BUSINESS REVIEW AND OUTLOOK

For the six months ended 30 June 2016 (the “Six Month Period”), Strong Petrochemical Holdings Limited (the “Company”) and its subsidiaries (collectively, the “Group”) focused on its principal business of trading of oil products and manufacturing of petrochemicals. After the disposal of Hainan Huizhi Petrochemical Fine Chemical Co., Ltd. (“Huizhi”), an indirect non-wholly owned subsidiary of the Company, in April 2016, the business of manufacturing of petrochemicals was discontinued and is considered as “discontinued operations” of the Group. The Group continued to engage in trading of oil products which is considered as “continuing operations”.

The figures for the Six Month Period stated herein refer to the results of continuing operations. To facilitate meaningful comparison, unless specified, the comparative figures in this interim report refer to the results of continuing operations for the six months ended 30 June 2015.

Revenue for the Six Month Period was approximately Hong Kong (“HK”) dollar (“HK\$”) 4,805.4 million. Profit attributable to owners of the Company for the Six Month Period was approximately HK\$32.4 million.

CONTINUING OPERATIONS

Trading of Crude Oil, Petroleum Products and Petrochemicals

To tackle the glut which led to the low oil price in January 2016, the Organization of the Petroleum Exporting Countries (the "OPEC") intended to freeze the production at January levels, while Iran, one of the member countries, refused to sign the agreement. Despite the OPEC's failure to reach the agreement in April 2016, stronger-than-expected oil demand growth and unexpected supply cut led by militant action in Nigeria and Libya have supported the gradual increase of oil price. In May 2016, the OPEC and non-OPEC countries cut global oil supply by around 800,000 barrel ("BBL") per day. Both the oil demand growth and the supply cut transformed the view of International Energy Agency which predicted that the oil market would be balanced in the second half of 2016. Brent crude oil price rebounded to United States dollar ("US\$") 50.73 per BBL in June 2016, which represented an 85% increase compared to its thirteen-year-low of US\$27.36 per BBL in January 2016. Facing the volatile trading environment, our crude oil team sought opportunities proactively to widen the customer base and we successfully increased the trading volume. In consideration of the significant oil price fluctuation, the Group has performed hedging transactions for its inventories and recorded an unrealised hedging loss in the Six Month Period. It is expected that the relative earnings would be reflected when the inventories are sold.

In June 2016, Caixin China General Manufacturing Purchasing Managers' Index ("PMI") was below the neutral 50.0 mark for the fifteenth successive months, which indicated the weak condition of the manufacturing sector in the People's Republic of China (the "PRC"). Despite the upward trend of oil price during the Six Month Period, the PRC businesses generally maintained a pessimistic outlook towards the lumbering economy. Therefore, our petroleum products team has turned to focus on trading crude oil since the first half of 2015, but the team will put its focus back on trading petroleum products when the opportunity arises. In spite of our petrochemicals team's effort to expand the customer base in the PRC market, our petrochemicals trading business was still seriously impacted by the weak demand.

Storage Business

Strong Petrochemical (Nantong) Logistics Company Ltd. (“Strong Nantong”) operates its storage facilities with 21 storage tanks and a capacity of 139,000 cubic meters and is principally engaged in providing storage service for gasoline, diesel fuel and methyl alcohol. During the Six Month Period, Strong Nantong generated positive cash flow and obtained the qualification of ISO9001 for its storage facilities’ quality management system. It is believed that Strong Nantong’s recognition of quality services and its qualification of public bonded warehouse for liquidated chemical products can strongly enhance our competitiveness to attract new petrochemicals storage customers.

DISCONTINUED OPERATIONS

Manufacture and Development of Petrochemicals

During the Six Month Period, the Group completed the disposal of its entire share capital of Strong Petrochemical (Asia) Company Limited (“Strong Asia”) at a consideration of approximately US\$20.3 million or approximately HK\$158.3 million, details of which were disclosed by the Company in its announcements dated 11 March 2016 and 17 May 2016. Immediately prior to the completion of the disposal, Strong Asia held 57% equity interest in Huizhi (together with Strong Asia, collectively, “Strong Asia Group”), which was engaged in manufacturing and processing petrochemicals. The completion of the sale and purchase agreement for the disposal took place on 22 April 2016, after which the Group ceased its business of manufacturing petrochemicals.

The discontinued operations recorded a profit of approximately HK\$11.9 million for the period ended 22 April 2016, compared to a loss of approximately HK\$0.7 million for the six months ended 30 June 2015. Upon the completion of the disposal, the Group realised a gain of approximately HK\$121.1 million during the Six Month Period. This disposal provided the Group with a good opportunity to realise the investment at an attractive return. Details of the discontinued operations are set out in note 7 to the condensed consolidated financial statements.

Outlook

The July 2016 Caixin China General Manufacturing PMI of 50.6 signaled a renewed improvement in operating conditions in the PRC manufacturing sector. With the continuing implementation of supportive fiscal and monetary policies, it is expected that the improving trend of the PRC manufacturing sector will continue. We remain optimistic towards our businesses in the PRC market and will proactively look for opportunities in engaging new customers.

Our Singapore office's application for the global trader programme (the "GTP") launched by International Enterprise Singapore was approved in May 2016. The approval recognised our Singapore office as a well-established international player conducting substantial international physical trading activities in Singapore. The GTP status allows us to enjoy a 10% concessionary tax rate on the qualifying income generated from physical trading on crude oil and petroleum products and commodities futures trading till the end of 2018.

The disposal of Strong Asia Group strengthened the Group's overall financial position and this gives us a solid financial support to seek new business opportunities. Despite the fast changing oil market, the Group will vigorously pursue opportunities to expand its business by entering the oil production sector. Simultaneously, we will continue to engage new customers in both PRC market and overseas market in the second half of 2016 so as to expand business opportunities.

FINANCIAL REVIEW

Revenue

The Group is principally engaged in the trading of oil products. Approximately 95% (2015: approximately 92%) of the Group's revenue was generated from trading of crude oil for the Six Month Period, while the revenue generated from trading of petroleum products was approximately 2% (2015: approximately 4%) and the revenue generated from trading of petrochemicals was approximately 3% (2015: approximately 4%).

The revenue of the Group was approximately HK\$4,805.4 million (2015: approximately HK\$6,714.3 million) for the Six Month Period, representing a decrease of approximately 28% compare with the same period last year. The trading volume of crude oil increased from 13,586,519 BBL to 17,026,372 BBL for the Six Month Period since our Macau office successfully developed trading relationship with several new customers and increased trading volume with existing customers for back-to-back arrangement. However, due to the comparatively low oil price, revenue generated from trading of crude oil dropped by approximately 26% for the Six Month Period. Simultaneously, in view of the weak demand in petroleum products in the PRC market, our petroleum products team continued to focus on selling crude oil to Thai oil refiners and this led to a decrease in the trading volume of petroleum products from 96,668 metric tons ("MT") to 27,503 MT for the Six Month Period. The trading volume of petrochemicals decreased from 48,637 MT to 33,220 MT for the Six Month Period is mainly due to the low demand in petrochemicals in the PRC market which is in line with its economic instability.

MANAGEMENT DISCUSSION AND ANALYSIS

Products	Unit	Six months ended 30 June					
		Number of shipment	2016 Sales quantity	Revenue HK\$ million	Number of shipment	2015 Sales quantity	Revenue HK\$ million
Trading of major products							
Crude oil	BBL	25	17,026,372	4,567.9	19	13,586,519	6,194.5

Petrochemicals	MT	25	33,220	150.1	57	48,637	249.0
Total		62		4,805.4	81		6,714.3

Gross Profit

Due to the decrease in revenue and the focus on back-to-back arrangement for crude oil trading with lower gross profit margin, the overall gross profit dropped to approximately HK\$95.3 million (2015: approximately HK\$266.5 million).

Fair Value Changes on Derivative Financial Instruments

The Group has engaged in trading of derivative financial instruments for hedging and investment purposes. The purposes of hedging activities are to minimise the price risk exposure of each trade and to reduce the fluctuation in the operating results. Simultaneously, the Group intends to enhance its profitability with the use of surplus cash through investing in crude oil and oil products related derivative products and securities.

For the Six Month Period, the Group reported an aggregate loss on fair value changes on derivative financial instruments for hedging transactions of approximately HK\$134.3 million (2015: approximately HK\$200.1 million) and an aggregate loss on fair value changes on derivative financial instruments for proprietary trading transactions of approximately HK\$2.0 million (2015: aggregate gain of approximately HK\$3.9 million). The realised gain and unrealised loss on fair value changes on derivative financial instruments were approximately HK\$12.5 million and HK\$148.8 million respectively (2015: realised loss and unrealised gain of approximately HK\$196.7 million and HK\$0.5 million respectively).

Profit for the Period

Profit attributable to owners of the Company for the Six Month Period was approximately HK\$32.4 million, whilst for the same period last year, the Group recorded a loss of approximately HK\$42.1 million.

Liquidity and Financial Resources

The bank balances and cash as at 30 June 2016 was amounted to approximately HK\$615.1 million (31 December 2015: approximately HK\$242.2 million). The increase in bank balances and cash was mainly contributed by the proceeds from the disposal of the entire share capital of Strong Asia and sales of available-for-sale financial assets.

The banking facilities as at 30 June 2016 were amounted to approximately US\$940.8 million and Renminbi (“RMB”) 48.0 million (equivalent to approximately HK\$7,394.0 million in total) from several banks. Save for the Group’s bank borrowings of approximately HK\$716.4 million, the Group had no bank overdraft as at 30 June 2016.

Gearing Ratio

As at 30 June 2016, the gearing ratio was approximately 30% (31 December 2015: approximately 22%). The gearing ratio was calculated as the Group’s total borrowing divided by total assets. The increase in gearing ratio is mainly due to the increase in bank borrowings, partially offset by the increase in bank balances and cash.

Charges of Assets and Contingent Liabilities

As at 30 June 2016, the Group’s banking facilities were secured by pledged bank deposits of approximately HK\$53.8 million, inventories of approximately HK\$468.9 million, prepaid lease payments of approximately HK\$18.9 million, certain storage tanks of approximately HK\$55.0 million and plant and machinery of approximately HK\$9.6 million.

As at 30 June 2016, the Group did not have any significant contingent liabilities.

MANAGEMENT DISCUSSION AND ANALYSIS

Foreign Exchange Exposure

The functional currency of the Group is denominated in US\$, while the reporting currency is denominated in HK\$. Since the exchange rate of US\$ against HK\$ is relatively stable during the Six Month Period, the exposure on foreign exchange is insignificant.

The Group has not implemented any foreign currency hedging policy at the moment. Nonetheless, the management has been continuously monitoring the level of foreign currency receipts and payments, and ensuring their net exposure to foreign exchange risk is kept at acceptable level from time to time and will consider hedging the foreign exchange exposure if it is significant to the Group.

Capital Commitment

As at 30 June 2016, the Group did not have any capital commitment. As at 31 December 2015, the Group had contracted for capital expenditure of approximately RMB67,000 (equivalent to approximately HK\$80,000) in respect of the construction of facilities and equipment for manufacturing and processing of petrochemicals in Yangpu Economic Development Zone, Hainan Province, the PRC.

Interim Dividends

The board (the "Board") of directors (the "Directors") of the Company did not recommend the payment of any interim dividend for the Six Month Period (2015: Nil).

Employees and Remuneration Policy

As at 30 June 2016, the number of the Group's employees decreased to 83 (31 December 2015: 169) due to completion of the disposal of Strong Asia Group during the Six Month Period. The Group's remuneration packages are maintained at competitive level and are determined on the basis of performance, qualification and experience of individual employee.

We recognise the importance of a good relationship with our employees by providing competitive remuneration package commensurate with prevailing market practice to our employees, including provident fund, life and medical insurances, discretionary bonus, share options, and training for human resources upskilling.

CONDENSED CONSOLIDATED STATEMENT OF CHANGES IN EQUITY

For the six months ended 30 June 2016

Notes:

- (a) The special reserve represents the difference between the nominal value of shares of the acquired subsidiaries and the nominal value of the shares of the Company issued for the acquisition at the time of the corporate reorganisation to rationalise the Group structure prior to the listing of the Company's share on the Stock Exchange.
- (b) According to the law and regulation of Macao Special Administrative Region ("Macao"), a legal reserve is required to be established up to a minimum of 50% of the company's paid up capital and is established in any year in which a dividend is appropriated. A subsidiary of the Company established in Macao appropriated a final dividend for the year ended 31 March 2006 to its holding company, as a result, 50% of the issued capital MOP100,000 was transferred to the legal reserve.
- (c) Other reserve was resulted from the deemed disposal of partial interests in subsidiaries without losing the Group's control over the subsidiaries in previous years and the difference between the fair value of ordinary shares issued by the Company and the carrying amount of the additional interests in a subsidiary acquired by the Group in previous years.

NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

For the six months ended 30 June 2016

1. BASIS OF PREPARATION

The condensed consolidated financial statements have been prepared in accordance with the applicable disclosure requirements of Appendix 16 to the Listing Rules and with Hong Kong Accounting Standard (“HKAS”) 34 *Interim financial reporting* issued by the Hong Kong Institute of Certified Public Accountants (the “HKICPA”).

2. PRINCIPAL ACCOUNTING POLICIES

The condensed consolidated financial statements have been prepared on the historical cost basis except for certain financial instruments, which are measured at fair values, as appropriate.

Except as described below, the accounting policies and methods of computation used in the condensed consolidated financial statements for the six months ended 30 June 2016 are the same as those followed in the preparation of the Group’s annual financial statements for the year ended 31 December 2015.

In the current interim period, the Group has applied, for the first time, the following amendments to Hong Kong Financial Reporting Standards (“HKFRSs”) issued by the HKICPA, which are effective for the Group’s financial year beginning on 1 January 2016.

Amendments to HKAS 1	Disclosure initiatives
Amendments to HKAS 16 and HKAS 38	Clarification of acceptable methods of depreciation and amortisation
Amendments to HKAS 16 and HKAS 41	Agriculture: Bearer plants
Amendments to HKFRS 10, HKFRS 12 and HKAS 28	Investment entities: Applying the consolidation exception
Amendments to HKFRS 11	Accounting for acquisitions of interests in joint operations
Amendments to HKFRSs	Annual improvements to HKFRSs 2012–2014 cycle

The application of the above amendments to HKFRSs in the current interim period has had no material effect on the amounts reported and/or disclosures set out in these condensed consolidated financial statements.

NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

For the six months ended 30 June 2016

2. PRINCIPAL ACCOUNTING POLICIES – Continued

The Group has not early applied the new and revised standards and amendments that have been issued but are not yet effective.

The Directors are currently assessing the impact of those new and revised standards and amendments but are not yet in a position to state whether they would have material financial impact on the Group's results of operations.

3. REVENUE AND SEGMENTAL INFORMATION

Revenue

Revenue represents the amounts received and receivable for goods sold in the normal course of business, net of discounts and sales related taxes.

Segmental information

On 22 April 2016, the Group completed the disposal of the entire share capital of Strong Asia and its non-wholly owned subsidiary, Huizhi, which was engaged in manufacturing of petrochemicals. The financial information in respect of the discontinued operations are disclosed in more detail in note 7 to the condensed consolidated financial statements.

After the disposal of Strong Asia Group, the Group is currently principally engaged in trading of crude oil, petroleum products and petrochemicals ("Trading business"). Certain storage facilities generated some insignificant revenue. Accordingly, the Trading business as a whole constitutes one operating segment for the purpose of segment information presentation under HKFRS 8 *Operating Segments*.

Information are reported to the chief executive officer of the Company, being the chief operating decision maker (the "CODM"), for the purpose of performance assessment and resource allocation. The CODM regularly reviews the Group's revenue and profit for the period as a whole, which are measured in accordance with the Group's accounting policies. No analysis of the Group's assets and liabilities by the respective business is regularly provided to the CODM for review. Accordingly, no segment information is presented.
