The Group has not applied any new and revised standards, amendments or interpretations that have been issued but are not yet effective. The Group is currently assessing the impact of the adoption of such new and revised standards, amendments or interpretations to the Group but is yet to be in a position to state whether they would have any material financial impact on the Group's results of operations and financial position.

2. Significant Events

The World Health Organisation declared coronavirus and COVID-19 a global health emergency on 30 January 2020. The COVID-19 pandemic has caused severe disruption to economic activities worldwide and created significant uncertainties in the business environment faced by the Group. These significant uncertainties include, but not limited to, government measures to combat the spread of the virus and the long-term effects of the pandemic on the demand for the Group's primary products.

The significant events and transactions that have occurred since 31 December 2019 relate to the effects of the global pandemic on the Group's condensed consolidated interim financial statements for the six months ended 30 June 2020 and are summarised as follows.

NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

For the six months ended 30 June 2020

2. Significant Events (Continued)

(a) Decrease in sales and cash flows

As disclosed in Note 4, the sales of LED beads and LED lighting products have experienced significant reductions since the pandemic's effects became widespread. The Group considered the reduced sales and reductions in budgeted revenue as indicators of impairment, and therefore determined the recoverable amount for all of its cash generating units ("CGU"). The recoverable amount is the higher of fair value less costs of disposal and value in use. Value in use was higher in all cases due to the nature of the assets included in the carrying amount of cash generating units.

Recoverable amount exceeded the carrying amount on cash generating unit based on forecast cash flows. No impairment on the CGU of the Group for the six months ended 30 June 2020.

(b) Expected credit losses

The Group makes estimates of expected credit losses attributable to trade receivables arising from sales to customers on credit terms, including the incorporation of forward-looking information to supplement historical credit loss rates.

The economic downturn and uncertainties that have arisen as a result of COVID-19 have made these estimates more judgemental, which the Group has taken into account in its determination of applicable expected credit losses.

3. Changes in HKFRSs

The Group has applied the same accounting policies in these interim condensed consolidated financial statements as in its 2019 annual consolidated financial statements, except that it has adopted the following amendments to HKFRSs:

- Amendments to HKFRS 3: Definition of a Business, which is first effective for the current accounting period; and
- Amendments to HKFRS 16: Covid-19-Related Rent Concessions, which is not yet effective for the current accounting period but early adopted by the Group.

The new and revised standards are not relevant to the preparation of the Group's interim condensed consolidated financial information.

NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

For the six months ended 30 June 2020

4. Revenue, Other Income and Gains

Revenue, which is also the Group's turnover, represents the net invoiced value of goods sold, less discounts, returns, value added tax and other applicable local taxes during the reporting period. The sales contract terms not allow rebate, discount, warranties and return on revenue. During the six months ended 30 June 2020 and 2019, there is no rebate, discount, warranties and return on revenue.

MANAGEMENT DISCUSSION AND ANALYSIS

Business Activities

The Group is principally engaged in the design, development, manufacturing, subcontracting service and sales of light-emitting diode (“**LED**”) beads and LED lighting products in the People’s Republic of China (the “**PRC**”). Since the listing of the Company’s securities on the GEM of the Stock Exchange on 30 December 2016 (the “**Listing**”), there are no significant change in the business operations of the Group. During the Period, the Group generally recognised revenue from the sales of LED beads upon delivery of the products to the customers with their acceptance of the products and recognised revenue from subcontracting service based on the stage of completion of the contract by adopting the input method.

Business Review

The Group’s revenue decreased from approximately RMB89.7 million for the six months ended 30 June 2019 to approximately RMB42.8 million for the six months ended 30 June 2020. The significant decrease in revenue during the Period was primarily attributable to the decrease in the sales volume during the Period, as the demand for backlight LED products and LED beads in the PRC has substantially declined as a result of the COVID-19 pandemic (the “**Pandemic**”).

Profit for the Period amounted to approximately RMB0.1 million (approximately RMB3.3 million for the Previous Period), which represents a decrease of approximately RMB3.2 million or approximately 97.0% as compared to that for the corresponding period in 2019. The decrease in profit was primarily due to the significant decrease in revenue during the Period.

Due to the outbreak of the Pandemic, business operations at the Group’s wholly-owned subsidiary, Zhuhai HongGuang Lighting Fixture Company Limited* (“**Zhuhai HongGuang**”) (珠海宏光照明器材有限公司), was temporarily disrupted in February 2020, as certain workers in the affected provinces and municipalities were unable to return to the Group’s principal production factory which is located in the Zhuhai City of Guangdong Province after the Chinese New Year Holidays owing to the suspension or limited service of transportation facilities in certain cities in the PRC. Moreover, some of the Group’s customers and suppliers had also experienced an extended period of disruption or suspension in their business operation and production after the Chinese New Year Holidays.

MANAGEMENT DISCUSSION AND ANALYSIS (CONTINUED)

With the improving situation of the prevention and control on the Pandemic and the lifting of local travel restrictions in most parts of the PRC, most of the Group's workers had reported to duties and the previously affected customers and suppliers had gradually resumed production in the second quarter of 2020. The Group has also imposed the highest hygiene and caution standard in its working environment to protect the health and safety of the staff.

Pessimistic consumer sentiments and the contraction in the overall commercial activity caused by the Pandemic has adversely impacted the business performance of the Group during the Period, as reflected by the cutback or suspension of orders from the Group's customers. The downtrend is expected to be carried forward to certain extent for the rest of 2020. During this critical time with all the increased uncertainties prompted by the Pandemic, the Group will take all practicable measures to cope with the challenges ahead, including the implementation of cost-control measures and the exploration of opportunities to further develop its business and enhance its growth potential.

The Group recognises the importance of research and development to increase resiliency when faced with unprecedented challenges and therefore continues to dedicate efforts on research and development. In 2020, registration of 1 patent was further granted to Zhuhai HongGuang. Furthermore, the Group successfully submitted applications for the registration of 6 patents in the PRC. As at the date of this report, the Group is the registered proprietor of 28 patents in the PRC.

The decrease in revenue was mainly due to the decrease in sales volume during the Period, as the demand for backlight LED products and LED beads in the PRC has substantially declined as a result of the Pandemic.

The gross profit margin of LED beads decreased from approximately 22.6% for the six months ended 30 June 2019 to approximately 22.0% for the six months ended 30 June 2020. Such decrease was mainly attributable to the decrease in the average selling price of LED beads.

Business strategies as set out in the Prospectus	Actual business progress up to 30 June 2020
— Expanding the production capacity	The Group has purchased 86 additional machineries for LED bead encapsulation.
— Developing the Group's sales channels	The Group has recruited 5 sales and marketing staff and in the process of exploring PRC and overseas markets.
