Management Discussion and Analysis

I. ECONOMIC AND MARKET ENVIRONMENT DURING THE REPORTING PERIOD

During the Reporting Period, China's macro-economy was running smoothly. In the first half of 2016, China's GDP grew by 6.7% year on year, 0.3 percentage points lower than that of the same period of 2015. Against the slowdown in fixed asset investment growth and pull-back in exports, domestic consumption continued to enjoy relatively rapid growth and became the key to maintaining stable macro-economic development in the first half of the year. During the Reporting Period, under the pressure from depreciating Reminbi and shrinking foreign exchange reserves, market liquidity basically remained stable. In the first half of 2016, newly-added social financing totaled RMB9.75 trillion, with broad money and narrow money grew by 11.8% and 24.6% year on year respectively.

China's stock market dropped sharply at the beginning of 2016 and then entered into a consolidation period. During the Reporting Period, the Shanghai Composite Index and Shenzhen Component Index fell by 17.22% and 17.17%, respectively. The total turnover of stock and funds on the Shanghai and Shenzhen stock markets for the first half of 2016 slumped by 52.89% from the same period of 2015 to RMB69,240.228 billion, of which the turnover of stocks and funds on Shanghai Stock Exchange decreased by 65.72% to RMB28,135.9 billion while the turnover of stocks and funds on Shenzhen Stock Exchange decreased by 36.68% to RMB41,104.328 billion as compared with the same period of 2015.

II. ANALYSIS OF PRINCIPAL BUSINESS

During the Reporting Period, China's stock market was in the doldrums with falling stock prices and trading volumes. As a result, the Group's revenue from brokerage, wealth management, proprietary trading and asset management business decreased drastically. During the Reporting Period, the Group recorded revenue and other income of RMB1,661.84 million and a net profit of RMB228.14 million, representing a decrease of 43.35% and 80.70% as compared with the same period of 2015, respectively.

(I) Brokerage and Wealth Management Business

During the Reporting Period, the revenue and other income from brokerage and wealth management business amounted to RMB904.60 million, representing a decrease of 48.50% as compared with the same period of 2015.

1. Securities brokerage

During the Reporting Period, facing the sluggish stock market in China, the Company promoted business development through multiple channels such as online business expansion, increase of offline branches and devoting more efforts in development of institutional clients. At the end of the Reporting Period, the number of clients reached 1,920,100, representing an increase of 225,200 clients or 13.29% as compared with the end of 2015; the total assets under custody for clients reached RMB124,432 million, representing a decrease of 3.59% as compared with the end of 2015; the turnover of stocks and funds reached RMB732,198 million, representing a decrease of 37.41% as compared to the same period of 2015.

Management Discussion and Analysis

2. Futures brokerage

During the Reporting Period, Hengtai Futures grasped opportunities to conduct innovative business and promote business development. To this end, it sought breakthroughs with IB business, advanced internet business, and strengthened development of financial institution and industry clients. Furthermore, it deepened management of IB service areas and intensified cooperation with Internet financial platform. During the Reporting Period, the number of newly-added clients of Hengtai Futures reached 1,954.

3. Wealth management

During the Reporting Period, the Company further optimized the sale of financial products based on the overall performance of the securities market and macro-economy as well as its own business development requirements, so as to constantly improve its wealth management level and asset allocation capability from the perspective of investors. Meanwhile, the Company strengthened risk control, enhanced risk awareness and improved compliance-based operation. During the Reporting Period, the Company sold 42 financial products and recorded a sales amount of RMB3,430 million, representing a decrease of 28.75% as compared to the same period of 2015.

4. Capital-based intermediary business

During the Reporting Period, as impacted by the factors such as declining stock markets, both margin financing and securities lending was decreased continually on the market. Facing the declining trend of its business, the Company actively sought breakthroughs while strengthening control of business risks. As at the end of the Reporting Period, the number of accounts opened for small-amount stock-pledged repo amounted to 26,400 and the size of margin financing and securities lending of the Company reached RMB4,684 million, representing a decrease of 25.08% as compared with the end of 2015.

Management Discussion and Analysis

(II) Investment Banking Business

During the Reporting Period, the revenue and other income from investment banking business amounted to RMB255.98 million, representing an increase of 114.28% as compared to the same period of 2015.

During the Reporting Period, Hengtai Changcai proactively innovated in investment banking business. While steadily developing traditional advantageous businesses including IPO, refinancing and enterprise bonds, it vigorously developed innovative projects such as corporate bonds, asset securitization, merger and reorganization. All these businesses achieved significant growth.

1. Equity financing

During the Reporting Period, Hengtai Changcai completed two projects, a merger and reorganization project and an IPO project, with the total financing amount of RMB3,722.40 million, representing an increase of 538% as compared with the same period of 2015.

2. Debt financing

During the Reporting Period, Hengtai Changcai, acting as the lead underwriter, completed 15 projects in total, including 11 enterprise bonds projects and 4 corporate bonds projects, with the total financing amount of RMB13,290 million, representing an increase of 285% as compared with the same period of 2015.

3. Business of listing on the NEEQ

During the Reporting Period, relevant policies, regulations and business rules were promulgated successively, which greatly improved the standardization of the business and also intensified competition in the industry. The Company maintained admirable business growth in face of the intensifying competition by proactively adjusting strategies, enhancing system construction and exploring market. During the Reporting Period, it completed 17 listing projects and had 24 project applications under review by regulatory authorities, representing an increase of 1,600% and 1,100% as compared with the same period of 2015, respectively.

Management Discussion and Analysis

(III) Investment Management Business

During the Reporting Period, the revenue and other income from investment management business amounted to RMB389.12 million, representing an increase of 10.63% as compared to the corresponding period of 2015.

1. Assets management

During the Reporting Period, the downward pressure on domestic economy increased and financial regulations became tighter. With the introduction of a number of policies aiming at risk control, crack down on illegal margin financing as well as deleveraging became the main trend in the PRC securities market in the first half of 2016, resulting in a significant decrease in the securities market indices. Among the asset management business of the Company, those segments mainly engaged in investing in various equity-based products were negatively impacted and suffered significant decrease in income.

As at the end of the Reporting Period, the total size of asset management business was RMB38,954 million, of which the size of collective scheme amounted to RMB2,507 million; the size of targeted scheme amounted to RMB10,394 million; the size of asset securitization amounted to RMB25,223 million; and the size of asset management scheme of Hengtai Futures and Shanghai Yingwo Investment Management Co., Ltd amounted to RMB830 million.

During the Reporting Period, 12 collective schemes and 8 targeted schemes terminated upon expiry, resulting in a substantial decrease in the total management size. As at the end of the Reporting Period, there were still 11 collective schemes and 26 targeted schemes.

During the Reporting Period, the Company was engaged in 4 new issue projects of enterprise assets securitization with the total issue size of RMB2,381 million as the manager/promoter.

2. Fund management

During the Reporting Period, New China Fund continued to maintain its core advantages in respect of investment research and strengthen the construction of an investment research team to promote stable investment results while keeping channel expansion and maintenance as well as promotion of product sales.

During the Reporting Period, New China Fund had 36 publicly-raised funds with total management size amounting to RMB30,580 million, representing a decrease of RMB3,780 million or 11% as compared to the end of 2015. The size of asset management with special accounts reached RMB8,600 million, representing a decrease of RMB1,200 million or 12% as compared to the end of 2015. During the Reporting Period, the decrease in the net value and size of assets of New China Fund was mainly due to the plunge in the A share market in the PRC.

Management Discussion and Analysis

3. Private equity investment business

During the Reporting Period, Hengtai Capital continued to increase its size of direct investment business, proactively promoted the development of equity investment business and consolidated post-investment management of projects invested and investment management of direct investment funds.

During the Reporting Period, Hengtai Capital utilized its own funds to invest in 16 direct investment projects with the total investment size of RMB961 million and managed 3 direct investment funds with the total size of RMB263 million.

4. Alternative investment

During the Reporting Period, HengTai Pioneer kept on promoting business transformation. Its investment fields were changed from real estate and cultural artworks into internet finance and sports, while its business model was changed from direct investment and financing into the platform-based management of the investment of the Company's subsidiaries.

(IV) Proprietary Trading Business

During the Reporting Period, the revenue and other income from the proprietary trading business amounted to RMB78.34 million, representing a decrease of 88.50% as compared to the corresponding period of 2015.

During the Reporting Period, in terms of stock investment business, the Company adhered to the principle of prudent investment. It took measures such as reducing overall positions according to the market changes to control the overall business risks. However, the trial implementation of circuit breaker mechanism at the beginning of 2016 gave rise to the plummet in the A share market in the PRC, bringing adverse impact on the Company's stock investment business. In terms of share transfer market-making business, market-making indices accumulatively dropped by 20.40% during the Reporting Period due to the sluggish performance of NEEQ market, which, together with the poor liquidity of NEEQ market, resulted in adverse influence on share transfer market-making business of the Company. In terms of fixed income business, the Company seized opportunities to enhance portfolio income, strictly control credit risk and reduce financing costs, thus achieving admirable investment gains.

(V) International Business

During the Reporting Period, the Company took the initiative to conduct related research and exploration of its international business while making contacts with overseas institutions to understand and match clients' overseas investment demands, and extensively acquire various overseas investment project resources, which laid a sound foundation for future development of international business.

Management Discussion and Analysis

III. PROSPECTS AND FUTURE PLANS

(I) Development prospect of the industry

In the first half of 2016, with ongoing reforms in the capital market and the further optimised regulatory regimes for operation of the capital market, the capital market has enhanced its capability in serving the real economy. Thanks to the implementation of the hierarchical NEEQ system, significant progress has been made in the construction of the multi-tiered capital market system in China.

In respect of the regulation of the industry, CSRC officially promulgated the revised Management Measures for the Risk Control Indexes of Securities Companies and its supporting rules on June 16, 2016, which will be officially put into effect on October 1, 2016. According to the revised Management Measures for the Risk Control Indexes of Securities Companies, a reasonable and effective risk control indexes system will be constructed by virtue of four core indexes, namely, risk coverage ratio, capital leverage ratio, liquidity coverage ratio and net stable funding ratio. Meanwhile, overall risk management requirements for securities companies were intensified in the management measures. Under the new regulatory environment, securities companies with stronger risk control capability will be provided with ampler room for development.

In respect of operation of the industry, it is expected that in the second half of 2016, the securities market is very likely to maintain fluctuation within certain range, and the brokerage business and margin financing and securities lending business may remain under pressure due to the low turnover of the securities market. Investment banking business is expected to maintain its steady growth momentum and thus contribute more to the performance of securities companies. Investment management business will witness an obvious differentiation in the industry, while the securities companies with active management capacity are expected to maintain steady growth. As uncertainties exist with respect to the proprietary business amid the fluctuating market, the securities companies in the industry may differ significantly from each other in terms of investment performance.

(II) Development plan of the Company

The Company will continue to enhance risk control and compliance management as it always does so as to create a favorable environment for the business development of the Company.

The Company will accelerate the business transformation of its brokerage business, pay close attention to the input and output efficiency of business development and concentrate on capital-based intermediary business. Meanwhile, it will continually intensify its active management capability in asset management so as to improve its competitiveness in the market. In regard to public-raised funds, the Company will steadily expand the management size and enrich and improve types of its fund products. In regard to investment banking business, the Company will focus on cultivation of the business capability in the capital market, and enhance quality control and kernel quality, striving for a new breakthrough. In regard to asset securitisation business, the Company will continue to consolidate its leading position in the market.

Management Discussion and Analysis

The Company will speed up the building of three business eco-systems. Firstly, the internet finance business will gradually step into performance-enhancing phase from the input phase while the building and advancement of both internal and external eco-systems will be improved; secondly, the private fund management business will carry out corresponding ecological layout focusing on buyout fund businesses; thirdly, centered on NEEQ business, the Company will seek better development opportunities through building an eco-system among listing, capital market, market making, equity investment, asset management and private fund business.

The Company will continue to keep close eyes on the development of international business and will start such business at appropriate time and through a variety of forms.

The Company will take advantage of management measures such as recruitment of excellent market team and internal eco-system building to promote the overall business development of the Company.

Monitoring and reporting: risk management department of the Company is in charge of monitoring the risk exposure of relevant business lines and sending risk warning to relevant business departments, and reporting to the Company's chief risk officer, risk management special committee and the Board when necessary; and the business department shall report the proposed risk response measures to the risk management department within time limits.

Management Discussion and Analysis

3. Liquidity risk

Liquidity risk refers to the risk where the Company fails to obtain sufficient funds in time at reasonable costs in order to repay mature debts, fulfill other payment obligations and satisfy the funding needs for carrying on normal business. To minimize liquidity risk, risk management department monitors the liquidity risk control indicator and conducts semi-annual liquidity risk stress tests to analyze the Company's ability to withstand short-term and long-term liquidity pressure. The Company's planning and financial department monitors and analyzes the matching of the Company's assets and liabilities from various time periods under both normal and stressed situations, the diversification and stability of the Company's capital resources, high-quality liquid assets and market liquidity and at the same time strengthens the management of the Company's liquidity during operating hours to maintain adequate liquidity position and related financing arrangements. The Company's planning and financial department establishes emergency plans for liquidity risks, taking into consideration the scale, nature, complexity, risk levels and results from stress tests, to ensure the Company is able to meet liquidity requirements in emergencies.

4. Compliance risk

Compliance risk refers to the risk of being subject to legal sanctions, regulatory measures, self-discipline penalties and loss of property or reputation among securities firms because the business activities or employee conduct violate laws, regulations or rules. The Company has established an effective sound compliance risk management system and compliance management organizational system. In order to promote the compliance management of the securities industry, the Company set up the legal and compliance department at an early stage, actively explored various models of compliance management and conducted effective management through compliance review, monitoring, examination, supervision and training. In addition, the Company has formulated and implemented comprehensive procedures for responding to and settling complaints and disputes. The Company has also established internal policies on engagement of external attorneys in the course of the Company's operation or dealing with disputes and legal proceedings when necessary.

5. Operational risk

Operational risk refers to the risk of financial loss resulting from the improper operation in transactional processes or the management system, mainly including internal policy and procedure, information system and inappropriate behavior of the staff. The Company formulated operational risk management system and the supporting process guidance. In addition, the Company established management system and operation guidance for different businesses in compliance with the latest requirements from domestic regulatory authorities and risk management demands of the Company while continuing to make improvements. The Company formulated management mechanism to select, debug, test and monitor the information system. Moreover, the Company conducted staff training through on-site and off-site means to sharpen their risk management awareness.

Management Discussion and Analysis

(II) Risk Management Measures (to be) Adopted by the Company

1. Establishing an appropriate risk management framework

The Company established a risk management framework led by the Board, which ensures implementation of all risk management measures of the Company by defining the risk management responsibilities at different levels including the Board, the Risk Control and Supervisory Committee, the Audit Committee, the management and the chief risk officer of the Company.

2. Further perfecting risk management institutional system

Pursuant to the relevant requirements of the Securities Law of the People's Republic of China, Regulations on Supervision and Management of Securities Companies, Measures for Managing the Risk Control Indexes of Securities Companies, Norms for the All-rounded Risk Management of Securities Companies, Management Measures on Liquidity Risk Management of Securities Companies and other laws, regulations and regulatory provisions and Articles of Association of Hengtai Securities Co., Ltd and other internal rules and regulations, the Company established Risk Management Measures, Administrative Measures for Liquidity Risk Management, Market Risk Management Provisions, Credit Risk Management Provisions, Regulations for Operation Risk Management and other specific risk management regulations. The Company has completed the amendments and modifications to six special risk management provisions concerning net capital, stress tests and real-time monitoring and formulated risk management stipulations in relation to the standards of entry into the asset pool for non-standard businesses, due diligence, post-investment management, risk review and NEEQ market-making. According to the changes of the market environment and regulatory policies, the Company completed the revision of systems in respect of business risk management including margin financing and securities lending business, securities-backed lending so as to form a relatively sound institutional system.

3. Further improving risk management information system

The Company has kept upgrading the internal control system covering various businesses, comprehensive risk management system and risk management modules embedded in various business systems while continuing to make supplements to the comprehensive risk management system modules from the perspective of internal credit-rating, liquidity risk management and risk preferences based on needs for risk management. The Company has rudimentarily realized the quantitative management of credit risk and liquidity risk as well as the establishment and improvement of the risk preference system. The Company has completed the consulting, system development and the launching deployment of credit risk; the consulting and system development of liquidity risk and FTP, which is now under system test; and the preliminary consulting and low-rank indicator determination of the risk preference system, which is now in the course of development.

In the meantime, the Company has devoted significant efforts in functional upgrade and optimization of the existing risk management information system: firstly, the Company launched the Net Capital System Version 4.0, which increased the promptness and accuracy of monitoring of risk management indicators; secondly, according to the needs of business implementation and risk management, certain risk monitoring functions were added to the real-time monitoring system in order to match up the application of new business qualifications.

Management Discussion and Analysis

4. **Establishing a working mechanism of stress test normalization**

On top of conducting a comprehensive stress test annually, the Company studied and established special stress test modes with respect to various business and special risk types so as to a relatively integrated tool library of stress test modes. In consideration of the specific market environment and the operation of the Company, the Company also carried out regular and occasional stress tests, aiming at prospectively analyzing the impacts of various risk factors on the profitability of the businesses and risk tolerance levels of the Company.

5. **Promoting the quantification level of risk assessment**

For market risks regarding securities investment, the Company increased the accuracy and practicality of quantitative assessment and thus provided certain support to the decision-making of business by continuously consummating the measurement model and system functions; for credit risks regarding non-standard businesses, the Company has kept perfecting the special risk appraisal mechanism while enhancing the capability of risk factors identification and analysis, the quantification level of assessment and the appraisal objectivity by means of on-site due diligence investigation, appraisal analysis and credit rating conducted by the risk management department.

Independent Review Report

TO THE BOARD OF DIRECTORS OF HENGTUO SECURITIES

(a joint stock company incorporated in the People's Republic of China with limited liability under the Chinese corporate name "恒泰证券股份有限公司" and carrying on business in Hong Kong as "恒投證券" (in Chinese) and "HENGTOU SECURITIES" (in English))

INTRODUCTION

We have reviewed the interim financial information set out on pages 42 to 80 which comprises the condensed consolidated statement of financial position of the Company as at 30 June 2016 and the related condensed consolidated statement of profit or loss, condensed consolidated statement of profit or loss and other comprehensive income, condensed consolidated statement of changes in equity and condensed consolidated statement of cash flows for the six-month period then ended, and a summary of significant accounting policies and other explanatory notes. The Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited require the preparation of a report on interim financial information to be in compliance with the relevant provisions thereof and International Accounting Standard 34 "Interim Financial Reporting" ("IAS 34") issued by International Accounting Standards Board. The directors are responsible for the preparation and presentation of this interim financial information in accordance with IAS 34. Our responsibility is to express a conclusion on this interim financial information based on our review and to report our conclusion solely to you, as a body, in accordance with our agreed terms of engagement, and for no other purpose. We do not assume responsibility towards or accept liability to any other person for the contents of this report.

SCOPE OF REVIEW

We conducted our review in accordance with Hong Kong Standard on Review Engagements 2410 "Review of Interim Financial Information Performed by the Independent Auditor of the Entity" issued by the Hong Kong Institute of Certified Public Accountants. A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Hong Kong Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

CONCLUSION

Based on our review, nothing has come to our attention that causes us to believe that the interim financial information is not prepared, in all material respects, in accordance with IAS 34.

OTHER MATTER

The comparative condensed consolidated financial information for the six months ended 30 June 2015 has not been reviewed in accordance with standards applicable to review engagements issued by the Hong Kong Institute of Certified Public Accountants.

37. FAIR VALUE MEASUREMENTS (Continued)

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The following disclosures of fair value measurements use a fair value hierarchy that categorises into three levels the inputs to valuation techniques used to measure fair value:

Level 1 inputs: quoted prices (unadjusted) in active markets for identical assets or liabilities that the Group can access at the measurement date.

Level 2 inputs: inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly.

Level 3 inputs: unobservable inputs for the asset or liability.

The Group's policy is to recognise transfers into and transfers out of any of the three levels as of the date of the event or change in circumstances that caused the transfer.

37. FAIR VALUE MEASUREMENTS (Continued)

- (c) Disclosure of valuation process used by the Group and valuation techniques and inputs used in fair value measurements at 30 June 2016:

The Group's Financial Market Department is responsible for the fair value measurements of financial assets and liabilities required for financial reporting purposes, including Level 3 fair value measurements. The Financial Market Department reports directly to the Board of Directors for these fair value measurements. Discussions of valuation processes and results are held between the Financial Market Department and the Board of Directors periodically.

A majority of the financial assets at fair value through profit or loss classified as Level 2 consist of debt securities and bond investments trading in the inter-bank bond market and the over-the-counter market. Fair values are determined based on recent transaction prices in inactive markets and using valuation techniques.

A majority of the available-for-sale financial assets classified as Level 2 consist of restricted shares, close-end funds and collective assets management schemes. Fair values of restricted shares are determined by the quoted market prices of the shares with an adjustment of discount for lack of marketability. Fair values of close-end funds are determined by trading price which is based on the net asset value as at the reporting date. Fair values of collective assets management schemes are determined based on the fair value of the underlying investments in each portfolio.

For financial instruments in Level 3, prices are determined using valuation methodologies such as discounted cash flow models and other similar techniques. Determinations to classify fair value measures within Level 3 of the valuation hierarchy are generally based on the significance of the unobservable inputs to the overall fair value measurement.
