### (IV) Management Discussion and Analysis

### 1. OPERATING ENVIRONMENT AND INDUSTRY OVERVIEW

In the first half of 2020, China's GDP was RMB45,661.4 billion. By quarters, in the first quarter, a YOY decrease of 6.8% was recorded, while in the second quarter, a YOY growth of 3.2% was recorded. During the second quarter, the GDP growth rate turned to be a positive 3.2% from a previous negative one, which was better than market expectation. In June, economic indicators improved significantly: the added value of industrial enterprises above designated size increased for three consecutive months, the growth rate of total retail sales of consumer products and fixed assets investment continued to decline at a slower pace, the unemployment rate in urban areas decreased slightly, and the real income of residents declined at a slower rate. China's fixed assets investment (excluding rural households) amounted to RMB28,160.3 billion, representing a YOY decrease of 3.1%, while infrastructure investment (excluding power, heat, gas and water production and supply sectors) recorded a YOY decrease of 2.7%, among which, the investment in water conservancy increased by 0.4%; the investment in public facilities management decreased by 6.2%; the investment in road transportation and railway transportation increased by 0.8% and 2.6%, respectively. **(Source: National Bureau of Statistics of China)** 

In the first half of 2020, China's economy recorded a growth despite of an earlier decline. Key indicators achieved a recovery growth and fixed assets investment decreased at a significantly slower rate. Infrastructure investment continued to decrease slightly on a YOY basis, however, the investment in each of water conservancy, road transportation and railway transportation all increased slightly after a turnaround. The investment in real estate development turned to positive growth, floor space under construction by real estate developers continued to increase at a slow pace and floor space newly started for construction by real estate developers continued to decline significantly YOY, while the newly-acquired land area figure was basically same as that of the previous year.

In the first half of 2020, operation and production resumption were sped up nationwide, the economy recovered stably, and the market demand for cement rebound soon. However, cement production indicator still showed a negative growth despite that China's cumulative cement output continued to decline at a slower pace, due to the outbreak of Coronavirus Disease 2019 ("**COVID-19 outbreak**") and the adverse weather condition of heavy rainfall in Southern China on the market. But the decline in cement output narrowed significantly to be below 5% from a nearly 30% YOY decrease at the beginning of the year. For the second half of the year, owing to the end of plum rain season, the arrival of the traditional peak season of construction works and the resulting rapid rebound of demand, the cement output is expected to increase at a positive pace instead of a negative one.

In the first half of 2020, China's total cement production amounted to 998 million tonnes, representing a YOY decrease of 4.8%, but such decrease was 3.4% lower as compared with that from January to May, while China's total cement production in the same period of last year represented a YOY increase of 6.8%; in June, China's cement production amounted to 229 million tonnes, representing a YOY increase of 8.4%, but a decrease of 8.06% as compared with that of the previous month. **(Source: Digital Cement)**

The YOY increase in the proportion of raw materials cost to sales revenue was mainly attributed to the decreases in unit selling prices of cement and clinker; however, due to the YOY decreases in unit purchase prices of certain raw materials such as limestone, slag powder and fly ash, the total raw materials cost decreased as compared with the same period of last year. In the first half of 2020, the average purchase price of coal was down approximately by 14.9% to RMB576.9/tonne compared with the same period of last year (RMB678.1/tonne). ### (j) Management of foreign exchange exposure

The Group's functional currency is RMB, and during the Reporting Period, as most of the sales amounts and purchase amounts of the Group were denominated in RMB, there was no significant foreign exchange exposure.

RMB is not a freely convertible currency. Future exchange rate of RMB may change substantially as compared to current or historical exchange rates as a result of the controls imposed by the PRC government. The exchange rate may also be subject to domestic and international economic developments and political changes as well as the supply and demand of RMB. The appreciation or depreciation of RMB against foreign currencies may have an impact on the Group's operating results.

The Group currently does not have a foreign currency hedging policy. However, the management of the Group monitors foreign exchange exposure and will consider hedging significant foreign currency exposure should the need arise.

### 4. OUTLOOK FOR THE SECOND HALF OF THE YEAR

#### Macro operating environment outlook for the second half of the year

In the first half of 2020, the industry demand declined as affected by the COVID-19 outbreak, resulting in a downward trend in cement prices across the country and pressure on the performance of cement enterprises. However, from the perspective of the domestic economic situation, the main indicators have recovered to positive growth and the decline in fixed asset investment has narrowed to a great extent. A slight YOY decline was recorded in infrastructure investment, while the YOY growth rate of investment in water conservancy management, road transportation and railway transportation has turned from negative to positive, indicating a slight increase. In the second half of 2020, supported by positive factors such as increased investment in infrastructure and continued recovery in real estate industry, cement prices will see in an upward recovery in the second half of 2020, and cement demand will continue to maintain a healthy operation.

### On the demand front, the overall forecast for the market demand in the second half of the year is expected to be higher than that of the same period last year due to the impact of three favorable factors.

1. Continuous efforts were put into economic stimulus policies.

In order to hedge against the impact of the COVID-19 outbreak on the economy, China has increased money supply and introduced a series of economic stimulus policies regarding monetary and fiscal aspects.

2. Increasing efforts were put in the construction of key projects.

More than RMB40 trillion has been announced to be invested in the infrastructure in 31 provinces across the country during this year. The cumulative investment amount planned to be put into comprehensive transportation construction for 2020 as announced in the area where Shanshui is located was RMB303.6 billion: RMB184.2 billion for Shandong, RMB25.2 billion for Liaoning, RMB40 billion for Inner Mongolia and RMB54.2 billion for Xinjiang. The construction of certain projects has started in the first half of the year, and it is expected that the cement consumption will increase significantly in the third quarter as the progress of project construction accelerates; at the same time, a number of new key projects will also accelerate to be implemented as the COVID-19 outbreak eases.

### 4. OUTLOOK FOR THE SECOND HALF OF THE YEAR (CONTINUED)

# Macro operating environment outlook for the second half of the year (Continued)

3. Recovery and growth were seen in the real estate industry.

In the first half of 2020, RMB6,278 billion has been put into the investment in real estate development across the country, representing a YOY increase of 1.9%. Among them, residential investment was RMB4,635 billion, representing an increase of 2.6%, and the growth rate was 2.6% higher than that from January to May. The growth rate of investment in real estate development has turned positive, and the floor space under construction by real estate developers has maintained a slight increase. Although the floor space newly started for construction has decreased significantly year on year, the land acquisition area has almost remained the same year on year, which indicates that the real estate industry is gradually recovering and further growth prospects are expected to be seen in the second half of the year. The recovery and growth of the real estate industry will bring further growth in demand for cement.

# On the supply front, the supply-side reform of the cement industry will continue to be advanced.

In the second half of 2020, cutting excessive capacity will remain a key theme of the industry. As the Chinese government further advanced supply-side structural reform and stepped up efforts on air pollution control and environmental protection, off-peak production, production restriction for environmental protection, elimination of outdated production capacity, capacity reduction and replacement, and mergers and reorganizations that increase industry concentration will continue to be the most important means for the cement industry to promote supply-side structural reform. In the second half of 2020, more efforts will be made to promote green and high-quality development. Green manufacturing is the only way for the transformation and upgrading of cement industry. Great efforts and time are required by green mine construction, energy saving and consumption reduction, and the building of a garden cement plant. On the other hand, intelligent factories and production lines will be constructed to further develop the intelligence and digitalization of cement factories. The industry needs to accelerate the speed of transformation and upgrading.

Meanwhile, the promulgation of new infrastructure plans by the NPC and CPPCC has also brought more opportunities for economic operations which suffered severe damage across the country. In the face of a new industry situation where opportunities and challenges co-exist, the in-depth integration of the development of networking, intelligence and digitalization in the 5G era with the traditional industry of cement is also imperative.

As the Group is the sixth largest cement and clinker manufacturer in China in terms of its capacity, the PRC government's implementation of stricter environmental protection policies and off-peak production measures to promote the development of intelligent, digital and green cement enterprises will facilitate us in cementing our market position and improving our financial performance.

### 4. OUTLOOK FOR THE SECOND HALF OF THE YEAR (CONTINUED)

# Macro operating environment outlook for the second half of the year (Continued)

#### Business outlook for the second half of the year

In the second half of 2020, the Group will, in accordance with its annual business goals, speed up the replacement of old drivers of growth with new ones, implement the three main strategies of "resource reserve, industry chain extension and talent-oriented development", make efforts to accomplish key tasks such as standardization of rules and procedures, remedying its shortcomings, management innovation and team building, so as to pursue high-quality development and open up fresh growth prospects. Meanwhile, the Group will seize the favorable opportunities arising from the restructuring of the cement industry to enhance its presence in the domestic market.

In terms of operation and management, the Group will keep a close eye on the impact of the supply-side structural reform and environmental protection policies on the supply side, as well as the impact of the country's increased infrastructure investment on the demand side. It will make comprehensive studies and analyses and accurately predict the market trends, so as to improve the accuracy of marketing strategies and improve the quality of operations. Further, it will strengthen studies and analyses on the raw material markets, consolidate and strengthen its strategic cooperation with major suppliers of various materials, and actively explore new pipelines to ensure stable and economic supply of raw materials. In addition, the Group will improve its staff training mechanism, innovate talents recruiting mode and enhance its talent incentive mechanism to generate internal impetus for the sustainable development of the Company.

In short, the Group will, with the efforts of all its employees, keep improving the quality of its operations to take business development to a new level, and build itself into a top-notch player in the industry. Meanwhile, it will earnestly fulfill social responsibility, and reward its shareholders and employees and the society with excellent performance.

### 4. SHARE OPTION SCHEME

The Company adopted the Share Option Scheme pursuant to a Shareholders' resolution passed on 14 June 2008 (the "**Adoption Date**"). Save for the Share Option Scheme, the Company has no other share option scheme currently in force.

At the Adoption Date, a mandate limit was approved to allow the Company to grant options entitling holders to subscribe for Shares not exceeding 10% of the then issued Shares as at the date of the approval of the Share Option Scheme, which amounted to 260,336,000 options to subscribe for 260,336,000 Shares (the "**Existing Scheme Mandate Limit**"). During the period from the Adoption Date to the date of this report, no refreshment of the Existing Scheme Mandate Limit has been approved by the Shareholders.

Since the adoption of the Share Option Scheme, options to subscribe for 7,400,000 Shares were granted on 25 May 2011 (the closing price of the Shares as at the date of grant was HK\$7.83 per Share) and options to subscribe for 163,700,000 Shares (not including the options to subscribe for 20,000,000 Shares and 23,600,000 Shares conditionally granted to ZHANG Bin and ZHANG Caikui (ZHANG Caikui was deemed to be a substantial Shareholder due to his interest in CSI and ZHANG Bin is his associate), respectively, subject to the approval of the Shareholders which has not yet been obtained) were granted on 27 January 2015 (the closing price of the Shares as at the date of grant was HK\$3.68 per Share).

By virtue of the High Court Miscellaneous Proceedings No. 593 of 2015 ("HCMP593/2015"), CSI has commenced an injunction application to apply to set aside the grant of the 207,300,000 share options in early 2015. A Consent Summons with Wong & Lawyers (for CSI in its capacity as minority shareholders) and Mayor Brown JSM (for CSI in its corporate capacity) was signed on 6 January 2016 in which the Company gave an undertaking to the High Court that it will not take steps to implement the share options offered as described in its public announcement dated 27 January 2015 until 28 days from the handing down of the judgment in relation to the substantive hearing of the Petitioner's Summons dated 17 August 2015 or until further Order of the Court.

Since no extraordinary general meeting of the Company was held for the approval of the grant of 43,600,000 options in aggregate conditionally granted to ZHANG Bin and ZHANG Caikui, such options have not been granted.

Out of the options to subscribe for 7,400,000 Shares granted on 25 May 2011, 400,000 Shares were lapsed in accordance with the terms of the Share Option Scheme and therefore will not be counted for the purpose of the Existing Scheme Mandate Limit pursuant to Note 1 to Rule 17.03(3) of the Listing Rules.

Out of the options to subscribe for 163,700,000 Shares granted on 27 January 2015, 41,800,000 Shares were lapsed in accordance with the terms of the Share Option Scheme and therefore will not be counted for the purpose of the Existing Scheme Mandate Limit pursuant to Note 1 to Rule 17.03(3) of the Listing Rules.

Save for the above, none of the options granted on 25 May 2011 and 27 January 2015 have been exercised or cancelled or lapsed.

### 1. MATERIAL LITIGATION IN THE CAYMAN ISLANDS

#### Cause Nos.: FSD 161 of 2018 and FSD 93 of 2019

Tianrui (International) Holding Company Limited ("**Tianrui**"), a Shareholder of the Company, presented a petition dated 30 August 2018 seeking to wind up the Company (the "**Cayman Petition**") before the Grand Court of the Cayman Islands (the "**Cayman Court**"). The Cayman Petition asks the court to appoint official liquidators to take over management of the Company. Tianrui filed a further application on 6 September 2018 for the appointment of joint provisional liquidators ("**JPLs**") over the Company (together with the Cayman Petition, the "**Cayman Proceedings**").

On 10 and 11 October 2018, the substantive hearing was heard in the Cayman Court (the "**Cayman Hearing**"), at which the Company was granted a Validation Order from the Cayman Court, on the terms requested by the Company, permitting it to make payments in the ordinary course of business. The Cayman Petition was struck out and the application for appointment of JPLs dismissed by order of the Cayman Court dated 19 October 2018 (the "**Grand Court's Order**"). Subsequently, Tianrui appealed against the Grand Court's Order to the Court of Appeal of the Cayman Islands (the "**Court of Appeal**") (i.e. CICA 26 of 2018) and the appeal was allowed. The Company then sought leave to appeal to the Privy Council of the United Kingdom (the "**Privy Council**") against the decision of the Court of Appeal but did not obtain leave to do so.

On 21 March 2019, the Company announced that it was considering applying for a validation order (the "VO Application") from the Cayman Court to sanction the deposit of share certificates into the Central Clearing and Settlement System ("CCASS") of Hong Kong, and asking shareholders who wish to have their share certificates included in any such application for a validation order (the "Requesting Shareholders") to submit a written request to the Company. Subsequently, the Company received a number of written requests from Requesting Shareholders. On 29 March 2019 (Cayman Islands time), the Company made an application to the Cayman Court to, among other things, validate the transfer of shares held by the Requesting Shareholders to HKSCC Nominees Limited, the common nominee for shares deposited in CCASS which was heard on 3 and 4 July 2019. On 12 September 2019, the Cayman Court granted the VO Application and ordered (among other things) the validation of any transfer of shares to HKSCC Nominees Limited by the Company's shareholders and that any such transfer shall not be avoided in the event of any order for the winding-up of the Company (the "Share Transfer Order"). On the same day that the judgment was handed down, the Cayman Court also granted the petitioner, Tianrui, leave to appeal against its decision to the Court of Appeal. On 18 February 2020 (Cayman Islands Time), the Court of Appeal allowed this appeal and reversed the Share Transfer Order. The Company is seeking leave to appeal the Court of Appeal's decision, and continues to vigorously dispute the winding-up petition, which it believes to be without merits.

The Company was served on 4 June 2019 with a Writ of Summons issued on 27 May 2019, in the Cayman Court (the "Writ").

### 1. MATERIAL LITIGATION IN THE CAYMAN ISLANDS (CONTINUED)

### Cause Nos.: FSD 161 of 2018 and FSD 93 of 2019 (Continued)

The Writ has been issued by Tianrui seeking (i) orders setting aside the Company's issue of certain convertible bonds, issued on or about 8 August 2018 and 3 September 2018, the subsequent conversion of the bonds on 30 October 2018 and/or the allotment of the Company's shares to the holders of such convertible bonds; and/or (ii) declarations setting aside the issue and subsequent conversion of the bonds.

The Company considers that there is no reasonable basis for the orders and/or declarations sought and, it will vigorously defend itself against the Writ and Tianrui's claim.

On 12 August 2019, the Company filed applications with the Cayman Court to, among others, (i) strike out the Cayman Petition and the Writ, and/or (ii) stay both proceedings until the Hong Kong High Court has delivered judgment at trial in HCA 548/2019 and/or HCA 2880/2015 (the "**Applications**"). The Applications were heard by the Cayman Court from 26 to 28 November 2019.

On 6 April 2020 (Cayman Islands time), the Cayman Court dismissed the Applications and as a result, the two proceedings will continue. The Company has filed an application for leave to appeal against the Cayman Court's decision.

#### **1 BASIS OF PREPARATION**

These condensed consolidated financial statements have been prepared in accordance with International Accounting Standard 34 ("**IAS 34**") "Interim Financial Reporting", issued by the International Accounting Standards Board ("**IASB**") as well as with the applicable disclosure requirements of Appendix 16 of the Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited.

The interim financial report is unaudited, but has been reviewed by the Audit Committee of the Company.

The auditor of the Company expressed a qualified opinion on the comparative information of the audited consolidated statements of profit or loss, profit or loss and other comprehension income, changes in equity and cash flows of the Group for the year ended 31 December 2019 and an unmodified opinion on the audited consolidated financial statements of the Group for the year ended 31 December 2019 in their report dated 20 March 2020.

#### Significant events and transactions in the Reporting Period

The COVID-19 outbreak and the subsequent quarantine measures as well as the travel restrictions imposed by many countries have had negative impacts to the global economy, business environment and directly and indirectly affect the operations of the Group. Save for the shut down of some subsidiaries in the first quarter each year due to seasonal factors, the shut down has been prolonged due to the impact of COVID-19 outbreak in 2020, and the mandatory quarantine measures imposed by the government also affected the transportation and delivery. However, the operations of subsidiaries of the Group have resumed to normal since March to April 2020 as the epidemic was properly controlled. In addition, the government of the People's Republic of China (the "**PRC**") has announced some financial measures and supports for enterprises to overcome the negative impact arising from the pandemic. As such there is no material impact on the financial positions and performance of the Group for the Reporting Period.

### 2 PRINCIPAL ACCOUNTING POLICIES

The condensed consolidated financial statements have been prepared on the historical cost basis, except for certain financial instruments, which are measured at fair values.

Other than additional accounting policies resulting from application of new and amendments to International Financial Reporting Standards ("**IFRSs**"), the accounting policies and methods of computation used in the condensed consolidated financial statements for the six months ended 30 June 2020 are the same as those presented in the Group's annual financial statements for the year ended 31 December 2019.

#### Application of new and amendments to IFRSs

In the current interim period, the Group has applied, the Amendments to References to the conceptual Framework in IFRSs and the following amendments to IFRSs issued by the IASB for the first time, which are mandatory effective for the annual period beginning on or after 1 January 2020 for the preparation of the Group's condensed consolidated financial statements:

Amendments to HKAS 1 and HKAS 8 Amendments to HKFRS 3 Amendments to HKFRS 9, HKAS 39 and HKFRS 7 Definition of Material Definition of a Business Interest Rate Benchmark Reform

Except as described below, the application of the Amendments to References to the conceptual Framework in IFRSs and the amendments to IFRSs in the current period has had no material impact on the Group's financial performance and positions for the current and prior periods and/or on the disclosures set out in these condensed consolidated financial statements.

## 2.1 Impacts of application on Amendments to HKAS 1 and HKAS 8 "Definition of Material"

The amendments provide a new definition of material that states "information is material if omitting, misstating or obscuring it could reasonably be expected to influence decisions that the primary users of general purpose financial statements make on the basis of those financial statements, which provide financial information about a specific reporting entity." The amendments also clarify that materiality depends on the nature or magnitude of information, either individually or in combination with other information, in the context of the financial statements taken as a whole.

The application of the amendments in the current period had no impact on the condensed consolidated financial statements.

### 2 PRINCIPAL ACCOUNTING POLICIES (CONTINUED)

#### Application of new and amendments to IFRSs (Continued)

#### 2.2 Impacts and accounting policies on application of Amendments to HKFRS 3 "Definition of a Business"

2.2.1 Accounting policies

#### **Business combinations**

Optional concentration test

Effective from 1 January 2020, the Group can elect to apply an optional concentration test, on a transaction-by-transaction basis, that permits a simplified assessment of whether an acquired set of activities and assets is not a business. The concentration test is met if substantially all of the fair value of the gross assets acquired is concentrated in a single identifiable asset or group of similar identifiable assets. The gross assets under assessment exclude cash and cash equivalents, deferred tax assets, and goodwill resulting from the effects of deferred tax liabilities. If the concentration test is met, the set of activities and assets is determined not to be a business and no further assessment is needed.

2.2.2 Transition and summary of effects

The amendments had no impact on the condensed consolidated financial statements of the Group.

# Significant changes in significant judgements and key sources of estimation uncertainty

The significant judgements made by management in applying the Group's accounting policies and the key sources of estimation uncertainty were the same as those described in the last annual financial statements.

- Shandong Province subsidiaries operating and located in the Shandong Province of the PRC.
- Northeastern China subsidiaries operating and located in the Liaoning Province and Inner-Mongolia Autonomous Region of the PRC.

### **3 REVENUE AND SEGMENT REPORTING (CONTINUED)**

### (b) Segment reporting (Continued)

No operating segments identified by the CODM have been aggregated in arriving at the reportable segments of the Group.

#### (i) Segment results, assets and liabilities

For the purposes of assessing segment performance and allocating resources between segments, the Group's CODM monitors the results, assets and liabilities attributable to each reportable segment on the following bases:

- Segment assets include all tangible and intangible assets and current assets, with the exception of interests in associates, deferred tax assets, derivative component of convertible bonds and other corporate assets. Segment liabilities include trade payables, other payables and accrued expenses, bank loans and other borrowings managed directly by the segments and lease liabilities.
- Revenue and expenses are allocated to the reportable segments with reference to sales generated by those segments and the expenses incurred by those segments or which otherwise arise from the depreciation or amortisation of assets attributable to those segments.
- Segment results represents profits, earned by each segment without allocation of head office administrative expenses, share of results of associates, waiver of interest expenses, gain/(loss) on fair value changes of financial assets at fair value through profit or loss ("**FVTPL**"), gain/(loss) on fair value changes of derivative component of convertible bonds, directors' remuneration, auditor's remuneration and finance costs in relation to the unallocated bank loans, other borrowings, long-term bonds and convertible bonds. This is the measure reported to the CODM for the purposes of resources allocation and performance assessment.

| diluted earnings per shares  | 4,446,970,997          | 4,353,966,228          |

The computation of diluted earnings per share does not assume the exercise of the share options granted by the Company in 2011 and 2015 because exercise prices of these share options were higher than the average market price of the shares for both periods.

For the six months ended 30 June 2020, the computation of diluted earnings per share assumed the conversion of the Company's outstanding convertible bonds which are dilutive. For the six months ended 30 June 2019, the computation of diluted earnings per share had not taken into account of the potential ordinary shares on convertible bonds as the assumed conversion would be anti-dilutive and result in an increase in earnings per share.

### 22 FAIR VALUE MEASUREMENT OF FINANCIAL INSTRUMENTS

This note provides information about how the Group determines fair values of various financial assets and liabilities.

#### (i) Fair value measurement and valuation process

Some of the Group's financial instruments are measured at fair value for financial reporting purposes. The management of the Group will determine the appropriate valuation techniques and inputs for fair value measurements.

In estimating the fair value, the Group uses market-observable data to the extent it is available. ### 24 CONTINGENT LIABILITIES AND OTHER EVENTS (CONTINUED)

#### (b) Litigation in the Cayman Islands

The Company is facing a winding-up petition (the "**Cayman Petition**") before the Grand Court of the Cayman Islands (the "**Grand Court**"). The Cayman Petition was filed by one of the shareholders of the Company, Tianrui (International) Holding Company Limited ("**Tianrui**"). The Company has appointed legal counsel to represent it to oppose the Cayman Petition.

On 21 March 2019, the Company announced that it was considering applying for a validation order (the "VO Application") from the Grand Court to sanction the deposit of share certificates into the Central Clearing and Settlement System ("CCASS") of Hong Kong, and asking shareholders who wish to have their share certificates included in any such application for a validation (the "Requesting Shareholders") to submit a written request to the Company. On 29 March 2019 (Cayman Islands time), the Company made the VO Application to the Grand Court to, among others, validate the transfer of shares held by the Requesting Shareholders to HKSCC Nominees Limited, the common nominee for shares deposited in CCASS. On 12 September 2019, the Grand Court granted the VO Application and ordered (among other things) the validation of any transfer of shares to HKSCC Nominees Limited by the Company's shareholders and that any such transfer shall not be avoided in the event of any order for the winding-up of the Company (the "Share Transfer Order"). On the same day that the judgment was handed down, the Grand Court also granted the petitioner, Tianrui, leave to appeal against its decision to the Court of Appeal. On 18 February 2020 (Cayman Islands time), the Court of Appeal allowed this appeal and reversed the Share Transfer Order. The Company is seeking leave to appeal against the Court of Appeal's decision, and continues to vigorously dispute the Cayman Petition, which it believes to be without merits.

The Company was served on 4 June 2019 with a Writ of Summons issued on 27 May 2019 in the Grand Court (the "**Writ**"). The Writ has been issued also by Tianrui, seeking (i) orders setting aside the Company's issue of certain convertible bonds, issued on or about 8 August 2018 and 3 September 2018, the subsequent conversion of the bonds on 30 October 2018 and/or the allotment of the Company's shares to the holders of such convertible bonds; and/or declarations setting aside the issue and subsequent conversion of the bonds. The Company considers that there is no reasonable basis for the orders and/or declarations sought and will vigorously defend itself against the Writ and Tianrui's claim.

On 12 August 2019, the Company filed applications with the Grand Court to, among others, (i) strike out the Cayman Petition and the Writ, and/or (ii) stay both proceedings (the "**Applications**"). On 6 April 2020 (Cayman Islands time), the Grand Court dismissed the Applications, and as a result, the two proceedings will continue. The Company has filed an application for leave to appeal against the Grand Court's decision.

Other than the disclosure of above, as at 30 June 2020, as far as the Group was aware, the Group had no other material litigation or claim which was pending or threatened against the Group. As at 30 June 2020, the Group was the defendant of certain non-material litigations, and also a party to certain non-material litigations, and also a party to certain litigations arising from the ordinary course of business. The likely outcome of these contingent liabilities, litigations or other legal proceedings cannot be ascertained at present, but the Directors believe that any possible legal liability which may be incurred from the aforesaid cases will not have any material impact on the financial position of the Group.

### (VIII) Miscellaneous

#### I. INTERIM DIVIDEND

The Board did not declare the payment of any interim dividend for the six months ended 30 June 2020.

# II. PURCHASE, SALE OR REDEMPTION OF LISTED SECURITIES OF THE COMPANY

Neither the Company nor any of its subsidiaries purchased, sold, or redeemed any of the Company's listed securities during the Reporting Period.

#### **III. COMPLIANCE WITH THE CORPORATE GOVERNANCE CODE**

The Board is committed to maintaining good corporate governance standards.

The Company has applied the principles and code provisions as set out in the Corporate Governance Code (the "**CG Code**") contained in Appendix 14 of the Listing Rules.

During the Reporting Period, the Board was not aware of any information which would indicate that the Company did not comply with the code provisions of the CG Code unless otherwise indicated.

#### Chairman and Chief Executive Officer

According to code provision A.2.1 of the CG Code, the roles of chairman and chief executive officer should be separated and should not be performed by the same individual.

The Company did not appoint any Chief Executive Officer and Mr. CHANG Zhangli, the Chairman, undertakes the responsibilities of the Chief Executive Officer. In allowing the two positions to be occupied by the same person, the Company has considered that both positions require in-depth knowledge and considerable experience of the Group's business. Candidates with the requisite knowledge, experience and leadership are difficult to identify. If either of the positions is occupied by an unqualified person, the Group's performance could be gravely compromised. Besides, the Board believes that the balance of power and authority will not be impaired by such arrangement as it is adequately ensured by the Board which comprises experienced and high calibre individuals (including executive Directors and independent non-executive Directors).

#### **IV. MODEL CODE FOR SECURITIES TRANSACTIONS BY DIRECTORS**

The Company has adopted a set of Code of Conduct for Securities Transactions by Directors ("**Code of Conduct**"), the terms of which are not less exacting than the Model Code.
