### COMPANY PROFILE

Mongolian Mining Corporation (In Provisional Liquidation) ("MMC" or the "Company" and together with its subsidiaries, the "Group") (Stock Code: 975) is the largest producer and exporter of high-quality washed hard coking coal ("HCC") in Mongolia. MMC owns and operates the Ukhaa Khudag ("UHG") and the Baruun Naran ("BN") open-pit coking coal mines, both located in the Umnugobi aimag (South Gobi province), Mongolia.

### MISSION, VISION AND VALUES

#### **I OUR MISSION**

To undertake safe and profitable mining and processing of mineral resources while promoting the development of Mongolia, through combination of modern technology and human endeavor

#### **OUR VISION**

We strive to become a leading mining company in the region by maximising value for our shareholders and for the communities where we operate

#### **I OUR VALUES AND OBJECTIVES**

WE RECOGNISE THAT PEOPLE ARE OUR KEY ASSET. THEREFORE:

 As a responsible employer, MMC provides equal employment opportunities within a meritocratic workplace

WE BELIEVE THAT
MODERN AND COST-EFFICIENT
TECHNOLOGY WILL BRING
SUSTAINABLE GROWTH AND
PROSPERITY. THEREFORE:

- MMC aims to use technology and innovate in the same to produce quality products safely at the lowest cost
- MMC continues to contribute to the development of technical standards in the global extractive industry

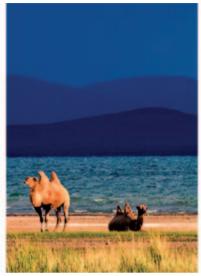

WE ARE COMMITTED TO ENVIRONMENTAL SUSTAINABILITY IN OUR OPERATIONS. THEREFORE:

- MMC strives to minimise the impact of our operations on the environment
- MMC complies with all required environmental standards, and take further measures to prevent and mitigate potential environmental impact

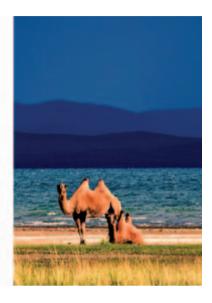

- MMC strives to build mutually beneficial relationships with local communities and officials
- MMC contributes to social development through community development initiatives and other programs

WE ARE COMMITTED TO TRANSPARENT AND FAIR BUSINESS PRACTICES. THEREFORE:

- MMC fosters mutually beneficial relationships with our suppliers and contractors
- MMC develops, maintains and values long-term relationships with our customers

WE BELIEVE SOUND
CORPORATE GOVERNANCE
IS A CORNERSTONE OF
MMC'S MANAGEMENT AND
OPERATIONS. THEREFORE:

- MMC complies with the best international practices
- MMC continues to cultivate a culture of good corporate governance as an integral part of its ongoing organisational development

### MANAGEMENT DISCUSSION AND ANALYSIS

#### INDUSTRY OVERVIEW

According to the data released by the World Steel Association ("WSA"), in the first half of 2016, China's crude steel production reached 399.6 million tonnes ("Mt"), which decreased by 1.1% from the same period in 2015.

Industry sources indicated that China has reduced its steel production capacity by 13 Mt in the first half of 2016, which accounts for about 30% of the planned target for this year. The Ministry of Industry and Information Technology ("MIIT") stated that the Chinese government remains fully committed to meet its policy targets for steel production capacity cuts, and as such, one may expect that the officials will intensify the enforcement measures for the remaining period of the year.

It was estimated by China Coal Resource ("**CCR**") that the domestic steel consumption decreased by 5.4% on a year-on-year basis to 338.3 Mt in the first half of 2016 from 357.5 Mt recorded in the corresponding period in the previous year.

With shrinking domestic steel consumption, Chinese steel producers continue to focus on exports to international markets and Chinese steel export increased to 57.1 Mt, representing 9.0% increase in the first half of 2016. However, this leads to the elevated tensions with other nations and corresponding anti-dumping allegations and investigations on such practices. Recently the European Union ("EU") announced that it will impose anti-dumping custom duties for products imported from multiple Chinese and Russian steel producers.

Following the decrease in the domestic crude steel production, China's coke production decreased by 4.7% on a year-on-year basis in the first half of 2016 to 215.2 Mt according to CCR. Coke exports from China remained at high level of 4.8 Mt in the first half of 2016, representing a 0.1% year-on-year increase.

According to CCR, China's coking coal consumption was 258.9 Mt in the first half of 2016, representing a 2.6% drop from the same period in the previous year. Subsequently, the domestic coking coal production decreased to 210.2 Mt as a result of sluggish demand and coal production capacity cuts.

In order to balance demand and supply from cost competitive sources, Chinese coking coal imports increased by 25.0% on a year-on-year basis to 27.0 Mt in the first half of 2016, which to a certain extent contributed to the stabilization of market prices for coking coal in the international markets.

As such, Australia, the largest coking coal supplier to China, increased its volume supplied by 21.4% on a year-on-year basis to 13.2 Mt in the first half of 2016, followed by Mongolia which increased its volume by 44.7% to 9.0 Mt in the first half of 2016. Australia and Mongolia continue to dominate the coking coal volumes imported to China with combined market share reaching 82.3% by coking coal import volumes compared to 79.1% reported for the first half of 2015.

Note: Due to rounding, discrepancy may exist in year-on-year percentage change.

#### OPERATING ENVIRONMENT

#### **Legal Framework**

On 1 February 2016, the Government of Mongolia ("**GoM**") issued Resolution No.81 revising the pricing determinants for mineral products exported by mining license holders from Mongolia used for royalty calculations. For coal exports, two sources are identified: (i) contract price; and (ii) market index source as indicated under http://www.sxcoal.com.

Mining license holders exporting coal are allowed to pay their royalties based on their actual contract pricing, which shall be adjusted with reference to the closest border crossing point used for export from Mongolia. If mining license holders fail to comply with the respective requirements for royalty calculation based on their contractual prices, the royalty payable will be calculated according to the benchmark reference price which will be determined by the relevant authorities, based on the information obtained from the market index source.

On 28 March 2016, the GoM issued Resolution No.179 to adopt a template agreement for community cooperation as stipulated under the Minerals Law, with such agreement to be entered between exploration and mining license holders and aimag (province) governors representing local authorities. This template agreement covers various aspects of community engagement, including matters related to environmental protection, employment creation and infrastructure development. The Company remains committed to a sustainable business model with strong focus on community development by way of implementing various programs. As such the Company will continue to work closely with local authorities by ensuring that its previous community engagement documentation is in line with the latest template.

#### **Political Environment**

The parliamentary election of Mongolia was held on 29 June 2016 and the opposition party, Mongolian People's Party ("MPP"), clinched landslide victory, gaining 65 seats out of 76 seats in the Parliament. The Democratic Party took 9 seats while the remaining 2 seats went to the Mongolian People's Revolutionary Party and an independent candidate, respectively. Following the election results declared by the General Election Committee and officially presented to the President of Mongolia, Mr. Elbegdorj Tsakhia, the first session of the newly elected Parliament was called. On 5 July 2016, Mr. Enkhbold Miyegombo, the Head of the MPP, was elected as the Speaker of the Parliament. On 8 July 2016, Mr. Erdenebat Jargaltulga was appointed by the Parliament as the Prime Minister to lead the newly formed cabinet, consisting of 16 ministers.

#### **BUSINESS OVERVIEW**

### A

#### **Coal Resources and Exploration Activities**

#### Ukhaa Khudag deposit

The UHG deposit sits within Mining License MV-11952 ("**UHG mining license**"), held by the Group for a period of 30 years commencing from 29 August 2006. The UHG mining license covers 2,960 hectares, and is extendable twice by 20-year periods. Since acquiring the UHG mining license, the Group has prepared three JORC compliant Coal Resource estimates.

The most recent JORC compliant Coal Resource estimate with statement date as of 30 November 2015, was made in accordance with the requirements of the JORC Code (2012) including in compliance with the most recent Australian Guidelines for the Estimation and Classification of Coal Resources (2014). Internal peer audit against these requirements was conducted by Mr. Gary Ballantine, who was employed as Executive General Manager of Exploration and Geology within the Group at that time.

Compared to the previous JORC compliant Coal Resource estimate as at 31 December 2014, the recent update did not include any new exploration data, but accounted for the changes in surface topography as a result of mining activity between the statement dates. Information gained from past exploration activities by the Group was used to prepare the structural and coal quality models used for the latest Coal Resource estimate as at 30 November 2015. These past exploration activities included:

- drilling of 1,556 individual boreholes for a total of 191,275 metres ("m"), including 104,369m of HQ-3 (63.1 millimetre ("mm") core holes, 96.0mm hole diameter) and 86,906m of 122mm diameter open holes;
- collection and analysis of 37,548 individual analytical samples;
- collection and analysis of 71 kilometres ("km") of high resolution 2D seismic survey in-field measurements, collected by Polaris Seismic International Ltd ("Polaris") and analysed by Velseis Processing Pty Ltd ("Velseis"); and
- analysis of large-diameter, bulk-sample drilling samples collected and conducted at the ALS Group ("ALS") laboratories in Ulaanbaatar.

JORC compliant Coal Resource estimate figures are summarised in Table 1. These figures are reported based upon an in situ density, at an as-received moisture basis. According to official mine survey measurement, production activity between 1 December 2015 and 30 June 2016 has depleted the stated JORC compliant Coal Resource by approximately 1 Mt and thus considered not to have caused any material change. No further exploration activities have been conducted within the UHG mining license area in 2016.

Table 1. UHG mining license JORC compliant Coal Resource estimate, by depth and category, as at 30 November 2015 (Notes):

Total Coal Resource	Resource Category (Mt)				
Depth limit from topographic surface	Measured	Indicated	Inferred	Total	Total
				(M+I)	(M+I+I)
Subcrop to Base Horizon of					
Weathering Elevation ("BHWE")	2	3	5	5	10
BHWE to 100m	73	23	17	97	114
From 100m to 200m	94	48	26	141	168
From 200m to 300m	91	64	21	155	176
From 300m to 400m	57	35	15	92	108
Below 400m	40	44	30	84	114
Sub-Total above 300m	260	138	70	398	468
Sub-Total below 300m	97	79	45	177	222
Total	357	217	115	575	689
Total (Rounded)	360	220	120	580	690

#### Notes:

- (i) The UHG deposit Coal Resource estimation was compiled by Mr. Lkhagva-Ochir Said, General Manager of Technical Services, Mongolian Mining Corporation. Mr. Said is a member of the Australasian Institute of Mining and Metallurgy (the "AusIMM"). He has over 8 years of experience relevant to both the style and type of coal deposit under consideration, and to the activity which has been undertaken to qualify as a Competent Person as defined by the Australasian Code for Reporting of Exploration Results, Minerals Resources and Ore Reserves (the "JORC Code (2012)"). Mr. Said consents to the inclusion in the release of the matters based on this information in the form and context in which it appears. The estimate of the Coal Resource set out in Table 1 is considered to be a true reflection of the UHG deposit Coal Resource as at 30 November 2015, prepared in accordance with the principles and guidelines of the JORC Code (2012).
- (ii) Mr. Gary Ballantine was employed by the Group as Executive General Manager for Exploration and Geology at that time, and is a member of the AusIMM. With over 25 years of experience relevant to the style and type of coal deposit under consideration, and to the activity which has been undertaken, to qualify as a Competent Person as defined by the JORC Code (2012).
- (iii) Due to rounding, discrepancy may exist between sub-totals and totals. Rounding rules refer to Clause 25 of the JORC Code (2012).

#### Baruun Naran deposit

The BN deposit comprises two distinct yet contiguous mining licenses. Through the acquisition of Baruun Naran Limited, formerly known as QGX Coal Limited on 1 June 2011, Mining License 14493A ("BN mining license") of 4,482 hectares area was obtained for 30 years from 1 December 2008. Mining License MV-017336 ("THG mining license") of 8,340 hectares area was granted to the Group on 24 June 2013, effective for 30 years. Both licenses are extendable twice, by 20-year periods.

The Group last updated JORC compliant Coal Resource estimates as at 30 June 2015 for the BN and THG mining license areas. This process applied the more stringent requirements of the Australian Guidelines for the Estimation and Classification of Coal Resources (2014), as compared to the previous JORC (2012) Coal Resource estimates prepared by McElroy Bryan Geological Services Pty Ltd. ("MBGS"), stated as of 30 June 2012 and 30 April 2013 for the BN mining license and the THG mining licenses respectively.

These most recent updates of the JORC compliant Coal Resources estimate within the BN deposit incorporated new data obtained from exploration work conducted by the Group in 2014, as well as data obtained earlier that was used in preparation of the previous JORC (2012) and JORC (2004) Coal Resource estimates. The following information provided the basis for updating the structural and coal quality geological models underpinning the most recent JORC compliant Coal Resource statement:

- drilling of 92 exploration boreholes at BN, with a total of 28,540m drilled, of which 14,780m were HQ-3 boreholes, 9,640m PQ-3 boreholes (83.0mm core, 122.6mm hole diameter) and 4,120m of 122mm diameter open boreholes;
- drilling of 32 exploration boreholes at Tsaikhar Khudag ("**THG**"), with a total of 9,970m drilled, of which 5,900m were HQ-3 boreholes, 3,610m PQ-3 boreholes and 460m were 122mm open boreholes;
- collection and analysis of 8,720 (BN) and 3,824 (THG) coal samples; and
- collection and analysis of 75km of 2D seismic survey in-field measurements over the BN mining license, captured by Polaris and analysed by Velseis.

Internal peer review was conducted by Mr. Gary Ballantine. External peer review of the structural and coal quality geological models was provided by Mr. Todd Sercombe of GasCoal Pty Ltd, and by Mr. Brett Larkin from Geocheck Pty Ltd with regard to the geostatistical analysis required to be prepared under the Australian Guidelines for the Estimation and Classification of Coal Resources (2014). These reviews confirmed that the Group's work to update the Coal Resource estimates complied with requirements of the JORC Code (2012).

Summary of the updated JORC compliant Coal Resources estimate for BN and THG mining license areas are shown in Table 2 and Table 3 respectively. The figures in these tables represent calculation based upon in situ density, at an assumed 5% moisture basis. With no mining activity having occurred since the latest statement date, there has been no depletion of the stated Coal Resources.

 $\bigstar$

#### Notes:

(i) The BN deposit Coal Resource estimation was compiled by Mr. Lkhagva-Ochir Said, General Manager of Technical Services, Mongolian Mining Corporation. Mr. Said is a member of the AuslMM. He has over 8 years of experience relevant to both the style and type of coal deposit under consideration, and to the activity which has been undertaken, to qualify as a Competent Person as defined by the JORC Code (2012). Mr. Said consents to the inclusion in the release of the matters based on this information in the form and context in which it appears. The estimates of the Coal Resource set out in Table 2 and Table 3 are considered to be a true reflection of the BN deposit Coal Resource as at 30 June 2015, prepared in accordance with the principles and guidelines of the JORC Code (2012).

- (ii) Mr. Gary Ballantine was employed by the Group as Executive General Manager for Exploration and Geology at that time, and is a member of the AusIMM. With over 25 years of experience relevant to the style and type of coal deposit under consideration, and to the activity which has been undertaken, to qualify as a Competent Person as defined by the JORC Code (2012).
- (iii) Due to rounding, discrepancy may exist between sub-totals and totals. Rounding rules refer to Clause 25 of the JORC Code (2012).

#### **Coal Reserves**

#### Ukhaa Khudag deposit

The most recent JORC compliant Coal Reserve estimate for the UHG deposit was prepared by RungePincockMinarco Limited ("**RPM**") in 2015, stated as of 30 November 2015. This estimate was based upon the most recent JORC compliant Coal Resource estimate, of the same statement date. This most recent JORC compliant Coal Reserve estimate represented an update to the work previously completed by RPM in 2013, which produced the previous JORC (2012) compliant Coal Reserve estimate stated as at 31 December 2012. This update focused only on UHG stand-alone operation.

The process used in development of the most recent JORC (2012) Coal Reserve estimate was the same as used in the previous estimate, which was based upon continued execution of open cut, multi seam, truck and excavator mining methods. Pit optimization software was used to generate a series of nested pit shells corresponding to varying revenue factors, simulating incrementally different economic scenarios as impacted by mining cost or coal price variance. The pit algorithms used included for incorporation of:

- geotechnical constraints, including limitation of overall slope angles within the pit by sector, ex-pit dump offset from Life-of-Mine ("LOM") pit shell crest and maximum pit depth, with updates on basis of research and analyses made since timing of the previous JORC (2012) Coal Reserve estimate, as provided by Mr. John Latilla of AMC Consultants Pty Ltd ("AMC");
- washability curves on seam ply basis, as prepared previously by Mr. John Trygstad of Norwest Corporation ("Norwest") for inclusion in the previous JORC (2012) Coal Reserve estimate, to individual coal seams based upon propensity for processing into coking and/or thermal products, with update made to reassign some of Seam 0B from thermal to coking coal production, based upon results observed during production trials in 2015;
- updated assumptions with regard to coal losses and dilution, and manual re-assignment of the proportion of coal mined from coking to thermal product streams, based on the reconciliation of actual production performance at UHG, as well as allowing for unadjusted presentation of Proved and Probable categorisation of Coal Reserves as per JORC Code (2012) specification;
- updated cost input assumptions, derived from recent historical operating performance at UHG mine on the basis of negotiated reduction in cost for mining and blasting contractor services and sustainable cost reductions achieved in response to difficult market conditions; and
- updated revenue input assumptions, derived from an updated market study commissioned from Shanxi Fenwei Energy Consulting Co. Ltd ("Shanxi Fenwei") in October 2015, which provided for medium to long term forecasting of expected Free-on-Transport ("FOT") pricing at UHG mine for hard coking, semi-soft coking and thermal coal products planned for production.

 $\bigstar$ 

Following pit optimisation works to determine the economic pit limits, practical pit designs were then created, and mineable in situ coal within the pit shell was converted to run-of-mine ("ROM") and product coal quantities. Resulting raw coal tonnages based upon an as-received basis with 5% total moisture are shown in Table 4. Between 1 December 2015 and 30 June 2016, the stated Coal Reserve has been depleted by approximately 1 Mt as result of mining activity, and it is thus considered not to have caused any material change.

Table 4. UHG mining license JORC (2012) Coal Reserve estimate, as at 30 November 2015 (Notes):

ROM Coal Reserve	Reserve Category (Mt)			
Coal Type	Proved	Probable T		
Coking	119	52	171	
Thermal	52	4	55	
Total	171	55	226	

#### Notes:

- (i) The estimate of the UHG deposit Coal Reserve presented in Table 4 has been carried out in accordance with requirements of the JORC Code (2012). The UHG deposit Coal Reserve estimation has been compiled by Mr. Greg Eisenmenger, who is a member of the AusIMM. Mr. Eisenmenger is a full time employee of RPM and has extensive experience in the mining industry, working for over 30 years with major mining companies, mining contractors and consultants. During this time he has either managed or contributed significantly to numerous mining studies related to the estimation, assessment, evaluation and economic extraction of coal in Australia, New Zealand, Indonesia, Mozambique and Mongolia. He has sufficient experience relevant to the style of mineralization and type of deposit under consideration, and to the activity which has been undertaken, to qualify as a Competent Person as defined by the JORC Code (2012). Mr. Eisenmenger consents to the inclusion in the release of the
- (ii) Due to rounding, discrepancy may exist between sub-totals and totals.

matters based on this information in the form and context in which it appears.

#### Baruun Naran deposit

The current JORC (2012) Coal Reserve estimate for the BN deposit was prepared in 2013 by RPM (stated 31 December 2012), as part of a LOM study considering integrated operation with the UHG deposit. This estimate was prepared using the previous JORC (2012) Coal Resource estimate, which was prepared by MBGS within the BN mining license area and stated as at 30 June 2012. The JORC (2012) Coal Reserve estimate for the BN deposit has not yet been updated on account of the recent non-operational nature of the deposit, however, the updated BN mining license and THG mining license JORC (2012) compliant Coal Resource estimates stated as at 30 June 2015 provide the basis for future update.

The LOM plan prepared by RPM underpinning the current JORC (2012) Coal Reserve estimate for the BN deposit was based upon open cut, multi seam, truck and excavator mining methods. Pit optimization software was used to generate a series of nested pit shells corresponding to varying revenue factors, simulating incrementally different economic scenarios as impacted by operating cost and coal revenue variance.

The pit optimisation algorithms are used and included for implementation of the following:

- limitation of open pit depth to 350m from surface, and overall slope angle restrictions, based upon geotechnical advice received from Mr. John Latilla from AMC;
- categorisation of coal seams for scheduling purposes based on propensity for coking or thermal coal production, based upon recommendations made by Mr. John Trygstad of Norwest;
- cost input assumptions based upon historical operating performances at both the UHG and BN mines, up until end of 2012; and
- revenue input assumptions derived from a market study of the principal coking and thermal coal markets in China, completed by Shanxi Fenwei in March 2012.

Summary of JORC (2012) Coal Reserve estimate for the BN deposit is shown in Table 5, with tonnages stated on as-received basis at an assumed, standardized 6% total moisture. Production activity between 1 January 2013 and 30 June 2016 depleted the stated JORC (2012) Coal Reserve by less than 1 Mt, according to mine survey measurement, and is considered to cause no material change.

Table 5. BN mining license JORC (2012) Coal Reserve estimate, as at 30 June 2012 (Notes):

ROM Coal Reserve	Reserve Category (Mt)			
Coal Type	Proved	Probable To		
Coking	118	22	140	
Thermal	23	2	25	
Total	141	24	165	

#### Notes:

- (i) The estimate of the BN deposit Coal Reserve presented in Table 5 has been carried out in accordance with requirements of the JORC Code (2012). The BN deposit Coal Reserve estimation has been compiled by Mr. Greg Eisenmenger, who is a member of the AuslMM. Mr. Eisenmenger is a full time employee of RPM and has extensive experience in the mining industry, working for over 30 years with major mining companies, mining contractors and consultants. During this time he has either managed or contributed significantly to numerous mining studies related to the estimation, assessment, evaluation and economic extraction of coal in Australia, New Zealand, Indonesia, Mozambique and Mongolia. He has sufficient experience relevant to the style of mineralization and type of deposit under consideration, and to the activity which has been undertaken to qualify as a Competent Person as defined by the JORC Code (2012). Mr. Eisenmenger consents to the inclusion in and the release of the matters based on this information in the form and context in which it appears.
- (ii) Due to rounding, discrepancy may exist between sub-totals and totals.

 $\bigstar$ 

#### **Production and Transportation**

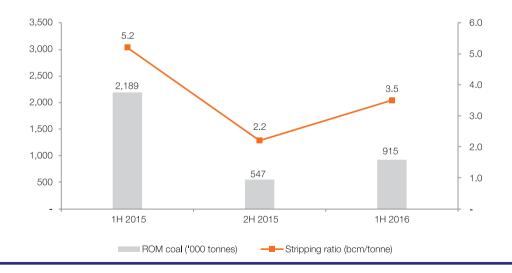

#### **Coal Mining**

In the first half of 2016, mine production increased as compared to the second half of 2015 with semi-annual ROM coal mining output achieving 0.9 Mt. To access coal, approximately 3.2 million bank cubic metres ("bcm") of prime overburden was also mined, resulting in an actual stripping ratio of 3.5 bcm per ROM tonne for the period. Recent semi-annual mine production can be seen in Figure 1, all of which has been extracted from UHG mine whilst mine operation at BN remains suspended.

The continuation of a low stripping ratio in the ROM coal production has been possible due to both strategic scheduling to delay overburden movement as much as possible, and the continued success in utilising Seam 0B in ROM feed blend delivered to the coal handling and preparation plant ("CHPP") in the production of HCC meeting customers' specifications. Significant quantities of Seam 0B exist largely uncovered in the current pit floor, and utilising this Seam 0B instead of the usual Seam 0C allows for coal mining to occur without further need to strip overburden to uncover more coal from Seam 0C.

Mine production and technical services personnel continued to focus on the scheduling and utilisation of equipment with the lowest unit cost production during the period, as well as to exploit the identified short haulage overburden dumping locations as much as possible, following the revision of geotechnical recommendations in the second half of 2015. In collaboration with the mining contractor, some of its surplus fleet was identified for relocation to other projects, which will assist in reducing mining contractor fixed costs payable in the second half of 2016.

Figure 1. The Group's 2015-2016 semi-annual ROM coal production volumes (in thousand tonnes) and actual stripping ratio (in bcm per ROM tonne of coal):

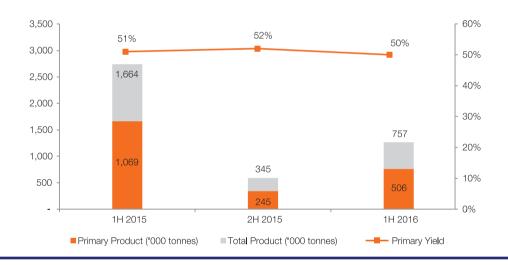

#### **Coal Processing**

In parallel with the increased mine production compared with the second half of 2015, the volume of ROM coal processed at the Group's CHPP also increased in the first half of 2016. Total ROM feed of 1.0 Mt was processed, resulting in the production of 0.5 Mt of HCC primary product at 50% yield, and 0.25 Mt of thermal middlings secondary product at 25% yield. All ROM coal processed in the first half of 2016 was sourced from the UHG deposit, and the recent semi-annual washed coal production for the Group is shown in Figure 2.

Following successful production trials in 2015 incorporating Seam 0B into the normal ROM feed blend in the production of HCC, full scale operation incorporating this concept was executed in the first half of 2016. Primary and secondary yields have not been affected by this, and the slight dip in semi-annual yield was caused by other influences related to mine production sequencing. It is expected that Seam 0B shall remain included in the ROM feed blend, with product coal unit costs reduced on account of the lower stripping ratio and correspondingly the mining cost incurred to access this coal.

#### **Transportation and Logistics**

To meet the output of the CHPP, the Group's transportation and logistics operations within Mongolia responded by increasing total production and by further improving on productivity improvements realised in 2015.

Within the period, approximately 0.6 Mt of HCC primary product was hauled from the UHG CHPP to the Tsagaan Khad ("**TKH**") coal stockpile and trans loading facility adjacent to the Mongolia — China border. As per normal practice in recent years, this was achieved by solely utilizing the Company's fleet of double trailer heavy haulage trucks without any assistance from third party haulage contractors.

In addition, approximately 0.3 Mt of thermal middlings secondary product produced by the CHPP was rehandled onsite at UHG to satellite stockpiles near the CHPP stacker to reduce the short term cost of operation.

Productivity gains realised in 2015 as a result of systematic improvements to remove system bottlenecks were maintained in the first half of 2016, with the utilisation of double trailer heavy haulage trucks approaching 45 round trips per month. Further improvements were made where average truck payload was increased by approximately 2 tonnes per trip, or approximately 1.5%, and via sharing of equipment resources with the mine production team, some third party fleet of wheel loaders used for loading trucks were able to be off-hired.

MIMIC

#### Occupational Health, Safety and Environment

In the first half of 2016, approximately 1.1 million man-hours were recorded by employees, contractors and sub-contractors of the Group. During this period, no occurrence of Lost Time Injury ("LTI") was recorded, resulting in a Lost Time Injury Frequency Rate ("LTIFR") of 0.0 LTIs per million man-hours worked equivalent being recorded for the period. This represents the first semi-annual period of zero LTIs being recorded by the Group since the commencement of the Company's public reporting, and results in a very low 12-month rolling average LTIFR of 0.5 LTIs per million man-hours worked equivalent being realised.

Although no LTIs were recorded in the reporting period, 1 Medical Treatment Injury ("MTI") and 2 First Aid Injury ("FAI") cases were recorded. These represent injuries of lower severity that do not result in an absence from work by the injured persons. However, recording and reporting do emphasize the importance that the Group places on achieving its goal of Zero Harm to employees. The Total Recordable Injury Frequency Rate ("TRIFR") for the period was at 0.88 Total Recordable Injuries ("TRI") per million man-hours worked equivalent.

During the reporting period, only 3 low level environmental incidents were recorded; 2 Level 1 incidents, and 1 Level 2 incident. Within the MMC system of categorisation, Level 1 represents the lowest possible level, whereas Level 5 would represent an incident of highest severity.

The continued reduction in number of incidents and related frequency rates is testament to the commitment of the Group's management to the concept of Zero Harm in terms of health, safety and environment. This was again demonstrated by the frequency and quantity of related trainings provided to employees, contractors, subcontractors and visitors, with 5,168 individual training sessions delivered for 7,512 man-hours of training in the first half of 2016.

#### Sales and Marketing

Affected by the reduced pace of economic growth in China and subsequent reduction in steel consumption, the prolonged market slowdown continued in the first half of the year resulting in coking coal prices remaining stagnant at low levels. Amid this continued challenging market environment, the Group strove to maintain its relationship with its existing customer base of key end-users with long term strategic value, while continuing to maintain focused on liquidity and credit risk management through prepaid arrangements in its sales operation.

The Group's existing customers mostly comprise of steel mills and coke plants located in Inner Mongolia and Hebei areas, including Baotou Iron and Steel Co. Ltd, Jianlong Janeboat Steel Co., Ltd, Qiananshi Jiujiang Wire Co., Ltd and Tangshan Dafeng Coking Co., Ltd.

Besides maintaining sales through its already existing sales channels, the Group continued to seek new end-user customers in the first half of 2016 and has subsequently started supplying HCC to new customers such as Chifeng Jiu Lian Coal Chemical Co., Ltd and Chifeng Defeng Coking Co. Ltd in Inner Mongolia province, Jiuquan Iron and Steel in Gansu province, Hebei Iron and Steel Group Company, Tangshan Dongfang Gas and Coking Coal Co., Ltd, Tangshan Lanhai Industrial Co. Ltd, and Tangshan Yongshun Gas and Coking Co. Ltd, in Hebei province.

With the above mentioned developments in the first half of 2016, the Group is focused to overcome the ongoing downtrend of the market with the prudent practice of maintaining existing market share whilst laying foundations for long term sustainable operations.

The Group sold a total of 0.6 Mt of HCC in the first half of 2016, of which 0.1 Mt, 0.4 Mt and 0.1 Mt were sold under Delivery-at-Place ("**DAP**") at Ganqimaodu ("**GM**"), FOT, and Cost-and-Freight ("**C&F**") terms respectively. This represents a decrease by 20.5% year-on-year compared to 0.7 Mt HCC sold in the first half of 2015. However, HCC sales volume in the first half of 2016 increased by 32.8% compared to 0.45 Mt of HCC sold in the second half of 2015.

Note: Due to rounding, discrepancy may exist between sub-totals, totals, volume of market shares and year-on-year change.

#### OUTLOOK AND BUSINESS STRATEGIES IN 2016

The Company intends to pursue the following key strategies in order to maintain and enhance its competitive position as a major washed coking coal producer in Mongolia: (i) adjusting the capital structure and its debt to adequate and sustainable levels; (ii) maximizing assets utilization to drive unit fixed costs down; (iii) supporting initiatives to improve logistics infrastructure providing access to Chinese railway network to reach its customers in the People's Republic of China ("PRC") and beyond; (iv) exploring opportunities for expanding and diversifying its business operations through potential strategic cooperation and joint ventures agreements; and (v) continuing its strong commitment to safe, environmentally and socially responsible operations.

In light of the adverse market conditions, and to better protect the interests of all the stakeholders of the Company, the Company is engaged in ongoing discussions with its creditors about a possible restructuring arrangement in relation to its indebtedness. The Company is committed to transparent communication with broader investment community with the ultimate goal to achieve outcomes acceptable and in the long term beneficial to all its stakeholders.

THERE CAN BE NO ASSURANCE THAT ANY DISCUSSIONS WITH ANY CREDITOR WILL LEAD TO A PROPOSAL ACCEPTABLE TO THE CREDITOR MORE GENERALLY OR THAT DISCUSSIONS WITH THE CREDITOR CAN BE PROGRESSED TO ANY POSITIVE CONCLUSION. ACCORDINGLY, THE COMPANY OFFERS NO ASSURANCE THAT THE PROPOSED RESTRUCTURING WILL BE SUCCESSFULLY CONCLUDED. SHAREHOLDERS OF THE COMPANY, HOLDERS OF OTHER SECURITIES OF THE COMPANY AND POTENTIAL INVESTORS IN THE SECURITIES OF THE COMPANY ARE ADVISED TO EXERCISE EXTREME CAUTION WHEN DEALING IN THE SECURITIES OF THE COMPANY.

The Company will continue to pursue its long term development objectives, including the opportunity to engage in coal mining, processing, and transportation and exploration activities at Tavan Tolgoi coalfield in Mongolia. The ultimate benefit to Mongolia is seen from significant improvements of the competitive position of Mongolian coal at international markets by way of consolidating commercial operations within Tavan Tolgoi coalfield under the public private partnership model. However, the final outcome of this transaction remains highly uncertain given the complex nature of negotiations, involving multiple parties, including regulators.

SHAREHOLDERS AND POTENTIAL INVESTORS SHOULD NOTE THAT THE COMPANY MAY OR MAY NOT ENTER INTO ANY DEFINITIVE AGREEMENTS WITH ITS CONSORTIUM PARTNERS, THE GOM AND/OR ITS DESIGNATED ENTITIES. EVEN IF DEFINITIVE AGREEMENTS ARE ENTERED INTO, COMPLETION AND FULFILLMENT OF SUCH AGREEMENTS WILL BE SUBJECT TO SATISFACTION OF THE CONDITIONS PRECEDENT SET OUT THEREIN. ACCORDINGLY, THE COMPANY MAY OR MAY NOT BENEFIT FROM THE TAVAN TOLGOI COALFIELD DEVELOPMENT. SHAREHOLDERS AND POTENTIAL INVESTORS ARE ADVISED TO EXERCISE CAUTION WHEN DEALING IN THE SECURITIES OF THE COMPANY.

#### FINANCIAL REVIEW

#### Revenue

Coking coal prices momentarily rebounded from its prolonged decline during the first half of 2016. However, severe excess supply of coal products still exist in the market, and the brief rebound in prices had no material impact on the Group's financial performance during the period. The Chinese economy continued to cool down with weak steel consumption and excess supply of coal products made up for a challenging environment during the first half of 2016.

The Group's total sales volume for the six months ended 30 June 2016 reached approximately 0.6 Mt of coal products generating total revenue of United States Dollar ("**USD**") 31.1 million, whilst for the six months ended 30 June 2015 total sales volume was 1.0 Mt of coal products with a total revenue of USD71.8 million. For the six months ended 30 June 2016, approximately 86.4 thousand tonnes of HCC was sold at DAP GM terms, representing 14.5% of total sales volume which generated USD4.3 million in revenue. Approximately 0.5 Mt of HCC was sold at FOT and C&F terms under inland China sales generating USD26.8 million in revenue. There were no sales of coal products procured from Chinese third party sources during the first half of 2016 compared to 0.3 Mt in the first half of 2015.

The Group's pricing reflected the current challenging price environment for all coking coal products in the global market. The average selling price ("ASP") of HCC achieved on a combined basis at all selling points was USD63.2 per tonne for the six months ended 30 June 2016 compared to USD64.1 per tonne for the same period in 2015. The ASP of HCC under FOT and C&F term sales were USD47.3 per tonne and USD76.8 per tonne, respectively during the first half of 2016, compared to USD77.0 and USD110.4 in the first half of 2015 respectively. It is worth noting that the ASP of sales under C&F terms is an average price of sold quantity across different locations in China, therefore year-on-year comparison may not depict the true trend as selling quantity and locations may differ each year. The ASP of sales of HCC under DAP GM terms was USD49.6 per tonne in the first half of 2016 which was approximately 8.5% lower compared to USD54.2 per tonne in the first half of 2015.

For the six months ended 30 June 2016, the Group derived individually more than 10.0% of its revenue from five customers, with purchase amounts of approximately USD5.3 million, USD4.9 million, USD4.5 million, USD4.3 and USD3.3 million, respectively. In the first half of 2015, the Group derived individually more than 10.0% of its revenue from four customers, with the purchase amounts of approximately USD26.1 million, USD15.4 million, USD10.7 million and USD7.5 million, respectively.

#### **Cost of Revenue**

The Group's cost of revenue consists primarily of mining costs, processing and handling costs, transportation and logistics costs, and costs related to site administration, stockpile and transportation loss, and governmental royalties and fees.

During the first half of 2016, the total cost of revenue of USD64.6 million was solely associated with self-produced coal, compared to USD97.1 million during the first half of 2015 which included costs relating to both self-produced and procured coal from Chinese third parties.

There was no cost of revenue associated with procured coal in the first half of 2016 compared with USD23.4 million incurred in first half of 2015 relating to trading of coal procured from Chinese third party sources.

The total cost of revenue of USD64.6 million, is inclusive of USD11.8 million inventory provision booked due to continuous weakening prices of coal products. The provision was made based on the assessment of the net realizable value of coal inventories.

Table 6. Total and individual costs of revenue and unit costs of revenue of self-produced coal:

	Six months ended 30 June		
	2016	2015	
	(USD'000)	(USD'000)	
Cost of revenue	52,791	64,253	
Idling costs	17,859	19,057	
Cost of revenue excluding idling costs	34,932	45,196	
Mining cost	11,224	20,169	
Variable cost	6,105	9,242	
Fixed cost	4,596	9,688	
Depreciation and amortization	523	1,239	
Processing cost	6,994	7,783	
Variable cost	3,292	3,097	
Fixed cost	574	1,815	
Depreciation and amortization	3,128	2,871	
Handling cost	625	697	
Transportation cost	8,155	8,748	
Logistic cost	1,942	1,598	
Variable cost	1,162	908	
Fixed cost	712	640	
Depreciation and amortization	68	50	
Site administration cost	3,551	3,552	
Transportation and stockpile loss/(gain)	(235)	(733)	
Royalties and fees	2,676	3,382	
Royalty	1,620	2,168	
Air pollution fee	590	675	
Customs fee	466	539	

In accordance with the Group's policy to conserve cash outflow when confronted with an ASP which is trending lower, it made tactical sense for the Group to temporarily suspend operations at certain times during the period under review for conservation and efficiency purposes. In relation to this, idling costs arose during certain periods when production was held at a limited level and incurred associated costs were USD17.9 million, including depreciation and amortization of USD7.7 million.

The mining cost consists of costs associated with overburden and topsoil removal and ROM coal extraction, including the costs related to mining staff and equipment, together with base and performance fees paid to the mining contractor, blasting contractor fees, and costs paid to fuel suppliers. For the six months ended 30 June 2016, the Group's mining costs were approximately USD11.2 million (first half of 2015: USD20.2 million). Mining unit cost was USD9.4 per ROM tonne for the six months ended 30 June 2016, compared to USD14.7 in the first half of 2015, representing a decrease of 36.1% which was due to the successful negotiation and revision of the agreement with the Company's mining contractor. Major amendments include adjustment in the mining fleet rate, indexing project base fee to market coal prices and reducing plant rates which, in aggregate, helped the Group to reduce mining unit costs.

Table 7. Total unit mining cost per ROM tonne:

	Six months ended 30 June		
	2016	2015	
	(USD/	(USD/	
	ROM tonne)	ROM tonne)	
Mining cost	9.4	14.7	
Blasting	1.0	1.3	
Plant cost	2.1	3.3	
Fuel	2.0	2.1	
National staff cost	0.7	1.4	
Expatriate staff cost	0.3	0.6	
Contractor fee	2.8	5.0	
Ancillary and support cost	0.1	0.1	
Depreciation and amortization	0.4	0.9	

Note: The above mining cost does not include idling cost

The Group identified components of the mine in accordance with the mine plan. Accounting of mining unit costs is based on the stripping ratio applicable to each component of the mine. Average accounting stripping ratio for components mined during the six months ended 30 June 2016 was 2.4 bcm per tonne, compared to 2.6 bcm per tonne for the six months ended 30 June 2015. The mining cost together with the costs of pre-stripped overburden, which is associated with the coal to be mined, processed, transported and sold in the future, are all recorded in the Consolidated Statement of Comprehensive Income.

The processing cost primarily includes the costs associated with operations of the CHPP including power and water costs. During the six months ended 30 June 2016, the Group's processing cost was approximately USD7.0 million (first half of 2015: USD7.8 million), of which approximately USD3.1 million is related to the depreciation and amortization of the CHPP, USD2.0 million was incurred in the UHG Power Plant for power generation and distribution, and USD0.8 million was incurred in the UHG Water Supply Facility for water extraction and distribution related to the washed coal sold during the period.

Unit processing cost calculated per ROM coal in-feed tonne increased from USD5.7 per ROM tonne in the first half of 2015 to USD5.9 per ROM tonne in the first half of 2016, representing an increase of 3.5%. The increase was mainly attributable to the lower utilisation of CHPP capacity.

Table 8. Total processing cost and unit processing cost per ROM tonne:

	Six months ended 30 June			
	2016	2015	2016	2015
			(USD/	(USD/
	(USD'000)	(USD'000)	ROM tonne)	ROM tonne)
Total	6,994	7,783	5.9	5.7
Consumables	281	386	0.2	0.3
Maintenance and spares	209	587	0.2	0.4
Power	1,994	1,631	1.7	1.2
Water	808	493	0.7	0.4
Staff	288	1,190	0.2	0.8
Ancillary and support	286	625	0.3	0.5
Depreciation and amortisation	3,128	2,871	2.6	2.1

Note: The above processing cost does not include idling cost

The handling cost is related to feeding ROM coal from ROM coal stockpiles to the CHPP, and also the removal of course reject (primarily rock and sediment separated from coal) after coal processing. During the six months ended 30 June 2016, the Group's handling cost was approximately USD0.6 million (first half of 2015: USD0.7 million). Unit handling cost was USD1.0 per tonne for the first half of 2016, which was the same as that in the first half of 2015.

Transportation costs include costs related to the transportation of coal products from UHG to TKH, and the transportation of coal products from TKH to GM, including fees paid to third party transportation contractors. During the six months ended 30 June 2016, the Group's transportation costs, excluding idling cost, were USD8.2 million (first half of 2015: USD8.7 million). On a unit cost basis, the Group's overall transportation costs in the UHG-GM section increased by USD1.1 per tonne or 8.7% from USD12.6 per tonne in the first half of 2015 to USD13.7 per tonne in the first half of 2016. The transportation cost in the long haul section (UHG-TKH) increased from USD6.6 per tonne in the first half of 2015 to USD8.0 per tonne in the first half of 2016 due to lower transportation volume. In the short-haul (TKH-GM) section, where the Group utilised fleet from third party contractors, the costs slightly decreased to USD5.7 per tonne in the first half of 2016 from USD6.0 per tonne as recorded in the same period in 2015.

The logistics cost is mainly related to costs associated with operating product stockpiles at UHG and TKH. For the six months ended 30 June 2016, the Group's logistics cost was approximately USD1.9 million (first half of 2015: USD1.6 million).

The site administration cost is primarily related to the site support facilities such as the airstrip operations, and also overall supervision and joint management of the Group's mining, processing, transportation and logistics operations. For the six months ended 30 June 2016, the Group's site administration cost was approximately USD3.6 million, which was the same as that in the first half of 2015.

For the six months ended 30 June 2016, the Group recorded a total transportation loss of around USD83,000 compared to a gain of around USD4,000 in the first half of 2015. For the six months ended 30 June 2016, the Group recorded unrealized inventory gain of USD0.3 million for ROM coal and washed coal product stockpiles compared to unrealised gain of USD0.7 million as recorded in the first half of 2015. The inventory losses or gains are assessed based on periodic survey measurements of the Group's ROM coal stockpile inventories at the UHG and BN mines, and product coal stockpile inventories at UHG and TKH. Survey of coal quantity is a measurement of volume, and as for every bulk commodity, the conversion to tonnage requires the application of density assumption, which involves natural variance. Subsequently, the measurement of stockpile quantities is an estimation in which errors are inherent. Therefore, variations within 5% are tolerated, and any tonnages above/below this limit are recorded as stockpile gain/loss. The management expects that by maintaining lower levels of inventory and improving overall inventory management, the Company will be in a position to keep inventory losses under control.

Governmental royalties and fees are related to royalties, air pollution fees and custom fees paid according to the applicable laws and regulations in Mongolia. The progressive royalty rate is applied in the range of 5-8% for processed coal products and 5-10% for raw coal products based on monthly reference price determined by the Ministry of Mining of Mongolia. The Group's effective royalty rate for the six months ended 30 June 2016 was approximately 5.0% for coal exported from Mongolia based on customs clearance documentation (first half of 2015: 5.5%).

#### **Gross Loss**

The Group's gross loss for the six months ended 30 June 2016 was approximately USD33.6 million, compared to the gross loss of approximately USD25.3 million recorded for the six months ended 30 June 2015. The gross loss position was largely driven by further downward pressure on ASP of coking coal products due to the oversupplied state of the market, lower sales volume, idling costs incurred during the periods of limited production and inventory provision.

#### **Selling and Distribution Costs**

The Group's selling and distribution costs of USD5.7 million for the six months ended 30 June 2016 (30 June 2015: USD5.5 million) in an aggregate amount were associated with inland China sales activities and include expenses relating to fees and charges incurred for importing coal into China, logistics, transportation, governmental fees and charges and fixed agent fees. The selling and distribution costs were higher compared to the same period in 2015 due to higher sales volume realized under inland China sales activities.

#### **General and Administration Expenses**

The Group's general and administrative expenses relate primarily to head office staff costs, share option expenses, allowance for doubtful debts, consultancy and professional fees, depreciation and amortisation of office equipment and other expenses. For the six months ended 30 June 2016, the Group's general and administrative expenses decreased by approximately USD6.7 million or 55.9% from USD12.0 million for the six months ended 30 June 2015 to approximately USD5.3 million for the six months ended 30 June 2016.

#### **Net Finance Costs**

Net finance costs for the six months ended 30 June 2016 was approximately USD19.9 million (30 June 2015: USD42.9 million). Net finance costs for the six months ended 30 June 2016 comprised of interest expense and other credit facilities related expenses, and approximately USD17.4 million foreign exchange net gain, which is mainly attributable to the gain arising from exchange rate differences realized between the receivables recognition and settlement dates.

The Group has triggered the event of default under the secured interest-bearing borrowings from BNP Paribas Singapore Branch and Industrial and Commercial Bank of China Limited (collectively, the "Lenders") with a principal amount of USD93,000,000 (the "BNP and ICBC Facility") as disclosed in the announcements of the Company dated since 23 March 2016, which also constituted an event of default under certain of the Group's other indebtedness that contain cross-default provisions, including the senior notes ("Senior Notes") issued by the Company with a principal amount of USD600,000,000 on 29 March 2012. Accrued interest expenses in respect of the BNP and ICBC Facility totalled USD3.7 million for the first half of 2016, which is inclusive of 2% per annum default interest calculated starting from 22 March 2016, in addition to accumulated interest payables of USD0.3 million for the prior period. Accrued interest in respect of the Senior Notes was USD26.6 million for the first half of 2016, in addition to accumulated interest payables of USD13.6 million for the prior period.

#### **Income Tax Expenses**

The Group did not have income tax expense for the six months ended 30 June 2016 due to the loss incurred during the period, but had income tax credit of approximately USD1.8 million. The Group had income tax credit of USD6.7 million due to the recognition of deferred tax asset for the six months ended 30 June 2015.

#### Loss for the Period

As a result of the costs listed above, losses attributable to equity shareholders of the Company for the six months ended 30 June 2016 amounted to approximately USD61.7 million (30 June 2015: loss of USD79.1 million). The major contributing factor of the Group's net loss position is the continuing depressed ASP and lower sales volume of coking coal products due to prolonged tough market conditions in China as coking coal price continues to be negatively impacted by global supply and demand imbalances.

#### **Liquidity and Capital Resources**

For the six months ended 30 June 2016, the Company's cash needs had been primarily related to working capital requirements.

 $\bigstar$ 

The Company's cash resources were mainly funded by revenue generated from sales of coal products.

Table 9. Combined cash flows:

	For the six months ended 30 June	
	2016 USD'000	2015 USD'000
Net cash generated from/(used in) operating activities	8,650	(55,170)
Net cash generated from/(used in) investing activities	53,237	(39,230)
Net cash used in financing activities	(59,694)	(98,500)
Net increase/(decrease) in cash and cash equivalents	2,193	(192,900)
Cash and cash equivalents at beginning of the period	702	202,856
Effect of foreign exchange rate changes	87	(43)
Time deposits with original maturity over three months	_	60,000
Cash and cash equivalents at end of the period	2,982	69,913

Note: USD53.2 million generated from investing activities comprises of USD53.5 million generated from the release of time deposits and its interest income, which were utilised to offset against the obligations under the credit facilities from Mongolian domestic banks, and USD0.2 million incurred for payments for deferred stripping activity and USD0.1 million incurred for payments for property, plant and equipment. The settlement of the credit facilities from Mongolian domestic banks is reflected under the net cash used in financing activities section of the combined cash flows.

The gearing ratio (calculated as total bank and other borrowings divided by total assets) of the Company as at 30 June 2016 was 54.8% (31 December 2015: 57.0%). All borrowings are denominated in USD. Cash and cash equivalents are held in MNT, USD, RMB, Euro ("EUR") and Hong Kong Dollars ("HKD"). The Company's policy is to regularly monitor current and expected liquidity requirements and compliance with debt covenants to ensure that the Company maintains sufficient reserves of cash to meet its liquidity requirements in the short and long term.

#### Indebtedness

As of 30 June 2016, the Group had USD746.1 million in outstanding short-term and long-term borrowings, including indebtedness incurred under (i) USD600 million Senior Notes, (ii) USD150 million BNP and ICBC Facility, (iii) USD180 million facility agreements with European Bank for Reconstruction and Development ("EBRD"), Nederlandse Financierings - Maatschappij voor Ontwikkelingslanden N.V. ("FMO"), and Deutsche Investitions - und Entwicklungsgesellschaft mbH ("DEG") (collectively the "Parallel Lenders") (the "EBRD, FMO and DEG Loans"), and (iv) USD40 million revolving credit line from Trade and Development Bank of Mongolia.

Under the EBRD, FMO and DEG Loans, the outstanding principal amount was USD51.8 million as at 30 June 2016. On 11 March 2016, the Group entered into the Deed of Termination and Release (the "DTR") with the Parallel Lenders regarding the repayment of the EBRD, FMO and DEG Loans. Pursuant to the DTR, the Group endorsed to the Parallel Lenders certain promissory notes issued by the Ministry of Finance ("MOF") with a total amount of approximately MNT105.6 billion, and in return the obligations under the borrowings will be discharged in their entirety and the relevant security thereunder will be released after 121 calendar days plus 2 business days from the signing of the DTR (the "Timing Condition").

Subsequent to the balance sheet date, on 25 July 2016, the Timing Condition has been fulfilled. Therefore, the EBRD, FMO and DEG Loans have been discharged in its entirety and the relevant security thereunder has been released.

The Senior Notes bear a fixed interest rate of 8.875% per annum payable semi-annually. The Senior Notes will mature in March 2017, unless earlier redeemed. As of 30 June 2016, the outstanding principal amount was USD600 million. The Group published an announcement on 14 March 2016 in relation to a formation of the steering committee ("Steering Committee") for potential restructuring of the Senior Notes and announced that the Group will likely not be able to pay the interest due on 29 March 2016.

On 5 March 2014, the Company as a borrower entered into the BNP and ICBC Facility Agreement for a coal pre-export loan facility of USD150 million. The loan bears an interest rate of LIBOR plus 6.00% per annum, and is repayable in 10 quarterly installments starting from September 2014 and ending in December 2016. As of 30 June 2016, the outstanding principal amount of the BNP and ICBC Facility was USD93.0 million. Under the BNP and ICBC Facility, the Company shall not issue any shares if such issue results in (i) the creation of a new share class of the issued share capital of the Company, and (ii) a change of control by controlling shareholder of the Company ceases to beneficially hold (directly or indirectly) at least 30% of the total issued share capital of the Company.

On 23 March 2016, the Group published an announcement stating an event of default had occurred under the BNP and ICBC Facility Agreement and cross-default under the Senior Notes due to failure to make certain repayment of principal installments and interests and replenish certain collection account. On 26 April 2016, the Group received a notice from the agent under the BNP and ICBC Facility Agreement (the "Agent") on acceleration and demand of the BNP and ICBC Facility Agreement ("Acceleration Notice") and a notice from the shared security agent ("Shared Security Agent") on enforcement under the intercreditors agreement ("Intercreditors Agreement") entered into between the Company, certain of its subsidiaries, the original lenders under the BNP and ICBC Facility Agreement, the trustee of the Senior Notes and the Shared Security Agent thereunder as referenced to in the Group's announcement dated 23 March 2012. Under the Acceleration Notice, the Agent makes demand for immediate payment of all amounts accrued or outstanding under the BNP and ICBC Facility of USD95,433,943.90. As such, all such amounts are immediately due and payable. On 29 April 2016, the Group published an announcement stating that a default of interest payment of the Senior Notes had continued for a period of 30 consecutive calendar days and, as such, an event of default under the Senior Notes had been triggered. As at the date of this interim report, the Group received no acceleration or demand request under the Senior Notes. Subsequent to the balance sheet date, the Company announced on 8 July 2016 an indicative terms of the restructuring of the Senior Notes and the BNP and ICBC Facility (the "Debt Restructuring") as the Group currently proposes (the "Debt Restructuring Proposal"). The Steering Committee supports the Debt Restructuring Proposal. Further developments regarding the Debt Restructuring Proposal can be found in the paragraph headed "Other and Subsequent Events" under the Management Discussion and Analysis section on pages 33 and 34 of this interim report.

In addition to the Senior Notes and the BNP and ICBC Facility, the Debt Restructuring also includes the Company's promissory notes issued to QGX Holding Ltd. ("QGX") which are booked under other payables of the Company. For further details, please see Note 19 of the Notes to the Unaudited Interim Financial Report on pages 69 and 70.

The loan granted by Trade and Development Bank of Mongolia is a revolving credit facility with the outstanding principal amount of USD1.3 million as of 30 June 2016. The facility bears 11.2% per annum interest, the latest extension of the maturity date was granted until 29 July 2016. The Company continues to maintain regular and constructive discussions with the lender regarding the extension and settlement arrangements.

A

#### **Credit Risk**

The Group closely monitors its credit exposure. Credit risk is primarily attributable to trade and other receivables.

As at 30 June 2016, the Group had approximately USD2.9 million in trade receivables, USD104.2 million in other receivables and USD0.4 million for allowance of doubtful debts. As at 31 December 2015, the Group had approximately USD2.0 million in trade receivables and USD92.3 million in other receivables, as well as USD0.4 million for allowance of doubtful debts.

As of 30 June 2016, in accordance with the internal credit policy of the Group (the "Credit Policy"), there was no addition to or reversal of allowance for doubtful debts, in line with the overall aging analysis of trade receivables balance as at 30 June 2016. The management continues to monitor, on an ongoing basis, the exposure, including but not limited to the current ability to pay, and takes into account information specific to the customer and pertaining to the economic environment in which the customer operates on an ongoing basis.

The major components of the other receivables of USD104.2 million comprise of USD17.3 million value added tax ("VAT") and other tax receivables, USD30.4 million of other deposits and prepayments and USD53.8 million receivables in relation to certain promissory notes which were endorsed to the Parallel Lenders during the period where the related obligations and securities under the EBRD, FMO and DEG Loan Agreements have not yet been released as of 30 June 2016. For the VAT receivables, based on the Tax Authority inspection and approval of the VAT tax refund, the Group offset USD6.6 million against its other tax payments and payables to certain suppliers. The remaining amounts are deposits, advances, prepayments and other receivables in the ordinary course of business. Management believes that there is no issue in the collectability of such receivables.

Substantially all of the Group's cash at bank are deposited with reputable banks, which the management assessed the credit risk to be insignificant.

#### Foreign Exchange Risk

Cash and cash equivalents denominated in the currency other than the functional currency of the entity to which they relate as at 30 June 2016 and 31 December 2015 amounted to USD1.5 million and USD50.2 million, respectively. Total borrowings denominated in the currency other than the functional currency of the entity to which they relate as at 30 June 2016 and 31 December 2015 amounted to USD53.1 million and USD101.8 million, respectively.

The majority of the Group's assets and operating expenses are denominated in MNT. However, a large portion of expenses, including fuel and capital expenditures, are import costs and are thus linked to USD and RMB prices. Also, the majority of the Group's finance costs are denominated in USD. Therefore, the Group believes that there is a natural hedge that partially offsets foreign exchange risk.

The Group has not entered into any derivative instruments to manage foreign exchange fluctuations. However, the management monitors foreign exchange exposure and will consider hedging significant foreign currency exposure should the need arise.

#### Pledge of Assets of the Group

As at 30 June 2016, the Company pledged Energy Resources LLC ("**ER**") current accounts held with Trade and Development Bank of Mongolia, Khan Bank of Mongolia, Golomt Bank of Mongolia and XacBank of Mongolia, its Debt Reserve Account held with BNP Paribas London; cooperation contract with Inner Mongolia Qinghua Group of China, coal mining agreement with Thiess Mongolia LLC (formerly known as Leighton LLC); engineering, procurement and construction management contract for the CHPP constructed at the UHG site with Sedgman LLC; CHPP modules 1 and 2; UHG Power Plant; and water facilities for EBRD, FMO and DEG Loan Agreements. Such pledges in relation to the EBRD, FMO and DEG Loan Agreements were released of security by the Parallel Lenders on 25 July 2016, subsequent to the balance sheet date.

The Company also pledged Collection and Cash Collateral accounts with BNP Paribas Hong Kong and certain coal stockpiles under the BNP and ICBC Facility Agreement as at 30 June 2016.

Share pledges of Mongolian Coal Corporation Limited and Mongolian Coal Corporation S.à.r.l. are shared among the BNP and ICBC Facility and the Senior Notes.

The total amount of indebtedness covered with the above pledges is USD744.8 million as at 30 June 2016.

ER pledged its 4,207,500 common shares, being 16.46% common shares held by it in International Medical Centre LLC ("**IMC**"), to secure loan repayment obligation of IMC in proportion to its equity interest in IMC.

#### **Contingent Liabilities**

As at 30 June 2016, the Company has contingent liability in respect of the consideration adjustments for the acquisition of BN mine pursuant to the share purchase agreement (the "Share Purchase Agreement") entered into by the Company and its subsidiary Mongolian Coal Corporation Limited with Quincunx (BVI) Ltd and Kerry Mining (Mongolia) Limited ("KMM") on 31 May 2011 in relation to the acquisition of the entire share capital of Baruun Naran Limited (formerly known as QGX Coal Ltd.) (the "Acquisition"), which may arise from the royalty provision. Under the royalty provision, an additional LOM payment of USD6 per tonne may be payable in the event that the actual amount of coal extracted from the BN mine exceeds a specified semi-annual production target fixed on the date of the determination of the total reserves in each semi-annual period after 1 June 2011 commencing on 1 January and ending on 30 June and commencing on 1 July and ending on 31 December.

Under the royalty provisions for excessive coal production at the BN mine pursuant to the Share Purchase Agreement and the Settlement Agreement, the specified semi-annual ROM coal production has to exceed approximately 5.0 Mt. Therefore, the probability of royalty provision is considered to be very low.

 $\star$ 

#### **Financial Instruments**

The Company has a share option scheme, adopted on 17 September 2010 ("Share Option Scheme"), in which the board of directors of the Company (the "Board") is authorised, at its discretion, to grant to eligible participants options to subscribe for shares ("Share Options" or "Options") subject to the terms and conditions stipulated therein as incentives or rewards for their contributions to the Company.

Under the Share Option Scheme, the Company granted three batches of Share Options to its director and employees. On 12 October 2011, the Company granted 3,000,000 and 32,200,000 Share Options to a director and employees respectively, at the exercise price of HKD6.66 (which was adjusted to HKD4.53 due to rights issue in December 2014). On 28 November 2012, the Company granted another 5,000,000 and 17,750,000 Share Options to a director and employees respectively, at the exercise price of HKD3.92 (which was adjusted to HKD2.67 due to rights issue in December 2014). On 10 June 2015, the Company granted another 60,000,000 and 94,750,000 Share Options to a director and employees respectively, at the exercise price of HKD0.445.

The fair value of services received in return for Share Options granted is measured with reference to the fair value of Share Options granted. For the six months ended 30 June 2016, USD0.8 million was recognised in administrative expenses and capital reserves in relation to the equity-settled share-based transactions.

The Senior Notes have been accounted for as a hybrid financial instrument containing both a derivative component and a liability component. The derivative component was initially recognised at its fair value of USD4.9 million, and the attributable transactions costs of USD0.1 million were charged to the profit or loss for the year ended 31 December 2012.

The fair value of the derivative component of the Senior Notes as at 30 June 2016 was nil. The liability component was initially recognised at an amortised cost of USD591.7 million after taking into account of USD13.2 million as attributable costs.

#### **Capital Commitments and Capital Expenditures**

As at 30 June 2016, the Group had USD0.5 million of contracted capital commitments (as at 31 December 2015: USD0.5 million).

Table 10. The Group's historical capital expenditure for the periods indicated:

		For the six months ended 30 June		
	2016	2015		
	USD'000	USD'000		
Water supply facility	_	6		
Others	59			
Total	59	6		

#### **Operating Lease Commitments**

As at 30 June 2016, the Company had contracted obligations consisting of operating leases which totalled approximately USD0.5 million due within one year. Lease terms range from one to five years, with fixed rentals.

#### **Significant Investments Held**

As at 30 June 2016, the Company did not hold any significant investments. Save as disclosed in this interim report, the Company has no future plans for material investment or capital assets in the coming period.

#### Material Acquisitions and Disposals of Subsidiaries and Associated Companies

For the six months ended 30 June 2016, the Company did not have any material acquisitions and disposals of subsidiaries and associated companies.

#### **Other and Subsequent Events**

- (a) The Company had a meeting with the Steering Committee to finalise the Debt Restructuring term sheet. Following subsequent negotiations, the Company and the Steering Committee have agreed on the form of a term sheet that is available as Appendix A to the announcement of the Company dated 8 July 2016.
- (b) On 7 July 2016 (Cayman Islands time), the Company filed (i) an application (the "Application") with the Grand Court of the Cayman Islands (the "Cayman Court") to assist in the process of negotiations with its creditors and to facilitate recognition of the Debt Restructuring in different jurisdictions (as appropriate), as well as (ii) a petition for the winding up of the Company (the "Petition") which is a necessary pre-cursor to facilitate the Application, with the Cayman Court. The Application was heard by the Cayman Court on 19 July 2016 and the Cayman Court granted the order (the "Court Order") sought in the Application to appoint the joint provisional liquidators ("JPLs") who are authorized to develop and propose the Debt Restructuring in accordance with their powers conferred by the Court Order, which are limited to the Company itself rather than the Company's subsidiaries. Under the Court Order, experienced restructuring professionals, Mr. Simon Conway of PwC Corporate Finance Recovery (Cayman) Limited and Mr. Christopher So Man Chun of PricewaterhouseCoopers Ltd., are appointed as the JPLs of the Company. The JPLs submitted their first report to the Cayman Court on 25 August 2016 (Cayman Islands time). Court hearing of the Petition is scheduled to be heard on 1 September 2016. Relevant announcements were posted on the websites of Hong Kong Exchanges and Clearing Limited and the Company on 21 July 2016 and 26 August 2016.
- (c) As the Company was informed by counsel to the lenders (including the Lenders to the Company under the BNP and ICBC Facility, as amended from time to time, dated 5 March 2014) on 8 July 2016, BNP Paribas Singapore Branch filed an application for the winding-up of the Company and the appointment of the joint official liquidators to the Company (the "BNP Petition") with the Cayman Court immediately after the Company submitted the Application and the Petition to the Cayman Court on 7 July 2016 (Cayman Islands time). This information on the submission of the BNP Petition is available in the announcement of the Company dated 11 July 2016. All future events and announcements relating to the JPLs and the Cayman Court will be duly announced by the Company in due course.
- (d) On 25 July 2016, the Group has fulfilled all conditions set forth in the DTR entered into by and between with the Parallel Lenders on 11 March 2016. Under the DTR, the Group's obligations under the borrowings taken from the Parallel Lenders have been discharged in their entirety and the relevant security thereunder have been fully released.

 $\bigstar$ 

(e) The Group agreed to transfer its entire investment in Tavan Tolgoi Power Plant Water Supply LLC (the "TTPPWS"), a wholly-owned subsidiary of the Group, to a third party for consideration of MNT12.5 billion as a part of settlement of its certain overdue obligations. The transaction was completed and share transfer was registered on 8 July 2016. The book value of investment in TTPPWS was MNT6.6 billion and as such the Group realized a gain of MNT5.9 billion from this transaction.

#### **Employees**

As at 30 June 2016, the number of employees of the Group was 1,494, compared with 1,897 employees as at 30 June 2015. The Group's total staff costs for the six months ended 30 June 2016 was USD6.0 million, compared to USD17.3 million for the six months ended 30 June 2015 (see Note 7(b) of the Notes to the Unaudited Interim Financial Report on page 59).

The Group's employees are remunerated with reference to the individual performance, experience, qualification and the prevailing salary trends in the local market, which is subject to review from time to time. With reference to the Group's financial and operational performance, employees may also enjoy other benefits such as discretionary bonus and Share Options pursuant to the Company's Share Option Scheme.

In the six months ended 30 June 2016, the Company focused on internally sourced trainings rather than trainings provided by external parties. As at 30 June 2016, a total of 256 employees attended professional trainings, out of which 10 employees attended mining heavy equipment operator training, 194 employees attended mine maintenance training and 52 employees attended professional development training.

### PURCHASE, SALE OR REDEMPTION OF THE COMPANY'S LISTED SECURITIES

For the six months ended 30 June 2016, neither the Company nor any of its subsidiaries had purchased, sold, or redeemed any of the Company's listed securities.

#### DIVIDEND

The Board does not recommend the payment of dividend in respect of the six months ended 30 June 2016 (dividend for the six months ended 30 June 2015: nil)

#### REVIEW BY AUDIT COMMITTEE

The Audit Committee of the Company currently comprises of one non-executive Director, Mr. Gankhuyag Adilbish, and three independent non-executive Directors, namely Mr. Chan Tze Ching, Ignatius, Mr. Unenbat Jigjid, and Dr. Khashchuluun Chuluundorj. Mr. Chan Tze Ching, Ignatius is the chairman of the Audit Committee.

The Audit Committee of the Company, together with the management, have reviewed the accounting principles and practice adopted by the Group, and also discussed issues related to financial reporting, including the review of the Group's unaudited interim results and interim report for the period under review. The Audit Committee is of the opinion that such statements and the interim report comply with the applicable accounting standards, the Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited (the "Listing Rules") and legal requirements, and that adequate disclosures have been made.

### CORPORATE SOCIAL RESPONSIBILITY

#### CORPORATE SOCIAL RESPONSIBILITY

MIMIC

35

In line with our Corporate Social Responsibility ("CSR") policy, we aim to build long-lasting and meaningful relationships with the communities in which we operate. We care about their sustainable economic and social development, and therefore, we support and implement a wide range of programs and initiatives that focus on job creation, improved access to health and education, and local business development. The ultimate aim is to build stronger and more sustainable communities.

During the reporting period, the Company continued with the following CSR initiatives:

#### Sustainable livelihood support program

To create better economic opportunities for resettled and affected herders, the Company is implementing a sustainable livelihood support program that primarily focuses on supporting local start-up businesses and small and medium enterprises. As of the end of the reporting period, a total of 15 herder households, looking to expand their businesses, got enrolled in the program and received interest-free business loans from a revolving loan fund set up by the Company. Out of these, six herder households have fully paid off their business loans and the remaining nine households have been repaying their loans on schedule.

#### Health support program

To strengthen the capacity of the local health care infrastructure and help improve the quality and accessibility of health care services for community members, MMC contributed approximately MNT110 million for the construction of a new inter-soum hospital in Tsogttsetsii soum, Umnugobi aimag. The financing was mainly used to purchase modern medical equipment and furniture required for the new hospital. The new hospital provides health care services for the residents of Tsogttsetsii and neighboring soums in the region. It was officially opened in April 2016.

### Corporate Social Responsibility

#### Community development program

Five years ago, the Company created a wind protected area for the Tsogttsetsii soum residents to support their community vegetable gardening initiatives and has sustained it as part of its community development program. In addition to properly managing the land and an irrigation system, the Company organizes professional training programs on vegetable growing and provides the community members with seeds and supplies. During the reporting period, over 60 households of the soum grew 20 types of fruits and vegetables in the area. In April 2016, the Company organized a community meeting jointly with the local government and discussed various ways of strengthening the collective actions among those who grow vegetables as part of the program.

#### "Good Neighborhood" initiative

Within the framework of the "Good Neighborhood" initiative, the Company provides various forms of in-kind assistance to its host communities. During the period under review, the following activities were carried out:

- Free-of-charge seedlings, shrubs and trees were provided to the local administration for their use in various landscaping projects in and around Tsogttsetsii soum;
- Free-of-charge thermal coal was provided to Dalanzadgad power plant and Khanhongor soum of Umnugobi aimag during harsh winter months;
- Gently-used office furniture and computers were donated to a number of local organizations including the police office in Tsogttsetsii soum, Mongolian Sustainable Development and Social Responsibility Council, a local non-governmental organization, and a secondary school for disabled children.

#### HEALTH, SAFETY AND ENVIRONMENT

Our health, safety and environment ("HSE") performance is driven by our commitment to "Zero Harm" to people and host communities and minimal adverse impacts on the environment. Below is an overview of activities carried out in the reporting period.

- In the first half of 2016, the LTIFR, an injury frequency rate expressed as the number of injuries per million hours worked, was 0.0 for 1,133,958 man-hours recorded within the Company's coal mining, processing and transportation operations.
- Workplace occupational hygiene and safety inspections were carried out more than 90 times at various workplace locations. All identified hazards and incidences of occupational health, safety and environment management system non-conformance were investigated in order to discover and eliminate the root causes.
- A total of 11 workplace safety risk assessments were conducted during the reporting period to minimize or eliminate work-related hazards and to enhance awareness of daily safety routines among the Company's employees.
- Re-vegetation activity was conducted last year on a topsoil stockpile which covers an area of 1.3 hectares. Onobrychis arenaria and Medicago falcate are perennial plant species which support soil nutrient cycling and are well adapted to the local climate. Also, two species of Gobi endemic trees were planted in the re-vegetation. In the first half of 2016, the vegetation cover percentage in restored lands measured 70% higher than that of analogue sites as a result of improved regular irrigation and caring activities.

### Corporate Social Responsibility

Re-vegetated topsoil stockpile, July 2015

Re-vegetated topsoil stockpile, July 2016

- Soil restoration activity was carried out last year at a disturbed land near the site power plant. Silverberry, a tree native to the Gobi region was used in the restoration project and the survival rate of the trees was approximately 95% for the first half of 2016. Using native trees in land rehabilitation offers a number of benefits, such as a reduction in emissions and haul road noise as well as the provision of shelter and habitat for small mammals and invertebrates.
- Within the framework of the UHG project's Biodiversity action plan, two species (Olgaea leucophylla and Caryoptheris mongolica/of) endangered and endemic plants in the Gobi region were planted at the nursery field in April 2016. It was the first time such endangered species of plant, native to the region, had been planted for biodiversity conservation purposes in a mine-site area.
- The Company's environmental team provides ice and hay to hoofed mountain animals in the region, including the Siberian ibex and argali (wild sheep), throughout the winter months in several locations in Tsetsii Mountain every year. The activity, also a part of the Biodiversity action plan, was carried forward into 2016 and the Company's employees provided salt to hoofed mountain animals in cooperation with local environmental protection officers. It is believed that such activities help keep animals' habitat stable during harsh winter months.

The Company organizes voluntary environmental protection activities in Tsogttsetsii soum on a regular basis. On National Tree Planting Day, the Company's employees planted over 1,835 trees in and around the UHG project mine site and 200 seedlings were donated to local organizations. In addition, tree planting activities were organized in May 2016 along the paved road between the worker's camp and the mine site. Employees also installed an irrigation system and a water tank in the area and approximately 750 tree seedlings were planted.

A

### DISCLOSURE OF INFORMATION

#### MODEL CODE FOR SECURITIES TRANSACTIONS

The Company has adopted the Model Code for Securities Transactions by Directors of Listed Issuers (the "Model Code") as set out in Appendix 10 to the Listing Rules. Specific enquiry has been made to all the Directors and all the Directors have confirmed that they have complied with the Model Code throughout the six months ended 30 June 2016.

The Company has also established written guidelines on no less exacting terms than the Model Code for securities transactions by relevant employees (the "**Employees Written Guidelines**") who are likely to possess inside information of the Company. No incident of non-compliance with the Employees Written Guidelines by the employees was noted by the Company during the reporting period.

### STATEMENT OF COMPLIANCE WITH CORPORATE GOVERNANCE CODE

The Company has adopted the code provisions set out in the Corporate Governance Code (the "CG Code") contained in Appendix 14 to the Listing Rules as its code of corporate governance. The Company has complied with all the applicable code provisions as set out in the CG Code for the six months ended 30 June 2016.

### DIRECTORS' AND CHIEF EXECUTIVE'S INTERESTS AND SHORT POSITIONS IN SHARES, UNDERLYING SHARES AND DEBENTURES OF THE COMPANY OR ITS ASSOCIATED CORPORATIONS

As at 30 June 2016, the interest and short positions of the Directors and chief executive of the Company in the shares and underlying shares or debentures of the Company or its associated corporations (within the meaning of Part XV of the Securities and Futures Ordinance (Cap. 571 of the Laws of Hong Kong) ("SFO") which were required (i) to be notified to the Company and The Stock Exchange of Hong Kong Limited (the "Stock Exchange") pursuant to Divisions 7 and 8 of Part XV of the SFO (including interests and short positions which they are taken or deemed to have under such provisions of the SFO); or (ii) pursuant to section 352 of the SFO, to be entered in the register referred to therein; or (iii) pursuant to the Model Code to be notified to the Company and the Stock Exchange were as follows:

#### Notes:

- (1) MCS Mining Group Limited is owned as to approximately 57.76% by MCS Holding LLC and approximately 42.24% by MCS (Mongolia) Limited. MCS Holding LLC is wholly-owned by MCS Global Limited which in turn is wholly-owned by MCS (Mongolia) Limited. MCS (Mongolia) Limited is owned as to approximately 49.84% by Novel Holdings Group Limited which in turn is wholly-owned by Mr. Odjargal Jambaljamts, and 28.69% by Trimunkh Limited which in turn is wholly-owned by Mr. Od Jambaljamts. MCS Mining Group Limited holds 3,231,593,984 shares and had a short position in 2,815,457,053 shares in the Company. Novel Holdings Group Limited and Trimunkh Limited each also directly held 461,647,547 shares and 265,762,267 shares in the Company, and Trimunkh Limited had a short position in 106,304,907 shares in the Company. Ms. Batmunkh Dashdeleg is the spouse of Mr. Odjargal Jambaljamts, and Ms. Munkhsuren Surenkhuu is the spouse of Mr. Od Jambaljamts.
- (2) (a) KMUHG is a direct wholly-owned subsidiary of KMM. Fexos controls more than one-third of the voting power of KMM. Fexos is a direct wholly-owned subsidiary of KHL which in turn is a direct whollyowned subsidiary of KGL. Accordingly, KMM, Fexos, KHL and KGL were deemed to be interested in the 750,000,000 shares that KMUHG was interested.
  - (b) Fexos controls more than one-third of the voting power of Kerry Asset Management Limited ("**KAM**"). Fexos, KHL and KGL were deemed to be interested in the 6,890,120 shares that KAM was interested.
- (3) Out of KGL's corporate interest in 1,197,461,111 shares of the Company, KGL's wholly-owned subsidiaries (other than KHL) were interested in 440,570,991 shares of the Company, KHL (through companies that it controls more than one-third of the voting power) was interested in 756,890,120 shares of the Company.

Save as disclosed above, as at 30 June 2016, the Company has not been notified by any person (other than the Directors or chief executive of the Company) who had interests or short position in the shares or underlying shares of the Company.

#### CHANGE IN INFORMATION OF DIRECTORS

Changes in information of Directors which are required to be disclosed pursuant to Rule 13.51B(1) of the Listing Rules since the date of the 2015 Annual Report are set out below:

The director's fee for each of the Directors under the respective director's service agreement and letter of appointment for the first half of the year 2016 was reduced by 50%.

Mr. Chan Tze Ching, Ignatius was redesignated as Chairman of the Council of Hong Kong Polytechnic University with effect from 1 January 2016.

MIMIC

#### SHARE OPTION SCHEME

The Share Option Scheme was adopted by the Company on 17 September 2010, which became effective on the Listing Date on 13 October 2010 (the "Adoption Date"). Share Options could be granted within a period of 10 years from the Adoption Date. Therefore, as at 30 June 2016, the remaining life of the Share Option Scheme was approximately 4 years and 3 months. The purpose of the Share Option Scheme is to provide an opportunity for employees of the Group to acquire an equity participation in the Company and to encourage them to work towards enhancing the value of the Company for the benefit of the Company and its shareholders as a whole.

Under the Share Option Scheme, the Company granted three batches of Share Options to a Director and employees. On 12 October 2011, the Company offered 3,000,000 and 34,500,000 Share Options to a Director and employees respectively at the exercise price of HKD6.66, and 3,000,000 and 32,200,000 Share Options were accepted by a Director and employees respectively. On 28 November 2012, the Company granted 5,000,000 and 17,750,000 Share Options to a Director and employees respectively with the exercise price of HKD3.92.

As a result of the rights issue completed on 29 December 2014, adjustments were made to the exercise price and the number of Shares falling to be issued upon the exercise of the Share Options in accordance with the terms of the Share Option Scheme and the supplementary guidance issued by the Stock Exchange on 5 September 2005 regarding the adjustment of share options under Rule 17.03(13) of the Listing Rules. The exercise price of HKD6.66 for the Share Options granted on 12 October 2011 was adjusted to HKD4.53 and the exercise price of HKD3.92 for the Share Options granted on 28 November 2012 was adjusted to HKD2.67.

A total of 48,100,000 Share Options were outstanding under the Share Option Scheme as at the completion of the rights issue. The number of the Shares falling to be issued under the outstanding Share Options were adjusted and both the exercise price and the number of Shares falling to be issued were adjusted pursuant to Clause 11 of the Share Option Scheme (the "**Option Adjustments**") with effect from 1 January 2015, and such adjustments have been reviewed and confirmed by the independent financial adviser of the Company, Somerley Capital Limited. Please refer to the 2014 Annual Report of the Company for details of the adjustment.

On 10 June 2015, the Company granted another 60,000,000 and 94,750,000 Share Options to a Director and employees respectively at the exercise price of HKD0.445. Details of the movements in the number of Share Options of the Company during the six months ended 30 June 2016 were as follows:

#### Table 14. Director:

#### Notes:

- 1. The Share Options are subject to vesting scale in four tranches of 25% each. The exercise periods are as follows:
  - (1) first 25% of the Share Options granted 12 October 2012 to 12 October 2019
  - (2) second 25% of the Share Options granted 12 October 2013 to 12 October 2019
  - (3) third 25% of the Share Options granted 12 October 2014 to 12 October 2019
  - (4) fourth 25% of the Share Options granted 12 October 2015 to 12 October 2019
- 2. The Share Options are subject to vesting scale in three tranches. The exercise periods are as follows:
  - (1) first 25% of the Share Options granted 28 November 2013 to 28 November 2020
  - (2) second 25% of the Share Options granted 28 November 2014 to 28 November 2020
  - (3) third 50% of the Share Options granted 28 November 2015 to 28 November 2020
- 3. The Share Options are subject to vesting scale in four tranches of 25% each. The exercise periods are as follows:
  - (1) first 25% of the Share Options granted 10 June 2015 to 10 June 2020
  - (2) second 25% of the Share Options granted 10 June 2016 to 10 June 2020
  - (3) third 25% of the Share Options granted 10 June 2017 to 10 June 2020
  - (4) fourth 25% of the Share Options granted 10 June 2018 to 10 June 2020
- 4. As a result of the rights issue of the Company completed on 29 December 2014, the exercise prices and the number of the Shares falling to be issued upon full exercise of the outstanding Share Options were adjusted in accordance with the Option Adjustments with effect from 1 January 2015.

#### **Treatment of Lapse of the Share Options**

Pursuant to the Share Option Scheme, in the event that an employee ceases to be an employee of the Company before exercising the option in full, the option (to the extent not already exercised) shall lapse on the date of cessation or termination and not be exercisable unless the Directors otherwise determine. The offer letter to grantees also states that any option shares that have not yet vested according to the vesting scales shall be considered "Unvested Shares", and upon cessation of employment or services on behalf of the Company for any reason, no further vesting of the option will occur and any unvested portion of the option will terminate.

The Directors determined that in the event that an employee ceases to be an employee of the Company before exercising the option in full, only unvested Share Options (but not all the outstanding Share Options) will lapse effective from 1 August 2013.

### NOTES TO THE UNAUDITED INTERIM FINANCIAL REPORT

#### 1 CORPORATE INFORMATION

The Company was incorporated in the Cayman Islands on 18 May 2010 as an exempted company with limited liability under the Companies Law, Cap 22 (Law 3 of 1961, as consolidated and revised) of the Cayman Islands. The Group is principally engaged in the mining, processing, transportation and sale of coal products.

Pursuant to a group reorganisation completed on 17 September 2010 (the "**Reorganisation**") to rationalise the group structure for the public listing of the Company's shares on the Main Board of the Stock Exchange, the Company's shares were listed on the Stock Exchange on 13 October 2010. Details of the Reorganisation are set out in the prospectus of the Company dated 28 September 2010.

#### 2 BASIS OF PREPARATION

The Group had net current liabilities of USD906,081,000 as at 30 June 2016 (as at 31 December 2015: net current liabilities of USD220,761,000) and made a loss of USD61,707,000 for the six months period then ended. These conditions indicate the existence of a material uncertainty which may cast significant doubt upon the going concern assumption.

In view of such circumstances, the Directors have given careful consideration to the future liquidity and performance of the Group and its available resources of financing in evaluating whether the going concern basis in preparing the consolidated financial statements is appropriate. The Directors have reviewed trading and cash flow forecasts which take into consideration the uncertainties in the current operating environment. The Directors have concluded that there are material uncertainties surrounding going concern as below:

Future trading may not be in line with the assumption in the Group's latest forecasts, the
achievability of which is dependent upon the current economic environment and the price of
coking coal market.

MIMIC

#### 2 BASIS OF PREPARATION (Continued)

- The Group is due to redeem the Senior Notes issued by the Company with a principal amount of USD600,000,000 on 29 March 2017 (see Note 20). The Group is due to repay the BNP and ICBC Facility within the year ending 31 December 2016 (see Note 18). The Group is overdue in payment of interest under the Senior Notes and in repayment of certain principal and interest under the BNP and ICBC Facility. As announced by the Company on 26 January 2016, 14 March 2016 and 23 March 2016, the Group has been actively seeking for the potential restructuring of the Senior Notes with the holders of the Senior Notes (the "Holders") and maintained active discussions with the Steering Committee, Given the material amount of the BNP and ICBC Facility and also the Intercreditors Agreement in relation to the shared securities and guarantees, the discussions to revise the BNP and ICBC Facility are undertaken in connection with the Debt Restructuring. The Company announced on 8 July 2016 an indicative terms of the Debt Restructuring Proposal. The Steering Committee has indicated that it supports the indicative terms of the Debt Restructuring Proposal. The discussions and negotiations with the Steering Committee, the Lenders and other creditors of the Group are still ongoing. The Directors have no reason to believe that the Debt Restructuring will not be achieved after formulating and agreeing a detailed plan for protecting the interests of all stakeholders of the Group in this regard.
- As disclosed in Note 28 (b), the Company filed the Application with the Cayman Court on 7 July 2016 (Cayman Islands time) for the appointment of the JPLs over the Company on a "soft touch" basis, to assist the Debt Restructuring negotiation with its creditors; and also filed the Petition as a necessary pre-cursor to facilitate the Application. An order was granted by the Cayman Court on 19 July 2016 with respect of the appointment of the JPLs, and the hearing of the Petition is scheduled to be heard on 1 September 2016. The Company has worked together with the JPLs, and the Directors are not aware of any impediments yet indicating negative result of the upcoming hearing.

#### 2 BASIS OF PREPARATION (Continued)

- As announced by the Company on 29 April 2016, the Group was in payment default under the BNP and ICBC Facility (see Note 18). This default also triggered a cross default under the Senior Notes. On 26 April 2016, the Company received (i) a notice from the Agent on immediate payment of all amounts accrued or outstanding under the BNP and ICBC Facility of USD95 million, and (ii) a notice from the Shared Security Agent on enforcement of the security interest over capital stock of Mongolian Coal Corporation Limited. As disclosed in Note 28 (c), BNP Paribas Singapore Branch filed the BNP Petition with the Cayman Court immediately after the Company filed its Application and the Petition. Given the aforementioned order granted by Cayman Court on 19 July 2016, the BNP Petition has been adjourned. The Directors closely monitor the progress and status of the BNP Petition, and maintain regular and active communication with the Lenders.
- The Group is overdue in repaying promissory notes of USD72,216,000 to QGX (see Note 19(v)).
   The Company continues to maintain regular and constructive discussions with QGX regarding the settlement arrangements, with awareness of the Debt Restructuring.

The Directors consider that, among all the above-mentioned matters and conditions, the key determining factor lies with the Debt Restructuring and it is the material uncertainty in relation to the going concern assumption.

Based on the Group's business plan and cash flow forecast, and assuming having the support from its creditors in relation to the Debt Restructuring and also the ongoing support from its shareholders, the Directors are optimistic to have sufficient financial resources to cover operating costs and to meet its financial obligations as and when they fall due for the twelve-month period from 30 June 2016. In the meantime, the Directors have identified a number of management initiatives that the business could pursue and which they are of the opinion that can be achieved to mitigate the liquidity and solvency pressure including:

- The Group had updated the service agreement with the mining contractor by taking decreased charge rates; such cost saving effect has been revealed during the six months ended 30 June 2016 and thereafter;
- The Group manages capital expenditure to minimum levels;
- The Group is seeking prepayments at reaching new coal off-take agreements, and negotiating business terms with suppliers to ease cash flow demands.

#### 2 BASIS OF PREPARATION (Continued)

Accordingly, the Directors are of the opinion that it is appropriate to prepare the consolidated financial statements on a going concern basis. The consolidated financial statements do not include any adjustments that would result from the going concern basis of preparation being inappropriate.

This interim financial report has been prepared in accordance with the applicable disclosure provisions of the Listing Rules, including compliance with International Accounting Standard ("IAS") 34, Interim financial reporting, issued by the International Accounting Standards Board ("IASB"). It was authorised for issuance on 26 August 2016.

The interim financial report has been prepared in accordance with the same accounting policies adopted in the 2015 annual financial statements, except for the accounting policy changes that are expected to be reflected in the 2016 annual financial statements. Details of these changes in accounting policies are set out in Note 3.

The preparation of an interim financial report in conformity with IAS 34 requires management to make judgements, estimates and assumptions that affect the application of policies and reported amounts of assets and liabilities, income and expenses on a year to date basis. Actual results may differ from these estimates.

The interim financial report contains condensed consolidated financial statements and selected explanatory notes. The notes include an explanation of events and transactions that are significant to an understanding of the changes in financial position and performance of the Group since the 2015 annual financial statements. The condensed consolidated interim financial statements and notes thereon do not include all of the information required for full set of financial statements prepared in accordance with International Financial Reporting Standards ("IFRSs").

The financial information relating to the financial year ended 31 December 2015 that is included in the interim financial report as comparative information does not constitute the Company's statutory annual consolidated financial statements for that financial year but is derived from those financial statements. The Company's auditor has reported on those financial statements. The auditor's report was unqualified but included a reference to a matter relating to the existence of the material uncertainties which may cast significant doubt about the Group's ability to continue as a going concern to which the auditor drew attention by way of emphasis without qualifying its report dated 24 March 2016.

#### 3 CHANGES IN ACCOUNTING POLICIES

The IASB has issued a number of amendments to IFRSs that are first effective for the current accounting period of the Group. Of these, the following developments are relevant to the Group:

- Annual Improvements to IFRSs 2012-2014 Cycle
- Amendments to IAS 1, Presentation of financial statements: Disclosure initiative

The Group has not applied any new standard or interpretation that is not yet effective forthe current accounting period.

#### Annual Improvements to IFRSs 2012-2014 Cycle

This cycle of annual improvements contains amendments to four standards. Among them, IAS 34, Interim financial reporting, has been amended to clarify that if an entity discloses the information required by the standard outside the interim financial statements by a cross-reference to the information in another statement of the interim financial report, then users of the interim financial statements should have access to the information incorporated by the cross-reference on the same terms and at the same time. The amendments do not have an impact on the group's interim financial report as the group does not present the relevant required disclosures outside the interim financial statements.

#### Amendments to IAS1, Presentation of financial statements: Disclosure initiative

The amendments to IAS 1 introduce narrow-scope changes to various presentation requirements. The amendments do not have a material impact on the presentation and disclosure of the group's interim financial report.

#### 4 SEGMENT REPORTING

The Group has one business segment, the mining, processing, transportation and sale of coal products. The majority of its customers are located in the PRC. Based on information reported to the chief operating decision maker for the purpose of resource allocation and performance assessment, the Group's only operating segment is the mining, processing, transportation and sale of coal. Accordingly, no additional business and geographical segment information are presented.

#### **5 REVENUE**

The Group is principally engaged in the mining, processing, transportation and sale of coal products. Revenue represents the sales value of goods sold to customers exclusive of value added or sales taxes and after deduction of any trade discounts and volume rebates. The amount of each significant category of revenue recognised for the six months ended 30 June 2016 is as follows:

	Six months ended 30 June	
	2016 USD'000	2015 USD'000
Self-produced coal		
HCC	31,066	47,963
Washed thermal coal ("middlings")	_	1
Trading of coal procured from Chinese third party sources	_	23,840
	31,066	71,804

Revenue during the six months ended 30 June 2016 include approximately USD26,777,000 (six months ended 30 June 2015: USD17,063,000) which arose from sales of HCC to customers through agent sales arrangements for diversifying and expanding the Group's sales channels.

For the six months ended 30 June 2016, the Group had five customers that individually exceeded 10% of the Group's turnover, with the purchase amounts of approximately USD5,264,000, USD4,937,000, USD4,540,000, USD4,322,000 and USD3,274,000, respectively. In the first half of 2015, the Group had four customers that individually exceeded 10% of the Group's turnover, with the purchase amounts of approximately USD26,119,000, USD15,441,000, USD10,657,000, and USD7,503,000, respectively.

#### **6 COST OF REVENUE**

7
-W

	Six months ended 30 June	
	2016	2015
	USD'000	USD'000
Mining costs	11,224	20,169
Processing costs	6,994	7,783
Transportation costs	8,155	8,748
Provision for coal inventories (Note 15)	11,837	6,122
Others (Note (i))	8,559	35,266
Cost of revenue during mine operations	46,769	78,088
Cost of revenue during idled mine period (Note (ii))	17,859	19,057
Cost of revenue	64,628	97,145

#### Notes:

- (i) Others include cost of coal procured from Chinese third party sources and royalty tax for the coal exported from Mongolia.
- (ii) For the six months ended 30 June 2016, cost of revenue during idled mine period includes mining contractor costs and depreciation expense related to idled plant and equipment.

#### 7 LOSS BEFORE TAXATION

Loss before taxation is arrived at after charging/(crediting):

#### (a) Net finance costs:

	Six months ended 30 June	
	2016	2015
	USD'000	USD'000
Interest income	(1,235)	(3,021)
Foreign exchange gain, net (Note(i))	(17,357)	_
Finance income	(18,592)	(3,021)
Interest on bank and other borrowings	9,229	11,129
Interest on liability component of Senior Notes (Note 20)	27,478	27,242
Transaction costs	1,601	2,223
Unwinding interest on		
- Accrued reclamation obligations (Note 22)	179	431
Net interest expense	38,487	41,025
Foreign exchange loss, net	_	4,914
Finance costs	38,487	45,939
Net finance costs	19,895	42,918

#### Notes:

- (i) Foreign exchange gain (net) during the six months ended 30 June 2016 includes realized foreign exchange gain of approximately USD18,384,000 (six months ended 30 June 2015: nil) in respect of certain receivables.
- \* No borrowing costs have been capitalised during the six months ended 30 June 2016 and the six months ended 30 June 2015.

#### 7 LOSS BEFORE TAXATION (Continued)

### MIMIC

#### (b) Staff costs:

	Six months ended 30 June	
	2016	2015
	USD'000	USD'000
Salaries, wages, bonuses and benefits	4,621	13,815
Retirement scheme contributions	625	1,565
Equity-settled share-based payment expenses (Note 21)	799	1,919
	6,045	17,299

Pursuant to the relevant labour rules and regulations in Mongolia, the Group participates in defined contribution retirement benefit schemes ("**the Schemes**") organised by the GoM whereby the Group is required to make contributions to the Schemes at a rate of 7% of the eligible employees' salaries. Contributions to the Schemes vest immediately.

The Group has no other material obligation for the payment of pension benefits beyond the annual contributions described above.

#### (c) Other items:

	Six months ended 30 June	
	2016 USD'000	2015 USD'000
Depreciation and amortisation	17,117	23,599
Operating lease charges: minimum lease payments	236	1,108
Costs of inventories	64,628	97,145
Loss/(gain) on disposal of property, plant and		
equipment and assets held for sale	65	(60)
Selling and distribution costs (Note (i))	5,707	5,500

#### Note:

<sup>(</sup>i) Selling and distribution costs represent fees and charges incurred for exporting coal into PRC, logistics and transportation costs, governmental fees and charges and fixed agent fees associated with the market penetration strategy to diversify and expand sales channels in the PRC.

#### 8 INCOME TAX

(a) Income tax in the consolidated statement of comprehensive income represents:

	Six months ended 30 June	
	2016	2015 USD'000
	USD'000	
Current tax	169	214
Deferred taxation	(2,002)	(6,941)
	(1,833)	(6,727)

(b) Reconciliation between tax expense and accounting loss at applicable tax rates:

	Six months ended 30 June	
	2016 USD'000	2015 USD'000
Loss before income tax	(63,540)	(85,914)
Tax on loss before taxation, calculated at the rates		
applicable in profits/(loss) in the countries concerned	(1,062)	(7,489)
Tax effect of non-deductible expense (Note (iii))	8,173	585
Tax effect of non-taxable income (Note (iii))	(9,191)	(821)
Tax losses not recognized	227	998
Actual tax expenses	(1,833)	(6,727)

#### Notes:

- (i) Pursuant to the income tax rules and regulations of Mongolia, the Group is liable to Mongolian Enterprise Income Tax at a rate of 10% of the first MNT3 billion taxable income and 25% of the remaining taxable income for the six months ended 30 June 2016 and 2015. According to the Corporate Income Tax Law of the PRC, the Company's subsidiary in the PRC is subject to statutory income tax rate of 25%.
- (ii) Pursuant to the rules and regulations of the Cayman Islands, the Group is not subject to any income tax in the Cayman Islands. The Group is not subject to Hong Kong and Luxembourg profits tax as it has no assessable income arising in or derived from Hong Kong and Luxembourg during the six months ended 30 June 2016 and 2015.
- (iii) Non-deductible and non-taxable items represent mainly the unrealised exchange gain which is non-taxable and other non-deductible expenses and non-taxable income pursuant to the income tax rules and regulations of Mongolia and other related tax source regions during the six months ended 30 June 2016 and 2015.

### MMC

### Notes to the Unaudited Interim Financial Report

Six months and ad 30 June

#### 9 LOSS PER SHARE

#### (a) Basic loss per share

The calculation of basic loss per share for the six months ended 30 June 2016 is based on the loss attributable to ordinary equity shareholders of the Company for the period of USD61,720,000 (six months ended 30 June 2015: loss attributable to ordinary equity shareholders of the Company of USD79,050,000) and the 9,262,591,250 ordinary shares (six months ended 30 June 2015: 9,262,591,250 ordinary shares) in issue during the six months ended 30 June 2016. In calculating the loss per share, the weighted average number of shares outstanding during the six months ended 30 June 2016 and 2015 were calculated as if the bonus elements without consideration included in the rights issue had existed from the beginning of the comparative period.

#### (b) Diluted loss per share

For the six months ended 30 June 2016 and 30 June 2015, basic and diluted loss per share are the same as the effect of the potential ordinary shares outstanding is anti-dilutive.

The equity-settled share-based payment transactions (see Notes 21) are anti-dilutive and therefore not included in calculating diluted loss per share for the six months ended 30 June 2016 and 30 June 2015.

#### 10 OTHER COMPREHENSIVE INCOME

	Six months ended 30 June	
	2016	2015
	USD'000	USD'000
Exchange differences on translation of:		
- financial statements of overseas subsidiaries	3,607	606
<ul><li>net investment</li></ul>	(13,379)	24,418
Reclassification adjustments for amounts transferred to profit or loss:		
<ul> <li>disposal of net investment</li> </ul>	(978)	(2,075)
	(10,750)	22,949

#### 11 PROPERTY, PLANT AND EQUIPMENT

Mining properties of the Group at 30 June 2016 include stripping activity assets carrying book value of USD230,545,000 (31 December 2015: USD225,233,000).

During the six months ended 30 June 2016, the additions of property, plant and equipment of the Group, representing mainly various mining structures, amounted to USD6,643,000 (six months ended 30 June 2015: USD22,226,000). Items of property, plant and equipment with a net book value of USD1,606,000 were disposed of during the six months ended 30 June 2016 (six months ended 30 June 2015: USD276,000). As at 30 June 2016, certain of the Group's borrowings were secured by the Group's coal handling and preparation plant-modules I and II, power plant and water supply infrastructure assets-phase I with a net book value of USD88,063,000, USD22,653,000 and USD2,418,000, respectively (31 December 2015: USD91,100,000, USD23,519,000 and USD2,532,000 respectively) (see Note 18).

#### 12 CONSTRUCTION IN PROGRESS

The construction in progress is mainly related to water supply extension facilities and other mining related machinery and equipment.

#### 13 INTANGIBLE ASSETS

Intangible assets represent the acquired mining right.

Given the fact that coking coal market experienced continuing price decline and the operating losses sustained by the Group during the six months ended 30 June 2016, according to IAS 36, Impairment of assets, management has performed impairment assessment on the carrying amount of the Group's property, plant and equipment, construction in progress, intangible assets and long-term prepayments related to the UHG Mine and BN Mine operations (collectively referred to as "**UHG and BN Assets**"). For the purpose of this, the UHG and BN Assets are treated as a cash generating unit ("**CGU**").

The recoverable amount of the CGU was based on value in use, determined by discounting the future cash flows to be generated from the continuing use of the UHG and BN Assets. The key assumptions used in the estimation of value in use were based on the management's best estimation and were in line with the reserves and resource statements and exploration and evaluation works undertaken by appropriately qualified persons, detailed LOM plans.

Based on the impairment assessment, the carrying amount of the CGU has not exceeded its recoverable amount as at 30 June 2016, and has not resulted in the identification of an impairment loss as at 30 June 2016. The Directors are of the opinion that the impairment provision is adequate as at 30 June 2016 and no additional or reversal of impairment provision is needed in respect of the Group's non-financial assets in this regard. The Directors believe that the estimates and assumptions incorporated in the impairment assessment are reasonable; however, the estimates and assumptions are subject to significant uncertainties and judgements.

#### 14 OTHER NON-CURRENT ASSETS

	At	At
	30 June	31 December
	2016	2015
	USD'000	USD'000
		(audited)
Prepayments in connection with construction work,		
equipment purchases and others	61,816	48,813
Financial assets available-for-sale	1,799	1,769
	63,615	50,582

#### **15 INVENTORIES**

(a) Inventories in the consolidated statement of financial position comprise:

At	At
30 June	31 December
2016	2015
USD'000	USD'000
	(audited)
Coal <b>35,902</b>	39,434
Materials and supplies 12,694	12,517
48,596	51,951
Less: provision for coal inventories (17,959)	(6,122)
30,637	45,829

#### 15 INVENTORIES (Continued)

(b) The analysis of the amount of inventories recognised as an expense and included in profit or loss is as follows:

	Six months ended 30 June	
	2016	2015
	USD'000	USD'000
Carrying amount of inventories sold	34,932	71,966
Write down of inventories	11,837	6,122
	46,769	78,088

As at 30 June 2016, certain of the Group's borrowings were secured by the Group's coal inventory, net of provision for coal inventories, of USD14,274,000 (31 December 2015: USD27,941,000, net of provision for coal inventories) (see Note 18).

During six months ended 30 June 2016, USD11,837,000 (six months ended 30 June 2015: USD6,122,000) has been recognised as provision for coal inventories and expensed in profit or loss as cost of revenue. This provision was due to the decrease in the estimated net realisable value of coal products as a result of decreasing selling price, and changes in production plan.

#### 16 TRADE AND OTHER RECEIVABLES

	At	At
	30 June	31 December
	2016	2015
	USD'000	USD'000
		(audited)
Trade receivables (Note (a))	2,922	1,976
Other receivables (Note (c))	104,213	92,317
	107,135	94,293
Less: allowance for doubtful debts (Note (b)	(436)	(436)
	106,699	93,857

#### 16 TRADE AND OTHER RECEIVABLES (Continued)

Notes:

#### (a) Ageing analysis

Trade receivables (net of allowance for doubtful debts) are invoiced amounts due from the Group's customers which are due from the date of billing. Respective ageing analysis is as follows:

	At	At
	30 June	31 December
	2016	2015
	USD'000	USD'000
		(audited)
Within 90 days	2,042	631
90 to 180 days	444	734
180 to 365 days	_	175
	2,486	1,540

#### (b) Impairment of trade receivables

Impairment losses in respect of trade receivables are recorded using an allowance account unless the Group is satisfied that recovery of the amount is remote, in which case the impairment loss is written off against trade receivables directly.

As at 30 June 2016, an allowance for doubtful debts amounts to USD436,000 (31 December 2015: USD436,000) which was made on a collective basis in respect of the Group's trade receivable balances outstanding at the balance sheet date. Receivables that were past due but not impaired relate to a number of independent customers that have good track record with the Group, or had reached payment schedules with the Group before the authorised issue of this interim financial report. Therefore, management anticipates full recovery of its remaining outstanding trade receivables; therefore, no further loss provisions have been recorded in respect of the Group's trade receivables.

MIMIC

#### 16 TRADE AND OTHER RECEIVABLES (Continued)

Notes: (Continued)

#### (c) Other receivables

	At	At
	30 June	31 December
	2016	2015
	USD'000	USD'000
		(audited)
Amounts due from related parties (Note (i))	386	456
Prepayments and deposits (Note (ii))	30,355	25,462
VAT and other tax receivables (Note (iii))	17,252	20,752
Amounts due from the GoM in relation to the termination of the		
Concession Agreement (Note (iv))	_	41,952
Amounts due from EBRD, FMO and DEG (Note(v))	53,825	_
Others	2,395	3,695
	104,213	92,317

#### Notes:

- (i) Amount due from related parties are unsecured, interest-free and have no fixed repayment terms (see Note 25(a)).
- (ii) At 30 June 2016, prepayments and deposits mainly represent the prepayments made to the Group's mining contractor.
- (iii) VAT and other tax receivables include amounts that have been accumulated to date in certain subsidiaries and were due from the Tax Authority of Mongolia. Based on current available information the Group anticipates full recoverability of such amounts.
- (iv) It represented the compensation amount receivable from the GoM upon the termination of a Build-Operate-Transfer Concession Agreement (the "Concession Agreement") signed on 6 May 2013, relating to the railway base infrastructure between Ukhaa Khudag coking coal mine and Gashuun Sukhait border check point of Mongolia (the "UHG-GS Railway"), which was settled by issuance of MNT denominated promissory notes by the MOF to the Group.
- (v) On 11 March 2016, the Group entered into the DTR with the Parallel Lenders regarding the repayment of secured interest-bearing borrowings (see Note 18). Pursuant to the DTR, to release the obligations under the borrowings in their entirety and the relevant security (the "Release"), the Group endorsed to the Parallel Lenders certain promissory notes issued by MOF (see Note 16 (iv)) with total amount of approximately MNT105.6 billion; the Release is only effective after 121 calendar days plus 2 business days from the signing of the DTR. The Timing Condition has been fulfilled on 25 July 2016.

#### 17 CASH AT BANK AND IN HAND

	At	At
	30 June	31 December
	2016	2015
	USD'000	USD'000
		(audited)
Cash in hand	4	13
Cash at bank	2,978	50,689
Cash at bank and in hand	2,982	50,702
Less: time deposits with original maturity over three months	_	(50,000)
Cash and cash equivalents in the condensed		
consolidated cash flow statement	2,982	702

As at 30 June 2016, certain of the Group's borrowings were secured by the Group's cash at bank of USD1,508,000 (31 December 2015: USD39,000) (see Note 18).

#### **18 BORROWINGS**

(a) The Group's long-term interest-bearing borrowings comprise:

	At	At
	30 June	31 December
	2016	2015
	USD'000	USD'000
		(audited)
Bank loan		
- secured	144,818	144,818
- unsecured	1,265	40,000
Less: Current portion of long-term borrowings		
less amortised transaction costs	(145,166)	(182,631)
Less: Unamortised transaction costs	(917)	(2,187)
	_	_

As at 30 June 2016, the Group's current portion of long-term interest-bearing borrowings from EBRD, FMO and DEG of USD40,909,000 (31 December 2015: USD40,909,000), USD6,545,000 (31 December 2015: USD6,545,000) and USD4,364,000 (31 December 2015: USD4,364,000), respectively, bearing interest of one month LIBOR + 3.5%~3.75%, were secured by the Group's property, plant and equipment (see Note 11) and cash at bank (see Note 17). The obligations under this loan have been fully settled and released as at 25 July 2016 (see Note 16 (c) (v))

#### 18 BORROWINGS (Continued)

(a) The Group's long-term interest-bearing borrowings comprise: (Continued)

As at 30 June 2016, the Group's current portion of long-term interest-bearing borrowings under the BNP and ICBC Facility of USD93,000,000 (31 December 2015: USD93,000,000), bearing interest of LIBOR + 6.00% per annum, were secured by the Group's cash at bank (see Note 17) and inventory (see Note 15). The attributable transaction cost amounts to USD917,000 as at 30 June 2016.

As at 30 June 2016, unpaid borrowings under USD40,000,000 revolving credit facility was USD1,265,000 (31 December 2015: USD40,000,000). The facility bears 11.2% per annum interest, the latest extension of the maturity date was granted until 29 July 2016. The Company continues to maintain regular and constructive discussions with the lender regarding the extension and settlement arrangements.

The Group's long-term borrowings are repayable as follows:

	At	At
	30 June	31 December
	2016	2015
	USD'000	USD'000
		(audited)
Within 1 year or on demand	146,083	184,818
After 1 year but within 2 years	_	
	146,083	184,818

(b) The Group's short-term interest-bearing borrowings comprise:

At	At
30 June	31 December
2016	2015
USD'000	USD'000
	(audited)
Bank loans	
- Unsecured -	15,000
Current portion of long-term borrowings	
- Bank loan <b>146,083</b>	184,818
Less: Unamortised transaction costs (917)	(2,187)
145,166	197,631

Certain bank loans of the Group are subject to the fulfillment of covenants relating to certain of the Group's financial ratios, as are commonly found in lending arrangements with financial institutions. As at 30 June 2016, the Group was in payment default and breach of certain financial covenants under the BNP and ICBC Facility as at 30 June 2016.

Promissory notes (Note (v)) 72	,216	72,230
Others (Note (vi))	,346	24,391
302	,871	213,429

#### Notes:

(i) As of the end of the reporting period, the ageing analysis of trade creditors and bills payable (which are included in trade and other payables), based on the invoice date, is as follows:

	At 30 June	31 December
	2016	2015
	USD'000	USD'000
		(audited)
Within 90 days	25,188	14,122
90 to 180 days	17,482	2,153
180 to 365 days	47,737	14,019
Over 365 days	6,723	8,993
	97,130	39,287

- (ii) Receipts in advance represent payments in advance made by third party customers in accordance with the terms set out in respective sales agreements.
- (iii) Amounts due to related parties represent payables for equipment, construction work and services provided which are unsecured, interest-free and have no fixed terms of repayments (see Note 25(a)).
- (iv) Interest payables as at 30 June 2016 include 2% default interest calculated on the BNP and ICBC Facility starting from 22 March 2016, and unpaid semi-annual coupon under the Senior Notes, which were due in March 2016.

#### 19 TRADE AND OTHER PAYABLES (Continued)

Notes: (Continued)

- (v) On 27 November 2012, the Company issued two promissory notes to QGX each in the amount of USD52,500,000, and bear interest at a rate of 8.0% per annum as at 30 June 2016. The original maturity date was 22 November 2013 and it has been extended several times since then, the latest extension of the maturity date of two promissory notes was granted until 15 April 2016. The Company continues to maintain regular and constructive discussions with QGX regarding the settlement arrangements.
- (vi) Others represent accrued expenses, payables for staff related costs and other deposits.

All of the other payables and receipts in advance are expected to be settled or recognised in profit or loss within one year or are repayable on demand.

Interest payable	(26,625)
At 30 June 2016	598,487

On 29 March 2012, the Company issued the guaranteed Senior Notes in the aggregate principal amount of USD600,000,000 which were listed on the Singapore Exchange Securities Trading Limited. The Senior Notes bear interest at 8.875% per annum, payable semi-annually in arrears, and will be due in March 2017.

The Senior Notes may be redeemed at the option of the Company upon giving not less than 30 days or no more than 60 days notice to the Holders.

The Company has agreed, for the benefit of the Holders, to pledge all of the capital stock of Mongolian Coal Corporation Limited owned by the Company and to cause Mongolian Coal Corporation Limited to pledge all of the capital stock of Mongolian Coal Corporation S.à.r.l. owned by Mongolian Coal Corporation Limited. The Senior Notes are guaranteed by some of the Company's subsidiaries, namely Mongolian Coal Corporation Limited, Mongolian Coal Corporation S.à.r.l., Energy Resources Corporation LLC, ER, Energy Resources Mining LLC and Transgobi LLC.

The Senior Notes have been accounted for as a hybrid financial instrument containing both a derivative component and a liability component.

#### 20 SENIOR NOTES (Continued)

MIMIC

The derivative component was initially recognised at its fair value of USD4,920,000, and the attributable transaction cost of USD107,000 were charged to the profit or loss for the year ended 31 December 2012. Fair value of the derivative component as at year ended 31 December 2015 was nil; this amount was valued by the Directors with the reference to a valuation report issued by an independent business valuer based on the Binomial model. As at 30 June 2016, the Directors were of the opinion that the fair value of the derivative component remained unchanged as that of 31 December 2015.

The liability component was initially recognised at an amortised cost of USD591,707,000, after taking into account of attributable transaction costs of USD13,213,000.

The Group is seeking the Debt Restructuring. The Group has appointed restructuring advisers to assist with negotiations with the Holders and to achieve the Debt Restructuring. Further details are set out in Note 2.

#### 21 EQUITY-SETTLED SHARE-BASED PAYMENT TRANSACTIONS

The Company has the Share Option Scheme which was adopted on 17 September 2010 whereby the Board is authorised, at their discretion, to invite eligible participants to receive options to subscribe for shares subject to the terms and conditions stipulated therein as incentives or rewards for their contributions to the Group.

Under the Share Option Scheme, the Company may grant options to employees and directors, suppliers, customers and professional advisers of the Group to subscribe for shares of the Company. The exercise price of the options is determined by the Board at the time of grant, and shall be the highest of the nominal value of the shares, the closing price of the shares at the date of grant and the average closing price of the shares for the five business days immediately preceding the date of grant. The Share Option Scheme remains in force for a period of 10 years commencing on the Adoption Date and will expire on 12 October 2020.

#### Note:

(i) As a result of the rights issue completed on 29 December 2014, adjustments were required to be made to the exercise price and the number of Shares falling to be issued upon the exercise of the Share Options in accordance with the terms of the Share Option Scheme and the supplementary guidance issued by the Stock Exchange on 5 September 2005 regarding the adjustment of share options under Rule 17.03(13) of the Listing Rules.

#### 21 EQUITY-SETTLED SHARE-BASED PAYMENT TRANSACTIONS

#### (Continued)

(b) The movement of the number and weighted average exercise price of share options are as follows: (Continued)

A total of 48,100,000 Options are outstanding under the Share Option Scheme as at the completion of the rights issue. The exercise price and the number of the Shares falling to be issued under the outstanding Share Options have been adjusted pursuant to the Option Adjustments, with effect from 1 January 2015, and such adjustments have been reviewed and confirmed by the independent financial adviser of the Company, Somerley Capital Limited, as follows:

Original

A dimeted

Date of grant	Exercise period	Original Subscription Price (HKD)	number of Shares subject to Options	Adjusted Subscription Price (HKD)	number of Shares subject to Options	Basis of additional Shares pursuant to the Option Adjustments
12 October 2011	12 October 2012 to 12 October 2019 12 October 2013 to 12 October 2019 12 October 2014 to 12 October 2019 12 October 2015 to 12 October 2019	6.66	26,350,000	4.53	38,750,000	8 additional Shares for every 17 Shares subject to Options
28 November 2012	28 November 2013 to 12 October 2020 28 November 2014 to 12 October 2020 28 November 2015 to 12 October 2020	3.92	21,750,000	2.67	31,985,294	8 additional Shares for every 17 Shares subject to Options

The options outstanding at 30 June 2016 had an exercise price of HKD4.53 or HKD2.67 or HKD0.445 (2015: HKD4.53 or HKD2.67 or HKD0.445) per share and a weighted average remaining contractual life of 3.9 years (2015: 4.4 years).

#### 21 EQUITY-SETTLED SHARE-BASED PAYMENT TRANSACTIONS

### MIMIC

#### (Continued)

(c) Fair value of share options and assumptions

The fair value of services received in return for share options granted is measured by reference to the fair value of share options granted. The estimate of the fair value of the share options granted is measured based on the Black-Scholes option pricing model. The variables of the models included expected life of the options, risk-free interest rate, expected volatility and expected dividend of the shares of the Company.

Fair value of share options and assumptions:

	10 June 2015	28 November 2012	12 October 2011
Fair value at measurement date	HKD0.160	HKD1.8155	HKD3.3793
	~HKD0.220	~ HKD2.0303	~ HKD3.7663
Share price	HKD0.445	HKD3.92	HKD6.66
Exercise price	HKD0.445	HKD3.92	HKD6.66
Expected life	5 years	4.5-5.5 years	4.5-6 years
Risk-free interest rate	1.19%	0.249%~0.298%	0.755%~1.054%
Expected volatility	60%	57.71%~59.43%	61.87%~63.43%
Expected dividends	_	_	_

The expected volatility is based on the historic volatility of entities in the same industry (calculated based on the weighted average remaining life of the share options), adjusted for any expected changes to future volatility based on publicly available information. Expected dividends are based on management's estimates. The risk-free interest rate is based on the yield of Hong Kong Exchange Fund Notes corresponding to the expected life of the options as at the grant date. Changes in the subjective input assumptions could materially affect the fair value estimate.

Share options were granted under a service condition. The condition has not been taken into account in the grant date fair value measurement of the services received. There was no market condition associated with the share option grants.

#### 22 PROVISIONS

	At	At
	30 June	31 December
	2016	2015
	USD'000	USD'000
		(audited)
Accrued reclamation obligations	16,974	13,567
Others	1,500	1,500
	18,474	15,067
Less: Current portion	(1,500)	(1,500)
	16,974	13,567

The accrual for reclamation costs has been determined based on management's best estimates. The estimate of the associated costs may be subject to change in the near term when the reclamation on the land from current mining activities becomes apparent in future periods. At the balance sheet date, the Group reassessed the estimated costs and adjusted the accrued reclamation obligations, where necessary. The Group's management believes that the accrued reclamation obligations at 30 June 2016 are adequate and appropriate. The accrual is based on estimates and therefore, the ultimate liability may exceed or be less than such estimates. The movement of the accrued reclamation cost is as follows:

	2016 USD'000	2015 USD'000
At 1 January	13,567	12,995
Adjustment of estimations	2,928	454
Accretion expense (Note 7(a))	179	854
Exchange adjustments	300	(736)
At 30 June/31 December	16,974	13,567

### 23 CAPITAL, RESERVES AND DIVIDENDS

### MIMIC

#### (a) Dividends

The Board does not recommend declaration and payment of interim dividend in respect of the six months ended 30 June 2016 (six months ended 30 June 2015: nil).

#### (b) Share capital

#### **Authorised:**

	At 30 June 2016		At 31 Decem	ber 2015
	No. of shares		No. of shares	
	'000	USD'000	'000	USD'000
Ordinary shares	15,000,000	150,000	15,000,000	150,000

#### Ordinary shares, issued and fully paid:

	At 30 June 2016		At 31 December 2015	
	No. of shares		No. of shares	
	'000	USD'000	'000	USD'000
Ordinary shares	9,262,591	92,626	9,262,591	92,626

The Company was incorporated on 18 May 2010 with an authorised share capital of USD50,000 comprising 5,000,000 ordinary shares of USD0.01 each. On 18 May 2010, MCS Mining Group Limited acquired its initial share of one share of USD0.01. By an ordinary resolution passed at the annual general meeting held on 23 August 2010, the Company's authorised ordinary share capital was increased to USD60,000,000 by the creation of an additional 5,995,000,000 ordinary shares of USD0.01 each, ranking pari passu with the existing ordinary shares of the Company in all respects.

On 29 December 2014, 5,557,554,750 ordinary shares were issued pursuant to the rights issue on the basis of three rights shares for every two existing shares at HKD0.28 each. Total net consideration amounted to USD195,453,000, of which USD55,576,000 was credited to share capital and the remaining proceeds of USD139,877,000 was credited to the share premium account. The Company's authorised ordinary share capital was increased to USD150,000,000 by the creation of an additional 9,000,000,000 ordinary shares of USD0.01 each, raking pair with the existing ordinary shares of the Company in all respects.

The aggregate amount of share capital of the companies now comprising the Group, after elimination of interests in subsidiaries, was included in other reserve during the period/year ended 30 June 2016 and 31 December 2015.

### 23 CAPITAL, RESERVES AND DIVIDENDS (Continued)

#### (c) Reserves

#### (i) Share premium

Under the Companies Law of the Cayman Islands, the share premium account of the Company may be applied for payment of distributions or dividends to shareholders provided that immediately following the date on which the distribution or dividend is proposed to be paid, the Company is able to pay its debts as they fall due in the ordinary courses of business.

#### (ii) Other reserve

The other reserve comprises the following:

- the aggregate amount of share capital and other reserves of the companies now comprising the Group after elimination of the investments in subsidiaries; and
- the portion of the grant date fair value of unexercised share options granted to directors and employees of the Company that has been recognised in accordance with the accounting policy adopted for share-based payments.

#### (iii) Exchange reserve

The exchange reserve comprises foreign exchange adjustments arising from the translation of the MNT denominated financial statements of the Group's operations to the Group's presentation currency.

#### 24 FAIR VALUE MEASUREMENT OF FINANCIAL INSTRUMENTS

### MMC

79

#### (a) Financial assets and liabilities measured at fair value

#### (i) Fair value hierarchy

The level into which a fair value measurement is classified is determined with reference to the observability and significance of the inputs used in the valuation technique as follows:

- Level 1: valuation is based on unadjusted quoted prices in active markets for identical financial assets and liabilities.
- Level 2: valuation is based on inputs (other than quoted prices included within Level 1)
   that are observable for the financial asset or liability, either directly or indirectly.
- Level 3: valuations is based on unobservable inputs.

Fair value of the Group's financial instruments, including redemption option embedded in senior notes and conversion option embedded in convertible notes which is categorised into Level 3 of the fair value hierarchy was valued by the directors with the reference to a valuation report issued by an independent business valuer.

	Fair value at 30 June		lue measureme le 2016 categori	
	2016 USD'000	Level 1 USD'000	Level 2 USD'000	Level 3 USD'000

	2015	Level 1	Level 2	Level 3
	USD'000	USD'000	USD'000	USD'000
Recurring fair value				
measurement				
Assets				
- Redemption option				
embedded in senior notes	_	_	_	_

There have been no transfer between Level 1 and Level 2, or transfers into or out of Level 3 during the six months ended 30 June 2016 (six months ended 30 June 2015: nil). The Group's policy is to recognise transfers between levels of fair value hierarchy as at the balance sheet date in which they occur.

#### 24 FAIR VALUE MEASUREMENT OF FINANCIAL INSTRUMENTS

(Continued)

#### (a) Financial assets and liabilities measured at fair value (Continued)

#### (ii) Information about Level 3 fair value measurements

	Valuation techniques	Significant unobservable inputs	Expected volatility
Redemption option embedded in senior notes	Binomial model	Expected volatility	38%

The fair value of redemption option embedded in senior notes is determined using binomial model and the significant unobservable input used in the fair value measurement is expected volatility. The fair value measurement is positively correlated to the expected volatility. As at 30 June 2016, it is estimated that with all other variables held constant, an increase/decrease in the expected volatility by 1% would have no impact on the Group's loss.

The movement during the period in the balance of Level 3 fair value measurements is as follows:

	At	At
	30 June	31 December
	2016	2015
	USD'000	USD'000
		(audited)
Redemption option embedded in senior notes:		
At 1 January	_	_
Changes in fair value recognized in profit or		
loss during the period	_	
At 30 June/31 December	_	_

The changes in fair value arising from the remeasurement of the redemption option embedded in senior notes are presented in "finance cost/income" in the consolidated statement of comprehensive income.

### MMG

81

#### 24 FAIR VALUE MEASUREMENT OF FINANCIAL INSTRUMENTS

(Continued)

#### (b) Fair value of financial assets and liabilities carried at other than fair value

In respect of cash and cash equivalents, trade and other receivables, and trade and other payables, the carrying amounts approximate fair value due to the relatively short-term nature of these financial instruments.

In respect of borrowings, the carrying amounts are not materially different from their fair values as at 30 June 2016. The fair values of borrowings are estimated as the present value of future cash flows, discounted at current market interest rates for similar financial instruments.

The aggregate carrying values of other financial liabilities carried on the consolidated balance sheet are not materially different from their fair values as at 30 June 2016.

### 25 MATERIAL RELATED PARTY TRANSACTIONS

#### (a) Transactions with related parties

Related parties refer to enterprises over which the Group is able to exercise significant influence or control during the six months ended 30 June 2016. During the six months ended 30 June 2016, the Group entered into transactions with the following related parties.

Name of party	Relationship
MCS (Mongolia) Limited ("MCS")	Shareholder
Uniservice Solution LLC	Subsidiary of MCS
MCS International LLC	Subsidiary of MCS
M Armor LLC (previously MCS Armor LLC)	Subsidiary of MCS
MCS Estates LLC	Subsidiary of MCS
MCS Property LLC	Subsidiary of MCS
Chinggis Eco Tour LLC	Subsidiary of MCS
Unitel LLC	Subsidiary of MCS
Univision LLC	Subsidiary of MCS
Shangri-La Ulaanbaatar LLC	Subsidiary of MCS

Particulars of significant transactions between the Group and the above related parties during the six months ended 30 June 2016 are as follows:

	Six months ended 30 June	
	2016 USD'000	2015 USD'000
Ancillary services and related interest charge (Note (i)) Lease of property, plant and equipment (Note (ii))	5,272 240	9,795 —

### 25 MATERIAL RELATED PARTY TRANSACTIONS (Continued)

#### (a) Transactions with related parties (Continued)

#### Notes:

- (i) Ancillary services represent expenditures for support services such as power and heat generation, management fee paid to MCS International LLC, security service & vehicle inspection paid to M Armor LLC, cleaning and canteen expense paid to Uniservice Solution LLC, and other ancillary services fee paid to Shangri-La Ulaanbaatar LLC, MCS and its affiliates. The service charges are based on comparable or prevailing market rates, where applicable.
- (ii) Lease of property, plant and equipment represents rental paid or payable in respect of properties and office equipment leased from Shangri-La Ulaanbaatar LLC, MCS and its affiliates. The rental charges are based on comparable or prevailing market rates, where applicable.

#### Amounts due from/(to) related parties

#### Note:

(i) Pursuant to settlement agreements reached with respective parties within the six months ended 30 June 2016, the repayment of USD6,930,000 ancillary service payables was deferred for more than twelve months period.

### 25 MATERIAL RELATED PARTY TRANSACTIONS (Continued)

### MMG

#### (b) Key management personnel remuneration

Key management personnel are those persons holding positions with authority and responsibility for planning, directing and controlling the activities of the Group, directly or indirectly, including the Group's directors.

	Six months ended 30 June	
	<b>2016</b> 2015	
	USD'000	USD'000
Salaries and other emoluments	700	812
Discretionary bonus	14	1,064
Retirement scheme contributions	46	120
Equity-settled share-based payment expenses	672	964
	1,432	2,960

Total remuneration is included in "staff costs" (see Note 7(b)).

### **26 COMMITMENTS AND CONTINGENCIES**

#### (a) Capital commitments

Capital commitments outstanding at respective balance sheet dates not provided for in the interim financial report were as follows:

	At	At
	30 June	31 December
	2016	2015
	USD'000	USD'000
		(audited)
Contracted for		
- property, plant and equipment	525	525

#### 26 COMMITMENTS AND CONTINGENCIES (Continued)

#### (b) Operating lease commitments

(i) At 30 June 2016, the total future minimum lease payments under non-cancellable operating leases are payable as follows:

At	: At
30 June	31 December
2016	2015
USD'000	USD'000
	(audited)
Within 1 year 500	1,570
After 1 year but within 5 years —	123
500	1,693

(ii) The Group leases certain buildings through operating leases. These operating leases do not contain provisions for contingent lease rentals. None of the agreements contain escalation provisions that may require higher future rental payments.

#### (c) Environmental contingencies

Historically, the Group has not incurred any significant expenditure for environmental remediation. Further, except for the accrued reclamation obligations as disclosed in Note 22 and amounts incurred pursuant to the environment compliance protection and precautionary measures in Mongolia, the Group has not incurred any other significant expenditure for environmental remediation, is currently not involved in any other environmental remediation, and has not accrued any other amounts for environmental remediation relating to its operations. Under existing legislation, the directors believe that there are no probable liabilities that will have a material adverse effect on the financial position or operating results of the Group. Environmental liabilities are subject to considerable uncertainties which affect the Group's ability to estimate the ultimate cost of remediation efforts. The outcome of environmental liabilities under future environmental legislations cannot be estimated reasonably at present and which could be material.

#### 27 MAJOR NON-CASH TRANSACTIONS

According to the relevant tax regulations in Mongolia, the income tax payable and payables to suppliers can be offset by the VAT receivables. During the six months ended 30 June 2016, the Group offset the VAT receivables of USD519,000 (six months ended 30 June 2015: USD1,024,000), USD897,000 (six months ended 30 June 2015: nil), USD116,000 (six months ended 30 June 2015: nil) and USD5,101,000 (six months ended 30 June 2015: nil) with royalty tax payable, income tax payable and other tax payables, air pollution fee and payables to suppliers, respectively.

#### 28 SUBSEQUENT EVENTS AFTER THE BALANCE SHEET DATE

- (a) The Company had a meeting with the Steering Committee to finalise the Debt Restructuring term sheet. Following subsequent negotiations, the Company and the Steering Committee have agreed on the form of a term sheet that is available as Appendix A to the announcement of the Company dated 8 July 2016.
- (b) On 7 July 2016 (Cayman Islands time), the Company filed (i) the Application to assist in the process of negotiations with its creditors and to facilitate recognition of the Debt Restructuring in different jurisdictions (as appropriate), as well as (ii) the Petition which is necessary pre-cursor to facilitate the Application, with the Cayman Court. The Application was heard by the Cayman Court on 19 July 2016 and the Cayman Court granted the Court Order sought in the Application to appoint the JPLs who are authorised to develop and propose the Debt Restructuring in accordance with their powers conferred by the Court Order, which are limited to the Company itself rather than the Company's subsidiaries. Under the Court Order, experienced restructuring professionals, Mr. Simon Conway of PwC Corporate Finance Recovery (Cayman) Limited and Mr. Christopher So Man Chun of PricewaterhouseCoopers Ltd., are appointed as the JPLs of the Company. The JPLs submitted their first report to the Cayman Court on 25 August 2016 (Cayman Islands time). Court hearing of the Petition is scheduled to be heard on 1 September 2016. Relevant announcements were posted on the websites of Hong Kong Exchanges and Clearing Limited and the Company on 21 July 2016 and 26 August 2016.
- (c) As the Company was informed by counsel to the lenders (including the Lenders to the Company under the BNP and ICBC Facility, as amended from time to time, dated 5 March 2014) on 8 July 2016, BNP Paribas Singapore Branch filed the BNP Petition with the Cayman Court immediately after the Company submitted the Application and the Petition to the Cayman Court on 7 July 2016 (Cayman Islands time). This information on the submission of the BNP Petition is available in the announcement of the Company dated 11 July 2016. All future events and announcements relating to the JPLs and the Cayman Court will be duly announced by the Company in due course.
- (d) On 25 July 2016, the Group has fulfilled all conditions set forth in the DTR entered into by and between with the Parallel Lenders on 11 March 2016. Under the DTR, the Group's obligations under the borrowings taken from the Parallel Lenders have been discharged in their entirety and the relevant security thereunder have been fully released.
- (e) The Group agreed to transfer its entire investment in TTPPWS, a wholly-owned subsidiary of the Group, to a third party for consideration of MNT12.5 billion as a part of settlement of its certain overdue obligations. The transaction was completed and share transfer registered on 8 July 2016. The book value of investment in TTPPWS was MNT6.6 billion and as such the Group realized a gain of MNT5.9 billion from this transaction.

"mineral resource"

A concentration or occurrence of material of intrinsic economic interest in or on the earth's crust in such form, quality and quantity that there are reasonable prospects for eventual economic extraction. The location, quantity, quality, geological characteristics and continuity of a mineral resource are known, estimated or interpreted from specific geological evidence and knowledge. Mineral resources are sub-divided, in order of increasing geological confidence, into inferred, indicated and measured categories

"mining rights"

The rights to mine mineral resources and obtain mineral

products in areas where mining activities are licensed

Togrog or tugrik, the lawful currency of Mongolia

"Model Code"

The Model Code for Securities Transactions by Directors of

Listed Issuers as set out in Appendix 10 to the Listing Rules

"Mt"

"MNT"

Million tonnes

"Norwest"

Norwest Corporation

"Offer Date"

12 October 2011, 28 November 2012 and 10 June 2015, the dates of offer of a total of 37,500,000, 22,750,000 and 154,750,000 Share Options, respectively, to its Director and certain employees under the Share Option Scheme adopted by the Company

"open-pit"

The main type of mine designed to extract minerals close to

the surface; also known as "open cut"

"ore"

A naturally occurring solid material from which a metal or

valuable mineral can be extracted profitably

"Parliament"

Parliament of Mongolia

"raw coal"

Generally means coal that has not been washed and processed

"RMB"

Renminbi

"ROM"

Run-of-mine, the as-mined material during room and pillar mining operations as it leaves the mine site (mined glauberite

ore and out-of-seam dilution material)

"seam"

A stratum or bed of coal or other mineral; generally applied to

large deposits of coal

"soum"

## Glossary and Technical Terms

"SEHK" or "Stock Exchange"

The Stock Exchange of Hong Kong Limited

"SFO" Securities and Futures Ordinance (Chapter 571 of the Laws of

Hong Kong)

"Share(s)" Ordinary share(s) of USD0.01 each in the share capital of the

Company

"Share Options" or "Options" The share options which were granted under the Share Option

Scheme to eligible participants to subscribe for Shares of the

Company

"Share Option Scheme" A share option scheme which was adopted by the Company

on 17 September 2010

"Share Purchase Agreement" Share purchase agreement entered by the Company and its

subsidiary Mongolian Coal Corporation Limited with Quincunx (BVI) Ltd and Kerry Mining (Mongolia) Limited in relation to the

acquisition of the entire issued share capital of QGX Coal Ltd

The second level of Mongolian administrative subdivisions

(essentially equivalent to a sub-province)

"strip ratio" or "stripping ratio" The ratio of the amount of waste removed (in bank cubic

metres) to the amount of coal or minerals (in tonnes) extracted

by open-pit mining methods

"Tavan Tolgoi" The coal formation located in South Gobi, Mongolia which

includes our UHG and BN deposits

"the Schemes" The Group participates in defined contribution retirement

benefit schemes

"thermal coal" Also referred to as "steam coal" or "steaming coal", thermal

coal is used in combustion processes by power producers and industrial users to produce steam for power and heat. Thermal coal tends not to have the carbonisation properties possessed by coking coals and generally has lower heat value and higher

volatility than coking coal

"THG" Tsaikhar Khudag

"TKH" Tsagaan Khad

"tonne" Metric tonne, being equal to 1,000 kilograms

"TRIFR" Total Recordable Injury Frequency Rate

"Tsogttsetsii" Tsogttsetsii soum is the location where Tavan Tolgoi sits

"UHG" Ukhaa Khudag

 $\bigstar$ 

## Glossary and Technical Terms

"UHG deposit" Ukhaa Khudag deposit located in the Tavan Tolgoi coalfield

which includes both aboveground (<300m) and underground

(>300m) deposits

"UHG mine" The aboveground (<300m) portion of our UHG deposit

"USD" United States Dollar

"VAT" Value added tax

"washed coal" Coals that have been washed and processed to reduce its ash

content

"WSA" World Steel Association
