CHAIRMAN'S LETTER

STEADY BUSINESS PERFORMANCE • PROMISING GROWTH OPPORTUNITIES

For the interim period ended 30th June 2017, CK Infrastructure Holdings Limited (“CKI”, the “Company” or the “Group”) recorded unaudited profit attributable to shareholders of HK\$5,657 million, a 3% increase over the same period in 2016.

The result was achieved notwithstanding the British pound having dropped more than 10% when compared with the corresponding period last year.

In addition, a one-off gain generated from the disposal of CKI's stake in Spark Infrastructure in June 2016 was recorded in last year's corresponding result. This year's interim result would have shown an increase of 20%, if this one-off gain was adjusted for.

Overall performance of the Group's businesses around the world continued to be sound with steady returns generated.

CONTINUOUS DIVIDEND GROWTH

The Board of Directors of CKI (the “Board”) has declared an interim dividend for 2017 of HK\$0.67 per share (2016: HK\$0.63 per share), a 6.3% increase over the same period in 2016. This extends CKI's sequence of continuous growth in dividends since listing over 20 years ago. The interim dividend will be paid on Thursday, 31st August, 2017 to shareholders whose names appear on the Register of Members of the Company at the close of business on Tuesday, 22nd August, 2017.

ACQUISITION

During the period under review, CKI made a milestone investment with the acquisition of DUET. DUET is an owner and operator of energy utility assets which are mostly located in Australia. Its businesses comprise regulated network businesses, contracted gas pipelines, and power generation projects. The company has a long track record of stable performance, bolstered by regulated and contracted revenue streams.

CHAIRMAN'S LETTER

The enterprise value of the business is approximately A\$13 billion. CKI now owns a 40% stake in the business, with associate companies of the CK Group – Cheung Kong Property Holdings Limited (“CKPH”) and Power Assets Holdings Limited (“Power Assets”) – holding 40% and 20% respectively. This acquisition is the largest acquisition ever made by CKI.

The DUET transaction successfully addressed concerns of the Australian Government, paving the way for further investment opportunities in Australia for the Group.

BUSINESS OPERATIONS

Power Assets

Profit contribution from Power Assets was HK\$1,564 million, an increase of 16% as compared to the same period last year.

Both Hong Kong and international portfolios reported financial growth during the period under review.

UK Portfolio

Profit contribution from the United Kingdom portfolio was £295 million, an increase of 3% over the corresponding period last year. This result when translated into Hong Kong dollars, amounted to HK\$2,929 million, representing a 8% decrease. The British pound continued to be affected by the Brexit decision. Nonetheless, the underlying operations of the Group's businesses in the United Kingdom continued to perform well.

UK Power Networks (“UKPN”) delivered a sound operational performance. During the interim period, UKPN completed a two-year trial of Britain's largest grid-scale battery project. The 6MW/10MWh “big battery” trial demonstrated that energy storage has the potential to be both technically and commercially viable; this could possibly transform the energy grid, playing a major role in the transition towards a low-carbon economy.

Northumbrian Water continued to provide a steady source of income. For the fourth year running, the company was named the most trusted water company in the country according to a survey carried out by Consumer Council for Water.

Both of the Group's gas distribution businesses in the United Kingdom – Northern Gas Networks and Wales & West Gas Networks – generated results which were in line with expectations.

CHAIRMAN'S LETTER

The Group's regulated businesses across the United Kingdom have all completed their regulatory resets, laying down the foundation for stable returns for the coming years.

UK Rails recorded steady operational performance in the first half. A five-car test train for the £140 million Great Western Railway new order arrived United Kingdom in June and will commence testing in the summer. 63 of these trains are scheduled to be in service next year.

Seabank Power also achieved good results in the interim period.

Australian Portfolio

Profit contribution from CKI's Australian businesses was A\$139 million (approximately HK\$834 million), a decrease of 45% (HK\$: 42%) over the same period last year. This is mainly due to the one-off gain of HK\$781 million recorded in the corresponding period last year for the disposal of Spark Infrastructure. Excluding this, total contribution from Australia increased 27%.

During the period under review, performance of both SA Power Networks and Victoria Power Networks was in line with forecast.

Australian Gas Networks also delivered a steady performance. The business is currently finalising the terms of the regulatory reset for its networks in Victoria and New South Wales. Once confirmed, a secure framework for future earnings is expected to be in place.

The newly acquired DUET provided 1.5 months of income to the Group. Since completion, DUET's various operations have been performing on track.

Other Infrastructure Businesses

Profit contribution from the Mainland China portfolio was HK\$157 million, similar to that of the same period last year.

In Canada, profit contribution was C\$21 million (approximately HK\$120 million), an increase of 49% (HK\$: 50%) over the corresponding period last year. The result was buoyed by earnings generated from Canadian Midstream Assets which was acquired from Husky Energy in July last year.

CHAIRMAN'S LETTER

Profit contribution of NZ\$15.7 million (approximately HK\$87 million) was generated from the New Zealand portfolio. This represents an increase of 6% (HK\$: 12%) when compared to the same period last year. Cold weather brought in a higher than expected revenue for Wellington Electricity during the period.

In Continental Europe, Dutch Enviro Energy performed satisfactorily, generating a profit contribution of €9.5 million (approximately HK\$80 million), an amount similar to that of last year. Meanwhile, Portugal Renewable Energy recorded €12.4 million (approximately HK\$104 million), a drop of 7% (HK\$: 9%) over the corresponding period last year. The decrease is due to lower wind resource in the first half of the year.

Results of the Group's materials business was HK\$149 million, similar to that of the same period last year.

STRONG FINANCIAL POSITION

As at 30th June, 2017, the Group had cash on hand of HK\$4.7 billion and a net debt to net total capital ratio of 15.3%. Notwithstanding the DUET acquisition, CKI maintains a strong financial position.

SUBSEQUENT EVENT

On 14th July, 2017, it was announced that CKI has agreed to buy 25% of the shareholding of Reliance LP ("Reliance") from CKPH at a consideration of approximately C\$715 million (approximately HK\$4,386 million). Reliance is principally engaged in the building equipment services sector providing water heaters, HVAC (heating, ventilation and air conditioning) equipment, comfort protection plans and other services to homeowners in Ontario, Canada. It also has operations in Manitoba, Saskatchewan and Alberta in Canada, as well as Georgia in the United States. The sale of the 25% shareholding to CKI is subject to the approval of CKPH's independent shareholders. Assuming this proceeds, this acquisition will enhance CKI's portfolio in Canada and further widen CKI's business scope.

CHAIRMAN'S LETTER

OUTLOOK

The addition of DUET has enhanced the portfolio mix of CKI, expanding and diversifying its electricity business and widening its gas coverage in the country. With this newly acquired business, the revenue and profit base of CKI has been further strengthened.

Building on this successful acquisition momentum, CKI will continue to pursue further growth opportunities. Sizeable capital intensive deals are of particular interest to us. Our unique competitive edge lies in the readiness of our associate companies in the CK Group to form joint ventures in our investments. This is most beneficial to us in the diversification and management of risks and reward, mitigating our exposure in any particular investment. Nonetheless, as always, CKI will continue to adopt very strict financial discipline when analysing prospective investments and will not approach them with a "must win" mentality.

With a solid business foundation, steady revenue streams, ample cash on hand, and strong management capabilities, the Group is well-positioned to advance on the growth path. CKI is optimistic about prospects for the Group.

I would like to take this opportunity to thank the Board, management and staff for their commitment and efforts, as well as our shareholders for their support.

LI TZAR KUOI, VICTOR

FINANCIAL REVIEW

FINANCIAL RESOURCES, TREASURY ACTIVITIES AND GEARING RATIO

The Group's capital expenditure and investments were funded from cash on hand, internal cash generation, syndicated loans, notes, share placement and other project loans.

As at 30th June, 2017, cash and bank deposits on hand amounted to HK\$4,746 million and the total borrowings of the Group amounted to HK\$24,336 million, which included Hong Kong dollar notes of HK\$260 million and foreign currency borrowings of HK\$24,076 million. Of the total borrowings, 12 per cent were repayable in 2017, 44 per cent were repayable between 2018 and 2021 and 44 per cent were repayable beyond 2021. The refinancing of the borrowing repayable in 2017 has been committed with certain banks. The Group's financing activities continue to be well received and fully supported by its bankers.

The Group adopts conservative treasury policies in cash and financial management. To achieve better risk control and minimise the cost of funds, the Group's treasury activities are centralised. Cash is generally placed in short-term deposits mostly denominated in U.S. dollars, Hong Kong dollars, Australian dollars, New Zealand dollars, British pound, Canadian dollars or Euro. The Group's liquidity and financing requirements are reviewed regularly. The Group will continue to maintain a strong capital structure when considering financing for new investments or maturity of bank loans.

As at 30th June, 2017, the Group maintained a net debt position with a net debt to net total capital ratio of 15.3 per cent, which was based on its net debt of HK\$19,590 million and net total capital, which represents the total borrowings plus total equity net of cash and bank deposits, of HK\$128,213 million. This ratio was higher than the net debt to net total capital ratio of 4.5 per cent at the year end of 2016. This change was mainly due to the funds utilised for the investment in a business that owns and operates energy utility assets in Australia, the United States, the United Kingdom and Europe during the period.

The fluctuations in currencies and in particular, the devaluation of the British pound arising from the United Kingdom referendum vote to leave the European Union had an impact on all businesses in the market that have exposure in the United Kingdom and/or to British pound. While the Group is not immune from such impact, there is no material change beyond market expectation.

FINANCIAL REVIEW

To minimise currency risk exposure in respect of its investments in other countries, the Group generally hedges those investments with (i) currency swaps and (ii) the appropriate level of borrowings denominated in the local currencies. The Group also entered into certain interest rate swaps to mitigate interest rate risks. As at 30th June, 2017, the notional amounts of these derivative instruments amounted to HK\$49,157 million.

CHARGE ON GROUP ASSETS

As at 30th June, 2017:

- the Group's obligations under finance leases totalling HK\$29 million were secured by charges over the leased assets with carrying value of HK\$29 million; and
- the shares of a subsidiary were pledged to secure bank borrowings totalling HK\$1,308 million granted to the Group.

CONTINGENT LIABILITIES

As at 30th June, 2017, the Group was subject to the following contingent liabilities:

HK\$ million	
Guarantee in respect of bank loan drawn by affiliated companies	1,241
Other guarantee given in respect of an affiliated company	731
Performance bond indemnities	112
Total	2,084

EMPLOYEES

The Group, including its subsidiaries but excluding affiliated companies, employs a total of 2,014 employees. Employees' cost (excluding directors' emoluments) amounted to HK\$365 million. The Group ensures that the pay levels of its employees are competitive and that its employees are rewarded on a performance related basis within the general framework of the Group's salary and bonus system.

Preferential subscription of 2,978,000 new shares of the Company was given to those employees who had subscribed for shares of HK\$1.00 each in the Company at HK\$12.65 per share on the flotation of the Company in 1996. The Group does not have any share option scheme for employees.

The adoption of the new and revised HKFRSs has no material impact on the Group’s results and financial position for the current or prior periods.

The Directors are of the opinion that, taking into account of the available banking facilities and internal financial resources of the Group, the Group has sufficient working capital for its present requirements within one year from the end of the reporting period. RISK FACTORS

The Group's businesses, financial conditions, results of operations or growth prospects may be affected by risks and uncertainties directly or indirectly pertaining to the Group's businesses. The risk factors set out below are those that could result in the Group's businesses, financial conditions, results of operations or growth prospects differing materially from expected or historical results. Such factors are by no means exhaustive or comprehensive, and there may be other risks in addition to those shown below which are not known to the Group or which may not be material now but could turn out to be material in the future. In addition, this Interim Report does not constitute a recommendation or advice to invest in the shares of the Company and investors are advised to make their own judgment or consult their own investment advisors before making any investment in the shares of the Company.

GLOBAL ECONOMY

Global economic growth remains slow with subdued demand conditions in the major economies. The outcomes of the United Kingdom ("UK") referendum on the EU's membership and the fluctuation of the US dollar against major currencies around the world heightened uncertainties in the world economy and global financial market. Slowdown in global economic growth could lead to economic contractions in certain markets, commercial and consumer delinquencies, weakened consumer confidence and increased market volatility. The Group is a diversified infrastructure investment company with businesses in Hong Kong, Mainland China, the UK, the Netherlands, Portugal, Australia, New Zealand and Canada. Any adverse economic conditions in those countries and places in which the Group operates may potentially impact on the Group's financial position or potential income, asset value and liabilities.

ECONOMIC CONDITIONS AND INTEREST RATES

The industries in which the Group operates are affected by the economic conditions of the various places where the Group's investments or operations are located, the population growth of these places, mark to market value of securities investments, the currency environment and interest rates cycles. There can be no assurance that the combination of the above factors the Group experiences in the future will not adversely affect its financial conditions or results of operations.

RISK FACTORS

In particular, income from finance and treasury operations is dependent upon the capital markets, interest rate and currency environment, and the worldwide economic and market conditions, and therefore there can be no assurance that changes in these conditions will not adversely affect the Group's financial conditions or results of operations. The volatility in the financial markets may also adversely affect the income to be derived by the Group from its finance and treasury activities.

POTENTIAL RISKS IN RELATION TO THE UK REFERENDUM ON EU'S MEMBERSHIP ("BREXIT")

On 23rd June, 2016, the outcome of UK's referendum on the EU's membership was to "leave the European Union". The financial markets and exchange rate of the British pound responded vigorously immediately. Although the UK Government has already given notice to the EU of its intention to leave the EU, the terms of any withdrawal are subject to a negotiation period of potentially two or more years depending on the precise timetable agreed during the negotiations. Nevertheless, the referendum has created significant uncertainty about the future relationship between the UK and EU, including with respect to the laws and regulations that will apply as the UK determines which EU-derived laws to replace or replicate in the event of a withdrawal. These developments, or the perception that any of them could occur, has had a material adverse effect on global economic conditions and stability of global financial markets.

While the Group's businesses in the UK are either protected by the respective regulated regimes or under long term payment contracts, and are essential services including electricity, water & sewage, gas and transportation, the continuing uncertainties following Brexit could adversely affect the economy of the UK and the strength of the British pound, although the long term implication of Brexit remains to be seen.

A significant and prolonged depreciation of the British pound may affect the Group's reported profit, and its ability to maintain future growth of dividends for shareholders.

RISK FACTORS

CONCENTRATION IN GEOGRAPHICAL MARKETS AND BUSINESS TYPES

The business operation of the Group may be viewed as substantially concentrated in one or more geographical markets or in one particular or more types of business. If and when the Group's operations are exposed to any deterioration in the economic, social and/or political conditions as well as any incidence of social unrest, strike, riot, civil disturbance or disobedience or terrorism in such geographical markets and/or business segments, the adverse circumstances may materially disrupt the Group's operations and, in turn, impact the revenue, profitability and financial condition of the Group.

HIGHLY COMPETITIVE MARKETS

The Group's waste management and off-airport car park businesses face significant competition across the markets in which they operate. New market entrants and intensified price competition among existing market players could adversely affect the Group's businesses, financial conditions, results of operations or growth prospects. Competition risks faced by the Group include (a) possible restrictions on the access by the shuttle buses operated by the Group's off-airport car park businesses as imposed by the airport authorities who operates the on-airport car park businesses; (b) the availability of rail link services from city centre to airport which may reduce the usage of the off-airport car park; and (c) significant competition and pricing pressure from other competitors attempting to capture a higher level of market share. Such risks may adversely affect the financial performance of the Group's operation.

INFRASTRUCTURE MARKET

Some of the investments owned by the Group (for example, water, gas and electricity) are subject to regulatory pricing and strict adherence must be made to the licence requirements, codes and guidelines established by the relevant regulatory authorities from time to time. Failure to comply with these licence requirements, codes or guidelines may lead to penalties, or, in extreme circumstances, amendment, suspension or cancellation of the relevant licences by the authorities. Infrastructure projects are capital intensive, and with only a few major players in the market, there is no assurance of ready buyers on disposal.

RISK FACTORS

The distribution and transmission networks of the Group's utilities investments are also exposed to supply interruptions. If a severe earthquake, storm, flood, fire, sabotage, terrorist attack or other unplanned event interrupts service, the loss of cash flow resulting from the interruption and the cost of recovery from network damage could be considerable and potentially cause poor customer perception and may also lead to claims and litigations. Moreover, some losses from events such as terrorist attacks may not be recoverable. Increases in the number or duration of supply interruptions could result in material increases in the costs associated with the operation of the distribution and transmission networks. The capacity factor (load factor) of the Group's wind farms could also be affected by the wind condition, which could result in the fluctuation of revenues. All of these uncertain factors could have a material adverse effect on the businesses, financial conditions, results of operations or growth prospects of the Group.

CRUDE OIL MARKETS

The Group's investment in Husky Midstream Limited Partnership ("HMLP") comprises oil pipelines, storage facilities and ancillary assets in Canada. Its results of operation and financial condition may be dependent on the prices received for Husky Energy Inc. ("Husky")'s refined products and crude oil. Lower prices over a prolonged period of time for crude oil could adversely affect the value and quantity of Husky's oil reserve. HMLP also has other customers apart from Husky and their demand for HMLP's services may depend on prices received for their refined products and crude oil. Prices for refined products and crude oil are based on local and global supply and demand as well as availability and costs of transportation. Supply and demand may be affected by a number of factors including, but not limited to, actions taken by the Organisation of the Petroleum Exporting Countries (OPEC), non-OPEC crude oil supply, social and political conditions in oil producing countries, the occurrence of natural disasters, general and specific economic conditions, technological developments, prevailing weather patterns and the availability of alternate sources of energy. Volatility in refined products and crude oil price may adversely affect the Group's financial condition and results of operations.

RISK FACTORS

CAPITAL EXPENDITURE

A significant amount of capital expenditure is required for the Group to acquire new investments and to maintain the assets of its existing businesses. While the relevant asset companies have their own asset management plans, there is a risk that due to unforeseen events, capital expenditure required for the replacement of assets could exceed budgeted amounts and hence affect the businesses, financial conditions, results of operations or growth prospects of the Group.

CURRENCY FLUCTUATIONS

The Group is a diversified infrastructure investment company with businesses in Hong Kong, Mainland China, the UK, the Netherlands, Portugal, Australia, New Zealand and Canada, and is exposed to potential currency fluctuations in these countries and places in which the Group operates. The results of the Group are recorded in Hong Kong dollars but its various subsidiaries, associates and joint ventures may receive revenue and incur expenses in other currencies. Any currency fluctuations on translation of the accounts of these subsidiaries, associates and joint ventures and also on the repatriation of earnings, equity investments and loans may therefore impact on the Group's financial position or potential income, asset value and liabilities. The fluctuations in currencies and in particular, the devaluation of the pound sterling arising from the UK referendum vote to leave the European Union impact on all businesses in the market that have exposure in the UK and/or to pound sterling. While the Company is not immune from such impact, there is no material change beyond market expectation.

To minimise currency risk exposure in respect of its investments in other countries, the Group generally hedges those investments with (i) currency swaps and (ii) appropriate level of borrowings denominated in the local currencies. The Group has not entered into any speculative derivative transaction.

Although currency exposures have been managed by the Group, a depreciation or fluctuation of the currencies in which the Group conducts operations relative to the Hong Kong dollar could adversely affect the Group's businesses, financial conditions, results of operations or growth prospects.

RISK FACTORS

CYBERSECURITY

With the fast expanding adoption of Internet and networking operational technology, cyberattacks around the world are occurring at a higher frequency and intensity. The Group's critical utility and information assets are exposed to attack, damage or unauthorised access in the cyberworld. Cybersecurity risks could have material adverse effect on the operational and business performance, as well as the business reputation of the Group.

Although the Group has not experienced any major damage to its infrastructure projects, assets or activities from cyberattacks to date, there can be no assurance that future cyberattacks or breaches of the Group's cybersecurity will not occur and result in significant impact on the Group's reputation, business, results of operations and financial condition.

STRATEGIC PARTNERS

Some of the businesses of the Group are conducted through non wholly-owned subsidiaries, associates and joint ventures in which the Group shares control (in whole or in part) and strategic alliances had been formed by the Group with other strategic or business partners. There can be no assurance that any of these strategic or business partners will continue their relationships with the Group in the future or that the Group will be able to pursue its stated strategies with respect to its non wholly-owned subsidiaries, associates and joint ventures and the markets in which they operate. Furthermore, the joint venture partners may (a) have economic or business interests or goals that are inconsistent with those of the Group; (b) take actions contrary to the Group's policies or objectives; (c) undergo a change of control; (d) experience financial and other difficulties; or (e) be unable or unwilling to fulfill their obligations under the joint ventures, which may affect the Group's businesses, financial conditions, results of operations or growth prospects.

RISK FACTORS

MERGERS AND ACQUISITIONS

The Company has undertaken mergers and acquisitions activities in the past and may continue to do so if there are appropriate acquisition opportunities in the market. Although due diligence and detailed analysis are conducted before these activities are undertaken, there can be no assurance that these can fully expose all hidden problems, potential liabilities and unresolved disputes that the target company may have. In addition, valuations and analyses on the target company conducted by the Company and by professionals alike are based on numerous assumptions, and there can be no assurance that those assumptions are correct or appropriate or that they will receive universal recognition. Relevant facts and circumstances used in the analyses could have changed over time, and new facts and circumstances may come to light as to render the previous assumptions and the valuations and analyses based thereon obsolete. Some of these mergers and acquisitions activities are subject to regulatory approvals in overseas countries and there can be no assurance that such approvals will be obtained, and even if granted, that there will be no burdensome conditions attached to such approvals. The Company may not necessarily be able to successfully integrate the target business into the Group and may not be able to derive any synergy from the acquisition, leading to an increase in costs, time and resources. For merger and acquisitions activities undertaken overseas, the Company may also be exposed to different and changing political, social, legal and regulatory requirements at the local, national and international level. The Company may also need to face different cultural issues when dealing with local employees, customers, governmental authorities and pressure groups.

IMPACT OF LOCAL, NATIONAL AND INTERNATIONAL REGULATIONS

The local business risks in different countries and cities in which the Group operates could have a material impact on the businesses, financial conditions, results of operations or growth prospects. The Group has investments in different countries and cities around the world and the Group is, and may increasingly become, exposed to different and changing political, social, legal, tax, regulatory and environmental requirements at the local, national or international level. Also, new guidelines, directives, policies or measures by governments, whether fiscal, tax, regulatory, environmental or other competitive changes, may lead to an increase in additional or unplanned operating expenses and capital expenditures, increase in market capacity, reduction in government subsidies, pose a risk to the overall investment return of the Group's businesses and may delay or prevent the commercial operation of a business with resulting loss of revenue and profit, which may adversely affect the Group's businesses, financial conditions, results of operations or growth prospects.

RISK FACTORS

IMPACT OF NEW ACCOUNTING STANDARDS

The International Accounting Standards Board has from time to time issued a number of new and revised International Financial Reporting Standards (“IFRS”). The International Accounting Standards Board may in the future issue new and revised standards and interpretations. In addition, interpretations on the application of the IFRS will continue to develop. These factors may require the Group to adopt new accounting policies. The adoption of new accounting policies or new IFRS might or could have a significant impact on the Group’s financial position, results of operations or profit growth.

OUTBREAK OF HIGHLY CONTAGIOUS DISEASE

In 2003, there was an outbreak of Severe Acute Respiratory Syndrome (“SARS”) in Hong Kong, the Mainland and other places. The SARS outbreak had a significant adverse impact on the economies of the affected areas. The spread of Influenza and other communicable diseases from time to time have also affected many areas of the world. The outbreak of the Ebola virus disease and Zika virus also pose a significant threat to global industries. Additional outbreaks of other epidemic diseases may adversely affect the Group’s businesses, financial conditions, results of operations or growth prospects.

CONNECTED TRANSACTIONS

CK Hutchison Holdings Limited (“CK Hutchison”) is also listed on The Stock Exchange of Hong Kong Limited. Although the Group believes that its relationship with CK Hutchison provides it with significant business advantages, the relationship results in various connected transactions under the Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited (“Listing Rules”) and accordingly any transactions entered into between the Group and CK Hutchison, its subsidiaries or associates are connected transactions, which, unless one of the exemptions is available, will be subject to compliance with the applicable requirements of the Listing Rules, including the issuance of announcements, the obtaining of independent shareholders’ approval at general meetings and disclosure in annual reports and accounts. Independent shareholders’ approval requirements may also lead to unpredictable outcomes causing disruptions to as well as an increase in the risks of the Group’s business activities. Independent shareholders may also take actions that are in conflict with the interests of the Group.

RISK FACTORS

THE GROUP'S FINANCIAL CONDITIONS OR RESULTS OF OPERATIONS ARE AFFECTED BY THOSE OF THE POWER ASSETS GROUP

Following the spin-off by Power Assets Group of its Hong Kong electricity business in January 2014, the Group owns approximately 38.87 per cent of Power Assets Holdings Limited ("Power Assets") which has investments in different countries and places and holds 33.37 per cent of HK Electric Investments, a fixed single investment trust, which in turn holds 100 per cent of The Hongkong Electric Company, Limited whose operations comprise the generation, transmission, distribution and supply of electricity to Hong Kong Island and Lamma Island. Hence the financial conditions and results of operations of Power Assets may be affected by the local market conditions and the economy of Hong Kong as well as the places where its investments are located. The Group's financial conditions and results of operations are materially affected by the financial conditions and results of operations of Power Assets.

NATURAL DISASTERS

Some of the Group's assets and projects, and many of the Group's customers and suppliers are located in areas at risk of damage from earthquakes, floods, fire, frost and similar events and the occurrence of any of these events could disrupt the Group's business and materially and adversely affect the Group's businesses, financial conditions, results of operations or growth prospects.

Although the Group has not experienced any major structural damage to its infrastructure projects or assets or facilities from earthquakes or natural disasters to date, there can be no assurance that future earthquakes or other natural disasters will not occur and result in major damage to the Group's infrastructure projects, assets or facilities or on the general supporting infrastructure facilities in the vicinity, which could adversely affect the Group's businesses, financial conditions, results of operations or growth prospects.

RISK FACTORS

TERRORIST THREAT

The Group is a diversified infrastructure investment company with businesses in Hong Kong, Mainland China, the UK, the Netherlands, Portugal, Australia, New Zealand and Canada. In 2015 and 2016, a series of terrorist activities occurred in Europe that resulted multiple deaths and casualties. There is no assurance that there will not be any political unrest or immunity from terrorist threat in the countries in which the Group operates, and if these events occur, it may have an adverse impact on the Group's financial condition and results of operations.
