Notes:

1. Basis of preparation

The condensed consolidated financial statements have been prepared in accordance with Hong Kong Accounting Standard (“HKAS”) 34 “Interim Financial Reporting” issued by the Hong Kong Institute of Certified Public Accountants (“HKICPA”) as well as with the applicable disclosure requirements of Appendix 16 to the Rules Governing the Listing of Securities (the “Listing rules”) on The Stock Exchange of Hong Kong Limited (the “Stock Exchange”).

2. Principal accounting policies

The condensed consolidated financial statements have been prepared on the historical cost basis, except for investment properties and certain financial instruments, which are measured at fair values.

Other than additional accounting policies resulting from application of amendments to Hong Kong Financial Reporting Standards (“HKFRS”) and application of certain accounting policy which became relevant to the Group, the accounting policies and methods of computation used in the condensed consolidated financial statements for the six months ended 30 June 2020 are the same as those presented in the Group’s annual financial statements for the year ended 31 December 2019.

Application of amendments to HKFRS

In the current interim period, the Group has applied the Amendments to References to the Conceptual Framework in HKFRS Standards and the following amendments to HKFRSs issued by the HKICPA, for the first time, which are mandatorily effective for the annual period beginning on or after 1 January 2020 for the preparation of the Group’s condensed consolidated financial statements:

Amendments to HKAS 1 and HKAS 8	Definition of Material
Amendments to HKFRS 3	Definition of a Business
Amendments to HKFRS 9, and HKAS 39 and HKFRS 7	Interest Rate Benchmark Reform

Except as described below, the application of the Amendments to References to the Conceptual Framework in HKFRS Standards and the amendments to HKFRSs in the current period has had no material impact on the Group’s financial positions and performance for the current and prior periods and/or on the disclosures set out in these condensed consolidated financial statements.

2. Principal accounting policies – continued

Impacts of application on Amendments to HKAS 1 and HKAS 8 “Definition of Material”

The amendments provide a new definition of material that states “information is material if omitting, misstating or obscuring it could reasonably be expected to influence decisions that the primary users of general purpose financial statements make on the basis of those financial statements, which provide financial information about a specific reporting entity.” The amendments also clarify that materiality depends on the nature or magnitude of information, either individually or in combination with other information, in the context of the financial statements taken as a whole.

The application of the amendments in the current period had no impact on the condensed consolidated financial statements. Changes in presentation and disclosures on the application of the amendments, if any, will be reflected on the consolidated financial statements for the year ending 31 December 2020.

3. Segment information

HKFRS 8 “Operating Segments” requires operating segments to be identified on the basis of internal reports about components of the Group that are regularly reviewed by the executive directors of the Company, who are Chief Operating Decision Maker (“CODM”), in order to allocate resources to segments and to assess their performance. Specifically, the Group’s reportable segments under HKFRS 8 organised into six main operating divisions - (i) manufacture and sale of laminates, (ii) manufacture and sale of PCBs, (iii) manufacture and sale of chemicals, (iv) sales and rental of properties (“properties”), (v) investments (mainly investment income from debt instruments at fair value through other comprehensive income, equity instruments at fair value through profit or loss and equity instruments at fair value through other comprehensive income) and (vi) others (mainly including service income, manufacture and sale of magnetic products and hotel business). The management aggregated the sales of properties and rental income business into one reportable segment because the financial performance of both businesses are affected by changes in the property market. In addition, the management aggregated service income, hotel business and manufacture and sale of magnetic products into one reportable segment because the revenue, results, assets and liabilities of each business are insignificant to the Group. No other operating segment identified by the CODM have been aggregated in arriving at the reportable segments of the Group.

The accounting policies the Group used for segment reporting under HKFRS 8 are the same as those used in its HKFRS consolidated financial statements. The CODM assesses segment profit or loss using a measure of operating profit whereby certain items are not included in arriving at the segment results of the operating segments (share of result of an associate, share of results of joint ventures, finance costs and unallocated corporate income and expenses).

Under the Law of the PRC on Enterprise Income Tax (the "EIT Law") and Implementation Regulation of the EIT Law, the tax rate of the PRC subsidiaries is 25% from 1 January 2008 onwards.

The provision of LAT is estimated according to the requirements set forth in the relevant PRC tax laws and regulations. LAT has been levied at progressive rates ranging from 30% to 60% on the appreciation of land value, represented by the excess of sales proceeds of properties over prescribed direct costs. Prescribed direct costs are defined to include costs of land, development and construction costs, as well as certain costs relating to the property development. According to the State Administration of Taxation's official circulars, LAT shall be payable provisionally upon sales of the properties, followed by final ascertainment of the gain at the completion of the properties development.

On 21 March 2018, the Hong Kong Legislative Council passed The Inland Revenue (Amendment) (No. 7) Bill 2017 (the "Bill") which introduces the two-tiered profits tax rates regime. The Bill was signed into law on 28 March 2018 and was gazetted on the following day. Under the two-tiered profits tax rates regime, the first HK\$2 million of profits of the qualifying group entity will be taxed at 8.25%, and profits above HK\$2 million will be taxed at 16.5%. The profits of group entities not qualifying for the two-tiered profits tax rates regime will continue to be taxed at a flat rate of 16.5%.

The directors of the Company considered the amount involved upon implementation of the two-tiered profits tax rates regime as insignificant to the consolidated financial statements. Hong Kong Profits Tax is calculated at 16.5% of the estimated assessable profit for both periods.

Taxation arising in other jurisdictions is calculated at the rates prevailing in the relevant jurisdictions.

BUSINESS REVIEW

On behalf of the board (“Board”) of directors (“Directors”) of Kingboard Holdings Limited, I am delighted to report a satisfactory performance for the Company and its subsidiaries (the “Group”) for the six months ended 30 June 2020 (the ‘Period’). During the Period, a public health crisis descended upon the world without early warning. The manufacturing industry has taken substantial knocks amid the spread of the COVID-19 pandemic. Nevertheless the Group faced up to the challenges through coordinated efforts to prevent infection while securing production, enabling the Group to drive work and production resumption at all factories in an orderly manner. As the pandemic continued to intensify with logistics channels under pressure, overseas markets were greatly affected. However, with the situation in Mainland China being gradually brought under control, the domestic market recorded a swift recovery. The Group’s management also seized the opportunities presented by market revival and industrial sector rebound, in order to minimise the impacts of the pandemic. In the face of complex market challenges, the Group expanded business around its diversified portfolio. The properties segment obtained a handsome sales performance, making up for the sales drop in the manufacturing and industrial segments. The Group’s revenue consequently increased 9% year on year to HK\$19,925.6 million. However during the Period, fair value changes of equity instruments at fair value through profit or loss incurred a loss owing to the fluctuations of the securities market amidst the COVID-19 pandemic and the consequent development and occurrences, thus profit attributable to the owners of the Company decreased by 27% to HK\$1,059.2 million. The Board has proposed an interim dividend of HK\$0.28 per share.

FINANCIAL HIGHLIGHTS

PERFORMANCE

The Group maintained its position as the world's top laminates producer for the fifteenth consecutive year. During the Period, despite a slide in market demands, especially from overseas, as a result of the pandemic, the division took full advantage of its vertically integrated production capability to ensure adequate product supply at the time of market rejuvenation, thereby enabling it to tap into the domestic market and clearing away the hindrance created by the pandemic. Because of a fall in product unit price, segment revenue (including inter-segment sales) was down by 6% to HK\$6,685.9 million, but earnings before interest, tax, depreciation and amortisation ("EBIDTA") still saw a 7% increase to HK\$1,365.6 million on the back of sound cost management.

The performance of the printed circuit board ("PCB") division was generally similar to that of the laminates division. But as the demand for distant work arrangements rose abruptly, orders for such electronic products as computers and video-conferencing facilities increased markedly, demand for medical and related equipment has also increased significantly, offsetting the reduction of certain overseas orders. At the same time, the division's development towards advanced PCBs harvested fruitful results, leading to a quick enhancement of its product mix for an increased profit margin. The turnover of the PCB division fell slightly by 2% to HK\$4,271.6 million, while EBIDTA grew by 7% to HK\$606.2 million.

The chemicals business was dragged down by a slowdown in economic activities and a plunge in petroleum prices. The selling price of key chemical products declined compared to the same period last year. Hence the chemicals division's turnover (including inter-segment sales) dropped 22% to HK\$5,124.0 million. EBIDTA also decreased by 32% to HK\$476.5 million.

Regarding the property business, the partial booking of income from the Kau To project in Shatin, Hong Kong, together with the booking of completed and delivered units in Eastern China, has led to a surge in the turnover from property sales to HK\$4,329.7 million. Affected by the pandemic, rental income decreased by a modest 5% to HK\$528.2 million. On the whole, division turnover increased by 442% to HK\$4,857.9 million, with EBIDTA up by 229% to HK\$1,908.4 million.

PROSPECTS

Heading into the second half of the year, macro changes in the international climate such as the Sino-US trade dispute and the paradigm shift in the industry will mean more complex internal and external environments for the Group. Premised on a vertically integrated supply chain, the Group stays committed to pursuing a business portfolio diversification strategy. Through closely observing China's new economic strategy, which focuses on a strong 'domestic circulation' while promoting a 'dual circulation' policy that seeks mutually beneficial external development, the Group sets its sights on achieving stable performance and sustainable growth. In addition, the epidemic situation in some European countries has been controlled and economic activities have been restarted. The demand in the electronics industry chain, including the automotive industry, has increased, driving the increase in the business volume of the group's laminates and PCB segments.

Output volume of laminates exceeded 12 million square meters both in June and July 2020. Recently, the price of some upstream materials has increased, and the copper foil was in short supply. It is expected that the prices of laminates and copper foil products have room for upward adjustment. The laminates division is planning to increase the capacities of copper foil and glass epoxy laminates ("FR4"), by 900 tonnes and 480,000 square metres per month respectively. In fully exploiting the competitive advantage of such upstream materials as copper foil, glass yarn and glass fabric, the Group will continue to strengthen its core competencies in laminates. In a further step, it will seek accreditation from customers to drive the sales of high value-added products. The division will upgrade its product portfolio according to market changes, expand customer coverage on the back of cost advantages, and further its value-adding abilities based on scale.

5G network and artificial intelligence are prime examples of the accelerating development of new technologies. The ever-expanding reach of electronic products will bring huge growth potential to the Group's PCB business. Currently, the PCB division collects solid gains from aspects such as base station infrastructure, servers, computers and home appliances. The division will focus on boosting product performance and improving operating mechanisms. With the objective of being market-oriented and efficiency-driven, the division will devise a master plan for bolstering the brands under the Group, namely Elec & Eltek, Techwise and Express Electronics, thus building up a network of Kingboard PCBs for higher market penetration. E&E, a subsidiary of the Company listed on the main board of the SGX-ST and the main board of the Stock Exchange, has been in the process of proposed privatization by way of voluntary conditional cash offer. As

at the closing of the Offer which took place on 6 August 2020, the Company (through its wholly-owned subsidiaries) owned an aggregate holding of approximately 98.32% in E&E. For details, please refer to Note 17 of this report.

The mainland economy is displaying strong resilience and positive signs of recovery. The establishment of ecological infrastructure, and the battle to fight air, water and soil pollution, will remain as the country's priorities in 2020. The chemicals segment will spare no effort in making sure production safety and emission standards are met, and will take steps to reduce energy consumption through enhancing plant efficiency and improving resources utilisation.

The property division will continue with the scheduled sales of its residential projects in Eastern China, with the aim of speeding up capital recovery. The Group is also actively mapping out a plan to promote its residential project in Hong Kong, and is confident that the project will continue to yield considerable returns.
