### **BUSINESS REVIEW AND OUTLOOK**

For the six months ended 30 June 2017 (the "Six Month Period"), Strong Petrochemical Holdings Limited (the "Company") and its subsidiaries (collectively, the "Group") focused on its principal business of trading of oil products.

In the corresponding period of 2016, the Group was principally engaged in, among others, the trading of oil products and manufacturing of petrochemicals. After the disposal of Hainan Huizhi Petrochemical Fine Chemical Co., Ltd. ("Hainan Huizhi"), a previously indirect non-wholly owned subsidiary of the Company, in April 2016, the business of manufacturing of petrochemicals was discontinued and was considered as "discontinued operations" of the Group in the corresponding period of 2016. The Group continued to engage in trading of oil products which is considered as "continuing operations".

The figures for the Six Month Period stated herein refer to the results of continuing operations. To facilitate meaningful comparison, unless specified, the comparative figures in this interim report refer to the results of continuing operations for the six months ended 30 June 2016.

Revenue for the Six Month Period was approximately Hong Kong ("HK") dollar ("HK\$") 4,669.4 million. Profit attributable to owners of the Company for the Six Month Period was approximately HK\$37.3 million.

### Trading of Crude Oil, Petroleum Products and Petrochemicals

Although the Organization of the Petroleum Exporting Countries (the "OPEC") reached an agreement to cut production among its members and non-members in late 2016, Brent crude oil price did not rebound as expected by the market and the OPEC in the Six Month Period. It swung between United States dollar ("US\$") 44.72 per barrel ("BBL") and US\$55.60 per BBL during the Six Month Period. Furthermore, Brent crude oil price turned to be on a decreasing trend starting from late May 2017, just before the OPEC meeting on 25 May 2017, mainly because each of Libya and Nigeria had a production increase while several OPEC members failed to fulfill their commitments to reduce production.

In the Six Month Period, even though Caixin China General Manufacturing Purchasing Managers' Index remained above the neutral 50.0 mark, except in May 2017, the manufacturers were generally being prudent about the market condition in the People's Republic of China (the "PRC"). Therefore, they intended to reduce inventory holdings until they become optimistic towards the business outlook again.

In view of the decrease in demand of crude oil in the PRC market, our crude oil team had to lower the gross profit margin so as to maintain the market share and the long-term business relationship with counterparties. Considering the significant fluctuation of oil price, apart from trading crude oil through back-to-back arrangement, the Group cautiously performed hedging transactions for its inventories and a hedging gain was recorded in the Six Month Period. Besides, our crude oil team put its focus on developing business relationship with teapot refineries in the PRC. It is expected that trading with teapot refineries will be one of the Group's business directions in the coming years.

Facing the weak demand in petroleum products in the PRC market, our petroleum products business was further affected by the big trading houses' competitive trading strategy for the Six Month Period. As a result, the petroleum products team turned to focus on developing business opportunities in other energy products which are disclosed in more details in the section of "Outlook" below. Moreover, the team is in the progress of developing its customer base in Vietnam and Indonesia in view of the sluggish PRC market condition. Our petrochemicals trading business was also affected by the PRC customers' cautious trading approach, even though our petrochemicals team proactively strengthened domestic trading network in the PRC.

### Storage Business

Strong Petrochemical (Nantong) Logistics Company Ltd. ("Strong Nantong") operates its storage facilities with 21 storage tanks and a capacity of 139,000 cubic meters and is principally engaged in providing storage service for gasoline, diesel fuel and methyl alcohol. During the Six Month Period, Strong Nantong successfully increased its revenue and generated positive cash flow. In the second half of the year, Strong Nantong will focus on maintaining business relationship with existing petrochemicals storage customers and continue to expand its customer base so as to fully utilise its competitive advantage of the qualification of public bonded warehouse for liquidated chemical products.

### Outlook

Pursuant to a subscription agreement dated 17 July 2017, the Company agreed to allot and issue 353,603,681 new ordinary shares at the subscription price of HK\$0.658 per subscription share to an independent third party which subsequently became a substantial shareholder of the Company. Net proceeds from the issue of these new shares amounted to approximately HK\$232.6 million. This subscription was completed on 25 July 2017 and 353,603,681 subscription shares were allotted and issued to the subscriber under the general mandate. It is expected that the net proceeds could support the Group to look for suitable investment opportunities, especially investments in new energy industry, in the future.

Considering the limited opportunities in the petroleum products market, our Singapore office has taken initiative to develop business relationship with the Indonesian coal supplier and the Chinese power plant during the Six Month Period and it has successfully started its coal trading business in July 2017. We will strive to reach out to newly developed business areas in the hope of bringing more business opportunities to the Group.

The Group will keep looking for business opportunities which can increase its profitability. With cash surplus, the Group provided a loan to an independent third party during the Six Month Period and this provision of financial assistance successfully generated a satisfactory return to the Group.

Looking ahead, we will formulate appropriate strategies to develop our trading business and storage business while diversifying the Group's business to other industries within the energy sector may become one of the Group's development directions simultaneously. We will continue to look for new opportunities to maximise the return for the shareholders.

### **FINANCIAL REVIEW**

### Revenue

The Group is principally engaged in the trading of oil products. Approximately 97% (2016: approximately 95%) of the Group's revenue was generated from trading of crude oil for the Six Month Period and the revenue generated from trading of petrochemicals was approximately 3% (2016: approximately 3%), while the Group did not generate any revenue from the trading of petroleum products (2016: approximately 2%).

The revenue of the Group was approximately HK\$4,669.4 million (2016: approximately HK\$4,805.4 million) for the Six Month Period, representing a decrease of approximately 3%, compared with the same period last year. The trading volume of crude oil decreased from 17,026,372 BBL for the six months ended 30 June 2016 to 11,252,457 BBL for the Six Month Period, mainly because our Singapore office lost its market share of crude oil trading in Thailand and the PRC. The weak demand in petroleum products in the PRC market, together with the keen competition from large trading houses, led to a complete stop in the trading of petroleum products during the Six Month Period (2016: 27,503 metric tons ("MT")). The trading volume of petrochemicals decreased from 33,220 MT for the six months ended 30 June 2016 to 23,169 MT for the Six Month Period as the unstable market condition in the PRC led to lower demand in petrochemicals, while the tough competition of the petrochemicals market further reduced the trading volume.

		Six months ended 30 June								
Products	Unit	Number of shipment	2017 Sales quantity	Revenue HK\$ million	Number of shipment	2016 Sales quantity	Revenue HK\$ million			
Trading of major products										
Crude oil	BBL	17	11,252,457	4,544.5	25	17,026,372	4,567.9

Total		49		4,669.4	62		4,805.4			

#### **Gross Profit**

Due to the lower premium led by the intense market competition in the PRC, the overall gross profit dropped significantly to approximately HK\$6.9 million (2016: approximately HK\$95.3 million).

### Fair Value Changes on Derivative Financial Instruments

The Group has engaged in trading of derivative financial instruments for hedging and investment purposes. The purposes of hedging activities are to minimise the price risk exposure of each trade and to reduce the fluctuation in the operating results. Simultaneously, the Group intends to enhance its profitability with the use of surplus cash through investing in crude oil and oil products related derivative products and securities.

For the Six Month Period, the Group reported an aggregate gain on fair value changes on derivative financial instruments for hedging transactions of approximately HK\$103.4 million (2016: loss of approximately HK\$134.3 million) and an aggregate loss on fair value changes on derivative financial instruments for proprietary trading transactions of approximately HK\$11.9 million (2016: approximately HK\$2.0 million). The realised gain and unrealised gain on fair value changes on derivative financial instruments were approximately HK\$61.4 million and HK\$30.1 million, respectively (2016: realised gain and unrealised loss of approximately HK\$12.5 million and HK\$148.8 million respectively).

### Profit for the Period

Profit attributable to owners of the Company for the Six Month Period was approximately HK\$37.3 million. For the same period last year, the Group recorded a profit of approximately HK\$32.4 million, which was inclusive of profit from discontinued operations. By excluding profit from discontinued operations, the normalised loss attributable to owners of the Company for the same period last year should be approximately HK\$96.5 million.

### Liquidity and Financial Resources

The bank balances and cash as at 30 June 2017 amounted to approximately HK\$321.4 million (31 December 2016: approximately HK\$230.3 million). The increase in bank balances and cash was mainly contributed by the decrease in deposits placed with brokers and the increase in trade and bills payables.

The banking facilities as at 30 June 2017 were amounted to approximately US\$790.8 million (equivalent to approximately HK\$6,167.9 million) from several banks. Save for the Group's bank borrowings of approximately HK\$771.6 million, the Group had no other bank overdraft as at 30 June 2017.

### **Gearing Ratio**

As at 30 June 2017, the gearing ratio was approximately 24% (31 December 2016: approximately 35%). The gearing ratio was calculated as the Group's total borrowing divided by total assets. The decrease in gearing ratio is mainly because the Group repaid part of the bank borrowings by using the cash inflow generated from sales of inventories and the gain from fair value changes on derivative financial instruments.

### **Charges of Assets and Contingent Liabilities**

As at 30 June 2017, the Group's banking facilities were secured by pledged bank deposits of approximately HK\$50.6 million, bills receivables of approximately HK\$410.1 million.

As at 30 June 2017, the Group did not have any significant contingent liabilities.

### Foreign Exchange Exposure

The functional currency of the Group is denominated in US\$, while the reporting currency is denominated in HK\$. Since the exchange rate of US\$ against HK\$ is relatively stable during the Six Month Period, the exposure on foreign exchange was insignificant.

The Group has not implemented any foreign currency hedging policy at the moment. Nonetheless, the management has been continuously monitoring the level of foreign currency receipts and payments, ensuring that their net exposure to foreign exchange risk is kept at acceptable level from time to time and will consider hedging the foreign exchange exposure if it is significant to the Group.

### Capital Commitment

As at 30 June 2017, the Group did not have any capital commitment (31 December 2016: approximately HK\$391,000).

### Interim Dividend

On 17 August 2017, the board (the "Board") of directors (the "Directors") of the Company has resolved to declare an interim dividend of HK1 cent per share (2016: Nil). The interim dividend will be payable on or around Wednesday, 4 October 2017 to those shareholders whose names appear on the register of members of the Company on Friday, 8 September 2017.

### Closure of Register of Members

The register of members of the Company will be closed from Wednesday, 6 September 2017 to Friday, 8 September 2017, both days inclusive, during which period no transfer of shares will be effected. In order to be eligible for the proposed interim dividend, all completed share transfer forms accompanied by the relevant share certificates must be lodged with the branch share registrar of the Company in Hong Kong, Tricor Investor Services Limited, at Level 22, Hopewell Centre, 183 Queen's Road East, Hong Kong not later than 4:30 p.m. on Tuesday, 5 September 2017.

### **Employees and Remuneration Policy**

As at 30 June 2017, the number of the Group's employees slightly increased to 85 (31 December 2016: 84). The Group's remuneration packages are maintained at competitive levels and are determined on the basis of performance, qualification and experience of individual employee.

We recognise the importance of maintaining good relationships with our employees by providing our employees with competitive remuneration packages that commensurate with prevailing market practice, including provident fund, life and medical insurances, discretionary bonus, share options, and trainings for human resources upskilling.

The CODM regularly reviews the Group's revenue and profit for the period as a whole, which are measured in accordance with the Group's accounting policies. No analysis of the Group's assets and liabilities by the respective business is regularly provided to the CODM for review. Accordingly, no segment information is presented.
