Notes to the Condensed Consolidated Financial Statements

For the six months ended 30th June, 2018

1. BASIS OF PREPARATION

The condensed consolidated financial statements have been prepared in accordance with Hong Kong Accounting Standard 34 “Interim Financial Reporting” issued by the Hong Kong Institute of Certified Public Accountants (“HKICPA”) as well as with the applicable disclosure requirements of Appendix 16 to the Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited.

2. PRINCIPAL ACCOUNTING POLICIES

The condensed consolidated financial statements have been prepared on the historical cost basis except for certain financial instruments, which are measured at fair values.

Except as described below, the accounting policies and methods of computation used in the condensed consolidated financial statements for the six months ended 30th June, 2018 are the same as those followed in the preparation of the Group’s annual financial statements for the year ended 31st December, 2017.

In the current interim period, the Group has applied, for the first time, certain new and amendments to Hong Kong Financial Reporting Standards (“HKFRSs”) issued by the HKICPA that are mandatorily effective for the current interim period.

The application of the above amendments to HKFRSs in the current interim period has had no material effect on the amounts reported in these condensed consolidated financial statements and/or disclosures set out in these condensed consolidated financial statements.

Notes to the Condensed Consolidated Financial Statements

For the six months ended 30th June, 2018

2. PRINCIPAL ACCOUNTING POLICIES (CONTINUED)

In addition, the Group has applied the following accounting policies during the current period:

Non-current assets held for sale

Non-current assets and disposal groups are classified as held for sale if their carrying amount will be recovered principally through a sale transaction rather than through continuing use. This condition is regarded as met only when the asset (or disposal group) is available for immediate sale in its present condition subject only to terms that are usual and customary for sales of such asset (or disposal group) and its sale is highly probable. Management must be committed to the sale, which should be expected to qualify for recognition as a completed sale within one year from the date of classification.

When the Group is committed to a sale plan involving loss of control of a subsidiary, all of the assets and liabilities of that subsidiary are classified as held for sale when the criteria described above are met, regardless of whether the Group will retain a non-controlling interest in its former subsidiary after the sale.

Non-current assets (and disposal groups) classified as held for sale are measured at the lower of their previous carrying amount and fair value less costs of disposal.

The mining rights represent the rights to conduct mining activities in various locations in the PRC, and have legal lives of one to two years. The Group's mining rights are expiring in the period from August 2019 to October 2019. In the opinion of the directors of the Company, the Group will be able to renew the mining rights with the relevant government authorities continuously without significant costs.

The mining rights are amortised by using the units of production method based on the actual production quantity for the period over the proven and probable mineral reserves under the assumption that the Group can renew the mining rights indefinitely till all proven reserves have been mined.

Notes to the Condensed Consolidated Financial Statements

For the six months ended 30th June, 2018

12. MINING RIGHTS (CONTINUED)

During the six months ended 30th June, 2017, the management conducted an impairment review on the related assets of the cash-generating unit (“CGU”) which is engaged in mining and processing of gold and stone for construction from gold mine in the PRC, due to the implementation of several temporary policies relating to environmental protection and transportation during the period, which adversely impacts on the products delivery, causing certain degrees of disturbance in the production plant and product delivery as a result.

The management determined that the recoverable amount of this CGU using a value in use. No market price is available for the mining rights and the related property, plant and equipment as there is no active market for similar asset transfer in the similar location.

The value in use calculation of each CGU is based on estimated cash flow projections prepared based on forecasted production schedules approved by the directors of the Company that reflect the net cash flows to be generated from the CGU from the expected mining and sales of the mineral concentrates less the estimated costs of the production of the mineral concentrates, at a discount rate of 17.12%. The selling prices of the mineral concentrates are based on the quoted spot metal market prices available at the end of the reporting period. Other key assumptions for the value in use calculation including processing recovery rate and expected mine life period.

Aggregate impairment losses of RMB123,487,000, RMB17,398,000 and RMB2,119,000 for the six months ended 30th June, 2017 had been recognised on mining rights, production assets included in the Group’s property, plant and equipment and goodwill respectively.
