As at 30 June 2019, the Sub-Fund invests in short-term deposits, the Sub-Fund is subject to interest rate risk. Interest rate risk is the risk that the value of the Sub-Fund's portfolio will decline because of rising interest rates. The Manager and Trustee monitor the interest rate risks by quantifying (a) market exposure in percentage terms; and (b) exposure in duration terms by different countries. As a result, Management considers sensitivity analysis of currency risk is not necessary to be presented.

### NOTES TO THE UNAUDITED CONDENSED FINANCIAL STATEMENTS

### 7. FINANCIAL RISK MANAGEMENT (Continued)

### (b) Credit and counterparty risk

Credit and counterparty risk is the risk that an issuer or counterparty will be unable or unwilling to meet a commitment that it has entered into with the Sub-Fund.

The Sub-Fund limits its exposure to credit and counterparty risk by carrying out the majority of its investment transactions and contractual commitment activities with well-established broker-dealers, banks and regulated exchanges with high credit ratings.

The Sub-Fund places bank balances with reputable financial institutions. As such, the Manager does not consider the Sub-Fund to be exposed to significant credit and counterparty risk.

The main concentration to which the Sub-Fund is exposed arises from the Sub-Fund's investments in short-term deposits and money market instruments. The Sub-Fund does not have explicit restrictions on the minimum credit ratings of securities it may hold. The Manager will actively manage the portfolio of the Sub-Fund. In case of credit rating downgrading, the Manager will adjust the positions in the portfolio using its credit analysis and rating systems that are designed to manage credit risks.

The table below summarises the amount of Short-term deposits and bank balance of the Sub-Fund placed with the counterparties together with the credit rating of the relevant counterparties as at 30 June 2019.

### 7. FINANCIAL RISK MANAGEMENT (Continued)

### (c) Liquidity risk

Liquidity risk is the risk that the Sub-Fund may not be able to generate sufficient cash resources to settle its obligations in full as they fall due or can only do so on terms that are materially disadvantageous.

The Sub-Fund is exposed to daily redemptions of units in the Sub-Fund. The Sub-Fund invests the majority of its assets in short-term deposits that are matured less than three months.

The table below analyses the Sub-Fund's financial liabilities into relevant maturity groupings based on the remaining period at the reporting date to the contractual maturity date. The amounts in the table are the contractual undiscounted cash flows. Balances due within 12 months equal their carrying balances, as the impact of discounting is not significant.

	Less than 1 month <i>HKD</i>	1 month to less than 3 months <i>HKD</i>	Over 3 months <i>HKD</i>	Total <i>HKD</i>
As at 30 June 2019

Units are redeemed on demand at the unitholder's option. As at 30 June 2019, there were two unitholders holding more than 10% of the Sub-Fund's units.

The Manager has assessed the liquidity of the instruments based on historical liquidity of similar money market instruments, by assessing the days to liquidate for such instruments. Only instruments or deposits with high liquidity are included in the portfolio of the Sub-Fund. The following table illustrates the expected liquidity of assets held:

#### NOTES TO THE UNAUDITED CONDENSED FINANCIAL STATEMENTS

#### 7. FINANCIAL RISK MANAGEMENT (Continued)

#### (d) Fair value estimation

The Sub-Fund classifies fair value measurements using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The fair value hierarchy has the following levels:

- Quoted prices (unadjusted) in active markets for identical assets or liabilities that the Sub-Fund can access at the measurement date (level 1).
- Inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices) (level 2).
- Inputs for the asset or liability that are not based on observable market data (that is, unobservable inputs) (level 3).

The level in the fair value hierarchy within which the fair value measurement is categorised in its entirety is determined on the basis of the lowest level input that is significant to the fair value measurement in its entirety. For this purpose, the significance of an input is assessed against the fair value measurement in its entirety. If a fair value measurement uses observable inputs that require significant adjustment based on unobservable inputs, that measurement is a level 3 measurement. Assessing the significance of a particular input to the fair value measurement in its entirety requires judgment, considering factors specific to the asset or liability.

The determination of what constitutes "observable" requires significant judgment by the Sub-Fund. The Sub-Fund considers observable data to be that market data that is readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market.

The Sub-Fund did not hold any investments as at 30 June 2019.

The assets and liabilities included in the condensed statement of financial position are carried at amortised cost; their carrying value are approximation of fair value. There are no other assets and liabilities not carried at fair value but for which fair value is disclosed.

### (e) Capital risk management

The Sub-Fund's capital is represented by the redeemable units outstanding. The Sub-Fund's objective is to provide investment results that correspond generally to the performance of the respective index. The Manager may:

- Redeem and issue new units on a daily basis in accordance with the constitutive documents of the Sub-Fund:
- Exercise discretion when determining the amount of distributions of the Sub-Fund to the unitholders; and
- Suspend the creation and redemption of units under certain circumstance as currently disclosed in the Prospectus of the Sub-Fund.

#### 8. DISTRIBUTION

There was no distribution during the period from 11 July 2018 (date of inception) to 30 June 2019.

### NOTES TO THE UNAUDITED CONDENSED FINANCIAL STATEMENTS

#### 9. FINANCIAL INSTRUMENTS BY CATEGORY

As of 30 June 2019, all financial assets including bank interest receivable, other receivable and bank balances are categorised as per IFRS9 and carried at amortised costs. All the financial liabilities of the Sub-Fund are carried at amortised cost.

The carrying value of the financial assets and liabilities are considered by the Manager to approximate their fair value as they are short term in nature and the effect of discounting is immaterial.

#### 10. INVESTMENT LIMITATION AND PROHIBITIONS UNDER THE SFC CODE

The aggregate value of a scheme's holding of instruments and deposits issued by a single issuer may not exceed 10% of the total net asset value of the scheme except:

- (i) where the issuer is a substantial financial institution and the total amount does not exceed 10% of the issuer's issued capital and published reserves, the limit may be increased to 25%; or
