fluctuation reserve of US\$7,015,000 was recognised largely due to the changes in the exchange rate of US\$ to RM.

LIQUIDITY, FINANCIAL RESOURCES AND NET GEARING RATIO

As at 31 March 2016, the Group's cash and cash equivalents were US\$140,950,000 (2015: US\$118,620,000) and total bank and other borrowings were US\$116,116,000 (2015: US\$131,091,000). The net cash position was US\$24,834,000 (2015: net debt of US\$12,471,000). Owners' equity was US\$213,024,000 (2015: US\$209,744,000).

The net gearing ratio of the Group, calculated as net debt over owners' equity, was nil as at 31 March 2016 (2015: 5.9%).

CAPITAL STRUCTURE

During the year, the Company repurchased a total of 1,000 shares at an aggregate purchase consideration of HK\$1,150 (equivalent to US\$148). Details of the repurchase are set out in note 29(a) to the financial statements.

EMPLOYEES AND EMOLUMENT POLICY

As at 31 March 2016, the Group had 4,368 employees (2015: 4,554 employees), the majority of whom were employed in Malaysia and Hong Kong. The Group remunerates its employees based on industry practice and performance of individual employees. The emoluments of the directors and senior management are reviewed by the Remuneration Committee regularly, having regard to the Group's operating results, individual performance and comparable market statistics. No director or any of his/her associates is involved in dealing with his/her own remuneration. The Group has share option schemes as an incentive to directors and eligible employees.

As a media corporate, we are committed to product quality, customer satisfaction, positive work culture and well-being of employees, community development as well as best corporate governance practices.

COMMUNITY

Humanitarian assistance

The Group continues to play a key role in the communities we serve. We provide a social platform for the public to learn more about our corporate social responsibility (“CSR”) aims and activities as well as highlight stories and plights of poor families in need of assistance.

In Malaysia, most of the CSR initiatives of the Group are implemented through Yayasan Sin Chew and Yayasan Nanyang Press. It is through the editorial contents in our publications that we encourage the public to care and help the underprivileged and poor in need through their participation and donations.

During the year, the Group has successfully raised funds for various charitable causes, including the provision of aids to victims of major catastrophes and natural disasters and people who are less fortunate, especially those in need of medical treatments. Financial assistance and relief schemes are also provided for the poor and distressed.

As a relief response to the devastating earthquake in Nepal, Yayasan Sin Chew and Yayasan Nanyang Press kicked-off fund raising drives to provide emergency aid and recovery supplies to the quake victims. Together, they provide the Group with a wealth of knowledge, experience, skills and expertise that is important for the continued successful direction of the Group.

The Board appreciates the distinct roles and responsibilities of the Group Executive Chairman and the Group Chief Executive Officer ("Group CEO"). As such, the roles of the Group Executive Chairman and the Group CEO are separate and clearly defined in the Board Charter, and are held by different individuals to ensure a proper balance of power and authority.

The Group Executive Chairman plays a crucial role in providing overall business direction while the implementation falls under the responsibility of the Group CEO. The Group Executive Chairman is responsible for, among others, providing leadership for and overseeing the functions of the Board. He should ensure that the Board works effectively and performs its responsibilities and that all key and appropriate issues are discussed by the Board in a timely manner. (e) Implications of the Company's dual primary listings status on the investors in Hong Kong

On 30 April 2008, the Company's admission to the Official List of Bursa Securities and the listing of and quotation for the Company's shares on the main market of Bursa Securities took effect. As a result, shareholders of the Company are entitled to trade the shares on both the HK Stock Exchange and Bursa Securities. Certain additional obligations which they are subject to as shareholders of an entity listed in Malaysia, among others, are set out as follows:

(i) Trading of the Company's shares

If a shareholder chooses to trade his/her shares in the Company on Bursa Securities, there is a stamp duty of RM1 for RM1,000 or fractional part of value of securities (payable by both buyer and seller) chargeable on the transaction and the maximum stamp duty to be paid is RM200. For the trading in Hong Kong, stamp duty on sale or purchase of the Company's shares is charged at a rate of 0.1% of the amount of the consideration or of its value on every sold note and every bought note together with a transfer deed stamp duty of HK\$5. The applicable brokerage and clearing fees would also be payable by the seller and the buyer.

(ii) Transfer of shares from Bursa Securities to the HK Stock Exchange and vice versa

If a shareholder whose shares are deposited in Bursa Malaysia Depository Sdn Bhd (i.e. the central depository of the Bursa Securities) ("Bursa Depository"), wishes to withdraw his/her shares from Bursa Depository and deposit them into the Hong Kong securities system for trading in Hong Kong, the share transfer form will be subject to Malaysian stamp duty. The stamp duty payable on such share transfer form is a nominal sum of RM10 on the basis that no beneficial interest passes in such transfer as the transfer is made by a bare trustee (i.e. Bursa Depository) to a beneficiary (i.e. the investor).

For the share transmission between the Hong Kong branch share register and the Malaysian branch share register, a shareholder has to pay approximately RM211 or HK\$442 to the relevant share registrar as administrative fees for registration and issuance of new share certificates. Such fees are subject to revision from time to time.

Statement on Risk Management and Internal Control

INTRODUCTION

This Statement on Risk Management and Internal Control (this “Statement”) is made pursuant to Paragraph 15.26(b) of the Bursa Securities Listing Requirements, with reference to the Statement on Risk Management and Internal Control: Guidelines for Directors of Listed Issuers and in accordance with the Hong Kong Code contained in Appendix 14 of the HK Listing Rules. The Board remains committed to maintaining a sound risk management and internal control system to manage risks and safeguard shareholders’ investments and the Group’s assets.

BOARD RESPONSIBILITY

The Board affirms its overall responsibility in establishing a sound risk management framework and internal control system for the Group as well as reviewing its adequacy and effectiveness. The Board is of the view that the risk management framework and internal control system are designed to manage and mitigate the Group’s risks within the acceptable risk appetite, rather than to eliminate the risk of failure to achieve business objectives and strategies. In view of the inherent limitations in any system, such system can only provide reasonable but not absolute assurance against material misstatements, losses, frauds, breaches of laws and regulations, and unforeseen emerging risks.

The Group has established appropriate control structure and systematic process for identifying, evaluating, monitoring and managing significant risks pertinent to the achievement of its overall corporate objectives and strategies throughout the year. This process is regularly reviewed by the Board.

RISK MANAGEMENT FRAMEWORK

The Audit Committee assists the Board in (i) reviewing the adequacy and effectiveness of the Group’s risk management and internal control systems; (ii) reviewing management’s identification of the significant risks in accordance with the Group’s risk management policy; and (iii) reporting to the Board of any significant failures or potential breaches of the Group’s risk management policy.

The Group has established two separate risk management committees (“RMCs”), one in each of Malaysia and Hong Kong, to oversee and drive improvement in risk management. The two RMCs are responsible for overseeing the implementation of the risk management framework, periodically reviewing the risk management processes and ensuring that on-going measures taken are adequate to manage, address or mitigate the identified significant risks. All key management, heads of subsidiary companies and heads of departments have to identify, evaluate and manage risks associated with the business operations on an on-going basis with defined parameters. The deliberation of risks and related mitigating responses are carried out at regular management meetings of the Group. Significant risks are conveyed by the RMCs to the Group Executive Committee and the Audit Committee at the quarterly scheduled meetings.

INTERNAL AUDIT

The Group’s Internal Audit Function is independent of all operations it reviews and reports directly to the Audit Committee. The Internal Audit Function undertakes regular reviews in accordance with the annual internal audit plan approved by the Audit Committee. The Internal Audit Function adopts risk-based approach in its audit strategy and focuses on major business functions of the Group.

Statement on Risk Management and Internal Control

The internal audit findings and improvement opportunities are discussed with management for appropriate actions to be taken in response to the issues highlighted. Management has to follow-up in ensuring the agreed actions are satisfactorily implemented. The Audit Committee reviews all internal audit findings, management responses and the adequacy and effectiveness of the internal controls on a quarterly basis. Significant risk issues, if any, are reported to the Board for its attention.

OTHER INTERNAL CONTROL PROCESSES

Apart from the above, the other key features of the Group's internal control systems are as follows:

- The Group has established an organisation structure with clearly defined lines of responsibilities, authority limits and accountability aligned to businesses and operations requirements;
- Relevant executive directors and senior management have been delegated with specific authorities and responsibilities for monitoring the performance of designated business operating units;
- The Board reviews and approves the Group's annual business plans and budgets. The Group's senior management meets on a quarterly basis with operating companies' management to review their businesses and financial performances against the business plans and approved budgets. Key business risks relevant to each operating company are also reviewed in these meetings;
- Explanations on actual performance and significant variances against budgets are provided to the Board on a quarterly basis. This helps the Board and senior management monitor the Group's business operations and plan on a timely basis to suit the changes in business environment;
- Each operating company maintains internal controls and procedures appropriate to its structure and business environment whilst complying with the Group's policies, standards and guidelines;
- The Group maintains an appropriate insurance programme in order to provide sufficient insurance coverage on major assets and libel suits that could result in material loss. The insurance brokers assist management in conducting a risk assessment on a yearly basis on the Group's operations, which helps the Group in assessing the adequacy of intended coverage;
- The Board reviews all areas of significant financial risk and approves all significant capital projects and investments after detailed review and consideration;
- The Group has established IT Services Continuity Plans in key business units primarily aimed to handle potential IT service interruptions;
- The Group has established a Crisis Management Team in a key business unit to manage and handle significant risk or crisis faced by the business unit;
- The treasury department manages the cash balances and exposure to currency transaction risks through treasury policies, risk limits and monitoring procedures;
- Code of ethics are established and adhered to by all employees to ensure high standards of conduct and ethical values in all business practices; and
- The legal department monitors compliance with relevant laws and regulations which govern the Group's businesses.

Statement on Risk Management and Internal Control

WHISTLEBLOWING POLICY

The Group has a whistleblowing policy approved by the Board. The policy outlines the Group's commitment toward enabling the employees to raise concerns about possible improprieties in financial reporting, internal controls or other matters within the Group. Proper arrangements have been put in place for fair and independent investigation of such matters and for appropriate follow-up actions. All the disclosures made under this policy will be handled with strict confidentiality. The effectiveness of this policy will be monitored and reviewed regularly by the Audit Committee.

REVIEW OF ADEQUACY AND EFFECTIVENESS

The Board has reviewed the adequacy and effectiveness of the Group's risk management framework and internal control activities to ensure that necessary actions have been or are being taken to rectify weaknesses identified during the year.

The Board has also received reasonable assurance from the Group CEO and Head of Finance that the Group's system of risk management and internal control, in all material aspects, is operating adequately and effectively. For the financial year under review and up to the date of this Statement, there were no material control failures or adverse compliance events that have directly resulted in any material loss to the Group.

In this connection, the Board concludes that an effective system of risk management and internal control is in place to safeguard the shareholders' investment and the Group's assets.

REVIEW OF THE STATEMENT BY EXTERNAL AUDITOR

The external auditor has reviewed this Statement for inclusion in the Group's Annual Report for the financial year ended 31 March 2016. The external auditor has reported to the Board that nothing has come to its attention that causes it to believe that the Statement is inconsistent with its understanding of the process adopted by the Board in reviewing the adequacy and integrity of the Group's system of risk management and internal control.

This Statement on Risk Management and Internal Control was approved by the Board on 30 June 2016.

COMPETING BUSINESS

Set out below is information disclosed pursuant to paragraph 8.10 of the HK Listing Rules.

Tan Sri Datuk Sir TIONG Hiew King and Dato' Sri Dr TIONG Ik King are the substantial shareholders and directors of the Company, and both of them hold directorships and/or ownerships in Pacific Star Limited and R.H. Tours & Travel Agency Sdn Bhd. In addition, Ms TIONG Choon is a director of the Company and she is also a director of R.H. Tours & Travel Agency Sdn Bhd. Pacific Star Limited is engaged in the business of newspapers publishing in Papua New Guinea. R.H. Tours & Travel Agency Sdn Bhd is engaged in the travel and travel related services business in Malaysia. As the Board of Directors of the Company is independent of the boards of the aforesaid companies, the Group operates its business independently of, and at arm's length from, the businesses of the aforesaid companies.

Tan Sri Datuk Sir TIONG Hiew King and Dato' Sri Dr TIONG Ik King are also deemed interested in One Media, a subsidiary of the Company which is listed on the HK Stock Exchange. In addition, Tan Sri Datuk Sir TIONG Hiew King and Mr TIONG Kiew Chiong are directors of the Company and One Media. One Media Group is engaged in media business in the Greater China region, including but not limited to magazine publishing and digital media business. As the contents and demographic readership of the publications of the Group and those of One Media Group are different, the directors consider that there is a clear delineation and no competition between the businesses of the Group and One Media Group and that the Group is carrying on its business independently of, and at arm's length with, One Media Group.

Save as disclosed above, none of the directors of the Company has any interest in a business which competes or is likely to compete with the business of the Group during the year.

DIRECTORS' SERVICE CONTRACTS

Each of the directors has entered into an appointment letter with the Company for a term of 2 years commencing from 1 April 2016 until 31 March 2018, except for Mr LEONG Chew Meng and Ms TIONG Choon whose appointment letters with the Company commenced from 1 April 2015 to 31 March 2017; and Mr KHOO Kar Khoo whose appointment letter with the Company commenced from 23 June 2016 to 31 March 2018.

Save as disclosed above, none of the directors who are proposed for re-election at the forthcoming annual general meeting have service contracts with the Company or any of its subsidiaries which are not determinable by the Group within one year without payment of compensation, other than statutory compensation.

SHARE OPTION SCHEMES

The Company has no share option scheme. One Media had adopted two share option schemes, namely the pre-IPO share option scheme ("Pre-IPO Scheme") and the post-IPO share option scheme ("Post-IPO Scheme") (together the "One Media Schemes") which were conditionally approved and adopted by ordinary resolutions of the shareholders of One Media and the Company on 26 September 2005 ("Adoption Date"). The principal terms of the Pre-IPO Scheme were substantially the same as those of the Post-IPO Scheme (where applicable) except for the following terms: (a) the subscription price per share of One Media should be the offer price; and (b) no options would be offered or granted upon the commencement of dealings in the shares of One Media on the HK Stock Exchange.

Pursuant to the One Media Schemes, the board of One Media might, at its absolute discretion, grant share options to any full time employees, executive and non-executive directors (including independent non-executive directors) of One Media Group or the Group (for so long as One Media remains a subsidiary of the Company) to subscribe for shares in One Media subject to the terms and conditions stipulated therein. The purposes of the One Media Schemes were to encourage its employees to work towards enhancing the value of One Media and its shares for the benefit of One Media and its shareholders as a whole, and to motivate them to achieve higher levels of good corporate governance.

(i) Summary of terms:

The maximum number of shares in respect of which options may be granted under the One Media Schemes when aggregated with the number of shares in respect of any options to be granted under any other share option scheme established by One Media (if any) is that number which is equal to 10% of the issued share capital of One Media immediately following the commencement of dealings in the shares of One Media on the HK Stock Exchange. No employee should be granted an option if the total number of shares issued and to be issued upon exercise of the options granted and to be granted to such employee in any 12-month period up to the date of the latest grant would exceed 1% of the issued share capital of One Media from time to time.

The period within which an option may be exercised under each of the One Media Schemes would be determined and notified by the board of One Media in its absolute discretion (subject to any vesting periods, if applicable), save that no option might be exercised later than 10 years from the date of offer of the option or 10 years after the Adoption Date, whichever was earlier. No option granted under the Pre-IPO Scheme would be exercisable within 6 months from the listing date of One Media. Save for the number of shares which might be subscribed for pursuant to the exercise of options and the vesting periods of the options granted, each option so granted under the Pre-IPO Scheme had the same terms and conditions.

The offer of a grant of share option might be accepted within 28 days from the date of offer upon payment of a nominal consideration of HK\$1.00 by the grantee.

The subscription price under the Pre-IPO Scheme should be the offer price whereas for the Post-IPO Scheme, the subscription price in relation to each option should be determined by the board of One Media in its absolute discretion, but in any event should be the highest of: (i) the closing price of the shares of One Media as stated in the HK Stock Exchange's daily quotation sheet on the date, which must be a business day, of the written offer of the option; (ii) the average closing price of the shares of One Media as stated in the HK Stock Exchange's daily quotation sheets for the 5 business days immediately preceding the date of offer of the grant of such option; and (iii) the nominal value of the shares of One Media.

In relation to each option granted to the grantees, either of the following two vesting scales has been applied:

- (1) 20% of the shares comprised in the option would vest on each of the 5 anniversaries of the One Media listing date from the 1st anniversary of the listing date to the 5th anniversary of the listing date; or
- (2) 100% of the shares comprised in the option would fully vest on the 1st anniversary of the One Media listing date,

as the case might be, which had been specified in the offer letters to the grantees.

Report of the Directors

- (ii) Both the Pre-IPO Scheme and the Post-IPO Scheme expired on 25 September 2015. No option had ever been granted or agreed to be granted by One Media under the Post-IPO Scheme.

During the year ended 31 March 2016, movements of the options granted under the Pre-IPO Scheme are as follows:

Report of the Directors

PENSION SCHEME ARRANGEMENT

Hong Kong

The Group operates a hybrid retirement benefit scheme (the “Scheme”) and a Mandatory Provident Fund Scheme (the “MPF”) for its employees in Hong Kong.

During the year, the Scheme was funded by contributions from both the employees and the Group at 5% each of the monthly basic salaries of the employees. Actual contributions paid by the Group was about 4% of the monthly basic salaries of the employees, with the difference being funded by the forfeiture reserve. Forfeited employers’ contributions arising from early termination of services by employees are credited to a forfeiture reserve for the purposes of funding the differences in the Group’s contributions as aforesaid and for covering any shortfall on the defined benefit plans. The total amount available for such purposes amounted to US\$457,000 at 31 March 2016 (2015: US\$718,000).

The most recent independent funding actuarial valuation of the Scheme was carried out by Towers Watson Hong Kong Limited, a professionally qualified independent actuary, as at 31 March 2015 (the “Valuation”). According to the Valuation, the Scheme was solvent at the date of the Valuation.

With effect from 1 December 2000, all new joiners of the Group are eligible to join the MPF. The Group’s contributions to the MPF are at 5% of the employees’ relevant income as defined in the Hong Kong Mandatory Provident Fund Schemes Ordinance up to a maximum of HK\$1,500 per employee per month (the “MPF Contributions”) (the amount has been revised from HK\$1,250 to HK\$1,500 per month since June 2014). The MPF Contributions are fully and immediately vested in the employees as accrued benefit once they are paid.

Malaysia

The Group operates 2 types of retirement benefit schemes in Malaysia:

(a) Defined contribution plans

Defined contribution plans are post-employment benefit plans under which the Group pays fixed contributions into separate entities or funds and will have no legal or constructive obligation to pay further contributions if any of the funds do not hold sufficient assets to pay all employee benefits relating to employee services in the current and preceding financial years. Such contributions are recognised as an expense in the income statement as incurred. As required by law, companies in Malaysia make such contributions to the Employees Provident Fund.

(b) Defined benefit plans

The Group operates an unfunded defined benefit retirement scheme for its eligible employees in Malaysia (the “Malaysia Scheme”). The Group’s obligation under the Malaysia Scheme is calculated using the projected unit credit method, and is determined based on actuarial computations by independent actuaries, through which the amount of benefit that employees have earned in return for their services in the current and prior years is estimated. That benefit is discounted in order to determine its present value.

Other countries

Employees in other countries are under separate pension schemes which are defined contribution plans set up in the countries that the Group operates.

The assets of all retirement plans are held separately from those of the Group in independently administered funds. The defined benefit plans and defined contribution plans are generally funded by payments from the relevant Group companies and/or their respective employees.

AUDITOR'S RESPONSIBILITY

Our responsibility is to express an opinion on these consolidated financial statements based on our audit. We conducted our audit in accordance with International Standards on Auditing. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation of consolidated financial statements that give a true and fair view in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by the directors, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

1 GENERAL INFORMATION

Media Chinese International Limited (the “Company”) is a limited liability company incorporated in Bermuda. Its registered address is Canon’s Court, 22 Victoria Street, Hamilton HM12, Bermuda.

The Company is an investment holding company. The principal activities of its subsidiaries are the publishing, printing and distribution of newspapers, magazines, books and digital contents primarily in Chinese language, and the provision of travel and travel related services in Hong Kong, Taiwan, Mainland China, North America, Malaysia and other Southeast Asian countries. The shares of the Company have been listed on The Stock Exchange of Hong Kong Limited (the “HK Stock Exchange”) since 22 March 1991 and subsequently dual-listed on Bursa Malaysia Securities Berhad (“Bursa Securities”) on 30 April 2008.

These consolidated financial statements are presented in US dollars (“US\$”), unless otherwise stated. These consolidated financial statements have been approved for issue by the Board of Directors on 30 June 2016.

2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The principal accounting policies applied in the preparation of these consolidated financial statements are set out below. These policies have been consistently applied to all the years presented, unless otherwise stated.

2.1 Basis of preparation

The consolidated financial statements of the Company and its subsidiaries (collectively the “Group”) have been prepared in accordance with International Financial Reporting Standards (“IFRSs”) and under the historical cost convention, as modified by the revaluation of investment properties, available-for-sale financial assets, and financial assets at fair value through profit or loss, which are carried at fair value.

The preparation of financial statements in conformity with IFRSs requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in the process of applying the Group’s accounting policies. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the consolidated financial statements are disclosed in note 4.

(a) New and amended standards and interpretations to existing standards adopted by the Group

- (i) Amendment to IAS 19 on contributions from employees or third parties to defined benefit plans. The amendment distinguishes between contributions that are linked to service only in the period in which they arise and those linked to service in more than one period. The amendment allows contributions that are linked to service, and do not vary with the length of employee service, to be deducted from the cost of benefits earned in the period that the service is provided. Contributions that are linked to service, and vary according to the length of employee service, must be spread over the service period using the same attribution method that is applied to the benefits.
- (ii) Amendments from annual improvements to IFRSs — 2010–2012 Cycle, on IFRS 8, ‘Operating segments’, IAS 16, ‘Property, plant and equipment’, IAS 38, ‘Intangible assets’ and IAS 24, ‘Related party disclosures’. The adoption of the improvements made in the 2010–2012 Cycle has required additional disclosures in the segment note.
- (iii) Amendments from annual improvements to IFRSs — 2011–2013 Cycle, on IFRS 3, ‘Business combinations’, IFRS 13, ‘Fair value measurement’ and IAS 40, ‘Investment property’.

2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES *(Continued)*

2.2 Subsidiaries

2.2.1 Consolidation

A subsidiary is an entity (including a structured entity) over which the Group has control. The Group controls an entity when the Group is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. Subsidiaries are consolidated from the date on which control is transferred to the Group. They are deconsolidated from the date that control ceases.

(a) Business combinations

The Group applies the acquisition method to account for business combinations. The consideration transferred for the acquisition of a subsidiary is the fair values of the assets transferred, the liabilities incurred to the former owners of the acquiree and the equity interests issued by the Group. The consideration transferred includes the fair value of any asset or liability resulting from a contingent consideration arrangement. Identifiable assets acquired and liabilities and contingent liabilities assumed in a business combination are measured initially at their fair values at the acquisition date.

The Group recognises any non-controlling interest in the acquiree on an acquisition-by-acquisition basis. Non-controlling interests in the acquiree that are present ownership interests and entitle their holders to a proportionate share of the entity's net assets in the event of liquidation are measured at either fair value or the present ownership interests' proportionate share in the recognised amounts of the acquiree's identifiable net assets. All other components of non-controlling interests are measured at their acquisition date fair values, unless another measurement basis is required by IFRS.

Acquisition-related costs are expensed as incurred.

If the business combination is achieved in stages, the carrying amount of the acquirer's previously held equity interest in the acquiree is re-measured to fair value at the acquisition date; any gains or losses arising from such re-measurement are recognised in profit or loss.

Any contingent consideration to be transferred by the Group is recognised at fair value at the acquisition date. Subsequent changes to the fair value of the contingent consideration that is deemed to be an asset or liability is recognised in accordance with IAS 39 either in profit or loss or as a change to other comprehensive income. Contingent consideration that is classified as equity is not remeasured, and its subsequent settlement is accounted for within equity.

The excess of the consideration transferred, the amount of any non-controlling interest in the acquiree and the acquisition-date fair value of any previous equity interest in the acquiree over the fair value of the identifiable net assets acquired is recorded as goodwill. If the total of consideration transferred, non-controlling interest recognised and acquisition-date fair value of any previously held interest is less than the fair value of the net assets of the subsidiary acquired in the case of a bargain purchase, the difference is recognised directly in the income statement.

Intra-group transactions, balances and unrealised gains on transactions between Group companies are eliminated unless the transaction provides evidence of an impairment of the transferred asset. Unrealised losses are also eliminated. When necessary, amounts reported by subsidiaries have been adjusted to conform with the Group's accounting policies.

Notes to the Financial Statements

For the year ended 31 March 2016

2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES *(Continued)*

2.2 Subsidiaries *(Continued)*

2.2.1 Consolidation *(Continued)*

(b) *Changes in ownership interests in subsidiaries without change of control*

Transactions with non-controlling interests that do not result in a loss of control are accounted for as equity transactions — that is, as transactions with the owners of the subsidiary in their capacity as owners. The difference between the fair value of any consideration paid and the relevant share acquired of the carrying amount of net assets of the subsidiary is recorded in equity. Gains or losses on disposals to non-controlling interests are also recorded in equity.

(c) *Disposal of subsidiaries*

When the Group ceases to have control, any retained interest in the entity is re-measured to its fair value at the date when control is lost, with the change in carrying amount recognised in profit or loss. The fair value is the initial carrying amount for the purposes of subsequently accounting for the retained interest as an associate, joint venture or financial asset. In addition, any amounts previously recognised in other comprehensive income in respect of that entity are accounted for as if the Group had directly disposed of the related assets or liabilities. This may mean that amounts previously recognised in other comprehensive income are reclassified to profit or loss.

2.2.2 Separate financial statements

Investments in subsidiaries are accounted for at cost less impairment. Cost includes direct attributable costs of investment. The results of subsidiaries are accounted for by the Company on the basis of dividends received and receivable.

Impairment testing of the investments in subsidiaries is required upon receiving a dividend from these investments if the dividend exceeds the total comprehensive income of the subsidiary in the period the dividend is declared or if the carrying amount of the investment in the separate financial statements exceeds the carrying amount in the consolidated financial statements of the investee's net assets including goodwill.

2.3 Joint arrangements and associates

An Associate is an entity over which the Group has significant influence but not control, generally accompanying a shareholding of between 20% and 50% of the voting rights.

Investments in joint arrangements are reclassified as either joint operations or joint ventures depending on the contractual rights and obligations of each investor. The Group has assessed the nature of its joint arrangements and determined them to be joint ventures.

Interests in joint ventures and associates are accounted for using the equity method of accounting. Under the equity method, the interests are initially recognised at cost, and the carrying amount is increased or decreased to recognise the investor's share of the profit or loss of the investee after the date of acquisition. The Group's interests in associates include goodwill identified on acquisition.

2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES *(Continued)*

2.3 Joint arrangements and associates *(Continued)*

The Group's share of post-acquisition profit or loss is recognised in the consolidated income statement, and its share of post-acquisition movements in other comprehensive income is recognised in other comprehensive income with a corresponding adjustment to the carrying amount of the investment. When the Group's share of loss in a joint venture or associate equals or exceeds its interest in the joint venture or associate, including any other unsecured receivables, the Group does not recognise further losses, unless it has incurred legal or constructive obligations or made payments on behalf of the joint venture or associate.

The Group determines at each reporting date whether there is any objective evidence that the interest in a joint venture or an associate is impaired. If this is the case, the Group calculates the amount of impairment as the difference between the recoverable amount of the joint venture or the associate and its carrying amount and recognises the impairment adjacent to 'share of profits/(losses) of joint ventures and associates' in the consolidated income statement.

Profits and losses resulting from upstream and downstream transactions between the Group and its joint ventures and associates are recognised in the Group's financial statements only to the extent of unrelated investor's interests in the joint ventures and associates. Unrealised losses are eliminated unless the transaction provides evidence of an impairment of the asset transferred. Accounting policies of joint ventures and associates have been changed where necessary to ensure consistency with the accounting policies adopted by the Group.

2.4 Segment reporting

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision-maker. The chief operating decision-maker, who has been identified as the Group Executive Committee, is responsible for allocating resources, assessing performance of the operating segments and making strategic decisions.

2.5 Foreign currency translation

(a) Functional and presentation currency

Items included in the financial statements of each of the Group's entities are measured using the currency of the primary economic environment in which the entity operates, i.e. the functional currency. The functional currency of the Company is Malaysian Ringgit ("RM"). However, each entity within the Group can present its financial statements in any currency, which can be the same or different from the entity's functional currency. As the Group operates internationally, management considers that it is more appropriate to use US\$, a globally recognised currency, as the presentation currency for the Group's consolidated financial statements. For the entity whose functional currency is not US\$, its results and financial position have been translated into US\$.

(b) Transactions and balances

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions or valuation where items are re-measured. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in the consolidated income statement.

Foreign exchange gains and losses that relate to borrowings and cash and cash equivalents are presented in the consolidated income statement within 'finance costs'. All other foreign exchange gains and losses are presented in the consolidated income statement within 'Other losses, net'.

2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES *(Continued)*

2.5 Foreign currency translation *(Continued)*

(c) Group companies

The results and financial position of all the Group entities (none of which has the currency of a hyperinflationary economy) that have a functional currency different from the presentation currency are translated into the presentation currency as follows:

- (i) assets and liabilities for each statement of financial position presented are translated at the closing rate at the end of each reporting period;
- (ii) income and expenses for each income statement are translated at average exchange rates (unless this average is not a reasonable approximation of the cumulative effect of the rates prevailing on the transaction dates, in which case income and expenses are translated at the rates on the dates of the transactions); and
- (iii) all resulting currency translation differences are recognised in other comprehensive income.

Goodwill and fair value adjustments arising on the acquisition of a foreign entity are treated as assets and liabilities of the foreign entity and translated at the closing rate. Currency translation differences arising are recognised in other comprehensive income.

(d) Disposal of foreign operation

On the disposal of a foreign operation (that is, a disposal of the Group's entire interest in a foreign operation, or a disposal involving loss of control over a subsidiary that includes a foreign operation, or a disposal involving loss of joint control over a joint venture that includes a foreign operation, or a disposal involving loss of significant influence over an associate that includes a foreign operation), all of the currency translation differences accumulated in equity in respect of that operation attributable to the owners of the Company are reclassified to profit or loss.

In the case of a partial disposal that does not result in the Group losing control over a subsidiary that includes a foreign operation, the proportionate share of accumulated currency translation differences are re-attributed to non-controlling interests and are not recognised in profit or loss. For all other partial disposals (that is, reductions in the Group's ownership interest in associates or joint ventures that do not result in the Group losing significant influence or joint control), the proportionate share of the accumulated currency translation differences is reclassified to profit or loss.

2.6 Property, plant and equipment

Freehold land is not amortised. Buildings situated on freehold land are stated at cost and are depreciated on a straight-line basis over their expected useful lives to the Group. The principal annual rates used for this purpose range from 2% to 5%.

Buildings situated on leasehold land and held for own use are stated at cost and are depreciated on a straight-line basis over the unexpired periods of the leases or their expected useful lives to the Group, whichever is shorter. The principal annual rates used for this purpose range from 2% to 5%.

Leasehold land held for own use under a finance lease is stated at cost and amortised over the period of the lease on a straight-line basis.

2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES *(Continued)*

2.6 Property, plant and equipment *(Continued)*

Plant and equipment, comprising leasehold improvements, furniture, fixtures, office equipment, machinery, printing equipment and motor vehicles, are stated at cost less accumulated depreciation and accumulated impairment losses. Construction in progress is stated at cost less accumulated impairment losses.

Subsequent costs are included in an asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably. The carrying amount of the replaced part is derecognised. All other repairs and maintenance are charged to the consolidated income statement during the financial period in which they are incurred.

Depreciation is calculated using the straight-line method to allocate the assets' costs to their residual values over their estimated useful lives as follows:

Leasehold land classified as finance lease	Shorter of remaining lease term of 29 to 82 years and useful life
Leasehold improvements	Shorter of remaining lease term of 3 to 13 years and useful life
Furniture, fixtures and office equipment	2 to 13 years
Machinery and printing equipment	
Printing equipment	10 to 20 years
Machinery	3 to 10 years
Motor vehicles	4 to 10 years

The assets' depreciation method, useful lives and residual values are reviewed, and adjusted if appropriate, at the end of each reporting period.

An asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount (note 2.9).

Gains and losses on disposals are determined by comparing the proceeds with the carrying amount and are recognised within "Other operating expenses" in the consolidated income statement.

2.7 Investment property

Investment property, principally comprising leasehold land and buildings, is held for long-term rental yields or for capital appreciation or both, and that is not occupied by the Group. Land held under operating leases is accounted for as investment properties when the rest of the definition of an investment property is met. In such cases, the operating leases concerned are accounted for as if they were finance leases. Investment property is initially measured at cost, including related transaction costs and where applicable borrowing costs. After initial recognition, investment properties are carried at fair value, representing open market value determined at each reporting date by external valuers. Fair value is based on active market prices, adjusted, if necessary, for any difference in the nature, location or condition of the specific asset. If the information is not available, the Group uses alternative valuation methods such as recent prices on less active markets or discounted cash flow projections. Changes in fair values are recorded in the consolidated income statement as part of a valuation gain or loss in "Other losses, net".

2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES *(Continued)*

2.8 Intangible assets

(a) Goodwill

Goodwill arises on the acquisition of subsidiaries, joint ventures and associates and represents the excess of the consideration transferred over the Group's interest in the net fair value of the net identifiable assets, liabilities and contingent liabilities of the acquiree and the amount of the non-controlling interest in the acquiree.

For the purpose of impairment testing, goodwill acquired in a business combination is allocated to each of the cash-generating units ("CGUs"), or groups of CGUs, that is expected to benefit from the business combination. Each unit or group of units to which the goodwill is allocated represents the lowest level within the entity at which the goodwill is monitored for internal management purposes. Goodwill is monitored at the operating segment level.

Goodwill impairment reviews are undertaken annually or more frequently if events or changes in circumstances indicate a potential impairment. The carrying amount of goodwill is compared to the recoverable amount, which is the higher of value in use and the fair value less costs to sell. Any impairment is recognised immediately as an expense and is not subsequently reversed.

(b) Other intangible assets

Other intangible assets primarily comprise costs of computer softwares, archives, mastheads and publishing rights that are acquired by the Group and are stated at cost less accumulated amortisation.

Amortisation of other intangible assets is charged to the consolidated income statement on a straight-line basis over the assets' estimated useful lives. Other intangible assets with finite useful lives are amortised from the date they are available for use and their estimated useful lives are as follows:

Archives, mastheads, publishing rights	40 years
Computer softwares	5–10 years

2.9 Impairment of investments in subsidiaries, associates, joint ventures and non-financial assets

Assets that have an indefinite useful life, for example goodwill, are not subject to amortisation and are tested annually for impairment. Assets that are subject to amortisation are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs to sell and value in use. For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash flows (cash-generating units). Non-financial assets other than goodwill that suffered an impairment are reviewed for possible reversal of the impairment at each reporting date.

Impairment testing of the investments in subsidiaries is required upon receiving dividends from these investments if the dividend exceeds the total comprehensive income of the subsidiary in the period the dividend is declared or if the carrying amount of the investment in the separate financial statements exceeds the carrying amount in the consolidated financial statements of the investee's net assets including goodwill.

2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES *(Continued)*

2.10 Financial assets

2.10.1 Classification

The Group classifies its financial assets in the following categories: at fair value through profit or loss, loans and receivables and available-for-sale. The classification depends on the purposes for which the financial assets were acquired. Management determines the classification of the financial assets at initial recognition.

(a) *Financial assets at fair value through profit or loss*

Financial assets at fair value through profit or loss are financial assets held for trading. A financial asset is classified in this category if acquired principally for the purpose of selling in the short-term. Derivatives are also categorised as held for trading unless they are designated as hedges. Assets in this category are classified as current assets if expected to be settled within 12 months; otherwise, they are classified as non-current assets.

(b) *Loans and receivables*

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. They are included in current assets, except for the amount that are settled or expected to be settled more than 12 months after the end of the reporting period. These are classified as non-current assets. The Group's loans and receivables comprise "Trade and other receivables" (note 2.14) and "Cash and cash equivalents" (note 2.15) in the consolidated statement of financial position.

(c) *Available-for-sale financial assets*

Available-for-sale financial assets are non-derivatives that are either designated in this category or not classified in any of the other categories. They are included in non-current assets unless the investment matures or management intends to dispose of it within 12 months of the end of each reporting period.

2.10.2 Recognition and measurement

Regular way purchases and sales of financial assets are recognised on the trade-date — the date on which the Group commits to purchase or sell the assets. Investments are initially recognised at fair value plus transaction costs for all financial assets not carried at fair value through profit or loss. Financial assets carried at fair value through profit or loss are initially recognised at fair value, and transaction costs are expensed in the consolidated income statement. Financial assets are derecognised when the rights to receive cash flows from the investments have expired or, the financial assets have been transferred and the Group has transferred substantially all risks and rewards of ownership. Available-for-sale financial assets and financial assets at fair value through profit or loss are subsequently carried at fair value. Loans and receivables are subsequently carried at amortised cost using the effective interest method.

Gains or losses arising from changes in the fair value of the "Financial assets at fair value through profit or loss" category are presented in the consolidated income statement within "Other losses, net".

Changes in the fair value of monetary and non-monetary securities classified as available-for-sale are recognised in other comprehensive income.

2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES *(Continued)*

2.11 Offsetting financial instruments

Financial assets and liabilities are offset and the net amount reported in the consolidated statement of financial position when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis or realise the asset and settle the liability simultaneously. The legally enforceable right must not be contingent on future events and must be enforceable in the normal course of business and in the event of default, insolvency or bankruptcy of the company or the counterparty.

2.12 Impairment of financial assets

The Group assesses at the end of each reporting period whether there is objective evidence that a financial asset or a group of financial assets is impaired. A financial asset or a group of financial assets is impaired and impairment losses are incurred only if there is objective evidence of impairment as a result of one or more events that occurred after the initial recognition of the asset (a "loss event") and that loss event (or events) has an impact on the estimated future cash flows of the financial asset or group of financial assets that can be reliably estimated.

Evidence of impairment may include indications that the debtors or a group of debtors is experiencing significant financial difficulty, default or delinquency in interest or principal payments, the probability that they will enter bankruptcy or other financial reorganisation, and where observable data indicate that there is a measurable decrease in the estimated future cash flows, such as changes in arrears or economic conditions that correlate with defaults.

(a) Assets carried at amortised cost

For loans and receivables category, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future credit losses that have not been incurred) discounted at the financial asset's original effective interest rate. The carrying amount of the asset is reduced and the amount of the loss is recognised in the consolidated income statement.

If, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognised (such as an improvement in the debtor's credit rating), the reversal of the previously recognised impairment loss is recognised in the consolidated income statement.

(b) Assets classified as available-for-sale

For debt securities, if any such evidence exists the cumulative loss — measured as the difference between the acquisition cost and the current fair value, less any impairment loss on that financial asset previously recognised in profit or loss — is removed from equity and recognised in profit or loss. If, in a subsequent period, the fair value of a debt instrument classified as available-for-sale increases and the increase can be objectively related to an event occurring after the impairment loss was recognised in profit or loss, the impairment loss is reversed through the consolidated income statement.

For equity investments, a significant or prolonged decline in the fair value of the security below its cost is also evidence that the assets are impaired. If any such evidence exists the cumulative loss — measured as the difference between the acquisition cost and the current fair value, less any impairment loss on that financial asset previously recognised in profit or loss — is removed from equity and recognised in profit or loss. Impairment losses recognised in the consolidated income statement on equity instruments are not reversed through the consolidated income statement.

2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES *(Continued)*

2.13 Inventories

Inventories are stated at the lower of cost and net realisable value. Cost is determined using the weighted average method. Net realisable value is the estimated selling price in the ordinary course of business, less applicable variable selling expenses.

2.14 Trade and other receivables

Trade and other receivables are amounts due from customers for merchandise sold or services performed in the ordinary course of business. If collection of trade and other receivables is expected in one year or less (or in the normal operating cycle of the business if longer), they are classified as current assets.

Trade and other receivables are recognised initially at fair value and subsequently measured at amortised cost using the effective interest method, less allowance for impairment.

2.15 Cash and cash equivalents

In the consolidated statement of cash flows, cash and cash equivalents include cash on hand, bank deposits, other short-term highly liquid investments with original maturities of three months or less.

2.16 Share capital

Ordinary shares are classified as equity. Incremental costs directly attributable to the issue of new shares or options are shown in equity as a deduction, net of tax, from the proceeds.

2.17 Trade payables

Trade payables are obligations to pay for goods or services that have been acquired in the ordinary course of business from suppliers. Trade payables are classified as current liabilities if payment is due within one year or less (or in the normal operating cycle of the business if longer). If not, they are presented as non-current liabilities.

Trade payables are recognised initially at fair value and subsequently measured at amortised cost using the effective interest method.

2.18 Borrowings

Borrowings are recognised initially at fair value, net of transaction costs incurred. Borrowings are subsequently stated at amortised cost; any difference between the proceeds (net of transaction costs) and the redemption value is recognised in the consolidated income statement over the period of the borrowings using the effective interest method.

Borrowings are classified as current liabilities unless the Group has an unconditional right to defer settlement of the liability for at least 12 months after the end of the reporting period.

2.19 Borrowing costs

General and specific borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use or sale, are added to the cost of those assets, until such time as the assets are substantially ready for their intended use or sale.

All other borrowing costs are recognised in profit or loss in the period in which they are incurred.

2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES *(Continued)*

2.20 Current and deferred income tax

The tax expense for the period comprises current and deferred tax. Tax is recognised in the consolidated income statement, except to the extent that it relates to items recognised in other comprehensive income or directly in equity. In this case, the tax is also recognised in other comprehensive income or directly in equity, respectively.

(a) Current income tax

The current income tax charge is calculated on the basis of the tax laws enacted or substantively enacted at the end of each reporting period in the countries where the Company, its subsidiaries, joint ventures and associates operate and generate taxable income. Management periodically evaluates positions taken in tax returns with respect to situations in which applicable tax regulation is subject to interpretation. It establishes provisions where appropriate on the basis of amounts expected to be paid to the tax authorities.

(b) Deferred income tax

Inside basis differences

Deferred income tax is recognised, using the liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the consolidated financial statements. However, deferred income tax liabilities are not recognised if they arise from the initial recognition of goodwill; deferred income tax is not accounted for if it arises from initial recognition of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting nor taxable profit or loss. Deferred income tax is determined using tax rates (and laws) that have been enacted or substantively enacted by the end of each reporting period and are expected to apply when the related deferred income tax asset is realised or the deferred income tax liability is settled.

Deferred income tax assets are recognised only to the extent that it is probable that future taxable profit will be available against which the temporary differences can be utilised.

Outside basis differences

Deferred income tax liabilities are provided on taxable temporary differences arising from investments in subsidiaries, associates and joint arrangements, except for deferred income tax liability where the timing of the reversal of the temporary difference is controlled by the Group and it is probable that the temporary difference will not reverse in the foreseeable future. Generally the Group is unable to control the reversal of the temporary difference for associates. Only where there is an agreement in place that gives the Group the ability to control the reversal of the temporary difference not recognised.

Deferred income tax assets are recognised on deductible temporary differences arising from investments in subsidiaries, associates and joint arrangements only to the extent that it is probable the temporary differences will reverse in the future and there is sufficient taxable profit available against which the temporary differences can be utilised.

(c) Offsetting

Deferred income tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets against current tax liabilities and when the deferred income tax assets and liabilities relate to income taxes levied by the same tax jurisdiction on either the same taxable entity or different taxable entities where there is an intention to settle the balances on a net basis.

2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES *(Continued)*

2.21 Employee benefits

(a) Pension obligations

Group companies operate various pension schemes. These schemes are generally funded through payments to insurance companies or trustee-administered funds, determined by periodic actuarial calculations. The Group has both defined contribution and defined benefit plans.

Defined contribution plans

A defined contribution plan is a pension plan under which the Group pays fixed contributions into a separate entity. The Group has no legal or constructive obligations to pay further contributions if the fund does not hold sufficient assets to pay all employees the benefits relating to employee services in the current and prior periods.

The Group pays contributions to publicly or privately administered pension insurance plans on a mandatory, contractual or voluntary basis. The Group has no further payment obligations once the contributions have been paid. The contributions are recognised as employee benefit expense when they are due. Prepaid contributions are recognised as an asset to the extent that a cash refund or a reduction in the future payments is available. The Group's defined contribution plans cover eligible employees in Hong Kong, North America, Mainland China, Malaysia and other Southeast Asian countries.

Defined benefit plans

A defined benefit plan is a pension plan that is not a defined contribution plan. Typically defined benefit plans define an amount of pension benefit that an employee will receive on retirement, usually dependent on one or more factors such as age, years of service and compensation.

The liability recognised in the consolidated statement of financial position in respect of defined benefit pension plans is the present value of the defined benefit obligation at the end of the reporting period less the fair value of plan assets. The defined benefit obligation is calculated annually by independent actuaries using the projected unit credit method. The present value of the defined benefit obligation is determined by discounting the estimated future cash outflows using interest rates of high-quality corporate bonds that are denominated in the currency in which the benefits will be paid, and that have terms to maturity approximating to the terms of the related pension obligation. In countries where there is no deep market in such bonds, the market rates on government bonds are used.

The current service cost of the defined benefit plan (recognised in the consolidated income statement in employee benefit expense), except where included in the cost of an asset, reflects the increase in the defined benefit obligation resulting from employee service in the current year, benefit changes, curtailments and settlements.

The net interest cost is calculated by applying the discount rate to the net balance of the defined benefit obligation and the fair value of plan assets. This cost is included in employee benefit expense in the consolidated income statement.

Remeasurements arising from defined benefit plans are recognised in other comprehensive income and reflected immediately in retained earnings. Remeasurements comprise actuarial gains and losses, and the return on plan assets (excluding amounts included in net interest on the net defined benefit liability/asset).

2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES *(Continued)*

2.21 Employee benefits *(Continued)*

(a) Pension obligations *(Continued)*

Defined benefit plans (Continued)

Actuarial gains and losses arising from experience adjustments and changes in actuarial assumptions are charged or credited to equity in other comprehensive income in the period in which they arise.

Past-service costs are recognised immediately in the consolidated income statement.

The Group's defined benefit plans cover eligible employees in Hong Kong and Malaysia.

- (i) The defined benefit plan for the Group's employees in Hong Kong is funded by means of an independent pension fund. The liability recognised in the consolidated statement of financial position in respect of the defined benefit plan is the present value of the defined benefit obligations at the end of each reporting period less the fair value of plan assets, together with adjustments for actuarial gains and losses and unrecognised past-service costs. Defined benefit obligations are calculated annually by independent actuaries using the projected unit credit method. The present value of the defined benefit obligations is determined by discounting the estimated future cash outflows by reference to market yields of Hong Kong Government's Exchange Fund Notes which are denominated in the currency in which the benefits will be paid, and that have terms to maturity approximating to the terms of the related pension liability.
- (ii) The defined benefit plan for the Group's employees in Malaysia is not funded. The Group's obligation under the plan, calculated using the projected unit credit method, is determined based on actuarial computations by independent actuaries, through which the amount of benefit that the employees have earned in return for their services in the current and prior years is estimated. The benefit is discounted based on the interest rates of high-quality corporate bonds in order to determine its present value.

(b) Profit sharing and bonus plans

The expected cost of profit sharing and bonus plans is recognised as a liability when the Group has a present legal or constructive obligation as a result of services rendered by the employees and a reliable estimate of the obligation can be made. Liabilities for profit sharing and bonus plans are expected to be settled within 12 months of the end of each reporting period and are measured at the amounts expected to be paid when they are settled.

(c) Employee leave entitlements

Employee entitlements to annual leave are recognised when they accrue to the employees. A provision is made for the estimated liability for annual leave as a result of services rendered by the employees up to the end of each reporting period.

Employee entitlements to sick leave and maternity leave are not recognised until the time of leave.

Notes to the Financial Statements

2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES *(Continued)*

2.21 Employee benefits *(Continued)*

(d) Long service payments

The Group's net obligation in respect of long service payments to its employees in Hong Kong upon cessation of their employment in certain circumstances under the Hong Kong Employment Ordinance is the amount of future benefits that the employees have earned in return for their services in the current and prior periods.

The obligation is calculated using the projected unit credit method, discounted to its present value and reduced by entitlements accrued under the Group's retirement schemes that are attributed to contributions made by the Group. The discount rate is the yield at the end of each reporting period of Hong Kong Government's Exchange Fund Notes which have terms to maturity approximating the terms of the related liability. The expected costs of these benefits are accrued over the period of employment using the same accounting methodology as used for defined benefit plans. Actuarial gains and losses arising from experience adjustments and changes in actuarial assumptions are recognised in full in other comprehensive income in the year in which they occur.

2.22 Share-based payments

Equity-settled share-based payment transactions

The Group operates a number of equity-settled, share-based compensation plans, under which the Group receives services from employees as consideration for equity instruments (options) of the Group. The fair value of the employee services received in exchange for the grant of the options is recognised as an expense. The total amount to be expensed is determined by reference to the fair value of the options granted:

- including any market performance conditions (for example, the Group's share price);
- excluding the impact of any service and non-market performance vesting conditions (for example, profitability, sales growth targets and remaining an employee of the Group over a specified time period); and
- including the impact of any non-vesting conditions (for example, the requirement for employees to save).

Non-market performance and service conditions are included in assumptions about the number of options that are expected to vest. The total expense is recognised over the vesting period, which is the period over which all of the specified vesting conditions are to be satisfied.

In addition, in some circumstances employees may provide services in advance of the grant date and therefore the grant date fair value is estimated for the purposes of recognising the expense during the period between service commencement period and grant date.

At the end of each reporting period, the Group revises its estimates of the number of options that are expected to vest based on the non-market performance and service conditions. It recognises the impact of the revision to original estimates, if any, in the consolidated income statement, with a corresponding adjustment to equity.

When the options are exercised, the Group issues new shares. The proceeds received net of any directly attributable transaction costs are credited to share capital (nominal value) and share premium.

2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES *(Continued)*

2.23 Provisions

Provisions are recognised when the Group has a present legal or constructive obligation as a result of past events; it is probable that an outflow of resources will be required to settle the obligation; and the amount has been reliably estimated. Provisions are not recognised for future operating losses.

Where there are a number of similar obligations, the likelihood that an outflow will be required in settlement is determined by considering the class of obligations as a whole. A provision is recognised even if the likelihood of an outflow with respect to any one item included in the same class of obligations may be small.

Provisions are measured at the present value of the expenditures expected to be required to settle the obligation using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the obligation. The increase in the provision due to passage of time is recognised as interest expense.

2.24 Financial guarantees contracts

Financial guarantee contracts are contracts that require the issuer to make specified payments to reimburse the holder for a loss it incurs because a specified debtor fails to make payments when due, in accordance with the terms of a debt instrument. Such financial guarantees are given to banks, financial institutions and other bodies on behalf of subsidiaries or associates to secure loans, overdrafts and other banking facilities.

The Group does not recognise liabilities for financial guarantees at inception, but performs a liability adequacy test at each reporting date by comparing the carrying amount of the net liability regarding the financial guarantee with its present legal or constructive obligation amount. If the carrying amount of the net liability is less than its present legal or constructive obligation amount, the entire difference is recognised in the consolidated income statement immediately as an expense.

2.25 Revenue recognition

Revenue comprises the fair value of the consideration received or receivable for the sale of goods and services in the ordinary course of the Group's activities. Revenue is shown net of value-added tax, business tax, returns, rebates and discounts and after eliminating sales within the Group.

The Group recognises revenue when the amount of revenue can be reliably measured, it is probable that future economic benefits will flow to the entity and specific criteria have been met for each of the Group's activities as described below. The Group bases its estimates on historical results, taking into consideration the type of customer, the type of transaction and the specifics of each arrangement.

Advertising income, net of trade discounts, is recognised when the newspapers and magazines are published.

Revenue from the circulation and subscription sales of newspapers, magazines and books, net of trade discounts and returns, is recognised on the transfer of risks and rewards of ownership, which generally coincides with the date of delivery. Unearned subscription fees received from subscribers are recorded as receipts in advance under trade and other payables in the consolidated statement of financial position.

Revenue from tour operations is based on the percentage of the tour that has been completed, where revenue from the provision of other travel related services is recognised when the services have been rendered.

2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES *(Continued)*

2.25 Revenue recognition *(Continued)*

Revenue from scrap sales of old newspapers and magazines is recognised on the date of delivery.

Licence fees and royalty income are recognised on an accrual basis in accordance with the substance of the relevant agreements.

Interest income is recognised using the effective interest method. When a receivable is impaired, the Group reduces the carrying amount to its recoverable amount, being the estimated future cash flows discounted at the original effective interest rate of the instrument, and continues unwinding the discount as interest income.

Management fee income is recognised on an accrual basis.

Operating lease rental income is recognised in equal instalments over the periods covered by the lease term.

Dividend income is recognised when the right to receive payment is established.

2.26 Leases

Leases in which a significant portion of the risks and rewards of ownership are retained by the lessor are classified as operating leases. Payments made under operating leases (net of any incentives received from the lessor) are charged to the consolidated income statement on a straight-line basis over the period of the lease.

The Group leases certain property, plant and equipment. Leases of property, plant and equipment where the Group has substantially all the risks and rewards of ownership are classified as finance leases. Finance leases are capitalised at the commencement of leases at the lower of the fair value of the leased property and the present value of the minimum lease payments.

Each lease payment is allocated between the liability and finance charges. The corresponding rental obligations, net of finance charges, are included in current and non-current liabilities. The interest element of the finance cost is charged to the consolidated income statement over the lease period so as to produce a constant periodic rate of interest on the remaining balance of the liability for each period. The property, plant and equipment acquired under a finance lease is depreciated over the shorter of the useful life of the asset and the lease term.

2.27 Dividend distribution

Dividend distributions to owners of the Company are recognised as a liability in the Group's and the Company's financial statements in the period in which the dividends are declared by the directors in the case of interim and special dividends or approved by the Company's shareholders in the case of final dividends.

3 FINANCIAL RISK MANAGEMENT

3.1 Financial risk factors

The Group's activities expose it to a variety of financial risks: market risk (including price risk, interest rate risk and foreign exchange risk), credit risk and liquidity risk. The Group's overall risk management programme focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the Group's financial performance.

Risk management is carried out by management according to the policies of the Group. The Group's management identifies and evaluates financial risks in close co-operation with the Group's operating units.

(a) Market risk

(i) Price risk

The Group is exposed to price risk for its listed equity securities which are classified on the consolidated statement of financial position as financial assets at fair value through profit or loss. Management adopts the quoted market prices as its best estimate of the fair values of such securities. Details are set out in note 20. Management monitors the market conditions and securities price fluctuations so as to minimise adverse effects on the Group.

(ii) Interest rate risk

The Group's cash balances are placed with authorised financial institutions, which generate interest income for the Group. They are exposed to the cash flow interest rate risk. The Group manages this risk by placing deposits at various maturities and interest rate terms.

The Group's bank borrowings are exposed to risk arising from changing interest rates. Bank borrowings at variable rates expose the Group to cash flow interest rate risk. The Group manages these risks by maintaining an appropriate level at variable rates for its bank borrowings.

To evaluate the sensitivity of the Group's profit before income tax to possible changes in interest rates, the impact of an interest rate change was modeled on the floating rate of bank borrowings while all other variables were held constant. Based on these assumptions, a hypothetical increase of 1% per annum in interest rates would have reduced the Group's profit before income tax for the years ended 31 March 2016 and 2015 by approximately US\$8,000 and US\$96,000 respectively.

(iii) Foreign exchange risk

The Group operates internationally and is exposed to foreign exchange risk arising from various currency exposures, primarily with respect to RM, Renminbi ("RMB"), Canadian dollars, Hong Kong dollars ("HK\$") and US\$. Foreign exchange risk arises from future commercial transactions, recognised assets and liabilities and net investments in foreign operations.

The assets and liabilities of each entity within the Group are mostly denominated in its own functional currency and do not have material currency impact on the consolidated income statement for the year.

3 FINANCIAL RISK MANAGEMENT *(Continued)*

3.1 Financial risk factors *(Continued)*

(b) Credit risk

Credit risk is the risk of a loss resulting from the failure of one of the Group's counterparties to discharge its contractual obligations. The Group manages and controls credit risk by setting limits on the amount of risk it is willing to accept for individual counterparties and by monitoring exposures in relation to such limits.

The extent of credit risk relating to the Group's trade receivables (according to the extent to which allowance for impairment are warranted) is disclosed in note 24. The Group maintains cash and cash equivalents with reputable financial institutions from which management believes the risk of loss to be remote. The management assesses the credit quality of outstanding cash and cash equivalents balances as high and considers there is no individually significant exposure. Maximum exposure to credit risk at the reporting date is the carrying amount of the cash at banks.

(c) Liquidity risk

The liquidity risk of the Group is controlled by maintaining sufficient banking facilities and cash and cash equivalents, which are generated from the operating cash flows.

The table below analyses the Group's financial liabilities into relevant maturity groupings based on the remaining period at the end of each reporting period to the contractual maturity date. The amounts disclosed in the table are the contractual undiscounted cash flows.

	2016 US\$'000	2015 US\$'000

3 FINANCIAL RISK MANAGEMENT *(Continued)*

3.2 Capital risk management

The Group's objectives when managing capital are to safeguard the Group's ability to continue as a going concern in order to provide returns for shareholders and benefits for other stakeholders and to maintain an optimal capital structure to reduce the cost of capital.

In order to maintain or adjust the capital structure, the Group may adjust the amount of dividends paid to shareholders, return capital to shareholders, repurchase shares, issue new shares or sell assets to reduce debt.

The Group monitors capital on the basis of the net gearing ratio. This ratio is calculated as net debt over owners' equity. Net debt is calculated as total borrowings less cash and cash equivalents. Owners' equity represents equity attributable to owners of the Company as shown in the consolidated statement of financial position.

During the year ended 31 March 2016, the Group's strategy was to maintain a net gearing ratio below 40% (2015: below 40%).

As at 31 March 2016, the Group's net gearing ratio was nil (2015: 5.9%).

3.3 Fair value estimation

For financial instruments that are measured at fair value, the Group classifies fair value measurements using a fair value hierarchy that prioritises the inputs to valuation techniques used to measure fair value. The fair value hierarchy has the following levels:

- Level 1 – Quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2 – Inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices).
- Level 3 – Inputs for the asset or liability that are not based on observable market data (that is, unobservable inputs).

The following table presents the Group's assets that are measured at fair value at 31 March 2016:

	Level 1 US\$'000	Level 2 US\$'000	Level 3 US\$'000	Total US\$'000
Financial assets at fair value through profit or loss				
Listed equity securities	340	–	–	340
Available-for-sale financial assets				
Unlisted club debentures	–	–	97	97
	340	–	97	437

Notes to the Financial Statements

For the year ended 31 March 2016

3 FINANCIAL RISK MANAGEMENT *(Continued)*

3.3 Fair value estimation *(Continued)*

The following table presents the Group's assets that are measured at fair value at 31 March 2015:

	Level 1 US\$'000	Level 2 US\$'000	Level 3 US\$'000	Total US\$'000
Financial assets at fair value through profit or loss				
Listed equity securities	294	–	–	294
Available-for-sale financial assets				
Unlisted club debentures	–	–	97	97
	294	–	97	391

The fair value of financial instruments traded in active markets is based on quoted market prices at the end of each reporting period. A market is regarded as active if quoted prices are readily and regularly available from an exchange, dealer, broker, industry group, pricing service or regulatory agency, and those prices represent actual and regularly occurring market transactions on an arm's length basis. The quoted market price used for financial assets held by the Group is the current bid price. These instruments are included in level 1.

The fair value of financial instruments that are not traded in an active market is determined by using valuation techniques.

These valuation techniques maximise the use of observable market data where it is available and rely as little as possible on the entity-specific estimates. If all significant inputs required to determine the fair value of an instrument are observable, the instrument is included in level 2.

If one or more of the significant inputs is not based on observable market data, the instrument is included in level 3.

There was no transfer between level 1 and level 2 of the fair value hierarchy during the year. There was no change during the year attributable to level 3 of the fair value hierarchy.

4 CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS

The Group makes estimates and judgements concerning the future based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. The resulting accounting estimates will, by definition, seldom equal the related actual results. The key assumptions concerning the future, and other key sources of estimation uncertainty at the end of each reporting period, that have a significant risk of causing material adjustment to the carrying amounts of assets and liabilities within the next financial year, are discussed below.

(a) Impairment of goodwill

The Group tests annually whether goodwill has suffered any impairment in accordance with the accounting policy stated in note 2.8(a). The recoverable amounts of cash-generating units have been determined based on value-in-use calculations. These calculations require the use of estimates. Changing the assumptions selected by the Group to determine the level, if any, of impairment, including the discount rate or the growth rate assumptions, could significantly affect the Group's reported financial condition and results of operations. The assumptions used are set out in note 17.

Notes to the Financial Statements

For the year ended 31 March 2016

4 CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS *(Continued)*

(b) **Income taxes**

The Group is subject to income taxes in numerous jurisdictions. Significant judgement is required in determining the worldwide provision for income taxes. There are many transactions and calculations for which the ultimate tax determination is uncertain during the ordinary course of business. The Group recognises liabilities for anticipated tax audit issues based on estimates of whether additional taxes will be due. Where the final tax outcome of these matters is different from the amounts that were initially recorded, such differences will impact the current and deferred tax assets and liabilities in the period in which such determination is made.

(c) **Deferred income tax assets**

Management has considered future taxable income and on-going prudent and feasible tax planning strategies in assessing the recognition criteria for deferred income tax assets recorded in relation to cumulative tax loss carried-forwards. The assumptions regarding future profitability of various subsidiaries and agreed tax losses with the tax authorities require significant judgement, and significant changes in these assumptions from period to period may have a material impact on the Group's reported financial condition and results of operations.

(d) **Fair value of investment properties**

Investment properties are stated at fair values which have been determined by accredited independent valuers. Details of the judgements and assumptions are disclosed in note 16.

(e) **Allowance for impairment loss of interests in joint ventures and associates**

The Group assesses at the end of each reporting period whether there is any indication that the interests in joint ventures and associates are impaired. Any allowance for impairment of these investments is based on an assessment of the recoverability of these balances. The identification of impairment of these balances requires the use of judgement and estimates. Where the expectation is different from the original estimate, such difference will impact the carrying amount of investments and receivables and allowance for impairment losses in the year in which such estimate has been changed.

(f) **Useful lives of property, plant and equipment**

The Group's management determines the estimated useful lives and related depreciation for its property, plant and equipment. These estimates are based on the historical experience of the actual useful lives of the property, plant and equipment of similar nature and functions. Management will revise the depreciation charge where useful lives are different from those previously estimated. It will also write off or write down non-strategic assets that have been abandoned or sold.

5 TURNOVER AND SEGMENT INFORMATION

The Group has determined the operating segments based on the reports that are reviewed and used by the Group Executive Committee for making strategic decisions.

The Group is organised operationally on a worldwide basis in four major operating segments:

Publishing and printing: Malaysia and other Southeast Asian countries

Publishing and printing: Hong Kong, Taiwan and Mainland China

Publishing and printing: North America

Travel and travel related services

Valuation processes and techniques

Independent valuations were performed by Raine & Horne International Zaki + Partners Sdn Bhd and Betsy Mak Appraisal Group to determine the fair values of the Group's investment properties as at 31 March 2016 and 2015. The revaluation gains or losses were included in 'Other losses, net' in the consolidated income statement (note 7).

For the properties in the Malaysia, fair values of investment properties have been generally determined using the sales comparison approach. Sales prices of comparable properties in close proximity are adjusted for differences in key attributes such as property size. The most significant input into this valuation approach is price per square foot.

For the property in the USA, the valuation was determined using income capitalisation approach and sales comparison approach based on significant unobservable inputs. These inputs included:

Future rental cash inflows	—	Based on the actual location, type and quality of the properties and supported by the terms of any existing lease, other contracts and external evidence such as current market rents for similar properties;
Estimated vacancy rates	—	Based on current and expected future market conditions after expiry of any current lease;
Maintenance costs	—	Including necessary investments to maintain functionality of the property for its expected useful life;
Capitalisation rates	—	Based on actual location, size and quality of the properties and taking into account market data at the valuation date.

Information about fair value measurements using significant unobservable inputs (Level 3):

Description	Fair value at 31 March 2016 US\$'000	Valuation techniques	Unobservable inputs	Range of unobservable inputs	Relationship of unobservable inputs to fair value
Commercial building — USA	3,370	Income capitalisation approach and sales comparison approach	Rental value	US\$226,092 per annum	The higher the rental value, the higher the fair value
			Capitalisation rate	4.75%	The higher the capitalisation rate, the lower the fair value
			Vacancy rate	2%–4%	The higher the vacancy rate, the lower the fair value
			Estimated expenses	US\$23.39 per square foot	The higher the estimated expenses, the lower the fair value

There are inter-relationships between unobservable inputs. Estimated vacancy rates may impact the yield, with higher vacancy rates resulting in lower yields. An increase in future rental income may be linked with higher expenses. If the remaining lease term increases, the yield may decrease.

17 INTANGIBLE ASSETS *(Continued)*

Notes:

- (a) Amortisation expense of US\$1,092,000 (2015: US\$1,126,000) is included in "Other operating expenses" in the consolidated income statement.
- (b) Goodwill acquired through business combinations is allocated to cash-generating units ("CGUs") for impairment testing. The allocation is made to those CGUs that are expected to benefit from the business combination.

The carrying amounts of goodwill are allocated to the following CGUs:

	2016 US\$'000	2015 US\$'000
Guang-Ming Ribao Sdn Bhd <i>(note (i))</i>	–	2,150
Mulu Press Sdn Bhd	466	490
Sinchew-i Sdn Bhd	36	38
Sin Chew Media Corporation Berhad <i>(note (iii))</i>	40,039	42,186
	40,541	44,864

The recoverable amount of each CGU has been determined based on a value-in-use calculation using cash flow projections approved by management covering a five-year period. Cash flows beyond the five-year period are extrapolated without any growth rate. Management determined budgeted gross margin based on past performance and its expectations for market development. The growth rates used are consistent with the forecasts included in industry reports. The discount rates used are pre-tax and reflect specific risks relating to the relevant CGUs.

Key assumptions used for the value-in-use calculations:

	Average growth rate in revenue 2016	Pre-tax discount rate 2016
Goodwill of Guang-Ming Ribao Sdn Bhd	1%	11%
Goodwill of Sin Chew Media Corporation Berhad	1%	11%

The value-in-use calculations for all the CGUs are sensitive to these key assumptions, which included discount rates and revenue growth during the five-year period.

With regard to the assessment of the value-in-use, management believes that no reasonably possible change in any of the above key assumptions would cause the carrying amount of the CGUs to materially exceed their respective recoverable amount, except as mentioned in note (i) below.

- (i) During the years ended 31 March 2011, 31 March 2015 and 31 March 2016, impairment of US\$4,132,000, US\$5,315,000 and US\$1,957,000, respectively, in the goodwill of Guang-Ming Ribao Sdn Bhd was recognised as the annual assessment performed indicated that the carrying amount of the goodwill exceeded its recoverable amount. This was primarily attributable to the challenging business conditions faced by this subsidiary. The impairment charges were included in the consolidated income statement under "Other losses, net" for the years ended 31 March 2015 and 31 March 2016.

Notes: (Continued)

(b) (Continued)

- (ii) 506,667,259 ordinary shares of HK\$0.1 each were deemed to have been issued on 31 March 2008 for the acquisition of the remaining equity interest in Sin Chew from its non-controlling shareholders. The purchase resulted in the Company recording a goodwill of US\$49,018,000 as at 31 March 2008. At 31 March 2016, the goodwill amounted to US\$40,039,000 (2015: US\$42,186,000) after a currency translation adjustment of US\$2,147,000 during the year.

Management has assessed that, amongst all assumptions used in the value-in-use calculations, the most sensitive key assumption is the discount rate which was arrived at based on weighted average cost of capital. The discount rate applied in determining the recoverable amount of the CGU was 11% (2015: 11%). An increase in the discount rate of 1% (2015: 1%) would result in approximately US\$10,787,000 (2015: US\$9,247,000) decrease in the recoverable amount of Sin Chew. There is still sufficient headroom after considering the reasonably possible change in the recoverable amount as mentioned above.

The above share options were conditionally granted on 27 September 2005 and the exercisable period is from 18 October 2005 to 25 September 2015.

The fair value of the options granted under the Pre-IPO Scheme was determined using the Binomial Option valuation model and amounted to US\$821,000. The significant inputs into the model were share price of HK\$1.200 (equivalent to US\$0.155) (being the IPO and placing share price of One Media), volatility of the underlying stock of 48% (being the volatility of the stock returns of listed companies in the media industry in Hong Kong), risk-free interest rate of 4.16% (being the yield of 10-year fund note issued by the Hong Kong Monetary Authority as at 23 September 2005) and suboptimal exercise factor of 1.4 (being the factor to account for the early exercise behavior of the share option).

Share compensation costs on share options granted are amortised over the vesting periods of 1 year or 5 years in accordance with terms specified in the Pre-IPO Scheme. For the year ended 31 March 2016, no share compensation cost (2015: Nil) was recognised in the consolidated income statement.

32 DEFINED BENEFIT PLAN LIABILITIES

The Group operates a number of staff retirement schemes which include a hybrid retirement benefit scheme (the "Scheme") for its employees in Hong Kong.

(a) The Scheme has three categories of members: Regular Member, Special Member and Defined Benefit ("DB") Member

Regular Member	–	defined contribution type of benefits based on accumulated employer's contributions and investment gains and losses thereon.
Special Member	–	benefits based on salary and service or accumulated employer's contributions with credited investment gains and losses, whichever is higher.
DB Member	–	benefits based on final salary and service only.

Regular Members and Special Members are required to contribute monthly at 5% of their basic monthly salaries to the Scheme. The accumulated members' contributions with investment gains and losses will be paid to the members upon their leaving the employment in addition to the benefits described above.

Expected Group's contributions to the Scheme for the year ending 31 March 2017 are US\$60,000.

(b) Defined benefit scheme for Special Member and DB Member

Pension costs are assessed using the projected unit credit method. The pension costs are charged to the consolidated income statement so as to spread the regular costs over the service lives of employees. A full valuation of the defined benefit scheme based on the projected unit credit method has been carried out by Towers Watson Hong Kong Limited, an independent qualified actuary, and the pension costs are charged to the consolidated income statement in accordance with its advice.

- (i) Beijing Times Resource Technology Consulting Limited ("TRT") is a domestic enterprise in the PRC owned legally by a PRC national. The Group has entered into contractual arrangements with the legal owner of TRT so that the decision-making rights, operating and financing activities of TRT are ultimately controlled by the Group. The Group is also entitled to substantially all of the operating profits and residual benefits generated by TRT. In particular, the legal owner of TRT is required under the contractual arrangements to transfer the interests in TRT to the Group or the Group's designee upon the Group's request at a pre-agreed nominal consideration. In addition, the Group can receive the cash flows derived from the operations of TRT through the levying of service and consultancy fees. The ownership interests in TRT have also been pledged by the legal owner of TRT to the Group. Based on the above, the directors regard TRT as a subsidiary of the Company.

To give details of other subsidiaries would, in the opinion of the directors, result in particulars of excessive length.

2. A member of the Company who is an authorised nominee as defined under the Malaysian Securities Industry (Central Depositories) Act 1991 may appoint at least one (1) proxy (but not more than two proxies) in respect of each securities account it holds with ordinary shares of the Company standing to the credit of the said securities account. Notice of the 26th Annual General Meeting

5. Explanatory notes on special business:

- (a) For the proposed Ordinary Resolution No. 9, in line with the Malaysian Code on Corporate Governance 2012, the Nomination Committee and the Board had assessed the independence of Mr. David YU Hon To, who has served as an independent director for a cumulative term of more than nine years, and recommended him to continue to act as an INED of the Company, based on the following justifications:
- (i) he has fulfilled all the requirements regarding independence of an INED and has provided annual confirmation of independence to the Company pursuant to Rule 3.13 of the HK Listing Rules and Paragraph 1.01 of the Listing Requirements of Bursa Securities. There is no evidence that his tenure has had any impact on his independence;
 - (ii) he has professional expertise in audit and finance sector, and detailed knowledge in corporate governance and regulatory matters. He has proven commitment and experience to provide an element of objectivity, independent judgement and balance to the Board for informed and balance decision-makings; and
 - (iii) he has exercised due care during his tenure as INED and has discharged his duties with reasonable skill and competence, bringing independent judgement and depth into the Board's decision-making in the interest of the Company and its shareholders.
- (b) The proposed Ordinary Resolution No. 10, if passed, will empower the Company and/or its subsidiaries to enter into recurrent related party transactions of a revenue or trading nature with related parties in the ordinary course of business based on normal commercial terms which are not more favourable to the related parties than those generally available to the public which are necessary for the day-to-day operations of the Company and its subsidiaries. Please refer to the circular to shareholders dated 14 July 2016 for more information.
- (c) The detailed information on Ordinary Resolution No. 11 on the proposed renewal of share buy-back mandate is set out in the circular to shareholders dated 14 July 2016 accompanying this Annual Report.
- (d) The Company has not issued any new shares under the general mandate for issuance and allotment of shares up to 10% of the issued and paid-up capital of the Company, which was approved at the 25th AGM held on 6 August 2015 and which will lapse at the conclusion of the 26th AGM to be held on 12 August 2016. A renewal of this mandate is sought at the 26th AGM under proposed Ordinary Resolution No. 12.

The proposed Ordinary Resolution No. 12, if passed, will authorise the Directors to issue and allot shares up to 10% of the issued and paid-up capital of the Company for the time being for such purposes as the Directors would consider to be in the interest of the Company. This is to avoid any delay and cost involved in convening a general meeting to approve such an issue of shares. This authority, unless revoked or varied by an ordinary resolution of the shareholders of the Company in general meeting, will expire at the conclusion of the next AGM of the Company.

The general mandate, if passed, will provide flexibility to the Directors of the Company to allot and issue shares for any possible fund raising activities, including but not limited to placement of shares, for the purpose of funding future investment, working capital and/or acquisition.
