CHAIRMAN'S STATEMENT

Ngiam Mia Je Patrick
Chairman

2020 has been a challenging year, an unprecedented year. The impact from the outbreak of the novel coronavirus ("COVID-19") was in ways we never had imagined.

During the year under review, COVID-19 has negatively impacted our financial results and caused delay in ongoing clinical trial programmes. However, in these demanding times, leadership, team spirits and acting responsibly have become the most critical value to be resilient and allowed us to continue executing our plans.

FINANCIAL PERFORMANCE

For the year ended 31 December 2020, Essex Bio-Technology Limited (the "Company", together with its subsidiaries, the "Group") achieved a consolidated turnover of approximately HK\$978.1 million, a decrease of 23.6% over the last year. The decrease is attributable to about 44.3% decrease in the first half of 2020 as the government implemented a series of control measures in a number of provinces and municipalities in the People's Republic of China (the "PRC") to curb the spread of COVID-19, which had significantly disrupted the clinical operations of hospitals in the PRC and had prevented non-emergency patients visiting hospitals and outpatient clinics. However, as clinical operations of hospitals in the PRC have been largely resumed to normalcy in September 2020, the Group's revenue has also been recovering to nearing the pre-COVID-19 level from the third quarter. The recovery had helped lower the decrease in revenue in the second half to approximately 6.2% as compared to the same period of last year.

The Group's turnover is primarily made up from the segments of Ophthalmology and Surgical (Wound care and healing). The core products that are of current growth driver under each segment are:

1. Ophthalmology – Beifushu series (Beifushu eye drops, Beifushu eye gel and Beifushu unit-dose eye drops), Tobramycin Eye Drops, Levofloxacin Eye Drops, Sodium Hyaluronate Eye Drops, Xalatan® Eye Drops, Xalacom® Eye Drops and 適麗順® (Iodized Lecithin Capsules*); and
2. Surgical (Wound care and healing) – Beifuji series (Beifuji spray, Beifuji lyophilised powder and Beifuxin gel), T-Bactum® (anti-microbial oral care product), Carisolv® dental caries removal gel and 伊血安顆粒 (Yi Xue An Granules*).

The sectoral turnover of Ophthalmology and Surgical is approximately 42.9% and 57.1% of the Group's turnover, respectively. The combined turnover of the Group's flagship biologics, Beifushu series and Beifuji series, the basic fibroblast growth factor (bFGF) based biologic drugs, represented about 83.3% of the Group's total turnover, of which Beifushu series and Beifuji series accounted for 27.1% and 56.2% of the Group's turnover, respectively. The remaining 16.7% of the Group's turnover is largely contributed from sales of Tobramycin Eye Drops, Levofloxacin Eye Drops, Sodium Hyaluronate Eye Drops, Xalatan® Eye Drops, Xalacom® Eye Drops, 適麗順® (Iodized Lecithin Capsules*), T-Bactum® and 伊血安顆粒 (Yi Xue An Granules*), collectively.

Ophthalmology segment contributed approximately HK\$419.2 million to the Group's turnover for the year ended 31 December 2020, representing a decrease of 26.1% as compared to last year. Surgical segment recorded a total turnover of approximately HK\$558.9 million for the year ended 31 December 2020, representing a decrease of 21.5% as compared to last year. The decrease was attributed to the aforementioned impact of COVID-19.

During the year under review, the Group achieved after-tax profit of approximately HK\$218.9 million as compared to approximately HK\$302.5 million in 2019, representing a decrease of 27.6% which was attributed to the aforementioned impact of COVID-19.

CHAIRMAN'S STATEMENT

As at 31 December 2020, the Group had cash and cash equivalents of approximately HK\$599.8 million (31 December 2019: approximately HK\$473.3 million).

SIGNIFICANT BUSINESS DEVELOPMENT ACTIVITIES

We are committed to pragmatically investing in new products and technologies to strengthen the Group's product and research and development ("R&D") pipeline as near to mid-term growth driver in ophthalmology and long-term plan for new therapeutics in oncology. During the year under review, investments in ophthalmic products and licensing of a molecule for use in oncology are outlined as follows:

Investments in Ophthalmology

On 4 June 2020, the Group entered into a framework agreement with 西藏林芝百盛藥業有限公司 (Tibet Linzhi Parkson Pharmaceutical Co., Ltd.*) in relation to the possible acquisition of all intellectual property rights relating to all technologies and process of product R&D and production of 適麗順® (Iodized Lecithin Capsules*) and other medicinal products in different forms in which iodized lecithin serves as an active pharmaceutical ingredient.

On 15 October 2020, the Group entered into a co-development and exclusive license agreement (the "Co-Development License Agreement") with Shanghai Henlius Biotech, Inc ("Henlius"). Pursuant to the Co-Development License Agreement, the Group has agreed to fund up to US\$24.0 million i.e. 80% of the development costs of a pharmaceutical product that contains an anti-vascular endothelial growth factor ("anti-VEGF") as a drug substance (the "Licensed Product"), which is intended for the treatment of exudative (wet) age-related macular degeneration ("wet-AMD"), being a bevacizumab biosimilar candidate. In return, the Group has obtained an exclusive license for the regulatory development, manufacture and commercialisation of the Licensed Product worldwide, subject to commercial sales milestone payment and royalties levied on net sales of the Licensed Product payable to Henlius. In the event that the Group grants a sub-license to a third party for commercialisation of the Licensed Product, the Group will share 20% of the relevant sub-licensing revenue with Henlius.

The filing by Henlius of clinical trial for recombinant anti-VEGF humanised monoclonal antibody ophthalmic injection HLX04-O for the treatment of wet-AMD has been approved by Therapeutic Goods Administration, Australia, and the phase 3 clinical trial is permitted to commence in Australia (CTN No. CT-2020-CTN-04843-1). Accordingly, a phase 3 clinical study with respect to the Licensed Product is intended and expected to be initiated in Australia in the near future.

The Licensed Product can be used for treating wet-AMD, diabetic macular edema, macular edema caused by retinal vein occlusion and myopic choroidal neovascularisation. In accordance with the report of Frost & Sullivan, the estimated number of patients of these 4 categories is over 15.5 million in the PRC in 2019. Assuming each patient applies 4 doses in the first year of treatment and 2 to 3 doses in subsequent years, it is expected that the size of the potential market of the Licensed Product will be significant.

CHAIRMAN'S STATEMENT

Apart from the above investments, in 2018, the Group entered into a co-development agreement with Mitotech S.A. and Mitotech LLC for the United States Food and Drug Administration ("US FDA") phase 3 clinical trial of an ophthalmic solution containing SkQ1 for dry eye disease. As disclosed in the announcement of the Company dated 24 February 2021, positive outcome was achieved during second phase 3 clinical trial (VISTA-2). The clinical trial study repeated statistically significant positive results on key predefined secondary end-point (Central Corneal Fluorescein Staining). The board of directors of the Company (the "Board") is enthusiastic about the read-out of clearing of central staining of the cornea (defined as zero staining in central cornea), which reveals the potential of SkQ1 in addressing oxidative stress in dry eye diseases, and is looking forward to seeing the results of the third phase 3 clinical trial (VISTA-3) on the overall regulatory pathway towards the new drug application submission with the US FDA targeted by Mitotech S.A. to be made in the year of 2022 to 2023.

Investment in Oncology

On 28 August 2020, the Group entered into an intellectual property license agreement (the "IP License Agreement") with 廣州康睿生物醫藥科技股份有限公司 (Guangzhou Kangrui Biological Pharmaceutical Technology Co., Ltd.*) ("Kangrui"). Pursuant to the IP License Agreement, Kangrui granted to the Group an exclusive license to develop, manufacture, use or otherwise commercialise any therapeutic products incorporating the molecule initially developed by Kangrui for use in oncology (the "Molecule").

In line with the Group's strategic development plans in oncology, the IP License Agreement presents a good opportunity for the Group to evaluate the suitability of developing and commercialising the Molecule in the field of therapeutic use and/or therapies in oncology.

MARKET DEVELOPMENT

Over the years, the Group has been relentlessly investing in establishing and strengthening its market access capability. As at 31 December 2020, the Group maintains a network of 43 regional sales offices in the PRC and a total number of about 1,290 sales and marketing representatives, out of which approximately 38% are on contract basis or from appointed agents.

During the year under review, the Group's therapeutic products are being prescribed in more than 9,000 hospitals and medical providers, coupled with approximately 2,000 pharmaceutical stores, which are mainly located in the major cities, provinces and county cities in the PRC.

For achieving a sustainable traction on growth for currently marketed products as well as for near-term to mid-term new products being commercialised, the Group initiated investments to improve its competitiveness and widen its customer base under the following plans:

- Investing in clinical observation programmes for affirming additional clinical indications of its commercialised products;
- Reaching out to market in lower-tier cities;
- Cultivating pharmaceutical stores, where possible, as complementary sales channel; and
- Building on-line platform for medical consultation and e-prescription for patients with chronic diseases under its healthtech initiative.

During the year under review, the Group has initiated its market access expansion to Southeast Asian countries by setting up a base in Singapore.

CHAIRMAN'S STATEMENT

RESEARCH AND DEVELOPMENT

During the year under review, the Group renewed its R&D's vision, dedicated to science and innovation, with a mission to develop therapeutics that would meet unmet clinical and/or commercial needs. The Group concurrently kick-started a 5-year (2021 to 2025) R&D's development plan to further strengthen its R&D capability and its position in ophthalmology.

The Group's key R&D initiatives comprise of growth factor, antibody (i.e. mAb, bsAb, sdAb, scFv, ADC/FDC, etc.), drug formulation know-how and Blow-Fill-Seal ("BFS") platform. Growth factor, antibody and drug formulation know-how are used for the development of therapeutic drugs in ophthalmology, surgical (wound care and healing) and oncology, whereas BFS platform is a state-of-the-art manufacturing facility for producing preservative-free unit-dose drugs, in particular for ophthalmic drugs.

As at 31 December 2020, there are 15 R&D programmes in the pre-clinical to clinical stage, out of which 4 ophthalmology programmes are in Investigational New Drug ("IND")/Clinical/New Drug Application ("NDA") stage. The 4 ophthalmology programmes listed below are targeted as mid-term growth driver.

1. EB11-18136P: SkQ1 eye drops, second phase 3 clinical trial (US FDA) topline data released on 24 February 2021
2. EB11-15120P: Azithromycin eye drops, pending phase 3 clinical trial results (National Medical Products Administration ("NMPA") in the PRC)
3. EB11-13108P: Moxifloxacin eye drops, NDA stage (NMPA in the PRC)
4. EB12-20145P: Bevacizumab for wet-AMD, IND ready stage (global, US FDA, European Medicines Agency and NMPA in the PRC)

During the year under review, the following programmes were completed with good success. The completed programmes would strengthen the currently marketed product portfolio, served as near-term growth driver.

1. EB12-05100P (ophthalmology): Beifushu (FGF2) unit-dose eye drops, entered commercial stage (in the PRC)
2. EB12-17133Z (dermatology): Beifuji (FGF2) increased dosage for external use, entered commercial stage (in the PRC)
3. EB23-18235Y (stomatology): T-Bactum® (anti-microbial oral care product), entered commercial stage (in the PRC)

As at the date of this report, the Group has obtained a total of 34 patent certificates or authorisation letters: 27 發明專利 (invention patents), 3 實用新型專利 (utility model patents) and 4 外觀專利 (design patents).

To advance our pursuits of new therapeutics programme involving antibodies that, in particular, target in oncology and ophthalmology, a wholly-owned subsidiary, EssexBio Therapeutics Inc. ("EssexBio USA"), has been incorporated in the United States in March 2020. EssexBio USA is set up as the Group's R&D centre and clinical trial management of the Group's products in the United States. Being in the United States, EssexBio USA will continue to position the Group with better visibility for in and out licensing potential of technologies and products.

CHAIRMAN'S STATEMENT

PROSPECTS

COVID-19 remains a major concern in 2021 globally. We continue to monitor the situation and will take appropriate actions to overcome any difficulty in this unforeseen circumstance. Barring the unforeseen circumstance, the Group remains focus on executing its plans and delivering progressive results.

DIVIDEND

To reward our valued shareholders, the Board is pleased to propose a final dividend of HK\$0.05 (2019: HK\$0.05) per ordinary share to be approved at the upcoming annual general meeting of the Company.

APPRECIATION

I would like to take this opportunity to express my sincere gratitude to all stakeholders, business associates and valued customers for the trust, support and cooperation accorded to us, and each and every member of the Group for their relentless efforts rendered in shaping the Group into being a progressive and promising pharmaceutical player.

BUSINESS REVIEW

The vision of Essex Bio-Technology Limited (the “Company”, together with its subsidiaries, the “Group”) is to be a great and socially responsible corporation. Strategically, the Group develops, manufactures and commercialises genetically engineered therapeutic recombinant bovine basic fibroblast growth factor (“rb-bFGF”), with established mechanism of action in cellular proliferation, differentiation and migration.

The Group’s turnover is primarily made up from the segments of Ophthalmology and Surgical (wound care and healing) covering dermatology, stomatology, obstetrics and gynaecology; while pursuing new therapeutics in oncology, orthopaedics and neurology through the Group’s enrichment programme.

Currently the Group has six commercialised biologics, formulated with rb-bFGF, that are marketed and sold as Beifushu eye drops, Beifushu eye gel and Beifushu unit-dose eye drops for treatment of ocular wounds, Beifuji spray, Beifuji lyophilised powder and Beifuxin gel for treatment of surface wounds, in the People’s Republic of China (the “PRC”) (collectively referred to as the “bFGF Series”). The bFGF Series are developed and manufactured by the Group, three of which were approved by 國家藥品監督管理局 (National Medical Products Administration) as Category I drugs and four of which are on the list of the National Drug List for Basic Medical Insurance, Work-Related Injury Insurance and Maternity Insurance issued by the National Healthcare Security Administration and the Ministry of Human Resources and Social Security of the PRC. Collectively, the combined turnover of the bFGF Series represented about 83.3% of the Group’s total turnover for the year under review.

Apart from the bFGF Series, the Group has a portfolio of commercialised preservative-free unit-dose eye drops, namely Tobramycin Eye Drops, Levofloxacin Eye Drops and Sodium Hyaluronate Eye Drops. These products are expected to strengthen the market positioning of the ophthalmology business segment of the Group.

During the year under review, the Group soft-launched in the fourth quarter of 2020 T-Bactum® (anti-microbial oral care product), an in-house developed best in class product from the patented nano emulsion technology, encompassing thymol. T-Bactum® is manufactured and sold through 武漢伢典生物科技有限公司 (Wuhan Adv. Dental Co., Ltd.*), a wholly-owned subsidiary of the Company.

Leveraging on its established market access capability, the Group undertakes importation, promotion and selling of a range of products such as Xalatan® Eye Drops, Xalacom® Eye Drops, 適麗順® (Iodized Lecithin Capsules*) and 伊血安顆粒 (Yi Xue An Granules*). Such products are complementary to the Group’s therapeutics business of Ophthalmology and Surgical, collectively formed part of the core products as current growth driver.

Building mid-term and long-term growth drivers, the Group maintains a pipeline of multi-project in research and development (“R&D”) at various stages of clinical programmes, which cover a handful of unit-dose ophthalmic products and biologics in growth factors and antibody.

SIGNIFICANT BUSINESS DEVELOPMENT ACTIVITIES

We are committed to pragmatically investing in new products and technologies to strengthen the Group’s product and R&D pipeline as near to mid-term growth driver in ophthalmology and long-term plan for new therapeutics in oncology. During the year under review, investments in ophthalmic products and licensing of a molecule for use in oncology are outlined as follows:

Investments in Ophthalmology

On 4 June 2020, the Group entered into a framework agreement with 西藏林芝百盛藥業有限公司 (Tibet Linzhi Parkson Pharmaceutical Co., Ltd.*) (“Parkson”) in relation to the possible acquisition of all intellectual property rights relating to all technologies and process of product R&D and production of 適麗順® (Iodized Lecithin Capsules*) and other medicinal products in different forms in which iodized lecithin serves as an active pharmaceutical ingredient. As at the date of this report, the Group has not entered into any definitive agreements with Parkson.

On 15 October 2020, the Group entered into a co-development and exclusive license agreement (the “Co-Development License Agreement”) with Shanghai Henlius Biotech, Inc (“Henlius”). Pursuant to the Co-Development License Agreement, the Group has agreed to fund up to US\$24.0 million i.e. 80% of the development costs of a pharmaceutical product that contains an anti-vascular endothelial growth factor (“anti-VEGF”) as a drug substance (the “Licensed Product”), which is intended for the treatment of exudative (wet) age-related macular degeneration (“wet-AMD”), being a bevacizumab biosimilar candidate and to make other payments and royalties in accordance with the terms of the Co-Development License Agreement. In return, the Group has obtained an exclusive license for the regulatory development, manufacture and commercialisation of the Licensed Product worldwide, subject to commercial sales milestone payment and royalties levied on net sales of the Licensed Product payable to Henlius. In the event that the Group grants a sub-license to a third party for commercialisation of the Licensed Product, the Group will share 20% of the relevant sub-licensing revenue with Henlius unless otherwise adjusted in accordance with the terms of the Co-Development License Agreement.

As disclosed in the announcement of the Company dated 29 January 2021, the filing by Henlius of clinical trial for recombinant anti-VEGF humanised monoclonal antibody ophthalmic injection HLX04-O for the treatment of wet-AMD has been approved by Therapeutic Goods Administration, Australia, and the phase 3 clinical trial is permitted to commence in Australia (CTN No. CT-2020-CTN-04843-1). Accordingly, a phase 3 clinical study with respect to the Licensed Product is intended and expected to be initiated in Australia in the near future.

Henlius is the holding company of a group principally engaged in (i) the research and development, production and sale of monoclonal antibody (mAb) drugs and the provision of related technical services (except for the development and application of human stem cells, genetic diagnosis and therapy technology); and (ii) the transfer of its own technology and provision of the related technology consultation services.

The Licensed Product can be used for treating wet-AMD, diabetic macular edema, macular edema caused by retinal vein occlusion and myopic choroidal neovascularisation. In accordance with the report of Frost & Sullivan, the estimated number of patients of these 4 categories is over 15.5 million in the PRC in 2019. Assuming each patient applies 4 doses in the first year of treatment and 2 to 3 doses in subsequent years, it is expected that the size of the potential market of the Licensed Product will be significant.

BUSINESS REVIEW

Apart from the above investments, in 2018, the Group entered into a co-development agreement (and as supplemented and revised from time to time) with Mitotech S.A. and Mitotech LLC for the United States Food and Drug Administration (“US FDA”) phase 3 clinical trial of an ophthalmic solution containing SkQ1 for dry eye disease. As disclosed in the announcement of the Company dated 24 February 2021, positive outcome was achieved during second phase 3 clinical trial (VISTA-2). The clinical trial study repeated statistically significant positive results on key predefined secondary end-point (Central Corneal Fluorescein Staining). The board of directors of the Company is enthusiastic about the read-out of clearing of central staining of the cornea (defined as zero staining in central cornea), which reveals the potential of SkQ1 in addressing oxidative stress in dry eye diseases, and is looking forward to seeing the results of the third phase 3 clinical trial (VISTA-3) on the overall regulatory pathway towards the new drug application submission with the US FDA targeted by Mitotech S.A. to be made in the year of 2022 to 2023.

Investments in Oncology

On 28 August 2020, the Group entered into an intellectual property license agreement (the “IP License Agreement”) with 廣州康睿生物醫藥科技股份有限公司 (Guangzhou Kangrui Biological Pharmaceutical Technology Co., Ltd.*) (“Kangrui”). Pursuant to the IP License Agreement, Kangrui granted to the Group an exclusive license to develop, manufacture, use or otherwise commercialise any therapeutic products incorporating the molecule initially developed by Kangrui for use in oncology (the “Molecule”).

In line with the Group’s strategic development plans in oncology, the IP License Agreement presents a good opportunity for the Group to evaluate the suitability of developing and commercialising the Molecule in the field of therapeutic use and/or therapies in oncology.

Apart from entering into the IP License Agreement with Kangrui, in 2019, the Group invested in Antikor Biopharma Limited (“Antikor”), a company incorporated in England and Wales which is focusing on the development of antibody fragment drug conjugates for cancer therapy. The scientific discussion of the technology was published in *Antibody Therapeutics, Volume 3, Issue 4, pages 237-245* by Dr. Mahendra Deonarain, the founder and Chief Executive Officer of Antikor, and Dr. Xue Qi, our Chief Scientific Officer in November 2020.

As at 31 December 2020 and the date of this report, each of the investments made and held by the Group represented less than 5% of the Group’s total assets, except for (i) the total maximum commitment in relation to the clinical development of the SkQ1 Product (an ophthalmic solution containing SkQ1 as its sole active pharmaceutical ingredient which shall be provided as a therapeutic product in the field of dry eye disease) under the co-development agreement with Mitotech S.A. and Mitotech LLC dated 16 July 2018 and as supplemented and revised from time to time; and (ii) the total maximum commitment in relation to the co-development of the Licensed Product with Henlius as mentioned above.

Total actual investment cost of approximately HK\$296.2 million for the clinical development of the SkQ1 Product with Mitotech S.A. is presented as “Acquired Intangible Assets” under the Group’s consolidated financial statements as at 31 December 2020. The investment cost represented 12.2% of the Group’s total assets as at 31 December 2020.

Total actual investment cost of approximately HK\$73.7 million for the co-development of the Licensed Product with Henlius is presented as “Acquired Intangible Assets” under the Group’s consolidated financial statements as at 31 December 2020. The investment cost represented 3.0% of the Group’s total assets as at 31 December 2020.

HONOURS AND AWARDS OBTAINED IN 2020

The Company was honourably awarded 中國證券金紫荊獎 – 最具社會責任感上市公司 (China Securities Golden Bauhinia Award – The most socially responsible listed company), which is a large-scale and credible award for listed companies in the Hong Kong and PRC securities markets, for its commitment to social responsibility over the years. This award is especially meaningful for the Company during the outbreak of the novel coronavirus this year.

The Company has been included in 2020 Forbes Asia’s Best Under A Billion list, a testimony to the Group’s achievements over the past few years. Forbes Asia’s Best Under A Billion list spotlights 200 top performing publicly listed companies in the Asia-Pacific region with sales under US\$1 billion, which have track records of exceptional corporate governance.

The Group’s Beifushu has been awarded as one of the Chinese reputable medicine brands in two consecutive years. This is a testament of the recognition by the industry for the efficacy and quality of the biologic drug.

RESEARCH AND DEVELOPMENT

During the year under review, the Group renewed its R&D's vision, dedicated to science and innovation, with a mission to develop therapeutics that would meet unmet clinical and/or commercial needs. The Group concurrently kick-started a 5-year (2021 to 2025) R&D's development plan to further strengthen its R&D capability and its position in ophthalmology.

The Group's key R&D initiatives comprise of growth factor, antibody (i.e. mAb, bsAb, sdAb, scFv, ADC/FDC, etc.), drug formulation know-how and Blow-Fill-Seal ("BFS") platform. Growth factor, antibody and drug formulation know-how are used for the development of therapeutic drugs in ophthalmology, surgical (wound care and healing) and oncology, whereas BFS platform is a state-of-the-art manufacturing facility for producing preservative-free unit-dose drugs, in particular for ophthalmic drugs.

One of the Group's technology platforms is built on recombinant proteins, in particular, the basic fibroblast growth factor (bFGF). The Group has been able to capitalise on its biologic facility, built with its proprietary technique and know-how, delivering high-quality bFGF Series of biologics in the Ophthalmology and Surgical business segments, the Group's primary current growth driver. Strengthening on the Group's biologics-based R&D, the recent strategic alliance forged with Antikor and Henlius is in furtherance of our R&D plans for biologics in oncology and in ophthalmology for wet-AMD, diabetic macular edema, macular edema caused by retinal vein occlusion and myopic choroidal neovascularisation for mid-term to long-term growth driver.

The establishment of the BFS platform formed part of the Group's core competency to develop and produce a series of preservative-free unit-dose drugs. As at 31 December 2020, the Group has 4 commercialised preservative-free unit-dose eye drops in the product pipeline. A handful of preservative-free unit-dose ophthalmic drugs are under development with targeted commercialisation within the next 2 to 5 years.

As at 31 December 2020, there are 15 R&D programmes in the pre-clinical to clinical stage, out of which 4 ophthalmology programmes are in Investigational New Drug ("IND")/Clinical/New Drug Application ("NDA") stage. The 4 ophthalmology programmes listed below are targeted as mid-term growth driver.

1. EB11-18136P: SkQ1 eye drops, second phase 3 clinical trial (US FDA) topline data released on 24 February 2021
2. EB11-15120P: Azithromycin eye drops, pending phase 3 clinical trial results (National Medical Products Administration ("NMPA") in the PRC)

3. EB11-13108P: Moxifloxacin eye drops, NDA stage (NMPA in the PRC)
4. EB12-20145P: Bevacizumab for wet-AMD, IND ready stage (global, US FDA, European Medicines Agency and NMPA in the PRC)

During the year under review, the following programmes were completed with good success. The completed programmes would strengthen the currently marketed product portfolio, served as near-term growth driver.

1. EB12-05100P (ophthalmology): Beifushu (FGF2) unit-dose eye drops, entered commercial stage (in the PRC)
2. EB12-17133Z (dermatology): Beifuji (FGF2) increased dosage for external use, entered commercial stage (in the PRC)
3. EB23-18235Y (stomatology): T-Bactum® (anti-microbial oral care product), entered commercial stage (in the PRC)

As at the date of this report, the Group has obtained a total of 34 patent certificates or authorisation letters: 27 發明專利 (invention patents), 3 實用新型專利 (utility model patents) and 4 外觀專利 (design patents).

To advance our pursuits of new therapeutics programme involving antibodies that, in particular, target in oncology and ophthalmology, a wholly-owned subsidiary, EssexBio Therapeutics Inc. (“EssexBio USA”), has been incorporated in the United States in March 2020. EssexBio USA is set up as the Group’s R&D centre and clinical trial management of the Group’s products in the United States. Being in the United States, EssexBio USA will continue to position the Group with better visibility for in and out licensing potential of technologies and products.

PRODUCTION CAPABILITY

The Group’s factory in Zhuhai is fully equipped with production plants for the production of active pharmaceutical substance (rb-bFGF), the Group’s flagship biologic formulations and the state-of-the-art BFS production plants for the production of preservative-free unit-dose drugs.

CONSTRUCTION OF THE SECOND FACTORY IN THE PRC

For the near-term expansion of the Group, a piece of land of about 15,000 square metres located at 珠海高新區科技創新海岸 (Zhuhai Hi-Tech Industrial Park*) was acquired in 2018. The land is within walking distance from the Group’s existing factory. The plan is to construct the Group’s second factory with a gross floor area (GFA) of about 58,000 square metres to house the Group’s R&D centre, additional manufacturing facility, administrative office and staff hostel. Construction work of the second factory has started on 1 January 2020 and is expected to be completed by 2023.

FINANCIAL REVIEW

The revenue of Essex Bio-Technology Limited (the “Company”, together with its subsidiaries, the “Group”) is chiefly derived and denominated in Renminbi from its operations in the People’s Republic of China (the “PRC”). For the year ended 31 December 2020, the Group achieved a consolidated turnover of approximately HK\$978.1 million, a decrease of 23.6% over the last year. The decrease is attributable to about 44.3% decrease in the first half of 2020 as the government implemented a series of control measures in a number of provinces and municipalities in the PRC to curb the spread of the novel coronavirus (“COVID-19”), which had significantly disrupted the clinical operations of hospitals in the PRC and had prevented non-emergency patients visiting hospitals and outpatient clinics. However, as clinical operations of hospitals in the PRC have been largely resumed to normalcy in September 2020, the Group’s revenue has also been recovering to nearing the pre-COVID-19 level from the third quarter. The recovery had helped lower the decrease in revenue in the second half to approximately 6.2% as compared to the same period of last year.

The Group’s turnover is primarily made up from the segments of Ophthalmology and Surgical (Wound care and healing). The core products that are of current growth driver under each segment are:

1. Ophthalmology – Beifushu series (Beifushu eye drops, Beifushu eye gel and Beifushu unit-dose eye drops), Tobramycin Eye Drops, Levofloxacin Eye Drops, Sodium Hyaluronate Eye Drops, Xalatan® Eye Drops, Xalacom® Eye Drops and 適麗順® (Iodized Lecithin Capsules*); and
2. Surgical (Wound care and healing) – Beifuji series (Beifuji spray, Beifuji lyophilised powder and Beifuxin gel), T-Bactum® (anti-microbial oral care product), Carisolv® dental caries removal gel and 伊血安顆粒 (Yi Xue An Granules*).

The sectoral turnover of Ophthalmology and Surgical is approximately 42.9% and 57.1% of the Group’s turnover, respectively. The combined turnover of the Group’s flagship biologics, Beifushu series and Beifuji series, the basic fibroblast growth factor (bFGF) based biologic drugs, represented about 83.3% of the Group’s total turnover, of which Beifushu series and Beifuji series accounted for 27.1% and 56.2% of the Group’s turnover, respectively. The remaining 16.7% of the Group’s turnover is largely contributed from sales of Tobramycin Eye Drops, Levofloxacin Eye Drops, Sodium Hyaluronate Eye Drops, Xalatan® Eye Drops, Xalacom® Eye Drops, 適麗順® (Iodized Lecithin Capsules*), T-Bactum® and 伊血安顆粒 (Yi Xue An Granules*) collectively.

Composition of turnover for the years ended 31 December 2020 and 2019, respectively, is shown in the following table:

Expressed in HK\$’ million	2020	2019
Ophthalmology	419.2	567.5
Surgical	558.9	712.0
Total	978.1	1,279.5

Ophthalmology contributed approximately HK\$419.2 million to the Group’s turnover for the year ended 31 December 2020, representing a decrease of 26.1% as compared to the previous year. Surgical recorded a total turnover of approximately HK\$558.9 million for the year ended 31 December 2020, representing a decrease of 21.5% as compared to the previous year. The decrease was attributable to the aforementioned impact of COVID-19.

FINANCIAL REVIEW

During the year under review, the Group achieved a profit of approximately HK\$218.9 million as compared to approximately HK\$302.5 million in 2019, representing a decrease of 27.6% which was attributable to the aforementioned impact of COVID-19.

The distribution and selling expenses for the year under review were approximately HK\$476.6 million as compared to approximately HK\$632.8 million in 2019, representing a decrease of 24.7%. Such expenses primarily consisted of remuneration, advertising costs, travelling and transportation costs, costs for organisation of seminars and conferences for product training and awareness, etc. The decrease is in line with the decrease in turnover for the year ended 31 December 2020.

The administrative expenses for the year under review were approximately HK\$111.6 million as compared to approximately HK\$81.7 million in 2019. The increase in administrative expenses was mainly due to (i) a one-off donation of cash of approximately HK\$5.6 million to support the prevention, control and relief works for COVID-19 in the PRC; (ii) an increase in costs for expansion of operations in the United States and Singapore and the establishment of on-line platform for medical consultation by approximately HK\$12.4 million; and (iii) an increase in research and development (“R&D”) personnel costs of approximately HK\$3.4 million which was attributed to the increase of headcount in the R&D.

Total expenditures (inclusive of acquired intangible assets) incurred in R&D for the year ended 31 December 2020 were approximately HK\$214.8 million (2019: approximately HK\$164.9 million), representing 22.0% (2019: 12.9%) of the turnover, of which approximately HK\$206.2 million (2019: approximately HK\$161.5 million) were capitalised.

The Group had cash and cash equivalents of approximately HK\$599.8 million as at 31 December 2020 (2019: approximately HK\$473.3 million).

The Group’s bank borrowings as at 31 December 2020 were approximately HK\$414.8 million (2019: HK\$220.0 million), among which 13.3% was repayable within 1 year and 86.7% was repayable in more than 1 year but within 5 years. Among the Group’s bank borrowings as at 31 December 2020, 48.4% was denominated in Hong Kong Dollar, 4.9% was denominated in Renminbi and 46.7% was denominated in US Dollar. All of the Group’s bank borrowings bear interest at floating rate. The interest rate of the Group’s bank borrowings ranged from 1.7% to 3.6% as at 31 December 2020. Please refer to the sub-section headed “Liquidity and Financial Resources” for details of banking facilities.

The total finance costs of the Group for the year ended 31 December 2020 were approximately HK\$1.4 million (2019: approximately HK\$7.0 million), including an imputed interest expense on the convertible loan payable and interest expenses on bank borrowings amounting to approximately HK\$13.9 million (2019: approximately HK\$11.4 million) of which approximately HK\$12.7 million (2019: approximately HK\$4.7 million) was capitalised during the year under review.

CONVERTIBLE LOAN FROM INTERNATIONAL FINANCE CORPORATION (“IFC”)

On 6 July 2016, the Company entered into a convertible loan agreement (the “Convertible Loan Agreement”) with IFC, being a member of the World Bank Group and an international organisation established by Articles of Agreement among its member countries including the PRC, pursuant to which IFC agreed to lend, and the Company agreed to borrow, a convertible loan in an aggregate principal amount of HK\$150.0 million at an interest rate of 1.9% per annum. Subject to the terms of the Convertible Loan Agreement, IFC has the right to convert all or any part of the outstanding principal amount of the convertible loan into ordinary shares of the Company (“Conversion Shares”) at a conversion price of HK\$5.90 per share (subject to adjustments as set out in the Convertible Loan Agreement) at any time after the date of the disbursement and prior to the then maturity date (i.e. the date falling on the fifth anniversary of the date of the disbursement).

On 10 July 2020, the Company and IFC entered into an amendment agreement to the Convertible Loan Agreement (the “Amendment Agreement”) to extend the maturity date for a period of 3 years to a date falling on the eighth anniversary of the date of the disbursement (i.e. 2 August 2024) (the “Extension”). Save as amended by the Amendment Agreement, the Convertible Loan Agreement and the terms and conditions of the convertible loan shall continue to be in full force and effect. Please refer to the announcement of the Company dated 10 July 2020 for details. On 6 October 2020, the Amendment Agreement has become effective.

Use of net proceeds from the convertible loan

The net proceeds from the convertible loan (after deducting the fees and expenses in relation to the obtaining of the convertible loan) are approximately HK\$145.0 million, which were intended to be utilised for the Company’s strategic investment in and development of the Group’s biologic business and general working capital requirements. All net proceeds had been utilised in 2018 according to the intended use.

Dilutive effect of the conversion of the convertible loan

As at 31 December 2020, no part of the outstanding principal amount of the convertible loan of HK\$150.0 million has been converted into Conversion Shares.

On the assumption that the convertible loan would be converted into Conversion Shares in full at the initial conversion price of HK\$5.90 per share, the aggregate principal amount of the convertible loan of HK\$150.0 million is convertible into 25,423,728 Conversion Shares.

FINANCIAL REVIEW

Dilutive effect on earnings per share

Based on the profit attributable to owners of the Company for the year ended 31 December 2020 of approximately HK\$218.9 million, the basic and diluted earnings per share attributable to owners of the Company, after considering the full conversion of the convertible loan, were HK37.88 cents and HK37.28 cents respectively.

The Company's ability to meet the repayment obligations under the convertible loan

Based on the cash and cash equivalents as at 31 December 2020 and the cash flow from the operations of the Company for the year then ended, the Company has the ability to meet its repayment obligations under the convertible loan which remained unconverted to Conversion Shares as at 31 December 2020.

GENERAL DISCLOSURE UNDER RULES 13.18 AND 13.21 OF THE RULES GOVERNING THE LISTING OF SECURITIES ON THE STOCK EXCHANGE OF HONG KONG LIMITED (THE “STOCK EXCHANGE”) – LOAN FROM IFC

As disclosed in the announcement of the Company dated 10 July 2020, the Group entered into a loan agreement dated 10 July 2020 with IFC (the “Loan Agreement”), pursuant to which IFC agreed to lend, and the Group agreed to borrow a loan in the aggregate principal amount of US\$25.0 million (equivalent to approximately HK\$193.7 million) (the “Loan”). On 13 October 2020, the Loan has been fully drawn by the Group.

Pursuant to the Loan Agreement, the occurrence of any of the following events would constitute an event of default, and as a result, IFC may, by notice to the Group, require it to immediately repay the Loan (or such part of the Loan as is specified in the relevant notice) and pay all interest accrued on it together with the prepayment premium and all other amounts payable in accordance with the Loan Agreement:

(i) Ngiam Mia Je Patrick, Ngiam Mia Kiat Benjamin and Lauw Hui Kian, as a group, for any reason ceases to own, directly and indirectly:

(A) at any time prior to the Loan Permitted Dilution Event (as defined below), at least 40%; and

(B) at any time on or after the Loan Permitted Dilution Event (as defined below), at least 35%,

of both the economic and voting interests in the Company’s share capital (determined on a fully diluted basis), and for the purpose of this paragraph (i), the “Loan Permitted Dilution Event” means the consummation of an acquisition permitted under the Loan Agreement with the consideration payable in whole or in part by the Company in the form of shares that causes Ngiam Mia Je Patrick, Ngiam Mia Kiat Benjamin and Lauw Hui Kian, as a group, to own, directly and indirectly, less than 40% of both the economic and voting interests in the Company’s share capital (determined on a fully diluted basis); or

(ii) Ngiam Mia Je Patrick, Ngiam Mia Kiat Benjamin and Lauw Hui Kian, as a group, at any time and for any reason ceases to be the single largest direct and indirect shareholder of the Company (determined on a fully diluted basis).

COVID-19 has negatively impacted the Group’s business operation and financial performance. The board of the Directors (the “Board”) considers that the Extension and the obtain of the Loan are prudent measures, which would effectively provide the Group with flexibility in relation to the Group’s deployment of its financial resources to fund its operation and development plans during this difficult period of COVID-19. Accordingly, the Board considers the respective terms of the Amendment Agreement and the Loan Agreement are fair and reasonable and the Extension and the Loan are in the interests of the Company and its shareholders as a whole.

MATERIAL ACQUISITIONS AND DISPOSALS OF SUBSIDIARIES, ASSOCIATED COMPANIES AND JOINT VENTURES

Save as disclosed in this report, there were no material acquisitions or disposals of subsidiaries, associates or joint ventures during the year ended 31 December 2020.

SIGNIFICANT INVESTMENTS HELD

Save as disclosed in this report, the Group did not hold any significant investments as at 31 December 2020.

FOREIGN EXCHANGE EXPOSURE

It is the Group's policy to borrow and deposit cash in local currencies to minimise currency risk.

The Group's assets, liabilities and transactions are mainly denominated in Hong Kong Dollar, Renminbi or US Dollar. The Directors are of the view that the Group's operating cash flow and liquidity are not subject to significant foreign exchange risks and therefore no hedging arrangements were made. So long as the linked exchange rate system in Hong Kong with US Dollar is maintained, it is expected that the Group will not be subject to any significant exchange risk. However, the Group will review and monitor the relevant foreign exchange exposure from time to time based on its business development requirements and may enter into foreign exchange hedging arrangements as appropriate.

TREASURY POLICY

The Group generally financed its operations with internally generated cash flows, bank and other borrowings. The Group placed these resources into interest-bearing bank accounts opened with the PRC and Hong Kong banks and earned interests in accordance with the PRC and Hong Kong banks rates. Bank deposits were mainly denominated in Renminbi, Hong Kong Dollar and US Dollar.

EMPLOYEES

As at 31 December 2020, the Group had a total of 1,242 full-time employees (2019: 1,110 full-time employees). The aggregate remuneration of the Group's employees, including that of the Directors, for the year under review and the preceding year amounted to approximately HK\$235.9 million and approximately HK\$214.5 million, respectively. The Group remunerates its employees based on their performance, experience and the prevailing industry practice. Share options and bonuses are also available to employees of the Group at the discretion of the Directors depending on the financial performance of the Group. Details of the share option scheme of the Company are disclosed in note 35 to the financial statements.

The remuneration of each executive Director has been determined with reference to the time commitment and responsibilities of each executive Director, and to the operating results of the Group and his/her performance in the relevant financial year.

REPORT OF THE DIRECTORS

BUSINESS REVIEW

Overview

The Group's emphasis continued primarily on manufacturing and selling of its flagship biologic drugs (the bFGF Series) for the treatment and healing of surface wounds and eye wounds, together with other pharmaceutical products (Tobramycin Eye Drops, Levofloxacin Eye Drops, Sodium Hyaluronate Eye Drops, Xalatan® Eye Drops, Xalacom® Eye Drops, 適麗順® (Iodized Lecithin Capsules*), T-Bactum® (anti-microbial oral care product), Carisolv® dental caries removal gel and 伊血安顆粒 (Yi Xue An Granules*)). The Group's turnover is primarily made up from the segments of Ophthalmology and Surgical (wound care and healing) covering dermatology, stomatology, obstetrics and gynaecology; while pursuing new therapeutics in oncology, orthopaedics and neurology through the Group's enrichment programme (the "Enrichment Programme"). The Group maintains a pipeline of multi-project in research and development ("R&D") at various stages of clinical programmes, which cover a handful of unit-dose ophthalmic products and biologics in growth factors and antibody.

As at 31 December 2020, major projects in the pipeline under the Enrichment Programme are:

At late stage of clinical development

Field	Project	Status
Ophthalmology	EB11-18136P: SkQ1 eye drops at late-stage clinical development for dry eye disease	Second phase 3 clinical trial (United States Food and Drug Administration ("US FDA")) topline data released on 24 February 2021
Ophthalmology	EB12-20145P: Bevacizumab for (wet) aged-related macular degeneration ("wet-AMD")	Investigational New Drug ("IND") ready stage (global, US FDA, European Medicines Agency and National Medical Products Administration ("NMPA") in the People's Republic of China (the "PRC"))

At early stage of development

Field	Project	Status
Oncology	Development of antibody fragment drug conjugates for cancer therapy	Pre-IND
Oncology	Radiotherapeutic bandage for treatment of non-melanoma skin cancer	Pre-IND

The Group's therapeutic products are being prescribed in more than 9,000 hospitals and medical providers, coupled with approximately 2,000 pharmaceutical stores, which are mainly located in the major cities, provinces and county cities in the PRC and are managed directly by its 43 regional sales offices (the "RSOs") with about 1,290 sales and marketing representatives.

FINANCIAL KEY PERFORMANCE INDICATORS

For the year ended 31 December 2020, the Group achieved a turnover of approximately HK\$978.1 million (2019: approximately HK\$1,279.5 million), representing a decrease of 23.6% over last year. Profit for the year was approximately HK\$218.9 million (2019: approximately HK\$302.5 million), representing a decrease of 27.6% over last year.

Ophthalmology contributed approximately HK\$419.2 million to the Group's turnover for the year ended 31 December 2020, representing a decrease of 26.1% as compared to the previous year. Surgical recorded a total turnover of approximately HK\$558.9 million for the year ended 31 December 2020, representing a decrease of 21.5% as compared to the previous year.

As at 31 December 2020, the Group maintains a network of 43 RSOs and a total number of about 1,290 sales and marketing representatives, out of which approximately 38% are on contract basis or from appointed agents.

To reward our valued shareholders for their years of valuable support, the board of Directors (the "Board") is proposing a final dividend of HK\$0.05 per ordinary share to be approved at the upcoming annual general meeting of the Company.

The Group had cash and cash equivalents of approximately HK\$599.8 million as at 31 December 2020 (2019: approximately HK\$473.3 million).

The Group's bank borrowings as at 31 December 2020 were approximately HK\$414.8 million (2019: HK\$220.0 million), among which 13.3% was repayable within 1 year and 86.7% was repayable in more than 1 year but within 5 years. Among the Group's bank borrowings as at 31 December 2020, 48.4% was denominated in Hong Kong Dollar, 4.9% was denominated in Renminbi and 46.7% was denominated in US Dollar. All of the Group's bank borrowings bear interest at floating rate. The interest rate of the Group's bank borrowings ranged from 1.7% to 3.6% as at 31 December 2020.

The total finance costs of the Group for the year ended 31 December 2020 were approximately HK\$1.4 million (2019: approximately HK\$7.0 million), including an imputed interest expense on the convertible loan payable and interest expenses on bank borrowings amounting to approximately HK\$13.9 million (2019: approximately HK\$11.4 million) of which approximately HK\$12.7 million (2019: approximately HK\$4.7 million) was capitalised during the year under review.

REPORT OF THE DIRECTORS

FUTURE DEVELOPMENT

The Group expects continued organic growth from its flagship biologic drugs, formulated with recombinant bovine basic fibroblast growth factor (rb-bFGF), in the near future years. This will be realised through expanding sales into major county cities in the PRC and executing its clinical plans to affirm additional therapeutic indications. In addition, the Group expects continued contributions from its range of unit-dose eye drops (Tobramycin Eye Drops, Levofloxacin Eye Drops and Sodium Hyaluronate Eye Drops), as well as the newly launched T-Bactum® (anti-microbial oral care product).

Leveraging on its established market access capability, the Group undertakes importation, promotion and selling of a range of products such as Xalatan® Eye Drops, Xalacom® Eye Drops, 適麗順® (Iodized Lecithin Capsules*) and 伊血安顆粒 (Yi Xue An Granules*). Such products are complementary to the Group's therapeutics business of Ophthalmology and Surgical, collectively formed part of the core products as current growth driver.

As at 31 December 2020, there are 15 R&D programmes in the pre-clinical to clinical stage, out of which 4 ophthalmology programmes are in IND/Clinical/New Drug Application ("NDA") stage. The 4 ophthalmology programmes listed below are targeted as mid-term growth driver.

1. EB11-18136P: SkQ1 eye drops, second phase 3 clinical trial (US FDA) topline data released on 24 February 2021
2. EB11-15120P: Azithromycin eye drops, pending phase 3 clinical trial results (NMPA in the PRC)
3. EB11-13108P: Moxifloxacin eye drops, NDA stage (NMPA in the PRC)
4. EB12-20145P: Bevacizumab for wet-AMD, IND ready stage (global, US FDA, European Medicines Agency and NMPA in the PRC)

During the year under review, the following programmes were completed with good success. The completed programmes would strengthen the currently marketed product portfolio, served as near-term growth driver.

1. EB12-05100P (ophthalmology): Beifushu (FGF2) unit-dose eye drops, entered commercial stage (in the PRC)
2. EB12-17133Z (dermatology): Beifuji (FGF2) increased dosage for external use, entered commercial stage (in the PRC)
3. EB23-18235Y (stomatology): T-Bactum® (anti-microbial oral care product), entered commercial stage (in the PRC)

While the Group is staying focused on investing in products and expanding market access for its Ophthalmology and Surgical (wound care and healing) business segments, especially striving to be one of the leading players in Ophthalmology in Asia, the Group seeks new therapeutics, particularly in Oncology, from the long-term development perspective. The investment made in Antikor Biopharma Limited, a company focusing on the development of antibody fragment drug conjugates for cancer treatment, is a strategic consideration to enable the Group to advance its therapeutics into oncology as mid-term to long-term growth driver.

Beyond therapeutics, the Group started investing in Healthtech business arena, focusing on artificial intelligence (“AI”) diagnosis and e-consultation platform for early detection of diseases and chronic diseases management. In years to come, the advent of such solutions would inevitably be a sea-change on how the healthcare services be provided, inclusive of prescription of drugs and delivery of drugs to patients. A new market access channel is not to be missed. Its maiden investment was in 成都上工醫信科技有限公司 (Chengdu Shangong Medical Technology Co., Ltd.*) (“Shangong”) in 2018. Shangong is a medical data analytics (AI Algorithm) company in the medical service industry in the PRC, having fully curated, quality controlled over 2.3 million retinal images of diabetic patients in the PRC, which forms a retinopathy big data that enables AI Algorithm to perform its diagnosis. The AI Algorithm can screen retinal images of patients and detect diabetic retinopathy, which affects almost a third of diabetes patients that would otherwise be examined by highly trained ophthalmologists. In 2019, the Group further invested RMB15.0 million in Shangong under a convertible loan arrangement. The early detection of diabetic retinopathy patients would be beneficial to our selling of 適麗順® (Iodized Lecithin Capsules*).

In addition, the Group invested US\$2.0 million in YesDok Pte. Ltd. (“YesDok”) in 2019. The investment is structured under a convertible loan arrangement. YesDok is incorporated in Singapore with a main operating subsidiary in Indonesia for the provision of e-health services that are reachable through mobile platform, which is a good platform to be leveraged for market access in Indonesia as part of our expansion into Southeast Asian countries.

PRINCIPAL RISKS AND UNCERTAINTIES

There are a number of factors that may affect the performance of the Group. The summary of major risks and uncertainties is as follows:

1 *Compliance with the Good Manufacturing Practices (“GMP”) Standards*

All pharmaceutical manufacturers in the PRC will be required to comply with the GMP standards, otherwise the pharmaceutical manufacturing enterprise permits will be revoked, resulting in the termination of the production. Any failure to comply with the relevant rules and regulations necessary for our operations may result in termination of ongoing operations by regulatory bodies. These may lead to cease of operations and corrective measures requiring additional expenditures or remedial actions, which in the future could materially and adversely affect our reputation, business, financial conditions and results of operations.

2 *Research and Development Risk*

The Group’s future prospect is dependent upon the continuous development and successful commercialisation of new products or progress of milestones achievement of projects. As one of its expansion strategies, the Group intends to form strategic alliances with suitable partners or candidates that would offer the Group access to promising research projects. The success of biologic drug development and progress of milestones achievement are highly unpredictable. Products that appear to be promising at the early phases of R&D may fail to reach the market for numerous reasons, including the discovery of harmful side effects in pre-clinical tests and clinical trials, unsatisfactory results in clinical trials and the failure of obtaining the necessary regulatory approvals. Consequently, the corresponding R&D expenditure incurred would have to be expensed, which will have an adverse impact on the profitability of the Group.

REPORT OF THE DIRECTORS

3 *Product Substitution*

New drug discoveries and developments in recombinant DNA technology and other pharmaceutical processes are expected to continue at a rapid pace. It is difficult to predict the effect of future technological changes and discoveries on the viability or competitiveness of the Group's products. It is essential for the Group to respond to these changes by developing new products in a timely manner to meet technological advances in the market. In addition, new alliances may have to be formed with new technological partners to enable the Group to have access to emerging technologies and new discoveries. The Group has to adopt and modify development methods, processes and programmes in response to new technologies and discoveries. The failure of the Group to respond rapidly to changing technologies and new discoveries could have a material and adverse impact on the Group's performance. There is also no assurance that other parties will not independently develop products having therapeutic effects similar or superior to the Group's products.

4 *Pharmaceutical Pricing Policies in the PRC*

The drug pricing system in the PRC is controlled by the government, and it affects the pharmaceutical industry, drug price setting and regulation. Under the government intervention, price reduction across therapeutic categories was common during the last 20 years, which may exert a downward pressure against the price of pharmaceutical products and our market share, revenue and profitability may be adversely affected.

5 *Impact of Local Regulations*

The healthcare system in the PRC is undergoing a crucial reform period, where laws, regulations and policies in effect governing the medical, healthcare and pharmaceutical industry are constantly evolving, in which the Group operates could have a material impact on the results of its operations or growth prospect. The changing political, social, legal, tax, regulatory and environmental requirements in the local level may subject the Group to material and adverse effects, thus leading to more uncertainties and risks in respect of our business and operation.

6 *Impact of the Novel Coronavirus ("COVID-19")*

The COVID-19 pandemic has been declared globally and has not shown any indication of its end. While the Group has considered the potential financial impact of COVID-19 in the preparation of the financial statements, the full extent of the probable impact of the COVID-19 disruptions on its operating and financial performance for the financial year ending 31 December 2021 remains uncertain. Accordingly, there is a possibility that factors not currently anticipated by management could occur in the future and the Group's assets may be subject to impairment loss in the subsequent financial periods.

ENVIRONMENTAL POLICIES AND PERFORMANCE

We are committed to building an environmental-friendly corporation that pays close attention to conserving natural resources. We strive to minimise our environmental impact by saving electricity and encouraging recycle of office supplies and other materials. We also require our suppliers to operate in strict compliance with the relevant environmental regulations and rules and obtain all necessary permission and approval from the relevant government authorities.

ENVIRONMENTAL, SOCIAL AND GOVERNANCE REPORT

The environmental, social and governance report of the Company prepared in accordance with Appendix 27 to the Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited (the “Listing Rules”) will be published within three months after the publication of the annual report of the Company.

KEY RELATIONSHIPS

1 *Employees*

Human resources are one of the greatest assets of the Group and the Group considers the personal development of its employees as highly important. The Group wants to continue to be an attractive employer for committed employees.

The Group strives to motivate its employees with a clear career path and opportunities for advancement and improvement of their skills. The Group provides on-the-job training and development opportunities to our staff members. The training programs cover areas such as managerial skills, sales and production, customer services, quality control and training of other areas relevant to the industry.

The Group offers competitive remuneration packages to our employees. The Group has also adopted share option schemes to recognise and reward the contribution of the employees to the growth and development of the Group.

2 *Suppliers*

We have developed long-standing relationships with a number of our vendors and take great care to ensure that they share our commitment to quality and ethics. We carefully select our suppliers and require them to satisfy certain assessment criteria including track record, experience, financial strength, reputation, ability to produce high-quality products and quality control effectiveness.

3 *Marketing agents and distributors*

We sell our products to hospitals through RSOs, marketing agents and distributors. We require our RSOs, marketing agents and distributors to comply with the relevant laws and regulations and our sales and marketing policies, including but not limited to selling price and promotional activities. We also monitor the financial condition and repayment history of our distributors, and sales performance of them.

4 *Hospitals and doctors*

The Group's therapeutic products are being prescribed in more than 9,000 hospitals and medical providers, coupled with approximately 2,000 pharmaceutical stores, which are mainly located in the major cities, provinces and county cities in the PRC.

PROPERTY, PLANT AND EQUIPMENT

Details of movements in the property, plant and equipment of the Group during the year under review are set out in note 17 to the financial statements.

REPORT OF THE DIRECTORS

SHARE CAPITAL AND SHARE OPTIONS

There was no movement in the Company's authorised share capital during the year under review. Please refer to the paragraph headed "Purchase, Redemption or Sale of Listed Securities of the Company" for details of the share repurchase of the Company conducted during the year under review. For the year ended 31 December 2020, there was no exercise of share options (the "Options") granted under the Company's share option scheme as approved by the shareholders of the Company at the annual general meeting held on 3 May 2013 (the "Scheme"). Details of the Company's share capital and details of the Scheme are set out in notes 33 and 35 respectively to the financial statements.

Summary of the Scheme

1. Purpose of the Scheme:
 - (a) To recognise and acknowledge the contributions that Eligible Participants (as defined below) have made or may make to the Group.
 - (b) To provide the Eligible Participants (as defined below) with the opportunity of acquiring proprietary interests in the Company with the view to (1) motivate them to optimise their performance and efficiency for the benefit of the Group; and (2) attract and retain or otherwise maintain ongoing business relationship with them whose contributions are, will or expected to be beneficial to the Group.
2. Participants of the Scheme:
 - (a) any director, officer, employee or officer employed by any company in the Group or by any member of the Group or a company in which the Group holds an interest or a subsidiary of such company (the "Affiliate") (whether full time or part time) (the "Employee"), consultant, professional, customer, supplier (whether of goods or services), agent, partner or adviser of or contractor to an Affiliate; or
 - (b) the trustee of any trust the beneficiary of which or any discretionary trust the discretionary objects of which include any director, officer, Employee, consultant, professional, customer, supplier (whether of goods or services), agent, partner or adviser of or contractor to any member of the Group or an Affiliate; or
 - (c) a company beneficially owned by any director, officer, Employee, consultant, professional, customer, supplier (whether of goods or services), agent, partner or adviser of or contractor to any member of the Group or an Affiliate (the "Eligible Participants").

The basis of eligibility of any of the above classes of the Eligible Participants to the grant of any right(s) to subscribe for fully paid share(s) of HK\$0.10 each of the Company (or such other nominal amount prevailing from time to time) (the "Share(s)") granted pursuant to this Scheme shall be determined by the Board from time to time on the basis of their contribution to the Group and/or the Affiliate(s) in line with the purposes of the Scheme.

3. (a) Total number of ordinary shares of HK\$0.10 each in the capital of the Company available for issue under the Scheme (excluding those to be issued upon exercise of the outstanding Options) as at the date of this report:

25,375,000 Shares.

REPORT OF THE DIRECTORS

(b) Percentage of the issued share capital that it represents as at the date of this report:

4.40%.

4. Maximum entitlement of each Eligible Participant under the Scheme:

Not to exceed 1% of the Shares in issue in any 12-month period unless approved by shareholders of the Company.

5. Period within which the Shares must be taken up under an Option:

Within 10 years from the date on which the Option is offered or such shorter period as the Board may determine.

6. Minimum period for which an Option must be held before it can be exercised:

No minimum period unless otherwise determined by the Board.

7. (a) Price payable on application or acceptance of the Option:

HK\$1.00.

(b) The period within which payments or calls must or may be made:

14 days after the offer date of an Option.

(c) The period within which loans for the purposes of the payments or calls must be repaid:

Not applicable.

8. Basis of determining the exercise price:

The exercise price shall be determined by the Board and notified to each grantee and shall not be less than the highest of:

(a) the closing price of a Share as stated in the daily quotations sheet of The Stock Exchange of Hong Kong Limited (the "Stock Exchange") on the date of grant of the relevant Option, which must be a business day;

(b) an amount equivalent to the average closing price of a Share as stated in the daily quotations sheets of the Stock Exchange for the 5 business days immediately preceding the date of grant of the relevant Option; and

(c) the nominal value of a Share.

9. The remaining life of the Scheme:

Approximately 2.3 years (expiring on 2 May 2023).

REPORT OF THE DIRECTORS

The number of Options exercisable is 1,700,000 Options or 1,700,000 Options X the average number of Shares traded per day during the period from 1 November 2017 to 31 October 2018 (both days inclusive)/500,000, whichever is lower (Note 1);

Note 1: On 31 October 2019, 1,700,000 Options were lapsed.

- (ii) up to 34% of the total number of Options granted to HK Zhixin is exercisable during the period from 1 November 2019 to 31 October 2020 (both dates inclusive). The number of Options exercisable is 1,700,000 Options or 1,700,000 Options x the average number of Shares traded per day during the period from 1 November 2018 to 31 October 2019 (both days inclusive)/750,000, whichever is lower (Note 2); and

Note 2: On 1 November 2019, the number of Options exercisable was determined to be 1,085,507 which were lapsed on 31 October 2020.

- (iii) up to 32% of the total number of Options granted to HK Zhixin is exercisable during the period from 1 November 2020 to 31 October 2021 (both dates inclusive). The number of Options exercisable is 1,600,000 Options or 1,600,000 Options x the average number of Shares traded per day during the period from 1 November 2019 to 31 October 2020 (both days inclusive)/1,000,000, whichever is lower (Note 3);

Note 3: On 1 November 2020, the number of Options exercisable was determined to be 765,537.

the term "average number of Shares traded per day" means the total number of Shares traded on the trading days during the relevant period/the total number of trading days in the relevant period, and the number of Shares traded as set out on the website of the Stock Exchange shall be relied upon in respect of the number of Shares traded on each trading day.

- (c) Each of the outstanding or unexercised Options granted to HK Zhixin shall lapse after the respective exercise periods. The vesting periods shall be subject to the provisions of the service contract of HK Zhixin in relation to early termination of the service contract.

* The number of Options exercisable during the period from 1 November 2020 to 31 October 2021 was determined on 1 November 2020 to be 765,537.

During the year under review, no Option has been cancelled.

The valuation of share options is set out in note 35 to the financial statements.

SUFFICIENCY OF PUBLIC FLOAT

Based on the information that is publicly available to the Company and within the knowledge of the Directors, the Company has maintained a sufficient prescribed public float under the Listing Rules throughout the year under review and up to the date of this report.

PRE-EMPTIVE RIGHTS

There are no provisions for pre-emptive rights under the Company's articles of association or the laws of the Cayman Islands, being the jurisdiction in which the Company was incorporated, which would oblige the Company to offer new Shares on a pro rata basis to existing shareholders.

PURCHASE, REDEMPTION OR SALE OF LISTED SECURITIES OF THE COMPANY

During the period from October 2020 to December 2020, the Company repurchased 1,056,000 of its shares on the Stock Exchange and these shares were subsequently cancelled by the Company as at the date of this report. The total amount paid for the repurchases of HK\$4,465,610 was paid wholly out of retained profits. Details of those transactions are as follows:

Month	Number of shares repurchased	Price per share		Total price paid HK\$
		Highest HK\$	Lowest HK\$	
October 2020	429,000	4.45	4.15	1,836,810
November 2020	605,000	4.30	4.10	2,540,910
December 2020	22,000	4.05	3.97	87,890
	<u>1,056,000</u>			<u>4,465,610</u>

Subsequent to the end of the reporting period and up to the date of this report, the Company repurchased 230,000 of its shares on the Stock Exchange and these shares were subsequently cancelled by the Company as at the date of this report. The highest and lowest price per share paid was HK\$4.13 and HK\$3.70 respectively and the total amount paid for the repurchases of HK\$872,590 was paid wholly out of retained profits.

The repurchase of the Company's shares was effected by the Directors, pursuant to the mandate from shareholders received at the last annual general meeting, with a view to benefiting shareholders as a whole by enhancing the net asset value per share and earnings per share of the Group.

Except as disclosed above, neither the Company nor any of its subsidiaries purchased, redeemed or sold any of the Company's listed securities during the year under review.

RESERVES

Details of movements in the reserves of the Company and of the Group during the year under review are set out in note 34 to the financial statements and in the consolidated statement of changes in equity on page 59, respectively.

REPORT OF THE DIRECTORS

DISTRIBUTABLE RESERVES

As at 31 December 2020, the Company has reserves of HK\$3,788,424 available for distribution, calculated in accordance with the provisions of the Companies Law of the Cayman Islands as detailed in note 34 to the financial statements. Before the date of this report, subsidiaries of the Company had declared dividends to the Company and the Company's reserves available for distribution, calculated in accordance with the relevant provisions of the Companies Law of the Cayman Islands, amounted to HK\$83,788,424 of which HK\$28,845,150 has been proposed as a final dividend for the year under review.

CHARITABLE DONATIONS

During the year, the Group made charitable donations amounting to approximately HK\$6,370,000 (2019: approximately HK\$580,000).

MAJOR CUSTOMERS AND SUPPLIERS

During the year under review, sales to the Group's five largest customers accounted for approximately 46.1% of the Group's total sales for the year and sales to the largest customer included therein accounted for approximately 21.4% of the Group's total sales.

During the year under review, purchases from the Group's five largest suppliers accounted for approximately 85.1% of the Group's total purchases for the year and purchases from the largest supplier included therein accounted for approximately 74.5% of the Group's total purchases.

None of the Directors, or any of their close associates or any shareholders (which, to the best knowledge of the Directors, own more than 5% of the Company's issued share capital), had any beneficial interest in the Group's five largest customers or suppliers.

DIRECTORS

The Directors during the year and up to the date of this report were:

Executive Directors:

Ngiam Mia Je Patrick (*Chairman*)

Fang Haizhou (*Managing Director*)

Ngiam Hian Leng Malcolm (*Deputy Managing Director*) (*appointed with effect from 19 September 2020*)

Zhong Sheng (*resigned with effect from 4 July 2020*)

Independent non-executive Directors:

Fung Chi Ying

Mauffrey Benoit Jean Marie

Yeow Mee Mooi

In compliance with the Company's articles of association and as recommended by the nomination committee of the Company, Fang Haizhou, Ngiam Mia Je Patrick and Fung Chi Ying will retire by rotation and, being eligible, offer themselves for re-election at the forthcoming annual general meeting of the Company to be held on Wednesday, 12 May 2021. Pursuant to the Company's articles of association and the Corporate Governance Code as set out in Appendix 14 to the Listing Rules, Ngiam Hian Leng Malcolm and Yau Lai Man, being the newly appointed Directors, will only hold their respective office until the forthcoming annual general meeting and, being eligible, offer themselves for re-election thereat.

DIRECTORS' SERVICE CONTRACTS

Each executive Director has entered into a service agreement with the Company.

Details of the appointments of the independent non-executive Directors are set out in the Corporate Governance Report on page 131 of this report.

Save as disclosed in note 11 to the financial statements, there were no other emoluments, pension and any compensation arrangements for the Directors and past Directors which are required to be disclosed under the Listing Rules, or section 383 of the Companies Ordinance (Chapter 622, Laws of Hong Kong) or the Companies (Disclosure of Information about Benefits of Directors) Regulation (Chapter 622G, Laws of Hong Kong). Save as disclosed above, none of the Directors has a service contract with the Company or any of its subsidiaries which is not determinable by the Company or any of its subsidiaries within one year without payment of compensation, other than statutory obligations.

CONFIRMATION OF INDEPENDENCE

The Company has received from each of the independent non-executive Directors a written confirmation of independence pursuant to Rule 3.13 of the Listing Rules. The Company thus considers all the independent non-executive Directors to be independent.

PERMITTED INDEMNITY PROVISION

Article 165(1) of the Articles of Association of the Company provides, among other things, that the Directors and other officers shall be indemnified and secured harmless out of the assets and profits of the Company from and against all actions, costs, charges, losses, damages and expenses which they or any of them shall or may incur or sustain by or by reason of any act done, concurred in or omitted in or about the execution of their duty, or supposed duty, in their respective offices, provided that this indemnity shall not extend to any matter in respect of any fraud or dishonesty which may attached to any of them. Such permitted indemnity provision is currently in force and was in force during the year ended 31 December 2020.

DIRECTORS' OR CONTROLLING SHAREHOLDERS' INTERESTS IN CONTRACTS OF SIGNIFICANCE

There has been no transaction, arrangement or contract of significance in relation to the business of the Group to which the Company or any of its subsidiaries was a party and in which a Director or an entity connected with the Director or controlling shareholders of the Company had a material interest, whether directly or indirectly, subsisted at the end of or at any time during the year under review.

MANAGEMENT CONTRACTS

No contracts concerning the management and administration of the whole or any substantial part of the business of the Company were entered into or existed during the year.

REPORT OF THE DIRECTORS

EMOLUMENT POLICY

The emolument policy of the employees of the Group is implemented by the human resources department on the basis of their merit, qualifications, and competence and is reviewed by the executive Directors.

The Company has adopted the model whereby the remuneration committee of the Board (the “Remuneration Committee”) makes recommendations to the Board on the remuneration packages of individual executive Directors and senior management, which should include benefits in kind, pension rights and compensation payments and any compensation payable for loss or termination of their office(s) or appointment(s), and to make recommendations to the Board on the remuneration of non-executive Directors (if any).

In determining or recommending the remuneration packages of the Directors and senior management, the Remuneration Committee should consider factors such as salaries paid by comparable companies, time commitment and responsibilities of the Directors and senior management, employment conditions elsewhere in the Group and desirability of performance-based remuneration. In reviewing and approving performance-based remuneration, reference will be made by the Remuneration Committee to the Group’s corporate goals and objectives resolved by the Board from time to time.

REMUNERATION OF DIRECTORS AND FIVE HIGHEST-PAID EMPLOYEES

Details of the remuneration of Directors (on a named basis) and the five highest-paid employees are set out in notes 11 and 12 to the financial statements, respectively.

REPORT OF THE DIRECTORS

To the Shareholders of Essex Bio-Technology Limited

(Incorporated in the Cayman Islands with limited liability)

Opinion

We have audited the consolidated financial statements of Essex Bio-Technology Limited (the "Company") and its subsidiaries (hereafter referred to as the "Group") set out on pages 57 to 129, which comprise the consolidated statement of financial position as at 31 December 2020, and the consolidated statement of profit or loss and other comprehensive income, the consolidated statement of changes in equity and the consolidated statement of cash flows for the year then ended, and notes to the consolidated financial statements, including a summary of significant accounting policies.

In our opinion, the consolidated financial statements give a true and fair view of the consolidated financial position of the Group as at 31 December 2020, and of its consolidated financial performance and its consolidated cash flows for the year then ended in accordance with Hong Kong Financial Reporting Standards ("HKFRSs") issued by the Hong Kong Institute of Certified Public Accountants (the "HKICPA") and have been properly prepared in compliance with the disclosure requirements of the Hong Kong Companies Ordinance.

Basis for Opinion

We conducted our audit in accordance with Hong Kong Standards on Auditing ("HKSA") issued by the HKICPA. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Consolidated Financial Statements section of our report. We are independent of the Group in accordance with the HKICPA's "Code of Ethics for Professional Accountants" (the "Code"), and we have fulfilled our other ethical responsibilities in accordance with the Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key Audit Matters

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the consolidated financial statements of the current period. These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, we do not provide a separate opinion on these matters.

Capitalisation of development expenditure as intangible assets and subsequent measurement

Refer to Notes 4(g), 5 and 21 to the consolidated financial statements.

Capitalised development expenditure amounted to the net carrying value of HK\$145,807,118 as at 31 December 2020. Development expenditure mainly comprised development of biopharmaceutical products. The Group capitalises eligible product development costs upon meeting the criteria as described in Hong Kong Accounting Standard 38 "Intangible Assets" ("HKAS 38"). Capitalisation criteria assessment under HKAS 38 requires significant judgement and measurement uncertainty at inception and throughout the lives of the individual projects. Judgements involved to determine the eligibility of the costs for capitalisation and the subsequent measurement requires detailed and sensitivity analysis.

Our Response

Our audit procedures included, amongst others, the following:

- (i) Assessing the eligibility of the development costs for capitalisation as intangible assets under HKAS 38 and evaluating the assumptions and methodologies used by the Group to test the impairment of these intangible assets; and
- (ii) Reviewing the design of the controls identified by the management surrounding the intangible assets capitalisation and subsequent measurement and for which we considered key, performing substantive test of details on the capitalised development costs. These procedures included on a sample basis testing underlying evidence related to hours registration, testing estimates of useful life, and testing estimates surrounding future cash flows.

Valuation of convertible loan receivables and unlisted equity investments

Refer to Notes 4(h), 5, 22 and 23 to the consolidated financial statements.

As at 31 December 2020, the Group's convertible loan receivables and unlisted equity investments amounted to HK\$75,350,152 and HK\$64,378,203 respectively. The Group engaged an independent firm of professionally qualified valuers (the "external valuer") to apply valuation techniques to determine the fair values of these financial instruments. These valuation techniques, in particular those that included significant unobservable inputs, involved subjective judgements and assumptions. The sensitivity of the assumptions used may have material impact on the valuation of these financial instruments.

We focused on this area due to the magnitude of the balances involved and the significant accounting judgements and estimates required in determining the fair values of these financial instruments.

Our Response

Our audit procedures included, amongst others, the following:

- (i) Examining the terms of the financial instruments and the relevant agreements;
- (ii) With the assistance of our own valuation specialists, assessing the key assumptions, inputs and parameters adopted by the external valuer against available market information and the appropriateness of valuation methodologies adopted by the external valuer;
- (iii) Evaluating the objectivity, independence, capabilities and competence of the external valuer engaged by the Group; and
- (iv) Evaluating the adequacy of the related disclosures in the consolidated financial statements.

INDEPENDENT AUDITOR'S REPORT

Other Information in the Annual Report

The directors are responsible for the other information. The other information comprises the information included in the Company's annual report, but does not include the consolidated financial statements and our auditor's report thereon.

Our opinion on the consolidated financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the consolidated financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the consolidated financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Directors' Responsibilities for the Consolidated Financial Statements

The directors of the Company are responsible for the preparation of the consolidated financial statements that give a true and fair view in accordance with HKFRSs issued by the HKICPA and the disclosure requirements of the Hong Kong Companies Ordinance, and for such internal control as the directors determine is necessary to enable the preparation of the consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, the directors of the Company are responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the Group or to cease operations, or have no realistic alternative but to do so.

The directors are also responsible for overseeing the Group's financial reporting process. The Audit Committee assists the directors in discharging their responsibilities in this regard.

Auditor's Responsibilities for the Audit of the Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. This report is made solely to you, as a body, in accordance with the terms of our engagement, and for no other purpose. We do not assume responsibility towards or accept liability to any other person for the contents of this report.

Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with HKSAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

INDEPENDENT AUDITOR'S REPORT

As part of an audit in accordance with HKSAAs, we exercise professional judgement and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the directors.
- Conclude on the appropriateness of the directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with the Audit Committee regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide the Audit Committee with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, actions taken to eliminate threats or safeguards applied.

INDEPENDENT AUDITOR'S REPORT

From the matters communicated with the directors, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended 31 December 2020

1. General

Essex Bio-Technology Limited (the “Company”) is a limited liability company incorporated in the Cayman Islands on 31 July 2000 under Companies Law Chapter 22 (Law 3 of 1961, as consolidated and revised) of the Cayman Islands. Its shares are listed on the Main Board of The Stock Exchange of Hong Kong Limited (the “Stock Exchange”) (Stock code: 1061). The address of its registered office is Cricket Square, Hutchins Drive, P.O. Box 2681, Grand Cayman KY1-1111, Cayman Islands. Its principal place of business is located at Room 2818, China Merchants Tower, Shun Tak Centre, 168-200 Connaught Road Central, Hong Kong.

The Group, comprising the Company and its subsidiaries, is principally engaged in investment holding, and development, manufacture and sale of biologic drugs in the People’s Republic of China (the “PRC”).

2. Basis of Preparation

(a) Statement of compliance

The consolidated financial statements have been prepared in accordance with Hong Kong Financial Reporting Standards (“HKFRSs”) (which include all Hong Kong Financial Reporting Standards, Hong Kong Accounting Standards (“HKASs”) and Interpretations) issued by the Hong Kong Institute of Certified Public Accountants and the disclosure requirements of the Hong Kong Companies Ordinance. In addition, the consolidated financial statements include applicable disclosures required by the Rules Governing the Listing of Securities on the Stock Exchange (the “Listing Rules”).

(b) Basis of measurement

The consolidated financial statements have been prepared under the historical cost basis except for certain financial instruments, which are measured at fair values. The measurement bases are fully described in the accounting policies set out in note 4 below.

(c) Functional and presentation currency

The consolidated financial statements are presented in Hong Kong dollars (“HK\$”), which is the same as the functional currency of the Company.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended 31 December 2020

3. Adoption of HKFRSs

(a) Adoption of revised HKFRSs – effective 1 January 2020

Amendments to HKFRS 3	Definition of a Business
Amendments to HKAS 1 and HKAS 8	Definition of Material

Amendments to HKFRS 3 – Definition of a Business

The amendments clarify and provide additional guidance on the definition of a business. The amendments clarify that for an integrated set of activities and assets to be considered a business, it must include, at a minimum, an input and a substantive process that together significantly contribute to the ability to create output. A business can exist without including all of the inputs and processes needed to create outputs. The amendments remove the assessment of whether market participants are capable of acquiring the business and continue to produce outputs. Instead, the focus is on whether acquired inputs and acquired substantive processes together significantly contribute to the ability to create outputs. The amendments have also narrowed the definition of outputs to focus on goods or services provided to customers, investment income or other income from ordinary activities. Furthermore, the amendments provide guidance to assess whether an acquired process is substantive and introduce an optional fair value concentration test to permit a simplified assessment of whether an acquired set of activities and assets is not a business.

Amendments to HKAS 1 and HKAS 8 – Definition of Material

The amendments provide a new definition of material. The new definition states that information is material if omitting, misstating or obscuring it could reasonably be expected to influence decisions that the primary users of general purpose financial statements make on the basis of those financial statements. The amendments clarify that materiality will depend on the nature or magnitude of information. A misstatement of information is material if it could reasonably be expected to influence decisions made by the primary users.

The adoption of these revised HKFRSs in the current year has no material impact on the Group's financial statements.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended 31 December 2020

3. Adoption of HKFRSs (Continued)

(b) Revised HKFRSs that have been issued but are not yet effective

The following revised HKFRSs, potentially relevant to the Group's financial statements, have been issued, but are not yet effective and have not been early adopted by the Group. The Group's current intention is to apply these changes on the date they become effective.

Amendments to HKFRS 3	Reference to the Conceptual Framework ¹
Amendments to HKAS 16	Proceeds before Intended Use ¹
Amendments to HKAS 37	Onerous Contracts: Costs of Fulfilling a Contract ¹
Annual Improvements to HKFRSs 2018-2020 Cycle	Amendments to HKFRS 9, Financial Instruments ¹
Amendments to HKAS 1	Classification of Liabilities as Current or Non-current ²
Amendments to HKFRS 10 and HKAS 28 (2011)	Sale or Contribution of Assets between an Investor and its Associate or Joint Venture ³

¹ Effective for annual periods beginning on or after 1 January 2022

² Effective for annual periods beginning on or after 1 January 2023

³ No mandatory effective date yet determined but available for adoption

Amendments to HKFRS 3 – Reference to the Conceptual Framework

Minor amendments were made to HKFRS 3 *Business Combinations* to update the references to the Conceptual Framework for Financial Reporting and add an exception for the recognition of liabilities and contingent liabilities within the scope of HKAS 37 *Provisions, Contingent Liabilities and Contingent Assets* and Interpretation 21 *Levies*. The amendments also confirm that contingent assets should not be recognised at the acquisition date.

Amendments to HKAS 16 – Proceeds before Intended Use

The amendments to HKAS 16 *Property, Plant and Equipment* prohibit an entity from deducting from the cost of an item of property, plant and equipment any proceeds received from selling items produced while the entity is preparing the asset for its intended use. The amendments also clarify that an entity is 'testing whether the asset is functioning properly' when it assesses the technical and physical performance of the asset. The financial performance of the asset is not relevant to this assessment. Entities must disclose separately the amounts of proceeds and costs relating to items produced that are not an output of the entity's ordinary activities.

Amendments to HKAS 37 – Onerous Contracts: Costs of Fulfilling a Contract

The amendments to HKAS 37 clarify that the direct costs of fulfilling a contract include both the incremental costs of fulfilling the contract and an allocation of other costs directly related to fulfilling contracts. Before recognising a separate provision for an onerous contract, the entity recognises any impairment loss that has occurred on assets used in fulfilling the contract.

Annual Improvements to HKFRSs 2018-2020 Cycle – Amendments to HKFRS 9, Financial Instruments

The amendments to HKFRS 9 clarify which fees should be included in the 10% test for derecognition of financial liabilities.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended 31 December 2020

3. Adoption of HKFRSs *(Continued)*

(b) Revised HKFRSs that have been issued but are not yet effective (Continued)

Amendments to HKAS 1 – Classification of Liabilities as Current or Non-current

The narrow-scope amendments to HKAS 1 *Presentation of Financial Statements* clarify that liabilities are classified as either current or non-current, depending on the rights that exist at the end of the reporting period. Classification is unaffected by the expectations of the entity or events after the reporting date (e.g. the receipt of a waiver or a breach of covenant). The amendments also clarify what HKAS 1 means when it refers to the 'settlement' of a liability. The amendments could affect the classification of liabilities, particularly for entities that previously considered management's intentions to determine classification and for some liabilities that can be converted into equity. They must be applied retrospectively in accordance with the normal requirements in HKAS 8 *Accounting Policies, Changes in Accounting Estimates and Errors*.

Amendments to HKFRS 10 and HKAS 28 (2011) – Sale or Contribution of Assets between an Investor and its Associate or Joint Venture

The amendments clarify the extent of gains or losses to be recognised when an entity sells or contributes assets to its associate or joint venture. When the transaction involves a business the gain or loss is recognised in full, conversely when the transaction involves assets that do not constitute a business the gain or loss is recognised only to the extent of the unrelated investors' interests in the joint venture or associate.

The Group has already commenced an assessment of the impact of adopting the above amendments to existing standards to the Group. The Group has so far concluded that the application of these new pronouncements will have no material impact on the Group's financial statements.

4. Significant Accounting Policies

(a) Basis of consolidation

The consolidated financial statements comprise the financial statements of the Company and its subsidiaries. Inter-company transactions and balances between group companies together with unrealised profits are eliminated in full in preparing the consolidated financial statements. Unrealised losses are also eliminated unless the transaction provides evidence of impairment on the asset transferred, in which case the loss is recognised in profit or loss.

(b) Subsidiaries

A subsidiary is an investee over which the Company is able to exercise control. The Company controls an investee if all three of the following elements are present: power over the investee, exposure, or rights, to variable returns from the investee, and the ability to use its power to affect those variable returns. Control is reassessed whenever facts and circumstances indicate that there may be a change in any of these elements of control.

In the Company's statement of financial position, interests in subsidiaries are stated at cost less impairment loss, if any. The results of subsidiaries are accounted for by the Company on the basis of dividend received and receivable.

(c) Associates

An associate is an entity over which the Group has significant influence and that is neither a subsidiary nor a joint arrangement. Significant influence is the power to participate in the financial and operating policy decisions of the investee but not control or joint control over those policies.

Associates are accounted for using the equity method whereby they are initially recognised at cost and thereafter, their carrying amounts are adjusted for the Group's share of the post-acquisition change in the associates' net assets except that losses in excess of the Group's interest in the associate are not recognised unless there is an obligation to make good those losses.

Profits and losses arising on transactions between the Group and its associates are recognised only to the extent of unrelated investors' interests in the associate. The investor's share in the associate's profits and losses resulting from these transactions is eliminated against the carrying value of the associate. Where unrealised losses provide evidence of impairment of the asset transferred they are recognised immediately in profit or loss.

Any premium paid for an associate above the fair value of the Group's share of the identifiable assets, liabilities and contingent liabilities acquired is capitalised and included in the carrying amount of the associate. Where there is objective evidence that the investment in an associate has been impaired, the carrying amount of the investment is tested for impairment in the same way as other non-financial assets.

(d) Business combination and goodwill

Business combinations are accounted for using the acquisition method. The consideration transferred is measured at the acquisition-date fair value which is the sum of the acquisition-date fair values of assets transferred by the Group, liabilities assumed by the Group to the former owners of the acquiree and the equity interests issued by the Group in exchange for control of the acquiree. For each business combination, the Group elects whether to measure the non-controlling interests in the acquiree that are present ownership interests and entitle their holders to a proportionate share of net assets in the event of liquidation at fair value or at the proportionate share of the acquiree's identifiable net assets. All other components of non-controlling interests are measured at fair value. Acquisition-related costs are expensed as incurred.

When the Group acquires a business, it assesses the financial assets and liabilities assumed for appropriate classification and designation in accordance with the contractual terms, economic circumstances and pertinent conditions as at the acquisition date. This includes the separation of embedded derivatives in host contracts of the acquiree.

(d) Business combination and goodwill (Continued)

Any contingent consideration to be transferred by the acquirer is recognised at fair value at the acquisition date. Contingent consideration classified as an asset or liability is measured at fair value with changes in fair value recognised in profit or loss. Contingent consideration that is classified as equity is not remeasured and subsequent settlement is accounted for within equity.

Goodwill is initially recognised at cost being the excess of the aggregate of the consideration transferred, the amount recognised for non-controlling interests in the acquiree and the acquisition-date fair value of the acquirer's previously held equity interests in the acquiree over the fair value of identifiable assets and liabilities acquired.

Where the fair value of identifiable assets and liabilities exceeds the aggregate of the fair value of consideration paid, the amount of any non-controlling interest in the acquiree and the acquisition-date fair value of the acquirer's previously held equity interest in the acquiree, the excess is recognised in profit or loss on the acquisition date, after reassessment.

After initial recognition, goodwill is measured at cost less any accumulated impairment losses. For the purpose of impairment testing, goodwill arising from an acquisition is allocated to each of the relevant cash-generating units that are expected to benefit from the synergies of the acquisition. A cash-generating unit is the smallest identifiable group of assets that generate cash inflows that are largely independent of the cash inflows from other assets or groups of assets. A cash-generating unit to which goodwill has been allocated is tested for impairment annually, and whenever there is an indication that the unit may be impaired.

For goodwill arising on an acquisition in a financial year, the cash-generating unit to which goodwill has been allocated is tested for impairment before the end of that financial year. When the recoverable amount of the cash-generating unit is less than the carrying amount of the unit, the impairment loss is allocated to reduce the carrying amount of any goodwill allocated to the unit first, and then to the other assets of the unit pro-rata on the basis of the carrying amount to each asset in the unit. However, the loss allocated to each asset will not reduce the individual asset's carrying amount to the amount below its fair value less cost of disposal (if measurable) or its value in use (if determinable), whichever is the higher. Any impairment loss for goodwill is recognised in profit or loss and is not reversed in subsequent periods.

(e) Property, plant and equipment

Property, plant and equipment are stated at cost less accumulated depreciation and accumulated impairment losses.

The cost of property, plant and equipment includes its purchase price and the costs directly attributable to the acquisition of the items.

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably. The carrying amount of the replaced part is derecognised. All other repairs and maintenance are recognised as an expense in profit or loss during the financial period in which they are incurred.

Property, plant and equipment, other than construction in progress, are depreciated so as to write off their cost net of expected residual value over their estimated useful lives on a straight-line basis. The useful lives, residual value and depreciation method are reviewed, and adjusted if appropriate, at the end of each reporting period. The annual rates are as follows:

Buildings and leasehold improvements	2%-20% or the remaining lease period whichever is shorter
Plant and machinery	9%-18%
Furniture, fixtures and equipment	10%-33%
Motor vehicles	10%-20%

Construction in progress is stated at cost less impairment losses. Cost comprises direct costs of construction as well as borrowing costs capitalised during the periods of construction and installation. Capitalisation of these costs ceases and the construction in progress is transferred to the appropriate class of property, plant and equipment when substantially all the activities necessary to prepare the assets for their intended use are completed. No depreciation is provided for in respect of construction in progress until it is completed and ready for its intended use.

An asset is written down immediately to its recoverable amount if its carrying amount is higher than the asset's estimated recoverable amount.

The gain or loss on disposal of an item of property, plant and equipment is the difference between the net sale proceeds and its carrying amount, and is recognised in profit or loss on disposal.

(f) Leases

The Group assesses at contract inception whether a contract is, or contains, a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

Group as a lessee

The Group applies a single recognition and measurement approach for all leases, except for short-term leases and leases of low-value assets. The Group recognises lease liabilities to make lease payments and right-of-use assets representing the right to use the underlying assets.

(i) Right-of-use assets

Right-of-use assets are recognised at the commencement date of the lease (that is the date the underlying asset is available for use). Right-of-use assets are measured at cost, less any accumulated depreciation and any impairment losses, and adjusted for any remeasurement of lease liabilities. The cost of right-of-use assets includes the amount of lease liabilities recognised, initial direct costs incurred, and lease payments made at or before the commencement date less any lease incentives received. Right-of-use assets are depreciated on a straight-line basis over the shorter of the lease terms and the estimated useful lives of the assets as follows:

Leasehold buildings	5 years
---------------------	---------

If ownership of the leased asset transfers to the Group by the end of the lease term or the cost reflects the exercise of a purchase option, depreciation is calculated using the estimated useful life of the asset.

Land use rights represent payments for leasehold land held for own use under operating leases. The Group made up-front payments to obtain land use rights as operating leases on which properties are developed. These payments are stated at cost and are amortised over the period of the lease on a straight-line basis as expense.

(ii) Lease liabilities

Lease liabilities are recognised at the commencement date of the lease at the present value of lease payments to be made over the lease term. The lease payments include fixed payments (including in-substance fixed payments) less any lease incentives receivable, variable lease payments that depend on an index or a rate, and amounts expected to be paid under residual value guarantees. The lease payments also include the exercise price of a purchase option reasonably certain to be exercised by the Group and payments of penalties for termination of a lease, if the lease term reflects the Group exercising the option to terminate. The variable lease payments that do not depend on an index or a rate are recognised as an expense in the period in which the event or condition that triggers the payment occurs.

4. Significant Accounting Policies *(Continued)*

(f) Leases (Continued)

Group as a lessee (Continued)

(ii) Lease liabilities *(Continued)*

In calculating the present value of lease payments, the Group uses its incremental borrowing rate at the lease commencement date because the interest rate implicit in the lease is not readily determinable. After the commencement date, the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made. In addition, the carrying amount of lease liabilities is remeasured if there is a modification, a change in the lease term, a change in lease payments (e.g., a change to future lease payments resulting from a change in an index or rate) or a change in assessment of an option to purchase the underlying asset.

(iii) Short-term leases and leases of low-value assets

The Group applies the short-term lease recognition exemption to its short-term leases of machinery and equipment (that is those leases that have a lease term of 12 months or less from the commencement date and do not contain a purchase option). It also applies the recognition exemption for leases of low-value assets to leases of office equipment and laptop computers that are considered to be of low value.

Lease payments on short-term leases and leases of low-value assets are recognised as an expense on a straight-line basis over the lease term.

Group as a lessor

When the Group acts as a lessor, it classifies at lease inception (or when there is a lease modification) each of its leases as either an operating lease or a finance lease.

Leases in which the Group does not transfer substantially all the risks and rewards incidental to ownership of an asset are classified as operating leases. When a contract contains lease and non-lease components, the Group allocates the consideration in the contract to each component on a relative stand-alone selling price basis. Rental income is accounted for on a straight-line basis over the lease terms and is included in revenue in profit or loss due to its operating nature. Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and recognised over the lease term on the same basis as rental income. Contingent rents are recognised as revenue in the period in which they are earned.

Leases that transfer substantially all the rewards and risks and rewards incidental to ownership of an underlying asset to the lessee are accounted for as finance leases.

(g) *Intangible assets*

(i) *Acquired intangible assets*

Intangible assets acquired separately are initially recognised at cost. Subsequently, intangible assets with finite useful lives are carried at cost less accumulated amortisation and accumulated impairment losses.

Amortisation is provided on unit-of-production method or straight-line basis over their useful lives, where appropriate. The amortisation expense is recognised in profit or loss.

Distribution rights and project development costs amortised under straight-line method	5-25 years
--	------------

(ii) *Research and development expenditure*

Expenditure on internally developed products is capitalised if it can be demonstrated that:

1. it is technically feasible to develop the product for it to be sold;
2. adequate resources are available to complete the development;
3. there is an intention to complete and sell the product;
4. the Group is able to sell the product;
5. sale of the product will generate future economic benefits; and
6. expenditure on the project can be measured reliably.

Capitalised development costs are amortised over the periods the Group expects to benefit from selling the products developed. The amortisation expense is recognised in profit or loss.

Capitalised development expenditure amortised under license period	5-10 years
--	------------

Development expenditure not satisfying the above criteria and expenditure on the research phase of internal projects are recognised in profit or loss as incurred.

(iii) *Impairment*

Intangible assets with finite lives are tested for impairment when there is an indication that an asset may be impaired.

(h) Financial instruments

(i) Financial assets

A financial asset (unless it is a trade receivable without a significant financing component) is initially measured at fair value plus, for an item not at fair value through profit or loss ("FVTPL"), transaction costs that are directly attributable to its acquisition or issue. A trade receivable without a significant financing component is initially measured at the transaction price.

All regular way purchases and sales of financial assets are recognised on the trade date, that is, the date that the Group commits to purchase or sell the asset. Regular way purchases or sales are purchases or sales of financial assets that require delivery of assets within the period generally established by regulation or convention in the market place.

Financial assets with embedded derivatives are considered in their entirety when determining whether their cash flows are solely payment of principal and interest.

Debt instruments

Subsequent measurement of debt instruments depends on the Group's business model for managing the asset and the cash flow characteristics of the asset. There are three measurement categories into which the Group classifies its debt instruments:

Amortised cost: Assets that are held for collection of contractual cash flows where those cash flows represent solely payments of principal and interest are measured at amortised cost. Financial assets at amortised cost are subsequently measured using the effective interest rate method. Interest income, foreign exchange gains and losses and impairment are recognised in profit or loss. Any gain on derecognition is recognised in profit or loss.

Fair value through other comprehensive income ("FVTOCI"): Assets that are held for collection of contractual cash flows and for selling the financial assets, where the assets' cash flows represent solely payments of principal and interest, are measured at FVTOCI. Debt investments at FVTOCI are subsequently measured at fair value. Interest income calculated using the effective interest rate method, foreign exchange gains and losses and impairment are recognised in profit or loss. Other net gains and losses are recognised in other comprehensive income. On derecognition, gains and losses accumulated in other comprehensive income are reclassified to profit or loss.

FVTPL: Financial assets at FVTPL include financial assets held for trading, financial assets designated upon initial recognition at FVTPL, or financial assets mandatorily required to be measured at fair value. Financial assets are classified as held for trading if they are acquired for the purpose of selling or repurchasing in the near term. Derivatives, including separated embedded derivatives, are also classified as held for trading unless they are designated as effective hedging instruments. Financial assets with cash flows that are not solely payments of principal and interest are classified and measured at FVTPL, irrespective of the business model. Notwithstanding the criteria for debt instruments to be classified at amortised cost or at FVTOCI, as described above, debt instruments may be designated at FVTPL on initial recognition if doing so eliminates, or significantly reduces, an accounting mismatch.

(h) Financial instruments (Continued)

(i) Financial assets (Continued)

Equity instruments

On initial recognition of an equity investment that is not held for trading, the Group could irrevocably elect to present subsequent changes in the investment's fair value in other comprehensive income. This election is made on an investment-by-investment basis. Equity investments at FVTOCI are measured at fair value. Dividend income are recognised in profit or loss unless the dividend income clearly represents a recovery of part of the cost of the investments. Other net gains and losses are recognised in other comprehensive income and are not reclassified to profit or loss. All other equity instruments are classified as FVTPL, whereby changes in fair value, dividends and interest income are recognised in profit or loss.

(ii) Impairment loss on financial assets

The Group recognises loss allowances for expected credit losses ("ECLs") on trade receivables, contract assets, financial assets measured at amortised cost and debt investments measured at FVTOCI. The ECLs are measured on either of the following bases: (1) 12 months ECLs: these are the ECLs that result from possible default events within the 12 months after the reporting date; and (2) lifetime ECLs: these are ECLs that result from all possible default events over the expected life of a financial instrument. The maximum period considered when estimating ECLs is the maximum contractual period over which the Group is exposed to credit risk.

ECLs are a probability-weighted estimate of credit losses. Credit losses are measured as the difference between all contractual cash flows that are due to the Group in accordance with the contract and all the cash flows that the Group expects to receive. The shortfall is then discounted at an approximation to the assets' original effective interest rate.

The Group has elected to measure loss allowances for trade receivables and contract assets using HKFRS 9 simplified approach and has calculated ECLs based on lifetime ECLs. The Group has established a provision matrix that is based on the Group's historical credit loss experience, adjusted for forward-looking factors specific to the debtors and the economic environment.

For other debt financial assets, the ECLs are based on the 12 months ECLs. However, when there has been a significant increase in credit risk since origination, the allowance will be based on the lifetime ECLs.

When determining whether the credit risk of a financial asset has increased significantly since initial recognition and when estimating ECLs, the Group considers reasonable and supportable information that is relevant and available without undue cost or effort. This includes both quantitative and qualitative information analysis, based on the Group's historical experience and informed credit assessment and including forward-looking information.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

4. Significant Accounting Policies *(Continued)*

(h) Financial instruments (Continued)

(ii) Impairment loss on financial assets (Continued)

The Group assumes that the credit risk on a financial asset has increased significantly if it is more than 60 to 90 days past due.

The Group considers a financial asset to be credit-impaired when: (1) the borrower is unlikely to pay its credit obligations to the Group in full, without recourse by the Group to actions such as realising security (if any is held); or (2) the financial asset is more than 90 to 180 days past due, depending on credit worth of customers.

Interest income on credit-impaired financial assets is calculated based on the amortised cost (i.e. the gross carrying amount less loss allowance) of the financial asset. For non credit-impaired financial assets interest income is calculated based on the gross carrying amount.

(iii) Financial liabilities

The Group classifies its financial liabilities, depending on the purpose for which the liabilities were incurred. Financial liabilities at FVTPL are initially measured at fair value and financial liabilities at amortised costs are initially measured at fair value, net of directly attributable costs incurred.

Financial liabilities at FVTPL

Financial liabilities at FVTPL include financial liabilities held for trading and financial liabilities designated upon initial recognition as at FVTPL.

Financial liabilities are classified as held for trading if they are acquired for the purpose of sale in the near term. Derivatives, including separated embedded derivatives, are also classified as held for trading unless they are designated as effective hedging instruments. Gains or losses on liabilities held for trading are recognised in profit or loss.

Where a contract contains one or more embedded derivatives, the entire hybrid contract may be designated as a financial liability at FVTPL, except where the embedded derivative does not significantly modify the cash flows or it is clear that separation of the embedded derivative is prohibited.

Financial liabilities may be designated upon initial recognition as at FVTPL if the following criteria are met: (i) the designation eliminates or significantly reduces the inconsistent treatment that would otherwise arise from measuring the liabilities or recognising gains or losses on them on a different basis; (ii) the liabilities are part of a group of financial liabilities which are managed and their performance evaluated on a fair value basis, in accordance with a documented risk management strategy; or (iii) the financial liability contains an embedded derivative that would need to be separately recorded.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended 31 December 2020

4. Significant Accounting Policies *(Continued)*

(h) Financial instruments (Continued)

(iii) Financial liabilities (Continued)

Financial liabilities at FVTPL (Continued)

Subsequent to initial recognition, financial liabilities at FVTPL are measured at fair value, with changes in fair value recognised in profit or loss in the period in which they arise, except for the gains and losses arising from the Group's own credit risk which are presented in other comprehensive income with no subsequent reclassification to the profit or loss. The net fair value gain or loss recognised in the profit or loss does not include any interest charged on these financial liabilities.

Financial liabilities at amortised cost

Financial liabilities at amortised cost including trade and other payables, bank borrowings and the debt component of convertible loan issued by the Group are subsequently measured at amortised cost, using the effective interest method. The related interest expense is recognised in profit or loss.

Gains or losses are recognised in profit or loss when the liabilities are derecognised as well as through the amortisation process.

(iv) Convertible loan payable

Convertible loan payable issued by the Group that contain both the liability and conversion option components are classified separately into their respective items on initial recognition. Conversion option that will be settled by the exchange of a fixed amount of cash or another financial asset for a fixed number of the Company's own equity instruments is classified as an equity instrument.

On initial recognition, the fair value of the liability component is determined using the prevailing market interest of similar non-convertible debts. The difference between the proceeds of the issue of the convertible loan and the fair value assigned to the liability component, representing the conversion option for the holder to convert the loan into equity, is included in equity (conversion component of convertible loan payable).

In subsequent periods, the liability component of the convertible loan payable is carried at amortised cost using the effective interest method. The equity component, represented by the option to convert the liability component into ordinary shares of the Company, will remain in conversion component of convertible loan payable until the embedded option is exercised (in which case the balance stated in conversion component of convertible loan payable will be transferred to share capital and share premium. Where the option remains unexercised at the expiry dates, the balance stated in conversion component of convertible loan payable will be released to the retained earnings. No gain or loss is recognised upon conversion or expiration of the option.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended 31 December 2020

4. Significant Accounting Policies *(Continued)*

(h) Financial instruments (Continued)

(iv) Convertible loan payable (Continued)

An exchange between an existing borrower and lender of debt instruments with substantially different terms shall be accounted for as an extinguishment of the original financial liability and the recognition of a new financial liability. Similarly, a substantial modification of the terms of an existing financial liability or a part of it (whether or not attributable to the financial difficulty of the debtor) shall be accounted for as an extinguishment of the original financial liability and the recognition of a new financial liability. The terms are substantially different if the discounted present value of the cash flows under the new terms, including any fees paid net of any fees received and discounted using the original effective interest rate, is at least 10 per cent different from the discounted present value of the remaining cash flows of the original financial liability. If an exchange of debt instruments or modification of terms is accounted for as an extinguishment, any costs or fees incurred are recognised as part of the gain or loss on the extinguishment. If the exchange or modification is not accounted for as an extinguishment, any costs or fees incurred adjust the carrying amount of the liability and are amortised over the remaining term of the modified liability.

(v) Effective interest method

The effective interest method is a method of calculating the amortised cost of a financial asset or financial liability and of allocating interest income or interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash receipts or payments through the expected life of the financial asset or liability, or where appropriate, a shorter period.

(vi) Equity instruments

Equity instruments issued by the Company are recorded at the proceeds received, net of direct issue costs.

(vii) Derecognition

The Group derecognises a financial asset when the contractual rights to the future cash flows in relation to the financial asset expire or when the financial asset has been transferred and the transfer meets the criteria for derecognition in accordance with HKFRS 9.

Financial liabilities are derecognised when the obligation specified in the relevant contract is discharged, cancelled or expires.

(i) Inventories

Inventories are initially recognised at cost, and subsequently at the lower of cost and net realisable value. Cost is calculated using the weighted average method. Net realisable value represents the estimated selling price in the ordinary course of business less the estimated costs of completion and the estimated costs necessary to make the sale.

(j) Revenue recognition

Revenue from contracts with customers is recognised when control of goods or services is transferred to the customers at an amount that reflects the consideration to which the Group expects to be entitled in exchange for those goods or services, excluding those amounts collected on behalf of third parties. Revenue excludes value added tax or other sales taxes and is after deduction of any trade discounts.

Depending on the terms of the contract and the laws that apply to the contract, control of the goods or service may be transferred over time or at a point in time. Control of the goods or service is transferred over time if the Group's performance:

- provides all of the benefits received and consumed simultaneously by the customer;
- creates or enhances an asset that the customer controls as the Group performs; or
- does not create an asset with an alternative use to the Group and the Group has an enforceable right to payment for performance completed to date.

If control of the goods or services transfers over time, revenue is recognised over the period of the contract by reference to the progress towards complete satisfaction of that performance obligation. Otherwise, revenue is recognised at a point in time when the customer obtains control of the goods or service.

(i) Development, manufacture and sale of biologic drugs

Customers obtain control of the biologic drugs when the goods are delivered to and have been accepted. Revenue is thus recognised upon when the customers accepted the products. There is generally only one performance obligation. Invoices are usually payable within 90 days.

The Group's contracts with customers from the sale of product provides customers a right of return (a right to exchange another product or to be refunded in cash). The right of return gives rise to variable consideration. The variable consideration is estimated at contract inception and constrained until the associated uncertainty is subsequently resolved. The application of the constraint on variable consideration increases the amount of revenue that will be deferred. In addition, a refund liability and a right to recover returned goods assets are recognised. The directors of the Company (the "Directors") considered that the financial impact of the returned goods is minimal, with reference to the historical returned goods pattern and the management assessment of possible return of goods.

(ii) Provision of marketing service

The Group provides pharmaceutical product marketing services to various manufacturers. Revenue from marketing services is recognised at a point in time when those services are provided. Invoices are usually payable within 90 days.

4. Significant Accounting Policies *(Continued)*

(j) Revenue recognition (Continued)

(iii) Other income

Interest income is recognised on an accrual basis using the effective interest method by applying the rate that exactly discounts the estimated future cash receipts over the expected life of the financial instrument or a shorter period, when appropriate, to the net carrying amount of the financial asset.

Dividend income is recognised when the shareholders' right to receive payment has been established, it is probable that the economic benefits associated with the dividend will flow to the Group and the amount of the dividend can be measured reliably.

(k) Income taxes

Income taxes for the year comprise current tax and deferred tax.

Current tax is based on the profit or loss from ordinary activities adjusted for items that are non-assessable or disallowable for income tax purposes and is calculated using tax rates that have been enacted or substantively enacted at the end of the reporting period.

Deferred tax is recognised in respect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the corresponding amounts used for tax purposes. Except for goodwill and recognised assets and liabilities that affect neither accounting nor taxable profits, deferred tax liabilities are recognised for all temporary differences. Deferred tax assets are recognised to the extent that it is probable that taxable profits will be available against which deductible temporary differences can be utilised. Deferred tax is measured at the tax rates expected to apply in the period when the liability is settled or the asset is realised based on tax rates that have been enacted or substantively enacted at the end of the reporting period.

Deferred tax liabilities are recognised for taxable temporary differences arising on investments in subsidiaries except where the Group is able to control the reversal of the temporary difference and it is probable that the temporary difference will not reverse in the foreseeable future.

Income taxes are recognised in profit or loss except when they relate to items recognised in other comprehensive income in which case the taxes are also recognised in other comprehensive income.

(l) Foreign currency

Transactions entered into by the group entities in currencies other than the currency of the primary economic environment in which they operate (the functional currency) are recorded at the rates ruling when the transactions occur. Foreign currency monetary assets and liabilities are translated at the rates ruling at the end of reporting period. Non-monetary items carried at fair value that are denominated in foreign currencies are retranslated at the rates prevailing on the date when the fair value was determined. Non-monetary items that are measured in terms of historical cost in a foreign currency are not retranslated.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended 31 December 2020

4. Significant Accounting Policies *(Continued)*

(l) Foreign currency (Continued)

Exchange differences arising on the settlement of monetary items, and on the translation of monetary items, are recognised in profit or loss in the period in which they arise. Exchange differences arising on the retranslation of non-monetary items carried at fair value are included in profit or loss for the period except for differences arising on the retranslation of non-monetary items in respect of which gains and losses are recognised in other comprehensive income, in which case, the exchange differences are also recognised in other comprehensive income.

On consolidation, income and expense items of foreign operations are translated into the presentation currency of the Group (i.e. HK\$) at the average exchange rates for the year, unless exchange rates fluctuate significantly during the period, in which case, the rates approximating to those ruling when the transactions took place are used. All assets and liabilities of foreign operations are translated at the rate ruling at the end of reporting period. Exchange differences arising, if any, are recognised in other comprehensive income and accumulated in equity as foreign currency translation reserve. Exchange differences recognised in profit or loss of group entities' separate financial statements on the translation of long-term monetary items forming part of the Group's net investment in the foreign operations concerned are reclassified to other comprehensive income and accumulated in equity as foreign currency translation reserve.

On disposal of a foreign operation, the cumulative exchange differences recognised in the foreign currency translation reserve relating to that operation up to the date of disposal are reclassified to profit or loss as part of the profit or loss on disposal.

Goodwill and fair value adjustments on identifiable assets acquired arising on an acquisition of a foreign operation on or after 1 January 2005 are treated as assets and liabilities of that foreign operation and translated at the rate of exchange prevailing at the end of reporting period. Exchange differences arising are recognised in the foreign currency translation reserve.

(m) Employee benefits

Short term employee benefits

Short term employee benefits are employee benefits (other than termination benefits) that are expected to be settled wholly before twelve months after the end of the annual reporting period in which the employees render the related service. Short term employee benefits are recognised in the year when the employees render the related service.

Defined contribution retirement plan

Contributions to defined contribution retirement plans are recognised as an expense in profit or loss when the services are rendered by the employees.

Termination benefits

Termination benefits are recognised on the earlier of when the Group can no longer withdraw the offer of those benefits and when the Group recognises restructuring costs involving the payment of termination benefits.

(n) Impairment of other assets (other than financial assets)

At the end of each reporting period, the Group reviews the carrying amounts of the following other assets to determine whether there is any indication that those assets have suffered an impairment loss or an impairment loss previously recognised no longer exists or may have decreased.

If the recoverable amount (i.e. the higher of the fair value less costs of disposal and value in use) of an asset is estimated to be less than its carrying amount, the carrying amount of the asset is reduced to its recoverable amount. An impairment loss is recognised in profit or loss immediately.

Where an impairment loss subsequently reverses, the carrying amount of the asset is increased to the revised estimate of its recoverable amount to the extent that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset in prior years. A reversal of an impairment loss is recognised in profit or loss immediately.

Value in use is based on the estimated future cash flows expected to be derived from the asset or cash-generating unit, discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset or cash-generating unit.

(o) Share-based payment

Where share options are awarded to employees and others providing similar services, the fair value of the options at the date of grant is recognised in profit or loss over the vesting period with a corresponding increase in the share option reserve within equity. Non-market vesting conditions are taken into account by adjusting the number of equity instruments expected to vest at the end of each reporting period so that, ultimately, the cumulative amount recognised over the vesting period is based on the number of options that eventually vest. Market vesting conditions are factored into the fair value of the options granted. As long as all other vesting conditions are satisfied, a charge is made irrespective of whether the market vesting conditions are satisfied. The cumulative expense is not adjusted for failure to achieve a market vesting condition.

Where the terms and conditions of options are modified before they vest, the increase in the fair value of the options, measured immediately before and after the modification, is also recognised in profit or loss over the remaining vesting period.

Where equity instruments are granted to persons other than employees and others providing similar services, the fair value of goods or services received is recognised in profit or loss unless the goods or services qualify for recognition as assets. A corresponding increase in equity is recognised.

(p) Provisions and contingent liabilities

Provisions are recognised for liabilities of uncertain timing or amount when the Group has a legal or constructive obligation arising as a result of a past event, which will probably result in an outflow of economic benefits that can be reasonably estimated.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended 31 December 2020

4. Significant Accounting Policies *(Continued)*

(p) Provisions and contingent liabilities (Continued)

Where it is not probable that an outflow of economic benefits will be required, or the amount cannot be estimated reliably, the obligation is disclosed as a contingent liability, unless the probability of outflow of economic benefits is remote. Possible obligations, the existence of which will only be confirmed by the occurrence or non-occurrence of one or more future events, are also disclosed as contingent liabilities unless the probability of outflow of economic benefits is remote.

(q) Cash and cash equivalents

Cash and cash equivalents comprise cash on hand and deposits held at call with banks, and other short-term highly liquid investments with original maturities of three months or less that are readily convertible to a known amount of cash and are subject to an insignificant risk of changes in value.

(r) Related parties

- (i) A person or a close member of that person's family is related to the Group if that person:
 - (1) has control or joint control over the Group;
 - (2) has significant influence over the Group; or
 - (3) is a member of key management personnel of the Group or the Company's parent.
- (ii) An entity is related to the Group if any of the following conditions apply:
 - (1) The entity and the Group are members of the same group (which means that each parent, subsidiary and fellow subsidiary is related to the others).
 - (2) One entity is an associate or joint venture of the other entity (or an associate or joint venture of a member of a group of which the other entity is a member).
 - (3) Both entities are joint ventures of the same third party.
 - (4) One entity is a joint venture of a third entity and the other entity is an associate of the third entity.
 - (5) The entity is a post-employment benefit plan for the benefit of the employees of the Group or an entity related to the Group.
 - (6) The entity is controlled or jointly controlled by a person identified in (i).
 - (7) A person identified in (i)(1) has significant influence over the entity or is a member of key management personnel of the entity (or of a parent of the entity).
 - (8) The entity, or any member of a group of which it is a part, provides key management personnel services to the Group or to the Group's parent.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

4. Significant Accounting Policies *(Continued)*

(r) Related parties (Continued)

Close members of the family of a person are those family members who may be expected to influence, or be influenced by, that person in their dealings with the entity and include:

- (i) that person's children and spouse or domestic partner;
- (ii) children of that person's spouse or domestic partner; and
- (iii) dependents of that person or that person's spouse or domestic partner.

(s) Capitalisation of borrowing costs

Borrowing costs attributable directly to the acquisition, construction or production of qualifying assets which require a substantial period of time to be ready for their intended use or sale, are capitalised as part of the cost of those assets. Income earned on temporary investments of specific borrowings pending their expenditure on those assets is deducted from borrowing costs capitalised. All other borrowing costs are recognised in profit or loss in the period in which they are incurred.

(t) Government grants

Government grants are recognised when there is reasonable assurance that they will be received and that the Group will comply with the conditions attaching to them. Grants that compensate the Group for expenses incurred are recognised as revenue in profit or loss on a systematic basis in the same periods in which the expenses are incurred. Grants that compensate the Group for the cost of an asset are deducted from the carrying amount of the asset and consequently are effectively recognised in profit or loss over the useful life of the asset by way of reduced depreciation expense.

5. Critical Accounting Judgements and Key Sources of Estimation Uncertainty

In the application of the Group's accounting policies, the Directors are required to make judgements, estimates and assumptions about the carrying amounts of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended 31 December 2020

5. Critical Accounting Judgements and Key Sources of Estimation Uncertainty (Continued)

In addition to information disclosed elsewhere in these consolidated financial statements, other key sources of estimation uncertainty that have a significant risk of resulting in a material adjustment to the carrying amounts of assets and liabilities within the next financial year is as follows:

(a) *Research and development costs*

In accordance with the accounting policy set out in note 4, costs associated with research activities are expensed in profit or loss as they are incurred, while costs that are directly attributable to development activities are recognised as other intangible assets provided they meet all the requirements. This requires the management to make judgements to distinguish the research phase and development phase of the projects being undertaken. Research is original and planned investigation undertaken with the prospect of gaining new scientific or technical knowledge and understanding. Development is the application of research, findings or other knowledge to a plan or design for the production of new or substantially improved materials devices, products, processes, systems or services before the start of commercial production or use. Determining the amounts to be expensed in profit or loss or to be capitalised required management to make judgement, and assumptions regarding the expected progress and outcome of the research and development activities, the future expected cash generation of the assets, discount rates to be applied, and also the expected period of, probable future economic benefits.

(b) *Impairment of trade and other receivables*

The Group makes allowance for impairment on trade and other receivables based on assumptions about risk of default and ECL rates. The Group uses judgement in making these assumptions and selecting the inputs to the impairment calculation, based on the Group's past history, existing market conditions as well as forward-looking estimates at the end of the reporting period.

(c) *Net realisable value of inventories*

Net realisable value of inventories is the estimated selling price in the ordinary course of business, less estimated costs of completion and selling expenses. These estimates are based on the current market condition and the historical experience of manufacturing and selling products of similar nature. It could change significantly as a result of competitors' actions in response to severe industry cycles. Management reassesses the estimations at the end of each reporting period.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended 31 December 2020

5. Critical Accounting Judgements and Key Sources of Estimation Uncertainty (Continued)

(d) Impairment of non-financial assets (other than goodwill)

The Group assesses whether there are any indicators of impairment for all non-financial assets at the end of each reporting period. Other non-financial assets are tested for impairment when there are indicators that the carrying amounts may not be recoverable. An impairment exists when the carrying amount of an asset or a cash-generating unit exceeds its recoverable amount, which is the higher of its fair value less costs of disposal and its value in use. The calculation of the fair value less costs of disposal is based on available data from binding sales transactions in an arm's length transaction of similar assets or observable market prices less incremental costs for disposing of the asset. When value-in-use calculations are undertaken, management must estimate the expected future cash flows from the asset or cash-generating unit and choose a suitable discount rate in order to calculate the present value of those cash flows.

(e) Valuation of share options granted

The fair value of share options granted was calculated using Binominal option pricing model valuation model based on the Group management's significant inputs into calculation including an estimated life of share options granted based on exercise restrictions and behavioural consideration, the volatility of share price, weighted average share prices and exercise price of the share options granted.

(f) Income taxes

The Group is subject to income taxes in different jurisdictions. The Group carefully evaluates tax implications of transactions in accordance with prevailing tax regulations and makes tax provision accordingly. However, judgement is required in determining the Group's provision for income taxes as there are many transactions and calculations of which the ultimate tax determination is uncertain during the ordinary course of business. Where the final tax outcome of these matters is different from the amounts that were initially recorded, such differences will impact the income tax and deferred tax provisions in the period in which such determination is made.

(g) Fair value measurement

The fair value measurement of the Group's financial and non-financial assets and liabilities utilises market observable inputs and data as far as possible. Inputs used in determining fair value measurements are categorised into different levels based on how observable the inputs used in the valuation technique utilised are (the "fair value hierarchy"):

- Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities;
- Level 2: Inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices); and
- Level 3: Inputs for the asset or liability that are not based on observable market data (unobservable inputs).

5. Critical Accounting Judgements and Key Sources of Estimation Uncertainty (Continued)

(g) Fair value measurement (Continued)

(i) Financial instruments measured at fair value

As at the end of the reporting period, convertible loan receivables and equity investments included in the consolidated financial statements require measurement at, and disclosure of, fair value.

The fair value of financial instruments with standard terms and conditions and traded on active liquid markets are determined with reference to quoted market prices.

The valuation techniques and significant unobservable inputs used in determining the fair value measurement of level 2 and level 3 financial instruments, as well as the relationship between key unobservable inputs and fair value are set out in notes (iii) and (iv) below.

(ii) Financial instruments not measured at fair value

Financial instruments not measured at fair value include cash and cash equivalents, trade and other receivables, pledged bank deposit, trade and other payables, bank borrowings, lease liabilities and convertible loan payable.

The carrying amounts of cash and cash equivalents, trade and other receivables, trade and other payables and current portion of pledged bank deposit, bank borrowings and lease liabilities approximate to their fair values due to the short term maturities of these instruments.

The fair values of non-current portion of pledged bank deposit, bank borrowings and lease liabilities and convertible loan payable for disclosure purposes have been determined using discounted cash flow models and are classified as level 3 in the fair value hierarchy. Significant inputs include the discount rate used to reflect the credit risks of the borrowers or the Company.

(iii) Information about level 2 fair value measurement

The fair values of the financial instruments included in the level 2 category have been determined with reference to generally accepted pricing models based on quoted prices for identical or similar assets or liabilities in markets that are not active.

(iv) Information about level 3 fair value measurement

The fair values of the financial instruments included in the level 3 category as at the end of the current year have been determined by the Directors with reference to the valuation performed by International Valuation Limited, an independent firm of professionally qualified valuers, details of which are set out in notes 22 and 23.

6. Segment Reporting

The Group manages its businesses by business lines. The segment information is reported internally to the chief operating decision-maker (i.e. executive Directors) for the purposes of resource allocation and performance assessment. The Group's reportable and operating segments for financial reporting purposes are as follows:

- Ophthalmic products
- Surgical products

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended 31 December 2020

6. Segment Reporting *(Continued)*

(a) Reportable segments

The chief operating decision-maker monitors the results of its business units separately for the purpose of making decision about resources allocation and performance assessment. Segment performance is evaluated based on the results from the reportable segments as explained in the table below.

12. Five Highest Paid Individuals and Senior Management

Of the five individuals with the highest paid in the Group, four (2019: three) were Directors whose emoluments are included in note 11 above. The emoluments of the remaining one individual (2019: two individuals) were as follows:

	2020 HK\$	2019 HK\$
Salaries and other benefits	2,264,380	4,205,779
Pension fund contributions	98,603	18,000
Equity-settled share-based payments	483,410	617,720
	2,846,393	4,841,499

Their emoluments were within the following bands:

	2020 Number of employees	2019 Number of employees
HK\$2,000,001 to HK\$2,500,000	–	2
HK\$2,500,001 to HK\$3,000,000	1	–

For the years ended 31 December 2020 and 2019, no emoluments were paid by the Group to the highest paid, non-director individuals as an inducement to join, or upon joining the Group, or as compensation for loss of office.

For the year ended 31 December 2020, the emoluments were paid to two (2019: three) members of the senior management (other than the Directors) which fell within the band of HK\$1,000,001 to HK\$1,500,000 and HK\$2,500,001 to HK\$3,000,000 (2019: HK\$500,001 to HK\$1,000,000, HK\$1,000,001 to HK\$1,500,000 and HK\$2,000,001 to HK\$2,500,000), respectively.

13. Retirement Benefits

The employees of the Group are members of a state-managed retirement benefits scheme operated by the PRC government, or in the case of the employees in Hong Kong, a defined contribution Mandatory Provident Fund retirement benefits scheme under the Mandatory Provident Fund Schemes Ordinance. The Group is required to contribute a certain percentage of its payroll to the retirement benefits schemes to fund the benefits. The only obligation of the Group with respect to the retirement benefits schemes is to make the required contributions under the schemes.

The Group's contribution to retirement benefits schemes for the year ended 31 December 2020 amounted to HK\$2,556,864 (2019: HK\$7,967,470).

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended 31 December 2020

14. Income Tax

Income tax in the consolidated statement of profit or loss and other comprehensive income represents:

	2020 HK\$	2019 HK\$
Current tax – the PRC		
– Provision for the year	18,753,031	43,055,265
Deferred tax (Note 32)	13,176,351	6,207,317
	31,929,382	49,262,582

No provision for Hong Kong profits tax has been made as the Group has no assessable profit arising in Hong Kong.

The Group's major operating subsidiary in Zhuhai, the PRC, was established and carries on business in the Special Economic Zones of the PRC as a high technology enterprise. This subsidiary has obtained a 高新技術企業證書 (High Technology Enterprise Certificate) and is entitled to enjoy the enterprise income tax at the concessionary rate of 15% for the years ended 31 December 2020 and 2019.

Enterprise income tax rate of 25%, 17% and 27.3% is applied to the Group's other operating subsidiaries in the PRC, Singapore and the United States respectively.

Income tax for the year can be reconciled to the profit before income tax per the consolidated statement of profit or loss and other comprehensive income as follows:

	2020 HK\$	2019 HK\$
Profit before income tax	250,854,937	351,765,002

Impairment testing on goodwill

The recoverable amount of the goodwill is determined based on each cash-generating unit ("CGU") of the Group to which the goodwill belongs on the value-in-use basis. The following table sets out the details of goodwill and the key assumptions made for the purpose of analysis:

CGU	2020			2019		
	Goodwill HK\$	Gross margin ratio	Pre-tax discount rate	Goodwill HK\$	Gross margin ratio	Pre-tax discount rate
Sales of biologic drugs and other pharmaceutical products	2,401,823	81%	14.5%	2,244,018	81%	15.3%
Sales of dental pharmaceuticals and devices	14,864,728	78%	15.2%	14,062,366	84%	15.6%
Operation of clinical management system	5,618,375	84%	33.8%	5,542,611	100%	22.1%
Sales of therapeutic products and medical devices in healthcare industry	1,267,811	19%	28.5%	N/A	N/A	N/A

Management determined the gross margin mainly based on past performance of the CGU and management's expectations for the market development. The discount rate is determined based on the risk-free interest rate adjusted by the specific risk associated with the CGU. The recoverable amounts of respective CGUs have been determined from value-in-use calculations based on cash flow projections from formally approved budgets covering a five-year period. Cash flows beyond the five-year period are extrapolated using an estimated weighted average growth rate of 3% (2019: 3%), which does not exceed the long-term growth rate for respective industries.

The recoverable amount of the goodwill determined in the above manner suggested that there was no impairment in the carrying amount of goodwill as at 31 December 2020 and 2019.

The Directors believe that any reasonable possible change in the key assumptions on which the recoverable amount is based would not cause the aggregate carrying amount to exceed the aggregate recoverable amount of respective CGUs.

Note:

During the year ended 31 December 2020, the capitalised costs of two development items were impaired by the Group. The impairment was determined as it became apparent that there were uncertainties to overcome technical or clinical challenges underlying the development of the two products. Accordingly, an aggregate loss of HK\$11,814,929 on the development expenditure was recognised in profit or loss.

[#] In 2018, the Group entered into a co-development agreement (and as supplemented and revised from time to time) with an independent third party, Mitotech S.A. under which the Group has agreed to fund for a clinical development in the United States Food and Drug Administration phase 3 clinical trial of an ophthalmic solution containing SkQ1 as its sole active pharmaceutical ingredient (the "SkQ1 Product") which shall be provided as a pharmaceutical product in the field of dry eye disease, in return for a share of certain income received by Mitotech S.A. in respect of the SkQ1 Product. During the year ended 31 December 2020, the project development cost of the SkQ1 Product amounting to HK\$107,877,479 (2019: HK\$129,940,422) was incurred.

In 2020, the Group entered into a co-development and exclusive license agreement with an independent third party, Shanghai Henlius Biotech, Inc. ("Henlius") under which the Group has agreed to fund 80% of the development costs of a pharmaceutical product that contains an anti-vascular endothelial growth factor (anti-VEGF) as a drug substance (the "Licensed Product"), which is intended for the treatment of exudative (wet) age-related macular degeneration. In return, the Group has obtained an exclusive license for the regulatory development, manufacture and commercialisation of the Licensed Product worldwide, subject to commercial sales milestone payment and royalties levied on net sales of the Licensed Product payable to Henlius. During the year ended 31 December 2020, the project development cost of the Licensed Product amounting to HK\$69,761,524 (2019: Nil) was incurred.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended 31 December 2020

22. Convertible Loan Receivables

In 2015, the Group entered into a convertible loan agreement with an independent third party, a private company registered in the PRC ("Investee A"), with principal amount of RMB10,000,000 (approximately HK\$11,937,448) which carries interest at 5% per annum payable quarterly in arrears with maturity on 13 December 2019 at redemption amount of 100% of the principal amount ("Convertible Loan A"). The principal amount of Convertible Loan A can be converted into such equity interest representing 30% of the entire equity interest of Investee A at any time from the date of issue to the maturity date. The principal activities of Investee A are manufacturing and selling of dental treatment techniques in the PRC. Convertible Loan A is secured by 100% equity interest in Investee A.

In 2019, Convertible Loan A was eliminated at consolidation level upon the acquisition of 100% equity interest in Investee A (Note 36).

In 2018, the Group entered into a convertible loan agreement with an independent third party, a private company incorporated in Singapore ("Investee B"), with principal amount of SG\$2,000,000 (approximately HK\$11,800,000) which carries interest at 2.5% per annum payable quarterly in arrears with maturity on 1 June 2023 ("Convertible Loan B"). The first tranche of Convertible Loan B in the principal amount of SG\$1,000,000 (equivalent to HK\$5,884,110) ("Tranche A of Convertible Loan B") was disbursed to Investee B in 2018. The entire principal amount of Convertible Loan B can be converted into such number of shares representing 40% of the enlarged total issued share capital of Investee B at any time before the maturity date. In the event that no conversion has been taken place before the maturity date, Investee B shall repay the Group the outstanding principal amount plus an amount calculated by the Group which would yield a return for the Group on the principal amount of Convertible Loan B of 6% per annum. Tranche A of Convertible Loan B is classified as financial asset at FVTPL upon the initial recognition.

In 2019, Tranche A of Convertible Loan B was eliminated at consolidation level upon the acquisition of 100% equity interest in Investee B (Note 36).

In 2018, the Group entered into an agreement with an independent third party, DB Therapeutics, Inc ("DBT"), to subscribe for a convertible loan with principal amount of US\$4,500,000 (approximately HK\$35,278,200) which carries interest at 5% per annum with maturity on 31 July 2022 ("Convertible Loan C"). Convertible Loan C will be disbursed to DBT in five tranches and the first tranche in the principal amount of US\$600,000 (equivalent to HK\$4,696,774) ("Tranche A of Convertible Loan C") was disbursed to DBT in 2018. The entire principal amount of Convertible Loan C can be converted into such number of shares representing 45% of the enlarged and fully diluted share capital of DBT at any time before the maturity date. In the event that no conversion has been taken place before maturity date, DBT shall repay the Group the outstanding principal amount plus an amount calculated by the Group which would yield a return for the Group on the principal amount of Convertible Loan C of 8% per annum. Tranche A of Convertible Loan C is classified as financial asset at FVTPL upon the initial recognition.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

22. Convertible Loan Receivables *(Continued)*

In 2019, the Group entered into a convertible loan agreement with an independent third party, Antikor Biopharma Limited (“Antikor”), with principal amount of US\$350,000 (equivalent to HK\$2,746,029) for a term of 6 months. This convertible loan carries interest at 5% per annum on the principal amount of this convertible loan outstanding on the conversion date, or 8% per annum if no conversion has been taken place before the maturity date. The principal amount of this convertible loan can be converted into such number of shares representing 6.54% of the enlarged and fully diluted share capital of Antikor at any time before the maturity date. The Group also acquired certain convertible loan notes (the “Sale Loan Notes”) issued by Antikor at an aggregate amount of GBP307,905 (equivalent to HK\$2,929,977). This convertible loan and the Sale Loan Notes are classified as financial assets at FVTPL upon the initial recognition. In 2019, the Group converted the principal amount of this convertible loan and the Sale Loan Notes.

During the year ended 31 December 2020, the Group further made available certain convertible loans to Antikor in the aggregate principal amount of US\$1,350,000 (equivalent to HK\$10,471,977) which carry interest at 5% per annum with maturity on 30 September 2021 (“Convertible Loan D”). The aggregate principal amount of Convertible Loan D can be converted into such number of shares representing 16.03% of the enlarged and fully diluted share capital of Antikor at any time before the maturity date. Convertible Loan D is classified as financial asset at FVTPL upon the initial recognition.

In 2019, the Group entered into a convertible loan agreement with an independent third party, another private company incorporated in Singapore (“Investee C”), with principal amount of US\$2,000,000 (equivalent to HK\$15,585,200) (“Convertible Loan E”) which would yield a return of 25% per annum for the Group on the principal amount of Convertible Loan E if no conversion has been taken place before the then maturity date (i.e. 5 January 2021). The principal amount of Convertible Loan E can be converted into such number of shares representing less than 19% of the enlarged and fully diluted share capital of Investee C at any time before the then maturity date. Convertible Loan E is classified as financial asset at FVTPL upon the initial recognition. On 4 January 2021, the Group entered into an amendment deed with Investee C to (i) extend the maturity date of Convertible Loan E to 5 November 2022; and (ii) increase the Group’s shareholding in Investee C upon conversion of Convertible Loan E to 60% on a fully-diluted basis.

In 2019, the Group entered into a convertible loan agreement with an independent third party, 成都上工醫信科技有限公司 (Chengdu Shangong Medical Technology Co., Ltd.*) (“Shangong”), with principal amount of RMB15,000,000 (equivalent to HK\$17,045,455) which carries interest at 10% per annum with the then maturity on 1 January 2021 (“Convertible Loan F”). The principal amount of Convertible Loan F can be converted into such equity interest representing approximately 8.11% of the entire equity interest of Shangong at any time before the then maturity date. Convertible Loan F is classified as financial asset at FVTPL upon the initial recognition. On 23 December 2020, the Group entered into a supplementary agreement with Shangong to extend the maturity date to 1 January 2022.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended 31 December 2020

22. Convertible Loan Receivables *(Continued)*

As at 31 December 2020, the fair values of convertible loan receivables are calculated using Binomial Share Option Model with the following key assumptions:

	Convertible Loan C	Convertible Loan D	Convertible Loan E	Convertible Loan F
Stock price	Nil	US\$0.2	Nil	RMB29.6
Dividend yield	Nil	Nil	Nil	Nil
Expected volatility	154%	73%	32%	73%

The key significant unobservable inputs to determine the fair value of convertible loan receivables are the stock price and expected volatility. A higher in the stock price and expected volatility would result in an increase in the fair value of convertible loan receivables, and vice versa.

During the respective loan periods and where applicable following the conversion of the convertible loan receivables, the Group was entitled to appoint 1 director of DBT and Investee C in accordance with the agreements of the convertible loan receivables. Accordingly, given the potential voting right and the right to appoint directors, the Group has regarded DBT and Investee C as associates of the Group. As at 31 December 2020 and up to the date of approval of these financial statements, as the Group has not converted the convertible loan receivables into equity interests of DBT and Investee C, the Group is not entitled to share any profit or loss of DBT and Investee C and accordingly, the Group has no interest in associates. The Directors are of the opinion that no further disclosure is considered meaningful in this regard.

For the year ended 31 December 2020

23. Financial Assets at Fair Value Through Other Comprehensive Income and Financial Assets at Fair Value Through Profit or Loss *(Continued)*

The movements in fair value of equity interest in Shanggong classified as level 3 in the fair value hierarchy are as follows:

	HK\$
At 1 January 2019	20,853,734
Change in fair value recognised in other comprehensive income	5,357,800
Exchange differences	(341,936)
At 31 December 2019	25,869,598
Change in fair value recognised in other comprehensive income	9,893,423
Exchange differences	2,035,701
At 31 December 2020	37,798,722

As at 31 December 2020, the fair value of equity interest in Shanggong is calculated using Value Allocation Model with the following key assumptions:

Expected volatility	67%
Risk-free interest rate	2.74%

A higher in the expected volatility would result in an increase in the fair value of equity interest in Shanggong, and vice versa. A higher in the risk-free interest rate would result in a decrease in the fair value of equity interest in Shanggong, and vice versa.

24. Inventories

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended 31 December 2020

31. Convertible Loan Payable

On 6 July 2016 (“Issue Date”), the Group entered into a convertible loan agreement with International Finance Corporation (“IFC”), pursuant to which IFC agreed to lend, and the Group agreed to borrow, a convertible loan in an aggregate principal amount of HK\$150,000,000 at an interest rate of 1.9% per annum (the “Convertible Loan Payable”). Subject to the terms of the convertible loan agreement, IFC has the right to convert all or any part of the outstanding principal amount of the Convertible Loan Payable into shares of the Company at a conversion price of HK\$5.90 per share (subject to anti-dilutive adjustments as set out in the convertible loan agreement) at any time after the date of disbursement and prior to the then maturity date. The then maturity date is the date falling on the fifth anniversary of the date of the disbursement. On 10 July 2020, the Group and IFC entered into an amendment agreement to the convertible loan agreement to extend the maturity date for a period of 3 years to a date falling on the eighth anniversary of the date of the disbursement (i.e. 2 August 2024). On 6 October 2020, the amendment agreement has become effective. The Company accounted for the extension as a derecognition of the existing financial liability and the recognition of a new financial liability with a gain recognised on extinguishment, being the difference between the fair value of consideration given to extinguish the financial liability and its previous carrying amount.

The Company shall repay the outstanding principal amount of the Convertible Loan Payable on the maturity date, together with a make whole premium (if any). Make whole premium is an amount calculated by IFC which would yield a return for IFC on the principal amount of the Convertible Loan Payable of (i) 6% per annum; or (ii) 8% per annum if there exists a change of control which occurs when, among others, (a) there is a decrease in the shareholdings of the Company’s certain shareholders as a group under specified conditions as stipulated in the convertible loan agreement; (b) certain shareholders of the Company as a group cease to be the single largest direct and indirect shareholder of the Company; or (c) any person (other than certain shareholders as a group) by itself or through its affiliates have obtained the power to appoint a majority of the board of directors of the Company.

Pursuant to the convertible loan agreement, unless otherwise agreed in writing by the IFC, the Company shall, within 10 days following the occurrence of a change of control defined in the convertible loan agreement, prepay the outstanding principal amount of the Convertible Loan Payable, together with accrued interest, the make whole premium (if any), increased costs (if any) thereon and all other amounts payable under the convertible loan agreement, including the amount of unwinding costs payable if the prepayment is not made on an interest payment date.

The fair value of the debt component and the equity conversion component were determined at the issuance/extinguishment of the Convertible Loan Payable where appropriate. The fair value of the debt component was calculated using a market interest rate for an equivalent non-convertible bond. The residual amount, representing the value of the equity conversion component, was included in equity. The make whole premium, being an embedded derivative, was measured at fair value separately. At Issue Date and at 31 December 2020, the fair value of the make whole premium was determined by the Directors to be minimal.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended 31 December 2020

32. Deferred Tax Liabilities *(Continued)*

The Group has tax losses arising in Hong Kong of approximately HK\$167 million (2019: approximately HK\$152 million) that are available indefinitely for offsetting against future taxable profits of the companies in which the losses arose. Deferred tax assets have not been recognised in respect of these losses as it is not considered probable that taxable profits will be available against which the tax losses can be utilised.

Withholding tax on undistributed earnings is calculated at 5% on the distributable earnings of the subsidiaries in the PRC expected to be distributed to the holding company with its principal place of business located in Hong Kong. At the end of the reporting period, undistributed earnings of the subsidiaries in the PRC on which deferred tax has not been provided for amounted to approximately HK\$668 million (equivalent to approximately RMB563 million) (2019: approximately HK\$727 million (equivalent to approximately RMB647 million)) as the Group is able to control the timing of the reversal of the temporary differences and it is probable that the temporary difference will not reverse in the foreseeable future.

The nature and purpose of each reserve of the Group are set out below:

(i) Capital reserve

The capital reserve represents discount on acquisition of a subsidiary in prior years.

(ii) Statutory surplus reserve

In accordance with the PRC Companies Law, the Company's PRC subsidiaries are required to transfer 10% of their profit after tax, as determined in accordance with accounting standards and regulations of the PRC, to statutory surplus reserve. Such reserve may be used to reduce any loss incurred by the subsidiary or be capitalised as paid-up capital of the subsidiary. The statutory surplus reserve is non-distributable.

(iii) Foreign currency translation reserve

The foreign currency translation reserve comprises all foreign exchange differences arising from the translation of the consolidated financial statements of foreign operations. The reserve is dealt with in accordance with the accounting policies set out in note 4(l).

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

35. Share-Based Payments

(a) *Equity-settled share option scheme*

The Share Option Scheme (the "Scheme") was approved on 3 May 2013. The purpose of the Scheme is to provide incentives and rewards to eligible participants who contribute to the success of the Group's operations. Eligible participants of the Scheme include (i) any director, officer, employee or officer employed by any company within the Group or by any member of the Group or a company in which the Group holds an interest or a subsidiary of such company ("Affiliate") (whether full time or part time) ("Employee"), consultant, professional, customer, supplier (whether of goods or services), agent, partner or adviser of or contractor to an Affiliate; or (ii) the trustee of any trust the beneficiary of which or any discretionary trust the discretionary objects of which include any director, officer, Employee, consultant, professional, customer, supplier (whether of goods or services), agent, partner or adviser of or contractor to any member of the Group or an Affiliate; or (iii) a company beneficially owned by any director, officer, Employee, consultant, professional, customer, supplier (whether of goods or services), agent, partner or adviser of or contractor to any member of the Group or an Affiliate ("Eligible Participants").

The maximum number of shares which may be issued upon the exercise of all outstanding share options granted and yet to be exercised under the Scheme and any other schemes involving the issue or grant of options or similar rights over shares or other securities by the Company must not, in aggregate, exceed 30% of the shares in issue from time to time. A nominal consideration of HK\$1 is payable by the grantee upon acceptance of an option.

The subscription price of shares under the Scheme may be determined by the board of directors at its absolute discretion but in any event will not be less than the highest of (i) the nominal value of the shares; (ii) the closing price of the shares as stated in the Stock Exchange's daily quotation sheet on the date of grant, which must be a business day; and (iii) the average of the closing price of the shares as stated in the Stock Exchange's daily quotation sheets for the five business days immediately preceding the date of grant of the relevant share option.

Any grant of share options to any director, chief executive or substantial shareholder or any of their respective associates must be approved by the independent non-executive directors of the Company (but excluding, for all purposes, any independent non-executive director of the Company who is a proposed grantee). Where any grant of share options to a substantial shareholder or an independent non-executive director of the Company or their respective associates would result in the total number of the shares issued and to be issued upon exercise of the share options granted and to be granted (including options exercised, cancelled and outstanding) to such person in any 12-month period up to and including the date of the grant:

- (i) representing in aggregate over 0.1% of the shares in issue; and
- (ii) having an aggregate value, based on the closing price of the shares at the date of each grant, in excess of HK\$5 million,

such further grant of share options must be approved by the shareholders of the Company. The Company must send a circular to its shareholders. All connected persons must abstain from voting in favour at such general meeting. Any vote taken at the meeting to approve the grant of such share options must be taken on a poll in accordance with the Listing Rules.

40. Financial Risk Management

The main risks arising from the Group's financial instruments in the normal course of the Group's business are credit risk, liquidity risk, interest rate risk and currency risk.

These risks are limited by the Group's financial management policies and practices described below.

(a) Credit risk

The Group's credit risk is primarily attributable to its trade and other receivables, convertible loan receivables and bank balances. Management has a credit policy in place and the exposures to these credit risks are monitored on an ongoing basis.

In respect of trade and other receivables, individual credit evaluations are performed on all customers requiring credit over a certain amount. These evaluations focus on the customers' past history of making payments including ECL rates when due and current ability to pay, and take into account information specific to the customers as well as pertaining to the economic environment in which the customers operate. Ongoing credit evaluation is performed on the financial condition of trade receivables. Normally, the Group does not obtain collateral from customers.

The Group's exposure to credit risk is influenced mainly by the individual characteristics of each customer. The default risk of the industry in which customers operate also has an influence on ECL risk. At the end of reporting period, the Group has a certain concentration of credit risk as 21% (2019: 25%) and 51% (2019: 48%) of the total trade receivables was due from the Group's largest customer and the five largest customers respectively.

The Group measures loss allowances for trade receivables at an amount equal to lifetime ECLs, which is calculated using a provision matrix. As the Group's historical credit loss experience does not indicate significantly different loss patterns for different customer segments, the loss allowance based on past due status is not further distinguished between the Group's different customer bases.

ECLs rates are based on actual loss experience. These rates are adjusted to reflect differences between economic conditions during the year over which the historic data has been collected, current conditions and the Group's view of economic conditions over the expected lives of the receivables. No impairment for trade and other receivables is provided as the amount of additional impairment measured under the ECLs model is immaterial.

Further quantitative disclosures in respect of the Group's exposure to credit risk arising from trade and other receivables are set out in note 25.

The credit risk on bank balances is limited because the counterparties are banks with high credit-rating or with good reputation.

40. Financial Risk Management *(Continued)*

(b) Liquidity risk

The Group's policy is to regularly monitor its liquidity requirements and its compliance with lending covenants, to ensure that it maintains sufficient reserves of cash and adequate committed lines of funding from major financial institutions to meet its liquidity requirements in the short and longer term.

The following tables show the remaining contractual maturities at the end of the reporting period of the Group's financial liabilities, based on undiscounted cash flows (including interest payments computed using contractual rates or, if floating based on rates current at the reporting date) and the earliest date the Group can be required to pay.

Specifically, for bank loans which contain a repayment on demand clause which can be exercised at the bank's sole discretion, the analysis shows the cash outflow based on the earliest period in which the entity can be required to pay, that is if the lenders were to invoke their unconditional rights to call the loans with immediate effect.

At 31 December 2019				
Bank borrowings	220,000,000	27,286,477	220,692,604	247,979,081

(c) Interest rate risk

Interest rate risk relates to the risk that the fair value or cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Group's interest rate risk arises primarily from pledged bank deposit and bank borrowings. Borrowings bearing variable and fixed rates expose the Group to cash flow interest rate risk and fair value interest rate risk respectively.

The Group's exposure to the risk of changes in market interest rates relates primarily to the Group's debt obligations with a floating interest rate. The Group has not implemented any procedures to hedge its interest rate risk.

At 31 December 2020, it is estimated that a general increase/decrease of 50 basis points in interest rates, with all other variables held constant, would decrease/increase the Group's profit after income tax and retained earnings by approximately HK\$1,732,000.

At 31 December 2019, it is estimated that a general increase/decrease of 50 basis points in interest rates, with all other variables held constant, would decrease/increase the Group's profit after income tax and retained earnings by approximately HK\$919,000.

The sensitivity analysis above has been determined assuming that the change in interest rates had occurred at the end of each of the relevant periods and had been applied to the exposure to interest rate risk for the borrowings in existence at that date. The 50 basis point increase or decrease represents management's assessment of a reasonably possible change in interest rates over the period until the next annual reporting date. The analysis was performed on the same basis for 2019.

(d) Currency risk

The Group's main operations are currently in the PRC with most of the transactions settled in RMB and did not have significant exposure to risk resulting from changes in foreign currency exchange rates.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended 31 December 2020

41. Capital Risk Management

The Group's objective of managing capital is to safeguard the Group's ability to continue as a going concern in order to provide returns for shareholders and benefits for other stakeholders and to maintain an optimal capital structure to reduce cost of capital.

In order to maintain or adjust the capital structure, the Group may adjust the amount of dividends paid to shareholders, return capital to shareholders, issue new shares or sell assets to reduce debts.

The capital structure of the Group consists of debts, which includes the bank borrowings and convertible loan payable, cash and cash equivalents, pledged bank deposit and total equity. The Group's management regularly reviews the capital structure. As part of this review, the management considers the cost of capital and the risks associated with each class of capital.

The gearing ratio of the Group at the end of reporting period was as follows:

	2020 HK\$	2019 HK\$
Bank borrowings	414,824,021	220,000,000
Convertible loan payable	140,529,056	140,158,931
Less: Cash and cash equivalents	(599,781,645)	(473,341,165)
Less: Pledged bank deposit	(40,150,000)	(44,000,000)
Net cash and pledged bank deposit	(84,578,568)	(157,182,234)
Total equity	1,426,190,834	1,197,145,035
Net debt to equity ratio	N/A	N/A

The Group monitors capital using a gearing ratio, which is net debts divided by total equity. Net debts are calculated as the sum of borrowings less the sum of cash and cash equivalents and pledged bank deposit as shown in the consolidated statement of financial position. The Group aims to maintain the gearing ratio at a reasonable level and the Directors are of the opinion that the Group's gearing ratio was maintained at reasonable level at the reporting dates.

CORPORATE GOVERNANCE REPORT

CORPORATE GOVERNANCE PRACTICES

Essex Bio-Technology Limited (the “Company”, together with its subsidiaries, the “Group”) is committed to achieving good corporate governance practices by emphasising its accountability, transparency, independence, responsibility and fairness. The Company is dedicated to exercise corporate governance through regular reviews of its adopted practices with reference to the Corporate Governance Code as set out in Appendix 14 to the Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited (the “Listing Rules”).

The Company has complied with the code provisions of the Corporate Governance Code as set out in Appendix 14 to the Listing Rules throughout the financial year ended 31 December 2020.

DIRECTORS’ SECURITIES TRANSACTIONS

The Company has adopted procedures governing directors’ securities transactions in compliance with the Model Code for Securities Transactions by Directors of Listed Issuers as set out in Appendix 10 to the Listing Rules (the “Model Code”). Having made specific enquiry of all directors of the Company (the “Directors”), all the Directors have confirmed that they have fully complied with the required standards and provisions as set out in the Model Code throughout the financial year ended 31 December 2020.

BOARD OF DIRECTORS

The board of Directors (the “Board”), which currently comprises seven Directors, is responsible for corporate strategy, annual and interim results, succession planning, risk management, major acquisitions, disposals and capital transactions, and other significant operational and financial matters. Major corporate matters that are specifically delegated by the Board to the management include the preparation of annual and interim accounts for Board approval before public reporting, execution of business strategies and initiatives adopted by the Board, implementation of adequate systems of internal controls and risk management procedures, and compliance with relevant statutory requirements and rules and regulations.

Details of backgrounds and qualifications of the chairman of the Board and the other Directors are set out in the section headed “Profiles of Directors and Senior Management” of this report. All the Directors have given sufficient time and attention to the affairs of the Group. Each executive Director has sufficient experience to hold the position so as to carry out his/her duties effectively and efficiently.

To improve the transparency and independency of the corporate governance of the Company, the chairman and the managing Director (who is responsible for the day-to-day management of the Company’s business) of the Company are segregated and are not exercised by the same individual since August 2005. Ngiam Mia Je Patrick is the chairman of the Board and an executive Director, and Fang Haizhou is the managing Director and an executive Director.

The Company appointed three independent non-executive Directors who have appropriate and sufficient experience and qualification to carry out their duties so as to protect the interests of the shareholders of the Company. Fung Chi Ying, Mauffrey Benoit Jean Marie and Yeow Mee Mooi are the independent non-executive Directors. Each of their term of appointment is two years commencing from 30 September 2020, determinable by either party serving not less than one month’s written notice on the other.

CORPORATE GOVERNANCE REPORT

All the Directors are subject to retirement by rotation and re-election at the annual general meeting in accordance with the Company's articles of association. Any Director appointed by the Board to fill a casual vacancy shall hold office until the first general meeting of the Company after his/her appointment and be subject to re-election at such meeting and any Director appointed by the Board as an addition to the existing Board shall hold office only until the next following annual general meeting of the Company and shall then be eligible for re-election.

The Company has arranged for appropriate insurance cover in respect of legal actions against the Directors.

The Board held a full board meeting for each quarter.

The Board is responsible for the leadership and control of the Company and overseeing the Group's businesses, strategic decisions and performances. The Board is delegated with the authority and responsibility for the management of the Group. In addition, the Board has also established various Board committees, including the audit committee (the "Audit Committee"), the remuneration committee (the "Remuneration Committee"), the nomination committee (the "Nomination Committee") and the corporate governance committee (the "Corporate Governance Committee") and has delegated various responsibilities to them.

The Company has adopted the practice of holding regular Board meetings at least four times a year. Apart from regular board meetings, the Board will meet on other occasions when a board level decision on a particular matter is required. Each of the members of the Board has full access to relevant information at the meetings.

The executive Directors and senior management of the Company, as delegated by the Board, are responsible for implementing the determined strategies and policies and the day-to-day management of the Group's business.

The Company has received from each of the independent non-executive Directors a written confirmation of independence pursuant to Rule 3.13 of the Listing Rules. The Company thus considers all the independent non-executive Directors to be independent.

Four Board meetings and one annual general meeting were held during the year ended 31 December 2020. The attendance record for the Board meetings and general meeting is as follows:

REMUNERATION COMMITTEE

The Remuneration Committee was established in August 2005. The chairperson of the committee is Yeow Mee Mooi, an independent non-executive Director, and other members include Ngiam Mia Je Patrick, the chairman of the Board and an executive Director, Fung Chi Ying and Mauffrey Benoit Jean Marie, both being independent non-executive Directors. The majority of the members of the Remuneration Committee are independent non-executive Directors.

The existing terms of reference of the Remuneration Committee have been adopted on 1 April 2012 in compliance with the amendments to the Listing Rules which became effective on 1 April 2012. Such terms of reference are available on the websites of The Stock Exchange of Hong Kong Limited (the "Stock Exchange") and the Company.

The role and function of the Remuneration Committee include the determination of the specific remuneration packages of all executive Directors and the senior management, including benefits in kind, pension rights and compensation payments, including any compensation payable for loss or termination of their office or appointment, and the making of recommendations to the Board on the remuneration of non-executive Directors. The Remuneration Committee should consider factors such as salaries paid by comparable companies, time commitment and responsibilities of the Directors, employment conditions elsewhere in the Group and desirability of performance-based remuneration.

The Company has adopted the model whereby the Remuneration Committee makes recommendations to the Board on the remuneration packages of individual executive Directors and senior management, which should include benefits in kind, pension rights and compensation payments, and any compensation payable for loss or termination of their office(s) or appointment(s), and to make recommendations to the Board on the remuneration of non-executive Directors.

CORPORATE GOVERNANCE REPORT

During the year under review, three meetings of the Remuneration Committee were held. Details of the attendance of the Remuneration Committee meetings are as follows:

Members	Attendance
Yeow Mee Mooi (<i>Chairperson</i>)	3/3
Ngiam Mia Je Patrick	3/3
Fung Chi Ying	3/3
Mauffrey Benoit Jean Marie	3/3

The Remuneration Committee has considered and reviewed the terms of employment contracts of the executive Directors and appointment letters of the independent non-executive Directors and has assessed the performance of the Directors. The Remuneration Committee considers that the terms of employment contracts of the executive Directors and appointment letters of the independent non-executive Directors are fair and reasonable.

NOMINATION COMMITTEE

The Nomination Committee was established in August 2005. The chairperson of the committee is Yeow Mee Mooi, an independent non-executive Director, and other members include Ngiam Mia Je Patrick, the chairman of the Board and an executive Director, Fung Chi Ying and Mauffrey Benoit Jean Marie, both being independent non-executive Directors.

The existing terms of reference of the Nomination Committee have been adopted on 1 April 2012 in compliance with the amendments to the Listing Rules which became effective on 1 April 2012. Such terms of reference are available on the websites of the Stock Exchange and the Company.

The role and function of the Nomination Committee include recommending the appointment and removal of Directors. The Nomination Committee considers the past performance, qualification, general market conditions and the Company's articles of association in selecting and recommending candidates for directorship during the year under review. The Nomination Committee also reviews the structure, size and composition of the Board and assesses the independence of the independent non-executive Directors.

In addition, the Board adopted a board diversity policy on 7 March 2014 (the "Diversity Policy"). Under the Diversity Policy, the Company recognises the benefits of board diversity and supports the principle that diversity can strengthen the performance of the Board, promote effective decision-making and better corporate governance and monitoring.

The Company believes that a diverse board will include and make good use of the difference in skills, experience and background, technical and industry experience, ethnicity, gender, age, nationality, knowledge and length of service and other qualities of the members of the Board. These factors will be considered in determining the optimum composition of the Board and all Board appointments will be based on merit, having due regard to the overall effective function of the Board as a whole.

The Nomination Committee reviews and assesses the composition of the Board and, where appropriate, makes recommendation to the Board on the appointment of new Directors. The Nomination Committee also reviews the structure, size and diversity of the Board annually and make recommendations on any proposed changes to the Board to complement the Company's corporate strategy.

CORPORATE GOVERNANCE REPORT

The Board considers the current Board composition has provided the Company with a good balance and diversity of skills and experience appropriate to the requirements of its business. The Board will continue to review its composition from time to time taking into consideration specific needs for the Group's business.

During the year under review, three meetings of the Nomination Committee were held. Details of the attendance of the Nomination Committee meetings are as follows:

Members	Attendance
Yeow Mee Mooi (<i>Chairperson</i>)	3/3
Ngiam Mia Je Patrick	3/3
Fung Chi Ying	3/3
Mauffrey Benoit Jean Marie	3/3

During the year under review, the Nomination Committee nominated and recommended for the appointments of Ngiam Hian Leng Malcolm and Yau Lai Man as executive Directors, and also considered and resolved that all the existing Directors shall be recommended to be retained by the Company. Further, in compliance with the Company's articles of association, Fang Haizhou, Ngiam Mia Je Patrick and Fung Chi Ying will retire by rotation, and being eligible, offer themselves for re-election at the forthcoming annual general meeting of the Company. Pursuant to the Company's articles of association and the Corporate Governance Code as set out in Appendix 14 to the Listing Rules, Ngiam Hian Leng Malcolm and Yau Lai Man, being the newly appointed Directors, will only hold their respective office until the forthcoming annual general meeting and, being eligible, offer themselves for re-election thereat.

AUDIT COMMITTEE

The Company established the Audit Committee in June 2001. The Audit Committee comprises three members, namely Fung Chi Ying, Mauffrey Benoit Jean Marie and Yeow Mee Mooi, all being independent non-executive Directors. The chairperson of the Audit Committee is Fung Chi Ying. The existing terms of reference of the Audit Committee have been adopted on 14 January 2019 in compliance with the amendments to the Listing Rules. Such terms of reference are available on the websites of the Stock Exchange and the Company.

The main responsibilities of the Audit Committee are to review and supervise the financial statements and the auditors' reports and monitor the integrity of the financial statements of the Group. Other responsibilities include the appointment of auditor, approval of the auditor's remuneration, discussion of audit procedures and any other matters arising from the above. The Audit Committee is also responsible for overseeing the financial reporting system, internal control and risk management systems and their effectiveness.

The Audit Committee examines all matters relating to the accounting principles and policies adopted by the Group, auditing functions, internal control, risk management and financial reporting. External auditor and the Directors are invited to attend the committee meetings as and when necessary. The Audit Committee also serves as a channel of communication between the Board and the external auditor.

The Audit Committee held four meetings during the year under review. Details of the attendance of the Audit Committee meetings are as follows:

Members	Attendance
Fung Chi Ying (<i>Chairperson</i>)	4/4
Mauffrey Benoit Jean Marie	4/4
Yeow Mee Mooi	4/4

CORPORATE GOVERNANCE REPORT

The work performed by the Audit Committee during the year under review and up to the date of this report included reviewing the audited consolidated financial statements of the Group for the year ended 31 December 2020, the unaudited consolidated interim financial statements of the Group for the six months ended 30 June 2020 and the effectiveness of the internal control and risk management practices of the Group. The Audit Committee has also reviewed the audit plan and approach of the external auditor and monitored the progress and results of the audit regularly. The Group's unaudited interim results for the six months ended 30 June 2020 and the audited annual results for the year ended 31 December 2020 have been reviewed by the Audit Committee, which was of the opinion that the preparation of such results complied with the applicable accounting standards and requirements and that adequate disclosure have been duly made.

CORPORATE GOVERNANCE COMMITTEE

The Corporate Governance Committee was established on 23 March 2012. The chairperson of the committee is Yeow Mee Mooi, an independent non-executive Director, and other members include Yau Lai Man, an executive Director, Fung Chi Ying and Mauffrey Benoit Jean Marie, both being independent non-executive Directors.

The existing terms of reference of the Corporate Governance Committee have been adopted on 1 April 2012 in compliance with the amendments to the Listing Rules which became effective on 1 April 2012. The role and function of the Corporate Governance Committee include developing and reviewing the policies and practices on corporate governance of the Group and making recommendations to the Board, reviewing and monitoring the Group's policies and practices on compliance with legal and regulatory requirements, reviewing and monitoring the code of conduct and compliance manual applicable to the Directors and employees, reviewing and monitoring the training and continuous professional development of Directors and senior management, and reviewing the Company's compliance with the Corporate Governance Code and disclosures in the Company's corporate governance report.

The Corporate Governance Committee held one meeting during the year under review. Details of the attendance of the Corporate Governance Committee meeting are as follows:

Members	Attendance (Note)
Yeow Mee Mooi (<i>Chairperson</i>)	1/1
Yau Lai Man (<i>appointed with effect from 19 September 2020</i>)	0/0
Fung Chi Ying	1/1
Mauffrey Benoit Jean Marie	1/1
Zhong Sheng (<i>resigned with effect from 4 July 2020</i>)	1/1

Note: Attendances of the members of the Corporate Governance Committee during 2020 was made by reference to the total number of such meetings held during their respective tenure.

During the year under review, the work performed by the Corporate Governance Committee included reviewing and monitoring appropriate training and continuous professional development of the Directors and senior management, and reviewing the Company's compliance with the Corporate Governance Code and disclosures in the Company's corporate governance report.

EMOLUMENTS OF SENIOR MANAGEMENT

During the year under review, the range of emoluments paid to members of the senior management (other than the Directors) of the Group is set out in note 12 to the financial statements.

DIVIDEND POLICY

Provided that the Group is profitable and without affecting the normal operations of the Group, the Company may consider to declare and pay dividends to the shareholders of the Company.

In deciding whether to propose a dividend and in determining the dividend amount, the Board shall take into account various factors, which include, but are not limited to, the operating results and performance, cash flow, financial position, capital requirements and future prospects of the Group, as well as the interests of the shareholders of the Company.

Declaration and payment of dividend by the Company are also subject to the laws of the Cayman Islands, the memorandum and articles of association of the Company and any applicable laws, rules and regulations.

For the avoidance of doubt, there can be no assurance that a dividend will be proposed or declared in any specific period.

DIRECTORS' AND AUDITOR'S RESPONSIBILITIES FOR ACCOUNTS

The Directors acknowledge that they are responsible for the preparation of financial statements for each financial period which gives a true and fair view of the state of affairs of the Group. In preparing the financial statements for the year ended 31 December 2020, the Directors have selected appropriate accounting policies and applied them consistently, and have prepared the financial statements on a going concern basis.

The external auditor of the Group has also stated its reporting responsibility in the auditor's report on the consolidated financial statements for the year.

RISK MANAGEMENT AND INTERNAL CONTROL

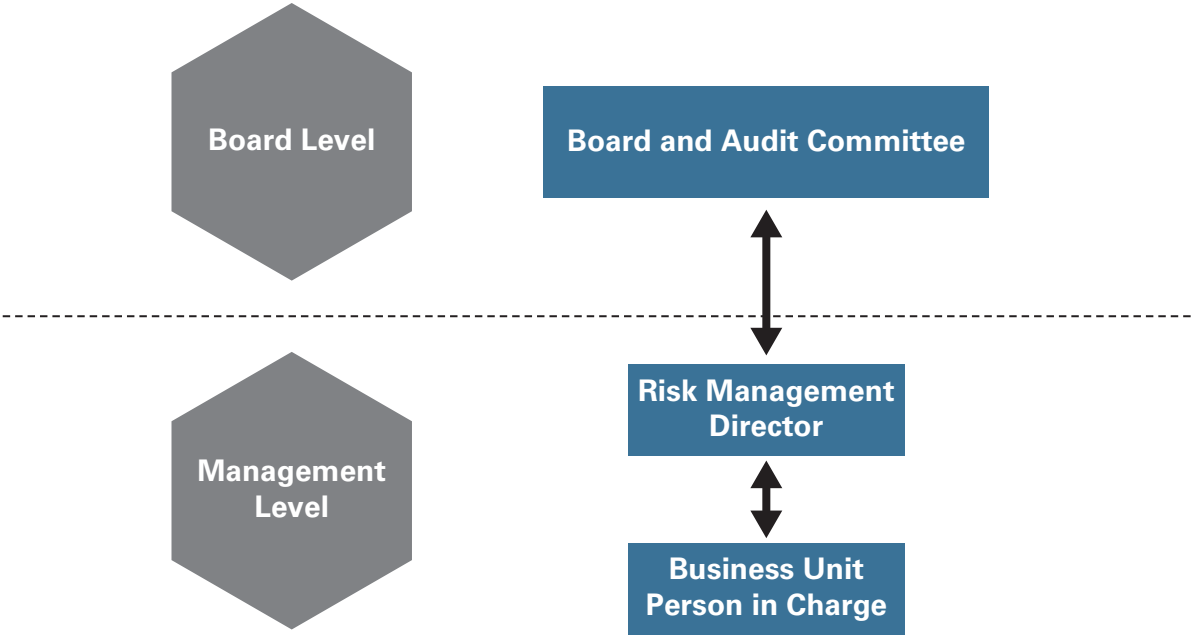

The Board acknowledges that a sound system of internal control and risk management practices are essential in ensuring good corporate governance and pursuing the achievement of the strategic goals of the Group. The Board also acknowledges that it is the Board's responsibility to ensure that the Group maintains sound and effective internal controls to safeguard the assets of the Group at all times. The Board reviews and monitors the effectiveness of the internal control and risk management systems on a yearly basis to ensure that the systems in place are adequate, and it has conducted a review of the risk management and internal control systems during the year under review.

The risk management and internal control systems of the Group are designed to manage rather than eliminate the risk of failure to achieve business objectives, and can only provide reasonable and not absolute assurance against material misstatement or loss.

Risk Management and Internal Control Framework

Risk management

In order to continuously improve the risk management and internal control systems, as well as to enhance the level of management and risk prevention capabilities, the Company has developed a risk management manual (the "Risk Management Manual"), established risk management strategy and structure, as well as defined the measures for risk assessment and risk management reporting procedures since 2016. The organisational structure for risk management is set out as follows:

The Board and Audit Committee oversee the structure and performance of the risk management functions, assess the effectiveness of the underlying risk management system.

Management of business units work together with the risk management director to perform risk assessment at operational level, and is responsible for monitoring and managing the risks identified in activities and operations. Risk management director is responsible for coordinating and conducting risk assessments in accordance with the Risk Management Manual and reporting risk management status to the Audit Committee annually.

CORPORATE GOVERNANCE REPORT

The four key steps in the risk management process are:

- **Risk identification and assessment** – identify the key risks of the Group and analyse the risk by considering the possibility of occurrence and their implication;
- **Risk handling** – adopt appropriate risk management strategy and risk response plans;
- **Risk monitoring** – create mechanisms for monitoring to ensure the risk response plans are executed smoothly;
- **Risk reporting** – summarise the result of risk assessment and report to the Audit Committee.

In the risk management process, the top risks within the Group are identified and assessed; and the respective risk management measures as well as the corresponding mitigating controls are discussed, agreed and implemented by the management. Risk assessment results are reported by the risk management director to the Audit Committee and the Board annually.

Internal control

The internal control framework of the Group has been established based on the framework developed by Committee of Sponsoring Organisations of the Treadway Commission for internal controls. To assist the Audit Committee in its overseeing and monitoring activities, the Group maintains an independent internal audit function. The role of internal audit is to provide independent assurance that the risk management, governance and internal control processes of the Group are operating effectively. The internal auditors assess the operating effectiveness of the risk management and internal control systems during their course of audits. They carried out internal audit on all functions and the frequency is determined by the level of assessed risks on each function. Internal auditors shall provide independent and objective report on operational and management activities of each function. The annual audit plans are reviewed and approved by the Audit Committee and audit findings are submitted to the Audit Committee for review.

The Audit Committee reviews internal control issues identified by the internal auditors, including the remedial actions taken to address and resolve the identified issues, and evaluates the adequacy and effectiveness of their risk management and internal control systems. The Audit Committee also reviews the internal control functions with particular emphasis on the scope and frequency of audits and the adequacy of resources.

To further strengthen the internal control systems, heads of all departments are required to confirm the effectiveness of the internal controls of their respective departments, including the identification of key issues in the control system and develop the action plan to remediate the weaknesses of the internal controls. Management is required to submit a confirmation to the Audit Committee and the Board annually to confirm the effectiveness of the risk management and internal control systems of the Group.

CORPORATE GOVERNANCE REPORT

Review the effectiveness of the risk management and internal control systems

The risk management director reported to the Audit Committee for the annual risk assessment, internal control review and testings. Key risks are identified and their responsive mitigating controls are documented in the risk registers and reported to the Board by the Audit Committee.

For the year ended 31 December 2020, the Board has conducted the review of risk management and internal control system functions of the Group and considered they are effective and adequate. The review covers all material controls, including financial, operational and compliance controls, and risk management functions. No significant areas of concern that may affect the Company to achieve strategic goals have been identified.

During the review of risk management and internal control systems of the Group, the Board has assessed the adequacy of resources, staff qualifications, experience, training programmes and budget of the Group's accounting and financial reporting function and considered that these resources are properly allocated.

Disclosure of inside information

The Company has established policies and internal controls for the handling and dissemination of inside information to ensure that disclosures are made and/or announcements are published on a timely basis in accordance with the applicable laws and regulations. The Company has implemented procedures for responding to external enquiries about the Group's affairs and has in place a strict prohibition on unauthorised use of inside information.

CONSTITUTIONAL DOCUMENTS

During the year under review, the Company had not amended its constitutional documents.

INVESTOR RELATIONS AND COMMUNICATION WITH SHAREHOLDERS

The Company has established the following communication channels with its shareholders and investors: (i) dispatching printed copies of corporate communication documents to shareholders of the Company; (ii) the opportunity for shareholders of the Company to raise comments and exchange views with the Board during each annual general meeting; (iii) providing the latest and key information of the Group through the website of the Company; and (iv) the Company's share registrar serves the shareholders of the Company in respect of all share registration matters.
