NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the six months ended 30 September 2019

1. Basis of preparation and accounting policies

These unaudited consolidated financial statements have been prepared in accordance with Hong Kong Accounting Standard ("HKAS") 34 "Interim Financial Reporting" issued by the Hong Kong Institute of Certified Public Accountants (the "HKICPA") and the disclosure requirements of Appendix 16 to the Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited (the "Listing Rules").

These consolidated financial statements should be read in conjunction with the annual financial statements for the year ended 31 March 2019.

The accounting policies and methods of computation used in the preparation of these condensed consolidated financial statements are consistent with those used in the annual financial statements for the year ended 31 March 2019, except the Group has adopted certain HKASs and Hong Kong Financial Reporting Standards ("HKFRS") which are mandatory for the financial year beginning 1 April 2019.

2. Changes in accounting policies

The following new and amendments to standards are mandatory for the first time for the financial year beginning 1 April 2019:

Leases
Uncertainty over Income Tax Treatments
Plan Amendment, Curtailment or Settlement
Long-term Interests in Associates and Joint Ventures
Prepayment Features with Negative Compensation
Annual Improvements to HKFRSs 2015-2017 Cycle

The new and amendments to standards have been applied in accordance with the relevant transition provisions in the respective standards and amendments which results in changes in accounting policies, amounts reported and/or disclosures. Except for HKFRS 16, the adoption of other new and amendments to standards has no material impact on the Group.

Changes in accounting policies (continued) 2.

Details of the changes in accounting policies for HKFRS 16 is outlined below.

Adjustments recognised on adoption of HKFRS 16 (i)

The Group has adopted HKFRS 16 retrospectively from 1 April 2019, but has not restated comparatives for the 2019 reporting period, as permitted under the specific transitional provisions in the standard. The reclassifications and adjustments arising from the new leasing rules for lessees are therefore recognised in the opening unaudited consolidated balance sheet on 1 April 2019. On adoption of HKFRS 16, the Group recognised lease liabilities in relation to leases which had previously been classified as "operating leases" under the principles of HKAS 17 "Leases" ("HKAS 17"). These liabilities were measured at the present value of the remaining lease payments, discounted using the lessee's incremental borrowing rate as of 1 April 2019. The weighted average lessee's incremental borrowing rate applied to the lease liabilities on 1 April 2019 was 3.68%. In applying HKFRS 16 for the first time, the Group has used the following practical expedients permitted by the standard:

- reliance on previous assessments on whether leases are onerous;
- the accounting for operating leases with remaining lease term of less than 12 months as at 1 April 2019 as short-term lease;
- the exclusion of initial direct costs for the measurement of the right-of-use assets at the date of initial application; and
- the use of hindsight in determining the lease term where the contract contains options to extend or terminate the lease.

The Group has also elected not to reassess whether a contract is, or contains a lease at the date of initial application. Instead, for contracts entered into before the transition date the Group relied on its assessment made applying HKAS 17 and HK(IFRIC)-Int 4 "Determining whether an Arrangement contains a Lease".

Changes in accounting policies (continued) 2.

(i) Adjustments recognised on adoption of HKFRS 16 (continued)

As a lessee, the Group's leases are mainly rentals of offices and land use rights. The right-of-use assets for leases were measured on a modified retrospective basis as if new rules had always been applied and there were no onerous lease contracts that would have required an adjustment to the right-of-use assets at the date of initial application. The change in accounting policy affected the following items in the unaudited consolidated balance sheet at 1 April 2019:

Balance sheet (extracted)	31 March 2019 As originally presented HK\$'000	Adjustments on adoption of HKFRS 16 HK\$'000	1 April 2019 Restated HK\$'000

2. Changes in accounting policies (continued)

(i) Adjustments recognised on adoption of HKFRS 16 (continued)

The reconciliation between the operating lease commitments as disclosed by applying HKAS 17 as at 31 March 2019 and the lease liabilities recognised in the interim condensed consolidated balance sheet as at 1 April 2019 (date of initial application of HKFRS 16) is as follows:

	Unaudited HK\$'000
Operating lease commitments disclosed as at 31 March 2019	378,842
Discounted using the lessee's incremental borrowing rate at the date of initial application	305,553
Less: short-term leases recognised on a straight-line basis as expense	(2,131)
Less: low-value leases recognised on a straight-line basis as expense	(504)
Lease liabilities recognised as at 1 April 2019	302,918
Of which are:	
Current lease liabilities	27,076
Non-current lease liabilities	275,842
	302,918

Changes in accounting policies (continued) 2.

The Group's leasing activities and how these are accounted for (ii)

The Group's leases are mainly rentals of offices. Rental contracts of offices are typically made for fixed periods of 1 to 16 years. Lease terms are negotiated on an individual basis and contain a wide range of different terms and conditions. The lease agreements do not impose any covenants, but certain leased assets may not be used as security for borrowing purposes.

Until the 2019 financial year, leases of office were classified as operating leases and the payments made under operating leases were charged to profit or loss on a straight-line basis over the period of the lease.

From 1 April 2019, leases are recognised as a right-of-use asset and a corresponding liability at the date at which the leased asset is available for use by the group. Each lease payment is allocated between the liability and finance cost. The finance cost is charged to profit or loss over the lease period so as to produce a constant periodic rate of interest on the remaining balance of the liability for each period. The right-of-use asset is depreciated over the shorter of the asset's useful life and the lease term on a straight-line basis.

Assets and liabilities arising from a lease are initially measured on a present value basis. Lease liabilities include the net present value of the following lease payments:

- fixed payments (including in-substance fixed payments)
- payments of penalties for terminating the lease, if the lease term reflects the lessee exercising that option.

The lease payments are discounted using the interest rate implicit in the lease. If that rate cannot be determined, the lessee's incremental borrowing rate is used, being the rate that the lessee would have to pay to borrow the funds necessary to obtain an asset of similar value in a similar economic environment with similar terms and conditions

Right-of-use assets are measured at cost comprising the following:

- the amount of the initial measurement of lease liability,
- any lease payments made at or before the commencement date less any lease incentives received.
- any initial direct costs, and
- restoration costs.

Payments associated with short-term leases and leases of low-value assets are recognised on a straight-line basis as an expense in profit or loss.

Segment information 3.

Segment analysed by products (a)

The Group mainly operates in the People's Republic of China (the "PRC"), Taiwan and Hong Kong and is principally engaged in designing, manufacturing and selling of consumer electronic products.

Design, manufacture and sale of consumer electronic AV products products, including audio, video and tablet products

Notebook products Design, manufacture and sale of commercial notebook and personal computers products

The Group's inter-segment transactions mainly consist of sale of assembly parts among subsidiaries. The transactions were entered into under normal commercial terms and conditions that would also be available to unrelated third parties.

7. Loss per share

Basic

Basic loss per share is calculated by dividing the loss for the period attributable to equity holders of the Company by the weighted average number of ordinary shares in issue during the period.

	Six months ended 30 September	
	2019	2018
Loss for the period attributable to equity holders of the Company (HK\$'000)	(216,786)	(180,598)
Weighted average number of ordinary shares in issue	723,244,650	578,595,720
Basic loss per share (HK cents)	(30.0)	(31.2)

Diluted

Diluted loss per share is calculated by adjusting the weighted average number of ordinary shares outstanding to assume conversion of all dilutive potential ordinary shares. There were no dilutive potential ordinary shares during the six months ended 30 September 2019 and 2018. Therefore, the diluted loss per share are the same as the basic loss per share.

8. **Dividends**

	Six months ended 30 September	
	2019	2018
	HK\$'000	HK\$'000
Interim dividend: nil (2018: nil)		

At a meeting held on 28 November 2019, the directors did not recommend an interim dividend for the six months ended 30 September 2019 (2018: nil).

Fair value gain 9.

On 1 June 2018, the Group transferred an owner-occupied property located in the PRC to an investment property and rented it out. The carrying amount and the fair value of the property were HK\$10,345,000 and HK\$75,768,000 on the date of transfer, respectively. The excess of the fair value over the carrying amount was HK\$65,423,000 and was recorded in other comprehensive income (or revaluation reserve in the consolidated balance sheet) as fair value gain for the six months ended 30 September 2018.

10. Trade receivables, prepayments, deposits and other receivables

	608,752	531,304
Total	617,479	542,864

The credit terms given to customers vary and are generally based on the financial strengths of individual customers. In order to effectively manage the credit risks associated with trade receivables, credit evaluations of customers are performed periodically.

The fair value of the trade and other receivables approximate to their carrying amounts.

10. Trade receivables, prepayments, deposits and other receivables (continued)

The ageing analysis of trade receivables based on shipping terms is as follows:

	Refund liabilities (Note i)	13,142	15,233
		292,992	205,340
	Total	297,281	210,060

The fair value of the trade and other payables approximate to their carrying amounts.

When a customer has a right to return product within a given period, the Group (i) recognises a refund liability for the amount of consideration received for which the entity does not expect to be entitled. The Group also recognises a right to the returned goods.

11. Trade and other payables (continued)

The ageing analysis of trade payables based on invoice date is as follows:

MANAGEMENT DISCUSSION AND ANALYSIS

Group results

For the six months ended 30 September 2019, the Group recorded turnover of HK\$462 million (2018: HK\$836 million), and loss attributable to shareholders of HK\$217 million (2018: loss of HK\$181 million). One of the most significant factors for the decline was the ongoing trade war between China and the United States, which affected a substantial portion of the Group's AV business.

As the China-US trade war dragged on, many China-based electronics manufacturers had to fight for an ever smaller slice of the export business. In fact, many of these manufacturers were willing to accept orders at below material costs, thus undermining gross margins for all industry players. Such dire conditions significantly affected the Group's ability to take on orders as highly fierce price competition made many of these orders unacceptable. To make matter worse, the Group was also unable to pass on the impact of additional US tariffs that took effect on 15 October to its retail customers. In certain cases, the Group had to absorb the extra import duties entirely, because the after-tariff retail prices would have been unacceptable to consumers; in some other cases, the price increases were too high to be absorbed by either the Group or its retail customers and hence would slow down the pace of re-ordering; and then there were customers who simply adopted a wait-and-see attitude, thus continuously delaying their purchase decisions.

Even though the Group's notebook PC business made progress in terms of number of units sold when compared with the same period last year, it did not grow as significantly as it could have due to a weakened economy in China, social incidents in Hong Kong, and relatively weak consumption sentiment in Taiwan (It would appear that an important part of Taiwan's economy remains dependent on the manufacturing industries, with many participants in one way or another reliant on links with China, hence were affected by the Mainland's current economic situation). Nonetheless, to further raise awareness of the Group's notebook PC brands and capture market shares, during the period under review, continuous investments were made in advertising and promotions, product development and R&D, and penetration into new markets.

The directors do not recommend the payment of an interim dividend (2018: nil) for the six months ended 30 September 2019.

Business review

To the disappointment of many business leaders on both sides of the Pacific and around the world, the China-US trade dispute has worn on for more than a year, creating stiff headwinds for many companies and industries, thus hindering both micro and macroeconomic growth.

The Group's AV business, consisting of audio, visual and tablet products, was severely impacted by the toxic trading environment. When the US government began imposing tariffs against made-in-China goods, they also started targeting specific industry leaders in China, such as ZTE and Huawei. Many manufacturers directly or indirectly connected to such industry leaders' supply chains began to collapse causing some to desperately fight for orders regardless of cost. Such hysterical competition made it virtually impossible for the Group to find or secure profitable orders, leading eventually to a severe erosion in gross margin.

Tariffs imposed on 15 October mainly affected the Group's audio and visual products. And as aforementioned, the Group was forced to absorb all of the extra import duties for certain models (as the after-tariff retail prices made such products unappealing to consumers); some of the Group's products had yet to receive any re-order because the extra import duties for them were too high to absorb by the Group or its customers, leading to loss of revenue as well as profit. Still other challenges faced include delayed purchases by some customers who took a wait-and-see approach, while other customers elected to source similar products from other parts of Asia, Mexico, South America, or Eastern Europe.

As far back as 2016, the Group was already aware of the need to establish alternative revenue streams to enable it to diversify its business segment and territory. Such awareness served as catalyst for the Group's development of AVITA Consumer Laptops and Nexstgo B2B/Commercial Laptops. As at 30 September 2019, the Group offered 13 models of Consumer Laptops and Commercial Laptops, including the AVITA ADMIROR flagship laptop and Nexstgo PRIMUS NX301 ultra lightweight business-grade laptop, both of which were launched in May at COMPUTEX 2019 in Taipei, Taiwan. The Group's involvement in the distribution of Commercial Notebook PCs for VAIO Corporation of Japan via Nexstgo Company Limited, a wholly owned subsidiary, has also been progressing with a line-up under Nexstgo's distribution expanding to a total of six models, including the newly launched A12, SX12, SX14 and SE14.

Business review (continued)

Even though the Group's notebook PC business made progress in terms of the number of units sold when compared with the same period last year, it however did not grow as quickly as it could have been. Among the factors impeding its growth included a weakened Chinese economy which resulted in many popular local Chinese notebook PC brands competing purely based on price; social incidents in Hong Kong (- one of the most important markets for AVITA laptops,) that led to a substantial drop in consumer traffic to electronics and I.T. stores, especially those in traditionally high-tourists traffic districts; and relatively cooled consumers spending in Taiwan (- yet another important market for AVITA laptops), due likely to the fact that an important part of the Taiwan economy is still dependent on the manufacturing industries where many participants have varying links with China, hence are susceptible to the PRC's slowing economy.

Despite the aforementioned developments, the Group has continued to invest in advertising and promotions, product development and R&D, with a view to further raise awareness and increase market shares for its notebook PC brands. In addition, the Group has made towards penetrating untapped markets. As regard to operations for the period under review, efforts were made to reduce overall fixed costs and headcount in the Group. Furthermore, resources allocated to the different Asia markets for the Group's notebook PC business were re-focused with the majority of the investments concentrated on the top 5 markets.

Prospects

Based on the latest information available, negotiations aimed at defusing the trade dispute between China and the United States have made some progress. However, as negotiation tactics are constantly changing, there are no guarantees that the anti-Chinese-goods tariffs will be lowered in the immediate future. After visiting some South East Asia based ODM/OEM manufacturing candidates last year, the Group has started in-depth price negotiations with some of them, especially those in Vietnam and Malaysia. The expectation is to have ODM/ OEM manufacturers in South East Asia possibly producing AV products on behalf of the Group starting in the year 2020.

In addition to the defensive action outlined above, the Group will proactively leverage its many years of experience in audio-visual technologies, together with its know-how in the latest IoT features, such as wireless charging, app controls and the like, to create "Smart Home Products" that possess much higher value add than those of the Group's traditional AV products. Already, some of these products are set to make their debut at the upcoming Consumer Electronics Show ("CES") in January 2020, in Las Vegas.

Prospects (continued)

Also set to premiere at CES will be the Group's new AVITA Consumer Laptops and Nexstgo B2B/Commercial Laptops, with their official launch dates to be during the Group's last financial quarter of 2020. Apart from the constant enhancement and uprating of the AVITA and Nexstgo laptop line-ups, the Group has also been examining for new markets to enter, while concurrently continuing to strengthen its presence in existing markets. In fact, as recently as October, the Group launched both AVITA and VAIO laptops in the Middle East markets and is also pursuing distributors in Pakistan, Bangladesh and Australia. Besides market expansion, owing to the Group's growing expertise and reputation in the notebook PC industry, it has been approached by brand-name laptop companies to co-develop as well as to produce on ODM/OEM basis laptops for general consumers as well as laptops for gaming applications.

In view of the likelihood that the adverse trading environment will last for a while into the future, the Group will constantly review to find ways to reduce its overall fixed costs and restructure its organization if necessary. Furthermore, resources allocated to the various markets for the Group's notebook PC business will also be constantly reviewed and reallocated, with the majority of the investments going to the most promising markets.

With the on-going trade war between China and the US, un-resolved Brexit timetable, seesawing diplomatic relations between North Korea and the US, as well as threats of potential tariffs to be imposed by the United States on imports of European cars and parts, many companies around the world and especially manufacturers based in China are battling some of the strongest headwinds they have ever seen in decades. In particular, many China based manufacturers is also faced with the imminent challenge of a 15% tariff that is to be imposed on the 15th of December, if no full or even partial agreement is to be reached between China and the USA from now to then. Under such circumstance, even though the Group's management is convinced that the current business and operational reforms are in the right direction, but conditions going forward are indeed very difficult to predict so the Group will need to always be ready to adjust its operations and products strategies as the trading environment evolves.

Liquidity and financial resources

The Group's total equity and total equity per share as at 30 September 2019 were HK\$1,101 million (31 March 2019: HK\$1.329 million) and HK\$1.52 (31 March 2019: HK\$1.84) respectively.

As at 30 September 2019, we had cash and deposits of HK\$102 million. After deducting bank and other borrowings of HK\$358 million, we had net borrowings of HK\$256 million (31 March 2019: net cash of HK\$93 million). Following the settlement of Christmas orders in December, our cash is expected to improve.

As at 30 September 2019, our inventory was HK\$651 million (31 March 2019: HK\$480 million). We take a cautious approach to monitor the inventory level especially during this environment with uncertainty.

Trade receivables as at 30 September 2019 were HK\$585 million (31 March 2019: HK\$511 million). It is our policy to deal with creditworthy customers and to adopt a prudent credit policy, and we have been closely monitoring credit risk.

Trade payables as at 30 September 2019 were HK\$197 million (31 March 2019: HK\$94 million)

Capital expenditure on fixed assets during the six months ended 30 September 2019 was HK\$5 million (2018: HK\$17 million). As at 30 September 2019, we had capital commitments contracted but not provided for in respect of property, moulds, plant and machinery and renovation amounting to HK\$6,870,000 (31 March 2019: HK\$8,815,000).

Due to peg-rate system, we have limited exposure to trade-related foreign exchange risk as substantially all of our sales, purchases and borrowings are denominated in United States dollars and Hong Kong dollars. Adhering to the policy of not engaging in currency speculation, there was no gain or loss from speculative activities during the reporting period.

Employees

As at 30 September 2019, the Group had approximately 1,100 employees in Hong Kong, the PRC and Taiwan. Remuneration packages are generally structured by reference to market terms and individual qualifications. Salaries and wages are normally reviewed on an annual basis based on performance appraisals and other relevant factors. We also provide other benefits including medical insurance, provident fund and education subsidies to all eligible staff.
