Prudential plc Annual Report 2019

2019 highlights >

Prudential helps people de-risk their lives and deal with their biggest financial concerns. We provide our customers with the freedom to face the future with confidence.

Our year in numbers

| Summary financials | 2019 | 2018 | Change on an actual exchange rate basis ⁸ | Change on a constant exchange rate basis ⁸ |
|---|-----------------|----------|--|---|
| Adjusted operating profit from continuing operations ¹ | \$5,310m | \$4,409m | 20% | 20% |
| Operating free surplus generated from continuing operations before US EEV modelling enhancements ^{2,3} | \$3,764m | \$3,410m | 10% | 10% |
| Life new business profit from continuing operations ⁴ | \$4,405m | \$4,707m | (6)% | (6)% |
| IFRS profit after tax from continuing operations ⁵ | \$1,953m | \$2,881m | (32)% | (33)% |
| Net cash remittances from business units from continuing operations ⁶ | \$1,465m | \$1,417m | 3% | — |
| LCSM shareholder surplus over Group minimum capital requirement ⁷ | \$9.5bn | \$9.7bn | (2)% | — |

Total full-year ordinary dividend

46.26 cents

The Group's 2020 dividend will be determined under the Group's dividend policy from a 2019 base of 36.84 cents⁹

Notes

- 'Adjusted operating profit' refers to adjusted IFRS operating profit based on longer-term investment returns from continuing operations. This alternative performance measure is reconciled to IFRS profit for the year in note B1.1 of the IFRS financial statements.
- For insurance operations, operating free surplus generated represents amounts maturing from the in-force business during the year less investment in new business and excludes non-operating items. For asset management businesses, it equates to post-tax operating profit for the year. Further information is set out in note 11 of the EEV basis results.
- During 2019, as part of the implementation of the NAIC's changes to the US statutory reserve and capital framework enhancements were made to the model used to allow for hedging within US statutory reporting which have been incorporated into the EEV model. This resulted in a fall in operating free surplus of \$(903) million from a lower expected transfer to net worth. After allowing for this, operating free surplus generated is \$2,861 million, down 16 per cent on both a constant and actual exchange rate basis.
- New business profit, on a post-tax basis, on business sold in the year, calculated in accordance with EEV principles.
- IFRS profit after tax from continuing operations reflects the combined effects of operating results determined on the basis of longer-term investment returns, together with short-term investment variances which for 2019 were driven by non-operating losses in Jackson, corporate transactions, amortisation of acquisition accounting adjustments and the total tax charge for the year.
- Net cash remitted by business units are included in the holding company cash flow, which is disclosed in detail in note (iii) of the Additional unaudited financial information. This comprises dividends and other transfers from business units that are reflective of emerging earnings and capital generation.
- Surplus over Group minimum capital requirement and estimated before allowing for second interim ordinary dividend. Shareholder business excludes the available capital and minimum capital requirement of participating business in Hong Kong, Singapore and Malaysia. 2018 surplus excludes M&G plc and includes \$3.7 billion of subordinated debt issued by Prudential plc that was transferred to M&G plc on 18 October 2019. Further information on the basis of calculation of the LCSM measure is contained in note (i) of the Additional unaudited financial information.
- Further information on actual and constant exchange rate bases is set out in note A1 of the IFRS financial statements.
- The Group's dividend policy will be determined from a 2019 US dollar base of 36.84 cents per share, representing the full-year ordinary dividend for 2019 of 46.26 cents less the contribution of the discontinued M&G plc business (9.42 cents per share).

Continuing to deliver long-term value

I am pleased to report that Prudential has produced a positive performance during 2019. We continue to focus on how we deliver for our customers, shareholders and wider stakeholders.

Prudential helps people de-risk their lives and cope with their biggest financial concerns, helping them to face the future with confidence. Our continued progress in 2019, a year of considerable economic uncertainty, is a reflection of our purpose-driven approach.

Our successful completion of the demerger of M&G plc from the Group, ahead of schedule in 2019, was one of the most complex changes to our business for many years. I am proud of the way our people worked towards this significant achievement while continuing to perform for our customers and investors.

Our ambition for Jackson is that it should play a broader role in the US retirement income market, through a strategy of diversifying its product range and distribution network. In view of this, Jackson will need access to additional investment, which we believe would best be provided by third parties. Over the past nine months, we have undertaken

significant work with our advisers to assess options for introducing third-party finance into Jackson. The Board has determined that the preferred route to achieve this is to seek a listing of Jackson in the US, subject to market conditions. We will now begin detailed engagement with key stakeholders, with a view to ensuring that Jackson will have the capital strength as a separately listed business to support its continued success as a broad provider of retirement solutions for America's ageing population.

Dividend

The Board has approved a 2019 second interim ordinary dividend of 25.97 cents per share, equivalent to the 19.60 pence per share previously announced in the demerger Circular alongside the new dividend policy for the Group post-demerger.

The Group's 2020 dividend under this new progressive dividend policy will be determined from a 2019 US dollar base of 36.84 cents per share.

Board changes

A strong and decisive Board is at the core of a well run company. The robust governance provided by our Board is key to ensuring we continue to meet all our objectives. Developing the skills, diversity and experience of our Board requires a flexible approach and openness to change, just as the Group's shape is itself changing. During 2019, we made a number of changes to the Board's composition, all of which have helped to reinforce its capabilities and position it strongly for the future, and we put plans in place for refreshing the Board in the years to come. Amy Yip joined us in September as a Non-executive Director and a member of the Remuneration Committee, bringing considerable expertise in financial services in China and South-east Asia. At the beginning of January 2020, Jeremy Anderson joined us as a Non-executive Director and a member of the Risk and Audit Committees, providing substantial experience in international financial services, particularly in audit and risk management. I would like to welcome

Amy and Jeremy to the Board and I would particularly like to thank Howard Davies, who will step down from the Board at the conclusion of the 2020 Annual General Meeting, for his significant contribution during his tenure and his leadership of the Risk Committee since its inception. Jeremy Anderson will succeed Howard as Chair of the Risk Committee at the conclusion of the Annual General Meeting in May 2020.

At the end of January 2020, we announced that Shriti Vadera will join the Board on 1 May as a Non-executive Director and member of the Nomination & Governance Committee, and that she is expected to succeed me as Chair of the Board and the Nomination & Governance Committee on 1 January 2021. Shriti is an excellent choice for the future Chair, and I look forward to working with her on the Board and during the transition.

Our customers and wider stakeholders

We are determined to build new capabilities in our structural growth markets, offering our products to more customers in Asia across an increasing range of channels; and reaching new customers in Africa, one of the fastest-growing regions in the world. In the US, the world's largest retirement market, we are a leader in providing asset accumulation and income products. The loyalty of our existing customer base is an important source of financial resilience for the Group, and we work continuously to improve service and outcomes. The nature of our business model means that we invest our customers' savings in companies and infrastructure that help to drive prosperity and strengthen the communities we serve.

Our business provides social benefits to our customers and to their communities. In particular, we are committed to broadening access to healthcare and finance and to providing solutions to issues emerging from demographic change. We are well aware of the risk climate change presents and are broadening the role our businesses can play in the transition to a sustainable economy. We are a signatory to the recommendations of the Financial Stability

Board's Task Force on Climate-Related Financial Disclosures, and we are deepening our understanding of the risks faced by the business. We will continue to work with governments, regulators, civil society and other businesses as we develop a range of approaches to these issues.

The Board remains committed to ensuring that we make a positive impact across all our activities. You will find references throughout this report to that impact, while an overview of what we have done across all areas of environmental, social and governance (ESG) activity in 2019 can be found in our ESG Summary on page 72 of this report. Further details are in our 2019 ESG Report on the Prudential plc website.

Our shareholders

The Board's role is to represent the interests of all of the Company's shareholders. We have delivered significant change to the business during a period of macroeconomic and industry headwinds, and we have stepped up our regular and frank dialogue with our shareholders to ensure we are responsive to their priorities and concerns, while ensuring they fully understand the wider backdrop to our performance. Ongoing shareholder engagement enables us to gather important feedback that informs our decisions as a Board. For me personally, these discussions are highly valuable and the ideas and suggestions generated are invariably useful and always taken seriously.

Changes in the policy and regulatory environment in which we work can have a significant impact on our business and what we can do for our customers. We build and develop positive and open relationships with our supervisors, governments and civil society, and we are grateful for the constructive work of our regulators, in particular the Hong Kong Insurance Authority. We look forward to continuing to work closely with them into the future.

Our people

Our business is built around our purpose and our strategy, but it is our people who implement that strategy. In our businesses around the world we have excellent teams working hard to ensure we meet our commitments to our customers. The needs, priorities and concerns of our colleagues are a focal point for the Board. During 2019, two of our Non-executive Directors, Kai Nargolwala for Asia and Africa and Tom Watjen for the US and the UK, were appointed to act as a conduit between employees and the Board, and they will continue to deepen their activity in this area. You can read more about their activities in this area on page 74 of this report.

We are committed to providing an inclusive working environment in which we develop our talent, reward performance, protect our people and value our differences. Diversity and inclusion is an important priority for the Group. We are making good progress in this area and I am confident we will continue to do so.

We are continuing our active programme of community investment in our businesses around the world. As we collect premiums in the many markets in which we operate, we also understand the need to help those communities to strengthen and develop. Our contribution includes projects covering a number of areas such as Safe Steps, which provides advice around natural disasters, road safety and first aid; First Read, which helps parents to develop their children's numeracy and literacy; and Cha-Ching, the first global financial education programme. Our people around the world continue to make a remarkable effort volunteering their time and skills for the benefit of their communities. I am particularly proud of these contributions, and I support this volunteering activity personally through the Chairman's Challenge, our flagship international volunteering programme, which brings teams together across the Group to help in their communities. This programme continues to appeal to colleagues, with more than 5,400 signing up in 2019 to participate across 21 projects.

During early 2020, our business has been responding with agility to the global challenges posed by the coronavirus outbreak. We have been providing customers with additional benefits and service, offering advice and flexible working options to colleagues, and collaborating with governments to directly support affected communities. The virus outbreak is also impacting financial markets. We are monitoring developments closely and will continue to be proactive in helping our colleagues and customers.

I would like to thank all my colleagues on the Board, in management and throughout the business, and all our stakeholders for their support and for everything they have done to ensure the success of Prudential during my time as Chairman.

Looking forward

Our Board is highly responsive to the interests of our stakeholders and we will continue to make improvements to the structure of the Group where we believe they will generate material benefits over the long term. We are well positioned to benefit from strong structural growth opportunities and continue to provide benefits for our customers and value for our investors well into the future.

Delivering profitable growth and positioning ourselves for the future

We have delivered a positive operating performance during 2019, led by continued growth in our Asian business.

Our clear strategy and focused execution, combined with improvements in our operations, have enabled us both to deliver profitable growth and to position ourselves for continued growth into the future.

We exist to take the financial risk out of the biggest events in the lives of our customers, enabling them to face the future with confidence. In addition to fulfilling our traditional role of providing life and health protection, savings opportunities to meet family goals and retirement income, we aspire to lead in new areas aligned with this purpose. During 2019, collectively our continuing businesses agreed to pay over \$29 billion to our customers in claims and savings pay-outs. Our products help consumers postpone and prevent ill-health through digital innovation, increase access to finance, and provide solutions for an ageing world. At the same time, we are investing our customers' savings in the real economy, helping to drive sustainable growth.

Our business is built around long-term structural opportunities. In our fast-growing markets in Asia there is a strong and growing need for health and protection, for savings opportunities and for ways to invest, and there is a significant gap for products that meet those needs. By meeting important financial needs, we expect to build long-term relationships with our customers. This translates into recurring income streams and low lapse rates, which in turn produce high-quality earnings.

We are well positioned to meet structural opportunities. We are diversified by geography, with operations in 15 markets in the region, through our products offering health and protection, savings and asset management, and in our mix of channels, providing our products through our large agency force and our network of partnerships with banks across the region. We are also innovating at pace and scale to digitalise the customer journey end-to-end, and delivering new value-added solutions, such as Pulse by Prudential, our new digital health app.

In the US, where the continuing transition of millions of Americans into retirement creates a substantial opportunity for Jackson's products, we have delivered organic diversification and Jackson has paid a dividend of \$525 million¹.

During 2019, we successfully completed the demerger of M&G plc from the Group, enabling us to focus on structural growth markets. We are working collaboratively with our new Group-wide regulator, the Hong Kong Insurance Authority, and our other supervisors across our markets.

The US is the world's largest retirement market with trillions of dollars expected to move from savings into retirement income products over the next decade. As a top-two annuity provider, Jackson is a leader in meeting the needs of Americans who aspire to a secure retirement with a guaranteed income.

Jackson's ambition is to play the fullest role possible through a strategy of diversifying both its product range and distribution network. Over time, this is expected to lead to a more balanced mix of policyholder liabilities and enhance statutory capital and cash generation.

As we stated at our half-year results, in order to diversify at pace, Jackson will need access to additional investment which we believe would best be provided by third parties. Since then, we have undertaken significant work with our advisers to assess options for introducing third party finance into Jackson. The Board has determined that the preferred route to achieve this is to seek a listing of Jackson in the US in due course, subject to market conditions.

Accordingly, we are today announcing that preparations have commenced for a minority initial public offering (IPO) of Jackson and have already taken a number of management actions to support this path. We will now commence detailed engagement with key stakeholders, with a view to ensuring that Jackson will have the capital strength as a separately listed business to support its continued success as a broad provider of retirement solutions for America's aging population. We will provide an update at our HY20 results scheduled for 11 August 2020.

Macroeconomic environment

The core demand for our long-term savings and protection products has remained strong despite uncertain conditions in the macroeconomic environment. A combination of low interest rates, trade disputes and volatile international politics has created difficult conditions across many sectors. The US government 10-year bond yield fell to 1.9 per cent at the end of 2019 (2018: 2.7 per cent). Equity markets finished 2019 higher than the start of the year, especially in the US, where the S&P500 index was up 28.9 per cent, and valuations in the credit markets were also elevated well above historic norms. We continue to manage our business conservatively for the long term, with a cautious allocation of shareholder funds and extensive hedge programmes in Jackson. These hedge programmes manage the economic risk, with consideration of the local regulatory position, of the guarantees contained within the products sold to customers.

Financial performance

The adjusted IFRS operating profit based on longer-term investment returns (adjusted operating profit²) for 2019 from our continuing operations increased by 20 per cent on both a constant and actual exchange rate basis, reflecting the continued growth and resilience of our Asian businesses and the beneficial impact of strong 2019 capital returns on deferred acquisition cost amortisation in the US. The IFRS profit after tax from continuing operations was \$1,953 million in 2019 (2018: \$2,881 million on an actual exchange rate basis). This is after a \$(380) million post-tax loss in Jackson, where accounting volatility continues to be expected given the economic nature of our hedging programme and the related accounting mismatches that exist.

Alongside our financial performance we have made significant investments, funded regionally and centrally. During 2019, this included the renewal of our regional strategic bancassurance alliance with United Overseas Bank Limited for an initial fee of \$853 million, (\$301 million of which was paid in 2019), entering into an exclusive bancassurance partnership with SeABank, our acquisition of 50.1 per cent of Thanachart Fund Management Co., Ltd for \$142 million³ and a total investment of \$619 million of free surplus in writing profitable new business in Asia, along with an investment of \$539 million in free surplus in US new business.

Asia

Our Asian operations continued to drive our performance. The fast-growing markets of Asia offer long-term structural opportunities for us, with the region's growing population having a clear and increasing need for the products we deliver. Insurance penetration in Asia is only 2.7 per cent of GDP, compared with 7.5 per cent in the UK⁴, while mutual fund penetration is just 12 per cent in Asia, compared with 96 per cent in the US⁵.

We have demonstrated the strength of our portfolio of businesses in the region by delivering double-digit growth in APE⁶ sales in six markets and in new business profit⁷ in eight, reinforcing the value of our diverse portfolio and demonstrating the breadth of earnings streams and new business spread in Asia.

Outside Hong Kong, we delivered a 17 per cent⁸ increase in APE⁶ sales and a 29 per cent⁸ rise in new business profit⁷. Within Hong Kong, our domestic business was resilient despite the effect of social unrest, with APE⁶ sales growing by 8 per cent⁸. Our domestic Hong Kong business has continued to expand and invest, driven by new health, protection and retirement solutions and supported by focused sales initiatives. Fewer visitors from mainland China caused a fall in total Hong Kong APE⁶ sales by 11 per cent⁸ and a fall in new business profit⁷ of 12 per cent⁸.

We have continued to accelerate our joint venture business in China, where APE⁶ sales over the year were 53 per cent⁸ higher, driving new business profit⁷ growth of 38 per cent⁸. We recently established a new branch in Shaanxi, our 20th in the country, and added seven cities and 14 sales and servicing offices. We are developing rapidly in a number of our other markets in the region, including Vietnam and the Philippines, where APE⁶ sales grew by 12 per cent⁸ and 34 per cent⁸ respectively and we are making good progress in Indonesia, where our sales grew by 23 per cent⁸ in the year including 41 per cent⁸ in the second half. Overall our Asia life businesses delivered 4 per cent⁸ growth in overall APE⁶ sales and a 2 per cent⁸ growth in overall new business profit⁷.

The benefits of our long held focus on writing high quality, recurring premium business, contributing to resilient and broad-based in-force growth are evident in the 12 per cent⁸ increase in renewal insurance premium⁹ and 14 per cent⁸ increase in adjusted operating profit², with double-digit growth⁸ in eight insurance markets including 24 per cent adjusted operating profit growth in Hong Kong and 20 per cent⁸ growth in mainland China.

At the same time, our Asian asset manager, Eastspring, has continued to grow well. Average assets under management were up by 15 per cent (on an actual exchange rate basis), while earnings were up by 18 per cent⁸ and net external inflows totalled \$8.9 billion¹⁰. Eastspring is continuing to expand its footprint in the region, and in December acquired a controlling stake in one of Thailand's leading asset managers, Thanachart Fund Management Co., Ltd, with the option to acquire the remaining equity in this business in due course.

We have broad and efficient channels in Asia, through both our agency force and our bank partners. During 2019, we continued to strengthen our network of bank partnerships, renewing and expanding our successful strategic alliance with United Overseas Bank in five markets across the region and signing two new partnership agreements in Vietnam.

We are continuing to deliver digital innovation to support our successful agency and bank channels. We are diversifying into new areas, including employee benefits insurance for both large and small employers in the region, and at the same time we are building new value-added services such as Pulse by Prudential, our new end-to-end digital health app.

Africa

We are continuing to make good progress in our newer markets in Africa. In 2019 we enhanced our growing scale in the region by acquiring a majority stake in a leading life insurer operating in Cameroon, Côte d'Ivoire and Togo, which have a combined population of more than 65 million. We now operate in eight markets in Africa with a total population of almost 400 million. In 2019, the Africa business delivered a 76 per cent⁸ increase in APE⁶ sales to \$82 million (2018: \$47 million).

US

In the US, our product innovation and distribution leave us well positioned to provide an ageing population with financial strategies for stable retirements. The US is the world's largest retirement savings market¹¹, with approximately four million Americans reaching retirement age every year¹². This transition continues to trigger the unprecedented shift of trillions of dollars from savings accumulation to retirement income generation¹³.

We provide products that offer Americans the retirement strategies they need, including variable, fixed and fixed index annuities. Our diversified product approach has enabled us to deliver APE⁶ sales up 8 per cent, with increases in both fixed index and fixed annuity products. New business profit⁷ declined by 28 per cent, reflecting lower interest rates and changes in product mix.

In the US, we have one of the leading distribution teams¹⁴. We are agile and successful in launching well designed, customer-centric products, have successful risk management and hedge programmes are investing in technology platforms and have award-winning customer service. We are continuing to work towards further diversification and growth, within a highly competitive industry.

Our US business has taken important steps in the delivery of its diversification announced with our half year results in August 2019 and has maintained a cautious approach to managing risk through its dynamic hedging programme. The financial results of the US business reflect the execution of this strategy. While adjusted operating profit² increased by 20 per cent to \$3,070 million, the effects of strong US equity market performance and lower interest rates in the period led to a post-tax IFRS loss in the US of \$(380) million. We continue to accept a degree of volatility in our IFRS results

since our hedging programme is based on managing the economic risks in the business and protecting statutory solvency in the circumstances of large market movements. Further detail is provided in the Group Chief Financial Officer and Chief Operating Officer's report.

Outlook

We continue to monitor closely the development of the coronavirus outbreak. Our priority is the health and wellbeing for our customers and staff during this challenging time.

While the coronavirus outbreak has slowed down economic activity in the year to date and dampened our sales momentum in Hong Kong and China, we remain confident in the medium to long-term prospects of these economies and their respective insurance sectors. Our broad geographic spread across the region and the strength of our recurring premium business model lends considerable resilience to our earnings.

Given the impact of the coronavirus outbreak on travel and activity in the markets in which we operate, lower levels of new sales activity in those affected markets are to be expected. Our book of existing business is proving resilient and we are taking measures to manage the effect of lower activity while maintaining our investment in products, distribution and technology. Existing customers in both Hong Kong and mainland China continue to contribute to their policies with premiums being paid through a broad range of remote payment facilities.

The longer term structural drivers of growth in our Asia markets remain unchanged and compelling. The resilient and high quality nature of the IFRS operating earnings growth of our Asia business remains supported by the compounding nature of a highly enduring regular premium income

base and focus on health and protection products. These drivers, combined with the diversity of the Asia platform and quality of its execution, are expected to outweigh the effects of any one period's new sales.

In the US, we have commenced preparations for a minority IPO of Jackson as our preferred route to introduce third party finance into Jackson. As previously announced, from 2020 Jackson's remittances are expected to be more evenly spread over the calendar year than in prior periods.

The Group's strategy remains focused on structural growth opportunities. The Group will prioritise the considerable attractive investment opportunities available when considering the deployment of capital and applying its progressive dividend policy.

Interest rates have declined materially in 2019 and are trending lower in 2020. Equity markets have been volatile and have declined in the current year to date from their peaks in Q4 2019. These market conditions, as well as the coronavirus outbreak, create headwinds in respect of near-term new business profit and IFRS fee-based and spread earnings. However, our performance in 2019 demonstrates that the opportunities we have identified are clear and long term and that we are addressing these opportunities well. We are continuing to deliver growth based on the strength of those opportunities, the diversification of our business and the resilience of our earnings. I am confident that, with our clear focus on our structural growth markets and our continuing operational improvements, we will continue to deliver profitable growth for our investors and benefits for our stakeholders over the medium and long term.

Mike Wells
Group Chief Executive

Notes

- During 2019, the Group's holding company cash flow was managed in sterling and significant remittances were hedged and recorded on that basis. Amounts received were therefore distorted by the onwards translation into US dollars. The dividend paid by Jackson in the US in US dollars in 2019 was \$525 million (2018: \$450 million). The amount recorded as received in the holding company cash flow was \$509 million (2018: \$452 million).
- Adjusted IFRS operating profit based on longer-term investment returns is management's primary measure of profitability and provides an underlying operating result based on longer-term investment returns and excludes non-operating items. Further information on its definition and reconciliation to profit for the year is set out in note B1.1 of the IFRS financial statements.
- Cash payments made over 2019 and 2020.
- Source: Swiss Re Sigma 2017. Insurance penetration calculated as premiums on per cent of GDP. Asia penetration calculated on a weighted population basis.
- Source: Investment Company Institute, industry association and Lipper.
- APE sales is a measure of new business activity that comprises the aggregate of annualised regular premiums and one-tenth of single premiums on new business written down during the year for all insurance products, including premiums for contracts designated as investment contracts under IFRS 4. It is not representative of premium income recorded in the IFRS financial statements. See note II of the Additional unaudited financial information for further explanation.
- New business profit on a post-tax basis, on business sold in the period, calculated in accordance with EEV principles.
- Year-on-year percentage increases are stated on a constant exchange rate basis unless otherwise stated. As in previous years, we comment on our performance in local currency terms (expressed on a constant exchange rate basis) to show the underlying business trends in periods of currency movement.
- See note II of the Additional unaudited financial information for definition and reconciliation to IFRS balances.

Our purpose is to help people de-risk their lives and deal with their biggest financial concerns. We provide our customers with the freedom to face the future with confidence.

Our strategy

Our strategy is to capture the long-term structural opportunities for our markets and geographies, while operating with discipline and seeking to enhance our capabilities through innovation to deliver high-quality resilient outcomes for our customers.

We aim to do this by:

- Serving the protection and investment needs of the growing middle class in **Asia**;
- Offering products to new customers in **Africa**, one of the fastest-growing regions in the world; and
- Providing asset accumulation and retirement income products to **US** retirees.

Structural growth over the last 20 years has allowed our business to reach the scale where it can support its long-term goals through execution of its strategy and disciplined capital allocation. Prudential plc has a portfolio of businesses with access to the world's largest and fastest-growing markets.

US retirement

Strength and flexibility of our distribution network gives us a distinctive advantage

Leading position in the retirement income industry.

10,000 Americans reach retirement age each day for the next 20 years.

Largest wholesaling force in the annuity industry.

US GDP growth projections (\$)

Evolving to serve the future customer

Our trusted brands and strong distribution channels enable us to understand the growing needs of our customers for long-term savings and financial security, and to design products that meet those needs. By helping to build better lives and stronger communities and to fuel the growth cycle, we create long-term value for both our customers and our shareholders.

| Capturing structural opportunity | ... and enhancing capabilities |
|--|---|
| <p>We capture the structural opportunities by offering the products and solutions demanded by customers and wider society</p> <hr/> <p>Asia</p> <p>Asia's long-term structural trends are powerful drivers of sustainable growth. These trends underpin a strong and growing demand for savings and protection across the region, as markets are challenged by low life insurance penetration and a large pension funding gap.</p> <p>We are well placed to capture this opportunity, providing products that meet our customers' needs and gaining political and regulatory support in our markets.</p> <hr/> <p>Africa</p> <p>We have also continued to expand our presence in Africa, one of the world's most under penetrated markets where the population is forecast to grow by a billion by 2045. In July, we completed our acquisition of a 51 per cent stake in a leading life insurer, Group Beneficial, operating in West and Central Africa. We now operate in eight markets with a population of almost 400 million.</p> <hr/> <p>US</p> <p>In the US, an extra 22 million individuals will need retirement solutions by 2035¹, and pension provision has been declining². We see a growing demand for retirement products and an ongoing shift to fee-based solutions. Jackson is evolving its product range to address these needs.</p> | <p>We enhance our capabilities by developing our digital offerings and expanding our partnerships, further strengthening our distribution networks</p> <hr/> <p>Asia</p> <p>We continue to invest significantly in tech-driven capabilities and partnerships to address developing customer demand. Significant developments include the launch of Pulse by Prudential, our health and fitness app, and 18 new digital partnerships across the region.</p> <p>Our productive distribution footprint across Asia is diversified across a substantial agency force and bank partner network. Recent developments include the renewal of our UOB partnerships for 15 years, and a new partnership with OVO in Indonesia.</p> <hr/> <p>Africa</p> <p>We continue to grow and develop our footprint through our agency network and bancassurance partners. We are harnessing technology to improve customer service, innovate in distribution and build a business which is scalable.</p> <hr/> <p>US</p> <p>We have invested in a single technology platform to deliver one of the most efficient and scalable operating platforms across the industry. Jackson is the clear leader in each variable annuity distribution channel³, and is well positioned to further enhance its market-leading annuity position in the brokerage market.</p> <p>Our product innovation and distribution strategies will enable us to capture the industry trends towards advisory-based distribution models.</p> |

Operating with discipline

Risk management and disciplined allocation of capital underpin our activities

The Group has a proven track record of disciplined capital allocation. Our governance, processes and controls enable us to deal with uncertainty effectively, which is critical to the achievement of our strategy. Our Group Risk Framework and risk appetite allow us to control our risk exposure successfully throughout the year.

➤ The Group has a number of key performance indicators internally to measure financial performance. Read more on page 16.

Notes

- 1 From continuing operations.
- 2 New business profit, on a post-tax basis, on business sold in the period, calculated in accordance with EEV principles.
- 3 Growth rates on a constant exchange rate basis.
- 4 Adjusted IFRS operating profit based on longer-term investment returns. This alternative performance measure is reconciled to IFRS profit for the period in note B1.1 of the IFRS financial statements.
- 5 Surplus over Group minimum capital requirement and estimated before allowing for second interim ordinary dividend. Shareholder business excludes the available capital and minimum capital requirement of participating business in Hong Kong, Singapore and Malaysia. Further information on the basis of calculation of the LCSM measure is contained in note 1(i) of the Additional unaudited financial information.
- 6 EEV shareholders' funds at 31 December 2019 are not directly comparable to Group shareholders' funds reported at 31 December 2018, as the prior year balance included shareholders' funds of M&G plc which, following demerger, are not part of the Group as at 31 December 2019. The reported 31 December 2018 EEV shareholders' funds were 2,445 cents.
- 7 The Group's dividend policy will be determined from a 2019 US dollar base of 36.84 cents per share, representing the full-year ordinary interim dividend for 2019 of 46.26 cents less the contribution of the discontinued M&G plc business (9.42 cents).
- 8 Growth rates on an actual exchange rate basis.

... for our stakeholders.

Customers

We provide financial security and wealth creation by providing the right products through appropriate distribution. In the light of technological advances and evolving customer needs, we actively embrace the latest technology and embed digital capabilities in our business.

Sustainability

All of our stakeholders require us to undertake the actions to build a sustainable business, which we do through our products and the development of our capabilities. Responsible investment is a key component of sustainability. We take an inclusive approach to responsible investments, seeking to integrate environmental, social and governance considerations into our investment processes and stewardship activities through ownership practices and engagement with investee companies.

➤ Read more on pages 75, 77 to 80 and 84 to 86

Measuring our performance

To create sustainable economic value for our shareholders we focus on delivering growth and cash while maintaining appropriate capital.

Profit, cash and capital¹

Prudential takes a balanced approach to performance management across IFRS, EEV and cash. We aim to demonstrate how we generate profit under different accounting bases, reflecting the returns we generate on capital invested, and the cash generation of our business.

Adjusted IFRS operating profit based on longer-term investment returns (adjusted operating profit)² \$m

The Group's business involves entering into long-term contracts with customers, and hence the Group manages its associated assets and liabilities over a longer-term time horizon. This enables the Group to manage a degree of short-term market volatility. Therefore, adjusted operating profit based on longer-term investment returns gives a more relevant measure of the performance of the business. Other distorting items are excluded from adjusted operating profit to allow more relevant period-on-period comparisons of the trading operations of the Group, eg the effects of corporate transactions are excluded.

Group adjusted operating profit in 2019 is 20 per cent higher on a constant and actual exchange rate basis compared with 2018. Adjusted operating profit from Asia life and asset management operations was up 14 per cent on a constant exchange rate basis (13 per cent on an actual exchange rate basis). In the US, adjusted operating profit was up 20 per cent reflecting a lower market related deferred acquisition cost amortisation charge.

EEV new business profit³ \$m

Life insurance products are, by their nature, long term and generate profit over a number of years. Embedded value reporting provides investors with a measure of the future profit streams of the Group. EEV new business profit reflects the value of future profit streams which are not fully captured in the year of sale under IFRS reporting.

EEV new business profit in 2019 decreased by 6 per cent on a constant and actual exchange rate basis compared with 2018. New business profit generated by our Asian business was up 2 per cent on a constant exchange rate basis, with a 29 per cent increase from Asian businesses excluding Hong Kong. Hong Kong fell by 12 per cent broadly in line with the fall in APE sales given the decline in mainland China visitors in the second half of the year. US new business profit decreased by 28 per cent, with an increase in sales being more than offset by a fall in interest rates and the planned diversification of product mix.

EEV operating profit³ \$m

EEV operating profit is provided as an additional measure of profitability. This measure includes EEV new business profit, the change in the value of the Group's long-term in-force business, and profit from our asset management and other businesses. As with IFRS, EEV operating profit reflects the underlying results based on longer-term investment returns.

Group EEV operating profit in 2019 decreased by 12 per cent on a constant exchange rate basis (12 per cent on an actual exchange rate basis) compared with 2018. In addition to the decrease in new business profit described above, in force profit was lower due, in part, to falling interest rates.

Key

- Continuing
- Discontinued
- Continuing

* Growth rates relate to continuing operations.

Operating free surplus generation⁴ \$m

Free surplus generation is used to measure the internal cash generation of our business units. For insurance operations, it represents amounts maturing from the in-force business during the period, less investment in new business and excludes other non-operating items. For asset management, it equates to post-tax operating profit for the year.

Operating free surplus from continuing operations was \$2,861 million in the year. This comprises \$4,958 million generated from the in-force business and asset management, up 12 per cent, before allowing for \$(903) million of US EEV hedge modelling enhancements, new business strain of \$(1,158) million, up 22 per cent following the planned diversification of sales in the US towards higher strain fixed index and fixed annuities, and restructuring costs of \$(36) million.

Business unit remittances⁵ \$m

Remittances measure the cash transferred from business units to the Group. Cash flows across the Group reflect our aim of achieving a balance between ensuring sufficient net remittances from business units to cover the dividend (after corporate costs) and the use of cash for reinvestment in profitable opportunities available to the Group.

Cash remitted to the Group from continuing operations in 2019 amounted to \$1,465 million, including \$950 million from Asia (up 4 per cent) and \$509 from the US (up 13 per cent). During 2019, the Group's holding company cash flows were managed in sterling and significant remittances were hedged. If local currency remittances in Asia had been translated directly into US dollars then the growth rate in Asia remittances would have been 8 per cent. The dividend paid by Jackson was \$525 million (2018: \$450 million).

Group local capital summation method⁶ \$bn

Following the demerger of M&G plc from Prudential plc, the Hong Kong Insurance Authority (IA) has assumed the role of the Group-wide supervisor for the Prudential Group. The Group is no longer subject to Solvency II capital requirements and currently applies the local capital summation method (LCSM) that has been agreed with the Hong Kong IA to determine Group regulatory capital requirements (both minimum and prescribed levels).

The Group's available capital, as recorded on a LCSM basis, covers the Group's minimum capital requirement over three times. In 2019, capital generation from the in-force business has been used to invest in new business, pay the external dividend and invest in new bancassurance agreements and a new Thai asset manager. After these impacts and market movements, LCSM surplus fell slightly from \$9.7 billion at 31 December 2018 to \$9.5 billion at 31 December 2019.

Notes

- 1 The comparative results shown above have been prepared using an actual exchange rate (AER) basis except where otherwise stated. Comparative results on a constant exchange rate (CER) basis are also shown in financial tables in the Chief Financial Officer's report on our 2019 financial performance. Growth rates for 2018 to 2019 are on an AER basis.
- 2 Adjusted operating profit is management's primary measure of profitability and provides an underlying operating result based on longer-term investment returns and excludes non-operating items. This alternative performance measure is reconciled to IFRS profit for the year in note B1.1 of the IFRS financial statements.
- 3 The EEV basis results have been prepared in accordance with EEV principles discussed in note 1 of the EEV basis results. See note II of Additional unaudited financial information for definition and reconciliation to IFRS balances.
- 4 For insurance operations, operating free surplus generated represents amounts maturing from the in-force business during the period less investment in new business and excludes non-operating items. For asset management businesses, it equates to post-tax operating

- profit for the period. Restructuring costs are presented separately from the operating business unit amount. Further information is set out in note 11 of the EEV basis results.
- 5 Cash remitted to the Group forms part of the net cash flows of the holding company. A full holding company cash flow is set out in note I(iii) of the Additional unaudited financial information. This differs from the IFRS consolidated statement of cash flows which includes all cash flows relating to both policyholders' and shareholders' funds. The holding company cash flow is therefore a more meaningful indicator of the Group's central liquidity.
- 6 Surplus over Group minimum capital requirement and estimated before allowing for second interim ordinary dividend. Shareholder business excludes the available capital and minimum capital requirement of participating business in Hong Kong, Singapore and Malaysia. 2018 surplus excludes M&G plc and includes \$3.7 billion of subordinated debt issued by Prudential plc that was transferred to M&G plc on 18 October 2019. Further information on the basis of calculation of the LCSM measure is contained in note I(i) of the Additional unaudited financial information.

Asia

Continued progress towards our strategic priorities.

2019 performance highlights

- Continued strong performance in key earnings and value metrics: adjusted operating profit up 14 per cent¹ and European Embedded Value up 23 per cent² to \$39,235 million
- We expanded our presence in China with a new branch in Shaanxi, the addition of seven cities and a strong start to our wholly owned private fund manager
- We renewed our successful regional strategic bancassurance alliance with United Overseas Bank Limited (UOB) to 2034 and expanded its coverage
- We secured one of a few 100 per cent licences in Myanmar, our 13th life market in Asia
- Eastspring total funds under management grew to \$241 billion, up 25 per cent²
- We developed over 160 products in 2019, contributing 16 per cent of life new business profit
- Our digital health SuperApp, branded Pulse by Prudential, is live in eight markets and over one million people have downloaded the app

Our business

Our business model is underpinned by the breadth and quality of our operations in the life insurance and asset management sectors. We have an outstanding reputation with customers and regulators alike and we operate in markets with compelling structural drivers that support sustained future growth. We have a top-three position in nine insurance markets in the region and have built an Asian asset management business with one of the largest regional market footprints. This diversity, combined with our continued focus on customer outcomes and profitability, has provided protection from cyclical headwinds.

We have made significant investments during 2019 to strengthen further and grow our Asia business. We renewed our successful regional bancassurance partnership with UOB until the end of 2034 and expanded its coverage to include Vietnam as well as UOB's digital bank, TMRW. We extended our life insurance footprint to Myanmar, our 13th life market, and acquired a controlling stake in Thanachart Fund which makes us the fourth largest mutual fund manager in the attractive Thailand market with a 12 per cent market share. To date, over one million people have downloaded the 'Pulse by Prudential' app since its launch. Our focus on growing our presence in China saw our reach expand to a further seven cities, bringing our footprint to 94 cities, while our wholly owned private fund manager established in Shanghai in December 2018 has secured over one billion Yuan in its first year of operation.

We are able to translate these hallmarks of our business into financial success, with diversified growth in 2019 maintaining our strong track record of high-quality performance. We achieved a 14 per cent¹ increase in adjusted operating profit, with eight markets growing at a double-digit rate. This is supported by a 12 per cent¹ expansion in renewal premiums³, which reflects the long-term nature of our insurance business, and a 25 per cent² increase in funds under management at Eastspring helped by strong third party net-inflows of \$8.9 billion⁴. We also delivered 29 per cent¹ growth in new business profit outside Hong Kong, with eight markets expanding at a double-digit rate, which underpinned a 23 per cent² increase in European Embedded Value to \$39,235 million.

Market opportunities

We seek to enhance the health and wealth of consumers in Asia by providing life insurance and asset management solutions to address their protection and savings needs at all ages. The industry remains in the early stages of development, as characterised by the low penetration rates across the region for both insurance and asset management, and low levels of financial inclusion. In particular, most of our markets are approaching the level of per capita annual income when demand increases sharply. As a consequence, Asia is predicted to contribute about two-thirds of the global life insurance growth in the next 10 years⁵ and achieve a share of 42 per cent of the global insurance market by 2029 compared with just 32 per cent currently⁶. The Asia Pacific asset and wealth management industry is also expected to add about \$13 trillion of assets under management between 2020 and 2025⁷.

There are many structural drivers supporting the significant growth potential in Asia. The health protection gap, estimated at \$1.8 trillion⁸, is already substantial as consumers in Asia are under-insured and social safety nets remain limited. Meanwhile, medium-term economic growth prospects are superior to those of developed markets in the west, with continued income growth and rising wealth levels expected to raise the awareness of, and demand for, protection and wealth management solutions. Similarly, demographic trends are also favourable, as youthful emerging markets with growing working-age populations remain a core source of demand for traditional protection and savings products and more mature markets with ageing populations create demand for retirement and wealth management solutions.

While these secular trends offer attractive prospects, we remain vigilant and focused in our execution. We have carefully managed our businesses through a range of unforeseen external events during 2019, including heightened capital market volatility arising from trade tensions between the US and China, a slowdown in the growth of the Chinese economy, suppressed yields on US dollar and other Asian currency fixed-income instruments, and social unrest in Hong Kong that led to a notable decline in mainland China visitor arrivals.

We have also embraced the opportunities brought about by government initiatives. Our widening product offerings and new partnerships support many Asian regulators' vision to provide greater financial inclusion and promote the health and wellbeing of the people. For example, in Hong Kong we have seen strong demand for our annuity and medical reimbursement products that are eligible for tax incentives that were newly introduced by the government. We also successfully refreshed products of our Malaysia conventional business to comply with the new regulations on minimum allocation rate. In addition, our expertise in economic capital reporting, protection-focused business mix and conservative balance sheet position us well for the migration to risk-based solvency frameworks across the region.

Strategic priorities

We run our business with a focus on customers, quality growth and profitability. We favour health and protection products due to their resilience to market cycles and healthy margins. Collectively, such products produced 67 per cent of our new business profit in 2019 and contributed to our high mix of regular premiums, which comprised 93 per cent of our APE sales in 2019 and 99 per cent of our life weighted premium income⁹. This results in 86 per cent¹⁰ of our life IFRS operating income (excluding other income) arising from insurance margin and fee income, which in turn supports stable profit progression across market cycles and strong returns on equity.

This performance also reflects the disciplined execution of our four strategic priorities, which align with the evolving sources of demand across the region and help position our business for continued growth.

Diversification Adjusted operating profit by region

Full year 2019

\$3,276m

+14%

| Market | Adjusted operating profit | Share of total Asia | Growth |

| 10 Philippines | \$73m | 2% | +26% |
| 11 Others | \$177m | 5% | +30% |

Growth rate vs 2018 constant exchange rates

First, we seek to enhance the core of our existing business and made excellent progress in this regard in 2019. Significantly, our sales in Indonesia grew 23 per cent¹ in the full year and this growth accelerated to 41 per cent¹ in the second half from 4 per cent¹ in the first half, following a substantial reform of our agency channel and new product launches. We made successful business mix improvements in the Philippines by shifting towards higher-margin health and protection products, which resulted in a 5 percentage point increase in APE sales mix¹¹ for these products and supported the more than doubling of new business profit. On the distribution side, we have extended our exclusive partnership with UOB until the end of 2034 with an expanded scope to include Vietnam and UOB's digital bank, TMRW, and have established an exclusive 20-year partnership with SeAbank who have 1.2 million retail customers and almost 170 branches in Vietnam.

Secondly, we aim to create 'best-in-class' health capabilities. This is being delivered by enhancing customer access to healthcare products and services. Through our digital health SuperApp branded Pulse by Prudential, which is live in 8 markets, we collaborate with various digital partners and use artificial intelligence technology to offer users a wide range of affordable and easy-to-access consumer services such as health assessments, risk factor identification, triage, telemedicine, wellness and digital payment. Meanwhile, we have launched new protection products to meet the evolving needs of our customers, including two certified VHIS plans in Hong Kong and PRUCritical Benefit 88, our first standalone critical illness product in Indonesia. In 2019, we increased our new business profit from health and protection products by 23 per cent in Asia ex-Hong Kong, as we expanded our APE sales of such products in seven markets with notable success in India, where such sales saw 50 per cent underlying growth¹².

Thirdly, we plan to accelerate growth in Eastspring by expanding its product and distribution capabilities. We have continued to develop new solutions, including our first fund offerings in China and Thailand as well as fixed maturity plans in Taiwan, Singapore, Malaysia and India. We maintained our strong investment performance with 60 per cent of retail and institutional funds outperforming over the past year, collectively helping to attract strong net flows from third parties. This in turn raised our funds under management by 25 per cent² to \$241.1 billion. Further streamlining of our front and middle-office operations was delivered in 2019, following the completion of BlackRock's Aladdin system implementation across 10 markets. Meanwhile, our disciplined focus on costs has led to further improvement in the cost-income ratio, which fell three percentage points to 52 per cent in 2019, and contributed to the 18 per cent growth in adjusted operating profit for the year to \$283 million. Following our acquisition of majority stakes in Thanachart Fund and TMB Asset Management, Eastspring is now Thailand's fourth largest mutual fund manager, with a market share of 12 per cent¹³ and combined assets under management of \$22 billion⁴.

Finally, we continue to expand our presence in China across both the insurance and asset management sectors. We recently established a new branch in Shaanxi, our 20th in the country, and have added seven cities and 14 sales services offices in 2019, extending our reach to 94 cities and 229 sales offices. Our current presence gives us access to 77 per cent of China's population¹⁴ and 83 per cent of the insurance market¹⁵. Coupled with our continued strong focus on execution, our geographic expansion has helped us achieve strong NBP growth of 38 per cent, with strong double-digit growth across both the agency and bancassurance channels. Our life joint venture also recently received regulatory approval to establish its own asset management company, which will further strengthen our capabilities in savings and retirement products. Furthermore, our wholly owned private fund manager established in Shanghai in December 2018 has secured over one billion Yuan in its first year of operation.

Customers

We believe that excellent customer service has been key to our strong reputation and leading pan-Asia franchise. During 2019, we added a further 1.4 million new life customers¹⁸, bringing the total to over 15 million life customers, of which about one-third are our health customers. Customer loyalty is high, as reflected by our strong retention ratio which has consistently remained in excess of 90 per cent. The satisfaction and trust our customers have in our business also translates into a high proportion of repeat sales, which comprised 45 per cent of APE sales in 2019. The result of these dynamics is a portfolio of close to 25 million in-force policies, with each policyholder holding 1.6 policies on average.

At Eastspring, the expansion in assets under management was driven by strong underlying growth of 26 per cent in external client funds, excluding the M&G related assets that were reclassified following the demerger. Overall external client funds reached \$124.7 billion and contributed to 52 per cent of the total funds under management at the end of 2019.

Our customer centric health ecosystem, which empowers consumers to take control of their personal health and wellbeing in an affordable way any time and anywhere, has made a promising start. The number of individuals who have downloaded the Pulse by Prudential app has exceeded one million since launch in August 2019. Pulse will help us acquire and retain users at pace as we enhance its reach by expanding the scope of service and onboard new partners.

We continue to identify and target new customer groups and segments outside our traditional focus in the mass and affluent space in order to accelerate our future growth. We first expanded into the high net worth segment in 2018 with Opus in Singapore, which provided a differentiated experience for our customers, including a dedicated service team, wealth planners and external experts covering trust and legal matters. APE sales in this segment delivered impressive growth of 46 per cent in 2019 to \$76 million. Similarly, we also developed tailored offerings for SMEs, a segment that remains under-served and offers significant growth potential. This strategy is advanced through our all-inclusive platform, PRUworks, which provides a digitally-enabled HR solution for business owners and their employees, providing access to employee benefits and lifestyle programmes. In 2019, we achieved 22 per cent growth in our employee benefits APE in Singapore¹⁷ and leveraged this experience to extend our coverage to Indonesia. We have also developed strategies to reach the digitally-savvy millennial segment through TMRW, UOB's digital bank, and new partners such as OVO in Indonesia.

Products

We offer a wide range of insurance products that are tailored to local market requirements and fast-changing individual needs, with 67 per cent of new business profit contributed by health and protection solutions and the rest by savings products that include participating, linked and other traditional products. The diversity and resilience of our business is supported by the continued enhancements we make to our product range, which include broadening coverage for new risks and adding innovative features. Indeed, last year 16 per cent of new business profit and 55 per cent of external net inflows⁴ arose from the 166 products and 109 funds⁴ that were developed in 2019.

In Hong Kong, our new and innovative product offerings have contributed to the resilience of the domestic segment, which achieved 8 per cent APE sales growth in the full year. This growth accelerated to 12 per cent in the second half from 5 per cent in the first half despite the economic slowdown and social unrest. Our new qualified deferred annuity product was well received by customers in both the agency and bancassurance channels, and with sales of \$162 million accounted for 11 per cent of our Hong Kong APE sales since its launch on 1 April 2019. PruActive retirement marked our entry into the annuity market in Singapore, contributing 6 per cent to our Singapore APE sales since its launch in August. We also launched PRUHealth Cancer ReCover in Hong Kong, a first-in-market cancer protection plan tailored for cancer survivors and which also offers holistic homecare services to support in-home recovery.

The improvement of our Indonesia business, whose new business profit rose strongly by 39 per cent¹ in 2019, was also helped by the broadening of our product offering. Following the success of our upgraded unit-linked product, PRUlink Generasi Baru, that was launched in late 2018, we offered a number of new and refreshed products in 2019. To raise the productivity of our trainee agents we launched PRUCritical Benefit 88, our first standalone critical illness product, which accounted for around 10 per cent of the case count in this agent segment. Similarly, we refreshed our medical product, PRUprime Healthcare Plus, offering customers a simpler and faster process to upgrade health protection, and this was our best-selling product in Indonesia last year. We also plan to introduce new offerings to our critical illness and Shariah products, which we expect will help sustain the growth momentum in 2020.

Distribution

We believe in a multi-channel strategy for our business which can adapt and respond flexibly depending on local market conditions. Our distribution network is one of the strongest and most diversified in the Asia region. We have over 600,000 licensed tied agents across our life insurance markets, and this proprietary distribution channel is the core component of our success, comprising 83 per cent of our new business profit. We also have a leading bancassurance franchise that provides access to over 18,000 bank outlets through our strategic partnerships with multi-national banks and prominent domestic banks, which grew new business profit by 12 per cent in 2019. In recent years, we have also established non-traditional partnerships to broaden our reach further, with partners added in 2019 including Viettel, the largest telecommunications service provider in Vietnam. In total, we have more than 300 life insurance and asset management distribution partnerships in Asia.

Our focus on the agency channel positions us well for sustainable growth, as customers continue to have a strong preference for face-to-face advice from a trusted financial adviser, especially regarding complex protection and wealth solutions. We have created a culture whereby agents aspire to attain membership of the Million Dollar Round Table (MDRT), an industry-recognised indicator of quality. We place great emphasis on agent professionalism and promote career progression by providing tailored training programmes that share experience and best practice across different markets. In addition, to further assist our agents during the sales process and enhance productivity we continually upgrade the tools at their disposal.

We currently boast a number one position in agency APE sales in Hong Kong and have increased MDRT qualifiers by 35 per cent in our markets outside Hong Kong, reflecting our focus on agent recruitment, training and productivity across different markets. For example, in Indonesia, our segmented agency strategy is delivering positive early results and played a key role in driving APE sales growth in 2019, with the Elite segment growing APE sales by 57 per cent to account for 25 per cent of total agency APE sales for the year.

Our partnerships also made exceptional progress last year. The bancassurance channel achieved APE sales growth of 14 per cent¹, with particularly strong performances in China JV and Vietnam and 24 per cent growth from UOB following the renewal of the strategic partnership at the beginning of the year. Meanwhile, we also extended our collaboration with new partners to widen our access to new customer segments, underlined by our new strategic partnership with OVO, the largest digital payment platform in Indonesia with access to 115 million devices. We anticipate that this partnership will significantly enhance our reach to digitally-savvy consumers in the country through the joint development of digital propositions that encompass health, wellness and wealth products. The experience will also help us in designing and managing distribution strategies in our existing markets as well as in targeting new or recent points of entry.

New business profit by product

Full year 2019 %

New business profit by channel

Full year 2019 %

Digital

In the face of rapidly evolving customer needs and technological disruption, we actively embrace change and the latest technology. Our digital strategy is being executed in two waves. The first focuses on increasing automation and improving digital capabilities in our current business model for better customer experience leading to better business results. The second adds a new business model based on a customer centric digital ecosystem which is manifested in our SuperApp branded Pulse by Prudential.

First wave: Enhancing our current business model

In the first wave we are continually increasing the automation of our operations so as to improve both business efficiency and customer experience. For example, 83 per cent of all new business was submitted through e-point-of-sale technology in 2019, representing an increase of 11 percentage points year-on-year, with the enhancement particularly pronounced in our bancassurance partners in Thailand, Taiwan and Malaysia. Our smart underwriting tool, which is now used in 64 per cent of all new sales, offers dynamic underwriting that streamlines the application process and communicates instant underwriting decisions to customers. We provide our rapidly growing digital-savvy customer-base with efficient and secure digital payment solutions, for example, through our recent partnership with Boost, a leading lifestyle e-wallet in Malaysia. We have established a strategic relationship with the global technology services company Tech Mahindra to leverage their scale and expertise in Cloud and Mobile to ensure faster deliveries across all markets.

At Eastspring, in addition to embedding BlackRock's Aladdin system, we have also made other digital advancements, with our Malaysian entity winning the 'Fintech Innovation in Asset Management' award in Asia Asset Management's '2020 Best-of-the-Best awards'. This reflected the continued enhancements to our online platform, myEastspring, which enables our clients to access, monitor and transact online and includes tools for our agents to help clients predict their future savings needs. We also launched a new digital facility that empowers members of the Employees Provident Fund to take control of their investments and make transactions at nearly zero cost.

Prudential Corporation Asia automation rates trend

Second wave: Building an ecosystem-based business model

In the second wave, to aid the expansion of our role from providing protection to making customers healthier, we have added an ecosystem-based business model which is manifested in our Pulse by Prudential app. Built on the latest architecture, Pulse is scalable and is based on real data and artificial intelligence (AI) technology focusing on positive outcomes for customers and our businesses. This business model also uses a wide range of partnerships and the latest trends in health and wealth technology, allowing us to fulfil our strategic imperative to add prevention and postponement to our protection business. So far we have secured 18 market-leading partners across an array of different elements. We believe this will help us to acquire users at pace and gain access to new data, whilst enabling our customers to enjoy a wide range of affordable healthcare and value-added services to help them live longer and healthier lives. Currently live in eight markets, Pulse will continuously improve as we roll out new functionalities, increase partnerships and learn from direct user feedback over time.

The component of Pulse designed for the fast-growing small and medium enterprise (SME) segment in Asia is known as PruWorks. Following its launch in Singapore and Indonesia, we are now enhancing this further with a fully integrated, new administration system as well as direct connectivity to enhance customer experience for SMEs and their employees.

Corporate responsibilities

We have a large number of staff and agents across our life and asset management businesses across Asia, and an explicit inclusive approach to hiring and monitoring diversity. Progressively, we seek to ensure that mobility is not just seen as part of the opportunity provided to improve our individuals' skills but is also a source of key competitive advantage as we take learnings from one operation and apply them in another. The change in the method of managing agents in Indonesia using techniques developed in Vietnam is a prime example of this.

Highlights of key ecosystems partners

We have long-standing and strong relationships with the regulators in the markets we operate in. This is built on a culture of compliance with the rules and our promotion of financial services in the context of public policy. To drive the insurance penetration rates in protection and savings products which are desired by governments and regulators in the region, we support the process of deepening capital markets, building robust regulatory and legal frameworks and enhancing financial literacy in the markets in which we operate, which in turn supports economic

growth and stability. We see our investment appetite and risk management approach as contributing to the development and stability of the capital markets for the markets in which we operate. We actively engage with fellow market counterparties and governments to foster greater depth, transparency and liquidity of markets.

The responsible and sustainable management of our tax affairs also helps us to maintain constructive relations with our stakeholders and play a positive role

in the economy. We take a long-term perspective and balance our responsibility to support our business strategy with our responsibility to the communities in which we operate, which need sustainable tax revenues. We understand the importance of paying the right amount of tax on time. We manage our tax affairs transparently and seek to build constructive relationships with tax authorities in all the countries in which we operate.

COVID-19 update

We continue to monitor closely the development of the coronavirus outbreak. Our priority is the health and wellbeing of our customers and staff during this challenging time. In China and Hong Kong, we were one of the first insurance companies to launch extra free protection and coverage against this disease. Similarly, in another eight Asian markets we are offering additional free hospital cash benefits and other lump sum benefits to customers diagnosed with this disease, alongside a series of measures and services to support affected customers in a timely manner, such as dedicated hotlines and simplified claims procedures. For our staff, we have put in place flexible work arrangements, for example on work hours and work location, as well as enhanced hygienic tools in the office.

While the coronavirus outbreak has slowed down economic activities in the year-to-date and dampened our sales momentum in Hong Kong and China, we remain confident in the medium to long-term prospects of these economies and their respective insurance sectors. Our broad geographic spread across the region and the strength of our recurring premium business model lends considerable resilience to our earnings. We will continue to collaborate actively with the relevant governments and uphold our corporate and social responsibilities. This is exemplified by the recent donation of RMB15 million to support efforts in fighting against the disease by our joint ventures in China¹⁸. We will also continue to stand by our customers steadfastly and make them healthier with our 'best-in-class' health and protection capabilities.

Business outlook

Asia's growth fundamentals and demographic trends remain robust and we expect will continue to support strong growth for the insurance and asset management industries in Asia.

We are well placed to capture these structural prospects given our market-leading positions, focused strategic priorities, high-quality execution and expanding digital capabilities.

We have built a track record of consistent and resilient expansion across cycles over the past decades, and we are confident in continuing to replicate our past success and to make our customers in Asia healthier and wealthier in the years to come.

Nic Nicandrou
Chief Executive
Prudential Corporation Asia

Driving our business

Customers

In Asia, we focus our efforts on helping new and existing customers build better futures for themselves and their families, by helping to fill the savings and protection gap that exists in many markets in the region.

Products

We listen to our customers to help us understand their changing needs and tailor our design of product solutions and services.

Distribution

We are well-positioned in terms of the scale and diversity of our distribution to reach and serve our customers' needs. At the core of our distribution model is face-to-face customer interaction that delivers high-quality, needs-based advice.

Investment for growth

Building on our strong track record, we are building for future growth by investing in new opportunities and capabilities.

United

Providing America's ageing population with financial strategies for their retirement through product innovation and developing market-leading distribution capabilities.

2019 performance highlights

- Launches of Jackson's RateProtector, a single premium, multi-year guarantee fixed annuity, as well as MarketProtector and MarketProtector Advisory fixed index annuity products, contributing to an 8 per cent increase in new business sales
- Continued growth of advisory sales, with new business sales up 30 per cent as distribution models continue to evolve
- Expanded advisory distribution footprint with Morgan Stanley, DPL Financial Partners, TD Ameritrade and RetireOne
- Awarded 'Contact Center World Class CX Certification' and 'Highest Customer Service for the Financial Industry' awards by The Service Quality Measurement Group, Inc
- Actively engaged with FinTech partners including Investnet, MoneyGuidePro and eMoney
- Adjusted operating profit up 20 per cent to \$3,070 million and new business profit down 28 per cent to \$883 million

States

The US is the world's largest retirement savings market with approximately four million Americans reaching retirement age every year. This transition continues to trigger the unprecedented shift of trillions of dollars from savings accumulation to retirement income generation.

However, these Americans face challenges in planning for life after work. For those nearing the end of their working careers, a financially secure retirement is at risk, due to insufficient accumulation of savings and the current combination of low yields and market volatility. Employer-based pensions are being withdrawn, and state and government plans are underfunded as the impact of increased administrative costs and lower interest rates continue to reduce the affordability of the post-war pensions model. Social security was never intended to be a primary retirement solution and today its long-term funding status is in question.

Additionally, the life expectancy of an average retiree has significantly increased, lengthening the number of years for which retirement funding is needed.

To overcome these challenges, Americans need and demand retirement strategies that offer them the opportunity to grow and protect the value of their existing assets, as well as the ability to provide guaranteed income that will last throughout their extended lifetimes. Achieving this will reduce the gap many retirees face between income needed during retirement and the income they can generate from their retirement assets and social security. Reducing this gap is a public benefit as it helps reduce strain on supplemental government programmes for those in need.

Jackson believes that a retirement plan integrated with an income guarantee annuity will mitigate much of the risk of retirees running out of money during retirement. In response to this demand and the ongoing shift to fee-based solutions, Jackson has positioned itself with product innovation and distribution strategies to provide a wide spectrum of choice when selecting the retirement product that best fits customer needs. This will allow Jackson to enhance further our market-leading variable annuity position in the brokerage market, diversify in the fixed annuity and fixed index annuity space and grow in the advisory retirement solutions market. Jackson has demonstrated its ability to diversify during the year, growing the proportion of APE sales accounted for by fixed annuity, fixed index annuity and wholesale business to 34 per cent, from 19 per cent in the prior year.

Customers and products

Through its distribution partners, Jackson provides products that offer Americans the retirement strategies they need, including variable, fixed and fixed index annuities. Each of these products offer a unique range of features tailored to meet the individual needs of the retiree as discussed below:

Variable annuity A Jackson variable annuity, with investment freedom, represents an attractive option for retirees and soon-to-be-retirees, providing both access to equity market appreciation and guaranteed lifetime income as an add-on benefit.

Fixed index annuity A Jackson fixed index annuity is a guaranteed product with limited market exposure but no direct equity ownership. It is designed to build wealth through a combination of a base crediting rate that is generally lower than a traditional fixed annuity crediting rate, but with the potential for additional upside, based upon the performance of the linked index. Jackson also provides access to guaranteed lifetime income as an add-on benefit.

Fixed annuity A Jackson fixed annuity is a guaranteed product designed to build wealth without market exposure, through a crediting rate that is likely to be superior to interest rates offered from banks or money market funds.

These products also offer tax deferral, allowing interest and earnings to grow tax-free until withdrawals are made.

Jackson has a proven track record in this market with its market-leading flagship product, Perspective II¹. Jackson's success has been built on its quick-to-market product innovation, as demonstrated by the development and launch of Elite Access, our investment-only variable annuity. Further demonstrating Jackson's flexibility and manufacturing capabilities, and in response to the trend in financial services toward fee-based solutions, Jackson has launched Perspective Advisory II, Elite Access Advisory II and the innovative MarketProtector Advisory, the industry's first fully-liquid advisory fixed index annuity, to serve advisers and distributors with a preference for advisory products.

In June 2019, Jackson launched RateProtector, a single premium, multi-year guarantee fixed annuity. RateProtector offers consumers the opportunity to protect and grow their assets through guaranteed interest rates that will not fluctuate during a select period, combined with the ability to defer taxes on any earnings until money is withdrawn.

Market reception for these products has been positive and these have contributed to the delivery of the organic diversification of Jackson sales in 2019, with new business APE sales up 8 per cent to \$2,223 million (2018: \$2,059 million). The planned transition to a more balanced portfolio has resulted in higher investment in new business in 2019 which over time is expected to enhance statutory capital and cash generation.

Jackson operates within a well-defined risk framework and takes into account the expected cost of hedging when pricing its products. It aggregates financial risks across the company, obtains a unified view of its risk positions, and actively manages net risks through a hedging programme which aims to manage economic risk. Some accounting volatility is expected in periods of large market movements as was seen in 2019, given the economic focus described above, and this has impacted IFRS profitability in the year, as further discussed in the Group Chief Financial Officer and Chief Operating Officer's report. However, the benefits of Jackson's hedging programme have been demonstrated in times of equity market decline, for example during the fourth quarter of 2018 and during the recent market turbulence. At the end of 2019 Jackson's surplus of available capital over required capital was \$3,795 million after adopting the NAIC's changes to its framework for variable annuities. This equates to a ratio of 366 per cent (2018: 458 per cent using the previous NAIC framework). Jackson continues to monitor closely the recent changes in markets and take the appropriate actions through its dynamic hedging strategy. If these conditions persist management could take additional actions to assist in mitigating the impact.

Distribution

Jackson distributes products in all 50 states of the US and in the District of Columbia. Operations in the state of New York are conducted through a New York subsidiary. Jackson markets its retail products primarily through advice-based distribution channels, including independent agents, independent broker-dealer firms, regional broker-dealers, wirehouses and banks. For variable annuity sales, Jackson is the leader in the independent broker-dealer, bank and wirehouse channels² and third in regional firms².

Jackson's distribution strength also sets us apart from our competitors. Our highly productive wholesaling force is the largest³ in the annuity industry and is instrumental in supporting the independent advisers who help the growing pool of American retirees develop effective retirement strategies. Our wholesalers provide extensive training to thousands of advisers about the range of products and the investment strategies that are available to support their clients. Based on the latest available data, Jackson is the second most productive variable annuity wholesale distribution force in the US³.

In 2019, Jackson invested significant time and resources with fintech partners to help illustrate the benefits a lifetime income solution can provide within a comprehensive wealth management plan. This gives the financial adviser the necessary tools to customise according to the unique needs and goals of the client. Additionally, investment freedom within VA investment options allows the adviser to build a diversified portfolio that is customised to meet their clients' individual priorities and preferences, rather than locking them into restrictive allocation models. Some of the fintech platforms where Jackson is actively engaged include eMoney, MoneyGuidePro and Envestnet.

In 2019, Jackson announced distribution agreements with DPL Financial Partners (DPL), TD Ameritrade and RetireOne to provide our protected lifetime income solutions to independent registered investment advisers (RIAs). The collaboration expands Jackson's distribution footprint and provides Jackson with access to new opportunities in the independent RIA channel. In addition to these new relationships, Jackson's distribution partnership announced in late 2018 with State Farm is targeted to roll out in the first quarter of 2020. These new partnerships show Jackson's determination and progress on channel diversification.

Regulatory landscape

The regulatory outlook for the industry has improved since the passing of the Securities and Exchange Commission's (SEC) Best Interest Regulation in June 2019. This replaced proposed legislation known as the DOL Fiduciary Duty Rule. The SEC's finalised rule creates a best interest standard of conduct for broker-dealers and is designed to be 'product agnostic' meaning that it is not intended to give preference to or target any specific product. Instead, the rule enhances the diligence required when advising customers about suitable, albeit more complex, products such as variable annuities. The rule became effective 60 days after being published in the Federal Register (12 July 2019) and includes a transition period until 30 June 2020.

Despite lower interest rates, the life insurance industry saw increased total annuity sales as of the third quarter of 2019, primarily due to a clearer regulatory environment and more aggressive product feature changes (ie withdrawal percentages) implemented by competitors. Higher industry sales of fixed annuities were offset slightly by lower variable annuity sales.

Regardless of the outcome of the SEC best interest standard, the regulatory disruption caused by the now rescinded DOL Rules has challenged the industry to review the ways in which investment advice is provided to American investors. Manufacturers will need to have the ability to provide product and system adaptations in order to support the success of various distribution partners in their delivery of the retirement strategies that investors need. Because of its strong distribution, leadership in the annuities market, best-in-class service and an

efficient operation, we believe that Jackson is well positioned to take advantage of this opportunity.

In December 2019, the Setting Every Community Up for Retirement Enhancement Act (SECURE Act) was passed into law, bringing positive changes to the US retirement system. A significant change includes the portability of lifetime income products, permitting participants to preserve their lifetime income investments and avoid surrender charges and fees. Another provision of the Act clarifies the existing Employee Retirement Income Security Act safe harbour and removes ambiguity about the applicable fiduciary standard that currently acts as a roadblock to offering lifetime income benefit options under a defined contribution plan. Under this provision, for purposes of fulfilling their fiduciary duty to select an annuity provider, defined contribution plan fiduciaries may rely on representations from insurers regarding their status under state insurance laws. The enactment of these provisions, and the SECURE Act as a whole, are important steps in facilitating Americans' ability to achieve financial freedom for life.

We believe that Jackson is well positioned to manage the impact of these regulatory changes and welcome the outcomes of the revised regulations.

At 31 December 2019, Jackson early adopted the new US regulatory regime enacted by the National Association of Insurance Commissioners in respect of variable annuities. The effect of this change is further discussed in the Group Chief Financial Officer and Chief Operating Officer's report on the 2019 financial performance.

Corporate responsibility

As a provider of savings and protection products, stewardship is core to what we do. We recognise that to help our customers look to the future with confidence, we need to take a long-term view on a wide range of issues that affect our business and the communities in which we operate. To do this, we maintain a proactive dialogue with our stakeholders – customers, investors, employees, communities, regulators and governments – to ensure that we are managing these issues sustainably and delivering long-term value.

Jackson seeks to provide the best retirement solutions that we can, while striving to communicate information about those products in a fair and transparent way. In the US, Jackson continues to be a leader in shifting perspectives and simplifying the language around financial products. In 2018, Jackson led the creation of a groundbreaking, industry-wide coalition seeking to help mitigate America's looming retirement crises, the Alliance for Lifetime Income. The Alliance is a tremendous leap forward in Jackson's ongoing commitment to educating Americans about the importance of lifetime income in retirement planning.

At Jackson, we take an inclusive approach to responsible investment, seeking to integrate environmental, social and governance (ESG) considerations into our investment processes and stewardship activities through active ownership practices and engagement with investee companies. We also maintain the ability to exclude entities from our internal investment mandates, where their practices, policies or procedures conflict with our values, or where we see a need to explicitly recognise international consensus.

As a long-term investor, Jackson considers both financial and non-financial factors in our investment processes, decision-making and ownership practices that may have a meaningful impact on our customers' long-term investment outcomes. Similarly, as active asset owners of the capital we invest on behalf of our customers, we believe that due consideration of the various factors that can impact investment returns is part of our fiduciary duty to our customers.

Jackson also takes pride in helping the communities in which we operate, providing significant employment, tax revenues, charitable programmes and contributions, as well as the investment of general account assets, all of which provide valuable public services and build infrastructure for the benefit of the wider community and economy.

Investment for growth

We believe that a significant opportunity exists to reach even more American retirees and serve their needs with annuity products going forward. This is because there are trillions of dollars of adviser-distributed assets across distribution platforms that have not historically been a focus for the business, such as the dual-registered investment adviser channel, which we can seek to access. The industry will need to remain flexible and cost-effective in making changes to product systems and processes. We continue to seek to understand and make the necessary adjustments to support the needs and demands of American retirees into the future.

Jackson is making significant investments in new technologies, which allows us to provide better service that will give our customers what they want, when they want it. These new technologies will also provide higher quality data so that our executives and staff across the business can make better informed decisions with regard to risk, and with how and where to invest.

Jackson's competitive strengths are even more critical as we work towards diversification and growth, within a highly competitive insurance industry. The breadth and depth of our best-in-class distribution team, our agility and success in launching well designed customer-centric products, the continued success of our risk management and hedge programmes through many economic cycles, and our significant investment in technology platforms and award-winning customer service will provide Americans with the retirement strategies they so desperately need. Jackson's discipline helps enable us to be positioned to potentially capture additional growth during times of transition into the future.

Driving our business

Customers

Many retirees or soon-to-be retirees face a reality of under-saving, having no guaranteed income source and the prospect of living longer than any prior generation. Jackson's focus is to provide solutions to help address these concerns for the millions of Americans currently transitioning to and through retirement.

Products

Jackson's products provide access to equity market growth, protection of principal, and a way of converting retirees' savings into retirement income with a degree of certainty. With a long history of disciplined product design and prudent risk management, Jackson has earned and continues to earn trust from its key stakeholders.

Distribution

Jackson's distribution teams set us apart from our competitors. Jackson's annuity wholesaling force is the largest and one of the most productive in the industry, supporting thousands of advisers across multiple channels and distribution outlets.

Investment for growth

Jackson continues to invest in technology and innovative products to adapt efficiently and effectively to what our customers and regulatory environment require. Jackson launched an advisory version of our flagship product Perspective II, our innovative Elite Access product and our fixed index MarketProtector product to allow for penetration into untapped distribution.

Corporate responsibility

Jackson is committed to be a responsible partner with customers, employees, shareholders and the community.

Creating value and benefiting our stakeholders

and Chief Operating Officer

14%

increase in Asia adjusted operating profit¹

\$9.5bn

LCSM surplus⁶ over the Group
minimum capital requirement
(31 December 2018: \$9.7bn)

I am pleased to report that we maintained focus on the execution of our strategy alongside the successful completion of the demerger of M&G plc and that this has continued to deliver positive financial performance in 2019.

Growth has once again been led by our businesses in Asia, which reflects the benefits of our well positioned and broad-based portfolio, which has long focused on high quality, recurring premium business. In 2019, this saw our life businesses outside Hong Kong deliver overall new business profit growth of 29 per cent¹, and within this 10 markets increasing new business profit. While Hong Kong has seen a more challenging sales environment, the resilience of its business model is demonstrated by its 24 per cent¹ growth in adjusted operating profit, which contributed to the 14 per cent¹ increase in adjusted operating profit delivered by our overall Asia business.

Our US business took its first steps in the execution of its diversification strategy, broadened its presence across the US annuity market, delivered increased remittances to the Group, and early adopted the new National Association of Insurance Commissioners (NAIC) variable annuity framework. Jackson has successfully demonstrated its ability both to develop and distribute new products in order to diversify its product range. Over

time, this will contribute to a more balanced mix of policyholder liabilities which will enhance statutory capital and cash generation. During 2019, this transition has resulted in a higher investment in new business than has been seen in recent periods, with resulting impacts on capital generation and new business profit margins.

During 2019 our head office activities incurred costs of \$(460) million (2018: \$(490) million²). The demerger of M&G plc provides us with the opportunity to optimise the operating model of our Group functions across our head office. We are well advanced in developing and executing plans that will deliver total savings of circa \$180 million³, targeting a revised run-rate from 1 January 2021⁴. We have already completed the first phase of this work which will deliver annual savings⁵ of \$55 million.

Over 2019, global equity markets rallied strongly. In the US markets the S&P 500 index increased by 29 per cent over 2019, but government bond yields were generally lower over the period, with the US 10 year government bond yield ending the year at 1.9 per cent (2018: 2.7 per cent).

The impact of these market effects are most prevalent in the US's results. Jackson's hedging programme is focused on managing the economic risks in the business and protecting statutory solvency in the circumstance of large market movements. The hedging programme does not aim to hedge IFRS accounting results and this can lead to volatility in the IFRS results in periods of significant market movements, as was seen in 2019. In particular, while higher equity markets are expected to deliver ultimately increased profitability to Jackson through higher future fee income, this benefit is not fully recognised in the IFRS results in the short term. This contrasts with the impact on the derivatives within the hedging programme, designed to provide protection when markets fall, where rises in equity markets lead to short term losses in the IFRS results. These losses have been exacerbated by falling interest rates in 2019, which have led to an increase in the IFRS liabilities for the guarantees attaching to variable annuities given lower discount rates and lower assumed future separate account growth, impacting directly on the income statement. Collectively, these factors led

to an IFRS loss after tax of \$(380) million for the US over 2019. The interest rate falls have also led to gains on bonds, which are recognised outside the income statement, and US's IFRS segment shareholders' equity increased from \$7,163 million at the end of 2018 to \$8,929 million at the end of 2019. EEV has fewer mismatches (for example future fee income is fully recognised), but fluctuations in interest rates also impact Jackson's EEV results, since EEV discount rates and future expectations of separate account returns are based on current risk free rates. While our IFRS and EEV results in 2019 may therefore show a degree of volatility, we believe that the Jackson business is positioned to enhance its capital and cash generation over time as it continues to focus on the US retirement market opportunity.

We have presented the results of the UK and Europe operations (referred to as M&G plc) as discontinued operations and have adopted the US dollar as our presentational currency which better reflects the economic footprint of our business going forward. Prior year comparatives have been restated, as required under IFRS. However comparative balance sheet amounts are not restated for discontinued operations. As in previous years, growth rates referred to are on a constant exchange rate basis unless otherwise stated.

Adjusted operating profit before tax from continuing operations

Prudential's adjusted IFRS operating profit based on longer-term investment returns (adjusted operating profit) from continuing operations increased in 2019 to \$5,310 million (20 per cent higher on a constant and actual exchange rate basis). This increase was driven by higher earnings from our Asia life insurance and asset management operations, and by lower market-related DAC amortisation charges compared with the prior year in the US, as a result of the strong equity market returns achieved in 2019. Other income and expenditure generated a net cost of \$(926) million (2018: \$(967) million²). Of this, \$(179) million related to interest costs in respect of debt instruments transferred to M&G plc on 18 October 2019 prior to completion of the demerger. Excluding these amounts, interest costs for the continuing Group would have been \$(337) million, lower than 2018 following the redemption of debt in the first half of 2019.

IFRS basis non-operating items from continuing operations

Non-operating items in 2019 consist of short-term fluctuations in investment returns on shareholder-backed business of negative \$(3,203) million (2018: negative \$(791) million on an actual exchange rate basis), the net loss arising from corporate transactions undertaken in the year of negative \$(142) million (2018: negative \$(107) million on an actual exchange rate basis), and the amortisation of acquisition accounting adjustments of negative \$(43) million (2018: negative \$(61) million on an actual exchange rate basis) arising mainly from the REALIC business acquired by Jackson in 2012.

The \$(142) million cost of corporate transactions reflects gains from disposals offset by the \$(407) million incurred in the year in connection with the demerger of M&G plc from Prudential plc, in line with our previous guidance. Further information is set out in note D1.1 to the financial statements.

Negative short-term fluctuations comprised positive \$657 million (2018: negative \$(684) million on an actual exchange rate basis) for Asia, negative \$(3,757) million (2018: negative \$(134) million) in the US and negative \$(103) million (2018: positive \$27 million on an actual exchange rate basis) in other operations.

Falling interest rates in certain parts of Asia led to unrealised bond gains in the year which are accounted for within non-operating profit. In the US, rising equity markets and falling interest rates have resulted in negative effects primarily reflecting net losses on hedge instruments used to manage the market exposure of Jackson's products and by changes in the IFRS value for these features. Further discussion of Jackson's non-operating items is contained in the US section of this report.

After allowing for non-operating items, the total profit after tax from continuing items was \$1,953 million (2018: \$2,881 million²).

In addition to the effects seen above, falling interest rates resulted in unrealised gains of \$2.7 billion being recognised outside the income statement as part of other comprehensive income, partially mitigating the adverse effect of market movements on the Group's IFRS shareholders' funds.

IFRS loss after tax from discontinued operations

In the period prior to demerger, \$1,319 million IFRS profit after tax was recognised from the discontinued M&G plc business. On distribution to shareholders as a dividend in specie the net assets of the

business were remeasured to the market value of M&G plc on listing, resulting in a gain of \$188 million recognised within the loss from discontinued operations for the year. As a result of representing the historical results of M&G plc in US dollars (as opposed to sterling), a loss of \$(2,668) million was recognised at the date of demerger representing cumulative foreign exchange differences held in the currency translation reserve. This arose from the fall in the sterling/US dollar exchange rate over the period since the currency translation reserve was established in 2004. This was matched by an equal and opposite gain in other comprehensive income resulting in no overall impact on shareholders' funds. Reflecting the above, the total loss from discontinued operations after tax was \$(1,161) million. The rest of this report focuses solely on the continuing operations of the Group.

IFRS effective tax rates

In 2019, the effective tax rate on adjusted operating profit based on longer-term investment returns from continuing operations was 15 per cent. This was unchanged from 2018.

The 2019 effective tax rate on total IFRS profit was negative (2) per cent (2018: 16 per cent). The decrease in the 2019 effective tax rate reflects increased derivative losses in the US where the effective tax rate on these items is higher (at 21 per cent) than the effective tax rate on profit from Asia operations.

Total tax contribution from continuing operations

The Group continues to make significant tax contributions in the jurisdictions in which it operates, with \$2,168 million remitted to tax authorities in 2019. This increased from the equivalent amount of \$1,829 million² remitted in 2018, primarily due to the timing of when various tax payments became due.

Tax strategy

The Group publishes its tax strategy annually which, in addition to complying with the mandatory UK (Finance Act 2016) requirements, also includes a number of additional disclosures, including a breakdown of revenues, profits and taxes for all jurisdictions where more than \$5 million tax was paid. This disclosure is included as a way of demonstrating that our tax footprint (ie where we pay taxes) is consistent with our business footprint. An updated version of the tax strategy, including 2019 data, will be available on the Group's website before 31 May 2020.

Group capital position

Following the demerger of M&G plc from Prudential plc, the Hong Kong Insurance Authority (IA) is now the Group-wide supervisor for the Prudential Group. Ultimately, the Group will become subject to the Group-wide Supervision (GWS) Framework which is currently under development by the Hong Kong IA for the industry and is expected to be finalised in the second half of 2020. Until it comes into force, Prudential is applying the local capital summation method (LCSM) that has been agreed with the Hong Kong IA to determine Group regulatory capital requirements.

At 31 December 2019, the Group's LCSM surplus over the Group minimum capital requirement (GMCR) was estimated at \$9.5 billion on a shareholder basis⁶, equivalent to a solvency ratio of 309 per cent, and compares with a like-for-like position at 31 December 2018 of \$9.7 billion and ratio of 356 per cent.

The high quality and recurring nature of the Group's operating capital generation and disciplined approach to managing balance sheet risk is evident from the \$2.5 billion of in-force capital generation in the period, which supported \$0.6 billion of investment in new business (on an LCSM basis), inorganic investment in Asia along with

external dividends. The movement in LCSM surplus also includes demerger and other capital related items. More information is set out in note I(i) of the Additional unaudited financial information. The Group's LCSM position is resilient to external macro movements as demonstrated by the sensitivity disclosure contained in note I(i) of the Additional unaudited financial information, alongside further information on the basis of calculation of the LCSM measure.

The Group is no longer subject to Solvency II capital requirements nor regulated by the Bank of England.

Estimated Group LCSM capital position⁶

| | 31 December 2019 | | 31 December 2018 [†] | |
|---|------------------|--------------|-------------------------------|--------------|
| | Total | Shareholder* | Total | Shareholder* |
| Available capital (\$ billion) | 33.1 | 14.0 | 27.0 | 13.5 |
| Group minimum capital requirement (GMCR) (\$ billion) | 9.5 | 4.5 | 7.6 | 3.8 |
| LCSM surplus (over GMCR) (\$ billion) | 23.6 | 9.5 | 19.4 | 9.7 |
| LCSM ratio (over GMCR) (%) | 348% | 309% | 355% | 356% |

* The shareholder LCSM amounts exclude the available capital and minimum capital requirements of the participating business in Hong Kong, Singapore and Malaysia.

† Excludes M&G plc and includes \$3.7 billion of subordinated debt issued by Prudential plc that was transferred to M&G plc on 18 October 2019.

Financing and liquidity

Net core structural borrowings of shareholder-financed businesses⁷

| | 31 December 2019 \$m | | | 31 December 2018 \$m | | |
|---|----------------------|----------------------|-----------|----------------------|----------------------|-----------|
| | IFRS basis | Mark-to-market value | EEV basis | IFRS basis | Mark-to-market value | EEV basis |
| Subordinated debt substituted to M&G plc in 2019 | – | – | – | 3,718 | 82 | 3,800 |
| Other core structural borrowings | 5,594 | 633 | 6,227 | 6,043 | 151 | 6,194 |
| Total borrowings of shareholder-financed businesses | 5,594 | 633 | 6,227 | 9,761 | 233 | 9,994 |
| Less: holding company cash and short-term investments | (2,207) | – | (2,207) | (4,121) | – | (4,121) |
| Net core structural borrowings of shareholder-financed businesses | 3,387 | 633 | 4,020 | 5,640 | 233 | 5,873 |
| Gearing ratio* | 15% | | | 20% | | |

* Net core structural borrowings as proportion of IFRS shareholders' funds plus net debt, as set out in note II of the Additional unaudited financial information.

The total borrowings of the shareholder-financed businesses decreased by \$(4.2) billion, from \$9.8 billion to \$5.6 billion in 2019. This reflected the substitution of \$4,161 million Tier 2 subordinated notes to M&G plc as part of the demerger (including £300 million 3.875 per cent Tier 2 subordinated notes issued in July 2019), and the redemption of £400 million 11.375 per cent Tier 2 subordinated notes in May 2019. The Group had central cash resources of \$2.2 billion at 31 December 2019 (31 December 2018: \$4.1 billion),

resulting in net core structural borrowings of the shareholder-financed businesses of \$3.4 billion at end 2019 (2018: \$5.6 billion).

In addition to its net core structural borrowings of shareholder-financed businesses set out above, the Group has access to funding via the medium-term note programme, the US shelf programme (the platform for issuance of SEC registered bonds in the US market), a commercial paper programme and committed

revolving credit facilities. All of these are available for general corporate purposes.

Prudential plc has maintained a consistent presence as an issuer in the commercial paper market for the past decade and had \$520 million in issue at the year end (2018: \$601 million).

As at 31 December 2019, the Group had a total of £2.0 billion of undrawn committed facilities, expiring in 2024. Apart from small drawdowns to test the process, these facilities have never been drawn, and there were no amounts outstanding at 31 December 2019.

In addition to the Group's traditional sources of liquidity and financing, Jackson also has access to funding via the Federal Home Loan Bank of Indianapolis with advances secured against collateral posted by Jackson. Given the wide range of Jackson's product set and breadth of its customer base including retail, corporate and institutional clients, further sources of liquidity also include premiums and deposits.

Prudential plc seeks to maintain its financial strength rating which derives, in part, from the high level of financial flexibility to issue debt and equity instruments which is intended to be maintained and enhanced in the future.

Cash remittances Holding company cash flow⁷

| | Actual exchange rate | | |
|---|----------------------|--------------|------------|
| | 2019* \$m | 2018* \$m | Change % |
| From continuing operations | | | |
| Asia | 950 | 916 | 4 |
| US | 509 | 452 | 13 |
| Other UK (including Prudential Capital) | 6 | 49 | (88) |
| Total net cash remitted from continuing operations | 1,465 | 1,417 | 3 |
| From discontinued operations | | | |
| M&G plc | 684 | 842 | (19) |
| Net cash remitted by business units | 2,149 | 2,259 | (5) |
| Central outflows | (522) | (572) | |
| Dividends paid | (1,634) | (1,662) | |
| Other movements | (1,999) | 1,153 | |
| Total holding company cash flow | (2,006) | 1,178 | |
| Cash and short-term investments at beginning of year | 4,121 | 3,063 | |
| Foreign exchange movements | 92 | (120) | |
| Cash and short-term investments at end of year | 2,207 | 4,121 | |

* The holding company cash flow describes the movement in the cash and short-term investments of the centrally managed group holding companies.

Cash remitted to the Group from continuing operations in 2019 amounted to \$1,465 million, included \$950 million from Asia and \$509 million from the US. In addition, \$684 million of remittances were received pre-demergers from M&G plc (excluding the \$3,841 million pre-demergers dividend used to offset the payment due to M&G plc in return for the substitution of debt).

During 2019, the Group's holding company cash flow was managed in sterling and significant remittances were hedged and recorded on that basis. Growth rates are therefore distorted by the on-wards translation into US dollars for presentation purposes. If local currency remittances in Asia had been translated directly into US dollars⁸, then the growth rate in Asia remittances year-on-year would have been 8 per cent (compared with 4 per cent shown in the table above). The dividend paid by the US in 2019 was \$525 million (2018: \$450 million). From 1 January 2020, holding company cash flow will be managed in US dollars and no such distortions will occur.

Cash remittances were used to meet central costs of \$(522) million, pay dividends of \$(1,634) million and meet other expenditure of \$(1,999) million. Corporate expenditure includes net interest paid of \$(527) million of which \$(231) million relates to that expended on debt substituted to M&G plc. Corporate expenditure is net of receipts of \$265 million in 2019 from tax received. The level of tax receipts is expected to decline sharply in 2020, and then is not expected to recur going forward given the demerger of UK operations and the level of UK income which can be used to offset central UK expenditure.

Other expenditure of \$(1,999) million relates to amounts paid in connection with the demerger and other corporate transactions in the year, including the redemption of subordinated debt in the first half of 2019. Further information is contained in note I(iii) of the Additional unaudited financial information.

As highlighted in my report for the first half of 2019, holding company cash was expected to reduce in the second half of 2019. Cash and short-term investments totalled \$2.2 billion at the end of the year (2018: \$4.1 billion on an actual exchange rate basis), commensurate with the reduced size of the Group post-demergers. The Group will seek to manage its financial condition such that it has sufficient resources available to provide a buffer to support the retained businesses in stress scenarios and to provide liquidity to service central outflows.

| Mark-to-market value movements on Jackson assets backing surplus and required capital | – | – | 206 | (127) |
| Other | 117 | 9 | 95 | 176 |
| Net increase (decrease) in shareholders' funds | (2,491) | 206 | (8,691) | 2,935 |
| Shareholders' funds at beginning of the year | 21,968 | 21,762 | 63,402 | 60,467 |
| Shareholders' funds at end of the year | 19,477 | 21,968 | 54,711 | 63,402 |
| Shareholders' value per share^{10,11} | 749¢ | 847¢ | 2,103¢ | 2,445¢ |

Group IFRS shareholders' funds in the 12 months to 31 December 2019 decreased by 11 per cent to \$19.5 billion (31 December 2018: \$22.0 billion on an actual exchange rate basis) principally as a result of the demerger of M&G plc which reduced shareholders' funds by \$(7.4) billion. Excluding this effect, shareholders' funds increased by \$4.9 billion primarily as a result of profit after tax from continuing businesses of \$1.9 billion, profit generated by M&G plc up to the date of demerger of \$1.3 billion and unrealised gains on fixed income securities of Jackson of \$2.7 billion following a decrease in US long-term interest rates. These amounts were offset by dividends paid in the year of \$(1.6) billion.

The total return from continuing operations (including other comprehensive income) on Group's closing shareholders' funds for the year was 27 per cent¹², after excluding items arising from the demerger of \$528 million (being costs of undertaking the demerger and interest). The demerger alters the size of the Group's shareholders' equity and the nature of its operations, rendering a comparison with the prior year return on shareholders' funds value unrepresentative.

The Group's EEV basis shareholders' funds at 31 December 2019 was \$54.7 billion. This compares with \$46.1 billion at 31 December 2018 if the \$17.3 billion in respect of the UK & Europe operations is excluded. The growth over the year is primarily driven by EEV profit from continuing operations of \$4.2 billion, total inter-group dividends from M&G plc in the period before demerger of \$5.5 billion less external dividends of \$(1.6) billion. On a per share basis, the Group's embedded value at 31 December 2019 equated to 2,103 cents. More information on the Group's EEV results are included in the segmental detail that follows.

Free surplus generation from continuing operations¹³

Free surplus generation is the financial metric we use to measure the internal cash generation of our business operations and is based (with adjustments) on the capital regimes that apply locally in the various jurisdictions in which the Group operates. For life insurance operations, it represents amounts emerging from the in-force business during the year, net of amounts reinvested in writing new business. For asset management businesses, it equates to post-tax adjusted operating profit for the year.

Operating free surplus generated from continuing operations before the adjustments to reflect hedge modelling changes and restructuring costs increased to \$3.8 billion (2018: \$3.5 billion¹). This was after \$(1,158) million of investment in new business (2018: \$(946) million¹).

Asia operating free surplus generation¹⁴ increased by 13 per cent to \$1,772 million in line with business growth, higher asset management earnings and stable levels of new business investment.

US operating free surplus generation before the 2019 hedge modelling changes was \$2,028 million (2018: \$1,895 million) with the increase from in-force business, including a one-off benefit from the integration of the John Hancock business, offset by higher new business investment. As part of the implementation of the NAIC's changes to the US statutory reserve and capital framework enhancements were made to the model used to allow for hedging within US statutory reporting. As a consequence, the Group has chosen to utilise this new model within its EEV results, resulting in a \$3.2 billion reduction in Jackson's EEV at the start of the year and a subsequent fall in operating free surplus of \$(903) million from a lower expected transfer to net worth. Further information is included in the US segmental discussion and in the EEV basis results. After allowing for this effect and restructuring costs, operating free surplus generation for the Group was down 16 per cent to \$2,861 million.

Dividend

The Board has approved a 2019 second interim ordinary dividend of 25.97 cents per share, equivalent to the 19.60 pence per share previously indicated in the demerger Circular.

The Board considers dividends to be an important component of total shareholder return and adopted a progressive dividend policy for the Group following the demerger. The level of dividend growth will be determined after taking into account the Group's capital generation capacity, financial prospects and investment opportunities, as well as market conditions. The Group's 2020 dividend under the new progressive dividend policy will be determined from a 2019 US dollar base of \$958 million¹⁵ (36.84 cents per share), equivalent to the circa £750 million previously disclosed in the Circular.

This policy is expected to result, over the medium term, in future central outflows, ie dividends, debt interest costs and other central expenses (including central payments for bancassurance distribution agreements and restructuring costs) net of tax recoverables, being covered by remittances from business units.

The Board intends to maintain the Group's existing formulaic approach to first interim dividends, which are calculated as one-third of the previous year's full-year dividend.

Asia

Operational and financial highlights

Our 2019 Asia financial results reflect the benefits of our diverse and well-positioned portfolio across the Asia region, the resilience of the longer-term growth drivers in these markets, our long-held prioritisation of high quality, recurring premium life insurance business and focused execution on our key strategic priorities.

This is reflected in diversified growth, with 10 markets expanding new business profit and our Asia ex-Hong Kong businesses growing new business profit by 29 per cent. Our earnings continue to be supported by high quality drivers with a 14 per cent increase in insurance margin, underpinned by our protection propositions for customers, alongside 18 per cent growth in asset management earnings, helped by a 15 per cent increase in average funds under management.

This led to a 14 per cent increase in overall Asia adjusted operating profit with eight insurance markets delivering double-digit growth. These drivers are also reflected in the EEV operating profit of \$6,138 million (2018: \$6,052 million¹), driving a 23 per cent increase in embedded value to \$39.2 billion. At the same time, a 13 per cent increase in operating free surplus generation¹⁴ supported a higher cash remittance of \$950 million for the year.

| Total new business margin | | 68% | | 70% | | | | 70% | | |

Life insurance new business APE sales increased by 4 per cent to \$5,161 million and related **new business profit** increased by 2 per cent with eight markets achieving double-digit growth in new business profit.

Lower levels of APE sales and new business profit in Hong Kong (down 11 and 12 per cent respectively) were more than offset by higher overall APE sales and new business profit in markets outside Hong Kong (up 17 and 29 per cent respectively). Our Asia ex-Hong Kong businesses accelerated strongly, as new APE sales growth steadily increased throughout the year, with 11 per cent growth in the first quarter rising to 26 per cent growth in the fourth quarter.

We continue to favour health and protection products due to their resilience to market cycles and superior margins. Collectively, such products achieved new business profit growth of more than 20 per cent outside Hong Kong and produced 67 per cent of our overall Asia new business profit in 2019. This also contributed to our high mix of regular premiums, which comprised 93 per cent of our APE sales in 2019.

Our partnerships also made encouraging progress last year. The bancassurance channel achieved APE sales growth of 14 per cent, with particularly strong performances in our China joint venture and Vietnam and 24 per cent growth from UOB following the renewal of the strategic partnership at the beginning of the year.

In **Hong Kong**, our domestic business was resilient with new product launches and focused management actions leading to an 8 per cent increase in local APE sales. This was supported by strong take-up of our new qualified deferred annuity product which accounted for 11 per cent of our Hong Kong APE sales since its launch on 1 April 2019 as well as our VHIS plans, both of which are eligible for tax incentives that were newly introduced by the government. Our Hong Kong life insurance business serves the health and savings needs of both domestic as well as visiting mainland Chinese consumers. The social unrest drove a decline in mainland Chinese visitors in the second half of 2019 inhibiting sales to this segment which led to a 41 per cent reduction in related APE sales compared with the second half of 2018, and to a 21 per cent reduction in APE sales

over the year as a whole. Overall Hong Kong APE sales and new business profit were 11 and 12 per cent lower respectively.

In our **China JV**, APE sales were 53 per cent higher at \$590 million. This growth reflects a strong performance by both our agency and bancassurance channels with the latter reflecting the success of our strategy to drive increased branch activation. Higher volumes helped deliver an increase in new business profit by 38 per cent.

In **Indonesia**, the benefits of a recent restructuring of our agency channel and successful new product launches supported a 23 per cent increase in APE sales and this growth accelerated to 41 per cent in the second half from 4 per cent in the first half. The 39 per cent increase in new business profit reflected the benefit of increased volumes, as well as operational improvements from new product launches in the year.

The broad-based performance of our other life insurance markets led to a 9 per cent increase in related new sales, with particularly strong growth in the **Philippines** (34 per cent higher), while shifting towards higher-margin health and protection products. The 24 per cent increase in new business profit contribution from our other life markets is driven by higher new sales volumes, favourable assumption changes and modelling enhancements.

| Embedded value at 1 January | 32,008 | 28,879 | | | |
| Embedded value at 31 December | 39,235 | 32,008 | | | |
| % New business profit/closing embedded value | 9% | 11% | | | |
| % Operating profit/closing embedded value | 16% | 19% | | | |

Asia EEV operating profit increased marginally compared with the prior period to \$6,138 million (2018: \$6,052 million¹), driven by the 2 per cent increase in life new business profit, balanced by a 1 per cent reduction in the contribution from in-force life business.

The development of the in-force life result of \$2,366 million (2018: \$2,383 million¹) reflects a 4 per cent reduction in the expected return, partly offset by higher, favourable operating assumption changes and experience development. Under our active EEV assumption framework, the lower expected return is a function of lower period end interest rates leading to lower period end risk discount rates. These lower risk discount rates are applied to the opening embedded value in this analysis, and result in a lower expected return compared with the prior period, only

partly offset by a higher starting embedded value position. Operating assumption and experience developments were positive at \$824 million (2018: \$769 million¹) and are driven by favourable persistency and mortality/morbidity effects among other factors, and again reflect the high quality of our in-force life business.

The asset management segment operating profit after tax increased by 20 per cent to \$250 million (2018: \$209 million¹), which is discussed in more detail below.

Non-operating profit was \$1,962 million (2018: \$(1,232) million¹), mainly reflecting higher than assumed equity and fixed income returns in the period, partly offset by the effect of lower period end interest rates leading to a reduction in future assumed investment returns, among other factors.

Overall Asia segment embedded value increased by 23 per cent to \$39.2 billion (2018: \$32.0 billion). Of this, \$37.8 billion (2018: \$31.0 billion) relates to the value of the long-term business. The remainder represents Asia asset management and goodwill which are carried at IFRS net asset value under the EEV framework.

Asia analysis of movement in free surplus¹³

| | Actual exchange rate | | | Constant exchange rate | |
|--|----------------------|--------------|-----------|------------------------|-----------|
| | 2019 \$m | 2018 \$m | Change % | 2018 \$m | Change % |
| Operating free surplus generated from in-force life business and asset management before restructuring costs | 2,391 | 2,215 | 8 | 2,213 | 8 |
| Investment in new business | (619) | (652) | 5 | (646) | 4 |
| Operating free surplus generated before restructuring costs | 1,772 | 1,563 | 13 | 1,567 | 13 |
| Restructuring costs | (31) | (25) | (24) | (24) | (29) |
| Operating free surplus generated | 1,741 | 1,538 | 13 | 1,543 | 13 |
| Non-operating (loss) profit | 1,195 | (525) | | | |
| Net cash flows to parent company | (950) | (916) | | | |
| Foreign exchange movements on foreign operations, timing differences and other items | (357) | (847) | | | |
| Total movement in free surplus | 1,629 | (750) | | | |
| Free surplus at 1 January | 2,591 | 3,341 | | | |
| Free surplus at 31 December | 4,220 | 2,591 | | | |

Overall Asia operating free surplus generated¹⁴, after investment in new business, was \$1,772 million, an increase of 13 per cent compared with the prior period, driven by higher in-force generation and a lower level of investment in new business. The 8 per cent increase in the in-force return reflects growth in the in-force life portfolio, favourable operating experience effects and strong growth in asset management earnings, which more than offsets less favourable economic effects. The level of investment in new business reduced by 4 per cent, despite higher new sales, and reflects the net impact of assumption changes and various country and business mix effects. In turn, this growth in operating free surplus generation supported an increased net cash remittance of \$950 million for the year (2018: \$916 million). Non-operating profit of \$1,195 million mainly relates to the net effect of bond and equity gains across most Asia markets.

Local statutory capital

We maintained a resilient balance sheet with a robust shareholder LCSM surplus of \$4.7 billion and coverage ratio of 253 per cent at 31 December 2019 (31 December 2018: \$3.6 billion and 244 per cent) supported by our expertise in risk management and a conservative approach to credit risk. We seek to safeguard our business from market volatility through our strong focus on protection products and our prudent asset and liability management strategy, which continues to be well-matched by both currency and duration. This is demonstrated by the relatively low sensitivity of our new business profit and our embedded value to a wide range of capital market fluctuations.

IFRS earnings

Overall, Asia adjusted operating profit increased by 14 per cent to \$3,276 million, with life insurance earnings up 14 per cent and asset management earnings up 18 per cent. Our Asia life insurance earnings growth is broad-based and at scale, reflecting the benefits of our focus on high quality recurring premium business and well diversified business portfolio. 86 per cent¹⁶ of our total life income (excluding other income described below) arises from insurance margin and fee income, again supporting stable profit progression across market cycles.

Overall, eight insurance markets reported double-digit growth, with five delivering growth of 20 per cent or more. Six markets delivered annual adjusted operating profit of above \$200 million and three in the region of \$500 million or higher. At a market level, highlights include Hong Kong (up 24 per cent) driven by the high quality of its in-force growth, China JV (up 20 per cent), Vietnam (up 20 per cent) and the Philippines (up 26 per cent). Adjusted operating profit in Indonesia of \$540 million remains at a high level, but was 3 per cent below the prior period.

| Profit for the year after tax before restructuring costs | 3,725 | | 1,815 | | 1,799 | |

Our earnings continue to be based on high-quality drivers. The overall 14 per cent growth in Asia life insurance adjusted operating profit to \$2,993 million (2018: \$2,633 million¹) was driven principally by 14 per cent growth in insurance margin related revenues and reflects our ongoing focus on recurring premium health and protection products, and the associated continued growth of our in-force business. Renewal premiums¹⁰, reflecting the long-term nature of our insurance business, grew 12 per cent.

Fee income increased by three per cent, broadly in line with the increase in average unit-linked liabilities, while spread income rose by five per cent given changes in product and geographical mix and lower interest rates in the period.

With-profits earnings relate principally to the shareholders' share in bonuses declared to policyholders. As these bonuses are typically weighted to the end of a contract, under IFRS, with-profit earnings consequently emerge only gradually over time. The 14 per cent growth in with-profits earnings reflects the ongoing growth in these portfolios.

Other income primarily represents amounts deducted from premiums to cover acquisition costs and administration expenses. As such, the 9 per cent increase in margin on revenues largely reflects ongoing business growth and the associated continued growth in overall premiums received. Acquisition costs borne by shareholders increased by 8 per cent in relation to a 4 per cent

increase in overall APE sales. The ratio of shareholder acquisition costs to shareholder related APE sales (excluding with-profits related sales) reduced to 66 per cent (2018: 69 per cent on an actual exchange rate) as a result of changes in product mix. Administration expenses, including renewal commissions, increased by 6 per cent reflecting ongoing business growth.

| | 52% | 55% | (3) ppts |

Eastspring delivered a strong performance in 2019 reflecting positive operating momentum and the benefit of recent acquisitions. Overall funds under management of \$241.1 billion and adjusted operating profit of \$283 million, are at record levels.

The increase in external funds under management to \$124.7 billion (2018: \$77.8 billion) reflected \$8.9 billion¹⁸ (2018: \$(2.1) billion¹⁸) in positive third-party net flows, favourable market performance and \$7.5 billion from the TFUND acquisition in

December 2019. In addition, following the demerger of M&G plc, \$26.7 billion of M&G related assets have been reclassified to external from internal funds under management.

Third party net inflows were positive in both retail and institutional products and across both equity and fixed income funds, reflecting the benefit of new products and mandates. Overall funds under management were also supported by continued positive internal net flows resulting in total funds under management of \$241.1 billion at year end (2018: \$192.7 billion on an actual exchange rate basis).

An increase in average funds managed by Eastspring of 15 per cent² resulted in adjusted operating profit rising by 18 per cent (up 17 per cent on an actual exchange rate basis) to \$283 million and growth in operating income of 10 per cent². Disciplined cost management has led to an improvement in its cost-income ratio¹⁰ to 52 per cent (2018: 55 per cent on an actual exchange rate basis), with operating expenses increasing at a slower rate of 8 per cent (6 per cent on an actual exchange rate basis).

Return on segment equity

Asia return on closing IFRS shareholders' funds

| | 2019 | 2018 |
|---|------|------|
| Operating return on closing shareholders' funds (%) | 26 | 30 |
| Total comprehensive return on closing shareholders' funds (%) | 36 | 20 |

The benefit of our focus on profitable and capital efficient health and protection, with-profit and asset management businesses is evident in the attractive 26 per cent (2018: 30 per cent) return delivered on closing segment equity over 2019.

United States

Operational and financial highlights

The financial performance of the US business in the period reflects the impact of the execution of the first steps of its strategic diversification together with the varying financial effects of strong US equity market performance and lower interest rates in the period. We have decided to adopt early as at 31 December 2019 the new National Association of Insurance Commissioners (NAIC) capital rules related to variable annuities and have made consequential updates to our EEV basis results. All of the results below reflect the whole US segment, except for the discussion on local statutory capital which covers Jackson National Life only.

| | 2019 \$m | 2018 \$m | Change % |
|----------------------------|----------|----------|-----------|
| New business profit | 883 | 1,230 | (28) |
| Adjusted operating profit* | 3,070 | 2,563 | 20 |
| EEV operating profit* | 1,782 | 2,828 | (37) |
| Jackson RBC ratio (%) | 366 | 458 | (92) ppts |

* Before restructuring costs

New business performance

Life EEV new business profit and APE new business sales (APE sales)

| | 2019 \$m | 2018 \$m | Change % |
|----------------------------------|--------------|--------------|-------------|
| Variable annuities | 1,270 | 1,443 | (12) |
| Elite Access (variable annuity) | 200 | 225 | (11) |
| Fixed annuities | 119 | 46 | 159 |
| Fixed index annuities | 382 | 33 | 1,058 |
| Wholesale | 252 | 312 | (19) |
| Total APE sales | 2,223 | 2,059 | 8 |
| % APE variable annuities | 66 | 81 | (15) |
| % APE other products | 34 | 19 | 15 |
| Total new business profit | 883 | 1,230 | (28) |
| New business margin | 40% | 60% | |

Overall new US APE sales increased to \$2,223 million (2018: \$2,059 million), with the proportion of general account products (fixed annuities, fixed index annuities and wholesale business) at 34 per cent (2018: 19 per cent) of new sales reflecting our intention to diversify our product mix over time to balance the overall risk profile of Jackson better. This was supported by new product launches and additional distribution initiatives. New business profit was lower at \$883 million (2018: \$1,230 million). Of this \$(347) million reduction, \$(155) million is a result of lower interest rates and other changes in economic assumptions compared with the prior period. The remainder reflects the change in product mix and other assumption change impacts.

Movement in policyholder liabilities

| | 2019 \$m | | 2018 \$m | |
|--|------------------------------|---------------------------------------|------------------------------|---------------------------------------|
| | Separate account liabilities | General account and other liabilities | Separate account liabilities | General account and other liabilities |
| At 1 January | 163,301 | 73,079 | 176,578 | 67,905 |
| Premiums | 12,776 | 8,200 | 14,646 | 3,967 |
| Surrenders | (12,767) | (4,575) | (11,746) | (4,465) |
| Maturities/deaths | (1,564) | (1,823) | (1,449) | (1,238) |
| Net flows | (1,555) | 1,802 | 1,451 | (1,736) |
| Addition for closed block of group pay-out annuities in the US | – | – | – | 5,532 |
| Transfers from general to separate account | 951 | (951) | 708 | (708) |
| Investment-related items and other movements | 32,373 | 549 | (15,436) | 2,086 |
| At 31 December | 195,070 | 74,479 | 163,301 | 73,079 |

Overall US net flows were \$0.2 billion over the year (2018: \$(0.3) billion). Separate account net flows were negative at \$(1.6) billion (2018: positive \$1.5 billion), reflecting lower new sales of variable annuities in the period and expected higher levels of surrenders as the in-force book develops. Investment related movements reflect favourable investment performance driven by strong capital market returns. General account net flows were \$1.8 billion (2018: \$(1.7) billion), driven by higher new sales in the period. Total year-end policyholder liabilities were \$269.5 billion (2018: \$236.4 billion), with separate account liabilities at \$195.1 billion and general account and other liabilities at \$74.5 billion.

IFRS earnings

Profit margin analysis of US long-term insurance and asset management operations¹⁷

| | 2019 | | 2018 | |
|--|--------------|---------------|--------------|---------------|
| | \$m | Margin bps | \$m | Margin bps |
| Spread income | 642 | 112 | 778 | 155 |
| Fee income | 3,292 | 182 | 3,265 | 183 |
| Insurance margin | 1,317 | | 1,267 | |
| Other income | 26 | | 14 | |
| Total life income | 5,277 | | 5,324 | |
| Expenses: | | | | |
| Acquisition costs | (1,074) | (48)% | (1,013) | (49)% |
| Administration expenses | (1,675) | (68) | (1,607) | (69) |
| DAC adjustments | 510 | | (152) | |
| Long-term insurance business pre-tax adjusted operating profit | 3,038 | | 2,552 | |
| Asset management | 32 | | 11 | |
| Adjusted operating profit from long-term business and asset management before restructuring costs | 3,070 | | 2,563 | |
| Tax charge | (437) | | (402) | |
| Adjusted operating profit after tax for the year before restructuring costs | 2,633 | | 2,161 | |
| Non-operating profit after tax | (3,013) | | (179) | |
| (Loss) profit for the year after tax before restructuring costs | (380) | | 1,982 | |

Adjusted operating profit

US long-term adjusted operating profit was \$3,038 million (2018: \$2,552 million), and reflects the benefit of favourable market-related DAC adjustments in the period compared with unfavourable DAC adjustments in the prior period.

Fee income was marginally higher compared with the prior period, with the benefit of a 2 per cent increase in average separate account balances largely offset by a modest decline in the average fee margin¹⁷.

Spread income declined to \$642 million (2018: \$778 million) reflecting the combination of lower core spread income and lower income derived from swaps held for duration management purposes. The development of the core spread income was driven by the effect of lower invested asset yields and the full consolidation of the assets acquired with the John Hancock transaction towards the end of 2018, resulting in a reduction in the spread margin to 112 basis points (2018: 155 basis points).

Insurance margin primarily represents income from variable annuity guarantees and profits from legacy life businesses. This increased by 4 per cent to \$1,317 million (2018: \$1,267 million) mainly as a result of higher income from variable annuity guarantees.

Acquisition costs increased by 6 per cent, broadly in line with the 8 per cent increase

in new APE sales. Administrative expenses increased from \$(1,607) million in 2018 to \$(1,675) million in 2019, primarily as a result of higher asset-based commissions. Excluding these asset-based commissions, the resulting administration expense ratio would be 33 basis points (2018: 34 basis points).

DAC adjustments, being the cost deferred on sales in the period net of amortisation of amounts deferred previously, of \$510 million (2018: \$(152) million) were favourable compared with the prior period, in part due to higher sales in the period. Over 2019, strong capital market returns resulted in a separate account investment performance materially in excess of that assumed within the DAC mean reversion formula which led to a favourable DAC deceleration effect of \$280 million (2018: unfavourable DAC acceleration effect of \$(259) million).

Non-operating items

The non-operating result was negative \$(3,795) million pre-tax (2018: negative \$(241) million pre-tax) and contributed to a net loss after tax of \$(380) million (2018: net income \$1,982 million).

In the US, Jackson provides certain guarantees on its annuity products, the value of which would typically rise when equity markets fall and long-term interest rates decline. Jackson charges fees for these guarantees which are in turn used to

purchase downside protection, in particular options and futures to mitigate the effect of equity market falls. Under IFRS, accounting for the movement in the valuation of these derivatives, which are all fair valued, is asymmetrical to the movement in guarantee liabilities, which are not fair valued in all cases. Jackson designs its hedge programme to protect the economics of the business from large movements in investment markets and accepts the variability in accounting results. Non-operating losses of \$(3,795) million in the year mainly reflect the effect of lower interest rates on guarantee liabilities and the impact of higher equity markets on both guarantee liabilities and associated derivatives given that the S&P 500 index ended the year 28.9 per cent higher than at the start of the year. While the resulting negative mark-to-market movements on these hedging instruments are recorded in the current year, the related increases in fee income that arise from the higher asset values managed, will be recognised and reported in future years.

In addition to the effects seen above, falling interest rates resulted in gains of \$2.7 billion being recognised outside the income statement on bonds held by Jackson's general account. In total, Jackson's segment shareholders' funds increased to \$8,929 million (2018: \$7,163 million).

EEV basis results

| | 2019 \$m | 2018 \$m | Change % |
|---|----------------|---------------|--------------|
| New business profit | 883 | 1,230 | (28) |
| Business in force | 874 | 1,594 | (45) |
| Operating profit from long-term business | 1,757 | 2,824 | (38) |
| Asset management | 25 | 4 | 525 |
| Operating profit from long-term business and asset management before restructuring costs | 1,782 | 2,828 | (37) |
| Restructuring costs | (5) | (23) | 78 |
| Non-operating loss | (3,802) | (1,695) | (124) |
| Profit for the year | (2,025) | 1,110 | (282) |
| Other movements (including dividends) | (342) | (654) | |
| Net increase (decrease) in embedded value | (2,367) | 456 | |
| Embedded value at 1 January | 18,709 | 18,253 | |
| Embedded value at 31 December | 16,342 | 18,709 | |
| % New business profit / closing embedded value | 5% | 7% | |
| % Operating profit / closing embedded value | 11% | 15% | |

EEV operating profit from the long-term business reduced to \$1,757 million (2018: \$2,824 million) reflecting lower new business profit in the period and a reduction in the level of expected return on business in force.

During 2019, following the implementation of the NAIC's changes to the US statutory reserve and capital framework, enhancements were made to the model used to allow for hedging within US statutory reporting. As a consequence, the Group has chosen to utilise the model for its EEV reporting to update its allowance for the long-term cost of hedging, resulting in a \$(3,233) million reduction in Jackson's EEV at the start of the year.

The reduction in expected return from business in force reflects lower period end interest rates which reduce the expected unwind, and a lower starting balance of EEV shareholders' funds compared with the prior period.

This is a function of weak equity markets in the fourth quarter of 2018, and the adoption of a new hedge model as discussed above.

The EEV non-operating loss of \$(3,802) million mainly includes negative \$(3,233) million from the adoption of the new hedging model (as discussed above), and negative \$(1,201) million from economic effects, offset by positive \$876 million from favourable investment movements.

The investment return variances are driven by the benefit of strong capital market performance in the period leading to separate account returns materially in excess of those assumed, more than offsetting hedging losses on instruments held for risk management purposes.

Economic assumption changes of \$(1,201) million largely reflect the impact of lower interest rates in the period on the projected future fund growth rates for the variable annuity business. These projected lower growth rates reduce the expected growth in fund values for policyholders and hence the expected profitability for shareholders.

Overall segment embedded value ended the year at \$16.3 billion (2018: \$18.7 billion).

US analysis of movement in free surplus¹³

| | 2019 \$m | 2018 \$m | Change % |
|---|--------------|--------------|-------------|
| Operating free surplus generated from in-force life business and asset management before restructuring costs and EEV hedge modelling enhancements | 2,567 | 2,195 | 17 |
| Investment in new business | (539) | (300) | (80) |
| Operating free surplus generated before restructuring costs and EEV hedge modelling enhancements | 2,028 | 1,895 | 7 |
| Restructuring costs | (5) | (23) | 78 |
| Operating free surplus generated before EEV hedge modelling enhancements | 2,023 | 1,872 | 8 |
| Impact of 2019 EEV hedge modelling enhancements | (903) | - | - |
| Operating free surplus generated | 1,120 | 1,872 | (40) |
| Non-operating (loss) profit | (1,763) | (1,124) | |
| Net flows paid to parent company | (525) | (452) | |
| Timing differences and other items | 185 | (144) | |
| Total movement in free surplus | (983) | 152 | |
| Free surplus at 1 January | 2,760 | 2,608 | |
| Free surplus at 31 December | 1,777 | 2,760 | |

The US in-force business generated \$2,567 million (2018: \$2,195 million) prior to allowing for the change to the allowance for hedging costs discussed above. This included a \$355 million benefit following the integration of the John Hancock business acquired in 2018. Offsetting this increase was a higher investment in new business (up 80 per cent to \$(539) million). The increase in investment in new business to \$(539) million (2018: \$(300) million) is a function of a higher weight of general account new sales in the period.

Operating free surplus generated¹⁴ after allowing for the impact of changes to hedge modelling was \$1,120 million.

Non-operating assumptions and variances related to free surplus development were \$(1,763) million (2018: \$(1,124) million) and

reflect higher losses on hedge instruments compared with those assumed under the new basis. Circa \$395 million of these hedge losses were incurred in managing the risk profile of the business as Jackson transitioned from the previous US statutory and reserving framework to the new framework following updates made by the NAIC which is further discussed below.

Local statutory capital – Jackson National Life (Jackson)

Jackson applies the US statutory reserve and capital framework required by the NAIC and adopted the NAIC's changes to this framework for variable annuities with effect from 31 December 2019. This new capital methodology incorporates a unified approach to reserving and required capital determination. In addition, with effect from

1 October 2019, Jackson chose not to renew its long-standing permitted practice to exclude unrealised gains on certain derivative instruments taken out to protect Jackson against declines in long-term interest rates.

After adopting this new regime, the surplus of available capital over required capital (set at 100 per cent of the Company Action Level) was \$3,795 million. This equated to a risk-based capital ratio of 366 per cent (2018: 458 per cent using the previous NAIC framework). An analysis of the estimated movement in Jackson's risk-based capital position over 2019 is set out below. Jackson continues to remain within its existing risk appetite and expects the new capital regime to result in a more stable RBC ratio than under the previous regime, in low interest rate scenarios.

| | Total available capital \$m | Required capital \$m | Surplus \$m | Ratio % |
|---|-----------------------------|----------------------|--------------|------------|
| 1 January 2019 | 5,519 | 1,204 | 4,315 | 458 |
| Capital generation from new business written during 2019 | 119 | 263 | (144) | (75) |
| Operating capital generation from business in force at 1 January 2019* | 1,406 | (125) | 1,531 | 141 |
| Operating capital generation | 1,525 | 138 | 1,387 | 66 |
| Adoption of NAIC reforms (see above) | 279 | 137 | 142 | (17) |
| Other non-operating movements, including market effects and removal of the permitted practice | (1,577) | (53) | (1,524) | (104) |
| Dividends paid | (525) | - | (525) | (37) |
| 31 December 2019 | 5,221 | 1,426 | 3,795 | 366 |

* Includes operating experience variances and the impact of John Hancock

Over the period, statutory operating capital generation of \$1.4 billion increased the RBC ratio by 66 percentage points, comprising 118 percentage points (\$1.2 billion) from in-force capital generation, reduced by 75 percentage points (\$0.1 billion) for the capital strain of writing new business, and 23 percentage points (\$0.3 billion) of one-off benefits related to the recent John Hancock acquisition. In line with the product diversification strategy previously outlined and Jackson's accelerated sales growth of fixed index and new fixed annuity products, the capital strain from selling non-VA products was 64 percentage points of the total 75 percentage points of new business strain.

Non-operating and other capital movements reduced the RBC ratio by 121 percentage points (\$1.4 billion) due to:

- adoption of the new capital regime at 31 December 2019, resulting in a one-off reduction in the RBC ratio of 17 percentage points;
- one-off hedge losses in respect of managing through the changeover to the new regime representing a 28 percentage point fall in the RBC ratio;
- an increase in deferred tax assets not admitted as statutory capital, which reduced the RBC ratio by 26 percentage points, bringing the total non-admitted DTA to \$0.9 billion at 31 December 2019. \$0.5 billion of this non-admitted DTA balance relates to hedge losses incurred in 2019 which are required to be spread over three years for tax purposes and so is expected to be carried forward to be deducted from Jackson's taxable income in the next two years; and

— other non-operating items that reduced the RBC ratio by 50 percentage points, primarily representing variable annuity net hedge losses in the period given asymmetries between the statutory accounting basis and the economics hedged by Jackson.

During 2019 Jackson remitted \$(525) million to Prudential, representing around half of Jackson's operating capital generation in the period (excluding John Hancock effects), which reduced the RBC ratio by 37 percentage points. As previously announced, from 2020 Jackson's remittances are expected to be more evenly spread over the calendar year than in prior periods.

In respect of the previously noted ongoing NAIC review of the C-1 bond factors in the required capital calculation, the expected implementation has been delayed to 2021 or thereafter. After adoption of the new capital regime, the estimated reduction in RBC ratio under the current proposal is circa 10 to 20 points.

Return on segment equity US return on closing IFRS shareholders' funds.

| | 2019 | 2018 |
|---|------|------|
| Operating return on closing shareholders' funds (%) | 29 | 30 |
| Total comprehensive return on closing shareholders' funds (%) | 26 | 7 |

The US operating return on segment equity was 29 per cent (2018: 30 per cent). The total comprehensive return on segment equity, including non-operating and other comprehensive income movements, described above, was 26 per cent (2018: 7 per cent).

Notes

- 1 On a constant exchange rate basis.
- 2 On an actual exchange rate basis.
- 3 As compared with 2018 and before a planned \$10 million increase in Africa costs as business grows.
- 4 Approximately half of the corporate expenditure is incurred in sterling and our assumptions forecast an exchange rate of £1=\$1.2599.
- 5 From 1 January 2021.
- 6 Surplus over Group minimum capital requirement and estimated before allowing for second interim ordinary dividend. Shareholder business excludes the available capital and minimum requirement of participating business in Hong Kong, Singapore and Malaysia. Further information on the basis of calculation of the LCSM measure is contained in note I(i) of the Additional unaudited financial information.
- 7 Net cash remitted by business units are included in the holding company cash flow, which is disclosed in detail in note I(iii) of the Additional unaudited financial information. This comprises dividends and other transfers from business units that are reflective of emerging earnings and capital generation.
- 8 Using the relevant month-end spot rate.
- 9 Excluding profit for the year attributable to non-controlling interests.
- 10 See note II of the Additional unaudited financial information for definition and reconciliation to IFRS balances.
- 11 For EEV shareholders' value per share, see note II(x) of the Additional unaudited financial information.

- 12 See note I(iii) of the Additional unaudited financial information for the basis of calculation.
- 13 For insurance operations, operating free surplus generated represents amounts maturing from the in-force business during the period less investment in new business and excludes non-operating items. For asset management businesses, it equates to post-tax operating profit for the period. Restructuring costs are presented separately from the operating business unit amount. Further information is set out in note 11 of the EEV basis results.
- 14 Operating free surplus generated before restructuring costs.
- 15 The pro forma dividend for 2019 of the \$958 million represents the first interim ordinary dividend paid of \$528 million (£428 million based on spot exchange rate at the payment date) plus the second interim ordinary dividend of \$675 million (£510 million based on spot rate at 31 December 2019) less the contribution of remittances from the discontinued M&G plc business to the second interim ordinary dividend of \$245 million (£185 million based on spot exchange rates at 31 December 2019).
- 16 Total insurance margin (\$2,244 million) and fee income (\$286 million) of \$2,530 million divided by total life income excluding other income of \$2,958 million (Comprised of total life income of \$6,187 million less other income of \$3,229 million).
- 17 For discussion on the basis of preparation of the sources of earnings in the table see note I(iv) of the Additional unaudited financial information.
- 18 Excludes Money Market Funds.

Enabling business growth and change through risk management

James Turner
Group Chief Risk and Compliance Officer

Our Group Risk Framework and risk appetite have allowed us to control our risk exposure successfully throughout the year. Our governance, processes and controls enable us to deal with uncertainty effectively, which is critical to the achievement of our strategy of helping our customers achieve their long-term financial goals.

This section explains the main risks inherent in our business and how we manage those risks, with the aim of ensuring an appropriate risk profile is maintained.

1 Introduction Group structure

On 21 October 2019, just 18 months after announcing its intention to do so, the Group completed the demerger of M&G plc, marking the successful and controlled delivery of a complex and historic change to the business, in which the Risk function played a central role. An unsettled macroeconomic and geopolitical environment added to the challenges in completing a strategic initiative of this magnitude and to the key objective of delivering two distinct and strongly capitalised groups. Strong stewardship was provided by the Risk function through risk opinions, guidance and assurance on critical activity, as well as assessments and ongoing monitoring of external risks. At the same time, the function retained its focus on managing the risks of the ongoing business performing its defined role in providing risk management support and oversight, as well as objective challenge to ensure the Group remained within its risk appetite.

The Group welcomes the Hong Kong Insurance Authority (IA) as its new Group-wide supervisor and is transitioning to a new supervisory framework. A mature and well-embedded risk framework will enable the repositioned business to capture the opportunities in the growth markets in which it is now focused while operating with discipline.

The world economy

Economic growth worldwide slowed in 2019 driven by a contraction in global manufacturing, in particular in the Eurozone, UK and some Asian economies. Various factors contributed to this slowdown, including geopolitical tensions (in particular those around trade), steps taken in China to deleverage its financial system, and tightened financial conditions in the US during the first half of the year. Faced with the prospect of slowing economic growth and continued subdued inflation, the major central banks across North America, Europe and Asia implemented significant changes in monetary policy, deploying both conventional and non-conventional accommodation. The US Federal Reserve cut its benchmark federal funds rate by 75 basis points over 2019, while the ECB delivered a 10 basis point interest rate cut and announced a resumption of its quantitative easing programme in September. At the start of 2020, the prospects for global growth initially appeared to have improved with the signing of the 'Phase One' initial trade agreement by the US and China in January and signs that macroeconomic data was stabilising throughout the Eurozone and parts of Asia. Since then however, it is becoming increasingly evident that the coronavirus outbreak has impacted economic activity in Hong Kong and China with spill over to the rest of the global economy. This has prompted the world's major central banks to commit to measures to manage the potential economic effects and in early March 2020 the US Federal Reserve cut its benchmark federal funds rate by 50 basis points. This demonstrates the fragility of any improvement in the growth outlook, with geopolitical risks representing another source of potential disruption, including a resurfacing in trade tensions, a resumption of the protests in Hong Kong and, looking forward, political uncertainty that may arise from the US

presidential election towards the end of 2020.

Financial markets

After a volatile 2018, which was marked by sharp falls in equity markets in the final quarter, 2019 saw a significant rebound with all major risk assets, particularly global equities, providing strong returns over the course of the year. Government bonds also saw good returns as yields declined significantly, with the US 10-year government bond yield falling by circa 80 basis points over the year. Corporate bonds performed similarly well, with credit spreads tightening and mirroring the strong equity returns observed. The year was largely characterised by relatively defensive investor sentiment and a preference for higher credit quality within asset classes. This positive performance was facilitated by the accommodative environment driven by the shift in monetary policy by major central banks, but came amid a deterioration in macroeconomic indicators, an increase in perceived US recession risk and the trade negotiations between the US and China which ebbed and flowed, all of which negatively impacted global risk sentiment. Political headlines and the monetary policy shift by central banks were the primary drivers of currency market movements during 2019, with the US-China trade negotiations and developments surrounding the UK's departure from the EU impacting the US dollar (in particular the USD-RMB rate) and UK pound respectively. Funding markets came under significant pressure in September when a sudden spike in repo rates was observed, prompting the US Federal Reserve to intervene and inject significant funding through a combination of permanent and temporary open market operations. Global financial markets remain highly susceptible to reversals in risk sentiment, as demonstrated in Q1 2020 with the coronavirus outbreak, which has increased market downside risks significantly.

(Geo)political landscape

The geopolitical landscape over 2019 continued to reflect a world in an unsettled state of transition. Some nations continue to face the challenge of reconciling the inter-connectedness of the global economy with heightened nationalistic sentiment. This has played out in

international trade disputes, notably between the US and China during 2019. Increasing polarisation has become a driver of geopolitical risk, both between nations and within them. Populations appear to be increasingly active in voicing and acting collectively on their discontent. 2019 has been described as 'the year of the street protestor' with mass demonstrations having taken place across the world, including in Spain, France, Hong Kong, India and the Middle East over the course of the year and continuing into 2020. A weakening of civil order and domestic disruption are potential consequences, and this is testing the resilience of businesses and governments. As a global organisation, the Group has developed plans to mitigate

business risks arising against this backdrop and engages with national bodies where it can in order to ensure its policyholders, employees and other key stakeholders are not adversely impacted.

Regulations

Prudential operates in highly regulated markets, and the nature and focus of regulation and laws remains fluid. A number of national and international regulatory developments are in progress, with a continuing focus on solvency and capital standards, conduct of business, systemic risks and macroprudential policy. Some of these changes will have a significant impact on the way that the Group operates, conducts business

and manages its risks. These regulatory developments will continue to be monitored at a national and global level and form part of Prudential's engagement with government policy teams and regulators. In addition to the evolving regulatory landscape, and following the completion of the demerger in October, Prudential's Group-wide supervisor changed, with the Hong Kong IA assuming the role in October 2019. Constructive engagement continues on the Group-wide Supervision Framework (GWS) that will apply to the Group, which is expected to be finalised in 2020.

Societal developments

Increasingly, a strong sense of purpose for an enterprise is being seen as a driver of

2 Key internal, regulatory, economic and (geo)political events over the past 12 months

Q1 2019

- On 25 March, the Hong Kong IA and Prudential plc sign the Regulatory Letter specifying the supervisory framework immediately following the demerger of M&G plc. The Group has since agreed with the supervisor to apply the local capital summation method (LCSM) to determine Group regulatory capital requirements. The Hong Kong IA's Group-wide Supervision Framework is expected to be finalised in H2 2020.
- In Indonesia, the Otoritas Jasa Keuangan (OJK) approves 'grandfathering' of Prudential's existing 94.6 per cent shareholding in PT. Prudential Life Assurance, our Indonesian subsidiary, with future capital injections not permitted to increase the percentage of foreign ownership.
- In March, the Group announces further expansion in West Africa via the acquisition of a majority stake in Group Beneficial, a leading life insurer operating in Cameroon, Côte d'Ivoire and Togo. The acquisition completes in Q3.
- Over Q1, signs continue of a moderation in US growth and a sharper slowdown in the rest of the world, with Europe's growth expectations dropping progressively throughout the quarter. China reports its lowest quarterly GDP growth rate in 30 years of 6.2 per cent. Central bank rhetoric starts to turn dovish, and this is one of the factors driving the S&P 500 to its best quarter since Q2 2009 (rising by 13.6 per cent), along with returning positive risk sentiment. Meanwhile, yields fall sharply in response to the softening economic outlook and dovish turn by central banks.
- On 29 March, EIOPA releases a discussion paper on systemic risk and macroprudential policy in insurance, setting out its thinking on how this area should be addressed in the 2020 Solvency II review. The paper suggests a range of potential macroprudential tools and measures.
- In February, in a summit in Hanoi, the US and North Korea fail to reach an agreement on nuclear disarmament and a lifting of US-led international sanctions. Donald Trump becomes the first sitting US president to enter North Korea in June as the two countries agree to resume talks, although these stall in Q4.

Q2 2019

- Prudential's Pulse app launches in April in Malaysia, providing affordable digital health and wellness services to consumers. In June, Prudential announces a strategic partnership with OVO to offer customers wellness, health and wealth products and services in Indonesia.
- The Hong Kong IA issues its Guidelines on Enterprise Risk Management in July, setting out objectives and requirements on ERM and the Own Risk Solvency Assessment under Pillar 2 of its proposed RBC regime for solo entities.
- In April, the PRA issues Supervisory Statement (SS 3/19) on 'enhancing banks and insurers' approaches to managing the financial risks from climate change' which outlines the regulatory expectations for financial services firms to assess impacts from climate change.
- Suspension of the Woodford Equity Income Fund in June raises questions over the ability of the fund management industry to meet redemption requests, in particular for those funds heavily invested in illiquid assets.
- Several key elections are held across Asia in the first and second quarters. Legislative elections take place in Thailand in March, with the outcome marking the country's return to civilian rule; in April the incumbent President Widodo wins the presidential election in Indonesia; and in May the legislative elections in India see a victory for Prime Minister Narendra Modi. The election results align broadly to consensus polls.
- From June onwards and continuing over 2019, large-scale demonstrations take place in Hong Kong, sparked by an extradition bill proposed by the Hong Kong government.
- Geopolitical tensions rise in the Middle East as Iran announces a step-up in its production of enriched uranium. This follows the US' withdrawal from the 2015 nuclear deal and its subsequent imposition of economic sanctions. Tensions ultimately spike at the start of 2020 when the US assassinates Iranian military leader Qassam Soleimani.

long-term profitability, and this is making companies evaluate their place in, and contribution to, society. The 'why and how' a business acts has become arguably at least as important as what it produces or the services that it provides. Similarly, understanding and managing the environmental, social and governance (ESG) implications of the Group's business is fundamental to Prudential's brand, reputation and ultimately long-term success. Ensuring high levels of transparency and responsiveness to stakeholders is a key aspect of this. Key social issues with implications for the Group include risks arising from demographic changes as well as those arising from privacy and data security requirements and expectations.

Recent changes in demographic, geographical and environmental factors have driven public health trends, such as obesity, and changed the nature, likelihood and impact of extreme events such as pandemics, with a consequential impact on Prudential's underwriting assumptions and product design. Given the unique set of variables associated with extreme events, past experience is not an indication of the likely impact or ability to deal with future occurrences. The coronavirus outbreak demonstrates the unpredictable nature of such events and the impact on the functioning of society, with consequential disruption to business operations, staff, customers and sales. The Group is actively managing this impact

including assisting affected policyholders and staff in meeting their needs.

In support of increased social inclusion and to meet evolving customer needs, the Group is increasing its use of digital services, technologies and distribution methods for the products and services that it offers. This amplifies the risks to Prudential associated with regulations and expectations in relation to privacy and data security. These changes to the Group's use of technology and distribution models have broad implications, touching on Prudential's conduct of business, increasing the risks of technology and data being compromised or misused and potentially leading to new and unforeseen regulatory issues.

Q3 2019

- Central bank monetary policy becomes increasingly accommodative, contributing to a reversal in the weakness in risk assets. In August, following a record high in July, the S&P 500 corrects amid recession fears and trade tensions. The index continues to struggle in September but rebounds strongly over Q4.
- Government bond yields decline significantly, with the 10-year US Treasury yield falling by circa 50 basis points to 1.5 per cent over August (representing a circa 120 basis points drop over the year), its lowest rate since 2017. In Japan and Europe, the volume of negative-yielding debt surges significantly.

- Following the launch of ICS field-testing for 2019 in April, the Group submits its results to the IAIS on 31 July 2019. This is the last field-testing exercise prior to the finalisation of the ICS 2.0 specifications and the start of a five-year monitoring period in 2020.
- In September, US President Donald Trump and Chinese President Xi Jinping agree to resume trade talks following earlier breakdowns in negotiations in May and August. Talks continue positively into Q4 culminating in the signing of a 'Phase One' trade deal between the two countries in January 2020.

Q4 2019

- On 21 October 2019, M&G plc's shares begin trading on the London Stock Exchange, marking the successful completion of its demerger from the Prudential Group. The Hong Kong IA formally assumes its role as Group-wide supervisor for Prudential plc.
- Eastspring successfully completes the acquisition of 50.1 per cent of Thanachart Fund, which manages \$7.5 billion of mutual funds in Thailand, for circa \$142 million, with an option to increase its ownership to 100 per cent in future. The acquisition makes Eastspring the fourth-largest asset manager in Thailand.
- The broader economic cycle continues to deteriorate. US domestic data begins to show economic weakness in November. Despite this, equity markets reach new all-time highs over the quarter, supported by continued application of accommodative monetary policy by central banks.
- In September, the ECB delivers a package of easing measures, including a renewal of quantitative easing. Following this, the US Federal Reserve lowers its benchmark federal funds target rate for the third time in four months in October. Central banks in China and other emerging markets turn more dovish amid continued weakness in economic data.
- The 26th Annual Conference of the IAIS takes place in Abu Dhabi on 14 and 15 November, and it is agreed that the ICS project will move from Field

Testing into the Monitoring Period phase and ICS v2.0 is released. The Holistic Framework (HF) for systemic risk is endorsed by the FSB at the conference for implementation by the IAIS in 2020. The FSB also confirms that G-SII designations will be suspended until its review in 2022, although a number of the previous G-SII requirements are included either into the Insurance Core Principles or the ComFrame.

- Following the East Asia Summit in Bangkok in November, 15 of the 16 negotiating participants agree to sign up to the Regional Comprehensive Economic Partnership (RCEP), most likely in Q1 2020, with India deciding not to participate.
- Hong Kong enters technical recession in Q3, with its economy shrinking by 2.9 per cent overall over 2019, as the protests, which peak in violence during November, impact the territory's economy. On 27 November, the US president signs the Hong Kong Human Rights and Democracy Act into law, requiring annual reviews of Hong Kong's special trade status under US law, as well as sanctions against any official deemed responsible for human rights abuses or for undermining the city's autonomy.
- The National Association of Insurance Commissioners (NAIC) implements changes to the US statutory reserve and capital framework for variable annuities, effective from 1 January 2020. Jackson chooses to early adopt the changes at 31 December 2019 for US statutory reporting.

Q1 2020

- In December, cases of what appear to be viral pneumonia are reported in Wuhan, China. In January 2020, the virus is identified as a novel coronavirus (the resulting disease has since been named COVID-19) and over Q1 2020 thousands of cases are reported with the virus proceeding to spread to countries across Asia and the world.

Prudential Corporation Asia rolls out Asia-wide initiatives and a campaign to support customers and staff.

- Following its launch, downloads of Pulse by Prudential exceed one million in February 2020. The digital health platform is now one of the most popular health and wellness apps offered by an insurer in the region.

3 Managing the risks in implementing our strategy

This section provides an overview of the Group's strategy, the significant risks arising from the delivery of this strategy and current risk management focus. The risks outlined below, which are not exhaustive, are discussed in more detail in sections 5 and 6.

| Our strategy | Significant risks arising from the delivery of the strategy | Risk management focus |
|--|---|--|
| <p>Group-wide Our strategy is to capture the long-term structural opportunities for our markets and geographies, while operating with discipline and seeking to enhance our capabilities through innovation to deliver high-quality resilient outcomes for our customers.</p> | <p>Transformation risks around key change programmes, including those related to the Group's digital strategy</p> <hr/> <p>Group-wide regulatory risks</p> <hr/> <p>Information security and data privacy risks</p> <hr/> <p>Business disruption and third-party risks</p> <hr/> <p>Conduct risk</p> | <p>Continuing the focus on, and ensuring consistency in transformation risk management across the Group's business units. Provision of independent risk assurance, challenge and advice on first line programme risk identification and assessments.</p> <hr/> <p>Engagement with national governments, regulators and industry groups on macroprudential and systemic risk-related regulatory initiatives, international capital standards, and other initiatives with Group-wide impacts. Engagement with the Hong Kong IA on, and implementation of, the Group-wide Supervision Framework, which is expected to be finalised in H2 2020.</p> <hr/> <p>Continuing the implementation of the Group-wide organisational structure and governance model for cyber security management. Focus on compliance with applicable privacy laws across the Group and the appropriate use of customer data.</p> <hr/> <p>Continued application of the Group's global business continuity management, with an enhanced focus on operational resilience as it relates to customer outcomes. Applying the distinct oversight and risk management required over the Group's third parties, including its strategic partnerships for product distribution, non-traditional services and processing activities.</p> <hr/> <p>Continuing the enhancement of the Group-wide customer conduct risk management framework building on the Group's existing customer commitments policy.</p> |
| <p>Asia Serving the protection and investment needs of the growing middle class in Asia.</p> | <p>Financial risks</p> <hr/> <p>Persistency risk</p> <hr/> <p>Morbidity risk</p> | <p>Maintaining, and enhancing where necessary, risk limits and implementing business initiatives to manage financial risks, including asset allocation, bonus revisions, product repricing and reinsurance where required.</p> <hr/> <p>Implementation of business initiatives to manage persistency risk, including additional payment methods, enhancing customer experience, revisions to product design and incentive structures. Ongoing experience monitoring.</p> <hr/> <p>Implementation of business initiatives to manage morbidity risk, including product repricing where required. Ongoing experience monitoring.</p> |
| <p>United States Providing asset accumulation and retirement income products to US retirees.</p> | <p>Financial risks</p> <hr/> <p>Policyholder behaviour risk</p> | <p>Maintaining, and enhancing where necessary, risk limits, hedging strategies, modelling tools and risk oversight appropriate to Jackson's product mix.</p> <hr/> <p>Continued monitoring of policyholder behaviour experience and review of assumptions.</p> |
| <p>Africa Offering products to new customers in Africa, one of the fastest-growing regions in the world.</p> | <p>The Group continues to increase its focus on Prudential Africa's most significant risks, being those related to physical and information security and financial crime, as its presence there expands and grows in materiality.</p> | |

4 Risk governance
a System of governance

Appropriately managed risks allow Prudential to take business opportunities and enable the growth of its business. Effective risk management is therefore fundamental in the execution of the Group's business strategy. Prudential's approach to risk management must be both well embedded and rigorous, closely aligned to the Group's key stakeholders and operate across the entire group. As the economic and political environment in which we operate changes, it should also be sufficiently broad and dynamic to respond to these changes.

Prudential has in place a system of governance that promotes and embeds a clear ownership of risk, processes that link risk management to business objectives and a proactive Board and senior management providing oversight of risks. Mechanisms and methodologies to review, discuss and communicate risks are in place together with risk policies and standards to ensure risks are identified, measured, managed, monitored and reported.

How 'risk' is defined

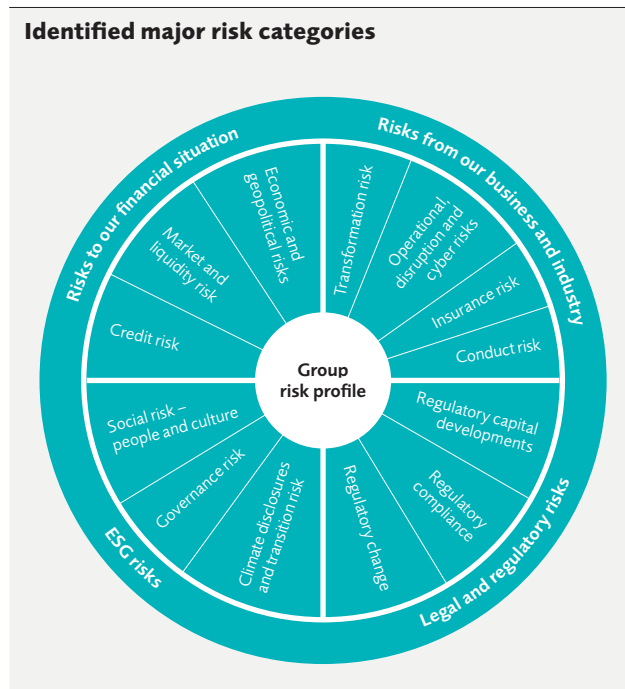

Prudential defines 'risk' as the uncertainty that is faced in implementing the Group's strategies and achieving its objectives successfully, and includes all internal or external events, acts or omissions that have the potential to threaten the success and survival of the Group. Accordingly, material risks will be retained selectively when it is considered that there is value in doing so, and where it is consistent with the Group's risk appetite and philosophy towards risk-taking.

How risk is managed

Risk management is embedded across the Group through the Group Risk Framework, which is owned by the Board and details Prudential's risk governance, risk management processes and risk appetite. The Group's risk governance arrangements are based on the concept of the 'three lines of defence' model, comprising risk taking and management, risk control and oversight, and independent assurance and has been developed to monitor the risks to our business. The aggregate Group exposure to its key risk drivers is monitored and managed by the Group Risk function which is responsible for reviewing, assessing, providing oversight and reporting on the Group's risk exposure and solvency position from the Group economic, regulatory and ratings perspectives.

In 2019, the Group reviewed and updated its policies and processes for alignment with the requirements of its new Group-wide supervisor. The frameworks relating to oversight of transformation risk and model risk were further embedded and the Group focused on development of a Group-wide customer conduct risk framework, building on its existing customer commitments policy.

The following section provides more detail on our risk governance, risk culture and risk management process.

b Group Risk Framework

i Risk governance and culture

Prudential's risk governance comprises the Board organisational structures, reporting relationships, delegation of authority, roles and responsibilities, and risk policies that the Group Head Office and the business units establish to make decisions and control their activities on risk-related matters. It includes individuals, Group-wide functions and committees involved in overseeing and managing risk.

The risk governance structure is led by the Group Risk Committee, supported by independent non-executive directors on risk committees of the Group's main subsidiaries. These committees monitor the development of the Group Risk Framework, which includes risk appetite, limits, and policies, as well as risk culture.

The Group Risk Committee reviews the Group Risk Framework and recommends to the Board any changes required to ensure that it remains effective in identifying and managing the risks faced by the Group. A number of core risk policies and standards support the Framework to ensure that risks to the Group are identified, assessed, managed and reported. In addition, a set of policies owned by other Group functions support the effective implementation of the Group Risk Framework.

Culture is a strategic priority of the Board, which recognises its importance in the way that the Group does business. Risk culture is a subset of Prudential's broader organisational culture, which shapes the organisation-wide values that we use to prioritise risk management behaviours and practices.

Risk culture forms part of the Group Risk Framework and the Group works to promote a responsible risk culture in the following ways:

- Senior management in business units promote a responsible culture of risk management by emphasising the importance of balancing risk with profitability and growth in decision-making. This balance is included in the performance evaluation of key individuals, including both senior management and those directly responsible for risk management;

- The Group works to build skills and capabilities in risk management, which are needed by both senior management and risk management specialists, while attempting to allocate scarce resources appropriately; and
- Employees understand and care about their role in managing risk – they are aware of and discuss risk openly as part of the way they perform their role.

The Group Risk Committee also has a key role in providing advice to the Remuneration Committee on risk management considerations to be applied in respect of executive remuneration.

Prudential's Group Code of Business Conduct and Group Governance Manual include a series of guiding principles that govern the day-to-day conduct of all its people and any organisations acting on its behalf. This is supported by specific risk-related policies which require that the Group act in a responsible manner. These include, but are not limited to, policies related to financial crime covering anti-money laundering, financial crime and anti-bribery and corruption. The Group's third-party supply policy ensures that human rights and modern slavery considerations are embedded across all of its supplier and supply chain arrangements. Embedded procedures to allow individuals to speak out safely and anonymously against unethical behaviour and conduct are also in place.

The ESG Executive Committee is focused on the holistic assessment of ESG matters material to the Group, raising matters for Board decision-making and overseeing the implementation of resulting decisions, supporting the sustainable delivery of the Group's strategy. It reports to the Board through the Group Nomination and Governance Committee which comprises the Group's Chairman, the Senior Independent Director, and the chairs of the Audit, Remuneration and Risk committees and is regularly attended by the Group Chief Executive.

ii The risk management cycle

The risk management cycle comprises processes to identify, measure and assess, manage and control, and monitor and report on our risks.

Risk identification

Group-wide risk identification takes place throughout the year as the Group's businesses undertake a comprehensive bottom-up process to identify, assess and document its risks. This concludes with an annual top-down identification of the Group's principal risks, which considers those risks that have the greatest potential to impact the Group's operating results and financial condition and is used to inform risk reporting to the risk committees and the Board for the year.

Our risk identification process also includes the Group's Own Risk and Solvency Assessment (ORSA) and horizon-scanning performed as part of our emerging risk management process. In addition to risk identification, the ORSA is also the ongoing process of assessing, controlling, monitoring and reporting the risks to which the business is exposed. It includes an assessment of capital adequacy to ensure that the Group's solvency needs are met at all times as well as quantitative and qualitative assessments of the Group's risk profile and solvency needs on a forward-looking basis, incorporating the Group's strategy and business plan. The Group's regular ORSA report was produced in H1 2019, with an additional ORSA report produced in October 2019 in anticipation of the completion of the demerger of M&G plc which included a forward-looking assessment of the post demerger Group's capital and liquidity position under a range of stresses and scenarios.

In accordance with provision 28 of the UK Corporate Governance Code, a process is in place to support Group-wide identification of the company's emerging and principal risks and this combines both top-down and bottom-up views of risks at the level of the Group and its business units. The Board performs a robust assessment and analysis of these principal and emerging risks facing the company through the risk identification process, the Group ORSA report and the risk assessments undertaken as part of the business planning review, including how they are managed and mitigated, which supports decision-making.

Stress and scenario testing, which includes reverse stress testing requiring the Group to ascertain the point of business model failure, is another tool that helps us to identify the key risks and scenarios that may have a material impact on the Group.

The risk profile is a key output from the risk identification and risk measurement processes and is used as a basis for setting Group-wide limits, management information, assessment of solvency needs, and determining appropriate stress and scenario testing. The Group's annual set of principal risks is given enhanced management and reporting focus.

Risk measurement and assessment

All identified risks are assessed based on an appropriate methodology for that risk. All quantifiable risks, which are material and mitigated by holding capital, are modelled in the Group's internal model, which is used to determine economic capital requirements. Governance arrangements are in place to support the internal model, including independent validation and processes and controls around model changes and limitations.

Risk management and control

The control procedures and systems established within the Group are designed to manage the risk of failing to meet business objectives. These focus on aligning the levels of risk-taking with the Group's strategy and can only provide reasonable, and not absolute, assurance against material misstatement or loss.

Risk management and control requirements are set out in the Group risk policies, and form part of the holistic risk management approach under the Group's ORSA process. These risk policies define:

- The Group's risk appetite in respect of material risks, and the framework under which the Group's exposure to those risks is limited;
- The processes to enable Group senior management to effect the measurement and management of the Group material risk profile in a consistent and coherent way; and
- The flows of management information required to support the measurement and management of the Group's material risks.

The methods and risk management tools that the Group employs to mitigate each of its major categories of risks are detailed in the further risk information section below.

Risk monitoring and reporting

The identification of the Group's key risks informs the management information received by the Group risk committees and the Board. Risk reporting of key exposures against appetite is also included, as well as ongoing developments in the Group's principal and emerging risks.

iii Risk appetite, limits and triggers

The Group recognises that interests of its customers and shareholders and a managed acceptance of risk lies at the heart of its business, and that effective risk management capabilities represent a key source of competitive advantage. The extent to which Prudential is willing to take risk in the pursuit of its business strategy and objective to create shareholder value is defined by a number of qualitative and quantitative expressions of risk appetite, operationalised through measures such as limits, triggers and indicators. The Group Risk function is responsible for reviewing the scope and operation of these risk appetite measures at least annually to determine that they remain relevant. The Board approves all changes made to the Group's aggregate risk appetite and has delegated authority to the Group Risk Committee to approve changes to the system of limits, triggers and indicators.

Group risk appetite is defined and monitored in aggregate for financial and non-financial risks by the setting of objectives for its liquidity, capital requirements and non-financial risk exposure. Further detail is included in sections 5 and 6, as well as covering risks to shareholders, including those from participating and third-party business. Group limits operate within these expressions of risk appetite to constrain material risks, while triggers and indicators provide further constraint and defined points for escalation.

Capital requirements

Limits on capital requirements aim to ensure that the Group maintains sufficient capital such that in business-as-usual and stressed conditions it exceeds its internal economic capital requirements, achieves its desired target rating to meet its business objectives, and supervisory intervention is avoided. The two measures currently in use at the Group level are the regulatory local capital summation method (LCSM) capital requirements (both minimum and prescribed levels) and internal economic capital (ECap) requirements. In addition, capital requirements are monitored on local statutory bases.

The Group Risk Committee is responsible for reviewing the risks inherent in the Group's business plan and for providing the Board with input on the risk/reward trade-offs implicit therein. This review is supported by the Group Risk function, which uses submissions from local business units to calculate the Group's aggregated position relative to the aggregate risk limits.

Liquidity

The objective of the Group's liquidity risk appetite is to ensure that the Group is able to generate sufficient cash resources to meet financial obligations as they fall due in business-as-usual and stressed scenarios. Risk appetite with respect to liquidity risk is measured using a liquidity coverage ratio (LCR) which considers the sources of liquidity against liquidity requirements under stress scenarios.

Non-financial risks

The Group is exposed to non-financial risks as an outcome of its chosen business activities and strategy. It aims to manage these risks effectively to maintain its operational resilience and its commitments to customers, and to avoid material adverse impact on its reputation.

Risk management

Risk identification

Risk identification covers Group-wide:

- Top-down risk identification
- Bottom-up risk identification
- Emerging risk identification

Risk measurement and assessment

Risks are assessed in terms of materiality.

Material risks which are modelled are included in appropriately validated capital models.

Manage and control

Risk appetite and limits allow for the controlled growth of our business, in line with business strategy and plan.

Processes that support the oversight and control of risks include:

- The Risk and Control Assessment process.
- The Own Risk and Solvency Assessment (ORSA).
- Group approved limits and early warning triggers.
- Large risk approval process.
- Global counterparty limit framework.
- Financial incidents procedures.
- Stress and scenario testing, including reverse stress testing.

Monitor and report

Escalation requirements in the event of a breach are clearly defined. Risk reporting provides regular updates to the Group's Board and risk committees on exposures against Board-approved appetite statements and limits. Reporting also covers the Group's key risks.

Risk governance and culture

Risk governance comprises the Board, organisational structures, reporting relationships, delegation of authority, roles and responsibilities, and risk policies. Risk culture is a subset of broader organisational culture, and shapes the organisation-wide values used to prioritise risk management behaviours.

Business strategy

Business strategy and the business plan provide direction on future growth and inform the level of limits on solvency, liquidity and earnings and for our key risks. The Group Risk function provides input and opinion on key aspects of business strategy.

Capital management

Capital adequacy is monitored to ensure that internal and regulatory capital requirements are met, and that solvency buffers are appropriate, over the business planning horizon and under stress.

Stress and scenario testing

Stress and scenario testing is performed to assess the robustness of capital adequacy and liquidity, and the appropriateness of risk limits. Recovery planning assesses the effectiveness of the Group's recovery measures and the appropriateness of activation points.

5 Summary risks

Broadly, the risks assumed across the Group can be categorised as those relating to its financial situation, its business and industry, regulatory and legal compliance and those relating to ESG. Principal risks, whether materialising within the Group or at third parties on which the Group relies, may have a financial impact and could

also impact the performance of products or services provided to customers and distributors, and its ability to fulfil commitments to customers, giving rise to potential risks to its brand and reputation. These risks, which are not exhaustive, are summarised below. The materiality of these risks, whether material at the level

of the Group or its business units, is also indicated. Further information on some of these risks and the risk management and mitigation in place are included in section 6. The Group's disclosures covering risk factors are aligned to the same categories and can be found at the end of this document.

Risks to the Group's financial situation (including those from the external macroeconomic and geopolitical environment)

The global economic and geopolitical environment may impact on the Group directly by affecting trends in financial markets and asset values, as well driving short-term volatility.

Risks in this category include the market risks to our investments, the credit quality of our investment portfolio as well as liquidity risk.

Global economic conditions

Changes in global economic conditions can impact Prudential directly; for example, by leading to reduced investment returns and fund performance and liquidity, and increasing the cost of promises (guarantees) that have been made to our customers. Changes in economic conditions can also have an

indirect impact on the Group; for example, leading to a decrease in the propensity for people to save and buy Prudential's products, as well as changing prevailing political attitudes towards regulation. This is a risk which is considered material at the level of the Group.

Geopolitical risk

The geopolitical environment can directly impact on the Group in a wide range of ways. Financial markets and economic sentiment have been highly susceptible to geopolitical developments in recent years, with implications for the Group's financial situation. Geopolitical tensions can result in mass civil protests and/or disobedience as well as the imposition of restrictive regulatory and trading requirements by governments and regimes; increasing operational, business

disruption and regulatory risks, and potentially impacting sales directly. Developments in the Hong Kong protests and the recent COVID-19 outbreak across Asia are being closely monitored by the Group and plans have been enacted to ensure that any potential impact to the business, our employees and customers are managed within our existing business resilience processes.

Market risks to our investments

This is the potential for reduced value of Prudential's investments resulting from the volatility of asset prices, driven by fluctuations in equity prices, interest rates, foreign exchange rates and property prices.

In the Asia business, the main market risks arise from the value of fees from its fee-earning products as well as from the guarantees of some non-linked products. In the US, Jackson's fixed and variable annuity books are exposed to a variety of market risks due to the assets backing these policies.

Interest rates remain low relative to historical levels and a persistently low interest rate environment poses challenges to both the capital position of life insurers as well as to new business profitability.

Liquidity risk

This is the risk of not having sufficient liquid assets to meet obligations as they fall due, and the Group looks at this under

both normal and stressed conditions. This is a risk which is considered material at the level of the Group.

Credit risk

The Group's asset portfolio gives rise to invested credit risk, being the potential for a reduction in the value of Prudential's investments driven by the lowering of credit quality and likelihood of defaults. The assets backing the Jackson general account portfolio and the Asia shareholder business means

credit risk is considered a material risk for the Group's business units.

The Group is also exposed to counterparty default risk through activities such as reinsurance and derivative hedging as well as the operational management of cash.

Risks from the nature of our business and our industry

These include the Group's non-financial risks (including operational and financial crime risk), transformation risks from significant change activity and the insurance risks assumed by the Group in providing its products.

Transformation risk

This is the risk arising from the design and execution of a material and complex change initiative, or a combination of initiatives.

A number of significant change programmes are currently in progress that effect both the Group's strategic vision,

enable its future compliance with impending regulatory changes and to maintain the Group's market competitiveness. The breadth of these activities, and their consequences, including the reputational impact, to the Group should they fail to meet their objectives, mean that this risk remains material at the level of the Group.

Non-financial risks

A combination of the complexity of the Group, its activities and the extent of transformation in progress creates a challenging operating environment.

Operational risk is the risk of loss or unintended gain from inadequate or failed processes, personnel, systems and external events, and can arise through business transformation, introducing new products, new technologies, and entering into new markets and geographies.

Implementing the business strategy and processes for ensuring regulatory compliance (including those relating to the conduct of its business) requires interconnected change initiatives across the Group, the pace of which introduces further complexity. The Group's outsourcing and third-party relationships introduce their own distinct risks. Such operational risks, if they materialise, could result in financial loss and/or reputational damage. These risks are considered to be material at the level of the Group.

Business disruption risks may impact on Prudential's ability to meet its key objectives, ensure continuity of services to customers, and protect its brand and reputation. The Group's business resilience is a core part of a well-embedded business continuity management programme, which contributes to the wider operational resilience of the Group.

Information security and data privacy risks are significant considerations for Prudential and the cyber security threat

continues to evolve globally in sophistication and potential significance. This includes the risk of malicious attack on its systems, network disruption and risks relating to data security, integrity, privacy and misuse. The scale of the Group's IT infrastructure and network (and the services required to monitor and manage it), stakeholder expectations and high-profile cyber security and data misuse incidents across industries mean that these risks are considered material at the level of the Group.

Prudential and the insurance industry are making increasing use of emerging technological tools and digital services, or forming partnerships with third parties that provide these capabilities. While this provides new opportunities, opening up markets, improving insights and increasing scalability, it also comes with additional risks which are managed within the Group's existing governance and risk management processes, including additional operational risks and increased risks around data security and misuse. Automated digital distribution channels increase the criticality of system and process resilience in order to deliver uninterrupted service to customers.

As with all financial services firms, the nature of the Group's business and its operations means that it is exposed to financial crime risks such as those relating to money laundering, fraud, sanctions compliance and bribery and corruption.

Insurance risks

The nature of the products offered by Prudential exposes it to insurance risks, which form a significant part of the overall Group risk profile.

The insurance risks that the business is exposed to by virtue of its products include **persistence risk** (customers lapsing their policies at different levels than expected, and a type of policyholder behaviour risk); **mortality risk** (higher number of policyholders with life protection dying than expected); **morbidity risk** (more policyholders with health protection becoming ill than expected) and **longevity risk** (policyholders living longer than expected). The medical insurance business in Asia is also exposed to **medical inflation risk** (the increasing cost of medical treatments being higher than expected).

The pricing of Prudential's products requires it to make a number of assumptions, and deviations from these may impact its reported profitability and capital position. Across its business units, some insurance risks are more material than others.

Persistence and morbidity risks are among the most material insurance risks for the Asia business given the focus on health and protection products in the region.

The Jackson business is most exposed to policyholder behaviour risk, including persistence, which impacts the profitability of the variable annuity business and is influenced by market performance and the value of policy guarantees.

Conduct risk

Prudential's conduct of business, especially the design and distribution of its products is crucial in ensuring that the Group's commitment to meeting customers' needs and

expectations are met. The Group's conduct risk framework is owned by the first line which reflects management focus on achieving good customer outcomes.

Risks related to regulatory and legal compliance

These include risks associated with prospective regulatory and legal changes and compliance with existing regulations and laws – including their retrospective application – with which the Group must comply with in the conduct of its business.

Prudential operates under the ever-evolving requirements set out by diverse regulatory, legal and tax regimes. The increasing shift towards macroprudential regulation and the number of regulatory changes underway across Asia and US (in particular focusing on capital requirements and consumer protection) are key areas of focus. Regulatory reforms can have a material impact on Prudential's businesses. From 21 October 2019, Prudential's Group-wide supervisor changed to the Hong Kong IA. As a result, the Group is now applying the local capital summation method (LCSM)

to determine Group regulatory capital requirements (both minimum and prescribed levels). The Hong Kong IA's Group-wide Supervision (GWS) Framework is expected to be finalised in the second half of 2020.

As the industry's use of emerging technological tools and digital services increases, this is likely to lead to new and unforeseen regulatory issues. The Group is monitoring the regulatory developments and standards emerging around the governance and ethical use of technology and data.

The Group's ESG-related risks

These include environmental risks associated with climate change (including physical and transition risks), social risks that arise from the diverse people and communities that the Group interacts with and governance-related risks.

As a Group, responding effectively to those material risks with ESG implications is crucial in maintaining Prudential's brand and reputation, and in turn its financial performance and delivery of its long-term strategy.

These include the **environmental risks** associated with climate change and the impact of this on the business, such as the physical impacts on the Group's operational resilience, underwriting assumptions and claims profile, as well as the impact to long-term asset valuations resulting from the transition to a low carbon economy. **Social risks** affecting Prudential may arise from public health and demographic changes (such as increasing obesity and urbanisation), which may impact on product claims profiles. Social risks may also arise from a failure to consider the rights,

diversity, well-being, and interests of people and communities in which the Group, or its third-parties, operates. This includes the responsibilities the Group assumes as a responsible employer. **Governance risks** may arise from a failure to maintain high standards of corporate governance (including committee independence and diversity) senior management behaviours and oversight of key risks.

Policies and procedures to support how the Group operates in relation to certain ESG issues are included in the Group Governance Manual. Further information on how Prudential addresses material risks associated with ESG themes are included in the ESG Summary.

6 Further risk information

In reading the sections below, it is useful to understand that there are some risks that Prudential's policyholders assume by virtue of the nature of their products, and some risks that the Company and its shareholders assume. Examples of the latter include those risks arising from assets held directly by and for the Company or the risk that policyholder funds are exhausted. This report is focused mainly on risks to the shareholder but will include those which arise indirectly through our policyholder exposures.

6.1 Risks to the Group's financial situation, including those from the external macroeconomic and geopolitical environment

a Market risk

(Audited)

The main drivers of market risk in the Group are:

- Investment risk, which arises on our holdings of equity and property investments, the prices of which can change depending on market conditions. The main investment risk exposure arises from the portion of the profits from the Hong Kong with-profits funds which the shareholders are entitled to receive; the value of the future fees from the fee-earning products in the Asia business; and from the asset returns backing Jackson's variable annuities business;
- Interest rate risk, which is driven by the valuation of Prudential's assets (particularly the bonds that it invests in) and liabilities, which are dependent on market interest rates and exposes it to the risk of those moving in a way that is detrimental. The Group's interest rate risk is driven by Jackson's fixed annuity business, the cost of guarantees in its fixed index and variable annuity business, and the guarantees of some non-unit-linked investment savings products in Asia. The impact of lower interest rates also manifests through reduced solvency levels in some of the Asian businesses as well as reduced new business profitability; and
- Foreign exchange risk, through translation of its profits and assets and liabilities denominated in various currencies, given the geographical diversity of the business.

The Group has appetite for market risk where it arises from profit-generating insurance activities to the extent that it remains part of a balanced portfolio of sources of income for shareholders and is compatible with a robust solvency position.

The Group's market risks are managed and mitigated by the following:

- The Group market risk policy;
- The Group Asset Liability Committee – a first-line risk management advisory committee to the Group Chief Executive Officer which supports the identification, assessment and management of key financial risks significant to the achievement of the Group's business objectives;
- Risk appetite statements, limits and triggers;
- Our asset and liability management programmes which include management actions such as asset allocation, bonus revisions, repricing and the use of reinsurance where appropriate;
- Hedging derivatives, including equity options and futures, interest rate swaps and swaptions and currency forwards;
- The monitoring and oversight of market risks through the regular reporting of management information; and
- Regular deep dive assessments.

Equity and property investment risk

In Asia, the shareholder exposure to equity price movements results from unit-linked products, where fee income is linked to the market value of the funds under management. Further exposure arises from with-profits businesses where bonuses declared are based broadly on historical and current rates of return from the Asia business's investment portfolios, which include equities.

In Jackson, investment risk arises from the assets backing customer policies. Equity risk is driven by the variable annuity business, where the assets are invested in both equities and bonds and the main risk to the shareholder comes from providing the guaranteed benefits offered. The exposure to this is primarily controlled by using a derivative hedging programme, as well as through the use of reinsurance to pass on the risk to third-party reinsurers.

While accepting the equity exposure that arises on future fees, the Group has limited appetite for exposures to equity price movements to remain unhedged or for

volatility within policyholder guarantees after taking into account any natural offsets and buffers within the business.

Interest rate risk

Some products that Prudential offers are sensitive to movements in interest rates. As part of the Group's ongoing management of this risk, a number of mitigating actions to the in-force business have been taken, as well as repricing and restructuring new business offerings in response to recent relatively low interest rates. Nevertheless, some sensitivity to interest rate movements is still retained.

The Group's appetite for interest rate risk is limited to where assets and liabilities can be tightly matched and where liquid assets or derivatives exist to cover interest rate exposures.

In Asia, our exposure to interest rate risk arises from the guarantees of some non-unit-linked investment savings products, including the Hong Kong with-profits and non-profit business. This exposure exists because of the potential for an asset and liability mismatch, where long-dated liabilities and guarantees are backed by short-dated assets, which cannot be eliminated, but is monitored and managed through local risk and asset liability management committees against risk appetite aligned with the Group's limit framework.

Jackson is affected by interest rate movements to its fixed annuity book where the assets are primarily invested in bonds and shareholder exposure comes from the mismatch between these assets and the guaranteed rates that are offered to policyholders. Interest rate risk results from the cost of guarantees in the variable annuity and fixed index annuity business, which may increase when interest rates fall. The level of sales of variable annuity products with guaranteed living benefits is actively monitored, and the risk limits we have in place help to ensure we are comfortable with the level of interest rate and market risks incurred as a result. Derivatives are also used to provide some protection.

Foreign exchange risk

The geographical diversity of Prudential's businesses means that it has some exposure to the risk of foreign exchange rate fluctuations. Some entities within the Group that write policies, invest in assets or enter into other transactions in local currencies or currencies not linked to the US dollar. Although this limits the effect

of exchange rate movements on local operating results, it can lead to fluctuations in the Group financial statements when results are reported in US dollars. This risk is accepted within our appetite for foreign exchange risk.

In cases where a non-US dollar denominated surplus arises in an operation which is to be used to support Group capital, or where a significant cash payment is due from a subsidiary to the Group, this currency exposure may be hedged where it is believed to be favourable economically to do so. Further, the Group generally does not have appetite for significant direct shareholder exposure to foreign exchange risks in currencies outside the countries in which it operates, but it does have some appetite for this on fee income and on non-sterling investments within the with-profits fund. Where foreign exchange risk arises outside appetite, currency swaps and other derivatives are used to manage the exposure.

b Credit risk

(Audited)

Prudential invests in bonds that provide a regular, fixed amount of interest income (fixed income assets) in order to match the payments needed to policyholders. It also enters into reinsurance and derivative contracts with third parties to mitigate various types of risk, as well as holding cash deposits at certain banks. As a result, it is exposed to credit risk and counterparty risk across its business.

Credit risk is the potential for reduction in the value of investments which results from the perceived level of risk of an investment issuer being unable to meet its obligations (defaulting). Counterparty risk is a type of credit risk and relates to the risk of the counterparty to any contract we enter into being unable to meet their obligations causing us to suffer loss.

The Group has some appetite to take credit risk where it arises from profit-generating insurance activities, to the extent that it remains part of a balanced portfolio of sources of income for shareholders and is compatible with a robust solvency position.

A number of risk management tools are used to manage and mitigate this credit risk, including the following:

- A credit risk policy and dealing and controls policy;
- Risk appetite statements and limits that have been defined on issuers, and counterparties;

- Collateral arrangements for derivative, secured lending reverse repurchase and reinsurance transactions;
- The Group Credit Risk Committee's oversight of credit and counterparty credit risk and sector and/or name-specific reviews;
- Regular assessments; and
- Close monitoring or restrictions on investments that may be of concern.

Debt and loan portfolio

Credit risk also arises from the debt portfolio in the Asia business comprising the shareholder, with-profit and unit-linked funds, the value of which was \$74.7 billion at 31 December 2019. The majority (67 per cent) of the portfolio is in unit-linked and with-profits funds and so exposure of the shareholder to this component is minimal. The remaining 33 per cent of the debt portfolio is held to back the shareholder business.

In the general account of the Group's US business, \$58.5 billion of debt securities are held to support shareholder liabilities including those from our fixed annuities, fixed index annuities and life insurance products.

The shareholder-backed debt portfolio of the Group's other operations was \$1.3 billion as at 31 December 2019.

Further details of the composition and quality of our debt portfolio, and exposure to loans, can be found in the IFRS financial statements.

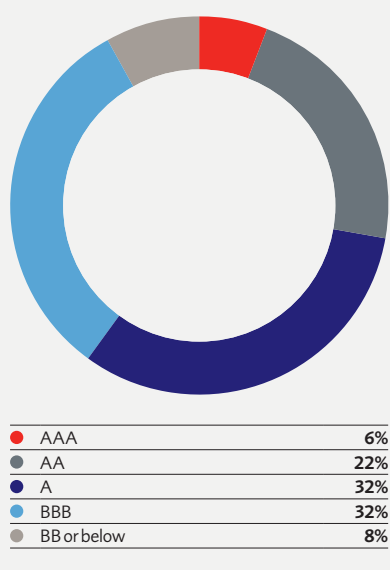

Group sovereign debt

Prudential also invests in bonds issued by national governments. This sovereign debt holdings represented 21 per cent or \$18.0 billion¹ of the shareholder debt portfolio of the Group as at 31 December 2019 (31 December 2018: 20 per cent or \$14.8 billion of the shareholder debt portfolio attributable to continuing operations). One per cent of this was rated AAA and 83 per cent was considered investment grade (31 December 2018: 84 per cent of the sovereign debt holdings attributable to continuing operations was considered investment grade).

The particular risks associated with holding sovereign debt are detailed further in our disclosures on risk factors.

The exposures held by the shareholder-backed business and with-profits funds in sovereign debt securities at 31 December 2019 are given in note C3.2(d) of the Group's IFRS financial statements.

Shareholder exposure by rating

Shareholder exposure by sector

Bank debt exposure and counterparty credit risk

Prudential's exposure to banks is a key part of its core investment business, as well as being important for the hedging and other activities undertaken to manage its various financial risks. Given the importance of its relationship with its banks, exposure to the sector is considered a material risk for the Group.

The exposures held by the shareholder-backed business and with-profits funds in bank debt securities at 31 December 2019 are given in note C3.2(d) of the Group's IFRS financial statements for continuing operations.

The exposure to derivative counterparty and reinsurance counterparty credit risk is managed using an array of risk management tools, including a comprehensive system of limits. Where appropriate, Prudential reduces its exposure, buys credit protection or uses additional collateral arrangements to manage its levels of counterparty credit risk.

At 31 December 2019:

- 92 per cent of the Group's shareholder portfolio is investment grade rated². In particular, 61 per cent of the portfolio is rated² A- and above (or equivalent); and
- The Group's shareholder portfolio is well diversified: no individual sector³ makes up more than 15 per cent of the total portfolio (excluding the financial and sovereign sectors).

c Liquidity risk

(Audited)

Prudential's liquidity risk arises from the need to have sufficient liquid assets to meet policyholder and third-party payments as they fall due. This incorporates the risk arising from funds composed of illiquid assets and results from a mismatch between the liquidity profile of assets and liabilities. Liquidity risk may impact on market conditions and valuation of assets in a more uncertain way than for other risks like interest rate or credit risk. It may arise, for example, where external capital is unavailable at sustainable cost, increased liquid assets are required to be held as collateral under derivative transactions or where redemption requests are made against Prudential external funds.

Prudential has no appetite for liquidity risk, ie for any business to have insufficient resources to cover its outgoing cash flows, or for the Group as a whole to not meet cash flow requirements from its debt obligations under any plausible scenario.

The Group has significant internal sources of liquidity, which are sufficient to meet all of our expected cash requirements for at least 12 months from the date the financial statements are approved, without having to resort to external sources of funding. The Group has a total of £2.0 billion of undrawn committed facilities that can be made use of, expiring in 2024. Access to further liquidity is available through the debt capital markets and an extensive commercial paper programme is in place, and Prudential has maintained a consistent presence as an issuer in the market for the past decade.

A number of risk management tools are used to manage and mitigate this liquidity risk, including the following:

- The Group's liquidity risk policy;
- Risk appetite statements, limits and triggers;
- Regular assessment by the Group and business units of LCRs which are calculated under both base case and stressed scenarios and are reported to committees and the Board;
- The Group's Liquidity Risk Management Plan, which includes details of the Group Liquidity Risk Framework as well as gap analysis of liquidity risks and the adequacy of available liquidity resources under normal and stressed conditions;
- Regular stress testing;
- Our contingency plans and identified sources of liquidity;
- The Group's ability to access the money and debt capital markets;
- Regular deep dive assessments; and
- The Group's access to external committed credit facilities.

6.2 Risks arising from the nature of the Group's business and industry

a Transformation risk

A number of significant change programmes are currently running in order to implement the Group's strategic vision, comply with impending regulatory changes and to maintain market competitiveness. Many of these programmes are interconnected with complex dependencies and/or of large scale, and may have financial and non-financial implications if they fail to meet their objectives. Additionally, these programmes inherently give rise to design and execution risks, and may introduce new, or increase existing, business risks. These include an increased strain on the operational capacity, newly-implemented controls being ineffective or general weakening of the control environment of the Group. Implementing further strategic initiatives may amplify these risks. Furthermore, these programmes require ongoing oversight, coordinated independent assurance and regular monitoring and consolidated reporting, as part of the Group's Transformation Risk Framework, to mitigate the risks to the business.

The Group's current significant change programmes relate to an expansion of its use of technology, platforms and analytics, improving the efficiency of certain business functions and processes (data, systems, people) and the establishment of new third-party arrangements. The Group's transformation portfolio also includes programmes related to regulatory change, including but not limited to, the transition to the Hong Kong IA's GWS framework, the discontinuation of IBORs and the implementation of IFRS 17 – see section 6.3 for further information.

b Non-financial risks

In the course of doing business, the Group is exposed to non-financial risks arising from its operations, the business environment and its strategy. The main risks across these areas are detailed below.

Operational risk

Prudential defines operational risk as the risk of loss (or unintended gain or profit) arising from inadequate or failed internal processes, personnel or systems, or from external events. This includes employee error, model error, system failures, fraud or some other event which disrupts business processes or has a detrimental impact to customers. Processes are established for activities across the scope of our business, including operational activity, regulatory compliance, and those supporting ESG activities more broadly, any of which can expose us to operational risks. A large volume of complex transactions is processed by the Group across a number of diverse products and are subject to a high number of varying legal, regulatory and tax regimes. Prudential has no appetite for material losses (direct or indirect) suffered as a result of failing to develop, implement or monitor appropriate controls to manage operational risks.

The Group's outsourcing and third-party relationships require distinct oversight and risk management processes. A number of important third-party relationships exist which provide the distribution and processing of Prudential's products, both as market counterparties and as outsourcing partners, and new IT and technology partners are being engaged. In Asia, the Group continues to expand its strategic partnerships and renew bancassurance arrangements and in Africa Prudential is continuing its expansion through acquisitions. These third-party arrangements support Prudential in providing a high level and cost-effective service to our customers, but they also make us reliant on the operational resilience and performance of our outsourcing partners.

The Group's requirements for the management of material outsourcing arrangements, which are in accordance with relevant applicable regulations, are included through its well-established Group-wide third-party supply policy. Third-party management is also included in the Group-wide framework and risk management for operational risk (see below). Third-party management forms part of the Group's operational risk categorisations and a defined qualitative risk appetite statement, limits and triggers are in place.

The performance of the Group's core business activities places reliance on the IT infrastructure, provided by our external IT and technology partners, that supports day-to-day transaction processing and administration. The IT environment must also be secure, and an increasing cyber risk threat needs to be addressed as the Group's digital footprint increases and the sophistication of cyber threats continue to evolve – see separate information security risk sub-section below. Exposure to operational and other external events could impact operational resilience by significantly disrupting systems, operations and services to customers, which may result in financial loss, customer impacts and reputational damage.

Operational challenges also exist in keeping pace with regulatory changes. This requires implementing processes to ensure we are, and remain, compliant on an ongoing basis, including regular monitoring and reporting. See section 6.3 for further detail on the Group's regulatory and legal risks.

Business disruption risk

Prudential recognises that business disruption is a key risk to effective business operations and delivery of business services, and has the potential to impact our customers and the market more broadly. The Group therefore continuously seeks to develop greater business resilience through planning, preparation, testing and adaptation. Business continuity management (BCM) is one of a number of activities undertaken by the Group Security function that helps the Group to protect its key stakeholders and its systems, and business resilience is at the

core of the Group's embedded BCM programme. The BCM programme and framework are appropriately linked to all business activities, and includes business impact analyses, risk assessments, incident management plans, disaster recovery plans, and the exercising and execution of these plans. Based on industry standards, the BCM programme is designed to provide business continuity that matches the Group's evolving business needs and is appropriate to the size, complexity and nature of the Group's operations. Prudential is also taking a broader, multi-functional approach to building greater business resilience, working with our external third-party providers and our service delivery teams to improve our ability to withstand, absorb and recover from disruption to our business services, while minimising the impact on our customers. The Group continuously reviews and develops its contingency plans and its ability to respond effectively when disruptive incidents occur, such as those resulting from the Hong Kong protests and the recent COVID-19 outbreak.

Business disruption risks are closely monitored by the Group Security function, with key operational effectiveness metrics and updates on specific activities being reported to the Group Risk Committee and discussed by cross-functional working groups.

Information security risk and data privacy

Information security risk remains an area of heightened focus after a number of recent high-profile attacks and data losses across industries. Criminal capability in this area is maturing and industrialising, with an increased level of understanding of complex financial transactions which increases the risks to the financial services industry. The threat landscape is continuously evolving, and the systemic risk of sophisticated but untargeted attacks is rising, particularly during times of heightened geopolitical tensions.

Developments in data protection requirements, such as GDPR that came into force in May 2018 and the California Consumer Protection Act which came into force on 1 January 2020, continue to evolve

worldwide. This increases financial and reputational implications for Prudential in the event of a breach of its (or third-party suppliers') IT systems. As well as protecting data, stakeholders expect companies and organisations to use personal information transparently and appropriately. Given this, both information security and data privacy are key risks for the Group. As well as having preventative risk management in place, it is fundamental that the Group has robust critical recovery systems in place in the event of a successful attack on its infrastructure, a breach of its information security or a failure of its systems in order to retain its customer relationships and trusted reputation.

During 2019, the revised organisational structure and governance model for cyber security management was implemented. This change has resulted in a centralised Group-wide Information Security and Privacy function, leveraging skills, tools and resources across the business under a 'centre of excellence' model. This organisational change has increased the Group's efficiency and agility in responding to cyber security related incidents and has facilitated increased collaboration between business units leveraging their respective strengths in delivering the Group-wide information security programme.

The strategic objectives of the programme include achieving consistency in the execution of security disciplines across the Group, improving visibility across Prudential's businesses and deployment of automation to detect and address threats. It also includes achieving security by design by aligning subject matter expertise to the Group's digital and business initiatives to embed security controls across platforms and ecosystems. Implementation of the operating model and progress against these strategic objectives have continued over the year.

The Board receives periodic updates on information security risk management throughout the year. Group functions work with the business units to address risks locally within the national and regional context of each business following the strategic direction of the Group-wide information security function.

Financial crime risk

As with all financial services firms, Prudential is exposed to risks relating to money laundering (the risk that the products or services of the Group are used by customers or other third parties to transfer or conceal the proceeds of crime); fraud (the risk that fraudulent claims or transactions, or procurement of services, are made against or through the business); sanctions compliance (the risk that the Group undertakes business with individuals and entities on the lists of the main sanctions regimes); and bribery and corruption (the risk that employees or associated persons seek to influence the behaviour of others to obtain an unfair advantage or receive benefits from others for the same purpose).

Prudential operates in some high-risk countries where, for example, the acceptance of cash premiums from customers may be common practice, large-scale agency networks may be in operation where sales are incentivised by commission and fees or where there is a higher concentration of exposure to politically-exposed persons.

The Group-wide policies we have in place on anti-money laundering, fraud, sanctions and anti-bribery and corruption reflect the values, behaviours and standards that are expected across the business. Across Asia, screening and transaction monitoring systems are in place and a series of improvements and upgrades are being implemented, while a programme of compliance control monitoring reviews is being undertaken. Risk assessments are performed annually at higher risk locations. Due diligence reviews and assessments against Prudential's financial crime policies are performed as part of the Group's business acquisition process. The Group continues to undertake strategic activity to monitor and evaluate the evolving fraud risk landscape, mitigate the likelihood of fraud occurring and increase the rate of detection.

The Group has in place a mature confidential reporting system through which staff and other stakeholders can report concerns relating to potential misconduct. The process and results of this are overseen by the Group Audit Committee.

Group-wide framework and risk management for operational risk

The risks detailed above form key elements of the Group's operational risk profile. In order to identify, assess, manage, control and report effectively on all operational risks across the business, a Group-wide operational risk framework is in place. The key components of the framework are:

- Application of a risk and control assessment (RCA) process, where operational risk exposures are identified and assessed as part of a periodical cycle. The RCA process considers a range of internal and external factors, including an assessment of the control environment, to determine the business's most significant risk exposures on a prospective basis;
- An internal incident management process, which identifies, quantifies and monitors remediation conducted through root cause analysis and application of action plans for risk events that have occurred across the business;
- A scenario analysis process for the quantification of extreme, yet plausible manifestations of key operational risks across the business on a forward-looking basis. This is carried out at least annually and supports external and internal capital requirements as well as informing risk oversight activity across the business; and
- An operational risk appetite framework that articulates the level of operational risk exposure the business is willing to tolerate, covering all operational risk categories, and sets out escalation processes for breaches of appetite.

Outputs from these processes and activities performed by individual business units are monitored by the Group Risk function, which provides an aggregated view of the risk profile across the business to the Group Risk Committee and Board.

These core framework components are embedded across the Group via the Group Operational Risk Policy and Standards documents, which set out the key principles and minimum standards for the management of operational risk across the Group.

The Group Operational Risk Policy, standards and operational risk appetite framework sit alongside other risk policies and standards that individually engage with key operational risks, including outsourcing and third-party supply, business continuity, financial crime, technology and data, operations processes and extent of transformation.

These policies and standards include subject matter expert-led processes that are designed to identify, assess, manage and control operational risks, including:

- A transformation risk framework that assesses, manages and reports on the end-to-end transformation life cycle, project prioritisation and the risks, interdependencies and possible conflicts arising from a large portfolio of transformation activities;
- Internal and external review of cyber security capability and defences;
- Regular updating and testing of elements of disaster-recovery plans and the Critical Incident Procedure process;
- Group and business unit-level compliance oversight and testing in respect of adherence with in-force regulations;
- Regulatory change teams in place to assist the business in proactively adapting and complying with regulatory developments;
- On financial crime risks, screening and transaction monitoring systems are in place and a programme of compliance control monitoring reviews is undertaken, as well as regular risk assessments;
- A framework is in place for emerging risk identification and analysis in order to capture, monitor and allow us to prepare for operational risks that may crystallise beyond the short-term horizon;
- Corporate insurance programmes to limit the financial impact of operational risks; and
- Reviews of key operational risks and challenges within Group and business unit business plans.

These activities are fundamental in maintaining an effective system of internal control, and as such outputs from these also inform core RCA, incident management and scenario analysis processes and reporting on operational risk. Furthermore, they also ensure that operational risk considerations are embedded in key business decision-making, including material business approvals and in setting and challenging the Group's strategy.

c Insurance risks

(Audited)

Insurance risk makes up a significant proportion of Prudential's overall risk exposure. The profitability of its businesses depends on a mix of factors, including levels of, and trends in, mortality (policyholders dying), morbidity (policyholders becoming ill) and policyholder behaviour (variability in how customers interact with their policies, including utilisation of withdrawals, take-up of options and guarantees and persistency, ie lapsing of policies), and increases in the costs of claims, including the level of medical expenses increases over and above price inflation (claim inflation).

The Group has appetite for retaining insurance risks in order to create shareholder value in the areas where it believes it has expertise and controls to manage the risk and can support such risk with its capital and solvency position.

The principal drivers of the Group's insurance risk vary across its business units. Across Asia, where a significant volume of health and protection business is written, the most significant insurance risks are morbidity risk, persistency risk, and medical inflation risk. In Jackson, policyholder behaviour risk is particularly material, especially in the take up of options and guarantees on variable annuity business.

In Asia, Prudential writes significant volumes of health and protection business, and so a key assumption is the rate of medical inflation, which is often in excess of general price inflation. There is a risk that the expenses of medical treatment increase more than expected, so the medical claim cost passed on to Prudential is higher than anticipated. Medical expense inflation risk is best mitigated by retaining the right to reprice our products each year and by having suitable overall claim limits within our policies, either limits per type of claim or in total across a policy. Prudential's morbidity risk is mitigated by appropriate underwriting when policies are issued and

claims are received. Our morbidity assumptions reflect our recent experience and expectation of future trends for each relevant line of business.

The Group's persistency assumptions reflect similarly a combination of recent past experience for each relevant line of business and expert judgement, especially where a lack of relevant and credible experience data exists. Any expected change in future persistency is also reflected in the assumptions. Persistency risk is managed by appropriate training and sales processes (including active customer engagement and service quality) and managed locally post-sale through regular experience monitoring and the identification of common characteristics of business with high lapse rates. Where appropriate, allowance is made for the relationship (either assumed or observed historically) between persistency and investment returns and any additional risk is accounted for. Modelling this dynamic policyholder behaviour is particularly important when assessing the likely take-up rate of options embedded within certain products. The effect of persistency on the Group's financial results can vary but depends mostly on the value of the product features and market conditions.

Prudential's insurance risks are managed and mitigated using the following:

- The Group's insurance, product and underwriting risk policies;
- The risk appetite statements, limits and triggers;
- Using persistency, morbidity and longevity assumptions that reflect recent experience and expectation of future trends, and industry data and expert judgement where appropriate;
- Using reinsurance to mitigate mortality and morbidity risks;
- Ensuring appropriate medical underwriting when policies are issued and appropriate claims management practices when claims are received in order to mitigate morbidity risk;
- Maintaining the quality of sales processes, training and using initiatives to increase customer retention in order to mitigate persistency risk;
- Using product repricing and other claims management initiatives in order to mitigate medical expense inflation risk; and
- Regular deep dive assessments.

6.3 Risks related to regulatory and legal compliance

Regulatory risks may impact Prudential's business or the way in which it is conducted. This covers a broad range of risks including changes in government policy and legislation, capital control measures, and new regulations at either national or international level. In addition to the risks arising from regulatory change, the breadth of local and Group-wide regulatory arrangements presents the risk that regulatory requirements are not fully met, resulting in specific regulator interventions or actions including retrospective interpretation of standards by regulators which may result in regulatory censure or significant additional costs to the business.

On 21 October 2019, the Hong Kong IA became Prudential's Group-wide supervisor, and the Group continues to engage with the supervisor on the Group-wide Supervision (GWS) Framework, which is expected to be finalised in the second half of 2020.

The focus of some governments toward more protectionist or restrictive economic and trade policies could impact on the degree and nature of regulatory changes and Prudential's competitive position in some geographic markets. This could take effect, for example, through increased friction in cross-border trade, capital controls or measures favouring local enterprises such as changes to the maximum level of non-domestic ownership by foreign companies. These developments continue to be monitored by the Group at a national and global level and these considerations form part of the Group's ongoing engagement with government policy teams and regulators.

Efforts to curb systemic risk and promote financial stability are also under way. At the international level, the Financial Stability Board (FSB) continues to develop recommendations for the asset management and insurance sectors, including ongoing assessment of systemic risk measures. The International Association of Insurance Supervisors (IAIS) has continued its focus on the following two key developments.

GROUP CHIEF RISK AND COMPLIANCE OFFICER'S REPORT ON THE RISKS FACING OUR BUSINESS AND HOW THESE ARE MANAGED CONTINUED

The IAIS is developing the ICS as part of ComFrame. The implementation of ICS will be conducted in two phases – a five-year monitoring phase followed by an implementation phase. ComFrame will more generally establish a set of common principles and standards designed to assist supervisors in addressing risks that arise from insurance groups with operations in multiple jurisdictions. The ComFrame proposals, including ICS, could result in enhanced capital and regulatory measures for IAIGs, for which Prudential is likely to satisfy the criteria. The Aggregation Method is one of the approaches being considered as part of the ICS and the related proposals are being led by the National Association of Insurance Commissioners (NAIC). Alongside the current ICS developments, the NAIC is also developing its Group Capital Calculation (GCC) for the supervision of insurance groups in the US. The GCC is intended to be a risk-based capital (RBC) aggregation methodology. In developing the GCC, the NAIC will also consider Group capital developments by the US Federal Reserve Board, which will inform the US regulatory association in its construction of a US group capital calculation.

The FSB has endorsed a new holistic framework (HF) for systemic risk for implementation by the IAIS in 2020 and suspended G-SII designations until a review to be undertaken in 2022. Many of the previous G-SII measures have already been adopted into the insurance core principles (ICPs) and ComFrame – the common framework for the supervision of internationally active insurance groups (IAIGs). Prudential is likely to satisfy the criteria of an IAIG and therefore continue to be subject to these measures. The HF also includes a monitoring element for the identification of a build-up of systemic risk and to enable supervisors to take action where appropriate. The IAIS has already consulted on an application paper on the liquidity risk elements introduced into the ICPs and ComFrame with a further consultation focused on macroeconomic elements expected to follow in 2021.

In certain jurisdictions in which Prudential operates there are also a number of ongoing policy initiatives and regulatory developments that are having, and will continue to have, an impact on the way Prudential is supervised. Decisions taken by regulators, including those related to solvency requirements, corporate or governance structures, capital allocation, financial reporting and risk management may have an impact on our business.

In May 2017, the International Accounting Standards Board (IASB) published IFRS 17 which will introduce fundamental changes to the IFRS-based reporting of insurance entities that prepare accounts according to IFRS from 2021. In June 2019, the IASB published an exposure draft proposing a number of targeted amendments to this new standard including the deferral of the effective date by one year from 2021 to 2022. As a result of comments on this exposure draft, the IASB plans to redeliberate on a number of areas of IFRS 17, with an amended standard expected to be issued in mid-2020. IFRS 17 is expected to, among other things, include altering the timing of IFRS profit recognition, and the implementation of the standard is likely to require changes to the Group's IT, actuarial and finance systems. The Group is reviewing the complex requirements of this standard and considering its potential impact.

In the US, various initiatives are under way to introduce fiduciary obligations for distributors of investment products, which may reshape the distribution of retirement products. Jackson has introduced fee-based variable annuity products in response to the potential introduction of such rules, and we anticipate that the business's strong relationships with distributors, history of product innovation and efficient operations should further mitigate any impacts.

In Asia, regulatory regimes are developing at different speeds, driven by a combination of global factors and local considerations. New local capital rules and requirements could be introduced in these and other regulatory regimes that challenge legal or ownership structures, or current sales practices, or could be applied to sales made prior to their introduction retrospectively, which could have a negative impact on Prudential's business or reported results.

In July 2014, the Financial Stability Board (FSB) announced widespread reforms to address the integrity and reliability of inter-bank offer rates (IBORs). The discontinuation of IBORs in their current form and their replacement with alternative risk-free reference rates such as the Sterling Overnight Index Average benchmark (SONIA) in the UK and the Secured Overnight Financing Rate (SOFR) in the US could, among other things, impact the Group through an adverse effect on the value of Prudential's assets and liabilities which are linked to, or which reference IBORs, a reduction in market liquidity during any period of transition and increased legal and conduct risks to the Group arising from changes required to documentation and its related obligations to its stakeholders.

Risk management and mitigation of regulatory risk at Prudential includes the following:

- Risk assessment of the Business Plan which includes consideration of current strategies;
- Close monitoring and assessment of our business environment and strategic risks;
- The consideration of risk themes in strategic decisions; and
- Ongoing engagement with national regulators, government policy teams and international standard setters.

6.4 Environmental, social and governance risks

The business environment in which Prudential operates is continually changing and responding effectively to those material risks associated with ESG themes is crucial in maintaining Prudential's brand and reputation, its ability to attract and retain customers and staff, and in turn its financial performance and its long-term strategy. The Group maintains active engagement with its key stakeholders as it responds to ESG-related matters, including investors, customers, employees, governments, policymakers and regulators in its key markets, as well as with international institutions – all of whom have expectations in this area which may differ.

Policies and procedures to support how the Group operates in relation to certain ESG topics are included in the Group Governance Manual. Prudential manages key ESG issues through a multi-disciplinary approach with functional ownership for ESG topics. The ESG Executive Committee coordinates these activities and seeks, as one of its aims, to ensure a consistent approach in managing ESG considerations in its business activities, including investment activities. It is supported by senior functional leaders and representatives from the Group's business units, including the chief investment officers of the Group's asset managers.

The environmental risks associated with climate change is one ESG area that poses significant risks to Prudential and its customers. The global transition to a lower carbon economy could potentially see the financial assets of carbon-intensive companies re-price as a result of facing significantly higher costs or decreasing demand for their products and services. The speed of this transition, including the extent to which it is orderly and managed, will be influenced by factors such as public policy, technology and changes in market or investor sentiment. This 'transition risk' may adversely impact the valuation of investments held by the Group. The Group expects the physical impacts of climate change, driven by both specific short-term climate-related events such as natural disasters and longer-term changes in the natural environment, to increasingly influence the longevity, mortality and morbidity risk assessments of the Group's product offerings. Climate-driven

change in countries in which Prudential, or its key third parties, operate could impact on its operational resilience and could change its claims profile. More information about the activities the Group is undertaking to increase its understanding and risk management of these climate-related risks can be found in the climate section of the ESG Summary.

Social risks that could impact Prudential include the emerging population risks associated with public health trends (such as an increase in obesity) and demographic changes (such as population urbanisation) which may impact customer lifestyles and therefore may impact claims against the Group's insurance product offerings. As a life and health insurer, we are committed to playing a greater role in preventing and postponing illness in order to protect our customers. Further information about how we are investing in artificial intelligence technology to enable access to an affordable and quality healthcare digital offering can be found within the Pulse case study included in the ESG Summary. Other social risks may arise from a failure to consider the rights, diversity, well-being, and interests of people and communities in which the Group, or its third parties, operates. These risks are increased as Prudential operates in multiple jurisdictions with distinct local cultures and considerations. As an employer, the Group is also exposed to the risk of being unable to attract, retain and develop highly-skilled staff, which can be increased where Prudential does not have responsible working practices.

A failure to maintain high standards of corporate governance may adversely impact the Group and its customers, staff and employees, through poor decision-making and a lack of oversight of its key risks, particularly in joint ventures or partnerships where Prudential does not have direct overall control. Poor governance may arise where key governance committees have insufficient independence, a lack of diversity, skills or experience in their members, or unclear (or insufficient) oversight responsibilities and mandates. Inadequate oversight over remuneration increases the risk of poor senior management behaviours. Prudential operates across multiple jurisdictions and has a group and subsidiary governance structure which may add further complexity to these considerations.

Further information on how Prudential addresses material risks associated with ESG themes is included in the ESG Summary.

Viability statement prepared in accordance with Provision 31 of the UK Corporate Governance Code

The Group's longer-term prospects

Prudential aims to meet the savings and investment needs of its customers, which by their very nature can often be over a timeframe of many years. Aligned with this objective, in the markets in which it operates it seeks to provide products and services that align with important global social needs, such as access to healthcare, protection against poverty, security for ageing populations and investment in infrastructure and the real economy. Prudential is focused on capturing the structural growth opportunity arising from these needs. The drivers for this structural growth, such as the low penetration rates across the Asian region, are discussed on pages 18 to 27 alongside the activities we undertook to expand our product set and customer reach during 2019. In undertaking these activities we aim to both meet the evolving needs of our customers and provide sustainable growth for our shareholders, which will ultimately lead to the viability of our business over the longer term. In the US, the Group is focused on delivering products that will help mitigate the worry many retirees have of running out of money during retirement, as employer-based plans are disappearing and many individuals have insufficient accumulation of assets over their working life. Further details of how Jackson is meeting this need are set out on pages 28 to 33.

As well as capturing the structural growth opportunities outlined above, the Group seeks to continually enhance its capabilities with a view to remaining relevant in an ever-changing world. Recent focus has been on digital development and investing in new and existing partnerships to ensure our products reach the customers we seek to serve. In Asia, we developed 'Pulse by Prudential' Health Ecosystem, an all-in-one digital app, and entered into a new strategic partnership with OVO, the largest digital payment platform in Indonesia. In the US, we have been actively engaged with FinTech partners to help illustrate the benefits a lifetime income solution can provide within a comprehensive wealth management plan. This is intended to give the financial adviser the necessary tools to customise according to the unique needs and goals of the client.

All of the Group's activities are underpinned by ongoing risk management, implemented via the Group Risk Framework and risk appetite limits described on pages 55 to 58. The Group's management of wider environmental, social and governance issues that could pose a risk in the future to the Group is set out in the Environmental, Social and Governance summary report on pages 76 to 87. This focus supports the sustainability of our business over the longer term.

The Group as a whole and each of its life assurance operations are subject to extensive regulation and supervision, which are designed primarily to reinforce the Group's management of its long-term solvency, liquidity and viability to ensure that it can continue to meet obligations to policyholders. Further details on the current capital strength of the Group are provided on pages 37 to 39.

Period of viability assessment

The Directors have assessed the viability of the Group for a period longer than the 12 months required by the going concern statement.

The Directors performed the assessment by reference to the three-year plan period to 31 December 2022. Three years is considered an appropriate period as it represents the period covered by the detailed business plan that is prepared annually on a rolling three-year basis. In approving the business plan, the Directors reviewed the Group's projected performance with regards to profitability, cash generation and capital position, together with the parent company's liquidity over this three-year period. This projection involves setting a number of economic and other assumptions that are inherently volatile over a much longer reporting period. Such assumptions include foreign exchange rates, interest rates, economic growth rates, the impact on the business environment arising from geopolitical events and continued level of changes in regulation and supervision.

The Directors are satisfied that this period is sufficient to enable a reasonable assessment of viability to be made.

Assessment of principal risks over the period

The Group's business plan implements the Group's strategic objectives through the business model and activities discussed on pages 12 to 15. Matters considered as part of that planning process included the impact of pursuing a more diversified product mix in the US, the impact of the recent protests in Hong Kong on sales and the economic outlook for Hong Kong. Assessment of the risks to achieving the projected performance remains an integral part of the planning process. The Group's approach to risk management and a summary of the key risks facing the Group are set out on pages 51 to 71.

For the purposes of assessing the Group's viability, the Directors considered those risks where the impact of possible adverse external developments could be of such speed and severity to present a shock to the Group's financial position. The risks considered, from those detailed on pages 59 to 61 are: market risk, credit risk, liquidity risk and regulatory risk. The Directors considered the macroeconomic environment and geopolitical risks in the markets which the Group operates, as well as subsequently considering the impact of the outbreak of coronavirus ('COVID-19'), which could trigger wider economic consequences such as slow down or recession in key economies and negative impacts in the global financial market.

Stress and scenario testing

As noted above, underpinning the projections in the business plan are a number of economic and other assumptions. To evaluate the Group's resilience to significant deteriorations in market and credit conditions and other shock events, these risks are grouped together into scenarios which are then applied to the assumptions underlying the business plans considered. For example, scenarios were used to assess the potential impact of up or down interest rate movements combined with corporate credit spread widening, falling equity values and insurance stresses (such as changes in policyholder behaviour, including lapses, and increased morbidity in Asia), together with the impact on central liquidity of a scenario assuming the closure of short-term debt markets, as well as additional calls on liquidity by the business units.

The scenarios tested showed that the Group would be able to maintain viability over the three-year period under assessment, after taking account of the actions available to management to mitigate the impacts on capital and liquidity in such scenarios. In addition, the Group conducts an annual reverse stress test which gives the Directors an understanding of the maximum resilience of the Group to extremely severe adverse scenarios. This analysis assists in identifying management actions that could be implemented to restore the Group's capital and liquidity resources from extreme positions. This analysis also informs the Group's recovery plan and liquidity risk management plan.

The impact on the business of known areas of regulatory change whose financial implications can be reasonably quantified is also considered as part of the plan.

As well as known areas of regulatory change, the Group is exposed to the risk of sudden and unexpected changes in regulatory requirements at the Group and local levels. While unexpected changes cannot be fully anticipated and hence modelled, the risk of regulatory change is mitigated by capital held by the Group and its subsidiaries in excess of Group and local regulatory requirements, the Group and its subsidiaries' ability to generate significant capital annually through operational delivery and the availability of compensating actions designed to restore key capital metrics.

Conclusion on viability

Based on this assessment, the Directors have a reasonable expectation that the Group will be able to continue in operation and meet its liabilities as they fall due over the three-year plan period to December 2022.

Notes

- 1 Excluding assets held to cover linked liabilities and those of the consolidated unit trusts and similar funds.
- 2 Based on hierarchy of Standard & Poor's, Moody's and Fitch, where available and if unavailable, NAIC and other external ratings have been used.
- 3 Source of segmentation: Bloomberg Sector, Bloomberg Group and Merrill Lynch. Anything that cannot be identified from the three sources noted is classified as other. Excludes debt securities from other operations.

Purpose and responsibility

We exist to take the financial risk out of the biggest events in the lives of our customers, enabling them to face the future with confidence. As well as providing life and health protection, savings opportunities to meet family goals, and retirement income, we aspire to lead in new areas aligned with this purpose.

We are helping consumers postpone and prevent ill-health through digital innovation, increasing access to finance and providing solutions for an ageing world. At the same time, we are investing our customers' savings in the real economy, helping to drive sustainable growth. We are working every day to be a better and more sustainable business that continues, through our strong and clear sense of purpose, to have a positive impact. We are committed to delivering the best possible performance across all areas of our environmental, social and governance (ESG) activity, and we are continuing to develop to improve the way we work in the interest of all our stakeholders.

Non-financial information statement

We recognise that to help our customers de-risk their lives, we need to take a long-term view on a wide range of issues that affect our business and the communities in which we operate.

To do this, we maintain a proactive dialogue with our stakeholders to ensure that we are managing these issues sustainably and delivering long-term value. Further information on our engagement with our stakeholders can be found in our Section 172 statement below.

This strategic report complies with the Non-Financial Reporting requirements contained in sections 414CA and 414CB of the Companies Act 2006. This ESG

summary provides an overview of our activities and progress in 2019 across a range of areas in which we have helped to provide benefits to stakeholders throughout the markets in which we operate. For us, ESG means:

- **What we do** – the products we offer, our customer service, our human capital and the assets we own and operate; and
- **How we do it** – understanding our customers and providing suitable solutions that meet their needs, fostering long-term relationships with our stakeholders, investing in our people and making responsible investments, in order to generate sustainable long-term returns in line

with our risk appetite, meet our customers' needs and help build the communities in which we operate. Our ESG approach underpins the delivery of our strategy, generating sustainable earnings and resilient capital growth, enabling us to deliver on our promises to our customers. More detailed information on our ESG activities is available in our 2019 ESG report found at www.prudentialplc.com/investors/reports/2019.

UK Companies Act, Section 172 Statement

Section 172 of the UK Companies Act requires each Director to act in a way that he or she considers, in good faith, would be most likely to promote the success of the company for the benefit of its members as a whole. In doing this, Section 172 requires a Director to have regard (among other matters) to the needs of employees, suppliers, customers and other wider stakeholder interests. During 2019 we engaged with our various stakeholder groups closely and we took account of their concerns in our decision-making. Below we have outlined how we have engaged with our stakeholders and the outcome of that engagement.

How we meet our Section 172 duty

We ensure that our Board meets its duty under Section 172 of the UK Companies Act in a number of ways. A briefing note is circulated in advance of each Board meeting reminding Directors of their statutory duties under Section 172 and reiterating who the Group's key stakeholders are. The annual Board evaluation process takes into account how the operation of the Board affects the consideration of stakeholder issues and seeks to identify improvements in this area. We ensure that our Section 172 obligations are taken into account in our Board succession planning and training, stakeholder engagement is addressed in the Board's Terms of Reference, and there is guidance for individuals who prepare Board papers that references Section 172 duties and our key stakeholders. We ensure that we take account of any conflicts between different stakeholder concerns, and resolve such conflicts as smoothly as possible at the highest level necessary. The Board ensures that it listens to and acts on the views of a diverse range of shareholders, from large institutions to individuals, recognising that different types of investor have different investment mandates and varied

stewardship approaches. Information on the independence of our Non-executive Directors can be found in the Governance report on page 115. Through our Group Code of Business Conduct, we ensure that we maintain the highest standards of behaviour throughout our business. Our Group Code of Business Conduct sets out the standards the Board expects in relation to employee behaviour and our business units run mandatory training programmes to highlight the personal obligations applicable to each individual. The Board reviews both the content of the Group Code of Business Conduct and business unit compliance each year. Meanwhile our Group-wide whistleblowing programme, Speak Out, enables all stakeholders to raise concerns, helping to maintain the highest standards of behaviour.

Alongside continuing to build our business and serve the needs of our customers, during 2019 our main activity was the demerger of M&G plc from the Group, which we completed successfully on 21 October 2019. The demerger had an impact for all our stakeholders, and we took steps to ensure that we engaged with all our stakeholder groups on the long-term consequences of this significant step in the history of our business. We are confident that this decision was the right one for the long-term interests of the Group.

Customers

Helping to de-risk the lives of our customers and deal with their biggest financial concerns is at the centre of what we do, and listening to and understanding their concerns is key to the sustainability of our business. We engage directly with our customers through face-to-face advice, contact centres, dedicated account managers, sales support units, business processing and servicing, mobile phone apps and telephone technical support teams. The outcome of our engagements with customers is transmitted through the business and used to shape the design of our products and how and where we distribute those products, and ultimately to inform strategic decisions made at Board level. Decisions about which markets to access, what kind of products to offer and how to develop our agency force, our bank partnerships and our digital capabilities, are all driven by an understanding of what customers want, based on engagement with those customers.

During 2019, as well as making decisions on markets, products and platforms provided by the business, the Board paid

close attention to the effect on customers of the progress towards and conclusion of the demerger of M&G plc, including steps to ensure that customers were not disadvantaged and ensuring that they were fully informed of developments and prepared for the demerger when it was concluded. Other concerns raised by customers during the year included service delivery and issues with business processing, and these were dealt with through the business units, applying the highest standards of professional care and service in line with our Customer Commitments Policy.

Investors

We engaged with our investors through our annual and half-year reports, ESG Report and other regular reporting, including press releases and regulatory announcements. We held regular meetings with investors, including our Annual General Meeting, analyst meetings and investor roadshows, and a General Meeting to propose the demerger for approval by shareholders. Our Chairman met key investors on governance matters to address any other concerns they may have had, and our Senior Independent Director and the Chairs of our Board Committees made themselves available to meet investors.

The main concerns of investors during this period were around the demerger, in particular its execution and timing, as well as the nature and strategy of the post-demerger Group and our post-demerger dividend policy. The demerger was subject to shareholders' approval and was approved in line with the Board's recommendation. The demerger dividend policy was approved by the Board. Investors were also consulted on the principal changes to the Directors' Remuneration Policy. To strengthen the alignment between Executive Directors and the workforce, the policy includes pension benefits for new Executive Directors of 13 per cent of salary and a reduction in the pension benefits of incumbent Executive Directors. Climate-related financial risk also emerged as an issue of increasing importance to investors during the year, and we have responded to that concern by proceeding with our intensive work towards meeting the recommendations of the Financial Stability Board's Task Force on Climate-Related Financial Disclosures (TCFD).

Colleagues

During 2019 two of our Non-executive Directors, Kai Nargolwala for Asia and Africa and Tom Watjen for the US and the UK, were appointed to represent employee interests in line with new requirements under the revised UK Corporate Governance Code. They both conducted formal meetings with colleagues, including town halls and smaller-group meetings, and informal activities, including job shadowing and floorwalking. The Board is updated biannually on their activity and reflections. Across the business, we also held a variety of events to engage with colleagues, including town halls, smaller-group meetings and one-to-ones, and we used our various intranets for two-way communication, encouraging colleagues to submit questions and suggestions.

In 2019 the key concerns of colleagues were around the demerger, including what it meant for jobs, working arrangements and transfer of roles to M&G plc, and what it meant for the future of the business. Throughout this process, we kept our people informed about the progress of the demerger and the outlook for the Group, responded to all questions promptly and transparently, and escalated concerns to senior executives and the Board as appropriate. Ahead of the demerger, we also initiated a consultation on a set of proposed changes to our pension schemes for all our UK colleagues. A formal 60-day consultation took place to enable colleagues to understand the proposed changes in detail and respond to them. One-to-one, group and education sessions were held, and we received individual feedback submissions and questions to our helpline. Having discussed and reviewed the feedback, the pensions proposals were updated for both defined benefit and defined contribution members. Colleagues were also concerned about the impact of the demerger on shares, share options and existing employee share plans. In response, the Remuneration Committee approved a method for converting the value of the demerger dividend in specie into additional Prudential plc shares in respect of outstanding share awards of employees.

In order to support the Group's strategic direction and the focus of our technology resources on the development of customer-facing applications, the Board took the decision to outsource certain IT infrastructure and operations activities that were previously performed in-house within Prudential Corporation Asia and Jackson.

A significant factor in the choice of supplier was the strength of the employee proposition offered by the successful supplier. The vendor chosen committed to re-hire all identified impacted employees on substantially similar terms and conditions, for a minimum of 12 months. The firm was noted as a growing IT-focused service company, which would provide transferred staff with greater opportunities for growth and exposure and to work on new innovative technologies, and around 97 per cent of the affected colleagues agreed to transfer to the new provider.

Regulators

Prior to the demerger of M&G plc, the Group was subject to the consolidated supervision of the UK's Prudential Regulation Authority. Following the demerger, the Hong Kong Insurance Authority (IA) became Prudential's Group-wide supervisor. We have engaged with both regulators on a regular basis, sharing an agreed range of management information. The Board receives regular updates on our engagement with the Hong Kong IA regarding the shape of its legislative and regulatory framework. Hong Kong IA applies principles and standards to the Group through existing requirements to ensure that we are a fit and proper controller of regulated insurance companies. Hong Kong IA's principles include financial integrity, effective corporate governance and sound risk management. We undertook gap analysis of the Group's policies and processes against Hong Kong IA requirements.

Governments

We regard governments and legislatures in the markets in which we operate as important stakeholders. We monitor governmental and legislative activity, and meet periodically with government ministers and officials, elected or permanent, and legislators, legislative committees and committee members, either bilaterally or as part of wider groups, to help us understand their objectives, priorities and concerns, and how they affect or shape our business. Across the many markets where we operate, the company engages governmental and political stakeholders (including ministers, officials and legislators) to inform and influence public policy debate in a range of areas, including regulatory development, financial inclusion, fairness and consumer protection, capital market development, sustainable finance, job creation and skills, tax policy, trade policy, demography and ageing, health and wellbeing, and the

digital economy. During 2019 a number of key points emerged from these exchanges. One key area that arose and prompted action from us was life insurance penetration. Prudential was granted a life insurance licence from the Ministry of Planning and Finance of Myanmar, enabling us to start offering life insurance products and solutions in this market. Another was the gap in structural protection in Asia. After meeting with the former Deputy Prime Minister of Singapore, we committed to supporting the Global Asia Insurance Partnership for five years. A third area was digital innovation, and during the 2019 UK-Singapore Economic and Financial Dialogue, Prudential Singapore expanded its PruFintegrate initiative to London. Another key area was financial inclusion, and in Zambia we partnered with the Securities and Exchange Commission and Junior Achievement Zambia to roll out our global financial education and responsibility programme for children, Cha-Ching.

Suppliers

Each of our critical suppliers has a nominated contact within Prudential, and we meet those suppliers on a regular basis to address concerns on both sides. Ahead of the demerger of M&G plc, we engaged with 217 suppliers in the UK to explain the impacts of the demerger and contracting changes. During 2019, we found that our suppliers were primarily concerned about revenue protection during the demerger. We introduced an e-procurement system in our London head office to improve the control and monitoring of our purchasing activities and to provide suppliers with greater visibility over their payments.

Civil society

We respond to ad hoc requests from NGOs and hold meetings with them throughout the year. Our AGM provides the Board with an opportunity to engage with a range of NGOs that are shareholders, and the Board also receives an annual update on our community investment activity. During 2019, NGOs were primarily concerned with our climate impact, and in response we have proceeded with our work around meeting the recommendations of the TCFD, as well as closely monitoring our impact on the environment. In response to questions about our modern slavery risk, we conducted an analysis of all supplier spend in our London head office against the Walk Free Foundation's Global Slavery Index. Further details will be available in our 2019 Modern Slavery Statement,

which will be published on the Group website in May.

How we govern ESG

Our ESG Executive Committee leads on how we identify, manage and report on material ESG risks and opportunities. The ESG Executive Committee is chaired by our ESG sponsor, our Group Director of Communications, supported by senior

leaders from Group functions across financial reporting, risk, governance and human resources, with representation from our business units. The ESG Executive Committee meets quarterly and raises matters to the Nomination & Governance Committee as appropriate.

We make sure that the ESG issues that are important to our stakeholders are

understood and managed. This enables the Group to manage risks more effectively and better inform key decision-making. We strive to meet the expectations of our stakeholders in a transparent and fair manner, and this is underpinned by our comprehensive identification process, which enables us to address our material ESG issue effectively and constructively.

ESG policy framework – Group Governance Manual

The Group Governance Manual (GGM) establishes standards for managing key material ESG issues across the Group, setting out the policies and procedures to support how we operate. The GGM is used to ensure that we comply with relevant statutory and regulatory requirements. Our Group-wide policies relating to our identified material issues include:

| Material ESG issues | Our Group-wide policies |
|---------------------------|--|
| Business integrity | <p>The Group Code of Business Conduct details our required Standards of Business Conduct to be used across the Group and covers our employees and individuals or organisations acting on our behalf. The Code sets out our values around ownership, partnership and stewardship, and the personal standards we adhere to in the areas of: protection from financial crime, avoiding conflicts of interest, managing information, communicating as a Group and providing equality for our people.</p> <p>Anti-Bribery and Corruption Policy covers our values for reputation, ethical behaviour and reliability. As an organisation we are focused on financial practices that align to those values and we prohibit corruption or bribery within our working practices.</p> <p>Anti-Money Laundering and Sanctions Policy outlines how we prohibit money laundering or terrorist financing in our working practices, setting out how we establish parameters to prevent this taking place across the organisation and the commitment we have to comply with sanctions, laws and regulations by screening, prohibiting or restricting business activity, and following up through investigation.</p> <p>Security Policy outlines our commitment to ensuring security aligns to industry recommended practice for managing our regulatory and legal obligations. This includes how we manage incidents under the 'Speak Out' programme, our whistleblowing process.</p> <p>Tax Risk Policy includes our processes to manage tax-related risk, by identifying, measuring, controlling and reporting on issues considered an operational, reputational or regulatory risk.</p> <p>Political Donations Policy outlines our position that as an organisation we do not donate to political parties.</p> <p>Third-Party Supply Policy covers how we manage and oversee our third-party arrangements, through due diligence/ selection criteria, contractual requirements, the ongoing monitoring of such relationships and reporting and escalation. Additionally, our policy considers the requirements of the UK Modern Slavery Act and the principles of the UN's Universal Declaration of Human Rights.</p> |
| Customers | <p>Customer Commitments Policy covers our five key commitments to our customers and how we assess, manage and report on these:</p> <ol style="list-style-type: none"> 1 Treat customers fairly, openly and honestly; 2 Provide and promote a range of products and services that meet customer needs, are easy to understand and that deliver real value; 3 Maintain the confidentiality of our customer information (except where the law requires disclosure); 4 Provide and promote high standards of customer service and monitor these standards rigorously; and 5 Ensure that our complaints processes provide an effective and fair means of arbitration between the Group's businesses and customers. |
| Environment | <p>Environment Policy outlines our approach to understand and manage the direct environmental impact of the Group. This covers our measurement, monitoring, review and reporting of issues associated with our environmental performance.</p> |

| <i>Material ESG issues</i> | <i>Our Group-wide policies</i> |
|-------------------------------|---|
| Responsible investment | Owing to the distinct investment risks faced by our asset management and ownership businesses, with each investing in different markets and asset classes, each business manages ESG-related matters through the pursuit of business-specific responsible investment policies. This is overlain by our Group-wide Responsible Investment Framework, aligned to our Group Code of Business Conduct and underpinned by our Group Responsible Investment Standards. |
| Technology | Privacy Policy governs the protection of data and complies with the General Data Protection Regulation. |
| People | <p>Diversity and Inclusion Policy sets out how we foster an inclusive workforce and ensure all our employees are treated fairly and feel valued, and together have the diversity in skill sets and backgrounds that enriches the organisation. Our policy considers a range of diversity aspects of our employees, including gender, age, ethnicity, disability, sexual orientation and background. Further information on the diversity of our Board, our policy in respect of this, how this is implemented and the associated results in 2019 can be found in our Governance statement on pages 110 to 117. Employee Relations Policy outlines the way we engage our employees and motivate them to achieve success for the Group: promoting positive relationships with employees, representative organisations and trade unions, and maintaining a positive reputation for the treatment of employees. Performance and Learning Policy sets out the importance of our people and frames how we invest in their development to deliver against our strategy and the future success of the organisation. This includes our Performance Management Framework.</p> <p>Remuneration Policy outlines our effective approach to appropriately rewarding our employees in a way that aligns incentives to business objectives and enables the recruitment, retention and incentivisation of high-calibre employees in line with our risk appetite and Group Reward Principles.</p> <p>Talent Policy demonstrates how we attract and select the best people for roles that will ensure high performance in the short term and improve the longer-term succession and talent pipeline. It sets out our fair and effective approach to pursuing this.</p> <p>Health and Safety Policy covers our employees, business partners, customers and others that may be affected by our operations. This details our health and safety core principles, our commitments and the measuring and reporting on our health and safety performance.</p> |
| Communities | Community Investment Policy covers how we are committed to working with the communities in which we operate as active and supportive members. This also outlines our strategy for investing in the community and how we make investments and report against them. |

Summary of ESG issues

Our key ESG issues can be categorised into the following areas: customers, responsible investments, climate, business integrity, people, technology, environment and supporting our communities.

Customers

Our relationships with our customers are at the heart of our business. We deliver products that meet their needs and help them to de-risk their lives, and we ensure that we treat them with the highest standards of care. We are continually innovating to find new ways to improve the products we deliver, how we deliver them and how we serve our customers.

Our customer commitments

Helping customers achieve their long-term financial needs through our products and services lies at the heart of our business strategy. Our Customer Commitments Policy applies to all members of the Prudential Group that deal directly or indirectly with customers. These commitments are:

- 1 Treat customers fairly, openly and honestly
- 2 Provide and promote a range of products and services that meet customer needs, are clearly explained and deliver real value
- 3 Maintain the confidentiality of our customer information
- 4 Provide and promote high standards of customer service
- 5 Act fairly to address customer complaints and any errors.

Customer-first brand commitment in Asia

In 2019 Prudential Corporation Asia launched its new brand commitment, 'Listening. Understanding. Delivering.' The commitment reinforces our focus on human connections, simplicity and innovation for our customers. The commitment is about:

- Focusing on customers, anticipating their needs and enhancing their experience with easy access to information and services;
- Delivering comprehensive solutions for protection, health and wellness, savings and retirements; and
- Capturing innovation with a human touch.

In line with our commitment to help protect our customers' health, we have continued our efforts to create best-in-class health capabilities by offering more comprehensive and flexible coverage and a wider range of value-added services. Across Asia, consumers, healthcare providers, insurers and governments are confronted with problems such as a rising, underinsured middle class and a growing ageing population. As lifestyles in Asia have changed and income levels have risen, there has been a rise in non-communicable diseases such as diabetes. This has led to a growing demand for healthcare for more complex conditions, many of which require long-term treatment or management. We are taking steps to meet the needs of an ageing workforce and help people prepare for longer life. Our digital health tools aim to empower the broader consumer group to take control of their personal health and wellbeing anytime and anywhere. We also offer a wide range of insurance products that are tailored to local market requirements and fast-changing individual needs, such as Prudential Malaysia PRUMy Critical Care, which provides comprehensive financial protection against 160 critical illnesses, and Prudential Hong Kong's first-in-market cancer protection plan for cancer sufferers.

Financial security in the US

In the US, for those nearing the end of their working careers, a financially secure retirement is at risk due to insufficient accumulation of savings and the current combination of low yields and market volatility. Through our distribution partners, Jackson provides products that offer Americans the retirement strategies they need. Jackson seeks to provide the best retirement solutions that we can, while striving to communicate information about those products in a fair and transparent way. Jackson continues to be a leader in shifting perspectives and simplifying the language around financial products.

Expanding our distribution

We continue to expand our distribution platform in 2019, including by:

- Completing our acquisition of a majority stake in a leading life insurer in West and Central Africa
- Renewing our strategic Asian bancassurance alliance with United Overseas Banks, increasing its geographical scope
- Signing long-term exclusive partnerships with two banks in Vietnam.

Customer care

We are committed to offering our customers the highest standards of professional care and service. We take our commitment seriously when training our personnel, who deliver service consistent with our values. Where customers have cause to complain to us, we have documented procedures in place to manage complaints received through multiple touchpoints, in a timely, robust and professional manner and in accordance with our Customer Commitments Policy and local regulatory requirements. Business units conduct analysis of complaints to understand their underlying causes, with the aim of reducing the overall number of complaints, and perform ongoing monitoring to identify issues that could lead to customer detriment and take prompt action to address any errors.

Awards

In Asia in 2019, we won awards for our services to customers in Hong Kong, Malaysia, Thailand and Vietnam, and in the US we won awards for the quality of our customer contact, our service and our digital initiatives.

Responsible investment

As a life insurer, asset owner and manager, we believe that the quality of corporate governance practices, and how companies manage the environmental and social aspects of their operations, can be material to delivering superior financial returns and longer-term shareholder value. Responsible investment at Prudential involves incorporating ESG factors into our investment decisions, alongside traditional financial analysis, to better manage risk and generate sustainable, long-term returns for our customers.

Responsible investment landscape

Across the Group's footprint, the policy and regulatory landscape continues to evolve with respect to sustainable finance and ESG. For example, the Monetary Authority of Singapore (MAS) has signalled its commitment to promote sustainable practices by encouraging financial institutions to adopt ESG best practices and encourage the development of the green bond market. We are highly supportive of these efforts and are an active industry contributor, working closely with the regulator to advance this aim. Among policymakers, we continue to see increasing focus on the need to develop a view of the exposure of the insurance sector to climate-related financial risk. The Task Force on Climate-related Financial Disclosures (TCFD) recommendations were released in 2017 to provide a framework for companies to develop voluntary, climate-related financial risk disclosures. Following Board discussion, Prudential plc became a signatory to the recommendations in 2018 in order to meet the growing expectations of our investors and regulators, and to support the ambitions of our business units in the local markets in which we operate.

Strengthening our governance of responsible investment

Following the successful completion of the demerger of M&G plc in late 2019, we took the opportunity to further integrate our responsible investment activities within the ESG Executive Committee by extending membership of the Committee to the chief investment officers of our asset owner businesses.

Our Group-wide Responsible Investment Framework is designed to draw together the ESG-related approaches of our asset management businesses (Eastspring in Asia and PPM America in the US) and our asset owner insurance businesses (Prudential Corporation Asia in Asia and Jackson in the US). The ESG Executive Committee now maintains our Group-wide Responsible Investment Standards, which are based upon our Group Code of Business Conduct and set minimum requirements for each of our business units. These Group-level standards require all of our businesses to develop and maintain their own local responsible investment policies, which capture their own approaches to responsible investment and are appropriate to the jurisdictions in which they operate. The strength of the commitment of our asset management businesses to responsible investment and helping to build a sustainable financial system can be demonstrated by the fact that they are both signatories to the United Nations-supported Principles for Responsible Investment (Eastspring since February 2018 and PPM America since October 2018).

ESG integration in the investment process

Integrating ESG analysis into our investment processes is an ongoing activity that will continue to progress over time as the characteristics of each asset class and each of our investment strategies evolve. When making investment decisions, PPM America and Eastspring's Singapore-based equity team look to identify all material risks to sustainable earnings for a company. ESG issues are incorporated into our fundamental analysis and integrated into our decision-making process when we believe they could have a material impact on a company's valuation and financial performance. This analysis incorporates the governance of a company, as well as its social and environmental impact, including any plans or strategies to improve environmental performance and resilience, in our assessment of the drivers of longer-term returns.

In 2019, both PPM America and Eastspring made progress in enhancing the integration of ESG factors into their respective investment processes. Since implementing its Responsible Investment Policy in 2018, PPM America has continued to integrate ESG information in its processes, wherever possible, so that its investment professionals can assess and evaluate potential ESG risks. During 2019, the fixed income team at Eastspring Singapore built on its ESG approach and launched its first investment strategy focusing on sustainable bonds. For Eastspring Singapore's fixed income team, assessment and monitoring of ESG factors are an integral part of the bottom-up credit research process. ESG issues are incorporated in the fundamental analysis of individual companies to assess their impact on an issuer's financial performance, its risk of default and the valuation of the bonds it issues. This process involves an assessment of the quality of corporate governance, as well as material environmental and social issues that could have an impact on a business's day-to-day operation, financial performance, and subsequently the ability to pay back its obligations.

Industry engagement, memberships and collaborative bodies

During 2019, Eastspring continued to engage with industry participants to promote awareness and understanding of responsible investment across Asia, organising a number of workshops in Asia to continue to help improve the understanding of climate-related risks across the region. These were jointly held in partnership with organisations including the Asia Investor Group on Climate Change (AIGCC), the World Wildlife Fund and ISS Climate. Eastspring is an active member of the AIGCC, which aims to create awareness among Asia's asset owners and financial institutions about the risks and opportunities associated with climate change and low-carbon investing.

Eastspring continued to participate in industry roundtable discussions throughout 2019 and was a Sustainable Finance panel member at Euromoney's Asia Sustainable & Responsible Capital Markets Forum in June. In April, Eastspring Singapore also hosted a Bloomberg Buy-side Women's Network on Responsible Investment and ESG Integration. Both Eastspring and Prudential Corporation Asia are members of the Asian Corporate Governance Association (ACGA), and during 2019 Eastspring contributed to a number of ACGA white

papers on corporate governance in the China and Japan equity markets. Eastspring Indonesia also engaged with the ACGA regarding strategies related to improved corporate governance practices in relation to proxy voting.

Climate

We recognise that climate change presents long-term risks to the sustainability of our business, as well as a range of opportunities associated with the transition to a low-carbon economy. In 2018, following Board discussion, Prudential became a supporter of the recommendations of the Task Force on Climate-related Financial Disclosure (TCFD). This reflects both the growing expectations of our external stakeholders and colleagues, and the ambition among our businesses to develop their capabilities to pursue products and services aligned to the global need to address the impacts of climate change.

Risks and opportunities

We are committed to developing a more granular understanding of the diverse risks we face and to working collaboratively with governments, peers and business partners to identify opportunities at scale for our businesses. During 2019, we focused on enhancing access to ESG and climate risk data sources and the carbon footprinting of sample Asian investment portfolios. During 2020, our priorities are to determine the Group's exposure to carbon-intensive sectors and companies, extend carbon footprinting across the Group's investment book and to refine the initial stress testing of the investment book for climate-related scenarios.

Governance

Our ESG Executive Committee, established in 2018, is focused on the holistic assessment of ESG matters material to the Group, raising matters to the Nomination & Governance Committee as appropriate. One of the ESG Executive Committee's principal responsibilities is to oversee the Group's progress towards fulfilling our commitment to report against the TCFD recommendations. This involves oversight of our Group-wide efforts to assess the climate-related risks and opportunities facing our businesses, and to subsequently identify and deliver the supporting implementation activities.

Following the successful completion of the demerger of M&G plc in late 2019, we took the opportunity to increase Committee representation from our businesses in Asia. We also took steps to further integrate our

responsible investment activities within the ESG Executive Committee by extending participation on the Committee to the chief investment officers of our asset owner businesses, reflecting the increasing importance of our investment activities within the development of our overall ESG strategies. Committee members include: the chief investment officers of our asset management businesses (PPM America and Eastspring), the Chief Investment Officer of Prudential Corporation Asia, Jackson's General Counsel, Prudential Corporation Asia's Chief Operating Officer, and representatives from Group functions.

The ESG Executive Committee meets quarterly and is required to report to the Board at least twice each year, with additional ad hoc reporting provided as necessary. The ESG Executive Committee reports to the Board through the Group Nomination & Governance Committee, which comprises the Group's Chairman, the Senior Independent Director, and the chairs of the Audit, Remuneration and Risk Committees, and is regularly attended by the Group Chief Executive.

Strategy

As an asset owner and asset manager, we rely on investment returns to fulfil the longer-term obligations of our saving, annuity and health and protection liabilities. We recognise that in the transition to a low-carbon economy, there may be a disorderly adjustment to the value of the assets that we hold, arising from regulatory and technological change. The physical impacts of climate change, such as rising temperatures, rising sea levels and increased occurrence of extreme weather events, may also impact the value of the Group's assets. Such physical risks may also cause disruption to our customers, employees and property portfolio.

We also recognise that climate-related opportunities can support the delivery of the Group's strategy. For example, Eastspring is a member of the Sustainable Development Investment Partnership initiative, coordinated by the World Economic Forum with support from the OECD, working with others to scale the use of finance in sustainable infrastructure investments in emerging and developing countries. Since 2016, our US asset manager's approach to ESG integration was a key factor in the sale of \$55 million of utilities credits that generate electricity primarily by coal, and the purchase of \$105 million of single-asset project bonds that generate 100 per cent of their electricity through renewables.

As a life insurer, the potential impact of climate change on life expectancy (mortality risk) and medical health and well-being (morbidity risk) could impact the profitability of our protection and health insurance products respectively. The long-term impact of climate change on the life insurance sector is complex, as climate change acts in conjunction with other factors, including demographic and social change and rapid urbanisation, all of which place increased demand on health services. As the risks from climate change intensify, so will the consequences for humanity and the natural environment – from disruptions in food, water and energy supplies to rising sea levels and increased occurrence of extreme weather events. In some regions, the negative impacts of climate change may have serious implications on public health, for example increasing the levels of life-threatening vector-borne diseases. Against this backdrop, there is a need for us to develop products and services that help to provide protection and support climate change adaptation.

Risk management

As a long-term investor, the Group's most significant exposure to climate-related risk is through our role as an asset owner and manager, with \$543.9 billion of assets under management. Our portfolio is exposed both to physical risk and transition risk as a result of climate change and we are using a range of methodologies to develop a more accurate understanding of the carbon intensity of our asset book and its exposure under a range of climate change scenarios. Through this process, we are seeking to develop metrics for actionable insights, which will help to inform the Group's Responsible Investment Standards and to direct our investments in the low-carbon economy, and reduce our exposure to climate risk.

We have begun to assess the climate transition risk exposure of our portfolios using a third-party carbon footprinting data and software provider. Our Asian asset manager, Eastspring, has taken the lead across the Group in starting to measure and interpret the carbon footprint for listed equities in sample portfolios. This tool allows us to assess the carbon footprint of the portfolio constituents compared to historical constituents, the carbon efficiency of the portfolio, the exposure of a portfolio to fossil fuels, potential emissions from fossil fuels, the strength of carbon risk management relative to industry peers and a portfolio's exposure to clean technology.

In order to assess our exposure to transition and physical risk, respectively, we have begun to explore the impact of temperature increase scenarios, over medium and long-term time horizons, on our investment portfolios. For this, we are using the guidance provided by the UK's insurance regulator, the Prudential Regulation Authority, and informed by the IPCC, as part of the regulator's August 2019 stress test exercise.

As a global business, we recognise the need for the Group to understand and mitigate the physical risks associated with climate change. The location of a significant number of our markets increases their vulnerability to climate change. Local environmental risks, including their potential short and medium-term impacts, are tracked and managed by our business units, with support from Group Risk and Security teams. This includes but is not limited to forecasts and reporting, business continuity advice and incident management planning. We manage the physical risk to our operations through comprehensive risk assessment during the selection of properties, including factors such as location, geography and weather events.

Our business units manage morbidity and mortality risk by analysing our experience from our customers, supplemented by industry data and stress testing. We assess changes in morbidity and mortality that have been observed in the past and consider how they may emerge in the future. As a life and health insurer, we are committed to playing a greater role in preventing and postponing illness in order to protect our customers. We are investing in artificial intelligence technology to enable access to affordable and quality healthcare and enhancing our digital offering to help improve access to finance and health protection products.

We continue to engage with policymakers and NGOs on this topic. We also work collaboratively with our peers through a range of networks, including the CRO Forum, the Asian Investor Group on Climate Change and ClimateWise. During 2019, we contributed to a ShareAction/AODP report entitled 'Insuring a low-carbon future', exploring leading practice and common barriers in managing climate-related risks and opportunities.

Metrics and targets

We participate in external benchmarks that assess our management of climate change risks and opportunities. In 2019 we continued to participate in CDP (formerly the Carbon Disclosure Project) and maintained our score with a B grading (2018: B). We continue to participate in ClimateWise, which in 2019 changed significantly to align itself with the TCFD framework. The Group score, similar to other organisations, is down from our previous submission (2019: 51, 2018: 78), but we remain committed to enhancing our climate change disclosures, in line with TCFD. Our scoring in CDP and ClimateWise is based on the performance of the pre-demerger Group, including M&G plc. We seek to minimise the impact of our direct operations on the environment. More detail on our environmental performance is included in the Environment section on page 84 of this report.

Business integrity

We are strongly aware of our purpose, which is to help people de-risk their lives and deal with their biggest financial concerns. In line with this purpose, responsible and ethical behaviour are embedded in our business. Our governance framework is clear about our standards of behaviour and those standards flow into every part of what we do, from our financial performance and tax practices to the way we fight financial crime and deal with our suppliers.

Our Code of Conduct

Our governance framework, setting out the principles by which we conduct our business and ourselves, includes our Group Code of Business Conduct, which is a central feature of our Group Governance Manual. Our Group Code of Business Conduct sets out the ethical standards that the Board expects of itself, our employees, our agents and others working on behalf of the Group. The Group Governance Manual consists of a range of policies covering all of our business units, setting out our principles for good governance. We review these policies on a regular basis to ensure that we meet the expectations of our stakeholders.

Financial strength

We contribute to financial stability and sustainability in all of the markets in which we operate. We fulfil our purpose by seeking to provide products and services that align with important global social needs and thereby generate sustainable value for stakeholders. Our products and services are designed and delivered with that purpose clearly in mind. Through the combination of our consistent strategy, our diversified portfolio of businesses and our disciplined execution, we have continued to create long-term value for customers, shareholders and other stakeholders.

Responsible tax practices

The responsible and sustainable management of our tax affairs helps us to maintain constructive relations with our stakeholders and play a positive role in the economy. Tax revenues are fundamental to sustainable development in those communities.

We understand the importance of paying the right amount of tax on time. We manage our tax affairs transparently and seek to build constructive relationships with tax authorities in all the countries in which we operate. Our Tax Risk Policy outlines our processes to identify, measure, control and report on risk across four categories: technical judgements, operations, regulations and reputation.

Our tax strategy is published annually and, as well as complying with the mandatory requirements under the UK 2016 Finance Act, includes additional disclosures, including a breakdown of the types and amounts of taxes we pay globally, which includes taxes borne and collected on employee income, for example social security. Furthermore, we disclose the revenues, profits, average employee

numbers and taxes on a country-by-country basis where more than \$5 million of tax was paid.

We are due to publish our updated tax strategy, which will include more information on the tax we paid in 2019, how we manage our tax affairs and the governance and management of tax risk, by 31 May 2020.

Fighting financial crime

We take the fight against money laundering, terrorist financing, bribery and corruption and fraud seriously and are committed to implement and maintain industry-leading policies and standards. In the majority of our markets we maintain business relationships with agents and intermediaries, who act on our behalf. We provide training to our staff to ensure they are familiar with international standards and best practice, as well as being well equipped to implement our policies in their respective markets.

Our Group-wide financial crime policies were updated in 2019 to reflect the requirements of our new lead regulator, the Hong Kong Insurance Authority. Our Group anti-bribery and corruption policy provides guidance to our diverse businesses on gifts and hospitality and how we deal with government officials, and highlights the importance of due diligence when dealing with third parties.

All of our Group-level financial crime policies are cascaded down to local business units through regional compliance teams, which ensure adherence to the Group requirements and applicable laws and expectations of local regulators. These policies are part of the Group governance framework, with business units attesting their compliance in addition to compliance and internal audit reviews.

The Group Risk Committee continues to review the effectiveness of the financial crime programme and the Group Financial Crime Compliance team regularly updates the Committee on risks and controls, and on the improvements made to processes in the financial crime framework. Any material matters on financial crime are reported to the Committee.

Whistleblowing

Our Group-wide whistleblowing procedures apply to all our colleagues and are supported by Speak Out, our Group-wide whistleblowing programme. Speak Out is available both internally and externally to staff, contractors, vendors,

agents, clients and the public, enabling reporters to raise concerns in a choice of languages through web and hotline channels. Reporters are able to log concerns covering a range of issues, including but not limited to anti-bribery and corruption, compliance breaches, discrimination and harassment and health and safety. Concerns are recorded by an independent third party and investigated by appropriately trained and skilled investigators. Qualitative programme improvements in 2019 included updates to the website, case management system upgrades, refreshed staff training and enhanced training for line managers. Since launching Speak Out in 2016, the number of concerns reported has increased by nearly 200 per cent.

Supply chain

Our Group Code of Business Conduct outlines the values and standards that are required by each of our suppliers. Our Group Third-Party Supply policy is core to our supply chain governance and specifies our position on supply chain management, setting out our approach to due diligence, selection criteria, contractual requirements and ongoing monitoring of relationships. Business units conduct due diligence before engaging with and ultimately selecting a new supplier. We perform regular due diligence, review meetings and audits where required, and our policies and procedures are supported by regular employee training exercises. In July 2019, we introduced the Workday platform, an e-procurement and general ledger system, at our London head office to improve the control and monitoring of purchasing activities. This system also allows us to better understand the composition of our supply chain and to automate our payments to help make sure we pay businesses in a timely way.

Being a responsible business also requires organisations to ensure that they meet and strive to surpass commitments to the UN's Declaration of Human Rights. We act with integrity to ensure that modern slavery, human trafficking, child labour or any other issue that subjugates human rights is eradicated from our supply chain.

People

We provide an inclusive working environment in which we develop our talent, reward great performance, protect our people and value our differences, and we believe that such an environment is essential to enabling us to deliver for our customers, shareholders and communities.

Diversity and inclusion

Having the benefit of diverse perspectives and experiences within our organisation is important to our success and fulfilling our purpose. Diversity and Inclusion (D&I) is an important priority for Prudential and the Group HR Director is the executive sponsor for D&I across the Group. Through the Group D&I Policy we ensure that we provide equal opportunities to our workforce, fostering a collaborative and supportive environment in which our employees are treated with dignity and respect.

Our strategic, long-term approach to D&I is reviewed regularly to ensure that it remains outcomes-focused and enables Prudential plc to be appropriately placed to become a more diverse and inclusive organisation over time. The Board of Prudential plc is committed to recruiting the best available talent and appointing

the best candidate for a role, from Board level to any role within the wider company, ensuring the necessary diversity of experience, skillsets and professional backgrounds.

As a signatory to the HMT Women in Finance Charter since 2016, we have an externally disclosed target of having 30 per cent women in senior management by the end of 2021. At 31 December 2019 the figure was 28 per cent and we remain on track to meet our 2021 target.

We give full and fair consideration to applications for employment by disabled people. If an employee incurs a disability while employed by us, efforts are made to continue their employment. Training, career development and promotion opportunities are equally applied for all our employees, regardless of disability.

Prudential headcount as at 31 December 2019

Gender diversity: senior management

* Pre-demerger position

Gender diversity: all employees

| Headcount | Total | Male | Female | Undisclosed ² | Unspecified ³ |
|---|--------|-------|--------|--------------------------|--------------------------|
| Chairman and Independent Non-executive Directors | 10 | 7 | 3 | – | – |
| Executive Directors | 3 | 3 | 0 | – | – |
| Group Executive Committee (GEC) Includes Executive Directors | 7 | 6 | 1 | – | – |
| Senior managers Excludes the Chairman, all Directors and GEC members | 53 | 38 | 15 | – | – |
| Whole company ¹ Full-time equivalent Includes the Chairman, all Directors, GEC members and Senior Managers | 18,125 | 8,137 | 9,914 | 41 | 33 |

Notes

- 1 Excludes Prudential Corporation Asia joint ventures.
- 2 In many of our businesses, we provide our employees with the option to not disclose their gender. For these employees, gender is recorded as 'undisclosed'.
- 3 No specification or information is captured on gender for an immaterial number of our employees. These employees are recorded as 'unspecified'.

Responsible working practices

We are committed to supporting human rights and to acting responsibly and with integrity at all times. Our policies are guided by the principles of the UN's Universal Declaration of Human Rights and the International Labor Organization's core labour standards, which are incorporated into our Group Code of Business Conduct, setting out our values and standards of employee behaviour, and into our Group Third-Party Supply Policy.

Our Group Employee Relations and Resourcing policies are available on the Group website at www.prudentialplc.com/investors/governance-and-policies/employee-relations-policy, along with our Board-approved Modern Slavery Act statement at www.prudentialplc.com/investors/governance-and-policies/modern-slavery-statement. Our business units implement policies and practices at a local level that aim to ensure compliance with statutory and regulatory requirements in the local labour market and the prevention of slavery, human trafficking and child and forced labour. Compliance with Group policies is certified annually through our Group Governance Manual attestation process.

In 2019, we again participated in ShareAction's Workforce Disclosure Initiative (WDI), which aims to create transparency for investors about how companies manage their workers, both in their direct operations and supply chains.

Talent development

Developing our people is key to achieving our strategic objectives as a responsible business and to the long-term success of the company. Prior to the demerger of M&G plc from the Group, we created two full boards and senior management teams for two FTSE 100 companies, providing individuals with development opportunities and career progression. Our priority now is to ensure that we have the diverse short, medium and long-term talent we need in an inclusive environment to deliver on the strategic priorities of the newly shaped organisation. Group HR focuses on developing senior leadership through an annual process of talent review, and we use succession planning to continue developing leaders and critical specialists, segmenting our talent to identify short, medium and long-term successors. We develop our senior executive leaders through a bespoke exercise based on their aspirations and the skillsets they need to continue to be successful, including fostering innovation, leading transformation and driving

digital capability and execution through collaboration. The Board receives an in-depth talent review, led by the Group HR Director, once a year.

Employee engagement

We want to foster an environment in which employees feel empowered and which provides them with an opportunity to make an active contribution to the organisation and the communities we serve. We drive employee engagement through a number of initiatives, including colleague appreciation programmes, wellbeing programmes, networking opportunities with peers and senior leaders across functions and employee focus groups. In the US, Jackson's Organisational Survey ensures that all associates have an opportunity to share their thoughts and make the organisation an even better place to work. The 2019 results show that associates are satisfied with their work and proud to be a part of Jackson. The areas of ethics and corporate responsibility were among the highest-scoring.

The Group's community investment strategy is closely aligned with our business purpose and one of the principal themes is employee engagement. Many of our employees play an active role in their communities through volunteering, charitable donations and fundraising. Chairman's Challenge is our flagship international volunteering programme, bringing people together across the Group to help their communities. More information is available in the Supporting our communities section on page 86.

The Board has considered options to ensure its decisions are informed by an appreciation of employees' views and in line with expectations of the UK Corporate Governance Code.

Performance and reward

We structure our reward arrangements to attract, motivate and retain high-calibre people. Our people contribute to the success of the Group and are rewarded accordingly. We recognise and reward high performance and are committed to a fair and transparent system of reward. Among our benefits, we offer employees competitive pension arrangements.

We also believe in the importance of giving employees the opportunity to benefit from the Group's success through share ownership, and operate share plans for employees in the UK and Asia. This includes the award-winning PruSharePlus plan, which enables employees in Asia to

share in the longer-term success of the business and actively encourages share ownership and engagement. Similar all-employee share plans operate in the UK.

Executive remuneration

The Group's executive remuneration arrangements reward the achievement of Group, business, functional and personal targets, provided that performance is aligned to the Group's risk framework and appetite and that our conduct expectations, as well as those of our regulators and other stakeholders, are met.

For the seventh consecutive year, salary increases in 2019 for executives were aligned with the bottom of the range of pay budgets for the wider workforce. In order to strengthen the community of interest between executives and other shareholders, remuneration is linked to sustained performance over the longer term. For example, 40 per cent of Executive Directors' bonus is deferred in shares for three years. The Remuneration Committee's Terms of Reference were updated in 2019 to incorporate updates to the Corporate Governance Code and to reference the Hong Kong Insurance Authority's remuneration requirements. More details on executive remuneration can be found in the Directors' Remuneration Report on page 136.

Technology

In the face of technological advancements and evolving customer needs, we actively embrace the latest technology and embed digital capabilities in our business model. We continually increase the automation of our operations in order to improve both business efficiency and customer satisfaction.

Increasing access to digital health tools in Asia

Access to physicians remains a challenge for many communities across Asia. To aid the expansion of our role from providing protection to preventing and postponing adverse health events, we have launched Pulse by Prudential, an all-in-one digital app that forms the core component of our pioneering digital health proposition. Accessible to everyone, Pulse uses artificial intelligence-powered self-help tools and real-time information to offer holistic health management to customers in Asia. Pulse is an evolving platform and consists of a range of partnerships with health and technology companies. Our partnership with Babylon enables users to monitor their health status online. We are also working

with a range of local and regional partners to provide increasingly personalised health management services to consumers. For example, through our partnership with Tictac, we are able to provide personalised wellness services to consumers by combining a user's lifestyle signals from their apps and wearables with contextual information about their surroundings. This information helps guide users to achieve their health objectives, such as preventing diabetes or reducing stress levels, by establishing good nutritional and fitness habits or instilling behaviours that are beneficial to their health.

Using technology to enhance our capabilities

In 2019, Jackson invested significant time and resources with fintech partners to help illustrate the benefits a lifetime income solution can provide within a comprehensive wealth management plan. The fintech platforms where Jackson is actively engaged include eMoney, MoneyGuidePro, and Envestnet. The technology solutions provided by eMoney reach more than 60,000 financial professionals, serving nearly four million households nationwide. During 2019, Prudential Singapore strengthened its partner network of fintech, insurtech, healthtech and medtech companies with the third edition of its flagship innovation initiative – the PRU Fintegrate Partnership. Our smart underwriting tool, which is now used in 64 per cent of all new sales, offers dynamic underwriting that streamlines the application process and communicates instant underwriting decisions to customers.

Promoting financial inclusion, protection and participation

In June, we announced a strategic partnership with OVO, a digital payments, rewards and financial services platform in Indonesia. Available on over 115 million devices, OVO is the preferred digital payments platform for Indonesians, with over 500,000 merchants and a presence in 319 cities. The partnership significantly enhances our reach to digitally minded consumers in one of Asia's fastest-growing insurance markets and is a key step in our broader commitment to make health and wealth services affordable and accessible to all Asians. Recognising the high cost of and unequal access to healthcare in the Philippines, Pru Life UK, our life insurance business in the Philippines, has the ambition to make health accessible and affordable to all through the use of mobile digital health. In 2019 PruLife UK published an

independent study, which it commissioned to examine the readiness of the country's regulatory and legal framework to support the development of mobile digital health.

Information security

As consumers seek on-demand, 24-hour access to our products and services, loss of access has the potential to have a significant impact on our customer relationships and our brand reputation. Furthermore, many of the social benefits of new technology, such as financial inclusion and greater access to primary healthcare, may not be realised. In this context, information risk remains an area of prominent concern and focus for ourselves, regulators and businesses globally. For us, information security is rated as a principal risk, demonstrating our continued commitment to securely managing the information our customers entrust to us.

During 2019, we implemented a long-term shift from federated information security teams within each business unit to a single Group-wide team leveraging skills, experience and resource globally via a "centres of excellence" model. This new model will support collaboration and skills-sharing across the whole Group. Throughout 2019, the transition to the new model has been progressing under the newly appointed Group Chief Information Security Officer. To support the new model, we developed a new Global Information Security Policy, which came into force in 2020. The policy has been mapped to numerous international and local standards.

How we manage information security risk

Effective risk management is key to the successful execution of our objectives and the newly formed Group-wide Information Security and Privacy Committee defines and provides governance and the risk management framework for information security risks across the Group. This Committee meets at least quarterly and is a sub-committee of the Group Executive Risk Committee (GERC), which is chaired by the Group Chief Risk and Compliance Officer and of which the Group Chief Information Security Officer is a standing member. The Information Security team also works closely with the Group Risk function to define information security as a risk within the business. The Information Security team regularly reports on security risk and performance to the Group Risk Committee and the GERC, demonstrating the priority and level of executive oversight

assigned to information security risk and the management of these risks. We monitor our information security risks through our Group-wide key performance indicators, which map to the industry-leading National Institute of Standards and Technology Cyber Security Framework and other frameworks. Our Security function retains its overarching commitment to protect the business, comply with all applicable laws and regulations, and support the growth of the Group securely.

In 2019 we launched several projects to enhance our approach to information security assurance using automation and analytics. In Asia we have introduced automated firewall rule analytics to provide deep-dive real-time reviews on the performance of our on-premise firewalls. Projects such as these are driving our approach to innovating our assurance processes to provide greater visibility in a faster and more efficient manner, while protecting the information entrusted to us.

Training, awareness and Board oversight of information security risk

Our staff are critical to protecting the information entrusted to us by our customers. Consequently, information security awareness training is integral to ensuring that our information and systems remain safe. All members of staff, including temporary staff, across all of our businesses are mandated to complete this training at least annually. Training is provided locally to support local languages and reflect any local regulatory and legal requirements. Completion is tracked within each business. This training is supplemented with simulated phishing campaigns quarterly to test how staff respond to these attacks in 'real world' scenarios. This focus extends to our Board and executives. Throughout the year our Non-executive Directors have access to one-to-one training, often delivered by the Group Chief Information Security Officer, on topics including cyber threat and privacy.

Incident response and resilience

While our aim at Prudential is always to prevent incidents wherever possible, we must ensure that we are prepared to respond to any incident in a timely and effective manner. Incident response plans are developed, maintained and tested regularly, and the Group Information Security & Privacy team maintains a close working relationship with business continuity and disaster recovery teams to ensure alignment of plans and support in the event of an incident. Regular scenario-

based testing of these processes serves both to confirm the effectiveness of the plans and provide assurance that staff, including senior executives, are prepared for such an event.

Privacy and data protection

In 2019, our focus was dedicated to maintaining awareness as well as enhancing and embedding activities that were implemented as part of the General Data Protection Regulation programme, in order to strengthen and sustain ongoing compliance. Our Group Privacy Office, which we established in 2018, continues to maintain oversight of privacy compliance. In addition, the Office works with Group businesses across Asia, Africa and the US to support and advise on ongoing privacy compliance as well as to provide a point of escalation for resolving data privacy issues.

Environment

We are determined to minimise our impact on the environment in line with our purpose of improving the lives of our customers and their communities. We are responsible for understanding our impact on the environment and doing what we can to minimise any damaging effects. We measure our environmental performance and take action to ensure that we improve that performance year after year.

Managing our direct impact

Our Group Governance Manual underpins all our activities, including minimising the direct impacts of our operations on the environment. Our Group Environmental Policy applies to our operational properties worldwide, guiding our approach to the management of the direct impacts of our business units, including compliance with environmental laws and regulations with respect to emissions, energy consumption, water use, waste disposal, environmental supply chain management and the adoption of risk management principles for all property-related matters. Business unit performance is monitored against the Group Environmental Policy and updates are provided to the Board. We participate in external benchmarks that assess our management of climate change risks and opportunities. More information is available in the Climate section on page 78 and information on our wider environmental impact can be found in the Responsible Investment section, on page 77.

Global environmental targets framework

In 2016 we developed a global environmental targets framework to drive improvements in environmental operational performance. This framework was aligned to the operational footprint of the pre-demerged Prudential Group and, as such, a number of targets are no longer relevant to the demerged Group. The Group's new operational footprint provides an opportunity to develop targets that are more closely aligned with that footprint and our ambition in this area. During 2020, we are reviewing our global environmental targets framework for the demerged Group and new targets will be established to start from 2021.

The highlights of our 2019 environmental performance are available below. These metrics cover the performance of the demerged Prudential Group for 2019 and form the new baseline data from which we will measure future environmental performance. The demerged Prudential Group is 24 per cent smaller (based on headcount) than the Prudential Group including M&G plc. Consequently, the reported figures are much lower than the values reported in 2018.

Our environmental performance

1 Energy and climate change – understanding our impacts, reducing our greenhouse gas emissions and developing longer-term actions

In 2019, our global energy use (for the provision of small power, heating and cooling) across our occupied estate was 91,921 MWh. Across our occupied estate, our global absolute Scope 1 and 2 (market-based) greenhouse gas emissions were 56,421 tCO₂e. When normalised against net lettable floor area, our Scope 1 and 2 emissions were 105 kg CO₂e/m².

In Asia, we completed seven site assessments as part of our work towards achieving our target to conduct energy assessments of our 20 highest energy-consuming sites. In the US, Jackson continues to reduce energy usage and decrease our carbon footprint, and in 2019 completed a range of projects at our Corporate Way campus in Lansing, including installing high-efficiency rooftop CO₂ sensors, high-efficiency water heaters, an energy recovery ventilation unit and a new dust-collector filtration system to reduce exhaust and recover energy in printing facilities.

As in 2018, we have disclosed our Scope 3 air travel booked from the UK. We will continue to work with our business units across all of our regions to extend our Scope 3 emissions reporting. In 2019 our reported air travel emissions were 6,092 tCO₂e. During 2019 we chose to offset our air travel, covering both our reported and unreported emissions.

Our full greenhouse gas emissions statement can be found below.

2 Construction and refurbishment – delivering sustainable outcomes through property projects and improved wellbeing of our employees

Refurbishment projects and new office builds provide an opportunity to improve the environmental performance of our estate. Each business unit has the autonomy to deliver sustainable building certification most relevant to its region and develop standards or guidelines considered most appropriate in its market. Our new London office, which we occupied in April 2019, is rated as BREEAM Excellent. In Malaysia we have consolidated our headquarters operations into a new LEED Gold building in the Tun Razak Exchange, part of Kuala Lumpur's new business and international Financial District. In order to align and promote sustainable best practices throughout the life-cycle of our occupied estate, Prudential Corporation Asia developed a Smart Leasing Toolkit and an Environmental Design and Construction Guide.

3 Waste and recycling – reducing the waste we generate and diverting waste from landfill through recycling and recovery

During 2019, we generated 864 tonnes of waste in the UK and the US. The quality of the data being collected in Asia on waste continues to become more reliable and will be a focus area for ongoing reporting in 2020. Of the UK and US total, 63 per cent was diverted from landfill through recycling, composting or incineration. Scope 3 carbon emissions associated with our waste are calculated at 42 tCO₂e, a minor contribution to our overall corporate footprint in comparison with the energy use of our buildings and air travel. We continue to work with our suppliers to seek opportunities to increase recycling rates and decrease waste generation in the first instance.

4 Water consumption – assessing and reducing our use of water

In 2019, absolute use of water across our global occupied estate was 229,268 m³. When normalised against headcount, our use of water was 12.6 m³/employee. In the US, irrigation central control has been installed and activated for systems in part of Jackson's Corporate Way campus.

Desktop software and mobile phone applications are being used to monitor water usage, providing automated shut-off capability should there be any breaks in water supply lines.

5 Sustainable procurement – partnering our supply chain to deliver sustainable solutions and source responsibly

The continued support of our supply chain is key in becoming a sustainable business. Our procurement team ensures that environmental requirements are integrated into procurement frameworks and form part of the supplier selection criteria.

Prudential plc – greenhouse gas emissions statement

We have compiled our global GHG emissions in accordance with the Companies Act 2006 (Strategic and Directors' Reports) Regulations 2013. GHG emissions are broken down into three scopes; we have included full reporting for Scope 1 and 2 and select Scope 3 reporting as best practice. Scope 1 emissions are our direct emissions from the combustion of fuel, fugitive emissions and company owned vehicles. Scope 2 emissions cover our indirect emissions from the purchase of electricity, heating and cooling. We have reported our Scope 2 emissions using both the location and market-based methods in line with the GHG Protocol Scope 2 Guidance. Our Scope 3 footprint includes UK booked business travel for the occupied estate, global water consumption from the occupied estate and waste generated from occupied properties (UK and US). We continue to work with our business units to review the extent

of our Scope 3 reporting and increase coverage where practicable. Our 2019 reporting covers the period 1 October 2018 to 30 September 2019. Please refer to our Basis of Reporting and supplementary reporting online for further detail on our methodology, reported consumption and drivers of variation.

Group total (including continuing and discontinued operations)

| Emissions source | 2019 | 2018 | % change |
|--|---------------|-----------------------|--------------|

Data notes:

Reporting period: 1 October 2018 to 30 September 2019. Baseline year: 1 October 2017 to 30 September 2018. Independent assurance: Deloitte LLP has provided limited assurance over selected environmental metrics in accordance with the International Auditing and Assurance Standards Board's (ISAE3000 (Revised)) international standard. Consolidation (boundary) approach: Operational Control. Consistency with financial statements: The reporting period does not correspond with the Directors' Report period (01 January 2019 to 31 December 2019) as it was brought forward by three months to improve the availability of invoice data and reduce reliance on estimated data. Prudential owns assets, which are held on its balance sheet in the financial statements, over which it does not have operational control. These are excluded from the data below. Assets not included on the balance sheet but held under an operating lease and where we have operational control are included. Emission factor: Scope 1 and 3 reporting uses the UK DEFRA 2019 GHG Conversion Factors. Scope 2 calculations use the IEA GHG 2019 Conversion Factors for location-based reporting. Market-based reporting uses supplier emission factors for our UK REGO-backed supply and RE-DISS factors where available. Accounting methodology: The Greenhouse Gas Protocol Corporate Accounting and Reporting Standard. Materiality threshold: Five per cent. Data restatements:⁽¹⁾ 2018 figure restated as accurate data became available from suppliers.

Supporting our communities

Our community investment strategy is closely aligned with our business purpose and with our stakeholders' concerns and interests, and is focused around four principal themes: social inclusion, education and life skills, disaster preparedness and employee engagement. We take an active approach in helping tackle environmental and social challenges. Our strong contribution, harnessing the commitment of our people, continues to improve lives and build communities, wherever we work.

Our approach to community investment

Our relationships with our charity partners are long-term, involving support through both funding and skills-based employee volunteering. Our business units are guided by the Group's strategy and framework for investing in the community, as laid out in our Group-wide Community Investment Policy, but within that framework they have the autonomy to manage their own community investment programmes. Our Group-wide Community Investment Policy sets minimum standards, as well as prohibiting political funding and contributions to religious organisations that have a clear aim to propagate a set faith.

Understanding the issues faced by local communities is part of being a responsible business, and those best placed to manage community investment are our local businesses. In Asia and Africa this is done through the Prudence Foundation, a

unified charitable organisation governed by a statutory board of directors, which maximises the impact of our community investment across these regions.

In the US, a governance committee of Jackson and the Jackson Charitable Foundation board of directors regularly review our community investment activity, strategy and spend.

The plc Board reviews the Group's community investment performance and approves our strategy annually, while our Material Subsidiary Boards oversee corporate responsibility initiatives undertaken by our business units. Paul Manduca, Chairman of Prudential plc, is the Board sponsor for corporate responsibility.

Monitoring and measuring our programmes

We take a strategic, long-term approach to community investment, and we ensure that all our community investment activities meet our objectives. We use performance metrics aligned to the London Benchmarking Group (LBG) guidelines, which are used to monitor progress and guide the valuation of both cash and in-kind contributions, employee volunteering and management costs.

In 2019, the Group spent \$29.1 million supporting community activities. Direct cash donations to charitable organisations amounted to \$20.6 million. The balance includes in-kind donations as set out on the Group website at www.prudentialplc.com/

about-us/esg/performance/community-investment that are calculated in accordance with LBG guidelines. This included 10,834 employees who contributed 103,775 hours of volunteer service in their communities. Our 2019 community investment reporting is assured by Deloitte LLP. Further information and Deloitte's assurance statement can be found on the Prudential plc website at www.prudentialplc.com/about-us/esg/performance/external-assurance-of-responsibility-reporting.

2019 highlights

Volunteering across the globe

Many of our employees play an active role in their communities through volunteering, charitable donations and fundraising. Chairman's Challenge is our flagship international volunteering programme, bringing people together across the Group to help their communities. The programme continues to appeal to colleagues, with over 5,400 signing up to participate across 21 projects. Each volunteering project focuses on one or more of our community priorities and enables us to support both large, well established charities and innovative, smaller-scale activities with volunteers and financial support. As well as volunteering on behalf of the Chairman's Challenge, employees around the Group volunteered on a huge range of other charitable projects, from providing disaster relief to mentoring schoolchildren supporting the elderly and skills-sharing.

Cha-Ching – the first global financial education programme

Developed by Prudential to address the gap in financial literacy, Cha-Ching is a global financial education and responsibility programme for children aged from seven to 12. Now in its ninth year, the programme has expanded from its origins in Asia to the US and Africa. It has been very positively received in all markets, with strong feedback from parents, teachers, children and government stakeholders.

Safe Steps

Safe Steps is a ground-breaking, Asia and Africa public service programme aimed at enhancing awareness about natural disasters, road safety and first aid through the dissemination of survival tips. The programme was created and developed by the Prudence Foundation. Principal partners involved in the programme's development and continuing to support its roll-out are National Geographic, the International Federation of Red Cross and Red Crescent Societies and the Federation Internationale de l'Automobile. The programme continues to reach an estimated 250 million people every day across Asia through partnerships with government, humanitarian and private sector organisations.

Safe Schools

During 2019, the Prudence Foundation continued to support the Safe Schools programme in partnership with Plan International and Save the Children in Cambodia, the Philippines and Thailand. This programme primarily focuses on disaster preparedness for students, teachers and local community members. Since 2013, almost 90,000 students and 43,000 adults have participated in the programme.

Early childhood development

The Prudence Foundation has supported the First Read programme since 2013, partnering with Save the Children to invest in early childhood care and development in Cambodia and the Philippines. First Read helps parents to develop their children's numeracy and literacy skills by providing books in the local language or dialect, and encouraging them to read, sing and count together. It also helps parents understand the importance of healthy and nutritious food for their children's development. Since 2013, more than 330,000 children and their parents have benefited through this home-based early childhood development programme, while over one million people have benefited indirectly through shared knowledge and resources developed from First Read.

Jackson Career Exploration Centre

In partnership with Junior Achievement of Middle Tennessee, Jackson has underwritten the Jackson Career Exploration Centre in JA Finance Park. This state-of-the-art programme serves seventh- to 12th-grade students across Middle Tennessee, combining hands-on classroom activities with real-world simulation, which allows students to put their money-management skills to the test, giving them a solid foundation for making intelligent personal finance decisions throughout their lives. The programme will host 10,000 students each school year, serving 22 counties in the region.

Prudential RideLondon

Prudential RideLondon is a major mass-participation and charity fundraising event in the UK which has raised more than £77.5 million for charity in the last seven years. In 2019 it raised more than £11.5 million for over 980 charities. We have sponsored the event since its inception in 2013, and in 2019 our community engagement partnership, PruGOals, supported 273 young people from 21 schools across the UK to improve their self-esteem, aspiration and educational outcomes.

Political donations

It is the Group's policy neither to make donations to political parties nor to incur political expenditure, within the meaning of those expressions as defined in the UK Political Parties, Elections and Referendums Act 2000. The Group did not make any such donations to incur any such expenditure in 2019.

More detailed information on our ESG activities is available in our 2019 ESG report found at www.prudentialplc.com/investors/reports/2019

Strategic report approval by the Board of Directors

Robust and transparent governance supporting our long-term sustainable success

Dear shareholder

Good governance encourages decisions to be made in a way that is most likely to promote the long-term sustainable success of the Company for the benefit of its members, taking into account the views and interests of the Group's wider stakeholders. We aim to achieve this through a governance framework that supports decision-making, facilitates challenge, is continuously updated to meet the Group's business needs, and encompasses a prudent system of internal controls and rigorous processes for identifying, managing and mitigating key risks.

Set out below are some of the principal strategic and governance items the Board has considered over 2019.

The demerger of M&G plc

Following the announcement in 2018 of the Board's intention to demerge M&G plc from the remainder of the Prudential Group, the demerger was completed on 21 October 2019 on an accelerated timetable. The effort by management and employees during the year to achieve this milestone should not be underestimated and the Board is grateful for the efforts of all those involved across the business.

During 2019, the Board has been focused on overseeing the execution of the demerger in a manner that promotes the long-term sustainable success of both groups. A number of workshops were held outside the usual cycle of meetings to facilitate more detailed discussions about the execution of the demerger, taking into account all stakeholder interests and ensuring the effective delivery of this complex transaction, and to consider the challenges and opportunities facing both groups post-demerger. The Board has found these workshops to be valuable and intends to continue this approach, as appropriate, when addressing key strategic matters, to ensure that additional time to discuss and challenge is available.

Time was spent ensuring M&G plc would have in place a suitable governance framework for a listed group at the point of demerger, including establishing a board with the desired skills and experience to progress M&G's strategic aims. Consideration was also given to the allocation of capital and resources between the two groups. As part of these discussions the Board considered and managed potential conflicts of interests between the two groups in order to create a fair outcome.

As Prudential no longer has operations in the UK and Europe, the Hong Kong Insurance Authority (the Hong Kong IA) has assumed the role of Group-wide supervisor. However, our long-standing governance framework has remained in place.

Our purpose, culture and values

Prudential has been delivering on its purpose throughout its 171 year history and we have taken the opportunity presented by the demerger of M&G plc to improve the articulation and communication of this purpose. We help people de-risk their lives and deal with their biggest financial concerns, providing them with the freedom to face the future with confidence. We deliver economic and social benefits for our customers, our employees and the communities in which we operate, while creating financial benefits and delivering growing returns for our investors. A description of how Prudential considers and delivers on this purpose is set out in the ESG report on pages 72 to 87.

We recognise that culture is an important contributor to long-term success and sustainable growth. The Board dedicated time in 2019 to reviewing Prudential's culture, focusing as part of our preparations for the demerger on the transition to our new operating environment and challenges. We made progress in defining and communicating our culture, recognising and rewarding behaviours that embody our culture, and measuring progress.

Now that the demerger is complete, we are focusing in more detail on how to shape our culture to support our changing business model and embrace new ways of thinking, working and leading. It is one of our key objectives to ensure that Prudential continues to be guided by its values and behaviours and demonstrates ongoing commitment to our stakeholders and to innovation, performance and excellence in execution.

We are developing plans for assessing and monitoring culture as we move forward, including regular reporting to the Board. Developing a shared culture and behaviours across multiple jurisdictions presents a number of challenges and so we are focusing efforts on developing a Group-wide culture framework, which includes a common purpose and shared mindsets, behaviours and capabilities but allows tailoring for local context.

Details of our risk governance and culture can be found in the Group Chief Risk and Compliance Officer's Report on pages 51 to 71. Our Group-wide Internal Audit function considers the risk and control culture of the organisation throughout its activities, and our Group Code of Business Conduct underlies everything we do, shaping our culture and linking culture explicitly to values and behaviours.

Looking after our stakeholders and wider community initiatives

At Prudential, we recognise that our stakeholders are key to our long-term success. We seek to engage proactively with them, to understand their views and to take these views into account when making decisions.

In response to the emphasis that the UK Corporate Governance Code places on wider stakeholders, the Board has designated two Non-executive Directors to represent the workforce at Board level and is taking action to improve oversight of workforce policies and practices in order to help ensure consistency with the Group's culture and values, including a review of relevant policies to be completed in 2020. Further information about how the Board has taken into account the views of the Group's key stakeholders, including employees, can be found on pages 73 to 76 and 81 to 84.

Our ESG Executive Committee has responsibility for identifying ESG themes and overseeing ESG reporting. This management Committee provides updates to the Nomination & Governance Committee. You can read more about our corporate social responsibility actions in the ESG summary and in our 2019 ESG report which will be published on our website.

Board composition

The Nomination & Governance Committee has undertaken significant work during 2019 to ensure that the Board's skills and experience remain appropriate to formulate and oversee delivery of the strategy for the Group following the demerger and that there is an orderly and planned succession strategy in place for key roles.

We announced last year that my tenure as Chairman had been extended until May 2021 in order both to help oversee the demerger of M&G plc and to ensure continuing smooth governance afterwards. The early delivery of the demerger has focused the Board's attention on succession planning. Following an extensive search which considered both internal and external candidates and which was led by Philip Remnant in his capacity as Senior Independent Director, we announced the appointment of Shriti Vadera as a Non-executive Director with effect from 1 May 2020. I intend to step down from the Board with effect from 31 December 2020 and Shriti is expected to succeed me and become Chair of the Board and Chair of the Nomination & Governance Committee on 1 January 2021. I believe that Shriti is an excellent choice and I look forward to working with her during the transition to her becoming Chair.

I would also like to welcome Amy Yip and Jeremy Anderson to the Board and to thank Howard Davies, who will step down from the Board at the conclusion of the 2020 Annual General Meeting, for his significant contribution during his tenure and his leadership of the Risk Committee since inception. As announced on 11 March 2020, Jeremy will succeed Howard Davies as Chair of the Risk Committee at the conclusion of the Annual General Meeting in May 2020.

I would also like to note the expansion of the roles of Mark FitzPatrick and James Turner, as announced on 10 July 2019, in preparation for the demerger. Mark's role is now Group Chief Financial Officer and Chief Operating Officer. This extension of his responsibilities encompasses oversight of key Group support functions including Legal, Government Relations and Communications. James assumed responsibility for Compliance and became Group Chief Risk and Compliance Officer.

I am pleased we have strengthened the Board's composition further to ensure the Group is well-placed to develop and deliver on our strategic objectives post-demerger.

Effective governance is based on the appropriate level of oversight and challenge. As such, the methodology and results of our 2019 Board evaluation are set out on pages 102 and 103 and I hope reading this report will demonstrate to you the work that we have done in ensuring that oversight and challenge continue to ensure that the Board is promoting the long-term success of the Company.

I hope that this report and the reports of my fellow Committee Chairs will demonstrate to you the work we have undertaken over the course of the year as well as the tangible and positive impact this has had on our business.

Paul Manduca
Chairman

Board of Directors

Paul Manduca

Chairman

Appointments

Board: October 2010

Chairman of the Board: July 2012

N&G: July 2012

Age: 68

Chairman

Relevant skills and experience

Paul will continue to draw on his extensive experience in leadership roles and his knowledge of the Group's core businesses, international markets and industry sectors, and his technical knowledge, to provide effective leadership during a period of change for the Group.

Paul has held a number of senior leadership roles. Notable appointments include serving as chairman of the Association of Investment Companies (1991 to 1993), acting as founding CEO of Threadneedle Asset Management Limited (1994 to 1999), global CEO of Rothschild Asset Management (1999 to 2002), directorships of Eagle Star and Allied Dunbar, holding the offices of European CEO of Deutsche Asset Management (2002 to 2005), chairman of Bridgewater Group plc and a director of Henderson Smaller Companies Investment Trust plc.

Other previous appointments include the chairmanship of Aon UK Limited and JPM European Smaller Companies Investment Trust Plc. From September 2005 until March 2011, Paul was a non-executive director of Wm Morrison Supermarkets Plc, including as senior independent director, audit committee chairman and remuneration committee chairman. He was a non-executive director and audit committee chairman of KazMunaiGas Exploration & Production until the end of September 2012 and chairman of Henderson Diversified Income Limited until July 2017.

Paul is the Chairman of the Board. He initially joined the Board in October 2010 as the Senior Independent Director and member of the Audit and Remuneration Committees, roles he held until his appointment as Chairman in July 2012. On becoming Chairman, Paul was also appointed Chair of the Nomination & Governance Committee, having been a member of the Committee since January 2011.

Michael Wells

Group Chief Executive

Appointments

Board: January 2011

Group Chief Executive: June 2015

Age: 59

Chief Executive

Relevant skills and experience

Mike continues to develop the operational management of the Group on behalf of the Board, implementing Board decisions and leading the Executive Directors and senior executives in the management of all aspects of the day-to-day business of the Group.

Mike has more than three decades' experience in insurance and retirement services, having started his career at the US brokerage house Dean Witter, before going on to become a managing director at Smith Barney Shearson.

Mike joined the Prudential Group in 1995 and became Chief Operating Officer and Vice-Chairman of Jackson in 2003. In 2011, he was appointed President and Chief Executive Officer of Jackson, and joined the Board of Prudential.

During his leadership of Jackson, Mike was responsible for the development of Jackson's market-leading range of retirement solutions. He was also part of the Jackson teams that purchased and successfully integrated a savings institute and two life companies.

Mike is Group Chief Executive, a position he has held since June 2015.

Other appointments

- International Advisory Panel of the Monetary Authority of Singapore
- San Diego University Advisory Board

Following the change of Group-wide supervisor in October 2019 to the Hong Kong Insurance Authority, the composition of the Prudential Corporation Asia Limited board of directors mirrors the Prudential Board.

Board changes

Non-executive Directors

As announced on 28 February 2019, Lord Turner stepped down from the Board with effect from the conclusion of the 2019 AGM held on 16 May 2019.

As announced on 10 May 2019, Amy Yip was appointed to the Board as a Non-executive Director and member of the Remuneration Committee with effect from 2 September 2019.

As announced on 10 December 2019, Jeremy Anderson was appointed to the Board as a Non-executive Director and member of the Risk and Audit Committees with effect from 1 January 2020.

As announced on 30 January 2020, Shriti Vadera will join the Board as a Non-executive Director and member of the Nomination & Governance Committee with effect from 1 May 2020.

Executive Directors

As announced on 28 February 2019, in preparation for the demerger of M&G plc, Michael Falcon, John Foley and Nic Nicandrou ceased to be Directors of Prudential plc at the conclusion of the 2019 AGM held on 16 May 2019. Michael Falcon and Nic Nicandrou maintained their positions as chief executives of their respective business units and as members of the Group Executive Committee. As the chief executive of M&G plc, John Foley ceased to be a member of the Group Executive Committee at demerger on 21 October 2019.

Executive Directors

Mark FitzPatrick CA

Group Chief Financial Officer and Chief Operating Officer

Appointment

Board: July 2017

Age: 51

Relevant skills and experience

Mark has a strong background across financial services, insurance and investment management, encompassing wide geographical experience relevant to the Group's key markets.

Mark previously worked at Deloitte for 26 years, building his industry focus on insurance and investment management globally. During this time, Mark was managing partner for Clients and Markets, a member of the executive committee and a member of the board of Deloitte UK. He was a vice chairman of Deloitte for four years, leading the CFO Programme and developing the CFO Transition labs.

Mark previously led the Insurance & Investment Management audit practice and the insurance industry practice.

Mark is Group Chief Financial Officer and Chief Operating Officer, a position he has held since July 2019. He joined the Board as Chief Financial Officer in July 2017.

James Turner FCA FCSI FRM

Group Chief Risk and Compliance Officer

Appointment

Board: March 2018

Age: 50

Relevant skills and experience

Having held senior positions at Prudential for a number of years, James has a wide-ranging understanding of the business and draws on previous experience across internal audit, finance and compliance, as well as technical knowledge, relevant to his role.

James has led internal audit teams in UBS in both the UK and Switzerland. Prior to joining Prudential, James was the deputy head of compliance for Barclays plc. He also held a number of senior internal audit roles across the Barclays group, leading teams that covered the UK, the US, Western Europe, Africa and Asia retail and commercial banking activities.

James joined Prudential in November 2010 as the Director of Group-wide Internal Audit and was appointed Director of Group Finance in September 2015, with responsibility for delivery of the Group's internal and external financial reporting, business planning, performance monitoring and capital and liquidity planning. He also led the development of the Group's Solvency II internal model.

James joined the Board as an Executive Director and Group Chief Risk Officer in March 2018. Prior to the demerger of M&G plc, he led the discussions with Hong Kong IA on the revised capital framework for the Group and in July 2019 assumed responsibility for Group Compliance, becoming the Group Chief Risk and Compliance Officer, relocating to Hong Kong in August 2019.

Other appointment

— West Bromwich Building Society (non-executive director)

Non-executive Directors

**The Hon. Philip Remnant
CBE FCA**

Senior Independent Director

Appointments

Board: January 2013

Audit : January 2013

N&G : January 2013

Rem : January 2013

Age: 65

Relevant skills and experience

Philip contributes experience across a number of sectors and in particular listed company experience and the financial services industry, including asset management, in the UK and Europe.

Philip was a senior adviser at Credit Suisse and a vice chairman of Credit Suisse First Boston (CSFB) Europe and head of the UK Investment Banking Department. He was twice seconded to the role of director general of the Takeover Panel. Philip also served on the board of Northern Rock plc and as chairman of the Shareholder Executive. Until July 2018, he also served on the board of UK Financial Investments Limited.

Philip joined the Board in January 2013 as a Non-executive Director, as Senior Independent Director and as a member of each of the Audit Committee, the Remuneration Committee and the Nomination & Governance Committee. He also chaired the M&G Group Limited board from April 2016 until October 2018.

Other appointments

- Severn Trent plc
- City of London Investment Trust (chairman)
- Takeover Panel (deputy chairman)

Jeremy Anderson CBE

Appointments

Board: January 2020

Audit : January 2020

Risk : January 2020

Age: 61

Relevant skills and experience

Jeremy contributes substantial leadership experience of the financial services sector across Asia and the US. He has extensive technical knowledge on audit and risk management, particularly concerning international companies.

Jeremy joined KPMG Consulting in 1985 and held the role of Chief Executive Officer in 2001 before being appointed as head of UK operations at Atos Origin and a member of the Management Board of Atos Origin SA in 2002. From 2006, following two years as head of financial services at KPMG UK, Jeremy held the role of KPMG's head of financial services for Europe followed by head of clients & markets in 2008. He served as KPMG's Chairman of Global Financial Services until 2017. Jeremy also served on the board of the UK Commission for Employment and Skills, and now serves as a non-executive director and chairman of the audit committee of UBS Group AG.

Jeremy joined the Board in January 2020 as a Non-executive Director and member of the Audit and Risk Committees.

Other appointments

- UBS Group AG (chairman of audit committee)
- The Productivity Group
- The Kingham Hill Trust

Sir Howard Davies

Appointments

Board: October 2010

Audit : November 2010

N&G : July 2012

Risk : October 2010

Age: 68

Relevant skills and experience

Howard has a wealth of experience in the financial services industry, across the Civil Service, consultancy, asset management, regulatory and academia. He also contributes his detailed knowledge of the Group's key international markets including the UK, Europe, North America and Asia as well as international regulatory experience.

Howard was previously chairman of the Phoenix Group and an independent director of Morgan Stanley Inc.

Howard joined the Board in October 2010 as a Non-executive Director and Chair of the Risk Committee. He joined the Audit Committee in November 2010 and the Nomination & Governance Committee in July 2012.

Other appointments

David Law ACA

Appointments

Board: September 2015

Audit : May 2017

Risk : May 2017

N&G : May 2017

Age: 59

Kaikushru Nargolwala FCA

Appointments

Board: January 2012

Rem : January 2012

Risk : January 2012

Employee Engagement

Director: May 2019

Age: 69

Anthony Nightingale CMG SBS JP

Appointments

Board: June 2013

N&G : May 2015

Rem : May 2015

Age: 72

Relevant skills and experience

David has experience across the Group's key international markets including North America and Asia, and across a number of industry sectors. He contributes extensive technical knowledge of audit, accounting and financial reporting essential to his role as Chair of the Audit Committee.

David was the global leader of PricewaterhouseCoopers (PwC) insurance practice, a partner in PwC's UK firm, and worked as the lead audit partner for multi-national insurance companies until his retirement in 2015. During his time at PwC David's responsibilities also included leadership of PwC's insurance and investment management assurance practice in London and the firm's Scottish assurance division. David's role as a director and CEO of L&F Holdings Limited and its subsidiaries (the professional indemnity captive insurance group which serves the PwC network and its member firms), ceased in July 2019.

David joined the Board in September 2015 as a Non-executive Director and member of the Audit Committee. David was appointed Chair of the Audit Committee and a member of the Risk Committee and of the Nomination & Governance Committee in May 2017.

Other appointment

- University of Edinburgh (Member of the court and policy and resources committee)

Relevant skills and experience

Kai has experience across some of the Group's key international markets, particularly Hong Kong and the wider Asian market. In addition to his experience with listed groups, he contributes knowledge of the financial services sector.

Kai spent 19 years at Bank of America and was based in Hong Kong in roles as group executive vice president and head of the Asia Wholesale Banking Group from 1990 to 1995. He spent 10 years working for Standard Chartered PLC in Singapore as group executive director responsible for Asia governance and risk from 1998 to 2007. Kai was chief executive officer of the Asia Pacific Region of Credit Suisse AG from 2008 to 2010 and now serves as director and chairman of their remuneration committee.

Kai has served on a number of other boards, including Singapore Telecommunications and Tate and Lyle plc.

Kai joined the Board in January 2012 as a Non-executive Director and member of the Remuneration and Risk Committees. Kai acts as a designated Non-executive Director for employee engagement matters as set out in the UK Code, for the Group's workforce in Asia and Africa.

Other appointments

- Clifford Capital Pte. Ltd (chair)
- Credit Suisse Group AG
- PSA International Pte Ltd
- Co-Chair of Sustainable Finance Steering Committee formed by Temasek (effective 1 March 2020)

Relevant skills and experience

Anthony has long executive experience of listed companies and, in particular, extensive knowledge of Asian markets.

Anthony spent his career in Asia, where he joined the Jardine Matheson Group in 1969, holding a number of senior positions before joining the board of Jardine Matheson Holdings in 1994. He was managing director of the Jardine Matheson Group from 2006 to 2012. He was a member of the Hong Kong-APEC trade policy study group until 2018 and a member of the UK-ASEAN Business Council until 2019.

Anthony joined the Board in June 2013 as a Non-executive Director and member of the Remuneration Committee. He became Chair of the Remuneration Committee and a member of the Nomination & Governance Committee in May 2015.

Other appointments

- Jardine Matheson Holdings (and other Jardine Matheson group companies)
- Schindler Holding Limited (until 19 March 2020)
- Shui On Land Limited
- Vitasoy International Holdings Limited
- The Innovation and Strategic Development Council in Hong Kong

Non-executive Directors continued

Alice Schroeder

Appointments

Board: June 2013
Audit : June 2013
Risk : March 2018
Age: 63

Relevant skills and experience

Alice has experience across the insurance, asset management, technology and financial services industries in the US.

Alice began her career as a qualified accountant at Ernst & Young. She joined the Financial Accounting Standards Board as a manager in 1991, overseeing the issuance of several significant insurance accounting standards.

From 1993, she led teams of analysts specialising in property-casualty insurance as a managing director at CIBC Oppenheimer, PaineWebber (now UBS) and Morgan Stanley. Alice was also an independent board member of the Cetera Financial Group and held the office of CEO and chair of WebTuner (now Showfer Media LLC), until its sale in 2017. She was also a director of Bank of America Merrill Lynch International until December 2018.

Alice joined the Board in June 2013 as a Non-executive Director and member of the Audit Committee. She became a member of the Risk Committee in March 2018.

Other appointments

Amy Yip

Appointments

Board: September 2019

Rem : September 2019

Age: 68

Relevant skills and experience

Amy has extensive experience of China and South-east Asia following a 40-year career in banking, insurance, asset management and government.

Amy started her career at Morgan Guaranty Trust of New York in 1978 before joining the Management Analysis Centre in Boston and Hong Kong as a consultant in 1986. She became executive director of Rothschild Asset Management in Hong Kong in 1988, vice president of Citibank Private Bank North Asia in 1991 and executive director (Reserves Management) of the Hong Kong Monetary Authority in 1996. She was group head of wealth management of DBS Bank, chair of DBS Asset Management and chief executive officer of DBS Bank Hong Kong between 2006 and 2010. Since 2011 she has been an adviser to Vita Green, a health supplements provider based in Hong Kong, and a founder and partner of RAYS Capital Partners, a Hong Kong investor in Asian equities.

Amy became a non-executive director of AIG Insurance Hong Kong Limited in 2011 and chair of its audit committee in 2017, a non-executive director and member of the compensation and nomination committees of Temenos Group AG in 2014, a non-executive director and member of the Technology Committee of Deutsche Börse AG in 2015 and a non-executive director of Fidelity Funds in 2017. In August 2019, she became the chair of the Asia Pacific advisory board of EFG Bank International.

Amy joined the Board in September 2019 as a Non-executive Director and member of the Remuneration Committee.

Other appointments

- AIG Insurance Hong Kong Limited
- Deutsche Börse AG
- Fidelity Funds
- RAYS Capital Partners (founder partner)

Group Executive Committee

The Group Executive Committee (GEC) comprises the Executive Directors, the Chief Executive of each of Prudential Corporation Asia and Jackson Holdings LLC, the Group Human Resources Director and Group Chief Digital Officer. The GEC is a management committee constituted to support the Group Chief Executive, who also chairs the GEC. For the purposes of the Hong Kong Listing Rules, Senior Management is defined as the members of the GEC.

Jolene Chen

Group Human Resources Director

Appointment to the GEC: June 2019

Age: 60

Relevant skills and experience

Jolene is the Group Human Resources Director and Chief Human Resources Officer for Prudential Corporation Asia. She is also a member of the Prudential Corporation Asia Executive Board and a Councillor of Prudence Foundation, the community investment arm of Prudential in Asia.

Jolene has more than 30 years' experience, including eight as Chief Human Resources Officer for Prudential Corporation Asia. Prior to joining us she spent over 21 years with multinational companies in a variety of resourcing, organisational design, talent management, learning and development and human resources roles.

Michael Falcon

Chief Executive Officer,
Jackson Holdings LLC

Appointment to the GEC: January 2019

Age: 57

Relevant skills and experience

Michael is Chief Executive Officer of Jackson Holdings LLC, which includes Jackson's US subsidiaries and affiliates. Before joining Prudential in January 2019, he was based in Hong Kong as chief executive officer of Asia Pacific for J.P. Morgan Asset Management, a role he held from 2015, and was head of Asia Pacific funds from 2014. Michael is also a director of a number of Group subsidiaries within Jackson.

Michael joined J.P. Morgan Asset Management in New York as head of retirement in 2010, before which he was at Merrill Lynch in a number of roles including as head of the retirement group. He has served as a trustee and executive committee member of the Employee Benefit Research Institute (EBRI) and was founding chairman of the Advisory Board of EBRI's Center for Retirement Income Research.

Nicolaos Nicandrou

Chief Executive,
Prudential Corporation Asia

Appointment to the GEC: October 2009

Age: 54

Relevant skills and experience

Nic became Chief Executive of Prudential Corporation Asia in July 2017 and is responsible for Prudential Corporation Asia's life insurance and asset management business across 14 markets in Asia. Nic is also the chairman of CITIC-Prudential Life Insurance Limited.

Nic started his career at PricewaterhouseCoopers (PwC). Before joining Prudential as an Executive Director and Chief Financial Officer in 2009, he worked at Aviva, where he held a number of senior finance roles, including as Norwich Union Life's finance director and board member, Aviva group financial control director, Aviva group financial management and reporting director and CGNU group financial reporting director.

Al-Noor Ramji

Group Chief Digital Officer

Appointment to the GEC: January 2016

Age: 65

Relevant skills and experience

Al-Noor, who joined Prudential in 2016 in the newly-created role of Group Chief Digital Officer, is responsible for developing and executing an integrated, long-term digital strategy for the Group.

Before joining Prudential, he worked at Northgate Capital, a venture capital firm in Silicon Valley, where he ran the technology-focused funds. Prior to that, Al-Noor was at Misys, the financial services software group, and he has previously held leading technology and innovation roles at BT Group, Qwest Communications, Dresdner Kleinwort Benson and Swiss Bank Corporation.

How we operate

This section tells you more about the Group's governance, operation of the Board and Board roles.

Group governance

Corporate governance codes – statement of compliance

The Company has dual primary listings in London (premium listing) and Hong Kong and has therefore adopted a governance structure based on the UK and Hong Kong Corporate Governance Codes (the UK and HK Codes). This report explains how the principles set out in the UK and HK Codes have been applied.

The Board confirms that, for the year under review, the Company has complied with the principles and provisions of the UK Code. In respect of provision 38 of the UK Code, Prudential has committed to aligning the level of pension contributions for newly appointed Executive Directors with that of the workforce. As recognised by the FRC's Board Effectiveness Guidance, there are practical considerations in amending arrangements for incumbents. Accordingly, Executive Directors who were in office before the 2018 UK Code came into force will have their pension contributions reduced over time, as described on page 171 of the Directors' remuneration report.

The Company has also complied with the provisions of the HK Code other than as follows: Provision B.1.2(d) of the HK Code requires companies, on a comply or explain basis, to have a remuneration committee which makes recommendations to a main board on the remuneration of non-executive directors. This provision is not compatible with provision 34 of the UK Code which recommends that the board determines the remuneration of non-executive directors. Prudential has chosen to adopt a practice in line with the recommendations of the UK Code.

The UK Code is available from: www.frc.org.uk

The HK Code is available from: www.hkex.com.hk

Our governance framework

The Group has established a governance framework for the business, which is approved by the Board, and is designed to promote appropriate behaviours across the Group. The Nomination & Governance Committee reviews the Group Governance framework annually.

The governance framework includes the key mechanisms through which the Group sets strategy, plans its objectives, monitors performance, considers risk management, holds business units to account for delivering on business plans and arranges governance.

The Group Governance Manual (the Manual) sets out the policies and procedures under which the Group operates, taking into account statutory, regulatory and other relevant matters. The Manual includes the Group Code of Business Conduct which is regularly reviewed by the Board. The Audit Committee monitors compliance with the Manual and the Risk Committee approves the Group risk framework and monitors compliance with it across the Group.

Business units manage and report compliance with the Group-wide mandatory requirements set out in the Manual through annual attestations. This includes compliance with our risk management framework, details of which are set out on pages 108 and 109 of this report.

The content of the Manual is reviewed regularly, reflecting the developing nature of both the Group and the markets in which it operates, with significant changes on key policies reported to the relevant Board Committee.

Subsidiary governance

Following the demerger of M&G plc, the Group is reviewing subsidiary governance to ensure this remains appropriate to the business and regulatory environment in which the Group operates. Reflecting changes in that environment, the composition of the Prudential Corporation Asia Limited board of directors now mirrors the Prudential Board and Board meetings are held concurrently. As part of demerger preparations, Prudential Corporation Asia Limited became the intermediate holding company for the Group's subsidiaries in the US and Africa.

Dialogue between the Group Chair, Group Risk Committee Chair and Group Audit Committee Chair and their counterparts at subsidiary level provided an effective information flow throughout the year and these arrangements continue where relevant. Each of the Group Chair, Group

Risk Committee Chair and Group Audit Committee Chair report to the Board or relevant Group Committee on the outcome of those dialogues, with any urgent issues being escalated between meetings as required.

The Nomination & Governance Committee is responsible for oversight of governance arrangements for the material subsidiaries. This and other activities of the Nomination & Governance Committee during 2019 are described on pages 110 to 117.

Regulatory environment

Prior to the demerger of M&G plc on 21 October 2019, the Group was subject to the consolidated supervision of the UK's Prudential Regulation Authority (PRA) under Solvency II. Following completion of the demerger, the Group-wide supervisor is now Hong Kong's Insurance Authority (Hong Kong IA).

Prior to demerger, Prudential undertook to maintain the Group-wide corporate governance framework for the Group post-demerger. This included maintaining appropriate internal controls for the oversight of the businesses, including in relation to conduct of business, the identification and mitigation of conflicts of interest and intra-group transactions. Prudential also undertook to maintain its group-wide risk management system and independent risk management function.

Individual regulated entities within the Group continue to be subject to entity-level regulatory requirements in the relevant jurisdictions in which they carry on business.

Interactions with regulators shape the Group's governance framework and the Chairman and Group Chief Executive play a leading role in representing the Group to regulators and ensuring our dialogue with them is constructive.

Terms of reference for each of the Board's principal Committees have been updated to ensure their duties align with the post-demerger business and regulatory regime.

Stakeholder engagement

The Board has identified the Group's key stakeholders as including customers, investors, employees, regulators, civil society and suppliers. Examples of Board

engagement and discussion on stakeholder views as part of the Board decision-making process can be found on pages 73 to 76. Additional information can be found on our website at www.prudentialplc.com/about-us/esg/our-approach

Employee voice

Having considered the suggested methods for strengthening workforce engagement as described in the UK Code, the Board concluded that the most appropriate method for achieving effective engagement, taking into account the international nature of the business and the geographic spread of the workforce, would be to designate a Non-executive Director based in Asia and a Non-executive Director based in the US to represent the workforce in those regions. During the year, the Board designated responsibility to Kai Nargolwala for engagement with the workforce in Asia, as well as in Africa, and to Tom Watjen for engagement with the workforce in the US, as well as staff in London.

An initial framework of activities was established, combining both formal and informal interactions with employees as well as access to relevant material. In particular, during the course of the year Kai Nargolwala attended townhall sessions with staff in Singapore and Hong Kong, and Tom Watjen visited staff in Nashville in 2019 and in London in January 2020. The key focus of those discussions was the impact on staff of organisational changes following the demerger. In addition, Tom Watjen and Kai Nargolwala received briefings from the Group HR Director on workforce-related matters.

The Board received an initial update in December 2019 on activities undertaken during the year. The framework will be expanded in 2020 to provide the designated Non-executive Directors with further opportunities for interactions with the workforce and includes regular reporting to the Board on a six-monthly basis. This will include updates on activities undertaken and themes arising for the Board to consider. If necessary, key items will be escalated outside of the six-monthly reporting cycle and in addition, Kai Nargolwala and Tom Watjen will offer their insight to Board discussions and decisions as part of the Board's consideration of the workforce as key stakeholders. They will also continue to work with the Group HR Director and the Company Secretary to identify key issues requiring engagement with the workforce, the most appropriate means of doing so and reporting on these activities.

Shareholders

The Board recognises the importance of maintaining an appropriate level of two-way communication with shareholders.

Throughout 2019, Prudential engaged with institutional shareholders, focusing primarily on matters relating to the demerger of M&G plc and strategic direction following the demerger. The executive management team of the Group, Prudential Corporation Asia and Jackson met with key target investors as part of a demerger marketing programme. In October 2019, a General Meeting was convened to allow shareholders to consider and approve the demerger of M&G plc. Shareholders demonstrated their overwhelming support for the demerger resolution which received 99.4 per cent of votes in favour.

These demerger-related activities were held in addition to the Group's usual full global programme of engagement with shareholders, potential investors and analysts, in the UK and overseas, which is conducted each year by the Group Chief Executive and the Group Chief Financial Officer and Chief Operating Officer, led by the Investor Relations team. The Group intends to maintain its regular engagement with investors and analysts which provides opportunity for the executive team to communicate progress and strategy outside of the financial reporting cycle. Going forward, this may include investor conferences or more specific events focused on particular aspects of our business.

The Group Chief Executive, Group Chief Financial Officer and Chief Operating Officer and Investor Relations team also attend major financial services conferences to present to, and meet with, the Company's shareholders.

In 2019, as part of the investor relations and demerger marketing programme, over 320 meetings were held with around 300 individual institutional investors in the UK, continental Europe, the US and Asia.

The Group holds an ongoing programme of regular contact with major shareholders, conducted by the Chairman, to discuss their views on the Group's governance. The Senior Independent Director offers meetings to major shareholders as needed. Engagement with institutional investors on the Directors' Remuneration Policy and implementation is led by the Remuneration Committee Chair on an annual basis. This has allowed key investors to provide feedback on the Directors' Remuneration

Policy prior to its adoption proposed to shareholders at the 2020 Annual General Meeting. All Non-executive Directors, and in particular Committee Chairs, are available to meet with major shareholders on request.

Shareholder feedback and key issues from these meetings are communicated to the Board.

The Annual General Meeting is an opportunity for further shareholder engagement, for the Chairman to explain the Company's progress and, along with other members of the Board, to answer any questions. The Committee Chairs each attend the Annual General Meeting and are available for shareholders who wish to ask questions on the activities of their respective Committees.

Further information, including aggregate shareholdings, details of the 2019 Annual General Meeting and General Meeting as well as the 2020 Annual General Meeting, dividend payment dates, and confirmation of sufficiency of public float can be found in the shareholder information section on pages 400 to 402.

Operation of the Board

How the Board leads the Group

The Group is headed by a Board led by the Chairman.

The Board consists of 14 Directors, of which a majority, excluding the Chairman, are independent Non-executive Directors. Biographical details of each of the Directors can be found on pages 92 to 97 and further details of the roles of the Chairman, Group Chief Executive, Senior Independent Director, Committee Chairs and the Non-executive Directors can be found on pages 104 to 106.

The Board is collectively responsible to shareholders for the long-term sustainable success of the business through:

- Approving the Group's long-term strategic objectives, annual budgets and business plans, as recommended by the Group Chief Executive, and any material changes to them;
- Monitoring the implementation of strategic objectives, annual budgets and business plans;
- Establishing the Company's purpose, values and strategy and satisfying itself that these are aligned with the Group's culture; and
- Assessing and monitoring culture, including alignment with policy, practices, behaviours and risk appetite.

Specific matters are reserved for decision by the Board, including:

- Approving dividend policy and determination of dividends;
- Approval of strategic projects;

— Approval of the three-year business and financial plan;

— Approval of the Group's full and half-yearly results announcements and any other periodic financial reporting;

— Responsibility for an effective system of internal control and risk management;

— Overseeing the Group's corporate social responsibility programmes; and

— Ensuring effective engagement with, and encouraging participation from, key stakeholder groups.

Key areas of focus – how the Board spent its time

The Board held 10 meetings during 2019. The table below gives an indication of the key topics considered at each meeting.

Notes

1 The Board held two meetings in March 2019.

2 Strategic projects considered during the year included the demerger of M&G plc, the acquisition of fund manager Thanachart in Thailand, entering into an exclusive bancassurance arrangement with Southeast Asia Commercial Joint Stock Bank, an IT outsourcing project as well as other confidential matters.

3 The effective date of the demerger of M&G plc was 21 October 2019.

The Board held a separate two-day strategy event in June in the US. The Board also held four workshops during the year to discuss key strategic matters, focusing on the demerger of M&G plc and strategy for the Prudential Group post-demerger, facilitating more in-depth discussion and challenge ahead of formal meetings and decisions. One of the Board meetings in

March 2019 was to consider the Group's 2018 full-year report only and the meeting in August 2019 was primarily to consider the Group's 2019 half-year report and accounts. In addition to the March Board meeting, the Board received a separate in-depth update from the management team of Prudential Corporation Asia covering progress against strategic

priorities, key risks facing the business in Asia, future opportunities, customer-orientated initiatives, brand, culture, the Eastspring business and the activities of the Prudence Foundation.

Between meetings, the Board is provided with monthly update reports from management.

Board and Committee meeting attendance throughout 2019

Individual Directors' attendance at meetings throughout the year is set out in the table below.

| | | Board 10 meetings | Audit Committee 12 meetings | Nomination & Governance Committee 3 meetings | Remuneration Committee 8 meetings | Risk Committee 5 meetings | Joint Audit and Risk Committee 1 meeting | General Meetings ¹ 2 meetings |

Notes

- In addition to the Annual General Meeting held in May each year, a General Meeting of shareholders was held on 15 October 2019. The purpose of the General Meeting was for shareholders to vote on the proposed demerger of M&G plc and election of Amy Yip as a Director of the Company. The nature of the business of the meeting meant that it was not considered necessary for the entire Board to be present. In addition to the Chairman and Senior Independent Director, each of the Executive Directors was present at the General Meeting and available to answer questions from shareholders about the business of the meeting.
- Paul Manduca recused himself from a meeting of the Nomination & Governance Committee which was convened to discuss his succession plans. Further information about Paul Manduca's succession may be found in the Nomination & Governance Committee report.
- Michael Falcon, John Foley and Nic Nicandrou stepped down from the Board with effect from the conclusion of the AGM held on 16 May 2019. Michael Falcon and Nic Nicandrou each continue in their role as chief executive of their respective business units as well as their membership of the Group Executive Committee. John Foley maintained his position as chief executive of M&G plc and continued as a member of the Group Executive Committee until demerger on 21 October 2019.
- Lord Turner stepped down from the Board with effect from the conclusion of the AGM held on 16 May 2019.
- Amy Yip was appointed a member of the Board and of the Remuneration Committee with effect from 2 September 2019.

Board and Committee papers are usually provided one week in advance of a meeting. Where a Director is unable to attend a meeting, his or her views are canvassed in advance by the Chairman of that meeting where possible.

Board effectiveness

Actions during 2019 arising from the 2018 review

The performance evaluation of the Board and its principal Committees for 2018 was conducted internally at the end of 2018 through a questionnaire. The findings were presented to the Board in February 2019 and an action plan agreed to address areas of focus identified by the evaluation.

The review confirmed that the Board continued to operate effectively during the year and no major areas requiring improvement were highlighted.

Set out below are the themes, summary of actions and progress updates:

| Theme | Summary of actions | Progress |
|--------------------------------------|--|--|
| Board composition and process | <ul style="list-style-type: none"> — Continuing work on Board succession with a focus on gender and geographic diversity. — Reduction in Board and Committee paper volume. | <ul style="list-style-type: none"> — During the year, Amy Yip joined the Board, strengthening the overall diversity of skills, gender and experience. — Diversity remains a key factor in ongoing succession planning. The Nomination & Governance Committee reviews the diversity policy and how diversity initiatives align with strategic objectives. — Management is considering whether paper volumes can be further decreased as part of changes to the meeting structure post-demerger. |
| Risk, capital and audit | <ul style="list-style-type: none"> — Cyber risk focus for Board agenda for 2019. — Board training on the Hong Kong IA regulatory regime. | <ul style="list-style-type: none"> — A cyber risk update was provided to a joint meeting of the Risk and Audit Committees in April 2019, to which all Board members were invited. — Board members were briefed on the new regulatory regime in December 2019. |
| Stakeholders | <ul style="list-style-type: none"> — Review of stakeholder groups. — Review of workforce voice and its representation at Board level. | <ul style="list-style-type: none"> — Stakeholder groups are reviewed and reported on in the ESG Report, which was approved by the Board in March 2020. — Workforce engagement mechanisms were approved by the Board during the year and a report on engagement activities was reviewed at the Board meeting in December 2019. This will be an area of continued focus in 2020 as the framework of Non-executive Director engagement is developed and their reporting to the Board embedded. |
| People | <ul style="list-style-type: none"> — Develop diversity and inclusion reporting to the Board. — Ensure overseas and 'home' Boards give scope for Non-executives to meet colleagues below Group Executive Committee level. | <ul style="list-style-type: none"> — The Board received an update on key initiatives to promote diversity and invest in talent for the long-term success of the Company. — The Nomination & Governance Committee will receive more reporting in this area going forward given its extended remit. — Both the Board visit to Hong Kong in March and the Board strategy session in Lansing in June provided opportunities for Non-executive Directors to meet with management below the Group Executive Committee level as part of presentations by Prudential Corporation Asia and Jackson management and in informal settings. — Non-executive Directors continue to engage directly with management as part of their meeting preparations, particularly for Committee meetings. |

2019 review and actions for 2020

The performance evaluation of the Board and its principal Committees for 2019 was conducted internally at the end of 2019 through a questionnaire. The findings were presented to the Board in February 2020 and an action plan agreed to address areas of focus identified by the evaluation.

The review confirmed that the Board continued to operate effectively during the year and no major areas requiring improvement were highlighted.

| Theme | Summarised actions |
|--------------------------------------|--|
| Board composition and process | <ul style="list-style-type: none"> — Continue to use workshops, as appropriate, to support discussions. — Monitor Board meeting arrangements in the post-demerger context and ensure strategic focus areas, including culture and values, continue to receive appropriate agenda time. |
| Risk, capital and audit | <ul style="list-style-type: none"> — Keep Board training in this area under review and schedule additional sessions as appropriate. |
| Stakeholders | <ul style="list-style-type: none"> — Continue to develop and embed reporting by the designated Non-executive Directors on workforce engagement. |
| People | <ul style="list-style-type: none"> — Continue to develop reporting on talent management, succession pipeline and Diversity & Inclusion, utilising the expanded role of the Nomination & Governance Committee. |

In accordance with the UK Code, the 2020 Board evaluation will be externally facilitated. The process for identifying and appointing the external evaluator will be overseen by the Nomination & Governance Committee.

Committee effectiveness and evaluation

Committee Chairs have responsibility for ensuring each Committee operates effectively. In order for Committees to provide effective challenge to management, the Committee Chairs each encourage open debate and contributions from all Committee members.

The effectiveness of each Committee is monitored via the annual Board effectiveness programme. Each Committee was found to be operating effectively. More details are set out in each of the Committee reports.

Director evaluation

The performance of the Non-executive Directors and the Group Chief Executive during 2019 was evaluated by the Chairman in individual meetings.

Philip Remnant, the Senior Independent Director, led the Non-executive Directors in a performance evaluation of the Chairman.

Executive Directors are subject to regular review and the Group Chief Executive individually appraised the performance of each of the Executive Directors as part of the annual Group-wide performance evaluation of all employees. The Chair of the Risk Committee provides feedback to the Group Chief Executive on the performance of the Group Chief Risk and Compliance Officer.

The outcome of each of these evaluation processes is reported to the Nomination & Governance Committee in February each year in order to inform the Committee's recommendation for Board members to be put forward for re-election by shareholders.

Executive Director performance is also reviewed by the Remuneration Committee as part of its deliberations on bonus payments.

Directors
Board roles and governance

Chairman – Paul Manduca

The Chairman is responsible for the leadership and governance of the Board, ensuring its smooth and effective running in discharging its responsibilities to the Group's stakeholders and managing Board business.

Managing Board business

- Responsible for setting the Board agenda, ensuring the right issues are brought to the Board's attention through collaboration with the Group Chief Executive and the Company Secretary
- Facilitating open, honest and constructive debate among Directors. When chairing meetings, ensuring there is sufficient time to consider all topics, all views are heard and all Board members, and in particular Non-executive Directors, have an opportunity to constructively challenge management
- Meeting with Non-executive Directors throughout the year. In 2019, the Chairman met with Non-executive Directors without Executive Directors being present on four occasions and also met with each Non-executive Director individually
- Ensuring information brought to the Board is accurate, clear, timely and contains sufficient analysis appropriate to the scale and nature of the decisions to be made
- Promoting effective reporting of Board Committee business at Board meetings through regular Committee Chair updates

Membership and composition of the Board

- Leading the Nomination & Governance Committee in succession planning and the identification of potential candidates, having regard to the skills and experience the Board needs to fulfil its strategy, and making recommendations to the Board
- Considering the development needs of the Directors so that Directors continually update their skills and knowledge required to fulfil their duties, including the provision of a comprehensive induction for new Directors
- Maintaining an effective dialogue with the Non-executive Directors to encourage engagement and maximise their contributions

Governance

- Leading the Board's determination of appropriate corporate governance and business values, including ethos, values and culture at Board level and throughout the Group
- Working with the Company Secretary to ensure continued good governance
- Acting as key contact for independent chairs of Material Subsidiaries¹
- Meeting with the independent chairs of the Group's Material Subsidiaries¹ on a regular basis and reporting to the Board on the outcome of those meetings

Relationship with the Group Chief Executive

- Discussing broad strategic plans with the Group Chief Executive prior to submission to the Board
- Ensuring the Board is aware of the necessary resources to achieve the strategic plan
- Providing support and advice to the Group Chief Executive

Relations with shareholders and other stakeholders

- Representing the Board externally at business, political and community level. Presenting the Group's views and positions as determined by the Board
- Playing a major role in the Group's engagement with regulators
- Balancing the interests of different categories of stakeholders, preserving an independent view and ensuring effective communication
- Engaging in a programme of meetings with key shareholders throughout the year and reporting to the Board on the issues raised at those meetings

External positions

- Approving Directors' external appointments prior to them being accepted, taking into account the required time commitment and escalating consideration of conflicts of interests to the Nomination & Governance Committee as needed

Group Chief Executive – Mike Wells

The Group Chief Executive leads the Executive Directors and senior executives and is responsible for the operational management of the Group on behalf of the Board on a day-to-day basis:

- Responsible for the implementation of Board decisions
- Establishes processes to ensure operations are compliant with regulatory requirements
- Sets policies, provides day-to-day leadership and makes decisions on matters affecting the operation, performance and strategy of the Group, seeking Board approval for matters reserved to the Board
- Supported by the Group Executive Committee which he chairs and which receives reports on performance and implementation of strategy for each business unit and discusses major projects and other activities related to the attainment of strategy
- Chairs the Chief Executive's Committee meetings which are held weekly to review matters requiring approval under the Group's framework of delegated authorities
- Keeps in regular contact with the Chairman and briefs him on key issues
- Meets with key regulators worldwide
- Leads on day-to-day effective stakeholder engagement

Senior Independent Director – Philip Remnant

The Senior Independent Director acts as an alternative conduit to the Board for shareholder concerns and leads the evaluation of the Chairman:

- Acts as a sounding board for the Chairman, providing support in the delivery of the Chairman's objectives
- Leads the Non-executive Directors in conducting the Chairman's annual evaluation and leads the Chairman's succession planning
- Holds meetings with Non-executive Directors without management being present, typically at least once a year to evaluate the performance of the Chairman
- Offers meetings to major shareholders to provide them with an additional communication point on request and is generally available to any shareholder to address concerns not resolved through normal channels

Committee Chairs

Each of the Committee Chairs is responsible for the effective operation of their respective Committees:

- Responsible for the leadership and governance of their Committee
- Sets the agenda for Committee meetings
- Reports to the Board on the activities of each Committee meeting and the business considered, including, where appropriate, seeking Board approval for actions in accordance with the Committees' terms of reference
- Works with the Company Secretary to ensure the continued good governance of each Committee during the year

In addition to Committee duties, the Chairs of the Audit and Risk Committees act as key contact points for the independent chairs of the audit and risk committees of the Material Subsidiaries¹

Non-executive Directors

All of the Non-executive Directors are deemed to be independent and together have a wide range of experience which can be applied to attain the strategic aims of the Group through:

- Constructive and effective challenge
- Providing strategic guidance and offering specialist advice
- Scrutinising and holding to account the performance of management in meeting agreed goals and objectives
- Serving on at least one of the Board's principal Committees
- Engaging with Executive Directors and other senior management at Board and Committee meetings as well as at training sessions and on an informal basis
- Taking part in one-to-one meetings with the Group Strategy team and participation in the annual strategy session

The Board has established four principal Committees. These Committees form a key element of the Group governance framework, providing effective independent oversight of the Group's activities by the Non-executive Directors. Each Committee Chair provides an update to the Board on the matters covered at each Committee meeting, supported by a short written summary. The terms of reference for each Committee are reviewed at least annually. The functions of the principal Committees are summarised below.

| Nomination & Governance Committee | Remuneration Committee | Audit Committee | Risk Committee |
|---|--|---|---|
| <p>Chair Paul Manduca</p> <ul style="list-style-type: none"> — Keeps leadership needs under review in support of the Group's strategic objectives — Develops succession planning for the Board and senior executives based on merit against objective criteria promoting diversity in all areas — Oversees development of a diverse pipeline in succession planning — Monitors the Group's diversity initiatives — Recommends appointments to the Board, its principal Committees and appointments of non-executive chairs to the boards of Material Subsidiaries¹ — Oversees the governance of Material Subsidiaries¹ and the Group's overall governance framework <p>➤ See Nomination & Governance Committee Report on pages 110 to 117</p> | <p>Chair Anthony Nightingale</p> <ul style="list-style-type: none"> — Ensures there is a formal and transparent process for establishing the Directors' Remuneration Policy — Approves individual remuneration packages of the Chairman, Executive Directors, senior executives and Material Subsidiary¹ non-executive directors — Approves the overall Remuneration Policy for the Group — Reviews the design and development of share plans and approves and assesses performance targets where applicable and ensures alignment with the Group's culture — Reviews workforce remuneration practices and policies when setting executive remuneration <p>➤ See Remuneration Committee Report on pages 136 to 195</p> | <p>Chair David Law</p> <ul style="list-style-type: none"> — Responsible for the integrity of the Group's financial reporting, including scrutinising accounting policies — Monitors the effectiveness of internal control and risk management systems — Monitors the effectiveness and objectivity of internal and external auditors — Approves the internal audit plan — Recommends the appointment of the external auditor <p>➤ See Audit Committee Report on pages 118 to 126</p> | <p>Chair Howard Davies</p> <ul style="list-style-type: none"> — Leads on and oversees the Group's overall risk appetite, risk tolerance and strategy — Approves the Group's risk management framework and monitors its effectiveness — From 2020 the Committee has full responsibility for all aspects of compliance — Supports the Board and management in embedding and maintaining a supportive culture in relation to the management of risk — Provides advice to the Remuneration Committee on risk management considerations to inform remuneration decisions <p>➤ See Risk Committee Report on pages 127 to 132</p> |

Terms of reference for the principal Committees can be accessed at www.prudentialplc.com/investors/governance-and-policies/board-and-committees-governance

The Board has established a Standing Committee which can meet as required to assist with any business of the Board. It is typically used for ad hoc or urgent matters which cannot be delayed until the next scheduled Board meeting.

All Directors are members of the Standing Committee and have the right to attend all meetings and receive papers.

Notice of a Standing Committee meeting is sent to all Directors and if an individual is unable to attend, he/she can give comments to the Chairman or Company Secretary ahead of the meeting for consideration by the Standing Committee. Before taking decisions on any matter, the Standing Committee must first determine that the business it is considering is appropriate for a Committee of the Board and does not properly need to be brought before the whole Board. All Standing Committee meetings are reported in full to the next scheduled Board meeting.

This governance structure allows for fast decision-making where necessary, while ensuring that the full Board has oversight of all matters under consideration and all Non-executives can contribute. Over 2019, the Company held three meetings of the Standing Committee.

Note

¹ Following the demerger of M&G plc, the Group is reviewing subsidiary governance to ensure this remains appropriate to the business and regulatory environment in which the Group operates.

Building Directors' knowledge Induction – new Directors

Amy Yip received a comprehensive induction, tailored to reflect her experience and position as a Non-executive Director. A summary of the general and specific induction programme for Amy Yip is set out below:

| General induction programme relevant to new Non-executive Directors | | |
|---|---|--|
| Understanding our governance | Understanding our business | Role-specific induction programme for Amy Yip |
| <ul style="list-style-type: none"> — Meetings with the Chairman and Group Chief Executive separately — Explanation of Prudential's corporate structure, Board and Executive Committee structure — Briefings on Group governance framework and key policies — Training as needed on the rules and governance requirements of the London and Hong Kong Stock Exchanges and on fulfilling the statutory duties of a Director | <ul style="list-style-type: none"> — Explanation of the Group's strategy and business plan — Tailored briefings with each business unit to gain a comprehensive understanding of each of their business models, product suites, pricing arrangements and governance structures — Tailored meetings with all Group functions — Comprehensive briefings on the regulatory environment in which the Group operates — Briefings on top risks and internal controls — Induction briefings and training as a whole give Directors an understanding of the interests of the Group's key stakeholders | <ul style="list-style-type: none"> — Orientation to the work and role of the Remuneration Committee — Updates on current UK remuneration topics — Meeting with the Chair of the Remuneration Committee to discuss the annual cycle of Committee work, its current focus and focus for 2020 and beyond |

Jeremy Anderson was appointed to the Board as a Non-executive Director with effect from 1 January 2020. His induction commenced in early 2020 and included a particular focus on risk matters to support his role as a member of the Risk Committee.

Continuing development of knowledge and skills

During 2019, the Board and its Committees received a number of technical and business updates as part of their scheduled meetings, providing information on external developments relevant to the Group and on particular products or operations. Below is an overview of how Directors are kept up to date:

- The Board holds an annual strategy session, which allows for detailed updates on each of the business units and deep dives on strategic direction and objectives for the Group. In 2019, these included a particular focus on the demerger of M&G plc and updates on the views of investors and other stakeholders;
- The Board receives updates on brand, environment, health and safety, culture, diversity and inclusion and employee engagement activities, usually once a year;
- The Board receives updates on corporate governance, political and regulatory developments in the US, UK, Europe and Asia and the dynamics of equity and currency markets at every scheduled meeting. Governance topics included gender pay gap reporting, the BEIS committee report on the future of audit and the Government's response to it, the Hampton-Alexander review publication, guidelines from investment institutions, the Financial Reporting Council's Lab report on climate-related corporate reporting and the publication of the updated Stewardship Code. The Board was also updated on the impact of the discontinuation of LIBOR;
- In April 2019, the Group ran a focused cyber security and information security update for members of the Risk and Audit Committees, which was particularly aimed at developing the knowledge of the Non-executive Directors;
- The Board reviews each business unit in depth at least once a year and conducts periodic site visits as part of this. In 2019, the Board received a presentation on Jackson Holdings. Other training included an overview of Jackson's distribution and products;
- The Nomination & Governance Committee received updates on the Climate Change and TCFD implementation as part of its expanded ESG remit;
- The Board and the Risk Committee receive regular updates on market developments and key risks. The Risk Committee reviews top risks on an annual basis and deep dives into specific topics in response to the identification of key risks. This review covers the financial, operational and strategic risks, whilst also identifying and addressing business environment and insurance risks within the Group;
- The Risk Committee received updates on regulatory developments focusing on the supervision of the Prudential Regulation Authority and discussions with the Hong Kong IA on the new Group-wide regulatory framework. A deep-dive review of artificial intelligence and digital transformation was undertaken as well as updates on civil unrest in Hong Kong;
- The Audit Committee received updates on developments affecting financial reporting and the work of audit committees more widely. In 2019, this included financial reporting disclosure developments and audit industry updates. These updates included consideration of the accounting treatment of the M&G Group, information security, financial crime and fraud prevention, working capital arrangements and the implementation of IFRS 17; and
- The Remuneration Committee receives updates on regulatory and governance developments affecting the Group's remuneration arrangements. In 2019, these included updates on discussions with the Hong Kong IA on the new regulatory regime, compliance with the UK Corporate Governance Code 2018 and guidelines from investment institutions.

All Directors have the opportunity to discuss their individual development needs as part of the annual Board effectiveness review and are encouraged to request specific updates during the year. At the start of the year, suggested topics are shared with the Board for feedback. Directors are asked to provide a record of training received externally on an annual basis. All Directors have the right to obtain professional advice at Prudential's expense. Board training materials are also made available, as relevant, to Group Executive Committee members, who have an opportunity to request any additional training as needed.

Risk management and internal control

The Board is responsible for ensuring that an appropriate and effective system of risk management and internal control is in place across the Group. The framework of risk management and internal control centres on clear delegated authorities to ensure Board oversight and control of important decisions. The framework is underpinned by the Group Code of Business Conduct, which sets out the ethical standards the Board requires of itself, employees, agents and others working on behalf of the Group. The framework is designed to monitor and manage, rather than eliminate, the risk of failure to achieve business objectives, and can only provide reasonable and not absolute assurance against material misstatement or loss.

Internal control

The Group Governance Manual (the Manual) sets out delegated authorities and establishes the requirements for subsidiaries to seek approvals from, or report to, Group Head Office. Group-wide policies are included within the Manual, and standards are established through these policies and other governance arrangements. Internal controls and processes, based on the provisions established in the Manual, are in place across the Group. These include controls covering the preparation of financial reporting. The operation of these controls and processes facilitates the preparation of reliable financial reporting and the preparation of local and consolidated financial statements in accordance with the applicable accounting standards, and requirements of the Sarbanes-Oxley Act. These controls include certifications by the Chief Executive and Chief Financial Officer of each business unit with respect to the

accuracy of information provided for use in preparation of the Group's consolidated financial reporting, and the assurance work carried out in respect of US reporting requirements.

The Board has delegated authority to the Audit Committee to review the framework and effectiveness of the Group's systems of internal control. The Audit Committee is supported in this responsibility by the assurance work carried out by Group-wide Internal Audit and the work of the business unit audit committees, which oversee the effectiveness of controls in each respective business unit. Details of how the Audit Committee oversees the framework of controls and their effectiveness on an ongoing basis, is set out more fully in the report on pages 118 to 126.

Risk management

A key component of the Manual is the Group Risk Framework, which requires all business units to establish processes for identifying, evaluating and managing the risks facing the business.

The Board determines the nature and extent of the principal risks it is willing to take in achieving its strategic objectives. The Board has delegated authority to the Risk Committee to assist it in providing leadership, direction and oversight of the Group's overall risk appetite, risk tolerance and strategy, overseeing and advising on the current and potential future risk exposures of the Group, reviewing and approving the Group's risk management framework, including changes to risk limits within the overall Board-approved risk appetite, monitoring the effectiveness of the risk management framework and adherence to the various risk policies.

Regular activities are detailed in the report on pages 127 to 132.

The Group's risk governance arrangements, which support the Board, the Risk Committee and the Audit Committee, are based on the principles of the 'three lines of defence' model: risk taking and management, risk control and oversight, and independent assurance.

Formal review of controls

A formal evaluation of the systems of risk management and internal control is carried out at least annually. Prior to the Board reaching a conclusion on the effectiveness of the systems in place, the report is considered by the Disclosure Committee and Audit Committee, with risk specific disclosures within the report also reviewed by the Risk Committee. This evaluation takes place prior to the publication of the Annual Report.

As part of the evaluation, the Chief Executive and Chief Financial Officer of each business unit, including Group Head Office, certify compliance with the Group's governance policies and the risk management and internal control requirements. The Group Risk function facilitates a review of the matters raised in this certification process. This includes the assessment of any risk and control issues reported during the year, risk and control matters identified and reported by the other Group oversight functions and the findings from the reviews undertaken by Group-wide Internal Audit, which carries out risk-based audit plans across the Group. Issues arising from any external regulatory engagement are also taken into account.

First line of defence (risk taking and management)

- Takes and manages risk exposures in accordance with the risk appetite, mandate and limits set by the Board;
- Identifies and reports the risks that the Group is exposed to, and those that are emerging;
- Promptly escalates any limit breaches or any violations of risk management policies, mandates or instructions;
- Identifies and promptly escalates significant emerging risk issues; and
- Manages the business to ensure full compliance with the Group risk management framework as set out in the Manual, which among other requirements, includes the Group Risk Framework and associated policies as well as approval requirements.

Second line of defence (risk control and oversight)

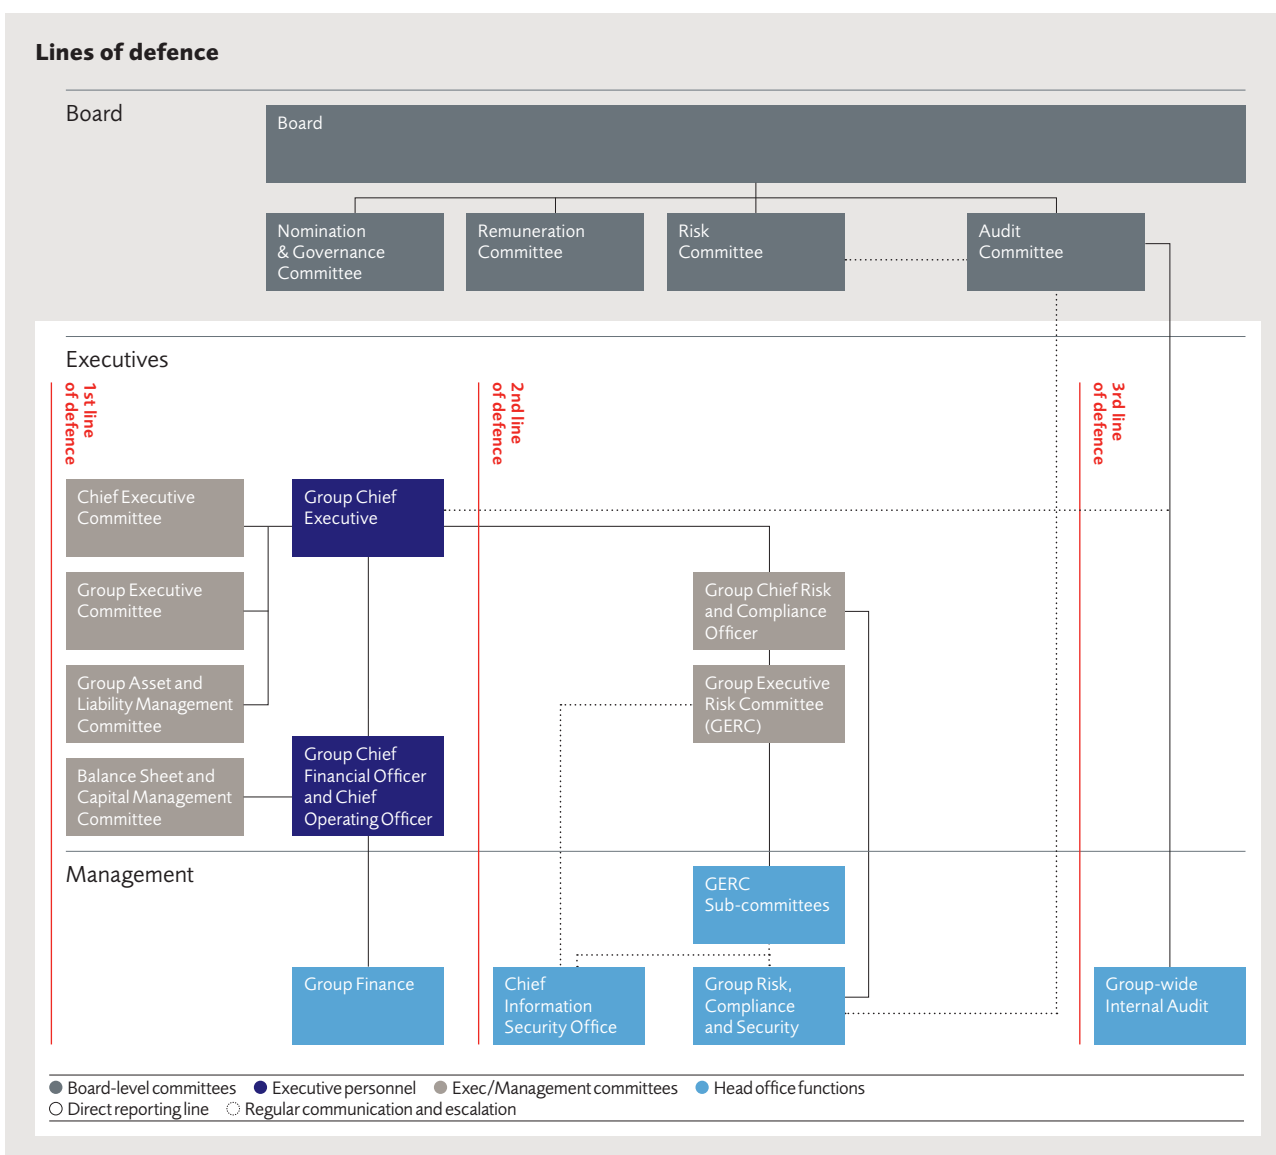

- Assists the Board to formulate the risk appetite and limit framework, risk management plans, risk policies, risk reporting and risk identification processes; and
- Reviews and assesses the risk-taking activities of the first line of defence, providing risk opinions and where appropriate challenging the actions being taken to manage and control risks.

Third line of defence (independent assurance)

- Provides independent assurance on the design, effectiveness and implementation of the overall system of internal control, including risk management and compliance.

Each business unit is required to implement a governance structure based on the three lines of defence model, proportionate to its size, nature and complexity, and to the risks that it manages.

Lines of defence

For the purposes of the effectiveness review, the Group has followed the FRC Guidance on Risk Management, Internal Control and Related Financial and Business Reporting. In line with this guidance, the certification outlined above does not apply to certain material joint ventures where the Group does not exercise full management control. In these cases, the Group satisfies itself that suitable governance and risk management arrangements are in place to protect the Group's interests. However, the relevant Group company which is party to the joint venture must, in respect of any services it provides in support of the joint venture, comply with the requirements of the Group's internal governance framework.

Effectiveness of controls

In accordance with provision 29 of the UK Code and provisions C.2.1, C.2.2 and C.2.3 of the HK Code, the Board reviewed the effectiveness and performance of the systems of risk management and internal control during 2019. This review covered all material controls, including financial, operational and compliance controls, risk management systems, budgets and the adequacy of resources, qualifications and experience of staff of the Group's accounting, internal audit and financial reporting functions. The review identified a number of areas for improvement, and the necessary actions have been or are being taken. The Audit Committees at Group and subsidiary level collectively monitor outstanding actions regularly and

ensure sufficient resource and focus is in place to resolve them within a reasonable time frame. This included oversight of M&G plc whilst it was a subsidiary of the Group.

The Board confirms that there is an ongoing process for identifying, evaluating and managing the significant risks faced by the Group, including the demerged M&G plc business prior to 21 October 2019, which has been in place throughout the period and up to the date of this report, and confirms that the system remains effective.

Three. (Two regular meetings and an additional meeting to consider Chair succession, held in September.)

Nomination & Governance Committee report

Dear shareholder

This report highlights some of the key areas of focus considered by the Committee during 2019.

The Committee's role has expanded recently to include taking a wider role in overseeing diversity initiatives, the wider talent pipeline, and receiving updates on ESG matters. Accordingly, the number of regular Committee meetings in 2020 will increase to three.

Ongoing succession planning

One of the Committee's main roles is to ensure the Board retains an appropriate balance of skills to support the strategic objectives of the Group. As part of this, the Committee helps maintain a rigorous and transparent approach to the identification of candidates for appointment as Directors.

A significant part of the Committee's activities over 2019 was focused on determining the most appropriate combination of skills and experience needed by the Board to drive the strategic focus of the Group post-demergers as well as supporting the creation of the M&G plc board prior to demerger. This included consideration of my successor as Chair of the Board and as Committee Chair. Philip Remnant led discussions on my succession in his capacity as Senior Independent Director culminating in the announcement of the appointment of Shriti Vadera. A separate report from Philip is set out below. As a member of the Committee and ultimately as the new Chair of the Group, Shriti will have an opportunity to shape the future composition of the Board.

In accordance with the UK Code, Howard Davies, who has been a member of the Board and Chair of the Risk Committee since its inception in 2010, will not be standing for re-election at the 2020 Annual General Meeting. The Committee has therefore been focused on identifying a suitable successor and recommended the appointment of Jeremy Anderson, who contributes substantial leadership and international experience in financial services, particularly in audit and risk. Having appointed Jeremy as a Non-executive Director with effect from January 2020, we subsequently announced that he would assume the role of Risk Committee Chair from the conclusion of the 2020 Annual General Meeting.

During the year, the Committee also recommended the appointment of Amy Yip to the Board as a Non-executive Director. Amy brings 40 years of experience in insurance, asset management and government gained across China and South-east Asia.

Diversity

Improving gender diversity at Board level continues to receive considerable attention from the Committee and diversity in its wider sense is an important factor in identifying candidates for Board level succession. The Committee considers this when making recommendations and talent search agencies are briefed on the Group's requirements in this respect when identifying candidates. Gender representation has improved at Board level during 2019, however there remains scope for improvement in this important area. Progress has been made via the appointment of Non-executive Directors and there is a continuing focus on the executive talent pipeline in order to increase diversity, in its widest sense, on both the Group Executive Committee and ultimately the Board. The Board exceeds the recommendation of the Parker review in respect of ethnic diversity. The Committee also considers the diversity of experience on the Board, including expertise across the geographical markets in which the post-demergers Group operates.

The Committee has responsibility for reviewing and monitoring diversity initiatives across the Group as a whole. I am pleased that the Group remains on target by the end of 2021 to achieve 30 per cent representation of women in senior leadership roles in accordance with our commitment to the HM Treasury Women in Finance Charter.

ESG considerations

The Committee received updates on primary ESG-related reporting developments and the proposed approach to ESG reporting, and reports from the newly created ESG Executive Committee. The Committee also received updates on progress against implementing the Task Force on Climate-related Financial Disclosures, including how to quantify risks and their potential financial impact on the Group.

Governance

Further changes have been made to the Committee's Terms of Reference to reflect the Committee's oversight of the process surrounding the annual evaluation of the effectiveness of the Board and its Committees. Committee members have taken a more active role in planning the Board evaluation in respect of 2019 and reviewed the actions arising from that evaluation. In 2020, the Committee will oversee the process for the appointment of an external specialist to conduct the next Board evaluation.

The Committee continues to oversee governance arrangements for the Group's subsidiaries to ensure they remain appropriate for the post-demerger Group.

The effectiveness of the Committee was reviewed as part of the annual Board evaluation, which confirmed that the Committee continued to operate effectively during the year and no major areas requiring improvement or action points were highlighted. Committee members noted that the focus in 2020 should include continuing enhancements on Diversity and Inclusion reporting in respect of the executive pipeline and developing the Committee's role in monitoring ESG strategy and reporting.

Report from Philip Remnant

Philip Remnant
Senior Independent Director

As announced on 30 January 2020, Shriti Vadera will join the Board with effect from 1 May 2020 as a Non-executive Director and member of the Nomination & Governance Committee, and is expected to succeed Paul Manduca as Chair of the Board and Chair of the Nomination & Governance Committee on 1 January 2021. Paul will step down as Chair and as a Director with effect from 31 December 2020.

Paul was first appointed to the Board in October 2010, meaning that the UK Code would have prescribed his retirement in October 2019. As I reported last year, the Board considered that it would have been disruptive for Paul to step down as Chair during a time of substantial change associated with the oversight and execution of the demerger itself and also for a period afterwards. It was expected that a search for a suitable successor to Paul would commence in 2020, with the intention that he would not stand for re-election at Prudential's Annual General Meeting in May 2021.

However, the accelerated completion of the demerger meant it was considered appropriate to bring this timing forward.

The search for suitable candidates was influenced by the views of the Board, taking account of the strategic needs of the post-demerger Group. Paul provided his views on the scope of the role and the individual attributes required. However, he recused himself from further discussions about the selection process.

I am delighted that Prudential has been able to secure such a high calibre individual to succeed Paul. Shriti was the unanimous choice of the Board following a rigorous assessment of internal and external candidates from around the world. She has senior boardroom experience at complex organisations with extensive international operations, and strong strategic and financial services experience.

|--|--|--|
| Senior leadership below Group Executive Committee | | |
| The Committee has oversight of a diverse pipeline of leadership talent extending below the level of the Group Executive Committee and seeks to attract, retain and develop the next generation of emerging leadership. | The Committee considered succession planning for senior management below Group Executive Committee level which is supported by an annual update on talent and diversity at different levels of the organisation and includes consideration of risk retention mitigation initiatives such as leadership development programmes. This review is usually undertaken and reported on in the fourth quarter of each year and prior to 2019, was undertaken by the Board. Reporting on activities in 2019 was moved to February 2020 in order to allow for a fuller review of talent succession planning across the post-demerger business. | The focus was on building new capabilities to support the changing business model and future direction of the business. The internal pipeline was being rebuilt in support of new roles, new capability and increased complexity. |
| Diversity Board and Group Executive Committee | | |
| Given the global reach of the Group's operations, its business strategy and long-term focus, the Board makes every effort to ensure it is able to recruit Directors from different backgrounds, with diverse experience, perspective and skills. The diversity not only contributes to Board effectiveness but is essential for successfully delivering the strategy of an international business. | <p>The Group's Diversity and Inclusion policy applies at all levels of the business including the Board and Group Executive Committee.</p> <p>The Committee is responsible for overseeing a diverse pipeline for the Board and other senior executives.</p> <p>The Board does not endorse quotas but is committed to recruiting the best available talent and appointing the most suitable candidate for each role, while at the same time aiming for appropriate diversity on the Board.</p> <p>Succession plans are based on merit against clear objective criteria and promote diversity across gender, social and ethnic background and cognitive and personal strengths.</p> <p>An element of Executive Directors' remuneration is based on achieving a diversity target. Further information is set out in the Directors' remuneration report.</p> | <p>The Board considers that its diversity of experience and skills set has increased as a result of Board level succession in 2019.</p> <p>The diversity of the Board, including skills and experience, of each Director is set out in the individual biographies of Directors on pages 92 to 97.</p> <p>The Committee considers the pipeline for diverse talent below the Group Executive Committee level which remains strong, with 32 per cent female representation of those who report directly to the Group Executive Committee.</p> <p>Further details of the gender make-up of the Board, the Group Executive Committee, management and employees can be found on page 81.</p> |

Process for appointing new Directors

The Committee assists the Board in ensuring that there is a formal, rigorous and transparent approach to the appointment of new Directors.

The Committee is involved from the start when a vacancy or a gap in the Board's skills is identified. Led by the Chairman, and working with the Group Chief Executive and the Group Human Resources Director, a role specification is prepared, reflecting the desired skills and experience and the Group's Diversity and Inclusion policy. This specification takes into account feedback from the Committee. Once agreed, specialist talent agencies are typically engaged to create a shortlist of candidates which is reviewed by the Committee and other stakeholders. Interviews with individuals then take place with selected Committee members and feedback is provided to all members. In this manner, a preferred candidate is selected and the Committee then recommends the individual to the Board for appointment. For the appointment of Executive Directors, the process is led by the Group Chief Executive working closely with the Chairman. The Senior Independent Director leads the Committee in the process of appointing a new Chairman.

Contemporaneously with this process, due diligence checks are undertaken on the candidate and Prudential liaises with the relevant regulatory authorities. The Committee is kept updated on this process as necessary.

Note

In addition to acting as search consultant in respect of the appointment of the Chair, the Chair of the Risk Committee and certain executive hires, Egon Zehnder also provides support for senior development assessments. Talent Intelligence also provides additional succession planning support to the Group below Group Executive Committee level. Ridgeway Partners also provided support for succession planning in respect of certain subsidiary company board committees.

Key matters considered during the year continued

| Why it is important to Prudential | How is this considered | Key outcomes |
|---|--|--|
| <p>Group-wide oversight</p> <p>Following an update to its terms of reference in December 2018, the Committee's remit includes reviewing the Group's diversity initiatives to see that these are in line with strategic objectives.</p> | <p>The Group's Diversity and Inclusion policy aims to provide equal opportunities for all who apply and who perform work for our organisation, irrespective of sex, race, age, ethnic origin, educational, social and cultural background, marital status, pregnancy and maternity, civil partnership status, any gender reassignment, religion or belief, sexual orientation, disability, or part time/fixed term work.</p> <p>The Committee keeps this under review across all its succession planning.</p> | <p>In line with the Committee's expanded remit, consideration was given to updating and developing the approach to overseeing talent development and Diversity and Inclusion initiatives across the Group. A review of the approach was subsequently provided to the Committee in February 2020, including an update on activities across the Group's business units and details of the 2020 Diversity & Inclusion and Talent strategy.</p> <p>A description of the Group's activities on Diversity and Inclusion can be found in the ESG summary.</p> |
| | <p>As part of the Group's commitment to diversity, Prudential is a signatory to the HM Treasury 'Women in Finance Charter' which aims to increase the number of women working in senior management in financial services companies. We have set a gender diversity target of 30 per cent women in senior management by the end of 2021.</p> | <p>As at 31 December 2019 the percentage of women in senior management was 28 per cent and the Group remains on track to meet the 30 per cent target by the end of 2021.</p> |
| <p>Non-executive Directors, independence, time commitment and terms of appointment</p> | | |
| <p>Independence</p> <p>Monitoring and safeguarding the independence of the Non-executive Directors is essential to comply with their statutory and regulatory obligations.</p> <p>Independence helps ensure effective scrutiny of management and individual Executive Directors against agreed objectives.</p> | <p>The Committee considers the independence of the Non-executive Directors as required by the UK Code and HK Listing Rules as part of any recommendation of the appointment of new Non-executive Directors and when recommending Non-executive Directors for election.</p> <p>Each Non-executive Director provides an annual confirmation of his or her independence as required under the HK Listing Rules.</p> <p>Prior to his appointment as a Non-executive Director, the Committee carefully considered the independence of Jeremy Anderson. In particular, the Committee reviewed the potential impact of his former position as a partner at KPMG (including any financial interest) which ended with effect from 31 December 2017 and noted that he had not been involved in any way in the audit of Prudential plc or its subsidiaries.</p> <p>The Committee considered Jeremy Anderson's independence with reference to the UK Code and HK Listing Rules, alongside relevant auditor independence and ethical guidance applicable in the UK and the US which generally recommend that independence of an external auditor is maintained by prohibiting a former partner from becoming a Director of an audit client for a period of two years after their employment has ceased.</p> | <p>All Non-executive Directors were considered to be independent, taking into account UK and HK requirements.</p> <p>Although Howard Davies has exceeded the nine-year tenure suggested by the UK Code and Kai Nargolwala will exceed from January 2021 (subject to re-election of Kai by shareholders in May 2020), both continue to demonstrate independence of judgement.</p> <p>Amy Yip and Shriti Vadera were deemed to be independent on appointment.</p> <p>Prudential also deems Jeremy Anderson to be independent in accordance with the UK and HK Codes, notwithstanding his former position as a partner at KPMG, having taken account of all circumstances set out in the UK Code and other applicable guidance in other jurisdictions. On balance, the Committee and the Board concluded that Jeremy Anderson could be expected to demonstrate objectivity and independence of judgement noting that two years had elapsed since his position at KPMG (including any financial interest) ended.</p> |
| | <p>In line with US regulatory requirements, the Committee annually reviews the independence of the Audit Committee with reference to the requirements of the Sarbanes-Oxley legislation.</p> | <p>The members of the Audit Committee were considered to be independent within the meaning of the Sarbanes-Oxley legislation.</p> |

Key matters considered during the year continued

| <i>Why it is important to Prudential</i> | <i>How is this considered</i> | <i>Key outcomes</i> |
|--|--|--|
| <p>Time commitment</p> <p>Setting out clear expectations on time commitment means Non-executive Directors are able to ensure they devote sufficient time for the proper performance of their duties.</p> | <p>The Committee reviews the time commitment required of the Non-executive Directors. Time requirements take account of preparation for and attendance at Board meetings and other regular commitments, as well as additional time that may be required for unforeseen events or future projects.</p> <p>All Non-executive Directors currently serve on at least one of the Board's principal Committees, which requires an additional commitment of time dependent on the Committee and role.</p> <p>The Committee considers the external commitments of Non-executive candidates and on appointment, all Non-executive Directors confirm they are able to devote sufficient time to the Group's affairs to meet the demands of the role.</p> | <p>The Committee concluded that the expected time commitment of 32.5 days per annum remained appropriate.</p> <p>The external commitments of Directors were considered as part of the Committee's recommendation of Directors' election at the next Annual General Meeting. Prudential recognises the need for Non-executive Directors to dedicate sufficient time to their role while also developing a wide range of experience and skills through seeking external appointments.</p> |
| | <p>All Non-executive Directors are required to discuss any additional commitments which might impact the time which he or she is able to devote to their role with the Chairman prior to accepting and the Chairman escalates to the Committee as appropriate.</p> | <p>The Committee considered and approved the appointment of Tom Watjen as a non-executive director of Arch Capital Group Ltd., a specialist financial services group with shares listed in Bermuda. The Committee considered the expected time commitment of the role and, taking into account any other commitments, concluded that he continued to have sufficient time to commit to his duties as a Non-executive Director. No conflicts of interest were identified in connection with the proposed appointment.</p> |
| <p>Terms of appointment</p> <p>It is important that the Non-executive Directors have clear terms of appointment which set out their duties towards Prudential and that their tenure is considered as part of ongoing succession activities.</p> | <p>Non-executive Directors are appointed for an initial term of three years.</p> <p>Subject to review by the Committee and re-election by shareholders, it is expected that Non-executive Directors serve a second term of three years. After six years, Non-executive Directors may be appointed for a further year, up to a maximum of three years in total. Reappointment is subject to rigorous review as well as re-election by shareholders.</p> <p>The Directors' remuneration report sets out the terms of the Non-executive Directors' letters of appointment and the terms of Executive Directors' service contracts.</p> <p>The tenure of each Non-executive Director is shown in the Directors' remuneration report.</p> | <p>Kai Nargolwala, Anthony Nightingale, Philip Remnant and Alice Schroeder have all been in office for six years or more. When considering their re-election at the next AGM, the Committee considered their continuing appointment particularly carefully. The Committee recommended that they each serve for a further term of one year, subject to shareholder re-election.</p> <p>Both Amy Yip and Jeremy Anderson were provided with letters of appointment confirming their duties and obligations. These letters are on standard terms applicable to all Non-executive Directors.</p> |

Chair of the Audit Committee

Committee members

- David Law (Chair)
- Jeremy Anderson (from January 2020)
- Howard Davies
- Philip Remnant
- Alice Schroeder

Regular attendees

- Chairman of the Board
- Group Chief Executive
- Group Chief Financial Officer and Chief Operating Officer
- Group Chief Risk and Compliance Officer
- Director of Group Finance
- Director of Group Financial Accounting and Reporting
- Company Secretary
- Director of Group Compliance (until January 2020)
- Group Chief Internal Auditor
- External Audit Partner

Number of meetings in 2019:

Twelve. (Nine regular meetings were held, including four shorter meetings to discuss full-year and half-year reporting matters, and three additional meetings to consider demerger related activities. A joint meeting was also held with the Risk Committee.)

Audit Committee report

Dear shareholder

As Chair of the Audit Committee, I am pleased to present this report on the Committee's activities during 2019. The Committee provides the Board with assurance as to the integrity of the Group's financial reporting and, together with the Risk Committee, monitors the effectiveness of the second and third lines of defence, which are an integral part of our internal control environment.

With regard to the Group's financial reporting, the Committee's work is focused on ensuring appropriate financial accounting policies are adopted and implemented, and on assessing key judgements and disclosures. We also have throughout the year received updates on the programme to implement IFRS 17 given the significant system and accounting changes it entails.

The Committee held additional meetings during the year to focus on matters relating to the demerger of M&G plc. The Committee supported the Board's review of the shareholder Circular and reviewed the various supporting processes and assurances received. When considering matters relating to the demerger, the Committee was conscious of the need to balance potential conflicts of interests between Prudential and M&G. The Committee also discussed the appropriate governance arrangements for the Group's subsidiary audit committees post-demerger, together with associated transitional arrangements. I worked closely with the chair of the M&G plc audit committee to ensure a smooth transition of the oversight of the M&G business between the two committees.

External auditor

An important part of the Committee's work consists of overseeing the Group's relationship with KPMG LLP (KPMG), including safeguarding independence, approving non-audit fees and satisfying ourselves that it is in the best interests of shareholders to recommend the re-appointment of KPMG. During the year, we enhanced the review of their effectiveness by adding an interview process conducted by a senior KPMG partner, independent of the audit team, with senior management across the Group and with Committee members. The results were discussed directly with the Committee. Overall feedback was positive and the KPMG audit team is following up on areas where potential enhancements were highlighted.

The Committee also requested earlier an enhanced review of the M&G half year key judgements, particularly longevity, in advance of the half year results announcement.

Under the relevant audit tender rules the Group is required to change audit firm no later than the 2023 financial year end. The Committee has previously agreed that in light of the significant change to the Group being undertaken, with the demerger of M&G plc, and the introduction of a new insurance accounting standard (IFRS 17) in the near term, that a new auditor should be engaged for the 2023 year end but that a competitive tender for the 2023 audit should commence in the first half of 2020. Planning for the tender has commenced and meetings with audit firms (not restricted to the 'Big-Four') have been held to assess their ability to tender in relation to the complexity of Prudential's geographically diverse business and their barriers to becoming independent. A formal tender process to identify KPMG's successor will be undertaken in the first half of 2020 and a Board decision is expected in July.

Internal audit

Throughout 2019, the Committee continued to receive regular briefings from the Group Chief Internal Auditor. During the year, Group-wide Internal Audit (GwIA) undertook a programme of risk-based audits covering matters across the business units in addition to assurance work on the demerger and significant change programmes. The work undertaken by GwIA during the year was important in supporting the demerger, the Group maintaining a stable control environment through a period of significant change and the creation of two appropriately-sized, resourced and experienced independent internal audit functions.

The effectiveness of GwIA was assessed in 2019, together with a review of progress against suggested enhancements identified by the external review undertaken by Deloitte in 2017. I have met regularly with the Group Chief Internal Auditor and the Group-wide Quality Assurance Audit Director to discuss internal audit work and matters arising. The Committee has also asked that management responsible for rectifying some of the issues identified attend the Committee to ensure that appropriate action was being taken. The Committee also approved the 2019 and 2020 internal audit plans, which have taken account of the business and organisational changes arising from the demerger.

Compliance

The Committee received updates on matters arising from the annual Compliance Plan throughout 2019. The plan focused on a number of areas to help strengthen the compliance framework, which is intended to aid the Group in meeting regulatory obligations, including monitoring compliance with key elements of the compliance framework such as conflicts of interest, anti-money laundering and anti-bribery and corruption policies. Following a change in management responsibility, Howard Davies and I agreed that, the Risk Committee should take on responsibility for all aspects of overseeing the compliance function with effect from 1 January 2020.

Committee governance

The Committee works closely with the Risk Committee to make sure both Committees are updated and aligned

on matters of common interest. Where responsibilities are perceived to overlap between the two Committees, Howard Davies and I agree the most appropriate Committee to consider the matter. During 2019, there was one joint session which, similar to the prior year, focused on cyber and information security, more details of which are set out in the Risk Committee report on page 127.

In advance of each of the main Committee meetings, I speak to the chairs of our main subsidiary audit committees and update the Committee on important points raised. I also report to the full Board after each Committee meeting on the main matters discussed.

In April we held a private session as a Committee to discuss our evaluation and key objectives for the year. We assessed our performance against these objectives

and I am pleased with the feedback received. The demerger, IFRS 17 and key accounting judgements were particular areas of focus. One area we will monitor for the future is how we are kept abreast of Asian market developments. One of my key focuses over the past two years has been the Group's whistleblowing procedures. I regularly meet privately with the Group Resilience Director to discuss whistleblowing cases and their resolution. These are also discussed in private sessions with the Committee or the relevant local audit committee. The Committee also meets privately with GwIA and KPMG.

The effectiveness of the Committee was reviewed as part of the annual Board evaluation, which confirmed that the Committee continued to operate effectively during the year and no major areas requiring improvement were highlighted.

Note

¹ Two meetings were held in each of February and March 2019.

Key matters considered during the year

Matter considered

How the Committee addressed the matter

Financial reporting

Overview

One of the Committee's key responsibilities is to monitor the integrity of the financial statements and any other periodic financial reporting. This has primarily focused on the Annual Report and Accounts but also covers the Group's environmental, social and governance report and Tax Strategy Report. The Committee also reviewed the 2018 Solvency and Financial Condition Report and associated Pillar 3 returns submitted to the Prudential Regulation Authority as required under the Solvency II regime. Post-demerger, this regime is no longer applicable.

In reviewing these and other items, the Committee received reports from management and, as appropriate, reports from internal and external assurance providers, which in some cases were provided at the explicit request of the Committee.

When considering financial reporting, the Committee assesses compliance with relevant accounting standards, regulations and governance codes. During 2019, the Group adopted IFRS 16 'Leases' and, as described in note A3, this resulted in a recognition of \$895 million right-of-use asset and an equivalent amount of lease liabilities on the balance sheet on day one. The Committee continued to receive updates on the Group's plans to implement IFRS 9 'Financial Instruments' and IFRS 17 'Insurance Contracts', which are not expected to be effective before 2022. The approach to adopting these standards is further discussed in note A3.

The following sections set out the key assumptions, judgements and other matters considered as part of their review of the 2019 Annual Report and Accounts.

Key assumptions and judgements

The Committee reviewed the key assumptions and judgements supporting the Group's IFRS results, including those made in valuing the Group's investments, insurance liabilities and deferred acquisition costs under IFRS, together with reports on the operation of internal controls to derive these amounts. It also reviewed the assumptions underpinning the Group's European Embedded Value (EEV) metrics.

Assumption setting

The measurement of insurance liabilities are based on estimates of future cash flows, including those to and from policyholders, over a long period of time. These estimates can, depending on the type of business, be highly judgemental. The Committee considered changes to assumptions and other estimates used to derive IFRS insurance liabilities and EEV reporting. Peer benchmarking was considered where available. The key assumptions reviewed were:

- Persistency, mortality, morbidity (including in relation to medical inflation) and expense assumptions within the Asia life businesses;
- Policyholder behaviour (eg guaranteed benefit utilisation and persistency) and mortality assumptions affecting the measurement of Jackson guaranteed liabilities (see note C4.2(b) of the IFRS financial statements);
- Economic assumptions, including investment return and associated discount rates; and
- Changes to the allowance within EEV for future hedge costs in connection to the Jackson variable annuity business. This is discussed further in note 7 of the EEV basis results.

The Committee was satisfied that the assumptions adopted by management were appropriate. Further information on the effects of material changes to insurance assets and liabilities is included in note B3 to the IFRS financial statements and in the EEV basis results.

Valuation of investments

The Committee received information on the carrying value of investments in the Group's balance sheet including information on how those values were calculated for those investments which require more judgement (for example private placement loans). Further information on the valuation of assets is contained in note C3 of the IFRS financial statements. The Committee satisfied itself that overall investments were valued appropriately.

Intangible assets including deferred acquisition costs (DAC)

The Committee received information to enable it to review the more material intangible asset balances. This included the assumptions that supported the amortisation profile of the DAC balance in the US, as described in note A4.1 'Other items requiring application of critical estimates or judgements' and whether there had been any indication of impairment of the Group's distribution rights assets. The Committee was satisfied that there was no impairment of the Group's intangibles at 31 December 2019. Further information is contained in note C5 of the IFRS financial statements.

Key matters considered during the year continued

| Matter considered | How the Committee addressed the matter |
|-----------------------------------|--|
| Other financial reporting matters | <p>Demerger of M&G plc</p> <p>The Committee reviewed the Class 1 Shareholder Circular prepared by management in accordance with the UK's Listing Rules for the demerger of M&G plc in October 2019. Assurance was sought from external parties including the Group's reporting accountant and financial advisers. The Committee reviewed the procedures undertaken to support the verification of material statements made in the Circular. The Committee reviewed drafts of documents throughout 2019 and so were able to comment on the approach and content throughout the process.</p> <p>Change in presentation currency of the Group financial statements</p> <p>Following the demerger of M&G plc, the Audit Committee approved management's proposal to change the Group's presentation currency in these financial statements from pounds sterling to US dollars. Given that a significant majority of the Group's earnings post demerger are denominated in US dollars, the Group believes that the presentation currency change will give investors and other stakeholders a clearer understanding of Prudential's performance over time. The Committee reviewed the methodology and process for the currency conversion as explained in note A1 of the IFRS financial statements. It also reviewed and agreed that, from 31 December 2019, the functional currency of the parent company had changed to US dollars from pounds sterling given the change to loans and dividend payments arising at that date.</p> <p>Taxation</p> <p>The Committee regularly receives updates on the Group's tax matters and provisions for certain open tax items including tax matters in litigation. The Committee was satisfied that the level of provisioning adopted by management was appropriate. See note B4 of the IFRS financial statements.</p> <p>Going concern and viability statements</p> <p>The Committee considered various analyses from management regarding Group and subsidiary capital and liquidity prior to recommending to the Board that it could conclude that the financial statements should continue to be prepared on the going-concern basis and that the disclosures on the Group's longer-term viability were both reasonable and appropriate. The Committee considered information on the risks to the Group's liquidity and capital position when making this assessment.</p> <p>Fair, balanced and understandable requirement</p> <p>The Committee carried out a formal review of whether the Annual Report and Accounts were 'fair, balanced and understandable' as required by the UK Corporate Governance Code. In particular, they considered whether the report gave a full picture of the Group's performance in the year with important messages appropriately highlighted, the level of consistency between financial statements and narrative sections and whether performance measures were clearly explained. They also considered the prominence of alternative performance measures.</p> <p>After completion of its detailed review, the Committee was satisfied that, taken as a whole, the Group's Annual Report and Accounts were fair, balanced and understandable.</p> <p>Parent company financial statements</p> <p>The Committee reviewed the parent company profit and loss account and balance sheet, which included the recoverability of the parent company's investment in subsidiaries by assessing whether the net assets of the relevant subsidiaries, being an approximation of their minimum recoverable amount, were in excess of their carrying value at the balance sheet date and whether those subsidiaries have historically been profit making.</p> |

Key matters considered during the year continued

Matter considered

How the Committee addressed the matter

External audit

Review of effectiveness, non-audit services and auditor reappointment

External audit effectiveness

The Group's external auditor is KPMG LLP (KPMG) and oversight of the relationship with them is one of the Committee's key responsibilities. The Committee reviews the effectiveness of the audit throughout the year taking into account:

- The detailed audit strategy for the year and coverage of the highlighted risks;
- Group materiality and how that is applied to the individual business units;
- Insight around the key accounting judgements, including benchmarking, and the way KPMG applied constructive challenge and professional scepticism in dealing with management;
- The outcome of management's internal evaluation of the auditor as discussed below; and
- Other external evaluations of KPMG, with a focus on the Financial Reporting Council's Annual Quality Review.

There is an open dialogue on emerging risks and issues between the Group Lead Partner and Committee members via a regular schedule of meetings aligned to key reporting milestones. The Committee formally meets with the Group Lead Partner without management present.

Internal evaluation of KPMG was conducted using a questionnaire that was circulated to the Committee members, Material Subsidiary audit committee members, the Group Chief Financial Officer and the Group's senior financial leadership for completion. A key component of the evaluation is the degree of challenge and robustness of approach to the audit. The survey asked 27 questions over four categories (audit quality and execution, team performance, process and communication) in relation to the 2018 audit.

As noted above the Committee enhanced the 2019 effectiveness review by arranging for a series of interviews to be conducted by a senior partner independent from the engagement team.

KPMG were given the opportunity to respond to the findings in the reports. As a result of the reports, KPMG proposed enhancements to the audit and team.

Key matters considered during the year continued

| Matter considered | How the Committee addressed the matter |
|--------------------------------------|--|
| Auditor independence and objectivity | <p>The Committee has responsibility for monitoring auditor independence and objectivity and is supported in doing so by the Group's Auditor Independence Policy (the Policy). The Policy is updated annually and approved by the Committee. It sets out the circumstances in which the external auditor may be permitted to undertake non-audit services and is based on four key principles which specify that the auditor should not:</p> <ul style="list-style-type: none"> — Audit its own firm's work; — Act as management or employees for the Group; — Have a mutual or conflicting interest with the Group; or — Be put in a position of being an advocate for the Group. <p>The Policy has two permissible service types: those that require specific approval by the Committee on an engagement basis and those that are pre-approved by the Committee with an annual monetary limit capped at no more than 5 per cent of the Group audit fee in the proposed year and capped at \$65,000 (£50,000) individually. In accordance with the Policy, the Committee approved these permissible services, classified as either audit or non-audit services, and monitored the usage of the annual limits on a quarterly basis. Non-audit services undertaken by KPMG were agreed prior to the commencement of work and were confirmed as permissible for the external auditor to undertake in accordance with the Policy which complies with the rules and regulations of the UK Financial Reporting Councils' Ethical Standard (2016), the US Securities and Exchange Commission (SEC) and the standards of the Public Company Accounting Oversight Board (PCAOB).</p> <p>The Committee considered potential impacts on independence that could have arisen from the increase in non-audit services during the year, with the non-audit fee ratio increasing to 43 per cent (2018: 12 per cent). The increase was driven by non-audit services completed by KPMG in their role as reporting accountant for the demerger of M&G plc. The Committee concluded that as the Group's auditor it was appropriate for KPMG to act as reporting accountant and this did not impair their independence. The audit partner was not involved in the delivery of services as the reporting accountant for the demerger and neither he nor members of the audit team are incentivised on, or rewarded in respect of, the provision of non-audit services to Prudential plc.</p> <p>In keeping with professional ethical standards, KPMG also confirmed their independence to the Committee and set out the supporting evidence for their conclusion in a report that was considered by the Committee prior to publication of the financial results.</p> <p>During the year, the Committee considered the proposals put forward by the Financial Reporting Council in December 2019 in a revision to its Ethical Standard and Auditing Standards on the Policy. The Committee agreed to implement their proposals for the 2020 year end. The key change is to establish a specific 'white-list' of non-audit services that the external auditor will be permitted to perform. The Committee will continue to monitor developments to ensure the Group's policies and processes around audit effectiveness and independence evolve in line with market practice.</p> |
| Fees paid to the auditor | <p>The fees paid to KPMG for the year ended 31 December 2019 amounted to \$30.4 million (2018: \$24.4 million) of which \$13.0 million (2018: \$3.0 million) was payable in respect of non-audit services. Non-audit services accounted for 43 per cent (2018: 12 per cent) of total fees payable. A breakdown of the fees payable to KPMG can be found in note B2.4 to the IFRS financial statements. Of the \$13.0 million (2018: \$3.0 million) non-audit services fees, \$11.7 million (2018: \$1.0 million) was for one-off services associated with the demerger of M&G plc. Excluding these one-off fees associated with the demerger, non-audit services accounted for 7 per cent (2018: 9 per cent) of total fees payable.</p> <p>The remaining \$1.3 million (2018: \$1.5 million out of the remaining \$2.0 million) of non-audit services fees was in respect of other assurance services. These services covered assurance over the Group's assurance reports on internal controls of certain Group companies that are made available for third parties, comfort letter procedures to support debt raising in the year and Solvency II external disclosures up to the demerger. In all these cases, the audit firm was considered the most appropriate to carry out the work, given its knowledge of the Group and the synergies that arise from running these engagements alongside its main audit.</p> <p>All non-audit services were pre-approved by the Committee and were in line with the Policy discussed above.</p> |

Key matters considered during the year continued

| <i>Matter considered</i> | <i>How the Committee addressed the matter</i> |
|---|---|
| Reappointment | Based on the outcome of the effectiveness evaluation and all other considerations, the Committee concluded that there was nothing in the performance of the auditor which would require a change. The Committee therefore recommended that KPMG be reappointed as the auditor. A resolution to this effect will be proposed to shareholders at the 2020 Annual General Meeting. |
| Audit tender | <p>The Committee acknowledges the provisions contained in the UK Code in respect of audit tendering, along with European rules on mandatory audit rotation and audit tendering. In conformance with these requirements, the Company will be required to change audit firm no later than for the 2023 financial year end. The external audit was last put out to competitive tender in 1999 when the present auditor, KPMG, was appointed. Since 2005, the Committee has annually considered the need to retender the external audit service.</p> <p>The Audit Committee assessed in February 2019 that in light of the significant change to the Group being undertaken, with the demerger of M&G plc, and the introduction of a new insurance accounting standard (IFRS 17) in the near term, that a new auditor should be engaged in time for the 2023 year end. In conducting this review, the Committee concluded that it would be appropriate to commence a competitive tender for the 2023 audit in the first half of 2020. The planning for this tender process has commenced with the Committee Chair meeting with a number of firms, including firms outside of the 'Big Four', to assess interest and ability to tender for the audit, with focus on capability and resource to service the key Asian business units. This was supplemented by a formal request for information to those firms who indicated they would be interested in tendering. A formal invitation to tender will be issued to those firms that confirmed they are able to undertake the audit in March 2020, with the Committee's recommendation of which firm to appoint to be considered for approval by the Board in July 2020. The tender process is being led by the Audit Committee with the support of Internal Audit and while the selection criteria are yet to be formally set, audit quality will be at the core of the decision.</p> <p>The auditor tender timeline takes into account the complexity of the Group and the expected timing of the introduction of IFRS 17 and allows the appointee time to ensure they meet the audit independence requirements to which the Group is subject. The timing remains subject to the Committee's normal annual review of auditor performance and recommendation to shareholders.</p> <p>The Company has complied throughout the 2019 financial year with the provisions of the Statutory Audit Services for Large Companies Market Investigation (Mandatory Use of Competitive Tender Processes and Audit Committee Responsibilities) Order 2014 issued by the Competition and Markets Authority.</p> <p>In line with the Financial Reporting Council's Ethical Standard, the rules and regulations of the SEC and the standards of the PCAOB, a new Group Lead Partner, Philip Smart, was appointed in respect of the 2017 financial year. Mr Smart is expected to be in place for a five-year term until the completion of the 2021 reporting cycle. A new Group Lead Partner will be required for the 2022 audit and an appropriate transition plan developed.</p> |
| Second line oversight | |
| Compliance, financial crime prevention, whistleblowing | |
| Compliance oversight | <p>The Group Compliance Director provided the Committee with regular reports that included updates on: the progress against the 2019 Compliance Plan; key Compliance activities; the effectiveness of the Compliance function; results of Compliance monitoring reviews; material regulatory issues; and the impact of any regulatory change and the establishment of the Hong Kong IA as the Group-wide supervisor.</p> <p>From 1 January 2020, the Risk Committee assumed responsibility for Compliance oversight from the Committee in order to align governance with changes to management's reporting responsibilities.</p> |
| Financial crime prevention | The Committee received the Annual Financial Crime Report that assessed the effectiveness of the Group's systems and controls to manage financial crime risks. In addition the Committee received regular updates on anti-bribery and corruption, anti-money laundering and sanctions screening. |

Key matters considered during the year continued

| Matter considered | How the Committee addressed the matter |
|---|---|
| Whistleblowing | <p>The Group continues to operate a Group-wide whistleblowing programme ('Speak Out'), hosted by an independent third party (Navex). The Speak Out programme received ad hoc reports from a wide variety of channels, including a web portal, hotline, email and letters. Reports are captured, confidentially recorded by Navex, and flagged for investigation by the appropriate team.</p> <p>The Committee is responsible for oversight of the effectiveness of the Group's whistleblowing arrangements. The Committee received regular reports on the most serious cases and other significant matters raised through the programme and the actions taken to address them. The Committee was also briefed on emerging Speak Out trends and themes. The Committee may, and has, requested further reviews of particular areas of interest.</p> <p>The Committee reviews the Group's Speak Out programme annually, satisfying itself that it continues to comply with regulatory and governance requirements. The Committee also considered the consistency of approach adopted across subsidiary audit committees. The Speak Out programme has been further strengthened during the year by enhanced training for managers and staff; improved mechanisms for reporters to feed back on their experience and case management workflow improvements that focus on tracking (post-investigation) management action and, where relevant, the Committee requested information on the sharing of lessons learnt.</p> <p>The Chair and Committee spent time privately with the Group Resilience Director to understand outcomes of investigations, ensure that investigations were adequately resourced and appropriately managed, that there had been no retaliation against anyone making a report and that investigations were not improperly influenced.</p> <p>A review of the Speak Out programme and its oversight is being undertaken in 2020.</p> |
| Third line oversight Internal audit Regular reporting | <p>The Committee received regular updates from GwIA on audits conducted and management's progress in addressing audit findings within agreed timelines. Any delays in implementing remediation actions were escalated to the Committee and given particular scrutiny.</p> <p>The independent assurance provided by GwIA formed a key part of the Committee's deliberations on the Group's overall control environment. During 2019, the areas reviewed included: change management and transformation (in particular relating to the demerger), financial controls, outsourcing and third-party supply, customer outcomes, cyber risk, compliance and regulatory and second line of defence. In addition, GwIA performed more business monitoring during 2019 to obtain a broader view of the business and enable more regular assessments of emerging risks and changes in the control environment. This has been achieved through a variety of methods including stakeholder discussions and an increasing use of data analytics.</p> <p>The Group Chief Internal Auditor reports functionally to the Committee Chair and for management purposes to the Group Chief Executive, and also has direct access to the Chair of the Board. In addition to formal Committee meetings, the Committee meets with the Group Chief Internal Auditor in private to discuss matters relating to, for example, the effectiveness of the internal audit function, significant audit findings and the risk and control culture of the organisation.</p> <p>The Committee Chair also meets with GwIA's Quality Assurance Director to discuss the outcome of the quality reviews of GwIA's work and actions arising.</p> |
| Annual internal audit plan and focus for 2020 | <p>GwIA now operates a rolling six-month approach to audit planning. The Committee approved the plan for the second half of 2019. It also considered and approved the Internal Audit Plan, resource and budget for the first half of 2020.</p> <p>The 2020 Internal Audit Plan was formulated based on a bottom-up risk assessment of audit needs mapped against various metrics combined with top-down challenge. The plan was then mapped against a series of risk and control parameters, including the top risks identified by the Risk Committee, to verify that it is appropriately balanced between financial, business change, regulatory and operational risk drivers and provides appropriate coverage of key risk areas and audit themes within a risk-based cycle of coverage. Key areas of focus for 2020 include: strategic change initiatives, customer outcomes, cyber security, financial risk and financial controls, culture, outsourcing and digitisation.</p> |

Key matters considered during the year continued

| <i>Matter considered</i> | <i>How the Committee addressed the matter</i> |
|--|--|
| Effectiveness of Internal Audit | <p>The Committee is responsible for approval of the GwIA charter, audit plan, resources, and for monitoring the effectiveness of the function. In addition, the Committee approved the new, post-demerger target operating model for internal audit in Prudential plc.</p> <p>The Committee also assesses the effectiveness of GwIA through a combination of External Quality Assessment reviews, required every five years, and an annual internal effectiveness review.</p> <p>A 2019 Internal Effectiveness review, performed by the GwIA Quality Assurance Director, was conducted in accordance with the professional practice standards of the Chartered Institute of Internal Auditors (CIIA) and assessed continued conformance with the CIIA guidance for Effective Internal Audit in the Financial Services (the CIIA Code). The review concluded that GwIA continued to comply with the requirements of internal audit policies, procedures and practices, and standards in all material respects relating to audit planning and execution, and continued to be aligned with its mandated objectives and maintained general conformance with the CIIA Code.</p> <p>During 2019, GwIA also continued to develop its practices with enhancements to methodology, approaches to audits and the use of data analytics. In preparation for the demerger, the function successfully completed the creation of two appropriately skilled and sized, independent internal audit functions, where previously there had been a single function.</p> |
| Internal control | |
| Internal control and risk management systems | <p>The Committee is responsible for reporting and making recommendations to the Board on the effectiveness of Group-wide internal control and risk management systems.</p> <p>The Committee considered the outcome of the annual review of the systems of internal control and risk management. This considered M&G plc to the extent it was relevant to the amounts disclosed within the Group 2019 financial statements. The review identified a number of areas for improvement and the necessary actions that have been, or are being, taken. The audit committees at Group and subsidiary level collectively monitor outstanding actions regularly and ensure sufficient resource and focus is in place to resolve them within a reasonable time frame.</p> |
| Governance | |
| Group governance framework | <p>The Group Governance Manual sets out the policies and procedures by which the Group operates within its framework of internal governance, taking into account relevant statutory and regulatory matters. It is a platform for mandating specific ways of working across the Group and each business unit attests annually to compliance with:</p> <ul style="list-style-type: none"> — Mandatory requirements set out in Group-wide policies, including matters which must be reported to the Group functions; and — Matters requiring prior approval from those parties with delegated authority. <p>The Committee reviewed the results of the Group Governance Manual annual content review and the results of the year end certification of compliance with Group Governance Manual requirements for the year ended 31 December 2019.</p> |
| Competence and experience | <p>In relation to the provisions of the UK Code and HK Listing Rules, the Board is satisfied that David Law has recent and relevant financial experience and that the Committee as a whole has competence relevant to the sectors in which the business operates.</p> <p>Full biographies of the Committee members including experience and professional qualifications, are set out on pages 94 to 96.</p> <p>The Board has determined that David Law qualifies as the Audit Committee financial expert under the requirements of Form 20-F.</p> |

Howard Davies
Chair of the Risk Committee

Committee members

- Howard Davies (Chair)
- Jeremy Anderson (from January 2020)
- David Law
- Kai Nargolwala
- Alice Schroeder
- Tom Watjen

Regular attendees

- Chairman of the Board
- Group Chief Executive
- Group Chief Risk and Compliance Officer
- Group Chief Financial Officer and Chief Operating Officer
- Company Secretary
- Group Chief Internal Auditor
- Chief risk officers of the main subsidiaries and members of the Group Risk Leadership Team are invited to attend each meeting as appropriate.

Number of meetings in 2019:

Five. (In addition a joint meeting was held with the Audit Committee in April 2019.)

Risk Committee report

Dear shareholder

As Chair of the Risk Committee, I am pleased to report on the Committee's activities and focus during 2019.

This will be my last report as Risk Committee Chair. Having served as a Non-executive Director and chaired the Committee since October 2010, I will not offer myself for re-election at the 2020 Annual General Meeting. I would like to take this opportunity to thank my fellow Committee members for their diligence and also everyone on the Prudential team who has supported me and the Committee over the years. As announced on 11 March 2020, Jeremy Anderson will succeed me as Chair of the Committee.

Committee operation

The Committee assists the Board in providing leadership, direction and oversight of the Group's overall risk appetite, limits and strategy. It also oversees and advises the Board on current and future risk exposures of the Group, including those which have the potential to impact on the delivery of the Group's Business Plan. The Committee reviews the Group Risk Framework and recommends changes to it for approval by the Board to ensure that it remains effective in identifying and managing the risks faced by the Group.

The Committee received regular reports from the Group Chief Risk and Compliance Officer (CRCO), who is advised by the Group Executive Risk Committee (GERC). I provided feedback on the performance of the CRCO to the Group Chief Executive Officer as part of the annual evaluation of the Board and its members. The Committee also received regular reports from the Group-wide Internal Audit function and updates from other areas of the business as needed.

Regulatory matters

On 25 March 2019 the Hong Kong Insurance Authority (Hong Kong IA) and the Group signed a Regulatory Letter, which outlines the interim supervision framework applicable to the Group until the Hong Kong IA's Group-wide Supervision (GWS) Framework becomes effective. The required legislative process is expected to be finalised in the second half of 2020. The Committee considered the capital aspects of the Regulatory Letter as well as considering regular updates on GWS developments over the year.

The CRCO briefed the Committee regularly on developments in systemic risk regulation and the Insurance Capital Standards (ICS). We considered the results of ICS field testing in July and the implications of the IAIS announcement in November of a unified path to convergence of comparable group capital standards across jurisdictions. During the year, the Group remained subject to the policy requirements resulting from its prior designation in 2016 as a Global Systemically Important Insurer (G-SII). The Committee therefore considered and approved the Group's 2019 Systemic Risk Management Plan, Liquidity Risk Management Plan and Recovery Plan.

Transformation risk, including the demerger, and other in-depth reviews

During 2019, a key area of consideration for the Committee was the risk associated with the Group's portfolio of key strategic change initiatives, which included the demerger of M&G plc, as well as, notably, those related to IFRS 17, the Group's digital transformation, LIBOR transition and further implementation of the Aladdin system. During the year, the Committee considered updates, risk opinions, guidance and assurance on this critical change activity. Ongoing reviews were also performed on the financial and non-financial risks to the execution of the demerger. The Committee considered and recommended for approval the risk disclosures included in the Prudential plc shareholder Circular published on 25 September 2019.

In-depth reviews were performed in existing and emerging high risk areas including the interest rate risk profile and asset liability management of our Asia business; Prudential's artificial intelligence and digital transformation initiatives and their associated risks, ethical considerations and governance; together with the reinsurance arrangements in place across the Group.

Risk appetite and principal risks

During 2019, the Committee reviewed the Group's risk policies and proposed changes to the Group risk appetite statements. Aligned with these reviews, proposals to amend associated limits were also considered. The amendments were recommended and approved to reflect the changes in the Group's risk profile and the evolving regulatory environment following the demerger.

The Committee also considered the principal risks facing the Group and received updates on these through the course of the year as well as reports from the chief risk officers of our main subsidiaries, who regularly attend Committee meetings. A fuller explanation of principal risks facing the Group and the way in which the Group manages these is set out in the Group Chief Risk and Compliance Officer's report on pages 51 to 71. During 2019, the Committee considered risk assessments and opinions on key areas covering the risks associated with the Group's Business Plan, the Group's revised dividend policy and executive remuneration, further details of which are noted below.

In respect of our principal risks, we continued to focus on the risks to the Group's financial viability and non-financial sustainability including those arising from the external business and macroeconomic environment in which it operates; risks arising from the nature of the Group's business and industry; and the risks around global legal and regulatory compliance. We regularly reviewed the strength of our capital and liquidity positions (including the results of stress and scenario analyses) and the impact of the transition to the Hong Kong IA's Local Capital Summation Method (LCSM) in determining the Group's regulatory capital requirements.

Information security and privacy

Information security and data privacy also received attention from the Committee in 2019. We reviewed progress achieved on the implementation of the Group's information security and privacy operating model and received updates on the Group's compliance with the EU's General Data Protection Regulation (GDPR). In April 2019, a joint session with the Audit Committee on cyber security included an update on progress against the Group's key 2019 objectives in this area and included training aimed at enhancing the knowledge of Non-executive Directors on both the increasing regulatory expectations and the threats faced by the Group.

Committee governance

The Committee works closely with the Audit Committee to ensure both Committees are updated and aligned on matters of common interest. Where responsibilities are perceived to overlap between the two Committees, David Law and I agree the most appropriate Committee to consider the matter. Aligned with the consolidation of the Risk, Compliance and Security functions under the leadership of the CRCO during 2019, the Committee assumed responsibility for Compliance oversight from the Audit Committee with effect from 1 January 2020. The Committee considered and approved the Risk and Compliance plan for the first half of 2020 and will receive a plan for the second half of 2020 at mid-year.

The effectiveness of the Committee was reviewed as part of the annual Board evaluation, which confirmed that the Committee continued to operate effectively during the year and no major areas requiring improvement were highlighted.

Key matters considered during the year

| <i>Matter considered</i> | <i>How the Committee addressed the matter</i> |
|--|---|
| Risk framework | <p>The Group Risk Framework and risk policies were subject to both an annual review and a further specific update to ensure compliance with the Hong Kong IA Regulatory Letter. Changes were recommended by the Committee for approval by the Board.</p> <p>Annually, business units are required to assess and certify their compliance with the Group Risk Framework and associated policies as part of the annual Group Governance Manual certification process. The certification process is facilitated by Group Risk and Compliance and subject to oversight by the Committee.</p> <p>The Committee conducted its annual review of risk effectiveness in February. It also considered the effectiveness of, and approved updates to, the Group Risk Mandate which formally sets out the purpose and responsibilities of the Group Risk function and its effectiveness in overseeing the key risks to the Group.</p> <p>The Committee also reviewed the methodology and calibration of the Group internal model.</p> |
| Risk appetite | <p>The Committee is responsible for recommending changes in the Group's overall risk appetite and tolerance to the Board for approval.</p> <p>The Committee considered the revised Group Risk Appetite Statement and associated limits that would apply after the demerger of M&G plc. These were defined in aggregate for financial and non-financial risks by the setting of objectives for its liquidity, capital requirements and non-financial risk exposure.</p> |
| Hong Kong Insurance Authority (IA) | <p>In August 2018, it was announced that the Hong Kong IA would become the Group-wide supervisor for Prudential plc after the demerger of M&G plc.</p> <p>Key updates on the discussions with the Hong Kong IA on the regulatory requirements applying immediately following the demerger, and those anticipated in the longer term, were provided to the Committee as part of the CRCO's regular reporting.</p> |
| Business Plan | <p>As part of its role in overseeing and advising the Board on future risk exposures and strategic risks, the Committee reviewed Group Risk's assessment of the Business Plan, which included key financial risks (including those associated with the macroeconomic environment, such as prolonged low interest rates) and non-financial risks (including those from the regulatory environment) to the post-demerger Group. The analysis reviewed included sensitivity assessments of the impact of various plausible scenarios.</p> <p>As part of its review of the risk assessment of the Business Plan, the Committee approved proposed changes to Group Approved Limits.</p> |
| Own Risk and Solvency Assessment (ORSA) | <p>The ORSA is a key ongoing process for identifying, assessing, controlling, monitoring and reporting the risks to which the Group is exposed and assessing capital adequacy over the business planning horizon.</p> <p>In April, the Committee considered the Group's ORSA report, based on the Business Plan, prior to its approval by the Board. An additional ORSA report was considered by the Committee in October which included a forward-looking assessment of the demerged Group's capital and liquidity position, and the outcome of a range of stress and scenario testing to inform the Committee of potential future capital solvency and liquidity levels.</p> |
| Stress and scenario testing | <p>The Committee is responsible for reviewing the outcome and results of stress and scenario testing, which is a key risk identification, measurement and management tool for the Group.</p> <p>Stress and scenario testing is a key component of the Group's ORSA and the risk assessment of the Business Plan, as described above, as well as its Recovery Planning and Reverse Stress Testing (RST).</p> <p>The Group's Recovery Plan, considered by the Committee in October, included an assessment of the effectiveness of the post-demerger business's recovery options under market and idiosyncratic scenarios. An updated year-end 2018 RST exercise was performed for the post-demerger Group, which confirmed that it remains resilient to all business model failure scenarios considered. The Committee recommended the Group's Recovery Plan and RST Report for approval by the Board.</p> |

Key matters considered during the year continued

| Matter considered | How the Committee addressed the matter |
|--|---|
| Global Systemically Important Insurer (G-SII) | <p>The FSB has endorsed a new Holistic Framework for systemic risk management to be implemented by the IAIS in 2020 and suspended G-SII designations until a review is undertaken in 2022.</p> <p>In 2019, the Group remained subject to G-SII measures due to its prior designation in 2016. The Committee therefore considered, and recommended for approval by the Board, updated deliverables associated with this designation. These included the Systemic Risk Management Plan, Recovery Plan and Liquidity Risk Management Plan. Many of the G-SII measures have been adopted into the Insurance Core Principles and ComFrame – the common framework for the supervision of Internationally Active Insurance Groups (IAIGs). As Prudential is expected to satisfy the criteria of an IAIG these measures are anticipated to continue for the Group.</p> |
| Transformation activity and demerger of M&G plc | <p>During 2019, a key area of consideration for the Committee was the demerger of M&G plc from the rest of the Group, which contributed to the portfolio of key strategic change activity across the Group. The Committee's work included overseeing the conflict management process around the demerger. The Committee also discussed the appropriate governance arrangements for the Group's subsidiary risk committees post-demerger and associated transitional arrangements.</p> <p>The Committee was provided with updates on demerger and transformation activity throughout the year, and considered the results of risk opinions, guidance and assurance work. It received regular updates on the Group's portfolio of key strategic change initiatives, including those related to IFRS 17, the Group's digital transformation, LIBOR transition and implementation of the Aladdin system.</p> <p>Ongoing analyses of the key financial risks to the execution of the demerger under various stress scenarios were provided to the Committee, as well as progress updates on operational separation activity.</p> <p>In particular, the Committee considered and approved changes to the following items, which were all updated to appropriately reflect the position of the demerged Group: risk assessment of the Group Business Plan; risk framework and policies; risk appetite and associated limits; ORSA report; and G-SII deliverables.</p> <p>The Committee also considered the risk disclosures included in the Prudential plc shareholder Circular in advance of its publication.</p> |
| Group principal risks | <p>The Committee evaluated the Group's principal risks, considering recommendations for promoting additional risks and changes in the scope of existing risks. The Committee received regular reporting on principal and emerging risks, external events such as the UK's exit from the EU and the Hong Kong protests and mitigating actions over the course of the year within the Group CRCO's regular report to the Committee. Further information about how the Group identifies emerging and principal risks can be found in the Group Chief Risk and Compliance Officer's report.</p> <p>These reports also provided the Committee with: regulatory updates; developments in the Group's internal model; the implications of the developing global capital standards including the engagement with the Hong Kong IA on the development of an industry group capital and risk management framework; and developments in relation to the Group's designation as a G-SII.</p> |
| Deep dives | <p>As part of its risk oversight responsibilities, the Committee also considers the result of 'deep dive' risk reviews performed over the year.</p> <p>In 2019, these focused on risks embedded within the assets and liabilities and the portfolio of products in our US and Asia businesses and the Group's digital transformation initiatives.</p> |
| Information security and privacy | <p>During 2019, updates were provided to the Committee on progress made in the implementation of the operating model for information security and privacy.</p> <p>In April, in a joint session of the Risk and Audit Committee, an update on cyber security was provided on the latest regulatory expectations, an assessment of the threats facing the Group and the means to enable appropriate oversight.</p> <p>The Committee received regular updates on Group-wide information security and privacy metrics providing a view of security posture across the businesses.</p> <p>Specifically in the key area of data privacy, the Committee received an update in February on progress on residual Group-wide activity to ensure compliance with General Data Protection Regulations. In November, the Committee was provided with an update on Group-wide privacy activities and emerging privacy regulations in the US and Asia.</p> |

Key matters considered during the year continued

| <i>Matter considered</i> | <i>How the Committee addressed the matter</i> |
|---------------------------------------|---|
| Jackson oversight | <p>The Committee received regular updates on the Jackson business throughout 2019 including in relation to the financial risk oversight of the business, which remains a key area of focus. Updates were provided to each Committee meeting on the effectiveness of the hedging programme and the impact of market movements on Jackson's estimated Risk Based Capital ratio.</p> <p>The Committee approved changes to limits used in the monitoring of the market and credit risks of the Jackson business.</p> <p>Additionally, the Committee considered the results of in-depth reviews performed on the methodology and assumptions of a tool for the estimation of Jackson capital adequacy under stress. In October, the Committee approved Jackson's adoption of the NAIC Variable Annuity Reform Framework.</p> |
| Remuneration | <p>The Committee has a formal role in the provision of advice to the Remuneration Committee on risk management considerations in respect of executive remuneration. It considered risk management assessments of proposed executive remuneration structures and outcomes during the year, making related recommendations to the Remuneration Committee for their consideration. The assessments considered included those relating to executives of M&G plc at the point of demerger and proposals relating to the Jackson bonus pool.</p> |
| Compliance and audit reporting | <p>The Committee received regular reporting on key compliance risks and mitigation activity throughout the year. It also reviewed and approved updates to regulatory compliance risk-related policies including changes to the regulatory communications policy in advance of the transfer of Group-wide supervisory responsibilities from the PRA to the Hong Kong IA in October.</p> <p>The Committee received updates from Group-wide Internal Audit throughout the year relating to effectiveness of risk management and internal control systems and other matters relating to its responsibilities.</p> |

Statutory and regulatory disclosures

Financial reporting

The Directors have a duty to report to shareholders on the performance and financial position of the Group and are responsible for preparing the financial statements on pages 196 to 318 and the supplementary information on pages 330 to 357. It is the responsibility of the auditor to form independent opinions, based on its audit of the financial statements and its audit of the EEV basis supplementary information, and to report its opinions to the Company's shareholders and to the Company. Its opinions are given on pages 320 to 329 and page 359.

Company law requires the Directors to prepare financial statements for each financial year that give a true and fair view of the financial affairs of the Company and of the Group. The criteria applied in the preparation of the financial statements are set out in the Statement of Directors' responsibilities on pages 319 and 358. Company law also requires the Board to approve the Strategic report. In addition, the UK Code requires the Directors' statement to state that they consider the Annual Report and financial statements, taken as a whole, is fair, balanced and understandable and provides the information necessary for shareholders to assess the Company's position and performance, business model and strategy.

The Directors are further required to confirm that the Strategic report includes a fair review of the development and performance of the business, with a description of the principal risks and uncertainties. Such confirmation is included in the statement of Directors' responsibilities on page 319.

The Strategic report provides, on pages 10 to 87, a description of the Group's capital position, financing and liquidity. The risks facing the Group's business are discussed in the Group Chief Risk and Compliance Officer's report of the risks facing our business and how these are managed on pages 51 to 71.

The Directors who held office at the date of approval of this Directors' report confirm that, so far as they are each aware, there is no relevant audit information of which the Company's auditor is unaware;

each Director has taken all the steps that he or she ought to have taken as a Director to make himself or herself aware of any relevant audit information and to establish that the Company's auditor is aware of that information. This confirmation is given and should be interpreted in accordance with the provisions of Section 418 of the Companies Act 2006.

Going concern

In accordance with the guidance issued by the Financial Reporting Council in September 2014, 'Guidance on Risk Management, Internal Control and Related Financial and Business Reporting', after making sufficient enquiries the Directors have a reasonable expectation that the Company and the Group have adequate resources to continue their operations for a period of at least 12 months from the date that the financial statements are approved.

In support of this expectation, the Company's business activities, together with the factors likely to affect its future development, successful performance and position in the current economic climate, are set out in the Strategic report on pages 10 to 87. The risks facing the Group's capital and liquidity positions are referred to in the Strategic report on pages 51 to 71 with further information on capital (including sensitivities) set out in note I(i) 'Group Capital Position' within Additional unaudited financial information.

In addition, the Directors considered the macro-economic environment and geopolitical risks in the markets which the Group operates, as well as the impact of the outbreak of coronavirus ('COVID-19'). The Group's IFRS financial statements include the details of the Group's borrowings in note C6 on pages 280 and 281, the market risks and liquidity analysis associated with the Group's assets and liabilities can be found in note C3.4(a) on pages 256 to 258, policyholder liability maturity profile by business units in notes C4.2(iii) and C4.3(ii) on pages 266 and 267 respectively, cash flow details in the consolidated statement of cash flows and provisions and contingencies in notes C11 and D3. The Directors therefore consider it appropriate to continue to adopt the going concern basis of accounting in preparing the financial statements for the year ended 31 December 2019.

Powers of the Board

The Board may exercise all powers conferred on it by the Company's Articles and the Companies Act 2006. This includes the powers of the Company to borrow money and to mortgage or charge any of its assets (subject to the limitations set out in the Companies Act 2006 and the Company's Articles) and to give a guarantee, security or indemnity in respect of a debt or other obligation of the Company.

Rules governing the appointment of Directors

The appointment and removal of Directors is governed by the provisions in the Articles of Association (the Articles), the UK Code, the HK Code (as appended to the Hong Kong Listing Rules) and the Companies Act 2006.

Director indemnities

Subject to the provisions of the Companies Act 2006, the Company's Articles permit the Directors and officers of the Company to be indemnified in respect of liabilities incurred as a result of their office. Suitable insurance cover is in place in respect of legal action against directors and senior managers of companies within the Group.

Qualifying third-party indemnity provisions are also available for the benefit of the Directors of the Company and certain other such persons, including certain directors of other companies within the Group. These indemnities were in force for 2019 and remain so. Prior to the demerger of M&G plc qualifying pension scheme indemnity provisions were in place for the benefit of certain pension trustee directors within the Group.

Contract of significance

At no time during the year did any Director hold a material interest in any contract of significance with the Company or any subsidiary undertaking.

Securities dealing and inside information

Prudential has adopted securities dealing rules relating to transactions by Directors on terms no less exacting than required by Appendix 10 to the HK Listing Rules and by relevant UK regulations. Having made specific enquiry of all Directors, the Directors have complied with these rules throughout the period.

The Group has adopted an Inside Information Policy which includes guidance and procedures for the identification, dissemination and escalation of inside information as well as appropriate controls on the disclosure of such information in line with regulatory requirements. All staff are made aware of the policy and receive communications reminding them of their obligations when they work on any confidential matters in the business or are notified when the Company enters or exits a closed period.

Requirements of Listing Rule 9.8.4

Information to be included in the Annual Report and Accounts under Listing Rule 9.8.4 may be found as follows:

| Listing Rule | Description | Page |
|--------------|---|------|
| 9.8.4 (4) | Details of long-term incentive schemes required by Listing Rule 9.4.3 | 168 |
| 9.8.4 (10) | Contracts of Significance involving a Director | 134 |
| 9.8.4 (12) | Details of shareholder waiver of dividends | 401 |
| 9.8.4 (13) | Details of shareholder waiver of future dividends | 401 |

US regulation and legislation

As a result of its listing on the New York Stock Exchange, the Company is required to comply with the relevant provisions of the Sarbanes-Oxley Act 2002 as they apply to foreign private issuers and have adopted procedures to ensure such compliance. In particular, in relation to Section 302 of the Sarbanes-Oxley Act 2002 which covers disclosure controls and procedures, a Disclosure Committee has been established, reporting to the Group Chief Executive, chaired by the Chief Financial Officer and comprising members of head office management. The work of the Disclosure Committee supports the Group Chief Executive and Chief Financial Officer in making the certifications regarding the effectiveness of the Group's disclosure procedures.

Change of control

Under the agreements governing Prudential Corporation Holdings Limited's life insurance and fund management joint ventures with China International Trust & Investment Corporation (CITIC), if there is a change of control of the Company, CITIC may terminate the agreements and either, (i) purchase the Company's entire interest in the joint venture or require the Company to sell its interest to a third party designated by CITIC, or (ii) require the Company to purchase all of CITIC's interest in the joint venture. The price of such purchase or sale is to be the fair value of the shares to be transferred, as determined by the auditor of the joint venture.

Customers

The five largest customers of the Group constituted in aggregate less than 30 per cent of its total revenue from sales for each of 2019 and 2018.

Directors' remuneration report

| | Page |
|---|------------|
| Annual statement from the Chairman of the Remuneration Committee | 138 |
| Our Executive Directors' remuneration at a glance | 142 |
| Annual report on remuneration | 144 |
| New Directors' remuneration policy | 174 |
| Additional remuneration disclosures | 192 |

This report has been prepared to comply with Schedule 8 of The Large and Medium-sized Companies and Groups (Accounts and Reports) (Amendment) Regulations 2013, The Companies (Miscellaneous Reporting) Regulations 2018, The Companies (Directors' Remuneration Policy and Directors' Remuneration Report) Regulations 2019, as well as the Companies Act 2006 and other related regulations.

The following sections were subject to audit: Table of 2019 and 2018 Executive Director total remuneration (the 'single figure') and related notes, salary information table in section entitled Remuneration in respect of performance in 2019, Pension entitlements, Long-term incentives awarded in 2019, Chairman and Non-executive Director remuneration in 2019, Statement of Directors' shareholdings, Outstanding share options, Recruitment arrangements and Payments to past Directors and payments for loss of office.

Annual statement from the Chairman of the Remuneration Committee

Anthony Nightingale
CMG SBS JP

Chairman of the Remuneration Committee

Dear shareholder,
I am pleased to present the Remuneration Committee's report for the year to 31 December 2019.

The Committee's report is presented in the following sections:

- 1 An 'at a glance' summary of the Group's remuneration arrangements on pages 142 and 143. This includes a summary of the key features of operation of the current Directors' remuneration policy and outlines our proposed changes to the policy for 2020. The current policy was approved by shareholders at the 2017 AGM;
- 2 Our Annual report on remuneration on pages 144 to 173 which describes how the Committee applied the Directors' remuneration policy in 2019 and the decisions it has made in respect of 2020;
- 3 Our new Directors' remuneration policy on pages 174 to 191 which describes how we propose paying Directors from 14 May 2020. This will be subject to an ordinary resolution of shareholders at the 2020 AGM; and
- 4 Supplementary information on pages 192 to 195.

By way of preface, I would like to share the context for the key decisions the Committee took during 2019, in particular, the decisions we took in connection with the demerger, how we rewarded performance achieved during the year, the remuneration arrangements for those stepping down from the Board and the decisions relating to remuneration arrangements in 2020 and the new Directors' remuneration policy. In line with our approach to shareholder engagement and given the above, I corresponded with and met the majority of our major shareholders, as well as organisations that represent and advise shareholders during late 2019 and early 2020. I am pleased to say that we have had the benefit of substantive feedback from 41 per cent of our shareholder register and that the majority of shareholders and advisory bodies who provided input were content with our proposals and commended the manner in which we conducted the consultation process. On behalf of the Committee, I would like to thank the shareholders and advisory bodies for their engagement to date and look forward to continuing this open dialogue into the future.

Further, I am delighted to welcome Amy Yip, who joined the Committee in September 2019.

Demerger-related decisions

The M&G plc business demerged from the Group with effect from 21 October 2019. As I described last year, the Committee established a set of principles to underpin decisions on remuneration relating to the demerger, including:

- Executives should not be advantaged or disadvantaged by the demerger; the value of outstanding awards and their key terms (release dates, holding periods, malus and clawback provisions) should be unaffected;
- Where performance conditions need to be revised, the new conditions should be no more or less stretching than those originally attached to the awards; and
- Where the Committee has applied discretion, this will be disclosed clearly.

These principles were the basis for the decisions taken by the Committee, including the treatment of outstanding share awards which was set out in the Shareholder Circular published on 25 September 2019 and voted upon and approved by shareholders at the October 2019 General Meeting. This treatment,

together with adjustments made to the targets of in-flight Prudential Long Term Incentive Plan (PLTIP) awards as a result of the demerger, are detailed in 'Remuneration decisions taken in relation to the demerger' section of this report.

Changes to the executive team

The Company made a number of changes to the senior leadership team of the Group in preparation for the demerger. On 16 May 2019, John Foley, Chief Executive of M&G Prudential, Nic Nicandrou, Chief Executive of Prudential Corporation Asia, and Michael Falcon, Chairman and Chief Executive Officer of Jackson Holdings LLC stepped down as Executive Directors of Prudential plc. They did not receive any loss of office payment in respect of their service as Executive Directors. Details of remuneration earned in respect of their service on the Prudential plc Board is provided in this report. When John Foley left the Group on the demerger of M&G plc, his outstanding PLTIP and deferred bonus awards were exchanged for replacement awards over M&G plc shares of an equivalent value and subject to equivalent malus and clawback provisions, and performance conditions which the Remuneration Committee of M&G plc determined were no more or less onerous than those which originally applied. Mr Foley's 2019 bonus will be assessed and determined by M&G plc Remuneration Committee and will be paid by M&G plc.

In July 2019 Mark FitzPatrick, in addition to his role as Group Chief Financial Officer, became Chief Operating Officer while James Turner, Group Chief Risk Officer, became additionally responsible for the Group Compliance function. Their titles were changed to reflect these new duties.

In August 2019, Mr Turner relocated to Hong Kong to support our dialogue with the Hong Kong Insurance Authority (Hong Kong IA), our Group-wide supervisor from the date of the demerger. The Company supported Mr Turner's relocation and, in order to recognise the expansion of his role and his development since joining the Board, he received an uplift in salary of 9 per cent and an increased bonus opportunity from 160 per cent of base salary to 175 per cent from the date of his move. No changes were made to Mr Turner's long-term incentive award level or to Mr FitzPatrick's 2019 remuneration arrangements.

Rewarding 2019 performance

Prudential's executive remuneration arrangements reward the achievement of Group, business, functional and personal targets, provided that this performance is delivered within the Company's risk framework and appetites, and that the conduct expectations of Prudential, our regulators and other stakeholders are met.

As set out in the 'Strategic report' section earlier in this Annual report, the Group delivered results which demonstrate operating earnings growth and the benefits of the diverse portfolio in Asia. These results have been achieved in parallel with the demerger of the M&G plc business. The table below illustrates achievement of KPIs:

| Performance measures | Group performance (\$m) ⁴ | 2018-2019 growth ⁵ | 2019 bonus achievement ⁶ | | | | | | | | | | | | |
|---|---|-------------------------------|-------------------------------------|------------------------|-------|------|-------|-------|-------|------|-------|-------|-------|--|---|

2019 Adjusted operating profit was 20 per cent higher than prior year on a constant exchange rate basis reflecting the performance outlined in the business performance review, which delivered a result approaching the Board approved stretch targets.

Group EEV new business profit was 6 per cent lower than prior year on a constant exchange rate basis. This reflected the significant reduction in interest rates during the year and the challenging trading environment in Hong Kong in the second half of the year as a direct result of political unrest in the region. Excluding Hong Kong, Asia new business profit was 29 per cent above prior year and given the strong performance of NBP absent the Hong Kong protests, the Committee considered it appropriate to adjust the EEV new business profit target to reflect the reduction in Hong Kong sales driven by the protests, which was considered to be outside of management's control. Allowing for this adjustment, Group EEV new business profit was between target and stretch target.

Group free surplus generation was 10 per cent higher than 2018 on a constant exchange rate basis, excluding the impact of EEV methodology changes outlined in the CFO report (Operating Free Surplus Generation is 16 per cent lower than prior year including the impact of EEV methodology changes). This result was above the Board approved stretch target.

All of our business units achieved target remittance levels, which were 3 per cent higher than 2018 for our continuing operations, enabling us to maintain significant cash stock at the centre, after dividends, corporate costs, demerger effects and investing in profitable opportunities within the business units. The business unit remittances contributed to Group cashflow, which approached the stretch target level.

The Group achieved these results while maintaining appropriate levels of capital and while operating within the Group's risk framework and appetites. The Committee believes that the bonuses it awarded to Executive Directors for 2019 (between 93 per cent and 96 per cent of executives' maximum AIP opportunities) appropriately reflect this performance.

Performance in 2019 has continued to deliver on the momentum achieved in recent years. The Group delivered total adjusted operating profits of \$19,021 million in the 2017, 2018 and 2019 financial years. Based on this strong cumulative adjusted operating profit performance over the period and performance against our sustainability scorecard, the Committee determined that between 61.75 and 68.75 per cent of the Prudential Long Term Incentive Plan (PLTIP) awards made to Executive Directors in 2017 would vest (depending on the business unit). These awards will be released to participants from April 2020. The portion of the awards related to Prudential's total shareholder return (TSR) lapsed as TSR performance was ranked below median of the peer group.

The total 2019 remuneration or 'single figure' for the Group Chief Executive, Mike Wells, is 11.25 per cent lower than his total restated 2018 'single figure', notwithstanding his exceptional leadership and personal performance. This chiefly reflects his housing support ending in November 2018 and the impact of the lower value of the 2017 PLTIP vesting compared to the 2016 PLTIP vesting due to lower share price growth over the performance period.

Reviewing the Directors' remuneration policy

Ahead of the renewal of the Directors' remuneration policy at the AGM in 2020, the Committee carefully considered and debated a range of potential remuneration models, taking into account the demerger of the M&G plc business from the Group, the views of our shareholders, the UK Corporate Governance Code and the broader regulatory and competitive environment. The Committee concluded that the current model continues to connect remuneration with the achievement of the Group's ambitious goals to build long-term shareholder value by continuing to focus on achieving sustainable, profitable growth and retaining a resilient balance sheet, with a disciplined approach to active capital allocation. In addition, the Committee decided to retain the key features of the current remuneration model since it is appropriate for a growth company, is well understood and drives the right behaviour and outcomes. On this basis, the Committee decided to retain the current

remuneration model while making a number of improvements to ensure that it continues to be aligned with the Group's remuneration principles, business priorities and evolving stakeholder expectations.

The proposed new Directors' remuneration policy set out on pages 174 to 191 has been designed to:

1 Align reward with the strategic priorities and capital framework of the post-demerger business

The Committee intends to align the Prudential Long Term Incentive Plan (PLTIP) performance conditions with the strategic priorities of the post-demerger business by introducing a new return on equity performance measure, operating return on average shareholders' funds, for the 2020 PLTIP awards, incentivising the efficient use of capital as well as shareholder returns. Using this metric alongside our established metrics of Total Shareholder Return (TSR) and a sustainability scorecard will ensure that the full value of long-term incentive awards is attained only where capital is effectively deployed in a way which creates shareholder returns superior to those delivered by peers while conduct and diversity expectations are met.

The proportion of 2019 long-term incentive awards which will vest for threshold performance was reduced to 20 per cent (from 25 per cent for previous awards). This level of threshold vesting is formalised in the 2020 policy and will apply to all future awards.

The proposed new Directors' remuneration policy seeks to reintroduce a financial element to the bonus for the Group Chief Risk and Compliance Officer from 2020, effectively reverting to a similar approach used until 2015. Specifically, it is proposed that the 2020 bonus for this role is based on 40 per cent functional objectives, 40 per cent Group financial measures and 20 per cent personal measures. This is in line with the current draft of the Hong Kong IA's guideline on the remuneration of key persons in control functions and reflects our view that it is important that this role and other control function staff continue to demonstrate long-term commercial sensitivity and are rewarded in a way which allows the Company to recruit the very best talent to these roles.

Following the Hong Kong IA assuming the role of our Group-wide supervisor, Prudential ceased to be subject to Solvency II capital requirements. It is therefore proposed that the Solvency II underpin under the AIP and the Solvency II capital metric within the PLTIP sustainability scorecard are replaced with measures aligned to the Hong Kong IA capital framework.

2 Strengthen the community of interest between executives and other shareholders

The Committee has decided to build on the share ownership guidelines which apply to executives during their employment by introducing a formal, post-employment shareholding guideline. This guideline will require Executive Directors to hold their full in-employment share ownership guideline for a period of two years from the date of their retirement from the Board (or their actual shareholding from this date if lower).

As described above, Mr FitzPatrick's role expanded in July 2019 when he became Chief Operating Officer in addition to his role as Group Chief Financial Officer. In this capacity, he became responsible for a number of key Group functions including Legal, Government Affairs and Communications. In recognition of Mr FitzPatrick's expanded role and responsibilities, together with the Board's view of his strong performance, potential and criticality to the Group, the Committee propose increasing the value of his 2020 long-term incentive award to 300 per cent of base salary (from 250 per cent at present). The Committee chose to recognise the increased scope of Mr FitzPatrick's role in this way to promote stewardship and long-term focus.

It is imperative that incentive payments are based on performance which is well-founded and sustainable. The Committee currently has the scope to reduce, cancel or recover these payments and intends to build on these discretionary powers in the 2020 policy by formalising and extending the circumstances which might trigger the use of malus and clawback to include non-financial issues and personal conduct which falls short of the Company's expectations.

3 Foster alignment between the remuneration of executives and the wider workforce

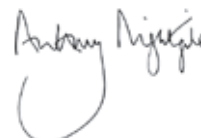

The Committee is aware that the greater alignment of reward arrangements of executives with those of the wider workforce is an area of attention for many investors, particularly in light of the expectations set out in the UK Corporate Governance Code. The Committee intends to reflect this focus in a number of ways, including those set out below.

The Committee is mindful of the need for continued restraint in base salary increases. With effect from 1 January 2020, salary increases of 2 per cent were awarded for all Executive Directors. 2020 will be the eighth consecutive year in which the increases generally offered to executives have been below or close to the bottom of the salary increase budget ranges for the broader workforce.

Subject to approval of the new Policy, it is proposed that Executive Directors recruited externally or internally from the date of the 2020 AGM will be offered pension benefits of 13 per cent of salary, aligned with the employer pension contribution available to the UK workforce. We also propose to reduce incumbent Executive Directors' pension benefits from 25 per cent to 20 per cent of salary by May 2021. The Committee recognises that pension benefits are an increasingly important area of focus and believe that the proposal is an active step towards aligning executives with the wider workforce whilst recognising the existing contractual commitments in place. This is an area where market practice is evolving rapidly and one which the Committee will keep under close review.

In conclusion

I trust that you will find this report a clear account of the way in which the Committee has implemented the Directors' remuneration policy during 2019 and of the Committee's proposed new Directors' remuneration policy.

Anthony Nightingale, CMG SBS JP
Chairman of the Remuneration Committee

10 March 2020

Our Executive Directors' remuneration at a glance

What performance means for Executive Directors' pay

At Prudential, remuneration packages are designed to ensure a strong alignment between pay and performance. As you can see from the charts within the Annual statement from the Chairman of the Remuneration Committee, we are continuing to deliver profitable growth for our shareholders. This has been reflected in both the annual bonuses paid and the release of long-term incentive awards, as set out in the Annual report on remuneration.

In particular, the long-term incentives awarded to Executive Directors in 2017 had stretching performance conditions attached to vesting and were denominated in shares or ADRs. The value of the performance-related elements of remuneration is added to the fixed packages provided to Executive Directors to calculate the 2019 'single figure' of total remuneration. The total 2019 'single figure' for the Group Chief Executive is 11.25 per cent less than the total 2018 'single figure'. This chiefly reflects his housing support ending in November 2018 and the impact of the lower value of the 2017 PLTIP vesting compared to the 2016 PLTIP vesting due to lower share price growth over the performance period. The values for the current Executive Directors are outlined in the table below:

| Executive Director | Role | Fixed pay | | Performance related | | 2019 single figure | 2018 single figure ¹ |
|---------------------------|---|-------------|----------------------|---------------------|--------------|--------------------|---------------------------------|
| | | 2019 salary | Pension and benefits | 2019 bonus | LTIP vesting | | |
| Mark FitzPatrick | Group Chief Financial Officer and Chief Operating Officer | £760,000 | £339,000 | £1,279,000 | £1,082,000 | £3,460,000 | £2,261,000 |
| James Turner ² | Group Chief Risk and Compliance Officer | £678,000 | £507,000 | £1,052,000 | £303,000 | £2,540,000 | £1,913,000 |
| Mike Wells | Group Chief Executive | £1,149,000 | £513,000 | £2,197,000 | £2,860,000 | £6,719,000 | £7,571,000 |

Notes

- 1 Revised 2018 single figure, in line with the regulations, reflecting the actual value of 2018 LTIP releases and additional dividends paid as set out in the notes to the 2018 single figure table.
- 2 Mr Turner relocated to Hong Kong on 1 August 2019 and has since been paid in HK dollars. Exchange rate fluctuations will therefore impact the reported sterling value. Actual amounts paid and the rates of exchange used to convert into a single currency are set out in the Notes to the 'single figure' table in the Annual report of remuneration.

Aligning 2020 pay to performance

The Committee awarded salary increases to the Executive Directors for 2020 of 2 per cent, which was below the lower end of the range of salary increase budgets for the wider workforce.

As discussed in the 'Annual statement from the Chairman of the Remuneration Committee' and in the 'Statement of implementation in 2020' sections, in the interests of recognising Mr FitzPatrick's expanded role and responsibilities and to support the promotion of stewardship and long-term focus, the Committee intends to increase the value of 2020 long-term incentive award to be made to the Group Chief Financial Officer and Chief Operating Officer within the limit provided for by the current Directors' remuneration policy.

Remuneration packages for 2020, effective 1 January 2020, are set out in detail in the Annual report on remuneration and are summarised below:

| Executive Director | Role | 2020 salary | Annual Incentive Plan (AIP) | | PLTIP award (% of salary) ¹ |
|---------------------------|---|---------------|-----------------------------|-----------------------------|--|
| | | | Maximum bonus (% of salary) | Bonus deferred (% of bonus) | |
| Mark FitzPatrick | Group Chief Financial Officer and Chief Operating Officer | £776,000 | 175% | 40% | 300% |
| James Turner ² | Group Chief Risk and Compliance Officer | HK\$7,480,000 | 175% | 40% | 250% |
| Mike Wells | Group Chief Executive | £1,172,000 | 200% | 40% | 400% |

Notes

- 1 The PLTIP award is subject to a three-year performance period and a holding period which ends on the fifth anniversary of the award.
- 2 James Turner relocated to Hong Kong on 1 August 2019 and has since been paid in HK dollars.

Summary of proposed changes to the Directors' remuneration policy

Current key elements of remuneration

Fixed pay

Key features of operation of the current policy¹

Salaries reviewed annually with increases generally aligned with those of the workforce. Benefits reflect individual circumstances and are competitive in the local market

Entitled to receive pension contributions and/or a cash supplement up to 25% of salary. Executive Directors based in Hong Kong receive this in addition to contributions into the Hong Kong Mandatory Provident Fund

Outline of proposed changes for 2020

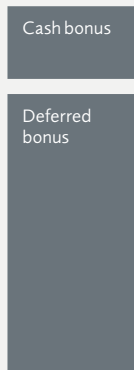

No change to salary and benefits policy

Offer new, externally recruited and promoted Executive Directors pension benefits aligned with the UK workforce at 13% of salary and move incumbent Executive Directors towards a contribution rate of 20% of salary by 14 May 2021

No change to Hong Kong Mandatory Provident Fund contributions for Executive Directors based in Hong Kong

Short-term variable pay

One-year performance assessed on financial or functional objectives and personal objectives, set with reference to business plans approved by the Board. Awards are subject to the achievement of a Solvency II capital underpin

The maximum opportunity is up to 200% of salary

40% of bonus is deferred into shares for three years

Award is subject to malus and clawback provisions

The measures for the Group Chief Risk and Compliance Officer are based on functional and personal targets only

No change to opportunity levels², payment scale, level of deferral or malus and clawback

Solvency II underpin replaced with a Pillar I capital underpin aligned with the Hong Kong IA³ capital framework

Reintroduce financial measures for the Group Chief Risk and Compliance Officer in line with current draft Hong Kong IA guideline and weight the 2020 bonus measures as follows: 40% Group financial measures, 40% functional objectives and 20% personal measures

Formalise and extend the circumstances which might trigger the use of malus and clawback to include non-financial issues and personal conduct which falls short of the Company's expectations

Long-term variable pay

Three-year performance assessed on a combination of:

- Financial measures; and/or
- Total Shareholder Return (TSR) relative to international insurance peers; and
- Sustainability scorecard of capital, conduct and diversity measures.

Maximum award under the Plan is 550% of salary although regular awards are below this level

Awards are subject to a three-year vesting period from date of grant and a further two-year holding period from the end of the vesting period

Awards are subject to malus and clawback provisions

2019 awards have relative TSR and sustainability scorecard targets only

The proportion of 2019 awards which will vest for threshold performance was reduced to 20% (from 25% for previous awards)

Increase the regular award level for Group Chief Financial Officer and Chief Operating Officer to 300% of salary (from 250% of salary)

No change to award levels for other Executive Directors

Adopt a Return on Equity (RoE) measure within the PLTIP for all Executive Directors in addition to the relative TSR and the sustainability scorecard measures. In the scorecard, replace Solvency II capital with a measure aligned with the Hong Kong IA capital framework

Weight of 2020 PLTIP measures as follows: 50% TSR, 30% RoE and 20% sustainability scorecard

No other changes to the sustainability scorecard metrics and the 20% vesting for threshold performance to be formalised

Formalise and extend the circumstances which might trigger the use of malus and clawback to include non-financial issues and personal conduct which falls short of the Company's expectations

Share ownership guidelines

Significant in-employment share ownership guidelines for all Executive Directors as follows:

- 400% of salary for the Group Chief Executive
- 250% of salary for other Executive Directors

Executives have five years from the later of the date of their appointment, or the date of an increase these guidelines, to build this level of ownership

Introduce a requirement that Executive Directors leaving the Board hold the lower of their actual shareholding at their retirement date and their in-employment share ownership guideline for a period of two years, subject to Remuneration Committee discretion

Notes

- 'Policy' refers to the 2017 Directors' remuneration policy.
- The Group Chief Risk and Compliance Officer's maximum bonus opportunity was increased during 2019 to recognise his expanded role and development since joining the Board.
- 'Hong Kong IA' refers to the Hong Kong Insurance Authority, the Company's Group wide supervisor following the demerger.

Annual report on remuneration

The Board has established Audit, Remuneration, Risk and Nomination & Governance Committees as principal standing committees of the Board. These committees form a key element of the Group governance framework.

The operation of the Remuneration Committee

Members

Anthony Nightingale (Chair of the Committee)
Kai Nargolwala
Philip Remnant
Thomas Watjen
Fields Wicker-Miurin
Amy Yip (member since 2 September 2019)

Individual Directors' attendance at meetings throughout 2019 is set out in the 'Governance' section.

Role and responsibility

The role and responsibilities of the Committee are set out in its terms of reference, which are reviewed by the Committee and approved by the Board on an annual basis, and which can be found on the Company's website. The Committee's role is to assist the Board in meeting its responsibilities regarding the determination, implementation and operation of the overall remuneration policy for the Group, including the remuneration of the Chairman, Executive Directors, Group Executive Committee and Company Secretary, as well as overseeing the remuneration arrangements of other staff within its purview.

The principal responsibilities of the Committee during 2019 were:

- Determining and recommending to the Board for approval, the framework and policy for the remuneration of the Chairman, Executive Directors and other members of the Group Executive Committee;
- Approving the design of performance-related pay schemes operated for the Executive Directors and other members of the Group Executive Committee, and determining the targets and individual payouts under such schemes;
- Reviewing the design and development of all share plans requiring approval by the Board and/or the Company's shareholders;
- Approving the share ownership guidelines for the Chairman and Executive Directors and other members of the Group Executive Committee, and monitoring compliance;
- Reviewing and approving individual packages for the Executive Directors and other members of the Group Executive Committee, and the fees of the Chairman and the Non-executive Directors of the Group's material subsidiaries;
- Reviewing and approving packages to be offered to newly recruited Executive Directors and other members of the Group Executive Committee;
- Reviewing and approving the structure and quantum of any severance package for Executive Directors and other members of the Group Executive Committee to ensure they are fair and do not reward failure;
- Ensuring the process for establishing remuneration policy is transparent and consistent with the Group's risk framework and appetites, encouraging strong risk management and solvency management practices;
- Reviewing the workforce remuneration practices and related policies across the Group when setting the remuneration policy for Executive Directors, as well as the alignment of incentives and awards with culture;
- Monitoring the remuneration and risk management implications of remuneration of senior executives across the Group, other selected roles and those with an opportunity to earn in excess of £1 million in a particular year; and
- Overseeing the implementation of the Group remuneration policy for those roles within scope of the specific arrangements referred to in Article 275 of Solvency II.

In 2019, the Committee met eight times. Key activities at each meeting are shown in the table below:

| Meeting | Key activities |
|-------------------------|--|
| January 2019 | Consider shareholder feedback received from consultation. |
| Early March 2019 | Approve the 2018 Directors' remuneration report; consider 2018 bonus awards for Executive Directors; consider vesting of long-term incentive awards with a performance period ending on 31 December 2018; approve 2019 long-term incentive awards and performance measures; note an update on regulation affecting remuneration; note an update on the Board's review of the Committee's effectiveness; and review the appointment of the Committee's independent adviser. |
| Mid-March 2019 | Confirm 2018 annual bonuses and the vesting of long-term incentive awards with a performance period ending on 31 December 2018, in light of audited financial results; approve the revised total shareholder return (TSR) peer group for the 2019 PLTIP awards; and approve Executive Directors' personal objectives for the 2019 annual incentive plan. |
| May 2019 | Approve the remuneration arrangements for those executives retiring from the Board; approve amendments to share plan rules and the remuneration terms of the Group Chief Risk and Compliance Officer's relocation package; review the remuneration of senior executives across the Group, employees with a remuneration opportunity over £1 million per annum and employees within the scope of the Solvency II remuneration rules; note the remuneration sections of the draft Shareholder Circular and Demerger Agreement; and review the executive remuneration model and its appropriateness for the ongoing international business. |
| June 2019 | Review proposals on Executive Directors' remuneration arrangements; note an update on regulation affecting remuneration; review progress towards share ownership guidelines by the Chairman, Executive Directors and other Group Executive Committee members; and approve the expense approval process for the Group Chief Executive and Chairman; and approve the Chairman's fees. |
| July 2019 | Review an initial draft of the 2020 Directors' remuneration policy; approve the Solvency II Remuneration Policy Statement for the 2018 performance year; and discuss the methodology for converting the dividend-in-specie (the 'demerger dividend') into additional Prudential plc shares for Prudential plc share plan participants. |
| September 2019 | Approve the draft 2020 Directors' remuneration policy and review proposed 2020 remuneration arrangements for Executive Directors ahead of consultation with shareholders; note an update on regulation affecting remuneration; approve minor amendments to the share plan rules and adjustments to outstanding Options; review the indicative incentive outcomes for Group Executive Committee members transferring to M&G plc; and review the workforce remuneration dashboard. |
| December 2019 | Review level of participation in the Company's all-employee share plans and dilution levels resulting from the Company's share plans; approve the Group Executive Committee members' 2020 salaries and incentive opportunities; consider the annual bonus measures and targets to be used in 2020; consider shareholder feedback; review an initial draft of the 2019 Annual report on remuneration and the 2020 Directors' remuneration policy; approve the Committee's 2020 Schedule of Business; approve the fees for independent non-executive directors of Material Subsidiaries; review the Group's remuneration arrangements and approve amendments to the 2020 Group remuneration policy in light of the draft Hong Kong IA Guideline on Group-Wide Corporate Governance; approve the Committee's terms of reference for recommendation to the Board; and note an update on regulation affecting remuneration. |

Additionally, a number of resolutions in writing were approved by the Committee between these meetings relating to the remuneration sections of the Circular and Demerger Agreement, the draft 2020 Directors' remuneration policy, and matters relating to the demerger.

The Chairman and the Group Chief Executive attend meetings by invitation. The Committee also had the benefit of advice from:

- Group Chief Risk and Compliance Officer;
- Group Chief Financial Officer and Chief Operating Officer;
- Group Human Resources Director; and
- Director of Group Reward and Employee Relations.

Individuals are not present when their own remuneration is discussed and the Committee is always careful to manage potential conflicts of interest when receiving views from Executive Directors or senior management about executive remuneration proposals.

In line with our approach to shareholder engagement and given the additional context of the demerger and the review of the Directors' remuneration policy, the Chairman of the Committee held meetings with shareholders and the principle advisory bodies (the Investment Association, Institutional Shareholder Services and Glass Lewis) to discuss decisions taken in respect of the demerger; the principle changes proposed as part of the renewal of the Directors' remuneration policy; and Executive Directors' remuneration arrangements for 2020. We have had the benefit of substantive feedback from 41 per cent of our shareholder register and are pleased that the majority of shareholders and advisory bodies who provided input were content with our proposals and commended the manner in which we conducted the consultation process.

During 2019, Deloitte LLP was the independent adviser to the Committee. Deloitte was appointed by the Committee in 2011 following a competitive tender process. As part of this process, the Committee considered the services that Deloitte provided to Prudential and its competitors, as well as other potential conflicts of interest. Deloitte is a member of the Remuneration Consultants' Group and voluntarily operates under their code of conduct when providing advice on executive remuneration in the UK. Deloitte regularly meets with the Chair of the Committee without management present. The Committee is comfortable that the Deloitte engagement partner and team providing remuneration advice to the Committee do not have connections with Prudential that may impair their independence and objectivity. The total fees paid to Deloitte for the provision of independent advice to the Committee in 2019 were £73,250 charged on a time and materials basis. During 2019, Deloitte gave Prudential management advice on remuneration, including advice on the new Directors' remuneration policy, as well as providing guidance on the demerger, the deployment of Workday, capital optimisation, digital and technology, taxation, internal audit, real estate, global mobility and other financial, risk and regulatory matters. Remuneration advice is provided by an entirely separate team within Deloitte. As set out in the table above, the Committee reviewed Deloitte's appointment in March 2019 and considered Deloitte to be independent. The Committee will conduct a competitive tender process for this appointment during 2020.

In addition, management received external advice and data from a number of other providers. This included market data and legal counsel. This advice, and these services, are not considered to be material.

The effectiveness of the Committee was reviewed as part of the annual Board evaluation, which confirmed that the Committee continued to operate effectively during the year and no major areas requiring improvement or action points were highlighted. During the year, the Company has acted in a manner that is consistent with the appropriate provisions of the UK Corporate Governance Code regarding Directors' remuneration.

Remuneration decisions taken in relation to the demerger

The M&G plc business demerged from the Group with effect from 21 October 2019. As disclosed last year, the Committee established a set of principles to underpin decisions on remuneration relating to the demerger, including:

- Executives should not be advantaged or disadvantaged by the demerger; the value of outstanding awards and their key terms (release dates, holding periods, malus and clawback provisions) should be unaffected;
- Where performance conditions need to be revised, the new conditions should be no more or less stretching than those originally attached to the awards; and
- Where the Committee has applied discretion, this will be disclosed clearly.

These principles formed the basis for the treatment of outstanding share awards which was set out in the Shareholder Circular published on 25 September 2019 and approved by shareholders at the October 2019 General Meeting. In summary, employees of Prudential plc (including the Executive Directors of the Company) have:

- Received the demerger dividend through which the demerger was effected, on their outstanding deferred bonus and long-term incentive awards in the form of additional Prudential plc shares. These will be released on the same timetable and to the same extent as their original share awards. The Committee decided that it was appropriate that, wherever possible, executives should be rewarded in the shares of the business which they continue to lead;
- Received the demerger dividend on the shares they hold outright through the all-employee UK SIP plan in the form of M&G plc shares, in the same way as other shareholders; and
- Had no adjustment made to the Options they hold under the all-employee UK sharesave plan, in line with the rules laid out by the UK tax authorities.

Adjusting in-flight PLTIP performance conditions

The Committee decided that the financial targets for the 2017 and in-flight 2018 PLTIP awards should be adjusted to exclude the M&G plc components of the Plan on which the targets were based, with effect from the date of the demerger, in order to appropriately account for the period they are not part of the Group. The revised targets will be disclosed in the remuneration report for the year in which the awards vest. The 2019 PLTIP award targets exclude M&G plc performance from the point of demerger.

As set out in the announcement of Prudential's 2019 half-year results, post-demerger, the Hong Kong IA assumed the role of the Group-wide supervisor for Prudential plc from the PRA. Prudential therefore ceased to be subject to Solvency II capital requirements and will no longer calculate or disclose a Solvency II position after 30 June 2019. The Group will ultimately be subject to the Group-wide Supervisory framework, which is currently under development by the Hong Kong IA. In the meantime, Prudential will apply and report the Hong Kong IA's local capital summation method (LCSM), which was calculated and reported for the first time at Half Year 2019. LCSM was not calculated in previous Plans and therefore is not available to replace the Solvency II operating capital generation. As an alternative, operating free surplus generation (OFSG) will replace Solvency II operating capital generation for in-flight awards. While there are methodological differences between those two measures, OFSG is the closest proxy to LCSM that is available in the Board approved 2018 – 2020 and 2019 – 2021 Plans and OFSG and LCSM are both prepared using the same underlying local statutory capital positions.

Therefore the Committee agreed the Solvency II metric in the sustainability scorecard for in-flight PLTIP awards should be retained for the period to 30 June 2019 and then, for the remainder of each performance period, be replaced with the OFSG measure. Performance for these in-flight PLTIP awards will be assessed using a weighted average between Solvency II and OFSG achievement to reflect the portion of the performance period for which each was in place.

No changes have been made to the TSR peer groups for outstanding awards held by Prudential plc staff. The TSR peer group for the 2019 PLTIP awards was developed in anticipation of the demerger to reflect the post-demerger business, with extensive input from shareholders.

Demerger share calculation

The demerger of M&G plc from Prudential plc was accomplished through a dividend in specie (the 'demerger dividend'); with shareholders receiving one share in M&G plc for every share they hold in Prudential plc at the record time and date. The Committee approved the approach to converting the demerger dividend into additional Prudential plc shares and ADRs for those with outstanding awards at the date of the demerger. Prudential plc employees who held awards over Prudential shares or ADRs received the value of the demerger dividend in the form of additional Prudential plc shares or ADRs respectively. These additional shares/ADRs are managed in the same way as other dividend equivalents, that is they will vest on the same timetable and to the same extent as the original award.

The Committee considered a number of approaches for converting the demerger dividend into additional Prudential plc shares/ ADRs. It decided to determine the number of additional Prudential plc shares/ADRs to be awarded as a dividend by dividing the average value of M&G plc shares during the five trading days immediately after the demerger by the Prudential plc share price/ADR price over a five-day period starting on the date on which the Prudential plc share and ADR prices reflected the removal of the M&G business. For share plan participants with ADR denominated awards, the sterling to US dollar conversion was based on an exchange rate averaged over five trading days immediately following the demerger.

TSR calculation

The Committee determined that the calculation of TSR for in-flight PLTIP awards should be adjusted to reflect the demerger of M&G plc. This involved the application of an adjustment factor calculated in line with standard methodologies. No changes have been made to the TSR peer groups for outstanding awards held by Prudential plc staff.

Table of 2019 Executive Director total remuneration (the 'single figure')

| £000s | 2019 salary | 2019 taxable benefits* | 2019 total bonus† | 2019 LTIP releases‡ | 2019 pension benefits§ | 2019 Other payments¶ | Total 2019 remuneration the 'single figure'^ | Total 2019 remuneration the 'single figure' in USD (\$000)# |
|---------------------------------|--------------|------------------------|-------------------|---------------------|------------------------|----------------------|--|---|
| Michael Falcon ^{1,2,3} | 237 | 126 | 1,227 | – | 59 | 4,950 | 6,599 | 8,424 |
| Mark FitzPatrick | 760 | 149 | 1,279 | 1,082 | 190 | – | 3,460 | 4,417 |
| John Foley ^{2,4} | 300 | 114 | – | – | 75 | – | 489 | 624 |
| Nic Nicandrou ^{2,3,5} | 411 | 141 | 707 | 931 | 103 | – | 2,293 | 2,927 |
| James Turner ^{3,6} | 678 | 338 | 1,052 | 303 | 169 | – | 2,540 | 3,242 |
| Mike Wells | 1,149 | 226 | 2,197 | 2,860 | 287 | – | 6,719 | 8,577 |
| Total | 3,535 | 1,094 | 6,462 | 5,176 | 883 | 4,950 | 22,100 | 28,211 |

* Benefits include (where provided) the cost of providing the use of a car and driver, medical insurance, security arrangements, relocation/expatriate benefits and shares awarded due to participation in the Share Incentive Plan (SIP).

† The total value of the bonus, comprising both the 60 per cent delivered in cash and 40 per cent bonus deferred into Prudential plc shares or ADRs for three years. The deferred part of the bonus is subject to malus and clawback in accordance with the malus and clawback policies but no further conditions.

‡ In line with the regulations, the estimated value of the 2019 LTIP releases for all Executive Directors excluding John Foley has been calculated based on the average share/ADR price over the last three months of 2019 (£13.85/US\$36.37) and includes the accumulated dividends delivered in the form of shares/ADRs. The Committee's approach to determining the level of vesting for this award is set out in the 'Remuneration in respect of performance periods ending in 2019' section. The number of Prudential plc shares/ADRs under award have been adjusted in line with the approach set out in the section on 'Remuneration decisions taken in relation to the demerger'. The actual value of vesting LTIP awards, based on the share price on the date awards are released, will be shown in the 2020 report. In line with the requirements under the UK Companies (Miscellaneous Reporting) Regulations 2018, it is estimated that 6.2 per cent of the value of the 2019 LTIP releases is attributable to share price growth over the vesting period as awards were granted using a share/ADR price of £16.75/US\$42.12 for all Executive Directors other than Mark FitzPatrick and £18.005 for Mark FitzPatrick in 2017. The Committee concluded that no discretion will be applied in determining the remuneration resulting from the 2019 LTIP releases as a result of share price appreciation.

§ 2019 pension benefits include cash supplements for pension purposes and contributions into defined contribution schemes as outlined on page 151.

¶ The value of Mr Falcon's buy-out award has been included in its entirety as it was granted without performance conditions during his period of Board service. The award vests in line with the original vesting schedule with the final tranche vesting 30 days commencing on the date of release of Prudential plc's results for 2020.

^ Each remuneration element is rounded to the nearest £1,000 and totals are the sum of these rounded figures. Total remuneration is calculated using the methodology prescribed by Schedule 8 of Statutory Instrument 2013 No. 1981 - The Large and Medium-sized Companies and Groups (Accounts and Reports) (Amendment) Regulations 2013.

Total 2019 remuneration has been converted to US dollars using the exchange rate of 1 GBP to USD 1.2765.

Notes

1 Michael Falcon was appointed to the Board on 7 January 2019 as Chairman and Chief Executive Officer, Jackson Holdings LLC.

2 Michael Falcon, Nic Nicandrou and John Foley stepped down from the Board on 16 May 2019. The remuneration above was paid in respect of their service as Executive Directors.

While salary and certain monthly paid benefits reflect what was actually delivered during the period, other benefits, bonus, LTIP releases and pension benefits are pro-rata for the period. The 2019 LTIP release for Mr Nic Nicandrou has been pro-rated for 28.5 months of the LTIP's 36 month performance period to reflect his time as an Executive Director during the LTIP's performance period.

3 Michael Falcon, Nic Nicandrou and James Turner are paid in their local currency and exchange rate fluctuations will therefore impact the reported sterling value.

4 John Foley stepped down from the Board on 16 May 2019. He subsequently left the Company on the demerger of M&G plc from Prudential plc on 21 October 2019. As an Executive Director of Prudential plc during 2019 Mr Foley was eligible to receive a 2019 bonus award of up to 180% of salary. Since transferring to M&G plc it was agreed with M&G plc that his 2019 bonus will be assessed and determined by the M&G plc Remuneration Committee and will be paid by M&G plc. No 2019 bonus award has been paid to Mr Foley by Prudential plc.

Mr Foley's 2017-2019 LTIP award has been exchanged for an equivalent award over M&G plc shares. Under the terms of the Demerger Agreement this replacement award should be of an equivalent value; with the same release schedule; subject to equivalent malus and clawback provisions and subject to performance conditions which are relevant to M&G plc and which are no more or less onerous than those which originally applied.

The amount of any bonus payment (including any deferred component) to John Foley in respect of 2019 (including that awarded for performance and service during the pre-demerger period) and the vesting of Mr Foley's replacement 2017-2019 long-term incentive award are due to be disclosed by M&G plc and described in the M&G plc Directors' remuneration report as set out in the M&G plc 2019 Annual Report. These details were not known by Prudential plc prior to the finalisation of this report.

5 To facilitate Nic Nicandrou's relocation to Hong Kong, benefits include £95,000 to cover accommodation.

6 James Turner relocated to Hong Kong on 1 August 2019 and since has been paid in HK dollars; benefits include £160,000 to cover accommodation.

Table of 2018 Executive Director total remuneration (the 'single figure')

| £000s | 2018 salary | 2018 taxable benefits* | 2018 total bonus | Of which: | | | 2018 LTIP releases‡ | 2018 pension benefits§ | Total 2018 remuneration the 'single figure'¶ | Total 2018 remuneration the 'single figure' in USD (\$000)^ |
|------------------------------|--------------|------------------------|------------------|---------------------|---|---------------|---------------------|------------------------|--|---|
| | | | | Amount paid in cash | Amount deferred into Prudential shares† | | | | | |
| Mark FitzPatrick | 745 | 89 | 1,241 | 745 | 496 | – | 186 | 2,261 | 3,019 | |
| John Foley | 781 | 123 | 1,186 | 712 | 474 | 1,571 | 195 | 3,856 | 5,149 | |
| Nic Nicandrou ^{1,6} | 1,023 | 396 | 1,692 | 1,015 | 677 | 1,489 | 258 | 4,858 | 6,486 | |
| Anne Richards ² | 249 | 102 | – | – | – | – | 62 | 413 | 551 | |
| Barry Stowe ^{3,6} | 867 | 70 | 4,935 | 2,961 | 1,974 | 2,983 | 217 | 9,072 | 12,113 | |
| James Turner ⁴ | 521 | 109 | 793 | 476 | 317 | 360 | 130 | 1,913 | 2,554 | |
| Mike Wells ⁵ | 1,126 | 407 | 2,133 | 1,280 | 853 | 3,623 | 282 | 7,571 | 10,109 | |
| Total | 5,312 | 1,296 | 11,980 | 7,189 | 4,791 | 10,026 | 1,330 | 29,944 | 39,981 | |

* Benefits include (where provided) the cost of providing the use of a car and driver, medical insurance, security arrangements and relocation/expatriate benefits.

† The deferred part of the bonus is subject to malus and clawback in accordance with the malus and clawback policies, but no further conditions.

‡ In line with the regulations, the estimated value of 2018 LTIP releases has been recalculated based on the actual share/ADR price on the date awards were released, being £15.61 for the April release. The restated value of those awards released in June also reflects dividends paid on those awards in June. In line with the requirements under the UK Companies (Miscellaneous Reporting) Regulations 2018, 16.8 per cent of the value of the 2018 LTIP releases is attributable to share price growth over the vesting period as awards were granted using a share/ADR price of £12.99/US\$37.29 in 2016. The Committee concluded that no discretion will be applied in determining the remuneration resulting from the 2018 LTIP releases as a result of share price appreciation.

§ 2018 pension benefits include cash supplements for pension purposes and contributions into Defined Contribution (DC) schemes.

¶ Each remuneration element is rounded to the nearest £1,000 and totals are the sum of these rounded figures. Total remuneration is calculated using the methodology prescribed by Schedule 8 of Statutory Instrument 2013 No. 1981 - The Large and Medium-sized Companies and Groups (Accounts and Reports) (Amendment) Regulations 2013.

^ Total 2018 remuneration has been converted to US dollars using the exchange rate of 1 GBP to USD 1.3352.

Notes

- 1 To facilitate Nic Nicandrou's relocation to Hong Kong, Nic's benefits include £267,000 to cover accommodation.
- 2 Anne Richards stepped down from the Board on 10 August 2018. The remuneration above was paid in respect of her service as an Executive Director.
- 3 Barry Stowe retired from the Board on 31 December 2018.
- 4 James Turner was appointed to the Board on 1 March 2018.
- 5 To facilitate his appointment as Group Chief Executive and move to the UK in 2015, Mike Wells's benefits include £311,000 to cover mortgage interest, which ceased effective 30 November 2018.
- 6 Barry Stowe and Nic Nicandrou are paid in their local currency and exchange rate fluctuations will therefore impact the reported sterling value.

Remuneration in respect of performance in 2019

Base salary

Executive Directors' salaries were reviewed in 2018 with changes effective from 1 January 2019. When the Committee took these decisions it considered:

- The salary increase budgets for other employees, which vary across our business units, reflecting local market conditions;
- The performance and experience of each Executive Director;
- The relative size of each Executive Director's role; and
- The performance of the Group.

As reported last year, after careful consideration by the Committee, all Executive Directors received a salary increase of 2 per cent. The 2019 salary increase budgets for other employees across our business units were between 2 per cent and 5.5 per cent.

To provide context for the market review, information was also drawn from the following market reference points:

| Executive | Role | Benchmark(s) used to assess remuneration |
|-------------------------------|---|---|
| Mark FitzPatrick | Group Chief Financial Officer and Chief Operating Officer | — FTSE 40 — International insurance companies |
| Michael Falcon ^{1,2} | Chairman and CEO, Jackson Holdings | — Willis Towers Watson US Financial Services Survey — LOMA US Insurance Survey |
| John Foley ² | Chief Executive, M&GPrudential | — FTSE 40 — International insurance companies |
| Nic Nicandrou ² | Chief Executive, Prudential Corporation Asia | — Willis Towers Watson Asian Insurance Survey |
| James Turner ³ | Group Chief Risk and Compliance Officer | — FTSE 40 — FTSE 50 insurers |
| Mike Wells | Group Chief Executive | — FTSE 40 — International insurance companies |

Notes

- 1 Michael Falcon was appointed to the Board on 7 January 2019 as Chairman and CEO, Jackson Holdings LLC. His salary was reviewed on appointment.
- 2 Michael Falcon, Nic Nicandrou and John Foley stepped down from the Board on 16 May 2019.
- 3 James Turner relocated to Hong Kong on 1 August 2019. His remuneration was reviewed in light of his relocation.

In July 2019, the Group Chief Risk Officer became additionally responsible for the Group Compliance function and in August 2019, Mr Turner relocated to Hong Kong to support our dialogue with the Hong Kong IA. The Company supported Mr Turner's relocation and, in order to recognise the expansion of his role and his development since joining the Board, the Committee determined an uplift in base salary of 9 per cent and an increased maximum bonus incentive opportunity from 160 per cent to 175 per cent of base salary were appropriate. No other changes were made during the year to Executive Directors' maximum opportunities under either the annual incentive or the long-term incentive plans.

As a result, Executive Directors received the following salary increases:

| Executive Director | 2018 salary | 2019 salary |
|-----------------------------|----------------|----------------|
| Michael Falcon ¹ | N/A | \$800,000 |
| Mark FitzPatrick | £745,000 | £760,000 |
| John Foley ¹ | £781,000 | £797,000 |
| Nic Nicandrou ¹ | HK\$10,710,000 | HK\$10,930,000 |
| James Turner ² | £625,000 | HK\$7,330,000 |
| Mike Wells | £1,126,000 | £1,149,000 |

Notes

- 1 Michael Falcon, John Foley and Nic Nicandrou stepped down from the Board on 16 May 2019. The annualised 2019 salaries above were paid in respect of their service as Executive Directors and pro-rated for the portion of the year for which they were Executive Directors.
- 2 James Turner was appointed to the Board on 1 March 2018. The 2018 annualised salary above was paid in respect of his service as Group Chief Risk Officer. Mr Turner's salary as at 1 January 2019 was £638,000. He relocated to Hong Kong on 1 August 2019 and his new annualised 2019 salary was paid in Hong Kong dollars. This was an annual base salary of HK\$7,330,000.

Pension benefit entitlements

Pension benefit arrangements in 2019 are set out in the table below. The proposed arrangements for 2020 are described in the 'Statement of implementation in 2020' and in the 'New Directors' remuneration policy' sections.

| <i>Executive Director</i> | <i>2019 pension benefit</i> | <i>Life assurance provision</i> |
|---------------------------|--|---|
| Michael Falcon | Pension supplement of 25 per cent of salary, part of which is paid as a contribution to an approved US retirement plan. | Two times salary |
| Nic Nicandrou | Pension supplement in lieu of pension of 25 per cent of salary and a HK\$18,000 employer payment to the Hong Kong Mandatory Provident Fund. | Eight times salary |
| James Turner | For the period 1 January 2019 to 31 July 2019: pension contribution to defined contribution plan and/or pension supplement in lieu of pension of 25 per cent of salary. For the period 1 August 2019 to 31 December 2019: pension supplement in lieu of pension of 25 per cent of salary and a HK\$18,000 employer payment to the Hong Kong Mandatory Provident Fund. | For the period 1 January 2019 to 31 July 2019: up to four times salary plus a dependants' pension For the period 1 August 2019 to 31 December 2019: eight times salary |
| UK-based executives | Pension contribution to defined contribution plan and/or pension supplement in lieu of pension of 25 per cent of salary. | Up to four times salary plus a dependants' pension |

John Foley previously participated in a non-contributory defined benefit scheme that was open at the time he joined the Company. The scheme provided an accrual of 1/60th of final pensionable earnings for each year of pensionable service. John received pension payments of £16,061 per annum which increased to £16,462 per annum from 1 April 2019, in line with the Consumer Prices Index. The pension will continue to be subject to statutory increases in line with the Consumer Prices Index. Mr Foley left the Company on the demerger of M&G plc from Prudential plc on 21 October 2019.

Annual bonus outcomes for 2019

Target setting

For the financial AIP metrics which comprise 80 per cent of the bonus opportunity for all Executive Directors apart from the Group Chief Risk and Compliance Officer, the performance ranges are set by the Committee prior to, or at the beginning of, the performance period. These ranges are based on the annual business plans approved by the Board and reflect the ambitions of the Group and business units, in the context of anticipated market conditions. The financial element of Executive Directors' 2019 bonuses was determined by the achievement of four Group measures, namely adjusted operating profit, operating free surplus generation, EEV new business profit and cash flow, which are aligned to the Group's growth and cash generation focus. The financial element of 2019 bonus award for the Chief Executive, Prudential Corporation Asia is similarly determined by business unit measures in addition to Group measures. The targets set assumed 10 months of M&G plc performance up to the date of demerger.

Personal objectives comprise 20 per cent of the bonus opportunity for all Executive Directors apart from the Group Chief Risk and Compliance Officer, for whom this accounts for 50 per cent of the total bonus opportunity. These objectives are established at the start of the year and reflect the Company's Strategic Priorities set by the Board. Functional objectives account for the remaining 50 per cent of the Group Chief Risk and Compliance Officer's bonus opportunity. These are based on the Group Risk Plan and are developed with input from the Chairman of the Group Risk Committee.

AIP payments are subject to meeting minimum capital thresholds which are aligned to the Group and business unit risk framework and appetites (as adjusted for any Group Risk Committee and/or business unit risk committees approved counter-cyclical buffers).

The Committee seeks advice from the Group Risk Committee on risk management considerations to inform decisions about remuneration architecture and performance measures to ensure that risk management, culture and conduct are appropriately reflected in the design and operation of Executive Directors' remuneration.

Performance assessment

The Committee determines the overall value of the bonus, taking account of the inputs described above and any other factors which it considers relevant. The table below illustrates the weighting of performance measures for 2019 and the level of achievement under the AIP:

| Executive Director | Weighting of measures (% of total bonus opportunity) | | | Achievement against performance measures | | 2019 AIP outcome ^{1,5} (% of total bonus opportunity) |
|-------------------------------|---|--|--|---|--|---|
| | Group financial measures | Business unit financial measures | Personal / functional objectives | Financial measures | Personal / functional objectives | |
| Michael Falcon ^{2,3} | 80% | – | 20% | 96% | 91% | 95% |
| Mark FitzPatrick | 80% | – | 20% | 96% | 95% | 96% |
| Nic Nicandrou ² | 20% | 60% | 20% | 96% | 97% | 97% |
| James Turner ⁴ | – | – | 100% | N/A | 93% | 93% |
| Mike Wells | 80% | – | 20% | 96% | 92% | 96% |

Notes

- All bonus awards are subject to 40 per cent deferral for three years and the deferred bonus will be paid in Prudential plc shares or ADRs.
- Michael Falcon and Nic Nicandrou stepped down from the Board on 16 May 2019. The bonus awards illustrated in the table above are in relation to their Board service only.
- Michael Falcon is also eligible to receive 10 per cent of the Jackson bonus pool for 2019.
- James Turner's maximum bonus opportunity increased from 160 per cent of salary to 175 per cent of salary on 1 August 2019.
- John Foley stepped down from the Board on 16 May 2019. He subsequently left the Company on the demerger of M&G plc from Prudential plc on 21 October 2019. As an Executive Director of Prudential plc during 2019, Mr Foley was eligible to receive a 2019 bonus award of up to 180 per cent of salary. Since transferring to M&G plc it was agreed with M&G plc that his 2019 bonus will be assessed and determined by the M&G plc Remuneration Committee and will be paid by M&G plc. No 2019 bonus award has been paid to Mr Foley by Prudential plc.

Financial performance

The Committee reviewed performance against the performance ranges at its meeting in February 2020. Group adjusted operating profit was approaching the stretch targets. Group free surplus generation exceeded the stretching targets established by the Board. All of our business units achieved target remittance levels, which were 3 per cent higher than 2018 for our continuing operations, enabling us to maintain significant cash stock at the centre, after dividends, corporate costs, demerger effects and investing in profitable opportunities within the business units. The business unit remittances contributed to Group cashflow, which approached the stretch target level. Group EEV new business profit was 6 per cent lower than prior year on a constant exchange rate basis. This reflected the significant reduction in interest rates during the year and the challenging trading environment in Hong Kong in the second half of the year as a direct result of political unrest in the region. Excluding Hong Kong, Asia new business profit was 29 per cent above prior year and given the strong performance of NBP absent the Hong Kong protests, the Committee considered it appropriate to adjust the EEV new business profit target to reflect the reduction in Hong Kong sales driven by the protests, which was considered to be outside of management's control. Allowing for this adjustment, Group EEV new business profit was between target and stretch target.

The Committee considered a report from the Group Chief Risk and Compliance Officer which had been approved by the Group Risk Committee. This report confirmed that the 2019 results were achieved within the Group's and business units' risk framework and appetite. The Group Chief Risk and Compliance Officer also considered the effectiveness of risk management and internal controls, and specific actions taken to mitigate risks, particularly where these may be at the expense of profits or sales. The report also confirmed that the Group met minimum capital thresholds which were aligned to the Group and business unit risk framework and appetites. The Committee took into account this advice when determining AIP outcomes for Executive Directors.

The level of performance required for threshold, plan and maximum payment against the Group's 2019 AIP financial measures and the results achieved are set out below:

| 2019 AIP measure | Weighting | Threshold (\$m) | Target (\$m) | Stretch target (\$m) | Achievement (\$m) |
|--|-----------|--------------------|-----------------|-------------------------|----------------------|
| Group adjusted operating profit | 35% | 5,491 | 5,936 | 6,381 | 6,360 |
| Group operating free surplus generated | 30% | 4,269 | 4,493 | 4,718 | 4,794 |
| Group cash flow | 20% | (375) | (118) | 53 | (7) |
| Group EEV new business profit | 15% | 4,388 | 4,619 | 4,850 | 4,713 |

The Committee had regard to the achievement against the performance measures and the Group Chief Risk and Compliance Officer's report and decided to apply a discretionary adjustment to the arithmetic outcome under the financial element of the 2019 bonus as discussed above. The impact of this adjustment was an increase in bonus awards of approximately 9.8 per cent for the Group Chief Executive and Group Chief Financial Officer and Chief Operating Officer. The Board believes that, due to the commercial sensitivity of the business unit targets, disclosing further details of these targets may damage the competitive position of the Group.

Personal performance

As set out in our Directors' remuneration policy, a proportion of the annual bonus for each Executive Director is based on the achievement of personal objectives including:

- The executive meeting their individual conduct and customer measures;
- The executive's contribution to Group strategy as a member of the Board; and
- Specific goals related to the function for which they are responsible and progress on major projects including the demerger.

For 2019, the Committee decided that, in addition to personal objectives for which they were each accountable, the Executive Directors should be given shared objectives relating to the demerger in light of the importance this had for the Group.

At the end of the year, the Committee considered the performance of all executives eligible for a Prudential plc bonus in respect of their 2019 Board service against objectives established at the start of the year. At its meeting in February 2020, it concluded that there had been a high level of performance against these 2019 objectives. All executives met their individual conduct measures and each Executive Director made a significant contribution to the achievement of Group strategy during 2019.

The below summarises performance against the shared and individual personal objectives for the current Executive Directors:

| Key shared 2019 objectives for Executive Directors | Achievement |
|--|--|
| Oversee the maintenance of appropriate financial resilience, within a set framework, across Group pre and post the planned demerger of M&G plc. | <ul style="list-style-type: none"> — Successfully managed the Group's credit rating agency relationship through the demerger with unchanged ratings, maintaining a resilient balance sheet with a robust shareholder LCSM ratio over Group minimum capital requirement of 309 per cent at 31 December 2019 supported by our conservative approach to risk management and, in particular, to credit risk, through the transition from the PRA to the Hong Kong IA. |
| Proactively engage with the Hong Kong IA to embed the new risk and capital frameworks, supporting the Hong Kong IA in assuming the role of Group-wide supervisor. | <ul style="list-style-type: none"> — Significant personal and team engagement in ascertaining, embedding and activating the new risk and capital framework. |
| Refresh Group Strategy post the demerger. Redevelop and embed the revised approach to Group capital allocation, which integrates risk-based decisions and funding with Group risk appetite and corporate strategy. | <ul style="list-style-type: none"> — Announced and executed on a clear allocation of future capital resources towards Asia. Made a decision to require Jackson to explore reinsurance and third-party financing for the execution of its future bolt on acquisitions above its internal capacity for capital generation; — Maintained a financial strength rating in the AA- range. This rating derives, in part, from the high level of financial flexibility that we have to issue debt and equity instruments; and — Determined and communicated high and resilient RoE and cash generation from the Asian business model. |

Mark FitzPatrick

| 2019 key objectives | Achievement |
|--|---|
| Execute on all necessary steps to support the demerger of M&G plc from Prudential at the earliest opportunity. | <ul style="list-style-type: none"> — Took day-to-day execution and management responsibility for the management of the demerger process, in particular designing and executing the process to achieve the required approvals of bond holders, shareholders and regulators. |
| Build and development of a new Group Treasury function and the material progression of IFRS 17 implementation in a way that aligns to the broader Group strategy and operating model. | <ul style="list-style-type: none"> — Recruited a new Group Treasurer and the established an effective Treasury team; — Integrated the Treasury team in the existing Group Finance structures; and — Directed the implementation of IFRS 17, overseeing the design, resourcing of central functions and business unit specifications for consistent implementation into the Group's accounting functions groupwide. Sponsored the team to select and manage mobilisation of global implementation partner and system vendors. |
| Lead Group Strategy formulation and execution ensuring opportunities to evolve the business continue to be explored. | <ul style="list-style-type: none"> — Led the strategic plan design and process from which was drawn the revised equity story to be used in the demerger documentation. |
| <p>Recognising Mr FitzPatrick's very strong performance against both his individual and shared personal objectives during 2019, the Committee judged that 19 per cent of a maximum of 20 per cent attributable to personal objectives was appropriate.</p> | |

James Turner

| 2019 key objectives | Achievement |
|---|--|
| Act as a trusted adviser and partner to the Group Chief Executive and members of the Board/Group Executive Committee. | <ul style="list-style-type: none"> — Ensured that key Board decisions in relation to the demerger were supported by clear and concise Risk opinions. These included consideration of external and internal financial and non-financial risks and scenarios relevant to the demerger timeline and readiness decisions, and contributed to the completion of the demerger of M&G plc on 21 October 2019; and — Assessed the risk management considerations to support the Group's early adoption of the NAIC regulatory framework in Q4 2019. |
| Drive the operation of the Risk and Compliance team as a Group-wide function promoting the collaboration of the teams across location. | <ul style="list-style-type: none"> — Steered the operation of the combined Risk and Compliance functions, having taken additional responsibility for Group Compliance in July 2019. — Initiated significant operational and structural changes to align the newly formed Group-wide function more closely with the lead regulator and operational businesses in Asia and US; and — Directly supported re-alignment of the function with key operational businesses and the lead regulator with personal relocation to Hong Kong in August 2019. |
| Lead strategic communications between Prudential and key regulators and oversee the internal regulatory communication policy to ensure that responses are appropriate, complete and timely. | <ul style="list-style-type: none"> — Positive and proactive engagement with both the PRA and Hong Kong IA ensuring our commitment of timely information flow to both Regulators was met and to support the successful handover of regulatory responsibilities on 21 October 2019; — Concluded discussions to confirm Hong Kong IA regulatory requirements in advance of the demerger; — Throughout 2019, led frequent and productive interaction with the Hong Kong IA and industry peers to support the drafting of Group-wide Supervisory standards which are expected to apply from the second half of 2020; and — Actively engaged with the Hong Kong IA and the Inaugural Regulatory College in October 2019, providing insight into the Prudential Group strategy, operations and risk and compliance frameworks to support the successful and complete transition of Group Regulator responsibilities by 21 October 2019. |

Recognising Mr Turner's very strong performance against both his individual and shared personal objectives during 2019, the Committee judged that 47 per cent of a maximum of 50 per cent attributable to personal objectives was appropriate.

Mike Wells

| 2019 key objectives | Achievement |
|--|---|
| Demonstrate personal leadership which effectively mobilises, secures and directs the team delivering the demerger of M&G plc from Prudential plc. | <ul style="list-style-type: none"> — Took overall responsibility for the management of the demerger process, in particular gaining the required approvals of senior stakeholders. At the same time, conducted and continued significant relationship building for the PCA and Jackson businesses while focusing business unit leadership on operational delivery. |
| Develop the capability and effectiveness of the Group, ensuring that the culture fosters delivery, positive internal and external relationships and co-operation across the Group. | <ul style="list-style-type: none"> — Committed significant time and leadership resource to the extensive roadshow marketing of the demerger process; and — Engaged employees through personal appearances and through the use of video and social media to support the demerger, communicating changes and addressing employees' questions and concerns. |
| Develop plans to determine the Group's exposure to climate-related risks and opportunities, and Group's actions as a consequence and implement actions to increase connectivity between the Group and business units, including revisions to operating models. | <ul style="list-style-type: none"> — Enhanced membership of the Environmental, Social and Governance (ESG) Executive Committee to increase business unit representation; — Created a roadmap for the implementation of the recommendations of the Task Force on Climate-Related Financial Disclosures; and — Enhanced access to ESG and climate risk data sources across the Group to support carbon footprinting work and initiated work on the stress-testing of the investment book against different climate change scenarios. |
| Recognising Mr Wells's very strong performance against both his individual and shared personal objectives during 2019, the Committee judged that 18 per cent of a maximum of 20 per cent attributable to personal objectives was appropriate. | |

Functional performance

The Group Chief Executive and the Chair of the Group Risk Committee undertakes the assessment of performance against functional objectives for the Group Chief Risk and Compliance Officer. 2019 achievement is summarised below:

| Summary of 2019 functional objectives | Achievement |
|---|--|
| Define and provide oversight of the Group's adherence to the framework of the Group-wide risk and compliance policies, risk appetite and limits during 2019 and ensuring oversight responsibilities across the Group and business units, in accordance with internal and regulatory requirements. | <ul style="list-style-type: none"> — Led discussions resulting in Board approval of revised Group Risk Appetite Framework, including incorporating revisions to regulatory capital requirements and a clear focus on non-financial risks; — Successfully revised the defined system of policies, risk appetite and limits to reflect the new regulatory environment of the Group from the point of demerger and led the embedding of this across the Group; |
| Establish strong Risk and Compliance capabilities across both in co-ordination with the M&G CRO and the M&G Compliance Director. | <ul style="list-style-type: none"> — Provided key insights and analysis of emerging issues both in relation to the demerger and to broader business operations; — Ensured two strong Risk and Compliance functions within Prudential and M&G in advance of demerger by overseeing the reallocation of resources, including people and technology and the build and revision of key risk framework elements for both businesses in advance of demerger; and |
| Deliver regulatory requirements, including those required under Solvency II until the point of demerger and the Hong Kong IA regulatory letter requirements thereafter. | <ul style="list-style-type: none"> — Delivered an extensive set of regulatory requirements under Solvency II until the point of demerger and under the Hong Kong IA regulatory letter from 21 October 2019 with increased frequency (for example to the Group's Own Risk and Solvency Assessment) and significant changes (for example in terms of capital disclosures) as a result of the demerger. |

In recognition of James Turner's very strong performance against his functional objectives during 2019, the Committee judged that 46 per cent of a maximum of 50 per cent attributable to functional objectives was appropriate.

The below summarises performance against the personal objectives for the Executive Directors who retired from the Board during the year and who remain employed by the Group:

Michael Falcon

| <i>Key objectives</i> | <i>Achievement</i> |
|--|--|
| Prioritise the success of the demerger of M&G plc from Prudential plc and support Group activities and synergy actions for the post-demerger environment. | <ul style="list-style-type: none"> — Committed significant time and leadership resource to the extensive roadshow marketing of the demerger process. |
| Develop the capability and effectiveness of the Jackson team, ensuring that the culture fosters delivery, positive internal and external relationships and cooperation across the Group and develop and implement (as appropriate) opportunities to optimise Jackson's capital deployment. | <ul style="list-style-type: none"> — Refreshed leadership of Jackson in distribution and commercial areas to position for the retirement markets. Enhanced quality and frequency of Group-wide co-ordination for example, with Group Strategy and IT outsourcing; — Delivered organic diversification by driving product and additional distribution initiatives to support Jackson's intent to better balance the overall risk profile, and to provide a higher absolute level of capital thereby optimising Jackson's capital deployment; — Determined and commenced programme from August 2019 of seeking inorganic opportunities with reinsurance and third-party financing, to deliver enhanced value to shareholders, taking into account the interests of customers, regulators, rating agencies and capital providers; — Expanded advisory distribution footprint with Morgan Stanley, DPL Financial Partners, TD Ameritrade and RetireOne; — Awarded 'Contact Center World Class CX Certification' and 'Highest Customer Service for the Financial Industry' awards by The Service Quality Measurement Group, Inc.; and — Actively engaged with FinTech partners including Envestnet, MoneyGuidePro and eMoney. |

Recognising Mr Falcon's very strong performance against both his individual and shared personal objectives during the year to 16 May 2019, the Committee judged that 18 per cent of a maximum of 20 per cent attributable to personal objectives was appropriate.

Nic Nicandrou

| <i>Key objectives</i> | <i>Achievement</i> |
|---|--|
| Prioritise the success of the demerger of M&G plc from Prudential plc and support Group activities and synergy actions for the post-demerger environment. | <ul style="list-style-type: none"> — Committed significant time and leadership resource to the extensive roadshow marketing of the demerger process. |
| Build, deploy and leverage digital enablers for customer proposition, operational efficiency and distribution and evolve the business operating model, improve ways of working and deepen capabilities of strategic importance. | <ul style="list-style-type: none"> — Commenced execution of Prudential Corporation Asia -wide digital strategy as part of the drive for high quality earnings and management of operating leverage through removal of duplication and modernisation of operating structures; — Launched 'Pulse by Prudential' Health Ecosystem, an all-in-one digital app, and entered into a new strategic partnership with OVO, the largest digital payment platform in Indonesia and commenced the roll-out of this programme over the Prudential Corporation Asia businesses; — Through our Health Ecosystem, collaborated with various partners to offer users a wide range of affordable and easy-to-access value-added services such as health assessments, risk factor identification, triage, telemedicine, wellness and digital payment; — Built on our distribution channels by renewing our regional strategic bancassurance alliance with UOB, entering into an exclusive bancassurance partnership with SeABank and by acquiring a majority stake in Thanachart Fund Management Co., Ltd; — Conducted extensive business renewal of products and the expansion of distribution channels in Indonesia and Hong Kong as well as built execution plans for the fast-growing SME segment; — Continued to expand our presence in China across both the insurance and asset management sectors, establishing a new branch in Shaanxi, our twentieth province launching our first fund offerings in China; — 83 per cent of all new business was submitted through e-point-of-sale technology in 2019, representing an increase of 11 percentage points year-on-year; and — Enhanced our growing scale in Africa by acquiring a majority stake in a leading life insurer operating in Cameroon, Côte d'Ivoire and Togo. |

Recognising Mr Nicandrou's very strong performance against both his individual and shared personal objectives during the year to 16 May 2019, the Committee judged that 19 per cent of a maximum of 20 per cent attributable to personal objectives was appropriate.

2019 Jackson bonus pool

In 2019, the Jackson bonus pool was determined by Jackson National Life Insurance Company's profitability, remittances to Group and advisory sales. Financial performance in the period reflects the impact of strong equity markets, lower interest rates, and a more diverse product mix. Further detail on this performance is set out on pages 28 to 33. The Committee also considered performance in a number of key activities and the delivery against certain non-financial Group requirements. As a result of this assessment, the Committee determined that Michael Falcon's share of the bonus pool for his service on the Board was \$1,282,000. Forty per cent of this award is deferred into shares for three years.

2019 bonus awards

The Committee determined the following 2019 AIP awards on the basis of the performance of the Group and its business units and its consideration of the total bonus value in light of its view of all relevant circumstances, including:

- The successful completion of the demerger of M&G plc from the Group;
- The overall contribution of the executive; and
- Behavioural, conduct and risk management considerations.

40 per cent of all awards are deferred into shares for three years:

| Executive Director | Role | 2019 salary ¹ | Maximum 2019 AIP (% of salary) | Actual 2019 AIP award (% of maximum opportunity) | 2019 bonus award (including cash and deferred elements) |
|-------------------------------|---|----------------------------|--------------------------------|--|---|
| Michael Falcon ^{2,3} | Chairman and CEO, Jackson Holdings | \$302,000 | 100% | 95% | £1,227,000 |
| Mark FitzPatrick | Group Chief Financial Officer and Chief Operating Officer | £760,000 | 175% | 96% | £1,279,000 |
| Nic Nicandrou ² | Chief Executive, Prudential Corporation Asia | HK\$4,113,000 | 180% | 96% | £707,000 |
| James Turner ⁴ | Group Chief Risk and Compliance Officer | £372,000/ HK\$3,054,000 | 160%/ | 175% | £1,052,000 |
| Mike Wells | Group Chief Executive | £1,149,000 | 200% | 96% | £2,197,000 |

Notes

- 1 Salary paid in respect of services as an Executive Director.
- 2 Michael Falcon and Nic Nicandrou stepped down from the Board on 16 May 2019. The maximum bonus opportunities shown represent their annual opportunity as an Executive Director. The 2019 bonus awards shown are in respect of their service as Executive Directors.
- 3 In addition to the AIP, Michael Falcon also participates in the Jackson bonus pool. The figure reflects both payments. 40 per cent of both the AIP and Jackson bonus award pool amounts is deferred.
- 4 The salary amounts shown above were actually delivered to Mr Turner for the portion of the year he was in the UK and the portion of the year he was in Hong Kong. Mr Turner's maximum bonus opportunity increased from 160 per cent of salary to 175 per cent of salary on 1 August 2019 on his relocation to Hong Kong. The 2019 bonus award was pro-rated to reflect the portion of the year he was in the UK and the portion of the year he was in Hong Kong.
- 5 John Foley stepped down from the Board on 16 May 2019. He subsequently left the Company on the demerger of M&G plc from Prudential plc on 21 October 2019. As an Executive Director of Prudential plc during 2019, Mr Foley was eligible to receive a 2019 bonus award of up to 180 per cent of salary. Since transferring to M&G plc it was agreed with M&G plc that Mr Foley's 2019 bonus will be assessed and determined by the M&G plc Remuneration Committee and will be paid by M&G plc. No 2019 bonus award has been paid to Mr Foley by Prudential plc.

Remuneration in respect of performance periods ending in 2019
Prudential Long Term Incentive Plan (PLTIP)

Target setting

Our long-term incentive plans have stretching performance conditions that are aligned to the strategic priorities of the Group. In 2017, all Executive Directors were granted awards under the PLTIP. In determining the financial targets the Committee had regard to the stretching nature of the three-year Business Plan for adjusted operating profit and capital positions as set by the Board. Further, in setting the conduct and diversity targets under the sustainability scorecard, the Committee considered input from Group-wide Internal Audit and the Group Chief Risk and Compliance Officer on conduct risk for the conduct measure and had regard to the Company's commitment under the Women in Finance Charter for the diversity measure.

The weightings of the measures are detailed in the table below:

| Executive Director ¹ | Weighting of measures | | | | | |
|---------------------------------|------------------------|---|---|--|----------------------|------------------------|
| | Group TSR ² | Adjusted operating profit (Group or business unit) ³ | Sustainability Scorecard | | | |
| | | | Solvency II operating capital generation ⁴ | ECap operating capital generation ⁵ | Conduct ⁶ | Diversity ⁷ |
| Mark FitzPatrick | 25% | 50% | 6.25% | 6.25% | 6.25% | 6.25% |
| Nic Nicandrou ⁸ | 25% | 50% | 6.25% | 6.25% | 6.25% | 6.25% |
| James Turner ⁹ | 25% | 50% | 6.25% | 6.25% | 6.25% | 6.25% |
| Mike Wells | 25% | 50% | 6.25% | 6.25% | 6.25% | 6.25% |

Notes

- This table includes Executive Directors who served on the Board during 2019 with 2017 PLTIP awards. Nic Nicandrou and John Foley stepped down from the Board on 16 May 2019 and John Foley subsequently left the Company on the demerger of M&G plc from Prudential plc on 21 October 2019. Mr Foley's 2017 PLTIP award was exchanged for an equivalent award of M&G plc shares. The M&G plc Remuneration Committee is responsible for determining, approving and settling the release of the 2017 long-term incentive award to Mr Foley.
- Group TSR is measured on a ranked basis over three years relative to peers.
- Adjusted operating profit is measured on a cumulative basis over three years.
- Solvency II operating capital generation is cumulative three-year Solvency II Group operating capital generation. As set out in the 'Remuneration decisions taken in relation to the demerger' section, Solvency II operating capital generation was replaced with Group free surplus generation from 1 July 2019.
- This is cumulative three-year ECap Group operating capital generation, less cost of capital (based on the capital position at the start of the performance period).
- Conduct is assessed through appropriate management action, ensuring there are no significant conduct/culture/governance issues that could result in significant capital add-ons or material fines.
- Diversity is measured as the percentage of the Leadership Team that is female at the end of 2019. The target for this metric has been based on progress towards the goal that the Company set when it signed the Women in Finance Charter, where 30 per cent of our Leadership Team should be female by the end of 2021.
- Nic Nicandrou was granted this award when he was in the role of Chief Financial Officer. The performance measures attached to his PLTIP award did not change following his appointment to the role of Chief Executive, Prudential Corporation Asia in 2017.
- James Turner was granted this award when he was in his previous role of Director of Group Finance.

As discussed in the section on 'Remuneration decisions taken in relation to the demerger', the Committee adjusted the performance conditions attached to the 2017 PLTIP awards in order to take account of the demerger, ensuring that the revised performance conditions are no more or less stretching than those originally attached to the awards. The performance assessment provided overleaf is based on these adjusted targets.

Under the Group TSR measure used for 2017 PLTIP awards, 25 per cent of the award vests for TSR at the median of the peer group increasing to full vesting for performance within the upper quartile. TSR is measured on a local currency basis since this has the benefit of simplicity and directness of comparison. No adjustments to the peer group has been made for the demerger. The peer group for the 2017 awards is set out below:

| | | | |
|---------------|--------------------|------------------------|----------------------|
| Aegon | AIA | AIG | Allianz |
| Aviva | AXA | Generali | Legal & General |
| Manulife | MetLife | Old Mutual | Prudential Financial |
| Standard Life | Sun Life Financial | Zurich Insurance Group | |

Following the merger of Standard Life and Aberdeen Asset Management during the three-year performance period, the Committee determined that Standard Life would be retained in the peer group for the pre-merger period and the combined entity would be included in the peer group from the date of the merger for all outstanding PLTIP awards. In addition, following the demerger of Quilter from Old Mutual and Old Mutual's delisting from the FTSE on 26 June 2018, the Committee determined that Old Mutual be retained as a TSR peer with no adjustment to its performance during the period prior to its demerger and delisting, and that Old Mutual's TSR performance from the date of its demerger and delisting would track an index of the peers (excluding Prudential plc) for all outstanding PLTIP awards.

Performance assessment

In deciding the proportion of the awards to be released, the Committee considered actual financial results against performance targets. The Committee also reviewed underlying Company performance to ensure vesting levels were appropriate, including an assessment of whether results were achieved within the Group's and business units' risk framework and appetite. The Directors' remuneration policy contains further details of the design of Prudential's long-term incentive plans.

Group adjusted operating profit performance

Under the adjusted operating profit measure, 25 per cent of the 2017 awards vest for meeting the threshold adjusted operating profit target set at the start of the performance period, increasing to full vesting for performance at or above the stretch level. The table below illustrates the cumulative performance achieved over 2017 to 2019 compared to the adjusted Group targets which exclude M&G plc from the point of demerger:

| Group | 2017-19 adjusted cumulative targets | | | 2017-19 cumulative achievement | Vesting under the adjusted operating profit element |
|---------------------------|-------------------------------------|-----------|-----------|--------------------------------|---|
| | Threshold | Plan | Maximum | | |
| Adjusted operating profit | \$15,063m | \$16,737m | \$18,411m | \$19,021m | 100% |

The Committee determined that the cumulative adjusted operating profit target established for the PLTIP should be expressed using exchange rates consistent with the reported disclosures. Individual business units achieved between 86 per cent and 100 per cent vesting under this element. Details of business unit adjusted operating profit targets have not been disclosed as the Committee considers that these are commercially sensitive and disclosure of targets at such a granular level would put the Company at a disadvantage compared to its competitors.

TSR performance

Prudential's TSR performance during the performance period (1 January 2017 to 31 December 2019) was ranked below median of the peer group. The portion of the awards related to TSR will therefore lapse.

Sustainability scorecard performance

Capital measure – Group Solvency II operating capital generation/Group operating free surplus generation

The vesting profile for the Group Solvency II operating capital generation and Group operating free surplus generation measure is binary, awarding full vesting for achieving plan and no vesting for any level of performance below plan. The weighted average of the adjusted Group Solvency II operating capital generation from 1 January 2017 to 30 June 2019 (target \$7.4bn) and the Group operating free surplus generation from 1 July 2019 to 31 December 2019 (target \$2.2 bn), which excludes M&G plc performance from the point of demerger, was in excess of the cumulative target and therefore generated 100 per cent vesting on this element.

Capital measure – Group ECap operating capital generation

The vesting profile for the Group ECap operating capital generation measure is binary, awarding full vesting for achieving plan and no vesting for any level of performance below plan. The adjusted cumulative Group ECap operating capital generation was below the target of \$8.5bn (which excludes M&G plc from the point of demerger) and therefore generated a zero per cent vesting outcome on this element of the PLTIP.

Details of cumulative achievement under the capital measures have not been disclosed as the Committee considers that these are commercially sensitive and would put the Company at a disadvantage compared to its competitors. The Committee will keep this disclosure policy under review based on whether, in its view, disclosure would compromise the Company's competitive position.

Conduct assessment

The vesting profile of this element is binary with full vesting being awarded where there are no significant conduct/culture/governance issues that result in significant capital add-ons or material fines. On 30 September 2019, the FCA fined M&G plc £23,875,000 for failures related to the non-advised sale of annuities between July 2008 and September 2017. Since this occurred before the demerger of M&G plc from the Group, the Committee determined that the portion of the 2017 PLTIP awards related to conduct held by Group Executive Directors should lapse.

Diversity assessment

On 31 December 2019, 28 per cent of our Leadership Team was female. Since this was above the 27 per cent level required for full vesting, the portion of the awards related to diversity that therefore vested was 100 per cent.

PLTIP vesting

The Committee considered a report from the Group Chief Risk and Compliance Officer which had been approved by the Group Risk Committee. This report confirmed that the financial results were achieved within the Group's and business units' risk framework and appetite. On the basis of this report and the performance of the Group and its business units described above, the Committee decided not to apply a discretionary adjustment to the arithmetic vesting outcome under the 2017 PLTIP awards and determined the vesting of each Executive Director's PLTIP awards as set out below:

| Executive Director | Maximum value of award at full vesting ¹ | Percentage of the LTIP award vesting | Number of shares vesting ² | Value of shares vesting ¹ |
|----------------------------|---|--------------------------------------|---------------------------------------|--------------------------------------|
| Mark FitzPatrick | £1,730,807 | 62.5% | 78,104 | £1,081,740 |
| Nic Nicandrou ³ | £1,882,617 | 62.5% | 67,255 | £931,482 |
| James Turner | £485,387 | 62.5% | 21,903 | £303,357 |
| Mike Wells | £4,576,469 | 62.5% | 206,517 | £2,860,260 |

Notes

- The share price used to calculate the value of the PLTIP awards with performance periods which ended on 31 December 2019 and vest in April 2020 for all Executive Directors other than Mark FitzPatrick and in August 2020 for Mark FitzPatrick, was the average share price for the three months up to 31 December 2019, being £13.85. The number of Prudential plc shares under award has been adjusted in line with the approach set out in the section on 'Remuneration decisions taken in relation to the demerger'.
- The number of shares vesting includes accrued dividends.
- The vesting of Nic Nicandrou's 2017 PLTIP award is in relation to his service as an Executive Director.
- John Foley stepped down from the Board on 16 May 2019. He subsequently left the Company on the demerger of M&G plc from Prudential plc on 21 October 2019. Mr Foley's 2017-2019 PLTIP award has been exchanged for an equivalent award over M&G plc shares. Under the terms of the Demerger Agreement this replacement award should be of an equivalent value; with the same release schedule; subject to equivalent malus and clawback provisions and subject to performance conditions which are relevant to M&G plc and which are no more or less onerous than those which originally applied. The vesting of Mr Foley's replacement 2017-2019 long-term incentive award is due to be disclosed by M&G plc and described in the M&G plc Directors' remuneration report as set out in the M&G plc 2019 Annual report. These details were not known by Prudential plc prior to the finalisation of this report.

Long-term incentives awarded in 2019

2019 share-based long-term incentive awards

The table below shows the awards of conditional shares made to Executive Directors who served on the Board in 2019 under the PLTIP and the performance conditions attached to these awards. Further details on the performance measures were disclosed on page 164 of the 2018 Annual Report.

| Executive Director | Role | Number of shares or ADRs subject to award [*] | Face value of award [†] | Percentage of awards released for achieving threshold targets [‡] | End of performance period | Weighting of performance conditions | |
|-----------------------------|---|--|----------------------------------|--|---------------------------|-------------------------------------|---------------------------------------|
| | | | | | | Group TSR | Sustainability scorecard [§] |
| Michael Falcon ¹ | Chairman and Chief Executive Officer, Jackson | 78,856 | \$3,199,976 | 20% | 31 December 2021 | 75% | 25% |
| Mark FitzPatrick | Chief Financial Officer | 123,376 | £1,899,990 | 20% | 31 December 2021 | 75% | 25% |
| John Foley ^{1,2} | Chief Executive, M&G Prudential | 129,383 | £1,992,498 | 20% | 31 December 2021 | 75% | 25% |
| Nic Nicandrou ¹ | Chief Executive, Prudential Corporation Asia | 172,743 | £2,660,242 | 20% | 31 December 2021 | 75% | 25% |
| James Turner | Group Chief Risk Officer | 103,571 | £1,594,993 | 20% | 31 December 2021 | 75% | 25% |
| Mike Wells | Group Chief Executive | 298,441 | £4,595,991 | 20% | 31 December 2021 | 75% | 25% |

* Awards over shares were awarded to all Executive Directors other than Michael Falcon whose awards were over ADRs.

† Awards for Executive Directors are calculated based on the average share price over the three dealing days prior to the grant date, being £15.40 for all Executive Directors other than Michael Falcon and an ADR price of US\$40.58 for Michael Falcon.

‡ The percentage of awards released for achieving maximum targets is 100 per cent.

§ Each of the four measures within the sustainability scorecard has equal weighting. They are Group Solvency II operating capital generation, Group ECap operating capital generation, diversity and conduct.

Notes

- Michael Falcon, Nic Nicandrou and John Foley stepped down from the Board on 16 May 2019.
- John Foley left the Company on the demerger of M&G plc from Prudential plc on 21 October 2019. His 2017-2019 PLTIP award has been exchanged for an equivalent award over M&G plc shares.

Update on performance against targets for awards made in 2018 and 2019

As set out in the section on 'Remuneration decisions taken in relation to the demerger', the Committee has adjusted the performance conditions attached to the 2018 and 2019 awards in order to take account of the demerger, ensuring that the revised performance conditions are no more or less stretching than those originally attached to the awards. The performance update provided below is based on these adjusted targets.

Group adjusted operating profit

Prudential's Group adjusted operating profit performance between 1 January 2018 and 31 December 2019 was above the stretch target established for the 2018 PLTIP awards. Group adjusted operating profit was not used as a performance measure for the 2019 PLTIP awards.

TSR Performance

As at 31 December 2019, Prudential's TSR performance ranked below the peer group median for the elapsed portions of the 2018 and 2019 performance periods.

Sustainability scorecard of strategic measures

Between 1 January 2018 and 31 December 2019, the Group also made good progress towards meeting the measures under the sustainability scorecard used for the 2018 and 2019 PLTIP awards:

— **Capital measure – Group Solvency II operating capital generation/Group operating free surplus generation**

For the elapsed portions of the 2018 and 2019 PLTIP performance periods, the Group's Solvency II operating capital generation and the Group's operating free surplus generation was above the established Plan levels for both awards.

— **Capital measure – Group ECap operating capital generation**

For the elapsed portions of the 2018 and 2019 PLTIP performance periods, the Group's ECap operating capital generation was below the Plan levels established for the both awards.

— **Conduct measure**

During 2018 and 2019, there were no significant conduct/culture/governance issues that resulted in significant capital add-ons or material fines. This assessment is unaffected by the FCA fine since the issues identified relate to a period which ended in 2017.

— **Diversity measure**

As at 31 December 2019, 28 per cent of our Leadership Team was female. This represented strong progress against the threshold level that at least 27 per cent of the Leadership Team be female by the end of 2020 for the 2018 PLTIP award, and the threshold level that at least 28 per cent of the Leadership Team be female by the end of 2021 for the 2019 PLTIP award.

Pay comparisons

Performance graph and table

The chart below illustrates the TSR performance of Prudential, the FTSE 100 (as the Company has a premium listing on the London Stock Exchange) and the peer group of international insurers used to benchmark the Company's performance for the purposes of the 2019 PLTIP awards. The chart illustrates the performance of a hypothetical investment of £100 in ordinary shares of Prudential plc over the 10-year period 1 January 2010 to 31 December 2019 compared to a similar investment in the FTSE 100 or an index of the Company's peers. Total shareholder return is based on Returns Index data calculated on a daily share price growth plus re-invested dividends (as measured at the ex-dividend dates).

The information in the table below shows the total remuneration for the Group Chief Executive over the same period:

| £000 | 2010 | 2011 | 2012 | 2013 | 2014 | 2015 | 2015 | 2016 | 2017 | 2018 | 2019 |

| Group Chief Executive 'single figure' of total remuneration ² | 5,293 | 5,339 | 9,533 | 8,702 | 13,418 | 4,699 | 7,526 | 7,370 | 8,560 | 7,571 | 6,719 |

Notes

- Tidjane Thiam left the Company on 31 May 2015. Mike Wells became Group Chief Executive on 1 June 2015. The figures shown for Mike Wells's remuneration in 2015 relate only to his service as Group Chief Executive.
- Further detail on the 'single figure' is provided in the 'single figure' table for the relevant year. The figures provided reflect the value of vesting LTIP awards on the date of their release other than for 2019 (for which an estimate is used).

Percentage change in remuneration

The table below sets out how the change in remuneration for the Group Chief Executive between 2018 and 2019 compared to a wider employee comparator group:

| | Salary | Benefits | Bonus |
|-----------------------|--------|----------|-------|
| Group Chief Executive | 2.0% | (44.5)% | 3.0% |
| All UK employees | 3.9% | (3.4)% | 6.7% |

The employee comparator group used for the purpose of this analysis is all UK employees. This is considered to be an appropriate comparator group as the Group Chief Executive's remuneration arrangements are similar in structure to the majority of these employees and it reflects the economic environment where the Group Chief Executive is employed. For 2018 this group included employees in M&G Prudential and Group Head Office. For 2019, this group included UK-based Group Head Office employees only. Employees in M&G plc have been excluded from the calculation of average pay in 2019 as M&G plc demerged from Prudential plc on 21 October 2019. M&G plc employees are no longer within the Group and Prudential plc does not have any influence over or knowledge of pay decisions, including 2019 bonus awards, for employees within M&G plc. The salary increase includes uplifts made through the annual salary review, as well as any additional changes in the year; for example to reflect promotions or role changes. The decrease in benefits paid to the Group Chief Executive is driven by the cessation of the payment of mortgage interest on 30 November 2018. The decrease in benefits paid to all UK employees is due to the reduction in the cost to the Company of providing certain benefits. There has been no change to the level of taxable benefit coverage received by employees.

Group Chief Executive pay compared with employee pay

To increase further transparency of executive remuneration and its alignment with the pay of other employees, we published our CEO pay ratio one year in advance of the disclosure becoming a requirement under the UK Companies (Miscellaneous Reporting) Regulations 2018 in the 2018 Directors' remuneration report. The employee comparator group used for the purpose of this 2018 analysis was all UK employees comprising employees in M&G Prudential and Group Head Office in 2018. In light of the demerger of the M&G plc business from Prudential plc on 21 October 2019, we have prepared the 2019 CEO pay ratio based on UK-based Group Head Office employees since Prudential plc no longer has any influence over or knowledge of pay decisions, including 2019 bonus awards, for employees within M&G plc. On this basis, the Committee has decided that the 2018 CEO pay ratio will not be restated in this report and that the 2019 CEO pay ratio will form the base year of reporting given the fundamental changes to the UK workforce which have resulted from the demerger.

The table below compares the Group Chief Executive's 'single figure' of total remuneration to that received by three representative UK employees in 2019.

| Year | Method | 25th percentile pay ratio | Median pay ratio | 75th percentile pay ratio |
|------|----------|---------------------------|------------------|---------------------------|
| 2019 | Option B | 87 : 1 | 67 : 1 | 43 : 1 |

Under the regulations there is a choice of three methodologies to determine the 25th, median and 75th full-time equivalent remuneration of our UK employees. This is the most recently collected data in accordance with the Equality Act 2010 (Gender Pay Gap Information) Regulations 2017 and includes all UK employees. The Company has chosen to use the 2019 hourly rate gender pay gap information as this method uses data that is aligned with other disclosures made under our gender pay gap reporting ('Option B' in the table above). The employees used in the calculations were identified using the most recent gender pay gap data for 2019, on 23 January 2020, following the end of the financial year. Base salary and total remuneration for these identified employees has then been calculated based on their actual remuneration for 2019. The Committee determined that the identified employees are reasonably representative since the structure of their remuneration arrangements is in line with that of the majority of employees within the UK-based Group Head Office workforce. The same methodology used for calculating the 'single figure' of the Group Chief Executive has been used for calculating the pay and benefits of these three UK employees.

The salary and total remuneration received during 2019 by the indicative employees used in the above analysis are set out below:

| | 25th percentile | Median | 75th percentile |
|-------------------------|-----------------|----------|-----------------|
| 2019 salary | £56,000 | £74,000 | £110,000 |
| Total 2019 remuneration | £77,000 | £100,000 | £155,000 |

The Committee believes the median pay ratio is consistent with the pay, reward and progression policies for our UK-based Group Head Office employees. The base salary and total remuneration levels for the Group Chief Executive and the median representative employee are competitively positioned within the relevant markets and reflect the operation of our remuneration structures which are effective in appropriately incentivising staff, having regard to our risk framework, risk appetites and to rewarding the 'how' as well as the 'what' of performance.

Gender pay gap

Our UK business, Prudential Services Limited, is the employing entity for almost all of our London Head Office staff including the UK-based Group Chief Executive and his direct reports. Prudential Services Limited has recently reported its 2019 UK gender pay gap data and details can be found on the Group's website. There has been a further narrowing of most of the pay gap figures. Where men and women perform similar roles, they are paid equally but the gender pay gap reflects that men and women are doing different roles. We remain focused on closing the remaining pay gap as soon as possible and on ensuring that we attract applicants from all backgrounds and create opportunities for all our employees to develop and progress in order to ensure that we have the diverse talent needed by the Group to better reflecting the communities we serve. However, the gender pay gap demonstrated the demographic profile of the business (and the financial services sector more widely): there is a greater proportion of males in more senior and front-office roles and a greater proportion of females in more junior, support and back-office non-finance roles. All the Group's businesses are continuing to work on initiatives to increase the proportion of women in senior management and operating roles as part of the Group's strategic focus on diversity and inclusion as described in the diversity and inclusion statement on our website. This important priority is reflected in the Group's reward structure through the diversity measure attached to PLTIP awards granted from 2017 onwards.

Consideration of workforce pay and approach to engagement

During the year, the Committee considered workforce remuneration and related policies in the business units across the Group. Information presented to the Committee, by way of a dashboard, included how the Company's incentive arrangements are aligned with the culture and informed the Committee's decision-making on executive pay and policy. By way of example, business unit salary increase budgets are considered as part of the year-end review of Executive Director compensation and salary increases.

As part of the Board's wider initiatives, which included the appointment of designated Non-executive Directors who led on workforce engagement during the year as detailed in the 'Governance' section earlier in this Annual report, the Committee took additional measures in 2019 to explain how the remuneration of Executive Directors aligns with the wider company pay policy. The Company established a microsite on its intranet that outlines executive pay arrangements during the previous financial year and key areas of change for 2019. It explains to employees that total remuneration for Executive Directors is made up of a number of elements and is governed by both the Directors' remuneration policy and the Group's remuneration policy (which is also published on the Company's website) with the relevant links to these documents.

Relative importance of spend on pay

The table below sets out the amounts payable in respect of 2018 and 2019 on all employee pay and dividends:

| | 2018 | 2019 | Percentage change |
|--|-------|-------|-------------------|
| All employee pay including M&G plc (\$m) ^{1,2} | 2,454 | 2,143 | (12.7)% |
| All employee pay excluding M&G plc (\$m) ^{1,3} | 1,672 | 1,466 | (12.3)% |
| Dividends including demerger dividend (\$m) ⁴ | 1,638 | 8,582 | 423.9% |
| Dividends excluding demerger dividend (\$m) ⁴ | 1,638 | 1,203 | (26.6)% |

Notes

- 1 All employee pay as taken from note B2.1 to the financial statements.
- 2 This includes the costs of employment for M&G plc employees up to the demerger in October 2019.
- 3 This excludes the costs of employment of M&G plc employees for 2018 and 2019 in order to present a like for like comparison between the two years.
- 4 Dividends taken from note B6 to the financial statements.

Chairman and Non-executive Director remuneration in 2019

Chairman's fees

The Chairman's fee was reviewed by the Committee during 2019 and increased by 2 per cent to £765,000 with effect from 1 July 2019 in order to reflect inflation.

Non-executive Directors' fees

The Non-executive Directors' fees were reviewed by the Board during 2019 and the basic fee was increased from £97,000 to £99,000, the Remuneration Committee Chair fee increased from £60,000 to £65,000 while the Nomination & Governance Committee member fee increased from £12,500 to £15,000. No other fees were increased. The Board also introduced a £30,000 fee for each designated Non-executive Director carrying out a workforce engagement role.

| Annual fees | From 1 July 2018 (£) | From 1 July 2019 (£) |
|--|----------------------------|----------------------------|
| Basic fee | 97,000 | 99,000 |
| Additional fees: | | |
| Audit Committee Chair | 75,000 | 75,000 |
| Audit Committee member | 30,000 | 30,000 |
| Remuneration Committee Chair | 60,000 | 65,000 |
| Remuneration Committee member | 30,000 | 30,000 |
| Risk Committee Chair | 75,000 | 75,000 |
| Risk Committee member | 30,000 | 30,000 |
| Nomination & Governance Committee Chair ¹ | – | – |
| Nomination & Governance Committee member | 12,500 | 15,000 |
| Senior Independent Director | 50,000 | 50,000 |
| Workforce engagement role | N/A | 30,000 |

Note

¹ There is no fee paid for the role of Nomination & Governance Committee Chair.

If, in a particular year, the number of meetings is materially greater than usual, the Company may determine that the provision of additional fees is fair and reasonable.

The resulting fees paid to the Chairman and Non-executive Directors are:

| £000s | 2019 fees | 2018 fees | 2019 taxable benefits [*] | 2018 taxable benefits [*] | Total 2019 remuneration: the 'single figure' [†] | Total 2019 remuneration: the 'single figure' in USD (\$000s) [‡] | Total 2018 remuneration: the 'single figure' [†] | Total 2018 remuneration: the 'single figure' in USD (\$000s) [‡] |
|------------------------------------|--------------|--------------|--|--|--|---|--|---|
| Chairman | | | | | | | | |
| Paul Manduca | 758 | 742 | 172 | 136 | 930 | 1,187 | 878 | 1,172 |
| Non-executive Directors | | | | | | | | |
| Howard Davies | 217 | 212 | – | – | 217 | 277 | 212 | 283 |
| David Law | 217 | 212 | – | – | 217 | 277 | 212 | 283 |
| Kai Nargolwala ¹ | 173 | 155 | – | – | 173 | 221 | 155 | 207 |
| Anthony Nightingale | 174 | 168 | – | – | 174 | 222 | 168 | 224 |
| Philip Remnant | 222 | 216 | – | – | 222 | 283 | 216 | 288 |
| Alice Schroeder | 158 | 150 | – | – | 158 | 202 | 150 | 200 |
| Lord Turner ² | 59 | 155 | – | – | 59 | 75 | 155 | 207 |
| Thomas Watjen | 173 | 131 | – | – | 173 | 221 | 131 | 175 |
| Fields Wicker-Miurin | 128 | 41 | – | – | 128 | 163 | 41 | 55 |
| Amy Yip ³ | 43 | – | – | – | 43 | 55 | – | – |
| Total | 2,322 | 2,182 | 172 | 136 | 2,494 | 3,183 | 2,318 | 3,094 |

* Benefits include the cost of providing the use of a car and driver, medical insurance and security arrangements (including any tax thereon).

† Each remuneration element is rounded to the nearest £1,000 and totals are the sum of these rounded figures. Total remuneration is calculated using the methodology prescribed by Schedule 8 of the Companies Act. The Chairman and Non-executive Directors are not entitled to participate in annual bonus plans or long-term incentive plans.

‡ Total remuneration has been converted to US dollars using the exchange rate of 1 GBP to 1.2765 USD for the 2019 single figure calculations and 1 GBP to 1.3352 USD for the 2018 single figure calculations.

Notes

¹ In 2019 Kai Nargolwala also received an annual fee of £250,000 in respect of his non-executive chairmanship of Prudential Corporation Asia Limited.

² Lord Turner stepped down from the Board on 16 May 2019.

³ Amy Yip joined the Board and the Remuneration Committee on 2 September 2019.

Statement of Directors' shareholdings

The interests of Directors in ordinary shares of the Company are set out below. 'Beneficial interest' includes shares owned outright, shares acquired under the Share Incentive Plan (SIP) and deferred annual incentive awards, detailed in the 'Supplementary information' section. It is only these shares that count towards the share ownership guidelines.

| | 1 January 2019 (or on date of appointment) | During 2019 | | 31 December 2019 (or on date of retirement) | | | Share ownership guidelines | |
|------------------------------------|--|---------------------------------|---------------------------------|---|---|-----------------------------|--|--|
| | Total beneficial interest (number of shares) | Number of shares acquired | Number of shares disposed | Total beneficial interest* (number of shares) | Number of shares subject to performance conditions† | Total interest in shares | Share ownership guidelines‡ (% of salary/fee) | Beneficial interest as a percentage of basic salary/ basic fees§ |

| Fields Wicker-Miurin | 1,000 | 3,500 | – | 4,500 | – | 4,500 | 100% | 67% |
| Amy Yip ⁸ | – | – | – | – | – | – | 100% | 0% |

* There were no changes of Directors' interests in ordinary shares between 31 December 2019 and 10 March 2020 with the exception of the UK based Executive Directors due to their participation in the monthly Share Incentive Plan (SIP). Mark FitzPatrick acquired a further 42 shares in the SIP and Mike Wells acquired a further 43 shares in the SIP during this period.

† Further information on share awards subject to performance conditions are detailed in the 'Share-based long-term incentive awards' section of the Supplementary information.

‡ Holding requirement of the Articles of Association (2,500 ordinary shares) must be obtained within one year of appointment to the Board. The increased guidelines for Executive Directors were introduced with effect from January 2013 and increased again in 2017. Executive Directors normally have 5 years from this date (or date of joining or role change, if later) to reach the enhanced guideline. The guideline for Non-executive Directors was introduced on 1 July 2011. Non-executive Directors normally have 3 years from their date of joining to reach the guideline. During 2019, the periods available to reach the guidelines for Executive Directors and Non-executive Directors were revised to recognise that shares they beneficially held in M&G post demerger no longer counted towards the guideline. Directors are expected to rebuild the value of their shareholding in line with the share ownership guidelines within a reasonable timeframe.

§ Based on the average closing price for the six months to 31 December 2019 £14.68.

The Company and its Directors, Chief Executives and shareholders have been granted a partial exemption from the disclosure requirements under Part XV of the Securities and Futures Ordinance (SFO). As a result of this exemption, Directors, Chief Executives and shareholders do not have an obligation under the SFO to notify the Company of shareholding interests, and the Company is not required to maintain a register of Directors' and Chief Executives' interests under section 352 of the SFO, nor a register of interests of substantial shareholders under section 336 of the SFO. The Company is, however, required to file with the Stock Exchange of Hong Kong Limited any disclosure of interests notified to it in the United Kingdom.

Notes

- Michael Falcon was appointed to the Board on 7 January 2019. He stepped down from the Board on 16 May 2019. Total interest in shares is shown at the date he stepped down from the Board. For the 16 May 2019 figure, Michael Falcon's beneficial interest in shares is made up of 25,994 ADRs (representing 51,988 ordinary shares).
- John Foley stepped down from the Board on 16 May 2019. Total interest in shares is shown at this date.
- Nic Nicandrou stepped down from the Board on 16 May 2019. Total interest in shares is shown at this date.
- For the 1 January 2019 figure, Mike Wells's beneficial interest in shares is made up of 297,320 ADRs (representing 594,640 ordinary shares) and 217,612 ordinary shares. For the 31 December 2019 figure, his beneficial interest in shares is made up of 297,320 ADRs (representing 594,640 ordinary shares) and 381,632 ordinary shares.
- For the 1 January 2019 figure, Alice Schroeder's beneficial interest in shares is made up of 7,250 ADRs (representing 14,500 ordinary shares). For the 31 December 2019 figure, the beneficial interest in shares is made up of 7,250 ADRs (representing 14,500 ordinary shares).
- Lord Turner stepped down from the Board on 16 May 2019. Total interest in shares is shown at this date.
- For the 1 January 2019 figure, Thomas Watjen's beneficial interest in shares is made up of 5,170 ADRs (representing 10,340 ordinary shares). For the 31 December 2019 figure, the beneficial interest in shares is made up of 5,170 ADRs (representing 10,340 ordinary shares).
- Amy Yip was appointed to the Board on 2 September 2019.

The bar chart below illustrates the Executive Directors' shareholding as a percentage of base salary versus the share ownership guideline.

Outstanding share options

The following table sets out the share options held by the Executive Directors in the UK Savings-Related Share Option Scheme (SAYE) as at the end of the period. No other directors participated in any other option scheme.

| | Date of grant | Exercise price (pence) | Market price at 31 Dec 2019 (pence) | Exercise period | | Number of options | | | | | | |
|------------------|---------------|------------------------|-------------------------------------|-----------------|-----------|---------------------|---------|-----------|-----------|-----------|--------|---------------|
| | | | | Beginning | End | Beginning of period | Granted | Exercised | Cancelled | Forfeited | Lapsed | End of period |
| Mark FitzPatrick | 21 Sep 17 | 1455 | 1449 | 01 Dec 22 | 31 May 23 | 2,061 | – | – | – | – | – | 2,061 |
| James Turner | 21 Sep 17 | 1455 | 1449 | 01 Jan 21 | 30 Jun 21 | 1,237 | – | – | – | – | – | 1,237 |

Notes

- 1 No Directors exercised SAYE options in 2019.
- 2 No price was paid for the award of any option.
- 3 The highest and lowest closing share prices during 2019 were £17.90 and £12.80 respectively.
- 4 All exercise prices are shown to the nearest pence.

Directors' terms of employment and external appointments

Details of the service contracts of each Executive Director are outlined in the table below. The Directors' remuneration policy contains further details of the terms included in Executive Director service contracts. Subject to the Group Chief Executive's or the Chairman's approval, Executive Directors are able to accept external appointments as non-executive directors of other organisations. Fees payable are retained by the Executive Directors.

| | Service contracts | | | External appointment | |
|----------------------------|-------------------|------------------------------|--------------------------------|----------------------------------|--|
| | Date of contract | Notice period to the Company | Notice period from the Company | External appointment during 2019 | Fee received in the period the Executive Director was a Group Director |
| Executive Directors | | | | | |
| Michael Falcon | 11 October 2018 | 12 months | 12 months | – | – |
| Mark FitzPatrick | 17 May 2017 | 12 months | 12 months | – | – |
| John Foley | 8 December 2010 | 12 months | 12 months | – | – |
| Nic Nicandrou | 27 April 2009 | 12 months | 12 months | – | – |
| James Turner | 1 March 2018 | 12 months | 12 months | Yes | £60,000 |
| Mike Wells | 21 May 2015 | 12 months | 12 months | – | – |

Directors served on the boards of educational, charitable and cultural organisations without receiving a fee for these services.

Details of changes to the Board of Directors during the year are set out in the 'Governance' report.

Letters of appointment of the Chairman and Non-executive Directors

Details of Non-executive Directors' individual appointments are outlined below. The Directors' remuneration policy contains further details on their letters of appointment.

| Chairman/Non-executive Director | Appointment by the Board | Notice period | Time on the Board at 2020 AGM |
|---------------------------------|--|---------------|-------------------------------|
| Chairman | | | |
| Paul Manduca | 15 October 2010 (Chairman from July 2012) | 12 months | 9 years 7 months |
| Non-executive Directors | | | |
| Philip Remnant | 1 January 2013 | 6 months | 7 years 4 months |
| Howard Davies | 15 October 2010 | 6 months | 9 years 7 months |
| David Law | 15 September 2015 | 6 months | 4 years 8 months |
| Kai Nargolwala | 1 January 2012 | 6 months | 8 years 4 months |
| Anthony Nightingale | 1 June 2013 | 6 months | 6 years 11 months |

Note

On 10 December 2019 and 30 January 2020 the Company announced the appointment of Non-executive Directors, Jeremy Anderson and Shriti Vadera, to the Board effective 1 January 2020 and 1 May 2020 respectively.

Recruitment and relocation arrangements

In making decisions about the remuneration arrangements for those joining the Board, the Committee worked within the current Directors' remuneration policy approved by shareholders and was mindful of:

- The skills, knowledge and experience that each new Executive Director brought to the Board;
- The need to support the relocation of executives to enable them to assume their roles; and
- Its commitment to honour legacy arrangements.

Appointing high-calibre executives to the Board and to different roles on the Board is necessary to ensure the Company is well positioned to develop and implement its strategy and deliver long-term value. As the Company operates in an international market place for talent, the best internal and external candidates are sometimes asked to move location to assume their new roles. Where this happens, the Company will offer relocation support. The support offered will depend on the circumstances of each move but may include paying for travel, shipping services, the provision of temporary accommodation and other housing benefits. Executives may receive support with the preparation of tax returns, but no current Executive Director is tax equalised.

Michael Falcon

Michael Falcon was appointed as Chairman and Chief Executive Officer, Jackson National Holdings LLC and joined the Board on 7 January 2019. Details of his remuneration arrangements on appointment, including the terms of his buy-out awards, were disclosed in the 2018 Directors' Remuneration Report.

Details of the remuneration he received during 2019 in his role as Executive Director of Prudential plc, including his buy-out award, are set out in the 2019 'single figure' table.

James Turner

James Turner relocated to Hong Kong in August 2019 in order to support our dialogue with the Hong Kong IA. Relocation support was provided in line with the current Directors' remuneration policy and included shipping of personal effects from the UK, temporary accommodation, a housing allowance for his permanent Hong Kong residence and support for visa applications and the preparation of necessary Hong Kong tax returns. Ongoing benefits will be provided in line with the local Prudential Corporation Asia policies. Since Mr Turner has moved with his school-aged child, he received education support on the same basis as other executives based in Hong Kong.

Details of the remuneration he received during 2019 in his role as Group Chief Risk and Compliance Officer, including this relocation support are set out in the 2019 'single figure' table.

Payments to past Directors and payments for loss of office

The Committee's approach when exercising its discretion under the policy is to be mindful of the particular circumstance of the departure and the contribution the individual made to the Group.

On 21 May 2019, the Company confirmed that John Foley, Chief Executive of M&G Prudential, Nic Nicandrou, Chief Executive of Prudential Corporation Asia, and Michael Falcon, Chairman and Chief Executive Officer, Jackson Holdings LLC, stepped down as members of the Prudential plc Board at the end of the Annual General Meeting on 16 May 2019 as part of our progress towards the demerger of M&G plc. They remained in their executive roles and continued to be members of the Group Executive Committee with Mr Foley leaving the Group on 21 October 2019 on the demerger of M&G plc.

The remuneration of these executives was managed in line with the currently approved Directors' remuneration policy and they have not received any loss of office payment in respect of their service as Directors.

Michael Falcon

An annual incentive award has been paid to Michael Falcon for the whole of 2019 as he remained a member of the Group Executive Committee after leaving the Board. This award was determined on performance achieved when the 2019 results were known. Sixty per cent of it was paid in cash in the usual way, and 40 per cent was deferred into Prudential ADRs (to be released in the Spring of 2023). In addition, he was eligible to receive a 10 per cent share of the Jackson bonus pool of which 40 per cent is similarly deferred. These awards continue to be subject to malus and clawback provisions.

Mr Falcon's 2019 PLTIP award will vest in line with the original vesting date, subject to the satisfaction of the original performance conditions. These awards will also continue to be subject to the original malus and clawback provisions, and awards will remain subject to a two-year holding period following the end of the three-year performance period. The terms of Mr Falcon's buy-out awards as disclosed in the 2018 Directors' remuneration report have not been changed and awards will vest in line with the original vesting schedule. The number of Prudential ADRs over which options have been granted has been adjusted in line with the approach set out in the section on 'Remuneration decisions taken in relation to the demerger'. In November 2019, Mr Falcon exercised the first tranche of this replacement award. The gross value of the award exercised (which included dividend equivalents) was \$464,198. Mr Falcon is the sole participant in this arrangement and no further awards will be made to Mr Falcon under this plan.

Details of the remuneration received during 2019 in respect of his role as an Executive Director are set out in the 2019 single figure table.

John Foley

Following his retirement from the Board on 16 May 2019, John Foley's employment with the Group ended on 21 October 2019 on the demerger of M&G plc and he continued as the Chief Executive Officer, M&G plc. The Committee determined that Mr Foley would not receive a bonus from Prudential plc for any part of the 2019 performance year. On the demerger date, Mr Foley's unvested awards under the Prudential deferred AIP and the PLTIP were cancelled by Prudential plc. These awards were converted by M&G plc into awards over M&G plc shares in line with the M&G plc Directors' remuneration policy. Further information on Mr Foley's 2019 remuneration arrangements may be found in the M&G plc 2019 Directors' remuneration report.

Nic Nicandrou

An annual incentive award has been paid to Nic Nicandrou for the whole of 2019 as he remained a member of the Group Executive Committee after leaving the Board. This award was determined on performance achieved when the 2019 results were known. Sixty per cent of it was paid in cash in the usual way, and 40 per cent was deferred into Prudential plc shares (to be released in the Spring of 2023). This award continues to be subject to malus and clawback provisions.

Details of the remuneration received during 2019 in respect of his role as an Executive Director are set out in the 2019 'single figure' table.

Mr Nicandrou's unvested awards under the Prudential deferred AIP will be released on the original timetable and remain subject to malus and clawback provisions. Outstanding long-term incentive awards will vest in line with the original vesting dates, subject to the satisfaction of the original performance conditions. The number of Prudential plc shares under award have been adjusted in line with the approach set out in the section on 'Remuneration decisions taken in relation to the demerger'. These awards will also continue to be subject to the original malus and clawback provisions, and awards will remain subject to a two-year holding period following the end of the three-year performance period.

Barry Stowe

Barry Stowe retired as Chairman and Chief Executive, NABU on 31 December 2018. He remained as an adviser to the Group until his employment ended on 31 December 2019. Mr Stowe received US\$1,466,000 in respect of salary, benefits, and pension between 1 January and 31 December 2019. As disclosed in the 2018 Directors' remuneration report, the Committee exercised its discretion in accordance with the approved Directors' remuneration policy and determined that Mr Stowe should be allowed to keep his unvested 2017 and 2018 PLTIP awards which will vest in line with the original vesting dates, subject to the satisfaction of the performance conditions under the plan rules, remain subject to malus and clawback provisions, and will be pro-rated for service to the date Mr Stowe retired from the Board to 31 December 2018. Mr Stowe was not eligible for a 2019 bonus and was not granted a 2019 PLTIP award.

As set out in the section 'Remuneration in respect of performance in 2019' the performance conditions attached to Mr Stowe's 2017 PLTIP awards were partially met and 68.75 per cent will be released in 2020. The number of Prudential plc ADRs under award have been adjusted in line with the approach set out in the section on 'Remuneration decisions taken in relation to the demerger'. The details of Mr Stowe's award are set out below:

| Award | Number of ADRs vesting ¹ | Value of ADRs vesting ² |
|-----------------|-------------------------------------|------------------------------------|
| Prudential LTIP | 62,395 | £1,777,756 |

Notes

- 1 The number of ADRs vesting include accrued dividends.
- 2 The ADR price used to calculate the value was the average ADR price for the three months up to 31 December 2019, being US\$36.37.

Tony Wilkey

Tony Wilkey stepped down from the Board on 17 July 2017 and his employment ended with the Group on 17 July 2018. As disclosed in the 2017 Directors' remuneration report, the Committee exercised its discretion in accordance with the approved Directors' remuneration policy and determined that Mr Wilkey should be allowed to keep his unvested PLTIP awards granted in 2017. This award will vest in accordance with the original timetable, subject to the original performance conditions, remain subject to malus and clawback provisions, and will be pro-rated for service. This is the last PLTIP award that will vest to Mr Wilkey.

As set out in the section 'Remuneration in respect of performance in 2019' the performance conditions attached to Mr Wilkey's 2017 PLTIP awards were partially met and 61.75 per cent will be released in 2020. The number of Prudential plc shares under award have been adjusted in line with the approach set out in the section on 'Remuneration decisions taken in relation to the demerger'. The details of Mr Wilkey's award are set out below:

| Award | Number of shares vesting ¹ | Value of shares vesting ² |
|-----------------|---------------------------------------|--------------------------------------|
| Prudential LTIP | 44,969 | £622,821 |

Notes

- 1 The number of shares vesting include accrued dividend shares.
- 2 The share price used to calculate the value was the average share price for the three months up to 31 December 2019, being £13.85.

Other Directors

A number of former Directors receive retiree medical benefits for themselves and their partner (where applicable). This is consistent with other senior members of staff employed at the same time. A de minimis threshold of £10,000 has been set by the Committee; any payments or benefits provided to a past Director above this amount will be reported.

Statement of voting at general meeting

At the 2017 Annual General Meeting, shareholders were asked to vote on the current Directors' remuneration policy and at the 2019 Annual General Meeting, shareholders were asked to vote on the 2018 Directors' remuneration report. Each of these resolutions received a significant vote in favour by shareholders and the Committee is grateful for this support and endorsement by our shareholders. The votes received were:

| Resolution | Votes for | % of votes cast | Votes against | % of votes cast | Total votes cast | Votes withheld |
|--|---------------|-----------------|---------------|-----------------|------------------|----------------|
| To approve the Directors' remuneration policy (2017 AGM) | 1,773,691,171 | 90.71 | 181,582,497 | 9.29 | 1,955,273,668 | 45,820,585 |
| To approve the Directors' remuneration report (2019 AGM) | 1,948,451,528 | 95.71 | 87,313,483 | 4.29 | 2,035,765,011 | 6,608,034 |

Statement of implementation in 2020

Base salary

Executive Directors' remuneration packages were reviewed in 2019 with changes effective from 1 January 2020. When the Committee took these decisions, it considered the salary increases awarded to other employees in 2019 and the expected increases in 2020. The external market reference points used to provide context to the Committee were similar to those used for 2019 salaries.

All Executive Directors received a salary increase of 2 per cent. The 2020 salary increase budgets for other employees across the Group's business units were between 2.5 per cent and 5.1 per cent.

Pension entitlements from 2020

As set out in the Annual statement from the Chairman of the Remuneration Committee, externally or internally-recruited Executive Directors appointed on or after the date of the 2020 AGM will be offered pension benefits of 13 per cent of salary, aligned with the employer pension contribution available to the UK workforce and broadly reflecting the pension benefits for the workforce in locations across Asia and the US. The Committee intends to reduce incumbent Executive Directors' pension benefits from 25 per cent to 20 per cent of salary on the following basis:

- From 14 May 2020 (the effective date of the new policy), incumbent Executive Directors' pension benefits will be reduced to 22.5 per cent of base salary; and
- From 14 May 2021, incumbent Executive Directors' pension benefits will be reduced to 20 per cent of base salary.

In addition, statutory contributions will continue to be made into mandatory pension arrangements in the country in which the Executive Directors are based, in line with the local requirements.

Annual bonus

No changes have been made to the bonus opportunities for Executive Directors for 2020.

In recent years, bonuses for the Group Chief Risk and Compliance Officer have been based entirely on a combination of personal and functional measures, an approach aligned with Solvency II remuneration requirements under the PRA. In 2020 the Committee has introduced a financial element in the bonus for the Group Chief Risk and Compliance Officer. The 2020 bonus for this role will be based on 40 per cent Group financial measures, 40 per cent functional objectives and 20 per cent personal measures. This is in line with the current draft of the Hong Kong IA's guideline on the remuneration of key persons in control functions. It reflects the Committee's view that it is important that this role and other control function staff continue to demonstrate long-term commercial sensitivity and are rewarded in a way which allows the Company to recruit the very best talent to these roles.

AIP payments for all Executive Directors have been previously subject to meeting Solvency II minimum capital thresholds which were aligned to the Group and business unit risk framework and appetites (as adjusted for any Group Risk Committee and/or business unit risk committees approved counter-cyclical buffers). This will be replaced with LCSM minimum capital thresholds aligned to the Group and business unit framework and appetites. No other changes have been made to the bonus performance measures and weightings for the other Executive Directors.

2020 share-based long-term incentive awards

Award levels

No change to the PLTIP award levels of the Group Chief Executive of 400 per cent of base salary or the Group Chief Risk and Compliance Officer of 250 per cent of base salary are proposed. In recognition of Mark FitzPatrick's expanded role and responsibilities in 2019, together with the Board's view of his strong performance, potential and criticality to the Group, the Committee intends to increase the value of his long-term incentive award within the current policy limit for 2020 to 300 per cent of base salary (from 250 per cent at present). This approach is also considered to support the promotion of stewardship and long-term focus.

Performance conditions

The post-demerger Prudential Group is focused on capturing the structural growth opportunity across the Asian and African markets under Prudential Corporation Asia, its Asian business unit. In the US, its business unit, Jackson, will seek to benefit from the growing retirement market and to provide enhanced cash generation to the post-demerger Prudential Group.

The Executive Directors' long-term incentive awards will continue to be made under the PLTIP. The Company will look to build long-term shareholder value by continuing to focus on achieving sustainable, profitable growth and retaining a resilient balance sheet, with a disciplined approach to active capital allocation. As set out in the 2018 Directors' remuneration report and following our conversations with investors last year, the vesting of the major part of 2019 awards under the PLTIP is dependent on the achievement of a relative TSR target. As also indicated in last year's report, this was appropriate in the context of the demerger and the Committee intended to develop performance measures for 2020 and subsequent years in light of the evolving priorities of the business.

To this end, the Committee will introduce a new return on equity performance measure, operating return on average shareholders' funds, for the 2020 PLTIP awards, incentivising the efficient use of capital as well as shareholder returns. Using this metric alongside TSR and a sustainability scorecard will ensure that the full value of long-term incentive awards is attained only where capital is effectively deployed in a way that creates shareholder returns superior to those delivered by peers while conduct and diversity expectations are met. The weighting of measures for the 2020 PLTIP awards will be as follows:

- Relative TSR (50 per cent of award);
- A return on equity measure (30 per cent of award); and
- Sustainability scorecard of strategic measures (20 per cent of award).

The proportion of 2020 long-term incentive awards which will vest for threshold performance will remain at 20 per cent. This level of threshold vesting is formalised in the proposed 2020 Directors' remuneration policy.

Since these measures are in line with the remuneration requirements for control staff under the draft Hong Kong IA Corporate Governance Guideline, the weightings of the Group Chief Risk and Compliance Officer's PLTIP performance targets will be the same as that of the other Executive Directors.

Relative TSR

Under the Group TSR measure, 20 per cent of the award will vest for TSR at the median of the peer group, increasing to full vesting for performance within the upper quartile. TSR is measured on a local currency basis since this has the benefit of simplicity and directness of comparison. A comprehensive review of the TSR peer group which anticipated the Group's post-demerger footprint was undertaken for the 2019 PLTIP awards. The companies were selected based on organisational size, product mix and geographical footprint. The peer group for 2020 PLTIP awards is the same as that used for 2019 and is set out below:

| | | | |
|-------------------|---------------------|----------------------|-------------------------|
| Aegon | AIA | AXA Equitable | China Taiping Insurance |
| Great Eastern | Lincoln National | Manulife | MetLife |
| Ping An Insurance | Principal Financial | Prudential Financial | Sun Life Financial |

Operating return on average shareholders' funds

Operating return on average shareholders' funds is calculated as adjusted IFRS operating profit based on longer-term investment returns ('adjusted operating profit') after tax and net of non-controlling interests divided by average shareholders' funds, is assessed at Group level. 20 per cent of the award will vest for achieving the threshold level of performance of 16.7 per cent, increasing to full vesting for reaching the stretch level of at least 22.9 per cent.

Sustainability scorecard

Under the 2020 sustainability scorecard, performance will be assessed for each of the four measures, at the end of the three-year performance period. Performance will be assessed on a sliding scale. Each of the measures has equal weighting and the 2020 measures are set out below:

| | |
|---------------------------|--|
| Capital measure: | Cumulative three-year ECap Group operating capital generation relative to plan, less cost of capital (based on the capital position at the start of the performance period). |
| Vesting basis: | 20 per cent vesting for achieving Plan, increasing to full vesting for performance above stretch level. The plan figure for this metric will be published in the Annual Report for the final year of the performance period. |
| Capital measure: | Cumulative three-year LCSM operating capital generation relative to plan |
| Vesting basis: | 20 per cent vesting for achieving Plan, increasing to full vesting for performance above stretch level. The plan figure for this metric will be published in the Annual Report for the final year of the performance period. |
| Conduct measure: | Through strong risk management action, ensure there are no significant conduct/culture/governance issues that result in significant capital add-ons or material fines. |
| Vesting basis: | 20 per cent vesting for partial achievement of the Group's expectations, increasing to full vesting for achieving the Group's expectations. |
| Diversity measure: | Percentage of the Leadership Team that is female at the end of 2022. The target for this metric will be based on progress towards the goal that the Company set when it signed the Women in Finance Charter, specifically that 30 per cent of our Leadership Team will be female by the end of 2021. |
| Vesting basis: | 20 per cent vests for meeting the threshold of at least 27 per cent of our Leadership Team being female at the end of 2022, increasing to full vesting for reaching the stretch level of at least 33 per cent being female at that date. |

Changes in line with the 2020 Directors' remuneration policy

Post-directorship share ownership

The Committee is building on the share ownership guidelines which apply to executives during their employment by introducing a formal, post-employment shareholding guideline. Executive Directors will, on leaving the Board, be required to maintain their in-employment share ownership guideline for a period of two years or their actual shareholding on the date of their retirement from the Board if lower. This obligation will be implemented by requiring retiring Executive Directors to obtain clearance to deal in the Company's shares during the two years following their retirement in the same way as they must during the time on the Board. No changes have been made to Executive Directors' in-employment share ownership guidelines.

Chairman and Non-executive Directors

Fees for the Chairman and Non-executive Directors were reviewed in 2019 with changes effective from 1 July 2019, as set out under the 'Chairman and Non-executive Director remuneration in 2019' section. The next review will be effective 1 July 2020. Fees for the Chairman will be paid in US dollars from May 2020.

New Directors' remuneration policy

This section sets out the revised Directors' remuneration policy which will be put forward to shareholders for a binding vote at the 2020 AGM on 14 May 2020. If approved this policy will apply immediately for three years following the AGM. This policy has evolved from the current policy which was approved at the AGM held on 18 May 2017 and has applied from that date.

As discussed in the Annual statement from the Chairman of the Remuneration Committee, the current policy has operated as intended. Full details of the existing policy can be found on pages 135 to 150 of the 2016 Annual Report or on our website at www.prudentialplc.com/investors/governance-and-policies/directors-remuneration-policy

During 2019, the Committee reviewed the policy, taking into account the demerger, the views of our shareholders, the new UK Corporate Governance Code, evolving market practice and the broader regulatory and competitive environment. It also considered workforce remuneration and related policies in the business units across the Group, including how the Company's incentive arrangements are aligned with culture. Input was sought from the management team, while ensuring that conflicts of interest were suitably mitigated.

In reviewing the policy, alternative remuneration structures were considered. Following careful consideration, the Committee decided to retain the key features of the current remuneration model since it is appropriate for a growth company, is well understood and drives the right behaviour and outcomes. However, as described in the Chairman's letter, the Committee felt that it was important to make changes to specific components in order to:

- Align reward with the strategic priorities and capital framework of the post-demerger business;
- Strengthen the community of interest between executives and other shareholders; and
- Foster alignment between the remuneration of executives and the wider workforce.

Fixed pay policy for Executive Directors

| <i>Component and purpose</i> | <i>Operation</i> | <i>Opportunity</i> |
|--|--|--|
| <p>Base salary Paying salaries at a competitive level enables the Company to recruit and retain key executives.</p> | <p>Prudential's policy is to offer all Executive Directors base salaries that are competitive within their local market.</p> <p>The Committee reviews salaries annually with changes normally effective from 1 January. In determining base salary for each executive, the Committee considers factors such as:</p> <ul style="list-style-type: none"> — Salary increases for other employees across the Group; — The performance and experience of the executive; — The size and scope of the role; — Group financial performance; — Internal relativities; and — External factors such as economic conditions and market data, taking into account the geographies and markets in which the Company operates. <p>While salaries are typically paid in the local currency of the country where the executive is based, the Committee may determine that the salary of an executive is set or paid in an alternative currency.</p> | <p>Annual salary increases for Executive Directors will normally be in line with the increases for other employees unless there is a change in role or responsibility.</p> |

| <i>Component and purpose</i> | <i>Operation</i> | <i>Opportunity</i> |
|--|---|--|
| <p>Benefits Provided to executives to assist them in carrying out their duties efficiently.</p> <p>Expatriate and relocation benefits allow Prudential to attract high calibre executives in the international talent market and to deploy them appropriately within the Group.</p> | <p>Prudential's policy is for the Committee to have the discretion to offer Executive Directors benefits which reflect their individual circumstances and are competitive within their local market, including:</p> <ul style="list-style-type: none"> — Health and wellness benefits; — Protection and security benefits; — Transport benefits; — Family and education benefits; — All employee share plans and savings plans; — Relocation and expatriate benefits; and — Reimbursed business expenses (including any tax liability) incurred when travelling overseas in performance of duties. | <p>The maximum paid will be the cost to the Company of providing these benefits. The cost of these benefits may vary from year to year but the Committee is mindful of achieving the best value from providers.</p> |
| <p>Provision for an income in retirement Pension benefits provide executives with opportunities to save for an income in retirement.</p> | <p>Prudential's policy is to offer all Executive Directors a pension provision that is competitive and appropriate in the context of pension benefits for the wider workforce.</p> <p>Executives have the option to:</p> <ul style="list-style-type: none"> — Receive payments into a defined contribution scheme; and/or — Take a cash supplement in lieu of contributions. <p>In addition, Executive Directors may receive statutory contributions to mandatory pension arrangements in the country in which they are based in line with local requirements.</p> | <p>New Executive Directors, either externally recruited or promoted from within the Company, will be entitled to receive pension contributions or a cash supplement (or a combination of the two) of 13 per cent of base salary.</p> <p>Current Executive Directors are entitled to receive pension contributions or a cash supplement (or combination of the two) of 22.5 per cent of base salary from the date of this Policy (a reduction from 25 per cent of base salary in the previous Policy) and 20 per cent of base salary from 14 May 2021.</p> <p>In addition, statutory contributions will be made to mandatory pension arrangements in the country in which the Executive Directors are based, in line with the local requirements.</p> |

Annual bonus policy for Executive Directors

Annual bonus

Payments under the Annual Incentive Plan (AIP) incentivise the delivery of stretching financial, functional and/or personal objectives which are drawn from the annual business plan.

Operation

Currently all Executive Directors participate in the AIP.

The AIP payments for all Executive Directors are subject to the achievement of financial, functional and/or personal objectives.

Form and timing of payment

All Executive Directors are required to defer a percentage of their total annual bonus into Prudential shares. Currently all Executive Directors defer 40 per cent of their bonus for three years, with the remaining proportion of their bonus paid in cash following the end of the performance year.

The release of deferred bonus awards is not subject to any further performance conditions. Deferred bonus awards carry the right to accumulate an amount to reflect the dividends paid on the released shares during the deferral period. These dividend equivalents will normally be settled in shares, but there is the flexibility to deliver them in cash.

The Committee has the authority to apply clawback and/or a malus adjustment to all, or a portion of, the cash and deferred award elements of the bonus. More details about clawback and malus are set out below. See the 'Policy on corporate transactions' section for details of the Committee's powers in the case of corporate transactions.

| | |
|--|---|
| Determining annual bonus awards | <p>In assessing financial performance, the Committee determines the AIP award for each Executive Director with reference to the performance achieved against approved performance ranges.</p> <p>In assessing performance, the Committee will take into account the personal performance of the Executive Director and the Group's risk framework and appetite, as well as other relevant factors. To assist them in their assessment the Committee considers advice from the Group Risk Committee on adherence to the Group's risk framework and appetite and to all relevant conduct standards.</p> <p>The Committee may adjust the formulaic outcome based on the performance targets to reflect the underlying performance of the Company by applying discretion within the limits of the Policy. The Committee will disclose in the next Directors' Remuneration Report where discretion is used.</p> |
| Opportunity | <p>The maximum AIP opportunity is up to 200 per cent of salary for Executive Directors. Annual awards are disclosed in the relevant Annual report on remuneration.</p> |
| Performance measures | <p>The Committee has the discretion, for each Executive Director, to determine the specific performance conditions attached to each AIP cycle and to set annual targets for these measures with reference to the business plans approved by the Board. The financial measures used for the AIP will typically include profit and cash flow targets and payments depend on the achievement of minimum capital thresholds and operation within the Board approved risk framework and appetite. For the measures to be used in 2020, please refer to the Annual report on remuneration.</p> <p>No bonus is payable under the AIP for performance at or below the threshold level, increasing to 100 per cent for achieving or exceeding the maximum level.</p> <p>The weightings of the performance measures for 2020 for all Executive Directors, other than the Group Chief Risk and Compliance Officer, are 80 per cent Group financial measures and 20 per cent personal measures. For the Group Chief Risk and Compliance Officer, the weightings of performance measures for 2020 are 40 per cent Group financial measures, 40 per cent functional objectives and 20 per cent personal measures.</p> <p>The Committee retains the discretion to adjust and/or set different performance measures and/or targets if events occur (such as a change in strategy, a material acquisition and/or divestment of a Group business, a change in share capital of the Company, a change in the capital framework, or the requirements of the Company's regulators or a change in prevailing market conditions) which cause the Committee to determine that the measures and/or targets are no longer appropriate and that amendment is required so that they achieve their original purpose (or comply with such regulatory requirements).</p> |
| Amendments | <p>The Committee may make amendments to the rules of the deferred bonus plan which it considers appropriate (such as amendments which benefit the administration of the plan) but it will not make any amendments which are incompatible with the approved Directors' remuneration policy.</p> |
| Committee discretions | <p>In determining awards under the AIP, the Committee retains the discretion to adjust the formulaic outcome against any or all measures if it considers that the outcome does not reflect the underlying financial or non-financial performance of the participant or any member of the Group over the performance period and/or there exists any other reason why an adjustment is appropriate, taking into account such factors as the Committee considers relevant.</p> |

Long-term incentive policy for Executive Directors

Prudential Long Term Incentive Plan (PLTIP)

The Prudential Long Term Incentive Plan is designed to incentivise the delivery of:

- Longer-term business plans;
- Sustainable long-term returns for shareholders; and
- Group strategic priorities, such as disciplined risk and capital management.

| | | | | | | | |
|---|---|-----------------------|--------------|---|--------------|---|--------------|
| Operation | <p>Currently all Executive Directors participate in the PLTIP.</p> <p>Prudential's policy is that Executive Directors may receive long-term incentive awards with full vesting only achieved if the Company meets stretching performance targets.</p> <p>The rules of the PLTIP were approved by shareholders in 2013. Subsequent to this, minor amendments have been made to the rules to incorporate clawback provisions, provide for a holding period and to ensure participants were no better or no worse off as a result of the demerger of M&G plc from Prudential plc.</p> | | | | | | |
| Granting awards | <p>The PLTIP is a conditional share plan: the shares which are awarded will ordinarily vest after three years to the extent that performance conditions have been met. If performance conditions are not achieved, the unvested portion of any award lapses and performance cannot be retested.</p> <p>The PLTIP has a three-year performance period (although the Committee has the discretion to apply shorter or longer performance periods when the PLTIP is used for buy-out awards on recruitment – see the 'Approach to recruitment remuneration' section).</p> | | | | | | |
| Holding period | <p>Awards made under this Policy are normally subject to a holding period which ends on the fifth anniversary of the award (except for buyout awards made under the PLTIP or, for example, in the case of the death of an executive).</p> <p>The Company may sell such number of shares as is required to satisfy any tax liability that arises on vesting. The balance of shares will be subject to the holding period.</p> | | | | | | |
| Determining the release of the award | <p>The Committee has the authority to apply clawback and/or a malus adjustment to all, or a portion of, a PLTIP award. More details about clawback and malus are set out below.</p> <p>Awards carry the right to accumulate an amount to reflect the dividends paid on the released shares, during the period between the awards being granted and the award vesting. Dividend equivalents will normally be settled in shares, but there is the flexibility to deliver them in cash.</p> | | | | | | |
| Opportunity | <p>The value of shares awarded under the PLTIP (in any given financial year) may not exceed 550 per cent of the executive's annual basic salary.</p> <p>Awards made in a particular year are usually significantly below this limit.</p> <p>In 2020, the Committee intends to make awards at the following levels under the PLTIP (as a percentage of base salary):</p> <table border="0"> <tr> <td>Group Chief Executive</td> <td style="text-align: right;">400 per cent</td> </tr> <tr> <td>Group Chief Financial Officer and Chief Operating Officer</td> <td style="text-align: right;">300 per cent</td> </tr> <tr> <td>Group Chief Risk and Compliance Officer</td> <td style="text-align: right;">250 per cent</td> </tr> </table> <p>The Committee would consult with major shareholders before making any increase to current award levels. Award levels are disclosed in the relevant Annual report on remuneration.</p> <p>The maximum vesting under the PLTIP is 100 per cent of the original share award plus accrued dividend equivalents.</p> | Group Chief Executive | 400 per cent | Group Chief Financial Officer and Chief Operating Officer | 300 per cent | Group Chief Risk and Compliance Officer | 250 per cent |
| Group Chief Executive | 400 per cent | | | | | | |
| Group Chief Financial Officer and Chief Operating Officer | 300 per cent | | | | | | |
| Group Chief Risk and Compliance Officer | 250 per cent | | | | | | |

| | |
|------------------------------|--|
| Performance measures | <p>The performance conditions attached to PLTIP 2020 awards for all Executive Directors are:</p> <ul style="list-style-type: none"> — Relative TSR (50 per cent of award); — A Return on Equity measure (30 per cent of award); and — Sustainability scorecard measures (20 per cent of award). <p>Using a Return on Equity metric alongside TSR and a sustainability scorecard will ensure that the full value of long-term incentive awards is attained only where capital is effectively created and deployed in a way which creates shareholder returns superior to those delivered by peers while conduct and diversity expectations are met.</p> <p>The Committee may decide to attach different performance conditions and/or change the conditions' weighting for future PLTIP awards. The performance conditions attached to each award will be disclosed in the relevant Annual report on remuneration.</p> <p>Relative TSR is measured over three years. 20 per cent of this portion of each award will vest for achieving the threshold level of median, increasing to full vesting for meeting the stretch level of upper quartile. TSR is measured against a peer group of international insurers similar to Prudential in size, geographic footprint and products. The peer group for each award is disclosed in the relevant Annual report on remuneration.</p> <p>Three year cumulative Return on Equity, defined as Operating return on average shareholder funds, calculated as adjusted IFRS operating profit based on longer-term investment returns ('adjusted operating profit') after tax and net of non-controlling interests divided by average shareholder funds, is assessed at Group level. Threshold and maximum achievement levels will be set at the beginning of the performance periods in line with the three-year business plan. 20 per cent of this portion of the award will vest for achieving threshold performance increasing to full vesting for meeting stretch targets.</p> <p>Performance against the measures in the scorecard of sustainability measures is assessed at the end of the three-year performance period. For the 2020 awards these measures will be equally weighted. 20 per cent of this portion of the award will vest for achieving threshold performance increasing to full vesting for meeting stretch targets. The scorecard measures for each award are disclosed in the relevant Annual report on remuneration for the year of grant.</p> <p>The Committee also considers advice from the Group Risk Committee on whether results were achieved within the Group's and business units' risk framework and appetite and to all relevant conduct standards.</p> |
| Committee discretions | <p>For any award made under the PLTIP to vest, the Committee must be satisfied that the quality of the Company's underlying financial performance justifies the level of reward delivered at the end of the performance period. The Committee receives data about factors such as risk management and the cost of capital to support their decision. The Committee has the discretion to alter or disapply the holding period if it believes that it is appropriate. See the 'Policy on corporate transactions' section for details of the Committee's powers in the case of corporate transactions.</p> <p>The Committee retains the ability to amend the performance conditions and/or targets attached to an award and/or set different performance measures (or to revise the weighting of measures) which apply to new or outstanding long-term incentive awards if:</p> <ul style="list-style-type: none"> — events occur which cause the Committee to determine that circumstances relevant to the performance conditions have changed such that the measures described in this section are no longer appropriate; and — that amendment is required so that they achieve their original purpose, provided the Committee is satisfied that the amended measure and/or target range will be a fairer measure of performance and no more or less demanding than the original condition. <p>Examples of such events could include a change in strategy, a material acquisition and/or divestment of a Group business or a change in the share capital of the Company, a change in the requirements of the Company's regulators or a change in prevailing market conditions. The Committee would seek to consult with major shareholders before revising performance conditions on outstanding awards under the PLTIP.</p> <p>It is the intention of the Committee that PLTIP awards should normally reflect the outcomes of performance measures set. However, the Committee may, in its discretion, adjust (including by reducing to nil) the formulaic outcome under the PLTIP if it considers that:</p> <ol style="list-style-type: none"> (i) the extent to which any performance condition has been met does not reflect the underlying financial or non-financial performance of the participant or any member of the Group over the performance period; or (ii) there exists any other reason why an adjustment is appropriate, taking into account such factors as the Committee considers relevant, including the context of circumstances that were unexpected or unforeseen at the date of grant. |
| Amendments | <p>The Committee may make amendments to the rules of the Plan which are minor and benefit the administration of the Plan, which take account of any changes in legislation, and/or which obtain or maintain favourable tax, exchange control or regulatory treatment. Otherwise no amendments may be made to certain key provisions of the PLTIP to the advantage of participants without prior shareholder approval.</p> |

Share ownership guidelines for Executive Directors

It is imperative that the Company's remuneration arrangements align the interests of executives and other shareholders. The following reinforces this alignment.

In-employment guidelines

Under the Articles of Association, all Executive Directors are required to hold at least 2,500 shares and have one year, from their date of appointment to the Board, to acquire these.

The share ownership guidelines for the Executive Directors during their employment are:

- 400 per cent of salary for the Group Chief Executive;
- 250 per cent of salary for the Group Chief Financial Officer and Chief Operating Officer; and
- 250 per cent of salary for the Group Chief Risk and Compliance Officer.

Executives normally have five years from the later of the date of their appointment or promotion, or the date of an increase in these guidelines, to build this level of ownership. Shares earned and deferred under the AIP are included in calculating the Executive Director's shareholding for these purposes, as are shares held by members of an Executive Director's household. Unvested share awards under long-term incentive plans are not included but vested share awards under long-term incentive plans which are subject to the holding period are included.

Progress against the share ownership guidelines is detailed in the 'Statement of Directors' shareholdings' section of the Annual report on remuneration.

Should an Executive Director not meet the share ownership guidelines, the Remuneration Committee retains the discretion to determine how this should be addressed, taking account all of the prevailing circumstances. In the absence of mitigating circumstances, if an Executive Director fails to comply with the share ownership guideline in the required timeframe and has not (in the opinion of the Remuneration Committee) taken reasonable steps to achieve compliance, despite encouragement to do so, then the Remuneration Committee may take steps including preventing the individual from selling shares/ADRs or mandating the use of any cash bonuses to buy Prudential plc shares/ADRs.

Post Directorship guidelines

When an Executive Director leaves the Board, they will be required to hold the lower of their actual shareholding on the date of their retirement from the Board and their in-employment share ownership guideline for a period of two years.

The Committee has the discretion to disapply or reduce this requirement in extenuating circumstances, for example if the Executive Director takes up a role with a Regulator or for compassionate reasons (such as genuine financial hardship or on death).

Malus and clawback policy

As detailed in the policy table, the Committee may apply clawback and/or a malus adjustment to variable pay in certain circumstances as set out below. The Committee can delay the release of awards pending the completion of an investigation which could lead to the application of malus or clawback.

| <i>Circumstances when the Committee may exercise its discretion to apply malus or clawback to an award</i> | |
|--|---|
| <p>Malus (applies in respect of any annual bonus or long-term incentive award)</p> <p>Allows unvested shares awarded under deferred bonus and LTIP plans to be forfeited or reduced in certain circumstances.</p> | <p>Where a business decision taken during the performance period by the business which the participant leads has resulted in a material breach of any law, regulation, code of practice or other instrument that applies to companies or individuals within the business.</p> <p>Where there is a materially adverse restatement of the accounts for any year during the performance period of (i) the business unit in which the participant worked at any time in that year; and/or (ii) any member of the Group which is attributable to incorrect information about the affairs of that business unit; or (iii) for awards made in 2020 or later, it becomes apparent that the calculation of payments was based on erroneous or misleading data or otherwise incorrect.</p> <p>Where an individual's personal conduct during the relevant performance period has resulted in the Company, or any member of the Group, suffering significant reputational or financial damage; the potential to cause significant reputational or financial damage; and/or the material breach of the Group's business code of conduct or law.</p> <p>Where any matter arises which the Committee believes affects or may affect the reputation of the Company or any member of the Group.</p> |
| <p>Clawback Allows cash and share awards, including shares subject to the holding period, to be recovered before or after release in certain circumstances.</p> | <p>Clawback may be applied:</p> <ul style="list-style-type: none"> — For the PLTIP, where at any time before the fifth anniversary of the award date, and — For the AIP, where at any time before the fifth anniversary of the end of the bonus performance period <p>where either (i) there is a materially adverse restatement of the Company's published accounts in respect of any financial year which (in whole or part) comprised part of the performance period; or (ii) it becomes apparent that a material breach of a law or regulation took place during the performance period which resulted in significant harm to the Company or its reputation, and the Committee considers it appropriate, taking account of the extent of the participants' responsibility for the relevant restatement or breach, that clawback be applied to the relevant participant; or (iii) for awards made in 2020 or later, it becomes apparent that the calculation of payments was based on erroneous or misleading data or otherwise incorrect.</p> <p>Where an individual's personal conduct during the relevant performance period has resulted in the Company, or any member of the Group, suffering significant reputational or financial damage; the potential to cause significant reputational or financial damage; and/or the material breach of the Group's business code of conduct or law.</p> |

Notes to the remuneration policy table for Executive Directors

Committee's judgement

The Committee is required to make judgements when assessing Company and individual performance under the Directors' remuneration policy. In addition, the Committee has discretions under the Company's share plans, for example, determining if a leaver should retain or lose their unvested awards and whether to apply malus or clawback to an award. Exercise of such discretion during the year will be reported and explained in the next Annual report on remuneration.

The Committee may approve payments or awards in excess of, in a different form to, or calculated or delivered other than as described above, where the Committee considers such changes necessary or appropriate in light of regulatory requirements. If these changes are considered by the Committee to be material, the Company will seek to consult with its major shareholders.

Determining the performance measures

The Committee selected the performance measures that currently apply to variable pay plans on the following basis:

AIP

The performance measures are selected to incentivise the delivery of the Group's business plan, specifically to ensure that financial objectives are delivered while maintaining adequate levels of capital. Executives are also rewarded for the achievement of functional and/or personal objectives. These objectives include the executive's contribution to Group strategy as a member of the Board, achievement of the Group's strategic priorities and, for the Group Chief Risk and Compliance Officer, specific goals related to the Risk and Compliance function.

PLTIP

Awards made under the PLTIP in 2020 are subject to the achievement of Return on Equity, relative TSR and a sustainability scorecard :

- Return on Equity was selected as a performance measure for the PLTIP because it is a familiar measure for investors, is comparable across the market and also aligns performance incentives to the generation of long-term shareholder value.
- Relative TSR was selected as a performance measure because it focuses on the value delivered to shareholders – aligning the long-term interests of shareholders with those of executives.
- A sustainability scorecard was selected to ensure an alignment with the Group's strategic objectives, which are approved by the Board each year, and to reflect Prudential's cultural values.

The Committee may decide to attach different performance conditions and/or change the conditions' weighting for future PLTIP awards.

Setting the performance ranges for financial targets

Where variable pay has performance conditions based on business plan measures (for example the financial metrics of the AIP and the Return on Equity element of the PLTIP) the performance ranges are set by the Committee prior to, or at the beginning of, the performance period. Performance is based on the annual and longer-term plans approved by the Board. These reflect the long-term ambitions of the Group and business units, in the context of anticipated market conditions.

For market-based performance conditions (eg relative TSR) the Committee requires that performance is in the upper quartile, relative to Prudential's peer group, for awards to vest in full.

Targets used to determine annual bonus outcomes will be disclosed in the Directors' remuneration report for the year for which the bonus is paid.

Wherever possible, the targets attached to long-term incentive awards will be disclosed prospectively at the time of the award. Where long-term incentive targets are commercially sensitive, they will be published in the Annual Report for the final year of the performance period.

Key differences between Directors' remuneration and the remuneration of the wider workforce

Across the Group, remuneration is reviewed regularly with the intention that all employees are paid appropriately in the context of their local market and given their individual skills, experience and performance. The Committee regularly receives information on workforce remuneration and related policies and takes this into account when determining Executive Director remuneration, for example it considers salary increase budgets for the workforce when determining the salaries of Executive Directors.

The remuneration principles that apply to Executive Directors are cascaded to employees as appropriate. Employees are regularly provided with an explanation of how decisions on executive pay are made and how they reflect the wider Company remuneration policy.

Legacy payments

The Committee reserves the right to make any remuneration payments and/or payments for loss of office (including exercising any discretions available to it in connection with such payments) notwithstanding that they are not in line with the policy set out above where the terms of the payment were agreed (i) before 15 May 2014 (the date the Company's first shareholder-approved Directors' remuneration policy came into effect); (ii) before this policy came into effect, provided that the terms of the payment were consistent with the shareholder-approved Directors' remuneration policy in force at the time they were agreed; or (iii) at a time when the relevant individual was not a Director of the Company and, in the opinion of the Committee, the payment was not in consideration for the individual becoming or having been a Director of the Company. For these purposes 'payments' includes the Committee satisfying awards of variable remuneration and, in relation to an award over shares, the terms of the payment are 'agreed' at the time the award is granted.

References to 'shares'

In this policy, references to shares include American Depositary Receipts (ADRs). Directors may receive awards denominated in ADRs rather than shares.

Scenarios of total remuneration

The chart below provides an illustration of the future total remuneration for each Executive Director in respect of their remuneration opportunity for 2020. Four scenarios of potential outcome are provided based on underlying assumptions shown in the notes to the chart.

The Committee is satisfied that the maximum potential remuneration of the Executive Directors is appropriate. Prudential's policy is to offer Executive Directors remuneration which reflects the performance and experience of the executive, internal relativities and Group financial and non-financial performance. In order for the maximum total remuneration to be payable:

- Financial performance must exceed the Group's stretching business plan;
- Relative TSR must be at or above the upper quartile relative to the peer group;
- The sustainability scorecard, aligned to the Group's strategic priorities, must be fully satisfied;
- Functional and personal performance objectives must be fully met; and
- Performance must be achieved within the Group's risk framework and appetite.

The fourth scenario below illustrates the maximum potential remuneration (shown in the third scenario) on the assumption that the Company's share price grows by 50 per cent over three years.

Notes

The scenarios in the chart above have been calculated on the following assumptions:

| | Minimum | In line with expectations | Maximum | Share price growth |
|---|---|--|---------------------------------------|---|
| Fixed pay | Base salary at 1 January 2020. Pension allowance for the year has been calculated at 22.5% of salary in line with this policy Estimated value of benefits based on amounts paid in 2019. James Turner is paid in HK\$ and figures have been converted to GBP for the purposes of this chart. | | | |
| Annual bonus | No bonus paid. | 50% of maximum AIP. | 100% of maximum AIP. | |
| Long-term incentives (excludes dividends) | No PLTIP vesting. | Vesting of 60% of award under PLTIP (midway between threshold and maximum) | Vesting of 100% of award under PLTIP. | Vesting of 100% of award under PLTIP plus share price growth of 50 per cent over three years. |

Approach to recruitment remuneration

The table below outlines the approach that Prudential will take when recruiting a new Executive Director. This approach would also apply to internal promotions.

The approach to recruiting a Non-executive Director or a Chairman is outlined on page 188.

| <i>Element</i> | <i>Principles</i> | <i>Potential variations</i> |
|---|--|---|
| Base pay | The salary for a new Executive Director will be set using the approach set out in the fixed pay policy table on page 174. | |
| Benefits and pension | The benefits for a new Executive Director will be consistent with those outlined in the fixed pay policy table. | |
| Variable remuneration opportunity | The variable remuneration opportunities for a new Executive Director would be consistent with the limits and structures outlined in the variable pay policy table. | |
| Awards and contractual rights forfeited when leaving previous employer | <p>On joining the Board from within the Group, the Committee may allow an executive to retain any outstanding deferred bonus and/or long-term incentive awards and/or other contractual arrangements that they held on their appointment. These awards (which may have been made under plans not listed in this policy) would remain subject to the original rules, performance conditions and vesting schedule applied to them when they were awarded.</p> <p>If an externally-appointed Executive Director forfeits one or more bonuses (including outstanding deferred bonuses) on leaving a previous employer, these payments or awards may be replaced in either cash, Prudential shares or options over Prudential shares with an award of an equivalent value. Replacement awards will normally be released on the same schedule as the foregone bonuses.</p> <p>If an externally-appointed Executive Director forfeits one or more long-term incentive awards on leaving a previous employer, these may be replaced with Prudential awards with an equivalent value. Replacement awards will generally be made under the terms of a long-term incentive plan approved by shareholders, and vest on the same schedule as the foregone awards. Where foregone awards were subject to performance conditions, performance conditions will normally be applied to awards replacing foregone long-term incentive awards; these will usually be the same as those applied to the long-term incentive awards made to Prudential executives in the year in which the forfeited award was made.</p> | <p>The Committee may consider compensating a newly-appointed executive for other relevant contractual rights forfeited when leaving their previous employer.</p> <p>The use of Listing Rule 9.4.2 to facilitate the recruitment of an Executive Director is now only relevant in 'unusual circumstances'. The Committee does not anticipate using this rule on a routine basis but reserves the right to do so in an exceptional circumstance. For example, this rule may be required if, for any reason, like-for-like replacement awards on recruitment could not be made under existing plans.</p> <p>This provision would only be used to compensate for remuneration forfeited on leaving a previous employer.</p> |

Policy on payment on loss of office

| <i>Element</i> | <i>Principle</i> | <i>Potential variations</i> |
|--|---|---|
| Notice periods | <p>The Company's policy is that Executive Directors' service contracts will not require the Company to give an executive more than 12 months' notice without prior shareholder approval. A shorter notice period may be offered where this is in line with market practice in an executive's location.</p> <p>The Company is required to give to, and to receive from, each of the current Executive Directors 12 months' notice of termination. An Executive Director whose contract is terminated would be entitled to 12 months' salary and benefits in respect of their notice period. The payment of the salary and benefits would either be phased over the notice period or, alternatively, a payment in lieu of notice may be made.</p> <p>In agreeing the terms of departure for any Executive Director, other than on death or disablement, the Company will have regard to the need to mitigate the costs for the Company, which would be reduced or cease if departing Executives secure alternative paid employment during the notice period.</p> | <p>If an Executive Director is dismissed for cause their contract would be terminated with immediate effect and they would not receive any payments in relation to their notice period.</p> <p>Should an executive die, their estate would not be entitled to receive payments and benefits in respect of their notice period – provisions are made under the Company's life assurance scheme to provide for this circumstance.</p> <p>Should an Executive Director step down from the Board but remain employed by the Group, they would not receive any payment in lieu of notice in respect of their service as a Director.</p> |
| Outstanding deferred bonus awards | <p>The treatment of outstanding deferred bonuses will be decided by the Committee taking into account the circumstances of the departure including the performance of the Executive Director.</p> <p>Deferred bonus awards are normally retained by participants leaving the Company. Awards will vest on the original timetable and will not normally be released early on termination.</p> <p>Prior to release, awards remain subject to the malus terms originally applied to them. The clawback provisions will continue to apply.</p> | <p>Any Executive Director dismissed for cause would forfeit all outstanding deferred bonus awards.</p> <p>Should an executive die, outstanding deferred bonus awards will be released as soon as possible after the date of death.</p> <p>Should an Executive Director step down from the Board but remain employed by the Group, they would retain any outstanding deferred bonus awards. These awards would remain subject to the original rules and vesting schedule applied to them when they were awarded.</p> |
| Unvested long-term incentive awards | <p>The treatment of unvested long-term incentives will be decided by the Committee taking into account the circumstances of the departure including the performance of the Executive Directors.</p> <p>Where an Executive Director is determined to be a good leaver, unvested long-term incentive awards will normally subsist. These awards will ordinarily be pro-rated based on time employed, will vest on the original timescale and will remain subject to the original performance conditions assessed over the entire performance period.</p> <p>Good leavers are defined as injury or disability, retirement with the approval of the employing company, the employing company ceasing to be a member of the Group, the business in which the individual is employed being transferred to a transferee that is not a member of the Group, or any other circumstances at the discretion of the Committee. Individuals who die in service will also be treated as good leavers.</p> <p>Where an individual is not determined to be a good leaver, unvested long-term incentive awards will lapse on cessation of employment.</p> <p>Prior to release, awards remain subject to the malus and clawback terms and holding periods originally applied to them.</p> | <p>Any Executive Director dismissed for cause would forfeit all unvested long-term incentive awards.</p> <p>If the Committee has judged that the departing Executive Director should retain their unvested long-term incentive awards with the expectation that:</p> <ul style="list-style-type: none"> (i) the Executive Director is retiring from their professional executive career; and/or (ii) the Executive Director will not be seeking to secure alternative employment with another organisation of comparable size as the Company or that is within the financial services sector <p>the Committee retains the power to lapse all unvested long-term incentive awards should the Committee deem that the Executive Director has secured similar paid executive employment elsewhere.</p> <p>On death, disablement and in other exceptional circumstances, the Committee has discretion to release unvested long-term incentive awards earlier than the end of the vesting period. The malus and clawback provisions will continue to apply.</p> <p>Should an Executive Director step down from the Board but remain employed by the Group, an executive would retain any outstanding long-term incentive awards which they held on their change of role. These awards would remain subject to the original rules, performance conditions and vesting schedule.</p> |

| <i>Element</i> | <i>Principle</i> | <i>Potential variations</i> |
|---|---|--|
| Vested long-term incentive awards, subject to the holding period | <p>The treatment of vested long-term incentives will be decided by the Committee taking into account the circumstances of the departure.</p> <p>Executive Directors will normally retain their vested long-term incentive awards that remain subject to the holding period. Normally these awards will be released in accordance with the original timescale and will remain subject to the holding period.</p> <p>Prior to release, awards remain subject to the malus and clawback terms originally applied to them.</p> | <p>On death, disablement and in other exceptional circumstances, the Committee has discretion to release vested long-term incentive awards earlier than the end of the holding period. The malus clawback provisions will continue to apply.</p> <p>Should an Executive Director step down from the Board but remain employed by the Group, they would retain any vested long-term incentive awards that remain subject to the holding period. These awards would remain subject to the original rules and release schedule applied to them when they were awarded (ie the holding period will continue to apply).</p> |
| Bonus for final year of service | <p>The payment of a bonus for the final year of service will be decided by the Committee giving full consideration to the circumstances of the departure including the performance of the Executive Director.</p> <p>The Committee may award a departing executive a bonus which will usually be pro-rated to reflect the portion of the final financial year in which they served which had elapsed on the last day of their employment. Any such bonus would be calculated with reference to financial, functional and/or personal performance measures in the usual way. The normal portion of any such bonus awarded must be deferred.</p> | <p>Any Executive Director dismissed for cause would not be eligible for any bonus that has not been paid.</p> <p>Should an Executive Director die whilst serving as an employee a time pro-rated bonus may be awarded. In such circumstances, deferral will not be applied and the payment will be made solely in cash.</p> <p>The Committee may decide to award an executive stepping down from the Board but remaining with the Group a bonus pro-rated to reflect the portion of the financial year which had elapsed on the date of their change of role. This would be calculated with reference to financial, functional and/or personal performance measures in the usual way. The Committee may determine that a portion of such a bonus must be deferred.</p> |
| Other payments | <p>Consistent with other employees, Executive Directors may receive payments to compensate them for the loss of employment rights on termination. Payments may include:</p> <ul style="list-style-type: none"> — A nominal amount for agreeing to non-solicitation and confidentiality clauses; — Directors and Officers insurance cover for a specified period following the executives' termination date; — Payment for outplacement services; — Reimbursement of legal fees; and — Repatriation assistance. <p>The Committee reserves the right to make additional exit payments where such payments are made in good faith:</p> <ul style="list-style-type: none"> — In discharge of an existing legal obligation (or by way of damages for breach of such an obligation); or — By way of settlement or compromise of any claim arising in connection with the termination of a Director's office or employment. | |
| Post-Directorship guidelines | <p>When an Executive Director leaves the Board they will be subject to post-Director Share ownership guidelines.</p> <p>Further details are included in the section on 'Share ownership guidelines for Executive Directors'.</p> | <p>Further details are included in the section on 'Share ownership guidelines for Executive Directors'.</p> |

Policy on corporate transactions

| | <i>Treatment</i> |
|--|--|
| Deferred Annual Incentive Plan Awards | <p>In the event of a corporate transaction (eg takeover, material merger, winding up etc), the Committee will determine whether awards will:</p> <ul style="list-style-type: none"> — Vest in part or in full; — Continue in accordance with the rules of the plan; and/or — Lapse and, in exchange, the participant will be granted an award under any other share or cash incentive plan which the Committee considers to be broadly equivalent to the award. |
| Prudential Long Term Incentive Plan | <p>In the case of a corporate transaction (eg takeover, material merger, winding up etc), the Committee will determine whether awards will:</p> <ul style="list-style-type: none"> — Be exchanged for replacement awards (either in cash or shares) of equal value unless the Committee and successor company agree that the original award will continue; or — Vest in part or in full and be released. <p>Where awards vest/ are released the Committee will have regard to the performance of the Company, the time elapsed between the date of grant and the relevant event and any other matter that the Committee considers relevant or appropriate.</p> |

Service contracts

Executive Directors' service contracts provide details of the broad types of remuneration to which they are entitled, and about the kinds of plans in which they may be invited to participate. The service contracts offer no certainty as to the value of performance-related reward and confirm that any variable payment will be at the discretion of the Company.

Copies of the service contract between the Prudential Group and each of the Executive Directors are available for inspection at Prudential's registered office during normal hours of business and will also be available at any General Meeting of the Company. Details of the duration of the Executive Directors' service contracts are set out in the 'Directors' terms of employment and external appointments' section of the Annual report on remuneration.

Statement of consideration of conditions elsewhere in the Company

Across the Group, remuneration is reviewed regularly with the intention that all employees are paid appropriately in the context of their local market and given their individual skills, experience and performance. Each business unit's salary increase budget is set with reference to local market conditions. The Committee considers salary increase budgets across the workforce when determining the salaries of Executive Directors.

Prudential does not specifically consult with employees when setting the Directors' remuneration policy: Prudential is a global organisation with employees and agents in multiple business units and geographies. We do have a mechanism for designated Non-executive Directors to gather employees' views on a range of topics and for these views to be represented to the Board. As many employees are also shareholders, they are able to participate in binding votes on the Directors' remuneration policy and annual votes on the Annual report on remuneration.

Statement of consideration of shareholder views

The Committee and the Company undertake regular consultation with key institutional investors on the Directors' remuneration policy and implementation. This engagement is led by the Committee Chairman and is an integral part of the Company's investor relations programme. The Committee is grateful to shareholders for the feedback that is provided and takes this into account when determining executive remuneration.

Remuneration policy for Non-executive Directors and the Chairman

| | <i>Fees</i> | <i>Benefits</i> | <i>Share Ownership Guidelines</i> |
|--------------------------------|---|--|---|
| Non-executive Directors | <p>All Non-executive Directors receive a basic fee for their duties as a Board member. Additional fees are paid for added responsibilities such as chairmanship and membership of committees, acting as the Senior Independent Director or designation to carry out the workforce engagement role. Fees are paid to Non-executive Directors, subject to the appropriate deductions.</p> <p>The basic and additional fees are reviewed annually by the Board with any changes effective from 1 July. In determining the level of fees the Board considers:</p> <ul style="list-style-type: none"> — The time commitment and other requirements of the role; — Group financial performance; — Salary increases for all employees; and — Market data. <p>If, in a particular year, the number of meetings is materially greater than usual, the Company may determine that the provision of additional fees in respect of that year is fair and reasonable.</p> <p>Should a new committee be formed, or the remit of an existing committee be materially expanded, the new or additional fees paid for the chairmanship or membership of the committee will be commensurate with the new or additional responsibilities and time commitment involved.</p> <p>Non-executive Directors are not eligible to participate in annual bonus plans or long-term incentive plans.</p> | <p>Non-executive Directors do not currently receive benefits or a pension allowance or participate in the Group's employee pension schemes.</p> <p>Travel and business expenses for Non-executive Directors are incurred in the normal course of business, for example, in relation to attendance at Board and Committee meetings. The costs associated with these are all met by the Company, including any tax liabilities arising on these business expenses.</p> | <p>Under the Articles of Association, all Non-executive Directors are required to hold at least 2,500 shares and have one year, from their date of appointment to the Board, to acquire these.</p> <p>It is further expected that Non-executive Directors will hold shares with a value equivalent to one times the annual basic fee (excluding additional fees for chairmanship and membership of any committees).</p> <p>Non-executive Directors will normally be expected to attain this level of share ownership within three years of their date of appointment.</p> |

NEW DIRECTORS' REMUNERATION POLICY
CONTINUED

| | <i>Fees</i> | <i>Benefits</i> | <i>Share Ownership Guidelines</i> |
|-----------------|--|---|--|
| Chairman | <p>The Chairman receives an annual fee for the performance of their role. This fee is agreed by the Committee and is paid to the Chairman in cash, subject to the appropriate deductions. On appointment, the fee may be fixed for a specified period of time. Following the fixed period (if applicable) this fee will be reviewed annually. Changes in the fee are effective from 1 July.</p> <p>In determining the level of the fee for the Chairman the Committee considers:</p> <ul style="list-style-type: none"> — The time commitment and other requirements of the role; — The performance and experience of the Chairman; — Internal relativities; — Company financial performance; and — Market data. <p>The Chairman is not eligible to participate in annual bonus plans or long-term incentive plans.</p> | <p>The Chairman may be offered benefits including:</p> <ul style="list-style-type: none"> — Health and wellness benefits; — Protection and security benefits; — Transport benefits; — Reimbursement of business expenses (and any associated tax liabilities) incurred when travelling overseas in performance of duties; and — Relocation and expatriate benefits (where appropriate). <p>The maximum paid will be the cost to the Company of providing these benefits.</p> <p>The Chairman is not eligible to receive a pension allowance or to participate in the Group's employee pension schemes.</p> | <p>Under the Articles of Association, the Chairman is required to hold at least 2,500 shares and has one year, from their date of appointment to the Board, to acquire these.</p> <p>The Chairman has a share ownership guideline. This is currently one times the annual fee and it is normally expected that this level of share ownership would be attained within five years of the date of appointment.</p> |

Recruitment of a new Chairman or Non-executive Director

The fees for a new Non-executive Director will be consistent with the current basic fee paid to other Non-executive Directors (as set out in the Annual report on remuneration for that year) and will be reflective of their additional responsibilities as chair and/or members of Board committees.

The fee for a new Chairman will be set with reference to the time commitment and other requirements of the role, the experience of the candidate, as well as internal relativities among the other Executive and Non-executive Directors. To provide context for this decision, data would be sought for suitable market reference point(s).

Notice periods – Non-executive Directors and Chairman

Non-executive Directors are appointed pursuant to letters of appointment with notice periods of six months without liability for compensation. A contractual notice period of 12 months by either party applies for the Non-executive Chairman. The Chairman would not be entitled to any payments for loss of office. Details of the individual appointments of the Chairman and Non-executive Directors are set out in the 'Letters of appointment of the Chairman and Non-executive Directors' section of the Annual report on remuneration.

For information on the terms of appointment for the Chairman and Non-executive Directors please see page 168.

Changes from 2017 policy

The proposed Directors' remuneration policy generally reflects that approved by shareholders in May 2017. The principal differences are set out below. Additionally, minor changes have been made to provide alignment with the UK Corporate Governance Code and to generally improve clarity.

- The Solvency II capital metric in the AIP and PLTIP scorecard is to be replaced with a Pillar I capital metric;
- The weightings of the AIP performance measures for the Group Chief Risk and Compliance Officer are 40 per cent Group financial measures, 40 per cent functional objectives and 20 per cent personal measures. In the 2017 policy, the measures were entirely based on a combination of personal and functional measures;
- A Return on Equity measure replaces the operating profit measure in the PLTIP;
- Under the PLTIP, 20 per cent of each portion of the award will vest for achieving threshold performance. This change was implemented for 2019 PLTIP awards and it is now reflected in this policy. For prior awards, threshold performance resulted in 25 per cent of awards vesting;
- The Committee intends to make a 2020 PLTIP award of 300 per cent of salary to the Group Chief Financial Officer and Chief Operating Officer (increased from 250 per cent of salary);
- From the date of this policy, current Executive Directors will receive pension contributions of 22.5 per cent of base salary, reducing to 20 per cent of base salary from 14 May 2021. New Executive Directors, either externally recruited or promoted from within the Company, will be entitled to receive pension contributions or a cash supplement (or a combination of the two) of 13 per cent of base salary. In addition, statutory contributions will continue to be made to mandatory pension arrangements in the country in which the Executive Directors are based in line with the local requirements. The 2017 policy offered all Executive Directors pension benefits of 25 per cent of salary; and
- Executive Directors will, on leaving the Board, be required to hold the lower of their actual shareholding on the date of their retirement from the Board and their in-employment share ownership guideline for a period of two years.

Principles underlying the policy

In particular, when determining the new Directors' remuneration policy the Committee had regard to a number of key principles as illustrated below and opposite:

| | |
|------------------------------------|--|
| <p>Simplicity</p> | <p>The Committee has decided to retain the key features of the current policy. It continues to consist of fixed remuneration, annual and long-term incentives only.</p> <hr/> <p>Stakeholders are familiar with the operation of current reward arrangements and there is a demonstrable link between performance and reward outcome.</p> |
| <p>Risk</p> | <p>The Group Risk Committee formally provides advice to the Committee on risk management considerations to inform decisions over bonus payments and long-term incentive vesting levels.</p> <hr/> <p>The current policy provides the Committee with substantial flexibility to adjust incentive outcomes, to reduce or cancel unvested awards and to reclaim both bonus and long-term incentive payments. The Committee's discretionary powers have been formalised and additional malus and clawback triggers for personal conduct introduced in relation to the AIP and PLTIP to take into account non-financial and individual factors.</p> <hr/> <p>The time horizon for our long-term incentives extends for five years, including the holding period on awards.</p> <hr/> <p>There are currently significant in-employment share ownership guidelines for all Executive Directors providing a material connection to the sustained success of the Company. Executives have five years from the later of the date of their appointment, or the date of an increase these guidelines, to build this level of ownership.</p> <hr/> <p>A post-employment shareholding requirement has been introduced for Executive Directors leaving the Board to maintain their in-employment share ownership guideline for a period of two years or their actual shareholding on the date of their retirement from the Board if lower, subject to Committee discretion. This obligation will be implemented by requiring Executive Directors retiring from the Board to obtain clearance to deal in the Company's shares during the two years following their retirement.</p> |
| <p>Alignment to culture</p> | <p>Executive Directors recruited externally or internally from the date of the 2020 AGM will be offered pension benefits of 13 per cent of salary, aligned with the employer pension contribution available to the UK workforce. For existing Directors, pension benefits will be reduced from 25 per cent to 20 per cent of salary by May 2021.</p> <hr/> <p>The conduct measure in the PLTIP rewards for appropriate management action in ensuring that there are no significant conduct/culture/governance issues that result in significant capital add-ons or material fines.</p> <hr/> <p>The pay arrangements for Executive Directors are aligned with that of the senior leadership team.</p> <hr/> <p>The vesting period attached to the long-term incentives reflects the time horizon of the business plan. The additional post-vesting holding period and post-employment shareholding requirement strengthens the community of interests between Executives and other stakeholders.</p> |

| | |
|------------------------|--|
| Clarity | <p>The Committee has consulted with the Company's largest shareholders and their advisers on the changes to the policy and executive pay decisions before they are implemented.</p> <hr/> <p>Details on Executive Director pay are clearly set out in the Annual report on remuneration.</p> |
| Proportionality | <p>There are no incentive awards for below threshold performance. Financial targets are set against the Board approved Plan.</p> <hr/> <p>Under the PLTIP, 20 per cent of each portion of the award will vest for achieving threshold performance.</p> <hr/> <p>The Committee approves the termination arrangements of Executive Directors to ensure that there is no reward for failure.</p> <hr/> <p>The PLTIP leaver rules are another safeguard that there is no reward for failure under this plan.</p> <hr/> <p>The Committee's discretionary powers have been formalised and additional malus and clawback triggers for personal conduct introduced in relation to the AIP and PLTIP to take into account non-financial and individual factors.</p> |
| Predictability | <p>The level of awards under incentive awards to Executive Directors at threshold, on-target and maximum levels are defined and have been outlined in the scenarios of total remuneration charts for the new policy.</p> |

Signed on behalf of the Board of Directors

Anthony Nightingale, CMG SBS JP

Notes

- 1 A dividend equivalent was accumulated on these awards.
- 2 The table above reflects the adjustments made to outstanding awards at the time of the demerger.

All-employee share plans

It is important that all employees are offered the opportunity to own shares in Prudential, connecting them both to the success of the Company and to the interests of other shareholders. Executive Directors are invited to participate in these plans on the same basis as other staff in their location.

Save As You Earn (SAYE) schemes

UK-based Executive Directors are normally eligible to participate in the HM Revenue and Customs (HMRC) approved Prudential Savings-Related Share Option Scheme. This scheme allows all eligible employees to save towards the exercise of options over Prudential plc shares with the option price set at the beginning of the savings period at a discount of up to 20 per cent of the market price.

Since 2014 participants have been able to elect to enter into savings contracts of up to £500 per month for a period of three or five years. At the end of this term, participants may exercise their options within six months and purchase shares. If an option is not exercised within six months, participants are entitled to a refund of their cash savings plus interest if applicable under the rules. Shares are issued to satisfy those options which are exercised. No options may be granted under the schemes if the grant would cause the number of shares which have been issued, or which remain issuable pursuant to options granted in the preceding 10 years under the scheme and any other option schemes operated by the Company, or which have been issued under any other share incentive scheme of the Company, to exceed 10 per cent of the Company's ordinary share capital at the proposed date of grant. In anticipation of the demerger of the M&G plc business the Company did not operate the SAYE in 2018 and it was relaunched in November 2019.

Details of Executive Directors' rights under the SAYE scheme are set out in the 'Outstanding share options' table.

Share Incentive Plan (SIP)

UK-based Executive Directors are also eligible to participate in the Company's Share Incentive Plan (SIP). Since April 2014, all UK-based employees have been able to purchase Prudential plc shares up to a value of £150 per month from their gross salary (partnership shares) through the SIP. For every four partnership shares bought, an additional matching share is awarded which is purchased by Prudential plc on the open market. Dividend shares accumulate while the employee participates in the plan. If the employee withdraws from the plan, or leaves the Group, matching shares may be forfeited.

The table below provides information about shares purchased under the SIP together with matching shares (awarded on a 1:4 basis) and dividend shares:

| | Year of initial grant | Share Incentive Plan awards held in Trust at 1 Jan 2019 (Number of shares) | Partnership shares accumulated in 2019 (Number of shares) | Matching shares accumulated in 2019 (Number of shares) | Dividend shares accumulated in 2019 (Number of shares) | Share Incentive Plan awards held in Trust at 31 Dec 2019 (Number of shares) |
|------------------|-----------------------|---|--|---|---|--|
| Mark FitzPatrick | 2017 | 214 | 119 | 30 | 9 | 372 |
| James Turner | 2011 | 709 | 76 | 19 | 25 | 829 |
| Mike Wells | 2015 | 548 | 120 | 30 | 21 | 719 |

Cash-settled long-term incentive awards

This information has been prepared in line with the reporting requirements of the Hong Kong Stock Exchange and sets out Executive Directors' outstanding share awards and share options. For details of the cash-settled long-term incentive awards held by one Executive Director, please see our 2018 Annual report on remuneration.

Dilution

Releases from the Prudential Long Term Incentive Plan and the Prudential Agency Long Term Incentive Plan are satisfied using new issue shares rather than by purchasing shares in the open market. Shares relating to options granted under all-employee share plans are also satisfied by new issue shares. The combined dilution from all outstanding shares and options at 31 December 2019 was 1 per cent of the total share capital at the time. Deferred bonus awards will continue to be satisfied by the purchase of shares in the open market.

Remuneration of the five highest-paid individuals and the remuneration of senior management

In line with the requirements of the Stock Exchange of Hong Kong Limited, the following table sets out, on an aggregate basis, the annual remuneration of i) the five highest-paid employees, and ii) senior management for the year ended 31 December 2019.

Of the five individuals with the highest emoluments in 2019, one was an Executive Director for the full year whose emoluments are disclosed in this report. The aggregate of the emoluments of the other four individuals for 2019 were set out in the table below. In light of a change to the Board's definition of senior management during 2019, senior management comprised the Executive Directors, plus from 1 August 2019, members of the Group Executive Committee. The table sets out the aggregate of the emoluments paid to the senior management team:

| Components of remuneration | Five highest paid | | Senior management | |
|--|-------------------|---------------|-------------------|---------------|
| | HK\$000 | £000 | HK\$000 | £000 |
| Base salaries, allowances and benefits in kind | 28,727 | 2,872 | 63,251 | 6,324 |
| Pension contributions | 4,598 | 460 | 11,777 | 1,178 |
| Performance related pay | 124,502 | 12,448 | 152,481 | 15,246 |
| Payments made on appointment | 49,505 | 4,950 | 49,505 | 4,950 |
| Payments made on separation | 62,681 | 6,267 | – | – |
| Total | 270,013 | 26,997 | 277,014 | 27,698 |

Their emoluments for 2019 were within the following bands:

| Remuneration band HKD | Remuneration band GBP equivalent | Number of employees | |
|-------------------------|----------------------------------|---------------------|-------------------|
| | | Five highest paid | Senior management |
| 7,500,001 – 8,000,000 | 749,888 – 799,880 | – | 1 |
| 8,500,001 – 9,000,000 | 849,873 – 899,865 | – | 1 |
| 10,000,001 – 10,500,000 | 999,850 – 1,049,843 | – | 1 |
| 25,000,001 – 25,500,000 | 2,499,625 – 2,549,618 | – | 1 |
| 34,500,001 – 35,000,000 | 3,449,483 – 3,499,475 | – | 1 |
| 39,500,001 – 40,000,000 | 3,949,408 – 3,999,400 | – | 1 |
| 48,000,001 – 48,500,000 | 4,799,280 – 4,849,273 | 1 | – |
| 62,500,001 – 63,000,000 | 6,249,063 – 6,299,055 | 1 | – |
| 67,000,001 – 67,500,000 | 6,698,995 – 6,748,988 | 1 | 1 |
| 83,500,001 – 84,000,000 | 8,348,748 – 8,398,740 | – | 1 |
| 92,000,001 – 92,500,000 | 9,198,620 – 9,248,613 | 1 | – |

| | | 30.3¢ | 156.0¢ |
| Diluted | | | |
| Based on profit from continuing operations | | 75.1¢ | 111.7¢ |
| Based on (loss) profit from discontinued operations | | (44.8)¢ | 44.3¢ |
| | | 30.3¢ | 156.0¢ |

* The 2018 comparative results have been re-presented from those previously published to reflect the change in the Group's presentation currency from pounds sterling to US dollars (as described in note A1) and the reclassification of the Group's UK and Europe operations as discontinued operations in 2019 (as described in note A2).

Note

This measure is the formal profit before tax measure under IFRS. It is not the result attributable to shareholders principally because total corporate tax of the Group includes those on the income of consolidated with-profits and unit-linked funds that, through adjustments to benefits, are borne by policyholders. These amounts are required to be included in the tax charge of the Company under IAS 12. Consequently, the IFRS profit before tax measure is not representative of pre-tax profit attributable to shareholders as it is determined after deducting the cost of policyholder benefits and movements in the liability for unallocated surplus of with-profits funds after adjusting for tax borne by policyholders.

Consolidated statement of comprehensive income

The parent company statement of financial position is presented on page 310.

Notes

- (i) As at 1 January 2019, the Group applied IFRS 16 'Leases', using the modified retrospective approach. Under this approach, comparative information is not restated. The application of the standard has resulted in the recognition of an additional lease liability and a corresponding 'right-of-use' asset of a similar amount as at 1 January 2019. See note A3 and note C13 for further details.
- (ii) Included within equity securities and holdings in collective investment schemes, debt securities and other investments are \$90 million of lent securities as at 31 December 2019 (31 December 2018: \$10,543 million, of which \$107 million were from continuing operations).
- (iii) The Group has adopted a change in its presentation currency from pounds sterling to US dollars at 31 December 2019 as described in note A1. Accordingly, the 31 December 2018 and 1 January 2018 comparative statements of financial position and the 2018 related notes have been re-presented retrospectively from the previously published results. As a result of this change, the statement of financial position as at 1 January 2018 has been re-presented in accordance with IAS 1.
- (iv) The 31 December 2018 and 1 January 2018 comparative statements of financial position included discontinued UK and Europe operations.

The consolidated financial statements on pages 199 to 309 were approved by the Board of Directors on 10 March 2020. They were signed on its behalf:

Paul Manduca
Chairman

Mike Wells
Group Chief Executive

Mark FitzPatrick
Group Chief Financial Officer and Chief Operating Officer

Consolidated statement of cash flows

| <i>Comprising:</i> | | | |
| Cash and cash equivalents from continuing operations | | 6,965 | 9,394 |
| Cash and cash equivalents from discontinued operations | D2 | – | 6,048 |

* The 2018 comparative results have been re-presented from those previously published to reflect the change in the Group's presentation currency from pounds sterling to US dollars (as described in note A1) and the reclassification of the Group's UK and Europe operations as discontinued operations in 2019 (as described in note A2).

Notes

- (i) Cash flows arising from the acquisition of business and intangibles includes amounts paid for distribution rights.
- (ii) Structural borrowings of shareholder-financed businesses exclude borrowings to support short-term fixed income securities programmes, non-recourse borrowings of investment subsidiaries of shareholder-financed businesses and other borrowings of shareholder-financed businesses. Cash flows in respect of these borrowings are included within cash flows from operating activities. The changes in the carrying value of the structural borrowings of shareholder-financed businesses for the Group are analysed in note C6.1.
- (iii) The cash flows shown above are presented excluding any transactions between continuing and discontinued operations.

A Basis of preparation and accounting policies

A1 Basis of preparation and exchange rates

Prudential plc ('the Company') together with its subsidiaries (collectively, 'the Group' or 'Prudential') is an international financial services group. The Group has operations in Asia, the US, Africa and, prior to the demerger of M&G plc in October 2019, UK and Europe. The Group helps individuals to de-risk their lives and deal with their biggest financial concerns through life and health insurance, and retirement and asset management solutions. On 21 October 2019, the Company completed the demerger of M&G plc, its UK and Europe operations, from Prudential plc resulting in two separately-listed companies. It has therefore reclassified these operations as discontinued in these financial statements (see note A2).

Basis of preparation

These statements have been prepared in accordance with IFRS as issued by the International Accounting Standards Board (IASB) and as endorsed by the European Union (EU) as required by EU law (IAS Regulation EC1606/2032). EU-endorsed IFRS may differ from IFRS issued by the IASB if, at any point in time, new or amended IFRS have not been endorsed by the EU. At 31 December 2019, there were no unendorsed standards effective for the two years ended 31 December 2019 which impact the consolidated financial statements of the Group and there were no differences between IFRS endorsed by the EU and IFRS issued by the IASB in terms of their application to the Group. For financial years beginning after 31 December 2020, the Group will prepare its consolidated financial statements in accordance with UK-adopted international accounting standards, instead of the EU-endorsed IFRS.

The Directors consider it appropriate to adopt the going concern basis of accounting in preparing these financial statements as set out in the Governance Report on page 121. The parent company statement of financial position prepared in accordance with the UK Generally Accepted Accounting Practice (including Financial Reporting Standard 101 Reduced Disclosure Framework) is presented on page 310. The Group IFRS accounting policies are the same as those applied for the year ended 31 December 2018 with the exception of the adoption of the new and amended accounting standards as described in note A3.

Exchange rates

Following the demerger of its UK and Europe operations, the Directors have elected to change the Group's presentation currency in these financial statements from pounds sterling to US dollars which better reflects the economic footprint of our business going forward. The Group believes that the presentation currency change will give investors and other stakeholders a clearer understanding of Prudential's performance over time. The change in presentation currency is a voluntary change which is accounted for retrospectively in the comparative information and all comparative statements and notes have been restated accordingly applying the foreign exchange translation principles as set out below.

The exchange rates applied for balances and transactions in the presentation currency of the Group, US dollars (\$), and other currencies were:

| \$: local currency | Closing rate at 31 Dec 2019 | Average rate for 2019 | Closing rate at 31 Dec 2018 | Average rate for 2018 | Opening rate at 1 Jan 2018 |
|---------------------|-----------------------------|-----------------------|-----------------------------|-----------------------|----------------------------|
| China | 6.97 | 6.91 | 6.87 | 6.61 | 6.51 |
| Hong Kong | 7.79 | 7.84 | 7.83 | 7.84 | 7.82 |
| Indonesia | 13,882.50 | 14,140.84 | 14,380.00 | 14,220.82 | 13,567.00 |
| Malaysia | 4.09 | 4.14 | 4.13 | 4.03 | 4.05 |
| Singapore | 1.34 | 1.36 | 1.36 | 1.35 | 1.34 |
| Thailand | 29.75 | 31.05 | 32.56 | 32.30 | 32.59 |
| UK | 0.75 | 0.78 | 0.79 | 0.75 | 0.74 |
| Vietnam | 23,172.50 | 23,227.64 | 23,195.00 | 23,017.17 | 22,708.16 |

Foreign exchange translation

In order to present the consolidated financial statements in US dollars, the results and financial position of entities not using US dollars as functional currency (ie the currency of the primary economic environment in which the entity operates) must be translated into the US dollars. The general principle for converting foreign currency transactions is to translate at the functional currency spot rate prevailing at the date of the transactions. This includes external dividends determined and paid to shareholders in pounds sterling. Prudential will determine and declare its dividend in US dollars commencing with dividends paid in 2020, including the 2019 second interim dividend. All assets and liabilities of entities not operating in US dollars are converted at closing exchange rates while all income and expenses are converted at average exchange rates where this is a reasonable approximation of the rates prevailing on transaction dates. The impact of these currency translations is recorded as a separate component in the statement of comprehensive income. At 31 December 2019 the functional currency of the Group's parent company changed to US dollars. The Group and parent company have chosen, for presentational purposes, to retranslate their share capital and share premium as at 31 December 2019 using the closing exchange rate as at that date, and comparative amounts at the relative closing exchange rates. The foreign exchange adjustments arising on the share capital and share premium balances of \$2,797 million (31 December 2018: \$2,668 million) adjust the translation reserve movement in the statement of other comprehensive income. As this amount arises on the translation of the parent company's share capital and share premium, the corresponding impact to the currency translation reserve of \$980 million will never be recycled on disposal of any foreign operations.

During 2019 and 2018, borrowings that are used to provide a hedge against Group equity investments in overseas entities were translated at year end exchange rates and movements recognised in other comprehensive income. Other foreign currency monetary items are translated at year end exchange rates with changes recognised in the income statement.

A1 Basis of preparation and exchange rates continued

Certain notes to the financial statements present 2018 comparative information at constant exchange rates (CER), in addition to the reporting at actual exchange rates (AER) used throughout the consolidated financial statements. AER are actual historical exchange rates for the specific accounting period, being the average rates over the period for the income statement and the closing rates at the balance sheet date for the statement of financial position. CER results are calculated by translating prior period results using the current period foreign exchange rate, ie current period average rates for the income statement and current period closing rates for the statement of financial position.

The effect of foreign exchange movement from continuing operations arising during the years shown recognised in other comprehensive income is:

| | 2019 \$m | 2018 \$m |
|--|----------|----------|
| Asia operations | 194 | (206) |
| Unallocated to a segment (other funds) | (42) | 167 |
| | 152 | (39) |

A2 Discontinued operations

The Group completed the demerger of its UK and Europe operations, M&G plc, from the Prudential plc group on 21 October 2019. In accordance with IFRS 5 'Non-Current Assets Held for Sale and Discontinued Operations', the results of M&G plc have been reclassified as discontinued operations in these consolidated financial statements.

Consistent with IFRS 5 requirements, profit after tax attributable to the discontinued UK and Europe operations in 2019 have been shown in a single line in the income statement with 2018 comparatives being restated accordingly, with further analysis provided in note D2. Notes B1 to B5 have also been prepared on this basis.

IFRS 5 does not permit the comparative 31 December 2018 and 1 January 2018 statement of financial position to be re-presented, as the UK and Europe operations were not reclassified as held for sale at these dates. In the related balance sheet notes, prior year balances have been presented to show the amounts from discontinued operations separately from continuing operations in order to present the results of the continuing operations on a comparable basis. Additionally, in the analysis of movements in Group's assets and liabilities between the beginning and end of the years, the balances of the discontinued UK and Europe operations are removed from the opening balances to show the underlying movements from continuing operations.

Profit from the discontinued UK and Europe operations up to the demerger is presented in the consolidated income statement after the elimination of intragroup transactions with continuing operations where it is appropriate to provide a more meaningful presentation of the position of the Group immediately after the demerger. The statement of cash flows is presented excluding intragroup cash flows between the continuing and discontinued UK and Europe operations up to demerger.

A3 New accounting pronouncements in 2019

IFRS 16 'Leases'

The Group has adopted IFRS 16 'Leases' from 1 January 2019. The new standard brings most leases on-balance-sheet for lessees under a single model, eliminating the distinction between operating and finance leases.

IFRS 16 applies primarily to operating leases of major properties occupied by the Group's businesses where Prudential is a lessee.

Under IFRS 16, these leases are brought onto the Group's statement of financial position with a 'right-of-use' asset being established and a corresponding liability representing the obligation to make lease payments. The rental accrual charge in the income statement under IAS 17 is replaced with a depreciation charge for the 'right-of-use' asset and an interest expense on the lease liability leading to a more front-loaded operating lease cost profile compared to IAS 17.

As permitted by IFRS 16, the Group has chosen to adopt the modified retrospective approach upon transition to the new standard. Under the approach adopted, there is no adjustment to the Group's retained earnings at 1 January 2019 and the Group's 2018 comparative information is not restated. The 'right-of-use' asset and lease liability at 1 January 2019 are set at an amount equal to the discounted remaining lease payments adjusted by any prepaid or accrued lease payment balance immediately before the date of initial application of the standard.

When measuring lease liabilities on adoption, the Group discounted lease payments using its incremental borrowing rate at 1 January 2019. The weighted average rate applied is 3.4 per cent. The aggregate effect of the adoption of the standard on the statement of financial position at 1 January 2019 is shown in the table below:

| | Continuing operations \$m | Discontinued operations \$m | Total Group \$m |
|--|------------------------------|--------------------------------|--------------------|
| Effect of adoption of IFRS 16 at 1 January 2019 | | | |
| Assets | | | |
| Property, plant and equipment (right-of-use assets) | 527 | 368 | 895 |
| Total assets | 527 | 368 | 895 |
| Liabilities | | | |
| Operational borrowings (lease liability) | 541 | 414 | 955 |
| Accruals, deferred income and other liabilities (accrued lease payment balance under IAS 17) | (14) | (46) | (60) |
| Total liabilities | 527 | 368 | 895 |

Reconciliation of IFRS 16 lease liability and IAS 17 lease commitments

| | Total Group \$m |
|---|--------------------|
| IFRS 16 operating lease liability shown in the table above | 955 |
| Add back impact of discounting | 210 |
| IFRS 16 operating lease liability on an undiscounted basis | 1,165 |
| Difference in lease rental payments due to probable renewals or early termination decisions reflected above | (48) |
| Other | (6) |
| Total operating lease commitments at 31 December 2018* | 1,111 |

* As disclosed in note D5 of the Group's IFRS financial statements for the year ended 31 December 2018 and after excluding \$76 million for the amount relating to certain lease commitments from the central operations to the discontinued UK with-profits fund.

The Group has applied the practical expedient to grandfather the definition of a lease on transition. This means that IFRS 16 has been applied to all contracts that were identified as leases in accordance with IAS 17 and IFRIC 4 'Determining whether an Arrangement contains a Lease' entered into before 1 January 2019. Therefore, the definition of a lease under IFRS 16 is applied only to contracts entered into or changed on or after 1 January 2019.

The Group has used the following practical expedients, in addition to the aforementioned, when applying IFRS 16 to leases previously classified as operating leases under IAS 17:

- Applying a single discount rate to a portfolio of leases with similar characteristics. Accordingly, for such portfolios, the incremental borrowing rates used to discount the future lease payments will be determined based on market specific risk-free rates adjusted with a margin/spread to reflect the Group's credit standing, lease term and the outstanding lease payments; and
- Using hindsight when determining the lease term if the contract contains options to extend or terminate the lease.

Other new accounting pronouncements

In addition to the above, the following new accounting pronouncements were also effective from 1 January 2019:

- IFRIC Interpretation 23 'Uncertainty over Income Tax Treatments';
- Amendments to IAS 28 'Long-term Interests in Associates and Joint Ventures';
- Amendments to IFRS 9 'Prepayment Features with Negative Compensation';
- Annual Improvements to IFRSs 2015-2017 cycle; and
- Amendments to IAS 19 'Plan Amendment, Curtailment or Settlement'.

The Group has applied the principles within the Amendments to IAS 19 'Plan Amendment, Curtailment or Settlement' when accounting for the changes to the pension benefits of its UK defined benefit schemes during the year. The other pronouncements have had no significant impact on the Group financial statements.

A4 Accounting policies

Note A4.1 presents the critical accounting policies, accounting estimates and judgements applied in preparing the Group's consolidated financial statements. Other accounting policies, where significant, are presented in the relevant individual notes. All accounting policies are applied consistently for both years presented and normally are not subject to changes unless new accounting standards, interpretations or amendments are introduced by the IASB.

A4.1 Critical accounting policies, estimates and judgements

The preparation of these financial statements requires Prudential to make estimates and judgements about the amounts of assets, liabilities, revenues and expenses, which are both recognised and unrecognised (eg contingent liabilities) in the primary financial statements. Prudential evaluates its estimates, including those related to long-term business provisioning and the fair value of assets as required. The notes below set out those critical accounting policies, the application of which requires the Group to make critical estimates and judgements. Also set out are further critical accounting policies affecting the presentation of the Group's results and other items that require the application of critical estimates and judgements.

(a) Critical accounting policies with associated critical estimates and judgements

Classification of insurance and investment contracts

IFRS 4 requires contracts written by insurers to be classified as either 'insurance' contracts or 'investment' contracts. The classification of the contract determines its accounting.

Impacts \$397.6 billion of reported contract liabilities, requiring classification, including those held by the joint venture and associate.

Judgement is applied in considering whether the material features of a contract gives rise to the transfer of significant insurance risk.

Contracts that transfer significant insurance risk to the Group are classified as insurance contracts. This judgement is made at the point of contract inception and is not revisited.

For the majority of the Group's contracts, classification is based on a readily identifiable scenario that demonstrates a significant difference in cash flows if the covered event occurs (as opposed to does not occur) reducing the level of judgement involved.

Contracts that transfer financial risk to the Group but not significant insurance risk are classified as investment contracts. Certain investment contracts contain discretionary participating features as discussed in IFRS 4. Insurance contracts and investment contracts with discretionary participation features are accounted for under IFRS 4.

Investment contracts without such discretionary participation features are accounted for as financial instruments under IAS 39.

| Insurance business units | Insurance contracts and investment contracts with discretionary participation features | Investment contracts without discretionary participation features |
|----------------------------|---|--|
| Asia | <ul style="list-style-type: none"> — With-profits contracts — Non-participating term contracts — Whole life contracts — Unit-linked policies — Accident and health policies | <ul style="list-style-type: none"> — Minor amounts for a number of small categories of business |
| US | <ul style="list-style-type: none"> — Variable annuity contracts — Fixed annuity contracts — Fixed index annuity contracts — Group pay-out annuity contracts — Life insurance contracts | <ul style="list-style-type: none"> — Guaranteed investment contracts (GICs) — Minor amounts of 'annuity certain' contracts |
| Discontinued UK and Europe | <ul style="list-style-type: none"> — With-profits contracts — Bulk and individual annuity business — Non-participating term contracts | <ul style="list-style-type: none"> — Certain unit-linked savings and similar contracts |

Measurement of policyholder liabilities and unallocated surplus of with-profits

The measurement basis of policyholder liabilities is dependent upon the classification of the contracts under IFRS 4 described above.

Impacts \$402.3 billion of policyholder liabilities and unallocated surplus of with-profits.

Policyholder liabilities are estimated based on a number of actuarial assumptions (eg mortality, morbidity, policyholder behaviour and expenses).

IFRS 4 permits the continued usage of previously applied Generally Accepted Accounting Practices (GAAP) for insurance contracts and investment contracts with discretionary participating features.

A modified statutory basis of reporting was adopted by the Group on first time adoption of IFRS in 2005. This was set out in the Statement of Recommended Practice issued by the Association of British Insurers (ABI SORP). An exception was for UK regulated with-profits funds which were measured under FRS 27, 'Life Assurance' as discussed below.

FRS 27 and the ABI SORP were withdrawn for the accounting periods beginning in or after 2015. As used in these consolidated financial statements, the terms 'grandfathered' FRS 27 and the 'grandfathered' ABI SORP refer to the requirements of these pronouncements prior to their withdrawal. For investment contracts that do not contain discretionary participating features, IAS 39 is applied and, where the contract includes an investment management element, IFRS 15 'Revenue from Contracts with Customers' applies.

The policies applied in each business unit are noted below. When measuring policyholder liabilities, a number of assumptions are applied to estimate future amounts due to or from the policyholder. The nature of assumptions varies by product and among the most significant is policyholder behaviour, particularly in the US. Additional details of valuation methodologies and assumptions applied for material product types are discussed in note C4.2.

Measurement of insurance contract liabilities and investment contract liabilities with discretionary participation features

Asia insurance operations

The policyholder liabilities for businesses in Asia are generally determined in accordance with methods prescribed by local GAAP, adjusted to comply with the modified statutory basis where necessary. Refinements to the local reserving methodology are generally treated as changes in estimates, dependent on their nature. In Taiwan and India, US GAAP principles are applied.

The sensitivity of Asia insurance operations to variations in key estimates and assumptions, including mortality and morbidity, is discussed in note C7.2.

US insurance operations (Jackson)

The policyholder liabilities for Jackson's conventional protection-type policies are determined under US GAAP principles with locked in assumptions for mortality, interest, policy lapses and expenses along with provisions for adverse deviations. For other policies, the policyholder liabilities include the policyholder account balance.

For those investment contracts in the US with fixed and guaranteed terms, the Group uses the amortised cost model to measure the liability. The US has no investment contracts with discretionary participation features.

The sensitivity of US insurance operations to variations in key estimates and assumptions, including policyholder behaviour, is discussed in note C7.3.

Discontinued UK and Europe insurance operations

The UK regulated with-profits funds' liabilities are the realistic basis liabilities in accordance with 'grandfathered' FRS 27. The realistic basis requires the value of liabilities to be calculated as the sum of a with-profits benefits reserve, future policy-related liabilities and the realistic current liabilities of the fund.

The interest rates used in establishing policyholder benefit provisions for pension annuities in the course of payment are adjusted each reporting period and include an allowance for credit risk. Mortality rates used in establishing policyholder benefits are based on published mortality tables adjusted to reflect actual experience.

Measurement of investment contract liabilities without discretionary participation features

Investment contracts without discretionary participation features are measured in accordance with IAS 39 to reflect the deposit nature of the arrangement, with premiums and claims reflected as deposits and withdrawals, and taken directly to the statement of financial position as movements in the financial liability balance.

Investment contracts without fixed and guaranteed terms are classified as financial instruments and designated as fair value through profit or loss because the resulting liabilities are managed and their performance is evaluated on a fair value basis. Where the contract includes a surrender option, its carrying value is subject to a minimum carrying value equal to its surrender value.

Other investment contracts are measured at amortised cost.

A4 Accounting policies continued

A4.1 Critical accounting policies, estimates and judgements continued

Measurement of policyholder liabilities and unallocated surplus of with-profits continued

| | |
|--|---|
| Measurement of unallocated surplus of with-profits funds | Unallocated surplus of with-profits funds represents the excess of assets over policyholder liabilities determined in accordance with the Group's accounting policies and based on local GAAP for the Group's with-profits funds in Hong Kong, Malaysia and, up to its demerger, the UK and Europe operations that have yet to be appropriated between policyholders and shareholders. The unallocated surplus is recorded wholly as a liability with no allocation to equity. The annual excess or shortfall of income over expenditure of the with-profits funds, after declaration and attribution of the cost of bonuses to policyholders and shareholders, is transferred to or from the unallocated surplus each period through a charge or credit to the income statement. The balance retained in the unallocated surplus represents cumulative income arising on the with-profits business that has not been allocated to policyholders or shareholders. The balance of the unallocated surplus is determined after full provision for deferred tax on unrealised appreciation or depreciation on investments. |
|--|---|

| | |
|-------------------------|---|
| Liability adequacy test | <p>The Group performs adequacy testing on its insurance liabilities to ensure that the carrying amounts (net of related deferred acquisition costs) and, where relevant, present value of acquired in-force business is sufficient to cover current estimates of future cash outflows. Any deficiency is immediately charged to the income statement.</p> <p>Jackson's liabilities for insurance contracts, which include those for separate accounts (reflecting separate account assets), policyholder account values and guarantees measured as described in note C4.2 and the associated deferred acquisition cost asset, are measured under US GAAP and liability adequacy testing is performed in this context. Under US GAAP, most of Jackson's products are accounted for under Accounting Standards Codification Topic 944, Financial Services – Insurance of the Financial Accounting Standards Board (ASC 944) whereby deferred acquisition costs are amortised in line with expected gross profits. Recoverability of the deferred acquisition costs in the balance sheet is tested against the projected value of future profit using current estimates and therefore no additional liability adequacy test is required under IFRS 4. The deferred acquisition cost asset recoverability test is performed in line with US GAAP requirements, which in practice is at a grouped level of those contracts managed together.</p> |
|-------------------------|---|

(b) Further critical accounting policies affecting the presentation of the Group's results

Measurement and presentation of derivatives and debt securities of US insurance operations (Jackson)

| | |
|--|--|
| <p>Jackson holds a number of derivative instruments and debt securities. The selection of the accounting approach for these items significantly affects the volatility of profit before tax.</p> <p>\$ (4,225) million of the US investment return in the income statement arises from such derivatives and debt securities.</p> | <p>Jackson enters into derivative instruments to mitigate economic exposures. The Group has considered whether it is appropriate to undertake the necessary operational changes to qualify for hedge accounting so as to achieve matching of value movements in hedging instruments and hedged items in the performance statements. The key factors considered in this assessment were the complexity of asset and liability matching in Jackson's product range and the difficulty and cost of applying the macro hedge provisions under IAS 39 (which are more suited to banking arrangements) to Jackson's derivative book.</p> <p>The Group has decided that, except for occasional circumstances, applying hedge accounting using IAS 39 to derivative instruments held by Jackson would not improve the relevance or reliability of the financial statements to such an extent that would justify the difficulty and cost of applying these provisions. As a result of this decision, the total income statement results are more volatile as the movements in the fair value of Jackson's derivatives are reflected within it. This volatility is reflected in the level of short-term fluctuations in investment returns, as shown in notes B1.1 and B1.2.</p> <p>Under IAS 39, unless carried at amortised cost (subject to impairment provisions where appropriate) under the held-to-maturity category, debt securities are carried at fair value. The Group has chosen not to classify any financial assets as held-to-maturity. Debt securities of Jackson are designated as available-for-sale with value movements, unless impaired, being recorded as movements within other comprehensive income. Impairments are recorded in the income statement, as discussed in note (c) below.</p> |
|--|--|

Presentation of results before tax attributable to shareholders

Profit before tax is a significant IFRS income statement item. The Group has chosen to present a measure of profit before tax attributable to shareholders which distinguishes between tax borne by shareholders and tax attributable to policyholders to support understanding of the performance of the Group.

Profit from continuing operations before tax attributable to shareholders is \$1,922 million and compares to profit from continuing operations before tax of \$2,287 million.

The total tax charge for the Group reflects tax that, in addition to that relating to shareholders' profit, is also attributable to policyholders through the interest in with-profits or unit-linked funds. Further detail is provided in note B4. Reported IFRS profit before the tax measure is therefore not representative of pre-tax profit attributable to shareholders. Accordingly, in order to provide a measure of pre-tax profit attributable to shareholders, the Group has chosen to adopt an income statement presentation of the tax charge and pre-tax results that distinguishes between policyholders and shareholders returns.

Segmental analysis of results and earnings attributable to shareholders

The Group uses adjusted IFRS operating profit based on longer-term investment returns as the segmental measure of its results.

Total segmental adjusted IFRS operating profit from continuing operations based on longer-term investment returns is \$6,346 million and is shown in note B1.1.

The basis of calculation of adjusted IFRS operating profit based on longer-term investment returns is provided in note B1.3.

For shareholder-backed business, with the exception of debt securities held by Jackson and the Group's new treasury company, which are treated as available-for-sale, and assets classified as loans and receivables at amortised cost, all financial investments and investment properties are designated as assets at fair value through profit or loss. Short-term fluctuations in fair value affect the result for the year and the Group provides additional analysis of results before and after the effects of short-term fluctuations in investment returns, together with other items that are of a short-term, volatile or one-off nature. The effects of short-term fluctuations include asymmetric impacts where the measurement bases of the liabilities and associated derivatives used to manage the Jackson annuity business differ as described in note B1.2.

Short-term fluctuations in investment returns on assets held by with-profits funds in Hong Kong, Malaysia and Singapore do not affect directly reported shareholder results. This is because (i) the unallocated surplus of with-profits funds is accounted for as a liability and (ii) excess or deficit of income and expenditure of the funds over the required surplus for distribution are transferred to or from policyholder liabilities (including the unallocated surplus).

(c) Other items requiring application of critical estimates or judgements

Deferred acquisition costs (DAC) for insurance contracts

The Group applies judgement in determining qualifying costs that should be capitalised (ie those costs of acquiring new insurance contracts that meet the criteria under the Group's accounting policy for deferred acquisition costs).

The Group estimates projected future profits/margins to assess whether adjustments to the carrying value or amortisation profile of deferred acquisition cost asset are necessary.

Impacts \$14.2 billion of deferred acquisition costs as shown in note C5.2(i).

Costs of acquiring new insurance business are accounted for in a way that is consistent with the principles of the 'grandfathered' ABI SORP with deferral and amortisation against margins in future revenues on the related insurance policies. The recoverability of the deferred acquisition costs (DAC) is measured and the DAC asset is deemed impaired if the projected margins (which are estimated based on a number of assumptions similar to those underlying policyholder liabilities) are less than the carrying value. To the extent that the future margins differ from those anticipated, an adjustment to the carrying value will be necessary either through an impairment (if the projected margins are lower than carrying value) or through a change in the amortisation profile.

A4 Accounting policies continued

A4.1 Critical accounting policies, estimates and judgements continued

Deferred acquisition costs (DAC) for insurance contracts continued

Asia insurance operations

For those business units applying US GAAP to insurance assets and liabilities, as permitted by the 'grandfathered' ABI SORP, principles similar to those set out in the US insurance operations paragraph below are applied to the deferral and amortisation of acquisition costs. For other business units in Asia, the general principles of the 'grandfathered' ABI SORP are applied. In general, deferral of acquisition costs is shown by an explicit carrying value in the balance sheet. However, in some Asia operations the deferral is implicit through the reserving basis.

US insurance operations

The most material estimates and assumptions applied in the measurement and amortisation of DAC balances relate to the US insurance operations.

The Group's US insurance operations apply FASB ASU 2010-26 on 'Accounting for Costs Associated with Acquiring or Renewing Insurance Contracts' and capitalise only those incremental costs directly relating to successfully acquiring a contract.

For term life business, acquisition costs are deferred and amortised in line with expected premiums. For annuity and interest-sensitive life business, acquisition costs are deferred and amortised in line with expected gross profits on the relevant contracts. For fixed and fixed index annuity and interest-sensitive life business, the key assumption is the long-term spread between the earned rate on investments and the rate credited to policyholders.

For variable annuity business, a key assumption is the long-term investment return from the separate accounts, which for 2019 is 7.4 per cent (2018: 7.4 per cent). The impact of using this return is reflected in two principal ways, namely:

- Through the projected expected gross profits that are used to determine the amortisation of deferred acquisition costs. This is applied through the use of a mean reversion technique which is described in more detail below; and
- The required level of provision for claims for guaranteed minimum death, 'for life' withdrawal, and income benefits.

In addition, expected gross profits depend on mortality assumptions, lapses (including the related charges), assumed unit costs and future hedge costs, which are based on a combination of Jackson's actual experience, industry benchmarking and future expectations.

Jackson uses a mean reversion methodology that sets the projected level of return for each of the next five years such that these returns in combination with the actual rates of return for the preceding three years (including the current year) average the assumed long-term annual return (gross of asset management fees and other charges to policyholders, but net of external fund management fees) over the eight-year period. Projected returns after the mean reversion period revert back to the long-term investment return. For further details on current balances, assumptions and sensitivity, refer to note C5.2 (i).

To ensure that the methodology in extreme market movements produces future expected returns that are realistic, the mean reversion technique has a cap and floor feature whereby the projected returns in each of the next five years can be no more than 15 per cent per annum and no less than zero per cent per annum (both gross of asset management fees and other charges to policyholders, but net of external fund management fees) in each year.

Jackson makes certain adjustments to the DAC assets which are recognised directly in other comprehensive income ('shadow accounting') to match the recognition of unrealised gains or losses on available-for-sale securities causing the adjustments. More precisely, shadow DAC adjustments reflect the change in DAC that would have arisen if the assets held in the statement of financial position had been sold, crystallising unrealised gains or losses, and the proceeds reinvested at the yields currently available in the market.

Carrying value of distribution rights intangible assets

The Group applies judgement to assess whether factors such as the financial performance of the distribution arrangement, changes in relevant legislation and regulatory requirements indicate an impairment of intangible assets representing distribution rights.

To determine the impaired value, the Group estimates the discounted future expected cash flows arising from distribution rights.

Affects \$3.0 billion of assets as shown in note C5.2.

Distribution rights relate to bancassurance partnership arrangements for the distribution of products for the term of the contractual agreement with the bank partner, for which an asset is recognised based on fees paid. Distribution rights impairment testing is conducted when there is an indication of impairment.

To assess indicators of an impairment, the Group monitors a number of internal and external factors, including indications that the financial performance of the arrangement is likely to be worse than expected and changes in relevant legislation and regulatory requirements that could impact the Group's ability to continue to sell new business through the bancassurance channel, and then applies judgement to assess whether these factors indicate that an impairment has occurred.

If an impairment has occurred, a charge is recognised in the income statement for the difference between the carrying value and recoverable amount of the asset. The recoverable amount is the greater of fair value less costs to sell and value in use. Value in use is calculated as the present value of future expected cash flows from the asset or the cash generating unit to which it is allocated.

Financial investments – Valuation

Financial investments held at fair value represent \$388.1 billion of the Group's total assets.

Financial investments held at amortised cost represent \$15.6 billion of the Group's total assets.

The Group estimates the fair value of financial investments that are not actively traded using quotations from independent third parties or internally developed pricing models.

The Group holds the majority of its financial investments at fair value (either through profit or loss or available-for-sale). Financial investments held at amortised cost primarily comprise loans and deposits.

Determination of fair value

The fair values of the financial instruments for which fair valuation is required under IFRS are determined by the use of current market bid prices for exchange-quoted investments or by using quotations from independent third parties such as brokers and pricing services or by using appropriate valuation techniques.

The estimated fair value of derivative financial instruments reflects the estimated amount the Group would receive or pay in an arm's-length transaction. This amount is determined using quoted prices if exchange listed, quotations from independent third parties or valued internally using standard market practices.

Current market bid prices are used to value investments having quoted prices. Actively traded investments without quoted prices are valued using prices provided by third parties such as brokers or pricing services. Financial investments measured at fair value are classified into a three-level hierarchy as described in note C3.1(b).

If the market for a financial investment of the Group is not active, the Group establishes fair value by using quotations from independent third parties, such as brokers or pricing services, or by using internally developed pricing models. Priority is given to publicly available prices from independent sources when available, but overall the source of pricing and/or the valuation technique is chosen with the objective of arriving at a fair value measurement which reflects the price at which an orderly transaction would take place between market participants on the measurement date. The valuation techniques include the use of recent arm's length transactions, reference to other instruments that are substantially the same, discounted cash flow analysis, option-adjusted spread models and, if applicable, enterprise valuation and may include a number of assumptions relating to variables such as credit risk and interest rates. Changes in assumptions relating to these variables could positively or negatively impact the reported fair value of these financial investments. Details of the financial investments classified as 'level 3' to which valuation techniques are applied and the sensitivity of profit before tax to a change in the valuation of these items, are presented in note C3.1(d).

A4 Accounting policies continued

A4.1 Critical accounting policies, estimates and judgements continued

Financial investments – Determining impairment of “available-for-sale” and “amortised cost” assets

The Group applies judgement to assess whether factors such as the severity and duration of the decline in fair value, the financial condition and the prospects of the issuer indicate an impairment in value of financial investments classified as ‘available-for-sale’ or ‘held at amortised cost’.

If evidence for impairment exists, valuation techniques, including estimates, are then applied in determining the impaired value, which is based on its expectation of discounted future cash flows. If the impaired value is less than book cost, an impairment loss is recognised in the income statement.

Affects \$73.9 billion of assets.

For financial investments classified as ‘available for sale’ or ‘at amortised cost’, if a loss event that will have a detrimental effect on cash flows is identified, an impairment loss is recognised in the income statement. The loss recognised is determined as the difference between the book cost and the fair value or estimated future cash flows of the relevant impairment assets. The loss comprises the effect of the expected loss of contractual cash flows and any additional market-price driven temporary reductions in values.

Available-for-sale securities

The Group’s available-for-sale securities are principally held by the US insurance operations. For these securities, the consideration of evidence of impairment requires management’s judgement. In making this determination, a range of market and industry indicators are considered including the severity and duration of the decline in fair value and the financial condition and prospects of the issuer. The factors reviewed include economic conditions, credit loss experience, other issuer-specific developments and future cash flows. These assessments are based on the best available information at the time. Factors such as market liquidity, the widening of bid/ask spreads and a change in cash flow assumptions can contribute to future price volatility. If actual experience differs negatively from the assumptions and other considerations used in the consolidated financial statements, unrealised losses currently in equity may be recognised in the income statement in future periods.

For US residential mortgage-backed and other asset-backed securities, all of which are classified as available-for-sale, impairment is estimated using a model of expected future cash flows. Key assumptions used in the model include assumptions about how much of the currently delinquent loans will eventually default and assumed loss severity.

Additional details on the methodology and estimates used to determine impairments of the available-for-sale securities of Jackson are described in note C3.2(e).

Assets held at amortised cost

When assets held at amortised cost are subject to impairment testing, estimated future cash flows are compared to the carrying value of the asset. In estimating future cash flows, the Group looks at the expected cash flows of the assets and applies historical loss experience of assets with similar credit risks that has been adjusted for conditions in the historical loss experience which no longer exist, or for conditions that are expected to arise. The estimated future cash flows are discounted using the financial asset’s original or variable effective interest rate and exclude credit losses that have not yet been incurred.

Reversal of impairment losses

If, in subsequent periods, an impaired debt security held on an available-for-sale basis or an impaired loan or receivable recovers in value (in part or in full) and this recovery can be objectively related to an event occurring after the impairment, then any amount determined to have been recovered is reversed through the income statement.

A4.2 New accounting pronouncements not yet effective

The following standards, interpretations and amendments have been issued but are not yet effective in 2019, including those which have not yet been adopted in the EU. Following UK's withdrawal from the European Union, the Group will continue to prepare these statements in accordance with IASB issued standards as endorsed by the EU until the end of the transition period on 31 December 2020. This includes accounting standards already endorsed by the EU but not yet effective as well as any new or amended standards adopted by the EU before the 31 December 2020. For financial years beginning after 31 December 2020, the Group will be required to prepare financial statements in accordance with UK-adopted international accounting standards. The Government is in the process of establishing the UK Endorsement Board to undertake the work of assessing, endorsing and adopting any new or amended International Accounting Standards published by the IASB.

This is not intended to be a complete list as only those standards, interpretations and amendments that could have a material impact on the Group's financial statements are discussed.

IFRS 9 'Financial instruments: Classification and measurement'

In July 2014, the IASB published a complete version of IFRS 9 with the exception of macro hedge accounting. The standard became mandatorily effective for the annual periods beginning on or after 1 January 2018, with early application permitted and transitional rules apply.

The Group met the eligibility criteria for temporary exemption under the Amendments to IFRS 4 from applying IFRS 9 in 2018 and has accordingly deferred the adoption of IFRS 9 until the date when IFRS 17 'Insurance Contracts' is expected to be adopted upon its current mandatory effective date. The Group made a reassessment during the year following the demerger of the UK and Europe operations in October 2019 and confirmed that it remained qualified for the temporary exemption. The Group is eligible as its activities are predominantly to issue insurance contracts based on the criteria as set out in the amendments to IFRS 4. The disclosure of the fair value of the Group's financial assets, showing the amounts for instruments that meet the 'Solely for Payment of Principal and Interest' (SPPI) criteria that do not meet the definition of held for trading or are managed and evaluated on a fair value basis separately from all other financial assets, as required for entities applying the temporary exemption is provided below.

When adopted IFRS 9 replaces the existing IAS 39 'Financial Instruments – Recognition and Measurement' and will affect the following three areas:

The classification and the measurement of financial assets and liabilities

IFRS 9 redefines the classification of financial assets. Based on the way in which the assets are managed in order to generate cash flows and their contractual cash flow characteristics (whether the cash flows represent 'solely payments of principal and interest'), financial assets are classified into one of the following categories: amortised cost, fair value through other comprehensive income (FVOCI) and fair value through profit or loss (FVTPL). An option is also available at initial recognition to irrevocably designate a financial asset as at FVTPL if doing so eliminates or significantly reduces accounting mismatches.

Under IAS 39, 82 per cent of the Group's investments are valued at FVTPL and the Group's current expectation is that a significant proportion will continue to be designated as such under IFRS 9.

The existing IAS 39 amortised cost measurement for financial liabilities is largely maintained under IFRS 9. For financial liabilities designated at FVTPL IFRS 9 requires changes in fair value due to changes in entity's own credit risk to be recognised in other comprehensive income.

The calculation of the impairment charge relevant for financial assets held at amortised cost or FVOCI

A new impairment model based on an expected credit loss approach replaces the existing IAS 39 incurred loss impairment model, resulting in earlier recognition of credit losses compared to IAS 39. This aspect is the most complex area of IFRS 9 to implement and will involve significant judgements and estimation processes. The Group is currently assessing the scope of assets to which these requirements will apply.

The hedge accounting requirements which are more closely aligned with the risk management activities of the Company

No significant change to the Group's hedge accounting is currently anticipated, but this remains under review.

The Group is assessing the impact of IFRS 9 and implementing this standard in conjunction with IFRS 17 as permitted. Further details on IFRS 17 are provided below.

The parent company and a number of intermediate holding companies in the UK and non-insurance subsidiaries in Asia adopted IFRS 9 in 2018 in their individual or separate financial statements where these statements are prepared in accordance with IFRS, including the UK Financial Reporting Standard 101 Reduced Disclosure Framework. The public availability of the financial statements for these entities varies according to the local laws and regulations of each jurisdiction. The results for these entities continue to be accounted for on an IAS 39 basis in these consolidated financial statements.

The fair value of the Group's directly held financial assets at 31 December 2019 and 2018 are shown below. The 2018 comparative information includes financial assets related to M&G plc, which was demerged from the Group in October 2019. Financial assets with contractual terms that give rise on specified dates to cash flows that are solely payments of principal and interest (SPPI) as defined by IFRS 9 are shown separately. This excludes financial assets that meet the definition of held for trading or are managed and evaluated on a fair value basis.

IFRS 17 'Insurance Contracts'

In May 2017, the IASB issued IFRS 17 'Insurance Contracts' to replace the existing IFRS 4 'Insurance Contracts'. The standard, which is subject to endorsement in the EU and other regions, applies to annual periods beginning on or after 1 January 2021. In June 2019, the IASB issued an exposure draft proposing amendments to IFRS 17 which includes a delay of the effective date of IFRS 17 by one year to periods beginning on or after 1 January 2022. As a result of comments on this exposure draft, the IASB redeliberated on a number of areas of the IFRS 17 with an amended standard expected to be issued in mid-2020. The IASB staff have proposed that the IASB Board delay the effective date by a further year to 1 January 2023. The IASB will make a decision on this proposal at its 16-20 March 2020 meeting. Early application of IFRS 17 is permitted after the standard has been endorsed, provided the entity also applies IFRS 9 on or before the date it first applies IFRS 17. The Group intends to adopt the new standard on its mandatory effective date, alongside the adoption of IFRS 9.

IFRS 4 permitted insurers to continue to use the statutory basis of accounting for insurance assets and liabilities that existed in their jurisdictions prior to January 2005. IFRS 17 replaces this with a new measurement model for all insurance contracts.

IFRS 17 requires liabilities for insurance contracts to be recognised as the present value of future cash flows, incorporating an explicit risk adjustment, which is updated at each reporting date to reflect current conditions, and a contractual service margin (CSM) that is initially set equal and opposite to any day-one gain arising on initial recognition. Losses are recognised directly into the income statement. For measurement purposes, contracts are grouped together into contracts of similar risk, profitability profile and issue year, with further divisions for contracts that are managed separately.

Profit for insurance contracts under IFRS 17 is represented by the recognition of the services provided to policyholders in the period (release of the CSM), release from non-economic risk (release of risk adjustment) and investment profit.

The CSM is released as profit over the coverage period of the insurance contract, reflecting the delivery of services to the policyholder. For certain contracts with participating features (where a substantial share of the fair value of the related investments and other underlying items is paid to policyholders), the CSM reflects the variable fee to shareholders. For these contracts, the CSM is adjusted to reflect the changes in economic experience and assumptions. For all other contracts the CSM is only adjusted for non-economic assumptions. The scope of contracts subject to the variable fee remains under consideration by the Group.

A4 Accounting policies continued

A4.2 New accounting pronouncements not yet effective continued

IFRS 17 introduces a new measure of insurance revenue, based on the delivery of services to policyholders and excluding any premiums related to the investment elements of policies, which will be significantly different from existing premium revenue measures, currently reported in the income statement. In order to transition to IFRS 17, the amount of deferred profit, being the CSM at transition date, needs to be determined.

IFRS 17 requires this CSM to be calculated as if the standard had applied retrospectively. However if this is not practical an entity is required to choose either a simplified retrospective approach or to determine the CSM by reference to the fair value of the liabilities at the transition date. The approach for determining the CSM will have a significant impact on both shareholders' equity and on the amount of profits on in-force business in future reporting periods.

IFRS 17 Implementation Programme

IFRS 17 is expected to have a significant impact as the requirements of the new standard are complex and requires a fundamental change to accounting for insurance contracts as well as the application of significant judgement and new estimation techniques. The effect of changes required to the Group's accounting policies as a result of implementing these standards are currently uncertain, particularly as the requirements of the standard continue to be deliberated by the IASB. These changes can be expected to, among other things, alter the timing of IFRS profit recognition. Given the implementation of this standard will involve significant enhancements to IT, actuarial and finance systems of the Group, it will also have an impact on the Group's expenses.

The Group has a Group-wide implementation programme underway to implement IFRS 17 and IFRS 9. The programme is responsible for setting Group-wide accounting policies and developing application methodologies, establishing appropriate processes and controls, sourcing appropriate data and implementing actuarial and finance system changes.

A Group-wide Steering Committee, chaired by the Group Chief Financial Officer and Chief Operating Officer with participation from the Group Risk function and the Group's and business units' senior finance managers, provides oversight and strategic direction to the implementation programme. A number of sub-committees are also in place to provide governance over the technical interpretation and accounting policies selected, programme management, design and delivery of the programme.

The Group is making progress towards providing IFRS 17 financial statements in line with the requirements for interim reporting at its effective date.

Other new accounting pronouncements

In addition to the above, the following new accounting pronouncements have also been issued and are not yet effective but the Group is not expecting them to have a significant impact on the Group's financial statements:

- Revised Conceptual Framework for Financial Reporting, issued in March 2018 and effective from 1 January 2020;
- Amendment to IFRS 3 'Business Combinations' issued in October 2018 and effective from 1 January 2020;
- Amendments to IAS 1 and IAS 8 'Definition of material' issued in October 2018 and effective from 1 January 2020;
- Amendments to IFRS 9, IAS 39 and IFRS 7 'Interest rate benchmark reform' issued in September 2019 and effective from 1 January 2020; and
- Amendments to IAS 1 'Classification of liabilities as current or non-current' issued in January 2020 and effective from 1 January 2022.

For those IASB standards and amendments that have an effective date after 31 December 2020, the Group's financial statements will be prepared in accordance with UK-adopted international accounting standards, which is currently being finalised, instead of EU-endorsed IFRS.

Notes

- (i) For definitions of AER and CER refer to note A1.
- (ii) Interest charged to the income statement on debt that was substituted to M&G plc in October 2019 for 2019 was \$(179) million (2018: \$(128) million).
- (iii) Corporate expenditure as shown above is primarily for head office functions in London and Hong Kong.
- (iv) Restructuring costs include group-wide costs incurred for IFRS 17 implementation in 2019 from continuing operations.
- (v) Amortisation of acquisition accounting adjustments principally relate to the REALIC business of Jackson which was acquired in 2012.
- (vi) Tax charges have been reflected as operating and non-operating in the same way as for the pre-tax items. Further details on tax charges are provided in note B4.

B EARNINGS PERFORMANCE
CONTINUED

B1 Analysis of performance by segment continued

B1.2 Short-term fluctuations in investment returns on shareholder-backed business

| | 2019 \$m | 2018 \$m |
|-------------------------------------|----------------|--------------|
| Asia operations ^{note (i)} | 657 | (684) |
| US operations ^{note (ii)} | (3,757) | (134) |
| Other operations | (103) | 27 |
| Total | (3,203) | (791) |

Notes

(i) *Asia operations*

In Asia, the positive short-term fluctuations of \$657 million (2018: negative \$(684) million) principally reflect net value movements on shareholders' assets and related liabilities following decreases in bond yields during the year.

(ii) *US operations*

The short-term fluctuations in investment returns for US insurance operations are reported net of the related credit for amortisation of deferred acquisition costs of \$1,248 million as shown in note C5.2(i) (2018: debit of \$(152) million) and comprise amounts in respect of the following items:

| | 2019 \$m | 2018 \$m |
|---|----------------|--------------|
| Net equity hedge result ^{note (a)} | (4,582) | (78) |
| Other than equity-related derivatives ^{note (b)} | 678 | (85) |
| Debt securities ^{note (c)} | 156 | (42) |
| Equity-type investments: actual less longer-term return | 18 | 51 |
| Other items | (27) | 20 |
| Total net of related DAC amortisation | (3,757) | (134) |

Notes

(a) *Net equity hedge result*

The purpose of the inclusion of this item in short-term fluctuations in investment returns is to segregate the amount included in pre-tax profit that relates to the accounting effect of market movements on both the value of guarantees in Jackson's variable annuity and fixed index annuity products and on the related derivatives used to manage the exposures inherent in these guarantees. The level of fees recognised in non-operating profit is determined by reference to that allowed for within the reserving basis. The variable annuity guarantees are valued in accordance with either Accounting Standards Codification (ASC) Topic 820, Fair Value Measurements and Disclosures (formerly FAS 157) or ASC Topic 944, Financial Services – Insurance (formerly SOP 03-01) depending on the type of guarantee. Both approaches require an entity to determine the total fee ('the fee assessment') that is expected to fund future projected benefit payments arising using the assumptions applicable for that method. The method under FAS 157 requires this fee assessment to be fixed at the time of issue. As the fees included within the initial fee assessment are earned, they are included in non-operating profit to match the corresponding movement in the guarantee liability. Other guarantee fees are included in operating profit, which in 2019 was \$699 million (2018: \$657 million), net of related DAC amortisation. As the Group applies US GAAP for the measured value of the product guarantees, the net equity hedge result also includes asymmetric impacts where the measurement bases of the liabilities and associated derivatives used to manage the Jackson annuity business differ.

The net equity hedge result therefore includes significant accounting mismatches and other factors that do not represent the economic result. These other factors include:

- The variable annuity guarantees and fixed index annuity embedded options being only partially fair valued under 'grandfathered' US GAAP;
- The interest rate exposure being managed through the other than equity-related derivative programme explained in note (b) below; and
- Jackson's management of its economic exposures for a number of other factors that are treated differently in the accounting frameworks such as future fees and assumed volatility levels.

The net equity hedge result can be summarised as follows:

| | 2019 \$m | 2018 \$m |
|--|----------------|-------------|
| Fair value movements on equity hedge instruments* | (5,314) | 399 |
| Accounting value movements on the variable and fixed index annuity guarantee liabilities | (22) | (1,194) |
| Fee assessments net of claim payments | 754 | 717 |
| Total net of related DAC amortisation | (4,582) | (78) |

* Held to manage equity exposures of the variable annuity guarantees and fixed index annuity options as discussed in the Group Chief Financial Officer and Chief Operating Officer's report.

(b) *Other than equity-related derivatives*

The fluctuations for this item comprise the net effect of:

- Fair value movements on free-standing, other than equity-related derivatives;
- Fair value movements on the Guaranteed Minimum Income Benefit (GMIB) reinsurance asset that are not matched by movements in the underlying GMIB liability, which is not fair valued; and
- Related amortisation of DAC.

The free-standing, other than equity-related derivatives, are held to manage interest rate exposures and durations within the general account and the variable annuity guarantees and fixed index annuity embedded options described in note (a) above. Accounting mismatches arise because of differences between the measurement basis and presentation of the derivatives, which are fair valued with movements recorded in the income statement, and the exposures they are intended to manage.

(c) Short-term fluctuations related to debt securities

| | 2019 \$m | 2018 \$m |
|---|----------|----------|
| (Charges) credits in the year: | | |
| Losses on sales of impaired and deteriorating bonds | (28) | (6) |
| Bond write-downs | (15) | (5) |
| Recoveries/reversals | 1 | 25 |
| Total (charges) credits in the year | (42) | 14 |
| Risk margin allowance deducted from adjusted IFRS operating profit based on longer-term investment returns* | 109 | 104 |
| | 67 | 118 |
| Interest-related realised gains (losses): | | |
| Gains (losses) arising in the year | 220 | (12) |
| Less: Amortisation of gains and losses arising in current and prior years to adjusted IFRS operating profit based on longer-term investment returns | (129) | (155) |
| | 91 | (167) |
| Related amortisation of deferred acquisition costs | (2) | 7 |
| Total short-term fluctuations related to debt securities net of related DAC amortisation | 156 | (42) |

* The debt securities of Jackson are held in the general account of the business. Realised gains and losses are recorded in the income statement with normalised returns included in adjusted IFRS operating profit based on longer-term investment returns with variations from year to year included in the short-term fluctuations category. The risk margin reserve charge for longer-term credit-related losses included in adjusted IFRS operating profit based on longer-term investment returns of Jackson for 2019 is based on an average annual risk margin reserve of 17 basis points (2018: 18 basis points) on average book values of \$62.6 billion (2018: \$57.1 billion) as shown below:

| Moody's rating category (or equivalent under NAIC ratings of mortgage-backed securities) | 2019 | | | 2018 | | |
|--|--------------------|------|----------------------|--------------------|------|----------------------|
| | Average book value | RMR | Annual expected loss | Average book value | RMR | Annual expected loss |
| | \$m | % | \$m | \$m | % | \$m |
| A3 or higher | 38,811 | 0.10 | (38) | 29,982 | 0.10 | (31) |
| Baa1, 2 or 3 | 22,365 | 0.24 | (53) | 25,814 | 0.21 | (55) |
| Ba1, 2 or 3 | 1,094 | 0.85 | (9) | 1,042 | 0.98 | (10) |
| B1, 2 or 3 | 223 | 2.56 | (6) | 289 | 2.64 | (8) |
| Below B3 | 75 | 3.39 | (3) | 11 | 3.69 | - |
| Total | 62,568 | 0.17 | (109) | 57,138 | 0.18 | (104) |
| Related amortisation of deferred acquisition costs | | | 19 | | | 22 |
| Risk margin reserve charge to adjusted IFRS operating profit based on longer-term investment returns for longer-term credit-related losses | | | (90) | | | (82) |

In addition to the accounting for realised gains and losses described above for Jackson general account debt securities, included within the statement of other comprehensive income is a pre-tax gain of \$3,392 million for net unrealised gains on debt securities classified as available-for-sale net of related amortisation of deferred acquisition costs (2018: charge of \$(1,831) million). Temporary market value movements do not reflect defaults or impairments. Additional details of the movement in the value of the Jackson portfolio are included in note C3.2(b).

B1.3 Determining operating segments and performance measure of operating segments

Operating segments

The Group's operating segments for financial reporting purposes are defined and presented in accordance with IFRS 8 'Operating Segments' on the basis of the management reporting structure and its financial management information.

Under the Group's management and reporting structure, its chief operating decision maker is the Group Executive Committee (GEC). In the management structure, responsibility is delegated to the Chief Executive Officers of Prudential Corporation Asia, the North American Business Unit and, up to the date of demerger, M&G plc for the day-to-day management of their business units (within the framework set out in the Group Governance Manual). Financial management information used by the GEC aligns with these business segments. These operating segments derive revenue from both insurance and asset management activities.

On 21 October 2019, the Group completed the demerger of M&G plc from the Prudential plc group, resulting in two separately listed companies. Accordingly, UK and Europe operations do not represent an operating segment at the year end. The results of M&G plc have been reclassified as discontinued operations in these consolidated financial statements in accordance with IFRS 5 'Non-current Assets Held for Sale and Discontinued Operations' and have therefore been excluded in the analysis of performance measure of operating segments.

Operations which do not form part of any business unit are reported as 'Unallocated to a segment'. These include head office costs in London and Hong Kong. The Group's Africa operations and treasury function do not form part of any operating segment under the structure, and their assets and liabilities and profit or loss before tax are not material to the overall financial position of the Group. The Group's treasury function and Africa operations are therefore also reported as 'Unallocated to a segment'.

B1 Analysis of performance by segment continued

B1.3 Determining operating segments and performance measure of operating segments continued

Performance measure

The performance measure of operating segments utilised by the Company is adjusted IFRS operating profit attributable to shareholders based on longer-term investment returns, as described below. This measurement basis distinguishes adjusted IFRS operating profit based on longer-term investment returns from other constituents of total profit for the year as follows:

- Short-term fluctuations in investment returns on shareholder-backed business. This includes the impact of short-term market effects on the carrying value of Jackson's guarantee liabilities and related derivatives as explained below;
- Amortisation of acquisition accounting adjustments arising on the purchase of business. This comprises principally the charge for the adjustments arising on the purchase of REALIC in 2012; and
- Gain or loss on corporate transactions, such as disposals undertaken in the year and costs connected to the demerger of M&G plc from Prudential plc.

Determination of adjusted IFRS operating profit based on longer-term investment returns for investment and liability movements

(a) With-profits business

For Asia's with-profits business in Hong Kong, Singapore and Malaysia, the adjusted IFRS operating profit based on longer-term investment returns reflects the shareholders' share in the bonuses declared to policyholders. Value movements in the underlying assets of the with-profits funds only affect the shareholder results through indirect effects of investment performance on declared policyholder bonuses and therefore, do not affect directly the determination of adjusted IFRS operating profit based on longer-term investment returns.

(b) Unit-linked business including the US variable annuity separate accounts

The policyholder unit liabilities are directly reflective of the underlying asset value movements. Accordingly, the adjusted IFRS operating profit based on longer-term investment returns reflect the current period value movements in both the unit liabilities and the backing assets.

(c) US variable annuity and fixed index annuity business

This business has guarantee liabilities which are measured on a combination of fair value and other US GAAP derived principles. These liabilities are subject to an extensive derivative programme to manage equity and interest rate exposures whose fair value movements pass through the income statement each period.

The following value movements for Jackson's variable and fixed index annuity business are excluded from adjusted IFRS operating profit based on longer-term investment returns. See note B1.2 note (ii):

- Fair value movements for equity-based derivatives;
- Fair value movements for guaranteed benefit options for the 'not for life' portion of Guaranteed Minimum Withdrawal Benefit (GMWB) and fixed index annuity business, and Guaranteed Minimum Income Benefit (GMIB) reinsurance (see below);
- Movements in the accounts carrying value of Guaranteed Minimum Death Benefit (GMDB), GMIB and the 'for life' portion of GMWB liabilities, (see below) for which, under the 'grandfathered' US GAAP applied under IFRS for Jackson's insurance assets and liabilities, the measurement basis gives rise to a muted impact of current period market movements (ie they are relatively insensitive to the effect of current period equity market and interest rate changes);
- A portion of the fee assessments as well as claim payments, in respect of guarantee liabilities; and
- Related amortisation of deferred acquisition costs for each of the above items.

Guaranteed benefit options for the 'not for life' portion of GMWB and equity index options for the fixed index annuity business

The 'not for life' portion of GMWB guaranteed benefit option liabilities is measured under the US GAAP basis applied for IFRS in a manner consistent with IAS 39 under which the projected future growth rate of the account balance is based on the greater of US Treasury rates and current swap rates (rather than expected rates of return) with only a portion of the expected future guarantee fees included. Reserve value movements on these liabilities are sensitive to changes to levels of equity markets, implied volatility and interest rates. The equity index option for fixed index annuity business is measured under the US GAAP basis applied for IFRS in a manner consistent with IAS 39 under which the projected future growth is based on current swap rates.

Guaranteed benefit option for variable annuity guarantee minimum income benefit

The GMIB liability, which is substantially reinsured, subject to a deductible and annual claim limits, is accounted for using 'grandfathered' US GAAP. This accounting basis substantially does not recognise the effects of market movements. The corresponding reinsurance asset is measured under the 'grandfathered' US GAAP basis applied for IFRS in a manner consistent with IAS 39 'Financial Instruments: Recognition and Measurement', and the asset is therefore recognised at fair value. As the GMIB is economically reinsured, the mark to market element of the reinsurance asset is included as a component of short-term fluctuations in investment returns.

(d) Policyholder liabilities that are sensitive to market conditions

Under IFRS, the degree to which the carrying values of liabilities to policyholders are sensitive to current market conditions varies between business units depending upon the nature of the 'grandfathered' measurement basis.

Movements in liabilities for some types of business do require bifurcation between the elements that relate to longer-term market condition and short-term effects to ensure that at the net level (ie after allocated investment return and charge for policyholder benefits) the adjusted IFRS operating profit based on longer-term investment returns reflects longer-term market returns.

For certain Asia non-participating business, for example in Hong Kong, the economic features are more akin to asset management products with policyholder liabilities reflecting asset shares over the contract term. Consequently, for these products, the charge for policyholder benefits in the adjusted IFRS operating profit based on longer-term investment returns reflects the asset share feature rather than volatile movements that would otherwise be reflected if the local regulatory basis (as applied for the IFRS balance sheet) was used.

For other types of Asia non-participating business, expected longer-term investment returns and interest rates are used to determine the movement in policyholder liabilities for determining adjusted IFRS operating profit based on longer-term investment returns. This ensures assets and liabilities are reflected on a consistent basis.

(e) Assets backing other shareholder-financed long-term insurance business

Except in the case of assets backing liabilities which are directly matched (such as unit-linked business) adjusted IFRS operating profit based on longer-term investment returns for assets backing shareholder-financed business is determined on the basis of expected longer-term investment returns. Longer-term investment returns comprise actual income receivable for the period (interest/dividend income) and for both debt and equity-type securities longer-term capital returns.

Debt securities and loans

In principle, for debt securities and loans, the longer-term capital returns comprise two elements:

- Risk margin reserve based charge for the expected level of defaults for the period, which is determined by reference to the credit quality of the portfolio. The difference between impairment losses in the reporting period and the risk margin reserve charge to the adjusted IFRS operating profit based on longer-term investment returns is reflected in short-term fluctuations in investment returns; and
- The amortisation of interest-related realised gains and losses to adjusted IFRS operating profit based on longer-term investment returns to the date when sold bonds would have otherwise matured.

At 31 December 2019, the level of unamortised interest-related realised gains and losses related to previously sold bonds for the Group was a net gain of \$916 million (2018: \$776 million).

For Asia insurance operations, realised gains and losses are principally interest related. Accordingly, all realised gains and losses to date for these operations are amortised over the period to the date those securities would otherwise have matured, with no explicit risk margin reserve charge.

For US insurance operations, Jackson has used the ratings by Nationally Recognised Statistical Ratings Organisations (NRSRO) or ratings resulting from the regulatory ratings detail issued by the National Association of Insurance Commissioners (NAIC) to determine the average annual risk margin reserve to apply to debt securities held to back general account business. Debt securities held to back separate account and reinsurance funds withheld are not subject to risk margin reserve charge. Further details of the risk margin reserve charge, as well as the amortisation of interest-related realised gains and losses, for Jackson are shown in note B1.2 note (ii)(c).

B1 Analysis of performance by segment continued

B1.3 Determining operating segments and performance measure of operating segments continued

Equity-type securities

For equity-type securities, the longer-term rates of return are estimates of the long-term trend investment returns for income and capital having regard to past performance, current trends and future expectations. Different rates apply to different categories of equity-type securities.

For Asia insurance operations, investments in equity securities held for non-linked shareholder-backed business amounted to \$3,473 million as at 31 December 2019 (31 December 2018: \$2,733 million). The rates of return applied in 2019 ranged from 5.0 per cent to 17.6 per cent (2018: 5.3 per cent to 17.6 per cent) with the rates applied varying by business unit. These rates are broadly stable from year to year but may be different between regions, reflecting, for example, differing expectations of inflation in each local business unit. The assumptions are for the returns expected to apply in equilibrium conditions. The assumed rates of return do not reflect any cyclical variability in economic performance and are not set by reference to prevailing asset valuations.

The longer-term investment returns for the Asia insurance joint ventures and associate accounted for using the equity method are determined on a similar basis as the other Asia insurance operations described above.

For US insurance operations, as at 31 December 2019, the equity-type securities for non-separate account operations amounted to \$1,481 million (31 December 2018: \$1,731 million). For these operations, the longer-term rates of return for income and capital applied in the years indicated, which reflect the combination of the average risk-free rates over the year and appropriate risk premiums are as follows:

| | 2019 | 2018 |
|---|--------------|--------------|
| Equity-type securities such as common and preferred stock and portfolio holdings in mutual funds | 5.5% to 6.7% | 6.7% to 7.2% |
| Other equity-type securities such as investments in limited partnerships and private equity funds | 7.5% to 8.7% | 8.7% to 9.2% |

Derivative value movements

Generally, derivative value movements are excluded from adjusted IFRS operating profit based on longer-term investment returns. The exception is where the derivative value movements broadly offset changes in the accounting value of other assets and liabilities included in adjusted IFRS operating profit based on longer-term investment returns. The principal example of derivatives whose value movements are excluded from adjusted IFRS operating profit based on longer-term investment returns arises in Jackson.

Equity-based derivatives held by Jackson are as discussed above in section (c) above. Non-equity based derivatives held by Jackson are part of a broad-based hedging programme for features of Jackson's bond portfolio (for which value movements are booked in the statement of other comprehensive income rather than the income statement), product liabilities (for which US GAAP accounting as 'grandfathered' under IFRS 4 does not fully reflect the economic features being hedged), and the interest rate exposure attaching to equity-based product options.

(f) Fund management and other non-insurance businesses

For these businesses, the determination of adjusted IFRS operating profit based on longer-term investment returns reflects the underlying economic substance of the arrangements. Generally, realised gains and losses are included in adjusted IFRS operating profit based on longer-term investment returns with temporary unrealised gains and losses being included in short-term fluctuations. In some instances, realised gains and losses on derivatives and other financial instruments are amortised to adjusted IFRS operating profit based on longer-term investment returns over a time period that reflects the underlying economic substance of the arrangements.

B1.4 Segmental income statement

Premiums for conventional with-profits policies and other protection type insurance policies are recognised as revenue when due. Premiums and annuity considerations for linked policies, unitised with-profits and other investment type policies are recognised as revenue when received or, in the case of unitised or unit-linked policies, when units are issued. These amounts exclude premium taxes and similar duties where Prudential collects and settles taxes borne by the policyholder.

Policy fees charged on linked and unitised with-profits policies for mortality, asset management and policy administration are recognised as revenue when related services are provided.

Claims paid include maturities, annuities, surrenders and deaths. Maturity claims are recorded as charges on the policy maturity date. Annuity claims are recorded when each annuity instalment becomes due for payment. Surrenders are charged to the income statement when paid and death claims are recorded when notified.

Notes

- (i) Included within other income is revenue from the Group's continuing asset management business of \$453 million (2018: \$287 million). The remaining other income consists primarily of policy fee income from external customers. Other income also includes \$3 million (2018: \$7 million) relating to the fee income on financial instruments that are not held at fair value through profit or loss.
- (ii) In Asia, external revenue from no one individual market exceeds 10 per cent of the Group total except for Hong Kong in both 2019 and 2018 and Singapore in 2019. Total external revenue of Hong Kong is \$9,821 million (2018: \$10,307 million) and Singapore is \$4,401 million.
- (iii) Due to the nature of the business of the Group, there is no reliance on any major customers.
- (iv) Interest income includes \$4 million (2018: \$5 million) accrued in respect of impaired securities.
- (v) This measure is the formal profit (loss) before tax measure under IFRS but is not the result attributable to shareholders.
- (vi) Unallocated to a segment includes central operations (Head Office functions and Group borrowings), the Group's treasury function and Africa operations.
- (vii) In October 2018, Jackson entered into a 100 per cent reinsurance agreement with John Hancock Life Insurance Company (John Hancock USA) to acquire a closed block of group pay-out annuity business. The transaction resulted in an addition to gross premiums earned of \$5.0 billion and a corresponding increase in benefits and claims of \$5.5 billion for the increase in policyholder liabilities and a decrease in other operating expenditure for negative ceding commissions of \$0.5 billion at the inception of the contract. There was no material impact on adjusted IFRS operating profit based on longer-term investment returns or total profit as a result of the transaction.

B1.5 Other investment return

Investment return included in the income statement principally comprises interest income, dividends, investment appreciation and depreciation (realised and unrealised gains and losses) on investments designated as fair value through profit or loss, and realised gains and losses (including impairment losses) on items held at amortised cost and Jackson's debt securities designated as available-for-sale. Movements in unrealised appreciation or depreciation of debt securities designated as available-for-sale are recorded in other comprehensive income. Interest income is recognised as it accrues, taking into account the effective yield on investments. Dividends on equity securities are recognised on the ex-dividend date and rental income is recognised on an accrual basis.

| | 2019 \$m | 2018 \$m |
|---|----------|----------|
| Realised and unrealised gains (losses) on securities at fair value through profit or loss | 49,809 | (14,867) |
| Realised and unrealised (losses) gains on derivatives at fair value through profit or loss | (5,825) | 705 |
| Realised gains on available-for-sale securities, including impairment previously recognised in other comprehensive income | 185 | 15 |
| Realised (losses) on loans | (3) | (1) |
| Dividends | 1,000 | 740 |
| Other investment (loss) income | (218) | 81 |
| Other investment return | 44,948 | (13,327) |

Realised gains and losses on the Group's investments for 2019 recognised in the income statement amounted to a net loss of \$2.0 billion (2018: a net gain of \$2.5 billion) from continuing operations.

| | (757) | 32 | – | (725) | 2,322 |

* In October 2018, Jackson entered into an agreement with John Hancock Life to reinsure 100 per cent of the group pay-out annuity business. The transaction resulted in an addition to gross premiums earned of \$5.0 billion and a corresponding increase in benefits and claims of \$5.5 billion for the increase in policyholder liabilities and a decrease in other operating expenditure for negative ceding commissions of \$0.5 billion at the inception of the contract. There was no material impact on adjusted IFRS operating profit based on longer-term investment returns or total profit as a result of the transaction.

B2 Acquisition costs and other expenditure

| | 2019 \$m | 2018 \$m |
|---|----------------|----------------|
| Acquisition costs incurred for insurance policies | (4,177) | (4,313) |
| Acquisition costs deferred less amortisation of acquisition costs ^{note (i)} | 2,116 | 59 |
| Administration costs and other expenditure ^{* notes (ii),(iii)} | (5,019) | (3,877) |
| Movements in amounts attributable to external unit holders of consolidated investment funds | (203) | (396) |
| Total acquisition costs and other expenditure from continuing operations | (7,283) | (8,527) |

* The 2018 administration costs and other expenditure included a credit of \$0.5 billion for the negative ceding commissions arising from the group payout annuity business reinsurance agreement entered into by Jackson with John Hancock in 2018.

Notes

- (i) The credit for acquisition costs deferred less amortisation of those costs of \$2,116 million (2018: \$59 million) arises in Asia operations of \$358 million (2018: \$362 million) and in US operations of \$1,758 million (2018: a charge of \$(303) million) as set out in note C5.2. The credit of \$1,758 million for US operations (2018: a charge of \$(303) million) comprises additional costs deferred in the year of \$807 million (2018: \$759 million) driven by higher new business sales and a credit of \$951 million (2018: a charge of \$(1,062) million) for DAC amortisation, driven by the hedging losses arising in 2019.
- (ii) During the year, the Group paid \$182 million of upfront fees to modify the terms and condition of two subordinated debt instruments, which are expensed to the income statement as described in note C6.1. All other fee expenses relating to financial liabilities held at amortised cost in 2019 and 2018 are part of the determination of the effective interest rate and are included in 'Administration costs and other expenditure' above.
- (iii) Total depreciation and amortisation expense is included in 'Acquisition costs incurred for insurance policies', 'Administration costs and other expenditure' and 'Acquisition costs deferred less amortisation of acquisition costs' and relates primarily to amortisation of deferred acquisition costs of insurance contracts and asset management contracts. The segmental analysis of interest expense (other than interest expense in core structural borrowings) and depreciation and amortisation included within total acquisition costs and other expenditure was as follows:

| | Other interest expense | | Depreciation and amortisation | |
|---|------------------------|--------------|-------------------------------|----------------|
| | 2019* \$m | 2018 \$m | 2019* \$m | 2018 \$m |
| Asia operations: | | | | |
| Insurance | (13) | – | (641) | (482) |
| Asset management | – | – | (14) | (5) |
| US operations: | | | | |
| Insurance | (264) | (212) | 901 | (1,110) |
| Asset management | (2) | – | (4) | (8) |
| Total segment | (279) | (212) | 242 | (1,605) |
| Unallocated to a segment (other operations) | (27) | (38) | (30) | (3) |
| Total continuing operations | (306) | (250) | 212 | (1,608) |

* In 2019, these amounts also include interest on lease liabilities of \$20 million and depreciation on right-of-use assets of \$141 million recognised under IFRS 16.

B2.1 Staff and employment costs

The average number of staff employed by the Group, for both continuing and discontinued operations, during the years shown was:

| | 2019 | 2018 |
|---|---------------|---------------|
| Asia operations | 14,471 | 16,798 |
| US operations | 4,014 | 4,285 |
| Other operations* | 519 | 676 |
| Total continuing operations | 19,004 | 21,759 |
| Discontinued UK and Europe operations† | 5,672 | 6,447 |
| Total Group | 24,676 | 28,206 |

* The Other operations' staff numbers include staff from central operations and Africa which are unallocated to a segment.

† Average staff numbers of the discontinued UK and Europe operations are for the period up to the demerger in October 2019.

The costs of employment, for both continuing and discontinued operations, were:

| | 2019 \$m | | | 2018 \$m | | |
|------------------------------|--------------|--------------|--------------|--------------|--------------|--------------|
| | Continuing | Discontinued | Group total | Continuing | Discontinued | Group total |
| Wages and salaries | 1,435 | 573 | 2,008 | 1,517 | 694 | 2,211 |
| Social security costs | 53 | 68 | 121 | 71 | 84 | 155 |
| Defined benefit schemes* | (91) | (5) | (96) | 7 | (46) | (39) |
| Defined contribution schemes | 69 | 41 | 110 | 77 | 50 | 127 |
| Total Group† | 1,466 | 677 | 2,143 | 1,672 | 782 | 2,454 |

* The charge (credit) incorporated the effect of actuarial gains and losses. Post-demerger of the UK and Europe operations, the Group's defined benefit schemes costs are expected to be negligible. See note C9.

† Total costs of employment in the table above include the costs of employment of the discontinued UK and Europe operations up to the demerger in October 2019.

B2 Acquisition costs and other expenditure continued

B2.2 Share-based payment

The Group offers discretionary share awards to certain key employees and all-employee share plans for all UK and a number of Asian locations.

The compensation expense charged to the income statement is primarily based upon the fair value of the options granted, the vesting period and the vesting conditions.

The Company has established trusts to facilitate the delivery of Prudential plc shares under these plans. The cost to the Company of acquiring these newly issued shares held in trusts is shown as a deduction from shareholders' equity.

(a) Description of the plans

The Group operates a number of share award plans that provides Prudential plc shares, or ADRs, to participants upon vesting. The plans in operation include the Prudential Long Term Incentive Plan (PLTIP), the Prudential Annual Incentive Plan (AIP), savings-related share option schemes, share purchase plans and deferred bonus plans. Where Executive Directors participate in these plans, details are provided in the Directors' remuneration report. In addition, the following information is provided.

| Share scheme | Description |
|--|--|
| Prudential Corporation Asia Long-Term Incentive Plan (PCA LTIP) | The PCA LTIP provides eligible employees with conditional awards. Awards are discretionary and vest after three years subject to the employee being in employment. Vesting of awards may also be subject to performance conditions. All awards are generally made in Prudential shares, or ADRs. In countries where share awards are not feasible due to securities and/or tax considerations, awards will be replaced by the cash value of the shares that would otherwise have vested. |
| Prudential Agency Long-Term Incentive Plan | Certain agents in Asia are eligible to be granted awards under the Prudential Agency Long-Term Incentive Plan. These awards are structured in a similar way to the PCA LTIP described above. |
| Restricted Share Plan (RSP) | The Company operates the RSP for certain employees. Awards under this plan are discretionary, and the vesting of awards may be subject to performance conditions. All awards are made in Prudential shares or ADRs. |
| Deferred bonus plans | The Company operates a number of deferred bonus plans including the Group Deferred Bonus Plan (GDBP) and the Prudential Corporation Asia Deferred Bonus Plan (PCA DBP). There are no performance conditions attached to deferred share awards made under these arrangements. |
| Savings-related share option schemes | Employees and eligible agents in a number of geographies are eligible for plans similar to the HMRC-approved Save As You Earn (SAYE) share option scheme in the UK. During the year ended 31 December 2019 eligible employees participated in the International Savings-Related Share Option Scheme while eligible agents based in certain regions of Asia can participate in the International Savings-Related Share Option Scheme for Non-Employees. |
| Share purchase plans | Eligible employees outside the UK are invited to participate in arrangements similar to the Company's HMRC-approved UK SIP, which allows the purchase of Prudential plc shares. Staff based in Asia are eligible to participate in the Prudential Corporation Asia All Employee Share Purchase Plan. |

(b) Outstanding options and awards

The following table shows the movement in outstanding options and awards under the Group's share-based compensation plans:

| | Options outstanding under SAYE schemes | | | | Awards outstanding under incentive plans | |
|--|--|---|----------------------------------|--|--|-------|
| | 2019 | | 2018 | | 2019 | 2018 |
| | Number of options millions | Weighted average exercise price £ | Number of options millions | Weighted average exercise price £ | Number of awards millions | |
| Balance at beginning of year: | 4.9 | 12.10 | 6.4 | 11.74 | 32.8 | 33.6 |
| Granted | 0.6 | 11.13 | 0.3 | 13.94 | 13.4 | 10.7 |
| Modification | 0.3 | 11.95 | – | – | 4.3 | – |
| Exercised | (1.7) | 10.87 | (1.4) | 10.85 | (9.8) | (8.7) |
| Forfeited | – | 12.87 | (0.1) | 12.25 | (2.5) | (2.6) |
| Cancelled | (0.1) | 12.82 | (0.2) | 12.43 | (0.7) | – |
| Lapsed/Expired | (0.1) | 12.93 | (0.1) | 12.60 | (1.0) | (0.2) |
| M&G plc awards derecognised on demerger | (0.1) | 13.37 | – | – | (3.5) | – |
| Balance at end of year | 3.8 | 12.38 | 4.9 | 12.10 | 33.0 | 32.8 |
| Options immediately exercisable at end of year | 0.9 | 11.33 | 0.8 | 10.37 | | |

On demerger of the M&G plc business from the Prudential Group, outstanding share / ADR awards for Prudential plc participants were adjusted to receive the demerger dividend in the form of additional Prudential plc shares / ADRs, to be released on the same timetable and to the same extent as their original share awards. In the case of the International Savings-Related Share Option Scheme for Non-Employees the adjustments to outstanding options were confirmed as being fair and reasonable by an independent financial adviser in accordance with the rules of that plan and the Hong Kong Stock Exchange Listing Rules.

Employees of M&G plc were granted replacement awards over M&G plc shares, in exchange for existing Group awards outstanding under incentive plans. As designated replacement awards were granted, no cancellation was recognised in respect of the original awards. As the replacement awards are an obligation of M&G plc, these awards were derecognised by the Group on demerger.

M&G plc employees with outstanding SAYE options on demerger were treated as 'good leavers', with both the vesting period and number of options exercisable curtailed on demerger.

The weighted average share price of Prudential plc for 2019 was £15.05 (2018: £17.36).

The following table provides a summary of the range of exercise prices for Prudential plc options outstanding at 31 December:

| | Outstanding | | | | | | Exercisable | | | |
|---------------------|----------------------------------|------|---|------|--|-------|----------------------------------|------|--|-------|
| | Number outstanding (millions) | | Weighted average remaining contractual life (years)* | | Weighted average exercise prices £ | | Number exercisable (millions) | | Weighted average exercise prices £ | |
| | 2019 | 2018 | 2019 | 2018 | 2019 | 2018 | 2019 | 2018 | 2019 | 2018 |
| Between £9 and £10 | – | 0.3 | – | 0.4 | – | 9.01 | – | 0.3 | – | 9.01 |
| Between £11 and £12 | 2.4 | 3.0 | 2.0 | 1.6 | 11.19 | 11.19 | 0.9 | 0.5 | 11.33 | 11.11 |
| Between £13 and £14 | 0.3 | 0.3 | 3.2 | 4.1 | 13.94 | 13.94 | – | – | – | – |
| Between £14 and £15 | 1.1 | 1.3 | 2.0 | 2.6 | 14.55 | 14.55 | – | – | – | – |
| Weighted average | 3.8 | 4.9 | 2.1 | 2.1 | 12.38 | 12.10 | 0.9 | 0.8 | 11.33 | 10.37 |

* The years shown above for weighted average remaining contractual life include the time period from end of vesting period to expiration of contract.

B2 Acquisition costs and other expenditure continued

B2.2 Share-based payment continued

(c) Fair value of options and awards

The fair value amounts estimated on the date of grant relating to all options and awards were determined by using the following assumptions:

| | 2019 | | | | 2018 | | |
|--|--------------------------|-------------------------------|--------------------------------|-----------------|--------------------------|-----------------|-----------------|
| | Prudential LTIP (TSR) | SAYE options | | | Prudential LTIP (TSR) | SAYE options | Other awards |
| | | Granted in October 2019 | Granted in November 2019 | Other awards | | | |
| Dividend yield (%) | – | 3.66 | 2.10 | – | – | 2.52 | – |
| Expected volatility (%) | 22.14 | 25.58 | 23.92 | – | 24.03 | 21.09 | – |
| Risk-free interest rate (%) | 0.97 | 0.31 | 1.60 | – | 1.19 | 0.97 | – |
| Expected option life (years) | – | 3.96 | 3.47 | – | – | 3.94 | – |
| Weighted average exercise price (£) | – | 11.12 | 11.18 | – | – | 13.94 | – |
| Weighted average share price at grant date (£) | 16.07 | 13.94 | 13.77 | – | 17.46 | 16.64 | – |
| Weighted average fair value at grant date (£) | 6.32 | 2.90 | 3.35 | 15.39 | 6.64 | 3.29 | 17.04 |

The compensation costs for all awards and options are recognised in net income over the plans' respective vesting periods. The Group uses the Black-Scholes model to value all options and awards other than those which have TSR performance conditions attached (some Prudential LTIP and RSP awards) for which the Group uses a Monte Carlo model in order to allow for the impact of these conditions. These models are used to calculate fair values for share options and awards at the grant date based on the quoted market price of the stock at the measurement date, the amount, if any, that the employees are required to pay, the dividend yield, expected volatility, risk-free interest rates and exercise prices.

For all options and awards, the expected volatility is based on the market implied volatilities as quoted on Bloomberg. The Prudential specific at-the-money implied volatilities are adjusted to allow for the different terms and discounted exercise price on SAYE options by using information on the volatility surface of the FTSE 100.

Risk-free interest rates are taken from swap spot rates with projections for two-year, three-year and five-year terms to match corresponding vesting periods. For 2019 awards issued prior to demerger, dividend yields are determined as the average yield over a period of 12 months up to and including the date of grant, and data is based on sterling risk free rates. For 2019 awards issued after demerger, dividend yields are estimated based on £750 million target dividend included in the demerger investor circular and data is based on US dollar risk free rates. For awards with a TSR condition, volatilities and correlations between Prudential and a basket of 12 competitor companies is required. For grants in 2019, the average volatility for the basket of competitors was 23.10 per cent (2018: 21.32 per cent). Correlations for the basket are calculated for each pairing from the log of daily TSR returns for the three years prior to the valuation date. Market implied volatilities are used for both Prudential and the basket of competitors. Changes to the subjective input assumptions could materially affect the fair value estimate.

(d) Share-based payment expense charged to the income statement

Total expense recognised in 2019 in the consolidated financial statements relating to share-based compensation is \$181 million (2018: \$191 million), all accounted for as equity-settled.

The Group has no liabilities outstanding at the year-end relating to awards that are settled in cash.

B2.3 Key management remuneration

Key management constitutes the Directors of Prudential plc as they have authority and responsibility for planning, directing and controlling the activities of the Group and following reorganisations during 2019, key management also includes other non-director members of the Group Executive Committee from August 2019.

Total key management remuneration is analysed in the following table:

| | 2019 \$m | 2018 \$m |
|----------------------------------|----------|----------|
| Salaries and short-term benefits | 25.2 | 22.0 |
| Post-employment benefits | 1.5 | 2.0 |
| Share-based payments | 13.1 | 19.0 |
| | 39.8 | 43.0 |

The share-based payments charge comprises \$8.4 million (2018: \$13.0 million), which is determined in accordance with IFRS 2 'Share-based Payment' (see note B2.2) and \$4.8 million (2018: \$6.4 million) of deferred share awards.

B2.4 Fees payable to the auditor

| | 2019 \$m | 2018 \$m |
|--|-------------|-------------|
| Fees payable to the Company's auditor for the audit of the Company's annual accounts | 2.2 | 2.8 |
| Fees payable to the Company's auditor and its associates for other services: | | |
| Audit of subsidiaries pursuant to legislation | 9.5 | 12.3 |
| Audit-related assurance services* | 5.7 | 6.3 |
| Other assurance services | 5.7 | 1.5 |
| Services relating to corporate finance transactions | 7.3 | 0.3 |
| All other services | – | 1.2 |
| Total fees paid to the auditor | 30.4 | 24.4 |
| Analysed into: | | |
| Fees payable to the auditor attributable to the continuing operations: | | |
| Non-audit services associated with the demerger of the UK and Europe operations† | 11.7 | 1.0 |
| Other audit and non-audit services | 15.3 | 15.1 |
| Fees payable to the auditor attributable to the discontinued UK and Europe operations | 27.0 | 16.1 |
| | 3.4 | 8.3 |
| | 30.4 | 24.4 |

* Of the audit-related assurance service fees of \$5.7 million in 2019 (2018: \$6.3 million), \$1.1 million relates to services that are required by law.

† Of the \$11.7 million one-off non-audit services fees in 2019 associated with the demerger of the UK and Europe operations, \$4.4 million was for other assurance services and \$7.3 million was for services relating to corporate finance transactions. In 2018, the \$1.0 million was for all other services associated with the preparation for the demerger.

In addition, there were fees incurred by pension schemes of \$0.1 million (2018: \$0.3 million) for audit services. These pension schemes were transferred to UK and Europe operations in 2019 as part of the demerger.

B3 Effect of changes and other accounting matters on insurance assets and liabilities

The following matters are relevant to the determination of the 2019 results:

(a) Asia insurance operations

In 2019, the adjusted IFRS operating profit based on longer-term investment returns for Asia insurance operations includes a net credit of \$142 million (2018: credit of \$126 million) representing a small number of items that are not expected to reoccur, including the impact of a refinement to the run-off of the allowance for prudence within technical provisions.

(b) US insurance operations

Changes in the policyholder liabilities held for variable and fixed index annuity guarantees are reported as part of non-operating profit and are as described in note B1.2.

B4 Tax charge from continuing operations

Prudential is subject to tax in numerous jurisdictions and the calculation of the total tax charge inherently involves a degree of estimation and judgement. Current tax expense is charged or credited based upon amounts estimated to be payable or recoverable as a result of taxable amounts for the current year and adjustments made in relation to prior years. The positions taken in tax returns where applicable tax regulation is subject to interpretation are recognised in full in the determination of the tax charge in the financial statements if the Group considers that it is probable that the taxation authority will accept those positions. Otherwise, provisions are established based on management's estimate and judgement of the likely amount of the liability, or recovery by providing for the single best estimate of the most likely outcome or the weighted average expected value where there are multiple outcomes.

The total tax charge includes tax expense attributable to both policyholders and shareholders. The tax expense attributable to policyholders comprises the tax on the income of the consolidated with-profits and unit-linked funds. In certain jurisdictions, life insurance companies are taxed on both their shareholders' profits and on their policyholders' insurance and investment returns on certain insurance and investment products. Although both types of tax are included in the total tax charge in the Group's consolidated income statement, they are presented separately in the consolidated income statement to provide the most relevant information about tax that the Group pays on its profits.

Deferred taxes are provided under the liability method for all relevant temporary differences. IAS 12 'Income Taxes' does not require all temporary differences to be provided for, in particular, the Group does not provide for deferred tax on undistributed earnings of subsidiaries where the Group is able to control the timing of the distribution and the temporary difference created is not expected to reverse in the foreseeable future. Deferred tax assets are only recognised when it is more likely than not that future taxable profits will be available against which these losses can be utilised.

Deferred tax is measured at the tax rates that are expected to apply to the period when the asset is realised or the liability settled, based on tax rates (and laws) that have been enacted or are substantively enacted at the end of the reporting period.

B4 Tax charge from continuing operations continued

B4.1 Total tax charge by nature of expense

The total tax charge for continuing operations in the income statement is as follows:

| Tax charge | 2019 \$m | | | 2018 \$m |
|---|--------------|--------------|--------------|--------------|
| | Current tax | Deferred tax | Total | Total |
| Attributable to shareholders: | | | | |
| Asia operations | (306) | (162) | (468) | (369) |
| US operations | (307) | 652 | 345 | (340) |
| Other operations | 182 | (28) | 154 | 140 |
| Tax (charge) credit attributable to shareholders' returns | (431) | 462 | 31 | (569) |
| Attributable to policyholders: | | | | |
| Asia operations | (130) | (235) | (365) | (107) |
| Total tax (charge) credit | (561) | 227 | (334) | (676) |

The principal reason for the decrease in the tax charge attributable to shareholders' returns from continuing operations is the increase in the tax credit on US derivative losses which largely offset the tax charge on Asia profits in 2019.

The reconciliation of the expected to actual tax charge attributable to shareholders is provided in B4.2 below. The tax charge attributable to policyholders of \$365 million above is equal to the profit before tax attributable to policyholders of \$365 million. This is the result of accounting for policyholder income after the deduction of expenses and movement on unallocated surpluses on an after-tax basis.

The total tax (charge) credit comprises:

| | 2019 \$m | 2018 \$m |
|---|--------------|--------------|
| Current tax expense: | | |
| Corporation tax | (589) | (380) |
| Adjustments in respect of prior years | 28 | 15 |
| Total current tax charge | (561) | (365) |
| Deferred tax arising from: | | |
| Origination and reversal of temporary differences | 235 | (331) |
| Impact of changes in local statutory tax rates | 7 | 11 |
| Credit in respect of a previously unrecognised tax loss, tax credit or temporary difference from a prior period | (15) | 9 |
| Total deferred tax credit (charge) | 227 | (311) |
| Total tax charge | (334) | (676) |

The reduction in the deferred tax charge from \$311 million in 2018 to a credit of \$227 million in 2019 principally relates to the increase in the tax credit on US derivative losses, which are tax deductible over a three year period.

In 2019, a tax charge of \$709 million (2018: charge of \$387 million from continuing operations), principally relating to an increase in the market value on securities of US insurance operations classified as available-for-sale, has been taken through other comprehensive income.

B4.2 Reconciliation of shareholder effective tax rate for continuing operations

In the reconciliation below, the expected tax rates reflect the corporation tax rates that are expected to apply to the taxable profit or loss of the relevant business. Where there are profits or losses of more than one jurisdiction, the expected tax rates reflect the corporation tax rates weighted by reference to the amount of profit or loss contributing to the aggregate business result.

| | 2019 | | | | | 2018 | |
|--|------------------------|----------------------|--------------------------|---|-------------------------------|---|-------------------------------|
| | Asia operations \$m | US operations \$m | Other operations* \$m | Total attributable to shareholders \$m | Percentage impact on ETR % | Total attributable to shareholders \$m | Percentage impact on ETR % |

B4 Tax charge from continuing operations continued

B4.2 Reconciliation of shareholder effective tax rate for continuing operations continued

Notes

- (i) The \$125 million (2018: \$111 million) reconciling item in US operations reflects the impact of the dividend received deduction on the taxation of profits from variable annuity business. The principal reason for the increase in the Asia operations reconciling items from \$17 million in 2018 to \$192 million in 2019 reflects an increase in investment gains in Hong Kong which are not taxable due to the taxable profit being computed as 5 per cent of net insurance premiums.
- (ii) The \$46 million adverse reconciling item in unrecognised tax losses reflects losses arising after the demerger of the Group's UK and Europe operations where it is unlikely that relief for the losses will be available in future periods.
- (iii) Profit before tax includes Prudential's share of profit after tax from the joint ventures and associates. Therefore, the actual tax charge does not include tax arising from profit or loss of joint ventures and associates and is reflected as a reconciling item.
- (iv) The \$59 million (2018: \$63 million) adverse reconciling items reflects local withholding taxes on dividends paid by certain non-UK subsidiaries, principally Indonesia, to the UK. The dividends are exempt from UK tax and consequently the withholding tax cannot be offset against UK tax payments.
- (v) The complexity of the tax laws and regulations that relate to our businesses means that from time to time we may disagree with tax authorities on the technical interpretation of a particular area of tax law. This uncertainty means that in the normal course of business the Group will have matters where, upon ultimate resolution of the uncertainty, the amount of profit subject to tax may be greater than the amounts reflected in the Group's submitted tax returns. The statement of financial position contains the following provisions in relation to open tax matters.

| | \$m |
|--|-----|
| Balance at beginning of year | 190 |
| Movements in the current year included in: | |
| Tax charge attributable to shareholders | (1) |
| Other movements* | 9 |
| Balance at end of year | 198 |

* Other movements include interest arising on open tax matters and amounts included in the Group's share of profits from joint ventures and associates, net of related tax.

- (vi) The \$76 million adverse reconciling items in Demerger related activities relates to non-tax deductible costs incurred in preparation for, or as a result of, the demerger of the Group's UK and Europe operations.
- (vii) 2018 actual tax rate of the relevant business operations are shown below:

| | 2018 | | | |
|--|--------------------|------------------|---------------------|--|
| | Asia operations | US operations | Other operations | Total attributable to shareholders |
| Adjusted IFRS operating profit based on longer-term investment returns | 14% | 16% | 14% | 15% |
| Profit before tax | 17% | 15% | 13% | 16% |

B5 Earnings per share

Accounting principles

Basic earnings per share is calculated by dividing the earnings attributable to ordinary shareholders (after related tax and non-controlling interests) by the weighted average number of ordinary shares outstanding during the year, excluding those held in employee share trusts and consolidated investment funds, which are treated as cancelled.

For diluted earnings per share, the weighted average number of shares in issue is adjusted to assume conversion of all dilutive potential ordinary shares. The Group's only class of potentially dilutive ordinary shares are those share options granted to employees where the exercise price is less than the average market price of the Company's ordinary shares during the year. No adjustment is made if the impact is anti-dilutive overall.

* Excluding those held in employee share trusts and consolidated investment funds.

B6 Dividends

B6.1 Demerger dividend in specie of M&G plc

On 21 October 2019, following approval by the Group's shareholders, Prudential plc demerged M&G plc its UK and Europe operations via a dividend in specie. As required by IFRIC 17 'Distributions of Non-cash Assets to Owners', the dividend has been recorded at the fair value of M&G plc being \$7,379 million.

B6.2 Other dividends

First and second interim dividends are recorded in the period in which they are paid. Final dividends (if applicable) are recorded in the period in which they are approved by shareholders.

| | 2019 | | 2018 | |
|---|-----------------|-------|-----------------|-------|
| | Cents per share | \$m | Cents per share | \$m |
| Dividends relating to reporting year: | | | | |
| First interim ordinary dividend | 20.29¢ | 528 | 20.55¢ | 530 |
| Second interim ordinary dividend | 25.97¢ | 675 | 42.89¢ | 1,108 |
| Total | 46.26¢ | 1,203 | 63.44¢ | 1,638 |
| Dividends paid in reporting year: | | | | |
| Current year first interim ordinary dividend | 20.29¢ | 526 | 20.55¢ | 530 |
| Second interim ordinary dividend for prior year | 42.89¢ | 1,108 | 43.79¢ | 1,132 |
| Total | 63.18¢ | 1,634 | 64.34¢ | 1,662 |

Dividend per share

The 2019 first interim ordinary dividend of 20.29 cents per ordinary share was paid to eligible shareholders on 26 September 2019.

The second interim ordinary dividend for the year ended 31 December 2019 of 25.97 cents per ordinary share will be paid on 15 May 2020 to shareholders on the UK register on 27 March 2020 (Record Date), and to shareholders on the Hong Kong register at 4.30pm Hong Kong time on the Record Date (HK Shareholders). Holders of US American Depositary Receipts (US Shareholders) will be paid their dividends on 15 May 2020. The second interim ordinary dividend will be paid on or about 22 May 2020 to shareholders with shares standing to the credit of their securities accounts with The Central Depository (Pte) Limited (CDP) at 5.00pm Singapore time on the Record Date (SG Shareholders).

The Group's 2020 dividend under the new progressive dividend policy will be determined from a 2019 US dollar base of \$958 million (36.84 cents per share), equivalent to the circa £750 million previously disclosed in the Circular. This represents the first interim ordinary dividend relating to 2019 of \$528 million plus the second interim ordinary dividend of \$675 million less the contribution of remittances from the discontinued M&G plc business to the second interim ordinary dividend of \$245 million.

Prudential plc now determines and declares its dividends in US dollars, commencing with dividends paid in 2020, including the 2019 second interim dividend. Shareholders holding shares on the UK or Hong Kong share registers will continue to receive their dividend payments in either pounds sterling or Hong Kong dollars respectively, unless they elect otherwise. Shareholders holding shares on the UK or Hong Kong registers may elect to receive dividend payments in US dollars. Elections must be made through the relevant UK or Hong Kong share registrar on or before 23 April 2020. The corresponding amount per share in pounds sterling and Hong Kong dollars is expected to be announced on or about 30 April 2020. The US dollar to pound sterling and Hong Kong dollar conversion rates will be determined by the actual rates achieved by Prudential buying those currencies during the two working days preceding the subsequent announcement. Holders of American Depositary Receipts (ADRs) will continue to receive their dividend payments in US dollars. Shareholders holding an interest in Prudential shares through the Central Depository (Pte) Limited (CDP) in Singapore will continue to receive their dividend payments in Singapore dollars at an exchange rate determined by CDP.

Shareholders on the UK register are eligible to participate in a Dividend Reinvestment Plan.

C Financial position notes

C1 Analysis of Group statement of financial position by segment

To explain the assets, liabilities and capital of the Group's businesses more comprehensively, it is appropriate to provide analyses of the Group's statement of financial position by operating segment and type of business.

Notes

- (i) Unallocated to a segment includes central operations, the Group's treasury function and Africa operations as per note B1.3.
- (ii) 'Other assets' at 31 December 2019 included property, plant and equipment of \$1,065 million relating to continuing operations (31 December 2018: \$1,795 million, of which \$482 million related to continuing operations). On 1 January 2019, \$527 million of right-of-use assets was recognised for continuing operations upon adoption of IFRS 16 (see note A3). Movements in the right-of-use assets in 2019 is provided in note C13.

Also included in 'Other assets' are accrued investment income and other debtors at 31 December 2019 of \$3,695 million (31 December 2018: \$8,708 million), of which \$3,191 million (31 December 2018: \$7,834 million) are expected to be settled within one year. These are further analysed as follows:

| | 31 Dec 2019 \$m | 31 Dec 2018 \$m |
|--|--------------------|--------------------|
| Interest receivable | 1,064 | 2,221 |
| Other | 577 | 1,280 |
| Total accrued investment income | 1,641 | 3,501 |
| Premiums receivable due from: | | |
| Policyholders | 574 | 576 |
| Intermediaries | 4 | 4 |
| Reinsurers | 216 | 277 |
| Other receivables | 1,260 | 4,350 |
| Total other debtors | 2,054 | 5,207 |
| Total accrued investment income and other debtors | 3,695 | 8,708 |
| Analysed as: | | |
| From continuing operations | | 4,356 |
| From discontinued operations | | 4,352 |
| | | <u>8,708</u> |

- (iii) Cash and cash equivalents

Cash and cash equivalents consist of cash at bank and in hand, deposits held at call with banks, treasury bills and other short-term highly liquid investments with less than 90 days maturity from the date of acquisition and are analysed as follows:

| | 31 Dec 2019 \$m | 31 Dec 2018 \$m |
|---|--------------------|--------------------|
| Cash | 2,071 | 7,335 |
| Cash equivalents | 4,894 | 8,107 |
| Total cash and cash equivalents | 6,965 | 15,442 |
| Analysed as: | | |
| Held centrally and available for general use by the Group | 2,491 | 445 |
| Other funds not available for general use by the Group, including funds held for the benefit of policyholders | 4,474 | 14,997 |
| Total cash and cash equivalents | 6,965 | 15,442 |
| Comprising: | | |
| Cash and cash equivalents from continuing operations | | 9,394 |
| Cash and cash equivalents from discontinued operations | | 6,048 |
| | | <u>15,442</u> |

The Group's cash and cash equivalents are held in the following currencies: US dollars 52 per cent, pounds sterling 20 per cent, Euro 1 per cent and other currencies 27 per cent (2018: US dollars 38 per cent, pounds sterling 32 per cent, Euro 15 per cent and other currencies 15 per cent).

- (iv) Accruals, deferred income and other liabilities are analysed as follows (maturity analysis is provided in note C3.4(a)):

| | 31 Dec 2019 \$m | 31 Dec 2018 \$m |
|--|--------------------|--------------------|
| Accruals and deferred income | 582 | 2,165 |
| Other creditors | 6,724 | 9,010 |
| Creditors arising from direct insurance and reinsurance operations | 2,831 | 3,010 |
| Interest payable | 68 | 149 |
| Funds withheld under reinsurance of the REALIC business | 3,760 | 3,745 |
| Other items | 523 | 1,342 |
| Total accruals, deferred income and other liabilities | 14,488 | 19,421 |
| Analysed as: | | |
| From continuing operations | | 13,338 |
| From discontinued operations | | 6,083 |
| | | <u>19,421</u> |

- (v) Of the total financial investments of \$404,096 million as at 31 December 2019 (31 December 2018: \$547,522 million), \$260,896 million (2018: \$304,843 million) are due to be recovered within one year.

C2 Analysis of segment statement of financial position by business type

To show the statement of financial position by reference to the differing degrees of policyholder and shareholder economic interest of the different types of business, the analysis below is structured to show the assets and liabilities of each segment by business type.

C2.1 Asia

| | 31 Dec 2019 \$m | | | | | | | 31 Dec 2018 \$m | |

C3 Assets and liabilities

C3.1 Group assets and liabilities – measurement

The Group holds financial investments in accordance with IAS 39, whereby subject to specific criteria, financial instruments are required to be accounted for under one of the following categories:

- Financial assets and liabilities at fair value through profit or loss – this comprises assets and liabilities designated by management as fair value through profit or loss on inception and derivatives that are held for trading. This includes instruments that are managed and the performance evaluated on a fair value basis and includes liabilities related to net assets attributable to unit holders of consolidated investment funds and, in Asia, policyholder liabilities for investment contracts without discretionary participation features. All investments within this category are measured at fair value with all changes thereon being recognised in investment return in the income statement;
- Financial investments on an available-for-sale basis – this comprises assets that are designated by management as available-for-sale and/or do not fall into any of the other categories. These assets are initially recognised at fair value plus attributable transaction costs. Available-for-sale assets are subsequently measured at fair value. Interest income is recognised on an effective interest basis in the income statement. The effective interest rate is the rate that exactly discounts estimated future cash receipts through the expected life of the financial instrument or, when appropriate, a shorter period to the net carrying amount of the financial asset. Except for foreign exchange gains and losses on debt securities, which are included in the income statement, unrealised gains and losses are recognised in other comprehensive income. Upon disposal or impairment, accumulated unrealised gains and losses are transferred from other comprehensive income to the income statement as realised gains or losses; and
- Loans and receivables – except for those designated as at fair value through profit or loss or available-for-sale, these instruments comprise non-quoted investments that have fixed or determinable payments. These instruments include loans collateralised by mortgages, deposits, loans to policyholders and other unsecured loans and receivables. These investments are initially recognised at fair value plus transaction costs. Subsequently, these instruments are carried at amortised cost using the effective interest method.

The Group uses the trade date method to account for regular purchases and sales of financial assets.

(a) Fair value measurement hierarchy of Group assets and liabilities

Assets and liabilities carried at fair value on the statement of financial position

The table below shows the assets and liabilities carried at fair value analysed by level of the IFRS 13 'Fair Value Measurement' defined fair value hierarchy. This hierarchy is based on the inputs to the fair value measurement and reflects the lowest level input that is significant to that measurement.

All assets and liabilities held at fair value are classified as fair value through profit or loss, except for \$58,302 million (31 December 2018: \$52,025 million) of debt securities classified as available-for-sale, principally in the US operations. All assets and liabilities held at fair value are measured on a recurring basis. As of 31 December 2019, the Group did not have any financial instruments that are measured at fair value on a non-recurring basis.

Assets and liabilities at amortised cost and their fair value

The table below shows the financial assets and liabilities carried at amortised cost on the statement of financial position and their fair value. Cash deposits, accrued income, other debtors, accruals, deferred income and other liabilities are excluded from the analysis below, as these are carried at amortised cost, which approximates fair value.

The fair value of the assets and liabilities in the table above, with the exception of the subordinated and senior debt issued by the parent company, has been estimated from the discounted cash flows expected to be received or paid. Where appropriate, the observable market interest rate has been used and the assets and liabilities are classified within level 2. Otherwise, they are included as level 3 assets or liabilities. The fair value included for the subordinated and senior debt issued by the parent company is determined using quoted prices from independent third parties. These are presented as level 2 liabilities.

(b) Valuation approach for level 2 fair valued assets and liabilities

A significant proportion of the Group's level 2 assets are corporate bonds, structured securities and other non-national government debt securities. These assets, in line with market practice, are generally valued using a designated independent pricing service or quote from third-party brokers. These valuations are subject to a number of monitoring controls, such as comparison to multiple pricing sources where available, monthly price variances, stale price reviews and variance analysis on prices achieved on subsequent trades.

When prices are not available from pricing services, quotes are sourced directly from brokers. Prudential seeks to obtain a number of quotes from different brokers so as to obtain the most comprehensive information available on their executability. Where quotes are sourced directly from brokers, the price used in the valuation is normally selected from one of the quotes based on a number of factors, including the timeliness and regularity of the quotes and the accuracy of the quotes considering the spreads provided. The selected quote is the one which best represents an executable quote for the security at the measurement date.

Generally, no adjustment is made to the prices obtained from independent third parties. Adjustment is made in only limited circumstances, where it is determined that the third-party valuations obtained do not reflect fair value (eg either because the value is stale and/or the values are extremely diverse in range). These are usually securities which are distressed or that could be subject to a debt restructure or where reliable market prices are no longer available due to an inactive market or market dislocation. In these instances, prices are derived using internal valuation techniques including those as described below in this note with the objective of arriving at a fair value measurement that reflects the price at which an orderly transaction would take place between market participants on the measurement date. The techniques used require a number of assumptions relating to variables such as credit risk and interest rates. Examples of such variables include an average credit spread based on the corporate bond universe and the relevant duration of the asset being valued. Prudential determines the input assumptions based on the best available information at the measurement dates. Securities valued in such manner are classified as level 3 where these significant inputs are not based on observable market data.

Of the total level 2 debt securities of \$66,637 million at 31 December 2019 (31 December 2018: \$63,247 million from continuing operations), \$8,915 million are valued internally (31 December 2018: \$7,462 million from continuing operations). The majority of such securities are valued using matrix pricing, which is based on assessing the credit quality of the underlying borrower to derive a suitable discount rate relative to government securities of a comparable duration. Under matrix pricing, the debt securities are priced taking the credit spreads on comparable quoted public debt securities and applying these to the equivalent debt instruments factoring in a specified liquidity premium. The majority of the parameters used in this valuation technique are readily observable in the market and, therefore, are not subject to interpretation.

C3 Assets and liabilities continued

(c) Fair value measurements for level 3 fair valued assets and liabilities

Reconciliation of movements in level 3 assets and liabilities measured at fair value

The following table reconciles the value of level 3 fair valued assets and liabilities at 1 January 2019 to that presented at 31 December 2019.

Total investment return recorded in the income statement represents interest and dividend income, realised gains and losses, unrealised gains and losses on the assets classified at fair value through profit and loss and foreign exchange movements on an individual entity's overseas investments.

Total gains and losses recorded in other comprehensive income includes unrealised gains and losses on debt securities held as available-for-sale principally within Jackson and foreign exchange movements arising from the retranslation of the Group's overseas subsidiaries and branches.

Valuation approach for level 3 fair valued assets and liabilities

Investments valued using valuation techniques include financial investments which by their nature do not have an externally quoted price based on regular trades, and financial investments for which markets are no longer active as a result of market conditions, eg market illiquidity. The valuation techniques used include comparison to recent arm's length transactions, reference to other instruments that are substantially the same, discounted cash flow analysis, option-adjusted spread models and, if applicable, enterprise valuation.

The Group's valuation policies, procedures and analyses for instruments categorised as level 3 are overseen by Business Unit committees as part of the Group's wider financial reporting governance processes. The procedures undertaken include approval of valuation methodologies, verification processes, and resolution of significant or complex valuation issues. In undertaking these activities, the Group makes use of the extensive expertise of its asset management functions. In addition, the Group has minimum standards for independent price verification to ensure valuation accuracy is regularly independently verified. Adherence to this policy is monitored across the business units.

At 31 December 2019, the Group held \$1,408 million of net financial instruments at fair value within level 3. This represents less than one per cent of the total fair valued financial assets net of financial liabilities.

Included within these net assets and liabilities are policy loans of \$3,587 million at 31 December 2019 measured as the loan outstanding balance, plus accrued investment income, attached to acquired REALIC business and held to back the liabilities for funds withheld under reinsurance arrangements. The funds withheld liability of \$3,760 million at 31 December 2019 is also classified within level 3. The fair value of the liabilities is equal to the fair value of the underlying assets held as collateral, which primarily consist of policy loans and debt securities. The assets and liabilities broadly offset and therefore their movements have minimal impact on shareholders' profit and equity.

Excluding the loans and funds withheld liability under REALIC's reinsurance arrangements as described above, which amounted to a net liability of \$173 million, the level 3 fair valued financial assets net of financial liabilities were a net asset of \$1,581 million, which are all externally valued and comprise the following:

- Other financial investments of \$1,301 million consisting primarily of private equity limited partnerships held by Jackson, which are externally valued in accordance with International Private Equity and Venture Capital Association guidelines using management information available for these investments;
- Equity securities and holdings in collective investment schemes of \$276 million consisting primarily of property and infrastructure funds held by the Asia participating funds, which are externally valued using the net asset value of the invested entities; and
- Other sundry individual financial instruments of a net asset of \$4 million.

Of the net asset of \$1,581 million referred to above:

- A net asset of \$258 million is held by the Group's Asia participating funds and therefore shareholders' profit and equity are not impacted by movements in the valuation of these financial instruments; and
- A net asset of \$1,323 million is held to support non-linked shareholder-backed business. All of these instruments are externally valued and are therefore inherently less subjective than internal valuations. These instruments consist primarily of private equity limited partnerships held by Jackson as described above. If the value of all these Level 3 financial instruments decreased by 10 per cent, the change in valuation would be \$132 million, which would reduce shareholders' equity by this amount before tax. All of this amount would pass through the income statement substantially as part of short-term fluctuations in investment returns outside of adjusted IFRS operating profit based on longer-term investment returns.

(d) Transfers into and transfers out of levels

The Group's policy is to recognise transfers into and transfers out of levels as of the end of each half year reporting period except for material transfers which are recognised as of the date of the event or change in circumstances that caused the transfer. Transfers are deemed to have occurred when there is a material change in the observed valuation inputs or a change in the level of trading activities of the securities.

During 2019, the transfers between levels within the Group's portfolio, excluding those held by the discontinued UK and Europe operations, were primarily transfers from level 1 to level 2 of \$678 million and transfers from level 2 to level 1 of \$1,121 million. These transfers which relate to equity securities and debt securities arose to reflect the change in the observed valuation inputs and in certain cases, the change in the level of trading activities of the securities. There were no transfers excluding those related to the discontinued UK and Europe operations, into and out of level 3 in the year.

C3 Assets and liabilities continued

C3.2 Debt securities

This note provides analysis of the Group's debt securities, including asset-backed securities and sovereign debt securities.

With the exception of certain debt securities classified as 'available-for-sale' under IAS 39 as disclosed in notes C3.2(b) below, which primarily relate to US insurance operations, the Group's debt securities are carried at fair value through profit or loss.

(a) Credit rating

Debt securities are analysed below according to external credit ratings issued, with equivalent ratings issued by different ratings agencies grouped together. Standard & Poor's ratings have been used where available, if this isn't the case Moody's and then Fitch have been used as alternatives. For the US, NAIC ratings have also been used where relevant (as shown in 'Other' in the tables below). In the table below, AAA is the highest possible rating. Investment grade financial assets are classified within the range of AAA to BBB- ratings. Financial assets which fall outside this range are classified as below BBB-.

| 31 Dec 2019 \$m | | | | | | | |
|--|---------------|---------------|---------------|---------------|---------------|------------------------------|----------------|
| | AAA | AA+ to AA- | A+ to A- | BBB+ to BBB- | Below BBB- | Other (including NAIC rated) | Total |

Credit ratings for securities classified as 'Other'

Securities for continuing operations with credit ratings classified as 'Other' can be further analysed as follows for Asia and US non-linked shareholder-backed.

| Asia | 31 Dec 2019 \$m | 31 Dec 2018 \$m |
|---|-----------------|-----------------|
| Government bonds* | 323 | 46 |
| Corporate bonds rated by local external rating agencies | | |
| AAA | 184 | 239 |
| AA+ to AA- | 958 | 702 |
| A+ to A- | 345 | 241 |
| BBB+ to BBB- | 91 | 39 |
| Below BBB- and unrated | 32 | 25 |
| | 1,610 | 1,246 |
| Other (asset-backed securities)† | 371 | 163 |
| Total Asia | 2,304 | 1,455 |

* 99.7 per cent are investment grade (2018: 92 per cent).

† Primarily unrated.

| US | 31 Dec 2019 \$m | | | 31 Dec 2018 \$m |
|--|----------------------------|------------------|---------------|-----------------|
| | Mortgage-backed securities | Other securities | Total | Total |
| Implicit ratings based on NAIC valuations* | | | | |
| NAIC 1 | 3,367 | 4,430 | 7,797 | 6,376 |
| NAIC 2 | 1 | 3,470 | 3,471 | 2,697 |
| NAIC 3-6 | 2 | 91 | 93 | 47 |
| Total US† | 3,370 | 7,991 | 11,361 | 9,120 |

* The Securities Valuation Office of the NAIC classifies debt securities into six quality categories ranging from Class 1 (the highest) to Class 6 (the lowest). Performing securities are designated as Classes 1 to 5 and securities in or near default are designated Class 6.

† Mortgage-backed securities totalling \$3,180 million at 31 December 2019 have credit ratings issued by Standard & Poor's of BBB- or above and hence are designated as investment grade. Other securities totalling \$7,900 million at 31 December 2019 with NAIC ratings 1 or 2 are also designated as investment grade.

(b) Additional analysis of US insurance operations debt securities

| | 31 Dec 2019 \$m | 31 Dec 2018 \$m |
|---|-----------------|-----------------|

Movements in unrealised gains and losses on Jackson available-for-sale securities

The movement in the statement of financial position value for debt securities classified as available-for-sale from a net unrealised loss of \$527 million to a net unrealised gain of \$3,496 million as analysed in the table below.

| | 31 Dec 2019 \$m | Changes in unrealised appreciation reflected in other comprehensive income \$m | 31 Dec 2018 \$m |
|--|--------------------|---|--------------------|
| Assets fair valued at below book value | | | |
| Book value* | 3,121 | | 32,260 |
| Unrealised gain (loss) | (27) | 1,151 | (1,178) |
| Fair value (as included in statement of financial position) | 3,094 | | 31,082 |
| Assets fair valued at or above book value | | | |
| Book value* | 50,474 | | 20,292 |
| Unrealised gain (loss) | 3,523 | 2,872 | 651 |
| Fair value (as included in statement of financial position) | 53,997 | | 20,943 |
| Total | | | |
| Book value* | 53,595 | | 52,552 |
| Net unrealised gain (loss) | 3,496 | 4,023 | (527) |
| Fair value (as included in the footnote above in the overview table and the statement of financial position) | 57,091 | | 52,025 |

* Book value represents cost or amortised cost of the debt securities.

Jackson debt securities classified as available-for-sale in an unrealised loss position

(i) Fair value of securities as a percentage of book value

The following table shows the fair value of the debt securities in a gross unrealised loss position for various percentages of book value:

| | 31 Dec 2019 \$m | | 31 Dec 2018 \$m | |
|----------------------|-----------------|-----------------|-----------------|-----------------|
| | Fair value | Unrealised loss | Fair value | Unrealised loss |
| Between 90% and 100% | 3,083 | (25) | 30,136 | (1,030) |
| Between 80% and 90% | 11 | (2) | 900 | (132) |
| Below 80% | – | – | 46 | (16) |
| Total | 3,094 | (27) | 31,082 | (1,178) |

(ii) Unrealised losses by maturity of security

| | 31 Dec 2019 \$m | 31 Dec 2018 \$m |
|---|--------------------|--------------------|
| 1 year to 5 years | (1) | (92) |
| 5 years to 10 years | (12) | (555) |
| More than 10 years | (7) | (474) |
| Mortgage-backed and other debt securities | (7) | (57) |
| Total | (27) | (1,178) |

(iii) Age analysis of unrealised losses for the periods indicated

The following table shows the age analysis of all the unrealised losses in the portfolio by reference to the length of time the securities have been in an unrealised loss position:

| Age analysis | 31 Dec 2019 \$m | | | 31 Dec 2018 \$m | | |
|--------------------|----------------------|-------------------|-------------|----------------------|-------------------|----------------|
| | Non-investment grade | Investment grade* | Total | Non-investment grade | Investment grade* | Total |
| Less than 6 months | (1) | (20) | (21) | (26) | (179) | (205) |
| 6 months to 1 year | (1) | (1) | (2) | (28) | (560) | (588) |
| 1 year to 2 years | – | (1) | (1) | (13) | (181) | (194) |
| 2 years to 3 years | – | (1) | (1) | – | (157) | (157) |
| More than 3 years | – | (2) | (2) | (2) | (32) | (34) |
| Total | (2) | (25) | (27) | (69) | (1,109) | (1,178) |

* For Standard and Poor's, Moody's and Fitch rated debt securities, those with ratings range from AAA to BBB- are designated as investment grade. For NAIC rated debt securities, those with ratings 1 or 2 are designated as investment grade.

Further, the following table shows the age analysis of the securities whose fair values were below 80 per cent of the book value:

| Age analysis | 31 Dec 2019 \$m | | 31 Dec 2018 \$m | |
|------------------------|-----------------|-----------------|-----------------|-----------------|
| | Fair value | Unrealised loss | Fair value | Unrealised loss |
| Less than 3 months | – | – | 41 | (13) |
| 3 months to 6 months | – | – | 2 | (1) |
| More than 6 months | – | – | 3 | (2) |
| Total below 80% | – | – | 46 | (16) |

(c) Asset-backed securities

The Group's holdings in asset-backed securities (ABS), which comprise residential mortgage-backed securities (RMBS), commercial mortgage-backed securities (CMBS), collateralised debt obligations (CDO) funds and other asset-backed securities, as at 31 December 2019 are as follows:

| | 31 Dec 2019 \$m | 31 Dec 2018 \$m |
|--|-----------------|-----------------|
| Asia operations: ^{note (i)} | | |
| Shareholder-backed business | 189 | 154 |
| With-profits business | 369 | 299 |
| US operations ^{note (ii)} | 6,015 | 4,590 |
| Other operations | – | 566 |
| Total for continuing operations | 6,573 | 5,609 |
| Total for discontinued UK and Europe operations | – | 8,503 |
| Group total | 6,573 | 14,112 |

Notes

(i) Of the Asia operations' exposure to asset-backed securities for the shareholder-backed business and with-profits business at 31 December 2019, 100 per cent (31 December 2018: 99.8 per cent) are investment grade.

(ii) US operations' exposure to asset-backed securities comprises:

| | 31 Dec 2019 \$m | 31 Dec 2018 \$m |
|---|-----------------|-----------------|
| RMBS | | |
| Sub-prime (31 Dec 2019: 2% AAA, 3% AA, 3% A) | 93 | 122 |
| Alt-A (31 Dec 2019: 51% A) | 116 | 134 |
| Prime including agency (2019: 23% AAA, 61% AA, 10% A) | 862 | 562 |
| CMBS (31 Dec 2019: 76% AAA, 16% AA, 4% A) | 3,080 | 2,477 |
| CDO funds (31 Dec 2019: 46% AAA, 38% AA, 16% A), including \$nil exposure to sub-prime | 696 | 17 |
| Other ABS (31 Dec 2019: 16% AAA, 11% AA, 54% A), including \$84 million exposure to sub-prime | 1,168 | 1,278 |
| Total (31 Dec 2019: 50% AAA, 24% AA, 17% A) | 6,015 | 4,590 |

(e) Impairment of US available-for-sale debt securities and other financial assets

In accordance with the Group's accounting policy set out in note A3.1, impairment reviews were performed for available-for-sale securities and loans and receivables.

During the year ended 31 December 2019, a charge for recoveries net of impairment of \$17 million (2018: credit of \$19 million) was recognised for available-for-sale securities loans and receivables held by Jackson.

Jackson, with the support of internal credit analysts, regularly monitors and reports on the credit quality of its holdings of debt securities. In addition, there is a periodic review of its investments on a case-by-case basis to determine whether any decline in fair value represents an impairment. Investments in structured securities are subject to a review of their future estimated cash flows, including expected and stress case scenarios, to identify potential shortfalls in contractual payments (both interest and principal). Impairment charges are recorded on structured securities when the Company forecasts a contractual payment shortfall. Situations where such a shortfall would not lead to a recognition of a loss are rare. The impairment loss reflects the difference between the fair value and book value.

In 2019, the Group realised gross losses on sales of available-for-sale securities of \$70 million (2018: \$55 million) with 51 per cent (2018: 49 per cent) of these losses related to the disposal of fixed maturity securities of the top 10 individual issuers, which were disposed of to limit future credit loss exposure. Of the \$70 million (2018: \$55 million), \$28 million (2018: \$6 million) relates to losses on sales of impaired and deteriorating securities.

The effect of changes in the key assumptions that underpin the assessment of whether impairment has taken place depends on the factors described in note A3.1. A key indicator of whether such impairment may arise in future, and the potential amounts at risk, is the profile of gross unrealised losses for fixed maturity securities accounted for on an available-for-sale basis by reference to the time periods by which the securities have been held continuously in an unrealised loss position and by reference to the maturity date of the securities concerned.

For 2019, the amount of gross unrealised losses for fixed maturity securities classified as available-for-sale under IFRS in an unrealised loss position was \$27 million (2018: \$1,178 million). Note B1.2 provides further details on the impairment charges and unrealised losses of Jackson's available-for-sale securities.

C3.3 Loans portfolio

(a) Overview of loans portfolio

Loans are principally accounted for at amortised cost, net of impairment except for certain policy loans of the US insurance operations that are held to back liabilities for funds withheld under reinsurance arrangements and are also accounted on a fair value basis.

The amounts included in the statement of financial position are analysed as follows:

| | 31 Dec 2019 \$m | | | | 31 Dec 2018 \$m | | | |
|---|----------------------------|---------------------------|-------------|--------|----------------------------|---------------------------|-------------|--------|
| | Mortgage loans note (i) | Policy loans note (ii) | Other loans | Total | Mortgage loans note (i) | Policy loans note (ii) | Other loans | Total |
| Asia | | | | | | | | |
| With-profits | – | 1,089 | 374 | 1,463 | – | 926 | 83 | 1,009 |
| Non-linked shareholder-backed | 165 | 316 | 19 | 500 | 199 | 288 | 259 | 746 |
| US | | | | | | | | |
| Non-linked shareholder-backed | 9,904 | 4,707 | – | 14,611 | 9,406 | 4,688 | – | 14,094 |
| Other operations | – | 9 | – | 9 | – | – | – | – |
| Total continuing operations | 10,069 | 6,121 | 393 | 16,583 | 9,605 | 5,902 | 342 | 15,849 |
| Total discontinued UK and Europe operations | | | | | 5,241 | 4 | 1,844 | 7,089 |
| Total Group | | | | | 14,846 | 5,906 | 2,186 | 22,938 |

Notes

(i) All mortgage loans are secured by properties.

(ii) In the US, \$3,587 million of policy loans held at 31 December 2019 (31 December 2018: \$3,544 million) are backing liabilities for funds withheld under reinsurance arrangements and are accounted for at fair value through profit or loss. All other policy loans are accounted for at amortised cost, less any impairment.

(b) Additional information on US mortgage loans

In the US, mortgage loans are all commercial mortgage loans that are secured by the following property types: industrial, multi-family residential, suburban office, retail or hotel. The average loan size is \$19.3 million (31 December 2018: \$17.8 million). The portfolio has a current estimated average loan to value of 54 per cent (31 December 2018: 53 per cent).

Jackson had no mortgage loans where the contractual terms of the agreements had been restructured for both years shown.

Liquidity analysis

Contractual maturities of financial liabilities on an undiscounted cash flow basis

The following table sets out the contractual maturities for applicable classes of financial liabilities, excluding derivative liabilities and investment contracts that are separately presented. The financial liabilities are included in the column relating to the contractual maturities of the undiscounted cash flows (including contractual interest payments) due to be paid assuming conditions are consistent with those of year end.

| 31 Dec 2019 \$m | | | | | | | | | |
|--|----------------------|----------------|-------------------------|---------------------------|----------------------------|----------------------------|---------------|--------------------|-------------------------------|
| Financial liabilities | Total carrying value | 1 year or less | After 1 year to 5 years | After 5 years to 10 years | After 10 years to 15 years | After 15 years to 20 years | Over 20 years | No stated maturity | Total undiscounted cash flows |
| Core structural borrowings of shareholder-financed businesses ^{C6.1} | 5,594 | 105 | 1,146 | 888 | 648 | – | – | 3,725 | 6,512 |
| Lease liabilities under IFRS 16 | 630 | 145 | 388 | 113 | 37 | 18 | 1 | – | 702 |
| Other operational borrowings | 2,015 | 941 | 188 | 232 | 1,132 | 2 | – | – | 2,495 |
| Obligations under funding, securities lending and sale and repurchase agreements | 8,901 | 2,067 | 5,476 | 1,902 | 278 | – | – | – | 9,723 |

| Total | 37,626 | 18,428 | 7,834 | 3,136 | 2,095 | 268 | 1 | 8,156 | 39,918 |

| 31 Dec 2018 \$m | | | | | | | | | |
|--|----------------------|----------------|-------------------------|---------------------------|----------------------------|----------------------------|---------------|--------------------|-------------------------------|
| Financial liabilities | Total carrying value | 1 year or less | After 1 year to 5 years | After 5 years to 10 years | After 10 years to 15 years | After 15 years to 20 years | Over 20 years | No stated maturity | Total undiscounted cash flows |
| Core structural borrowings of shareholder-financed businesses ^{C6.1} | 9,761 | 380 | 2,240 | 1,944 | 2,347 | 1,363 | 8,371 | 3,725 | 20,370 |
| Operational borrowings | 6,289 | 1,961 | 1,703 | 1,002 | 349 | 181 | 2,657 | – | 7,853 |
| Obligations under funding, securities lending and sale and repurchase agreements | 8,901 | 2,450 | 4,908 | 2,131 | 289 | – | – | – | 9,778 |
| Accruals, deferred income and other liabilities | 19,421 | 13,811 | 599 | 90 | 115 | 138 | 448 | 4,503 | 19,704 |
| Net asset value attributable to unit holders of consolidated unit trusts and similar funds | 14,839 | 14,839 | – | – | – | – | – | – | 14,839 |
| Total | 59,211 | 33,441 | 9,450 | 5,167 | 3,100 | 1,682 | 11,476 | 8,228 | 72,544 |
| Analysed as: | | | | | | | | | |
| Continuing operations | 32,839 | 12,284 | 7,479 | 4,167 | 2,636 | 1,363 | 8,412 | 7,983 | 44,324 |
| Discontinued UK and Europe operations | 26,372 | 21,157 | 1,971 | 1,000 | 464 | 319 | 3,064 | 245 | 28,220 |
| Total | 59,211 | 33,441 | 9,450 | 5,167 | 3,100 | 1,682 | 11,476 | 8,228 | 72,544 |

Maturity analysis of derivatives

The following table shows the gross and net derivative positions together with a maturity profile of the net derivative position:

| | Carrying value of net derivatives \$m | | | Maturity profile of net derivative position \$m | | | | |
|------|---------------------------------------|------------------------|-------------------------|---|-------------------------|--------------------------|---------------|-------------------------------|
| | Derivative assets | Derivative liabilities | Net derivative position | 1 year or less | After 1 year to 3 years | After 3 years to 5 years | After 5 years | Total undiscounted cash flows |
| 2019 | 1,745 | (392) | 1,353 | 1,353 | – | – | – | 1,353 |
| 2018 | 4,450 | (4,465) | (15) | 372 | (10) | (5) | 38 | 395 |

The majority of derivative assets and liabilities have been included at fair value within the one year or less column, representing the basis on which they are managed (ie to manage principally asset or liability value exposures). The Group has no cash flow hedges and, in general, contractual maturities are not considered essential for an understanding of the timing of the cash flows for these instruments. The only exception is that in 2018 certain identified interest rate swaps were expected to be held until maturity for the purposes of matching cash flows on separately held assets and liabilities. These swaps were closed as part of the preparation for the demerger of UK and Europe operations.

Maturity analysis of investment contracts

The table below shows the maturity profile for investment contracts based on undiscounted cash flow projections of expected benefit payments. Total carrying value of investment contracts at 31 December 2019 was \$5,535 million as shown in the statement of financial position (31 December 2018: \$110,339 million, of which \$5,142 million was from continuing operations).

| | Maturity profile for investment contracts from continuing operations \$m | | | | | | |
|-------------|--|-------------------------|---------------------------|----------------------------|----------------------------|---------------|-------------------------------|
| | 1 year or less | After 1 year to 5 years | After 5 years to 10 years | After 10 years to 15 years | After 15 years to 20 years | Over 20 years | Total undiscounted cash flows |
| 31 Dec 2019 | 1,557 | 5,197 | 3,866 | 3,049 | 3,196 | 5,890 | 22,755 |
| 31 Dec 2018 | 1,409 | 4,779 | 3,352 | 2,487 | 2,830 | 4,257 | 19,114 |

Most investment contracts have options to surrender early, often subject to surrender or other penalties. Therefore, most contracts can be said to have a contractual maturity of less than one year, but the additional charges and term of the contracts mean these are unlikely to be exercised in practice and the more useful information is to present information on expected payment.

The vast majority of the Group's financial assets are held to back the Group's policyholder liabilities. Although asset/liability matching is an important component of managing policyholder liabilities (both those classified as insurance and those classified as investments), this profile is mainly relevant for managing market risk rather than liquidity risk. Within each business unit, this asset/liability matching is performed on a portfolio-by-portfolio basis.

In terms of liquidity risk, a large proportion of the policyholder liabilities contain discretionary surrender values or surrender charges, meaning that many of the Group's liabilities are expected to be held for the long term. Much of the Group's investment portfolios are in marketable securities, which can therefore be converted quickly to liquid assets.

For the reasons provided above, an analysis of the Group's assets by contractual maturity is not considered meaningful to evaluate the nature and extent of the Group's liquidity risk.

Credit risk

The Group's maximum exposure to credit risk of financial instruments before any allowance for collateral or allocation of losses to policyholders is represented by the carrying value of financial instruments on the balance sheet that have exposures to credit risk comprising cash and cash equivalents, deposits, debt securities, loans and derivative assets, accrued investment income and other debtors, the carrying value of which are disclosed at the start of this note and note C3.4(b) below for derivative assets. The collateral in place in relation to derivatives is described in note C3.4(c) below. Note C3.3 describes the security for the loans held by the Group. The Group's exposure to credit risk is further discussed in note C7 below.

Of the total loans and receivables held, \$7 million (31 December 2018: \$18 million from continuing operations) are past their due date but are not impaired. Of the total past due but not impaired, \$1 million are less than one year past their due date (31 December 2018: \$11 million from continuing operations). The Group expects full recovery of these loans and receivables.

Financial assets that would have been past due or impaired had the terms not been renegotiated amounted to nil (31 December 2018: \$29 million from continuing operations).

In addition, during 2019 and 2018, the Group did not take possession of any other collateral held as security.

Further details of collateral in place in relation to derivatives, securities lending, repurchase agreements and other transactions are provided in note C3.4(c) below.

C3 Assets and liabilities continued

C3.4 Financial instruments – additional information continued

Foreign exchange risk

As at 31 December 2019, the Group held 8 per cent of its financial assets and 25 per cent of its financial liabilities in currencies, mainly US Dollar, other than the functional currency of the relevant business units or the currency to which the functional currency is pegged (eg financial assets and liabilities of US dollar denominated business in Hong Kong).

The exchange risks inherent in these exposures are mitigated through the use of derivatives, mainly forward currency contracts (note C3.4(b) below).

The amount of exchange loss recognised in the income statement in 2019, except for those arising on financial instruments measured at fair value through profit or loss, is \$72 million (2018: \$88 million gain from continuing operations).

(b) Derivatives and hedging

Accounting principles for derivatives and embedded derivatives

Derivative financial instruments are used to reduce or manage investment, interest rate and currency exposures, to facilitate efficient portfolio management and for investment purposes.

The Group does not regularly seek to apply fair value or cash flow hedging treatment under IAS 39. The Group has no fair value and cash flows hedges under IAS 39 at 31 December 2019 and 2018. All derivatives that are not designated as hedging instruments are carried at fair value, with movements in fair value being recorded in the income statement.

Embedded derivatives are embedded within other non-derivative host financial instruments and insurance contracts to create hybrid instruments. Embedded derivatives meeting the definition of an insurance contract are accounted for under IFRS 4. Where economic characteristics and risks of the embedded derivatives are not closely related to the economic characteristics and risks of the host instrument, and where the hybrid instrument is not measured at fair value with the changes in fair value recognised in the income statement, the embedded derivative is bifurcated and carried at fair value as a derivative measured in accordance with IAS 39.

In addition, the Group applies the option under IFRS 4 to not separate and fair value surrender options embedded in host contracts and with-profits investment contracts whose strike price is either a fixed amount or a fixed amount plus interest.

Derivatives held and their purpose

The Group enters into a variety of exchange traded and over-the-counter derivative financial instruments, including futures, options, forward currency contracts and swaps such as interest rate swaps, cross-currency swaps, swaptions and credit default swaps.

All over-the-counter derivative transactions, with the exception of transactions in some Asia operations, are conducted under standardised ISDA (International Swaps and Derivatives Association Inc) master agreements and the Group has collateral agreements between the individual Group entities and relevant counterparties in place under each of these market master agreements.

The majority of the Group's derivatives are held by Jackson. Derivatives are used for efficient portfolio management to obtain cost effective and management of exposure to various markets in accordance with the Group's investment strategies and to manage exposure to interest rate, currency, credit and other business risks. The Group also uses interest rate derivatives to reduce exposure to interest rate volatility. In particular:

- US operations hold large amounts of interest-rate sensitive investments that contain credit risks on which a certain level of defaults is expected. These businesses have purchased some swaptions to manage the default risk on certain underlying assets and hence reduce the amount of regulatory capital held to support the assets; and
- Some products, especially in the US, have guarantee features linked to equity indices. A mismatch between guaranteed product liabilities and the performance of the underlying assets exposes the Group to equity index risk. In order to mitigate this risk, the relevant business units purchase swaptions, equity options and futures to better match asset performance with liabilities under equity-indexed products.

Additional information on Jackson derivative programme

Jackson enters into financial derivative transactions, including those noted below, to reduce and manage business risks. These transactions manage the risk of a change in the value, yield, price, cash flows or quantity of, or a degree of exposure, with respect to assets, liabilities or future cash flows, which Jackson has acquired or incurred.

Jackson uses free-standing derivative instruments for hedging purposes. Additionally, certain liabilities, primarily trust instruments supported by funding agreements, fixed index annuities, certain variable annuity guaranteed benefit features and reinsured Guaranteed Minimum Income Benefit variable annuity features are similar to derivatives. Jackson does not account for such items as either fair value or cash flow hedges as might be permitted if the specific hedge documentation requirements of IAS 39 were followed. Financial derivatives are carried at fair value, including derivatives embedded in certain host liabilities where these are required to be valued separately.

The principal types of derivatives used by Jackson and their purpose are as follows:

| Derivative | Purpose |
|---|--|
| Interest rate swaps | These generally involve the exchange of fixed and floating payments over the period for which Jackson holds the instrument without an exchange of the underlying principal amount. These agreements are used to hedge Jackson's exposure to movements in interest rates. |
| Swaption contracts | These contracts provide the purchaser with the right, but not the obligation, to require the writer to pay the present value of a long-duration interest rate swap at future exercise dates. Jackson both purchases and writes swaptions in order to hedge against significant movements in interest rates. |
| Treasury futures contracts | These derivatives are used to hedge Jackson's exposure to movements in interest rates. |
| Equity index futures contracts and equity index options | These derivatives (including various call and put options and options contingent on interest rates and currency exchange rates) are used to hedge Jackson's obligations associated with its issuance of certain VA guarantees. Some of these annuities and guarantees contain embedded options that are fair valued for financial reporting purposes. |
| Cross-currency swaps | Cross-currency swaps, which embody spot and forward currency swaps and additionally, in some cases, interest rate swaps and equity index swaps, are entered into for the purpose of hedging Jackson's foreign currency denominated funding agreements supporting trust instrument obligations. |
| Credit default swaps | These swaps represent agreements under which the buyer has purchased default protection on certain underlying corporate bonds held in its portfolio. These contracts allow Jackson to sell the protected bonds at par value to the counterparty if a default event occurs in exchange for periodic payments made by Jackson for the life of the agreement. |

Hedging

The Group has formally assessed and documented the effectiveness of the following net investment hedges under IAS 39. During 2019, up to 31 December 2019, the Group had designated perpetual subordinated capital securities totalling \$3.7 billion (31 December 2018: \$3.7 billion) as a net investment hedge to hedge the currency risks related to the net investment in Jackson. Accordingly, the foreign exchange loss of \$150 million (2018: loss of \$266 million) on translation of Prudential plc's borrowings to pounds sterling (the functional currency of Prudential plc until 31 December 2019) is recognised in the translation reserve in shareholders' equity rather than the income statement. This net investment hedge was 100 per cent effective.

The Group has no cash flow hedges or fair value hedges in place.

(c) Derecognition, collateral and offsetting

Derecognition of financial assets and liabilities

The Group's policy is to derecognise financial assets when it is deemed that substantially all the risks and rewards of ownership have been transferred.

The Group derecognises financial liabilities only when the obligation specified in the contract is discharged, cancelled or has expired.

Reverse repurchase agreements

The Group is party to various reverse repurchase agreements under which securities are purchased from third parties with an obligation to resell the securities. The securities are not recognised as investments in the statement of financial position but the right to receive the cash paid is recognised as deposits.

At 31 December 2019, the Group had entered into reverse repurchase transactions under which it purchased securities and had taken on the obligation to resell the securities. The fair value of the collateral held in respect of these transactions, which is represented by the purchased securities, was \$1,011 million (31 December 2018: \$3,039 million from continuing operations).

Securities lending and repurchase agreements

The Group is also party to various securities lending agreements (including repurchase agreements) under which securities are loaned to third parties on a short-term basis. The loaned securities are not derecognised; rather, they continue to be recognised within the appropriate investment classification. To the extent cash collateral is received it is recognised on the statement of financial position. Other collateral is not recognised.

At 31 December 2019, the Group has \$90 million (31 December 2018: \$107 million from continuing operations) of lent securities and assets subject to repurchase agreements. The cash and securities collateral held or pledged under such agreements were \$95 million (31 December 2018: \$112 million from continuing operations).

C3 Assets and liabilities continued

C3.4 Financial instruments – additional information continued

Collateral and pledges under derivative transactions

At 31 December 2019, the Group had pledged \$1,301 million (31 December 2018: \$2,896 million from continuing operations) for liabilities and held collateral of \$1,883 million (31 December 2018: \$810 million from continuing operations) in respect of over-the-counter derivative transactions. These transactions are conducted under terms that are usual and customary to collateralised transactions including, where relevant, standard securities lending and repurchase agreements.

The Group has entered into collateral arrangements in relation to over-the-counter derivative transactions, which permit sale or re-pledging of underlying collateral. During 2019, the Group has not sold any collateral held (2018: nil). As of 31 December 2019, the value of collateral re-pledged by the Group amounted to \$nil (31 December 2018: \$5 million from continuing operations). All over-the-counter derivative transactions, with the exception of transactions in some Asia operations, are conducted under standardised International Swaps and Derivatives Association (ISDA) master agreements. The collateral management for these transactions is conducted under the usual and customary terms and conditions set out in the Credit Support Annex to the ISDA master agreement.

Other collateral

At 31 December 2019, the Group had pledged collateral of \$3,299 million (31 December 2018: \$3,053 million from continuing operations) in respect of other transactions. This principally arises from Jackson's membership of the Federal Home Loan Bank of Indianapolis primarily for the purpose of participating in the bank's collateralised loan advance programme with short-term and long-term funding facilities.

Offsetting assets and liabilities

The Group's derivative instruments, repurchase agreements and securities lending agreements are subject to master netting arrangements and collateral arrangements. A master netting arrangement with a counterparty creates a right of offset for amounts due to and due from that same counterparty that is enforceable in the event of a default or bankruptcy. The Group recognises amounts subject to master netting arrangements on a gross basis within the consolidated balance sheets.

The following tables present the gross and net information about the Group's financial instruments subject to master netting arrangements:

| | 31 Dec 2019 \$m | | | | |
|--|---|--|-----------------|-------------------------------------|-------------------------|
| | Gross amount included in the consolidated statement of financial position note (i) | Related amounts not offset in the consolidated statement of financial position | | | Net amount note (iv) |
| | | Financial instruments note (ii) | Cash collateral | Securities collateral note (iii) | |
| Financial assets: | | | | | |
| Derivative assets | 1,708 | (115) | (901) | (618) | 74 |
| Reverse repurchase agreements | 953 | – | – | (953) | – |
| Total financial assets | 2,661 | (115) | (901) | (1,571) | 74 |

| Total financial liabilities | (264) | 115 | 134 | – | (15) |

| | 31 Dec 2018 \$m | | | | |
|--|---|--|-----------------|-------------------------------------|-------------------------|
| | Gross amount included in the consolidated statement of financial position note (i) | Related amounts not offset in the consolidated statement of financial position | | | Net amount note (iv) |
| | | Financial instruments note (ii) | Cash collateral | Securities collateral note (iii) | |
| Financial assets: | | | | | |
| Derivative assets | 4,112 | (1,606) | (2,149) | (211) | 146 |
| Reverse repurchase agreements | 14,771 | – | – | (14,782) | (11) |
| Total financial assets | 18,883 | (1,606) | (2,149) | (14,993) | 135 |
| Financial liabilities: | | | | | |
| Derivative liabilities | (4,062) | 1,606 | 905 | 1,346 | (205) |
| Securities lending and repurchase agreements | (1,602) | – | 43 | 1,535 | (24) |
| Total financial liabilities | (5,664) | 1,606 | 948 | 2,881 | (229) |
| Analysed as: | | | | | |
| Financial assets from continuing operations | 3,709 | (308) | (435) | (2,947) | 19 |
| Financial assets from discontinued UK and Europe operations | 15,174 | (1,298) | (1,714) | (12,046) | 116 |
| Total financial assets | 18,883 | (1,606) | (2,149) | (14,993) | 135 |
| Financial liabilities from continuing operations | (1,637) | 308 | 86 | 1,095 | (148) |
| Financial liabilities from discontinued UK and Europe operations | (4,027) | 1,298 | 862 | 1,786 | (81) |
| Total financial liabilities | (5,664) | 1,606 | 948 | 2,881 | (229) |

Notes

- (i) The Group has not offset any of the amounts included in the consolidated statement of financial position.
- (ii) Represents the amount that could be offset under master netting or similar arrangements where the Group does not satisfy the full criteria to offset on the consolidated statement of financial position.
- (iii) Excludes initial margin amounts for exchange-traded derivatives.
- (iv) In the tables above, the amounts of assets or liabilities included in the consolidated statement of financial position would be offset first by financial instruments that have the right of offset under master netting or similar arrangements with any remaining amount reduced by the amount of cash and securities collateral. The actual amount of collateral may be greater than amounts presented in the tables.

C4 Policyholder liabilities and unallocated surplus

The note provides information of policyholder liabilities and unallocated surplus of with-profits funds held on the Group's statement of financial position:

Notes

- (a) The items above represent the amount attributable to changes in policyholder liabilities and unallocated surplus of with-profits funds as a result of each of the components listed. The policyholder liabilities shown include investment contracts without discretionary participation features (as defined in IFRS 4) and their full movement in the year but exclude liabilities that have not been allocated to a reporting segment. The items above are shown gross of external reinsurance.
- (b) The analysis includes the impact of premiums, claims and investment movements on policyholders' liabilities. The impact does not represent premiums, claims and investment movements as reported in the income statement. For example, premiums shown above exclude any deductions for fees/charges; claims (surrenders, maturities and deaths) shown above represent the policyholder liabilities provision released rather than the claims amount paid to the policyholder.
- (c) The policyholder liabilities of the Asia insurance operations at 31 December 2018 of \$91,836 million were after deducting the intra-group reinsurance liabilities ceded by the discontinued UK and Europe operations of \$1,412 million to the Hong Kong with-profits business, which were recaptured in October 2019 upon demerger. Including this amount, total Asia policyholder liabilities at 31 December 2018 were \$93,248 million.
- (d) The Group's investment in joint ventures and associate are accounted for on an equity method basis in the Group's statement of financial position. The Group's share of the policyholder liabilities as shown above relates to life businesses of the China JV, India and the Takaful business in Malaysia.
- (e) Average policyholder liabilities have been based on opening and closing balances, adjusted for acquisitions, disposals and other corporate transactions arising in the year, and exclude unallocated surplus of with-profits funds.

(ii) Analysis of movements in policyholder liabilities for shareholder-backed business

| | Asia \$m | US \$m | Dis- continued UK and Europe operations \$m | Total \$m |

Note

Including net flows of the Group's insurance joint ventures and associate.

C4 Policyholder liabilities and unallocated surplus continued

C4.1 Group overview continued

(iii) Movement in insurance contract liabilities and unallocated surplus of with-profits funds

Further analysis of the movement in the year of the Group's gross contract liabilities, reinsurer's share of insurance contract liabilities and unallocated surplus of with-profits funds (excluding those held by joint ventures and associate) is provided below:

| | Gross insurance contract liabilities \$m | Reinsurers' share of insurance contract liabilities \$m note (a) | Investment contracts \$m note (b) | Unallocated surplus of with-profits funds \$m |
|--|--|--|--|---|
| Balance at 1 January 2018 | (443,952) | 13,086 | (112,378) | (22,931) |
| Income and expense included in the income statement ^{note (c)} | | | | |
| – continuing operations | 512 | 548 | (104) | 1,494 |
| – discontinued operations | 11,497 | 14,727 | (5,249) | 227 |
| Other movements ^{note (d)} | 13,375 | (13,375) | 859 | (51) |
| Foreign exchange translation differences | 7,621 | (793) | 6,533 | 1,081 |
| Balance at 31 December 2018/1 January 2019 | (410,947) | 14,193 | (110,339) | (20,180) |
| Demerger of UK and Europe operations ^{note (e)} | 87,824 | (2,169) | 105,196 | 16,982 |
| Income and expense included in the income statement for continuing operations ^{note (c)} | (55,579) | 1,795 | (311) | (1,415) |
| Other movements ^{note (d)} | – | – | (63) | (112) |
| Foreign exchange translation differences | (1,441) | 37 | (18) | (25) |
| Balance at 31 December 2019 | (380,143) | 13,856 | (5,535) | (4,750) |

Notes

- (a) Includes reinsurers' share of claims outstanding of \$1,094 million (31 December 2018: \$1,280 million).
- (b) This comprises investment contracts with discretionary participation features of \$633 million at 31 December 2019 (31 December 2018: \$85,858 million) and investment contracts without discretionary participation features of \$4,902 million at 31 December 2019 (31 December 2018: \$24,481 million).
- (c) The total charge for benefits and claims from continuing operations in 2019 shown in the income statement comprises the amounts shown as 'income and expense included in the income statement' in the table above of \$(55,510) million (2018: \$2,450 million) together with claims paid of \$(29,585) million (2018: \$(26,926) million), net of amounts attributable to reinsurers of \$1,190 million (2018: \$1,050 million).
- (d) Other movements for 2019 are for continuing operations only and include premiums received and claims paid on investment contracts without discretionary participating features, which are taken directly to the statement of financial position in accordance with IAS 39 and changes in the unallocated surplus of with-profits funds resulting from the recapture of the intra-group reinsurance agreement between the with-profits discontinued UK and Europe operations and Asia insurance operations prior to the demerger, which is eliminated in the income statement for the continuing operations of the Group. For 2018, in addition to premiums received and claims paid on investment contracts without discretionary participating features, other movements also included the reclassification of the reinsured UK annuity business as held for sale at 31 December 2018 and the changes in the unallocated surplus of with-profits funds resulting from actuarial gains and losses on the Group's defined benefit pension schemes allocated to the with-profits funds of the discontinued UK and Europe operations, which were recognised directly in other comprehensive income.
- (e) The balances of the discontinued UK and Europe operations are removed from the opening balances to show the underlying movement from continuing operations. The \$2,169 million of reinsurer's share of insurance contract liabilities in the table above excluded the intra-group reinsurance assets of \$1,412 million for the with-profits business ceded to the Asia insurance operations.

(iv) Reinsurers' share of insurance contract liabilities

The measurement of reinsurance assets is consistent with the measurement of the underlying direct insurance contracts. The treatment of any gains or losses arising on the purchase of reinsurance contracts is dependent on the underlying accounting basis of the entity concerned.

| | 31 Dec 2019 \$m | | | 31 Dec 2018 \$m | |
|--|------------------|----------------|-----------------------------|-----------------|---------------|
| | Asia note (a) | US note (b) | Unallocated to a segment | Total | Total |
| Insurance contract liabilities | 5,311 | 7,447 | 4 | 12,762 | 12,913 |
| Claims outstanding | 147 | 947 | – | 1,094 | 1,280 |
| Total | 5,458 | 8,394 | 4 | 13,856 | 14,193 |
| Analysed as: | | | | | |
| From continuing operations | | | | | 12,024 |
| From discontinued UK and Europe operations | | | | | 2,169 |
| | | | | | 14,193 |

Notes

- (a) The reinsurers' share of insurance contract liabilities for Asia primarily relates to protection business written in Hong Kong.
- (b) The reinsurer's share of insurance contract liabilities for Jackson as shown in the table above primarily relates to certain fully collateralised former REALIC business retained by Swiss Re through 100 per cent reinsurance agreements. Apart from the reinsurance of REALIC business, the principal reinsurance ceded by Jackson outside the Group is on term-life insurance, direct and assumed accident and health business and GMIB variable annuity guarantees.

The Group cedes certain business to other insurance companies. Although the ceding of insurance does not relieve the Group from its liability to its policyholders, the Group participates in such agreements for the purpose of managing its loss exposure. The Group evaluates the financial condition of its reinsurers and monitors concentration of credit risk from similar geographic regions, activities or economic characteristics of the reinsurers to minimise its exposure from reinsurer insolvencies. Of the reinsurers' share of insurance contract liabilities balance of \$13,856 million at 31 December 2019 (31 December 2018: \$12,024 million from continuing operations), 97 per cent (31 December 2018: 95 per cent from continuing operations) of the balance was from reinsurers with rating A- and above by Standard & Poor's or other external rating agencies.

Net commissions received on ceded business and claims incurred ceded to external reinsurers for Asia totalled \$355 million and \$552 million respectively during 2019 (2018: \$294 million and \$362 million, respectively). Net commissions received on ceded business and claims incurred ceded to external reinsurers for Jackson totalled \$20 million and \$630 million respectively during 2019 (2018: \$9 million and \$653 million, respectively). There were no deferred gains or losses on reinsurance contracts for Asia and Jackson in either 2019 or 2018.

C4.2 Asia insurance operations

(i) Analysis of movements in policyholder liabilities and unallocated surplus of with-profits funds

| | Shareholder-backed business | | | Total \$m |
|--|------------------------------|--------------------------------|-----------------------|----------------|
| | With-profits business \$m | Unit-linked liabilities \$m | Other business \$m | |
| Balance at 1 January 2018 | 49,292 | 27,093 | 23,505 | 99,890 |
| <i>Comprising:</i> | | | | |
| – Policyholder liabilities on the consolidated statement of financial position | 44,592 | 22,001 | 18,496 | 85,089 |

C4 Policyholder liabilities and unallocated surplus continued

C4.2 Asia insurance operations continued

Notes

- (a) The Group's investment in joint ventures and associate are accounted for on an equity method and the Group's share of the policyholder liabilities as shown above relate to the life business of the China JV, India and the Takaful business in Malaysia.
- (b) The rate of surrenders for shareholder-backed business (expressed as a percentage of opening policyholder liabilities) was 7.0 per cent in 2019 (2018: 6.6 per cent).
- (c) Investment-related items and other movements in 2019 primarily represent equity market gains from the with-profits business and effects from lower interest rates.
- (d) Movements in the year have been translated at the average exchange rates for the year ended 31 December 2019. The closing balance has been translated at the closing spot rates as at 31 December 2019. Differences upon retranslation are included in foreign exchange translation differences.
- (e) Average policyholder liabilities have been based on opening and closing balances, adjusted for any acquisitions, disposals and other corporate transactions arising in the year, and exclude unallocated surplus of with-profits funds.

(ii) Duration of policyholder liabilities

The table below shows the carrying value of policyholder liabilities and the maturity profile of the cash flows on a discounted basis, taking account of expected future premiums and investment returns:

| | 31 Dec 2019 \$m | 31 Dec 2018 \$m |
|---------------------------|--------------------------|--------------------------|
| Policyholder liabilities | 115,943 | 91,836 |
| Expected maturity: | 31 Dec 2019 % | 31 Dec 2018 % |
| 0 to 5 years | 18 | 20 |
| 5 to 10 years | 18 | 19 |
| 10 to 15 years | 15 | 15 |
| 15 to 20 years | 13 | 12 |
| 20 to 25 years | 11 | 10 |
| Over 25 years | 25 | 24 |

(iii) Summary policyholder liabilities (net of reinsurance) and unallocated surplus

At 31 December 2019, the policyholder liabilities and unallocated surplus for Asia operations (excluding joint ventures and associate), net of external reinsurance of \$5,458 million (31 December 2018: \$3,537 million), comprised the following:

| | 31 Dec 2019 \$m | 31 Dec 2018 \$m |
|-----------------------|--------------------|--------------------|
| Hong Kong | 58,800 | 43,997 |
| Indonesia | 4,933 | 4,687 |
| Malaysia | 7,725 | 6,937 |
| Singapore | 27,427 | 23,121 |
| Taiwan | 6,801 | 5,353 |
| Other operations | 9,549 | 7,402 |
| Total Asia operations | 115,235 | 91,497 |

C4.3 US insurance operations

(i) Analysis of movements in policyholder liabilities

| | Variable annuity separate account liabilities \$m | Fixed annuity, GICs and other business \$m | Total \$m |
|--|--|---|----------------|
| Balance at 1 January 2018 | 176,578 | 67,905 | 244,483 |
| Premiums | 14,646 | 3,967 | 18,613 |
| Surrenders | (11,746) | (4,465) | (16,211) |
| Maturities/deaths | (1,449) | (1,238) | (2,687) |
| Net flows | 1,451 | (1,736) | (285) |
| Addition for closed block of group payout annuities in the US | – | 5,532 | 5,532 |
| Transfers from general to separate account | 708 | (708) | – |
| Investment-related items and other movements | (15,436) | 2,086 | (13,350) |
| Balance at 31 December 2018/1 January 2019 | 163,301 | 73,079 | 236,380 |
| Premiums | 12,776 | 8,200 | 20,976 |
| Surrenders | (12,767) | (4,575) | (17,342) |
| Maturities/deaths | (1,564) | (1,823) | (3,387) |
| Net flows ^{note (a)} | (1,555) | 1,802 | 247 |
| Transfers from general to separate account | 951 | (951) | – |
| Investment-related items and other movements ^{note (b)} | 32,373 | 549 | 32,922 |
| Balance at 31 December 2019 | 195,070 | 74,479 | 269,549 |
| Average policyholder liability balances ^{note (c)} | | | |
| 2019 | 179,186 | 73,779 | 252,965 |
| 2018 | 169,940 | 69,109 | 239,049 |

Notes

- (a) Net inflows in 2019 are \$247 million with new inflows into fixed annuity, fixed index annuity and the general account exceeding withdrawals and surrenders on this business, partially offset by net outflows from variable annuity business as the portfolio matures.
- (b) Positive investment-related items and other movements largely represent positive separate account returns following the increase in the US equity market in the year and asset gains arising from declining bond yields.
- (c) Average policyholder liabilities have been based on opening and closing balances, adjusted for any acquisitions, disposals and other corporate transactions arising in the year.

(ii) Duration of policyholder liabilities

The table below shows the carrying value of policyholder liabilities and maturity profile of the cash flows on a discounted basis at the balance sheet date:

| | 31 Dec 2019 | | | 31 Dec 2018 | | |
|--------------------------|--|---|--------------|--|---|--------------|
| | Variable annuity separate account liabilities \$m | Fixed annuity, GICs and other business \$m | Total \$m | Variable annuity separate account liabilities \$m | Fixed annuity, GICs and other business \$m | Total \$m |
| Policyholder liabilities | 195,070 | 74,479 | 269,549 | 163,301 | 73,079 | 236,380 |
| Expected maturity: | % | % | % | % | % | % |
| 0 to 5 years | 41 | 45 | 42 | 40 | 51 | 43 |
| 5 to 10 years | 27 | 27 | 27 | 28 | 24 | 27 |
| 10 to 15 years | 16 | 13 | 15 | 16 | 12 | 15 |
| 15 to 20 years | 9 | 8 | 9 | 9 | 7 | 8 |
| 20 to 25 years | 4 | 4 | 4 | 4 | 3 | 4 |
| Over 25 years | 3 | 3 | 3 | 3 | 3 | 3 |

C4 Policyholder liabilities and unallocated surplus continued

C4.3 US insurance operations continued

(iii) Aggregate account values

The table below shows the distribution of account values for fixed annuities (fixed interest rate and fixed index), the fixed account portion of variable annuities, and interest-sensitive life business within the range of minimum guaranteed interest rates as described in note C4.4(b). As at 31 December 2019, approximately 87 per cent (31 December 2018: 87 per cent) of Jackson's fixed annuities, variable annuity fixed account options and interest-sensitive life business account values correspond to crediting rates that are at the minimum guaranteed interest rates.

| Minimum guaranteed interest rate | Fixed annuities and the fixed account portion of variable annuities | | Interest-sensitive life business | |
|----------------------------------|---|--------------------|----------------------------------|--------------------|
| | 31 Dec 2019 \$m | 31 Dec 2018 \$m | 31 Dec 2019 \$m | 31 Dec 2018 \$m |
| > 0% – 1.0% | 6,952 | 9,660 | – | – |
| > 1.0% – 2.0% | 12,994 | 8,646 | – | – |
| > 2.0% – 3.0% | 13,701 | 12,832 | 270 | 291 |
| > 3.0% – 4.0% | 1,561 | 1,623 | 3,018 | 3,049 |
| > 4.0% – 5.0% | 2,236 | 2,285 | 2,597 | 2,683 |
| > 5.0% – 6.0% | 278 | 286 | 2,031 | 2,168 |
| Total | 37,722 | 35,332 | 7,916 | 8,191 |

C4.4 Products and determining contract liabilities

C4.4(a) Asia

| Contract type | Description and material features | Determination of liabilities |
|---|--|--|
| With-profits and participating contracts | <p>Provides savings and/or protection where the basic sum assured can be enhanced by a profit share (or bonus) from the underlying fund as determined at the discretion of the Company.</p> <p>Participating products often offer a guaranteed maturity or surrender value. Declared regular bonuses are guaranteed once vested. Future bonus rates and cash dividends are not guaranteed. Market value adjustments and surrender penalties are used for certain products where the law permits such adjustments. Guarantees are predominantly supported by segregated life funds and their estates.</p> | <p>With-profits contracts are predominantly sold in Hong Kong, Malaysia and Singapore. The total value of the with-profits funds is driven by the underlying asset valuation with movements reflected principally in the accounting value of policyholder liabilities and unallocated surplus.</p> |

C4.4(a) Asia continued

| <i>Contract type</i> | <i>Description and material features</i> | <i>Determination of liabilities</i> |
|---|--|--|
| Term, whole life and endowment assurance | <p>Non-participating savings and/or protection where the benefits are guaranteed, or determined by a set of defined market-related parameters.</p> <p>These products often offer a guaranteed maturity and surrender value. It is common in Asia for regulations or market-driven demand and competition to provide some form of capital value protection and minimum crediting interest rate guarantees. This is reflected within the guaranteed maturity and surrender values. Guarantees are borne by shareholders.</p> | <p>The approach to determining the contract liabilities is generally driven by the local solvency basis. A gross premium valuation method is used in those local businesses where a risk-based capital framework is adopted for local solvency. Under the gross premium valuation method, all cash flows are valued explicitly using best estimate assumptions with a suitable margin for prudence.</p> <p>This is achieved either through adding an explicit allowance for assumptions to deviate from best estimate or by applying an overlay constraint so that on day one no negative reserves (ie where future premium inflows are expected to exceed prudent future claims and outflows) are derived at an individual policyholder level, or a combination of both.</p> <p>In Vietnam, the Company uses an estimation basis aligned substantially to that used by the countries applying the gross premium valuation method.</p> <p>For India and Taiwan, US GAAP is applied for measuring insurance liabilities. For these businesses, the future policyholder benefit provisions for non-linked business are determined using the net level premium method, with an allowance for surrenders, maintenance and claims expenses. Rates of interest used in establishing the policyholder benefit provisions vary by operation depending on the circumstances attaching to each block of business.</p> <p>The Hong Kong business unit applies a net premium valuation method to determine the future policyholder benefit provisions.</p> |
| Unit-linked | <p>Combines savings with protection, the cash value of the policy depends on the value of the underlying unitised funds.</p> | <p>The attaching liabilities reflect the unit value obligation driven by the value of the investments of the unit fund. Additional technical provisions are held for guaranteed benefits beyond the unit fund value using a gross premium valuation method. These additional provisions are recognised as a component of other business liabilities.</p> |
| Health and protection | <p>Health and protection features are offered as supplements to the products listed above or sold as standalone products. Protection covers mortality or morbidity benefits including health, disability, critical illness and accident coverage.</p> | <p>The determination of the liabilities of health and protection contracts are driven by the local solvency basis. A gross premium valuation method is used in those countries where a risk-based capital framework is adopted for local solvency. Under the gross premium valuation method, all cash flows are valued explicitly using best estimate assumptions with a suitable margin for prudence.</p> <p>This is achieved either through adding an explicit allowance for assumptions to deviate from best estimate or by applying an overlay constraint so that on day one no negative reserves (ie where future premium inflows are expected to exceed prudent future claims and outflows) are derived at an individual policyholder level, or a combination of both.</p> <p>The Hong Kong business unit applies a net premium valuation method to determine the future policyholder benefit provisions.</p> |

C4 Policyholder liabilities and unallocated surplus continued

C4.4 Products and determining contract liabilities continued

C4.4(b) US

| <i>Contract type</i> | <i>Description and material features</i> | <i>Determination of liabilities</i> |
|---|--|---|
| <p>Fixed interest rate annuities</p> <p>At 31 December 2019, fixed interest rate annuities accounted for 6 per cent (31 December 2018: 7 per cent) of Jackson's policy and contract liabilities.</p> | <p>Fixed interest rate annuities are primarily deferred annuity products that are used for asset accumulation in retirement planning and for providing income in retirement.</p> <p>The policyholder of a fixed interest rate annuity pays Jackson a premium, which is credited to the policyholder's account. Periodically, interest is credited to the policyholder's account and in some cases administrative charges are deducted from the policyholder's account. Jackson makes benefit payments at a future date as specified in the policy based on the value of the policyholder's account at that date. On more than 90 per cent (2018: 94 per cent) of in-force business, Jackson may reset the interest rate on each contract anniversary, subject to a guaranteed minimum, in line with state regulations. When the annuity matures, Jackson either pays the contract holder the account value or a series of payments in the form of an immediate annuity product.</p> <p>The policy provides that at Jackson's discretion it may reset the interest rate, subject to a guaranteed minimum.</p> <p>Approximately 65 per cent (31 December 2018: 64 per cent) of the fixed interest rate annuities Jackson wrote in 2019 provide for a (positive or negative) market value adjustment (MVA) on surrender. This formula-based adjustment approximates the change in value that assets supporting the product would realise as interest rates move.</p> <p>Guaranteed minimum interest rate. At 31 December 2019, Jackson had fixed interest rate annuities totalling \$15.9 billion (31 December 2018: \$16.1 billion) in account value with minimum guaranteed rates ranging from 1.0 per cent to 5.5 per cent and a 2.88 per cent average guaranteed rate (31 December 2018: 1.0 per cent to 5.5 per cent and a 2.91 per cent average guaranteed rate), depending on the particular product, jurisdiction where issued and the date of issue.</p> | <p>As explained in note A4.1, all of Jackson's insurance liabilities are based on US GAAP. An overview of the deferral and amortisation of acquisition costs for Jackson is provided in note C5.2(i)(b).</p> <p>With minor exceptions, the following is applied to most of Jackson's contracts. Contracts are accounted for as investment contracts as defined for US GAAP purposes by applying a retrospective deposit method to determine the liability for policyholder benefits.</p> <p>This is then augmented by:</p> <ul style="list-style-type: none"> — Any amounts that have been assessed to compensate the insurer for services to be performed over future periods (ie deferred income); — Any amounts previously assessed against policyholders that are refundable on termination of the contract; and — Any probable future loss on the contract (ie premium deficiency). <p>Capitalised acquisition costs and deferred income for these contracts are amortised over the life of the book of contracts. See the variable annuity section below for further discussion.</p> <p>The interest guarantees are not explicitly valued but are reflected as they are earned in the current account liability value.</p> |

C4.4(b) US continued

| Contract type | Description and material features | Determination of liabilities |
|---|--|--|
| <p>Fixed index annuities</p> <p>At 31 December 2019, fixed index annuities accounted for 5 per cent (31 December 2018: 5 per cent) of Jackson's policy and contract liabilities.</p> | <p>Fixed index annuities vary in structure but are generally deferred annuities that enable policyholders to obtain a portion of an equity-linked return (based on participation rates, caps and spreads), and provide a guaranteed minimum return.</p> <p>Most fixed index annuities are subject to early surrender charges for the first five to 12 years of the contract. During the surrender charge period, the contract holder may cancel the contract for the surrender value. Jackson offers a fully liquid fixed index annuity product that has no surrender charges.</p> <p>Jackson hedges the equity return risk on fixed index products using offsetting equity exposure in the variable annuity product. The cost of hedging is taken into account in setting the index participation rates, caps or spreads.</p> <p>Guaranteed minimum rates are generally set at 1.0 to 3.0 per cent. At 31 December 2019, Jackson had fixed index annuities allocated to indexed funds totalling \$9.8 billion (31 December 2018: \$7.6 billion) in account value with minimum guaranteed rates on index accounts ranging from 1.0 per cent to 3.0 per cent and a 1.46 per cent average guaranteed rate (31 December 2018: 1.0 per cent to 3.0 per cent and a 1.77 per cent average guarantee rate).</p> <p>Jackson offers an optional lifetime income rider, which can be elected for an additional fee.</p> <p>Jackson also offers fixed interest accounts on some fixed index annuity products. At 31 December 2019, fixed interest accounts of fixed index annuities totalled \$4.3 billion (31 December 2018: \$3.4 billion) in account value.</p> <p>Minimum guaranteed rates on fixed interest accounts range from 1.0 per cent to 3.0 per cent and a 2.75 per cent average guaranteed rate (31 December 2018: 1.0 per cent to 3.0 per cent and a 2.58 per cent average guaranteed rate).</p> | <p>The liability for policyholder benefits that represent the guaranteed minimum return is determined similarly to the liabilities of the fixed interest annuity above. The equity-linked return option within the contract is treated as an embedded derivative liability under US GAAP and therefore this element of the liability is recognised at fair value.</p> <p>The liability for the lifetime income rider is determined each period end by estimating the expected value of benefits in excess of the projected account balance and recognising the excess on a prorated basis over the life of the contract based on total expected assessments.</p> |

| <p>Group pay-out annuities</p> <p>At 31 December 2019, group pay-out annuities accounted for 2 per cent (31 December 2018: 2 per cent) of Jackson's policy and contract liabilities.</p> | <p>Group pay-out annuities consist of a block of defined benefit annuity plans assumed from John Hancock USA and John Hancock New York. A single premium payment from an employer (contract holder) funds the pension benefits for its employees (participants). The contracts are tailored to meet the requirements of the specific pension plan being covered. This is a closed block of business from two standpoints: (1) John Hancock USA and John Hancock New York are no longer selling new contracts, and (2) contract holders (companies) are no longer adding additional participants to these defined benefit pension plans.</p> <p>The contracts provide annuity payments that meet the requirements of the specific pension plan being covered. In some cases, the contracts have pre-retirement death and/or withdrawal benefits, pre-retirement surviving spouse benefits, and/or subsidised early retirement benefits.</p> | <p>The liability for future benefits is determined under US GAAP methodology for limited-payment contracts, using assumptions as of the acquisition date as to mortality and expense plus provisions for adverse deviation.</p> |

C4.4(b) US continued

| Contract type | Description and material features | Determination of liabilities |
|---|---|--|
| <p>Variable annuities</p> <p>At 31 December 2019, variable annuities accounted for 78 per cent (31 December 2018: 75 per cent) of Jackson's policy and contract liabilities.</p> | <p>Variable annuities are deferred annuities that have the same tax advantages and pay-out options as fixed interest rate and fixed index annuities. They are also used for asset accumulation in retirement planning and to provide income in retirement.</p> <p>The rate of return depends upon the performance of the selected fund portfolio. Policyholders may allocate their investment to either the fixed account or a selection of variable accounts. Most variable annuities are subject to early surrender charges for the first three to nine years of the contract. During the surrender charge period, the contract holder may cancel the contract for the surrender value. Jackson offers some fully liquid variable annuity products that have no surrender charges. Subject to benefit guarantees, investment risk on the variable account is borne by the policyholder, while investment risk on the fixed account is borne by Jackson through guaranteed minimum fixed rates of interest. At 31 December 2019, 4 per cent (31 December 2018: 5 per cent) of variable annuity funds were in fixed accounts.</p> <p>Jackson had variable annuity funds in fixed accounts totalling \$7.8 billion (31 December 2018: \$8.1 billion) with minimum guaranteed rates ranging from 1.0 per cent to 3.0 per cent and a 2.19 per cent average guaranteed rate (31 December 2018: 1.0 per cent to 3.0 per cent and a 1.7 per cent average guaranteed rate).</p> <p>Jackson offers a choice of guaranteed benefit options within its variable annuity product portfolio, which can be elected for additional fees. These guaranteed benefits might be expressed as the return of either: (a) total deposits made to the contract adjusted for any partial withdrawals, (b) total deposits made to the contract adjusted for any partial withdrawals, plus a minimum return, or (c) the highest contract value on a specified anniversary date adjusted for any withdrawals following that contract anniversary.</p> <p>Jackson hedges these risks using derivative instruments as described in note C7.3.</p> | <p>The general principles for fixed annuity and fixed index annuity also apply to variable annuities.</p> <p>The impact of any fixed account interest guarantees is reflected as they are earned in the current account value.</p> <p>Jackson regularly evaluates estimates used and adjusts the benefit guarantee liability balances, with a related charge or credit to benefit expense if actual experience or other evidence suggests that earlier assumptions should be revised.</p> <p>The benefit guarantee types are further set out below:</p> <p><i>Benefits that are payable in the event of death (guaranteed minimum death benefit)</i></p> <p>The liability for Guaranteed Minimum Death Benefit (GMDB) is determined at each period end by estimating the expected value of benefits in excess of the projected account balance and recognising the excess rateably over the life of the contract based on total expected assessments. At 31 December 2019, these liabilities were valued using a series of stochastic investment performance scenarios, a mean investment return of 7.4 per cent (31 December 2018: 7.4 per cent) net of external fund management fees, and assumptions for policyholder behaviour, mortality and expense.</p> <p><i>Benefits that are payable upon the depletion of funds (guaranteed minimum withdrawal benefit)</i></p> <p>The liability for the Guaranteed Minimum Withdrawal Benefit (GMWB) 'for life' portion is determined similarly to GMDB above.</p> <p>Provisions for benefits under GMWB 'not for life' features are recognised at fair value under US GAAP.</p> <p>Non-performance risk is incorporated into the fair value calculation through the use of discount interest rates sourced from an AA corporate credit curve as a proxy for Jackson's own credit risk. Other risk margins, particularly for policyholder behaviour and long-term volatility, are also incorporated into the model through the use of explicitly conservative assumptions. On a periodic basis, Jackson validates the resulting fair values based on comparisons to other models and market movements.</p> <p>The value of future fees to offset payments made under the guarantees are established so that on day one no gain arises.</p> |

|---|---|--|
| <p>Life insurance</p> <p>At 31 December 2019, life insurance products accounted for 7 per cent (31 December 2018: 9 per cent) of Jackson's policy and contract liabilities.</p> | <p>Jackson discontinued new sales of life insurance products in 2012.</p> <p>Life products include term life, traditional life and interest-sensitive life (universal life and variable universal life).</p> <ul style="list-style-type: none"> — Term life provides protection for a defined period and a benefit that is payable to a designated beneficiary upon death of the insured. — Traditional life provides protection for either a defined period or until a stated age and includes a predetermined cash value. — Universal life provides permanent individual life insurance for the life of the insured and includes a savings element. — Variable universal life is a type of life insurance policy that combines death benefit protection with the ability for the policyholder account to be invested in separate account funds. <p>Excluding the business that is subject to the retrocession treaties at 31 December 2019, Jackson had interest-sensitive life business in force with total account value of \$7.9 billion (31 December 2018: \$8.2 billion), with minimum guaranteed interest rates ranging from 2.5 per cent to 6.0 per cent with a 4.68 per cent average guaranteed rate (31 December 2018: 2.5 per cent to 6.0 per cent with a 4.67 per cent average guaranteed rate).</p> | <p>For term and traditional life insurance contracts, provisions for future policy benefits are determined under US GAAP using the net level premium method and assumptions as of the issue or acquisition date as to mortality, interest, policy lapses and expenses plus provisions for adverse deviation for directly sold business and assumptions at purchase for acquired business.</p> <p>For universal life and variable universal life a retrospective deposit method is used to determine the liability for policyholder benefits. This is then augmented by additional liabilities to account for no-lapse guarantees, profits followed by losses, contract features such as persistency bonuses, and cost of interest rate guarantees.</p> |
| <p>Institutional products</p> <p>At 31 December 2019, institutional products accounted for 1 per cent (31 December 2018: 1 per cent) of Jackson's policy and contract liabilities.</p> | <p>Institutional products are: guaranteed investment contracts (GICs), funding agreements (including agreements issued in conjunction with Jackson's participation in the US Federal Home Loan Bank programme) and Medium Term Note funding agreements.</p> <p>GICs feature a lump sum policyholder deposit on which interest is paid at a rate fixed at inception. Market value adjustments are made to the value of any early withdrawals.</p> <p>Funding agreements feature either lump sum or periodic policyholder deposits. Interest is paid at a fixed or index linked rate. Funding agreements have a duration of between one and 30 years. In 2019 and 2018 there were no funding agreements terminable by the policyholder with less than 90 days' notice.</p> | <p>Institutional products are classified as investment contracts, and are accounted for as financial liabilities at amortised cost. The currency risk on contracts that represent currency obligations other than US dollars are hedged using cross-currency swaps.</p> |

C5 Intangible assets

C5.1 Goodwill

Business combination

Business acquisitions are accounted for by applying the purchase method of accounting, which adjusts the net assets of the acquired company to fair value at the date of purchase. The excess of the acquisition consideration over the fair value of the assets and liabilities of the acquired business is recorded as goodwill. The Group chooses the full goodwill method or the partial goodwill method to calculate goodwill on an acquisition by acquisition basis. Expenses related to acquiring new subsidiaries are charged to the income statement in the period in which they are incurred and not included in goodwill. Income and expenses of acquired businesses are included in the income statement from the date of acquisition.

Where the Group writes a put option over its non-controlling interests as part of its business acquisition, which if exercised triggers the purchase by the Group of the non-controlling interests, the put option is recognised as a financial liability at the acquisition date with a corresponding amount, deducted directly from shareholder's equity due to the significant risks and rewards of ownership remaining with the non-controlling interests. Any subsequent changes to the carrying amount of the put liability are also recognised within equity.

Goodwill

Goodwill is capitalised and carried on the Group consolidated statement of financial position as an intangible asset at initial value less any accumulated impairment losses. Goodwill impairment testing is conducted annually and when there is an indication of impairment.

Goodwill shown on the consolidated statement of financial position at 31 December 2019 is wholly attributable to shareholders and represents amounts allocated to businesses in Asia and Africa in respect of both acquired asset management and life businesses.

| | 31 Dec 2019 \$m | 31 Dec 2018 \$m |
|--|--------------------|--------------------|
| Carrying value at beginning of year | 2,365 | 2,005 |
| Demerger of UK and Europe operations | (1,731) | – |
| Additions in the year | 299 | 503 |
| Disposals/reclassifications to held for sale | – | (13) |
| Exchange differences | 36 | (130) |
| Carrying value at end of year | 969 | 2,365 |

Impairment testing

Goodwill does not generate cash flows independently of other groups of assets and thus is assigned to cash-generating units for the purposes of impairment testing. These cash-generating units are based upon how management monitors the business and represent the lowest level to which goodwill can be allocated on a reasonable basis.

Goodwill is tested for impairment by comparing the cash-generating unit's carrying amount, including any goodwill, with its recoverable amount. The Group's methodology of assessing whether goodwill may be impaired for acquired life and asset management operations is discussed below:

For acquired life businesses, the Company routinely compares the aggregate of net asset value and acquired goodwill on an IFRS basis of the acquired life business with the value of the current in-force business as determined using the EEV methodology. Any excess of IFRS value over EEV carrying value is then compared with EEV basis value of current and projected future new business to determine whether there is any indication that the goodwill in the IFRS statement of financial position may be impaired. The methodology and assumptions underpinning the Group's EEV basis of reporting are included in the EEV basis supplementary information in this Annual Report.

The goodwill in respect of asset management businesses comprised mainly the goodwill arising from the acquisition of Thanachart Fund Management Co., Ltd. (TFUND) in 2019 and TMB Asset Management Co., Ltd. (TMBAM) in Thailand in 2018. At 31 December 2019, the recoverable amount of these businesses has been determined by calculating the value in use of each of these businesses (considered to be the cash-generating units) using a discounted cash flow valuation.

For TMBAM, the discounted cash flow valuation is based on the latest three-year plan and cash flow projections for the later years. For TFUND, which was acquired in December 2019, the valuation is based on the 10-year cash flow projections used in assessing the acquisition. The value in use for these acquired asset management businesses is particularly sensitive to a number of key assumptions as follows:

- The set of economic, market and business assumptions used to derive the cash flow projections for the businesses;
- The assumed growth rate on forecast cash flows beyond the terminal year of the cash flow projections after considering expected future and past growth rates. At 31 December 2019, a growth rate of 2.25 per cent has been used to extrapolate beyond the projection period (2018: 2.25 per cent in respect of TMBAM);
- The risk discount rate applied in accordance with the nature of the businesses. The pre-tax discount rate applied at 31 December 2019 was 9 per cent (2018: 9 per cent in respect of TMBAM); and
- The continuation of asset management contracts on similar terms.

Management believes that any reasonable change in the key assumptions would not cause the recoverable amount of the asset management businesses acquired to fall below its carrying amount.

C5.2 Deferred acquisition costs and other intangible assets

Intangible assets acquired on the purchase of a subsidiary or portfolio of contracts are measured at fair value on acquisition. Deferred acquisition costs are accounted for as described in note A4.1(c). Other intangible assets, such as distribution rights and software, are valued initially at the price paid to acquire them and are subsequently carried at cost less amortisation and any accumulated impairment losses. For intangibles other than DAC, amortisation follows the pattern in which the future economic benefits are expected to be consumed. If the pattern cannot be determined reliably, a straight-line method is applied. For software, the amortisation generally represents the licence period of the software acquired. Amortisation of intangible assets is charged to the 'acquisition costs and other expenditure' line in the consolidated income statement. Impairment testing is conducted when there is an indication of impairment.

| Amortisation of DAC related to net unrealised valuation movements on the US insurance operation's available-for-sale securities recognised within other comprehensive income | – | (631) | – | – | (631) | 328 |
| Balance at 31 December | 1,999 | 12,240 | – | 3,170 | 17,409 | 15,008 |

* Under the Group's application of IFRS 4, US GAAP is used for measuring the insurance assets and liabilities of its US and certain Asia operations. Under US GAAP, most of the US insurance operation's products are accounted for under Accounting Standard no. 97 of the Financial Accounting Standards Board (FAS 97) whereby deferred acquisition costs are amortised in line with the emergence of actual and expected gross profits which are determined using an assumption for long-term investment returns for the separate account of 7.4 per cent (2018: 7.4 per cent), gross of asset management fees and other charges to policyholders, but net of external fund management fees. The other assumption impacting expected gross profits include mortality assumptions, lapses, assumed unit costs and future hedge costs. The amounts included in the income statement and other comprehensive income affect the pattern of profit emergence and thus the DAC amortisation attaching. DAC amortisation is allocated to the operating and non-operating components of the Group's supplementary analysis of profit and other comprehensive income by reference to the underlying items.

† PVIF and other intangibles comprise present value of acquired in-force (PVIF), distribution rights and other intangibles such as software rights. Distribution rights relate to amounts that have been paid or have become unconditionally due for payment as a result of past events in respect of bancassurance partnership arrangements in Asia. These agreements allow for bank distribution of Prudential's insurance products for a fixed period of time. Software rights include additions of \$51 million, amortisation of \$(33) million, disposals of \$5 million, foreign exchange of \$2 million and closing balance at 31 December 2019 of \$85 million (31 December 2018: \$70 million for continuing operations).

‡ In January 2019, the Group renewed its regional strategic bancassurance alliance with United Overseas Bank Limited (UOB). The new agreement extends the original alliance, which commenced in 2010, to 2034 and increases the geographical scope to include a fifth market, Vietnam, alongside the existing markets of Singapore, Malaysia, Thailand and Indonesia. As part of this transaction, Prudential has agreed to pay UOB an initial fee of \$853 million (equivalent to SGD1,150 million) for distribution rights which are not dependent on future sales volumes. Of the \$853 million, \$301 million was paid in 2019, with another two instalments being payable in 2020 and 2021. After allowing for discounting, the amount included in additions in the table above is \$834 million.

(b) The DAC amount in respect of US arises in the insurance operations which comprises the following amounts:

| | 31 Dec 2019 \$m | 31 Dec 2018 \$m |
|---|-----------------|-----------------|
| Variable annuity business | 12,406 | 10,796 |
| Other business | 529 | 381 |
| Cumulative shadow DAC (for unrealised gains/losses booked in other comprehensive income)* | (695) | (64) |
| Total DAC for US operations | 12,240 | 11,113 |

* A loss of \$(631) million (2018: a gain of \$328 million) for shadow DAC amortisation is booked within other comprehensive income to reflect the impact from the positive unrealised valuation movement of \$4,023 million (2018: negative unrealised valuation movement of \$(2,159) million). These adjustments reflect the movement from year to year, in the changes to the pattern of reported gross profit that would have happened if the assets reflected in the statement of financial position had been sold, crystallising the unrealised gains and losses, and the proceeds reinvested at the yields currently available in the market. At 31 December 2019, the cumulative shadow DAC balance as shown in the table above was negative \$(695) million (31 December 2018: negative \$(64) million).

(c) Sensitivity of US DAC amortisation charge

The amortisation charge to the income statement in respect of the US DAC asset is reflected in both adjusted IFRS operating profit based on longer-term investment returns and short-term fluctuations in investment returns. The amortisation charge to adjusted IFRS operating profit based on longer-term investment returns in a reporting period comprises:

- A core amount that reflects a relatively stable proportion of underlying premiums or profit; and
- An element of acceleration or deceleration arising from market movements differing from expectations.

In periods where the cap and floor features of the mean reversion technique (which is used for moderating the effect of short-term volatility in investment returns) are not relevant, the technique operates to dampen the second element above. Nevertheless, extreme market movements can cause material acceleration or deceleration of amortisation in spite of this dampening effect.

Furthermore, in those periods where the cap or floor is relevant, the mean reversion technique provides no further dampening and additional volatility may result.

In 2019, the DAC amortisation charge for adjusted IFRS operating profit based on longer-term investment returns was determined after including a credit for decelerated amortisation of \$280 million (2018: \$259 million charge for acceleration). The deceleration arising in 2019 reflects a mechanical decrease in the projected separate account return for the next five years under the mean-reversion technique. Under this technique, the projected level of return for each of the next five years is adjusted so that, in combination with the actual rates of return for the preceding three years (including the current year), the assumed long-term annual separate account return of 7.4 per cent is realised on average over the entire eight-year period. The deceleration in DAC amortisation in 2019 is primarily driven by the actual separate account return in the year being higher than that assumed.

The application of the mean reversion formula (described in note A4.1) has the effect of dampening the impact of equity market movements on DAC amortisation while the mean reversion assumption lies within the corridor. At 31 December 2019, it would take approximate movements in separate account values of more than either negative 26 per cent or positive 49 per cent for mean reversion assumption to move outside the corridor.

(ii) Deferred acquisition costs related to insurance and investment contracts

The movements in deferred acquisition costs relating to insurance and investment contracts are as follows:

| | 2019 \$m | | 2018 \$m | |
|---|---------------------|---------------------------|---------------------|---------------------------|
| | Insurance contracts | Investment contracts note | Insurance contracts | Investment contracts note |
| Balance at 1 January | 12,758 | 99 | 12,406 | 85 |
| Demerger of UK and Europe operations | (62) | (72) | – | – |
| Additions | 1,411 | 11 | 1,324 | 35 |
| Amortisation | 699 | (5) | (1,266) | (16) |
| Exchange differences | 31 | – | (34) | (5) |
| Change in shadow DAC related to movement in unrealised appreciation of debt securities classified as available-for-sale | (631) | – | 328 | – |
| Balance at 31 December | 14,206 | 33 | 12,758 | 99 |

Note

All of the additions of investment contracts are through internal development. The carrying amount of the DAC balance comprises the following gross and accumulated amortisation amounts:

| | 31 Dec 2019 \$m | 31 Dec 2018 \$m |
|--------------------------|-----------------|-----------------|
| Gross amount | 34 | 231 |
| Accumulated amortisation | (1) | (132) |
| Carrying amount | 33 | 99 |

(iii) PVIF and other intangibles attributable to shareholders

| | 2019 \$m | | | | 2018 \$m | | | |
|--|---------------|------------------------------|--|--------------|---------------|------------------------------|--|--------------|
| | PVIF note (a) | Distribution rights note (b) | Other intangibles (including software) | Total | PVIF note (a) | Distribution rights note (b) | Other intangibles (including software) | Total |
| Balance at 1 January | | | | | | | | |
| Cost | 295 | 2,546 | 399 | 3,240 | 307 | 2,426 | 491 | 3,224 |
| Accumulated amortisation | (252) | (587) | (250) | (1,089) | (258) | (423) | (334) | (1,015) |
| | 43 | 1,959 | 149 | 2,151 | 49 | 2,003 | 157 | 2,209 |
| Demerger of UK and Europe operations | (1) | – | (8) | (9) | – | – | – | – |
| Additions | – | 1,110 | 69 | 1,179 | – | 242 | 65 | 307 |
| Amortisation charge | (5) | (196) | (42) | (243) | (5) | (190) | (49) | (244) |
| Disposals and transfers | – | – | (11) | (11) | – | – | (19) | (19) |
| Exchange differences and other movements | 1 | 98 | 4 | 103 | (1) | (96) | (5) | (102) |
| Balance at 31 December | 38 | 2,971 | 161 | 3,170 | 43 | 1,959 | 149 | 2,151 |
| Comprising: | | | | | | | | |
| Cost | 175 | 3,783 | 379 | 4,337 | 295 | 2,546 | 399 | 3,240 |
| Accumulated amortisation | (137) | (812) | (218) | (1,167) | (252) | (587) | (250) | (1,089) |
| | 38 | 2,971 | 161 | 3,170 | 43 | 1,959 | 149 | 2,151 |

Notes

- (a) All of the net PVIF balances relate to insurance contracts. The PVIF attaching to investment contracts have been fully amortised. Amortisation is charged over the period of provision of asset management services as those profits emerge.
- (b) Distribution rights relate to fees paid in relation to the bancassurance partnership arrangements for the bank distribution of Prudential's insurance products for a fixed period of time. The distribution rights amounts are amortised on a basis to reflect the pattern in which the future economic benefits are expected to be consumed by reference to new business production levels.

C6 Borrowings

C6.1 Core structural borrowings of shareholder-financed businesses

Accounting principles

Although initially recognised at fair value, net of transaction costs, borrowings, excluding liabilities of consolidated collateralised debt obligations, are subsequently accounted for on an amortised cost basis using the effective interest method. Under the effective interest method, the difference between the redemption value of the borrowing and the initial proceeds (net of related issue costs) is amortised through the income statement to the date of maturity or for hybrid debt, over the expected life of the instrument.

| | 31 Dec 2019 \$m | 31 Dec 2018 \$m |
|---|--------------------|--------------------|
| Central operations: | | |
| Subordinated debt substituted to M&G plc in 2019: | | |

| Total core structural borrowings of shareholder-financed businesses ^{note (viii)} | 5,594 | 9,761 |

Notes

- (i) In 2019, the Group agreed with the holders of these two subordinated debt instruments that, in return for an increase in the coupon of the two instruments and upfront fees totalling \$182 million for both instruments, they would permit the substitution of M&G plc as the issuer of the instruments, together with other modifications of terms to ensure the debt meet the requirements of Solvency II. In accordance with IAS 39, this has been accounted for as an extinguishment of the old debt and the issuance of new debt, recognised at fair value. The debt was substituted to M&G plc in October 2019. The \$182 million of upfront fees have been paid by Prudential plc and have been treated as a non-operating expense from continuing operations.
- (ii) In 2019, Prudential plc transferred subordinated debt to M&G plc as part of the demerger. In addition to the subordinated debt held at 31 December 2018 as shown in the table above, the debt transferred included the further £300 million 3.875 per cent subordinated debt raised in July 2019.
- (iii) These borrowings can be converted, in whole or in part, at the Company's option and subject to certain conditions, on any interest payment date, into one or more series of Prudential preference shares.
- (iv) In May 2019, the Company redeemed its £400 million 11.375 per cent Tier 2 subordinated notes.
- (v) The senior debt ranks above subordinated debt in the event of liquidation.
- (vi) The bank loan of \$350 million was drawn in November 2019 at a cost of LIBOR plus 0.2 per cent. The loan matures on 7 November 2024. The £275 million bank loan was repaid by the Group in October 2019.
- (vii) Jackson's borrowings are unsecured and subordinated to all present and future indebtedness, policy claims and other creditor claims of Jackson.

(viii) The changes in the carrying value of the structural borrowings of shareholder-financed businesses for the Group (including both continuing and discontinued operations) are analysed below:

| | Cash movements \$m | | | | Non-cash movements \$m | | | Balance at end of year |
|------|------------------------------|---------------|--------------------|-------------------------------------|---------------------------|--------------------------------------|-----------------|------------------------|
| | Balance at beginning of year | Issue of debt | Redemption of debt | Payment for change to terms of debt | Foreign exchange movement | Demerger of UK and Europe operations | Other movements | |
| 2019 | 9,761 | 367 | (504) | (182) | 298 | (4,161) | 15 | 5,594 |
| 2018 | 8,496 | 2,079 | (553) | (44) | (232) | – | 15 | 9,761 |

Ratings

Prudential plc has debt ratings from Standard & Poor's, Moody's and Fitch. Prudential plc's long-term senior debt is rated A2 by Moody's, A by Standard & Poor's and A- by Fitch.

Prudential plc's short-term debt is rated P-1 by Moody's, A-1 by Standard & Poor's and F1 by Fitch.

Jackson National Life Insurance Company's financial strength is rated AA- by Standard & Poor's and Fitch, A1 by Moody's and A+ by A.M. Best.

Prudential Assurance Co. Singapore (Pte) Ltd.'s (Prudential Singapore) financial strength is rated AA- by Standard & Poor's.

All the Group's ratings are on a stable outlook.

C6.2 Operational borrowings

| | 31 Dec 2019 \$m | 31 Dec 2018 \$m |
|---|--------------------|--------------------|
| Borrowings in respect of short-term fixed income securities programmes – commercial paper | 520 | 601 |
| Lease liabilities under IFRS 16 ^{note (a)} | 371 | – |
| Non-recourse borrowings of consolidated investment funds ^{note (b)} | 1,045 | 448 |
| Bank loans and overdrafts | 29 | 115 |
| Finance lease liability under IAS 17 ^{note (a)} | – | 25 |
| Other | 377 | 82 |
| Other borrowings ^{note (c)} | 406 | 222 |
| Operational borrowings attributable to shareholder-financed businesses | 2,342 | 1,271 |
| Non-recourse borrowings of consolidated investment funds ^{note (b)} | – | 2,153 |
| Lease liabilities under IFRS 16 ^{note (a)} | 259 | – |
| Other borrowings | 44 | 2,865 |
| Operational borrowings attributable to with-profits businesses^{note (d)} | 303 | 5,018 |
| Total operational borrowings | 2,645 | 6,289 |
| Analysed as: | | |
| Total from continuing operations | | 1,160 |
| Total from discontinued UK and Europe operations | | 5,129 |
| | | 6,289 |

Notes

- (a) The Group adopted IFRS 16 that replaces IAS 17 as at 1 January 2019, using the modified retrospective approach. Under this approach, comparative information is not restated (as described in note A3). The finance lease liabilities recognised under IAS 17 in the comparative was principally held by the discontinued UK and Europe operations. Further details on the Group's IFRS 16 adoption and operating leases are provided in notes A3 and C13.
- (b) In all instances, the holders of the debt instruments issued by consolidated investment funds do not have recourse beyond the assets of those funds.
- (c) Other borrowings mainly include senior debt issued through the Federal Home Loan Bank of Indianapolis (FHLB), secured by collateral posted with the FHLB by Jackson.
- (d) Operational borrowings attributable to with-profits businesses at 31 December 2018 were mainly attributable to the discontinued UK and Europe operations (\$4,994 million) held in consolidated investment funds.

C7 Risk and sensitivity analysis

C7.1 Group overview

The Group's risk framework and the management of the risk, including those attached to the Group's financial statements including financial assets, financial liabilities and insurance liabilities, together with the inter-relationship with the management of capital have been included in the audited sections of the 'Group Chief Risk and Compliance Officer's Report on the risks facing our business and how these are managed'.

The financial and insurance assets and liabilities on the Group's balance sheet are, to varying degrees, subject to market and insurance risk and other changes of experience assumptions that may have a material effect on IFRS basis profit or loss and shareholders' equity. The market and insurance risks, including how they affect Group's operations and how these are managed are discussed in the Risk report referred to above.

The most significant items that the IFRS shareholders' profit or loss and shareholders' equity for the Group's life assurance business are sensitive to, are shown in the following tables. The distinction between direct and indirect exposure is not intended to indicate the relative size of the sensitivity.

| Type of business | Market and credit risk | | | Insurance and lapse risk |
|--|---|---|--|---|
| | Investments/derivatives | Liabilities/unallocated surplus | Other exposure | |
| Asia insurance operations (see also section C7.2) | | | | |
| All business | | | | Mortality and morbidity risk Persistency risk |
| With-profits business | Net neutral direct exposure (indirect exposure only) | | Investment performance subject to smoothing through declared bonuses | |
| Unit-linked business | Net neutral direct exposure (indirect exposure only) | | Investment performance through asset management fees | |
| Non-participating business | Asset/liability mismatch risk | | | |
| | Credit risk | Interest rates for those operations where the basis of insurance liabilities is sensitive to current market movements | | |
| | Interest rate and price risk | | | |
| US insurance operations (see also section C7.3) | | | | |
| All business | Currency risk | | | Persistency risk |
| Variable annuity business | Net effect of market risk arising from incidence of guarantee features and variability of asset management fees offset by derivative hedging programme | | | Risk that utilisation of withdrawal benefits or lapse levels differ from those assumed in pricing |
| Fixed index annuity business | Derivative hedge programme to the extent not fully hedged against liability | Incidence of equity participation features and meeting contractual accumulation requirements | | Minimal lapse risk |
| Fixed index annuities, Fixed annuities and GIC business | Credit risk and interest rate risk on investments Profit and loss and shareholders' equity are volatile for the incidence of these risks on unrealised appreciation of fixed income securities classified as available-for-sale under IAS 39 | Interest rate risk on liabilities (meeting guaranteed rates of accumulation on fixed annuity products) | Spread difference between earned rate and rate credited to policyholders | Lapse risk, but the effects of extreme events may be mitigated by the application of market value adjustments |

Detailed analyses of sensitivity of IFRS basis profit or loss and shareholders' equity to key market and other risks by business unit are provided in notes C7.2, C7.3 and C7.4. The sensitivity analyses provided show the effect on profit or loss and shareholders' equity to changes in the relevant risk variables, all of which are reasonably possible at the relevant balance sheet date. In the equity risk sensitivity analysis shown, the Group has considered the impact of an instantaneous 20 per cent fall in equity markets. If equity markets were to fall by more than 20 per cent, the Group believes that this would not be an instantaneous fall but rather would be expected to occur over a period of time during which the hedge positions within Jackson, where equity risk is greatest, would be rebalanced. The equity risk sensitivity analysis provided assumes that all equity indices fall by the same percentage.

The published sensitivities only allow for limited management actions such as changes to policyholder bonuses, where applicable. If the economic conditions set out in the sensitivities persisted, the financial impacts may differ to the instantaneous impacts. In this case management could also take additional actions to help mitigate the impact of these stresses, including (but not limited to) rebalancing investment portfolios, further market risk hedging, increased use of reinsurance, repricing of in-force benefits, changes to new business pricing and the mix of new business being sold.

Following the adoption of US dollar as the Group's presentation currency, the Group has no exposure to currency fluctuation from business units that operate in US dollars, or currencies pegged to the US dollar (such as Hong Kong dollars), and reduced exposure to currencies partially managed to the US dollar within a basket of currencies (such as Singapore dollars). Sensitivities to exchange rate movements in the Group's key markets are therefore expected to be limited.

Impact of diversification on risk exposure

The Group benefits from diversification benefits achieved through the geographical spread of the Group's operations and, within those operations, through a broad mix of product types. Relevant correlation factors include:

- Correlation across geographic regions for both financial and non-financial risk factors; and
- Correlation across risk factors for longevity risk, expenses, persistency and other risks.

Other limitations on the sensitivities include: the use of hypothetical market movements to demonstrate potential risk that only represent Prudential's view of reasonably possible near-term market changes and that cannot be predicted with any certainty; the assumption that interest rates in all countries move identically; and the lack of consideration of the inter-relation of interest rates, equity markets and foreign currency exchange rates.

C7.2 Asia insurance operations

Exposure and sensitivity of IFRS basis profit and shareholders' equity to market and other risks

The Asia operations sell with-profits and unit-linked policies, and the investment portfolio of the with-profits funds contains a proportion of equities. Shareholder exposure to market risk on these products is muted given the shareholders share this risk with the policyholders through its joint participation in with-profits funds results or through fees that vary with the size of the unit-linked funds. Non-participating business is largely backed by debt securities or deposits, which means that value of its assets fluctuate with interest rates. Depending on the reserving basis in the business unit, this may be offset by a consequential change in insurance liabilities as discount rates change accordingly. The Group's exposure to market risk arising from its Asia operations is therefore at modest levels.

Asia also sells regular premium health and protection business (which may attach to a unit-linked or other savings products). This exposes Asia to persistency, mortality and morbidity risk. This is discussed further below.

In summary, for Asia operations, the adjusted IFRS operating profit based on longer-term investment returns is mainly affected by the impact of market levels on unit-linked persistency and other insurance risks. At the total IFRS profit level, the Asia result is affected by short-term value movements on the asset portfolio for non-linked shareholder-backed business offset by the impact of changing interest rates on the discount rate used to determine insurance liabilities.

(i) Sensitivity to interest rate risk

Excluding with-profits and unit-linked businesses, the results of the Asia business are sensitive to the movements in interest rates, as described above.

For the purposes of analysing sensitivity to variations in interest rates, reference has been made to the movements in the 10-year government bond rates of the regions. At 31 December 2019, 10-year government bond rates vary from region to region and range from 0.7 per cent to 7.2 per cent (31 December 2018: 0.9 per cent to 8.1 per cent).

For the sensitivity analysis as shown in the table below, the reasonably possible interest rate movement used is 1 per cent for all local business units (subject to a floor of zero).

The estimated sensitivity to the decrease and increase in interest rates is as follows:

| | 2019 \$m | | 2018 \$m | |
|---|----------------|----------------|----------------|----------------|
| | Decrease of 1% | Increase of 1% | Decrease of 1% | Increase of 1% |
| Profit before tax attributable to shareholders | (705) | (744) | 397 | (430) |
| Related deferred tax (where applicable) | 3 | 26 | (19) | 33 |
| Net effect on profit after tax and shareholders' equity | (702) | (718) | 378 | (397) |

C7 Risk and sensitivity analysis continued

C7.2 Asia insurance operations continued

The pre-tax impacts, if they arose, would mostly be recorded within short-term fluctuations in investments returns in the Group's segmental analysis of profit before tax.

The degree of sensitivity of the results of the non-linked shareholder-backed business of the Asia operations to movements in interest rates depends upon the degree to which the liabilities under the 'grandfathered' IFRS 4 measurement basis reflects market interest rates from year to year. This varies by local business unit. For example, for businesses applying US GAAP, the results can be more sensitive as the effect of interest rate movements on the backing investments may not be offset by liability movements. Further, the level of options and guarantees in the products written in the particular business unit will also affect the degree of sensitivity to interest rate movements. The direction of the sensitivity of the Asia operations as a whole in a given year can also be affected by a change in the geographical mix.

In addition, the degree of sensitivity of the results is dependent on the interest rate level at that point of time.

At 31 December 2018 the sensitivities were dominated by the impact of interest rate movements on the value of government and corporate bond investments, which are expected to increase in value as interest rates fall to a greater extent than the offsetting increase in liabilities (and vice versa if rates rise). This arises because the discount rate in some operations does not fluctuate in line with interest rate movements. This feature remains for most local business units at 31 December 2019 and is evident in the 'increase of 1%' sensitivity. The 'decrease of 1%' sensitivity at 31 December 2019 reflects that some local business units' liabilities become more sensitive at lower interest rates and the fluctuations in liabilities begin to exceed asset gains. As noted above, the results only allow for limited management actions, and if such economic conditions persisted management could take additional actions to help mitigate the impact of these stresses, including (but not limited to) rebalancing investment portfolios, increased use of reinsurance, changes to new business pricing and the mix of new business being sold.

(ii) Sensitivity to equity price risk

The non-linked shareholder-backed business has limited exposure to equity and property investment (31 December 2019: \$3,480 million; 31 December 2018: \$2,740 million). The increase in 2019 reflects higher equity markets and business growth. Generally, changes in equity and property investment values are not directly offset by movements in non-linked policyholder liabilities. Movements in equities backing with-profits and unit-linked business have been excluded as they are generally matched by an equal movement in insurance liabilities (including unallocated surplus of with-profits funds).

The estimated sensitivity to a 10 per cent and 20 per cent change in equity and property prices for shareholder-backed Asia other business (including those held by the Group's joint venture and associate businesses), which would be reflected in short-term fluctuations in investment returns of the Group's segmental analysis of profit before tax, is as follows:

| | 2019 \$m | | 2018 \$m | |
|---|-----------------|-----------------|-----------------|-----------------|
| | Decrease of 20% | Decrease of 10% | Decrease of 20% | Decrease of 10% |
| Profit before tax attributable to shareholders | (864) | (432) | (709) | (355) |
| Related deferred tax (where applicable) | 48 | 24 | 21 | 10 |
| Net effect on profit after tax and shareholders' equity | (816) | (408) | (688) | (345) |

A 10 or 20 per cent increase in equity and property values would have an approximately equal and opposite net effect on profit and shareholders' equity to the sensitivities shown above. The impacts at 31 December 2019 are similar to those at 31 December 2018, and reflect the growth in the business.

(iii) Sensitivity to insurance risk

In Asia, adverse persistency experience can impact the IFRS profitability of certain types of business written in the region. This risk is managed at a local business unit level through regular monitoring of experience and the implementation of management actions as necessary. These actions could include product enhancements, increased management focus on premium collection, as well as other customer retention efforts. The potential financial impact of lapses is often mitigated through the specific features of the products, eg surrender charges, or through the availability of premium holiday or partial withdrawal policy features. The reserving basis in Asia is such that a change in lapse assumptions has an immaterial effect on immediate profitability.

Many of the business units in Asia are exposed to mortality and morbidity risk and a provision is made within policyholder liabilities to cover the potential exposure. If all these assumptions were strengthened by 5 per cent then it is estimated that post-tax profit and shareholders' equity would decrease by approximately \$77 million (2018: \$73 million). Weakening these assumptions by 5 per cent would have a similar equal and opposite impact.

C7.3 US insurance operations

Exposure and sensitivity of IFRS basis profit and shareholders' equity to market and other risks

Jackson's reported adjusted IFRS operating profit based on longer-term investment returns is sensitive to market conditions, both with respect to income earned on spread-based products and indirectly with respect to income earned on variable annuity asset management fees. Jackson's main exposures to market risk are to interest rate risk and equity risk.

Jackson is exposed primarily to the following risks:

| Risks | Risk of loss |
|--------------------|--|
| Equity risk | <ul style="list-style-type: none"> — Related to the incidence of benefits related to guarantees issued in connection with its variable annuity contracts; and — Related to meeting contractual accumulation requirements in fixed index annuity contracts. |
| Interest rate risk | <ul style="list-style-type: none"> — Related to meeting guaranteed rates of accumulation on fixed annuity and interest sensitive life products following a sustained fall in interest rates; — Related to increases in the present value of projected benefits related to guarantees issued in connection with its variable annuity contracts following a sustained fall in interest rates especially if in conjunction with a fall in equity markets; — Related to the surrender value guarantee features attached to the Company's fixed annuity and interest sensitive life products and to policyholder withdrawals following a sharp and sustained increase in interest rates; and — The risk of mismatch between the expected duration of certain annuity liabilities and prepayment risk and extension risk inherent in mortgage-backed securities. |

A prolonged low interest rate environment may result in a lengthening of maturities of the fixed annuity and interest-sensitive life contract holder liabilities from initial estimates, primarily due to lower policy lapses. As interest rates remain at low levels, Jackson may also have to reinvest the cash it receives as interest or proceeds from investments that have matured or that have been sold at lower yields, reducing its investment margins. Moreover, borrowers may prepay or redeem the securities in their investment portfolios with greater frequency in order to borrow at lower market rates, which exacerbates this risk. The majority of Jackson's fixed annuities, variable annuity fixed account options and life products were designed with contractual provisions that allow crediting rates to be re-set annually, subject to minimum crediting rate guarantees.

Jackson's derivative programme, which is described in note C3.4(b), is used to manage the economic interest rate risk associated with a broad range of products and equity market risk attaching to its equity-based products. Movements in equity markets, equity volatility, interest rates and credit spreads materially affect the carrying value of derivatives that are used to manage the liabilities to policyholders and backing investment assets. Movements in the carrying value of derivatives combined with the use of US GAAP measurement (as 'grandfathered' under IFRS 4) for the insurance contracts assets and liabilities, which is largely insensitive to current period market movements, mean that the Jackson total profit (ie including short-term fluctuations in investment returns) is sensitive to market movements. In addition to these effects the Jackson shareholders' equity is sensitive to the impact of interest rate and credit spread movements on the value of fixed income securities. Movements in unrealised appreciation on these securities are included as movement in shareholders' equity (ie outside the income statement).

C7 Risk and sensitivity analysis continued

C7.3 US insurance operations continued

(i) Sensitivity to equity risk

Jackson had variable annuity contracts with guarantees, for which the net amount at risk (NAR) is defined as the amount of guaranteed benefit in excess of current account value, as follows:

| | Minimum return [†] % | Account value \$m | Net amount at risk \$m | Weighted average attained age Years | Period until expected annuitisation Years |
|--|----------------------------------|----------------------|---------------------------|--|--|
| 31 Dec 2019 | | | | | |
| Return of net deposits plus a minimum return | | | | | |
| GMDB | 0-6% | 150,576 | 2,477 | 66.9 years | |
| GMWB – premium only | 0% | 2,753 | 16 | | |
| GMWB* | 0-5% [‡] | 257 | 14 | | |
| GMAB – premium only | 0% | 37 | – | | |
| Highest specified anniversary account value minus withdrawals post-anniversary | | | | | |

| GMWB* | | 682 | 113 | | |
| Combination net deposits plus minimum return, highest specified anniversary account value minus withdrawals post-anniversary | | | | | |
| GMDB | 0-6% | 6,947 | 1,550 | 69.5 years | |
| GMIB [†] | 0-6% | 1,599 | 825 | | 0.1 years |
| GMWB* | 0-8% [‡] | 116,902 | 21,442 | | |

* Amounts shown for GMWB comprise sums for the 'not for life' portion (where the guaranteed withdrawal base less the account value equals to the net amount at risk (NAR)), and a 'for life' portion (where the NAR has been estimated as the present value of future expected benefit payment remaining after the amount of the 'not for life' guaranteed benefits is zero).

† The GMIB guarantees are substantially reinsured.

‡ Ranges shown based on simple interest. The upper limits of 5 per cent or 8 per cent simple interest are approximately equal to 4.1 per cent and 6 per cent respectively, on a compound interest basis over a typical 10-year bonus period. For example $1 + 10 \times 0.05$ is similar to 1.04 growing at a compound rate of 4 per cent for a further nine years. The "Combination GMWB" category also includes benefits with a defined increase in the withdrawal percentage under pre-defined non-market conditions.

Account balances of contracts with guarantees were invested in variable separate accounts as follows:

| | 31 Dec 2019 \$m | 31 Dec 2018 \$m |
|-------------------|--------------------|--------------------|
| Mutual fund type: | | |
| Equity | 121,520 | 99,834 |
| Bond | 19,341 | 17,705 |
| Balanced | 30,308 | 25,349 |
| Money market | 956 | 1,049 |
| Total | 172,125 | 143,937 |

As noted above, Jackson is exposed to equity risk through the options embedded in the fixed index annuity liabilities and guarantees included in certain variable annuity benefits as illustrated above. This risk is managed using an equity hedging programme to minimise the risk of a significant economic impact as a result of increases or decreases in equity market levels. Jackson purchases futures and options that hedge the risks inherent in these products, while also considering the impact of rising and falling guaranteed benefit fees.

Due to the nature of valuation under IFRS of the free-standing derivatives and the variable annuity guarantee features, this hedge, while highly effective on an economic basis, would not automatically offset within the financial statements as the impact of equity market movements resets the free-standing derivatives immediately while the hedged liabilities reset more slowly and fees are recognised prospectively in the period in which they are earned. Jackson's hedging programme is focused on managing the economic risks in the business and protecting statutory solvency in the circumstances of large market movements. The hedging programme does not aim to hedge IFRS accounting results, which can lead to volatility in the IFRS results in a period of significant market movements, as was seen in 2019.

In addition to the exposure explained above, Jackson is also exposed to equity risk from its holding of equity securities, partnerships in investment pools and other financial derivatives.

The estimated sensitivity of Jackson's profit and shareholders' equity to immediate increases and decreases in equity markets is shown below. The sensitivities are shown net of related changes in DAC amortisation.

Sensitivity to equity risk – Jackson

| | 2019 \$m | | | | 2018 \$m | | | |
|---|------------|------------|--------------|------------|--------------|------------|-----------|--------------|
| | Decrease | | Increase | | Decrease | | Increase | |
| | of 20% | of 10% | of 20% | of 10% | of 20% | of 10% | of 20% | of 10% |
| Profit before tax (net of related changes in amortisation of DAC) | 964 | 256 | 1,848 | 770 | 1,347 | 544 | 74 | (159) |
| Related deferred tax | (202) | (54) | (388) | (162) | (282) | (115) | (15) | 33 |
| Net effect on profit after tax and shareholders' equity* | 762 | 202 | 1,460 | 608 | 1,065 | 429 | 59 | (126) |

* The table above has been prepared to exclude the impact of the instantaneous equity movements on the separate account fees. The sensitivity movements shown include those relating to the fixed index annuity and the reinsurance of GMIB guarantees.

The above sensitivities assume instantaneous market movements while the actual impact on financial results would vary contingent upon the volume of new product sales and lapses, changes to the derivative portfolio, correlation of market returns and various other factors including volatility, interest rates and elapsed time.

The directional movements in the sensitivities reflect the hedging programme in place at 31 December 2019 and 2018 respectively. The impacts shown under a decrease in equity markets reflect the mismatch discussed in note B1.2(ii)(a), with the gains on equity derivatives exceeding the increase in IFRS liabilities given the measurement basis applied. Following the equity market gains during 2019, the equity call options held at 31 December 2019 act to limit losses on equity derivatives under equity market increases. If equity markets therefore increase the main effect is a reduction in liabilities as guarantees move further out-of-the-money. The sensitivities above reflect the actual hedging portfolio at 31 December 2019 and the nature of Jackson's dynamic hedging programme means that the portfolio, and hence the results of these sensitivities, will change on an ongoing basis.

C7 Risk and sensitivity analysis continued

C7.3 US insurance operations continued

(ii) Sensitivity to interest rate risk

Except in the circumstances of interest rate scenarios where the guarantee rates included in contract terms are higher than crediting rates that can be supported from assets held to cover liabilities, the IFRS measurement basis of fixed annuity liabilities of Jackson's products is not generally sensitive to interest rate risk. This position derives from the nature of the products and the US GAAP basis of measurement. The GMWB features attached to variable annuity business (other than 'for life' components) are accounted for under US GAAP at fair-value and, therefore, will be sensitive to changes in interest rates, as discount rates and fund earned rates will be updated on an ongoing basis.

Debt securities and related derivatives are marked to fair value. Value movements on derivatives, again net of related changes to amortisation of DAC and deferred tax, are recorded within the income statement. Fair value movements on debt securities, net of related changes to amortisation of DAC and deferred tax, are recorded within other comprehensive income. The estimated sensitivity of these items and policyholder liabilities to a 1 per cent and 2 per cent decrease (with no floor of zero applied) and increase in interest rates is as follows:

| | 2019 \$m | | | | 2018 \$m | | | |
|--|----------|---------|----------|---------|----------|---------|----------|---------|
| | Decrease | | Increase | | Decrease | | Increase | |
| | of 2% | of 1% | of 2% | of 1% | of 2% | of 1% | of 2% | of 1% |
| Profit or loss: | | | | | | | | |
| Profit before tax (net of related changes in amortisation of DAC) | (6,238) | (2,815) | 3,914 | 2,141 | (4,502) | (2,188) | 2,815 | 1,530 |
| Related deferred tax | 1,310 | 591 | (822) | (450) | 945 | 460 | (591) | (321) |
| Net effect on profit after tax | (4,928) | (2,224) | 3,092 | 1,691 | (3,557) | (1,728) | 2,224 | 1,209 |
| Other comprehensive income: | | | | | | | | |
| Direct effect on carrying value of debt securities (net of related changes in amortisation of DAC) | 5,342 | 2,840 | (5,342) | (2,840) | 5,265 | 2,988 | (5,265) | (2,988) |
| Related deferred tax | (1,122) | (596) | 1,122 | 596 | (1,105) | (628) | 1,105 | 628 |
| Net effect on other comprehensive income | 4,220 | 2,244 | (4,220) | (2,244) | 4,160 | 2,360 | (4,160) | (2,360) |
| Total net effect on shareholders' equity | (708) | 20 | (1,128) | (553) | 603 | 632 | (1,936) | (1,151) |

These sensitivities above are shown for interest rates in isolation only and do not include other movements in credit risk that may affect credit spreads and valuations of debt securities. Similar to the sensitivity to equity risk, the sensitivity movements provided in the table above are at a point in time and reflect the hedging programme in place on the balance sheet date, while the actual impact on financial results would vary contingent upon a number of factors. The increase in the magnitude of the sensitivities at 31 December 2019 mainly reflects the lower interest rates at 31 December 2019 and the consequential reduction on assumed future separate account return, that is based on risk-free rates under grandfathered US GAAP. This has the effect of the IFRS liability reflecting a greater potential for policyholder payments under the variable annuity guarantees as interest rates fall. Jackson's hedging programme is focused on managing the economic risks in the business and protecting statutory solvency under large market movements, and does not aim to hedge the IFRS accounting results.

(iii) Sensitivity to insurance risk

Jackson is sensitive to mortality risk, lapse risk and other types of policyholder behaviour, such as the utilisation of its GMWB product features. Jackson's persistency assumptions reflect a combination of recent experience for each relevant line of business and expert judgement, especially where a lack of relevant and credible experience data exists. These assumptions vary by relevant factors, such as product, policy duration, attained age and for variable annuity lapse assumptions, the extent to which guaranteed benefits are 'in the money' relative to policy account values. Changes in these assumptions, which are assessed on an annual basis after considering recent experience, could have a material impact on policyholder liabilities and therefore on profit before tax. Any changes in these assumptions are recorded within short-term fluctuations in investment returns in the Group's supplementary analysis of profit (see note B1.2).

In addition, in the absence of hedging, equity and interest rate movements can both cause a loss directly or an increased future sensitivity to policyholder behaviour. Jackson has an extensive derivative programme that seeks to manage the exposure to such altered equity markets and interest rates.

Note A4.1 describes the methodology applied by Jackson to amortise deferred acquisition costs. The amount of amortisation charged in any one period is sensitive to separate account investment returns.

C7.4 Asset management and other operations

(i) Asset management

The profit for the year of asset management operations are sensitive to the level of assets under management, as this significantly affects the value of management fees earned by the business in the current and future years. The Group's asset management operations do not hold significant financial investments.

(ii) Other operations

At 31 December 2019, the financial investments of the other operations are principally short-term treasury bills held by the Group's treasury function for liquidity purposes and so there is limited sensitivity to credit risk and interest rate movements.

C8 Tax assets and liabilities

Accounting policies on deferred tax are included in note B4.

C8.1 Current tax

At 31 December 2019, of the \$492 million (31 December 2018: \$476 million from continuing operations) current tax recoverable, the majority is expected to be recovered more than twelve months after the reporting period.

At 31 December 2019, the current tax liability of \$396 million (31 December 2018: \$411 million from continuing operations) includes \$198 million (31 December 2018: \$190 million from continuing operations) of provisions for uncertain tax matters. Further detail is provided in note B4.

C8.2 Deferred tax

The statement of financial position contains the following deferred tax assets and liabilities in relation to:

| | 2019 \$m | | | | | Balance at 31 Dec |
|---|------------------|--------------------------------------|------------------------------|--|--|-------------------|
| | Balance at 1 Jan | Demerger of UK and Europe operations | Movement in income statement | Movement through other comprehensive income and equity | Other movements including foreign currency movements | |
| Deferred tax assets | | | | | | |
| Unrealised losses or gains on investments | 144 | – | (16) | – | (128) | – |
| Balances relating to investment and insurance contracts | 1 | – | 60 | – | (29) | 32 |
| Short-term temporary differences | 2,979 | (146) | 1,069 | (15) | 1 | 3,888 |
| Capital allowances | 19 | (14) | (3) | – | (1) | 1 |
| Unused tax losses | 162 | – | 8 | – | (16) | 154 |
| Total | 3,305 | (160) | 1,118 | (15) | (173) | 4,075 |
| Deferred tax liabilities | | | | | | |
| Unrealised losses or gains on investments | (1,104) | 1,053 | (231) | (713) | 118 | (877) |
| Balances relating to investment and insurance contracts | (1,276) | – | (246) | – | 15 | (1,507) |
| Short-term temporary differences | (2,671) | 233 | (414) | 19 | (14) | (2,847) |
| Capital allowances | (71) | 65 | – | – | – | (6) |
| Total | (5,122) | 1,351 | (891) | (694) | 119 | (5,237) |

Of the short-term temporary differences of \$3,888 million relating to deferred tax assets, \$3,068 million relating to the US insurance operations is expected to be recovered in line with the run off of the in-force book, and the majority of the remaining balances are expected to be recovered within 5 years.

C8 Tax assets and liabilities continued

C8.2 Deferred tax continued

The deferred tax balances are further analysed as follows:

| | Deferred tax assets | | Deferred tax liabilities | |
|---------------------------------------|---------------------|--------------------|--------------------------|--------------------|
| | 31 Dec 2019 \$m | 31 Dec 2018 \$m | 31 Dec 2019 \$m | 31 Dec 2018 \$m |
| Asia operations | 270 | 152 | (2,146) | (1,601) |
| US operations | 3,804 | 2,923 | (3,091) | (2,150) |
| Other operations | 1 | 70 | – | (20) |
| Total continuing operations | 4,075 | 3,145 | (5,237) | (3,771) |
| Discontinued UK and Europe operations | – | 160 | – | (1,351) |
| Total Group | 4,075 | 3,305 | (5,237) | (5,122) |

The taxation regimes applicable across the Group often apply separate rules to trading and capital profits and losses. The distinction between temporary differences that arise from items of either a trading or capital nature may affect the recognition of deferred tax assets. For the 2019 results and financial position at 31 December 2019, the following tax benefits and losses have not been recognised:

| | 31 Dec 2019 \$m | | 31 Dec 2018 \$m | | | | | |
|----------------|-----------------|--------|-----------------|--------------|-------------|------------|--------------|-------------|
| | Tax benefits | Losses | Tax benefits | | | Losses | | |
| | | | Continuing | Discontinued | Total group | Continuing | Discontinued | Total group |
| Trading losses | 36 | 175 | 61 | 1 | 62 | 301 | 6 | 307 |
| Capital losses | 1 | 5 | 55 | 7 | 62 | 270 | 38 | 308 |

Of the benefit from unrecognised trading losses, \$34 million will expire within the next ten years and the rest have no expiry date.

Some of the Group's businesses are located in jurisdictions in which a withholding tax charge is incurred upon the distribution of earnings. At 31 December 2019, deferred tax liabilities of \$247 million (2018: \$149 million from continuing operations) have not been recognised in respect of such withholding taxes as the Group is able to control the timing of the distributions and it is probable that the timing differences will not reverse in the foreseeable future.

C9 Defined benefit pension schemes

The Group has historically operated a number of defined benefit pension schemes in the UK, with all pension surplus and deficit attributable to subsidiaries of M&G plc except for 30 per cent of the surplus attaching to the Prudential Staff Pension Scheme (PSPS), which was allocated to Prudential plc. In preparation for the demerger of M&G plc, at 30 June 2019, the 30 per cent of surplus attaching to PSPS was formally reallocated to M&G Prudential Services Limited. All UK schemes left the Group upon the demerger of M&G plc and Prudential plc will incur no further costs in respect of these schemes. Outside of the UK, there are two small defined benefit schemes in Taiwan which have negligible deficits.

C10 Share capital, share premium and own shares

Shares are classified as equity when their terms do not create an obligation to transfer assets. Amounts recorded in share capital represent the nominal value of the shares issued. The difference between the proceeds received on issue of the shares, net of share issue costs, and the nominal value of the shares issued, is credited to share premium. Where the Company purchases shares for the purposes of employee incentive plans, the consideration paid, net of issue costs, is deducted from retained earnings. Upon issue or sale any consideration received is credited to retained earnings net of related costs.

| | 2019 | | | 2018 | | |
|--|---------------------------|----------------------|----------------------|---------------------------|----------------------|----------------------|
| | Number of ordinary shares | Share capital \$m | Share premium \$m | Number of ordinary shares | Share capital \$m | Share premium \$m |
| Issued shares of 5p each fully paid | | | | | | |
| Balance at 1 January | 2,593,044,409 | 166 | 2,502 | 2,587,175,445 | 175 | 2,635 |
| Shares issued under share-based schemes | 8,115,540 | – | 22 | 5,868,964 | 1 | 22 |
| Impact of change in presentation currency | – | 6 | 101 | – | (10) | (155) |
| Balance at 31 December | 2,601,159,949 | 172 | 2,625 | 2,593,044,409 | 166 | 2,502 |

Options outstanding under save as you earn schemes to subscribe for shares at each year end shown below are as follows:

| | Number of shares to subscribe for | Share price range | | Exercisable by year |
|-------------|-----------------------------------|-------------------|--------|---------------------|
| | | from | to | |
| 31 Dec 2019 | 3,805,447 | 1,104p | 1,455p | 2025 |
| 31 Dec 2018 | 4,885,804 | 901p | 1,455p | 2024 |

Transactions by Prudential plc and its subsidiaries in Prudential plc shares

The Group buys and sells Prudential plc shares ('own shares') either in relation to its employee share schemes or up until the demerger of its UK and Europe operations via transactions undertaken by authorised investment funds that the Group is deemed to control. The cost of own shares of \$183 million at 31 December 2019 (31 December 2018: \$217 million) is deducted from retained earnings. The Company has established trusts to facilitate the delivery of shares under employee incentive plans. At 31 December 2019, 8.4 million (31 December 2018: 9.6 million) Prudential plc shares with a market value of \$161 million (31 December 2018: \$172 million) were held in such trusts, all of which are for employee incentive plans. The maximum number of shares held during the year was 14.1 million which was in March 2019.

Within the trusts, shares are notionally allocated by business unit reflecting the employees to which the awards were made. On demerger, shares allocated to M&G plc were transferred to a separate trust established by M&G plc.

The Company purchased the following number of shares in respect of employee incentive plans. The shares purchased each month are as follows:

| | 2019 | | | | 2018 | | | |
|--------------|------------------|-------------|--------|-------------------|------------------|-------------|--------|-------------------|
| | Number of shares | Share price | | Cost* \$ | Number of shares | Share price | | Cost* \$ |
| | | Low £ | High £ | | | Low £ | High £ | |
| January | 75,165 | 14.25 | 14.29 | 1,384,926 | 51,555 | 19.18 | 19.40 | 1,378,409 |
| February | 71,044 | 15.00 | 15.18 | 1,390,865 | 55,765 | 17.91 | 18.10 | 1,402,089 |
| March | 68,497 | 15.20 | 16.32 | 1,385,182 | 55,623 | 18.25 | 18.54 | 1,432,155 |
| April | 2,638,429 | 15.65 | 16.73 | 54,052,710 | 1,664,334 | 16.67 | 17.95 | 40,997,710 |
| May | 73,417 | 16.35 | 16.45 | 1,550,109 | 63,334 | 18.91 | 19.38 | 1,636,433 |
| June | 217,800 | 16.20 | 16.36 | 4,484,773 | 181,995 | 18.21 | 18.65 | 4,432,511 |
| July | 60,514 | 17.47 | 17.71 | 1,321,427 | 55,888 | 17.68 | 17.86 | 1,308,608 |
| August | 72,671 | 14.86 | 15.21 | 1,318,593 | 60,384 | 18.04 | 18.10 | 1,404,285 |
| September | 73,284 | 14.14 | 14.76 | 1,318,767 | 82,612 | 16.95 | 16.98 | 1,829,814 |
| October | 178,359 | 13.78 | 14.24 | 3,148,811 | 148,209 | 15.62 | 16.84 | 3,223,238 |
| November | 75,904 | 13.38 | 13.85 | 1,309,146 | 67,162 | 15.95 | 15.96 | 1,382,514 |
| December | 68,573 | 13.07 | 13.13 | 1,178,206 | 73,744 | 13.99 | 14.30 | 1,323,949 |
| Total | 3,673,657 | | | 73,843,515 | 2,560,605 | | | 61,751,715 |

* The cost in US dollars for the shares purchased each month shown has been calculated from the share prices in pounds sterling using the monthly average exchange rate.

Prior to the demerger of UK and Europe operations in October 2019, the Group consolidated a number of authorised investment funds of M&G plc that hold shares in Prudential plc. In the prior year, at 31 December 2018, the total number of shares held by these funds was 3.0 million and the cost of acquiring these shares of \$25 million was included in the cost of own shares. The market value of these shares as at 31 December 2018 was \$53 million. These funds were deconsolidated upon the demerger.

All share transactions were made on an exchange other than the Stock Exchange of Hong Kong.

Other than set out above, the Group did not purchase, sell or redeem any Prudential plc listed securities during 2019 or 2018.

C11 Provisions

| | 31 Dec 2019 \$m | 31 Dec 2018 \$m |
|---|--------------------|--------------------|
| Provision in respect of defined benefit pension schemes ^{c9} | 1 | 222 |
| Other provisions ^{note} | 465 | 1,151 |
| Total provisions | 466 | 1,373 |
| Analysed as: | | |
| Continuing operations | | 427 |
| Discontinued UK and Europe operations | | 946 |
| | | <u>1,373</u> |

Note

Analysis of movement in other provisions:

| | 2019 \$m | 2018 \$m |
|--------------------------------------|--------------|--------------|
| Balance at 1 January | 1,151 | 1,275 |
| Demerger of UK and Europe operations | (725) | – |
| Charged to income statement: | | |

| Unused amounts released | (7) | (24) |
| Utilisation during the year | (154) | (349) |
| Exchange differences | 12 | (58) |
| Balance at 31 December | 465 | 1,151 |

Other provisions for continuing operations comprise staff benefits provisions of \$408 million (31 December 2018: \$364 million) that are generally expected to be paid out within the next three years and other provisions of \$57 million (31 December 2018: \$63 million).

C12 Capital

C12.1 Group objectives, policies and processes for managing capital

(i) Capital measure

The Group manages its Group LCSM available capital as its measure of capital. At 31 December 2019 estimated Group shareholder LCSM available capital is \$14.0 billion (31 December 2018: \$13.5 billion).

(ii) External capital requirements

Following the demerger of the UK and Europe operations from Prudential plc, the Hong Kong Insurance Authority (IA) has assumed the role of the group-wide supervisor for the Prudential Group with the Group no longer subject to Solvency II capital requirements. Ultimately, Prudential plc will become subject to the Group Wide Supervision (GWS) framework which is currently under development by the Hong Kong IA and is expected to be finalised in the second half of 2020.

Until Hong Kong's GWS framework comes into force, Prudential will apply the local capital summation method (LCSM) that has been agreed with the Hong Kong IA to determine group regulatory capital requirements (both minimum and prescribed levels). The LCSM surplus represents the summation of available capital across local solvency regimes for regulated entities of the Group and IFRS net assets (with some adjustments) for non-regulated entities less the summation of local statutory capital requirements across the Group, with no allowance for diversification between business operations.

(iii) Meeting of capital management objectives

The Group minimum capital requirement has been met during 2019. Prior to the demerger of the UK and Europe operations, the Group capital requirement was met in accordance with the Solvency II regime.

As well as holding sufficient capital to meet LCSM requirements at Group level, the Group also closely manages the cash it holds within its central holding companies so that it can:

- Maintain flexibility, fund new opportunities and absorb shock events;
- Fund dividends; and
- Cover central costs and debt payments.

More details on holding company cash flows and balances are given in section I(iii) of the Additional unaudited financial information.

Reserve adequacy testing under a range of scenarios and dynamic solvency testing is carried out, including under certain scenarios mandated by the US and Asia regulators.

The Group manages its assets, liabilities and capital locally, in accordance with local regulatory requirements and reflecting the different types of liabilities in each business unit. As a result of the diversity of products offered by Prudential and the different regulatory regimes under which it operates, the Group employs differing methods of asset/liability and capital management, depending on the business concerned.

The sensitivity of liabilities and other components of total capital vary depending upon the type of business concerned and this conditions the approach to asset/liability management.

C12.2 Local capital regulations

(i) Asia insurance operations

The local valuation basis for the assets, liabilities and capital requirements of significant operations in Asia are:

China JV

A risk-based capital, risk management and governance framework, known as the China Risk Oriented Solvency System (C-ROSS), applies in China. Under C-ROSS, insurers are required to maintain a core solvency ratio (core capital over minimum capital) and a comprehensive solvency ratio (available capital over minimum capital) of not lower than 50 per cent and 100 per cent, respectively. The China Banking Insurance Regulatory Commission is in the process of reviewing the C-ROSS formulae and parameters. The exact timing of updates is uncertain.

The actual capital is the difference between the admitted assets and admitted liabilities with trading and available-for-sale assets marked-to-market and other assets at book value. Policyholder liabilities are based on a gross premium valuation method using best estimate assumptions with a separate risk margin.

Hong Kong

The capital requirements set out in the regulations vary by underlying risk type and duration of liabilities, but are generally determined as a percentage of mathematical reserves and capital at risk.

Mathematical reserves are based on a net premium valuation method using assumptions which include a suitable margin for prudence. The valuation interest rate used to calculate these reserves is subject to a maximum that reflects a blend between the risk-adjusted portfolio yield and the reinvestment yield. The approach used to determine the reinvestment yield for reserving allows for average yields thus the impact of movements in interest rates are reflected in the valuation interest rate over time. The available capital is based on assets that are marked-to-market. The Hong Kong IA is in the process of developing a risk-based capital framework, targeted to be introduced by 2024, and has performed several quantitative impact studies over the past few years.

Indonesia

Solvency capital is determined using a risk-based capital approach. The available capital is based on assets that are marked-to-market, with policyholder liabilities based on a gross premium valuation method using best estimate assumptions with a suitable margin for prudence. Liabilities are zeroised at a policy level (i.e. negative liabilities are not permitted at a policy level). For unit-linked policies an unearned premium reserve is established.

Malaysia

A risk-based capital framework applies in Malaysia. The local regulator, Bank Negara Malaysia (BNM), has set a Supervisory Target Capital Level of 130 per cent below which supervisory actions of increasing intensity will be taken. Each insurer is also required to set its own Individual Target Capital Level to reflect its own risk profile and this is expected to be higher than the Supervisory Target Capital Level.

The available capital is based on assets that are marked-to-market, with policyholder liabilities based on a gross premium valuation method using best estimate assumptions with a suitable margin for prudence. Liabilities are zeroised at a fund level (i.e. negative liabilities are not permitted at a fund level). The BNM has initiated a review of its RBC framework. An exposure draft on valuation of liabilities was issued in December 2019 to gather industry feedback. The exact timing of implementation of potential revisions is uncertain.

Market liberalisation measures were introduced by BNM in April 2009, which increases the limit from 49 per cent to 70 per cent on foreign equity ownership for insurance companies and Takaful operators in Malaysia. A higher foreign equity limit beyond 70 per cent for insurance companies will be considered by BNM on a case by case basis for companies who support expansion of insurance provision to the most vulnerable in Malaysian society.

Singapore

A risk-based capital framework applies in Singapore. The regulator also has the authority to direct that the insurer satisfies additional capital adequacy requirements in addition to those set forth under the Singapore Insurance Act if it considers such additional requirements appropriate. The available capital is based on assets that are marked-to-market, with policyholder liabilities based on a gross premium valuation method using best estimate assumptions with a suitable margin for prudence. Liabilities are zeroised at a policy level (i.e. negative liabilities are not permitted at a policy level). The updated risk-based capital framework (RBC2) will come into effect on 31 March 2020.

C12 Capital continued

C12.2 Local capital regulations continued

(ii) US insurance operations

The regulatory framework for Jackson is governed by the requirements of the US NAIC-approved Risk-Based Capital standards. Under these requirements life insurance companies report using a formula-based capital standard, which includes components calculated by applying after-tax factors to various asset, premium and reserve items and a separate model-based component for market risk and interest rate risk associated primarily with variable annuity products. The 31 December 2019 Jackson local statutory results reflect early adoption of the NAIC regulatory framework reforms at the valuation date as agreed with the Department of Insurance Financial Services (DIFS), and Jackson's decision not to renew its long-standing permitted practice with the DIFS, which allowed certain derivative instruments, taken out to protect Jackson against declines in long-term interest rates, to be included at book value in the local statutory returns. At 31 December 2019, these derivatives were held at fair value.

(iii) Asset management operations – regulatory and other surplus

Certain asset management subsidiaries of the Group are subject to local regulatory requirements. The movement in the year of the estimated surplus regulatory capital position of those subsidiaries, combined with the movement in the IFRS basis shareholders' funds for unregulated asset management operations, is as follows:

| Regulatory and other surplus | 2019 \$m | | | | 2018 \$m |
|--|------------------------|------|-------|------------------------|------------------------|
| | Eastspring Investments | US | M&G | Total asset management | Total asset management |
| Balance at 1 January | 374 | 51 | 846 | 1,271 | 1,185 |
| Demerger of UK and Europe operations | | | (846) | (846) | – |
| Gains during the year | 214 | 24 | – | 238 | 701 |
| Movement in capital requirement | (32) | – | – | (32) | (7) |
| Capital injection | 20 | (30) | – | (10) | 135 |
| Distributions made to the parent company | (173) | (40) | – | (213) | (531) |
| Exchange and other movements | (27) | 1 | – | (26) | (212) |
| Balance at 31 December | 376 | 6 | – | 382 | 1,271 |

C12.3 Transferability of available capital

For Asia, the amounts retained within the insurance companies are at levels that provide an appropriate level of capital strength in excess of the local regulatory minimum. The businesses in Asia may, in general, remit dividends to parent entities, provided the statutory insurance fund meets the local regulatory solvency requirements and there are sufficient statutory accounting profits. For with-profits funds, the excess of assets over liabilities is retained within the funds, with distribution to shareholders tied to the shareholders' share of declared bonuses.

For Jackson, capital retention is maintained at a level consistent with an appropriate rating by Standard & Poor's (currently rated AA-). Jackson can pay dividends on its capital stock only out of earned surplus unless prior regulatory approval is obtained. Furthermore, dividends that exceed the greater of statutory net gain from operations less net realised investments losses for the prior year or 10 per cent of Jackson's prior year end statutory surplus, excluding any increase arising from the application of permitted practices, require prior regulatory approval.

Available capital of the non-insurance business units is transferable after taking account of an appropriate level of operating capital, based on local regulatory solvency requirements, where relevant.

C13 Property, plant and equipment

Property, plant and equipment comprise Group occupied properties and tangible assets. Following the adoption of IFRS 16 on 1 January 2019 (as described in note A3), property, plant and equipment also includes right-of-use assets for operating leases of properties occupied by the Group and leases of equipment and other tangible assets. All property, plant and equipment, including the right-of-use assets under operating leases, are held at cost less cumulative depreciation calculated using the straight-line method.

The Group does not have any right-of-use assets that would meet the definition of investment property. As at 31 December 2019, total right-of-use assets comprised \$569 million of property and \$24 million of non-property assets, of which \$18 million are attributable to shareholders.

Extension and termination options are included in a number of property and equipment leases across the Group. These are used to maximise operational flexibility in terms of managing the assets used in the Group's operations. The majority of extension and termination options held are exercisable only by the Group and not by the respective lessor. The Group assesses at lease commencement whether it is reasonably certain to exercise the option. This assertion is revisited if there is a material change in circumstances. The undiscounted value of lease payments beyond the break period not recognised in the lease liabilities as at 31 December 2019 is \$185 million.

A reconciliation of the carrying amount of these items from the beginning of the year to the end of the year is as follows:

| | 2019 \$m | | | | 2018 \$m | | |
|---|-------------------------|-----------------|---------------------|--------------|-------------------------|-----------------|--------------|
| | Group occupied property | Tangible assets | Right-of-use assets | Total | Group occupied property | Tangible assets | Total |
| Balance at 1 January | | | | | | | |
| Cost | 525 | 2,089 | – | 2,614 | 496 | 1,408 | 1,904 |
| Accumulated depreciation | (105) | (714) | – | (819) | (97) | (740) | (837) |
| Opening net book amount | 420 | 1,375 | – | 1,795 | 399 | 668 | 1,067 |
| Demerger of UK and Europe operations† | (143) | (1,170) | – | (1,313) | – | – | – |
| Recognition of right-of-use asset on initial application of IFRS 16 | – | – | 527 | 527 | – | – | – |
| Arising on acquisitions of subsidiaries | 6 | 13 | 1 | 20 | 6 | 691 | 697 |
| Additions | 1 | 63 | 196 | 260 | 47 | 339 | 386 |
| Depreciation and impairment charge | (9) | (77) | (141) | (227) | (14) | (170) | (184) |
| Disposals and transfers | – | (11) | 1 | (10) | (11) | (92) | (103) |
| Effect of movements in exchange rates | – | 4 | 9 | 13 | (7) | (61) | (68) |
| Balance at 31 December | 275 | 197 | 593 | 1,065 | 420 | 1,375 | 1,795 |
| Representing: | | | | | | | |
| Cost | 351 | 687 | 734 | 1,772 | 525 | 2,089 | 2,614 |
| Accumulated depreciation | (76) | (490) | (141) | (707) | (105) | (714) | (819) |
| Closing net book amount | 275 | 197 | 593 | 1,065 | 420 | 1,375 | 1,795 |
| Analysed as: | | | | | | | |
| Continuing operations | | | | | 277 | 205 | 482 |
| Discontinued operations | | | | | 143 | 1,170 | 1,313 |
| | | | | | 420 | 1,375 | 1,795 |

The Group has non-cancellable property subleases which have been classified as operating leases in 2019 under IFRS 16. The sublease rental income received for the leases is \$11 million in 2019.

Tangible assets from continuing operations

At 31 December 2019, of the \$197 million (31 December 2018: \$205 million) tangible assets, \$83 million (31 December 2018: \$94 million) were held by the Group's with-profits businesses.

Capital expenditure: property, plant and equipment by segment

The capital expenditure in 2019 of \$64 million (2018: \$386 million of which \$133 million related to continuing operations) arose as follows: \$44 million (2018: \$69 million) in Asia and \$5 million (2018: \$62 million) in US with the remaining balance of \$15 million (2018: \$2 million) arising from unallocated corporate expenditure.

D Other information

D1 Gain (loss) on disposal of business and corporate transactions

Income and expenses of entities sold during the period are included in the income statement up to the date of disposal. The gain or loss on disposal is calculated as the difference between sale proceeds net of selling costs, less the net assets of the entity at the date of disposal, adjusted for foreign exchange movements attaching to the sold entity that are required to be recycled to the income statement under IAS 21.

D1.1 Gain (loss) on disposal of business

| | 2019 \$m | 2018 \$m |
|---|--------------|--------------|
| Gain on disposals ^{note (i)} | 265 | – |
| Other transactions ^{note (ii)} | (407) | (107) |
| Total gain (loss) on disposal of business from continuing operations | (142) | (107) |

Notes

- (i) In 2019, the \$265 million gain on disposals principally relates to profits arising from a reduction in the Group's stake (from 26 per cent to 22 per cent) in its associate in India, ICICI Prudential Life Insurance Company, and the disposal of Prudential Vietnam Finance Company Limited, a wholly owned subsidiary that provides consumer finance.
- (ii) In 2019, the \$(407) million other transactions reflects costs related to the demerger of M&G plc from Prudential plc. These include the following amounts:
- \$(78) million transaction related costs, principally fees to advisors;
 - \$(182) million being the fee paid to the holders of two subordinated debt instruments as discussed in note C6.1(i); and
 - \$(147) million for one-off costs arising from the separation of the M&G plc business from Prudential plc.
- In 2018, the \$(107) million other transactions primarily related to exiting the NPH broker-dealer business in the US and costs related to the preparation for the demerger of M&G plc.

D1.2 Other corporate transactions

Acquisition of Thanachart Fund Management Co., Ltd. in Thailand

On 27 December 2019, the Group completed its acquisition of 50.1 per cent of Thanachart Fund Management Co., Ltd. (TFUND) from Thanachart Bank Public Company Ltd. (TBANK) and Government Savings Bank, with TBANK holding the remaining 49.9 per cent stake of TFUND. The acquisition complements the Group's purchase of 65 per cent of TMB Asset Management, now TMBAM Eastspring, in September 2018.

The terms of the sale agreement include an option for the Group to increase its ownership to 100 per cent in the future. The Group has recognised, in line with IFRS, a financial liability and a reduction in shareholders' equity of \$130 million as of the acquisition date for the option, being the discounted expected consideration payable for the remaining 49.9 per cent.

The fair value of the acquired assets, assumed liabilities and resulting goodwill are shown in the table below:

| | \$m |
|--|--------------|
| Assets | |
| Other assets | 28 |
| Cash and cash equivalents | 2 |
| Total assets | 30 |
| Other liabilities | (7) |
| Non-controlling interests* | (141) |
| Net assets acquired and liabilities assumed | (118) |
| Goodwill arising on acquisition* | 260 |
| Purchase consideration | 142 |

* The goodwill on acquisition of \$260 million is mainly attributable to the expected benefits from new customers and synergies. Refer to note C5.1 for changes to the carrying amount of goodwill during the year. The Group has chosen to apply the full goodwill method under IFRS 3, 'Business Combinations' for this acquisition, with non-controlling interests being measured at fair value on the acquisition date.

D2 Discontinued UK and Europe operations

On 21 October 2019, the Group completed the demerger of its UK and Europe operations (M&G plc) from the Group, resulting in two separately listed companies. The Group's UK and Europe operations have been reclassified as discontinued operations in these consolidated financial statements in accordance with IFRS 5 'Non-current assets held for sale and discontinued operations'.

The results and cash flows for the discontinued UK and Europe operations presented in the consolidated financial statements for the period of ownership up to the demerger in October 2019 are analysed below.

Income statement

| | 2019 \$m | 2018 \$m |
|---|-----------------|----------------|
| Earned premiums, net of reinsurance | 10,920 | (101) |
| Investment return and other income ^{note (1)} | 22,292 | (2,386) |
| Total revenue, net of reinsurance | 33,212 | (2,487) |
| Benefits and claims and movement in unallocated surplus of with-profits funds, net of reinsurance | (26,975) | 6,645 |
| Acquisition costs and other expenditure | (4,143) | (3,296) |
| Total charges, net of reinsurance | (31,118) | 3,349 |
| Discontinued UK and Europe operations' profit before tax | 2,094 | 862 |
| Re-measurement of the UK and Europe operations on demerger ^{note (2)} | 188 | – |
| Cumulative exchange loss recycled from other comprehensive income | (2,668) | – |
| (Loss) profit before tax | (386) | 862 |
| Tax (charge) credit ^{note (3)} | (775) | 280 |
| (Loss) profit for the year from discontinued operations | (1,161) | 1,142 |

Notes

- (1) Includes share of profits from joint ventures and associates, net of related tax.
(2) The re-measurement of the discontinued UK and Europe operations on demerger reflects the difference between the fair value of the UK and Europe operations and its net assets at the date of the demerger.
(3) The tax (charge) credit wholly relates to the tax on the ordinary profits of the discontinued UK and Europe operations.

Other comprehensive income

| | 2019 \$m | 2018 \$m |
|---|--------------|--------------|
| Cumulative exchange loss recycled through profit or loss | 2,668 | – |
| Other items, net of related tax | 203 | (605) |
| Other comprehensive income for the year from discontinued operations, net of related tax | 2,871 | (605) |

The profit and other comprehensive income for the period from the discontinued UK and Europe operations were wholly attributable to the equity holders of the Company.

Cash flows

| | 2019 \$m | 2018 \$m |
|---|----------------|--------------|
| Cash flows from operating activities | 2,375 | 5 |
| Cash flows from investing activities | (454) | (478) |
| Cash flows from financing activities* | – | (137) |
| Cash and cash equivalents divested on demerger | (7,611) | – |
| Net cash flows in the year | (5,690) | (610) |
| Net cash flows between discontinued and continuing operations* | (436) | (842) |
| Cash and cash equivalents at beginning of year | 6,048 | 7,857 |
| Effect of exchange rate changes on cash and cash equivalents | 78 | (357) |
| Cash and cash equivalents on the consolidated statement of financial position at end of year | – | 6,048 |

* The net cash flows between discontinued and continuing operations represents the net cash paid for dividend and other items from discontinued operations to continuing operations. In 2019, the net cash flows of \$(436) million primarily include pre-demerger dividend of \$(3,841) million, other dividends of \$(684) million offset by payment for the transfer of debt to M&G plc from Prudential plc prior to the demerger of \$4,161 million.

D3 Contingencies and related obligations

Litigation and regulatory matters

The Group is involved in various litigation and regulatory proceedings. These may from time to time include class actions involving Jackson. While the outcome of such litigation and regulatory issues cannot be predicted with certainty, the Company believes that their ultimate outcome will not have a material adverse effect on the Group's financial condition, results of operations or cash flows.

Guarantees

Guarantee funds in the US provide for payments to be made to policyholders on behalf of insolvent life insurance companies and are financed by payments assessed on solvent insurance companies based on location, volume and type of business. The estimated reserve for future guarantee fund assessments is not significant. The directors believe that sufficient provision has been made on the balance sheet for all anticipated payments for known insolvencies.

The Group has provided other guarantees and commitments to third-parties entered into in the normal course of business but the Group does not consider that the amounts involved are significant.

Intra-group capital support arrangements

Prudential has put in place intra-group arrangements to formalise undertakings by Prudential to the regulators of the Hong Kong subsidiaries regarding their solvency levels.

D4 Post balance sheet events

Dividends

The 2019 second interim ordinary dividend approved by the Board of Directors after 31 December 2019 is as described in note B6.

Coronavirus outbreak

The novel coronavirus outbreak, with thousands of cases reported in 2020 to date and the virus spreading to countries across Asia and the world, has disrupted the activity in the markets in which the Group operates, in particular Hong Kong and mainland China, and adversely impacted the economic conditions in the year to date. Given these conditions, lower levels of new business activity in affected markets are to be expected. Further details on the Group capital position are set out in note I(i) of the Additional unaudited financial information.

The Group continues to monitor closely the development of the coronavirus outbreak and its impact on market conditions. If current economic conditions persist, management could take additional actions to mitigate the impact. These actions include, but are not limited to, rebalancing investment portfolios, further market risk hedging, increased use of reinsurance, repricing of in-force benefits, changes to new business pricing and the mix of new business being sold.

It is not practicable to quantify the potential financial effect of the outbreak on the Group at this stage.

D5 Related party transactions

Transactions between the Company and its subsidiaries are eliminated on consolidation.

The Company has transactions and outstanding balances with certain unit trusts, Open-Ended Investment Companies (OEICs), collateralised debt obligations and similar entities that are not consolidated and where a Group company acts as manager, which are regarded as related parties for the purposes of IAS 24. The balances are included in the Group's statement of financial position at fair value or amortised cost in accordance with IAS 39 classifications. The transactions are included in the income statement and include amounts paid on issue of shares or units, amounts received on cancellation of shares or units and amounts paid in respect of the periodic charge and administration fee.

In addition, there are no material transactions between the Group's joint ventures and associates, which are accounted for on an equity method basis, and other Group companies.

Key management personnel of the Company, as described in note B2.3, may from time to time purchase insurance, asset management or annuity products marketed by Group companies in the ordinary course of business on substantially the same terms as those prevailing at the time for comparable transactions with other persons.

In 2019 and 2018, other transactions with key management personnel were not deemed to be significant both by virtue of their size and in the context of the individuals' financial positions. All of these transactions were on terms broadly equivalent to those that prevailed in arm's length transactions.

Additional details on the Directors' interests in shares, transactions or arrangements are given in the Directors' remuneration report. Key management remuneration is disclosed in note B2.3.

D6 Commitments

The Group has provided, from time to time, certain guarantees and commitments to third parties.

At 31 December 2019, Asia operations had unfunded commitments of \$2,013 million (31 December 2018: \$1,554 million) primarily related to investments in infrastructure funds and alternative investment funds. At 31 December 2019, Jackson had unfunded commitments of \$889 million (31 December 2018: \$846 million) related to investments in limited partnerships and \$796 million (31 December 2018: \$440 million) related to commercial mortgage loans and other fixed income securities. These commitments were entered into in the normal course of business and a material adverse impact on the operations is not expected to arise from them.

D7 Investments in subsidiary undertakings, joint ventures and associates

(a) Basis of consolidation

The Group consolidates those investees it is deemed to control. The Group has control over an investee if all three of the following are met: (1) it has power over an investee; (2) it is exposed to, or has rights to, variable returns from its involvement with the investee; and (3) it has ability to use its power over the investee to affect its own returns.

(i) Subsidiaries

Subsidiaries are those investees that the Group controls. The majority of the Group's subsidiaries are corporate entities, but the Group's insurance operations also invest in a number of limited partnerships.

The Group performs a re-assessment of consolidation whenever there is a change in the substance of the relationship between the Group and an investee. Where the Group is deemed to control an entity it is treated as a subsidiary and its results, assets and liabilities are consolidated. Where the Group holds a minority share in an entity, with no control over the entity, the investments are carried at fair value through profit or loss within financial investments in the consolidated statement of financial position.

(ii) Joint ventures and associates

Joint ventures are joint arrangements arising from a contractual agreement whereby the Group and other investors have joint control of the net assets of the arrangement. In a number of these arrangements, the Group's share of the underlying net assets may be less than 50 per cent but the terms of the relevant agreement make it clear that control is jointly exercised between the Group and the third party. Associates are entities over which the Group has significant influence, but it does not control. Generally it is presumed that the Group has significant influence if it holds between 20 per cent and 50 per cent voting rights of the entity.

With the exception of those referred to below, the Group accounts for its investments in joint ventures and associates by using the equity method of accounting. The Group's share of profit or loss of its joint ventures and associates is recognised in the income statement and its share of movements in other comprehensive income is recognised in other comprehensive income. The equity method of accounting does not apply to investments in associates and joint ventures held by the Group's insurance or investment funds. This includes venture capital business, mutual funds and unit trusts and which, as allowed by IAS 28, 'Investments in Associates and Joint Ventures', are carried at fair value through profit or loss.

(iii) Structured entities

Structured entities are those that have been designed so that voting or similar rights are not the dominant factor in deciding who controls the entity. Voting rights relate to administrative tasks. Relevant activities are directed by means of contractual arrangements. The Group invests in structured entities such as:

- Collective investment schemes;
- Limited partnerships;
- Variable interest entities;
- Investment vehicles within separate accounts offered through variable annuities;
- Collateralised debt obligations;
- Mortgage-backed securities; and
- Similar asset-backed securities.

Collective investment schemes

The Group invests in collective investment schemes, which invest mainly in equities, bonds, cash and cash equivalents, and properties. The Group's percentage ownership in these entities can fluctuate on a daily basis according to the participation of the Group and other investors in them.

- Where the entity is managed by a Group asset manager, and the Group's ownership holding in the entity exceeds 50 per cent, the Group is judged to have control over the entity.
- Where the entity is managed by a Group asset manager, and the Group's ownership holding in the entity is between 20 per cent and 50 per cent, the facts and circumstances of the Group's involvement in the entity are considered, including the rights to any fees earned by the asset manager from the entity, in forming a judgement as to whether the Group has control over the entity.
- Where the entity is managed by a Group asset manager, and the Group's ownership holding in the entity is less than 20 per cent, the Group is judged to not have control over the entity.
- Where the entity is managed by an asset manager outside the Group, an assessment is made of whether the Group has existing rights that gives it the ability to direct the current activities of the entity and therefore control the entity. In assessing the Group's ability to direct an entity, the Group considers its ability relative to other investors. The Group has a limited number of investment funds where it considers it has such ability.

D7 Investments in subsidiary undertakings, joint ventures and associates continued

Where the Group is deemed to control these entities, they are treated as a subsidiary and are consolidated, with the interests of investors other than the Group being classified as liabilities, and appear as net asset value attributable to unit holders of consolidated investment funds.

Where the Group does not control these entities (as it is deemed to be acting as an agent) and they do not meet the definition of associates, they are carried at fair value through profit or loss within financial investments in the consolidated statement of financial position.

Where the Group's asset manager sets up investment funds as part of asset management operations, the Group's interest is limited to the administration fees charged to manage the assets of such entities. With no participation in these entities, the Group does not retain risks associated with investment funds. For these investment funds, the Group is not deemed to control the entities but to be acting as an agent.

The Group generates returns and retains the ownership risks in investment vehicles commensurate to its participation and does not have any further exposure to the residual risks of these investment vehicles.

Jackson's separate account assets

These are investment vehicles that invest contract holders' premiums in equity, fixed income, bonds and money market mutual funds. The contract holder retains the underlying returns and the ownership risks related to the underlying investments. The shareholder's economic interest in separate accounts is limited to the administrative fees charged. The separate accounts are set up as separate regulated entities governed by a Board of Governors or trustees for which the majority of the members are independent of Jackson or any affiliated entity. The independent members are responsible for any decision making that impacts contract holders' interest and govern the operational activities of the entities' advisers, including asset managers. Accordingly, the Group does not control these vehicles. These investments are carried at fair value through profit or loss within financial investments in the consolidated statement of financial position.

Limited partnerships

The Group's insurance operations invest in a number of limited partnerships, either directly or through unit trusts, through a mix of capital and loans. These limited partnerships are managed by general partners, in which the Group holds equity. Such interest in general partners and limited partnerships provide the Group with voting and similar rights to participate in the governance framework of the relevant activities in which limited partnerships are engaged in. Accounting for the limited partnerships as subsidiaries, joint ventures, associates or other financial investments depends on the terms of each partnership agreement and the shareholdings in the general partners.

Other structured entities

The Group holds investments in mortgage-backed securities, collateralised debt obligations and similar asset-backed securities, the majority of which are actively traded in a liquid market.

The Group consolidates the vehicles that hold the investments where the Group is deemed to control the vehicles. When assessing control over the vehicles, the factors considered include the purpose and design of the vehicle, the Group's exposure to the variability of returns and the scope of the Group's ability to direct the relevant activities of the vehicle including any kick-out or removal rights that are held by third parties. The outcome of the control assessment is dependent on the terms and conditions of the respective individual arrangements.

The majority of such vehicles are not consolidated. In these cases the Group is not the sponsor of the vehicles in which it holds investments and has no administrative rights over the vehicles' activities. The Group generates returns and retains the ownership risks commensurate to its holding and its exposure to the investments. Accordingly the Group does not have power over the relevant activities of such vehicles and all are carried at fair value through profit or loss within financial investments in the consolidated statement of financial position.

The table below provides aggregate carrying amounts of the investments in unconsolidated structured entities reported in the Group's statement of financial position:

| Statement of financial position line items | 31 Dec 2019 \$m | | | 31 Dec 2018 \$m | | |
|---|------------------|-------------------------|---------------------------|------------------|-------------------------|---------------------------|
| | Investment funds | Separate account assets | Other structured entities | Investment funds | Separate account assets | Other structured entities |
| Equity securities and holdings in collective investment schemes | 23,620 | 195,070 | – | 27,021 | 163,301 | – |
| Debt securities | – | – | 6,574 | – | – | 14,113 |
| Total | 23,620 | 195,070 | 6,574 | 27,021 | 163,301 | 14,113 |

The Group generates returns and retains the ownership risks in these investments commensurate to its participation and does not have any further exposure to the residual risks or losses of the investments or the vehicles in which it holds investments.

As at 31 December 2019, the Group does not have an agreement, contractual or otherwise, or intention to provide financial support to structured entities that could expose the Group to a loss.

(a) Dividend restrictions and minimum capital requirements

Certain Group subsidiaries and joint ventures are subject to restrictions on the amount of funds they may transfer in the form of cash dividends or otherwise to the parent company.

Under UK company law, UK companies can only declare dividends if they have sufficient distributable reserves.

Jackson is subject to state laws that limit the dividends payable to its parent company based on statutory capital, surplus and prior year earnings. Dividends in excess of these limitations require prior regulatory approval.

The Group's subsidiaries, joint ventures and associates in Asia may remit dividends to the Group, in general, provided the statutory insurance fund meets the capital adequacy standard required under local statutory regulations and has sufficient distributable reserves. For further details on local capital regulations in Asia please refer to note C12.2.

(b) Investments in joint ventures and associates

The Group has shareholder-backed joint venture insurance and asset management businesses in China with CITIC Group and a joint venture asset management business in India with ICICI Bank. In addition, there is an asset management joint venture in Hong Kong with Bank of China International Holdings Limited (BOCI) and Takaful insurance joint venture in Malaysia.

For the Group's joint ventures that are accounted for by using the equity method, the net of tax results of these operations are included in the Group's profit before tax.

The Group's associates, which are also accounted for under the equity method, include the Indian insurance entity (with the majority shareholder being ICICI Bank). In addition, the Group has investments in collective investment schemes, funds holding collateralised debt obligations, property funds where the Group has significant influence. As allowed under IAS 28, these investments are accounted for on a fair value through profit or loss basis. The aggregate fair value of associates accounted for at fair value through profit or loss, where there are published price quotations, is approximately \$0.7 billion at 31 December 2019 (31 December 2018: \$0.1 billion from continuing operations).

For joint ventures and associates accounted for using the equity method, the 12 months financial information of these investments up to 31 December 2019 (covering the same period as that of the Group) has been used in these consolidated financial statements.

The Group's share of the profits (including short-term fluctuations in investment returns), net of related tax, and carrying amount of interest in joint ventures and associates, which are equity accounted as shown in the consolidated income statement at 31 December 2019 is \$397 million (2018: \$319 million) for shareholder-backed business and comprises the following:

| Share of profits from joint ventures and associates, net of related tax | 2019 \$m | 2018 \$m |
|---|----------|----------|
| Asia insurance operations | 291 | 238 |
| Asia asset management operations | 106 | 81 |
| Total segment and Group total | 397 | 319 |

There is no other comprehensive income in the joint ventures and associates. There has been no unrecognised share of losses of a joint venture or associate that the Group has stopped recognising in the total income.

The Group's interest in joint ventures gives rise to no contingent liabilities or capital commitments that are material to the Group.

(c) Related undertakings

In accordance with Section 409 of the Companies Act 2006 a list of Prudential Group's subsidiaries, joint ventures, associates and significant holdings (being holdings of more than 20 per cent) along with the classes of shares held, the registered office address and the country of incorporation and the effective percentage of equity owned at 31 December 2019 is disclosed below.

The definitions of a subsidiary undertaking, joint venture and associate in accordance with the Companies Act 2006 are different from the definition under IFRS. As a result, the related undertakings included within the list below may not be the same as the undertakings consolidated in the Group IFRS financial statements. The Group's consolidation policy is described in note A3.1(b). The Group also operates through branches. At 31 December 2019, there is no significant branch outside the UK.

Direct subsidiary undertakings of the parent company, Prudential plc (shares held directly or via nominees)

| Name of entity | Classes of shares held | Proportion held | Registered office address and country of incorporation |
|-------------------------------------|------------------------|-----------------|---|
| Prudential Corporation Asia Limited | OS | 100.00% | 13th Floor, One International Finance Centre, 1 Harbour View Street, Central, Hong Kong |
| Prudential Group Holdings Limited | OS | 100.00% | 1 Angel Court, London, EC2R 7AG, United Kingdom |

Notes on the parent company financial statements

1 Nature of operations

Prudential plc (the Company) is a parent holding company. The Company together with its subsidiaries (collectively, the Group) is an international financial services group with its operations in Asia, the US, Africa and, prior to the demerger of M&G plc in October 2019, the UK and Europe. The Group helps individuals to de-risk their lives and deal with their biggest financial concerns through life and health insurance, and retirement and asset management solutions. On 21 October 2019, the Company completed the demerger of M&G plc, its UK and Europe business, from Prudential plc resulting in two separately listed companies. The Directors of the Company distributed its investment in M&G plc to the Company's shareholders in the form of a dividend in specie.

2 Basis of preparation

The financial statements of the Company, which comprise the statement of financial position, statement of changes in equity and related notes, are prepared in accordance with UK Generally Accepted Accounting Practice, including Financial Reporting Standard 101 Reduced Disclosure Framework ('FRS 101') and Part 15 of the Companies Act 2006.

In preparing these financial statements, the Company applies the recognition, measurement and disclosure requirements in International Financial Reporting Standards ('IFRS') as issued by the International Accounting Standards Board ('IASB') and endorsed by the EU, but makes amendments where necessary in order to comply with the Companies Act 2006 and has set out below where advantage of the FRS 101 disclosure exemptions has been taken. The Company has also taken advantage of the exemption under Section 408 of the Companies Act 2006 from presenting its own profit and loss account.

In these financial statements, the Company has applied the exemptions available under FRS 101 in respect of the following disclosures:

- A cash flow statement and related notes;
- Disclosures in respect of transactions with wholly-owned subsidiaries within the Prudential Group;
- Disclosure in respect of capital management;
- The effects of new but not yet effective IFRSs; and
- An additional balance sheet for the beginning of the earliest comparative period following the retrospective change in the accounting policy with respect to the presentation currency (as outlined further below).

As the consolidated financial statements of the Group include the equivalent disclosures, the Company has also applied the exemptions available under FRS 101 in respect of the following disclosures:

- IFRS 2 'Share Based Payments' in respect of Group-settled share-based payments;
- Disclosure required by IFRS 7 'Financial Instrument Disclosures' and IFRS 13 'Fair Value Measurement', except for the consequential amendments to IFRS 7 related to IFRS 9 which have not been adopted by the Group;
- IFRS 15, 'Revenue from Contracts with Customers' in respect of revenue recognition; and
- IAS 1, 'Presentation of Financial Statements' in respect of presenting comparative information on change in presentation currency.

Following the disposal of M&G plc, the Company and Group will manage its central cash resources and remittances primarily in US dollars. At 31 December 2019, terms of the majority of loans payable to and receivable from subsidiary undertakings previously denominated in pounds sterling were amended to reflect US dollars. From 31 December 2019, dividend income and dividend declared by the Company will be denominated in US dollars. Accordingly, as at 31 December 2019, the primary currency of the Company's financing and investment activities is US dollars and the functional currency of the Company changed from pounds sterling to US dollars prospectively from that date. The Company's assets, liabilities and equity were redenominated into US dollars using the spot exchange rate at 31 December 2019.

As a result of the change in functional currency, the Company has chosen to change its presentation currency to US dollars which is accounted for retrospectively. Prior periods have been restated into US dollars using closing rates at the relevant balance sheet date for assets, liabilities, share capital, share premium and other capital reserves. Items of total comprehensive income have been converted at the rate prevailing on the date of transaction, or at the average rate for the relevant year where this provides an equivalent measurement.

The accounting policies set out in note 3 below have, unless otherwise stated, been applied consistently to both years presented in these financial statements.

3 Significant accounting policies

Investments in subsidiary undertakings

Investments in subsidiary undertakings are shown at cost less impairment. Investments are assessed for impairment by comparing the net assets of the subsidiary undertakings with the carrying value of the investment.

Amounts owed by subsidiary undertakings

Amounts owed by subsidiary undertakings are shown at cost, less provisions. Provisions are determined using the expected credit loss approach under IFRS 9.

Derivatives

Derivative financial instruments are held to manage certain macro-economic exposures. Derivative financial instruments are carried at fair value with changes in fair value included in the profit and loss account. Refer to Section 6.1 of the Group Chief Risk and Compliance Officer's report for detail of the approach to market risk.

Financial Instruments

Under IFRS 9, except for derivative instruments that are mandatorily classified as fair value through profit or loss, all of the financial assets and liabilities of the Company are classified as amortised cost. The Company assesses impairment on its loans and receivables using the expected credit loss approach. The expected credit loss on the Company's loans and receivables, the majority of which represent loans to its subsidiaries, have been assessed by taking into account the probability of default on those loans. In all cases the subsidiaries are expected to have sufficient resources to repay the loan either now or over time (based on projected earnings). For loans recallable on demand the expected credit loss has therefore been limited to the impact of discounting the value of the loan between the balance sheet date and the anticipated recovery date. For loans with a fixed maturity date the expected credit loss has been determined with reference to the historic experience of loans with equivalent credit characteristics.

Borrowings

Borrowings are initially recognised at fair value, net of transaction costs, and subsequently accounted for on an amortised cost basis using the effective interest method. Under the effective interest method, the difference between the redemption value of the borrowing and the initial proceeds, net of transaction costs, is amortised through the profit and loss account to the date of maturity or, for subordinated debt, over the expected life of the instrument. Where modifications to borrowings do not result in a substantial difference to the terms of the instrument, any costs or fees incurred adjust the carrying amount of the liability and are amortised over the remaining expected life of the modified instrument. Where modifications to borrowings do result in a substantial difference to the terms of the instrument, the instrument is treated as if it had been extinguished and replaced by a new instrument which is initially recognised at fair value and subsequently accounted for on an amortised cost basis using the effective interest method. Any costs or fees arising from such a modification are recognised as an expense when incurred.

Dividends

Interim dividends are recorded in the period in which they are paid.

Share premium

The difference between the proceeds received on issue of shares and the nominal value of the shares issued is credited to the share premium account.

Foreign currency translation

Transactions not denominated in the Company's functional currency are initially recorded at the functional rate of currency prevailing on the date of the transaction. Monetary assets and liabilities not denominated in the Company's functional currency, including borrowings that have been used to finance or provide a hedge against Group equity investments in overseas subsidiaries, are translated to the Company's functional currency at year end exchange rates. The impact of these currency translations is recorded within the profit and loss account for the year.

As discussed above, the Company's functional currency changed from pounds sterling to US dollars on 31 December 2019. The Company has also changed its presentation currency from pounds sterling to US dollars.

3 Significant accounting policies continued

Tax

Current tax expense is charged or credited to operations based upon amounts estimated to be payable or recoverable as a result of taxable amounts for the current year. To the extent that losses of an individual UK company are not offset, they can be carried back for one year or carried forward indefinitely to be offset, subject to restrictions based on future taxable profits, against profits arising from the same company or other companies in the same UK tax group.

Deferred tax assets and liabilities are recognised in accordance with the provisions of IAS 12 'Income Taxes'. Deferred tax assets are recognised to the extent that it is regarded as more likely than not that future taxable profits will be available against which these losses can be utilised. Deferred tax is measured at the tax rates that are expected to be applied to temporary differences when they reverse, using tax rates enacted or substantively enacted at the reporting date.

The Group's UK subsidiaries each file separate tax returns. In accordance with UK tax legislation, where one domestic UK company is a 75 per cent owned subsidiary of another UK company or both are 75 per cent owned subsidiaries of a common parent, the companies are considered to be within the same UK tax group. For companies within the same tax group, trading losses may be offset against taxable profits arising in the same or future accounting periods for the purposes of determining current and deferred taxes.

Pensions

The Company historically assumed a portion of the pension surplus or deficit of the Group's main pension scheme, the Prudential Staff Pension Scheme ('PSPS'). The Company's portion of the surplus was transferred to M&G Prudential Services Limited at 30 June 2019. Up until that date, the Company applied the requirements of IAS 19 'Employee Benefits' (as revised in 2011) for the accounting of its interest in the PSPS surplus or deficit. The key items are highlighted below.

A pension surplus or deficit is recorded as the difference between the present value of the scheme liabilities and the fair value of the scheme assets. The Company's share of pension surplus is recognised to the extent that the Company is able to recover a surplus either through reduced contributions in the future or through refunds from the scheme.

The assets and liabilities of the defined benefit pension schemes of the Prudential Group are subject to a full triennial actuarial valuation using the projected unit method. Estimated future cash flows are then discounted at a high quality corporate bond yield, adjusted to allow for the difference in duration between the bond index and the pension liabilities, where appropriate, to determine their present value. These calculations are performed by independent actuaries.

The aggregate of the actuarially determined service costs of the currently employed personnel and the net income (interest) on the net scheme assets (liabilities) at the start of the period, is recognised in the profit or loss account. Actuarial gains and losses as a result of the changes in assumptions, experience variances or the return on scheme assets excluding amounts included in the net deferred benefit asset (liability) are recorded in other comprehensive income. The loss on transfer of the pension surplus transferred to M&G Prudential Services Limited has been recognised in the profit or loss account.

Share-based payments

The Group offers share award and option plans for certain key employees and a Save As You Earn ('SAYE') plan for all UK and certain overseas employees. The share-based payment plans operated by the Group are mainly equity-settled.

Under IFRS 2 'Share-based payment', where the Company, as the parent company, has the obligation to settle the options or awards of its equity instruments to employees of its subsidiary undertakings, and such share-based payments are accounted for as equity-settled in the Group financial statements, the Company records an increase in the investment in subsidiary undertakings for the value of the share options and awards granted with a corresponding credit entry recognised directly in equity. The value of the share options and awards granted is based upon the fair value of the options and awards at the grant date, the vesting period and the vesting conditions. Cash receipts from business units in respect of newly issued share schemes are treated as returns of capital within investments in subsidiaries.

4 Reconciliation from the FRS 101 parent company results to the IFRS Group results

The parent company financial statements are prepared in accordance with FRS 101 and the Group financial statements are prepared in accordance with IFRS as issued by the IASB and endorsed by the EU.

The tables below provide a reconciliation between the FRS 101 parent company results and the IFRS Group results.

| | 2019 \$m | 2018 \$m |
|--|-----------------|-----------------|
| Profit after tax | | |
| Profit for the financial year of the Company (including dividends from subsidiaries) in accordance with FRS 101 and IFRS | 12,255 | 1,390 |
| Accounting policy difference* | 15 | 7 |
| Share in the IFRS result of the Group, net of distributions to the Company† | (11,487) | 2,622 |
| Profit after tax of the Group attributable to shareholders in accordance with IFRS | 783 | 4,019 |
| | | |
| | 31 Dec 2019 \$m | 31 Dec 2018 \$m |
| Net equity | | |
| Shareholders' equity of the Company in accordance with FRS 101 | 13,173 | 9,488 |
| Accounting policy difference* | 33 | 18 |
| Share in the IFRS net equity of the Group† | 6,271 | 12,462 |
| Shareholders' equity of the Group in accordance with IFRS | 19,477 | 21,968 |

* Adjustment represents difference in accounting policy for expected credit losses on loan assets, the Company has adopted IFRS 9 while the Group applies IAS 39.

† The 'share in the IFRS result and net equity of the Group' lines represent the parent company's equity in the earnings and net assets of its subsidiaries and associates.

The profit for the financial year of the Company in accordance with IFRS includes dividends received in the year from subsidiary undertakings of \$9,599 million for the year ended 31 December 2019 (2018: \$1,996 million). Dividends received in 2019 included dividends from M&G plc prior to demerger of \$5,566m and dividends from US subsidiaries of \$2,000m in the form of non-current debt instruments.

5 Investments in subsidiary undertakings

| | 2019 \$m | 2018 \$m |
|--|---------------|---------------|
| At 1 January | 13,787 | 14,608 |
| Capital injections and acquisitions | 72 | 117 |
| Distribution of M&G plc – cost of investment | (3,730) | – |
| Other disposals | (13) | – |
| Amounts in respect of share based payments | (123) | (81) |
| Other* | 451 | (857) |
| At 31 December | 10,444 | 13,787 |

* Includes amounts relating to foreign translation differences arising on the retranslation of reserves due to the change in the Company's presentation currency

Prior to the demerger of M&G plc from the Group in October 2019, the following transactions and restructuring occurred:

- On 20 September 2019, the Company disposed of its investment in Prudential Capital Holding Company Limited to M&G plc, for consideration of \$85 million. A gain on disposal of \$73 million is recognised in the income statement.
- On 8 October 2019, the Company acquired Prudential Africa Holdings Limited from Prudential Group Holdings Limited, a subsidiary of the Company, in exchange for consideration of \$49 million. On 15 October 2019, the Company subsequently transferred Prudential Africa Holdings Limited to Prudential Corporation Asia Limited under a share-for-share exchange. Additionally, in connection with this transaction, the Company increased its investment in Prudential Group Holdings Limited by \$23 million.
- Also on 15 October 2019, shares in Prudential (US Holdco 1) Limited were transferred to Prudential Corporation Asia Limited under a share-for-share exchange. There was no change to the Company's total investment in subsidiary undertakings as a result of this transfer.

5 Investments in subsidiary undertakings continued

On 21 October 2019 the Company distributed its equity shareholding in its subsidiary M&G plc as a dividend in-specie. In accordance with IFRIC 17 the value of dividend in-specie recognised as distribution within the statement of changes in equity was the fair value of M&G plc at the date of distribution. As also required by IFRIC 17, the difference between the fair value of M&G plc on distribution and the previous carrying value of the Company's investment in M&G plc of \$3,649 million is recognised as gain within profit for the year.

Amounts in respect of share-based payments of \$(123) million (2018: \$(81) million) comprise of \$5 million (2018: \$7 million) in respect of share-based payments reflecting the value of payments settled by the Company for employees of its subsidiary undertakings, less \$(128) million (2018: \$(88) million) relating to cash received from subsidiaries in respect of share awards.

Investments in subsidiaries held at 31 December 2019 have been assessed for impairment and no impairment was identified.

Subsidiary undertakings of the Company at 31 December 2019 are listed in note D7 of the Group financial statements.

6 Derivative financial instruments

| | 31 Dec 2019 \$m | | 31 Dec 2018 \$m | |
|-----------------------|-------------------|------------------------|-------------------|------------------------|
| | Fair value assets | Fair value liabilities | Fair value assets | Fair value liabilities |
| Cross-currency swap | – | – | 6 | – |
| Inflation-linked swap | – | – | – | 539 |
| Total | – | – | 6 | 539 |

Derivative financial instruments are held to manage certain macro-economic exposures.

The change in fair value of the derivative financial instruments of the Company was a (loss) before tax of \$(77) million (2018: gain of \$27 million).

7 Pension scheme financial position

The majority of Prudential staff in the UK are members of the Group's pension schemes. The largest scheme up to the demerger of M&G plc was the Prudential Staff Pension Scheme (the Scheme) which is primarily a closed defined benefit scheme. Historically, all pension surplus and deficit were attributable to subsidiaries of M&G plc in line with the Group's allocation policy with the exception of 30 per cent of the surplus attaching to PSPS, which was allocated to Prudential plc. In preparation for the demerger of M&G plc in 2019, at 30 June 2019, the 30 per cent of surplus attaching to PSPS of \$20 million was formally reallocated to M&G Prudential Services Limited. After the demerger of M&G plc, the Company no longer has any interest in the defined benefit pension scheme recognised on its balance sheet.

8 Borrowings

| | Core structural borrowings | | Other borrowings | | Total | |
|--|----------------------------|--------------------|--------------------|--------------------|--------------------|--------------------|
| | 31 Dec 2019 \$m | 31 Dec 2018 \$m | 31 Dec 2019 \$m | 31 Dec 2018 \$m | 31 Dec 2019 \$m | 31 Dec 2018 \$m |
| Core structural borrowings ^{note (i)} | | | | | | |

| Borrowings are repayable as follows: | | | | | | |
| Within 1 year | – | – | 520 | 601 | 520 | 601 |
| Between 1 and 5 years | 414 | 748 | – | – | 414 | 748 |
| After 5 years | 4,580 | 8,763 | – | – | 4,580 | 8,763 |
| | 4,994 | 9,511 | 520 | 601 | 5,514 | 10,112 |

Notes

- (i) Further details on the core structural borrowings of the Company are provided in note C6.1 of the Group IFRS financial statements.
(ii) The interests of the holders of the subordinated liabilities are subordinate to the entitlements of other creditors of the Company.
(iii) These borrowings support a short-term fixed income securities programme.

During 2019, the Company redeemed its £400 million 11.375 per cent Tier 2 subordinated notes, and issued further subordinated debt for proceeds of \$371 million, net of issue costs.

In addition, during 2019, the Company agreed with the holders of two subordinated debt instruments to alter the terms and conditions of these instruments in exchange for an upfront fee and an increase in the coupon of the instruments. The upfront fee paid of \$180 million has been recognised as an expense during the period within finance costs. The upfront fee and increase in coupon rates represent a significant change in the cash flows of each instrument and therefore, in accordance with IAS 39, has resulted in an extinguishment of the old debt and recognition of a new debt at fair value, resulting in a loss on revaluation of \$208 million.

On 18 October 2019, the Company transferred six subordinated debt instruments to M&G plc to implement a rebalancing of debt prior to demerger. The debt transferred included the two instruments revalued on alteration of terms discussed above. The Company recognised a gain of \$208 million on the transfer, reversing the loss on revaluation of debt instruments discussed above.

In October 2019 the Company repaid its £275 million bank loan due to Standard Chartered Bank.

9 Deferred tax liability

| Deferred tax liability | 2019 \$m | 2018 \$m |
|--|----------|----------|
| Short-term temporary differences related to pension scheme | – | (15) |

10 Share capital and share premium

A summary of the ordinary shares in issue and the options outstanding to subscribe for the Company's shares at 31 December 2019 is set out in note C10 of the Group financial statements.

11 Retained profit of the Company

Retained profit at 31 December 2019 amounted to \$10,376 million (31 December 2018: \$6,820 million). The retained profit includes distributable reserves of \$4,735 million and non-distributable reserves of \$5,641 million. The amount of \$5,641 million is not able to be regarded as part of the distributable reserves of the Company because the gains relate to intra-group transactions in which qualifying consideration was not received.

Under UK company law, Prudential may pay dividends only if sufficient distributable reserves of the Company are available for the purpose and if the amount of its net assets is greater than the aggregate of its called up share capital and non-distributable reserves (such as the share premium account) and the payment of the dividend does not reduce the amount of its net assets to less than that aggregate.

The retained profit of the Company is substantially generated from dividend income received from subsidiaries. The Group segmental analysis illustrates the generation of profit across the Group (see note B1 of the Group IFRS financial statements). The Group and its subsidiaries are subject to local regulatory minimum capital requirements, as set out in note C12 of the Group IFRS financial statements. A number of the principal risks set out in the 'Report on the risks facing our business and how these are managed' could impact the generation of profit in the Group's subsidiaries in the future and hence impact their ability to pay dividends in the future.

In determining the dividend payment in any year the directors follow the Group dividend policy described in the Group Chief Financial Officer and Chief Operating Officer's report section of this Annual Report. The directors consider the Company's ability to pay current and future dividends twice a year by reference to the Company's business plan and certain stressed scenarios.

12 Other information

- a Information on key management remuneration is given in note B2.3 of the Group financial statements. Additional information on directors' remuneration is given in the directors' remuneration report section of this Annual Report.
- b Information on transactions of the directors with the Group is given in note D5 of the Group financial statements.
- c The Company employs no staff.
- d Fees payable to the Company's auditor for the audit of the Company's annual accounts were \$0.1 million (2018: \$0.1 million) and for other services were \$0.1 million (2018: \$0.1 million).
- e In certain instances, the Company has guaranteed that its subsidiaries will meet their obligations when they fall due for payment.

13 Post balance sheet events

The second interim ordinary dividend for the year ended 31 December 2019, which was approved by the Board of Directors after 31 December 2019, is described in note B6 of the Group financial statements.

Statement of Directors' responsibilities in respect of the Annual Report and the financial statements

The directors are responsible for preparing the Annual Report and the Group and parent company financial statements in accordance with applicable law and regulations.

Company law requires the directors to prepare Group and parent company financial statements for each financial year. Under that law they are required to prepare the Group financial statements in accordance with International Financial Reporting Standards as adopted by the European Union (IFRSs as adopted by the EU) and applicable law and have elected to prepare the parent Company financial statements in accordance with UK Accounting Standards and applicable law (UK Generally Accepted Accounting Practice) including FRS 101 Reduced Disclosure Framework.

Under company law, the directors must not approve the financial statements unless they are satisfied that they give a true and fair view of the state of affairs of the Group and parent Company and of their profit or loss for that period. In preparing each of the Group and parent Company financial statements, the directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and estimates that are reasonable and prudent;
- for the Group financial statements, state whether they have been prepared in accordance with IFRSs as adopted by the EU;
- for the parent company financial statements, state whether applicable UK accounting standards have been followed, subject to any material departures disclosed and explained in the parent company financial statements; and
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the Group and the parent company will continue in business.

The directors are responsible for keeping adequate accounting records that are sufficient to show and explain the parent Company's transactions and disclose with reasonable accuracy at any time the financial position of the parent Company and enable them to ensure that its financial statements comply with the Companies Act 2006. They have general responsibility for taking such steps as are reasonably open to them to safeguard the assets of the Group and to prevent and detect fraud and other irregularities.

Under applicable law and regulations, the directors are also responsible for preparing a strategic report, directors' report, directors' remuneration report and corporate governance statement that comply with that law and those regulations.

The directors are responsible for the maintenance and integrity of the corporate and financial information included on the Company's website. Legislation in the UK governing the preparation and dissemination of financial statements may differ from legislation in other jurisdictions.

The directors of Prudential plc, whose names and positions are set out on pages 92 to 97 confirm that to the best of their knowledge:

- the financial statements, prepared in accordance with the applicable set of accounting standards, give a true and fair view of the assets, liabilities, financial position and profit or loss of the Company and the undertakings included in the consolidation taken as a whole;
- the strategic report includes a fair review of the development and performance of the business and the position of the Group and the undertakings included in the consolidation taken as a whole, together with a description of the principal risks and uncertainties that they face; and
- the Annual Report and financial statements, taken as a whole, is fair, balanced and understandable and provides the information necessary for shareholders to assess the Group's position and performance, business model and strategy.

Independent auditor's report to the members of Prudential plc

1 Our opinion is unmodified

We have audited the financial statements of Prudential plc ("the company") for the year ended 31 December 2019 which comprise;

- the consolidated income statement, consolidated statement of comprehensive income, consolidated statement of changes in equity, consolidated statement of financial position and consolidated statement of cash flows, and the related notes, including accounting policies in note A4; and
- the parent company statements of financial position and of changes in equity, and the related notes, including the significant accounting policies in note 3.

In our opinion:

- The financial statements give a true and fair view of the state of the Group's and of the parent company's affairs as at 31 December 2019 and of the Group's profit for the year then ended;
- The Group financial statements have been properly prepared in accordance with International Financial Reporting Standards as adopted by the European Union;
- The parent company financial statements have been properly prepared in accordance with UK Accounting Standards including FRS 101 Reduced Disclosure Framework; and
- The financial statements have been prepared in accordance with the requirements of the Companies Act 2006 and, as regards the Group financial statements, Article 4 of the IAS Regulation.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (UK) ("ISAs (UK)") and applicable law. Our responsibilities are described below. We believe that the audit evidence we have obtained is a sufficient and appropriate basis for our opinion. Our audit opinion is consistent with our report to the audit committee.

We were appointed as auditor by the shareholders in October 1999. The period of total uninterrupted engagement is for the 21 financial years ended 31 December 2019. We have fulfilled our ethical responsibilities under, and we remain independent of the Group in accordance with, UK ethical requirements including the Financial Reporting Council ('FRC') Ethical Standard as applied to listed public interest entities. No non-audit services prohibited by that standard were provided.

2 Key audit matters: our assessment of risks of material misstatement

Key audit matters are those matters that, in our professional judgment, were of most significance in the audit of the financial statements and include the most significant assessed risks of material misstatement (whether or not due to fraud) identified by us, including those which had the greatest effect on: the overall audit strategy; the allocation of resources in the audit; and directing the efforts of the engagement team. We summarise below the key audit matters, in decreasing order of audit significance, in arriving at our audit opinion above, together with our key audit procedures to address those matters and, as required for public interest entities, our results from those procedures. These matters were addressed, and our results are based on procedures undertaken, in the context of, and solely for the purpose of, our audit of the financial statements as a whole, and in forming our opinion thereon, and consequently are incidental to that opinion, and we do not provide a separate opinion on these matters.

Valuation of insurance contract liabilities and investment contract liabilities with discretionary participation features (2019: \$380,776 million, 2018: \$496,805 million).

The risk compared to the prior year is unchanged.

Refer to page 118 (Audit Committee report), page 208 (accounting policy) and pages 262 to 275 (financial disclosures)

| The risk | Our response |
|--|---|
| <p>The Group has significant insurance contract liabilities and investment contract liabilities with discretionary participation features (policyholder liabilities) representing 88 per cent of the Group's total liabilities.</p> <p>Subjective valuation This is an area that involves significant judgement over uncertain future outcomes, mainly the ultimate total settlement value of these long term policyholder liabilities. Economic assumptions, including investment return and associated discount rates, and operating assumptions including mortality, morbidity, expenses, utilisation of guarantees and persistency (including consideration of policyholder behaviour) are the key inputs used to estimate these long term liabilities, in addition to the appropriate design and calibration of complex reserving models.</p> <p>The specific application of these judgements to individual segments is explained below.</p> <p>For the US insurance segment, the valuation of the guarantees in the variable annuity ('VA') business is complex as it involves exercising significant judgement related to inputs such as expected market rates of return, fund performance, and discount rates, as well as assumptions such as mortality, benefit utilisation, and persistency.</p> <p>For the Asia insurance segment, the valuation of the policyholder liabilities requires significant judgement over the setting of mortality, morbidity, persistency and expense assumptions.</p> <p>The effect of these matters is that, as part of our risk assessment, we determined that the valuation of policyholder liabilities has a high degree of estimation uncertainty, with a potential range of reasonable outcomes greater than our materiality for the financial statements as a whole and possibly many times that amount. The financial statements notes C7.2 and C7.3 disclose the sensitivities estimated by the Group.</p> | <p>We used our own actuarial specialists to assist us in performing our procedures in this area.</p> <p>Our procedures included:</p> <p>Methodology choice We assessed the methodology for selecting assumptions and calculating the policyholder liabilities. This included:</p> <ul style="list-style-type: none"> — Assessing the methodology adopted for selecting assumptions by applying our industry knowledge and experience and comparing the methodology used against industry standard actuarial practice; — Assessing the methodology adopted for calculating the policyholder liabilities by reference to the requirements of the accounting standard and assessing the impact of current year changes in methodology on the calculation of policyholder liabilities; — Comparing changes in methodology to our expectations derived from market experience; and — Evaluating the analysis of the movements in policyholder liabilities during the year, including consideration of whether the movements were in line with the methodology and assumptions adopted. <p>Control operation We used our own IT specialists to assist us in performing our procedures in this area which included testing of the design, implementation and operating effectiveness of key controls over the valuation process. Controls testing in respect of the valuation process included assessment and approval of the methods and assumptions adopted over the calculation of policyholder liabilities as well as appropriate access and change management controls over the actuarial models.</p> <p>Our procedures for the US insurance segment also included:</p> <p>Historical comparison</p> <ul style="list-style-type: none"> — Assessing the assumptions relating to policyholder behaviour (benefit utilisation and persistency) by comparing to relevant company and industry historical experience data in order to assess whether this supported the year-end assumptions adopted. <p>Benchmarking assumptions and sector experience</p> <ul style="list-style-type: none"> — Assessing the assumptions for investment mix and projected investment returns by comparing to company specific and industry data and for future growth rates by comparing to market trends and market volatility. — Utilising the results of our industry benchmarking of assumptions and actuarial market practice to inform our challenge of assumptions in relation to policyholder behaviour. <p>Model evaluation</p> <ul style="list-style-type: none"> — Assessing the cash flow projections in the reserving models by reference to the inclusion of relevant product features. We have also assessed the impact of modelling and assumption changes by inspecting pre and post change model runs and comparing the outcomes of the changes to our expectations. — Independently recalculating the liabilities for a selection of individual policies to assess whether the selected model calibration had been appropriately implemented. |

Valuation of insurance contract liabilities and investment contract liabilities with discretionary participation features (2019: \$380,776 million, 2018: \$496,805 million).

The risk compared to the prior year is unchanged.

| | <p><i>Our procedures for the Asia insurance segment also included:</i></p> <p>Historical comparison</p> <ul style="list-style-type: none">— Evaluating the experience analysis in respect of the mortality and morbidity assumptions by reference to actual experience in order to assess whether this supported the year-end assumptions adopted. <p>Benchmarking assumptions and sector experience</p> <ul style="list-style-type: none">— Using our sector experience and market knowledge to inform our challenge of the assumptions in the areas noted above. <p>Model evaluation</p> <ul style="list-style-type: none">— Assessing the reserving models by considering the accuracy of the cash flow projections including by reference to the inclusion of relevant product features. We have also assessed the impact of modelling and assumption changes by inspecting pre and post change model runs and comparing the outcomes of the changes to our expectations. <p>Assessing transparency</p> <p>We assessed whether the disclosures in relation to the assumptions used in the valuation of policyholder liabilities are compliant with the relevant accounting requirements.</p> <p>Our result</p> <p>We found the valuation of policyholder liabilities to be acceptable (2018: acceptable).</p> |

Valuation of certain level 2 and level 3 investments held at fair value (2019: \$77,203 million, 2018: \$181,757 million).

The risk compared to the prior year is unchanged.

Refer to page 118 (Audit Committee report), page 213 (accounting policy) and pages 244 to 261 (financial disclosures)

| The risk | Our response |
|--|--|
| <p>The Group's investments portfolio represents 89 per cent (2018: 88 per cent) of the Group's total assets.</p> <p>Subjective valuation The area that involved significant audit effort and judgement in 2019 was the valuation of certain level 2 and level 3 positions within the portfolio of financial investments held at fair value. These included unlisted debt securities and unlisted funds that are valued by reference to their Net Asset Value ('NAV funds'). For these positions a reliable third party price was not readily available and therefore involved the application of expert judgement in the valuations adopted.</p> <p>The valuation of the portfolio involves judgement depending on the observability and significance of the inputs into the valuation and the consequent impact on the classification of those investments, and further judgement in determining the appropriate valuation methodology where external pricing sources are either not readily available or are unreliable.</p> <p>The effect of these matters is that, as part of our risk assessment, we determined that the valuation of certain level 2 and 3 investments held at fair value has a high degree of estimation uncertainty, with a potential range of reasonable outcomes greater than our materiality for the financial statements as a whole and possibly many times that amount.</p> <p>The financial statements notes C7.2 and C7.3 disclose the sensitivities estimated by the Group.</p> | <p>We used our own valuation specialists in order to assist us in performing our procedures in this area.</p> <p>Our procedures included:</p> <p>Methodology choice We assessed the appropriateness of the pricing methodologies with reference to relevant accounting standards as well as industry practice.</p> <p>Control operation We tested the design, implementation and operating effectiveness of key controls over the valuation process, including the Group's review and approval of the estimates and assumptions used for the valuation including key authorisation and data input controls.</p> <p>Tests of details For a sample of securities, we used our valuation specialists to assess the Group's classification of assets within Level 2 or Level 3 by evaluating the observability of the inputs used in valuing these securities.</p> <p>For a sample of unlisted debt securities we compared the price adopted to our independently derived price, using our valuation specialists.</p> <p>We agreed the valuations for the NAV funds to the most recent NAV statements. To assess reliability of these statements we compared to audited financial statements of the funds, where available, or performed a retrospective test over the NAV valuations for each fund to assess if the fund valuations reported in the audited financial statements in the prior year were materially consistent with the most recent NAV valuation statements available at the time.</p> <p>Assessing transparency We assessed whether the disclosures in relation to the valuation of level 2 and 3 investments held at fair value are compliant with the relevant accounting requirements.</p> <p>Our result We found the valuation of level 2 and 3 investments held at fair value to be acceptable (2018: acceptable).</p> |

Amortisation of US deferred acquisition costs ('DAC') (2019: \$12,240 million, 2018: \$11,113 million).

The risk compared to the prior year is unchanged.

Refer to page 118 (Audit Committee report), page 211 (accounting policy) and pages 277 to 279 (financial disclosures)

| <i>The risk</i> | <i>Our response</i> |
|--|---|
| <p>DAC represents 3 per cent (2018: 2 per cent) of the Group's total assets. The DAC associated with the US component, which represents 86 per cent of the total DAC, involves the greatest judgement in terms of measurement.</p> | <p>We used our own actuarial specialists to assist us in performing our audit procedures in this area.</p> <p>Our procedures included:</p> |
| <p>Subjective valuation</p> <p>US DAC related to annuities is amortised in proportion to estimated gross profits. Key assumptions impacting estimated gross profits include assumptions such as mortality and persistency, as well as the assumptions around long-term investment return and future hedge costs. We identified the amortisation of US DAC as a key audit matter given the judgements involved in selecting these assumptions.</p> | <p>Historical comparison</p> <p>Assumptions relating to persistency and mortality are also relevant to the calculation of the insurance contract liabilities. See further detail in our response to that risk.</p> <p>We have also assessed the appropriateness of the assumptions used in determining the estimated future profit profile and the extent of the associated adjustment necessary to the amortisation of the US DAC asset. Our work included critically assessing the judgements that determine the future profit profiles in the context of actual historical experience as well as by reference to market trends.</p> |
| <p>The effect of these matters is that, as part of our risk assessment, we determined that the amortisation of US DAC has a high degree of estimation uncertainty, with a potential range of reasonable outcomes greater than our materiality for the financial statements as a whole. The financial statements note C7.3 discloses the sensitivities estimated by the Group.</p> | <p>Our sector experience</p> <p>We challenged the reasonableness of the selected assumptions relating to projected investment return and future hedge costs based on our understanding of developments in the business. Our work included comparing the projected investment returns against the investment portfolio mix and market return data. Additionally, we evaluated management's approach for deriving the assumption for future hedge costs through comparison to actuarial market practice, and corroborating the rationale for any key differences.</p> |
| | <p>Tests of details</p> <p>We assessed the accuracy of the calculations performed including the extent of the amortisation adjustment determined based on an assessment of the future profit profiles.</p> |

Recoverability of parent company's investment in subsidiaries – (2019: \$10,444 million, 2018: \$13,787 million)

The risk is new in the current year. The risk relates to the parent company financial statements.

Refer to page 118 (Audit Committee report), Refer to page 313 (accounting policy) and pages 315 to 316 (financial disclosures)

| The risk | Our response |
|--|---|
| <p>Low risk, high value</p> <p>The carrying amount of the parent company's investments in subsidiaries represents 55 percent (2018: 64 percent) of the company's total assets. Their recoverability is not at a high risk of significant misstatement or subject to significant judgement. However, due to their materiality in the context of the parent company financial statements, this is considered to be the area that had the greatest effect on our overall parent company audit.</p> | <p>Our procedures included:</p> <p>Tests of details</p> <p>Comparing the carrying amount of 100% of the investments in subsidiaries with the relevant subsidiaries' draft balance sheet to identify whether their net assets, being an approximation of their minimum recoverable amount, were in excess of their carrying amount and assessing whether those subsidiaries have historically been profit-making.</p> <p>Assessing subsidiary audits</p> <p>Assessing the work performed by the subsidiary audit teams on all of those subsidiaries and considering the results of that work on those subsidiaries' profits and net assets.</p> <p>Our result</p> <p>We found the Group's assessment of the recoverability of the investment in subsidiaries to be acceptable (2018: acceptable).</p> |

Following the demerger of M&G plc from the Group on 21 October 2019, we no longer consider the following to be key audit matters for 2019:

- Determination of pension asset (restricted surplus) in respect of the defined benefit pension scheme. As a result of the demerger and associated transfer of certain financial balances by Prudential plc to the demerged entity, the balance is no longer material.
- The impact of uncertainties due to the UK exiting the European Union on our audit. As a result of the demerger, the Group no longer has any trading operations in the UK or Europe. As such, the factors giving rise to a key audit matter related to these uncertainties are no longer relevant.

3 Our application of materiality and an overview of the scope of our audit

Materiality for the Group financial statements as a whole was set at \$298 million (2018: \$446 million) determined with reference to a benchmark of IFRS shareholders' equity (of which it represents 1.5 per cent (2018: 2.0 per cent)). We consider IFRS shareholders' equity to be the most appropriate benchmark as it represents the residual interest that can be ascribed to shareholders after policyholder assets and corresponding liabilities have been accounted for; we consider that this is the most appropriate measure for the size of the business and that it provides a stable measure year on year. We compared our materiality against other relevant benchmarks (total assets, total revenue and profit before tax) to ensure the materiality selected was appropriate for our audit.

We set out below the materiality thresholds that are key to the audit.

Materiality for the parent company financial statements as a whole was set at \$40 million (2018: \$146 million), determined with reference to a benchmark of parent company's net assets, of which it represents 0.3 per cent (2018: 1.5 per cent). The component materiality, as determined by the Group audit team, applied to the audit of the parent company financial statements as a whole is lower than the materiality we would otherwise have determined by reference to its net assets.

We agreed to report to the Group audit committee any corrected or uncorrected identified misstatements exceeding \$15 million (2018: \$23 million) in addition to other identified misstatements that warrant reporting on qualitative grounds.

We subjected the Group's operations to audits for group reporting purposes as follows:

Of the 14 (2018: 16) reporting components scoped in for the Group audit, we subjected 10 (2018: 10) to full scope audits for group reporting purposes, and 4 (2018: 5) to an audit of account balances. The components for which we performed work other than full scope audits for group reporting purposes were not individually significant but were included in the scope of our group reporting work as they did present specific individual audit risks that needed to be addressed or in order to provide further coverage over the Group's results.

The components subjected to full scope audits included the parent company; the Prudential Assurance Company Limited in the UK and the insurance operations in the US, Hong Kong, Indonesia, Singapore, Malaysia, Vietnam, and China; and the fund management operations of M&G.

The components subjected to an audit of account balances included Prudential Pensions Limited, the insurance operations in Thailand and Taiwan, and the fund management operations of Eastspring Singapore. The account balances audited for Thailand were policyholder liabilities, investments, deferred acquisition costs, premiums and claims; the account balances audited for Taiwan were policyholder liabilities, investments, and deferred acquisition costs; the account balances audited for Eastspring Singapore were other income and expenses; the account balances audited for Prudential Pensions Limited were total investment return and benefits and claims.

For the remaining operations, we performed analysis at an aggregated Group level to re-examine our assessment that there were no significant risks of material misstatement within these operations.

These components accounted for the following percentages of the Group's results:

Group revenue

97%

(2018: 96%)

Group profit before tax

92%

(2018: 97%)

Group total assets

97%

(2018: 97%)

Group shareholders' equity

93%

(2018: 94%)

The Group audit team held a global planning conference with component auditors to identify audit risks and decide how each component team should address the identified audit risks. The Group audit team instructed component auditors as to the significant areas to be covered, including the relevant risks detailed above and the information to be reported. The Group audit team approved the component materialities, which ranged from \$40 million to \$238 million (2018: \$70 million to \$146 million) across the components, having regard to the size and risk profile of the Group across the components. The work on 13 components (2018: 15 components) was performed by component auditors and work on the remaining component, which was the parent company, was performed by the Group audit team.

The Group audit team visited all component auditor locations that performed a full-scope audit. Video and telephone conference meetings were also held with these component auditors and those that performed an audit of account balances. At these visits and telephone conference meetings, an assessment was made of audit risk and strategy, the findings reported to the Group audit team were discussed in more detail, key working papers were inspected and any further work required by the Group audit team was then performed by the component auditor.

The Group team also routinely reviews the audit documentation of all component audits. This year for one component in China, a joint venture of the Group, we visited the component team in December and performed a preliminary file review. As the Coronavirus prevented entry to the country post year-end, and remote access to audit documentation is prohibited, we instead extended our oversight of that component team through extended telephone discussions and expanded reporting.

The Senior Statutory Auditor, in conjunction with other senior staff in the Group and component audit teams, also regularly attended Business Unit audit committee meetings (these were held at a regional level for Asia) and participated in meetings with local components to obtain additional understanding, first hand, of the key risks and audit issues at a component level which may affect the Group financial statements.

4 We have nothing to report on going concern

The Directors have prepared the financial statements on the going concern basis as they do not intend to liquidate the Company or the Group or to cease their operations, and as they have concluded that the Company's and the Group's financial position means that this is realistic. They have also concluded that there are no material uncertainties that could have cast significant doubt over their ability to continue as a going concern for at least a year from the date of approval of the financial statements ("the going concern period").

Our responsibility is to conclude on the appropriateness of the Directors' conclusions and, had there been a material uncertainty related to going concern, to make reference to that in this audit report. However, as we cannot predict all future events or conditions and as subsequent events may result in outcomes that are inconsistent with judgements that were reasonable at the time they were made, the absence of reference to a material uncertainty in this auditor's report is not a guarantee that the Group and the Company will continue in operation.

In our evaluation of the Directors' conclusions, we considered the inherent risks to the Group's and Company's business model and analysed how those risks might affect the Group's and Company's financial resources or ability to continue operations over the going concern period. The risks that we considered most likely to adversely affect the Group's and Company's available financial resources over this period were:

- Adverse impacts arising from fluctuations or negative trends in the economic environment which affect the valuations of the Group's investments, wider credit spreads and defaults and valuation of policyholder liabilities due to the impact of these market movements; and
- Severely adverse policyholder lapse or claims experience.

As these were risks that could potentially cast significant doubt on the Group's and the Company's ability to continue as a going concern, we considered sensitivities over the level of available financial resources indicated by the Group's financial forecasts taking account of reasonably possible (but not unrealistic) adverse effects that could arise from these risks individually and collectively and evaluated the achievability of the actions the Directors consider they would take to improve the position should the risks materialise. We also considered less predictable but realistic second order impacts, such as failure of counterparties who have transactions with the Group (such as banks and reinsurers) to meet commitments that could give rise to a negative impact on the Group's financial position and increased illiquidity which also adds to uncertainty over the accessibility of financial resources and may reduce capital resources as valuations decline whilst taking into consideration developments in the wider economic environment reflecting factors such as the impact of Brexit and other such macroeconomic events.

Based on this work, we are required to report to you if:

- We have anything material to add or draw attention to in relation to the directors' statement in note A1 to the financial statements on the use of the going concern basis of accounting with no material uncertainties that may cast significant doubt over the Group and Company's use of that basis for a period of at least a year from the date of approval of the financial statements; or
- The related statement under the Listing Rules set out on page 133 is materially inconsistent with our audit knowledge.

We have nothing to report in these respects, and we did not identify going concern as a key audit matter.

5 We have nothing to report on the other information in the Annual Report

The directors are responsible for the other information presented in the Annual Report together with the financial statements. Our opinion on the financial statements does not cover the other information and, accordingly, we do not express an audit opinion or, except as explicitly stated below, any form of assurance conclusion thereon.

Our responsibility is to read the other information and, in doing so, consider whether, based on our financial statements audit work, the information therein is materially misstated or inconsistent with the financial statements or our audit knowledge. Based solely on that work we have not identified material misstatements in the other information.

Strategic report and directors' report

Based solely on our work on the other information:

- we have not identified material misstatements in the strategic report and the directors' report;
- in our opinion the information given in those reports for the financial year is consistent with the financial statements; and
- in our opinion those reports have been prepared in accordance with the Companies Act 2006.

Directors' remuneration report

In our opinion the part of the Directors' Remuneration Report to be audited has been properly prepared in accordance with the Companies Act 2006.

Disclosures of emerging and principal risks and longer-term viability

Based on the knowledge we acquired during our financial statements audit, we have nothing material to add or draw attention to in relation to:

- The directors' confirmation within the viability statement on page 70, that they have carried out a robust assessment of the emerging and principal risks facing the Group, including those that would threaten its business model, future performance, solvency and liquidity;
- The principal risks disclosures on pages 51 to 71 describing these risks and explaining how they are being managed and mitigated; and
- The directors' explanation in the viability statement of how they have assessed the prospects of the Group, over what period they have done so and why they considered that period to be appropriate, and their statement as to whether they have a reasonable expectation that the Group will be able to continue in operation and meet its liabilities as they fall due over the period of their assessment, including any related disclosures drawing attention to any necessary qualifications or assumptions.

Under the Listing Rules we are required to review the viability statement. We have nothing to report in this respect.

Our work is limited to assessing these matters in the context of only the knowledge acquired during our financial statements audit. As we cannot predict all future events or conditions and as subsequent events may result in outcomes that are inconsistent with judgments that were reasonable at the time they were made, the absence of anything to report on these statements is not a guarantee as to the Group's and Company's longer-term viability.

Corporate governance disclosures

We are required to report to you if:

- we have identified material inconsistencies between the knowledge we acquired during our financial statements audit and the directors' statement that they consider that the annual report and financial statements taken as a whole is fair, balanced and understandable and provides the information necessary for shareholders to assess the Group's position and performance, business model and strategy; or
- the section of the annual report describing the work of the Audit Committee does not appropriately address matters communicated by us to the Audit Committee.

We are required to report to you if the Corporate Governance Statement does not properly disclose a departure from the provisions of the UK Corporate Governance Code specified by the Listing Rules for our review.

We have nothing to report in these respects.

6 We have nothing to report on the other matters on which we are required to report by exception

Under the Companies Act 2006 we are required to report to you if, in our opinion:

- Adequate accounting records have not been kept by the parent company, or returns adequate for our audit have not been received from branches not visited by us; or
- The parent company financial statements and the part of the Directors' Remuneration Report to be audited are not in agreement with the accounting records and returns; or
- Certain disclosures of directors' remuneration specified by law are not made; or
- We have not received all the information and explanations we require for our audit.

We have nothing to report in these respects.

7 Respective responsibilities Directors' responsibilities

As explained more fully in their statement set out on page 319, the directors are responsible for the preparation of the financial statements including being satisfied that they give a true and fair view. They are also responsible for: such internal control as they determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error; assessing the Group and parent company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern; and using the going concern basis of accounting unless they either intend to liquidate the Group or the parent company or to cease operations, or have no realistic alternative but to do so.

Auditor's responsibilities

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud, or other irregularities, (see below), or error, and to issue our opinion in an auditor's report. Reasonable assurance is a high level of assurance, but does not guarantee that an audit conducted in accordance with ISAs (UK) will always detect a material misstatement when it exists. Misstatements can arise from fraud, other irregularities or error and are considered material if, individually or in

aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of the financial statements.

A fuller description of our responsibilities is provided on the FRC's website at www.frc.org.uk/auditorsresponsibilities.

Irregularities – ability to detect

We identified areas of laws and regulations that could reasonably be expected to have a material effect on the financial statements from our general commercial and sector experience and through discussion with the directors and other management (as required by auditing standards), and from inspection of the Group's regulatory and legal correspondence and discussed with the directors and other management the policies and procedures regarding compliance with laws and regulations. We communicated identified laws and regulations throughout our team and remained alert to any indications of non-compliance throughout the audit. This included communication from the Group to component audit teams of relevant laws and regulations identified at group level.

The potential effect of these laws and regulations on the financial statements varies considerably. Firstly, the Group is subject to laws and regulations that directly affect the financial statements including financial reporting legislation (including related companies legislation), distributable profits legislation and taxation legislation and we assessed the extent of compliance with these laws and regulations as part of our procedures on the related financial statement items.

Secondly, the Group is subject to many other laws and regulations where the consequences of non-compliance could have a material effect on amounts or disclosures in the financial statements, for instance through the imposition of fines or litigation or the loss of the Group's licence to operate. We identified the area of regulatory capital as that most likely to have such an effect recognising the financial and regulated nature of the Group's activities. Auditing standards limit the required audit procedures to identify non-compliance with these laws and regulations to enquiry of the directors and other management and inspection of regulatory and legal correspondence, if any. These limited procedures did not identify actual or suspected non-compliance.

Owing to the inherent limitations of an audit, there is an unavoidable risk that we may not have detected some material misstatements in the financial statements, even though we have properly planned and performed our audit in accordance with auditing standards. For example, the further removed non-compliance with laws and regulations (irregularities) is from the events and transactions reflected in the financial statements, the less likely the inherently limited procedures required by auditing standards would identify it. In addition, as with any audit, there remained a higher risk of non-detection of irregularities, as these may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal controls. We are not responsible for preventing non-compliance and cannot be expected to detect non-compliance with all laws and regulations.

8 The purpose of our audit work and to whom we owe our responsibilities

This report is made solely to the Company's members, as a body, in accordance with Chapter 3 of Part 16 of the Companies Act 2006. Our audit work has been undertaken so that we might state to the Company's members those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the Company and the Company's members, as a body, for our audit work, for this report, or for the opinions we have formed.

Description of EEV basis reporting

In broad terms, IFRS profit for long-term business reflects the aggregate of results on a traditional accounting basis. By contrast, EEV is a way of reporting the value of the life insurance business.

The EEV basis results have been prepared in accordance with the EEV Principles issued by the European Insurance CFO Forum in 2016. The EEV Principles provide consistent definitions, a framework for setting actuarial assumptions and an approach to the underlying methodology and disclosures. All results are stated net of tax and converted using actual exchange rates (AER) unless otherwise stated. AER are actual historical exchange rates for the specific accounting period.

* The 2018 comparative results have been re-presented from those previously published to reflect the change in the Group's presentation currency from pounds sterling to US dollars and the reclassification of the Group's UK and Europe operations as discontinued operations in 2019 (see note 1).

Notes

- (i) Intra-group dividends represent dividends that have been declared in the year. Dividends payable by the discontinued UK and Europe operations (M&G plc) to Prudential plc includes a \$3,841 million pre-demerger dividend, cash dividends paid in the period of \$684 million and restructuring impacts related to the demerger. Investment in operations reflects movements in share capital. The amounts included for these items in the analysis of movement in free surplus (note 11) for Asia are as per the holding company cash flow at transaction rates. The difference primarily relates to intra-group loans, foreign exchange and other non-cash items.
- (ii) Other movements include reserve movements in respect of the shareholders' share of actuarial gains and losses on defined benefit pension schemes that were transferred to M&G plc at 30 June 2019, share capital subscribed, share-based payments, treasury shares and intra-group transfers between operations that have no overall effect on the Group's shareholders' equity.
- (iii) Based on the number of issued shares at the end of 2019 of 2,601 million shares (end of 2018/beginning of 2019: 2,593 million shares, beginning of 2018: 2,587 million shares).
- (iv) On 21 October 2019, the Group completed the demerger of its UK and Europe operations (M&G plc), resulting in two separately listed companies. The demerger dividend in specie of M&G plc has been recorded at the fair value of M&G plc at the date of the demerger. The difference between the fair value and its carrying value, together with profit earned up to the date of the demerger have been recorded as loss for the year from the discontinued UK and Europe operations.
- (v) Representing goodwill attributable to shareholders.

Summary statement of financial position

| | 31 Dec 2019 \$m | 31 Dec 2018 \$m |
|---|--------------------|--------------------|
| Assets less liabilities before deduction of insurance funds | 396,241 | 549,264 |
| Less insurance funds:* | | |
| Policyholder liabilities (net of reinsurers' share) and unallocated surplus of with-profits funds | (376,572) | (527,273) |
| Shareholders' accrued interest in the long-term business | 35,234 | 41,434 |
| | (341,338) | (485,839) |
| Less non-controlling interests | (192) | (23) |
| Total net assets attributable to equity holders of the Company | 54,711 | 63,402 |
| Share capital | 172 | 166 |
| Share premium | 2,625 | 2,502 |
| IFRS basis shareholders' reserves | 16,680 | 19,300 |
| IFRS basis shareholders' equity | 19,477 | 21,968 |
| Shareholders' accrued interest in the long-term business | 35,234 | 41,434 |
| EEV basis shareholders' equity | 54,711 | 63,402 |
| Representing | | |
| Continuing operations | 54,711 | 46,101 |
| Discontinued UK and Europe operations | – | 17,301 |
| EEV basis shareholders' equity | 54,711 | 63,402 |

* Including liabilities in respect of insurance products classified as investment contracts under IFRS 4.

Notes on the EEV basis results

1 Basis of preparation

The EEV basis results have been prepared in accordance with the EEV Principles issued by the European Insurance CFO Forum in 2016. The EEV Principles provide consistent definitions, a framework for setting actuarial assumptions and an approach to the underlying methodology and disclosures. Where appropriate, the EEV basis results include the effects of adoption of EU-endorsed IFRS. The Directors are responsible for the preparation of the supplementary information in accordance with the EEV Principles.

The Group completed the demerger of its UK and Europe operations, M&G plc, from the Prudential plc Group on 21 October 2019. In line with the treatment of the results under IFRS, the EEV basis results for the Group's UK and Europe operations have been reclassified as discontinued operations and removed from the Group's key performance indicators (KPIs). In the subsequent notes, comparative amounts have been represented to show continuing operations only in order to present the results on a comparable basis. The Directors have also elected to change the Group's presentation currency from pounds sterling to US dollars. The 2018 comparative results have been accordingly re-presented from those previously published for these changes (see note A1 of the Group IFRS financial statements for exchange rates used).

Overview

Results prepared under the EEV Principles represent the present value of the shareholders' interest in the post-tax future profits (on a local statutory basis) expected to arise from the current book of long-term business, after sufficient allowance has been made for the aggregate risks in that business. The shareholders' interest in the Group's long-term business comprises:

- The present value of expected future shareholder cash flows from the in-force covered business (value of in-force business), less explicit allowance for the cost of locked-in required capital and the time value of financial options and guarantees across a range of economic scenarios;
- Locked-in required capital, based on the applicable local statutory regulations, including any amounts considered to be required above the local statutory minimum requirements to satisfy regulatory constraints (the application of this principle to each business unit is set out below); and
- The shareholders' total net worth in excess of required capital (free surplus). Free surplus is defined in note 11.

Required capital

For shareholder-backed business, the following capital requirements apply for long-term business:

- Asia: the level of required capital has been set to an amount at least equal to local statutory notification requirements. For China JV life operations, the level of required capital follows the approach for embedded value reporting issued by the China Association of Actuaries (CAA) reflecting the China Risk Oriented Solvency System (C-ROSS) regime; and
- US: the level of required capital has been set at 250 per cent of the risk-based capital (RBC) required by the National Association of Insurance Commissioners (NAIC) at the Company Action Level (CAL).

Key assumptions

The value of in-force business is determined by projecting post-tax future profits (on a local statutory basis) by product, using best estimate assumptions for operating factors such as persistency, mortality, morbidity and expenses. Explicit allowances are made for the cost of holding required capital under the applicable local statutory regimes and the time value of financial options and guarantees (TVOG). The TVOG is determined by weighting the probability of outcomes across a large number of different economic scenarios, and is less applicable to health and protection business that generally contain more limited financial options or guarantees.

As well as best estimate assumptions for operating factors, the projected cash flows assume a level of future investment return and are discounted using a risk discount rate. Both the risk discount rate and investment return are updated at each valuation date in line with changes in the risk-free rates. During 2019, this has had an overall negative effect on new business and in-force profitability. Different products will be sensitive to different assumptions, for example, spread-based products or products with guarantees are likely to benefit from higher assumed investment returns.

Risk discount rates are set equal to the risk-free rate at the valuation date plus a product-specific allowance for market and non-market risks, excluding risks explicitly captured elsewhere such as via the TVOG. Products such as participating and unit-linked business will have typically a higher allowance for market risk as compared to health and protection products due to a higher proportion of equity-type assets within the investment portfolio. Other product design and business features also affect the risks attached to the emergence of shareholder cash flows, for example, the construct of with-profits funds in some business units can reduce the sensitivity of both policyholder and shareholder cash flows for participating products. Risk discount rates in any one business unit will reflect a blend of the risks attaching to the products written in that business.

The value of future new business is excluded from the embedded value.

A description of the EEV methodology and accounting presentation is provided in note 14, including an explanation of the delineation of profit between operating profit based on longer-term investment returns and non-operating items. Further details of best estimate assumptions are provided in note 15.

2 Results analysis by business area

The 2018 comparative results are shown below on both actual exchange rates (AER) and constant exchange rates (CER) bases. The 2018 CER comparative results are translated at 2019 average exchange rates for US dollars following the change in the Group's presentation currency.

Annual premium equivalents (APE) from continuing operations^{note 16}

| | Actual exchange rate | | | | | | Constant exchange rate | | | |
|--------------------|---------------------------|---------------------|---------------------------|---------------------|---------------------------|---------------------|---------------------------|---------------------|---------------------------|---------------------|
| | 2019 \$m | | 2018 \$m | | Change % | | 2018 \$m | | Change % | |
| | Annual premium equivalent | New business profit | Annual premium equivalent | New business profit | Annual premium equivalent | New business profit | Annual premium equivalent | New business profit | Annual premium equivalent | New business profit |

3 Analysis of new business contribution

| | 2019 | | | | |
|---------------------------|--|--|--|---------------------|-------------|
| | Annual premium equivalents (APE) \$m note 16 | Present value of new business premiums (PVNBP) \$m note 16 | New business contribution \$m note (i) | New business margin | |
| | | | | APE % | PVNBP % |
| Asia ^{note (ii)} | 5,161 | 29,244 | 3,522 | 68% | 12.0% |
| US | 2,223 | 22,231 | 883 | 40% | 4.0% |
| Group total | 7,384 | 51,475 | 4,405 | 60% | 8.6% |

| | 2018 | | | | |
|---------------------------|--|--|--|---------------------|-------------|
| | Annual premium equivalents (APE) \$m note 16 | Present value of new business premiums (PVNBP) \$m note 16 | New business contribution \$m note (i) | New business margin | |
| | | | | APE % | PVNBP % |
| Asia ^{note (ii)} | 4,999 | 27,711 | 3,477 | 70% | 12.5% |
| US | 2,059 | 20,593 | 1,230 | 60% | 6.0% |
| Group total | 7,058 | 48,304 | 4,707 | 67% | 9.7% |

Notes

(i) The movement in new business contribution from \$4,707 million for 2018 to \$4,405 million for 2019 from continuing operations is analysed as follows:

| | Asia \$m | US \$m | Group total \$m |
|--|-------------|-----------|--------------------|
| 2018 new business contribution | 3,477 | 1,230 | 4,707 |
| Foreign exchange movement | (17) | – | (17) |
| Effect of changes in interest rates and other economic assumptions | (35) | (155) | (190) |
| Impact of US EEV hedge modelling enhancements ^{note 7} | – | (114) | (114) |
| Sales volume, business and product mix and other items | 97 | (78) | 19 |
| 2019 new business contribution | 3,522 | 883 | 4,405 |

(ii) Asia new business contribution is analysed as follows:

| | 2019 \$m | 2018 \$m | |
|------------|----------|----------|-------|
| | | AER | CER |
| China JV | 262 | 199 | 190 |
| Hong Kong | 2,042 | 2,309 | 2,310 |
| Indonesia | 227 | 163 | 163 |
| Taiwan | 75 | 61 | 56 |
| Other | 916 | 745 | 741 |
| Total Asia | 3,522 | 3,477 | 3,460 |

4 Operating profit from long-term business in force

| | 2019 \$m | | | 2018 \$m | | |
|---|--------------|------------|--------------|--------------|--------------|--------------|
| | Asia | US | Group total | Asia | US | Group total |
| Unwind of discount and other expected returns ^{note (i)} | 1,542 | 728 | 2,270 | 1,626 | 1,176 | 2,802 |
| Effect of changes in operating assumptions ^{note (ii)} | 539 | 1 | 540 | 457 | 154 | 611 |
| Experience variances and other items ^{note (iii)} | 285 | 145 | 430 | 298 | 264 | 562 |
| Total operating profit from long-term business in force | 2,366 | 874 | 3,240 | 2,381 | 1,594 | 3,975 |

Notes

(i) The movement in unwind of discount and other expected returns from \$2,802 million for 2018 to \$2,270 million for 2019 from continuing operations is analysed as follows:

| | Asia \$m | US \$m | Group total \$m |
|--|--------------|------------|--------------------|
| 2018 unwind of discount and other expected returns | 1,626 | 1,176 | 2,802 |
| Foreign exchange movement | (12) | – | (12) |
| Effect of changes in interest rates and other economic assumptions | (234) | (104) | (338) |
| Impact of US EEV hedge modelling enhancements ^{note 7} | – | (210) | (210) |
| Growth in opening value of in-force business and other items | 162 | (134) | 28 |
| 2019 unwind of discount and other expected returns | 1,542 | 728 | 2,270 |

(ii) The 2019 effect of changes in operating assumptions of \$539 million in Asia principally reflects the outcome from the annual review of persistency, claims and expense experience, together with the benefit of medical repricing management actions and the beneficial effect on the effective tax rate for China JV from changes to tax legislation in the first half of 2019.

(iii) In Asia, the 2019 effect of experience variances and other items of \$285 million is driven overall by positive mortality and morbidity experience in a number of local business units, together with positive persistency variance from participating and health and protection products.

In the US, the effect of experience variances and other items is analysed as follows:

| | 2019 \$m | 2018 \$m |
|--|------------|------------|
| Spread experience variance | 38 | 52 |
| Amortisation of interest-related realised gains and losses | 102 | 123 |
| Other items | 5 | 89 |
| Total US experience variances and other items | 145 | 264 |

5 Short-term fluctuations in investment returns

| | 2019 \$m | 2018 \$m |
|---|--------------|----------------|
| Asia | | |
| Hong Kong | 1,526 | (737) |
| Indonesia | (14) | (103) |
| Malaysia | (20) | (109) |
| Singapore | 338 | (311) |
| Taiwan | 147 | (37) |
| Thailand | 319 | (61) |
| Other | 155 | (16) |
| Total Asia^{note (i)} | 2,451 | (1,374) |
| US | | |
| Investment return related experience on fixed income securities ^{note (ii)} | (243) | 80 |
| Investment return related impact due to changed expectation of profits on in-force variable annuity business in future periods based on current period separate account return, net of related hedging activity and other items ^{note (iii)} | 1,119 | (2,057) |
| Total US | 876 | (1,977) |
| Other operations | (73) | 16 |
| Group total | 3,254 | (3,335) |

5 Short-term fluctuations in investment returns continued

Notes

- (i) For 2019, the credit of \$2,451 million mainly represents the increase in bond and equity values in Hong Kong and higher than expected investment returns in Singapore, Thailand and Taiwan. The small losses in Indonesia and Malaysia represent bond gains being more than offset by lower than expected equity returns.
- (ii) The net result relating to fixed income securities reflects a number of offsetting items as follows:
 - The impact on portfolio yields of changes in the asset portfolio in the year;
 - Credit experience versus the longer-term assumption (which in 2019 was positive); and
 - The difference between actual realised gains and losses and the amortisation of interest-related realised gains and losses that is recorded within operating profit.
- (iii) This item reflects the net impact of:
 - Changes in projected future fees and future benefit costs arising from the difference between the actual growth in separate account asset values of 24.1 per cent and that assumed of 4.8 per cent (geometric) (2018: actual growth of negative 5.4 per cent compared to assumed growth of positive 5.3 per cent (geometric)); and
 - Related hedging activity arising from realised and unrealised gains and losses on equity and interest rate derivatives compared to the updated expected long-term allowance for hedging costs recorded in operating profit, and other items.

6 Effect of changes in economic assumptions

| | 2019 \$m | 2018 \$m |
|--|----------------|------------|
| Asia | | |
| Hong Kong | (853) | 220 |
| Indonesia | 141 | (126) |
| Malaysia | 127 | (25) |
| Singapore | 18 | 93 |
| Taiwan | (142) | (19) |
| Thailand | (220) | 37 |
| Other | 262 | (27) |
| Total Asia ^{note (i)} | (667) | 153 |
| US | | |
| Variable annuity business ^{note (ii)} | (1,556) | 487 |
| Fixed annuity and other general account business ^{note (iii)} | 355 | (224) |
| Total US | (1,201) | 263 |
| Group total | (1,868) | 416 |

Notes

- (i) In 2019, the negative effect of \$(667) million largely arises from movements in long-term interest rates, resulting in lower assumed fund earned rates in Hong Kong, Thailand and Taiwan, partially offset by the positive effect of lower risk discount rates in Indonesia and Malaysia in valuing future profits for health and protection business and the effect of changes to the basis of setting economic assumptions as described in note 14(i)(h) and note 15(i).
- (ii) In 2019, the charge of \$(1,556) million mainly reflects the effect of a decrease in the assumed separate account return, following the 80 basis points decrease in the US 10-year treasury yield over the year, partially offset by the increase in US equity risk premium as described in note 15(i), resulting in lower projected fee income and an increase in projected benefit costs for variable annuity business.
- (iii) For fixed annuity and other general account business, the impact of \$355 million reflects the increase in the present value of future projected spread income from the combined decrease in interest rates and credit spreads in the year.

7 Impact of NAIC reform, hedge modelling and other related changes in the US

| | 2019 \$m |
|--|----------------|
| Impact of NAIC reform adopted at 31 December 2019 ^{note (i)} | 37 |
| Impact of hedge modelling changes and other NAIC reform related changes ^{note (ii)} | (3,494) |
| Total EEV impact of NAIC reform, hedge modelling and other related changes in the US | (3,457) |

Notes

- (i) The National Association of Insurance Commissioners (NAIC) has implemented changes to the US statutory reserve and capital framework for variable annuities, effective from 1 January 2020. Jackson has chosen to early adopt the changes at 31 December 2019 for US statutory reporting and the Group has updated EEV accordingly. The impact on Group EEV is a \$37 million benefit, with the increase in the cost of capital from higher capital requirements more than offset by the timing benefit from releasing policyholder liabilities earlier than previously anticipated. The impact on the various components of EEV as at 31 December 2019 is shown below. As discussed in note 14(i)(e), the below is based on a capital requirement of 250 per cent of the risk-based capital company action level and so the impact on free surplus is not equal to the effect on Jackson's US statutory position.

| | Free surplus \$m | Required capital \$m | Total net worth \$m | Value of in-force business \$m | Total embedded value \$m |
|---|---------------------|-------------------------|------------------------|-----------------------------------|-----------------------------|
| Impact of NAIC reform adopted at 31 December 2019 | (64) | 343 | 279 | (242) | 37 |

Given that the NAIC reform was adopted at 31 December 2019, with the exception of the amounts shown above there are no other impacts from this change recorded in the 2019 EEV consolidated income statement or in the analysis of movement in free surplus. If the changes had been adopted with effect from 1 January 2019, the Group's 2019 EEV results would not be expected to be materially different.

- (ii) Following the implementation of the NAIC's changes to the US statutory reserve and capital framework, enhancements were made to the model used to allow for hedging within US statutory reporting. As a consequence, the Group has chosen to utilise the enhanced model within EEV to update its allowance for the long-term cost of hedging under EEV economic assumptions. In common with established practice for such changes, the EEV income statement has been prepared on the basis that this change had been effected at the start of the year, at a cost of \$(3,233) million, included in non-operating profit.

The initial impact on EEV is shown as a reduction in the value of in-force business as at 1 January 2019, and so the unwind of those cash flows over the year reduces the expected transfer to net worth and hence operating free surplus generation by \$(903) million. This leads to an equal and offsetting benefit in short-term fluctuations as the excess of the actual cost of hedging in 2019 over the expected cost falls accordingly. There is no impact on total free surplus generation for 2019. See note 11 for the US free surplus results.

There were no changes to Jackson's hedging philosophy during 2019, which continues to focus on the underlying economics of the products whilst managing the volatility in the statutory position. The revised allowance for the long-term cost of hedging is expected to give a more refined indication of the expected long-term cost of the dynamic hedging programme under EEV economic assumptions, albeit it is not intended to reflect the exact derivatives held at a given point in time. In common with other long-term assumptions, the allowance for the expected cost of hedging in EEV will be kept under review, particularly in light of future experience under the new variable annuity statutory capital regime.

In addition to the enhancement to the cost of hedging described above, a number of other changes have been made to EEV reporting following the NAIC reform, coupled with the objective of bringing the EEV free surplus more in line with the US statutory basis of reporting. The total impact of these changes as recorded in EEV non-operating profit was \$(261) million. A reconciliation of EEV free surplus to surplus under the Group's LCSM capital measure at 31 December 2019 by segment is provided in note I(i) in the additional financial information.

8 Net core structural borrowings of shareholder-financed businesses

| | 31 Dec 2019 \$m | | | 31 Dec 2018 \$m | | |
|---|-----------------|---------------------------------|---------------------------|-----------------|---------------------------------|---------------------------|
| | IFRS basis | Mark-to-market value adjustment | EEV basis at market value | IFRS basis | Mark-to-market value adjustment | EEV basis at market value |
| Holding company cash and short-term investments ^{note (i)} | (2,207) | – | (2,207) | (4,121) | – | (4,121) |
| Central borrowings: | | | | | | |
| Subordinated debt held post demerger of M&G plc ^{note (ii)} | 4,304 | 327 | 4,631 | 4,785 | (138) | 4,647 |
| Senior debt | 690 | 221 | 911 | 658 | 222 | 880 |
| Bank loan | 350 | – | 350 | 350 | – | 35 |
| Central funds before amounts substituted to M&G plc | 5,344 | 548 | 5,892 | 5,793 | 84 | 5,877 |
| Subordinated debt substituted to M&G plc in 2019 ^{note (iii)} | – | – | – | 3,718 | 82 | 3,800 |
| Total central borrowings | 5,344 | 548 | 5,892 | 9,511 | 166 | 9,677 |
| Total net borrowings for central operations | 3,137 | 548 | 3,685 | 5,390 | 166 | 5,556 |
| Jackson Surplus Notes | 250 | 85 | 335 | 250 | 67 | 317 |
| Net core structural borrowings of shareholder-financed businesses ^{note (iv)} | 3,387 | 633 | 4,020 | 5,640 | 233 | 5,873 |

Notes

- (i) Holding company includes central finance subsidiaries.
(ii) In May 2019, the Company redeemed its £400 million 11.375 per cent subordinated notes.
(iii) In October 2019, Prudential plc transferred subordinated debt to M&G plc as part of the demerger. In addition to the subordinated debt held at 31 December 2018 as shown in the table above, the debt transferred included the further £300 million 3.875 per cent subordinated debt raised in July 2019.
(iv) The movement in the value of core structural borrowings includes foreign exchange effects for pounds sterling denominated debts, which are included in 'Exchange movements on foreign operations'. The movement in the mark-to-market value adjustment can be analysed as follows:

| | 2019 \$m | 2018 \$m |
|--|------------|------------|
| Mark-to-market value adjustment at beginning of year | 233 | 1,005 |
| Mark-to-market value adjustment on subordinated debt substituted to M&G plc at fair value at beginning of year | (82) | – |
| Charge (credit) in respect of mark-to-market movements included in the income statement* | 466 | (733) |
| Effect of foreign exchange movements for pounds sterling denominated debts | 16 | (39) |
| Mark-to-market value adjustment at end of year | 633 | 233 |

* Relates to continuing debt only.

9 Gain (loss) attaching to corporate transactions

| | 2019 \$m | 2018 \$m |
|---|--------------|--------------|
| Gain on disposals ^{note (i)} | 178 | – |
| Other corporate transactions ^{note (ii)} | (385) | (100) |
| Total | (207) | (100) |

Notes

- (i) In 2019, the \$178 million gain on disposals mainly relates to profits arising from a reduction in the Group's stake (from 26 per cent to 22 per cent) in its associate in India, ICICI Prudential Life Insurance Company, and the disposal of Prudential Vietnam Finance Company Limited, a wholly owned subsidiary that provides consumer finance.
- (ii) In 2019, other corporate transactions undertaken by continuing operations resulted in an EEV loss of \$(385) million (2018: \$(100) million). This primarily reflects costs related to the demerger of M&G plc from Prudential plc.

10 Analysis of movement in total net worth and value of in-force for long-term business

| | 2019 \$m | | | | |
|--|--------------|------------------|-----------------|----------------------------|----------------------|
| | Free surplus | Required capital | Total net worth | Value of in-force business | Total embedded value |
| Group | | | | | |
| Shareholders' equity at beginning of year | 9,587 | 12,542 | 22,129 | 42,045 | 64,174 |
| Demerger of UK and Europe operations | (4,676) | (6,513) | (11,189) | (3,342) | (14,531) |
| Shareholders' equity at beginning of year from continuing operations ^{note} | 4,911 | 6,029 | 10,940 | 38,703 | 49,643 |
| New business contribution ^{note 3} | (1,158) | 899 | (259) | 4,664 | 4,405 |
| Existing business – transfer to net worth | 3,081 | (613) | 2,468 | (2,468) | – |

| Non-operating profit (loss) | (1,763) | 140 | (1,623) | (2,179) | (3,802) |
| Profit (loss) for the year | (668) | 584 | (84) | (1,966) | (2,050) |
| Intra-group dividends and investment in operations | (525) | – | (525) | – | (525) |
| Other movements | 255 | – | 255 | (2) | 253 |
| Shareholders' equity at end of year | 1,771 | 3,709 | 5,480 | 10,856 | 16,336 |

Note

The net value of in-force business for continuing operations comprises the value of future margins from current in-force business less the cost of holding required capital for long-term business as shown below:

| | 31 Dec 2019 \$m | | | 31 Dec 2018 \$m | | |
|---|-----------------|--------|-------------|-----------------|---------|-------------|
| | Asia | US | Group total | Asia | US | Group total |
| Value of in-force business before deduction of cost of capital and time value of options and guarantees | 32,396 | 11,417 | 43,813 | 27,849 | 15,043 | 42,892 |
| Cost of capital | (866) | (370) | (1,236) | (721) | (377) | (1,098) |
| Time value of options and guarantees* | (493) | (191) | (684) | (1,249) | (1,842) | (3,091) |
| Net value of in-force business | 31,037 | 10,856 | 41,893 | 25,879 | 12,824 | 38,703 |
| Total net worth | 6,806 | 5,480 | 12,286 | 5,106 | 5,834 | 10,940 |
| Total embedded value | 37,843 | 16,336 | 54,179 | 30,985 | 18,658 | 49,643 |

* The time value of options and guarantees (TVOG) arises from the variability of economic outcomes in the future and is, where appropriate, calculated as the difference between an average outcome across a range of economic scenarios, calibrated around a central scenario, and the outcome from one central economic scenario, as described in note 14(i)(d). The TVOG and the outcome from the central economic scenario are linked; as the central economic scenario is updated for market conditions and the outcome reflects more or less of the guaranteed benefit payouts and associated product charges, there will be consequential changes to the TVOG.

11 Analysis of movement in free surplus

For EEV covered business, free surplus is the excess of the regulatory basis net assets for EEV reporting purposes (total net worth) over the capital required to support the covered business. Where appropriate, adjustments are made to total net worth so that backing assets are included at fair value rather than at cost to comply with the EEV Principles. In the Group's Asia and US operations, assets deemed to be inadmissible on a local regulatory basis are included in net worth where considered recognisable on an EEV basis, with the exception of deferred tax assets in the US that are inadmissible under the local regulatory basis, which have been included in the value of in-force business (VIF) within the Group's EEV results. Free surplus for asset management and other operations (including assets and liabilities of the Group's central operations, the Group's treasury function and Africa operations) is taken to be IFRS basis post-tax earnings and shareholders' equity, net of goodwill attributable to shareholders, with subordinated debt recorded as free surplus to the extent that it is classified as available capital under the Group's capital regime. A reconciliation of EEV free surplus to the Group's Local Capital Summation Method (LCSM) surplus over Group minimum capital requirements is set out in note I(i) in the additional financial information.

Notes

(a) Operating free surplus generated by Asia insurance and asset management operations before restructuring costs can be analysed as follows:

| | 2019 \$m | | 2018 \$m | | % change | |
|--|--------------|--|--------------|--------------|------------|------------|
| | | | AER | CER | AER | CER |
| Operating free surplus generated from in-force life business | 2,141 | | 2,003 | 2,004 | 7% | 7% |
| Investment in new business ^{note (c)} | (619) | | (652) | (646) | 5% | 4% |
| Long-term business | 1,522 | | 1,351 | 1,358 | 13% | 12% |
| Asset management | 250 | | 212 | 209 | 18% | 20% |
| Total Asia | 1,772 | | 1,563 | 1,567 | 13% | 13% |

(b) Operating free surplus generated by US insurance and asset management operations before restructuring costs can be analysed as follows:

| | 2019 \$m | | 2018 \$m | | % change | |
|--|--------------|--|--------------|--|--------------|--|
| | | | | | | |
| Operating free surplus generated from in-force life business before EEV hedge modelling enhancements ^{note (d)} | 2,542 | | 2,191 | | 16% | |
| Impact of EEV hedge modelling enhancements ^{note 7} | (903) | | – | | – | |
| Operating free surplus generated from in-force life business | 1,639 | | 2,191 | | (25)% | |
| Investment in new business ^{note (c)} | (539) | | (300) | | (80)% | |
| Long-term business | 1,100 | | 1,891 | | (42)% | |
| Asset management | 25 | | 4 | | 525% | |
| Total US | 1,125 | | 1,895 | | (41)% | |

(c) Free surplus invested in new business primarily represents acquisition costs and amounts set aside for required capital.

(d) The increase in the US in-force free surplus generation before the EEV hedge modelling enhancements described in note 7 includes a \$355 million benefit from the release of incremental reserves following the integration of the recently acquired John Hancock business.

(e) Other operating free surplus generated for "other business" includes \$(145) million (2018: \$(103) million) of interest costs (net of tax) on debt that was substituted to M&G plc in October 2019.

(f) Non-operating items include short-term fluctuations in investment returns, the effect of changes in economic assumptions for long-term business, the impact of NAIC reform, hedge modelling and other related changes in the US (as described in note 7) and the effect of corporate transactions (as described in note 9). In particular, for other business it includes \$(383) million for demerger costs (post-tax). In addition, for 2018 this included the impact in the US of changes to RBC factors following the US tax reform, which were formally approved by the NAIC in June 2018.

(g) Free surplus generated from the discontinued UK and Europe operations in 2019 includes profit for the period of ownership up to the demerger in October 2019 and fair value adjustment at the date of the demerger.

(h) Net cash flows to parent company for Asia operations reflect the flows as included in the holding company cash flow.

11 Analysis of movement in free surplus continued

(i) Foreign exchange movements, timing differences and other items represent:

| | 2019 \$m | | | | | Group total |
|--|-----------------------|------|--------------------------------------|-------|---------------------------------------|-------------|
| | Continuing operations | | | | Discontinued UK and Europe operations | |
| | Asia | US | Total insurance and asset management | Other | | |
| Foreign exchange movements | 99 | – | 99 | 91 | 77 | 267 |
| Mark-to-market value movements on Jackson assets backing surplus and required capital | – | 206 | 206 | – | – | 206 |
| Other items (including intra-group loans and other intra-group transfers between operations and other non-cash items)* | (456) | (21) | (477) | 719 | (503) | (261) |
| | (357) | 185 | (172) | 810 | (426) | 212 |

* The Group total for other items in 2019 included the effect of the redemption of \$0.5 billion of subordinated debt.

| | 2018 \$m | | | | | Group total |
|--|-----------------------|-------|--------------------------------------|-------|---------------------------------------|-------------|
| | Continuing operations | | | | Discontinued UK and Europe operations | |
| | Asia | US | Total insurance and asset management | Other | | |
| Foreign exchange movements | (67) | 3 | (64) | (170) | (377) | (611) |
| Mark-to-market value movements on Jackson assets backing surplus and required capital | – | (127) | (127) | – | – | (127) |
| Other items (including intra-group loans and other intra-group transfers between operations and other non-cash items)* | (780) | (20) | (800) | 2,017 | 319 | 1,536 |
| | (847) | (144) | (991) | 1,847 | (58) | 798 |

* The Group total for other items in 2018 included the effect of the net issuance of \$1.5 billion of subordinated debt.

(j) Free surplus from continuing operations at 31 December 2019 represents:

| | 2019 \$m | | | | Group total |
|----------------------------|----------|-------|--------------------------------------|-------|-------------|
| | Asia | US | Total insurance and asset management | Other | |
| Long-term business | 3,624 | 1,771 | 5,395 | – | 5,395 |
| Asset management and other | 596 | 6 | 602 | 3,739 | 4,341 |
| Total | 4,220 | 1,777 | 5,997 | 3,739 | 9,736 |

12 Expected transfer of value of in-force business and required capital to free surplus

The discounted value of in-force business and required capital for the Group's continuing long-term business operations can be reconciled to the 2019 and 2018 total emergence of free surplus as follows:

| | 31 Dec 2019 \$m | 31 Dec 2018 \$m |
|---|--------------------|--------------------|
| Required capital ^{note 10} | 6,891 | 6,029 |
| Value of in-force business (VIF) ^{note 10} | 41,893 | 38,703 |
| Other items* | 205 | 1,915 |
| Total continuing long-term business operations | 48,989 | 46,647 |

* 'Other items' represent the impact of the time value of options and guarantees and amounts incorporated into VIF where there is no definitive timeframe for when the payments will be made or receipts received. These items are excluded from the expected free surplus generation profile below.

Cash flows are projected on a deterministic basis and are discounted at the appropriate risk discount rate. The modelled cash flows use the same methodology underpinning the Group's EEV reporting and so are subject to the same assumptions and sensitivities.

The table below shows how the VIF generated by the in-force business and the associated required capital for the Group's continuing long-term business operations is modelled as emerging into free surplus over future years.

| | 31 Dec 2019 \$m | | | | | | |
|-------------|---------------------------|--|------------|-------------|-------------|-------------|-----------|
| | 2019 total as shown above | Expected period of conversion of future post-tax distributable earnings and required capital flows to free surplus | | | | | |
| | | 1-5 years | 6-10 years | 11-15 years | 16-20 years | 21-40 years | 40+ years |
| Asia | 34,295 | 8,561 | 6,335 | 4,394 | 3,398 | 7,715 | 3,892 |
| US | 14,694 | 6,408 | 4,735 | 2,424 | 825 | 302 | – |
| Group total | 48,989 | 14,969 | 11,070 | 6,818 | 4,223 | 8,017 | 3,892 |
| | 100% | 30% | 23% | 14% | 9% | 16% | 8% |

| | 31 Dec 2018 \$m | | | | | | |
|-------------|---------------------------|---|------------|-------------|-------------|-------------|-----------|
| | 2018 total as shown above | Expected period of conversion of future post-tax distributable earnings and required capital flows to free surplus from continuing long-term operations | | | | | |
| | | 1-5 years | 6-10 years | 11-15 years | 16-20 years | 21-40 years | 40+ years |
| Asia | 29,715 | 7,993 | 5,330 | 3,518 | 2,615 | 6,876 | 3,383 |
| US | 16,932 | 8,824 | 5,214 | 2,256 | 481 | 157 | – |
| Group total | 46,647 | 16,817 | 10,544 | 5,774 | 3,096 | 7,033 | 3,383 |
| | 100% | 36% | 23% | 12% | 7% | 15% | 7% |

13 Sensitivity of results to alternative assumptions

(i) Sensitivity analysis – economic assumptions

The tables below show the sensitivity of the embedded value as at 31 December 2019 and 31 December 2018 and the new business contribution for 2019 and 2018 for continuing long-term business to:

- 1 per cent increase in the discount rates;
- 1 per cent increase in interest rates, including consequential changes in assumed investment returns for all asset classes, market values of fixed interest assets and risk discount rates (but excluding changes in the allowance for market risk);
- 0.5 per cent decrease in interest rates, including consequential changes in assumed investment returns for all asset classes, market values of fixed interest assets and risk discount rates (but excluding changes in the allowance for market risk);
- 1 per cent rise in equity and property yields;
- 10 per cent fall in market value of equity and property assets (embedded value only); and
- The Group minimum capital requirements under the LCSM in contrast to EEV basis required capital (embedded value only).

The sensitivities shown below are for the impact of instantaneous (and permanent) changes on the embedded value of long-term business operations and include the combined effect on the value of in-force business and net assets (including derivatives) held at the valuation dates indicated. The results only allow for limited management actions such as changes to future policyholder bonuses where applicable. If such economic conditions persisted, the financial impacts may differ to the instantaneous impacts shown below. In this case management could also take additional actions to help mitigate the impact of these stresses. No change in the assets held at the valuation date is assumed when calculating sensitivities. If the changes in assumptions shown in the sensitivities were to occur, the effect shown below would be recorded within two components of the profit analysis for the following year, namely the effect of changes in economic assumptions and short-term fluctuations in investment returns. In addition, for changes in interest rates, the effect shown below for the US (Jackson) would also be recorded within mark-to-market value movements on Jackson assets backing surplus and required capital, which are taken directly to shareholders' equity. In addition to the sensitivity effects shown below, the other components of the profit for the following year would be calculated by reference to the altered assumptions, for example new business contribution and unwind of discount and other expected returns, together with the effect of other changes such as altered corporate bond spreads.

13 Sensitivity of results to alternative assumptions continued

(i) Sensitivity analysis – economic assumptions continued

New business contribution from continuing long-term business

| | 2019 \$m | | | 2018 \$m | | |

| Interest rates and consequential effects – 0.5% decrease | (28) | (686) | (714) | 466 | (348) | 118 |
| Equity/property yields – 1% rise | 1,758 | 556 | 2,314 | 1,326 | 1,288 | 2,614 |
| Equity/property market values – 10% fall | (810) | (1,205) | (2,015) | (602) | (634) | (1,236) |
| Group minimum capital requirements | 175 | 221 | 396 | 140 | 276 | 416 |

The directional movements in the sensitivities from 31 December 2018 to 31 December 2019 reflect the generally lower government bond yields and higher equity markets at 31 December 2019, and the actual hedging portfolio in place at both valuation dates, which varies due to the nature of Jackson's dynamic hedging programme.

(ii) Sensitivity analysis – non-economic assumptions

The tables below show the sensitivity of the embedded value as at 31 December 2019 and 31 December 2018 and the new business contribution for 2019 and 2018 for continuing long-term business operations to:

- 10 per cent proportionate decrease in maintenance expenses (for example, a 10 per cent sensitivity on a base assumption of \$10 per annum would represent an expense assumption of \$9 per annum);
- 10 per cent proportionate decrease in lapse rates (for example, a 10 per cent sensitivity on a base assumption of 5 per cent would represent a lapse rate of 4.5 per cent per annum); and
- 5 per cent proportionate decrease in base mortality (ie increased longevity) and morbidity rates.

14 Methodology and accounting presentation

(i) Methodology

(a) Covered business

The EEV basis results for the Group are prepared for 'covered business' as defined by the EEV Principles. Covered business represents the Group's long-term insurance business (including the Group's investments in joint venture and associate insurance operations), for which the value of new and in-force contracts is attributable to shareholders.

The EEV basis results for the Group's covered business are then combined with the post-tax IFRS basis results of the Group's asset management and other operations (including interest costs on core structural borrowings, corporate expenditure for head office functions in London and Hong Kong, the Group's treasury function and Africa operations). Under the EEV Principles, the results for covered business incorporate the projected margins of attaching internal asset management, as described in note (g) below.

The definition of long-term insurance business comprises those contracts falling under the definition for regulatory purposes together with, for US operations, contracts that are in substance the same as guaranteed investment contracts (GICs) but do not fall under the technical definition.

(b) Valuation of in-force and new business

The EEV basis results are prepared incorporating best estimate assumptions about all relevant factors including levels of future investment returns, persistency, mortality, morbidity and expenses, as described in note 15(iii). These assumptions are used to project future cash flows. The present value of the projected future cash flows is then calculated using a discount rate, as shown in note 15(i), which reflects both the time value of money and all other non-diversifiable risks associated with the cash flows that are not otherwise allowed for.

New business

In determining the EEV basis value of new business, premiums are included in projected cash flows on the same basis of distinguishing regular and single premium business as set out in the Group's new business sales reporting.

New business premiums reflect those premiums attaching to the covered business, including premiums for contracts classified as investment contracts under IFRS. New business premiums for regular premium products are shown on an annualised basis.

New business contribution represents profit determined by applying operating and economic assumptions as at the end of the period. New business profitability is a key metric for the Group's management of the development of the business. In addition, new business margins are shown by reference to annual premium equivalents (APE) and the present value of new business premiums (PVNBP). These margins are calculated as the percentage of the value of new business profit to APE and PVNBP. APE is calculated as the aggregate of regular premiums on new business written in the period and one-tenth of single premiums. PVNBP is calculated as the aggregate of single premiums and the present value of expected future premiums from regular premium new business, allowing for lapses and the other assumptions made in determining the EEV new business contribution.

14 Methodology and accounting presentation continued

Valuation movements on investments

With the exception of debt securities held by Jackson, investment gains and losses during the year (to the extent that changes in capital values do not directly match changes in liabilities) are included directly in the profit for the year and shareholders' equity as they arise.

The results for any covered business conceptually reflect the aggregate of the post-tax IFRS basis results and the movements in the additional shareholders' interest recognised on an EEV basis. Therefore, the start point for the calculation of the EEV basis results for Jackson, as for other businesses, reflects the market value movements recognised on an IFRS basis.

In determining the movements in the additional shareholders' interest, for Jackson's debt securities backing liabilities, the aggregate EEV basis results reflect the fact that the value of in-force business incorporates the discounted value of expected future spread earnings. This value is generally not affected by short-term market movements in debt securities that, broadly speaking, are held for the longer term. Consequently, within EEV total net worth, Jackson's debt securities backing liabilities are held on a statutory basis (largely at book value), while those backing surplus and required capital are accounted for at fair value. Consistent with the treatment applied under IFRS, for Jackson's debt securities classified as available-for-sale, movements in unrealised appreciation and depreciation on these securities are accounted for directly in equity rather than in the income statement, as shown in 'Mark-to-market value movements on Jackson assets backing surplus and required capital' in the statement of movement in shareholders' equity.

(c) Cost of capital

A charge is deducted from the embedded value for the cost of locked-in required capital supporting the Group's long-term business. The cost is the difference between the nominal value of the capital held and the discounted value of the projected releases of this capital, allowing for post-tax investment earnings on the capital.

The EEV results are affected by the movement in this cost from year to year, which comprises a charge against new business profit and generally a release in respect of the reduction in capital requirements for business in force as this runs off.

Where required capital is held within a with-profits long-term fund, the value placed on surplus assets within the fund is already adjusted to reflect its expected release over time and so no further adjustment to the shareholder position is necessary.

(d) Financial options and guarantees

Nature of financial options and guarantees in Prudential's long-term business

Asia

Participating products in Asia, principally written in Hong Kong, Singapore and Malaysia, have both guaranteed and non-guaranteed elements. These products provide returns to policyholders through bonuses that are smoothed. There are two types of bonuses: regular and final. Regular bonuses are declared once a year and, once credited, are guaranteed in accordance with the terms of the particular products. Final bonuses are guaranteed only until the next bonus declaration.

There are also various non-participating long-term products with guarantees. The principal guarantees are those for whole-of-life contracts with floor levels of policyholder benefits that accrue at rates set at inception and do not vary subsequently with market conditions.

US (Jackson)

The principal financial options and guarantees in Jackson are associated with the variable annuity and fixed annuity lines of business.

Jackson issues variable annuity contracts for which it contractually guarantees to the contract holder, subject to specific conditions, either: a) a return of no less than total deposits made to the contract, adjusted for any partial withdrawals; b) total deposits made to the contract, adjusted for any partial withdrawals plus a minimum return; or c) the highest contract value on a specified anniversary date, adjusted for any withdrawals following the specified contract anniversary. These guarantees include benefits that are payable upon depletion of funds (Guaranteed Minimum Withdrawal Benefits (GMWB)) or as death benefits (Guaranteed Minimum Death Benefits (GMDB)). These guarantees generally protect the policyholder's contract value in the event of poor equity market performance. Jackson hedges the GMWB and GMDB guarantees through the use of equity options and futures contracts, with an expected long-term future hedging cost allowed for within the EEV value of in-force business to reflect the equity options and futures expected to be held based on the Group's current dynamic hedging programme and consideration of past practice. This allowance was re-estimated in 2019 following the NAIC reform for variable annuity business, as described in note 7. Jackson also historically issued a small amount of income benefits (Guaranteed Minimum Income Benefits (GMIB)), which are now materially fully reinsured.

Fixed annuities provide that at Jackson's discretion it may reset the interest rate credited to policyholders' accounts, subject to a guaranteed minimum return, depending on the particular product, jurisdiction where issued and the date of issue.

Jackson also issues fixed index annuities that enable policyholders to obtain a portion of an equity-linked return while providing a guaranteed minimum return, which is of a similar nature to those for fixed annuities.

Time value

The value of financial options and guarantees comprises the intrinsic value (arising from a deterministic valuation on best estimate assumptions) and the time value (arising from the variability of economic outcomes in the future).

Where appropriate, a full stochastic valuation has been undertaken to determine the time value of financial options and guarantees. The economic assumptions used for the stochastic calculations are consistent with those used for the deterministic calculations. Assumptions specific to the stochastic calculations reflect local market conditions and are based on a combination of actual market data, historic market data and an assessment of long-term economic conditions. Common principles have been adopted across the Group for the stochastic asset models, for example, separate modelling of individual asset classes with an allowance for correlations between various asset classes. Details of the key characteristics of each model are given in note 15(ii).

In deriving the time value of financial options and guarantees, management actions in response to emerging investment and fund solvency conditions have been modelled. Management actions encompass, but are not confined to, investment allocation decisions, levels of regular and final bonuses and credited rates. Bonus rates are projected from current levels and varied in accordance with assumed management actions applying in the emerging investment and fund solvency conditions. In all instances, the modelled actions are in accordance with approved local practice and therefore reflect the options available to management.

The time value of financial options and guarantees reflects how the market value of the assets (including derivatives) held to manage the liability portfolios are expected to vary across the range of economic scenarios considered. For instance, in some economic scenarios the derivative portfolio may project gains in excess of the cost of the underlying guarantees on an EEV basis.

If the calculation of the time value of options and guarantees results in a positive outcome for a particular product (for example for variable annuity business in the US as at 31 December 2019) then the figure is capped at zero, reflecting the strong interaction between the outcome of the central economic scenario and the time value of financial options and guarantees in these circumstances, and the reported value of in-force business before deduction of cost of capital and time value of options and guarantees will reflect the outcome from the full stochastic valuation.

(e) Level of required capital

In adopting the EEV Principles, Prudential has based required capital on the applicable local statutory regulations, including any amounts considered to be required above the local statutory minimum requirements to satisfy regulatory constraints.

For shareholder-backed businesses, the following capital requirements for long-term business apply:

- Asia: the level of required capital has been set to an amount at least equal to local statutory notification requirements. For China JV life operations, the level of required capital follows the approach for embedded value reporting issued by the China Association of Actuaries (CAA) reflecting the C-ROSS regime; and
- US: the level of required capital has been set at 250 per cent of the risk-based capital (RBC) required by the National Association of Insurance Commissioners (NAIC) at the Company Action Level (CAL).

(f) With-profits business and the treatment of the estate

For the Group's relevant Asia operations, the proportion of surplus allocated to shareholders from the with-profits funds has been based on the applicable profit distribution between shareholders and policyholders. The EEV methodology includes the value attributed to the shareholders' interest in the residual estate of the in-force with-profits business. In any scenarios where the total assets of the life fund are insufficient to meet policyholder claims in full, the excess cost is fully attributed to shareholders. As required, adjustments are also made to reflect any capital requirements for with-profits business in Asia in excess of the available capital of the with-profits funds.

(g) Internal asset management

The in-force and new business results from long-term business include the projected future profit or loss from asset management and service companies that support the Group's covered insurance businesses. The results of the Group's asset management operations include the current period profit from the management of both internal and external funds. EEV basis shareholders' other income and expenditure is adjusted to deduct the unwind of the expected margins on the internal management of the assets of the life funds for the period as included in 'Other' operations. The deduction is on a basis consistent with that used for projecting the results for covered insurance business. Accordingly, Group operating profit includes the variance between the actual and expected profit margin in respect of the management of the assets for the covered business.

(h) Allowance for risk and risk discount rates

Overview

Under the EEV Principles, discount rates used to determine the present value of expected future cash flows are set by reference to risk-free rates plus a risk margin.

The risk-free rates are based on local government bond yields at the valuation date and are generally assumed to remain constant throughout the projection.

The risk margin reflects any non-diversifiable risk associated with the emergence of distributable earnings that is not allowed for elsewhere in the valuation. In order to better reflect differences in relative market risk volatility inherent in each product group, Prudential sets the risk discount rates to reflect the expected volatility associated with the expected future cash flows for each product group in the embedded value model, rather than at a Group level.

Since financial options and guarantees are explicitly valued under the EEV methodology, risk discount rates exclude the effect of these product features.

The risk margin represents the aggregate of the allowance for market risk, additional allowance for credit risk where appropriate, and allowance for non-diversifiable non-market risk. No allowance is required for non-market risks where these are assumed to be fully diversifiable.

14 Methodology and accounting presentation continued

Market risk allowance

The allowance for market risk represents the beta multiplied by an equity risk premium.

The beta of a portfolio or product measures its relative market risk. The risk discount rates reflect the market risk inherent in each product group and hence the volatility of product-specific cash flows. These are determined by considering how the profit from each product is affected by changes in expected returns on various asset classes. By converting this into a relative rate of return, it is possible to derive a product-specific beta.

Product level betas reflect the product mix at the valuation date to produce appropriate betas and risk discount rates for each major product group.

In 2019, the Group reconsidered the application of this methodology for certain Asia businesses to reflect a more granular assessment of the underlying market risks when determining the beta, alongside other refinements. These refinements resulted in the change in the risk discount rate for Vietnam shown in note 15(i)(a), and had an impact of \$67 million via the effect of change in economic assumptions in note 6. There were small consequential effects on new business contribution and in-force operating profit, which were overall not material in the context of the Group's results.

Additional credit risk allowance

The Group's methodology allows for credit risk. The total allowance for credit risk is to cover expected long-term defaults, credit risk premium (to reflect the volatility in downgrade and default levels) and short-term downgrades and defaults.

These allowances are initially reflected in determining best estimate returns and through the market risk allowance described above. However, for those businesses largely backed by holdings of debt securities, these allowances in the projected returns and market risk allowances may not be sufficient and an additional allowance may be appropriate.

The practical application of the allowance for credit risk varies depending on the type of business as described below:

Asia

For Asia, the allowance for credit risk incorporated in the projected rates of return and the market risk allowance is considered to be sufficient. Accordingly, no additional allowance for credit risk is required.

The projected rates of return for holdings of corporate bonds comprise the risk-free rate plus an assessment of long-term spread over the risk-free rate.

US (Jackson)

For Jackson, the allowance for long-term defaults of 0.17 per cent at 31 December 2019 (31 December 2018: 0.17 per cent) is reflected in the risk margin reserve charge that is deducted in determining the projected spread margin between the earned rate on the investments and the policyholder crediting rate.

The risk discount rate incorporates an additional allowance for credit risk premium and short-term downgrades and defaults, as shown in note 15(i)(b). In determining this allowance, a number of factors have been considered, in particular including:

- How much of the credit spread on debt securities represents an increased short-term credit risk not reflected in the risk margin reserve long-term default assumptions and how much is liquidity premium (which is the premium required by investors to compensate for the risk of longer-term investments that cannot be easily converted into cash at the fair market value). In assessing this effect, consideration has been given to a number of approaches to estimate the liquidity premium by considering recent statistical data; and
- Policyholder benefits for Jackson fixed annuity business are not fixed. It is possible, in adverse economic scenarios, to pass on a component of credit losses to policyholders (subject to guarantee features), through lower investment returns credited to policyholders. Consequently, it is only necessary to allow for the balance of the credit risk in the risk discount rate.

The level of the additional allowance is assessed at each reporting period to take account of prevailing credit conditions and as the business in force alters over time. The additional allowance for variable annuity business has been set at one-fifth of the non-variable annuity business to reflect the proportion of the allocated holdings of general account debt securities.

Allowance for non-diversifiable non-market risks

The majority of non-market and non-credit risks are considered to be diversifiable. An allowance for non-diversifiable non-market risks is estimated as set out below.

A base level allowance of 50 basis points is applied to cover the non-diversifiable non-market risks associated with the Group's covered business. For the Group's businesses in less mature markets (such as the Philippines and Thailand), additional allowances are applied for emerging market risk ranging from 100 to 250 basis points. The level and application of these allowances are reviewed and updated based on an assessment of the Group's exposure and experience in the markets. During 2019, the allowance for emerging market risk was removed for Indonesia, Taiwan and Vietnam reflecting the growth in the size of the businesses and increasing management exposure and experience in the local markets. For the Group's business in more mature markets, no additional allowance is necessary.

(i) Foreign currency translation

Foreign currency profits and losses have been translated at average exchange rates for the year. Foreign currency transactions are translated at the spot rate prevailing at the date of the transactions. This includes external dividends paid to shareholders. Prudential will determine and declare its dividend in US dollars commencing with dividends paid in 2020, including the 2019 second interim dividend. Foreign currency assets and liabilities have been translated at closing exchange rates. The principal exchange rates are shown in note A1 of the Group IFRS financial statements.

(j) Taxation

In determining the post-tax profit for the year for covered business, the overall tax rate includes the impact of tax effects determined on a local regulatory basis. Tax payments and receipts included in the projected future cash flows to determine the value of in-force business are calculated using tax rates that have been announced and substantively enacted by the end of the reporting period.

(ii) Accounting presentation

(a) Analysis of post-tax profit

To the extent applicable, the presentation of the EEV basis profit or loss for the year is consistent with the classification between operating and non-operating results that the Group applies for the analysis of IFRS basis results. Operating results are determined as described in note (b) below and incorporate the following:

- New business contribution, as defined in note (i)(b) above;
- Unwind of discount on the value of in-force business and other expected returns, as described in note (c) below;
- The impact of routine changes of estimates relating to operating assumptions, as described in note (d) below; and
- Operating experience variances, as described in note (e) below.

In addition, operating results include the effect of changes in tax legislation, unless these changes are one-off and structural in nature or primarily affect the level of projected investment returns, in which case they are reflected as a non-operating result.

Non-operating results comprise:

- Short-term fluctuations in investment returns;
- Mark-to-market value movements on core structural borrowings;
- Effect of changes in economic assumptions;
- Impact of NAIC reform, hedge modelling and other related changes in the US; and
- The impact of corporate transactions undertaken in the year.

Total profit or loss in the year attributable to shareholders and basic earnings per share include these items, together with actual investment returns. The Group believes that operating profit, as adjusted for these items, better reflects underlying performance.

(b) Investment returns included in operating profit

For the investment element of the assets covering the total net worth of long-term insurance business, investment returns are recognised in operating results at the expected long-term rates of return. These expected returns are calculated by reference to the asset mix of the portfolio.

For the purpose of determining the long-term returns for debt securities of Jackson for fixed annuity and other general account business, a risk margin reserve charge is included, which reflects the expected long-term rate of default based on the credit quality of the portfolio. For Jackson, interest-related realised gains and losses are amortised to the operating results over the maturity period of the sold bonds; for equity-related investments, a long-term rate of return is assumed (as disclosed in note 15(i)(b)), which reflects the aggregation of risk-free rates and the equity risk premium at the end of the reporting period. For variable annuity separate account business, operating profit includes the unwind of discount on the opening value of in-force business adjusted to reflect projected rates of return at the end of the reporting period, with the excess or deficit of the actual return recognised within non-operating results, together with related hedging activity variances.

(c) Unwind of discount and other expected returns

The Group's methodology in determining the unwind of discount and other expected returns is by reference to the value of in-force business at the beginning of the year (adjusted for the effect of changes in economic and operating assumptions in the current year) and required capital and surplus assets.

(d) Effect of changes in operating assumptions

Operating profit includes the effect of changes to non-economic assumptions on the value of in-force business at the end of the reporting period. For presentational purposes the effect of changes is delineated to show the effect on the opening value of in-force business as operating assumption changes, with the experience variances subsequently being determined by reference to the assumptions at the end of the reporting period, as discussed below.

(e) Operating experience variances

Operating profit includes the effect of experience variances on non-economic assumptions, such as persistency, mortality, morbidity, expenses and other factors, which are calculated with reference to the assumptions at the end of the reporting period.

(f) Effect of changes in economic assumptions

Movements in the value of in-force business at the beginning of the year caused by changes in economic assumptions, net of the related changes in the time value of financial options and guarantees, are recorded in non-operating results.

15 Assumptions

(i) Principal economic assumptions

The EEV basis results for the Group's covered business have been determined using economic assumptions where both the long-term expected rates of return on investments and risk discount rates are set by reference to risk-free rates of return at the end of the reporting period. The risk-free rates of return are based on local government bond yields, which are generally assumed to remain constant throughout the projection, and are shown below for each of the Group's insurance operations. Expected returns on equity and property asset classes and corporate bonds are derived by adding a risk premium to the risk-free rate based on the Group's long-term view. In the majority of business units, equity risk premiums were increased during 2019 by 25 basis points from those applied at 2018. The related expected return on equity assets and risk discount rates have been increased accordingly. As described in note 14(i)(h), the resulting risk discount rates incorporate allowances for market risk, additional credit risk and non-diversifiable non-market risks appropriate to the features and risks of the underlying products and markets, after considering risks allowed for explicitly elsewhere in the EEV basis, such as cost of capital and the time value of the cost of options and guarantees.

The total profit that emerges over the lifetime of an individual contract as calculated under the EEV basis is the same as that calculated under the IFRS basis. Since the EEV basis reflects discounted future cash flows, under the EEV methodology the profit emergence is advanced, thus more closely aligning the timing of the recognition of profit with the efforts and risks of current management actions, particularly with regard to business sold during the year.

Notes

- Total weighted average risk discount rates for Asia shown above have been determined by weighting each business's risk discount rates by reference to the EEV basis new business contribution and the net closing value of in-force business. The changes in the risk discount rates for individual Asia businesses reflect the movements in the local government bond yields, changes in the equity risk premiums, changes in the allowance for market risk as described in note 14(i)(h) and changes in product mix.
- For Hong Kong, the assumptions shown are for US dollar denominated business. For other businesses, the assumptions shown are for local currency denominated business.
- Equity risk premiums (geometric) in Asia range from 2.9 per cent to 4.8 per cent (31 December 2018: 2.6 per cent to 4.5 per cent).
- The geometric equity return assumptions for the most significant equity holdings of the Asia businesses are:

| | 31 Dec 2019 % | 31 Dec 2018 % |
|--|---------------|---------------|
| Hong Kong (US dollar denominated business) | 4.8 | 5.3 |
| Malaysia | 7.3 | 7.9 |
| Singapore | 5.7 | 5.8 |

(b) US

| Expected long-term rate of inflation | 2.9 | 2.9 |
| S&P 500 equity return volatility ^{note (ii)(b)} | 17.5 | 17.5 |

Note

Assumed new business spread margins are as follows:

| | 2019 % | | 2018 % | |
|---|------------------------|-------------------------|------------------------|-------------------------|
| | January to June issues | July to December issues | January to June issues | July to December issues |
| Fixed annuity business* | 1.50 | 0.85 | 1.75 | 1.75 |
| Fixed index annuity business [†] | 0.50 | 0.50 | 2.00 | 2.00 |
| Institutional business | 0.50 | 0.50 | 0.50 | 0.50 |

* Including the proportion of variable annuity business invested in the general account. The assumed spread margin grades up linearly by 25 basis points to a long-term assumption over five years.

† The assumed spread margin grades up linearly by 100 basis points over five years, increasing by a further 50 basis points to a long-term assumption at the end of the index option period (2018 issues: grades up linearly by 25 basis points to a long-term assumption over five years).

(ii) Stochastic assumptions

Details are given below of the key characteristics of the models used to determine the time value of financial options and guarantees as referred to in note 14(i)(d).

(a) Asia

- The stochastic cost of guarantees is primarily of significance for the Hong Kong, Malaysia, Singapore, Taiwan and Vietnam businesses;
- The principal asset classes are government bonds, corporate bonds and equity;
- Interest rates are projected using a stochastic interest rate model calibrated to the current market yields;
- Equity returns are assumed to follow a log-normal distribution;
- The corporate bond return is calculated based on a risk-free return plus a mean-reverting spread;
- The volatility of equity returns ranges from 18 per cent to 35 per cent for both years; and
- The volatility of government bond yields ranges from 1.1 per cent to 2.0 per cent for both years.

(b) US (Jackson)

- Interest rates and equity returns are projected using a log-normal generator reflecting historical market data;
- Corporate bond returns are based on treasury yields plus a spread that reflects current market conditions;
- The volatility of equity returns ranges from 17 per cent to 26 per cent for both years; and
- The standard deviation of interest rates ranges from 3.1 per cent to 3.3 per cent (2018: from 3.4 per cent to 3.7 per cent).

15 Assumptions continued

(iii) Operating assumptions

Best estimate assumptions are used for projecting future cash flows, where best estimate is defined as the mean of the distribution of future possible outcomes. The assumptions are reviewed actively and changes are made when evidence exists that material changes in future experience are reasonably certain.

Assumptions required in the calculation of the time value of financial options and guarantees, for example relating to volatilities and correlations, or dynamic algorithms linking liabilities to assets, have been set equal to the best estimates and, wherever material and practical, reflect any dynamic relationships between the assumptions and the stochastic variables.

Demographic assumptions

Persistency, mortality and morbidity assumptions are based on an analysis of recent experience, and reflect expected future experience. Where relevant, when calculating the time value of financial options and guarantees, policyholder withdrawal rates vary in line with the emerging investment conditions according to management's expectations. When projecting future cash flows for medical reimbursement business that is repriced annually, explicit allowance is made for expected future premium inflation and separately for future medical claims inflation.

Expense assumptions

Expense levels, including those of the service companies that support the Group's long-term business, are based on internal expense analysis and are appropriately allocated to acquisition of new business and renewal of in-force business. For mature business, it is Prudential's policy not to take credit for future cost reduction programmes until the actions to achieve the savings have been delivered. An allowance is made for short-term required expenses that are not representative of the longer-term expense loadings of the relevant businesses. At 31 December 2019 the allowance held for these costs across the Group was \$313 million, mainly arising in Asia. Expense overruns are reported where these are expected to be short-lived, including businesses that are growing rapidly or are sub-scale.

For Asia, expenses comprise costs borne directly and costs recharged from the Group head office function in Hong Kong that are attributable to the covered business. The assumed future expenses for these businesses also include projections of these future recharges. Development expenses are allocated to Asia covered business and are charged as incurred.

Corporate expenditure, which is included in other income and expenditure, comprises expenditure of the Group head office function in Hong Kong that is not allocated to the covered business or asset management, primarily for corporate related activities that are charged as incurred, and expenditure of the Group head office function in London, together with restructuring costs incurred across the Group.

Tax rates

The assumed long-term effective tax rates for operations reflect the expected incidence of taxable profit and loss in the projected future cash flows as explained in note 14(i)(j). Except for the change in China JV effective tax rate as discussed in note 4, there has been no change in the effective tax rates applied for projecting future cash flows.

| Group total ^{note (d)} | 26,010 | 23,685 | 4,783 | 4,691 | 7,384 | 7,058 | 51,475 | 48,304 |

Notes

- (a) The tables shown above are provided as an indicative volume measure of transactions undertaken in the reporting period that have the potential to generate profit for shareholders. The amounts shown are not, and not intended to be, reflective of premium income recorded in the Group IFRS income statement.
- (b) New business in China JV is included at Prudential's 50 per cent interest in the joint venture.
- (c) New business in India is included at Prudential's interest in the associate (with effect from 27 March 2019: 22 per cent; 2018: 26 per cent).
- (d) In 2019, the Africa business sold new business APE of \$82 million (2018: \$51 million on an actual exchange rate basis, \$47 million on a constant exchange rate basis). Given the relative immaturity of the Africa business, it is incorporated into the Group's EEV basis results on an IFRS basis and is excluded from new business sales and profit metrics.

Statement of directors' responsibilities in respect of the European Embedded Value (EEV) basis supplementary information

The directors have chosen to prepare supplementary information in accordance with the European Embedded Value Principles issued by the European Insurance CFO Forum in 2016 ('the EEV Principles') using the methodology and assumptions set out in the Notes on the EEV basis results.

When compliance with the EEV Principles is stated, those principles require the directors to prepare supplementary information in accordance with the Embedded Value Methodology (EVM) contained in the EEV Principles and to disclose and explain any non-compliance with the EEV guidance included in the EEV Principles.

In preparing the EEV supplementary information, the directors have:

- Prepared the supplementary information in accordance with the EEV Principles;
- Identified and described the business covered by the EVM;
- Applied the EVM consistently to the covered business;
- Determined assumptions on a realistic basis, having regard to past, current and expected future experience and to any relevant external data, and then applied them consistently;
- Made estimates that are reasonable and consistent; and
- Described the basis on which business that is not covered business has been included in the supplementary information, including any material departures from the accounting framework applicable to the Group's financial statements.

Independent auditor's report to Prudential plc on the European Embedded Value (EEV) basis supplementary information

Opinions and conclusions arising from our audit

Our opinion on the EEV basis supplementary information is unmodified

We have audited the EEV basis supplementary information of Prudential plc ('the Company') for the year ended 31 December 2019 set out in the EEV basis results and Notes on the EEV basis results pages. The EEV basis supplementary information should be read in conjunction with the Group financial statements.

In our opinion, the EEV basis supplementary information of the Company for the year ended 31 December 2019 has been properly prepared, in all material respects, in accordance with the European Embedded Value Principles issued by the European Insurance CFO Forum in 2016 ('the EEV Principles') using the methodology and assumptions set out in the Notes on the EEV basis results.

Respective responsibilities of directors and auditor

As explained more fully in the Directors' Responsibilities Statement set out on page 358, the directors have accepted responsibility for the preparation of the supplementary information on the EEV basis in accordance with the EEV Principles.

Our responsibility is to audit, and express an opinion on, the supplementary information in accordance with the terms of our engagement and in accordance with International Standards on Auditing (UK). Those standards require us to comply with the Financial Reporting Council's Ethical Standard.

Scope of an audit of financial statements performed in accordance with ISAs (UK)

A description of the scope of an audit of financial statements is provided on our website at www.kpmg.com/uk/auditscopeukco2014a. This report is made subject to important explanations regarding our responsibilities, as published on that website, which are incorporated into this report as if set out in full and should be read to provide an understanding of the purpose of this report, the work we have undertaken and the basis of our opinions.

The purpose of this report and restrictions on its use by persons other than the Company

This report is made solely to the Company in accordance with the terms of our engagement. Our audit work has been undertaken so that we might state to the Company those matters we have been engaged to state in this report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the Company for our audit work, for this report, or for the opinions we have formed.

I Additional financial information

I(i) Group capital position

Following the demerger of M&G plc from Prudential plc, the Hong Kong Insurance Authority (IA) has assumed the role of the group-wide supervisor for the Prudential Group with the Group no longer subject to Solvency II capital requirements. Ultimately, Prudential plc will become subject to the Group Wide Supervision (GWS) framework which is currently under development by the Hong Kong IA for the industry and is expected to be finalised in the second half of 2020. Until Hong Kong's GWS framework comes into force, Prudential will apply the local capital summation method (LCSM) that has been agreed with the Hong Kong IA to determine group regulatory capital requirements (both minimum and prescribed levels). Further detail on the LCSM is included in the basis of preparation section below.

For regulated insurance entities, the available and required capital included in the LCSM measure for Hong Kong IA Group regulatory purposes are based on the local solvency regime applicable in each jurisdiction. At 31 December 2019 the Prudential Group's total surplus of available capital over the regulatory Group Minimum Capital Requirement (GMCR), calculated using this LCSM was \$23.6 billion before allowing for the payment of the 2019 second interim ordinary dividend.

The Group holds material participating business in Hong Kong, Singapore and Malaysia. If the available capital and minimum capital requirement attributed to this policyholder business are excluded, then the Prudential Group shareholder LCSM surplus of available capital over the regulatory GMCR at 31 December 2019 was \$9.5 billion before allowing for the payment of the 2019 second interim ordinary dividend.

Estimated Group LCSM capital position based on Group Minimum Capital Requirement (GMCR)

| | 31 Dec 2019 | | | 31 Dec 2018* | | |
|--|-------------|-------------------|-------------|--------------|-------------------|-------------|
| | Total | Less policyholder | Shareholder | Total | Less policyholder | Shareholder |
| Available capital (\$bn) | 33.1 | (19.1) | 14.0 | 27.0 | (13.5) | 13.5 |
| Group Minimum Capital Requirement (\$bn) | 9.5 | (5.0) | 4.5 | 7.6 | (3.8) | 3.8 |
| LCSM surplus (over GMCR) (\$bn) | 23.6 | (14.1) | 9.5 | 19.4 | (9.7) | 9.7 |
| LCSM ratio (over GMCR) (%) | 348% | | 309% | 355% | | 356% |

* Excludes M&G plc and includes \$3.7 billion of subordinated debt issued by Prudential plc that was transferred to M&G plc on 18 October 2019.

The shareholder LCSM capital position by segment is presented below at 31 December 2019 and 31 December 2018 for comparison:

Estimated Group shareholder LCSM capital position (based on GMCR)

| | 31 Dec 2019 \$bn | | | | | |
|-----------------------------------|------------------|-------------------|-------------|------------|--------------------------|-------------|
| | Total Asia | Less policyholder | Shareholder | | | Group total |
| | | | Asia | US | Unallocated to a segment | |
| Available capital | 26.8 | (19.1) | 7.7 | 5.3 | 1.0 | 14.0 |
| Group Minimum Capital Requirement | 8.0 | (5.0) | 3.0 | 1.5 | – | 4.5 |
| LCSM surplus (over GMCR) | 18.8 | (14.1) | 4.7 | 3.8 | 1.0 | 9.5 |

| | 31 Dec 2018* \$bn | | | | | |
|-----------------------------------|-------------------|-------------------|-------------|------------|--------------------------|-------------|
| | Total Asia | Less policyholder | Shareholder | | | Group total |
| | | | Asia | US | Unallocated to a segment | |
| Available capital | 19.6 | (13.5) | 6.1 | 5.7 | 1.7 | 13.5 |
| Group Minimum Capital Requirement | 6.3 | (3.8) | 2.5 | 1.3 | – | 3.8 |
| LCSM surplus (over GMCR) | 13.3 | (9.7) | 3.6 | 4.4 | 1.7 | 9.7 |

* Excludes M&G plc and includes \$3.7 billion of subordinated debt issued by Prudential plc that was transferred to M&G plc on 18 October 2019.

The 31 December 2019 Jackson local statutory results reflect early adoption of the NAIC regulatory framework reforms at the valuation date as agreed with the Department of Insurance Financial Services (DIFS) and Jackson's decision not to renew its long-standing permitted practice with the DIFS which allowed certain derivative instruments, taken out to protect Jackson against declines in long-term interest rates, to be included at book value in the local statutory returns. At 31 December 2019 these derivatives are held at fair value.

I Additional financial information continued

I(i) Group capital position continued

Sensitivity analysis

The estimated sensitivity of the Group shareholder LCSM capital position (based on GMCR) to significant changes in market conditions is as follows:

| | 31 Dec 2019 | |
|---|----------------------|-----------------|
| | LCSM surplus \$bn | LCSM ratio % |
| Impact of market sensitivities | | |
| Base position | 9.5 | 309% |
| <i>Impact of:</i> | | |
| 20% instantaneous fall in equity markets | 1.5 | (9)% |
| 40% fall in equity markets ^{note (1)} | (0.2) | (39)% |
| 50 basis points reduction in interest rates | (0.2) | (17)% |
| 100 basis points increase in interest rates | (1.3) | (19)% |
| 100 basis points increase in credit spreads ^{note (2)} | (1.6) | (36)% |

Notes

(1) Where hedges are dynamic, rebalancing is allowed for by assuming an instantaneous 20 per cent fall followed by a further 20 per cent fall over a four-week period.

(2) US RBC solvency position included using a stress of 10 times expected credit defaults.

The sensitivity results above assume instantaneous market movements as at 31 December 2019, apart from the -40% equity sensitivity where for Jackson an instantaneous 20% market fall is assumed to be followed by a further market fall of 20% over a four-week period with dynamic hedges assumed to be rebalanced over the period. Aside from this assumed dynamic hedge rebalancing for Jackson in the -40% equity sensitivity, the sensitivity results only allow for limited management actions such as changes to future policyholder bonuses. If such economic conditions persisted, the financial impacts may differ to the instantaneous impacts shown above. In this case management could also take additional actions to help mitigate the impact of these stresses. These actions include, but are not limited to, rebalancing investment portfolios, further market risk hedging, increased use of reinsurance, repricing of in-force benefits, changes to new business pricing and the mix of new business being sold.

Between 31 December 2019 and the end of February 2020, government bond yields and equity markets fell significantly in many countries. For example, US 10-year treasury yields fell by around 80 basis points and the US S&P 500 equity index fell by around 9% over the 2-month period. Based on economic conditions at the end of February 2020, the Group shareholder LCSM capital ratio (over GMCR) is estimated to be in the range of 270% - 280%, compared to 309% at 31 December 2019. This estimated capital ratio at the end of February is slightly higher than implied by the sensitivities above, mainly reflecting the benefit of management actions taken in the period which are not allowed for in the sensitivities.

Analysis of movement in Group capital position

A summary of the estimated movement in the Group shareholder LCSM surplus (based on GMCR) from \$9.7 billion at 31 December 2018 to \$9.5 billion at 31 December 2019 is set out in the table below.

| | 2019 \$bn |
|---|--------------|
| Balance at beginning of year | 9.7 |
| Operating: | |
| Operating capital generation from the in-force business | 2.5 |
| Investment in new business | (0.6) |
| Operating capital generation | 1.9 |
| Non-operating and other capital movements: | |
| Non-operating experience (including market movements) | (0.6) |
| Adoption of NAIC regulatory reforms in the US | 0.1 |
| Corporate activities (excluding demerger items) | (0.8) |
| Demerger costs | (0.4) |
| Subordinated debt redemption | (0.5) |
| Demerger related impacts | 1.0 |
| M&G plc remittances | 0.7 |
| External dividends | (1.6) |
| Net dividend impact | (0.9) |
| Net movement in LCSM surplus | (0.2) |
| Balance at end of year | 9.5 |

The estimated movement in the Group shareholder LCSM surplus over 2019 is driven by:

- Operating capital generation of \$1.9 billion: generated by expected return on in-force business net of strain on new business written in 2019. It includes the impact from the release of incremental reserves associated with the John Hancock acquisition in the US (\$0.4 billion) and interest paid prior to demerger on subordinated debt transferred to M&G plc (\$0.2 billion);
- Non-operating experience of \$(0.6) billion: this includes the negative impact of higher equity markets on Jackson's derivatives net of reserve movements partially offset by the positive impacts of market and exchange rate movements on Asia surplus over the year;
- Corporate activities (excluding demerger items) of \$(0.8) billion: this is the effect on LCSM surplus of corporate transactions in the period, principally arising from the extension of the UOB bancassurance distribution deal;
- Demerger costs of \$(0.4) billion: this includes transaction related costs and other one-off costs arising from the demerger;
- Subordinated debt redemption of \$(0.5) billion: a reduction in surplus from the impact of debt redeemed during 2019;
- Demerger related impacts of \$1.0 billion: includes \$3.8 billion of pre-demerger dividend paid by M&G plc, \$1.0 billion of restructuring impacts prior to demerger and \$0.4 billion from debt raised by Prudential plc on behalf of M&G plc, partially offset by \$(4.2) billion from the transfer of subordinated debt to M&G plc prior to demerger; and
- Net dividend impact of \$(0.9) billion: this includes external dividends of \$(1.6) billion paid during 2019 largely based on the Group prior to demerger net of regular remittances paid by M&G plc during 2019 prior to the demerger of \$0.7 billion.

I Additional financial information continued

I(i) Group capital position continued

Reconciliation of Group shareholder LCSM surplus to EEV free surplus (excluding intangibles)

| 31 Dec 2019 (\$bn) | Asia | US | Unallocated to a segment | Group total |
|---|------------|------------|--------------------------|-------------|
| Estimated Group shareholder LCSM surplus (over GMCR) | 4.7 | 3.8 | 1.0 | 9.5 |
| Increase required capital for EEV free surplus ^{note (i)} | (0.6) | (2.2) | – | (2.8) |
| Adjust surplus assets and core structural borrowings to market value ^{note (ii)} | 0.3 | 0.2 | (0.2) | 0.3 |
| Add back inadmissible assets ^{note (iii)} | 0.1 | 0.1 | – | 0.2 |
| Deductions applied to EEV free surplus ^{note (iv)} | (0.9) | – | – | (0.9) |
| Other | – | (0.1) | 0.4 | 0.3 |
| EEV free surplus excluding intangibles* | 3.6 | 1.8 | 1.2 | 6.6 |

*As per the "Free surplus excluding distribution rights and other intangibles" from note 11 of the Group's EEV basis results.

Notes:

- (i) Required Capital under EEV is set at least equal to local statutory notification requirements for Asia (with China JV following the approach for embedded value reporting issued by the China Association of Actuaries (CAA) reflecting the C-ROSS regime) and at 250 per cent of the risk-based capital (RBC) required by the NAIC at the Company Action Level (CAL). This is higher than the solo legal entity statutory minimum capital requirements that are included in the LCSM surplus (over GMCR).
- (ii) The EEV Principles require surplus assets to be included at fair value and central core senior debt held at market value. Within LCSM surplus, some local regulatory regimes value certain assets at cost and core structural borrowings are held at amortised cost.
- (iii) LCSM restricts the valuation of certain sundry non-intangible assets. In most cases these assets are considered fully recognisable in free surplus. As an exception to this, both LCSM surplus and EEV free surplus restrict the deferred tax asset held by Jackson to the level allowed to be admitted by the local regulator in local statutory available capital.
- (iv) Deductions applied to EEV free surplus primarily include the impact of applying the embedded value reporting approach issued by the CAA within EEV free surplus as compared to the C-ROSS surplus reported for local regulatory purposes. The \$(0.9) billion predominantly arises from the requirement under the CAA embedded value methodology to establish a deferred profit liability within EEV net worth.

Reconciliation of Group IFRS shareholders' equity to shareholder LCSM available capital position

| | 31 Dec 2019 \$bn |
|---|---------------------|
| Group IFRS shareholders' equity | 19.5 |
| Remove DAC, goodwill and intangibles | (18.2) |
| Add subordinated debt at IFRS book value | 4.6 |
| Valuation differences | 8.6 |
| Other | (0.5) |
| Estimated Group shareholder LCSM available capital | 14.0 |

The key items of the reconciliation as at 31 December 2019 are:

- \$(18.2) billion due to the removal of DAC, goodwill and other intangibles from the IFRS statement of financial position;
- \$4.6 billion due to the addition of subordinated debt, which is treated as available capital under LCSM but as a liability under IFRS; and
- \$8.6 billion due to differences on the basis of valuing assets and liabilities between IFRS and local statutory valuation rules, including reductions for inadmissible assets. The most significant difference arises in Jackson where local statutory reserves are reduced by an expense allowance linked to surrender charges. IFRS makes no such allowance but instead defers acquisition costs on the balance sheet as a separate asset (which is not recognised on the statutory balance sheet).

Basis of preparation

In advance of the GWS framework coming into force, Prudential applies the local capital summation method (LCSM) that has been agreed with the Hong Kong IA to determine group regulatory capital requirements (both minimum and prescribed levels). The summation of local statutory capital requirements across the Group is used to determine group regulatory capital requirements, with no allowance for diversification between business operations. The Group available capital is determined by the summation of available capital across local solvency regimes for regulated entities and IFRS net assets (with adjustments described below) for non-regulated entities. The Hong Kong IA has yet to make any final decisions regarding the GWS framework for the industry and it continues to consider and consult on the proposed legislation and related guidelines. The results above should not therefore be interpreted as representing the results or requirements under the industry-wide GWS framework and are not intended to provide a forecast of the eventual position.

In determining the LCSM available capital and required capital the following principles have been applied:

- For regulated insurance entities, available and required capital are based on the local solvency regime applicable in each jurisdiction, with minimum required capital is set at the solo legal entity statutory minimum capital requirements. The treatment of participating funds is consistent with the local basis;
- For the US insurance entities, available and required capital are based on the local US RBC framework set by the NAIC, with minimum required capital set at 100 per cent of the CAL RBC;
- For asset management operations and other regulated entities, the shareholder capital position is derived based on the sectoral basis applicable in each jurisdiction, with minimum required capital based on the solo legal entity statutory minimum capital requirement;
- For non-regulated entities, the available capital is based on IFRS net assets after deducting intangible assets. No required capital is held in respect of unregulated entities;
- Investments in subsidiaries, joint ventures and associates (including, if any, loans that are recognised as capital on the receiving entity's balance sheet) are eliminated from the relevant holding company to prevent the double counting of available capital; and
- The Hong Kong IA has agreed that specific bonds (being those subordinated debt instruments held by Prudential plc at the date of demerger) can be included as part of the Group's capital resources for the purposes of satisfying group minimum and prescribed capital requirements. Senior debt instruments held by Prudential plc have not been included as part of the Group capital resources and are treated as a liability in the LCSM results presented above (this is equivalent to a 15 per cent reduction in the Group shareholder LCSM coverage ratio (over GMCR)). Grandfathering provisions under the GWS framework remain subject to further consultation and the Hong Kong legislative process in due course.

I(ii) Funds under management

For Prudential's asset management businesses, funds managed on behalf of third parties are not recorded on the statement of financial position. They are, however, a driver of profitability. Prudential therefore analyses the movement in the funds under management each period, focusing on those which are external to the Group and those primarily held by the Group's insurance businesses. The table below analyses, by segment, the funds of the Group held in the statement of financial position and the external funds that are managed by Prudential's asset management businesses.

| | 31 Dec 2019 \$bn | 31 Dec 2018* \$bn |
|---|---------------------|----------------------|
| Asia operations: | | |
| Internal funds | 141.9 | 112.5 |
| Eastspring Investments external funds (as analysed note I(v)) | 124.7 | 77.8 |
| Other† | – | 22.2 |
| | 266.6 | 212.5 |
| US operations – internal funds | 273.4 | 237.0 |
| Other operations | 3.9 | 5.8 |
| Total Group funds under management – continuing operations | 543.9 | 455.3 |

* The 2018 comparatives have been adjusted from the previously published amounts to exclude the discontinued UK and Europe operations. Additionally, the comparatives have been adjusted to include cash and cash equivalents and to exclude assets held that are attributable to external unit holders of consolidated collective investment schemes to align to the current year's presentation.

† Other represents funds managed by Eastspring Investments on behalf of M&G plc, that were categorised as the internal funds of the UK and Europe operations prior to the demerger of M&G plc. Following the demerger, these funds have been reclassified to external funds under management of Eastspring Investments.

Note

Total Group funds under management from continuing operations comprise:

| | 31 Dec 2019 \$bn | 31 Dec 2018 \$bn |
|---|---------------------|---------------------|
| Total investments and cash and cash equivalents held by the continuing operations on the consolidated statement of financial position | 412.6 | 349.6 |
| External and M&G plc funds of Eastspring Investments | 124.7 | 100.0 |
| Internally managed funds held in joint ventures and associate, excluding assets attributable to external unit holders of the consolidated collective investment schemes and other adjustments | 6.6 | 5.7 |
| Total Group funds under management from continuing operations | 543.9 | 455.3 |

I Additional financial information continued

I(iii) Holding company cash flow

The holding company cash flow describes the movement in the cash and short-term investments of the centrally managed group holding companies and differs from the IFRS cash flow statement, which includes all cash flows in the year including those relating to both policyholder and shareholder funds. The holding company cash flow is therefore a more meaningful indication of the Group's central liquidity.

During both 2019 and 2018 the cash and short-term investments of the central holding companies were managed in sterling, in line with the management of the Group's external dividends. Following the change to the Group's presentational currency, the holding company cash flow statement below is shown in US dollars and prior period amounts have been restated accordingly. Cash movements in the year have been converted from sterling into US dollars by using the month-end sterling to US dollar exchange rate for the month in which the transaction occurred. Cash balances at the start and end of the year have been translated from sterling to US dollars using the spot rates at 1 January and 31 December respectively. As an exception to the above, external dividends paid for both 2019 and 2018 have been translated at the exchange rate relevant to the day they were paid to ensure consistency with the financial statements.

At 31 December 2019, the Group changed its basis of managing central cash-holdings from sterling to US dollars to better reflect the inflows from the Group's operations post the demerger of M&G plc and its decision to declare dividends in US dollars from 2020. Therefore, in future reporting the holding company cash flow will be prepared directly in US dollars.

| | 2019 \$m | AER 2018 \$m |
|---|----------|-----------------|
| Net cash remitted by business units ^{note(a)} : | | |
| From continuing operations | | |
| Asia ^{note(b)} | 950 | 916 |
| US ^{note(b)} | 509 | 452 |
| Other operations | 6 | 49 |
| Total continuing operations | 1,465 | 1,417 |
| From discontinued UK and Europe operations | 684 | 842 |
| Net cash remittances by business units | 2,149 | 2,259 |
| Net interest paid ^{note(c)} | (527) | (488) |
| Tax received | 265 | 190 |
| Corporate activities | (260) | (274) |
| Total central outflows | (522) | (572) |
| Holding company cash flow before dividends and other movements | 1,627 | 1,687 |
| Dividends paid | (1,634) | (1,662) |
| Operating holding company cash flow after dividends but before other movements | (7) | 25 |
| Other movements | | |
| Transactions to effect the demerger, including debt substitution ^{note(d)} | (146) | 2,071 |
| Demerger costs | (424) | (29) |
| Redemption of subordinated debt for continuing operations | (504) | (553) |
| Early settlement of UK-inflation-linked derivative liability | (587) | – |
| Other corporate activities relating to continuing operations ^{note(e)} | (338) | (336) |
| Total other movements | (1,999) | 1,153 |
| Total holding company cash flow | (2,006) | 1,178 |
| Cash and short-term investments at beginning of year | 4,121 | 3,063 |
| Foreign exchange movements | 92 | (120) |
| Cash and short-term investments at end of year | 2,207 | 4,121 |

Notes

- (a) Net cash remittances comprise dividends and other transfers from business units that are reflective of emerging earnings and capital generation.
- (b) Significant cash remittances from business units were hedged into sterling using forward contracts during 2018 and 2019 and these contracts determine the amount of sterling recorded in the holding company cash flow for the relevant remittances. The implicit rates may therefore differ from that applied to present the holding company cash flow in US dollars. If local currency remittances in Asia had been translated directly into US dollars using the relevant month-end spot rate then the growth rate in Asia remittances year on year would have been 8 per cent (compared to 4 per cent shown in the table above). The dividend paid by Jackson in the US in US dollars in 2019 was \$525 million (2018: \$450 million).
- (c) The net interest paid in 2019 includes amounts on debt substituted to M&G plc shortly prior to its demerger of \$231 million.
- (d) Transactions to effect the demerger includes the transfer of subsidiaries and settlement of intercompany loans totalling \$(193) million issuance of substitutable debt for cash of \$367 million, receipt of the pre-demerger dividend of \$3,841 million, and the substitution of M&G plc as issuer of sub-ordinated debt in place of Prudential plc (as discussed further in note C6 of the IFRS financial statements), which reduced Cash and short-term investments by \$(4,161) million.
- (e) Other corporate activities relating to continuing operations primarily relates to the first instalment payable following the renewal of bancassurance arrangement with UOB of \$253 million, ongoing centrally funded payments of bancassurance distribution rights and other items.

I(iv) Analysis of adjusted IFRS operating profit based on longer-term investment returns by driver from long-term insurance businesses

This schedule classifies the Group's adjusted IFRS operating profit based on longer-term investment returns (adjusted operating profit) from continuing long-term insurance businesses into the underlying drivers using the following categories:

- **Spread income** represents the difference between net investment income and amounts credited to certain policyholder accounts. It excludes the operating investment return on shareholder net assets, which has been separately disclosed as expected return on shareholder assets.
- **Fee income** represents profit driven by net investment performance, being fees that vary with the size of the underlying policyholder funds, net of investment management expenses.
- **With-profits** represents the pre-tax shareholders' transfer from the with-profits business for the period.
- **Insurance margin** primarily represents profit derived from the insurance risks of mortality and morbidity.
- **Margin on revenues** primarily represents amounts deducted from premiums to cover acquisition costs and administration expenses (see below).
- **Acquisition costs and administration expenses** represent expenses incurred in the period attributable to shareholders. These exclude items such as restructuring costs, which are not included in the segment profit, as well as items that are more appropriately included in other categories (eg investment expenses are netted against investment income as part of spread income or fee income as appropriate).
- **DAC adjustments** comprise DAC amortisation for the period, excluding amounts related to short-term fluctuations in investment returns, net of costs deferred in respect of new business written in the period.

(a) Margin analysis of long-term insurance business – continuing operations

The following analysis expresses certain of the Group's sources of adjusted IFRS operating profit based on longer-term investment returns as a margin of policyholder liabilities or other relevant drivers. Details on the calculation of the Group's average policyholder liability balances are given in note (1).

| | 2019 | | | | |

Notes to the tables throughout I (iv)

- (1) For Asia, opening and closing policyholder liabilities have been used to derive an average balance for the year, as a proxy for average balances throughout the year. The calculation of average liabilities for the US is generally derived from month-end balances throughout the year as opposed to opening and closing balances only. The average liabilities for fee income in the US have been calculated using daily balances instead of month-end balances in order to provide a more meaningful analysis of the fee income, which is charged on the daily account balance. Average liabilities for spread income are based on the general account liabilities to which spread income is attached. Average liabilities used to calculate the administration expenses margin exclude the REALIC liabilities reinsured to third parties prior to the acquisition by Jackson.
- (2) Margin represents the operating return earned in the year as a proportion of the relevant class of policyholder liabilities excluding unallocated surplus.
- (3) The ratio of acquisition costs is calculated as a percentage of APE sales including with-profits sales. Acquisition costs include only those relating to shareholder-backed business.
- (4) The DAC adjustments contain a credit of \$72 million in respect of joint ventures and associate in 2019 (2018: AER credit of \$73 million).
- (5) Under IFRS, the Group's share of results from its investments in joint ventures and associate accounted for using the equity method is included in the Group's profit before tax on a net of related tax basis. These tax charges are shown separately in the analysis of Asia operating profit drivers in order for the contribution from the joint ventures and associate to be included in the margin analysis on a consistent basis as the rest of the Asia's operations.
- (6) The 2018 comparative information has been presented at both AER and CER to eliminate the impact of exchange translation. CER results are calculated by translating prior year results using the current year foreign exchange rates. All CER profit figures have been translated at current year average rates for US dollars to reflect the change in the Group's presentation currency in 2019. For Asia, CER average liabilities have been translated using current year opening and closing exchange rates.
- (7) The 2018 comparative results exclude the contribution from the discontinued UK and Europe operations.

I(v) Asia operations – analysis of adjusted IFRS operating profit based on longer-term investment returns by business unit

(a) Analysis of adjusted IFRS operating profit based on longer-term investment returns by business unit

Adjusted operating profit based on longer-term investment returns for Asia operations are analysed below. The table below presents the 2018 results on both AER and CER bases to eliminate the impact of exchange translation.

| | 2019 \$m | | 2018 \$m | | 2019 vs 2018 % | |
|--|--------------|--|--------------|--------------|----------------|------------|
| | | | AER | CER | AER | CER |
| Hong Kong | 734 | | 591 | 591 | 24% | 24% |
| Indonesia | 540 | | 555 | 559 | (3)% | (3)% |
| Malaysia | 276 | | 259 | 252 | 7% | 10% |
| Philippines | 73 | | 57 | 58 | 28% | 26% |
| Singapore | 493 | | 439 | 433 | 12% | 14% |
| Thailand | 170 | | 151 | 157 | 13% | 8% |
| Vietnam | 237 | | 199 | 197 | 19% | 20% |
| South-east Asia operations including Hong Kong | 2,523 | | 2,251 | 2,247 | 12% | 12% |
| China JV | 219 | | 191 | 182 | 15% | 20% |
| Taiwan | 74 | | 68 | 67 | 9% | 10% |
| Other | 70 | | 68 | 69 | 3% | 1% |
| Non-recurrent items* | 142 | | 126 | 124 | 13% | 15% |
| Total insurance operations | 3,028 | | 2,704 | 2,689 | 12% | 13% |
| Share of related tax charges from joint ventures and associate | (31) | | (53) | (51) | 42% | 39% |
| Development expenses | (4) | | (5) | (5) | 20% | 20% |
| Total long-term business | 2,993 | | 2,646 | 2,633 | 13% | 14% |
| Asset management (Eastspring Investments) | 283 | | 242 | 239 | 17% | 18% |
| Total Asia | 3,276 | | 2,888 | 2,872 | 13% | 14% |

* In 2019, the adjusted IFRS operating profit based on longer-term investment returns for Asia insurance operations includes a net credit of \$142 million (2018: \$126 million on an AER basis) representing a small number of items that are not expected to reoccur, including the impact of a refinement to the run-off of the allowance for prudence within technical provisions.

(b) Analysis of Eastspring Investments adjusted IFRS operating profit based on longer-term investment returns

| | 2019 \$m | 2018 \$m |
|--|-----------|-----------|
| Operating income before performance-related fees ^{note (1)} | 636 | 566 |
| Performance-related fees | 12 | 23 |
| Operating income (net of commission) ^{note (2)} | 648 | 589 |
| Operating expense ^{note (2)} | (329) | (311) |
| Group's share of tax on joint ventures' operating profit | (36) | (36) |
| Operating profit based on longer-term investment returns | 283 | 242 |
| Average funds managed by Eastspring Investments | \$214.0bn | \$186.3bn |
| Margin based on operating income* | 30bps | 30bps |
| Cost/income ratio [†] | 52% | 55% |

Notes

(1) Operating income before performance-related fees for Eastspring Investments can be further analysed as follows:

| | Retail \$m | Margin* bps | Institutional [‡] \$m | Margin* bps | Total \$m | Margin* bps |
|------|---------------|----------------|-----------------------------------|----------------|--------------|----------------|
| 2019 | 392 | 52 | 244 | 18 | 636 | 30 |
| 2018 | 336 | 50 | 230 | 18 | 566 | 30 |

* Margin represents operating income before performance-related fees as a proportion of the related funds under management. Monthly closing internal and external funds managed by Eastspring have been used to derive the average. Any funds held by the Group's insurance operations that are managed by third parties outside the Prudential Group are excluded from these amounts.

† Cost/income ratio represents cost as a percentage of operating income before performance-related fees.

‡ Institutional includes internal funds.

(2) Operating income and expense include the Group's share of contribution from joint ventures (but excludes any contribution from associates). In the consolidated income statement of the Group IFRS basis results, the net post-tax income of the joint ventures and associates is shown as a single line item.

(c) Eastspring Investments total funds under management

Eastspring Investments, the Group's asset management business in Asia, manages funds from external parties and also funds for the Group's insurance operations. The table below analyses the total funds managed and Eastspring Investments.

| | 31 Dec 2019 \$bn | 31 Dec 2018 \$bn |
|---|---------------------|---------------------|
| External funds under management ^{note (1)} : | | |
| Retail | 73.7 | 55.3 |
| Institutional* | 37.7 | 7.7 |
| Money market funds (MMF) | 13.3 | 14.8 |

I Additional financial information continued

I(vi) Reconciliation of expected transfer of value of in-force business and required capital to free surplus

The tables below show how the value of in-force business (VIF) generated by the in-force long-term business and the associated required capital is modelled as emerging into free surplus over the next 40 years. Although circa 7 per cent of the Group's embedded value emerges after this date, analysis of cash flows emerging in the years shown in the tables is considered most meaningful. The modelled cash flows use the same methodology underpinning the Group's embedded value reporting and so are subject to the same assumptions and sensitivities used to prepare our 2019 results.

In addition to showing the amounts, both discounted and undiscounted, expected to be generated from all in-force business at 31 December 2019, the tables also present the expected future free surplus to be generated from the investment made in new business during 2019 over the same 40-year period for long-term business operations.

| Expected period of emergence | 31 Dec 2019 \$m | | | | | |
|--|--|--------|-------------|---|-------|-------------|
| | Undiscounted expected generation from all in-force business* | | | Undiscounted expected generation from new business written* | | |
| | Asia | US | Group total | Asia | US | Group total |
| 2020 | 1,963 | 1,523 | 3,486 | 291 | 325 | 616 |
| 2021 | 2,088 | 1,445 | 3,533 | 244 | 45 | 289 |
| 2022 | 1,941 | 1,412 | 3,353 | 225 | 101 | 326 |
| 2023 | 1,965 | 1,500 | 3,465 | 207 | 120 | 327 |
| 2024 | 1,895 | 1,574 | 3,469 | 223 | 119 | 342 |
| 2025 | 1,874 | 1,528 | 3,402 | 202 | 26 | 228 |
| 2026 | 1,917 | 1,514 | 3,431 | 223 | 9 | 232 |

| 2038 | 1,550 | 312 | 1,862 | 169 | 35 | 204 |
| 2039 | 1,535 | 243 | 1,778 | 177 | 70 | 247 |
| 2040-2044 | 7,360 | 977 | 8,337 | 869 | 140 | 1,009 |
| 2045-2049 | 7,055 | - | 7,055 | 887 | - | 887 |
| 2050-2054 | 7,073 | - | 7,073 | 987 | - | 987 |
| 2055-2059 | 6,468 | - | 6,468 | 958 | - | 958 |
| Total free surplus expected to emerge in the next 40 years | 63,023 | 22,660 | 85,683 | 7,723 | 2,120 | 9,843 |

* The analysis excludes amounts incorporated into VIF at 31 December 2019 where there is no definitive time frame for when the payments will be made or receipts received. It also excludes any free surplus emerging after 2059.

The discounted expected generation from new business written in 2019 can be reconciled to the new business profit for long-term business operations as follows:

| | 2019 \$m | | |
|---|----------|-------|-------------|
| | Asia | US | Group total |
| Undiscounted expected free surplus generation for years 2020 to 2059 | 7,723 | 2,120 | 9,843 |
| Less: discount effect | (4,211) | (721) | (4,932) |
| Discounted expected free surplus generation for years 2020 to 2059 | 3,512 | 1,399 | 4,911 |
| Discounted expected free surplus generation for years after 2059 | 771 | - | 771 |
| Discounted expected free surplus generation from new business written in 2019 | 4,283 | 1,399 | 5,682 |
| Free surplus investment in new business | (619) | (539) | (1,158) |
| Other items† | (142) | 23 | (119) |
| EEV new business profit for long-term business operations | 3,522 | 883 | 4,405 |

† Other items represent the impact of the time value of options and guarantees on new business, foreign exchange effects and other non-modelled items. Foreign exchange effects arise as EEV new business profit amounts are translated at average exchange rates and the expected free surplus generation is translated at closing rates.

The undiscounted expected free surplus generation from all in-force business at 31 December 2019 shown below can be reconciled to the amount that was expected to be generated as at 31 December 2018 as follows:

| Group | 2019 \$m | 2020 \$m | 2021 \$m | 2022 \$m | 2023 \$m | 2024 \$m | Other \$m | Total \$m |

* Excluding 2019 new business.

† Including impact of US EEV hedge modelling enhancements as described in note 7 of the EEV financial statements.

At 31 December 2019, the total free surplus expected to be generated from continuing operations over the next five years (2020 to 2024 inclusive), using the same assumptions and methodology as those underpinning our 2019 embedded value reporting, was \$17.3 billion (31 December 2018: \$19.8 billion).

I Additional financial information continued

I(vi) Reconciliation of expected transfer of value of in-force business (VIF) and required capital to free surplus continued

At 31 December 2019, the total free surplus expected to be generated on an undiscounted basis in the next 40 years is \$85.7 billion, \$(0.6) billion lower than the \$86.3 billion expected at the end of 2018 from continuing operations, with the \$2.4 billion increase in Asia being more than offset by the \$(3.0) billion decrease in the US. In Asia the increase from new business of \$7.7 billion, together with favourable foreign exchange gains and operating assumption updates following the annual review of experience, more than offset the effect of generally lower interest rates across the region decreasing projected returns. At 31 December 2019 expected free surplus generation in Asia for the next 40 years is \$63.0 billion (31 December 2018: \$60.6 billion). In the US new business contributed \$2.1 billion to expected free surplus generation. Operating, non-operating and other movements were \$(3.1) billion, principally driven by the impact of lower interest rates and the effect of the NAIC reform, hedge modelling and other related changes described in note 7 of the EEV financial statements. At 31 December 2019 expected free surplus generation in the US for the next 40 years is \$22.7 billion (31 December 2018: \$25.7 billion).

Actual underlying free surplus generated in 2019 from life business in force at the end of 2018, before the impact of US EEV hedge modelling enhancements and restructuring costs, was \$4.7 billion including \$0.6 billion of changes in operating assumptions and experience variances. This compares with the expected 2019 realisation at the end of 2018 of \$4.0 billion.

This can be analysed further as follows:

| | 2019 \$m | | |
|--|--------------|--------------|--------------|
| | Asia | US | Group total |
| Transfer to free surplus in 2019 before impact of US EEV hedge modelling enhancements | 1,914 | 2,070 | 3,984 |
| Expected return on free assets | 80 | 61 | 141 |
| Changes in operating assumptions and experience variances | 147 | 411 | 558 |
| Underlying free surplus generated from in-force life business before impact of US EEV hedge modelling enhancements and restructuring costs* | 2,141 | 2,542 | 4,683 |
| 2019 free surplus expected to be generated at 31 December 2018 | 1,987 | 2,017 | 4,004 |

* Underlying free surplus generated from in-force life business before restructuring costs in 2019 in the US was \$1,639 million (Group total \$3,780 million), after reflecting the \$(903) million impact of US EEV hedge modelling enhancements described in note 7 of the EEV financial statements.

The equivalent discounted amounts of the undiscounted expected transfers from in-force business and required capital into free surplus shown previously are as follows:

| Expected period of emergence | 31 Dec 2019 \$m | | | | | |
|--|---|---------------|---------------|--|--------------|--------------|
| | Discounted expected generation from all in-force business | | | Discounted expected generation from new business written | | |
| | Asia | US | Group total | Asia | US | Group total |
| 2020 | 1,890 | 1,468 | 3,358 | 279 | 320 | 599 |
| 2021 | 1,910 | 1,313 | 3,223 | 218 | 42 | 260 |
| 2022 | 1,674 | 1,212 | 2,886 | 189 | 92 | 281 |
| 2023 | 1,608 | 1,212 | 2,820 | 165 | 102 | 267 |
| 2024 | 1,479 | 1,203 | 2,682 | 169 | 100 | 269 |
| 2025 | 1,397 | 1,105 | 2,502 | 147 | 22 | 169 |
| 2026 | 1,363 | 1,034 | 2,397 | 158 | 7 | 165 |
| 2027 | 1,281 | 966 | 2,247 | 147 | 98 | 245 |
| 2028 | 1,206 | 865 | 2,071 | 134 | 114 | 248 |
| 2029 | 1,088 | 765 | 1,853 | 137 | 90 | 227 |
| 2030 | 991 | 690 | 1,681 | 109 | 70 | 179 |
| 2031 | 938 | 595 | 1,533 | 99 | 59 | 158 |
| 2032 | 863 | 496 | 1,359 | 88 | 48 | 136 |
| 2033 | 819 | 345 | 1,164 | 82 | 39 | 121 |
| 2034 | 783 | 298 | 1,081 | 86 | 39 | 125 |
| 2035 | 737 | 256 | 993 | 76 | 30 | 106 |
| 2036 | 709 | 210 | 919 | 73 | 23 | 96 |
| 2037 | 682 | 151 | 833 | 70 | 18 | 88 |
| 2038 | 651 | 118 | 769 | 66 | 13 | 79 |
| 2039 | 619 | 90 | 709 | 67 | 24 | 91 |
| 2040-2044 | 2,631 | 302 | 2,933 | 292 | 49 | 341 |
| 2045-2049 | 2,060 | – | 2,060 | 244 | – | 244 |
| 2050-2054 | 1,730 | – | 1,730 | 232 | – | 232 |
| 2055-2059 | 1,294 | – | 1,294 | 185 | – | 185 |
| Total discounted free surplus expected to emerge in the next 40 years | 30,403 | 14,694 | 45,097 | 3,512 | 1,399 | 4,911 |

The discounted expected generation from all in-force business can be reconciled to the total embedded value for long-term business operations as follows:

| | 31 Dec 2019 \$m |
|--|--------------------|
| Discounted expected generation from all in-force business for years 2020 to 2059 | 45,097 |
| Discounted expected generation from all in-force business for years after 2059 | 3,892 |
| Discounted expected generation from all in-force business at 31 December 2019 | 48,989 |
| Free surplus of life operations held at 31 December 2019 | 5,395 |
| Other items* | (205) |
| Total EEV for long-term business operations | 54,179 |

* Other items represent the impact of the time value of options and guarantees and other non-modelled items.

I Additional financial information continued

I(vii) Option schemes

The Group presently grants share options through three schemes and exercises of the options are satisfied by the issue of new shares. Executive directors and eligible employees based in the UK may participate in the Prudential Savings-Related Share Option Scheme. Executives and eligible employees based in Asia as well as, prior to the demerger of M&G plc from the Prudential Group, eligible employees of M&G plc based in Europe can participate in the Prudential International Savings-Related Share Option Scheme, while agents based in certain regions of Asia can participate in the Prudential International Savings-Related Share Option Scheme for Non-Employees. Further details of the schemes and accounting policies are detailed in note B2.2 of the IFRS basis consolidated financial statements.

All options were granted at nil consideration. No options have been granted to substantial shareholders, suppliers of goods or services (excluding options granted to agents under the Prudential International Savings-Related Share Option Scheme for Non-Employees) or in excess of the individual limit for the relevant scheme. The maximum share entitlement of each participant under the relevant scheme for each option granted is limited to the total savings and any bonus or interest accumulated under that participant's savings contract, divided by the exercise price. At 31 December 2019, the maximum number of shares issued or issuable under the schemes, which were approved by shareholders, to all participants would not exceed 1 per cent of the issued share capital of the Company in the preceding 12-month period.

The option schemes will terminate as follows, unless the directors resolve to terminate the plans at an earlier date:

- Prudential Savings-Related Share Option Scheme: 16 May 2023;
- Prudential International Savings-Related Share Option Scheme: 19 May 2021; and
- Prudential International Savings-Related Share Option Scheme for Non-Employees 2012: 12 May 2022.

The weighted average share price of Prudential plc for the year ended 31 December 2019 was £15.05 (2018: £17.36).

Particulars of options granted to directors are included in the Directors' remuneration report on page 160.

The closing prices of the shares immediately before the date on which the options were granted during the year were £14.00 for the Prudential Savings-Related Share Option Scheme and £14.57 for the Prudential International Savings-Related Share Option Scheme for Non-Employees.

The following analyses show the movement in options for each of the option schemes for the year ended 31 December 2019.

Prudential Savings-Related Share Option Scheme

| Date of grant | Exercise price £ | Exercise period | | Number of options | | | | | | End of year |
|---------------|------------------|-----------------|-----------|-------------------|---------|-----------|-----------|-----------|-----------|-------------|
| | | Beginning | End | Beginning of year | Granted | Exercised | Cancelled | Forfeited | Lapsed | |

| 22 Sep 15 | 11.11 | 01 Dec 20 | 31 May 21 | 180,526 | – | (52,592) | (6,291) | (540) | (17,963) | 103,140 |
| 21 Sep 16 | 11.04 | 01 Dec 19 | 31 May 20 | 538,927 | – | (269,207) | (12,855) | (10,376) | (20,687) | 225,802 |
| 21 Sep 16 | 11.04 | 01 Dec 21 | 31 May 22 | 121,105 | – | (19,769) | (5,676) | (1,086) | (17,330) | 77,244 |
| 21 Sep 17 | 14.55 | 01 Dec 20 | 31 May 21 | 668,276 | – | (20,814) | (62,176) | (20,565) | (62,585) | 502,136 |
| 21 Sep 17 | 14.55 | 01 Dec 22 | 31 May 23 | 115,347 | – | (2,791) | (6,573) | (1,030) | (12,013) | 92,940 |
| 29 Nov 19 | 11.18 | 01 Jan 23 | 30 Jun 23 | – | 93,145 | – | (322) | – | – | 92,823 |
| 29 Nov 19 | 11.18 | 01 Jan 25 | 30 Jun 25 | – | 21,464 | – | – | – | – | 21,464 |
| | | | | 2,212,373 | 114,609 | (798,235) | (97,038) | (38,816) | (141,381) | 1,251,512 |

The total number of securities available for issue under the scheme is 1,251,512 which represents 0.048 per cent of the issued share capital at 31 December 2019.

M&G plc employees with outstanding options on demerger were treated as 'good leavers', with both the vesting period and number of options exercisable curtailed on demerger.

The weighted average closing price of the shares immediately before the dates on which the options were exercised during the current period was £14.69.

The weighted average fair value of options granted under the plan in the period was £3.35.

Prudential International Savings-Related Share Option Scheme

| Date of grant | Exercise price £ | Exercise period | | Beginning of year | Number of options | | | | | End of year |

There are no securities available for issue under the scheme at 31 December 2019.

At the time of the demerger, the only participants with outstanding options in this plan were M&G plc employees.

The outstanding options over Prudential plc shares did not vest at demerger. Instead, they have been exchanged for an equivalent grant in M&G plc shares. The M&G plc participants have been treated as 'good leavers'.

The weighted average closing price of the shares immediately before the dates on which the options were exercised during the current period was £15.83.

There were no options granted under the plan during the current period.

| | | | | 2,596,096 | 510,623 | 318,837 | (857,152) | (12,921) | (1,548) | – | 2,553,935 |

* As a result of the demerger of M&G plc, the exercise price of the outstanding share options at 18 October 2019 and the total number of shares have been adjusted with effect from 21 October 2019. These adjustments do not change the overall fair value of the options and were confirmed as being fair and reasonable by an independent financial adviser in accordance with the rules of that plan and the Hong Kong Stock Exchange Listing Rules.

The total number of securities available for issue under the scheme is 2,553,935 which represents 0.098 per cent of the issued share capital at 31 December 2019.

The weighted average closing price of the shares immediately before the dates on which the options were exercised during the current period was £15.06.

The weighted average fair value of options granted under the plan in the period was £2.90.

I Additional financial information continued

I(viii) Selected historical financial information of Prudential

The following table sets forth Prudential's selected consolidated financial data for the periods indicated. Certain data is derived from Prudential's audited consolidated financial statements prepared in accordance with International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board (IASB) and as adopted by the European Union (EU) and European Embedded Value (EEV).

This table is only a summary and should be read in conjunction with Prudential's consolidated financial statements and the related notes included elsewhere in this document.

Notes

- (i) This measure is the formal profit (loss) before tax measure under IFRS. It is not the result attributable to shareholders.
- (ii) Adjusted operating profit is determined on the basis of including longer-term investment returns. EEV and IFRS operating profits are stated after excluding the effect of short-term fluctuations in investment returns on shareholder-backed business gain or loss on corporate transactions and costs connected to the demerger of M&G plc from Prudential plc. Separately, for IFRS basis results, operating profit also excludes amortisation of acquisition accounting adjustments arising on the purchase of business. For EEV basis results, operating profit excludes the effect of changes in economic assumptions and the mark-to-market value movements on core structural borrowings for shareholder-financed operations.
- (iii) Funds under management comprise funds of the Group held in the statement of financial position and external funds that are managed by the Group's asset management operations. The comparative results from 2015 to 2018 have been re-presented from those previously published to exclude the discontinued UK and Europe operations and for other adjustments as described in note I(ii).
- (iv) The 2019 surplus is estimated under the LCSM regime, adopted by the Group following the demerger of its UK and Europe operations in October 2019, as discussed in note I(i), with 2018 comparative information re-presented on this basis. Prior to the demerger, the Group was subject to the Solvency II capital requirements.
- (v) The comparative results from 2015 to 2018 have been re-presented from those previously published for the demerger of the Group's UK and Europe operations, M&G plc, in October 2019 which is reclassified as discontinued operations.

II Calculation of alternative performance measures

The annual report uses alternative performance measures (APMs) to provide more relevant explanations of the Group's financial position and performance. This section sets out explanations for each APM and reconciliations to relevant IFRS balances.

II(i) Reconciliation of adjusted IFRS operating profit based on longer-term investment returns to profit before tax from continuing operations

Adjusted IFRS operating profit attributable to shareholders based on longer-term investment returns from continuing operations (operating profit) presents the operating performance of the business. This measurement basis adjusts for the following items within total IFRS profit before tax:

- Short-term fluctuations in investment returns on shareholder-backed business;
- Amortisation of acquisition accounting adjustments arising on the purchase of business; and
- Gain or loss on corporate transactions, such as disposals undertaken in the year and costs connected to the demerger of M&G plc from Prudential plc.

More details on how adjusted IFRS operating profit based on longer-term investment returns is determined are included in note B1.3 of the Group IFRS basis results. A full reconciliation to profit after tax is given in note B1.1.

II(ii) Calculation of IFRS gearing ratio

IFRS gearing ratio is calculated as net core structural borrowings of shareholder-financed businesses divided by closing IFRS shareholders' equity plus net core structural borrowings.

| | 31 Dec 2019 \$m | 31 Dec 2018 \$m |
|--|--------------------|--------------------|
| Core structural borrowings of shareholder-financed businesses | 5,594 | 9,761 |
| Less holding company cash and short-term investments | (2,207) | (4,121) |
| Net core structural borrowings of shareholder-financed businesses | 3,387 | 5,640 |
| Closing shareholders' equity | 19,477 | 21,968 |
| Closing shareholders' equity plus net core structural borrowings | 22,864 | 27,608 |
| IFRS gearing ratio | 15% | 20% |

II(iii) Return on IFRS shareholders' funds

Operating return on IFRS shareholders' funds is calculated as adjusted operating profit net of tax and non-controlling interests divided by closing shareholders' equity. Total comprehensive return on shareholders' funds is calculated as IFRS total comprehensive income for the period net of tax and non-controlling interests divided by closing shareholders' equity. Following the demerger of the UK and Europe operations in October 2019 and their treatment as discontinued, it is more meaningful to derive the 2019 return using profit from continuing operations and closing shareholders' equity. The Group will be introducing a new return on equity performance measure for the Group's 2020 Prudential Long-Term Incentive Plan (PLTIP) awards alongside other metrics. This measure is to be calculated as adjusted operating profit after tax and net of non-controlling interests, divided by average shareholders' equity. Accordingly, the calculation of the return on IFRS shareholders' funds going forward will be aligned to be based on average shareholders' equity.

Detailed reconciliation of adjusted operating profit based on longer-term investment returns to IFRS profit before tax for the Group's continuing operations is shown in note B1.1 to the Group IFRS basis results.

| | 2019 \$m | | | | | |
|---|----------|---------|---|---------|----------------------------------|--|
| | Asia | US | Unallocated to a segment (central operations) | Group | Add back demerger-related items* | Adjusted Group (excluding demerger-related items*) |
| Continuing operations | | | | | | |
| Adjusted operating profit based on longer-term investment returns | 3,276 | 3,070 | (1,036) | 5,310 | 179 | 5,489 |
| Tax on operating profit | (436) | (437) | 100 | (773) | (34) | (807) |
| Profit attributable to non-controlling interests | (6) | – | (3) | (9) | – | (9) |
| Adjusted operating profit based on longer-term investment returns, net of tax and non-controlling interests | 2,834 | 2,633 | (939) | 4,528 | 145 | 4,673 |
| Non-operating profit (loss), net of tax | 885 | (3,013) | (456) | (2,584) | 383 | (2,201) |
| IFRS profit for the year net of tax and non-controlling interests | 3,719 | (380) | (1,395) | 1,944 | 528 | 2,472 |
| Other comprehensive income, net of tax and non-controlling interests | 192 | 2,679 | (146) | 2,725 | – | 2,725 |
| IFRS total comprehensive income | 3,911 | 2,299 | (1,541) | 4,669 | 528 | 5,197 |
| Closing shareholders' funds | 10,866 | 8,929 | (318) | 19,477 | – | 19,477 |
| Operating return on shareholders' funds (%) | 26% | 29% | n/a | 23% | – | 24% |
| Total comprehensive return on shareholders' funds (%) | 36% | 26% | n/a | 24% | – | 27% |

* Demerger-related items comprise interest on the subordinated debt that was substituted to M&G plc prior to the demerger (\$179 million pre-tax) and one-off costs of the demerger (\$407 million pre-tax).

| | 2018 \$m | |
|---|----------|---------|
| | Asia | US |
| Adjusted operating profit based on longer-term investment returns | 2,888 | 2,563 |
| Tax on operating profit | (411) | (402) |
| Profit attributable to non-controlling interests | (1) | – |
| Adjusted operating profit based on longer-term investment returns, net of tax and non-controlling interests | 2,476 | 2,161 |
| Non-operating profit (loss), net of tax | (662) | (179) |
| IFRS profit for the year, net of tax and non-controlling interests | 1,814 | 1,982 |
| Other comprehensive income, net of tax and non-controlling interests | (206) | (1,446) |
| IFRS total comprehensive income | 1,608 | 536 |
| Closing shareholders' funds | 8,175 | 7,163 |
| Operating return on shareholders' funds (%) | 30% | 30% |
| Total comprehensive return on shareholders' funds (%) | 20% | 7% |

* Given the significant changes of Group shareholders' funds as a result of the demerger of the UK and Europe operations in October 2019, it is not meaningful to compare the 2019 and 2018 returns on shareholders' funds at a Group level. The 2018 comparatives have therefore excluded the presentation of a Group return on shareholders' funds. Additionally, the 2018 comparatives for Asia and US operations have been re-presented from those previously published to reflect the use of closing rather than opening shareholders' funds to be on a comparable basis with the 2019 calculation.

II Calculation of alternative performance measures continued

II(iv) Calculation of IFRS shareholders' funds per share

IFRS shareholders' funds per share is calculated as closing IFRS shareholders' equity divided by the number of issued shares at 31 December 2019 of 2,601 million (31 December 2018: 2,593 million). The demerger alters the size of the Group's shareholders' equity and the nature of its operations, rendering a comparison with the prior year return on shareholders' funds value unrepresentative.

| | 2019 | | | Group total |
|--|-------------|-------------|--------------|-------------|
| | Asia | US | Other | |
| Closing IFRS shareholders' equity (\$ million) | 10,866 | 8,929 | (318) | 19,477 |
| Shareholders' funds per share (cents) | 418¢ | 343¢ | (12)¢ | 749¢ |

II(v) Calculation of asset management cost/income ratio

The asset management cost/income ratio is calculated as asset management operating expenses, adjusted for commission and joint venture contribution, divided by asset management total IFRS revenue adjusted for commission, joint venture contribution, performance-related fees and non-operating items.

| | Eastspring Investments | |
|--|------------------------|------------|
| | 2019 \$m | 2018 \$m |
| Operating income before performance-related fees ^{note} | 636 | 566 |
| Share of joint venture revenue | (244) | (250) |
| Commission | 165 | 156 |
| Performance-related fees | 12 | 23 |
| IFRS revenue | 569 | 495 |
| Operating expense | 329 | 311 |
| Share of joint venture expense | (102) | (133) |
| Commission | 165 | 156 |
| IFRS charges | 392 | 334 |
| Cost/income ratio: operating expense/operating income before performance-related fees | 52% | 55% |

Note

Operating income and expense include the Group's share of contribution from joint ventures (but excludes any contribution from associates). In the consolidated income statement of the Group IFRS basis results, the net post-tax income of the joint ventures and associates is shown as a single line item.

II(vi) Reconciliation of Asia renewal insurance premium to gross premiums earned

Reconciliation of Asia renewal insurance premium to gross earned premiums and calculation of Asia Life weighted premium income.

| | 2019 \$m | 2018 \$m | |
|---|---------------|----------|---------|
| | | AER | CER |
| Asia renewal insurance premium | 19,007 | 17,165 | 17,046 |
| Add: General insurance premium | 135 | 120 | 122 |
| Add: IFRS gross earned premium from new regular and single premium business | 6,386 | 6,421 | 6,402 |
| Less: Renewal premiums from joint ventures | (1,771) | (1,717) | (1,657) |
| Asia segment IFRS gross premiums earned | 23,757 | 21,989 | 21,913 |
| Asia renewal insurance premium (as above) | 19,007 | 17,165 | 17,046 |
| Asia APE (see Note II(vi)) | 5,161 | 4,999 | 4,959 |
| Asia life weighted premium income | 24,168 | 22,164 | 22,005 |

II(vii) Reconciliation of APE new business sales to gross premiums earned

The Group reports APE new business sales as a measure of the new policies sold in the period. This differs from the IFRS measure of gross premiums earned as shown below:

| | 2019 \$m | 2018 \$m |
|--|---------------|---------------|
| Annual premium equivalents (APE) from continuing operations | 7,384 | 7,058 |
| Adjustment to include 100% of single premiums on new business sold in the year ^{note (a)} | 23,409 | 21,318 |
| Premiums from in-force business and other adjustments ^{note (b)} | 14,271 | 17,238 |
| Gross premiums earned from continuing operations | 45,064 | 45,614 |

Notes

- (a) APE new business sales only include one tenth of single premiums, recorded on policies sold in the year. Gross premiums earned include 100 per cent of such premiums.
- (b) Other adjustments principally include amounts in respect of the following:
- Gross premiums earned include premiums from existing in-force business as well as new business. The most significant amount is recorded in Asia, where a significant portion of regular premium business is written. Asia in-force premiums form the vast majority of the other adjustment amount;
 - In October 2018, Jackson entered into a 100 per cent reinsurance agreement with John Hancock Life Insurance Company to acquire a closed block of group payout annuity business. The transaction resulted in an addition to gross premiums earned of \$5.0 billion in 2018. No amounts were included in APE new business sales.
 - APE includes new policies written in the year which are classified as investment contracts without discretionary participation features under IFRS 4, arising mainly in Jackson for guaranteed investment contracts and in M&G plc for certain unit-linked savings and similar contracts. These are excluded from gross premiums earned and recorded as deposits;
 - APE new business sales are annualised while gross premiums earned are recorded only when revenues are due; and
 - For the purpose of reporting APE new business sales, the Group's share of amounts sold by the Group's insurance joint ventures and associates are included. Under IFRS, joint ventures and associates are equity accounted and so no amounts are included within gross premiums earned.

II(viii) Reconciliation between IFRS and EEV shareholders' equity

The table below shows the reconciliation of EEV shareholders' equity and IFRS shareholders' equity at the end of the year:

| | 31 Dec 2019 \$m | 31 Dec 2018 \$m |
|--|--------------------|--------------------|
| EEV shareholders' equity | 54,711 | 63,402 |
| Less: Value of in-force business of long-term business ^{note (a)} | (41,893) | (42,045) |
| Deferred acquisition costs assigned zero value for EEV purposes | 14,239 | 12,834 |
| Other ^{note (b)} | (7,580) | (12,223) |
| IFRS shareholders' equity | 19,477 | 21,968 |

Notes

- (a) The EEV shareholders' equity comprises the present value of the shareholders' interest in the value of in-force business, total net worth of long-term business operations and IFRS shareholders' equity of asset management and other operations. The value of in-force business reflects the present value of expected future shareholder cash flows from long-term in-force business which are not captured as shareholders' interest on an IFRS basis. Total net worth represents the net assets for EEV reporting that reflect the regulatory basis position, with adjustments to achieve consistency with the IFRS treatment of certain items as appropriate.
- (b) Other adjustments represent asset and liability valuation differences between IFRS and the local regulatory reporting basis used to value total net worth for long-term insurance operations. These also include the mark-to-market value movements of the Group's core structural borrowings which are fair valued under EEV but are held at amortised cost under IFRS. The most significant valuation differences relate to changes in the valuation of insurance liabilities. For example, in Jackson, IFRS liabilities are higher than the local regulatory basis as they are principally based on policyholder account balances (with a deferred acquisition costs recognised as an asset), whereas the local regulatory basis used for EEV reporting is based on expected future cash flows due to the policyholder on a prudent basis, with the consideration of an expense allowance, as applicable, but with no separate deferred acquisition cost asset.

II Calculation of alternative performance measures continued

II(ix) Calculation of return on embedded value

Return on embedded value is calculated as the total post-tax EEV profit for the year as a percentage of closing EEV basis shareholders' equity.

| | 2019 | | | | | |
|--|------------|--------------|--------------------|-------------|-------------------------|--|
| | Asia | US | Central operations | Group total | Demerger related items* | Adjusted Group total (excluding demerger related items*) |
| EEV basis profit (loss) for the year from continuing operations, net of tax and non-controlling interests (\$ million) | 8,063 | (2,025) | (1,886) | 4,152 | (528) | 4,680 |
| Closing EEV basis shareholders' equity (\$ million) | 39,235 | 16,342 | (866) | 54,711 | (528) | 55,239 |
| Total return on shareholders' funds (%) | 21% | (12)% | n/a | 8% | n/a | 8% |

| | 2018† | |
|--|------------|-----------|
| | Asia | US |
| EEV basis profit for the year, net of tax and non-controlling interests (\$ million) | 4,808 | 1,052 |
| Closing EEV basis shareholders' equity (\$ million) | 32,008 | 18,709 |
| Total return on shareholders' funds (%) | 15% | 6% |

* Demerger-related items comprise interest on the subordinated debt that was substituted to M&G plc prior to the demerger and one-off costs of the demerger.

† Given the significant changes of Group shareholders' funds as a result of the demerger of the UK and Europe operations in October 2019, it is not meaningful to compare the 2019 and 2018 returns on shareholders' funds at a Group level. The 2018 comparatives have therefore excluded the presentation of a Group return on shareholders' funds. Additionally, the 2018 comparatives for Asia and US operations have been re-presented from those previously published to reflect the use of closing rather than opening shareholders' funds to be on a comparable basis with the 2019 calculation.

Operating return on embedded value is calculated as the post-tax EEV operating profit for the year as a percentage of closing EEV basis shareholders' equity.

| | 2019 | | 2018 | |
|---|------------|------------|------------|------------|
| | Asia | US | Asia | US |
| EEV basis operating profit for the year from continuing operations, net of tax (\$ million) | 6,138 | 1,782 | 6,070 | 2,828 |
| Closing EEV basis shareholders' equity (\$ million) | 39,235 | 16,342 | 32,008 | 18,709 |
| Operating return on shareholders' funds (%) | 16% | 11% | 19% | 15% |

II(x) Calculation of EEV shareholders' funds per share

EEV shareholders' funds per share is calculated as closing EEV shareholders' equity divided by the number of issued shares at 31 December 2019 of 2,601 million (31 December 2018: 2,593 million). EEV shareholders' funds per share excluding goodwill attributable to shareholders is calculated in the same manner, except goodwill attributable to shareholders is deducted from closing EEV shareholders' equity. 2018 comparatives have been restated to show amounts attributable to continuing operations on a comparable basis.

| | 31 Dec 2019 | | | |
|---|---------------|-------------|--------------|---------------|
| | Asia | US | Other | Group total |
| Closing EEV shareholders' equity (\$ million) | 39,235 | 16,342 | (866) | 54,711 |
| Less: Goodwill attributable to shareholders (\$ million) | (796) | – | (26) | (822) |
| Closing EEV shareholders' equity excluding goodwill attributable to shareholders (\$ million) | 38,439 | 16,342 | (892) | 53,889 |
| Shareholders' funds per share (in cents) | 1,508¢ | 628¢ | (33)¢ | 2,103¢ |
| Shareholders' funds per share excluding goodwill attributable to shareholders (in cents) | 1,478¢ | 628¢ | (34)¢ | 2,072¢ |

| | 31 Dec 2018 | | | |
|---|---------------|-------------|---------------|---------------|
| | Asia | US | Other | Group total |
| Closing EEV shareholders' equity (\$ million) | 32,008 | 18,709 | (4,616) | 46,101 |
| Less: Goodwill attributable to shareholders (\$ million) | (634) | – | – | (634) |
| Closing EEV shareholders' equity excluding goodwill attributable to shareholders (\$ million) | 31,374 | 18,709 | (4,616) | 45,467 |
| Shareholders' funds per share (in cents) | 1,234¢ | 722¢ | (178)¢ | 1,778¢ |
| Shareholders' funds per share excluding goodwill attributable to shareholders (in cents) | 1,209¢ | 722¢ | (178)¢ | 1,753¢ |

II (xi) Calculation of new business contribution/embedded value

New business contribution/embedded value is calculated as the post-tax EEV new business contribution for the year as a percentage of closing EEV basis shareholders' equity.

| | 2019 | | 2018 | |
|---|--------|--------|--------|--------|
| | Asia | US | Asia | US |
| New business contribution (\$ million) | 3,522 | 883 | 3,477 | 1,230 |
| Closing EEV basis shareholders' equity (\$ million) | 39,235 | 16,342 | 32,008 | 18,709 |
| | 9% | 5% | 11% | 7% |

Risk factors

A number of risk factors affect Prudential's operating results and financial condition and, accordingly, the trading price of its shares. The risk factors mentioned below should not be regarded as a complete and comprehensive statement of all potential risks and uncertainties. The information given is as of the date of this document, and any forward-looking statements are made subject to the reservations specified under 'Forward-looking statements'.

Prudential's approaches to managing risks are explained in the section of this document headed 'Group Chief Risk and Compliance Officer's Report on the risks facing our business and how these are managed'.

Risks relating to Prudential's financial situation

Prudential's businesses are inherently subject to market fluctuations and general economic conditions

Uncertainty, fluctuations or negative trends in international economic and investment climates could have a material adverse effect on Prudential's business and profitability. Prudential operates in a macroeconomic and global financial market environment that presents significant uncertainties and potential challenges. For example, interest rates in the US and some Asian countries in which Prudential operates remain low relative to historical levels, and the transition to a lower carbon economy may impact on long-term asset valuations.

Global financial markets are subject to uncertainty and volatility created by a variety of factors. These factors include monetary policy in China, the US and other jurisdictions together with their impact on the valuation of all asset classes and effect on interest rates and inflation expectations, concerns over sovereign debt, a general slowing in world growth. Other factors include the increased level of geopolitical risk and policy-related uncertainty (including the broader market impacts resulting from the trade negotiations between the US and China), and socio-political, climate-driven and pandemic events and other outbreaks such as the recent coronavirus. The extent of financial market and economic impact of these factors may be influenced by the actions, including the effectiveness of mitigating measures, of governments, policymakers and the public.

The adverse effects of such factors could be felt principally through the following items:

- Lower interest rates and reduced investment returns arising on the Group's portfolios including impairment of debt securities and loans, which could reduce Prudential's capital and impair its ability to write significant volumes of new business, increase the potential adverse impact of product guarantees included in Jackson's variable annuities and non unit-linked investment products in Asia, and/or have a negative impact on its assets under management and profit.
- A reduction in the financial strength and flexibility of corporate entities which may result in a deterioration of the credit rating profile and valuation of the Group's invested credit portfolio, as well as higher credit defaults and wider credit and liquidity spreads resulting in realised and unrealised credit losses.
- Failure of counterparties who have transactions with Prudential (e.g. banks and reinsurers) to meet commitments that could give rise to a negative impact on Prudential's financial position and on the accessibility or recoverability of amounts due or, for derivative transactions, adequate collateral not being in place.
- Estimates of the value of financial instruments becoming more difficult because in certain illiquid or closed markets, determining the value at which financial instruments can be realised is highly subjective. Processes to ascertain such values require substantial elements of judgement, assumptions and estimates (which may change over time).
- Increased illiquidity, which also adds to uncertainty over the accessibility of financial resources and may reduce capital resources as valuations decline. This could occur where external capital is unavailable at sustainable cost, increased liquid assets are required to be held as collateral under derivative transactions or redemption restrictions are placed on Prudential's investments in illiquid funds. In addition, significant redemption requests could also be made on Prudential's issued funds and while this may not have a direct impact on the Group's liquidity, it could result in reputational damage to Prudential. The potential impact of increased illiquidity is more uncertain than for other risks such as interest rate or credit risk.

In general, upheavals in the financial markets may affect general levels of economic activity, employment and customer behaviour. As a result, insurers may experience an elevated incidence of claims, lapses, or surrenders of policies, and some policyholders may choose to defer or stop paying insurance premiums. The demand for insurance products may also be adversely affected. In addition, there may be a higher incidence of counterparty failures. If sustained, this environment is likely to have a negative impact on the insurance sector over time and may consequently have a negative impact on Prudential's business and its balance sheet and profitability. For example, this could occur if the recoverable value of intangible assets for bancassurance agreements and deferred acquisition costs are reduced. New challenges related to market fluctuations and general economic conditions may continue to emerge.

For some non-unit-linked investment products, in particular those written in some of the Group's Asia operations, it may not be possible to hold assets which will provide cash flows to match those relating to policyholder liabilities. This is particularly true in those countries where bond markets are not developed and in certain markets where regulated premium and claim values are set with reference to the interest rate environment prevailing at the time of policy issue. This results in a mismatch due to the duration and uncertainty of the liability cash flows and the lack of sufficient assets of a suitable duration. While this residual asset/liability mismatch risk can be managed, it cannot be eliminated. Where interest rates in these markets remain lower than those used to calculate premium and claim values over a sustained period, this could have a material adverse effect on Prudential's reported profit and the solvency of its business units. In addition, part of the profit from the Group's Asia operations is related to bonuses for policyholders declared on with-profits products, which are impacted by the difference between actual investment returns of the with-profits fund (which are broadly based on historical and current rates of return on equity, real estate and fixed income securities) and minimum guarantee rates offered to policyholders. This profit could be lower in particular in a sustained low interest rate environment.

Jackson writes a significant amount of variable annuities that offer capital or income protection guarantees. The value of these guarantees is affected by market factors (such as interest rates, equity values, bond spreads and realised volatility) and policyholder behaviour. Jackson uses a derivative hedging programme to reduce its exposure to market risks arising on these guarantees. There could be market circumstances where the derivatives that Jackson enters into to hedge its market risks may not cover its exposures under the guarantees. The cost of the guarantees that remain unhedged will also affect Prudential's results.

In addition, Jackson hedges the guarantees on its variable annuity book on an economic basis (with consideration of the local regulatory position) and, thus, accepts variability in its accounting results in the short term in order to achieve the appropriate result on these bases. In particular, for Prudential's Group IFRS reporting, the measurement of the Jackson variable annuity guarantees is typically less sensitive to market movements than for the corresponding hedging derivatives, which are held at market value. However, depending on the level of hedging conducted regarding a particular risk type, certain market movements can drive volatility in the economic or local regulatory results that may be less significant under IFRS reporting.

Also, Jackson has a significant spread based business with a significant proportion of its assets invested in fixed-income securities and its results are therefore affected by fluctuations in prevailing interest rates. In particular, fixed annuities and stable value products written by Jackson expose Prudential to the risk that changes in interest rates, which are not fully reflected in the interest rates credited to customers, will reduce spread. The spread is the difference between the rate of return Jackson is able to earn on the assets backing the policyholders' liabilities and the amounts that are credited to policyholders in the form of benefit increases, subject to minimum crediting rates. Declines in spread from these products or other spread businesses that Jackson conducts, and increases in surrender levels arising from interest rate rises, could have a material impact on its businesses or results of operations.

As a holding company, Prudential is dependent upon its subsidiaries to cover operating expenses and dividend payments

The Group's insurance and investment management operations are generally conducted through direct and indirect subsidiaries, which are subject to the risks discussed elsewhere in this 'Risk Factors' section.

As a holding company, Prudential's principal sources of funds are remittances from subsidiaries, shareholder-backed funds, the shareholder transfer from long-term funds and any amounts that may be raised through the issuance of equity, debt and commercial paper.

Certain of Prudential's subsidiaries are subject to applicable insurance, foreign exchange and tax laws, rules and regulations (including in relation to distributable profits) that can limit their ability to make remittances. In some circumstances, including changes to general market conditions, this could limit Prudential's ability to pay dividends to shareholders or to make available funds held in certain subsidiaries to cover operating expenses of other members of the Group.

(Geo)political risks and political uncertainty may adversely impact economic conditions, increase market volatility, cause operational disruption to the Group and impact its strategic plans, which could have adverse effects on Prudential's business and its profitability

The Group is exposed to (geo)political risks and political uncertainty in the markets in which it operates. Recent shifts in the focus of some national governments toward more protectionist or restrictive economic and trade policies, and international trade disputes, could impact on the macroeconomic outlook and the environment for global financial markets. This could take effect, for example, through increased friction in cross-border trade, such as implementation of trade tariffs or the withdrawal from existing trading blocs or agreements, and the exercise of executive powers to restrict overseas trade and/or financial transactions. The degree and nature of regulatory changes and Prudential's competitive position in some geographic markets may also be impacted, for example, through measures favouring local enterprises, such as changes to the maximum level of non-domestic ownership by foreign companies.

(Geo)political risks and political uncertainty may also adversely impact the Group's operations and its operational resilience. Increased (geo)political tensions may increase cross-border cyber activity and therefore increase cyber security risks. (Geo)political tensions may also lead to civil unrest and/or acts of civil disobedience. This includes the unrest in Hong Kong, where mass anti-government demonstrations have given rise to increased disruption throughout the region. Such events could impact operational resilience by disrupting Prudential's systems, operations, new business sales and renewals, distribution channels and services to customers, which may result in a reduction in contributions from business units to the central cash balances and profit of the Group, decreased profitability, financial loss, adverse customer impacts and reputational damage.

Prudential is subject to the risk of potential sovereign debt credit deterioration owing to the amounts of sovereign debt obligations held in its investment portfolio

Investing in sovereign debt creates exposure to the direct or indirect consequences of political, social or economic changes (including changes in governments, heads of state or monarchs) in the countries in which the issuers of such debt are located and to the creditworthiness of the sovereign. Investment in sovereign debt obligations involves risks not present in debt obligations of corporate issuers. In addition, the issuer of the debt or the governmental authorities that control the repayment of the debt may be unable or unwilling to repay principal or pay interest when due in accordance with the terms of such debt, and Prudential may have limited recourse to compel payment in the event of a default. A sovereign debtor's willingness or ability to repay principal and to pay interest in a timely manner may be affected by, among other factors, its cash flow situation, its relations with its central bank, the extent of its foreign currency reserves, the availability of sufficient foreign exchange on the date a payment is due, the relative size of the debt service burden to the economy as a whole, the sovereign debtor's policy toward local and international lenders, and the political constraints to which the sovereign debtor may be subject.

Moreover, governments may use a variety of techniques, such as intervention by their central banks or imposition of regulatory controls or taxes, to devalue their currencies' exchange rates, or may adopt monetary and other policies (including to manage their debt burdens) that have a similar effect, all of which could adversely impact the value of an investment in sovereign debt even in the absence of a technical default. Periods of economic uncertainty may affect the volatility of market prices of sovereign debt to a greater extent than the volatility inherent in debt obligations of other types of issuers.

In addition, if a sovereign default or other such events described above were to occur as has happened on occasion in the past, other financial institutions may also suffer losses or experience solvency or other concerns, which may result in Prudential facing additional risks relating to investments in such financial institutions that are held in the Group's investment portfolio. There is also risk that public perceptions about the stability and creditworthiness of financial institutions and the financial sector generally might be adversely affected, as might counterparty relationships between financial institutions. If a sovereign were to default on its obligations, or adopt policies that devalued or otherwise altered the currencies in which its obligations were denominated this could have a material adverse effect on Prudential's financial condition and results of operations.

Downgrades in Prudential's financial strength and credit ratings could significantly impact its competitive position and damage its relationships with creditors or trading counterparties

Prudential's financial strength and credit ratings, which are used by the market to measure its ability to meet policyholder obligations, are an important factor affecting public confidence in Prudential's products, and as a result its competitiveness. Downgrades in Prudential's ratings as a result of, for example, decreased profitability, increased costs, increased indebtedness or other concerns could have an adverse effect on its ability to market products, retain current policyholders, and on the Group's financial flexibility. In addition, the interest rates at which Prudential is able to borrow funds are affected by its credit ratings, which are in place to measure the Group's ability to meet its contractual obligations.

Prudential plc's long-term senior debt is rated as A2 by Moody's, A by Standard & Poor's and A- by Fitch.

Prudential plc's short-term debt is rated as P-1 by Moody's, A-1 by Standard & Poor's and F1 by Fitch.

Jackson's financial strength is rated AA- by Standard & Poor's and Fitch, A1 by Moody's and A+ by A.M. Best.

Prudential Assurance Co. Singapore (Pte) Ltd's financial strength is rated AA- by Standard & Poor's.

All ratings above are on a stable outlook and are stated as at the date of this document.

In addition, changes in methodologies and criteria used by rating agencies could result in downgrades that do not reflect changes in the general economic conditions or Prudential's financial condition.

Prudential is subject to the risk of exchange rate fluctuations owing to the geographical diversity of its businesses

Due to the geographical diversity of Prudential's businesses, Prudential is subject to the risk of exchange rate fluctuations. Prudential's operations generally write policies and invest in assets denominated in local currencies. Although this practice limits the effect of exchange rate fluctuations on local operating results, it can lead to fluctuations in Prudential's consolidated financial statements upon the translation of results into the Group's presentation currency. This exposure is not currently separately managed. The Group now presents its consolidated financial statements in US dollars, which is the currency in which a large proportion of the Group's earnings and assets and liabilities are denominated or linked to (such as the Hong Kong dollar, that is pegged to the US dollar). There remains some entities that are not denominated in or linked to the US dollar and transactions which are conducted in non-US dollar currencies. Prudential is subject to the risk of exchange rate fluctuations from the translation of the results of these entities and transactions and the risks from the maintenance of the Hong Kong dollar peg to the US dollar.

Risks relating to Prudential's business activities and industry

The implementation of large scale transformation, including complex strategic initiatives, gives rise to significant execution risks, may affect Prudential's operational capacity, and may adversely impact the Group if these initiatives fail to meet their objectives

As part of the implementation of its business strategies and to maintain market competitiveness, Prudential undertakes large scale transformation across the Group. Many of these change initiatives, which currently focus on digitalisation, outsourcing initiatives and industry and regulatory-driven change, are complex, interconnected and/or of large scale. There may be adverse financial and non-financial (including operational, regulatory, conduct and reputational) implications for the Group if these initiatives are subject to implementation delays, or fail, in whole or in part, to meet their objectives. Additionally, these initiatives inherently give rise to design and execution risks, and may increase existing business risks, such as placing additional strain on the operational capacity, or weakening the control environment, of the Group.

Implementing further initiatives related to significant regulatory changes, such as IFRS 17, and the transition to a legislative framework in Hong Kong for the group-wide supervision of insurance groups (GWS Framework), may amplify these risks. Risks related to the GWS Framework are explained in the 'Regulatory risks' risk factor.

Adverse experience in the operational risks inherent in Prudential's business, and those of its material outsourcing partners, could disrupt its business functions and have a negative impact on its results of operations

Operational risks are present in all of Prudential's businesses, including the risk of direct or indirect loss resulting from inadequate or failed internal and external processes, systems or human error, fraud, the effects of natural or man-made catastrophic events (such as natural disasters, pandemics, cyber-attacks, acts of terrorism, civil unrest and other catastrophes) or from other external events. These risks may also adversely impact Prudential through its partners which provide bancassurance, outsourcing, external technology, data hosting and other services.

Exposure to such events could impact Prudential's operational resilience and ability to perform necessary business functions by disrupting its systems, operations, new business sales and renewals, distribution channels and services to customers, or result in the loss of confidential or proprietary data. Such events, as well as any weaknesses in administration systems (such as those relating to policyholder records) or actuarial reserving processes, may also result in increased expenses, as well as legal and regulatory sanctions, decreased profitability, financial loss, customer conduct risk impacts and damage Prudential's reputation and relationship with its customers and business partners.

The recent social unrest and coronavirus outbreak, and measures to contain it, have slowed economic and social activity in Hong Kong and mainland China, and in the case of the coronavirus is having a broader global economic impact. While these conditions persist, the level of sales activity in affected markets are expected to be adversely impacted through a reduction in travel and agency and bancassurance activity. Extended travel restrictions in particular may also adversely impact product persistency in the Group's Hong Kong business. Disruption to Prudential's operations may also result where Prudential's employees, or those of its service partners, are affected by travel restrictions; office closures and other measures impacting on working practices, such as the imposition of remote working arrangements; quarantine requirements under local laws and/or other psychosocial impacts.

Prudential's business is dependent on processing a large number of transactions for numerous and diverse products. It also employs a large number of complex and interconnected information technology (IT) and finance systems and models, and user developed applications in its processes. The long-term nature of much of the Group's business also means that accurate records have to be maintained securely for significant time periods. Further, Prudential operates in an extensive and evolving legal and regulatory environment (including in relation to tax) which adds to the complexity of the governance and operation of its business processes and controls.

The performance of the Group's core business activities and the uninterrupted availability of services to customers rely significantly on, and require significant

investment in, IT infrastructure and security, system development, data governance and management, compliance and other operational systems, personnel, controls and processes. During times of significant change, the resilience and operational effectiveness of these systems and processes at Prudential and/or its third party providers may be adversely impacted. In particular Prudential and its business partners are making increasing use of emerging technological tools and digital services, or forming strategic partnerships with third parties to provide these capabilities. Automated distribution channels to customers increase the criticality of providing uninterrupted services. A failure to implement appropriate governance and management of the incremental operational risks from emerging technologies may adversely impact on Prudential's reputation and brand, the results of its operations, its ability to attract and retain customers, its ability to deliver on its long-term strategy and therefore its competitiveness and long-term financial success.

Although Prudential's IT, compliance and other operational systems, models and processes incorporate governance and controls designed to manage and mitigate the operational and model risks associated with its activities, there can be no assurance as to the resilience of these systems and processes to disruption or that governance and controls will always be effective. Due to human error, among other reasons, operational and model risk incidents do occur from time to time and no system or process can entirely prevent them, although Prudential has not, to date, identified any such incidents that have had a material impact. Prudential's legacy and other IT systems, data and processes, as with operational systems and processes generally, may also be susceptible to failure or security/data breaches.

In addition, Prudential relies on the performance and operations of a number of bancassurance, outsourcing (including external technology and data hosting), and service partners. These include back office support functions, such as those relating to IT infrastructure, development and support, and customer facing operations and services, such as product distribution and services (including through digital channels) and investment operations. This creates reliance upon the resilient operational performance of these partners, and failure to adequately oversee the partner, or the failure of a partner (or of its

IT and operational systems and processes) could result in significant disruption to business operations and customers and may have adverse financial, reputational or conduct risk implications.

Attempts to access or disrupt Prudential's IT systems, and loss or misuse of personal data, could result in loss of trust from Prudential's customers and employees, reputational damage and financial loss

Prudential and its business partners are increasingly exposed to the risk that individuals or groups may attempt to disrupt the availability, confidentiality and integrity of its IT systems, which could result in disruption to key operations, make it difficult to recover critical services, damage assets and compromise the integrity and security of data (both corporate and customer). This could result in loss of trust from Prudential's customers and employees, reputational damage and direct or indirect financial loss. The cyber-security threat continues to evolve globally in sophistication and potential significance. Prudential's increasing profile in its current markets and those in which it is entering, growing customer interest in interacting with their insurance providers and asset managers through the internet and social media, improved brand awareness and the 2016 designation of Prudential as a Global Systemically Important Insurer (G-SII) could also increase the likelihood of Prudential being considered a target by cyber criminals. Further, there have been changes to the threat landscape and the risk from untargeted but sophisticated and automated attacks has increased.

There is an increasing requirement and expectation on Prudential and its business partners, to not only hold customer, shareholder and employee data securely, but use it in a transparent and appropriate way. The risk of not securely handling or misusing data may be increased by the use of emerging technological tools which could increase the volume of data that Prudential collects and processes. Developments in data protection worldwide (such as the implementation of EU General Data Protection Regulation that came into force in 2018 and the California Consumer Protection Act that came into force on 1 January 2020) may also increase the financial and reputational implications for Prudential following a significant breach of its (or its third-party suppliers') IT systems. New and currently unforeseeable

regulatory issues may also arise from the increased use of emerging technology, data and digital services. Although Prudential has experienced or has been affected by cyber and data breaches, to date, it has not identified a failure or breach, or an incident of data misuse in relation to its legacy and other IT systems and processes which has had a material impact. However, Prudential has been, and likely will continue to be, subject to potential damage from computer viruses, unauthorised access and cyber-security attacks such as 'denial of service' attacks (which, for example, can cause temporary disruption to websites and IT networks), phishing and disruptive software campaigns.

Prudential is continually enhancing its IT environment to remain secure against emerging threats, together with increasing its ability to detect system compromise and recover should such an incident occur. However, there can be no assurance that such events will not take place which may have material adverse consequential effects on Prudential's business and financial position.

Prudential operates in a number of markets through joint ventures and other arrangements with third parties, involving certain risks that Prudential does not face with respect to its consolidated subsidiaries

Prudential operates, and in certain markets is required by local regulation to operate, through joint ventures and other similar arrangements. For such Group operations, management control is exercised in conjunction with other participants. The level of control exercisable by the Group depends on the terms of the contractual agreements, in particular, those terms providing for the allocation of control among, and continued cooperation between, the participants. In addition, the level of control exercisable by the Group could be subject to changes in the maximum level of non-domestic ownership imposed on foreign companies in certain jurisdictions. Prudential may face financial, reputational and other exposure (including regulatory censure) in the event that any of its partners fails or is unable to meet its obligations under the arrangements, encounters financial difficulty, or fails to comply with local or international regulation and standards such as those pertaining to the prevention of financial crime. In addition, a significant proportion of the Group's product distribution is carried out through arrangements with

third parties not controlled by Prudential such as bancassurance and agency arrangements and is therefore dependent upon continuation of these relationships. A temporary or permanent disruption to these distribution arrangements, such as through significant deterioration in the reputation, financial position or other circumstances of the third party or material failure in controls (such as those pertaining to the third-party system failure or the prevention of financial crime) could adversely affect Prudential's results of operations.

Adverse experience relative to the assumptions used in pricing products and reporting business results could significantly affect Prudential's results of operations

In common with other life insurers, the profitability of the Group's businesses depends on a mix of factors including mortality and morbidity levels and trends, policy surrenders and take-up rates on guarantee features of products, investment performance and impairments, unit cost of administration and new business acquisition expenses. The Group's businesses are subject to inflation risk. In particular, the Group's medical insurance businesses in Asia are also exposed to medical inflation risk.

Prudential needs to make assumptions about a number of factors in determining the pricing of its products, for setting reserves, and for reporting its capital levels and the results of its long-term business operations. Assumptions about future expected levels of mortality are of relevance to the Guaranteed Minimum Withdrawal Benefit (GMWB) of Jackson's variable annuity business.

A further factor is the assumption that Prudential makes about future expected levels of the rates of early termination of products by its customers (known as persistency). This is relevant to a number of lines of business in the Group, especially for Jackson's portfolio of variable annuities and, in Asia markets, the health and protection products in Hong Kong, Singapore, Indonesia and Malaysia. Prudential's persistency assumptions reflect a combination of recent past experience for each relevant line of business and expert judgement, especially where a lack of relevant and credible experience data exists. Any expected change in future persistency is also reflected in the assumption. If actual levels of future persistency are significantly different than assumed, the Group's results

of operations could be adversely affected. Furthermore, Jackson's variable annuity products are sensitive to other types of policyholder behaviour, such as the take-up of its GMWB product features.

In addition, Prudential's business may be adversely affected by epidemics, pandemics and other effects that give rise to a large number of deaths or additional sickness claims, as well as increases to the cost of medical claims. Pandemics, significant influenza and other epidemics and outbreaks such as the recent coronavirus have occurred a number of times historically but the likelihood, timing, or the severity of future events cannot be predicted. The effectiveness of external parties, including governmental and non-governmental organisations, in combating the spread and severity of any epidemics could have a material impact on the Group's loss experience.

Prudential's businesses are conducted in highly competitive environments with developing demographic trends and continued profitability depends upon management's ability to respond to these pressures and trends

The markets for financial services in the US and Asia are highly competitive, with several factors affecting Prudential's ability to sell its products and continued profitability, including price and yields offered, financial strength and ratings, range of product lines and product quality, brand strength and name recognition, investment management performance and fund management trends, historical bonus levels, the ability to respond to developing demographic trends, customer appetite for certain savings products and technological advances. In some of its markets, Prudential faces competitors that are larger, have greater financial resources or a greater market share, offer a broader range of products or have higher bonus rates. Further, heightened competition for talented and skilled employees and agents with local experience, particularly in Asia, may limit Prudential's potential to grow its business as quickly as planned. Technological advances may result in increased competition to the Group (including from outside the insurance industry) and a failure to be able to attract sufficient numbers of skilled staff.

In Asia, the Group's principal competitors include global life insurers together with regional insurers and multinational asset managers. In most markets, there are also local companies that have a material market presence. Jackson's competitors in the US include major stock and mutual insurance companies, mutual fund organisations, banks and other financial services companies.

Prudential believes that competition will intensify across all regions in response to consumer demand, digital and other technological advances, the need for economies of scale and the consequential impact of consolidation, regulatory actions and other factors. Prudential's ability to generate an appropriate return depends significantly upon its capacity to anticipate and respond appropriately to these competitive pressures.

Prudential is exposed to ongoing risks as a result of the demerger of M&G plc

On 21 October 2019, Prudential completed the demerger of M&G plc and, in connection with the demerger, Prudential entered into a demerger agreement with M&G plc. Among other provisions, the demerger agreement contains a customary indemnity under which Prudential has agreed to indemnify M&G plc against liabilities incurred by the M&G group that relate to the business of the Group. Although it is not anticipated that Prudential will be required to pay any substantial amount pursuant to such indemnity obligations, if any amount payable thereunder is substantial this could have a material adverse effect on Prudential's financial condition and/or results of operations.

Legal and regulatory risk

Prudential conducts its businesses subject to regulation and associated regulatory risks, including a change to the basis in the regulatory supervision of the Group, the effects of changes in the laws, regulations, policies and interpretations and any accounting standards in the markets in which it operates

Changes in government policy and legislation (including in relation to tax), capital control measures on companies and individuals, regulation or regulatory interpretation applying to companies in the financial services and insurance industries in any of the markets in which Prudential operates (including those related to the

conduct of business by Prudential or its third party distributors), or decisions taken by regulators in connection with their supervision of members of the Group, which in some circumstances may be applied retrospectively, may adversely affect Prudential. The impact from any regulatory changes may affect Prudential, for example changes may be required to its product range, distribution channels, handling and usage of data, competitiveness, profitability, capital requirements, risk management approaches, corporate or governance structure and, consequently, reported results and financing requirements. Also, regulators in jurisdictions in which Prudential operates may impose requirements affecting the allocation of capital and liquidity between different business units in the Group, whether on a geographic, legal entity, product line or other basis. Regulators may also change the level of capital required to be held by individual businesses, the regulation of selling practices, solvency requirements and could introduce changes that impact products sold or that may be sold. Furthermore, as a result of interventions by governments in light of financial and global economic conditions, there may continue to be changes in government regulation and supervision of the financial services industry, including the possibility of higher capital requirements, restrictions on certain types of transactions and enhancement of supervisory powers.

With effect from 21 October 2019, the group-wide supervisor of Prudential plc changed to the Hong Kong Insurance Authority (HKIA). Prior to the introduction of the proposed GWS Framework, the Group is being supervised on an interim basis in line with principles agreed with the HKIA. Until the GWS Framework is finalised the Group cannot be certain of the nature and extent of differences between the interim principles agreed with the HKIA and the specific regulatory requirements of the GWS Framework. With the agreement of the HKIA, Prudential is applying the Local Capital Summation Method (LCSM) to determine Group regulatory capital requirements. Any differences between these interim supervisory requirements and those that will be adopted under the GWS Framework may lead to changes to the way in which capital requirements are calculated and to the eligibility of the capital instruments issued by Prudential to satisfy such capital requirements. The Group's existing processes and resources may also need to change to comply with

the final GWS Framework legislation or any other requirements of the HKIA. The need to adapt to any such changes or to respond to any such requirements may lead to increased costs or otherwise impact the business, financial condition, results, profitability and/or prospects of the Group.

While the HKIA has agreed that the subordinated debt instruments Prudential has in issue can be included as part of the Group's capital resources for the purposes of satisfying the capital requirements imposed under the LCSM under the interim principles agreed with the HKIA, the grandfathering provisions under the GWS Framework remain subject to the Hong Kong legislative process. If Prudential is ultimately not able to include the subordinated debt instruments it holds as part of the Group's capital resources for the purposes of satisfying the capital requirements imposed under the GWS Framework it may need to raise additional capital, which may in turn lead to increased costs for the Group.

Currently there are also a number of other global regulatory developments which could impact Prudential's businesses in its many jurisdictions. These include the Dodd-Frank Wall Street Reform and Consumer Protection Act (Dodd-Frank Act) and its subsequent amendments in the US which provided for a comprehensive overhaul of the financial services industry within the US including reforms to financial services entities, products and markets, the work of the Financial Stability Board (FSB) in the area of systemic risk including the reassessment of the designation of Global Systemically Important Insurers (G-SIIs), and the Insurance Capital Standard (ICS) being developed by the International Association of Insurance Supervisors (IAIS). In addition, regulators in a number of jurisdictions in which the Group operates are further developing their local capital regimes. Across Asia this includes China, Hong Kong, Singapore, Thailand and India. There remains a high degree of uncertainty over the potential impact of such changes on the Group.

In November 2019 the FSB has endorsed a new Holistic Framework (HF), intended for the assessment and mitigation of systemic risk in the insurance sector, for implementation by the IAIS in 2020 and has suspended G-SII designations until completion of a review to be undertaken in 2022. Many of the previous G-SII measures have already been adopted into the Insurance Core Principles (ICPs) and

ComFrame – the common framework for the supervision of Internationally Active Insurance Groups (IAIGs). Prudential is expected to satisfy the criteria to be an IAIG and would therefore be subject to these measures. The HF also includes a monitoring element for the identification of a build-up of systemic risk and to enable supervisors to take action where appropriate. The IAIS has already consulted on an application paper on the liquidity risk elements introduced into the ICPs and ComFrame with a further consultation focused on macroeconomic elements expected to follow in 2021. The IAIS continues to develop the ICS as part of ComFrame. The implementation of ICS will be conducted in two phases – a five-year monitoring phase followed by an implementation phase. ComFrame will more generally establish a set of common principles and standards designed to assist supervisors in addressing risks that arise from insurance groups with operations in multiple jurisdictions. The ComFrame proposals, including ICS, could result in enhanced capital and regulatory measures for IAIGs.

In July 2014, the FSB announced widespread reforms to address the integrity and reliability of inter-bank offer rates (IBORs). The discontinuation of IBORs in their current form and their replacement with alternative risk-free reference rates such as the Sterling Overnight Index Average benchmark (SONIA) in the UK and the Secured Overnight Financing Rate (SOFR) in the US could, among other things, impact the Group through an adverse effect on the value of Prudential's assets and liabilities which are linked to or which reference IBORs, a reduction in market liquidity during any period of transition and increased legal and conduct risks to the Group arising from changes required to documentation and its related obligations to its stakeholders.

Various jurisdictions in which Prudential operates have created investor compensation schemes that require mandatory contributions from market participants in some instances in the event of a failure of a market participant. As a major participant in the majority of its chosen markets, circumstances could arise in which Prudential, along with other companies, may be required to make such contributions.

The Group's accounts are prepared in accordance with current IFRS applicable to the insurance industry. The International

Accounting Standards Board (IASB) introduced a framework that it described as Phase I which, under its standard IFRS 4 permitted insurers to continue to use the statutory basis of accounting for insurance assets and liabilities that existed in their jurisdictions prior to January 2005. In May 2017, the IASB published its replacement standard on insurance accounting (IFRS 17, 'Insurance Contracts'), which will have the effect of introducing fundamental changes to the statutory reporting of insurance entities that prepare accounts according to IFRS from 2021. In June 2019, the IASB published an exposure draft proposing a number of targeted amendments to this new standard including the deferral of the effective date by one year from 2021 to 2022. As a result of comments on this exposure draft, the IASB plans to redeliberate on a number of areas of IFRS 17, with an amended standard expected to be issued in mid-2020. The EU will apply its usual process for assessing whether the standard meets the necessary criteria for endorsement. The Group is reviewing the complex requirements of this standard and considering its potential impact. The effect of changes required to the Group's accounting policies as a result of implementing the new standard is currently uncertain, but these changes can be expected to, amongst other things, alter the timing of IFRS profit recognition. Given the implementation of this standard is likely to require significant enhancements to IT, actuarial and finance systems of the Group, it will also have an impact on the Group's expenses.

Any changes or modification of IFRS accounting policies may require a change in the way in which future results will be determined and/or a retrospective adjustment of reported results to ensure consistency.

The resolution of several issues affecting the financial services industry could have a negative impact on Prudential's reported results or on its relations with current and potential customers

Prudential is, and in the future may continue to be, subject to legal and regulatory actions in the ordinary course of its business on matters relevant to the delivery of customer outcomes. Such actions relate, and could in the future relate, to the application of current regulations or the failure to implement new regulations (including those relating to the conduct of business), regulatory reviews of broader industry practices and products

sold (including in relation to lines of business already closed) in the past under acceptable industry or market practices at the time and changes to the tax regime affecting products. Regulators may also focus on the approach that product providers use to select third-party distributors and to monitor the appropriateness of sales made by them. In some cases, product providers can be held responsible for the deficiencies of third-party distributors.

In the US, there has been significant attention on the different regulatory standards applied to investment advice delivered to retail customers by different sectors of the industry. As a result of reports relating to perceptions of industry abuses, there have been numerous regulatory inquiries and proposals for legislative and regulatory reforms. This includes focus on the suitability of sales of certain products, alternative investments and the widening of the circumstances under which a person or entity providing investment advice with respect to certain employee benefit and pension plans would be considered a fiduciary subjecting the person or entity to certain regulatory requirements. There is a risk that new regulations introduced may have a material adverse effect on the sales of the products by Prudential and increase Prudential's exposure to legal risks.

Litigation, disputes and regulatory investigations may adversely affect Prudential's profitability and financial condition

Prudential is, and may in the future be, subject to legal actions, disputes and regulatory investigations in various contexts, including in the ordinary course of its insurance, investment management and other business operations. These legal actions, disputes and investigations may relate to aspects of Prudential's businesses and operations that are specific to Prudential, or that are common to companies that operate in Prudential's markets. Legal actions and disputes may arise under contracts, regulations (including tax) or from a course of conduct taken by Prudential, and may be class actions. Although Prudential believes that it has adequately provided in all material respects for the costs of litigation and regulatory matters, no assurance can be provided that such provisions are sufficient. Given the large or indeterminate amounts of damages sometimes sought, other sanctions that might be imposed and the inherent unpredictability of litigation

and disputes, it is possible that an adverse outcome could have an adverse effect on Prudential's reputation, results of operations or cash flows.

Changes in tax legislation may result in adverse tax consequences

Tax rules, including those relating to the insurance industry, and their interpretation may change, possibly with retrospective effect, in any of the jurisdictions in which Prudential operates. Significant tax disputes with tax authorities, and any change in the tax status of any member of the Group or in taxation legislation or its scope or interpretation could affect Prudential's financial condition and results of operations.

Prudential's Articles of Association contain an exclusive jurisdiction provision

Under Prudential's Articles of Association, certain legal proceedings may only be brought in the courts of England and Wales. This applies to legal proceedings by a shareholder (in its capacity as such) against Prudential and/or its directors and/or its professional service providers. It also applies to legal proceedings between Prudential and its directors and/or Prudential and Prudential's professional service providers that arise in connection with legal proceedings between the shareholder and such professional service providers. This provision could make it difficult for US and other non-UK shareholders to enforce their shareholder rights.

Environmental, social and governance risks

The failure to understand and respond effectively to the risks associated with environmental, social or governance (ESG) factors could adversely affect Prudential's achievement of its long-term strategy

The business environment in which Prudential operates is continually changing. A failure to manage those material risks associated with the ESG themes detailed below may adversely impact on the reputation and brand of the Group, the results of its operations, its ability to attract and retain customers and staff, its ability to deliver on its long-term strategy and therefore its long-term financial success. Ensuring high levels of transparency and responsiveness to stakeholders is a key aspect of this. ESG-related issues may also directly or indirectly impact key stakeholders, ranging

from customers to institutional investors, employees, suppliers and regulators, all of whom have expectations in this area, which may differ.

The environmental risks associated with climate change is one ESG area that poses significant risks to Prudential and its customers. These risks include transition risks and physical risks. The global transition to a lower carbon economy could have an adverse impact on investment valuations as the financial assets of carbon-intensive companies re-price and could result in some asset sectors facing significantly higher costs and a disorderly adjustment to their asset values. The speed of this transition will be influenced by factors such as public policy, technology and changes in market or investor sentiment. This may adversely impact the valuation of investments held by the Group. The potential broader economic impact from this may adversely affect customer demand for the Group's products. The physical impacts of climate change, driven by both specific short-term climate-related events such as natural disasters and longer-term changes to the natural environment, will increasingly influence the longevity, mortality and morbidity risk assessments of the Group's underwriting product offerings. Climate-driven changes in countries in which Prudential, or its key third parties, operate could impact on its operational resilience and could change its claims profile. There is an increasing expectation from stakeholders for Prudential to understand, manage and provide increased transparency of its exposure to climate-related risks. Given that Prudential's investment horizons are long term, it is potentially more exposed to the long-term impact of climate change risks. Additionally, Prudential's stakeholders increasingly expect an approach to responsible investment that demonstrates how ESG considerations are effectively integrated into investment and engagement decisions, and fiduciary and stewardship duties.

Social risks that could impact Prudential may arise from a failure to consider the rights, diversity, well-being, and interests of people and communities in which the Group, or its third parties, operates. These risks are increased as Prudential operates in multiple jurisdictions with distinct local cultures and considerations. Emerging population risks associated with public health trends (such as an increase in obesity) and demographic changes (such

as population urbanisation and ageing) may affect customer lifestyles and therefore may impact claims against the Group's insurance product offerings. As a provider of insurance and investment services, Prudential has access to extensive amounts of customer personal data, including data related to personal health, and is therefore exposed to the regulatory and reputational risks associated with customer data misuse or security breaches. These risks are explained in the 'Information security and loss or misuse of data' risk factor. The potential for reputational risks extends to the Group's supply chains, which may be adversely impacted by factors such as poor labour standards and abuses of human rights by third parties. As an employer, the Group is also exposed to the risk of being unable to attract, retain and develop highly-skilled staff, which can be increased where Prudential does not have responsible working practices.

A failure to maintain high standards of corporate governance may adversely impact the Group and its customers, staff and employees, through poor decision-making and a lack of oversight of its key risks. Poor governance may arise where key governance committees have insufficient independence, a lack of diversity, skills or experience in their members, or unclear (or insufficient) oversight responsibilities and mandates. Inadequate oversight over remuneration increases the risk of poor senior management behaviours. Prudential operates across multiple jurisdictions and has a group and subsidiary governance structure which may add further complexity to these considerations. Participation in joint ventures or partnerships where Prudential does not have direct overall control increases the potential for reputational risks arising from poor governance.

Glossary

A

Acquisition expenses

Acquisition expenses include the initial expenses and commissions incurred in writing new business less deferred costs.

Actual exchange rates (AER)

Actual historical exchange rates for the specific accounting period, being the average rates over the period for the income statement and the closing rates at the balance sheet date for the balance sheet.

Administration expenses

Administration expenses are expenses and renewal commissions incurred in managing existing business.

Alternative performance measures (APMs)

Alternative performance measures (APMs) are non-GAAP measures used by the Prudential Group within its annual reports to supplement disclosures prepared in accordance with widely accepted guideline and principles established by accounting standard setters, such as International Financial Reporting Standards (IFRS). These measures provide useful information to enhance the understanding of the Group's financial performance. A reconciliation of these APMs to IFRS metrics is provided in additional financial information section of the annual report.

Annual premium equivalent (APE)

A measure of new business sales activity that is calculated as the aggregate of annualised regular premiums from new business plus one-tenth of single premiums on new business written during the period.

Asset-backed security (ABS)

A security whose value and income payments are derived from and collateralised (or 'backed') by a specified pool of underlying assets. The pool of assets is typically a group of small and illiquid assets that are unable to be sold individually.

Assets under management (AUM)

Assets under management represent all assets managed or administered by or on behalf of the Group, including those assets managed by third parties. Assets under management include managed assets that are included within the Group's statement of financial position and those assets belonging to external clients outside the Prudential Group, which are therefore not included in the Group's statement of financial position. These are also referred to as 'funds under management (FUM)'.

Available for sale (AFS)

Securities that have been acquired neither for short-term sale nor to be held to maturity. AFS securities are measured at fair value on the statement of financial position with unrealised gains and losses being booked in Other Comprehensive Income instead of the income statement.

B

Bancassurance

An agreement with a bank to offer insurance and investment products to the bank's customers.

Bonuses

Bonuses refer to the non-guaranteed benefit added to participating life insurance policies and are the way in which policyholders receive their share of the profits of the policies. These include regular bonus and final bonus and the rates may vary from period to period.

C

Cash remittances

Amounts paid by our business units to the Group comprising dividends and other transfers net of capital injections, which are reflective of emerging earnings and capital generation.

Cash surrender value

The amount of cash available to a policy holder on the surrender of or withdrawal from a life insurance policy or annuity contract.

Closed-book life insurance business

A 'closed book' is essentially a group of insurance policies that are no longer sold, but are still featured on the books of a life insurer as a premium-paying policy. The insurance company has "closed the books" on new sales of these products which will remain in run-off until the policies expire and all claims are settled.

Collective investment schemes (CIS)

CIS is an open-ended investment fund of pooled assets in which an investor can buy and sell units that are issued in the form of shares.

Constant exchange rates (CER)

Prudential plc reports its results at both actual exchange rates (AER) to reflect actual results and also constant exchange rates (CER) to eliminate the impact from exchange translation. CER results are calculated by translating prior year results using current period foreign currency exchange rates ie current period average rates for the income statements and current period closing rate for the balance sheet.

Core structural borrowings

Borrowings which Prudential considers to form part of its core capital structure and exclude operational borrowings.

Credit risk

The risk of loss if another party fails to meet its obligations, or fails to do so in a timely fashion.

Currency risk

The risk that asset or liability values, cash flows, income or expenses will be affected by changes in exchange rates. Also referred to as foreign exchange risk.

D

Deferred acquisition costs (DAC)

Acquisition costs are expenses of an insurer which are incurred in connection with the acquisition of new insurance contracts or the renewal of existing insurance policies. They include commissions and other variable sales inducements and the direct costs of issuing the policy, such as underwriting and other policy issue expenses. Typically, under IFRS, an element of acquisition costs are deferred ie not expensed in the year incurred, and instead amortised in the income statement in line with the emergence of surpluses on the related contracts.

Deferred annuities

Annuities or pensions due to be paid from a future date or when the policyholder reaches a specified age.

Discretionary participation features (DPF)

A contractual right to receive, as a supplement to guaranteed benefits, additional benefits:

- That are likely to be a significant portion of the total contractual benefits;
- Whose amount or timing is contractually at the discretion of the issuer; and
- That are contractually based on asset, fund, company or other entity performance.

Dividend cover

Dividend cover is calculated as operating profit after tax on an IFRS basis, divided by the current year interim dividend plus the proposed final dividend.

E

Endowment product

An ordinary individual life insurance product that provides the insured party with various guaranteed benefits if it survives specific maturity dates or periods stated in the policy. Upon the death of the insured party within the coverage period, a designated beneficiary receives the face value of the policy.

European Embedded Value (EEV)

Financial results that are prepared on a supplementary basis to the Group's consolidated IFRS results and which are prepared in accordance with a set of Principles issued by the CFO Forum of European Insurance Companies in 2016. Embedded value is a way of measuring the current value to shareholders of the future profits from life business written based on a set of assumptions.

F

Fixed annuities (FA)

Fixed annuity contracts written in the US which allow for tax-deferred accumulation of funds, are used for asset accumulation in retirement planning and for providing income in retirement and offer flexible pay-out options. The contract holder pays the insurer a premium, which is credited to the contract holders' account. Periodically, interest is credited to the contract holders' account and administrative charges are deducted, as appropriate.

Fixed indexed annuities (FIA)

These are similar to fixed annuities in that the contract holder pays the insurer a premium, which is credited to the contract holders' account and, periodically, interest is credited to the contract holders' account and administrative charges are deducted, as appropriate. An annual minimum interest rate may be guaranteed, although actual interest credited may be higher and is linked to an equity index over its indexed option period.

Funds under management (FUM)

See 'assets under management (AUM)' above.

G

Group free surplus

Group free surplus at the end of the period comprises free surplus for the insurance businesses, representing the excess of the net worth over the required capital included in the EEV results and IFRS net assets for the asset management and other businesses, excluding goodwill. The free surplus generated during the period comprises the movement in this balance excluding foreign exchange, capital and other reserve movements. Specifically, it includes amounts maturing from the in-force operations during the period less the investment in new business, the effect of market movements and other one-off items.

Group pay-out annuities

These are a closed block of defined benefit annuity plans assumed from John Hancock USA and John Hancock New York in October 2018, in which a single premium payment from an employer (contract holder) funds the pension benefits for its employees (participants).

Group-wide Supervision (GWS) Framework

Regulatory framework which is currently under development by the Hong Kong Insurance Authority for the industry and is expected to be finalised in the second half of 2020.

Guaranteed annuities

Policies that pay out a fixed amount of benefit for a defined period.

Guaranteed investment contracts (GICs) (US)

Investment contracts between an insurance company and an institutional investor, which provide a stated rate of return on deposits over a specified period of time. They typically provide for partial or total withdrawals at book value if needed for certain liquidity needs of the plan.

Guaranteed minimum accumulation benefit (GMAB) (US)

A guarantee that ensures that the contract value of a variable annuity contract will be at least equal to a certain minimum amount after a specified number of years.

Guaranteed minimum death benefit (GMDB) (US)

The basic death benefit offered under variable annuity contracts, which specifies that if the owner dies before annuity income payments begin, the beneficiary will receive a payment equal to the greater of the contract value or purchase payments less withdrawals.

Guaranteed minimum income benefit (GMIB) (US)

A guarantee that ensures, under certain conditions, that the owner may annuitise the variable annuity contract based on the greater of (a) the actual account value or (b) a pay-out base equal to premiums credited with some interest rate, or the maximum anniversary value of the account prior to annuitisation.

Guaranteed minimum withdrawal benefit (GMWB) (US)

A guarantee in a variable annuity that promises that the owner may make annual withdrawals of a defined amount for the life of the owner or until the total guaranteed amount is recovered, regardless of market performance or the actual account balance.

H

Health and protection

These comprise health and personal accident insurance products, which provide morbidity or sickness benefits and include health, disability, critical illness and accident coverage. Health and protection products are sold both as standalone policies and as riders that can be attached to life insurance products. Health and protection riders are presented together with ordinary individual life insurance products for purposes of disclosure of financial information.

Hong Kong Insurance Authority (Hong Kong IA or HKIA)

The HKIA is an insurance regulatory body responsible for the regulation and supervision of the Hong Kong insurance industry.

I

In-force

An insurance policy or contract reflected on records that has not expired, matured or otherwise been surrendered or terminated.

Internal vesting

Internal vesting relates to proceeds from a Prudential policy which the policyholder has decided to reinvest in a Prudential annuity product.

International Financial Reporting Standards (IFRS)

Accounting standards that all publicly listed groups in the European Union are required to apply in preparing consolidated financial statements.

Investment grade

Investments rated BBB- or above for S&P and Baa3 or above for Moody's. Generally, they are bonds that are judged by the rating agency as likely enough to meet payment obligations that banks are allowed to invest in them.

Investment-linked products or contracts

Insurance products where the surrender value of the policy is linked to the value of underlying investments (such as collective investment schemes, internal investment pools or other property) or fluctuations in the value of underlying investment or indices. Investment risk associated with the product is usually borne by the policyholder. Insurance coverage, investment and administration services are provided for which the charges are deducted from the investment fund assets. Benefits payable will depend on the price of the units prevailing at the time of surrender, death or the maturity of the product, subject to surrender charges. These are also referred to as unit-linked products or unit-linked contracts.

K

Key performance indicators (KPIs)

These are measures by which the development, performance or position of the business can be measured effectively. The Group Board reviews the KPIs annually and updates them where appropriate.

L

Liquidity coverage ratio (LCR)

Prudential calculates this as assets and resources available to us that are readily convertible to cash to cover corporate obligations in a prescribed stress scenario. We calculate this ratio over a range of time horizons extending to twelve months.

Liquidity premium

This comprises the premium that is required to compensate for the lower liquidity of corporate bonds relative to swaps and the mark to market risk premium that is required to compensate for the potential volatility in corporate bond spreads (and hence market values) at the time of sale.

Local Capital Summation Method (LCSM)

LCSM is the methodology used for the calculation of the Group's regulatory capital requirements (both minimum and prescribed levels) together with related governance requirements.

M

Money Market Fund (MMF)

An MMF is an open-ended mutual fund that invests in short-term debt securities such as US treasury bills and commercial paper. The purpose of an MMF is to provide investors with a safe place to invest easily accessible cash-equivalent assets characterised as a low-risk, low-return investment.

Mortality rate

Rate of death, varying by such parameters as age, gender and health, used in pricing and computing liabilities for future policyholders of life and annuity products, which contain mortality risks.

Morbidity rate

Rate of sickness, varying by such parameters as age, gender and health, used in pricing and computing liabilities for future policyholders of health products, which contain morbidity risks.

N

National Association of Insurance Commissioners (NAIC)

The NAIC is the US standard setting and regulatory support organisation created and governed by the chief insurance regulators from the 50 states, the District of Columbia and five US territories.

Net premiums

Life insurance premiums, net of reinsurance ceded to third-party reinsurers.

Net worth

Net assets for EEV reporting purposes that reflect the regulatory basis position, sometimes with adjustments to achieve consistency with the IFRS treatment of certain items.

New business margin

The value of new business on an EEV basis expressed as a percentage of the present value of new business premiums expected to be received from the new business.

New business profit

The profits, calculated in accordance with European Embedded Value Principles, from business sold in the financial reporting period under consideration.

Non-participating business

A life insurance policy where the policyholder is not entitled to a share of the company's profits and surplus, but receives certain guaranteed benefits. Examples include pure risk policies (eg fixed annuities, term insurance, critical illness) and unit-linked insurance contracts.

O

Operational borrowings

Borrowings which arise in the normal course of the business. From 1 January 2019, these also include all lease liabilities under IFRS 16.

P

Participating funds

Distinct portfolios where the policyholders have a contractual right to receive at the discretion of the insurer additional benefits based on factors such as the performance of a pool of assets held within the fund, as a supplement to any guaranteed benefits. The insurer may either have discretion as to the timing of the allocation of those benefits to participating policyholders or may have discretion as to the timing and the amount of the additional benefits. For Prudential the most significant participating funds are for business written in Hong Kong, Malaysia and Singapore.

Participating policies or participating business

Contracts of insurance where the policyholders have a contractual right to receive, at the discretion of the insurer, additional benefits based on factors such as investment performance, as a supplement to any guaranteed benefits. This is also referred to as with-profits business.

Persistency

The percentage of policies remaining in force from period to period.

Present value of new business premiums (PVNBP)

The present value of new business premiums is calculated as the aggregate of single premiums and the present value of expected future premiums from regular premium new business, allowing for lapses and other assumptions made in determining the EEV new business contribution.

R

Regular premium product

A life insurance product with regular periodic premium payments.

Rider

A supplemental plan that can be attached to a basic insurance policy, with payment of additional premium.

Risk margin reserve (RMR)

An RMR is included within operating profit based on longer-term investment returns and represents a charge for long-term expected defaults of debt securities, determined by reference to the credit quality of the portfolio.

S

Separate account

A separate account is a pool of investments held by an insurance company not in or 'separate' from its general account. The returns from the separate account generally accrue to the policyholder. A separate account allows an investor to choose an investment category according to his individual risk tolerance, and desire for performance.

Single premiums

Single premium policies of insurance are those that require only a single lump sum payment from the policyholder.

Stochastic techniques

Stochastic techniques incorporate results from repeated simulations using key financial parameters which are subject to random variations and are projected into the future.

Subordinated debt

A fixed interest issue or debt that ranks below other debt in order of priority for repayment if the issuer is liquidated. Holders are compensated for the added risk through higher rates of interest. Under EU insurance regulation, subordinated debt is not treated as a liability and counts towards the coverage of the required minimum margin of solvency, with limitations.

Surrender

The termination of a life insurance policy or annuity contract at the request of the policyholder after which the policyholder receives the cash surrender value, if any, of the contract.

Surrender charge or surrender fee

The fee charged to a policyholder when a life insurance policy or annuity contract is surrendered for its cash surrender value prior to the end of the surrender charge period.

T

Takaful

Insurance that is compliant with Islamic principles.

Term life contracts

These contracts provide protection for a defined period and a benefit that is payable to a designated beneficiary upon death of the insured.

Time value of options and guarantees (TVOG)

The value of financial options and guarantees comprises two parts, the intrinsic value and the time value. The intrinsic value is given by a deterministic valuation on best estimate assumptions. The time value is the additional value arising from the variability of economic outcomes in the future.

Total shareholder return (TSR)

TSR represents the growth in the value of a share plus the value of dividends paid, assuming that the dividends are reinvested in the Company's shares on the ex-dividend date.

U

Unallocated surplus

Unallocated surplus is recorded wholly as a liability and represents the excess of assets over policyholder liabilities for Prudential's with-profits funds. The balance retained in the unallocated surplus represents cumulative income arising on the with-profits business that has not been allocated to policyholders or shareholders.

Unit-linked products or unit-linked contracts

See 'investment-linked products or contracts' above.

Universal life

An insurance product where the customer pays flexible premiums, subject to specified limits, which are accumulated in an account and are credited with interest (at a rate either set by the insurer or reflecting returns on a pool of matching assets). The customer may vary the death benefit and the contract may permit the customer to withdraw the account balance, typically subject to a surrender charge.

V

Variable annuity (VA) (US)

An annuity whose value is determined by the performance of underlying investment options that frequently includes securities. A variable annuity's value is not guaranteed and will fluctuate, depending on the value of its underlying investments. The holder of a variable annuity assumes the investment risk and the funds backing a variable annuity are held in the insurance companies separate account.

Value of in-force business (VIF)

The present value of future shareholder cash flows projected to emerge from the assets backing liabilities of the in-force covered business.

W

Whole life contracts

A type of life insurance policy that provides lifetime protection; premiums must usually be paid for life. The sum assured is paid out whenever death occurs. Commonly used for estate planning purposes.

With-profits funds

See 'participating funds' above.

With-profits contracts

For Prudential, the most significant with-profits contracts are written in Hong Kong, Malaysia and Singapore. See 'participating policies or participating business' above.

Y

Yield

A measure of the rate of return received from an investment in percentage terms by comparing annual income (and any change in capital) to the price paid for the investment.

Shareholder information

Communication with shareholders

The Group maintains a corporate website containing a wide range of information relevant for private and institutional investors, including the Group's financial calendar: www.prudentialplc.com

Shareholder Meetings

The 2020 Annual General Meeting (AGM) will be held in the Churchill Auditorium at the QEII Centre, Broad Sanctuary, Westminster, London SW1P 3EE on 14 May 2020 at 11.00am.

Prudential will continue its practice of calling a poll on all resolutions and the voting results, including all proxies lodged prior to the meeting, will be displayed at the meeting and subsequently published on the Company's website.

Details of the 2019 AGM and of the General Meeting held in October 2019, including the major items discussed at those meetings and the results of the voting, can be found on the Company's website.

In accordance with relevant legislation, shareholders holding 5 per cent or more of the fully paid up issued share capital are able to require the Directors to hold a general meeting. Written shareholder requests should be addressed to the Group Company Secretary at the registered office.

Documents on display

The terms and conditions of all Directors' appointments are available for inspection at the Company's registered office during normal business hours and at the AGM.

Company constitution

Prudential is governed by the Companies Act 2006, other applicable legislation and regulations, and provisions in its Articles of Association (Articles). Any change to the Articles must be approved by special resolution of the shareholders. There were no changes to the constitutional documents during 2019. The current Memorandum and Articles are available on the Company's website.

Share capital

Issued share capital

The issued share capital as at 31 December 2019 consisted of 2,601,159,949 (2018: 2,593,044,409) ordinary shares of 5 pence each, all fully paid up and listed on the London Stock Exchange and the Hong Kong Stock Exchange. As at 31 December 2019, there were 46,847 (2018: 47,260) accounts on the register. Further information can be found in note C10 on page 290.

Prudential also maintains secondary listings on the New York Stock Exchange (in the form of American Depositary Receipts which are referenced to ordinary shares on the main UK register) and the Singapore Stock Exchange.

Prudential has maintained a sufficiency of public float throughout the reporting period as required by the Hong Kong Listing Rules.

Analysis of shareholder accounts as at 31 December 2019

| Size of shareholding | Number of shareholder accounts | % of total number of shareholder accounts | Number of shares | % of total number of shares |
|----------------------|--------------------------------|---|------------------|-----------------------------|
| 1,000,001 upwards | 305 | 0.65 | 2,284,969,122 | 87.84 |
| 500,001–1,000,000 | 149 | 0.32 | 106,232,809 | 4.08 |
| 100,001–500,000 | 532 | 1.14 | 124,456,844 | 4.79 |
| 10,001–100,000 | 1,453 | 3.10 | 43,978,798 | 1.70 |
| 5,001–10,000 | 1,554 | 3.32 | 10,778,080 | 0.41 |
| 1,001–5,000 | 10,162 | 21.69 | 22,114,945 | 0.85 |
| 1–1,000 | 32,692 | 69.78 | 8,629,351 | 0.33 |
| Total | 46,847 | 100 | 2,601,159,949 | 100 |

Major shareholders

The table below shows the holdings of major shareholders in the Company's issued ordinary share capital, as at 31 December 2019, as notified and disclosed to the Company in accordance with the Disclosure Guidance and Transparency Rules.

| As at 31 December 2019 | % of total voting rights |
|-------------------------------|--------------------------|
| BlackRock, Inc | 5.08 |
| Capital Group Companies, Inc. | 4.9336 |
| Norges Bank | 3.99 |

On 11 February 2020, Norges Bank notified that its holding had decreased to 2.998 per cent of the Company's issued share capital.

Rights and obligations

The rights and obligations attaching to the Company's shares are set out in full in the Articles. There are currently no voting restrictions on the ordinary shares, all of which are fully paid, and each share carries one vote on a poll. If votes are cast on a show of hands, each shareholder present in person or by proxy, or in the case of a corporation, each of its duly authorised corporate representatives, has one vote except that if a proxy is appointed by more than one member, the proxy has one vote for and one vote against if instructed by one or more members to vote for the resolution and by one or more members to vote against the resolution.

Where, under an employee share scheme, participants are the beneficial owners of the shares but not the registered owners, the voting rights are normally exercisable by the trustee on behalf of the registered owner in accordance with the relevant plan rules. The Trustees would not usually vote any unallocated shares held in trust but they may do so at their discretion provided

it would be considered to be in the best interests of the beneficiaries of the trust and permitted under the relevant trust deed.

As at 10 March 2020, Trustees held 0.30 per cent of the issued share capital under the various plans in operation.

Rights to dividends under the various schemes are set out in the Directors' remuneration report on pages 136 to 195.

Restrictions on transfer

In accordance with English company law, shares may be transferred by an instrument of transfer or through an electronic system (currently CREST) and any transfer is not restricted except that the Directors may, in certain circumstances, refuse to register transfers of shares but only if such refusal does not prevent dealings in the shares from taking place on an open and proper basis. If the Directors make use of that power, they must send the transferee notice of the refusal within two months.

Certain restrictions may be imposed from time to time by applicable laws and regulations (for example, insider trading laws) and pursuant to the Listing Rules of both the Financial Conduct Authority and the Hong Kong Stock Exchange, as well as under the rules of some of the Group's employee share plans.

All Directors are required to hold a minimum number of shares under guidelines approved by the Board, which they would also be expected to retain as described in the Directors' remuneration report.

Authority to issue shares

The Directors require authority from shareholders in relation to the issue of shares. Whenever shares are issued, these must be offered to existing shareholders pro rata to their holdings unless the Directors have been given authority by

shareholders to issue shares without offering them first to existing shareholders. Prudential seeks authority from its shareholders on an annual basis to issue shares up to a maximum amount, of which a defined number may be issued without pre-emption. Disapplication of statutory pre-emption procedures is also sought for rights issues. The existing authorities to issue shares, and to do so without observing pre-emption rights, are due to expire at the end of this year's AGM. Relevant resolutions to authorise share capital issuances will be put to shareholders at the AGM on 14 May 2020.

Details of shares issued during 2019 and 2018 are given in note C10 on page 290.

In accordance with the terms of a waiver granted by the Hong Kong Stock Exchange, Prudential confirms that it complies with the applicable law and regulation in the UK in relation to the holding of shares in treasury and with the conditions of the waiver in connection with the purchase of own shares and any treasury shares it may hold.

Authority to purchase own shares

The Directors also require authority from shareholders in relation to the purchase of the Company's own shares. Prudential seeks authority by special resolution on an annual basis for the buy-back of its own shares in accordance with the relevant provisions of the Companies Act 2006 and other related guidance. This authority has not been used since it was last granted at the AGM in 2019. This existing authority is due to expire at the end of this year's AGM and a special resolution to renew the authority will be put to shareholders at the AGM on 14 May 2020.

Dividend information

| 2019 second interim dividend | Shareholders registered on the UK register and Hong Kong branch register | Holders of US American Depositary Receipts | Shareholders with ordinary shares standing to the credit of their CDP securities accounts |
|------------------------------|--|--|---|
| Ex-dividend date | 26 March 2020 | – | 26 March 2020 |
| Record date | 27 March 2020 | 27 March 2020 | 27 March 2020 |
| Payment date | 15 May 2020 | 15 May 2020 | On or about 22 May 2020 |

A number of dividend waivers are in place in respect of shares issued but not allocated under the Group's employee share plans. These shares are held by the Trustees and will, in due course, be used to satisfy requirements under the Group's employee share plans. The dividends waived represent less than one per cent of the value of dividends paid during the year.

Shareholder enquiries

For enquiries about shareholdings, including dividends and lost share certificates, please contact the Company's registrars:

| Register | By post | By telephone |
|---------------------------|---|---|
| UK register | Equiniti Limited, Aspect House, Spencer Road, Lancing, West Sussex BN99 6DA, UK. | Tel 0371 384 2035 Textel 0371 384 2255 (for hard of hearing). Lines are open from 8.30am to 5.30pm (UK), Monday to Friday. International shareholders Tel +44 121 415 7026 |
| Hong Kong register | Computershare Hong Kong Investor Services Limited, 17M Floor, Hopewell Centre, 183 Queen's Road East, Wan Chai, Hong Kong. | Tel +852 2862 8555 |
| Singapore register | Shareholders who have shares standing to the credit of their securities accounts with The Central Depository (PTE) Limited (CDP) in Singapore may refer queries to the CDP at 11 North Buona Vista Drive, #01-19/20 The Metropolis Tower 2, Singapore 138589. Enquiries regarding shares held in Depository Agent Sub-accounts should be directed to your Depository Agent or broker. | Tel +65 6535 7511 |
| ADRs | JPMorgan Chase Bank N.A, PO Box 64504, St. Paul, MN 55164-0504, USA. | Tel +1 800 990 1135, or from outside the USA +1 651 453 2128 or log on to www.adr.com |

Dividend mandates

Shareholders may have their dividends paid directly to their bank or building society account. If you wish to take advantage of this facility, please call Equiniti and request a Cash Dividend Mandate form. Alternatively, shareholders may download the form from www.prudentialplc.com/investors/shareholder-information/forms

Shareholders on the UK or Hong Kong registers have the option to elect to receive their dividend in US dollars instead of pounds sterling or Hong Kong dollars respectively. More information may be found on our website www.prudentialplc.com/investors/shareholder-information/dividend/dividend-currency-election

Cash dividend alternative

The Company operates a Dividend Re-investment Plan (DRIP). Shareholders who have elected for the DRIP will automatically receive shares for all future dividends in respect of which a DRIP alternative is offered. The election may be cancelled at any time by the shareholder. Further details of the DRIP and the timetable are available at www.shareview.co.uk/4/Info/Portfolio/default/en/home/shareholders/Pages/ReinvestDividends.aspx

Electronic communications

Shareholders are encouraged to elect to receive shareholder documents electronically by registering with Shareview at www.shareview.co.uk. This will save on printing and distribution costs, and create environmental benefits. Shareholders who have registered will be sent an email notification whenever shareholder documents are available on the Company's website and a link will be provided to that information. When registering, shareholders will need their shareholder reference number which can be found on their share certificate or proxy form. The option to receive shareholder documents electronically is not available to shareholders holding shares through CDP. Please contact Equiniti if you require any assistance or further information.

Share dealing services

The Company's registrars, Equiniti, offer a postal dealing facility for buying and selling Prudential plc ordinary shares; please see the Equiniti address or telephone 0371 384 2248. They also offer a telephone and internet dealing service, Shareview, which provides a simple and convenient way of selling Prudential shares. For telephone sales, call 0345 603 7037 between 8.00am and 5.30pm, Monday to Friday, and for internet sales log on to www.shareview.co.uk/dealing

ShareGift

Shareholders who have only a small number of shares, the value of which makes them uneconomic to sell, may wish to consider donating them to ShareGift (Registered Charity 1052686). The relevant share transfer form may be downloaded from our website www.prudentialplc.com/investors/shareholder-information/forms or from Equiniti. Further information about ShareGift may be obtained on +44 (0)20 7930 3737 or from www.ShareGift.org

Prudential's office at Ludgate Hill, London; from *The Building News*, 1863.

HISTORY

Providing financial security since 1848

Successive generations have looked to Prudential to safeguard their financial security – from industrial workers and their families in Victorian Britain to 20 million customers worldwide today. Our financial strength, heritage, prudence and focus on our customers' long-term needs ensure that people continue to turn to our trusted brands to help them plan for today and tomorrow.

1848 Prudential is established as Prudential Mutual Assurance, Investment and Loan Association in Hatton Garden, London, offering loans and life assurance to professional people. From the beginning the figure of Prudence was adopted as the Company seal to represent the values of the business.

To this day she still carries her arrow (signifying strength of purpose), serpent (the ancient symbol of wisdom) and mirror (representing self awareness).

1854 Prudential opens the Industrial Department to sell a new type of insurance, Industrial Insurance, to the working classes, for premiums of a penny and upwards.

FORWARD-LOOKING STATEMENTS

This document may contain 'forward-looking statements' with respect to certain of Prudential's plans and its goals and expectations relating to its future financial condition, performance, results, strategy and objectives. Statements that are not historical facts, including statements about Prudential's beliefs and expectations and including, without limitation, statements containing the words 'may', 'will', 'should', 'continue', 'aims', 'estimates', 'projects', 'believes', 'intends', 'expects', 'plans', 'seeks' and 'anticipates', and words of similar meaning, are forward-looking statements. These statements are based on plans, estimates and projections as at the time they are made, and therefore undue reliance should not be placed on them. By their nature, all forward-looking statements involve risk and uncertainty.

A number of important factors could cause Prudential's actual future financial condition or performance or other indicated results to differ materially from those indicated in any forward-looking statement. Such factors include, but are not limited to, future market conditions, including fluctuations in interest rates and exchange rates, the continuance of a sustained low-interest rate environment, and the impact of economic uncertainty, asset valuation impacts from the transition to a lower carbon economy, inflation and deflation and the performance of financial markets generally; global political uncertainties; the policies and actions of regulatory authorities, including, in particular, the policies and actions of the Hong Kong Insurance Authority, as Prudential's new Group-wide supervisor, as well as new government initiatives generally; the impact of continuing application of Global Systemically Important Insurer or 'G-SII' policy measures on Prudential; the impact on Prudential of systemic risk policy measures adopted by the International Association of Insurance Supervisors; the impact of competition and fast-paced technological change; the effect on Prudential's business and results from, in particular, mortality and morbidity trends, lapse rates and policy renewal rates; the physical impacts of climate

change and global health crises on Prudential's business and operations; the timing, impact and other uncertainties of future acquisitions or combinations within relevant industries; the impact of internal transformation projects and other strategic actions failing to meet their objectives; the risk that Prudential's operational resilience (or that of its suppliers and partners) may prove to be inadequate, including in relation to operational disruption due to external events; disruption to the availability, confidentiality or integrity of Prudential's IT, digital systems and data (or those of its suppliers and partners); any ongoing impact on Prudential of the demerger of M&G plc; the impact of changes in capital, solvency standards, accounting standards or relevant regulatory frameworks, and tax and other legislation and regulations in the jurisdictions in which Prudential and its affiliates operate; the impact of legal and regulatory actions, investigations and disputes; and the impact of not adequately responding to environmental, social and governance issues. These and other important factors may, for example, result in changes to assumptions used for determining results of operations or re-estimations of reserves for future policy benefits. Further discussion of these and other important factors that could cause Prudential's actual future financial condition or performance or other indicated results to differ, possibly materially, from those anticipated in Prudential's forward-looking statements can be found under the 'Risk factors' heading of this document.

Any forward-looking statements contained in this document speak only as of the date on which they are made. Prudential expressly disclaims any obligation to update any of the forward-looking statements contained in this document or any other forward-looking statements it may make, whether as a result of future events, new information or otherwise except as required pursuant to the UK Prospectus Rules, the UK Listing Rules, the UK Disclosure and Transparency Rules, the Hong Kong Listing Rules, the SGX-ST listing rules or other applicable laws and regulations.

1871 The Company becomes one of the first in the City to employ women. Calculating machines are also introduced, bringing efficiencies to the processing of an increasing volume of business.

1923 Prudential's first overseas life branch is established in India, with the first policy being sold to a tea planter in Assam.

1994 Prudential Corporation Asia is formed in Hong Kong as a regional head office to expand operations beyond an existing presence in Malaysia, Singapore and Hong Kong.

2010 Prudential plc is listed on stock exchanges in Hong Kong and Singapore.

1879 Prudential moves into Holborn Bars, a purpose-built office complex designed by Alfred Waterhouse. The building becomes a London landmark.

1912 Following the National Insurance Act, Prudential works with the government to run Approved Societies, providing sickness and unemployment benefits to five million people.

1924 Prudential shares are floated on the London Stock Exchange.

1949 The 'Man from the Pru' advertising campaign is launched.

1986 Prudential acquires Jackson National Life Insurance in the United States.

1999 Prudential acquires M&G, pioneer of unit trusts in the UK and a leading provider of investment products.

2000 Prudential plc is listed on the New York Stock Exchange. Prudential becomes the first UK life insurer to enter the Mainland China market through its joint venture with CITIC Group.

2014 Prudential acquires businesses in Ghana and Kenya, marking its entry into the fast-growing African life insurance industry.

2019 Prudential demerges its UK and Europe business, M&G plc, in order to focus on its international business.
