21. FINANCIAL INSTRUMENTS (Continued)

(b) Fair values of financial assets and financial liabilities

The fair values of financial instruments refer to the amounts at which the instruments could be exchanged or settled between knowledgeable and willing parties in an arm's length transaction. Fair values have been arrived at based on prices quoted in an active, liquid market or estimated using certain valuation techniques such as discounted future cash flows based upon certain assumptions. Amounts derived from such methods and valuation techniques are inherently subjective and therefore do not necessarily reflect the amounts that would be received or paid in the event of immediate settlement of the instruments concerned.

On the basis of the amounts estimated from the methods and techniques as mentioned in the preceding paragraph, the carrying amounts of the various financial assets and financial liabilities reflected on the statements of financial position approximate their fair values.

The methodologies used in arriving at of fair values of the principal financial assets and financial liabilities of the Group are as follows:

- **Cash and cash equivalents, trade and other receivables, trade and other payables:** The carrying amounts are considered to approximate the fair values as they are either within the normal credit terms or they have short-term maturity period.
- **Bank loans:** As the term loans were obtained from licensed financial institutions at the prevailing market rate, the carrying values of these financial liabilities approximates its fair values.

Management Discussion and Analysis

The Group engages in the manufacturing and trading of food products. The core products include coconut cream powder and low fat desiccated coconut, manufactured at the Group's manufacturing facility located at Bagan Datoh, Perak, Malaysia (the "Perak Plant") which is equipped with a multi-stage spray dryer which is fully automated and monitored centrally ensuring high quality and stable production. The Group also manufactures other food products, such as non-dairy creamer and other traditional South-east Asian food ingredients, such as rice dumplings (ketupat) and toasted coconut paste (kerisik).

The Group is committed to delivering high quality and safe food products and services, meeting customers' expectations and complying with legal requirements. It will strive to continually improve customers' satisfaction and having a quality management team. It implements strict and comprehensive quality assurance procedures throughout all stages of the production process, from procurement of raw materials to the packaging and delivery of finished products. In this regard, the Group has been accredited with various certifications in relation to quality management and food safety.

During the six months ended 30 June 2018, the Group had obtained the relevant approvals from the respective authorities to proceed with the planned expansion of our Perak Plant. After an objective evaluation of the experience and competency of the relevant interested parties, the Group awarded a construction contract of RM12.0 million (equivalent to approximately HK\$23.5 million) by way of an open tender to Progamatic Design Sdn. Bhd. (the "Contractor") on 21 June 2018 in relation to the construction works at the Group's Perak Plant for factory expansion and upgrade. The Contractor had commenced construction works on 1 July 2018 and is scheduled to complete all construction works by 31 January 2019.

FINANCIAL REVIEW

The Group's revenue was approximately RM42.0 million for six months ended 30 June 2018, decreased by approximately 16%, or RM7.8 million, when compared with that for the six months ended 30 June 2017 of approximately RM49.8 million. The decrease in sales was largely attributed to a drop in sales volume from coconut cream powder, as discussed in the section below.

The Group's cost of sales decreased by approximately 21%, or RM7.6 million, from approximately RM36.7 million for the six months ended 30 June 2017 to approximately RM29.1 million for the six months ended 30 June 2018. This was attributable primarily to significant price drop of the major raw materials, coconuts and white kernels during the six months ended 30 June 2018 and as a result, the gross profit for the six months ended 30 June 2018 increased by approximately 4%, or RM0.2 million when compared with that for the six months ended 30 June 2017.

Coconut cream powder

The Group's best-selling product is coconut cream powder. Revenue for coconut cream powder for the six months ended 30 June 2018 was approximately RM36.8 million, representing a drop of approximately RM5.3 million as compared to that of the six months ended 30 June 2017 of approximately RM42.2 million. The decrease in revenue for coconut cream powder was attributable primarily to the drop in sales volume from certain overseas markets resulting from the change in market conditions thereat.

Management Discussion and Analysis (Continued)

Low fat desiccated coconut

Revenue for low fat desiccated coconut for the six months ended 30 June 2018 was approximately RM2.0 million, representing a drop of approximately RM2.2 million as compared to approximately RM4.2 million in the six months ended 30 June 2017. This decrease in revenue was attributable primarily to the decrease in sales volume in the six months ended 30 June 2018 as the exceptional surge in demand experienced during the six months ended 30 June 2017 was not repeated in the six months ended 30 June 2018.

Coconut milk

Revenue for coconut milk for the six months ended 30 June 2018 was approximately RM2.0 million and was approximately RM0.5 million higher as compared to that for the six months ended 30 June 2017 of approximately RM1.5 million, this was attributable primarily to an increase in sales volume. In the six months ended 30 June 2018, the Group had appointed a new contract supplier to fulfil the increase in market demand for coconut milk under its own brands, thereby boosted sales volume during the period.

Other income

The Group's other income increased by approximately RM0.2 million for the six months ended 30 June 2018 to approximately RM0.4 million, which was mainly attributable to an increase in sale of scrap materials as compared to the six months ended 30 June 2017.

Selling and distribution expenses

The Group's selling and distribution expenses decreased by approximately 7.7%, or RM0.2 million from approximately RM2.6 million for the six months ended 30 June 2017 to approximately RM2.4 million for the six months ended 30 June 2018. This was mainly attributable to a decrease in advertising and promotion expenses.

Administrative expenses

The Group's administrative expenses decreased by approximately 50%, or RM5.0 million from approximately RM10.0 million for the six months ended 30 June 2017 to approximately RM5.0 million for the six months ended 30 June 2018, attributable primarily to the recognition of the non-recurring listing expenses being incurred in the six months ended 30 June 2017. However, excluding the non-recurring listing expenses, the administrative expenses of the Group had increased by approximately RM2.3 million, mainly due to an increase in staff-related costs in line with the Group's factory and sales expansion plans and other expenses relating to the listing of the issued Shares on the Stock Exchange.

Other expenses

The Group's other expenses increased by approximately 82%, or RM0.5 million from approximately RM0.7 million for the six months ended 30 June 2017 to approximately RM1.2 million for the six months ended 30 June 2018, attributable primarily to an increase in net loss on foreign exchange differences arising mainly from the conversion of the net proceeds received by the Company from the initial public offering completed in July 2017 (the "**Net Proceeds**") into RM during the six months ended 30 June 2018.

Management Discussion and Analysis (Continued)

Net finance income/costs

The Group's recorded net finance income in the six months ended 30 June 2018 of approximately RM0.2 million as compared to net finance costs of approximately RM0.2 million in the six months ended 30 June 2017 as a result of the deployment of the unutilized Net Proceeds into interest-bearing bank deposits.

Income tax expense

The Group's income tax expense decreased by approximately 33%, or RM0.7 million from approximately RM2.1 million for the six months ended 30 June 2017 to approximately RM1.4 million for the six months ended 30 June 2018, which was primarily in line with the decrease in the profit before tax, leading to the decrease in the taxable income.

Profit/(Loss) attributable to equity shareholders of the Company

The Group recorded a profit attributable to equity shareholders of the Company of approximately RM3.4 million for the six months ended 30 June 2018, as compared to a loss of approximately RM2.2 million in the six months ended 30 June 2017. It was primarily attributable to the non-recurring listing expenses of approximately RM7.5 million incurred in the six months ended 30 June 2017 which was not incurred in the six months ended 30 June 2018 and other reasons as outlined above.

FUTURE PROSPECTS AND STRATEGIES

Looking forward to the remainder of the second half of 2018 and beyond, the Group will embark on a more aggressive marketing strategy in order to identify potential new customers for its existing products. Meanwhile, the Group plans to produce its own coconut milk products under its own brands by expanding and upgrading its production facilities at the Perak Plant. In addition, the Group is in the process of rolling out certain new products into the marketplace, such as coconut spread and coconut water. The Group will continue to expand global market reach by increasing sales and marketing efforts in different countries and participation at well-known food exhibitions around the world.

The Group's in-house research and development team continues to work closely with the sales and marketing team in order to better respond to customers' specific needs. In this regard, the Company will continue to offer customised product formulations as required by various customers. The Group intends to enhance and refine its products portfolio with the development of new products and improved variations of existing products.

As disclosed in the Company's announcements dated 21 June 2018 and 8 August 2018, respectively, the Group has awarded a contract to the Contractor to undertake the construction works at the Perak Plant and signed agreements with an independent supplier to acquire packages of equipment and systems to facilitate the production and packaging of coconut milk and water products, which will enable the Group to further expand into a new line of business which is synergistic with its overall business plan.

Despite the decline in the revenue and net profit after tax for the six months ended 30 June 2018, owing to the lower demand for coconut cream powder from certain markets, the overall financial position of the Group is healthy, and the Group is confident that it is capable of confronting challenges ahead, especially with its expansion plans which have been put in place.
