BUSINESS REVIEW AND OUTLOOK

The 2015/2016 financial year was dominated by political and geopolitical uncertainties at home and abroad. These included the US presidential election, Brexit, protracted conflicts in the Middle East, refugee issues in Europe, Legislative Council elections in Hong Kong, to name a few. Major global economies continued to be hindered by these factors. The fundamentals remained delicate and capital markets performances around the world are correspondingly cautious. Hong Kong's economic performance is certainly not insulated from these challenges faced by the major economies around the world.

The property sector in Hong Kong as a whole has shown resilience and recovered from an extended period of softening. During the year under review, the slowdown in the retail market has been most pronounced due to reduced visitor numbers. The office leasing market remains steady and residential market was rejuvenated, underpinned by a lack of supply and a sustained period of low interest rates. Events such as Brexit led to capital outflows from the region in search for safe havens which arguably provided more liquidity to fuel the already liquidity flushed markets such as Hong Kong. Labour supply shortages in the construction industry continues to drive wage inflation and pose a challenge on the cost management side.

The Group performed admirably against this challenging environment. The attributable rental portfolio of approximately 1.4 million square feet generated steady rental income at high occupancy rates. Rental income increased through tenant mix adjustments, rental reversion and robust contribution from the London properties. The completion of the 8 Observatory Road project in June 2015 added an attributable gross floor area ("**GFA**") of 51,145 square feet in the prime Tsim Sha Tsui area of Hong Kong. As at 18 October 2016, approximately 97% of the floor area of the building has been leased or has offers to lease with another approximately 3% of floor area under negotiation. 4 out of 9 units of the 339 Tai Hang Road luxury residential property were sold during the year under review.

BUSINESS REVIEW AND OUTLOOK (CONTINUED)

Subsequent to the year end, the Urban Renewal Authority project in Ma Tau Kok, Kowloon, "93 Pau Chung Street" ("**93 Pau Chung Street**") and the joint venture project in Tseung Kwan O named "Alto Residences" ("**Alto Residences**") were launched for pre-sale in September 2016 and October 2016, respectively. The 93 Pau Chung Street project offers 209 flats in total, including studios, one and two-bedroom units. Up to 18 October 2016, the Group has pre-sold 75 units in 93 Pau Chung Street with saleable area of approximately 26,400 square feet at an average selling price of approximately HK\$15,900 per square foot. The Alto Residences provides 605 flats, including 23 detached houses. Up to 18 October 2016, the first, second and the third price lists of the Alto Residences were released on 11 October 2016, 15 October 2016 and 18 October 2016, respectively for a total of 363 units with listed prices range from HK\$12,373 to HK\$27,508 per square foot.

Architect's impression of 93 Pau Chung Street

The management believes it is paramount to prepare the Group for the challenges and opportunities ahead. The Group completed a series of corporate activities as part of the new strategy to improve funding sources, execution capabilities and overall coordination with the wider Lai Sun Group since refocusing the strategy in 2012. Set out below are the projects the Group secured after the implementation of the new rental focused strategy:

BUSINESS REVIEW AND OUTLOOK (CONTINUED)

The acquisition of 106 Leadenhall Street in London in December 2015, adjacent to the other two wholly-owned properties of LSD, namely 100 and 107 Leadenhall Street, added a total GFA of approximately 12,687 square feet net internal area of office space to our rental portfolio in the United Kingdom. This multi-tenanted property is expected to enhance and enlarge the Group's strategic property investment portfolio in the City of London. The Ocean Hotel, to be operated by the Marriott group, will provide a total of 471 rooms and add approximately 226,664 square feet of attributable rental space to the existing rental portfolio attributable to the Group of approximately 1.4 million square feet.

The Group continued to participate in government tenders to grow the pipeline. In September 2015, the Group was successful in its bid for the development right to the Sai Wan Ho Street project from the Urban Renewal Authority in Shau Kei Wan, Hong Kong. Upon completion, it is planned to provide about 144 residential units with a total GFA of 61,139 square feet. In May 2016, the Group completed the purchase of the remaining unit for the proposed development on Ki Lung Street in Sham Shui Po, Kowloon, which comprises numbers 48-56 on Ki Lung Street and has a combined site area of 5,053 square feet. It is planned to be developed primarily into a commercial/residential development for sale with a total GFA of 42,873 square feet.

The rights issue of 10,047,266,781 shares on the basis of one rights share for every two existing shares of LSD at a subscription price of HK\$0.092 each in November 2015 ("**Rights Issue**") was completed in February 2016. The Rights Issue was fully underwritten by the Company. Immediately after the completion of the Rights Issue, the Company's interest in LSD increased from 51.84% to 61.93%.

To increase liquidity of the Company's shares in the United States of America ("**US**") and to provide access to the US capital market, a sponsored Level 1 American Depositary Receipt Programme was established with the Bank of New York Mellon and is effective since 1 April 2016.

In September 2016, LSD acquired approximately 49.96% interests in Camper & Nicholsons International SA ("**CNI**"), a long established and internationally recognised brand for luxury yachts. LSD believed that the acquisition of CNI will bolster LSD's offering of high-end food and beverage and hospitality services.

BUSINESS REVIEW AND OUTLOOK (CONTINUED)

The Group's strong cash position of HK\$3,306.9 million of cash on hand with a net debt to equity ratio of 41.4% as at 31 July 2016 provides the Group with full confidence and the means to review opportunities more actively. The Group's gearing excluding the net debt of the London portfolio all of which have a positive carry net of financing costs is 31.7%. However, the Group will continue its prudent and flexible approach in growing the landbank and managing its financial position.

APPRECIATION

Looking back on this financial year, I would like to thank my Board colleagues, the senior management team, our partners and everyone who worked with us during the year for their loyalty, support and outstanding teamwork.

I firmly believe that through the concerted efforts of our staff and with the support of all our stakeholders we will continue to grow the Group going forward in a prudent and sustainable manner.

Rental Income

During the year under review, the Group's rental operations recorded a turnover of HK\$806.5 million (2015: HK\$755.0 million), representing a 6.8% increase over last year. The increase is primarily due to the contributions from newly acquired rental properties in London, as well as continued management of tenant mix and rental reversion at major investment properties during the year under review.

The Group wholly owns five major investment properties in Hong Kong, namely Cheung Sha Wan Plaza, Causeway Bay Plaza 2, Lai Sun Commercial Centre, commercial podium of Crocodile Center and Por Yen Building. LSD's 50:50 joint venture with Henderson Land Development Company Limited ("**Henderson Land**") at 8 Observatory Road, Kowloon was completed in June 2015 and has started to contribute to the Group's results in the year under review. This is recognised as a component of "Share of profits of joint ventures" in the consolidated income statement.

HOTEL OPERATIONS

Turnover from hotel operation was mainly derived from the Group's operation of the Caravelle Hotel in Ho Chi Minh City, Vietnam. For the year ended 31 July 2016, the hotel operation contributed HK\$391.7 million to the Group's turnover (2015: HK\$384.0 million).

The hotel operation has extensive experience in providing consultancy and management services to hotels in Mainland China, Hong Kong and other Asian countries. Management Discussion and Analysis

INTERESTS IN ASSOCIATES (eSUN)

As at 31 July 2016, the Group's interest in eSun Holdings Limited ("eSun") is 41.92%.

Share of profits of eSun amounting to HK\$33.6 million (2015: HK\$108.0 million). The decrease is primarily due to a lower revaluation gain rising in the revaluation of Lai Fung's investment properties during the year under review and decrease in results of Media Asia Group Holdings Limited ("MAGHL") and its subsidiaries (collectively, "MAGHL Group") which is primarily attributable to (i) decrease in both the turnover and the gross profit ratio due to the decrease in the number of large-scale films released and events held by MAGHL Group during the year under review and (ii) increase in other operating expenses of MAGHL Group which is mainly due to the exchange loss arising from the depreciation in Renminbi.

INTERESTS IN JOINT VENTURES

During the year under review, contribution from joint ventures increased to HK\$770.5 million (2015: HK\$354.2 million), representing an increase of 117.5%. This is primarily due to stronger revaluation gains of 8 Observatory Road and CCB Tower.

	For the year ended 31 July	
	2016 (HK\$ million)	2015 (HK\$ million)
Revaluation gains	682.4	282.9
Operating profits	88.1	71.3
Contribution from joint ventures	770.5	354.2

LIQUIDITY AND FINANCIAL RESOURCES

As at 31 July 2016, cash and bank balances and undrawn facilities held by the Group amounted to HK\$3,306.9 million and HK\$6,215.0 million, respectively. Cash and bank balances and undrawn facility held by the Group excluding LSD as at 31 July 2016 were HK\$736.0 million and HK\$100.0 million, respectively.

The Group's sources of funding comprise mainly internal funds generated from the Group's business operations, loan facilities provided by banks, guaranteed notes issued to investors and rights issue.

As at 31 July 2016, the Group had bank borrowings of approximately HK\$6,285.7 million, guaranteed notes of approximately HK\$3,461.8 million, a note of HK\$195.0 million and a loan of HK\$31.7 million payable to the late Mr. Lim Por Yen ("Mr. Lim"), accrued interest of HK\$146.3 million in relation to the above-mentioned note and loan payable to the late Mr. Lim. The gearing ratio, expressed as a percentage of the total outstanding net debt (being the total outstanding bank borrowings, guaranteed notes and note and loan and related accrued interest payable to the late Mr. Lim less the pledged and restricted and unpledged bank balances and time deposits) to consolidated net assets attributable to owners of the Company, was approximately 41.4%. Excluding the net debt of LSD, the gearing ratio was approximately 7.7%. The Group's gearing excluding the net debt of the London portfolio all of which had a positive carry net of financing costs was approximately 31.7%. As at 31 July 2016, the maturity profile of the bank borrowings of HK\$6,285.7 million was spread over a period of less than 5 years with HK\$690.7 million repayable within 1 year, HK\$168.2 million repayable in the second year and HK\$5,426.8 million repayable in the third to fifth years. All the Group's borrowings carried interest on a floating rate basis except for the United States dollar and Renminbi guaranteed notes issued in January 2013 and July 2014 and which has a fixed rate of 5.7% and 7.7% per annum, respectively.

LIQUIDITY AND FINANCIAL RESOURCES (CONTINUED)

As at 31 July 2016, certain investment properties with carrying amounts of approximately HK\$17,329.7 million, certain property, plant and equipment with carrying amounts of approximately HK\$2,390.4 million, certain properties under development for sale of approximately HK\$634.6 million and certain bank guaranteed balances and time deposits with banks of approximately HK\$395.3 million were pledged to banks to secure banking facilities granted to and guaranteed notes issued by the Group. In addition, certain shares in subsidiaries held by the Group were also pledged to banks to secure banking facilities granted to and guaranteed notes issued by the Group. Certain shares in joint ventures held by the Group were pledged to banks to secure banking facilities granted to joint ventures of the Group. The Group's secured bank borrowings were also secured by floating charges over certain assets held by the Group.

The Group's major assets and liabilities and transactions were denominated in Hong Kong dollars and United States dollars. Considering that Hong Kong dollars are pegged against United States dollars, the Group believes that the corresponding exposure to exchange rate risk arising from United States dollars is nominal. In addition, the Group has investments in United Kingdom with the assets and liabilities denominated in Pounds Sterling. Majority of the investments were partly financed by bank borrowings denominated in Pounds Sterling in order to minimise the net foreign exchange exposure. Other than the above mentioned, the remaining monetary assets and liabilities of the Group were denominated in Renminbi and Vietnamese Dong which were also insignificant as compared with the Group's total assets and liabilities. No hedging instruments were employed to hedge for the foreign exchange exposure. The Group manages its foreign currency risk by closely reviewing the movement of the foreign currency rate and considers hedging significant foreign currency exposure should the need arise.

Details of contingent liabilities of the Group at the end of the reporting period are set out in note 34 to the financial statements.

Corporate Governance Report

The Company is committed to achieving and maintaining high standards of corporate governance and has established policies and procedures for compliance with the principles and code provisions set out from time to time in the Corporate Governance Code (“**CG Code**”) contained in Appendix 14 to the Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited (“**Stock Exchange**” and “**Listing Rules**”, respectively).

(I) CORPORATE GOVERNANCE PRACTICES

The Company has complied with all the code provisions set out in the CG Code throughout the year ended 31 July 2016 save for the deviations from code provisions A.4.1 and A.5.1 of the CG Code.

Under code provision A.4.1, non-executive directors should be appointed for a specific term and should be subject to re-election.

None of the existing non-executive directors (“**NEDs**”, including the independent non-executive directors (“**INEDs**”)) of the Company is appointed for a specific term. However, all directors of the Company (“**Directors**”) are subject to the retirement provisions of the Articles of Association of the Company (“**Articles of Association**”), which require that the Directors for the time being shall retire from office by rotation once every three years since their last election by shareholders of the Company (“**Shareholders**”) and the retiring Directors are eligible for re-election. In addition, any person appointed by the Board of Directors (“**Board**”) as an additional Director (including a NED) will hold office only until the next annual general meeting of the Company (“**AGM**”) and will then be eligible for re-election. Further, in line with the relevant code provision of the CG Code, each of the Directors appointed to fill a casual vacancy would/will be subject to election by the Shareholders at the first general meeting after his/her appointment. In view of these, the Board considers that such requirements are sufficient to meet the underlying objective of the said code provision A.4.1 and, therefore, does not intend to take any remedial steps in this regard.

Under code provision A.5.1, a nomination committee comprising a majority of independent non-executive directors should be established and chaired by the chairman of the board or an independent non-executive director.

The Company has not established a nomination committee whose functions are assumed by the full Board. Potential new Directors will be recruited based on their knowledge, skills, experience and expertise and the requirements of the Company at the relevant time and candidates for the INEDs must meet the independence criterion. The process of identifying and selecting appropriate candidates for consideration and approval by the Board has been, and will continue to be, carried out by the executive Directors (“**EDs**”). As the above selection and nomination policies and procedures have already been in place and the other duties of the nomination committee as set out in the CG Code have long been performed by the full Board effectively, the Board does not consider it necessary to establish a nomination committee at the current stage.

The Company has received from each of the INEDs an annual confirmation in writing of his independence for the Year and all INEDs also meet the guidelines for assessment of their independence as set out in Rule 3.13 of the Listing Rules. Further, up to the date of this Report, the Board has not been aware of the occurrence of any events which would cause it to believe that their independence has been impaired.

Mr. Chow Bing Chiu ("**Mr. Chow**"), an INED, will retire by rotation at the forthcoming AGM and, being eligible, offers himself for re-election. Mr. Chow has served on the Board as an INED for more than 12 years since September 2004. Being a long-serving Director, Mr. Chow has developed an in-depth understanding of the Company's operations and business, and has expressed objective views and given independent guidance to the Company over the years. There is no empirical evidence that the long service of Mr. Chow would impair his independent judgement. The Board is satisfied that Mr. Chow will continue to have the required character and experience to fulfill the role of an INED and considers that the re-election of Mr. Chow as an INED at the forthcoming AGM is in the best interest of the Company and its shareholders as a whole.

The Company has arranged appropriate directors' and officers' liabilities insurance coverage for the Directors and officers of the Company.

(3) DIRECTORS' INDUCTION AND CONTINUOUS PROFESSIONAL DEVELOPMENT

The Directors are regularly briefed on the amendments to or updates on the relevant laws, rules and regulations. Notes to Financial Statements

31 July 2016

1. CORPORATE AND GROUP INFORMATION

Lai Sun Garment (International) Limited (the “**Company**”) is a limited liability company incorporated in Hong Kong with its shares listed on the Main Board of The Stock Exchange of Hong Kong Limited (the “**Stock Exchange**”). The registered office of the Company is located at 11th Floor, Lai Sun Commercial Centre, 680 Cheung Sha Wan Road, Kowloon, Hong Kong.

During the year, the Company and its subsidiaries (collectively referred to as the “**Group**”) were involved in the following principal activities:

- property development for sale;
- property investment;
- investment in and operation of hotels;
- investment in and operation of restaurants; and
- investment holding.

Details of the principal subsidiaries are set out in note 40 to the financial statements.

2.1 BASIS OF PREPARATION

These financial statements have been prepared in accordance with Hong Kong Financial Reporting Standards (“**HKFRSs**”) (which include all Hong Kong Financial Reporting Standards, Hong Kong Accounting Standards (“**HKASs**”) and Interpretations) issued by the Hong Kong Institute of Certified Public Accountants, accounting principles generally accepted in Hong Kong and the Hong Kong Companies Ordinance. They have been prepared under the historical cost convention, except for investment properties, equity investments at fair value through profit or loss and certain available-for-sale financial assets, which have been measured at fair value. These financial statements are presented in Hong Kong dollars (“**HK\$**”) and all values are rounded to the nearest thousand except when otherwise indicated.

Basis of consolidation

The consolidated financial statements include the financial statements of the Company and its subsidiaries for the year ended 31 July 2016. A subsidiary is an entity (including a structured entity), directly or indirectly, controlled by the Company. Control is achieved when the Group is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee (i.e., existing rights that give the Group the current ability to direct the relevant activities of the investee).

When the Company has, directly or indirectly, less than a majority of the voting or similar rights of an investee, the Group considers all relevant facts and circumstances in assessing whether it has power over an investee, including:

- (a) the contractual arrangement with the other vote holders of the investee;
- (b) rights arising from other contractual arrangements; and
- (c) the Group’s voting rights and potential voting rights.

2.1 BASIS OF PREPARATION (CONTINUED)

Basis of consolidation (continued)

The financial statements of the subsidiaries are prepared for the same reporting period as the Company, using consistent accounting policies. The results of subsidiaries are consolidated from the date on which the Group obtains control, and continue to be consolidated until the date that such control ceases.

Profit or loss and each component of other comprehensive income are attributed to the owners of the parent of the Group and to the non-controlling interests, even if this results in the non-controlling interests having a deficit balance. All intra-group assets and liabilities, equity, income, expenses and cash flows relating to transactions between members of the Group are eliminated in full on consolidation.

The Group reassesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control described in the accounting policy for subsidiaries below. A change in the ownership interest of a subsidiary, without a loss of control, is accounted for as an equity transaction.

If the Group loses control over a subsidiary, it derecognises (i) the assets (including goodwill) and liabilities of the subsidiary, (ii) the carrying amount of any non-controlling interest and (iii) the cumulative translation differences recorded in equity; and recognises (i) the fair value of the consideration received, (ii) the fair value of any investment retained and (iii) any resulting surplus or deficit in profit or loss. The Group's share of components previously recognised in other comprehensive income is reclassified to profit or loss or retained profits, as appropriate, on the same basis as would be required if the Group had directly disposed of the related assets or liabilities.

2.2 CHANGES IN ACCOUNTING POLICIES AND DISCLOSURES

There were no new or revised standards adopted for the first time for the current year's financial statements.

2.4 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Investments in associates and joint ventures

An associate is an entity in which the Group has a long term interest of generally not less than 20% of the equity voting rights and over which it is in a position to exercise significant influence. Significant influence is the power to participate in the financial and operating policy decisions of the investee, but is not control or joint control over those policies.

A joint venture is a type of joint arrangement whereby the parties that have joint control of the arrangement have rights to the net assets of the joint venture. Joint control is the contractually agreed sharing of control of an arrangement, which exists only when decisions about the relevant activities require the unanimous consent of the parties sharing control.

The Group's investments in associates and joint ventures are stated in the consolidated statement of financial position at the Group's share of net assets under the equity method of accounting, less any impairment losses.

Adjustments are made to bring into line any dissimilar accounting policies that may exist.

The Group's share of the post-acquisition results and other comprehensive income of associates and joint ventures is included in the consolidated income statement and consolidated other comprehensive income, respectively. In addition, when there has been a change recognised directly in the equity of the associate or joint venture, the Group recognises its share of any changes, when applicable, in the consolidated statement of changes in equity. Unrealised gains and losses resulting from transactions between the Group and its associates or joint ventures are eliminated to the extent of the Group's investments in the associates or joint ventures, except where unrealised losses provide evidence of an impairment of the asset transferred. Goodwill arising from the acquisition of associates or joint ventures is included as part of the Group's investments in associates or joint ventures.

If an investment in an associate becomes an investment in a joint venture or vice versa, the retained interest is not remeasured. Instead, the investment continues to be accounted for under the equity method. In all other cases, upon loss of significant influence over the associate or joint control over the joint venture, the Group measures and recognises any retained investment at its fair value. Any difference between the carrying amount of the associate or joint venture upon loss of significant influence or joint control and the fair value of the retained investment and proceeds from disposal is recognised in profit or loss.

When an investment in an associate or a joint venture is classified as held for sale, it is accounted for in accordance with HKFRS 5 *Non-current Assets Held for Sale and Discontinued Operations*.

2.4 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Business combinations and goodwill

Business combinations are accounted for using the acquisition method. The consideration transferred is measured at the acquisition date fair value which is the sum of the acquisition date fair values of assets transferred by the Group, liabilities assumed by the Group to the former owners of the acquiree and the equity interests issued by the Group in exchange for control of the acquiree. For each business combination, the Group elects whether to measure the non-controlling interests in the acquiree that are present ownership interests and entitle their holders to a proportionate share of net assets in the event of liquidation at fair value or at the proportionate share of the acquiree's identifiable net assets. All other components of non-controlling interests are measured at fair value. Acquisition-related costs are expensed as incurred.

When the Group acquires a business, it assesses the financial assets and liabilities assumed for appropriate classification and designation in accordance with the contractual terms, economic circumstances and pertinent conditions as at the acquisition date. This includes the separation of embedded derivatives in host contracts of the acquiree.

If the business combination is achieved in stages, the previously held equity interest is remeasured at its acquisition date fair value and any resulting gain or loss is recognised in profit or loss.

Any contingent consideration to be transferred by the acquirer is recognised at fair value at the acquisition date. Contingent consideration classified as an asset or liability is measured at fair value with changes in fair value recognised in profit or loss. Contingent consideration that is classified as equity is not remeasured and subsequent settlement is accounted for within equity.

Goodwill is initially measured at cost, being the excess of the aggregate of the consideration transferred, the amount recognised for non-controlling interests and any fair value of the Group's previously held equity interests in the acquiree over the identifiable net assets acquired and liabilities assumed. If the sum of this consideration and other items is lower than the fair value of the net assets acquired, the difference is, after reassessment, recognised in profit or loss as a gain on bargain purchase.

After initial recognition, goodwill is measured at cost less any accumulated impairment losses. Goodwill is tested for impairment annually or more frequently if events or changes in circumstances indicate that the carrying value may be impaired. The Group performs its annual impairment test of goodwill as at 31 July. For the purpose of impairment testing, goodwill acquired in a business combination is, from the acquisition date, allocated to each of the Group's cash-generating units, or groups of cash-generating units, that are expected to benefit from the synergies of the combination, irrespective of whether other assets or liabilities of the Group are assigned to those units or groups of units.

2.4 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Business combinations and goodwill (continued)

Impairment is determined by assessing the recoverable amount of the cash-generating unit (group of cash-generating units) to which the goodwill relates. Where the recoverable amount of the cash-generating unit (group of cash-generating units) is less than the carrying amount, an impairment loss is recognised. An impairment loss recognised for goodwill is not reversed in a subsequent period.

Where goodwill has been allocated to a cash-generating unit (or group of cash-generating units) and part of the operation within that unit is disposed of, the goodwill associated with the operation disposed of is included in the carrying amount of the operation when determining the gain or loss on the disposal. Goodwill disposed of in these circumstances is measured based on the relative value of the operation disposed of and the portion of the cash-generating unit retained.

Fair value measurement

The Group measures its investment properties, equity investments at fair value and certain available-for-sale financial assets at the end of each reporting period. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either in the principal market for the asset or liability, or in the absence of a principal market, in the most advantageous market for the asset or liability. The principal or the most advantageous market must be accessible by the Group. The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Group uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 — based on quoted prices (unadjusted) in active markets for identical assets or liabilities
- Level 2 — based on valuation techniques for which the lowest level input that is significant to the fair value measurement is observable, either directly or indirectly
- Level 3 — based on valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

For assets and liabilities that are recognised in the financial statements on a recurring basis, the Group determines whether transfers have occurred between levels in the hierarchy by reassessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

2.4 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Impairment of non-financial assets

Where an indication of impairment exists, or when annual impairment testing for an asset is required (other than properties under development for sale, completed properties for sale, inventories, financial assets and investment properties), the asset's recoverable amount is estimated. An asset's recoverable amount is the higher of the asset's or cash-generating unit's value in use and its fair value less costs of disposal, and is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets, in which case the recoverable amount is determined for the cash-generating unit to which the asset belongs.

An impairment loss is recognised only if the carrying amount of an asset exceeds its recoverable amount. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. An impairment loss is charged to the income statement in the period in which it arises, unless the asset is carried at a revalued amount, in which case the impairment loss is accounted for in accordance with the relevant accounting policy for that revalued asset.

An assessment is made at the end of each reporting period as to whether there is an indication that previously recognised impairment losses may no longer exist or may have decreased. If such an indication exists, the recoverable amount is estimated. A previously recognised impairment loss of an asset other than goodwill is reversed only if there has been a change in the estimates used to determine the recoverable amount of that asset, but not to an amount higher than the carrying amount that would have been determined (net of any depreciation/amortisation) had no impairment loss been recognised for the asset in prior years. A reversal of such an impairment loss is credited to the income statement in the period in which it arises, unless the asset is carried at a revalued amount, in which case the reversal of the impairment loss is accounted for in accordance with the relevant accounting policy for that revalued asset.

A party is considered to be related to the Group if:

2.4 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Property, plant and equipment and depreciation

Property, plant and equipment, other than construction in progress, are stated at cost less accumulated depreciation and any impairment losses. The cost of an item of property, plant and equipment comprises its purchase price and any directly attributable costs of bringing the asset to its working condition and location for its intended use.

Expenditure incurred after items of property, plant and equipment have been put into operation, such as repairs and maintenance, is normally charged to the income statement in the period in which it is incurred. In situations where the recognition criteria are satisfied, the expenditure for a major inspection is capitalised in the carrying amount of the asset as a replacement. Where significant parts of property, plant and equipment are required to be replaced at intervals, the Group recognises such parts as individual assets with specific useful lives and depreciates them accordingly.

Depreciation is calculated on the straight-line basis to write off the cost of each item of property, plant and equipment to its residual value over its estimated useful life. The principal annual rates used for this purpose are as follows:

Hotel properties	Over the remaining lease terms
Leasehold buildings	Over the remaining lease terms
Leasehold improvements	20% or over the lease terms, whichever is shorter
Furniture, fixtures and equipment	20%
Motor vehicles	17% – 25%
Computers	20% – 33%
Motor vessels	25%

Where parts of an item of property, plant and equipment have different useful lives, the cost of that item is allocated on a reasonable basis among the parts and each part is depreciated separately. Residual values, useful lives and the depreciation method are reviewed, and adjusted if appropriate, at least at each financial year end.

An item of property, plant and equipment including any significant part initially recognised is derecognised upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss on disposal or retirement recognised in the income statement in the year the asset is derecognised is the difference between the net sales proceeds and the carrying amount of the relevant asset.

Construction in progress represents buildings under construction, which are stated at cost less any impairment losses, and are not depreciated. Cost comprises the direct costs of construction and capitalised borrowing costs on related borrowed funds during the period of construction. Construction in progress is reclassified to the appropriate category of property, plant and equipment when completed and ready for use.

2.4 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Investment properties

Investment properties are interests in land and buildings (including the leasehold interest under an operating lease for a property which would otherwise meet the definition of an investment property) held to earn rental income and/or for capital appreciation, rather than for use in the production or supply of goods or services or for administrative purposes; or for sale in the ordinary course of business. These include properties that are being constructed or developed for future use as investment properties. Such properties are measured initially at cost, including transaction costs. Subsequent to initial recognition, investment properties are stated at fair value, which reflects market conditions at the end of the reporting period, unless they are still in the course of construction or development at the end of the reporting period and their fair value cannot be reliably determined at that time.

Gains or losses arising from changes in the fair values of investment properties are included in the income statement in the year in which they arise.

Any gains or losses on the retirement or disposal of an investment property are recognised in the income statement in the year of the retirement or disposal.

Operating leases

Leases where substantially all the rewards and risks of ownership of assets remain with the lessor are accounted for as operating leases. Where the Group is the lessor, assets leased by the Group under operating leases are included in non-current assets, and rentals receivable under the operating leases are credited to the income statement on the straight-line basis over the lease terms. Where the Group is the lessee, rentals payable under the operating leases are charged to the income statement on the straight-line basis over the lease terms.

Prepaid land lease payments under operating leases are initially stated at cost and subsequently recognised on the straight-line basis over the lease terms.

Properties under development for sale

Properties under development for sale are stated at the lower of cost and net realisable value. Cost comprises the prepaid land lease payments or cost of land together with any other direct costs attributable to the development of the properties and other related expenses capitalised during the development period. Net realisable value is determined by the directors based on prevailing market prices on an individual property basis less estimated costs of completion and costs to be incurred in selling the property.

Once the construction or development of these properties is completed, these properties are reclassified to the appropriate categories of assets.

2.4 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Completed properties for sale

Completed properties for sale are stated at the lower of cost and net realisable value. Cost includes all development expenditure, applicable borrowing costs and other direct costs attributable to such properties. Cost is determined by apportionment of the total land and building costs attributable to unsold properties. Net realisable value is determined by the directors based on prevailing market prices on an individual property basis less costs to be incurred in selling the property.

Investments and other financial assets

Initial recognition and measurement

Financial assets are classified, at initial recognition, as financial assets at fair value through profit or loss, loans and receivables, and available-for-sale financial investments, as appropriate. When financial assets are recognised initially, they are measured at fair value plus transaction costs that are attributable to the acquisition of the financial assets, except in the case of financial assets recorded at fair value through profit or loss.

All regular way purchases and sales of financial assets are recognised on the trade date, that is, the date that the Group commits to purchase or sell the asset. Regular way purchases or sales are purchases or sales of financial assets that require delivery of assets within the period generally established by regulation or convention in the marketplace.

Subsequent measurement

The subsequent measurement of financial assets depends on their classification as follows:

Financial assets at fair value through profit or loss

Financial assets at fair value through profit or loss include financial assets held for trading. Financial assets are classified as held for trading if they are acquired for the purpose of sale in the near term. Derivatives, including separated embedded derivatives, are also classified as held for trading unless they are designated as effective hedging instruments as defined by HKAS 39.

Financial assets at fair value through profit or loss are carried in the statement of financial position at fair value with net changes in fair value recognised in the income statement. These net fair value changes do not include any dividends or interest earned on these financial assets, which are recognised in accordance with policies set out for "Revenue recognition" below.

Financial assets designated upon initial recognition as at fair value through profit or loss are designated at the date of initial recognition and only if the criteria in HKAS 39 are satisfied.

Derivatives embedded in host contracts are accounted for as separate derivatives and recorded at fair value if their economic characteristics and risks are not closely related to those of the host contracts and the host contracts are not held for trading or designated as at fair value through profit or loss. These embedded derivatives are measured at fair value with changes in fair value recognised in the income statement. Reassessment only occurs if there is either a change in the terms of the contract that significantly modifies the cash flows that would otherwise be required or a reclassification of a financial asset out of the fair value through profit or loss category.

2.4 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Investments and other financial assets (continued)

Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. After initial measurement, such assets are subsequently measured at amortised cost using the effective interest rate method less any allowance for impairment. Amortised cost is calculated by taking into account any discount or premium on acquisition and includes fees or costs that are an integral part of the effective interest rate. The effective interest rate amortisation is included in other revenue in the income statement. The loss arising from impairment is recognised in the income statement.

Available-for-sale financial assets

Available-for-sale financial assets are non-derivative financial assets in listed and unlisted equity investments and debt securities. Equity investments classified as available for sale are those which are neither classified as held for trading nor designated as at fair value through profit or loss. Debt securities in this category are those which are intended to be held for an indefinite period of time and which may be sold in response to needs for liquidity or in response to changes in market conditions.

After initial recognition, available-for-sale financial assets are subsequently measured at fair value, with unrealised gains or losses recognised as other comprehensive income in the investment revaluation reserve until the investment is derecognised, at which time the cumulative gain or loss is recognised in income statement, or until the investment is determined to be impaired, when the cumulative gain or loss is reclassified from the investment revaluation reserve to income statement. Interest and dividends earned whilst holding the available-for-sale financial assets are reported as interest income and dividend income, respectively and are recognised in the income statement as other revenue in accordance with the policies set out for "Revenue recognition" below.

Available-for-sale financial assets

When the fair value of unlisted equity investments cannot be reliably measured because (a) the variability in the range of reasonable fair value estimates is significant for that investment or (b) the probabilities of the various estimates within the range cannot be reasonably assessed and used in estimating fair value, such investments are stated at cost less any impairment losses.

The Group evaluates whether the ability and intention to sell its available-for-sale financial assets in the near term are still appropriate. When, in rare circumstances, the Group is unable to trade these financial assets due to inactive markets, the Group may elect to reclassify these financial assets if management has the ability and intention to hold the assets for the foreseeable future or until maturity.

For a financial asset reclassified from the available-for-sale category, the fair value carrying amount at the date of reclassification becomes its new amortised cost and any previous gain or loss on that asset that has been recognised in equity is amortised to profit or loss over the remaining life of the investment using the effective interest rate. Any difference between the new amortised cost and the maturity amount is also amortised over the remaining life of the asset using the effective interest rate. If the asset is subsequently determined to be impaired, then the amount recorded in equity is reclassified to the income statement.

2.4 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Derecognition of financial assets

A financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is primarily derecognised (i.e., removed from the Group's consolidated statement of financial position) when:

- the rights to receive cash flows from the asset have expired; or
- the Group has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a "pass-through" arrangement; and either (a) the Group has transferred substantially all the risks and rewards of the asset, or (b) the Group has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

When the Group has transferred its rights to receive cash flows from an asset or has entered into a pass-through arrangement, it evaluates if and to what extent it has retained the risks and rewards of ownership of the asset. When it has neither transferred nor retained substantially all the risks and rewards of the asset nor transferred control of the asset, the Group continues to recognise the transferred asset to the extent of the Group's continuing involvement. In that case, the Group also recognises an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Group has retained.

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the Group could be required to repay.

Impairment of financial assets

The Group assesses at the end of each reporting period whether there is objective evidence that a financial asset or a group of financial assets is impaired. An impairment exists if one or more events that occurred after the initial recognition of the asset have an impact on the estimated future cash flows of the financial asset or the group of financial assets that can be reliably estimated. Evidence of impairment may include indications that a debtor or a group of debtors is experiencing significant financial difficulty, default or delinquency in interest or principal payments, the probability that they will enter bankruptcy or other financial reorganisation and observable data indicating that there is a measurable decrease in the estimated future cash flows, such as changes in arrears or economic conditions that correlate with defaults.

Financial assets carried at amortised cost

For financial assets carried at amortised cost, the Group first assesses whether impairment exists individually for financial assets that are individually significant, or collectively for financial assets that are not individually significant. If the Group determines that no objective evidence of impairment exists for an individually assessed financial asset, whether significant or not, it includes the asset in a group of financial assets with similar credit risk characteristics and collectively assesses them for impairment. Assets that are individually assessed for impairment and for which an impairment loss is, or continues to be, recognised are not included in a collective assessment of impairment.

2.4 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Impairment of financial assets (continued)

Financial assets carried at amortised cost (continued)

The amount of any impairment loss identified is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future credit losses that have not yet been incurred). The present value of the estimated future cash flows is discounted at the financial asset's original effective interest rate (i.e., the effective interest rate computed at initial recognition).

The carrying amount of the asset is reduced through the use of an allowance account and the loss is recognised in the income statement. Interest income continues to be accrued on the reduced carrying amount using the rate of interest used to discount the future cash flows for the purpose of measuring the impairment loss. Loans and receivables together with any associated allowance are written off when there is no realistic prospect of future recovery.

If, in a subsequent period, the amount of the estimated impairment loss increases or decreases because of an event occurring after the impairment was recognised, the previously recognised impairment loss is increased or reduced by adjusting the allowance account. If a write-off is later recovered, the recovery is credited to the income statement.

Assets carried at cost

If there is objective evidence that an impairment loss has been incurred on an unquoted equity instrument that is not carried at fair value because its fair value cannot be reliably measured, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows discounted at the current market rate of return for a similar financial asset. Impairment losses on these assets are not reversed.

Available-for-sale financial assets

For available-for-sale financial assets, the Group assesses at the end of each reporting period whether there is objective evidence that an investment or a group of investments is impaired.

If an available-for-sale financial asset is impaired, an amount comprising the difference between its cost (net of any principal payment and amortisation) and its current fair value, less any impairment loss previously recognised in the income statement, is removed from other comprehensive income and recognised in the income statement.

In the case of equity investments classified as available for sale, objective evidence would include a significant or prolonged decline in the fair value of an investment below its cost. "Significant" is evaluated against the original cost of the investment and "prolonged" against the period in which the fair value has been below its original cost. Where there is evidence of impairment, the cumulative loss — measured as the difference between the acquisition cost and the current fair value, less any impairment loss on that investment previously recognised in the income statement — is removed from other comprehensive income and recognised in the income statement. Impairment losses on equity instruments classified as available for sale are not reversed through the income statement. Increases in their fair value after impairment are recognised directly in other comprehensive income.

The determination of what is "significant" or "prolonged" requires judgement. In making this judgement, the Group evaluates, among other factors, the duration or extent to which the fair value of an investment is less than its cost.

2.4 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Financial liabilities

Initial recognition and measurement

Financial liabilities are classified, at initial recognition, as financial liabilities at fair value through profit or loss, loans and borrowings, or as derivatives designated as hedging instruments in an effective hedge, as appropriate.

All financial liabilities are recognised initially at fair value and, in the case of loans and borrowings, net of directly attributable transaction costs.

Subsequent measurement

The subsequent measurement of financial liabilities depends on their classification as follows:

Loans and borrowings

After initial recognition, interest-bearing loans and borrowings are subsequently measured at amortised cost, using the effective interest rate method unless the effect of discounting would be immaterial, in which case they are stated at cost. Gains and losses are recognised in the income statement when the liabilities are derecognised as well as through the effective interest rate amortisation process.

Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the effective interest rate. The effective interest rate amortisation is included in finance costs in the income statement.

Financial guarantee contracts

Financial guarantee contracts issued by the Group are those contracts that require a payment to be made to reimburse the holder for a loss it incurs because the specified debtor fails to make a payment when due in accordance with the terms of a debt instrument. A financial guarantee contract is recognised initially as a liability at its fair value, adjusted for transaction costs that are directly attributable to the issuance of the guarantee. Subsequent to initial recognition, the Group measures the financial guarantee contract at the higher of: (i) the amount of the best estimate of the expenditure required to settle the present obligation at the end of the reporting period; and (ii) the amount initially recognised less, when appropriate, cumulative amortisation.

Derecognition of financial liabilities

A financial liability is derecognised when the obligation under the liability is discharged or cancelled, or expires.

When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a derecognition of the original liability and a recognition of a new liability, and the difference between the respective carrying amounts is recognised in the income statement.

2.4 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Offsetting of financial instruments

Financial assets and financial liabilities are offset and the net amount is reported in the statement of financial position if there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, or to realise the assets and settle the liabilities simultaneously.

Inventories

Inventories are stated at the lower of cost and net realisable value. Cost for food, beverages, cutlery, linen and supplies used in hotel and restaurant operations is determined on the first-in, first-out basis. Net realisable value is based on estimated selling prices less any estimated costs to be incurred to completion and disposal.

Cash and cash equivalents

For the purpose of the consolidated statement of cash flows, cash and cash equivalents comprise cash on hand and demand deposits, and short term highly liquid investments that are readily convertible into known amounts of cash, are subject to an insignificant risk of changes in value, and have a short maturity of generally within three months when acquired, less bank overdrafts which are repayable on demand and form an integral part of the Group's cash management.

For the purpose of the consolidated statement of financial position, cash and cash equivalents comprise cash on hand and at banks, including term deposits, and assets similar in nature to cash, which are not restricted as to use.

Provisions

A provision is recognised when a present obligation (legal or constructive) has arisen as a result of a past event and it is probable that a future outflow of resources will be required to settle the obligation, provided that a reliable estimate can be made of the amount of the obligation.

When the effect of discounting is material, the amount recognised for a provision is the present value at the end of the reporting period of the future expenditures expected to be required to settle the obligation. The increase in the discounted present value amount arising from the passage of time is included in finance costs in the income statement.

A contingent liability recognised in a business combination is initially measured at its fair value. Subsequently, it is measured at the higher of (i) the amount that would be recognised in accordance with the general guidance for provisions above; and (ii) the amount initially recognised less, when appropriate, cumulative amortisation recognised in accordance with the guidance for revenue recognition.

Notes to Financial Statements

2.4 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Income tax

Income tax comprises current and deferred tax. Income tax relating to items recognised outside profit or loss is recognised either in other comprehensive income or directly in equity.

Current tax assets and liabilities are measured at the amount expected to be recovered from or paid to the taxation authorities, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period, taking into consideration interpretations and practices prevailing in the countries in which the Group operates.

Deferred tax is provided, using the liability method, on all temporary differences at the end of the reporting period between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes.

Deferred tax liabilities are recognised for all taxable temporary differences, except:

- when the deferred tax liability arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss; and
- in respect of taxable temporary differences associated with investments in subsidiaries, associates and joint ventures, when the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not reverse in the foreseeable future.

Deferred tax assets are recognised for all deductible temporary differences, the carryforward of unused tax credits and any unused tax losses. Deferred tax assets are recognised to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, the carryforward of unused tax credits and unused tax losses can be utilised, except:

- when the deferred tax asset relating to the deductible temporary differences arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss; and
- in respect of deductible temporary differences associated with investments in subsidiaries, associates and joint ventures, deferred tax assets are only recognised to the extent that it is probable that the temporary differences will reverse in the foreseeable future and taxable profit will be available against which the temporary differences can be utilised.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilised. Unrecognised deferred tax assets are reassessed at the end of each reporting period and are recognised to the extent that it has become probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply to the period when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

2.4 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Income tax (continued)

Deferred tax assets and deferred tax liabilities are offset if a legally enforceable right exists to set off current tax assets against current tax liabilities and the deferred taxes relate to the same taxable entity and the same taxation authority.

For the purposes of measuring deferred tax liabilities and deferred tax assets for investment properties that are measured using the fair value model in accordance with HKAS 40 *Investment Property*, the carrying amounts of such properties are presumed to be recovered through sale, unless the presumption is rebutted. The presumption is rebutted when the investment property is depreciable and is held within a business model of the Group whose business objective is to consume substantially all of the economic benefits embodied in the investment property over time, rather than through sale. If the presumption is rebutted, deferred tax liabilities and deferred tax assets for such investment properties are measured in accordance with the above general principles set out in HKAS 12 (i.e., based on the expected manner as to how the properties will be recovered).

Revenue recognition

Revenue is recognised when it is probable that the economic benefits will flow to the Group and when the revenue can be measured reliably, on the following bases:

- (a) revenue from the sale of properties is recognised when the significant risks and rewards of properties are transferred to the purchasers, which refers to the time when the construction of relevant properties has been completed and the properties are ready for delivery to the purchasers pursuant to the sales agreements, and collectability of the related receivables is reasonably assured. Deposits and instalments received on properties sold prior to the date of revenue recognition are included in the statement of financial position as deposits received;
- (b) rental and building management fee income is recognised in the period in which the properties are let and on the straight-line basis over the lease terms;
- (c) service income from hotel and restaurant operations and the provision of other related services is recognised when such services have been provided to customers;
- (d) revenue from the sale of food and other operating items is recognised when the food and other operating items are sold to customers and the significant risks and rewards of ownership have been transferred to the customers, provided that the Group maintains neither managerial involvement to the degree usually associated with ownership, nor effective control over the food and other operating items sold;
- (e) interest income is recognised on an accrual basis using the effective interest method by applying the rate that exactly discounts the estimated future cash receipts over the expected life of the financial instrument to the net carrying amount of the financial asset; and
- (f) dividend income is recognised when the shareholders' right to receive payment has been established.

2.4 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Dividends

Final dividends are recognised as a liability when they are approved by the shareholders in a general meeting. Proposed final dividends are disclosed in the notes to the financial statements.

Interim dividends are simultaneously proposed and declared, because the Company's memorandum of association and bye-laws grant the directors the authority to declare interim dividends. Consequently, interim dividends are recognised immediately as a liability when they are proposed and declared.

Borrowing costs

Borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, i.e., assets that necessarily take a substantial period of time to get ready for their intended use or sale, are capitalised as part of the cost of those assets. The capitalisation of such borrowing costs ceases when the assets are substantially ready for their intended use or sale. Investment income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowing costs capitalised. All other borrowing costs are expensed in the period in which they are incurred. Borrowing costs consist of interest and other costs that an entity incurs in connection with the borrowing of funds.

Foreign currencies

These financial statements are presented in Hong Kong dollars, which is the Company's functional currency. Each entity in the Group determines its own functional currency and items included in the financial statements of each entity are measured using that functional currency. Foreign currency transactions recorded by the entities in the Group are initially recorded using their respective functional currency rates prevailing at the dates of the transactions. Monetary assets and liabilities denominated in foreign currencies are translated at the functional currency rates of exchange at the end of the reporting period. Differences arising on settlement or translation of monetary items are recognised in the income statement.

Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was measured. The gain or loss arising on translation of a non-monetary item measured at fair value is treated in line with the recognition of the gain or loss on change in fair value of the item (i.e., translation difference on the item whose fair value gain or loss is recognised in other comprehensive income or income statement is also recognised in other comprehensive income or income statement, respectively).

The functional currencies of certain overseas subsidiaries and associates are currencies other than the Hong Kong dollar. As at the end of the reporting period, the assets and liabilities of these entities are translated into Hong Kong dollars at the exchange rates prevailing at the end of the reporting period and their income statements are translated into Hong Kong dollars at the weighted average exchange rates for the year.

2.4 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Foreign currencies (continued)

The resulting exchange differences are recognised in other comprehensive income and accumulated in the exchange fluctuation reserve. On disposal of a foreign operation, the component of other comprehensive income relating to that particular foreign operation is recognised in the income statement.

For the purpose of the consolidated statement of cash flows, the cash flows of overseas subsidiaries are translated into Hong Kong dollars at the exchange rates ruling at the dates of the cash flows. Frequently recurring cash flows of overseas subsidiaries which arise throughout the year are translated into Hong Kong dollars at the weighted average exchange rates for the year.

Employee benefits

Share-based payments

The Company operates a share option scheme for the purpose of providing incentives and rewards to eligible participants who contribute to the success of the Group's operations. Employees (including directors) of the Group receive remuneration in the form of share-based payments, whereby employees render services as consideration for equity instruments ("**equity-settled transactions**").

The cost of equity-settled transactions with employees for grants after 7 November 2002 is measured by reference to the fair value at the date at which they are granted. The fair value is determined by using the Binomial Option Pricing Model, further details of which are given in note 31 to the financial statements.

The cost of equity-settled transactions is recognised in employee benefit expense, together with a corresponding increase in equity, over the period in which the performance and/or service conditions are fulfilled. The cumulative expense recognised for equity-settled transactions at the end of each reporting period until the vesting date reflects the extent to which the vesting period has expired and the Group's best estimate of the number of equity instruments that will ultimately vest. The charge or credit to the income statement for a period represents the movement in the cumulative expense recognised as at the beginning and end of that period.

Service and non-market performance conditions are not taken into account when determining the grant date fair value of awards, but the likelihood of the conditions being met is assessed as part of the Group's best estimate of the number of equity instruments that will ultimately vest. Market performance conditions are reflected within the grant date fair value. Any other conditions attached to an award, but without an associated service requirement, are considered to be non-vesting conditions. Non-vesting conditions are reflected in the fair value of an award and lead to an immediate expensing of an award unless there are also service and/or performance conditions.

For awards that do not ultimately vest because non-market performance and/or service conditions have not been met, no expense is recognised. Where awards include a market or non-vesting condition, the transactions are treated as vesting irrespective of whether the market or non-vesting condition is satisfied, provided that all other performance and/or service conditions are satisfied.

2.4 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Employee benefits (continued)

Share-based payments (continued)

Where the terms of an equity-settled award are modified, as a minimum an expense is recognised as if the terms had not been modified, if the original terms of the award are met. In addition, an expense is recognised for any modification that increases the total fair value of the share-based payments, or is otherwise beneficial to the employee as measured at the date of modification.

Where an equity-settled award is cancelled, it is treated as if it had vested on the date of cancellation, and any expense not yet recognised for the award is recognised immediately. This includes any award where non-vesting conditions within the control of either the Group or the employee are not met. However, if a new award is substituted for the cancelled award, and is designated as a replacement award on the date that it is granted, the cancelled and new awards are treated as if they were a modification of the original award, as described in the previous paragraph.

The dilutive effect of outstanding options is reflected as additional share dilution in the computation of earnings per share.

Paid leave carried forward

The Group provides paid annual leave to its employees under their employment contracts on a calendar year basis. Under certain circumstances, such leave which remains untaken as at the year end is permitted to be carried forward and utilised by the respective employees in the following year. An accrual is made at the end of the reporting period for the material expected future cost of such paid leave earned during the current financial year by the employees and carried forward.

Retirement benefits

The Group operates a defined contribution Mandatory Provident Fund retirement benefit scheme (the "MPF Scheme") under the Mandatory Provident Fund Schemes Ordinance, for those employees who are eligible to participate in the MPF Scheme. Contributions are made based on a percentage of the employees' basic salaries and are charged to the income statement as they become payable in accordance with the rules of the MPF Scheme. The assets of the MPF Scheme are held separately from those of the Group in an independently administered fund. The Group's employer contributions vest fully with the employees when contributed into the MPF Scheme.

The employees of the Group's subsidiaries which operate in Vietnam and the People's Republic of China (the "PRC") are required to participate in central pension schemes operated by the respective governments in Vietnam and the PRC. These subsidiaries are required to contribute a certain percentage of their payroll costs to the central pension schemes. The contributions are charged to the income statement as they become payable in accordance with the rules of the central pension schemes.

3. SIGNIFICANT ACCOUNTING JUDGEMENTS AND ESTIMATES

The preparation of the Group's financial statements requires management to make judgements, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and their accompanying disclosures, and the disclosure of contingent liabilities. Uncertainty about these assumptions and estimates could result in outcomes that could require a material adjustment to the carrying amounts of the assets or liabilities affected in the future.

Judgements

In the process of applying the Group's accounting policies, management has made the following judgements, apart from those involving estimations, which have the most significant effect on the amounts recognised in the financial statements:

Impairment of assets

In determining whether an asset is impaired or the event previously causing the impairment no longer exists, the Group has to exercise judgement in the area of asset impairment, particularly in assessing: (1) whether an event has occurred that may affect the asset value or such event affecting the asset value has not been in existence; (2) whether the carrying value of an asset can be supported by the net present value of future cash flows which are estimated based upon the continued use of the asset or derecognition; and (3) the appropriate key assumptions to be applied in preparing cash flow projections including whether these cash flow projections are discounted using an appropriate rate. Changing the assumptions selected by management to determine the level of impairment, including the discount rates or the growth rate assumptions in the cash flow projections, could materially affect the net present value used in the impairment test.

Provision for tax indemnity

Provision for tax indemnity is recognised at its fair value upon acquisition of Lai Sun Development Company Limited ("LSD") on 30 September 2010. The provision represents tax liability arising from disposal of certain property interests in the PRC pursuant to certain indemnity deeds entered into by LSD. Management's judgement is required to determine (i) the estimated sales proceeds and outgoings; and (ii) the latest development plan and status of individual property development projects. Further details are included in note 34(b) to the financial statements.

Estimation uncertainty

The key assumptions concerning the future and other key sources of estimation uncertainty at the end of the reporting period, that have a significant risk of causing a material adjustment to the carrying amounts of assets within the next financial year, are described below.

Notes to Financial Statements

3. SIGNIFICANT ACCOUNTING JUDGEMENTS AND ESTIMATES (CONTINUED)

Estimation uncertainty (continued)

Estimation of fair values of investment properties and available-for-sale financial assets

The best evidence of fair value is current prices in an active market for similar properties in the same location and condition and subject to similar leases and other contracts. In the absence of such information, management determines the amount within a range of reasonable fair value estimates. In making its judgement, management considers information from (i) independent valuations; (ii) current prices in an active market for properties of a different nature, condition or location by reference to available market information; (iii) recent prices of similar properties in less active markets, with adjustments to reflect any changes in economic conditions since the dates of transactions that occurred at those prices; and (iv) discounted cash flow projections, based on reliable estimates of future cash flows, derived from the terms of any existing lease and other contracts, and (where possible) from external evidence such as current market rates for similar properties in the same location and condition, and using discount rates that reflect current market assessments of the uncertainty in the amount and timing of cash flows. The carrying amount at fair value of investment properties as at 31 July 2016 was approximately HK\$17,713,376,000 (2015: HK\$17,730,080,000) and that of an available-for-sale financial asset, of which the principal asset is an investment property, as at 31 July 2016 was approximately HK\$1,204,693,000 (2015: HK\$1,051,018,000).

Estimation of total budgeted costs and costs to completion for properties under development for sale

The total budgeted costs for properties under development for sale comprise (i) prepaid land lease payments; (ii) construction costs; and (iii) any other direct costs attributable to the development of the properties. In estimating the total budgeted costs for properties under development for sale, management refers to information such as (i) current offers from contractors and suppliers, and (ii) professional estimation on construction and material costs.

Impairment of loans and receivables

The Group assesses at the end of each reporting period whether there is any objective evidence that a loan/receivable is impaired. To determine whether there is objective evidence of impairment, the Group considers factors such as the probability of insolvency or significant financial difficulties of the debtor and default or significant delay in payments. Where there is objective evidence of impairment, the amount and timing of future cash flows are estimated based on historical loss experience for assets with similar credit risk characteristics.

Useful lives and residual values of items of property, plant and equipment

In determining the useful lives and residual values of items of property, plant and equipment, the Group has to consider various factors, such as technical or commercial obsolescence arising from changes or improvements in production, expected usage of the asset, expected physical wear and tear, the care and maintenance of the asset, and legal or similar limits on the use of the asset. The estimation of the useful life of the asset is based on the experience of the Group with similar assets that are used in a similar way. Additional depreciation is made if the estimated useful lives and/or the residual values of items of property, plant and equipment are different from previous estimation. Useful lives and residual values are reviewed at each financial year end date based on changes in circumstances.

4. SEGMENT INFORMATION

For management purposes, the Group has the following reportable segments:

- (a) the property development and sales segment engages in property development and sale of properties;
- (b) the property investment segment engages in the leasing of and sale of investment properties and development of properties for investment purposes;
- (c) the hotel operation segment engages in the operation of and provision of consultancy services to hotels;
- (d) the restaurant operation segment engages in the operation of and provision of consultancy services to restaurants; and
- (e) the “others” segment comprises the Group’s property management and consultancy services business, which provides property management, security and consultancy services to residential, office, industrial and commercial properties, and project management services to property development projects.

Management monitors the results of the Group’s operating segments separately for the purpose of making decisions about resources allocation and performance assessment. Segment performance is evaluated based on reportable segment results, which is a measure of adjusted profit before tax. The adjusted profit before tax is measured consistently with the Group’s profit before tax except that fair value gains on investment properties, interest income, finance costs, dividend income, share of profits and losses of associates and share of profits of joint ventures are excluded from such measurement.

Segment assets mainly exclude interests in associates, interests in joint ventures, available-for-sale financial assets, equity investments at fair value through profit or loss, pledged and restricted bank balances and time deposits, and certain cash and cash equivalents.

Segment liabilities mainly exclude bank borrowings, guaranteed notes, other borrowing, note payable, interest payable, tax payable, deferred tax and provision for tax indemnity.

Intersegment sales are transacted with reference to the prevailing market prices.

16. INVESTMENT PROPERTIES (CONTINUED)

Valuation process

The directors of the Company have determined that all investment properties are completed properties held for rental, based on the nature, characteristics and risks of each property. The Group's investment properties were revalued on 31 July 2016 based on valuations performed by Savills Valuation and Professional Services Limited and Savills (UK) Limited, independent professionally qualified valuers, at HK\$15,250,630,000 (2015: HK\$15,074,130,000) and HK\$2,462,746,000 (2015: HK\$2,655,950,000), respectively. Each year, the Group's management decides to appoint which external valuer to be responsible for the external valuations of the Group's properties. Selection criteria include market knowledge, reputation, independence and whether professional standards are maintained. The Group's management has discussions with the valuer on the valuation assumptions and valuation results twice a year when the valuations are performed for interim and annual financial reporting.

Valuation techniques

Fair value measurement using significant unobservable inputs (Level 3)

Fair value of investment properties is generally determined using the income capitalisation method and, wherever appropriate, by the direct comparison method. The income capitalisation method is based on the capitalisation of the net income and reversionary income potential by adopting appropriate capitalisation rates, which are derived from an analysis of sales transactions and valuers' interpretations of prevailing investor requirements or expectations. The prevailing market rents adopted in the valuation are determined with reference to recent lettings, within the subject properties and other comparable properties. The direct comparison method is based on comparing the property to be valued directly with other comparable properties, which have recently been transacted.

As at 31 July 2016, unlisted investments of the Group with a carrying amount of approximately HK\$13,252,000 (2015: HK\$13,252,000) were stated at cost less impairment because the directors are of the opinion that the variability in the range of reasonable fair value estimates is significant and the probabilities of the various estimates within the range cannot be reasonably assessed and used in estimating the fair value.

In the prior year, the directors considered an unlisted equity investment had been impaired and an impairment loss of approximately HK\$6,141,000 was reclassified from other comprehensive income and recognised in the income statement for that year.

19. AVAILABLE-FOR-SALE FINANCIAL ASSETS (CONTINUED)

As at 31 July 2016, included in available-for-sale financial assets at fair value was an equity interest in Bayshore Development Group Limited (“**Bayshore**”) of approximately HK\$1,204,693,000 (2015: HK\$1,051,018,000). The principal activity of Bayshore is property investment.

Valuation techniques

Fair value measurement using significant unobservable inputs (Level 3)

Fair value of the equity interest in Bayshore has been estimated using the fair value of investment property held by Bayshore, which is determined by the direct comparison method and the income capitalisation method detailed below.

The properties are valued by the direct comparison method on the assumption that each property can be sold in its existing state subject to existing tenancies or otherwise with the benefit of vacant possession and by referring to comparable sales transactions as available in the relevant markets. Comparison is based on prices realised on actual transactions or asking prices of comparable properties. Comparable properties with similar sizes, characters and locations are analysed, and carefully weighed against all respective advantages and disadvantages of each property in order to arrive at a fair comparison of value.

The properties are also valued by the income capitalisation approach taking into account the rents passing of the properties and the reversionary potential of the tenancies, and reconciling the two approaches, if applicable.

Information about fair value measurement using significant unobservable inputs (Level 3)

24. DEBTORS, DEPOSITS PAID AND OTHER RECEIVABLES

The Group maintains various credit policies for different business operations in accordance with business practices and market conditions in which the respective subsidiaries operate. Sales proceeds receivable from the sale of properties are settled in accordance with the terms of the respective contracts. Rent and related charges in respect of the leasing of properties are receivable from tenants, and are normally payable in advance with rental deposits received in accordance with the terms of the tenancy agreements. Hotel and restaurant charges are mainly settled by customers on a cash basis except for those corporate clients who maintain credit accounts with the respective subsidiaries, the settlement of which is in accordance with the respective agreements.

An ageing analysis of the trade debtors, based on the payment due date, as at the end of the reporting period is as follows:

	2016 HK\$'000	2015 HK\$'000
Trade debtors:		
Not yet due or less than 30 days past due	15,805	7,620

Other than rental deposits received, the Group does not hold any collateral or other credit enhancements over these balances.

These tax indemnities given by LSD apply in so far as such tax is applicable to the difference between (i) the value of the Property Interests in the valuation thereon by Chesterton Petty Limited (currently known as "**Knight Frank Petty Limited**"), independent professionally qualified valuers, as at 31 October 1997 (the "**Valuation**"); and (ii) the aggregate costs of such Property Interests incurred up to 31 October 1997, together with the amount of unpaid land costs, unpaid land premium and unpaid costs of resettlement, demolition and public utilities and other deductible costs in respect of the Property Interests. The Lai Fung Tax Indemnity Deed assumes that the Property Interests are disposed of at the values attributed to them in the Valuation, computed by reference to the rates and legislation governing PRC income tax and LAT prevailing at the time of the Valuation.

The indemnities given by LSD do not cover (i) new properties acquired by Lai Fung subsequent to the listing of the shares of Lai Fung on the Stock Exchange (the "**Listing**"); (ii) any increase in the relevant tax which arises due to an increase in tax rates or changes to the legislation prevailing at the time of the Listing; and (iii) any claim to the extent that provision for deferred tax on the revaluation surplus has been made in the calculation of the adjusted net tangible asset value of Lai Fung as set out in Lai Fung's prospectus dated 18 November 1997.

After taking into account the plans and the status of the Property Interests held by Lai Fung as at 31 July 2016 and 31 July 2015 which are covered under the Lai Fung Tax Indemnity Deed and the prevailing tax rates and legislation governing PRC income tax and LAT, the Group recorded an aggregate provision for tax indemnity of approximately HK\$980,638,000 as at the end of the reporting period (2015: HK\$980,638,000).

38. FINANCIAL RISK MANAGEMENT OBJECTIVES AND POLICIES

The principal financial assets held by the Group comprise available-for-sale financial assets, pledged and restricted bank balances and time deposits, and cash and cash equivalents. The management would, based on the Group's projected cash flow requirements, determine the types and levels of these financial instruments with a view to maintaining appropriate level of funding for the Group's operations and to enhancing the returns generated from these financial instruments. The Group's principal financial liabilities comprise bank borrowings and guaranteed notes. The Group will procure various types and levels of such financial liabilities in order to maintain sufficient funding for the Group's daily operations and to cope with expenditures incurred for various properties under development for sale or investment projects. In addition, the Group has various other financial assets and liabilities such as long term loan receivables, other borrowing, note payable, interest payable, debtors and creditors which arise directly from its daily operations.

The main risks arising from the Group's financial instruments are interest rate risks, foreign currency risk and credit risk. The management of the Company meets periodically to analyse and formulate measures to manage the Group's exposure to these risks. Generally, the Group has adopted relatively conservative strategies on its risk management and the Group has not used any derivatives and other instruments for hedging purposes during the year. The Group does not hold or issue derivative financial instruments for trading purposes. The directors review and determine policies for managing each of these risks and they are summarised as follows:

(i) Fair value and cash flow interest rate risks

Fair value interest rate risk is the risk that the value of a financial instrument fluctuates because of changes in market interest rates. Cash flow interest rate risk is the risk that the future cash flows of a financial instrument fluctuate because of changes in market interest rates. The Group is exposed to both fair value and cash flow interest rate risks. The Group's exposure to market risk for changes in interest rates relates primarily to the Group's pledged and restricted bank balances and time deposits, cash and cash equivalents and bank borrowings with a floating interest rate.

At present, the Group does not intend to seek to hedge its exposure to interest rate fluctuations. However, the Group constantly reviews the economic situation and its interest rate risk profile, and will consider appropriate hedging measures in future as may be necessary.

38. FINANCIAL RISK MANAGEMENT OBJECTIVES AND POLICIES (CONTINUED)

(i) Fair value and cash flow interest rate risks (continued)

The following table demonstrates the sensitivity to a reasonably possible change in interest rates, with all other variables held constant and before any impact on tax, of the Group's profit or loss (through the impact on variable-rate mortgage loan receivables, pledged and restricted bank balances and time deposits, cash and cash equivalents, bank borrowings, other borrowing and note payable) and the Group's equity.

	Increase in interest rate (in percentage)	Decrease in profit and equity HK\$'000
2016	0.5	15,967
2015	0.5	13,053

(ii) Foreign currency risk

Foreign currency risk is the risk that the value of a financial instrument fluctuates because of changes in foreign exchange rates.

The Group's major assets and liabilities and transactions are principally denominated in HK\$ or US\$. As HK\$ is pegged against US\$, the Group does not expect any significant movements in the exchange rate in the foreseeable future.

The Group had made investments in the United Kingdom with the assets and liabilities denominated in Pounds Sterling. The investments were partly financed by bank borrowings denominated in Pounds Sterling in order to minimise the net foreign exchange exposure. Other than the abovementioned, the remaining monetary assets and liabilities of the Group were denominated in RMB and VND which were insignificant as compared with the Group's total assets and liabilities. No hedging instruments were employed to hedge for the foreign exchange exposure.

(iii) Credit risk

The Group maintains various credit policies for different business operations as described in note 24. In addition, trade debtor balances are closely monitored on an ongoing basis and the Group's exposure to bad debts is not significant.

The credit risk of the financial assets, which comprise trade debtors and other receivables, pledged and restricted bank balances and time deposits, cash and cash equivalents and available-for-sale financial assets, arises from default of the counterparty, with a maximum exposure equal to the carrying amounts of these instruments.

38. FINANCIAL RISK MANAGEMENT OBJECTIVES AND POLICIES (CONTINUED)

(iv) Liquidity risk

The Group's objective is to ensure adequate funds are available to meet commitments associated with its capital expenditure and financial liabilities. Cash flows are closely monitored on an ongoing basis.

The maturity profile of the Group's financial liabilities as at the end of the reporting period, based on the contractual undiscounted payments, is as follows:

38. FINANCIAL RISK MANAGEMENT OBJECTIVES AND POLICIES (CONTINUED)

(v) Capital management

The Group manages its capital structure to ensure that entities in the Group will be able to continue to operate as a going concern while maximising the return to stakeholders through the setting up and maintenance of an optimal debt and equity capital structure. The Group's overall strategy remains unchanged from that of the prior year.

The capital structure of the Group mainly consists of bank borrowings, guaranteed notes and equity attributable to owners of the Company, comprising share capital and reserves.

The directors of the Company review the capital structure regularly. They will take into consideration the cost of capital and the risks associated with each class of capital prevailing in the market. Based on the recommendation of the directors, the Group will balance its overall capital structure through various types of equity fund raising exercises as well as maintenance of appropriate types and level of debt.

The Group monitors capital using, inter-alia, a gearing ratio which is net debt divided by equity attributable to owners of the Company. Net debt includes bank borrowings, guaranteed notes, other borrowing, note payable and interest payable less pledged and restricted bank balances and time deposits, and cash and cash equivalents. The gearing ratio as at the end of the reporting period is as follows:

	2016 HK\$'000	2015 HK\$'000
Bank borrowings	6,285,682	4,592,273

Impairment testing of goodwill

Goodwill acquired through a business combination during the year ended 31 July 2016 had been allocated to cash-generating units (the "CGU") from the Acquisition, which are components of the restaurant operation segment, for impairment testing.

The acquired subsidiaries are a group of CGU which generate cash inflows that are largely independent of the cash inflows from other assets.

The recoverable amount of the CGU has been determined based on a value-in-use calculation using cash flow projections based on financial budgets covering a three-year period with a growth rate approved by senior management, which is based on the management's expectation for market development. The discount rate applied to the cash flow projections is 15%.

Assumptions were used in the value-in-use calculation of the CGU for the year ended 31 July 2016. The following describes each key assumption on which management has based its cash flow projections to undertake impairment testing of goodwill:

Budgeted profit — The basis used to determine the value assigned to the budgeted profit is the average profit achieved in the markets, adjusted for expected efficiency improvement, and expected market development.

Discount rate — The discount rate used is before tax and reflects specific risks relating to the relevant unit.

45. EVENT AFTER THE REPORTING PERIOD

On 30 September 2016, Action Charm Limited (“**ACL**”), a wholly-owned subsidiary of LSD, entered into a sale and purchase agreement, pursuant to which the vendor conditionally agreed to sell and ACL conditionally agreed to purchase 49.92% interest in Camper & Nicholsons International SA (“**CNI**”) for an aggregate consideration of approximately EUR13,000,000 (equivalent to approximately HK\$113,804,000). Upon completion on 3 October 2016, ACL subscribed a further one new share of CNI which increased its shareholding interest to 49.96%.

CNI is principally engaged in the business of brokerage, charter, marketing, management and construction of yachts.

Due to the timing of the transaction, the Group is still assessing the financial impact on the Group. Accordingly, certain disclosures in relation to the acquisition have not been presented.

Further details are set out in the Company’s announcement dated 30 September 2016.

46. APPROVAL OF THE FINANCIAL STATEMENTS
