Management Discussion and Analysis

BUSINESS REVIEW

In the first half of 2020, due to the severe impact of the novel coronavirus epidemic (the "**Epidemic**") on the domestic consumer market, the apparel industry has experienced an unprecedented downturn. During the six months ended 30 June 2020 (the "**Period**"), Shanshan Brand Management Co., Ltd. (the "**Company**") and its subsidiaries (collectively, the "**Group**") had a significant decline in total revenue, representing a decrease of approximately 39.2% from RMB533.8 million for the six months ended 30 June 2019 to RMB324.6 million for the Period. Although the Group quickly took a number of cost-saving measures to actively respond to the adverse effects of the Epidemic, the decline in revenue far exceeded the cost savings due to the fixed nature of expenses such as labour costs, storage costs and store channel rentals, which resulted in a sharp decline in the Group's net profit.

In order to adapt to the freezing market and reinvigorate operations, the Group took the initiative to seek change, and put forward the annual operating policy of "enhancing the efficiency of operations, achieving increment through innovation, and energising the enterprise through mechanism", to stabilise the fundamental of business and improve the overall operating efficiency of the Company through various strategies such as channel optimisation, product and supply chain alignment, layout of new retail scenes, organisation structure adjustment and mechanism reform.

Channel management — In order to cope with the continuing impact of the Epidemic, the Group made corresponding structural adjustments to the terminal channel based on the operating performance of stores: (1) it optimised the distributor system, cancelled the authorisation qualification of distributors with poor performance, and actively expanded the layout of high-quality distributors in the blank market and the substitution in existing markets; and (2) it optimised and adjusted direct-sale terminals, proactively "slimmed down", closed loss-making and inefficient stores, and actively improved and upgraded high-quality stores, including image upgrades, display upgrades, and enhancement of terminal retail training. During the Period, the Group's retail network was adjusted from 1,280 as of 31 December 2019 to 1,075 as of 30 June 2020, with 559, 504 and 12 stores of FIRS, SHANSHAN and LUBIAM, respectively, representing a reduction of approximately 16% in the total number of retail outlets under such three brands.

Products and supply chain — The Group strengthened the linkage between the headquarters and the terminals, allowing retail terminals to participate in links such as product development and assortment to adapt to changes in the needs of terminal consumers; strengthened the control of product margins. At the same time, it continued to introduce new suppliers, optimise the supplier structure, improve the bargaining power of suppliers, and strengthen the control of product quality.

Layout of new retail scenes – In 2020, the Group will fully launch the layout of new retail scenes, including online e-commerce, live broadcast, WeChat mini-programs, and cooperation with external Internet platforms to boost business growth. At the same time, the Group will open up online and offline consumption scenes to enhance consumer experience and interaction through the construction of an intelligent retail information system.

Organisation structure adjustment and mechanism construction – In order to further improve operating efficiency, the Group has carried out organisation structure adjustment, implemented a business division system and centralised its headquarters functions; made adjustments to manpower and improved its operational system procedures. It strengthened performance assessment and adopted innovative incentive mechanisms, such as the introduction of store partnership, which will significantly improve the cost, efficiency and business growth of the Group.

FINANCIAL REVIEW

Revenue

The Group generates revenue primarily from sales to distributors, direct sales and franchisee sales. For the Period, the Group's total revenue decreased by approximately 39.2% to RMB324.6 million from RMB533.8 million for the six months ended 30 June 2019, which was primarily due to (1) the fact that the domestic epidemic and the relevant prevention and control measures have severely affected the Group's distributor system, self-operated retail system and franchisee system; (2) the fact that the Group's structural optimisation of the above-mentioned three types of channel terminals has resulted in various degrees of decline in the sales revenue of channels such as "sales to distributors", "direct sales" and "franchisee sales"; and (3) a sharp fall in the revenue of the uniform business resulting from the customers' delays in bidding during the Epidemic and the seasonal impact of the uniform business. It is expected that in the second half of 2020, there will be a significant improvement in the revenue of the uniform business.

At present, the Group vigorously expands cooperation with various external e-commerce retail platforms for online brand authorisation. Due to the outstanding performance of the partners' gross merchandise volume on various e-commerce platforms, the Group's "trademark franchise income" has increased significantly, which is also a prominent manifestation of the Group's brand market position.

Please see the sections headed "Revenue by sales channels" and "Revenue by brands" below for details.

Gross profit

For the Period, the Group's gross profit decreased by approximately 43.5% to RMB169.2 million from RMB299.7 million for the six months ended 30 June 2019, which was primarily attributable to the decrease in (1) the total revenue of the Group; and (2) the gross profit margin as a result of more discounts offered by the Group to reduce inventory during the Epidemic.

Other revenue mainly includes sundry income derived from the sale of raw materials and received from the franchisees by the Group as well as interest income from banks. For the Period, the Group's other revenue decreased by approximately 25.0% to RMB0.6 million from RMB0.8 million for the six months ended 30 June 2019.

For the Period, the Group's selling and distribution expenses decreased by approximately 17.9% to RMB218.8 million from RMB266.6 million for the six months ended 30 June 2019, mainly attributable to the decrease in the revenue sharing fee paid to the franchisees as a result of the decrease of income from sales of SHANSHAN branded products.

For the Period, the Group's administrative expenses increased by approximately 9.7% to RMB22.6 million from RMB20.6 million for the six months ended 30 June 2019, mainly attributable to the bank charges of RMB2.2 million for the application of new overseas bank loans during the Period.

Impairment loss on trade receivables, net

The Group's impairment loss on trade receivables increased to RMB9.8 million which mainly attributable to (1) slow repayment of outstanding receivables from distributors; and (2) economic uncertainties of domestic market in the forthcoming year due to the Epidemic.

| Average trade payables turnover days | 207 | 180 |

The Group's average inventory turnover days increased from 388 days for the year ended 31 December 2019 to 567 days for the Period. Such an increase was mainly attributable to excess inventory as a result of lower sales affected by the Epidemic.

The Group's average trade receivables turnover days increased from 65 days for the year ended 31 December 2019 to 86 days for the Period, mainly due to slow repayment from major distributors during the Period.

1. CORPORATE INFORMATION

Ningbo Shanshan Garment Brand Management Co., Ltd ("**Shanshan Garment Brand**"), the predecessor of the Company, was established as a limited liability company in the PRC on 23 August 2011. On 18 May 2016, Shanshan Garment Brand was converted into a joint stock company with limited liability and renamed as Shanshan Brand Management Co., Ltd. The address of its registered office and principal place of business is No. 238, Yunlin Middle Road, Wangchun Industrial Park, Ningbo, Zhejiang Province, the PRC. The Company's H Shares have been listed on the Stock Exchange since 27 June 2018.

The Group is principally engaged in the design, marketing and sale of formal and casual business menswear in the PRC.

As at 31 December 2019, the Company's immediate and ultimate holding companies were Shanshan and Shanshan Holding, respectively, both of which were established in the PRC. On 24 June 2020, Shanshan disposed of 25% of the equity interests in the Company, and the shareholding decreased from 67% to 42%. Since then, the Directors considered that Shanshan and Shanshan Holding are no longer the Group's immediate holding company and ultimate holding company, respectively.

2. BASIS OF PREPARATION AND PRESENTATION

These condensed consolidated interim financial statements of the Group for the Period have been prepared in accordance with Hong Kong Accounting Standard 34 ("**HKAS 34**"), issued by the Hong Kong Institute of Certified Public Accountants (the "**HKICPA**") and the applicable disclosure provisions of the Listing Rules. These condensed consolidated interim financial statements were authorised for issue on 24 August 2020.

These condensed consolidated interim financial statements have been prepared with the same accounting policies adopted in the 2019 annual financial statements, except for those that relate to new/revised standards or interpretations effective for the first time for periods beginning on or after 1 January 2020. Details of any changes in accounting policies are set out in note 4. The adoption of the new/revised Hong Kong Financial Reporting Standards ("**HKFRSs**") have no material effect on these condensed consolidated interim financial statements. The Group has not early adopted any new/revised HKFRSs that has been issued but not yet effective in the current accounting period.

The preparation of these condensed consolidated interim financial statements in compliance with HKAS 34 requires the use of certain judgements, estimates and assumptions that affect the application of policies and the reported amounts of assets and liabilities, income and expenses on a year to date basis. Actual results may differ from these estimates. The areas where significant judgements and estimates have been made in preparing the financial statements and their effect are disclosed in note 5.

For the six months ended 30 June 2020

2. BASIS OF PREPARATION AND PRESENTATION (CONTINUED)

These condensed consolidated interim financial statements are presented in RMB, unless otherwise stated. These condensed consolidated interim financial statements contain condensed consolidated financial statements and selected explanatory notes. The notes include an explanation of events and transactions that are significant to an understanding of the changes in financial position and performance of the Group since the 2019 annual financial statements. These condensed consolidated interim financial statements and notes do not include all of the information required for a complete set of financial statements prepared in accordance with HKFRSs and should be read in conjunction with the 2019 annual financial statements.

3. SIGNIFICANT EVENTS

The World Health Organisation declared coronavirus and COVID-19 a global health emergency on 30 January 2020. Since then, the Group has experienced significant disruption to its operations in the following aspects:

- Decreased demand for certain garments as a consequence of social distancing requirements and recommendations;
- Disruptions in the supply of inventory from major suppliers;
- Significant uncertainty concerning when the government lockdowns will be lifted, social distancing requirements will be eased and the long-term effects of the pandemic on the demand for the Group's primary products.

The significant events and transactions that have occurred since 31 December 2019 relate to the effects of the global pandemic on the Group's condensed consolidated interim financial statements for the Period are summarised as follows.

(a) Decrease in sales and cash flows

As disclosed in note 6, most revenue streams have experienced significant reductions since the pandemic's effects became widespread. The Group considered the reduced sales and reductions in budgeted revenue as indicators of impairment, and therefore determined the recoverable amount for all of its cash generating units. The recoverable amount is the higher of fair value less costs of disposal and value in use. Value in use was higher in all cases due to the nature of the assets included in the carrying amount of cash generating units.

The Group's cash generating unit ("CGU"), the sales of garments in the PRC, was tested for impairment as summarised below:

Recoverable amount exceeded the carrying amount of the sales of garments CGU based on forecast cash flows. The cash flow forecasts for the sales of garments CGU are based on the budgets approved by the management for the next 5 years, with a terminal value thereafter. Based on the impairment testing result, the carrying amount of the Group's CGU is fully recoverable.

For the six months ended 30 June 2020

3. SIGNIFICANT EVENTS (CONTINUED)

(b) Rent concessions received from lessors

Due to the government policy, the Group has closed a number of its retail shops in January and February 2020 which have been reopened in March 2020.

The Group has received numerous forms of rent concessions from lessors due to being unable to operate for significant periods of time, including:

- Rent forgiveness; and
- Deferrals of rent

As discussed in note 4, the Group has elected to apply the practical expedient introduced by the amendments to HKFRS 16 to all rent concessions that satisfy the criteria. Substantially all of the rent concessions entered into during the Period satisfy the criteria to apply the practical expedient.

The application of the practical expedient has resulted in the reduction of total lease liabilities of RMB138,651. The effect of this reduction has been recorded in profit or loss in the Period in which the event or condition that triggers those payments occurs.

4. CHANGES IN HKFRSs

The HKICPA has issued a number of new/revised HKFRSs that are firstly effective for the current accounting period of the Group:

- Amendments to HKFRS 3: Definition of a Business
- Amendments to HKFRS 7, HKFRS 9 and HKAS 39: Interest Rate Benchmark Reform
- Amendments to HKAS 1 and HKAS 8: Definition of Material
- Amendments to HKFRS 16: COVID-19-Related Rent Concessions
- Conceptual Framework for Financial Reporting (Revised)

The new/revised HKFRSs that are effective from 1 January 2020 did not have any significant impact on the Group's accounting policies.

For the six months ended 30 June 2020

4. CHANGES IN HKFRSs (CONTINUED)

Amendments to HKFRS 3: Definition of a Business

The amendments clarify that a business must include, as a minimum, an input and a substantive process that together significantly contribute to the ability to create outputs, together with providing extensive guidance on what is meant by a "substantive process".

Additionally, the amendments remove the assessment of whether market participants are capable of replacing any missing inputs or processes and continuing to produce outputs, whilst narrowing the definition of "outputs" and a "business" to focus on returns from selling goods and services to customers, rather than on cost reductions.

An optional concentration test has also been added that permits a simplified assessment of whether an acquired set of activities and assets is not a business.

Amendments to HKFRS 7, HKFRS 9 and HKAS 39: Interest Rate Benchmark Reform

The amendments modify some specific hedge accounting requirements to provide relief from potential effects of the uncertainties caused by interest rate benchmark reform. In addition, the amendments require companies to provide additional information to investors about their hedging relationships which are directly affected by these uncertainties.

Amendments to HKAS 1 and HKAS 8: Definition of Material

The amendments clarify the definition and explanation of "material", aligning the definition across all HKFRSs and the Conceptual Framework, and incorporating supporting requirements in HKAS 1 into the definition.

Amendments to HKFRS 16: COVID-19-Related Rent Concessions

Effective 1 June 2020, HKFRS 16 was amended to provide a practical expedient for lessees accounting for rent concessions that arise as a direct consequence of the COVID-19 pandemic and satisfy the following criteria:

- (a) The change in lease payments results in revised consideration for the lease that is substantially the same as, or less than, the consideration for the lease immediately preceding the change;
- (b) The reduction is lease payments affects only payments originally due on or before 30 June 2021; and
- (c) There is no substantive change to other terms and conditions of the lease.

Rent concessions that satisfy these criteria may be accounted for in accordance with the practical expedient, which means the lessee does not need to assess whether the rent concession meets the definition of a lease modification. Lessees apply other requirements in HKFRS 16 in accounting for the concession.

4. CHANGES IN HKFRSs (CONTINUED)

Amendments to HKFRS 16: COVID-19-Related Rent Concessions (Continued)

The Group has elected to utilise the practical expedient for all rent concessions that meet the criteria. The practical expedient has been applied retrospectively, meaning it has been applied to all rent concessions that satisfy the criteria, which in the case of the Group, occurred between January 2020 and June 2020.

Accounting for the rent concessions as lease modifications would have resulted in the Group remeasuring the lease liability to reflect the revised consideration using a revised discount rate, with the effect of the change in the lease liability recorded against the right-of-use asset. By applying the practical expedient, the Group is not required to determine a revised discount rate and the effect of the change in the lease liability is reflected in profit or loss in the period in which the event or condition that triggers the rent concession occurs. The effect of applying the practical expedient is disclosed in note 3(b).

Conceptual Framework for Financial Reporting (Revised)

The revised framework is not a standard nor an accounting guideline. It does not override any standard, any requirement in a standard or accounting guideline. The revised framework includes: new chapters on measurement and reporting financial performance; new guidance on derecognition of assets and liabilities; updated definitions of asset and liability; and clarifications in the roles of stewardship, prudence and measurement uncertainty in financial reporting.

5. USE OF JUDGEMENTS AND ESTIMATES

In preparing the condensed consolidated interim financial statements, the significant judgements made by the management in applying the Group's accounting policies and the key sources of estimation uncertainty were the same as those that applied to 2019 annual financial statements.

However, as disclosed in note 3, the effects of COVID-19 have required significant judgements and estimates to be made, including:

- (a) Whether rent concessions satisfy the criteria to be accounted for using the practical expedient introduced by the amendments to HKFRS 16;
- Assessing whether the entity has reasonable assurance as to whether it will comply with the conditions attached to government grants;
- (c) Calculating the recoverable amount for CGUs that exhibit indicators of impairment as at the period end; and
- (d) Determining which information obtained subsequent to period end provides evidence of conditions that existed as at the end of the reporting period ("adjusting events after the reporting period") and which do not ("non-adjusting events after the reporting period").

5. USE OF JUDGEMENTS AND ESTIMATES (CONTINUED)

Additionally, while the changes in the following judgements and estimates have not had a material impact on the Group, the effects of COVID-19 have required revisions to:

- (a) Determining the net realisable value of inventory that has become slow moving due to the effects of COVID-19;
- (b) Estimates of customer returns and the determination of the Group's methodology for estimating the transaction price for sale subject to rights of return;
- (c) Estimates of expected credit losses attributable to trade receivables arising from sale to customers on credit terms, including the incorporation of forward-looking information to supplement historical credit loss rates; and
- Assessment of the Group's ability to continue as a going concern. Although the Group has (d) experienced downturns during the Period, the Directors do not consider that there are material uncertainties that cast doubt on the Group's going concern status over the course of the next 18 months. This judgement was made with consideration of the Group's liquidity position, given the underlying strength of the statement of financial position, the maturity dates of existing borrowings and the absence of covenants over such borrowings, the availability of undrawn finance facilities in place, and based on the assumptions and potential scenarios modelled within the trading segment as described in note 3, alongside the Directors' proposed responses to each scenario. Under each scenario, mitigating actions are all within management control, can be initiated as they relate to discretionary spend, and do not impact on the ability to meet demand. No significant structural changes to the business are assumed to be required under each scenario. Under each scenario, after taking mitigating actions as needed, the forecasts indicate that it is appropriate for the going concern basis to be adopted in preparing the interim report and financial statements, and that there are no material uncertainties over the assumptions underpinning this judgement that are required to be disclosed.

6. SEGMENT INFORMATION AND REVENUE

(a) Reportable segment

During the reporting period, the information reported to the executive Directors, who are the chief operating decision makers for the purpose of resource allocation and assessment of performance, is the financial information of the Group as a whole as reported under HKFRSs. Such information does not contain profit or loss information of a particular product or service line or geographical area. Therefore, the executive Directors have determined that the Group has only one single reportable segment which is trading of garments in the PRC. The executive Directors allocate resources and assess performance on an aggregated basis.

The following summary describes the operations of the Group's reportable segment:
