Basic Information, Prospects, Background and Necessity of Fund-raising Investment Projects

1. The use of raised funds from the initial public offering of A Share

The Company proposes to issue up to 20 million A Shares under an initial public offering. After deducting the expenses in connection with the offering, the raised funds will be used for the construction project of pharmaceutical classification and distribution centre, information system deepening project and the extension project for pharmaceutical wholesale business of the Company, and the estimated total investment amount is approximately RMB251.5625 million.

The construction project of pharmaceutical classification and distribution centre is proposed to be situated at pharmaceutical classification and distribution centre in Guangzhou Nansha, and the total investment amount is expected to be approximately RMB165 million, with a two-year construction period. Upon completion, the overall scale of the Company will be enlarged, the distribution capacity within the network will be enhanced, the advantage of the Company's services, the customer resources, branding and management resources will be further utilised, the market competitiveness and sustainability of the Company will be strengthened.

The information system deepening project is the third phase of the construction projects under the SAP informatization system, and the total investment amount is approximately RMB16.5625 million, with a one-year construction period. The project will introduce informatization modular such as CRM (Client Relationship Management). Upon completion, the project will become a vital managing tool of the Company, which could provide strong support to the innovations, management and operations of the business channels of the Company.

It is expected that approximately RMB70 million will be invested for the extension project for pharmaceutical wholesale business. The working capital required for the development of the supplemental wholesale business will be used for the procurement of upstream quality products and the development of downstream channels, so as to effectively enhance sales volume and market share, increase the corporate income and promote the operating performance.

The Company shall settle the payment for the projects by its self-raised funds based on their actual progress before obtaining the proceeds from the A Share Offering. After obtaining the proceeds from the A Share Offering, such proceeds could be used to replace the preliminary self-raised fund injected in the investment projects. The deposit system in the Special Account for Raised Funds would be set up, according to which the raised funds shall be deposited in a special account designated by the Board to be used properly as their designed purposes. The Company will strictly follow the related rules of the Administration System of Raised Funds to manage and utilize the raised funds.

The initial public offering of A Shares is subject to the approval of regulatory authorities such as CSRC.

2. Project Background

The Company is a leading medicine distributor in Guangdong province, which mainly sells various medicine products to other distributors, retail drug stores, hospitals, clinics and health stations. The Company focuses on non-centralized bidding market and spares no efforts to meet the end clients' service requirements of highly-frequency small-quantity procurement and efficient delivery. Now, the Company have two self-owned large medicine logistics distribution centres (in Shantou and Foshan), which are equipped with professional transportation teams and modern information systems, covering the whole pharmaceutical distribution supply chain from procurement, sales, warehousing, transportation to delivery.

In consideration of further development of the domestic medicine market, especially the boom of spending in medicine in Guangdong province, the Company's current logistics network, informatization level and self-capital scale can no longer meet the future development demand. So, it is in urgent need to invest more in logistics facilities in the Pearl River Delta region, enhance the information service capacity and increase additional working capital. Firstly, in China, health expenditure rose strongly. According to the data of National Bureau of Statistics, China's total health expenditure increased from RMB2,434.591 billion in 2011 to RMB4,097.464 billion in 2015, at a compound annual growth rate of 13.90%. According to the statistics from the *Report of Statistical Analysis on the Operation of Pharmaceutical Distribution Industry of 2016*, the sales volume in Guangdong province in 2016 amounted to RMB160.303 billion, ranking first among different provinces, cities and municipalities, and the compound annual growth rate reached 21.72% for the last five years. Secondly, in recent years, the awareness on medical care has been gradually increasing among Chinese residents, and the insurance system is being improved. The growth momentum of consumption of medical and healthcare services stays strong. In addition, with the competition in pharmaceutical industry getting increasingly fierce, the clients have higher and higher requirements on medicine products and services.

3. Project necessity

(1) Firstly, it is in line with future development strategy and planning of the Company

The Company plans to further explore Guangdong market, fully extend the network coverage and increase its market share. In order to achieve the above goal, we have to build several logistic centres in the Pearl River Delta region, so as to shorten the distribution radius and the network radiation capacity. The Company plans to build a pharmaceutical classification and distribution centre in Nansha District, Guangzhou City. There is no doubt that it conforms to the Company's development strategy and planning in the future. Being a municipal district of Guangzhou City, Nansha District is located at the estuary of the Pearl River and the geometric centre of the greater Pearl River Delta, a hub connecting a cluster of coastal cities along the Pearl River. The Pearl River Delta is one of the most economically developed regions in China, and Nansha District sits right in the centre of the region. Therefore, building a pharmaceutical classification and distribution centre in Nansha district can help the Company solve its existing problems of relatively lower warehousing capacity and the smaller distribution network in the Pearl River Delta, forming a complementary network with the distribution areas of Guangdong Charmacy Pharmaceutical Limited (referred to as "Guangdong Charmacy") and Zhuhai Charmacy Hengxiang Pharmaceutical Limited (referred to as "Zhuhai Charmacy"). Such that the service capacity of the Company in the Pearl River Delta could be fully strengthened.

(2) Secondly, it helps solve the bottleneck issue in respect of warehousing to achieve the self-development of the Company

In recent years, the Company has expanded businesses rapidly in China, especially in the Pearl River Delta. Guangdong Charmacy has a relatively shorter establishment history, but its operations scale has already surpassed that of the eastern Guangdong area in 2016. However, as the capacity of the Company's logistic centre in Foshan region is almost saturated, and it can no longer meet the market demand and the further development requirements of the Company. Therefore, there is an urgent need for the Company to build new logistic centres, so as to break through the bottleneck issue of the existing distribution capacity, increasing the supply capacity and meeting the increasing market demand.

- (3) *Thirdly, it helps improve the internal control and management system of the Company as a whole*

Being the core competition advantage for the future development for enterprises, informatization is the objective requirement for an enterprise to enhance its core competitiveness and efficiency, which is an important approach to achieve management innovation, and also an effective measure to solve the current prominent problems in business management. Informatization is of great significance to enhancement of a company's operation efficiency and realization of delicacy management. In particular, the Company focuses on the markets without bidding, in which the clients have extremely high requirements on the distribution efficiency and service standard. Therefore, it is essential for the Company to improve the information system and raise the informatization management capability.

- (4) *Lastly, it helps reduce cost to use the funds and enhance the efficiency of using the funds*

The medicine distribution industry is a capital-intensive industry. In the process of wholesale business development, the Company needs a huge amount of working capital as support, so as to make large-scale procurement to lower the procurement cost. The Company has been listed on the Main Board of the Stock Exchange of Hong Kong Limited, but in view of the restriction on financing scale of capital market in Hong Kong and the requirement of frequent and convenient financing channels in daily operations, bank loan is still the main financing mode for the Company. Under the indirect financing mode, the Company is vulnerable to credit policy and the fluctuation of interest rate, and is exposed to a higher capital cost and business risks. The funds raised by the Company are applied to the development of wholesale business. In this way, various disadvantages of indirect financing can be reduced, the cost to use the funds can be lowered, and the efficiency to use the funds can be enhanced.

The Board has proposed to the general meeting to fully authorize the Board to deal with the matters on the initial public offering and listing in the Shenzhen Stock Exchange of ordinary shares (A shares) denominated in Renminbi. The specific scope of authorization includes but not limited to the followings:

- (1) Formulate and implement the specific plan in respect of the offering and listing (including but not limited to, the time of offering, quantity under the issue, issue price and way of offering) within the scope of the resolution made at the general meeting in accordance with the requirements of the CSRC and the actual conditions of the securities market.
- (2) Propose the listing application to the CSRC and give relevant feedbacks.
- (3) Make appropriate adjustments to the purpose and selection of funds raised and investment amount in accordance with the implementation of the offering and listing plan, market conditions, environment for the policy and the requirement of the CSRC, to determine the investing progress and give priority in terms of importance of the fundraising project, as well as to sign the significant contracts during the fundraising project operation.
- (4) Sign, file and amend the relevant contracts, agreements and all necessary documents in relation to the offering and listing in accordance with the requirements of the laws and regulations of the PRC and of the regulatory authorities of securities.
- (5) Determine the stock exchange, and deal with the relevant procedures, for the offering and listing in accordance with the requirements of the regulatory authorities of securities.

- (7) Engage CSC Financial Co., Ltd. (中信建投證券股份有限公司) to act as the sponsor and underwriter for the offering and listing of A shares of the Company, and engage ShineWing Certified Public Accountants (Special General Partnership) (信永中和會計師事務所(特殊普通合夥)) to act as the auditors for the offering and listing of A shares, and engage Beijing Dacheng Law Offices (北京大成律師事務所) to act as the legal advisers for the offering and listing of A shares of the Company.
- (8) If there has been a change in the policies in relation to the offering and listing during the validity of the resolution in respect of the offering and listing, the matter of the offering and listing shall be proceeded in accordance with the new policies.
- (9) Deal with other necessary matters in relation to the offering and listing in pursuant to the relevant laws and regulations and the requirements under the regulatory authorities of securities of the PRC.
