# CHAIRMAN'S STATEMENT

## Chairman's Statement

On behalf of the board ("Board") of the directors ("Directors") of SIM Technology Group Limited ("Company"), I am presenting the interim results of the Company and its subsidiaries (collectively referred to as the "Group") for the six months ended 30 June 2016.

## Business Review

Reviewing 2015, the Group's business positioning and development strategies after its business transformation have begun to show notable results. In the first half of 2016, the Group has continued to consolidate the growth in its quality Original Design Manufacturer (ODM) consumer handset and wireless communication modules businesses. At the same time, the Group has also actively expanded the industrial application terminal, Internet of Things ("IOT") and intelligent robotic manufacturing businesses. During the reporting period, most of the core businesses of the Group recorded growth in revenue and gross profit, laying a solid foundation for the sustainable development of its overall operation in the future.

For the handsets and solutions business, the handsets developed for an internet operator last year were sold in the market throughout the first half of 2016. Meanwhile, the Group also boosted its research and development ("R&D") efforts in industry applications and IOT terminals last year. The combined effect contributed to the growth of the shipment volume and revenue in the first half of 2016, as compared to the same period last year. However, consumer handsets, which accounted for a larger proportion of shipment volume and sales, had a lower gross profit margin, resulting in a slight decrease in gross profit and gross profit margin in the handsets and solutions business during the period.

Due to the increasing demand for the Group's wireless communication modules from domestic and overseas markets, overall shipments have risen more than 27% as compared to the same period last year, of which 3G and 4G products had higher sales amounting to an increase of 40% and 12-times respectively. Hence, the shipment, sales and gross profit during the period recorded considerable growth. Benefitting from the notable growth in sales volume of 4G modules, gross profit margin for the period remained at the same level as compared to the same period last year despite the declining average selling price ("ASP") of 2G and other low-end modules.

# CHAIRMAN'S STATEMENT

As for the IOT business, the Group has continued to boost the investment in the value-added services of intelligent vending machines. It has expanded the business from retail, finance leasing and beverage trading to sectors including the operation of Online-To-Offline ("O2O") big data platform and the manufacturing of intelligent vending machine controllers. During the reporting period, the Group rationalised some of the Point-Of-Sales ("POS") that incurred higher rental or did not reach the sales target and tightened the cost control of rental fees over its newly-added POS. In addition, the Group has continued to expand the cloud computing and big data service platform, which has been applied in areas such as intelligent community and intelligent elderly care services, Internet of Vehicles ("IOV") applications and property management.

During the period under review, the Group has continued to actively expand the intelligent manufacturing business, fully utilized its advantage of manufacturing techniques and thorough understanding in the area of handsets and related components, and expanded its R&D team for robotics application and integration. These initiatives have enable it to quickly capture opportunities in the handset manufacturing market with notable results. The Group has enjoyed recognition as a prestigious brand in the communication and Surface-Mount Technology (SMT) testing sectors. During the reporting period, both sales and gross profit recorded significant growth. However, in order to secure more customers who can afford to consume our intelligent manufacturing products, the price reduction strategy adopted amidst the fierce market competition has affected the growth in gross profit margin for the period.

## Handsets and solutions business

Handset operators continue to purchase low-end 4G handsets from low-end to mid-range brands in China and use these handsets to boost their sales through giving away handsets when customers sign up for their mobile subscriptions. At the same time, some major handset brands sell their flagship products through their numerous POS. However, the intensifying competition in the open consumer market and price war have compelled some brands to focus their differentiated products on niche markets which have achieved progress. During the period, in light of this development trend, the Group has continued to develop products for education, training, light luxury segments and government affairs to secure branded customers in various differentiated product markets, which is expected to bring a contribution to revenue in the second half of the year.

## CHAIRMAN'S STATEMENT

Demand for industrial application terminals has continued to increase along with the further development of the IOT and Business-To-Business (B2B) sectors. In addition to expanding traditional scan terminals, police operational terminals and waterproof, dust-proof and shock-resistant terminals, the Group is further increasing investment in two-to-three target industries aiming to become a comprehensive solution provider in that industry. The rapid development of the global IOT market presents enormous potential market demand for terminals. Thus, the Group is continuing its strategy of investment in new areas in order to generate considerable returns in the future.

For the overseas market, the Group has continued to focus on Europe, Japan and North America. These markets have higher entry barriers with a longer investment period. Nevertheless, this strategic thrust is beneficial to the Group's long-term business development due to the overall income and strong customer loyalty. Apart from traditional consumer terminals, the Group has also been expanding into the IOT and the industrial application terminal segments in these geographic markets and the related new products are to be launched in the next two years.

### **Wireless communication modules business**

The IOT market in China has continued to flourish. The leading companies in different industries and the three largest operators in China have continued to implement favourable strategies such as network upgrades, provision of subsidies and customised terminals, which stimulated the diversification of terminal products and recorded notable growth in mainstream application markets such as smart homes, smart home electrical appliances, mobile payment POS, IOV, wireless automated meter reading (AMR) and security and surveillance. Thanks to the Group's extensive IOT industry application experience, it has achieved outstanding results across a wide range of IOT applications, enabling it to retain a leading presence in the IOT sector over the years. At the same time, the Group has continued to develop new products and provide prompt quality customised services for customers, while also achieving satisfactory results in the emerging industries including security and surveillance, smart home, smart home electrical appliances and health care sectors. Besides, the Group is also developing projects according to specification for customers in specific industries, thereby assisting customers to speed up the R&D of terminal products and saving their development costs.

# CHAIRMAN'S STATEMENT

Demand in Europe has shown clear signs of warming up. During the period under review, sales volume grew more than 30%. Meanwhile, demand for 2G, 3G and Global Navigation Satellite System ("GNSS") modules in South East Asia and Australia has also recorded significant growth. The Group and its business partners have actively participated in undertaking tenders for 3G and 4G products in Europe, South Asia, South East Asia and Australia. In North America, the shipment volume of 3G modules has almost doubled, while our SIM7100A 4G module has been applied by some customers. The SIM7500A 4G module is also preparing for passing the AT&T certification. In the Japan market, the certification for 4G modules has been almost completed and the design work for customers' terminal products has also commenced. The Group expects that these modules and terminal projects would generate more revenue in the second half of 2016. According to an AB1 2015 research report, SIMCOM branded modules accounted for the largest and second largest market share in China and in the world respectively between 2008 and 2014, and ranked the first in freight volume globally in 2015.

## IOT business

During the period under review, the Group's big data platform has continued to focus on a series of IOT application integrated solutions such as intelligent community and intelligent elderly care services, health monitoring systems, vehicle anti-theft management, management systems for property security, management systems for student safety, an automatic vending machine O2O service, and an industrial Internet. The platform also provides all-round cloud computing services to the Group through designing servers with uniform standards.

Regarding the vending machine business, after more than two years' development, the Group has enhanced the digital and networking functions of its vending machines, which has enabled multiple online payment functions such as QuickPass, Alipay and WeChat. This becomes an innovative payment model in the PRC which has drawn attention across different industries. In addition to the sale of traditional products such as food and beverages, it will gradually expand to cover other products such as packaged meals, medicine and daily personal necessities. During the period, the Group has optimized the POS, adjusted the product structure of certain POS and facilitated new arrangements and trials for new POS. Besides, the Group has shortened the lease period of certain customers to reduce the scale of finance leasing, lower the burden and risks of its assets and concentrate its resources on developing the profitability of its online business in the future.

# CHAIRMAN'S STATEMENT

The Group's intelligent elderly care services and intelligent community businesses are expanding. The Secretary of the municipal party committee of Shanghai City and Mayor of Shanghai visited one of the high-end intelligent elderly care homes in Shanghai which is using the intelligent platforms and intelligent positioning products produced by the Group and provided a high recognition. Currently, the Group is undertaking intelligent engineering for six intelligent communities. These efforts are expected to form a solid foundation for the Group to develop in the IOT industry.

## Intelligent manufacturing business

Since the Group has entered the intelligent manufacturing business segment in 2015, it has developed an automated testing system and subsequently entered the intelligent manufacturing market in the first half of 2016. Leveraging its significant advantages such as technological expertise, prompt attentive service and strong R&D capability, the Group has achieved impressive results in the China market. During the period, the Group has continued to allocate substantial resources to its R&D and design team, which has attained a level comparable to major integrated enterprises in the industry with the capacity to develop and design more than 20 projects concurrently.

The Group's efforts in the intelligent manufacturing business have begun to bear fruit. After the Group was designated as a pilot entity of "Integrated Standardisation and New Model Application for Intelligent Manufacturing", it was also included as one of the 63 companies on the "2016 Intelligent Manufacturing Pilot Demonstration Project" list by the Ministry of Industry and Information Technology. This is the highest honour awarded in the PRC to enterprises which have made significant contribution to execute the national "Made in China 2025" strategy.

## Properties development

As at 30 June 2016, "The Riverside Country" (晨與•翰林水郡), in Shenyang City, the PRC, has a total of 1,616 residential units in three phases, of which 1,248 units had been sold.

As at 30 June 2016, Phase I of "Seven River in Sweet" (七里香溪), in Taizhou City, the PRC, has a total of 310 residential units, of which 228 units had been sold. The construction of Phase II has been commence and is expected to be completed in the second half of 2017.

# CHAIRMAN'S STATEMENT

The sales recognised for the first half of 2016 amounted to HK\$112.5 million (2015 HK\$66.4 million) with a gross profit margin of 12.9% (2015: 18.5%).

## Interim dividend

The Board does not recommend the payment of interim dividend to the shareholders of the Company for the six months ended 30 June 2016.

## Prospects

In the future, the Group will continue to implement its ongoing strategies. As for the handset business, more new products developed in the first half are to be launched in the second half of 2016, with most of the profit expected to come from differentiated handset and industrial application terminals. The shipment to several major domestic and overseas customers will create room for increasing profitability. The Group will continue to secure more high-end differentiated customers and increase investment in industry terminals as it broadens its product range and scope of service. Apart from strengthening close cooperation with its current and industry consumers, our future development strategy for the handset business will be to develop domestic and overseas markets.

The global IOT industry is still in a fast-growth stage and has enormous room for expansion. As such, the Group will continue to enrich and optimise 2G modules and launch 3G modules with a higher price performance ratio. Besides, the highly integrated GNSS+GSM combo module will be marketed in the second half of 2016, optimising the GNSS module product mix. As for 4G modules, this product will be the key driver of the module businesses in the future. The Group has already started delivery of 4G modules and will launch the CAT4 and CAT1 4G modules boasting stronger technology in the second half of the year. At the same time, the Group has developed Narrow Band IOT (NB-IOT) and CAT-M technologies, and will launch customised supporting modules based on the network development of operators and upon the request of customers. Building upon the good results in the past few years and the new projects we have secured from customers, and more recently have captured the world number one market share in 2015, while in the future the Group will strive to enter more high-end markets and maintain its leadership in the global IOT module application and solution market.

## CHAIRMAN'S STATEMENT

The Group's vending machines offer the potential to optimise the POS burdened with higher expenses but low sales volume and reform the old vending machine payment model, and can also connect to a standardised payment platform, so the Group will also continue to enhance the development of value-added business within the intelligent automatic vending machine segment. It will step up its efforts to promote the O2O business and accelerate cooperation within the cloud-based business by working with UnionPay and banks, and use our vending machine network as a satisfactory high-frequency small-amount transaction channel, to promote the new business, hence providing marketing and channel support for them. Moreover, the Group continues to expand the cloud computing and big data service platform to support our self-developed smart home elderly service systems, health monitoring systems and vehicle anti-theft management systems and to promote these systems in both domestic and overseas markets.

Intelligent manufacturing is the latest business area that the Group has entered. It also offers the great development potential and its efforts over the years have started to bear fruit. The Group intends to increase its investment and expand its business scale into more industrial markets. Furthermore, the Group will develop the industrial internet by increasing investment in areas such as intelligent storage and logistics. In the past, our focus has been placed in replacing workers along production lines with equipment. The Group's direction in the future would be replacing workers handling simple, repetitive and mundane paper-work or desk jobs with robots, visual systems and artificial intelligence, which will increase work efficiency, eliminate human failure or error, and ultimately build an intelligent factory in which operations are digitalised, connected by networks with flexibility as described in Industry 4.0.

The management believes that the Group has reported good performances in new growth points and set effective development directions for laying a foundation for its sustainable development. The ensuing growth of its new business is set to advance the Group's overall business to new heights in the coming years.

### Appreciation

The Board would like to thank our shareholders, customers, suppliers, bankers and professional advisers for their support of the Group and to extend our appreciation to all our staff for their dedication and contribution throughout the reporting period.

# MANAGEMENT DISCUSSION AND ANALYSIS

## Handsets and solutions

Due to the year-on-year growth of the shipment volume of the handsets and solutions, the revenue of this segment for 1H-2016 increased 10.0% to HK\$687.0 million (2015: HK\$ 624.7 million) as compared to that of 1H-2015. However, consumer handsets, which normally accounts for a larger proportion of shipment volume and sales, recorded a lower gross profit margin, resulting in a slight decrease in gross profit and gross profit margin during 1H-2016. The gross profit margin for this segment slightly decreased to 12.7% in 1H-2016 (2015: 14.8%). The revenue of ODM business contributed to approximately 79% of the revenue of this segment in 1H-2016 (2015: 83%).

## Wireless communication modules

Due to the increasing demand for the Group's wireless communication modules from domestic and overseas markets, overall shipment in 1H-2016 have risen more than 27% as compared to the same period last year. Hence, the revenue of this segment increased year-on-year by 15.6%. Benefitting from the notable growth in sales volume of 4G modules, the gross profit margin maintained at 15.0% (2015: 15.3%) despite the declining ASP of 2G and other low-end modules.

## IOT business

During 1H-2016, the Group rationalised some of the POS that incurred higher rental or did not reach the sales target and tightened the cost control of rental fees over its newly-added POS. As a result, the revenue of IOT business recorded HK\$121.6 million (2015: HK\$120.9 million) in 1H-2016 while the gross profit margin increased to 17.4% (2015: 14.5%).

## Intelligent manufacturing business

During 1H-2016, the Group has continued to actively expand the intelligent manufacturing business and both revenue and gross profit recorded significant growth. However, in order to secure more customers who can afford to consume our intelligent manufacturing products, the price reduction strategy adopted amidst the fierce market competition has affected the growth in gross profit margin for the period. The revenue of this segment increased to HK\$73.5 million (2015: HK\$26.5 million) and the gross profit margin decreased to 39.0% in 1H-2016 (2015: 43.9%).

# MANAGEMENT DISCUSSION AND ANALYSIS

## LIQUIDITY, FINANCIAL RESOURCES AND CAPITAL STRUCTURE

### *Liquidity*

As at 30 June 2016, the Group had bank balances and cash of HK\$245.7 million (31 December 2015: HK\$298.4 million), of which 76.4% was held in Renminbi, 23.4% was held in US dollars and the remaining balance was held in Hong Kong dollars. As at 30 June 2016, the Group also had pledged bank deposits of HK\$50.6 million (31 December 2015: HK\$102.9 million) in Renminbi for the purpose of the Group's borrowings. The Group intends to finance its working capital and capital expenditure plans from such bank balances. The Group has pledged certain of its assets (including bank deposits, property, plant and equipment, investment properties and land use rights) to secure the bank borrowings. The total bank borrowings of the Group amounted to HK\$205.3 million as at 30 June 2016 (31 December 2015: HK\$333.5 million), all of which carried at floating interest rates and repayable within one year.

### *Operating efficiency*

The turnover period of inventory, trade and notes receivables, trade and notes payables of the Group for the core business are presented below:

	30 June 2016 Days	31 December 2015 Days
Inventory turnover period	114	71
Trade and notes receivables turnover period	45	33
Trade and notes payables turnover period	101	64

As at 30 June 2016, the current ratio, calculated as current assets over current liabilities, was 2.0 times (31 December 2015: 1.8 times).

# MANAGEMENT DISCUSSION AND ANALYSIS

## *Treasury policies*

The Group adopts a prudent approach in its treasury policy. The Group's surplus funds are held under fixed and savings deposits in reputable banks to earn interest income. As at 30 June 2016, the Group has entrusted a total amount of HK\$117.3 million under certain asset management agreements for an investment period from six months to one year. During 1H-2016, the Group did not have any other security or capital investments or derivative investments.

Certain sales and purchases of inventories of the Group are denominated in US dollars. Furthermore, certain trade receivables, trade payables and bank balances are denominated in US dollars, therefore exposing the Group to the currency risk of US dollars. During 1H-2016, the Group did not use any financial instrument for hedging purpose but it will consider entering into non-deliverable foreign exchange forward contracts to eliminate the foreign exchange exposures in US dollars when necessary.

## *Capital structure*

As at 30 June 2016, the Company had 2,557,896,300 ordinary shares of HK\$0.10 each in issue.

No shares of the Company has been issued or repurchased during the period under review.

## NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS FOR THE SIX MONTHS ENDED 30 JUNE 2016

### 1. GENERAL INFORMATION AND BASIS OF PREPARATION

The Company was incorporated in Bermuda as an exempted company under the Companies Act 1981 of Bermuda (as amended) with limited liability.

The company is an investment holding company. The principal activities of its subsidiaries are the manufacturing, design and development and sale of display modules, handsets and solutions, wireless communication modules, carrying out internet of things business and intelligent manufacturing business and property development in the PRC.

The functional currency of the Company is Renminbi ("RMB"). The condensed consolidated financial statements are presented in Hong Kong dollars ("HK\$"), as the Directors of the Company consider that it is a more appropriate presentation for a company listed on The Stock Exchange of Hong Kong Limited (the "Stock Exchange") and for the convenience of the shareholders.

The condensed consolidated financial statements of the Group have been prepared in accordance with International Accounting Standard ("IAS") 34 "Interim Financial Reporting" issued by the International Accounting Standards Board ("IASB") as well as the applicable disclosure requirements of Appendix 16 to the Rules Governing the Listing of Securities on the Stock Exchange.

### 2. PRINCIPAL ACCOUNTING POLICIES

The condensed consolidated financial statements have been prepared on the historical cost basis, except for certain financial instruments that are measured at fair values at the end of each reporting period.

Except as described below, the accounting policies and methods of computation used in the condensed consolidated financial statements for the six months ended 30 June 2016 are the same as those followed in the preparation of the Group's annual financial statements for the year ended 31 December 2015.

# INTERIM FINANCIAL STATEMENTS

In the current interim period, the Group has applied, for the first time, certain amendments to Hong Kong Financial Reporting Standards ("HKFRSs") issued by the Hong Kong Institute of Certified Public Accountants ("HKICPA") that are mandatorily effective for the current interim period. The application of the above amendments to HKFRSs in the current interim period has had no material effect on the amounts reported in these condensed consolidated financial statements and/or disclosures set out in these condensed consolidated financial statements.

## 3. REVENUE

Revenue represents the amounts received and receivable for goods sold net of discounts and sales related taxes, interest income generated from equipment financial leasing to outsiders and service income generated from service provided to outsiders.

## 4. SEGMENT INFORMATION

Segment information is presented based on internal reports about components of the Group that are regularly reviewed by the chief operating decision maker, being the executive directors, for the purpose of allocating resources to segments and assessing their performance.

During the six-month period ended 30 June 2016, the Group was organised into six (2015: six) reportable and operating segments, being sale of handsets and solutions, sale of wireless communication modules, internet of things business, intelligent manufacturing business, sale of display modules and property development.

## 8. DIVIDENDS

The Directors do not recommend the payment of an interim dividend for six months ended 30 June 2016 and 2015.

## 9. EARNINGS PER SHARE

The calculation of the basic and diluted earnings per share attributable to the owners of the Company is based on the following data:

	Six months ended 30 June	
	2016	2015
	HK\$'000	HK\$'000
	(unaudited)	(unaudited)
<b>Earnings</b>

Weighted average number of ordinary shares for the propose of diluted earnings per share	<b>2,560,366</b>	2,620,209

# INTERIM FINANCIAL STATEMENTS

The computation of diluted earnings per share for the six months ended 30 June 2016 and 2015 did not assume the exercise of certain of the Company's share options because the exercise price of these options was higher than the average market price for both six month periods ended 30 June 2016 and 2015.

## 10. MOVEMENTS IN INVESTMENT PROPERTIES, PROPERTY, PLANT AND EQUIPMENT AND INTANGIBLE ASSETS

### Investment properties

The fair value of the Group's investment properties at 30 June 2016 and 31 December 2015 have been arrived at on the basis of a valuation carried out on that date by Vigers Appraisal & Consulting Limited, an independent qualified professional valuer not related to the Group.

The fair value was determined based on the income capitalisation approach, where the market rentals of all lettable units of the properties are assessed and discounted at the market yield expected by investors for this type of properties. The market rentals are assessed based on estimates of future cash flows, supported by the terms of existing lease and reasonable and supportable assumptions that represent what knowledgeable willing parties would assume about rental income for future leases in the light of current conditions. The rate is determined by reference to the yields derived from analysing the sales transactions of similar commercial properties in Shanghai. There has been no change from the valuation technique used in the prior year.

In estimating the fair value of the properties, the highest and best use of the properties is their current use. At the end of the reporting period, the chief financial officer of the Group works closely with the independent qualified professional valuer to establish and determine the appropriate valuation techniques and inputs. Where there is a material change in the fair value of the assets, the causes of the fluctuations will be reported to the management of the Group.

The fair value of investment properties as at 30 June 2016 is HK\$358,187,000 (31 December 2015: HK\$355,981,000) and a fair value gain of HK\$5,555,000 (six months ended 30 June 2015: HK\$290,000) have been recognised directly in profit or loss for the six months ended 30 June 2016.

As at 30 June 2016, the Group held 30% equity interest in Xian Helicopter Co., Ltd. ("Xian Helicopter"), a company registered in the PRC with carrying amount of HK\$27,119,000 (31 December 2015: HK\$27,384,000). The principal activity of Xian Helicopter is provision of industrial use helicopter services in the PRC.

During the year ended 31 December 2014, the Group entered into a sale and purchase agreement with the existing major shareholder of Xian Helicopter to dispose of the Group's entire 30% equity interest in Xian Helicopter for a consideration of RMB26,160,000 which will be settled by three instalments. As at 30 June 2016, part of the consideration amounting to RMB20,950,000 (31 December 2015: RMB20,950,000) has been received by the Group and the remaining RMB5,210,000 (31 December 2015: RMB5,210,000) has not been settled. The transaction will be completed upon the receipt of the full consideration by the Group. As at 30 June 2016, the interest in Xian Helicopter of HK\$27,119,000 (31 December 2015: HK\$27,384,000) has been classified as asset classified as held for sale and the consideration received of HK\$24,574,000 (31 December 2015: HK\$24,805,000) has been classified as liability associated with asset classified as held for sale.

The sale proceeds exceed the carrying amount of the interest in Xian Helicopter and, accordingly, no impairment loss has been recognised.

## OTHER INFORMATION

Other than as disclosed above, at no time during 1H-2016 was the Company or any of its subsidiaries a party to any arrangements that enable the Directors or the chief executive of the Company to acquire benefits by means of acquisition of shares in, or debt securities (including debentures) of, the Company or any other body corporate and save as disclosed in this report, none of the Directors, the chief executive, their spouses or children under the age of 18, had any right to subscribe for securities of the Company, or had exercised any such right during 1H-2016.

### PURCHASE, SALE OR REDEMPTION OF LISTED SECURITIES OF THE COMPANY

During 1H-2016, neither the Company nor any of its subsidiaries has purchased, sold or redeemed any of the Company's listed securities.

### CORPORATE GOVERNANCE CODE

Save as mentioned below, the Company has complied with the code provisions laid down in the Corporate Governance Code ("Corporate Governance Code") as set out in Appendix 14 to the Listing Rules for 1H-2016.

Code provision A.2.7 of the Corporate Governance Code requires the chairman of the Board to hold meetings at least annually with the non-executive Directors (including independent non-executive Directors) without the executive Directors present. As Ms Yeung Man Ying, the chairman of the Board, is also an executive Director, the Company has deviated from this code provision as it is not applicable. Currently, the chairman of the Board may communicate with the non-executive Directors on a one-to-one or group basis periodically to understand their concerns, to discuss pertinent issues and to ensure that there is access to adequate and complete information.

In respect of code provisions A.5.1 to A.5.4 of the Corporate Governance Code, the Company does not have a nomination committee. At present, the Company does not consider it necessary to have a nomination committee as the full Board is responsible for reviewing the structure, size and composition of the Board and the appointment of new Directors from time to time to ensure that it has a balanced composition of skills and experience appropriate for the requirements of the businesses of the Company, and the Board as a whole is also responsible for assessing the independence of the independent non-executive Directors and reviewing the succession plan for the Directors, in particular the chairman of the Board.

## OTHER INFORMATION

According to the code provision E.1.2 of the Corporate Governance Code, the chairman of the Board shall attend the annual general meeting of the Company and arrange for the chairmen of the audit, remuneration and nomination committees (as appropriate) or in the absence of the chairman of such committees, another member of the committee or failing this his duly appointed delegate, to be available to answer questions at the annual general meeting.

At the annual general meeting of the Company held on 1 June 2016 ("2016 AGM"), Ms Yeung Man Ying, the chairman of the Board, was unable to attend due to an unexpected business engagement. Mr Chan Tat Wing, Richard, an executive Director and the chief finance officer of the Group, chaired the 2016 AGM on behalf of the chairman of the Board pursuant to the bye-laws of the Company and was available to answer questions. Mr Liu Hing Hung, an independent non-executive Director and the chairman of the remuneration committee of the Board and the audit committee of the Board ("Audit Committee"), was also available at the 2015 AGM to answer questions from shareholders.

### COMPLIANCE WITH THE MODEL CODE

The Company has adopted the Model Code as set out in Appendix 10 to the Listing Rules as its own code for securities transactions. All Directors have confirmed, following specific enquiry by the Company with all Directors, that they have fully complied with the required standard as set out in the Model Code for 1H-2016.

### AUDIT COMMITTEE

The Audit Committee has reviewed with the management the accounting principles and practice adopted by the Group and reviewed the unaudited condensed consolidated interim financial information of the Group for 1H-2016. In addition, the unaudited condensed consolidated interim financial information of the Group for 1H-2016 have been reviewed by our auditor, Messrs. Deloitte Touche Tohmatsu. The Audit Committee comprises all three independent non-executive Directors.
