| Hong Kong Stock Exchange          | The Stock Exchange of Hong Kong Limited  |
| CNRG                              | China National Railway Group Co., Ltd. (中國國家鐵路集團有限公司)  |
| CAM                               | China Association of Metros (中國城市軌道交通協會)   |
| CTCS                              | Chinese Train Control System, developed by China for ensuring the safe<br>operation of trains, which is divided into 0 to 4 levels based on function and<br>equipment configuration according to the operational requirements of different<br>lines. The higher the level, the faster the train speed applied and the higher the<br>technical difficulty |
| CIPS                              | Computer Integrated Processing System, automation system of the freight marshalling yard, a system for centralized supervision and control of marshalling yard operations  |
| ITCS                              | Incremental Train Control System, an enhanced train control system, which is<br>currently applied to the Qinghai-Tibet Railway   |
| MATC                              | Magnetic Automatic Train Control, medium and low speed maglev control<br>system, an automatic control system for moving block trains based on cross<br>induction loops, suitable for medium and low speed maglev trains  |
| ΑΤΟ                               | Automatic Train Operation, the automatic train operation system, a system that<br>automatically adjusts the speed and operation status of trains to automatically<br>control a train's operation   |

# SECTION I DEFINITIONS

| CBTC | Communication Based Train Control System, train control system for urban<br>transit, the wireless communication-based automatic train control system, a<br>wireless communication system for urban transit that enables bidirectional<br>communication between vehicle and ground facilities to control the operation of<br>trains   |
|------|--|
| RBC  | Radio Blocking Center, the ground core equipment of the CTCS-3 system to generate control information on the driving permission, line description and temporary speed limit for the controlled train according to the train status provided by the train ATP, the interlock path status provided by the interlock device, the track occupation status, and the temporary speed limit command provided by the TSRS and transmit such information to the on-board ATP through the GSM-R network to control the driving status of the train |
| ATP  | Automatic Train Protection, the automatic train protection equipment that automatically brakes train when it exceeds speed limits  |

### SECTION II CHAIRMAN'S STATEMENT

#### Dear shareholders:

The year 2020 is a year full of difficulties and challenges, and also a year in which all employees of CRSC worked hard and made extraordinary achievements despite difficulties. During this year, all shareholders gave the Company the greatest confidence and support! I would like to take this opportunity to express my sincerest gratitude on behalf of the board of directors to the shareholders and people from all sectors of society who support and care about the development of the Company!

In response to the sudden and unexpected outbreak of the pandemic and the complex situation of increasingly severe domestic and international risks and challenges, the Company unswervingly took Xi Jinping Thought on Socialism with Chinese Characteristics for a New Era as guidance, thoroughly implemented the decisions and plans of the Central Committee of the CPC and the State Council, and forged ahead with firm confidence and focused on implementation despite difficulties. Therefore, the Company made new headway and achievements in all aspects of work.

Business operations in the markets remained stable. The Company made every effort to overcome the adverse impact of the pandemic and focused on stabilizing production, business operation and market by active measures. In the field of rail transportation, the Company has successively won bids for such key projects as South Shandong High Speed Railway Phase II, the Guangdong section of Ganzhou-Shenzhen High-speed Railway and Zhongwei-Lanzhou Railway, maintaining its leading position in the market. In the field of urban transit control system, the Company has successively won the bidding of key projects, such as Shenzhen Subway Line 20, Wuhan Subway Line 16 and Zhengzhou Airport to Xuchang City Railway, with its market share increasing significantly. The Company further expanded the medium or small carrying-capacity urban transit market by successively winning the bidding of such projects as the PPP project of Tianshui Tram Model Line (Phase II) and the general contracting project of electromechanical equipment procurement and installation of Fenghuang Maglev Cultural Tourism Project (Phase I). The Company made active efforts to promote smooth international operation, reinforced the implementation of major projects along the "Belt and Road" and strived to ensure the normal progress and scheduled contract performance of overseas projects such as the Jakarta-Bandung Railway, Budapest-Belgrade Railway and China-Thailand Railway.

Outstanding achievements were made in scientific and technological innovation. The Company continued to increase investment in R&D, accelerated breakthroughs in key and core technologies, vigorously initiated the construction of innovation platforms and laboratories, made plans for forward-looking technology R&D in advance, improved the collaborative innovation system, gathered industry innovation resources, and sped up the transformation of scientific research results. The Company established the first engineering research center for intelligent control of autonomous train operation in the railway industry; completed the development of a full set of autonomous train control system equipment and successfully put it into application on the Hefei-Anqing-Jiujiang High-Speed Railway; completed the development of a comprehensive dispatching command management system for railway freight and realized on-site application on Shenhua Railway; and achieved a major breakthrough in the key area of railway transportation with TRANAVI Qiji – train autonomous circumambulation system ("TACS") based on vehicle-to-vehicle communication and took the initiative to launch it for commercial use in the industry. All the products of autonomous train control system have passed the European Union's Technical Specification for Interoperability certification, clearing the technical specification barrier for entry into the European market.

Deepened reform was advanced in an orderly manner. The Company actively promoted the deep integration and efficient linkage of reform and development, and propelled the implementation of various reform measures in an orderly manner; the Company further carried out special reform projects, improved the market-oriented business operation mechanism for "double hundred" enterprises and demonstration enterprises of "science and technology reform", implemented the tenure system and contract-based management for managers, and energetically practiced the professional manager system; the Company actively explored medium- and long-term incentives for technology-based enterprises to stimulate their vitality and improve efficiency and effectiveness; the Company steadily promoted the mixed-ownership reform and equity diversification reform to achieve complementary advantages with different ownership capitals and release new growth drivers for business.

On-going efforts were made to consolidate safety and quality. The Company resolutely implemented General Secretary Xi Jinping's series of important speeches and instructions on safety production, strengthened safety and quality control, improved safety quality system, implemented full life-cycle traceability management, set the redline, upheld the bottom line, and ensured the safe and stable operation of 146,300 km of railways and 37,900 km of high-speed railways in China. In 2020, the Company put into operation 3,515 km of high-speed railways and general speed railways with 326 stations in a safe and high-quality manner, including Hefei-Anqing High-speed Railway, Shanghai-Suzhou-Nantong High-speed Railway, Taiyuan-Jiaozuo High-speed Railway, Fuzhou-Pingtan High-speed Railway, and 20 urban rail transits covering 391.9 km, including 127 km of automatic driving lines, ranking first in the industry.

As the first year for implementing the "14th Five-Year Plan", 2021 is a year of special importance in the process of China's modernization construction, and will also be a year of great development for CRSC. In the new year, CRSC will actively implement the new development concept, grasp new development opportunities, and lead high-quality development with science and technology innovation, so as to create greater wealth and value for the society and shareholders!

ZHOU Zhiliang

Chairman

Beijing, the PRC 26 March 2021

#### LANGUAGE AND MEANS OF RECEIPT OF CORPORATE COMMUNICATIONS

The Company provides corporate communications to the shareholders based on their respective selected language version and means of receipt. The shareholders have the following options:

- to read the online version of all corporate communications published on the Company's website by electronic means instead of receiving the printed version and receive written notice for the publication of the corporate communications published on the Company's website;
- to receive printed English version of all corporate communications only;
- to receive printed Chinese version of all corporate communications only; or
- to receive both printed English and Chinese version of all corporate communications.

The shareholders may choose and/or change their choice on the language version of our corporate communications and/or the way to receive the corporate communications at any time. The shareholders may notify the Company of their options by the following ways:

- By mail: 17M Floor, Hopewell Centre, 183 Queen's Road East, Wanchai, Hong Kong
- By email: crsc.ecom@computershare.com.hk

For enquiry on the arrangement of selection of the language version and means of receipt of corporate communications, the shareholders may contact the hotline at +852 2862 8688 at any time.

# XI. EXPLANATION OF PERFORMANCE INDICATORS OF NON-ENTERPRISE ACCOUNTING STANDARDS

□ Applicable ✓ Not applicable

#### A. SUMMARY OF THE COMPANY'S BUSINESSES

#### I. MAJOR BUSINESSES AND OPERATION MODE, INDUSTRY INFORMATION AND RESEARCH AND DEVELOPMENT INFORMATION OF THE COMPANY DURING THE REPORTING PERIOD (OPERATION CENTER)

#### (I) Major Businesses, Major Products or Services

The Company always takes the development of national industry and national technology as its own responsibility. Since its establishment, the Company has been focusing on the research and exploration of rail transportation control system technology and is committed to providing safe and efficient core support for operation of national rail transportation, and is a core enterprise to ensure the safe operation of national rail transportation. As a world-class rail transportation control system solution provider, the Company has a complete industrial chain integrated with an industry-leading rail transportation control system design and development, equipment manufacturing and engineering services as well as capabilities to provide high-quality integrated services throughout the industrial chain of rail transportation control system to its customers.

The main businesses of the Company covering: 1) Design and integration, mainly includes provision of system integration services for related products of rail transportation control system and provision of design and consultancy services mainly for construction of rail transportation projects; 2) Equipment manufacturing, mainly includes producing and selling signal system, communication information system products and other related products; 3) System implementation, mainly includes construction, equipment installation and maintenance services for rail transportation control system projects.

While maintaining the world's advanced position in the field of railway signal and communication, the Company adheres to the development strategy of "one core business with diversification into related businesses", and strives to build a signal and communication business as the core, to optimize industrial structure and business layout on four sectors including R&D and design, equipment manufacturing, engineering construction and construction investment. The Company attaches great importance to technology accumulation and continuous innovation, actively carries out forward-looking research, accelerates the pace of independent innovation, adheres to the technological path of making further innovation on the basis of absorbing advances in overseas science and technology, and actively faces the forefront of world science and technology. In the future, the Company will continue to carry out research and development of advanced and intelligent technologies, and strive to make breakthroughs in advanced rail transportation control, intelligent comprehensive operation and maintenance of rail transportation, smart city and industry communication information, special chips for rail transportation and other fields, leading the new direction of industry development.

There was no material change in the Company's major businesses since its establishment.

#### (II) Major Operation Modes

The Company has been working in the field of rail transportation control system for many years and has formed a stable and efficient business model with profound understanding in China's railway and urban transit policies, operation mode and market environment. The Company mainly obtains orders through public bidding, and mainly obtains production raw materials through centralized procurement. The Company provides integrated and comprehensive services of rail transportation control system to its customers under the mature business mode of design and integration, equipment manufacturing and system implementation.

#### 1. Sales mode

The Company takes advantage of industry core technology and the whole industrial chain, actively participates in domestic and foreign user procurement activities with the aim of responding to users' needs and providing highly secure and reliable products and services, and obtains product and service orders through market competitions such as bidding and business negotiation.

#### 2. Production and service mode

The production and service mode adopted by the Company in design and integration, equipment manufacturing and system implementation etc. is mainly formed in line with the overall operation mode of railway and urban transit system in the PRC, and customized production and service can also be provided according to the specific needs of owners. The Company provides relevant products and services in strict accordance with the contract requirements on schedule and quality.

#### 3. Purchase mode

The Company strictly follows relevant national laws and regulations and standardizes various procurement activities in accordance with the Administrative Measures for the Procurement in China Railway Signal & Communication Corporation Limited\* (《中國鐵路通信信號股份有限公司採購管理辦法》). Procurement methods mainly include public tender, tender invitation, competitive negotiation, inquiry and bidding, etc., and the Company will select the applicable procurement methods according to the specific conditions of projects to ensure procurement efficiency. The Company mainly implements a centralized procurement system, under which the Company's engineering management center acts as the centralized management department for procurement activities and is responsible for formulating the relevant system of procurement management, monitoring and reviewing the procurement activities at various levels of the Company. The centralized procurement system is carried out at two levels, including two modes, namely the centralized procurement by the Company's headquarter and the centralized procurement by subordinate secondary enterprises. Secondary enterprises also have a sound procurement management system, under which the procurement activities of subordinate enterprises are independently and centrally managed by the specialized procurement department.

#### 4. Management mode

The Company implements a two-level operation and management mode, under which the headquarter and each of the subsidiaries are responsible for the projects executed by them respectively. The headquarter is responsible for formulating the overall strategic plan, centrally organizing and coordinating the operating activities of subsidiaries, making material decisions and improving the operation and management system of the Company while it is also the one to implement major project management. Subsidiaries are responsible for formulating their own operation and management systems and annual operating plans and goals, etc., and they also manage and operate their own contracted projects by setting up operating management institutions according to their respective operating plans and status.

#### (III) Relevant Industry Information

#### 1. Industrial development stage, basic characteristics and main technical thresholds

Seen from the perspective of global railway industry, the period since the late 1990s is the third development wave of high-speed railways, and the number of countries and regions that are building and planning to build high-speed railway is growing rapidly. As shown in the report High Speed Lines in the World released by the International Union of Railways (UIC) in February 2020, the operation mileage of high-speed railways in the world has reached 52,500 kilometers, the mileage under construction has reached 12,000 kilometers, the planned mileage has reached 11,400 kilometers, and the long-term planned mileage has reached 28,600 kilometers. Seen from the perspective of the domestic railway industry, according to the Program of Building National Strength in Railway Transportation in the New Era (《新時代交通強國鐵路先行規劃綱要》), by 2035, the national railway network will be approximately 200,000 kilometers, including approximately 70,000 kilometers of high-speed railway. The Planning Outline of the National Comprehensive Three-Dimensional Transportation Network (2021-2050) (《國家綜合立體交通網規劃綱要(2021-2050) 年)》), the Program of Building National Strength in Transportation (《交通強國建設綱要》), and the Medium and Long-term Railway Network Plan (《中長期鐵路網規劃》) and other documents have also laid the foundation for a new upsurge in domestic railway construction in the future. As of the end of 2020, the domestic mileage of railways in operation was approximately 146,300 kilometers, of which 37,900 kilometers were high-speed railways, indicating that there is still broad market space for new railway construction in the future. With the operation time of high-speed railway lines opened around 2010 reaching or approaching 10 years, the corresponding train control system has gradually entered the renewing and upgrading cycle. Marked by the renewal and transformation of the train control system of Beijing-Tianjin Intercity Railway, renewal markets of a batch of highspeed passenger train control system represented by the Wuhan-Guangzhou High-speed Railway will also be gradually released.

Seen from the perspective of the global urban rail transit industry, urban rail transit construction in emerging countries and regions is in the ascendant, while the rail transit systems of major cities in developed countries are constantly undergoing renovation and technological upgrading. Seen from the perspective of the domestic urban rail transit industry, in recent years, the nationallevel urbanization development strategy has also continuously injected impetus into the urban rail transit industry. Some large cities have completed a number of projects in succession, which has significantly improved the urban traffic situation and played an important role in giving full play to the urban functions, improving the environment and promoting economic and social development. The 2020 Government Work Report (《2020年國務院政府工作報告》) put forward the focus on supporting the construction of new infrastructure, new urbanization initiatives and major projects (兩新一重), and the CPC Central Committee's Proposals for Formulating the 14th Five-Year Plan (2021-2025) for National Economic and Social Development and the Long-Range Objectives through the Year 2035 (《中共中央關於制定國民經濟和社會發展第十四個五年規劃和二〇三五年遠景目標的建議》) clearly stated that "speed up the city clusters and metropolitan rail transportation networks", urban rail transit as one of the "new infrastructure" has been supported by national priority. As of the end of 2020, the national urban rail transit operation mileage reached 7,545.5 kilometers, and the future market momentum will be sufficient. It is expected that in 2021, there will be 50 rail transits in approximately 29 cities including Beijing, Shanghai, Guangzhou, Wuhan, Hangzhou, Nanjing, Dalian, Xiamen and Harbin with a total estimated mileage of over 1,000 kilometers in newly opened operation. Meanwhile, 22 lines in approximately 13 cities are expected to start construction with a total estimated mileage of over 500 kilometers, while another batch of lines is under planning. Urban rail transit industry has also ushered in a period of stable development in the PRC, and some subway lines built in the early stage also need to be upgraded to ensure safe operation.

The basic characteristic of the rail transportation control system industry is the high threshold of core technology. Customers have extremely high requirements for the safety, reliability and sustainability of the products and services provided, which requires enterprises to have a strong anti-risk ability. In addition, from the perspective of the full cycle of rail transit construction and maintenance, it also has significant cyclical characteristics. According to the requirements of relevant technical specifications and industry practices, the life cycle of high-speed rail transportation control system is generally about 10 years.

China's rail transit system has the characteristics of dense railway network, many hubs, fast train speed (maximum operating speed of 350km/h), long distance span (the train may cross the extremely cold and hot regions during driving), etc. With the characteristics of interconnection, high stability, high environmental adaptability, high system security, high calculation accuracy, etc., the rail transportation control system independently developed and fully applied by the Company can provide "secured escort" for China's huge and complex rail transit system.

The Company has world-class and domestic leading technology. The Company has been engaged in the rail transportation control system industry for many years, taking the lead in the formulation of CTCS (Chinese Train Control System) standards and the research and development of core technologies. It has undertaken a number of national major scientific research projects, providing technical support for the construction of China's high-speed railways, plateau railways, alpine railways and heavy-duty railways, the speed increase of existing lines and the construction of urban rail transit. CTCS train operation control system, urban rail transit CBTC system, freight railway CIPS integrated automation system and other research and development achievements independently developed by the Company have been widely used in the field of rail transit and maintained an efficient, safe and stable operation state, with a large number of actual operation data. The Company also has a number of world-leading laboratories and R&D centers and has accumulated abundant experimental cases, providing a strong guarantee for the Company's future technology upgrading.

The Company provides integrated and comprehensive services of rail transportation control system to its customers under the mature business mode of design and integration, equipment manufacturing and system implementation. This business mode improves the Company's ability of customization, allowing it to provide customers with different products and service combinations flexibly, which effectively meets customers' all-round needs, eventually forming the Company's unique competitive advantages.

#### 2. Analysis of relevant industrial status and changes thereof

The Company is a world-class provider of rail transportation control system solutions. In the field of high-speed railway, as of the end of 2020, the cumulative contracted mileage covered by the Company's core products and services of high-speed railway control system ranked the first in the world. The Company's contracted mileage continued to maintain a large lead based on the cumulative contracted mileage statistics of domestic high-speed railway control system integration projects. In the field of core equipment of high-speed railway control system produced by the Company, such as the market share of the track circuit, centralized traffic control system, computer interlocking, CTCS-3 on-board ATP system, RBC and train control center, continued to occupy the leading position in the industry. In the field of domestic urban transit, the Company is also the largest provider of urban transit control system solutions. Up to now, the Company's core products and services of urban transit control system have covered more than 110 urban transit routes in the PRC which have been in operation and completed the bidding of control system, and also have been in the leading position of the industry. While maintaining the continuous growth in the domestic market, the Company continues to accelerate its overseas business layout, continuously strengthen investment in overseas markets, and make every effort to enhance the Company's brand power and influence in the global market.

As a world-class provider of rail transportation control system solutions, the Company will continue to seize favorable industry trends and opportunities, fully utilize the world-frontier technologies, take advantage of industry chain integration, further increase investment in research and development and put an emphasis on making strategic breakthroughs in the structural adjustments to industry products, historical breakthroughs in core technologies and international breakthroughs in China's high-speed railway standards and industry export. Meanwhile, the Company will accelerate the conversion of research results into industrial production, continuously enhance its management as a modern enterprise, proactively adapt to new environments and new changes, seize market opportunities ahead of others, actively participate in global competition to consolidate its leading position in global industry of rail transportation control system and become a world-class multinational industrial group with the characteristics of its rail transportation control technology.

### 3. Development of new technology, new industry, new business type and new mode during the reporting period and future development trend

With the rapid growth in the economy of the PRC, communication among different regions has become increasingly frequent, and transportation is playing more and more prominent role in promoting and contributing social economy. The rise of urban agglomerations and the acceleration of urbanization have made intercity railways, municipal railways and low-to-medium-volume urban rail transit more and more important choices for local governments in building regional rail transit networks. The multi-system linkage of transportation and the integration of multiple networks of rail transit have also become important research directions and problems that need to be solved urgently. Meanwhile, as the scale of rail transit infrastructure and equipment continues to expand, the intelligent rail transit operation and maintenance system helps operation and maintenance units to better improve their operation and maintenance level and efficiency. Therefore, the Company will conduct the research and development of new generation train operation control system and equipment which are suitable to multiple transportation models and faster, more efficient, more intelligent and safer, build a full industrial chain of new generation of train control system from design, research & development, manufacturing to implementation and delivery; the Company is carrying out study of integrated operation and maintenance system and providing whole set of operation and maintenance solution to realize the improvement of level of the automation and intellectualization of operation and maintenance. In addition, overseas markets, with the "Belt and Road Initiative" as the fulcrum, are comprehensively promoting the construction and promotion of "Chinese Standard" rail transportation.

#### (IV) Core Technology and Research and Development Progress

#### 1. Core technology and its leading edges and changes during the reporting period

The Company focuses on technology research & development, and promotes sustainable development of its overall business by technology innovations. Since its establishment, the Company has been working in the field of rail transportation control system, and owned many industry-leading core technologies leveraging on its outstanding technology innovation strength. As of the end of December 2020, the Company has 2,571 registered patents to protect its core technologies in the PRC, meanwhile, the Company signed special confidentiality agreements with relevant technicians regarding core technologies to ensure that core technologies would not be disclosed or spread.

The core technologies owned by the Company primarily include but not limited to the below:

| No. | Core technology                            | Source of technology                         | Technical level and degree of application   |
|-----|--|--|---|
| 1   | Train operation control<br>technology      | Independently<br>researched and<br>developed | Train operation control technology has been<br>widely used in HSRs, ICRs and urban transit,<br>which provides core technical guarantee<br>for safe operation and highly efficient of rail<br>transportation. Responding to the demand<br>for highly safe and reliable operation of rail<br>transportation, this technology has addressed<br>certain significant technology issues such<br>as dynamical control curve model of train,<br>precise positioning of train, speed and distance<br>detecting of train, onboard fully functional<br>seamless switch, wireless redundancy coverage<br>of multiple doubling railways, moving blocking<br>and railway network connectivity.  |
| 2   | Automatic train<br>operation<br>technology | Independently<br>researched and<br>developed | Automatic unmanned train operation technology<br>has been successfully applied in the fields<br>of HSRs, ICRs and urban transit. Based on<br>train control system, by using this technology,<br>automatic train operation is realized; through<br>advanced automatic driving control algorithm,<br>certain significant technology issues such as<br>calculation of desired speed curve of train<br>operation, the algorithm of precise stop of train,<br>intelligent control of multiple objects, perception<br>of status in complex operation environment,<br>remote safe control have been addressed, and<br>multiple indicators such as punctuality rate of<br>operation and train parking accuracy and ride<br>comfort and operation consumption have been<br>improved. |

| No. | Core technology   | Source of technology                         | Technical level and degree of application   |
|-----|---|--|---|
| 3   | Integrated automation<br>technology of freight<br>railway | Independently<br>researched and<br>developed | Integrated automation technology of freight<br>railway has been widely used in many<br>marshalling yards in national railway and<br>dispatch centers of railway bureaus, which<br>provides core technology guarantee in improving<br>railway freight efficiency, benefit and safety.<br>The technology has addressed some significant<br>technology issues such as intelligent calculation<br>of freight traffic, intelligent adjustment of running<br>line of railway wagons, intelligent preparation<br>of locomotive usage plan and shunting plan,<br>smart issuance of periodical maintenance<br>and repair plan of vehicles, source control of<br>train operation, as a result, the railway freight<br>efficiency and intellectualization level have been<br>improved. |
| 4   | Train traffic control<br>automation<br>technology         | Independently<br>researched and<br>developed | Train traffic control automation technology<br>has been widely used in HSRs, ICRs, urban<br>transit and some normal-speed railways. This<br>technology integrates computer technology,<br>network technology and control technology,<br>forms a closed-loop system of train operation<br>dispatch and instruction, addresses technology<br>issues such as train tracing, automatic control<br>for hump rolling routes, prevention and control of<br>mistaken receiving-departure at multi-directional<br>hub station, train dispatch management and<br>control at sectional station and intermediate<br>station and intelligent adjustment of operation   |

plan, as a result, automation level of operation instruction and emergent handling level under

fault conditions have been improved.

#### Technical level and degree of application

Intelligent detection, operation and maintenance technology of rail transportation has been successfully used in the fields of HSRs, normalspeed railways, urban transit. This technology has used big data system and cloud service technology to promote the development of rail transit inspection operation and maintenance to the direction of digitization, intelligence and informatization. With the technologies such as diverse integration of intelligent perception, multi-drive engines integration of analysis and judgement, Big Data health assessment analysis as breakthrough points, through expert system, mode identification, trend analysis, comprehensive appraisal, comprehensive positioning and mobile internet, it has realized the advance prediction of rail transit operation risks, active maintenance and health management of key equipment during whole lifetime based on all factors such as personnel, equipment, environment and operation and maintenance processes, improved the maintenance efficiency of equipment, effectively shortened breakdown time, and significantly decreased the failure rate of equipment.

The Train control integration technology has been widely used in the fields of HSRs, ICRs, urban transit. Through the integrated engineering software design platform integrating data platform technology and graphic software technology, the technology has been applied to make engineering design, data allocation, automatic compiling an organic entirety, resulting in the improvement of software integration; by summarizing features of domestic hub and utilization scenario, an integration process of site installation, commissioning, test and construction standardization has been built. This technology is appropriate for the connectivity of different modes of equipment with various operation grades at newly-built routes, reconstructed routes and complex hubs.

This technology has<br>addressed some core technology issues such<br>as safe drive and collection based on electronic<br>components, clock level multi-machine<br>synchronous comparison, operation fault<br>detection and fast redundancy switch, and it has<br>been granted highest grade safety certification<br>of International Functional Safety Standard. |
| 8   | Mobile frequency<br>key control signal<br>safety modulation<br>technology | Independently<br>researched and<br>developed | Mobile frequency key control signal safety<br>modulation technology has been widely used<br>in the fields of HSRs, ICRs and normal-speed<br>railways. This technology has built a set of fault-<br>safety rail circuit system with mobile frequency<br>key control signal as power and rail as<br>conductor, addressed contactless safety signal<br>source technology, mobile frequency key control<br>signal digital spectrum analysis technology,<br>all-region at transmission channel detection<br>technology, and realized safe and core functions<br>covering rail section occupancy-idling detection,                                |

transmitting information to train through rail, and real-time detection of completeness of rails.

| No. | Core technology                                      | Source of technology                         | Technical level and degree of application  |
|-----|--|--|--|
| 9   | Turnout switch<br>technology                         | Independently<br>researched and<br>developed | Turnout switch technology has been widely<br>used in the fields of HSRs, normal-speed<br>railways, heavy-haul railways and urban transit<br>in the PRC. This technology has addressed<br>the major problems in large-size turnout<br>switch synchronization technology, industrial<br>and electrical interface integration, the switch<br>technology of movable point frog of high speed<br>turnout, external-locking technology of turnouts,<br>established world-leading high speed turnout<br>switch system technology system, and provides<br>powerful safeguard to the development of<br>railway in the PRC.  |
| 10  | Rail transportation<br>simulation test<br>technology | Independently<br>researched and<br>developed | Rail transportation simulation test technology<br>has been widely used in the fields of HSRs,<br>ICRs, freight railways, urban transit, which<br>provides support to test and verification<br>processes at various stages of lifetime from<br>plan verification, function development, system<br>integration to engineering execution of train<br>control system, freight and train operation<br>instruction system. This technology has<br>addressed some significant technology issues<br>such as simulation test structure based on<br>distribution semi-physical, modelling approach<br>for complex engineering system, multi-source<br>data at multi-level traceable test management<br>method, automatic test, reappearance of fault<br>and analysis, safe control system interface<br>monitoring, test of optimization deployment<br>of environmental resources, aiming at the<br>requirements of large scale of simulation of<br>tested object, greater isotacticity and strong<br>instantaneity and higher automation, and the<br>utilization of such technology improved the<br>defect remediation rate and quality reliability of |

tested system.

| No. | Core technology  | Source of technology                         | Technical level and degree of application  |
|-----|--|--|--|
| 11  | High precision simulation<br>technology based on<br>coupling of<br>multi-physics | Independently<br>researched and<br>developed | High precision simulation technology based on<br>coupling of multi-physics enables ground rail<br>circuit system to work safely and reliably under<br>railway natural conditions, electromagnetic<br>environment and complicated route conditions,<br>including in the circumstances of coupling of<br>multi-physics of high speed train rails contact<br>electric shunt, high power electrification traction<br>current disturbance, high-frequency transient<br>signal shock caused by lightening, bridge-<br>roadbed-tunnel multispace structure routes,<br>alternating dry-wet ballast bed and parallel<br>running on complex hub multi routes. This<br>technology has been applied to build a high<br>precision simulation analysis platform with<br>error within 0.5%. The platform was used for<br>precise analysis of transmission features of<br>approximately 10,000 typical deployment rail<br>circuits at engineering. |
| 12  | Manufacture technology<br>of rail transportation<br>safety products              | Independently<br>researched and<br>developed | The operation control system of rail transportation<br>has a high requirement to safety and reliability.<br>Based on complete identification of product<br>manufacture risk, the manufacture technology<br>of rail transportation safety products target<br>the control in the whole process from material<br>selection, manufacture equipment, production<br>technology, test and detection, reliability<br>verification to lifetime analysis, thus providing a<br>systematic quality assurance basis for the safety<br>and reliability of products.  |

| No. | Core technology  | Source of technology                         | Technical level and degree of application  |
|-----|--|--|--|
| 13  | Application technology<br>in broadband wireless<br>communication<br>industry | Independently<br>researched and<br>developed | Application technology in broadband wireless<br>communication industry is based on broadband<br>wireless communication technology of LTE-M/<br>R, which can actualize data transmission and<br>integration of multiple operations, improve the<br>efficiency and experience of trunking command<br>direction system. This technology can meet<br>the demand of wireless broadband, terminal<br>intellectualization and business mobilization.  |
| 14  | Comprehensive video<br>monitoring technology<br>for rail transportation      | Independently<br>researched and<br>developed | Comprehensive video monitoring technology for<br>rail transportation has been widely used in the<br>transportation fields such as HSRs and ICRs,<br>which provides comprehensive management<br>system containing video monitoring, Big Data<br>display and visualization for safe operation<br>of rail transportation. Aiming at the demand<br>for all-weather and full-coverage monitoring,<br>this technology has addressed the technology<br>issues such as decoding and forwarding of high<br>definition video stream, concurrency of readwrite,<br>unity and connect of railway three-stage<br>platform, massive video retrieval, intelligent face<br>recognition and certification, intelligent operation<br>and maintenance, clustering of platform<br>management, dynamic load balance of storage<br>resource and engineering, thus, leading the<br>development of comprehensive video monitoring<br>technology for rail transportation. |

The Company actively deployed innovation chain surrounding industrial chain, and it was dedicated to transformation and industrialization of core technology achievements. It applied its core technology to rail transportation core systems such as train control system of railway, train control system of ICRs, train control system of urban transit, freight automation system, operation command automation and detection system and communication information system. The development of core businesses such as design and integration, equipment manufacturing, system implementation of rail transportation control system of the Company will fully depend on its core technology.

During the reporting period, no material changes in the core technology occurred.

#### 2. Research and development achievements during the reporting period

During the reporting period, the Company has completed the engineering application of sets of equipment for CTCS-3 level autonomous train control system in the Beijing-Hong Kong highspeed railway (He'an section). Upon review of domestic on-board equipment technology of ITCS Signaling system of Qinghai-Tibet Railway, the pilot project for application of domestic password on urban transit system has passed the acceptance test of Henan Cryptography Administration, and the driverless test and validation of the Train Autonomous Circumambulate System (TACS) based on vehicle-to-vehicle communication has been completed and achieved industry debut. The construction of the CTCS-3 level autonomous train control system laboratory of the Yawan project has been completed, and the core equipment has obtained TSI and DeBo related certifications. Regarding the Company's core technologies and main products, newly authorized patents increased by 779, and the total number of accumulative effective authorized patents reached 2,571. Winning the Special Award of Shanghai "Science and Technology Progress Award" with the project of Safe and Reliable Guarantee Technology and Application for Core Control Software of Major Industrial Equipment, the Company has undertaken 20 research projects supported by governmental authorities at national, provincial and ministerial levels and industrial administration organizations and the preparations of 39 standards at national and industrial level. As a sponsor of authoritative journal Railway Signaling & Communication Engineering in the rail transportation control industry, the Company has published R&D and application achievements in those industrial authoritative journals, such as Railway Signaling & Communication sponsored by China State Railway Group, Journal of the China Railway Society and Railway Signaling & Communication Engineering sponsored by China Railway Society.

Reasons for material change on total research and development expenditure as compared to last year

#### □ Applicable ✓ Not applicable

Reasons for material change on percentage of capitalized research and development expenditure and its reasonable explanation

#### ✓Applicable □Not applicable

In recent years, the Company adhered to the innovative technology-driven principle, targeted at important core technologies, continuously expanded the investment in research and development and conquered difficulties through long-term unremitting efforts of scientific and technical personnel. The Company has completed the research and development of many industry-leading core technology products such as the high-speed railway CTCS-3 train control system technology and the automatic train operation system with proprietary intellectual property rights, urban transit CBTC system, freight railway CIPS integrated automation system and low speed magnetic levitations MATC signal system, etc. To expedite the transformation of core technology achievements and further improve the safety and liability of current products, the Company increased investments in research and development in the aspect of industrializing new products and technological upgrading and transformation of current products this year, which is the expenditure in development stage. The new products of our Company are expected to generate profit with their feasibility of use or sale, and would be capitalized correspondingly according to the CASBE.

#### 4. Projects under development

| Composition by education | Number (person) | Percentage (%) |
|--------------------------|-----------------|----------------|
| Doctoral candidate       | 60              | 1.39           |
| Master degree candidate  | 1,575           | 36.54          |
| Bachelor degree          | 2,470           | 57.31          |
| College degree           | 205             | 4.76           |
|                          |                 |                |
| Total                    | 4,310           | 100.00         |

## Age structure

| Range of age | Number (person) | Percentage (%) |
|--------------|-----------------|----------------|
|              |                 |                |
| 35 and below | 2,672           | 62.00          |
| 36 to 40     | 795             | 18.45          |
| 41 to 45     | 395             | 9.16           |
| 46 to 50     | 201             | 4.66           |
| 51 to 54     | 128             | 2.97           |
| 55 to 59     | 119             | 2.76           |
|              |                 |                |
| Total        | 4,310           | 100.00         |

### 6. Other explanation

□ Applicable ✓ Not applicable

# II. EXPLANATION ON MATERIAL CHANGES IN THE COMPANY'S MAJOR ASSETS DURING THE REPORTING PERIOD

#### ✓Applicable □Not applicable

For details, please refer to "III. Main Operations During the Reporting Period (III) Analysis of assets and liabilities" in "B. Discussion and Analysis on Business Operations" under Section IV "Report of the Directors".

## III. ANALYSIS OF THE CORE COMPETITIVENESS DURING THE REPORTING PERIOD

#### (I) Analysis of Core Competitiveness

✓Applicable □Not applicable

#### 1. Leading market position

The Company is a world-leading provider of rail transportation control system solutions. As of the end of 2020, the cumulative contracted mileage covered by the core products and services of high-speed railway control system ranked the first in the world. While further enhancing its influence in the global market, each core subsystem also has a leading market share in China. The Company also holds a significant leading position in the urban transit control system market in China. According to Rail Transit, in 2020, among the 29 metro signal control system projects which bids have been opened for, CRSC won 15 bids which accounted for 51.7%, ranking first for consecutive years, and is the largest domestic provider of urban transit control system solutions.

#### 2. Outstanding comprehensive technology innovation strength and core technology reserves

The Company has adhered to independent innovation with more than 2,500 registered patents and realized the absolute independent ownership of intellectual property rights and 100% domesticproduction of products for the core technologies of train operation control, thus helping its technologies regarding high-speed railways and automatic control for freight marshaling yards hold a leading position among global peers. Relying on the world-leading comprehensive research and development strength, the Company has developed core technologies of rail transportation control system with independent intellectual property rights and its products and services have been widely used in fields including railway and urban transit, which has established the Company's leading position in the industry.

The Company is the responsible department for the equipment standards, technical standards and product standards of China's rail transportation control system and has led the establishment of the most important and advanced technical standards for railway and urban transit control system in the PRC, such as CTCS and CBTC. The Company has constructed and operated more than 23,000 kilometers of high-speed railway control system, and had over 40,000 test cases in the Company's special database for railway control system. In addition, the Company also has advanced research and development ("R&D"), experiment and test institutions. The completeness and scale of its laboratory facilities are at a leading position in the world.

#### 3. The whole-industry-chain characteristics of rail transportation control system industry

The Company professionally provides integrated services covering investment and financing, design and integration, equipment manufacturing, system implementation, supporting project construction and repair and maintenance for rail transportation control system, and it is the only company in the world that can provide a full range of products and services independently in the entire industry chain of rail transportation control system. Meanwhile, it possesses domestic-leading and worldclass core technologies and crafts in every aspect of relevant field. With its prominent capabilities of technology R&D and design and integration, the Company can better provide the customers with customizable rail transportation control system solutions and complete the production, on-site assembly and debugging and opening of full range of system equipments. The one-stop services can effectively reduce the construction, operation and management costs of customers and the system compatibility risk in the case of complex lines, and minimise the impact of renovation projects on normal operations. While this business mode satisfies common requirements, it can provide customers with a flexible combination of different products and services based on the actual needs of customers; combining with the Company's internal efficient and accurate informatization management, effectively reduce marketing cost, and lay a good foundation for tracking and carrying out maintenance, repair and upgrading business.

#### 4. Highly reliable and safe core services and products

The Company establishes classified enterprise standards according to relevant international, national and industrial standards, implements strict and prudent quality and safety control measures, so as to ensure the high reliability and safety of rail transportation control system solutions and core products, and provides support for the safe and efficient operation of national rail transportation. The Company's quality management follows the requirements of ISO9001: 2015 Standard, with quality control standards and system procedures to maintain continuous improvement and certification obtained from independent third parties. All subordinate enterprises of the Company which engage in the fields of R&D and design, system integration and industrial manufacturing have passed the ISO/TS22163: 2017 (the upgraded standard of International Railway Industry Standard (IRIS)) certification; all subordinate enterprises of the Company's rail transportation control system products meet the European EN50126 standard for railway product safety and meet the generally accepted international quality requirements regarding safety, reliability, availability and maintenance.

#### 5. Experienced management team and high-level technical professionals

The management team of the Company is composed of professionals with extensive experience in rail transportation industry, stable in composition and strong in management, which plays an important role in efficiently leading the Company's business development and enables the Company to become a global leader in the industry.

The Company has many high-level technical professionals. More than 4,300 employees of the Company are engaged in technology research and development, representing nearly 21% of the total employees, more than one-third of whom have graduate degrees or above. The excellent talent team has laid a solid foundation for the Company to develop core technologies and maintain technical advantages.

# (II) Events which have a Serious Impact on the Company's Core Competitiveness, Impact Analysis and Measures During the Reporting Period

□ Applicable ✓ Not applicable

#### B. DISCUSSION AND ANALYSIS ON BUSINESS OPERATIONS

### I. DISCUSSION AND ANALYSIS ON BUSINESS OPERATIONS

During the reporting period, the Company adhered to the general working style of seeking improvement in stable work, and conducted diversified operations reasonably and efficiently on the basis of focusing on the field of traditional transit control system. The Company continuously improved its business strategic layout, optimized its business management model, developed its advantages in integration of industry chain and capital leveraging, and continued to improve its ability and level of professionalization, marketization, and internationalization of business undertakings; continued to solidify and improve the Four Electric industrial market in rail transit, expand related derivative or related businesses, and form the peripheral radiation capabilities of core business; accelerated the development of related information engineering industries, and gradually expanded market influence in areas such as smart cities and intelligent transportation; actively cultivated strategic emerging industries and created new business support points and economic growth points. We ensured the balanced development of various business segments through business contracting, strived to form a situation of coordinated development of the industrial structure supported by multiple points, enhanced the enterprise's ability to resist risks and sustainable development so as to grow stronger and better. In 2020, the aggregate amount of newly-signed contracts amounted to RMB71.452 billion, representing an increase of 1.20% as compared to the corresponding period of last year. Among which, the value of newly-signed contracts in railway sector amounted to RMB26.256 billion, representing an increase of 0.72% as compared to the corresponding period of last year; the value of newly-signed contracts in urban transit sector amounted to RMB13.059 billion, representing an increase of 13.45% as compared to the corresponding period of last year; the value of newly-signed contracts in overseas sector amounted to RMB1.489 billion, representing a decrease of 38.12% as compared to the corresponding period of last year; the total value of contracts for general contracting and newly-signed contracts for other sectors amounted to RMB30.648 billion, representing an increase of 0.09% as compared to the corresponding period of last year. As of the end of 2020, the Company's order in hand amounted to RMB125.284 billion.

In the field of rail transportation control system, the value of newly-signed contracts of the Company maintained a rapid growth constantly, and successively won bids for major projects including Zhongwei-Lanzhou Railway, Phase II of South Shandong Railway, Guangdong section of Jiangxi-Shenzhen high-speed railway, Huanggang-Huangmei High-speed Railway, Zhangjiajie-Jishou-Huaihua High-speed Railway, Xuancheng-Jixi High-speed Railway and the Connections of Yichang-Zhengzhou-Chongging High-speed Railway and continued to take a leading position in the market. In the field of urban transit control system, the Company's CBTC system has successively won the bidding of key projects, such as Wuhan Subway Line 16, Zhengzhou-Xuchang Interurban railway, Shenzhen Subway Line 20, Nantong Subway Line 2, the improvement of Changchun Subway Line 3, Zhengzhou Subway Line 10, Hangzhou Airport Line, Tiaodeng-Jingjin line in Chongging, Phase II of Kunming Subway Line 2, and Harbin Subway Line 3 and reconsolidated the industry leadership of the Company. At the same time, the market of low-to-medium-volume urban rail transit transportation has been further expended, and the Company has won the bid for the Tianshui City Tramcar Demonstration Line (Phase II) PPP Project ( ${ar {\infty}}$ 水市有軌電車示範線(二期)PPP項目) and Electromechanical Equipment Procurement and General Installation Contracting Project of Phoenix Maglev Cultural Tourism Project (鳳凰磁浮文化旅遊項目) (Phase I Engineering). In general contracting and other sectors, the amount of newly-signed contracts of the Company basically remained flat as compared to the corresponding period of last year

Business outlook for 2021: In the railway sector, due to the impact of the epidemic in 2020, the bidding for some projects has been postponed to 2021. Coupled with the proposed bidding for railway infrastructure poststation projects in 2021, it is expected that the contracting of the Company's railway market will basically remain stable, and the Company will increase its efforts in contracting for the market and strive for better growth. In the urban transit sector, with most of the projects approved during the 13th Five-Year Plan period entering the mid-to-late stage of implementation, the market for metro signal control is expected to basically remain stable in 2021, in line with the forecast of CAM. The Company will further consolidate the existing market and make every effort to expand the market of non-traditional dominant cities. In addition, the Company will closely follow the planning and layout of local governments in the low-capacity rail transportation market in the urban transit sector, the Company will continue to adhere to the principle of giving equal emphasis to the main business and gross profit margin, focus on the "New Infrastructure" national strategy, evaluate prudently and strive for quality projects. In overseas markets, given that the epidemic overseas has not yet been effectively controlled, it may continue to be affected to a certain extent, but the Company's primary market layout has basically been completed, and the Company will actively take the initiative through existing channels and further expend the overseas business.

### II. RISK FACTORS

(I) Risk of Making No Profits Yet

□ Applicable ✓ Not applicable

(II) Risk of Sharp Decline or Loss of Results

□ Applicable ✓ Not applicable

#### (III) Core Competitiveness Risk

✓ Applicable □Not applicable

The rail transportation control system industry in which the Company is engaged is in a stage of rapid development. The Company needs to continuously improve and develop new technologies and products that closely follow the technological development trend and customers' needs. If we encounter delays in technology development, fail to meet market demands, fail to closely follow technological trends, or our R&D achievements are lower than expected, our operating results may be adversely affected.

41

## (IV) Operating Risk

#### ✓Applicable □Not applicable

The number of competitors in the railway signal & communication segment has increased. The main competitors have comprehensively advanced the research and development of their system, equipped with all their core products and given a full play of their own advantages to participate in the competition. In addition, with related enterprises sparing no effort to penetrate the industry, our traditional advantageous system is under certain pressure.

The control measures of COVID-19 in domestic and foreign will affect the resumption of operation and production, advancement of projects and the development of the market to some extent. The economies on different countries are declining obviously and the government's fiscal deficit is worsening, leading to a wider funding gap for infrastructure construction and the decrease in the project delivery-payment ability. In 2021, our ongoing projects and the newly signed orders may be affected at different levels.

Given the nature of the Company's business, we may be involved in liability for compensation or punishment from the government may be incurred from the design, R&D, manufacturing, installation, testing, repair and sales of the products or services of rail transportation control system.

### (V) Industry Risk

#### ✓Applicable □Not applicable

With the adjustment of construction bidding rules, the traditional engineering business of companies such as railway line renovation and railway infrastructure projects tends to be contracted as a whole, and other construction companies in the traditional customer service project bidding can directly bid, which increases the pressure of the Company's competition.

The railway construction model shows a diversified trend. The investment and financing construction model introduced in the urban transit sector and the local railway field is used for reference, and emphasizes the investment driven project. The weak electricity part of the original "Four Electric" contracting is difficult to be separately contracted, which makes the Company's business pattern face certain challenge and compels the space of the Company's traditional business.

#### (VI) Macro-environmental Risk

✓Applicable □Not applicable

The global spread of the COVID-19 epidemic accelerated the process of world's thorough changes. With the rise of protectionism and unilateralism, the downturn of world's economy, as well as impacts to the global industry and supply chains, the amounts of external contracts newly entered into and the operating income of the Company may be adversely affected, and, especially, the contraction and promotion of overseas businesses could be exposed to large difficulties.

#### (VII) Risk Relating to Depository Receipts

□ Applicable ✓ Not applicable

### (VIII) Other Material Risks

✓Applicable □Not applicable

Risks of long recovery periods for account receivables:

The construction of railway and urban rail projects undertaken by the Company has the characteristics of long construction period, large investment amount, and lagging settlement, which tends to cause risks of long recovery periods for account receivables.

### III. MAIN OPERATIONS DURING THE REPORTING PERIOD

In 2020, the Company made all efforts to overcome the adverse effects of the epidemic, strived to strengthen the production and operation, expedited technological innovation, consolidatedly promoted special actions of quality and efficiency improvement, and the overall business operation remained stable. In 2020, the Company realized revenue of RMB40.124 billion, representing a decrease of 3.65% as compare to the last year, and realized net profit of RMB4.239 billion, representing an increase of 1.49% as compared to the last year. After excluding the impact of the disposal of the real estate business in the last year, the Company's net profit realized a year-on-year increase of 8.04%.

#### 2. Analysis of revenue and cost

#### ✓ Applicable □ Not applicable

Explanation on reasons for changes in revenue: Revenue fell by 3.65% as compared to the last year mainly because in the first quarter, the advancing of projects was postponed and the business volume of equipment sales and engineer services declined due to the adverse impacts of the COVID-19 epidemic. As the epidemic gradually improved in the second quarter, the Company proactively promoted the resumption of work and production, made all efforts to chase the progress of equipment supply, debugging and installation, which led to the narrow of the decline of revenue of the Company. The revenue of the year decreased slightly by 3.65% only as compared to the last year.

Explanation on reasons for changes in cost of sales: Cost of sales fell by 2.63% as compared to the last year mainly due to the decline of cost of sales due to the decline of revenue.

Description of Performance of main businesses by industry, product and region

Segment and terminal market:

Revenue from equipment manufacturing, design and integration, and system implementation for the year fell by 8.44%, 8.82% and 1.73%, respectively as compared to the last year, mainly because the postpone of bidding, suspension of equipment manufacturing, delay of system implementation service in the first quarter due to the COVID-19 epidemic resulted in the decline of volumes of equipment sales and engineering business. Started from the second quarter, the Company made all efforts to overcome the impacts of the epidemic, seize the market demand, proactively promote the resumption of work and production, which led to the improvement of production and operation by months and the significant narrow of the decrease of sales income in various business sectors. However, the operating income growth of rail transit sector failed to achieve positive due to the impacts of temporary postpone of the national investment on railway. The construction contracting achieved positive growth as the Company proactively resumed work to chase the terms of work.

#### Region:

Revenue from overseas business for the year significant increased by 67.20% as compared to the last year, mainly because the Group and the Company, on the precondition of complying with the epidemic prevention requirement, proactively promote the construction of overseas projects like Indonesia Yavan and Hungary-Serbia Railway, which increased the revenue from these projects.

#### Other explanations of cost analysis

Business cost in 2020 was RMB31,269 million, representing a decrease of 2.63% which was 1.02 percentage points lower than the decrease in revenue, as compared to RMB32,112 million in the corresponding period of last year. The cost of equipment manufacturing was RMB3,566 million, representing a decrease of 4.43% as compared to the corresponding period of last year; the cost of design and integration segment was RMB5,678 million, representing a decrease of 12.85% as compared to the corresponding period of last year; the cost of system implementation service was RMB11,798 million, representing a decrease of 1.33% as compared to the corresponding period of last year; the cost of construction contracting was RMB10,191 million, representing an increase of 3.12% as compared to the corresponding period of last year.

The consolidated gross profit of the Company was RMB8,855 million, representing a decrease of 7.12% as compared to RMB9,534 million in the corresponding period of last year.

- (4). Information about main customers and main suppliers
  - A. Information about main customers of the Company

The sales to top five customers was RMB16,333.0126 million, accounting for 40.71% of annual total sales, of which sales to related parties was RMB0.00, accounting for 0.00% of annual total sales. None of the Directors, Directors' close associates or Shareholders of the Company (so far as is known to the Directors, had more than 5% of the issued share capital) had any interests in top five customers.

#### 3. Expense

#### ✓Applicable □Not applicable

The explanation on reasons for sale expense changes: the sale expenses in this year was RMB783 million, a decrease of 10.90% compared with the last year, primarily due to the decreased expenses of travel and business in sales department in this year and the decrease in sales of equipment, resulting in the decreased expenses of product package and transportation.

The explanation on reasons for management expense changes: the management fees in this year was RMB2,060 million, a decrease of 18.60% compared with the same period of the last year, the main reason of which is that as a response to the impact of the COVID-19, the Company makes more efforts to reduce costs and increase efficiency and strictly controls the expenses of salary, travel and office of management personnel. Meanwhile, provision for production safety expenses decreases accordingly due to the decrease of revenue.

The explanation on reasons for financial expense changes: the financial income in this year was RMB250 million, mainly due to the increase of interest income.

The explanation on reasons for research and development expense changes: the research and development expense in this year was RMB1,434 million, a decrease of 9.42% with the last year, mainly due to the increase of capitalization expense of research and development investment and revenue expenditures reduces accordingly.

#### 4. Cash flow

#### ✓Applicable □Not applicable

Explanation on reasons for changes in net cash flow from operating activities: the net cash flows used in operating activities amounted to RMB3,007 million, representing a decrease of RMB364 million as compared to the period of last year, mainly due to the impact of epidemic for this year, the delay of project inspection and payment of owner's fund, resulting in decrease in cash received from selling goods and providing services as compared to the period of last year.

Explanation on reasons for changes in net cash flow from investing activities: the net cash flows used in investing activities amounted to RMB137 million, while the net cash flows used in investing activities amounted to RMB4,597 million in the period of last year, mainly due to a decrease in time deposits with maturity over three months in this year.

Explanation on reasons for changes in net cash flow from financing activities: the net cash flows used in financing activities amounted to RMB2,467 million, mainly due to dividend distribution and the repayment of loans, while the net cash flows generated from financing activities during the period of last year amounted to RMB8,247 million, mainly due to the inflow of funds raised from STAR Market.

| Project name              | period             | assets (%)     | end of last period | assets (%)    | period (%)      |
| Receivables for financing | 2,230,124,457.61   | 2.12           | 1,478,647,844.54   | 1.52          | 50.82           |
| Long-term receivables     | 8,384,707,579.19   | 7.96           | 6,422,130,017.28   | 6.59          | 30.56           |
| Construction in progress  | 1,421,305,987.45   | 1.35           | 160,740,323.63     | 0.16          | 784.22          |
| Development expenditure   | 139,208,125.21     | 0.13           | 47,507,051.83      | 0.05          | 193.03          |
| Short-term borrowings     | 491,584,392.53     | 0.47           | 238,066,170.39     | 0.24          | 106.49          |
| Bills payable             | 1,974,383,429.57   | 1.87           | 1,278,194,766.35   | 1.31          | 54.47           |

Other explanations:

The increase of receivables for financing was mainly due to the increase in the bills receivable received by the Company.

The increase of long-term receivables was mainly due to the increase of receivables confirmed for PPP project.

The increase of construction in progress was mainly due to the fact that in order to further meet the technological innovation needs of enterprises in Shanghai, the subsidiary such as CRSCS and CRSC CASCO purchased new R&D bases to build up technology development platform in the current period, which have not been put into use, and it is temporarily presented as construction in progress.

The increase in development expenditure was mainly due to the capitalized amounts invested by the Company in research and development for this year.

The increase in short-term borrowings was mainly due to the Company's increase in low-interest policy loans.

The increase in bills payable was mainly due to the increased percentage of the Company's payments settled by using acceptance bills in this year.

#### (IX) Use of proceeds raised from H shares

The proceeds raised from H shares amounted to approximately RMB9,104 million. As of 31 December 2020, a total of RMB7,907 million of proceeds raised from H shares have been used, of which RMB2,731 million was used in long-term research and development, including the construction of the CRSC Railway Transportation Research Center and technology research projects; RMB1,667 million was used in the fixed asset investments, including the technical overhaul of CRSC Xi'xin production base, the Company's subsidiary, and Changsha Industrial Park; RMB108 million was used in general equity acquisition; RMB788 million was used in investment of Tianshui Tramcar project and other PPP projects related to railway transportation; and RMB2,613 million was used to supplement working capital (On 12 June 2020, the Company convened the general meeting and considered and approved the Resolution on Change in the Use of Proceeds Raised from H Shares, according to which, the Company intends to change the portion of the proceeds of RMB1,713 million allocated for general domestic and overseas acquisition to general domestic and overseas purposes (supplementing working capital)). The Company confirms that, apart from RMB1,713 million allocated for general domestic and overseas acquisition, the intended usage of the aforesaid proceeds is consistent with the use of proceeds as disclosed in the prospectus.

Apart from the aforesaid use of funds, as of 31 December 2020, the Company's remaining proceeds raised from H shares amounting to RMB1,197 million have not been used and are expected to be used up in the coming three years, of which RMB154 million will be used for fixed asset investments, RMB1,033 million will be used for investments in PPP projects related to railway transportation and RMB10 million will be used to supplement working capital.

## IV. DISCUSSION AND ANALYSIS OVER THE FUTURE DEVELOPMENT OF THE COMPANY

#### (I) Industry landscape and trends

#### ✓Applicable □Not applicable

The national railway construction continues to maintain a certain investment intensity, in particular, local governments in areas with rapid economic development, have been increasingly enthusiastic in investing in intercity and municipal railways. China Railway Group plans to operate new lines of 3,700 kilometers in 2021, and by 2035, the national railway network will reach about 200,000 kilometers, of which 70,000 kilometers are high-speed railways. The strategy of the regional coordinated development will be further implemented. The state has deployed major strategies such as "new infrastructure", speeding up the network of rail transit in urban agglomerations and metropolitan areas, and accelerating the development of urban (suburban) railways in metropolitan areas, and where the development of the intercity and municipal (suburban) railways will be enhanced. The acceleration of the building China strength in transportation, the enhancement of effective investment, the adjustment of transportation structure, new scientific and technological revolution and industrial transformation have also brought new historical opportunities for railway industry. With the operating time of the high-speed railway lines operated in around 2010 has been at or near 10 years, the control system of relevant train is also gradually entering into the update and upgrade cycle, and the markets for upgrading, operation and maintenance will be gradually opened up. With an increasing extension of the scale of railway infrastructure and equipment in use, the railway operational system gradually become rigid demand for railway construction, and all these market spaces pave the way for the rolling development of enterprise.

In terms of competition landscape, in addition to CRSC, China Academy of Railway Sciences Corporation Limited has actively strengthened its own business shortcomings, accelerated the pace of marketoriented reform, and has always maintained a catch-up situation with Helishi Automation Technology Co., Ltd. Both companies have strong competitive strength and occupy a certain market share. In addition, Beijing Jiaoda Microunion Tech. Co., Ltd. is also competitive in some system fields.

The urban rail transit market will continue to maintain a steady growth trend. In 2021, the operating mileage of China will exceed 7,000 kilometers. From 2018 to 2020, the National Development and Reform Commission approved nearly 100 lines, plus the lines to be approved during the "14th Five-Year Plan" period, and the future market space can be expected. Meanwhile, the planning and construction of new medium and low capacity urban rail transit represented by modern tram is in the ascendant, and it also provides a wide market space for enterprises. While some subway lines built in the early stage have the need of upgrading and transformation to meet the operational needs, and the related engineering technology is difficult and the threshold is high, which will provide a stage for leading enterprises in the industry to show their strength.

57

In terms of the competition landscape, in addition to CRSC, Traffic Control Technology Co., Ltd. developed rapidly in recent years, and UniTTEC Co., Ltd. has completed the transformation to independent research and development of technology from purely inputting, forming the first echelon in the field of urban rail transit signal control system together with CRSC. In addition, enterprises such as Shanghai Thales SAIC Transport Co. Ltd., China Academy of Railway Sciences Corporation Limited and Shanghai Fuxin Intelligent Transportation Solutions Co., Ltd. are also dominant players in the market. According to the public bidding information in the past two years, the market has gradually shown a trend of gathering to the top enterprises. The public data in 2020 shown that, among the 31 urban rail control system projects that have biddings awarded, the top 5 enterprises have obtained 28 lines, accounting for more than 96%.

#### (II) Development strategies of the Company

✓Applicable □Not applicable

As a leading integrated rail transportation control system solution provider in the world, for the purpose of continuously consolidating and strengthening our leadership in the global market, and in view of the development trend in the industry and the Company's abundant resources, the Company will adhere to the quality and safety as the first principle, and shoulder the mission of introducing the national railway communication and signal industry to the world. The Company will expedite independent technological innovation, accelerate the process of high-quality development, take advantage of industry chain integration, and put an emphasis on making strategic breakthroughs in cultivating industrial ecological clusters, historical breakthroughs in the new generation of independent core technologies that leads the world, and international breakthroughs in the integration of China's high-speed rail standards and world railways, and basically realize "taking the lead in the world in technological innovation, safety management, industrial development, and comprehensive strength" in the same industry, eventually build up a cross-national industry group with international standards featuring rail transportation control technology.

### (III) Business plans

#### ✓Applicable □Not applicable

In 2021, the Company will maintain strategic focus, stick to systematic opinions, focus on high-quality development, implement new development ideas and serve the new development layouts based on the new development stage; adhere to the general working style of seeking improvement in stable work, take high-quality development as the theme, take the supply-side structural reform as the main line, take deepening reform as the booster, take science and technology innovation as the driver, take market operation as the leading position, take security quality as the insurance to constantly become stronger, better and larger, as well as promote all works to obtain new and better results.

#### (IV) Others

□ Applicable ✓ Not applicable

## V. MATTERS THAT THE COMPANY FAILED TO DISCLOSE ACCORDING TO THE RULES AS THE RULES WERE NOT APPLICABLE OR STATE SECRETS OR TRADE SECRETS WERE INVOLVED OR FOR OTHER SPECIAL REASONS AND DESCRIPTIONS OF SUCH REASONS

□ Applicable ✓ Not applicable

### **VI. OTHER DISCLOSURES**

#### (I) Corporate Information and Initial Public Offering

The Company was incorporated as a joint stock company in the PRC with limited liability on 29 December 2010. The H shares of the Company have been listed on the Main Board of the Hong Kong Stock Exchange since 7 August 2015. The A shares of the Company have been listed on the STAR Market of Shanghai Stock Exchange since 22 July 2019.

Basic information about the Company is set out in section III "Basic Corporate Information and Key Financial Indicators" of this report.

#### (II) Environmental Policies and Performance of the Company

Environmental policies and performance of the Company are set out in section V "Significant Events" of this report.

Further details of the environmental policies and performance of the Company will be set out in the "Environmental, Social and Governance Report" to be published within 3 months of the date of the 2020 annual report of the Company.

### (III) Compliance with Laws and Regulations

As the Group's main businesses are to provide specialized one-stop solution of design and integration, equipment manufacturing and system implementation services for rail transportation control systems to our customers, the Group is subject to relevant PRC policies, laws and regulations, including the Railway Law of the People's Republic of China (《中華人民共和國鐵路法》) and the Production Safety Law of the People's Republic of China (《中華人民共和國安全生產法》) and is under supervision of other government authorities. Such laws, regulations and policies mainly govern the operation and management of railway industry. In addition, all business operations of the Group are subject to the laws and regulations regarding quality, safety production, environmental protection, intellectual property and labor. Any violation of those laws and regulations may result in sanctions, including warnings, penalties and order to rectify, which may have an adverse impact on the Group's business operation and future development.

In addition, the Group is required to obtain and maintain valid permits, licenses, certificates and approvals from various governmental authorities or institutions under relevant laws and regulations for our businesses of design and integration, product manufacturing and system delivery services. The Group must comply with the restrictions and conditions imposed by various levels of governmental authorities to maintain the Group's permits, licenses, certificates and approvals. Should the Group fail to comply with any of the regulations or meet any of the conditions required for the maintenance of the Group's permits, licenses, certificates and approvals, licenses, certificates and approvals could be temporarily suspended or even revoked, or the renewal thereof, upon expiry of their original terms, may be delayed or rejected, which could materially and adversely impact our Group's business, financial condition and results of operations.

As a company incorporated in the PRC with limited liabilities and listed on Hong Kong Stock Exchange and Science and Technology Innovation Board of Shanghai Stock Exchange, the Company is governed by various applicable domestic laws and regulations including Company Law, the Production Safety Law of the People's Republic of China (《中華人民共和國安全生產法》) and the Guideline on Comprehensive Risk of Central Enterprises (《中央企業全面風險指引》) promulgated by the SASAC, as well as the Hong Kong Listing Rules, Listing Rules of Shanghai Stock Exchange and other securities regulatory rules.

The Group has implemented internal control measures to ensure its compliance with such laws and regulations. Based on a comprehensive review of the business performance of the Group, the Board is of the view that the Group has been in compliance with the requirements of relevant laws and regulations in all material respects.

#### (IV) Performance and Distribution

The performance of the Group for the year ended 31 December 2020 and the financial position of the Group as at 31 December 2020 are set out in the section XI "Financial Report" of this report.

The implementation of cash dividend policy of the Company during the reporting period is set out in the section V "Significant Events" of this report.

#### (V) Distribution Plan and Policy of Dividend

The Company's distribution plan and policy of dividend is set out in the section V "Significant Events" and section IX "Corporate Governance Report" of this report.

#### (VI) Issued Share Capital

As of 31 December 2020, the total share capital of the Company was RMB10,589,819,000, divided into 10,589,819,000 shares with a nominal value of RMB1.00 each. Details of the change of the share capital of the Company during the reporting period are set out in the note VII. 53 of section XI Financial Report.

### (VII) Repurchase, Sale or Redemption of Listed Securities of the Company

During the reporting period, neither the Company nor any of its subsidiary repurchased, sold or redeemed any of the listed securities of the Company under the Hong Kong Listing Rules.

### (VIII) Property, Plant and Equipment

Details of property, plant and equipment of the Group for 2020 are set out in the note VII. 21 to financial report.

At the end of the reporting period, the Group had no investment properties or properties held for development and/or sale with one or more of the percentage ratios (as defined under Rule 14.04 (9) of the Hong Kong Listing Rules) exceeding 5%.

#### (IX) Taxation

Details of the taxation of the Group for 2020 are set out in note VI to the financial report.

#### (X) Events After the Balance Sheet Date

Details of the events after the balance sheet date of the Group are set out in the note XV to financial report.

### (XI) Capital Reserve, Surplus Reserve and Special Reserve

Details of the capital reserve, surplus reserve and special reserve of the Group for 2020 are set out in the note VII. 55, 59, 58 to financial report.

#### (XII) Distributable Reserve

The distributable reserve of the Company as of 31 December 2020 is set out in the note VII. 60 to financial report.

#### (XIII) Major Customers and Suppliers

For the year ended 31 December 2020, total sales to the Company's five largest customers represented approximately 40.71% of total revenue for the year, among which total sales to the largest customer accounted for approximately 27.61% of total revenue for the year.

For the year ended 31 December 2020, total purchase from the Company's five largest suppliers represented approximately 8.09% of total cost of sales for the year, among which total purchase from the largest supplier accounted for approximately 3.16% of total cost of sales for the year.

In 2020, none of the Directors, close associates of the Directors or Shareholders of the Company (who, to the knowledge of the Directors, hold more than 5% of the issued share capital of the Company) had interests in the five largest customers or the five largest suppliers of the Group.

In terms of customers, the Group mainly provides rail transportation control system design, equipment manufacturing and system implementation services to domestic and overseas customers to construct and upgrade the control systems for railways and urban transit. In the railway sector, the majority of the Group's customers are China Railway Corporation affiliated entities. The Group generally wins purchase orders for railway control system products and services from the customers affiliated with China Railway Corporation through their public bidding processes. In the urban transit sector, the Group's customers are mostly metro construction companies and operation companies controlled by the local governments. The Group also regularly participates in industry exhibitions organized by China Railway Corporation, the China Communications and Transportation Association (中國交通協會) and the PRC Metro Committee (中國城市軌道交通專業委員會) to advertise and promote our products to professional customers through demonstrating our corporate strength and image.

In terms of suppliers, the Group has multiple sources for most of our components and raw materials to reduce possible interruptions to our business operations and reliance on single supplier. This helps the Group to maintain stability of components and raw materials procurement. Therefore, quality or delivery problems with respect to any single supplier will generally not lead to a material adverse effect on the Group's business operations. The Group has maintained business relationships with various major suppliers for five years or more, and entered into legally binding, long-term supply framework agreements.

## (XIV) Staff

Staff is the key for the Group's sustainable development. Details of the staff of the Group are set out in section VIII "Directors, Supervisors, Senior Management and Employees" of this report.

#### (XV) Bank and Other Borrowings

Details of the bank and other borrowings of the Group as of 31 December 2020 are set out in the note VII. 32, 45 to financial report.

### (XVI) Entrusted Deposits and Overdue Term Deposits

As of 31 December 2020, the Group had no entrusted deposits with financial institutions in China, or term deposits which were due but unrecovered.

#### (XVII) External Donations

In 2020, the Company donated a total of RMB1.2 million to various organizations including local charities and governments of impoverished counties.

#### (XVIII) Directors, Supervisors and Senior Management

The information on the Directors, Supervisors and Senior Management of the Company is set out in section VIII "Directors, Supervisors, Senior Management and Employees" of this report.

#### (XIX) Changes in Directors, Supervisors and Senior Management

Changes in the Directors, Supervisors and Senior Management of the Company are set out in section VIII "Directors, Supervisors, Senior Management and Employees" of this report.

#### (XX) Biographies of Directors, Supervisors and Senior Management

Biographical details of the Directors, Supervisors and Senior Management are set out in section VIII "Directors, Supervisors, Senior Management and Employees" of this report.

#### (XXI) Service Contracts of Directors and Supervisors

Each of the Directors and Supervisors has entered into a service contract with the Company, the principal particulars of which comprise: (1) the term is from the date of appointment and until the date of the expiration of the incumbent Board/the incumbent Supervisory Committee; and (2) it could be terminated in accordance with their respective terms.

Save as disclosed above, none of the Directors or Supervisors has entered into or intends to enter into a service contract with any member of the Group (other than contracts expiring or determinable by the relevant employer within one year without payment of compensation (other than statutory compensation)).

Save as service contracts, there were no any management and administration contracts in relation to the whole or any significant part of the business signed or existed.

#### (XXII) Remuneration of Directors, Supervisors and Senior Management

Remuneration of the Directors and Supervisors are paid in the form of fees, salaries, pension-defined contribution, discretionary bonuses, housing allowances and other allowances and benefits in kind.

Details of the Directors, Supervisors and five highest paid individuals of the Company are set out in the note XII. 5 to financial report.

During the reporting period, the remuneration scale of the Senior Management members (except for Ms. NG Wing Shan, one of the joint company secretaries of the Company, who serves as the assistant vice president of SWCS Corporate Services Group (Hong Kong) Limited (formerly known as SW Corporate Services Group Limited)) whose biographical details are set out in "Biographies of Directors, Supervisors and Senior Management" of this report is disclosed in section VIII "Directors, Supervisors, Senior Management and Employees" of this report.

#### (XXIII) Interests of Directors and Supervisors in Transactions, Arrangements or Contracts

During the reporting period, the Group did not participate in, directly or indirectly, concluding transactions, arrangements or contracts of significance in which any Director or the Supervisor or any entity which he or she was related to was materially interested, and related to the businesses of the Company and were subsisting during or by the end of the year.

#### (I) Interests of Directors in Competing Businesses

During the reporting period, save as disclosed in this report, none of the Directors or any of their respective associates had any competing interests in the businesses which, directly or indirectly, competed or were likely to compete with the Company.

### (II) Directors and Supervisors Serving in Competing Businesses

The businesses of the Group are partially competing with those of CRSC Group. The Company's executive Directors, Mr. ZHOU Zhiliang, Mr. XU Zongxiang and Mr. YANG Yongsheng, devote most of their time into the management of the Company's daily operations.

The information about the Directors of the Company who held positions in CRSC Group is set out in section VIII "Directors, Supervisors, Senior Managers and Employees" of this report.

Save as disclosed in this report, none of the Directors, Supervisors or their respective associates had any interests in the businesses which competed or were likely to compete with the Group, or had any other conflict of interests with the Group.

The Company further confirms that, save as disclosed above, as at the date of this report, members of the Senior Management of the Company have not involved in the daily operations of the businesses of CRSC Group which compete with the Group's businesses.

# (XXIV) Directors', Supervisors' and the Company's Chief Executives' Interests and Short Positions in Shares, Underlying Shares and Debentures of the Company and its Associated Corporations

As at 31 December 2020, none of the Directors, Supervisors or chief executives of the Company had any interests and/or short positions in the Shares, underlying Shares or debentures of the Company or its associated corporations (within the meaning of Part XV of the SFO) which will have to be notified to the Company and the Stock Exchange pursuant to Divisions 7 and 8 of Part XV of the Securities and Futures Ordinance (the "SFO") (including interests or short positions which he is taken or deemed to have under such provisions of the SFO) or which will be required, pursuant to Section 352 of the SFO, to be entered in the register referred to therein, or will be required, pursuant to the Model Code, to be notified to the Company and the Stock Exchange.

### (XXV) Directors' and Supervisors' Rights to Purchase Shares or Debentures

None of the Directors or Supervisors or any of their respective associates was granted by the Company or its subsidiaries any right to purchase the shares or debentures of the Company or any other corporate body, or had exercised any such right.

## (XXVI) Financial, Business and Family Relationships Among Directors, Supervisors and Senior Management Members

As at the date of this report, there were no financial, business or family relationships among the Directors, Supervisors and Senior Management members of the Company.

#### (XXVII) Directors' Insurance

As at the date of this report, the Company maintained effective directors' insurance for the Directors of the Company.

#### (XXVIII) Interests and Short Positions of Substantial Shareholders in Shares and Underlying Shares

The shareholdings of substantial shareholders in the Company are set out in the section VI "Changes in Shares and Particulars of Shareholders – (VI) Interests and short positions of substantial shareholders in shares and underlying shares of the Company" of this report.

### (XXIX) Arrangements for Share Pre-Emptive Right and Stock Option

In 2020, no arrangement for Share pre-emptive right and stock option was made by the Company, as there are no specific provisions under the PRC laws or the Articles of Associations of the Company regarding share pre-emptive right.

#### (XXX) Compliance of CRSC Corporation Group with the Non-Competition Undertaking

#### (XXXVII) Auditors

In March 2020, the Board proposed to reappoint Ernst & Young Hua Ming LLP as the Company's external auditor for the year of 2020, and the term of the appointment was proposed to be effective upon conclusion of the Company's 2019 annual general meeting and until the conclusion of the Company's 2020 annual general meeting.

On 12 June 2020, the Company held the 2019 annual general meeting, deliberated and passed the Proposal on Appointment of Auditors for 2020. Considering that the Company planned to continue to renew the appointment of Ernst & Young Hua Ming LLP as the auditor for 2020 to audit the Company's financial statements for 2020.

In the past three years, the Company has not changed auditor.

By order of the Board China Railway Signal & Communication Corporation Limited ZHOU Zhiliang Chairman

## SECTION V SIGNIFICANT EVENTS

# I. PLAN FOR DISTRIBUTION OF PROFITS FROM ORDINARY SHARES OR TRANSFER OF CAPITAL RESERVE FUND

#### (I) Formulation, implementation or adjustment of cash dividend policy

#### ✓ Applicable □Not Applicable

#### 1. Formulation of cash dividend policy

While maintaining its sustained and steady development, the Company attaches great importance to the reasonable return on investment of shareholders. According to the relevant regulations of the CSRC, the Articles of Association have clearly stipulated the review procedures for cash dividend and profit distribution. The Company's profit distribution complies with the provisions of the Articles of Association. The dividend standards and ratios are explicit and clear, and the relevant decision-making mechanism and procedures are complete.

#### 2. Implementation of cash dividend policy during the reporting period

On 12 June 2020, the 2019 annual general meeting of the Company reviewed and approved the profit distribution plan for 2019. Calculated based on the total share capital of 10,589,819,000 shares (after the listing and issue of A Shares of the Company), cash dividends of RMB0.2 (tax inclusive) per share were distributed, which had been completed.

#### 3. Explanation of profit distribution plan for 2020

The Company held the 25th meeting of the third session of the Board on 26 March 2021. The meeting reviewed and approved the Annual Profit Distribution Plan for 2020 with 7 affirmative votes, 0 dissenting vote and 0 vote abstaining from voting, and agreed to submit the profit distribution plan to the Company's 2020 annual general meeting for review. The plan decides that a cash dividend of RMB2 (tax inclusive) will be paid for every 10 shares, of which domestic shareholders will be paid in RMB and H shareholders will be paid in Hong Kong dollars. The exchange rate of Hong Kong dollars will be calculated in accordance with the average forex closing price published by the People's Bank of China for the three working days before the day when the dividend distribution announcement is made. As of 31 December 2020, the total share capital of the Company was 10,589,819,000 shares. Based on this calculation, the total proposed dividends to be distributed is RMB2,117,963,800.00, accounting for 55.46% of net profit attributable to shareholders of listed companies in the 2020 consolidated statement of the Company. The independent Directors of the Company performed their duties diligently, carefully reviewed the proposal on the cash dividend policy and issued independent opinions.

## SECTION V SIGNIFICANT EVENTS

If the above profit distribution plan is reviewed and approved by the Company's general meeting, the cash dividends are expected to be distributed on or before 30 August 2021. When the specific time is determined for convening the general meeting, the Company will separately announce further details including the closure of the registration of members of the H shares and the expected cash dividend payment date, if updated, in respect of the relevant cash dividend distribution.

The time arrangement such as the record date and the cash payment date for Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect investors is in line with that for H shareholders of the Company.

(II) The Company's plans for distribution of dividends from ordinary shares or transfer of capital reserve funds in the recent three years (including the reporting period)

(III) Share repurchase by cash counted into cash dividends

□ Applicable ✓ Not applicable

(IV) Provided that the Company has made profits and the parent company's profits distributable to ordinary shareholders are positive, but no plan for distribution of profits from ordinary shares by cash has been proposed during the reporting period, the Company shall disclose in details the reasons therefor and use and plan of usage of the undistributed profit

□ Applicable ✓ Not applicable

## SECTION V SIGNIFICANT EVENTS

### II. TAX AND TAX REDUCTION AND EXEMPTION

#### Cash dividend income tax applicable to overseas shareholders

#### Withholding and Payment of EIT on behalf of Overseas Non-Resident Enterprise Shareholders

Pursuant to the applicable provisions of the Enterprise Income Tax Law of the People's Republic of China 《中華人民共和國企業所得税法》) and its implementing rules and the requirements under the Notice on the Issues Concerning Withholding and Payment of the Enterprise Income Tax on the Dividends Paid by Chinese Resident Enterprises to H shareholders Who Are Overseas Non-resident Enterprises (Guo Shui Han [2008] No. 897) issued by the State Administration of Taxation (《關於中國居民企業向境外H股非居民企業股東派發 股息代扣代繳企業所得税有關問題的通知》(國税函[2008]897號)), the Company will withhold and pay EIT at the rate of 10% when it distributes the cash dividend to overseas non-resident enterprise holders of H Shares (including any H Shares of the Company registered in the name of HKSCC Nominees Limited, but excluding any H Shares of the Company registered in the name of HKSCC Nominees Limited and are held by China Securities Depository and Clearing Corporation Limited as nominee shareholder on behalf of investors who invest in the H shares of the Company through Shanghai-Hong Kong Stock Connect).

#### Withholding and Payment of Individual Income Tax on behalf of Overseas Individual Shareholders

Pursuant to the applicable provisions of the Individual Income Tax Law of the People's Republic of China (《中 華人民共和國個人所得税法》) and its implementing rules, the Tax Notice (《税收通知》), the Notice of the State Administration of Taxation on Issues Concerning the Administration of Individual Income Tax Collection after the Annulment of Document Guo Shui Fa [1993] No. 045 (Guo Shui Han [2011] No. 348) (《國家税務總局關 於國税發[1993]045號文件廢止後有關個人所得税徵管問題的通知》(國税函[2011]348號)) and other relevant laws, regulations and requirements under normative documents, the Company will implement the following arrangements in relation to the withholding and payment of individual income tax on behalf of the overseas individual H shareholders:

 For individual H shareholders who are Hong Kong or Macao residents or whose country (region) of domicile is a country (region) which has entered into a tax treaty with the PRC stipulating a tax rate of 10%, the Company will withhold and pay individual income tax at the rate of 10% on behalf of these individual H shareholders in the distribution of the cash dividend;

- For individual H shareholders whose country (region) of domicile is a country (region) which has entered into a tax treaty with the PRC stipulating a tax rate of less than 10%, the Company will temporarily withhold and pay individual income tax at the rate of 10% on behalf of these individual H shareholders in the distribution of the cash dividend. If relevant individual H shareholders would like to apply for a refund of the excess amount of tax withheld and paid, the Company will handle, on their behalf, the applications for tax preferential treatments under relevant tax treaties according to the Tax Notice. Qualified Shareholders please submit in time a letter of entrustment and all application materials as required under the Tax Notice to the Company's H Share Registrar, Computershare Hong Kong Investor Services Limited. The Company will then submit the above documents to the competent tax authorities and, after their examination and if and when the documents are approved, the Company will assist in refunding the excess amount of tax withheld and paid;
- For individual H shareholders whose country (region) of domicile is a country (region) which has entered into a tax treaty with the PRC stipulating a tax rate of more than 10% but less than 20%, the Company will withhold and pay individual income tax at the effective tax rate stipulated in the relevant tax treaty on behalf of these individual H shareholders in the distribution of the cash dividend; and
- For individual H shareholders whose country (region) of domicile is a country (region) which has entered into a tax treaty with the PRC stipulating a tax rate of 20%, or a country (region) which has not entered into any tax treaties with the PRC, or under any other circumstances, the Company will withhold and pay individual income tax at the rate of 20% on behalf of these individual H shareholders in the distribution of the cash dividend.

The agreement is valid for three years. The transaction and the aggregate transaction amount involved is within the decision-making authority of the Board of Directors of the Company and is deliberated and approved by the Board of Directors. Meanwhile, the transaction shall be exempted from the requirements of reporting, annual review, announcement and independent shareholders' approval as it conforms to the minimum exemption level required by the Hong Kong Listing Rules.

#### 2. NON-EXEMPT CONTINUING CONNECTED TRANSACTIONS

The following continuing connected transactions of the Group have been entered into on normal commercial terms. Pursuant to Chapter 14A of the Hong Kong Listing Rules, such continuing connected transactions are subject to the requirements of reporting, annual review, announcement and (as the case may be) independent shareholders' approval under Chapter 14A of the Listing Rules. The following are disclosures made under Chapter 14A of the Listing Rules.

#### Purchases and Sales Framework Agreement between the Company and CRSC Group

Reference is made to the announcement of the Company dated 20 December 2017 in relation to, among other things, the CRSC Group Purchases and Sales Framework Agreement and the amount of annual caps thereunder entered into between the Company and CRSC Group on 20 December 2017. Considering that the terms of the CRSC Group Purchases and Sales Framework Agreement and the corresponding annual caps thereunder will all expire on 31 December 2020, and the Company will continue the transactions thereunder after 31 December 2020. The Company will make adjustments to the annual caps for the year of 2020 under the CRSC Group Purchases and Sales Framework Agreement based on our actual business needs. The Company entered into the New CRSC Group Purchases and Sales Framework Agreement with CRSC Group on 25 March 2020 (after trading hours), and proposed the annual caps for 2020, 2021 and 2022 thereunder to adjust and renew such continuing connected transactions. The New CRSC Group Purchases and Sales Framework Agreement shall be effective from 1 January 2020 to 31 December 2022 for a term of three years.

#### Principal terms:

- (1) Pricing policy (see below);
- (2) Except for public tender, both parties must confirm the demand plan for the next year or the demand adjustment plan of the current year on a stipulated date of each year;
- (3) The Group and CRSC Group and/or its associates must enter into specific agreements to stipulate specific terms and conditions, including specific content of products, quality standards and payment methods, in respect of the relevant products under the New CRSC Group Purchases and Sales Framework Agreement; and
- (4) The New CRSC Group Purchases and Sales Framework Agreement shall be effective from 1 January 2020 to 31 December 2022, and may be renewed with mutual consent after negotiation.

#### Pricing policy:

The pricing of various products under the New CRSC Group Purchases and Sales Framework Agreement will be determined on the basis of market price, together with purchasing costs of materials, labor costs, manufacturing costs, management costs, financial costs, transportation and packaging costs incurred by sales, tax burden and profitability standards. The pricing of products provided by the Group to CRSC Group and/or its associates will be by reference to and subject to the terms of agreement between CRSC Group and/or its associates and the contractual party of the Overseas Project. CRSC Group will purchase products from the Group at the price agreed between itself and the contractual party of the Overseas Project, without making any profit.

As at the date on which the New CRSC Group Purchases and Sales Framework Agreement was signed, CRSC Corporation Group holds 62.37% of the issued share capital of the Company and is the controlling shareholder of the Company. Therefore, CRSC Group is a connected person of the Company. CRSC Group and its associates constitute connected persons of the Group according to the requirements under Chapter 14A of the Listing Rules. Accordingly, the continuing transactions carried out between the Group and CRSC Group and/or its associates under the New CRSC Group Purchases and Sales Framework Agreement constitute the continuing connected transactions of the Company under Chapter 14A of the Listing Rules.

#### Unit: Yuan Currency: RMB

Description of connected transaction: the aforesaid transactions was the performance of the new purchases and sales framework agreement entered into between the Company and CRSC Group on 25 March 2020 during the reporting period. The agreement is valid for three years, the transaction and the total transaction amount involved were within the decision-making authority of the Board of Directors of the Company and have been considered and approved by the same. In the meantime, the transaction satisfied the partial waiver level under the Hong Kong Listing Rules and was exempted from the approval by independent shareholders.

#### General Services Framework Agreement between the Company and CRSC Group

Reference is made in relation to the General Services Framework Agreement and the amount of annual caps thereunder entered into between the Company and CRSC Corporation Group on 20 December 2017. Considering that the terms of the General Services Framework Agreement will expire on 31 December 2020 and the corresponding annual caps thereunder will expire on 31 December 2020, the Company will continue the transactions thereunder after 31 December 2020 and will adjust the annual caps for year 2020 under the General Services Framework Agreement based on our actual business needs. The Company entered into the New General Services Framework Agreement with CRSC Group on 25 March 2020 (after trading hours), and proposed the annual caps for 2020, 2021 and 2022 thereunder to adjust and renew the continuing connected transaction. The New General Services Framework Agreement shall be effective from 1 January 2020 to 31 December 2022 for a term of three years.

#### Principal terms:

- (1) Pricing policy (see below):
- (2) Except for public tender, both parties must confirm the demand schedule for the next year or the demand adjustment schedule of the current year on a stipulated date each year;
- (3) The Group and CRSC Group and/or its associates must enter into specific agreements to stipulate specific terms and conditions, including specific scope of ancillary services, service methods and payment methods, in respect of the relevant products under the New General Services Framework Agreement; and
- (4) The New General Services Framework Agreement shall be effective from 1 January 2020 to 31 December 2022 and may be renewed with mutual consent after negotiation.

#### Pricing policy:

The logistics service fees provided by CRSC Group and/or its associates will be determined on the basis of service costs without making any profit in order to ensure that the service fees are fair and reasonable or more favourable to the Group than that obtained from an independent third-party.

Description of connected transaction: the aforesaid transactions was the performance of the New Purchases and Sales Framework Agreement entered into between the Company and CRSC Group on 25 March 2020 during the reporting period. The agreement is valid for three years, the transaction and the total transaction amount involved were within the decision-making authority of the Board of Directors of the Company and have been considered and approved by the same. In the meantime, the transaction satisfied the partial waiver level under the Hong Kong Listing Rules and was exempted from the approval by independent shareholders.

#### Construction Contracting Framework Agreement between the Company and CRSC Group

Reference is made to the announcement of the Company dated 14 June 2019 in relation to, among other things, the Construction Contracting Framework Agreement entered into between the Company and CRSC Group on 14 June 2019 and the amount of annual caps thereunder. Considering that the terms of the Construction Contracting Framework Agreement will expire on 31 December 2020 and the corresponding annual caps thereunder will expire on 31 December 2020 and the Company will continue the transactions thereunder after 31 December 2020, and that, the Company will adjust the annual cap for year 2020 under the Construction Contracting Framework Agreement according to actual business needs. The Company entered into the New Construction Contracting Framework Agreement with CRSC Group on 25 March 2020 (after trading hours), and proposed the annual caps for 2020, 2021 and 2022 thereunder to adjust and renew the continuing connected transaction. The New Construction Contracting Framework Agreement shall be effective from 1 January 2020 to 31 December 2022 for a term of three years.

Principal terms:

- (1) Pricing policy (see below);
- (2) Except for public tender, both parties must confirm the service demand schedule for the next year or the service demand adjustment schedule of the current year on a stipulated date of each year;
- (3) The Group and CRSC Group and/or its associates must enter into specific agreements to stipulate specific terms and conditions, including specific scope of engineering construction and ancillary services, service methods and payment methods, in respect of the engineering construction and ancillary services under the New Construction Contracting Framework Agreement; and
- (4) The New Construction Contracting Framework Agreement shall be effective from 1 January 2020 to 31 December 2022 and may be renewed with mutual consent after negotiation.

#### Pricing policy:

Pursuant to the New Construction Contracting Framework Agreement, the service fees for providing engineering construction and ancillary services to CRSC Corporation Group and/or its associates will be determined after arm's length negotiations with CRSC Corporation Group and/or its associates with reference to following major factors: (1) availability and cost of raw materials and equipment and machinery, labor, and subcontractors; (2) local guidance prices for the various raw materials and other construction costs provided by the Housing and Urban-Rural Development Bureaus; (3) project progress plans, complexity and scale of the construction project, and the potential adjustment of the scope of work; (4) the geographical location and environmental conditions of the project; and (5) for competitive bidding, assessment and analysis of the relevant functional departments of the Group based on relevant information of the competitors and specific project demand and the impact of the project on the Company's macro strategy. In order to ensure that the service fees charged by the Group for the provision of engineering contracting services are fair and reasonable and in line with the prevailing market prices, the Group will keep abreast of the current market rates and market conditions, and review the pricing through an independent thirdparty consulting agency. In addition, the Group will also refer to the fees previously charged for providing similar engineering contracting services to independent third-party customers.

As at the date on which the New CRSC Group Purchases and Sales Framework Agreement was signed, CRSC Corporation Group holds 62.37% of the issued share capital of the Company and is the controlling shareholder of the Company. Therefore, CRSC Group is a connected person of the Company. CRSC Group and its associates constitute connected persons of the Group according to the requirements under Chapter 14A of the Listing Rules. Accordingly, the continuing transactions carried out between the Group and CRSC Group and/or its associates under the New Construction Contracting Framework Agreement constitute the continuing connected transactions of the Company under Chapter 14A of the Listing Rules.

Description of connected transaction: the aforesaid transactions was the performance of the construction contracting framework agreement entered into and between the Company and CRSC Group on 25 March 2020 during the reporting period. The agreement is valid for three years, the transaction and the total transaction amount involved were within the decision-making authority of the Board of Directors of the Company and have been considered and approved by the same. In the meantime, the transaction satisfied the partial waiver level under the Hong Kong Listing Rules and was exempted from the approval by independent shareholders.

#### Confirmation by Independent Non-executive Directors

The independent non-executive Directors of the Company have reviewed the aforesaid continuing connected transactions and have confirmed that they have been entered into: in the ordinary and usual course of the Group's business; on normal commercial or better terms; on conditions no less favourable to the Company than those offered to or by (as the case may be) independent third parties, if it was not practical to make such judgement based on comparable transactions as to whether such transactions have been carried out on normal commercial terms; and in accordance with relevant agreements whose terms are fair and reasonable and in the interest of the shareholders of the Company as a whole.

#### Auditor's Letter

In accordance with Rule 14A.56 of the Hong Kong Listing Rules, the Company has engaged its auditor, Ernst & Young Hua Ming LLP ("Ernst & Young Hua Ming"), to report on the Group's continuing connected transactions in accordance with Hong Kong Standards on Assurance Engagements 3000 "Assurance Business Other Than Audits or Reviews of Historical Financial Information" and Practice Note 740 "Auditor's Letter on Continuing Connected Transactions under the Hong Kong Listing Rules" issued by the Hong Kong Institute of Certified Public Accounts. Based on its work, Ernst & Young Hua Ming has provided the Board with a letter confirming that, with respect to the aforesaid continuing connected transactions:

- nothing has come to Ernst & Young Hua Ming's attention that causes it to believe that the aforesaid continuing connected transactions have not been approved by the Board;
- (b) in relation to the transactions involving products and services supplied by the Group, nothing has come to Ernst & Young Hua Ming's attention that causes it to believe that the transactions have not followed the Group's pricing policy in any material aspect;
- (c) nothing has come to Ernst & Young Hua Ming's attention that causes it to believe that the transactions have not been carried out in any material aspect in accordance with the relevant agreements;
- (d) in relation to the aggregate amounts for each of the aforesaid continuing connected transactions, nothing has come to Ernst & Young Hua Ming's attention that causes it to believe that the actual transaction amount of any of the aforesaid continuing connected transactions has not exceeded the cap determined by the Company for the year.

The difference

#### XVII. THE WORK ON SOCIAL RESPONSIBILITIES

#### (I) The Work of the Listed Company on Poverty Alleviation

✓Applicable □Not applicable

#### 1. The plan of targeted poverty alleviation

#### ✓Applicable □Not applicable

The Company and CRSC Group, our controlling shareholder, undertook the designated poverty alleviation task in Sheqi county, Henan Province. According to the policies and arrangements of the poverty alleviation made by the CPC Central Committee and the State Council, as well as the SASAC's requirements for the designated poverty alleviation, we focused on the overall goal of the poverty alleviation in Sheqi county, adhered to the basic strategies of the targeted poverty alleviation, and helped Shegi County to achieve poverty alleviation. The poverty incidence rate was dynamically "cleared" and the third-party evaluation of poverty alleviation was passed. (1) Carrying out poverty alleviation through industrial development. We attached great importance to the poverty alleviation through industrial development, increased inputs in industrial support, developed agricultural cooperatives, built poverty alleviation workshops, set up family farms, and help Sheqi County enhance its "blood-making" function. (2) Accelerating poverty alleviation through education. We carried out the activities of "Golden Autumn Aid" and "Caring for Orphans" to help fresh college students in Sheqi county who were registered to have lived in poverty receive higher education and to provide charitable assistance to orphans in the middle and primary school to improve their study environment. (3) Enhancing poverty alleviation through consumption. Poverty alleviation cadres actively expanded sales channels, encouraged social forces to participate in poverty alleviation, and established operation and management model of integration of supply-production-sale by taking agricultural products trading service companies in Shegi as its platform, and built the "Internet +" sales model through strengthening the cooperation with E-commerce platforms, to enhance promotion efforts for poverty relief products. (4) Focusing poverty alleviation through healthcare. We continued to implement "the Project of Standing Together through Thick and Thin - Central Government-administered Enterprises Aid to Those with Emergencies and Difficulties" action, consistently carried out the activity of "presenting love and sending warmth", actively helped improve medical facilities in poverty-stricken areas and solved the problem of difficulties in getting medical services. (5) Paying attention to poverty alleviation through living standard increase. We invested in improving infrastructures in major poor villages, helping poor villages for renovating roads in villages, improving hygienic conditions of poor villages, improving waste and sewage

treatment facilities, building cultural squares, leisure corridors, fitness plazas and other livelihood projects, and promoting green development in rural areas. (6) Highlighting poverty alleviation through Party's building. We allocated special Party funds to help poor villages to improve Party's building, carried out pairing assistance between the Party organizations of affiliated enterprises and the Party branches of poor villages, helped poor villages strengthen the Party branch's ability to organize, power to unite and energy to fight, and improved the basic governance of the village's "Two Committees". We trained grassroots cadres, organized training courses for grassroots cadres, leaders for becoming rich and technicians, and organized inspections and study of the experience of poverty alleviation and to improve their ability to get rid of poverty and become better off.

#### 2. Summary of annual targeted poverty alleviation

#### ✓Applicable □Not applicable

The Company and its controlling shareholder, CRSC Group, bore in mind the mission, strengthened its organizational leadership, strictly performed its responsibilities, earnestly implemented the strategy of targeted poverty alleviation and poverty eradication to contribute to the removal of poverty from Sheqi County and the poverty-stricken masses to get rich. We focused on industrial assistance and has established 7 industrial projects in relation to poverty alleviation, including a mushroom cultivation base. We focused on financial support to poverty areas to sell agricultural products worth RMB1.36 million, which drove the industrial development in poverty areas. We focused on education support and built one hope primary school, assisted 82 college students from poverty families and 100 students who are orphans in education, and trained 323 poverty alleviation cadres and 357 agricultural technicians. We focused on health care assistance and donated one DR, which provided assistance to a population of 586 people who lived in poverty. We focused on Party building and improved the construction of basic Party organizations in 13 poverty villages, turning the advantages of Party building into a driving force for poverty alleviation. We focused on the livelihood of people who lived in poverty, specifically, we help poor villages build courtyard of happiness gathering and providing for the aged and installed solar street lights, in a view to contribute our force to building a beautiful country.

#### 3. Effect of targeted poverty alleviation

□ Applicable ✓ Not applicable

#### 4. Subsequent targeted poverty alleviation plan

#### ✓ Applicable $\Box$ Not applicable

The Company and its controlling shareholder, CRSC Group, will earnestly implement the policies issued by the Central Party Committee in relation to consolidating and developing the achievements we have obtained in the poverty alleviation battle and effectively connected to the rural revitalization; continuously select and train cadres and the First Secretary of the village; and continue to implement "SIX" assistance measures to ensure that our efforts, work and vigor for poverty alleviation are not reduced, so as to continue to consolidate the achievements we have obtained in the poverty alleviation battle, and help rural revitalization.

#### (II) Social Responsibility Work

For details, please refer to 2020 Social Responsibility Report of China Railway Signal & Communication Corporation Limited\* disclosed by the Company on the websites of SSE and the Hong Kong Stock Exchange on the same date.

#### (III) ENVIRONMENTAL INFORMATION

 Explanation on environmental protection of companies and their significant subsidiaries classified as the key pollutant discharging units announced by the environmental protection department

✓ Applicable  $\Box$  Not applicable

(1) Pollutant discharging information

✓Applicable □Not applicable

CRSC is an environmentally friendly "general class" enterprise with "low pollution emission". Pollutant discharge is mainly divided into three categories: air pollutants, water pollutants and hazardous wastes. Air pollution emissions mainly include a small amount of nitrogen oxide and sulfur dioxide produced by boiler heating in the factory, and a small amount of volatile organic compounds (VOCS) in the production process; water pollution emissions mainly include ammonia nitrogen and chemical oxygen demand (COD); the hazardous waste is HW08, HW09, HW13, HW17, and HW49, mainly including the electroplating sludge and organic solvents produced during mechanical processing, organic solvent produced in the process of electronic product assembly and cable extrusion, and emulsions and waste oils generated during equipment maintenance. In 2020, the COD emission in sewage was 1.1 tons, the

ammonia nitrogen emission was 0.26 ton, and the hazardous waste treatment capacity was 154.6 tons, maintaining a reasonable level, the air pollutant sulfur dioxide emission was 0.016 ton, and the nitrogen oxide emission was 0.749 ton. The discharge method of wastewater is mainly based on recycling, and unified discharge after complying with the standard treatment. The discharge method of VOCS and exhaust boiler is based on organized emission after adsorption treatment. All hazardous wastes are entrusted to professional enterprises with hazardous waste operation license, road transport of dangerous cargos license and other qualifications to handle. Enterprises in relation to fixed pollutants have submitted the application for and obtained new pollutants discharge licenses or completed the registration of the fixed pollutants source discharge. The discharge of major pollutants meets the discharge requirements stipulated by the state or local authorities

#### (2) Construction and operation of pollution prevention and control facilities

#### ✓Applicable □Not applicable

CRSC has effectively treated the discharge outlets of pollution sources produced in all links of the production process, and the pollution control equipment is running well. For the links involved in the production of VOCS by cable processing, mechanical product processing, and electronic product assembly in industrial enterprises, treatment devices, such as flue gas electronic purification systems, activated carbon purification systems, low temperature plasma and UV photolysis purification systems, are also equipped to ensure the standard emission of volatile organic gas. The additional and upgraded enterprise-level sewage treatment stations resulted in a substantial increase in sewage treatment capacity and strong monitoring of water pollution discharge indicators. Hazardous wastes shall be stored and managed strictly in accordance with regulations. In the process of transfer and disposal of hazardous wastes, the joint bills of hazardous wastes transfer shall be filled out in accordance with the provisions of the Administrative Measures on the Joint bills for the Transfer of Hazardous Wastes (《危險廢 物轉移聯單管理辦法》), and qualified units shall be entrusted to carry out harmless and safe disposal according to law.

*(3)* Environmental impact assessment and other administrative licenses in relation to environmental protection of construction projects

#### ✓Applicable □Not applicable

In the implementation of construction projects, CRSC implements the Environmental Impact Assessment Law (《環境影響評價法》) and the "three simultaneous" system of simultaneous design, construction and operation of environmental protection facilities and main projects. The total amount of pollutants shall be controlled and the principle of focusing on prevention,

combining prevention with treatment shall be implemented to treat and bury all kinds of pollutants generated so as to ensure the discharge up to the standard. CRSC has formulated the Administrative Measures for Safety and Environmental Protection of Construction Projects (《建設項目安全環保管理辦法》) to ensure that the construction projects obtained the local government's environmental assessment approval before the start of construction, and the environmental protection acceptance has been carried out in full accordance with the requirements of the Administrative Regulations on Environmental Protection of Construction Projects (《建設項目環境保護管理條例》).

#### (4) Emergency plan for contingent environmental incidents

#### ✓Applicable □Not applicable

According to the Safe Production Contingency Management Measures (《安全生產應急管理辦法》) formulated by CRSC, CRSC has set up emergency organizations, classified emergency responsibilities at all levels, refined the classification of events, formulated emergency plans and conducted practical exercises, carried out relevant safety education and training, strengthened safety awareness and effectively improved the level of response to emergency.

#### (5) Environmental self-monitoring program

#### ✓Applicable □Not applicable

CRSC strengthens the supervision and inspection of relevant enterprises' pollution sources. Each of relevant enterprises has formulated pollution discharge monitoring and management systems and third-party testing plans according to the actual conditions of the enterprise. In order to improve the monitoring effects, some enterprises have installed on-line monitoring system for wastewater and exhaust gas at the key pollutant discharge outlets as required, realizing 24-hour monitoring and warning of pollutant discharge and establishing a sound pollutant emission monitoring system.

#### (6) Other environmental information that should be disclosed

#### ✓Applicable □Not applicable

According to the requirements of the local ecological environment department of the place where the enterprise is located, major pollutant discharging units of CRSC will disclose relevant information on the quantity of major pollutant emission and environmental treatment construction projects of the enterprises on the website of the local environmental protection department.

2. Environmental protection of companies other than those classified as the key pollutant discharging units

#### (II) Remuneration Policy

#### ✓ Applicable □Not applicable

In accordance with various policies and guidelines of the state in relation to income distribution and considering the requirements of modern enterprise system, the Company has been continuously improving the remuneration management system and established a salary determination and normal increment mechanism which is basically adapted to the labor market and linked with the enterprise benefits and labour productivity. The Company gives full play to the incentive and constraint functions that remuneration distribution may serve to attract and retain the core talents of the Company, and focuses on the cultivation and reward of scientific and technological talents and technical talents.

In terms of total remuneration adjustment, the Company strictly follows the management measures of total remuneration, and adheres to the basic principle of efficiency-based wages, i.e., the enterprises with high efficiency and benefit set high wage levels, which reflects the fairness of distribution, at the same time, support of standalone measures of total remuneration was provided to the team undertaking key core technology research projects to stimulate the enthusiasm of scientific research personnel; in terms of management of the remuneration of responsible persons, the remuneration of responsible persons are linked with the operating performance and the management of the Company, which has good guiding and supporting effects on achieving the operation and management objectives; in terms of the remuneration management of employees of the Company, the Company established a salary system based on basic wages and performance-based bonus, to reflect the job value orientation and work achievement orientation of internal income distribution, effectively enhance the working positivity of employees and improve the vitality of enterprises.

#### (III) Training Plan

#### ✓Applicable □Not applicable

In 2020, according to training management measures of CRSC, the Company prepared the 2020 Annual Training Plan of the Company based on employees' needs. To ensure the implementation of training plan, the Company cultivated talents by adopting the online and offline method, followed and supervised the implementation of training plan, and evaluated the training effect. In light of actual situation, each subsidiary organized the trainings for whole year. The training content included the work procedure of business, relevant specialized knowledge and business skills.

All departments of the headquarters have carried out trainings according to the plan to strengthen the business training of the Group and the trainings on management ability and professional ability of the headquarters staff, and enhance the management and control ability of the Group.

In order to thoroughly study and implement Xi Jinping Thought on Socialism with Chinese Characteristics for a New Era, strengthen our consciousness of the need to maintain political integrity, think in big-picture terms, follow the leadership core, and keep in alignment with the central Party leadership; stay confident in the path, theory, system, and culture of socialism with Chinese characteristics; and uphold General Secretary Xi Jinping's core position on the Party Central Committee and in the Party as a whole, and uphold the Party Central Committee's authority and its centralized, unified leadership, we conscientiously implement the requirements of SASAC and the Party Committee of the Company, strengthen the political construction and capacity building of leading cadres, actively organize various kinds of Party building trainings, such as organizing web-based learning through the learning platform of China E-learning Academy for Leadership. The Company organized and completed the training of Guidance on Global Operations of Chinese Enterprises (中國企業全球化經營導航培訓), online training on Foreign Language for International Business (經貿外語網絡培訓), online training on News Dissemination Work of Stateowned Enterprise (國有企業新聞宣傳工作網絡培訓), the trainings of Learning Managerial Know-how from the Famous Enterprise (Alibaba Group) (走進名企(阿里集團)學管理培訓) and "Benchmarking Famous Enterprises" for Learning Management from Huawei ("對標名企"華為學管理培訓), Seminar and Training on lean management for enterprises in the Northeast China (東北地區企業精益管理研討培訓) and others. The Company cultivates international talents, management talents, technical talents and skilled talents which meet the development of the Company by strengthening the trainings to enhance the quality of talents.

In 2020, the Company organized 3,591 trainings with 66,946 participants, of which 19,837 participants were management personnel, 31,439 participants were professional technicians(other than management personnel) and 15,670 participants were technical personnel. CRSC continues to improve the talent training system, which provides strong support for the realization of CRSC talent strategy.

#### (IV) Labor Outsourcing

#### I. RELEVANT EXPLANATIONS ON CORPORATE GOVERNANCE

✓ Applicable □ Not applicable

During the reporting period, the Company strictly complied with the requirements of national laws and regulations and the Code of Corporate Governance for Listed Companies of the CSRC, strengthened information disclosure, standardized corporate governance, and improved the corporate governance structure and supervision mechanism. The Directors and Supervisors of the Company worked diligently and responsibly. The Senior Management of the Company paid attention to the performance of their duties in strict accordance with the authorization of the Board of Directors, and safeguarded the best interests of the Company and all Shareholders.

The Company strives to maintain high standards of corporate governance to safeguard the interests of its Shareholders and to enhance corporate value and accountability.

In order to ensure that the Company is able to fully perform its obligations under the Hong Kong Listing Rules, the Company has established an effective corporate governance structure and, from time to time, reviews and improves its internal control and corporate governance mechanism.

The Company also operates in strict compliance with the Articles of Association of the Company, terms for reference for Board Committees, the Company Law and the requirements of relevant laws, regulations and regulatory documents, as well as the relevant rules and regulations of the Hong Kong Stock Exchange in relation to corporate information disclosure and investors' relations management and services.

The Company's corporate governance practices are based on the principles and code provisions as provided by the Corporate Governance Code set out in Appendix 14 to the Hong Kong Listing Rules. The Board is of the view that the Company had complied with all the code provisions as set out in the Corporate Governance Code during the reporting period.

#### **Explanation on the General Meetings**

- ✓ Applicable □Not applicable
- On 12 February 2020, the Company held the first extraordinary general meeting in 2020 in an in-person manner. For details, please refer to the Announcement on Resolutions of the 2020 First Extraordinary General Meeting of China Railway Signal & Communication Corporation Limited dated 12 February 2020.
- 2. On 12 June 2020, the Company held the 2019 Annual General Meeting, the First A-share Class Meeting in 2020, and the First H-Share Class Meeting in 2020 in an in-person manner. For details, please refer to the Announcement on Resolutions of 2019 Annual General Meeting, the First A-share Class Meeting in 2020 and the First H-share Class Meeting in 2020 of China Railway Signal & Communication Corporation Limited dated 12 June 2020.

#### III. SHAREHOLDERS' RIGHTS

To safeguard shareholders' interests and rights, the Company will propose a separate resolution for each substantially separate issue at general meetings, including the election of individual Directors.

All resolutions put forward at general meetings will be voted on by poll pursuant to the Hong Kong Listing Rules and poll results will be posted on the websites of the Company and the Stock Exchange after each general meeting.

Shareholders who intend to put forward their enquiries to the Board could send their enquiries to the Company's headquarters in the PRC (at 20/F, CRSC Building A, 1 Compound, Automobile Museum South Road, Fengtai District, Beijing, PRC) or by email to ir@crsc.cn, or by fax at +86-10-51846610. H shareholders may contact Computershare Hong Kong Investor Services Limited, the H Share Registrar of the Company, if they have any enquiries about their shareholdings and entitlements to dividend.

#### 1. Convening of Extraordinary General Meeting on Requisition by Shareholders

According to the Articles of Association of the Company, where shareholders request to hold an extraordinary general meeting or class meeting, the following procedures shall be followed:

- (I) Shareholders who individually or jointly hold 10% or more of the voting Shares at the proposed meeting may make a proposal to the Board on holding an extraordinary general meeting or class meeting by signing one or several written requests with same contents in the same format and define the meeting topic. The above shareholders shall guarantee that the contents of the proposal shall be in compliance with the laws, regulations and the Articles of Association of the Company. The Board shall convene such meeting as soon as possible upon receipt of the aforesaid written request. The aforesaid number of shares shall be calculated as of the close of the date on which such Shareholders request to convene the meeting in writing or, if it falls on a non-trading date, the prior trading date on which such shareholders request to convene the meeting in writing;
- (II) If the Board is unable to or fails to perform its duty of convening an extraordinary general meeting or class meeting, the Supervisory Committee shall convene and preside over such meeting in a timely manner; if the Supervisory Committee cannot convene and preside over such meeting, shareholders who individually or jointly hold more than 10% of the Company's shares for more than 90 consecutive days may independently convene and preside over such meeting.

#### 2. Putting Forward Proposals at General Meetings

According to the Articles of Association of the Company, in the event the Company convenes a general meeting, the Board, the Supervisory Committee and shareholders individually or jointly holding more than 3% of the Company's shares are entitled to submit proposals in writing to the Company. Shareholders individually or jointly holding more than 3% of the Company's shares may submit ad hoc proposals to the convener in writing ten days prior to the general meeting. The convener shall issue a supplementary notice of the general meeting and announce the content of such ad hoc proposals within two days after receipt thereof. Except as provided above, the convener shall not amend the proposals set out in the notice of the general meeting or add any new proposals subsequent to the issue of the notice of the general meeting. The general meeting shall not carry out the voting and adopt resolutions on the proposals that are not stated in the notice of the general meeting or fail to meet the requirements under Article 76 of the Articles of Association of the Company.

#### 3. Communication with Shareholders and Investors/Investors Relations

The Company considers effective communication with shareholders essential for enhancing investor relations and investors' understanding of the Group's business performance and strategies. The Company also fully recognises the importance of transparency and timely disclosure of corporate information, which will enable shareholders and investors to make the best investment decisions. General meetings of the Company provide a forum for face-to-face communication between the Board and the shareholders. The chairman of the Board as well as chairmen of the Nomination Committee, the Remuneration and Evaluation Committee and the Audit and Risk Management Committee or, in their absence, other members of the respective committees and, where applicable, the chairman of the independent Board committee, are available to answer questions at general meetings.

To promote effective communication, the Company establishes its website and posts latest information and updates on the Company's business operations and developments, financial information, corporate governance practices and other information for public access.

#### IV. PERFORMANCE OF DUTIES OF DIRECTORS

#### (I) Directors and Board of Directors

#### 1. Composition of the Board

During the reporting period, the Board consists of executive Directors, namely Mr. ZHOU Zhiliang, Mr. XU Zongxiang and Mr. YANG Yongsheng and the independent non-executive Directors, namely Mr. WANG Jiajie, Mr. CHEN Jin'en, Mr. CHAN Ka Keung Peter and Mr. YAO Guiqing. Mr. XU Zongxiang was appointed as executive Director with approval by the shareholders at the Company's first extraordinary general meeting for 2020 held on 12 February 2020, and such appointment took effect from the same date. Mr. WANG Jiajie resigned as non-executive Director on 31 January 2021. With approval by the shareholders at the Company's first extraordinary general meeting for 2020 held on 5 March 2021, Mr. GUO Yonghong was appointed as the non-executive Director with effect on the same date.

There is no relationship (including financial, business, family or other material/relevant relationship(s)) among the members of the Board, especially between the chairman and the president.

Biographies of the Directors are set out in the section "Directors, Supervisors, Senior Management and Employees".

According to the requirements of the Articles of Association, every Director shall be elected or replaced by the general meeting and serve a term of three years. At the expiry of their terms, Directors may continue to serve as such if re-elected. The term of office of a Director shall commence from the date on which the resolution is passed at the general meeting and end upon expiry of the term of the incumbent Board. If an election is not held in a timely manner upon the expiry of the term of service of a Director, the incumbent Director shall continue to perform his or her duties as a Director in accordance with laws and the Articles of Association until the incoming Director assumes his or her position.

Under the code provision of the Corporate Governance Code, Directors are required to disclose to the issuer the number and nature of offices held in public companies or organizations and other significant commitments as well as the natures of such companies or organizations and the time involved in such offices. Each Director has agreed to disclose their commitments to the Company in a timely manner.

#### 2. Independent non-executive Directors

For the year ended 31 December 2020, the Board had complied with the requirements of the Hong Kong Listing Rules relating to the appointment of at least three independent non-executive Directors with at least one independent non-executive Director possessing appropriate professional qualifications or accounting or related financial management expertise.

The Company has appointed a sufficient number of independent non-executive Directors in compliance with Rule 3.10A of the Hong Kong Listing Rules which requires the number of independent non-executive Directors represents at least one third of the Board.

The Company has received the annual written confirmation on independence from each of the independent non-executive Directors in accordance with Rule 3.13 of the Hong Kong Listing Rules. The Company is of the view that all independent non-executive Directors are independent in accordance with the independence guidelines set out in the Hong Kong Listing Rules.

#### 3. Chairman of the Board and president

The roles, duties and responsibilities of the chairman of the Board and the president of the Company are held by different individuals and are explicitly defined in writing.

Mr. ZHOU Zhiliang serves as the chairman of Board of the Company, while Mr. XU Zongxiang acts as the president of the Company. The positions of chairman of the Board and president are held by different individuals to maintain independence as well as the balance of views and judgments.

According to the Articles of Association, the chairman of the Board is entitled to the following powers:

- (1) to preside over general meetings and to convene and preside over Board meetings;
- (2) to supervise and check on the implementation of resolutions of the Board;
- (3) to supervise and check on the work of the special committees;
- to listen to the regular or non-regular work reports of the president and other Senior Management members of the Company and provide guidance on the execution of the resolutions of the Board;
- (5) to exercise special rights over the Company's affairs that are in line with the requirements under the laws and the interests of the Company when the chairman of the Board is unable to convene a Board meeting in time in the event of force majeure, critical crisis or situations resulting in significant effect to the production and operation of the Company and report to the Board and general meeting afterwards;
- (6) to nominate candidates for secretary to the Board of the Company;
- to sign the share certificates, corporate bonds and other securities certificates issued by the Company;
- to sign the significant documents of the Board and to represent the Company in signing with third parties important documents that are legally-binding;
- to organize the formulation of various rules and regulations for the operation of the Board and coordinate the Board's work;
- (10) to review and approve the plan for using funds of the Board;
- (11) to exercise the duties and powers as the legal representative;
- (12) to exercise other duties and powers provided for in laws and regulations or the Articles of Association and those granted by the Board.

According to the requirement of the Articles of Association, the Company shall have one president, several vice presidents and one chief accountant; the president of the Company shall be accountable to the Board and exercise the following powers:

- to lead the Company's production, operation and management, to organize the implementation of the resolutions of the Board and to report to the Board;
- (2) to organize the implementation of the Company's annual plan and investment plan;
- (3) to draft plans for the establishment of the Company's internal management structure;
- (4) to draft the Company's basic management system;
- (5) to formulate the specific rules and regulations of the Company;
- to propose to the Board the appointment or dismissal of vice presidents and chief accountant of the Company;
- (7) to appoint or dismiss other management members of the Company other than those required to be appointed or dismissed by the Board in accordance with relevant principles and procedures;
- (8) to exercise other duties and powers conferred by the Articles of Association or the Board.

The chairman is responsible for the management of the operations of the Board, while the president is responsible for the operations of the Company. The chairman is required to keep close communication with the president and all Directors to keep them fully informed of all substantive matters relating to the Company's business development, and is also responsible for building and maintaining a highly efficient administrative support team to support him to discharge the assigned duties in this position.

#### 4. Term of office for Directors

Each of the Directors (including independent non-executive Directors) has entered into a service contract with the Company. The principal particulars of these service contracts comprise, among other things, (a) the term of office of three years commencing from the date when their respective appointments are approved by the Shareholders, and (b) termination provisions in accordance with their respective terms.

#### 5. Nomination, appointment and removal of Directors

The procedures and processes for appointment, re-election and removal of Directors are set out in the Articles of Association. The Nomination Committee is responsible for reviewing the structure, number of members and composition of the Board, advising on any proposed changes to the Board in response to the Company's strategies, and reviewing the independence of the independent non-executive Directors.

#### 6. Duties of the Board

The Board shall be accountable to the general meeting. According to the requirement of the Articles of Association, duties of the Board shall include the exercise of the following functions and powers:

- (1) to convene general meetings and to report on its work to the general meeting;
- (2) to implement the resolutions of the general meeting;
- (3) to decide on the business plans and investment plans of the Company;
- (4) to formulate the annual financial budgets and final accounts of the Company;
- (5) to formulate the profit distribution plans and plans for making up losses of the Company;
- (6) to formulate plans for the increase or reduction of the registered capital of the Company;
- to formulate plans for the issuance of corporate bonds, any class of Shares, warrants and other similar securities;
- (8) to formulate plans for significant acquisition by the Company, repurchase of Shares of the Company or merger, division, reorganization or dissolution of the Company and changes in the corporate form of the Company;
- (9) to decide on the provision by the Company of any external guarantee other than those to be approved by the general meeting as required by the Articles of Association;
- (10) to decide on significant acquisition or disposal within one year by the Company of assets not more than 30% of the latest audited total assets of the Company;
- (11) to decide on connected transactions other than those to be approved by the general meeting as required by laws and regulations and regulatory rules in the place where Shares of the Company are listed;

- (12) to decide on significant investment projects of the Company with the single amount not more than 30% of the latest audited net assets of the Company;
- (13) to decide on entrusted wealth management and asset mortgages or pledges with the accumulated amount not more than 30% of the latest audited net assets of the Company;
- (14) to decide on extra costs and expenses with the single amount not more than 10% of the latest audited net assets of the Company;
- (15) to decide on plans of external donation and sponsorship of the Company with the single amount not more than RMB5 million;
- (16) to formulate amendments to the Articles of Association, the Rules of Procedure for the general meeting and the Rules of Procedure for the Board;
- (17) to engage or dismiss the Company's president and secretary to the Board; to engage or dismiss vice presidents and the chief accountant of the Company, as proposed by the president, and decide on matters relating to their remuneration, rewards and punishments;
- (18) to decide on the establishment of the Company's internal management organization;
- (19) to decide on the establishment of each special committee under the Board and to consider and approve resolutions proposed by each special committee under the Board;
- (20) to formulate the basic management systems of the Company;
- (21) to formulate development strategies, long and medium term development plans and corporate culture development plans, and to monitor the implementation of such plans;
- (22) to decide on the Company's risk management system, including risk evaluation, financial control, internal audit and legal risk control, and to monitor the implementation of such systems;
- (23) to propose to the general meeting the appointment, removal or termination of reappointment of an accounting firm;
- (24) to listen to the work reports of the Company's president and inspect the work of the president and other Senior Management members;
- (25) to perform duties of corporate governance and to evaluate and improve the corporate governance of the Company regularly in accordance with the regulatory rules in the place where Shares of the Company are listed;

- (26) to formulate equity incentive scheme;
- (27) to manage the Company's information disclosure matters;
- (28) other duties and powers provided in laws and regulations, regulatory rules in the place where Shares of the Company are listed or specified in the Articles of Association or granted by the general meeting.

Resolutions by the Board on the matters mentioned above shall, be passed by the affirmative vote of more than one half of all the Directors with the exception of resolutions on the matters referred to in items (6), (7), (8), (16) and (26), which shall require the affirmative vote of at least two-thirds of all the Directors for adoption. Besides the affirmative vote of more than one half of all the Directors, the affirmative vote of at least two-thirds of all the Directors present is also required when the matters referred to in item (9) are considered by the Board.

The abovementioned duties and powers of the Board as well as any transaction or arrangement of the Company shall be proposed at the general meeting for approval as prescribed by the regulatory rules in the place where Shares of the Company are listed.

The duties and powers of the Board and the management have been defined in the Articles of Association. The Board is responsible for decision making in the Company's significant matters, including the approval and monitoring of all policy matters, overall strategies and budgets, internal control and risk management systems, material transactions (in particular those that may involve conflict of interests), financial information and other significant financial and operational matters.

All Directors have full and timely access to all relevant information as well as the advice and services of the company secretary, with a view to ensuring that Rules of Procedure for Board meetings and all applicable laws, rules and regulations are followed. Upon making request to the Board, a Director is generally able to seek independent professional advice in appropriate circumstances at the Company's expense.

In strict accordance with the Articles of Association and the authorization of general meetings, the Board takes and fulfils its decision-making responsibilities seriously, supervises management's implementation of the resolutions of the Board to ensure their effective implementation, and implements the resolutions of the general meetings and reports the work to general meetings.

The day-to-day management, administration and operation of the Company are delegated to the president and the Senior Management. The Board shall be responsible for the fulfilment of the following corporate governance responsibilities:

- to formulate, review and make recommendations on the corporate governance policies and practices of the Company;
- to review and monitor the training and continuous professional development of Directors and Senior Management;
- (3) to review and monitor the Company's policies and practices with regard to complying with laws and regulatory requirements;
- to formulate, review and monitor the code of conduct and compliance manual (if any) applicable to employees and Directors;
- (5) to review the Company's compliance with the Corporate Governance Code and disclosures made in the Corporate Governance Report of the annual report of the Company.

The Board and the Audit and Risk Management Committee have reviewed and approved the disclosures made in the Corporate Governance Report. The Board has also reviewed the Company's compliance with the corporate governance policies, practices, laws and regulatory requirements, and monitored and organized the training courses designed for Directors and Senior Management.

During the reporting period, the Board focused on the continuous professional development of Directors and actively encouraged and organized Directors to participate in the trainings. In order to keep their knowledge and skills up to date as well as improve their capacities of duty performance, all members of the Board of Directors continued to learn all kinds of regulatory information and the latest regulatory documents in their daily duties, including relevant laws and regulations and regulatory documents such as corporate governance and Listing Rules, meanwhile they read industry, professional books and publications. Mr. ZHOU Zhiliang, Mr. XU Zongxiang and Mr. YANG Yongsheng attended the thematic training of Securities Law held by CSRC's Beijing Bureau. Mr. XU Zongxiang and Mr. YANG Yongsheng attended the first and third session of the thematic training for Directors and Supervisors in 2020 respectively. Mr. WANG Jiajie, Mr. CHEN Jin'en, Mr. CHAN Ka Keung Peter and Mr. YAO Guiqing, the independent non-executive Directors, successively attended the training courses for external Directors of Central Enterprises held by the SASAC. Thanks to such trainings, all Directors further understood the regulations of domestic and overseas regulatory institutions, code of conduct for the performance of duties as directors and requirements for information disclosure which A+H listed companies should follow.

#### (III) Objections Raised by Independent Directors against Relevant Matters of the Company

□ Applicable ✓ Not applicable

#### (IV) Others

□ Applicable ✓ Not applicable

#### V. FOR IMPORTANT OPINIONS AND SUGGESTIONS PROPOSED BY THE SPECIAL COMMITTEES UNDER THE BOARD OF DIRECTORS IN DUTY PERFORMANCE DURING THE REPORTING PERIOD, ANY OBJECTIONS SHOULD BE DISCLOSED IN DETAIL

#### ✓ Applicable □ Not applicable

In accordance with the relevant PRC laws and regulations and provisions with regard to the corporate governance practice prescribed in the Listing Rules and the Articles of Association, the Company has established five special committees under the Board of Directors, including the Strategy and Investment Committee, the Remuneration and Evaluation Committee, the Nomination Committee, the Audit and Risk Management Committee, and the Quality and Safety Committee. Members of the Remuneration and Evaluation Committee were all held by external directors, who accounted for the majority of the other three special committees, ensuring that external directors fully express their opinions and perform their duties efficiently.

#### (I) Audit and Risk Management Committee

During the reporting period, the Audit and Risk Management Committee currently consists of independent non-executive Directors Mr. CHAN Ka Keung Peter, Mr. WANG Jiajie and Mr. CHEN Jin'en. In particular, Mr. CHAN Ka Keung Peter is a member of the Hong Kong Institute of Certified Public Accountants, International Association of Accounting Professionals and CPA Australia, with rich knowledge and experience in accounting. He serves as chairman of the Audit and Risk Management Committee. The Audit and Risk Management Committee was mainly responsible for proposing the selection and replacement of the Company's external audit firm; supervising the Company's internal audit system; the communication, supervising and verifying the Company's internal audit; reviewing the financial information and its disclosure; reviewing risk management and internal systems; reviewing the Company's risk management strategies and solutions; risk control, management, supervision and evaluation of major decisions, major events, and important business processes.

During the reporting period, the Audit and Risk Management Committee strictly complied with the requirements of the Company's Working Rules for the Audit and Risk Management Committee of the Board of Directors and the Working Rules for the Annual Report of the Audit and Risk Management Committee of the Board of Directors and other system requirements, performed the duties of the committee independently and objectively, and actively carried out work centering on auditing and supervision, financial monitoring, internal control system construction and comprehensive risk management. The Audit and Risk Management Committee reviewed the Company's financial information and disclosure thereof, repeatedly examined and studied the financial information disclosed in the Company's reports and financial statements, carefully reviewed the proposals on the relevant financial reports of the Company; examined the implementation of the Company's internal control and risk management; guided the internal audit work of the Company, listened to the reports of internal audit department of the Company on auditing work and determined the audit work plan of the Company for 2020.

During the reporting period, the Audit and Risk Management Committee held five meetings and considered 10 proposals including regular performance reports of CRSC, report on internal control evaluation and summary and plan of internal audit work. The Committee proposed opinions from various aspects, such as operating cash flow management, account receivables, carrying out of internal audit and prevention of capital risks, which were accepted by the Board. The attendance rate of the committee members is as follows:

| Name of Director            | Number of<br>meetings required<br>to attend | Number of<br>meetings actually<br>attended | Number of<br>meetings not<br>attended |
|-----------------------------|---|--|---------------------------------------|

| CHEN Jin'en                 | 5   | 5  | 0                                     |
| WANG Jiajie <sup>Note</sup> | 5   | 5  | 0                                     |

Note: Mr. WANG Jiajie resigned as a member of the Audit and Risk Management Committee on 29 January 2021.

The Audit and Risk Management Committee has reviewed the annual results of the Group for the year ended 31 December 2019, the unaudited interim results of the Group for the six months ended 30 June 2020 and quarterly results of the Group for 31 March and 30 September 2020. The Audit and Risk Management Committee has discussed the accounting policies and practices adopted by the Company, internal control and financial reporting matters with the senior management of the Group, financial control, the effectiveness of the accounting policies and practices adopted by the Group, financial control, the risk management and internal control system and the internal audit function of the Group, and considers that the Group's risk management and internal control system and the operation of the internal audit department remain effective. Meanwhile, the Audit and Risk Management Committee had two meetings with external auditors.

The Audit and Risk Management Committee has also reviewed the compliance of the Company with the Corporate Governance Code and the corporate governance report of the Company.

The Audit and Risk Management Committee has also listened to the special report on major risk assessment and major risk measures of the Company in 2019, conducted special audit in this regard and proposed dynamic tracking of the implementation of major risk control measures, to ensure the efficiency and effectiveness of risk control measures.

#### (II) Remuneration and Evaluation Committee

During the reporting period, the Remuneration and Evaluation Committee consists of independent nonexecutive Directors Mr. CHEN Jin'en, Mr. CHAN Ka Keung Peter and Mr. YAO Guiqing. Mr. CHEN Jin'en serves as chairman of the committee. The Remuneration and Evaluation Committee was mainly responsible for formulating and assessing the evaluation standards of the Company's directors and senior management; and formulating and reviewing the remuneration policies and plans of the Company's directors and senior management, and making recommendations to the Board of Directors.

During the reporting period, the Remuneration and Evaluation Committee of the Board of Directors strictly complied with the Company's Working Rules for the Remuneration and Evaluation Committee of the Board of Directors and other system requirements, and performed the duties of the committee independently and objectively.

During the reporting period, the Remuneration and Evaluation Committee held one meeting and considered and approved the Proposal on the Remuneration of Leaders of CRSC in 2019. Records of attendance of the members at the meeting of the Remuneration and Evaluation Committee are set out as follows:

| Name of Director    | Number of<br>meetings required<br>to attend | Number of<br>meetings actually<br>attended | Number of<br>meetings not<br>attended |
|---------------------|---|--|---------------------------------------|
| CHEN Jin'en         | 1   | 1  | 0                                     |
| CHAN Ka Keung Peter | 1   | 1  | 0                                     |
| YAO Guiqing         | 1   | 1  | 0                                     |

#### (III) Nomination Committee

During the reporting period, the Nomination Committee consists of Chairman Mr. ZHOU Zhiliang, independent non-executive Directors Mr. WANG Jiajie, and Mr. YAO Guiqing serving as members. Mr. ZHOU Zhiliang serves as the chairman.

The Nomination Committee was accountable to the Board of Directors and was mainly responsible for researching the selection criteria, procedures and methods for Directors and senior management and making recommendations; reviewing candidates for Directors and senior management, and providing review opinions and appointment recommendations to the Board of Directors; reviewing the independence of Non-executive Directors; and making recommendations to the Board of Directors on the appointment or reappointment of Directors and senior management and the succession plans for the above-mentioned personnel.

During the reporting period, the Nomination Committee did not hold any meetings as there were no matters required to convene the Nomination Committee.

The Nomination Committee adopts the following procedures for selection and appointment of Directors and senior management members:

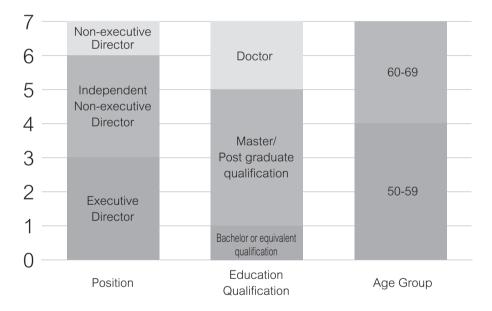

- actively studying the Company's demands for new Directors and senior management members and preparing written materials;
- searching for candidates for Directors and senior management members in the Company and its wholly-owned and holding (joint-stock) enterprises and the talent market;
- (3) gathering information of preliminary candidates, including occupation, education, job title, detailed work experience and all part-time jobs, and preparing written materials;
- (4) seeking the consent of the nominees for nomination;
- (5) convening a meeting of the Nomination Committee to conduct a qualification check of the preliminary candidates based on the appointment criteria for Directors and senior management members;
- (6) submitting to the Board its recommendations on the candidates for Directors and senior management members and relevant materials prior to the election of new Directors or the appointment of new senior management members;
- (7) implementing other follow-up work in accordance with the decisions and feedback of the Board.

In reviewing the structure of the Board, the Nomination Committee considers Board members diversity from various aspects, including but not limited to cultural, educational background, professional experience, skills and knowledge. All appointments of Board members are based on meritocracy, and candidates are considered with due regard for the capacity, skill and experience required for the overall operation of the Board, so as to ensure the proper balance of the Board members.

#### Diversity policy of Board members

The Company understands and strongly believes that diversity among Board members is an important element in maintaining the Company's competitive advantages and fostering the Company's sustainability. The Company considers the diversity of Board members from many aspects when determining the composition of the Board of Directors, including but not limited to gender, age, cultural and educational background, race, professional experience, skills, knowledge, and service period. As the Nomination Committee makes recommendations or suggestions to the Board of Directors on the appointment of new Directors of the Company, it will fully take into account the benefits of diversity of Board members. Meanwhile, the Company considers the above factors based on its own business model and specific needs from time to time, and will ultimately come to a decision based on the strengths of the candidates and the contributions they can provide to the Board of Directors.

The table below shows the diversity position/overview of the Board of Directors of the Company as at the date of this report:

In the process of reviewing the composition of the Board of Directors, the Nomination Committee evaluated the skills and experience of each Director and their relevance to the Company's business, and arrived at a conclusion that the existing structure of the Company's Board of Directors is reasonable and their talent, experience, and professional knowledge are balanced and meet the Company's business needs, as well as being in line with the Company's adopted Board diversity policy.

#### (IV) Strategy and Investment Committee

During the reporting period, the Strategy and Investment Committee consists of chairman of the Board Mr. ZHOU Zhiliang Mr. XU Zongxiang and Mr. YANG Yongsheng, and independent non-executive Directors Mr. CHEN Jin'en and Mr. YAO Guiqing, and Mr. ZHOU Zhiliang serves as Chairman. The Strategy and Investment Committee was accountable to the Board of Directors, mainly responsible for researching the Company's development strategy and planning, and making recommendations on major investments, major investment and financing, major capital operations, asset management projects, and other major issues affecting the Company's development.

During the reporting period, the Strategy and Investment Committee held one meeting to discuss and judge the Company's development direction and ideas during the 14th Five-Year Plan period. Records of attendance of the members at the meeting of the Strategy and Investment Committee are set out as follows:

| Name of Director             | Number of<br>meetings required<br>to attend | Number of<br>meetings actually<br>attended | Number of<br>meetings not<br>attended |
|------------------------------|---|--|---------------------------------------|
| ZHOU Zhiliang                | 1   | 1  | 0                                     |
| XU Zongxiang <sup>Note</sup> | 1   | 1  | 0                                     |
| YANG Yongsheng               | 1   | 1  | 0                                     |
| CHEN Jin'en                  | 1   | 1  | 0                                     |
| YAO Guiqing                  | 1   | 1  | 0                                     |

Note: In February 2020, Mr. XU Zongxiang serves as a member of the Strategy and Investment Committee.

#### (V) Quality and Safety Committee

During the reporting period, the Quality and Safety Committee consists of executive Director Mr. XU Zongxiang and independent non-executive Directors Mr. WANG Jiajie and Mr. YAO Guiqing. Mr. XU Zongxiang serves as chairman. The Quality and Safety Committee was accountable to the Board of Directors and was mainly responsible for researching the Company's major quality and safety decisions, researching the Company's long-term quality and safety mechanism construction, and reviewing the Company's annual key work on quality and safety.

During the reporting period, the Quality and Safety Committee held one meeting and considered and approved the Report on the Safety and Quality Situation in 2020 and the Key Safety and Quality Works Arrangement in 2021 of the CRSC. Records of attendance of the members at the meeting of the Quality and Safety Committee are set out as follows:

| Name of Director                  | Number of<br>meetings required<br>to attend | Number of<br>meetings actually<br>attended | Number of<br>meetings not<br>attended |
|-----------------------------------|---|--|---------------------------------------|
| XU Zongxiang <sup>Note 1</sup>    | 1   | 1  | 0                                     |
| Mr. WANG Jiajie <sup>Note 2</sup> | 1   | 1  | 0                                     |
| YAO Guiqing                       | 1   | 1  | 0                                     |

Notes: 1. In February 2020, Mr. XU Zongxiang served as the chairman of the Quality and Safety Committee.

2. On 29 January 2021, Mr. WANG Jiajie has resigned as a member of the Quality and Safety Committee.

#### VI. SUPERVISORY COMMITTEE

As of the date of this report, the Supervisory Committee of the Company consists of 3 members, namely Mr. KONG Ning, Ms. LI Tienan and Mr. CHEN Shikui and Mr. KONG Ning served as the chairman. The Supervisory Committee is made up of representatives of the Shareholders and an appropriate proportion of representatives of the Company's staff. The actual proportion shall be stipulated in the Articles of Association of the Company, provided that the proportion of representatives of the Company's staff shall not be less than one-third.

Representatives of the Company's staff at the Supervisory Committee shall be democratically elected by the Company's staff at the staff representative assembly, general staff meeting or otherwise. A Supervisor shall serve a term of three years, and may seek re-election upon expiry of the said term. A Supervisor shall continue to perform his or her duties in accordance with the laws, administrative regulations and the Company's Articles of Association until a duly re-elected Supervisor takes office, if re-election is not conducted in a timely manner upon the expiry of his or her term of office or if the resignation of Supervisors results in the number of Supervisors being less than the quorum.

The Company received the resignation reports of Supervisors Ms. TIAN Liyan and Mr. WU Zuowei in January 2020. Due to work arrangements, Ms. TIAN Liyan and Mr. WU Zuowei tendered their resignations as Supervisors of the third session of the Supervisory Committee of the Company. After resignation, Ms. TIAN Liyan and Mr. WU Zuowei will not hold any position in the Company. Ms. TIAN Liyan and Mr. WU Zuowei shall continue to perform their duties as Supervisors before new Supervisors take office upon election. Upon approval by the shareholders at the Company's first extraordinary general meeting for 2020 on 12 February 2020, Mr. KONG Ning and Ms. LI Tienan were appointed as Shareholder representative Supervisors of the

third session of the Supervisory Committee of the Company and Ms. TIAN Liyan and Mr. WU Zuowei ceased to serve as Supervisors of the Company from 12 February 2020. The Supervisory Committee held a meeting of Supervisory Committee on 25 March 2020 where the Supervisory Committee considered and approved, among other matters, the resolution on electing KONG Ning as chairman of the Supervisory Committee, electing Mr. KONG Ning as the chairman of the third session of the Supervisory Committee of the Company for a term commencing from the date of approval at the meeting until the expiration of the term of the third session of the Supervisory Committee.

The Supervisory Committee shall be accountable to the general meeting and may exercise the following powers:

- (1) to review the Company's financial position;
- (2) to supervise the Directors, president and other senior management in their performance of their duties of the Company and to propose the removal of Directors and senior management who have violated laws, regulations, the Articles of Association or resolutions of general meetings;
- (3) when the acts of a Director, president and other senior management are detrimental to the Company's interests, to require him/her to correct such acts;
- to propose the convening of extraordinary general meetings and to convene and preside over general meetings when the Board fails to perform the duty of convening and presiding over general meetings according to laws;
- (5) to put forward proposals to general meetings;
- to review and issue written review comments on the periodic reports of the Company prepared by the Board;
- (7) to initiate proceedings against Directors and the senior management in accordance with relevant laws;
- (8) to initiate investigations into any irregularities identified in the operation of the Company and, where necessary, to engage professional institutions, such as an accounting firm and a law firm, to assist its work;
- (9) other powers authorized by the Articles of Association or general meeting.

During the reporting period, Supervisory Committee had during the year monitored Directors and managers' performance of functions and lawful operation of the Company, reviewed periodical reports of the Company prepared by the Board, reviewed the financial statements of the Company and conducted daily supervision and paid close attention to possible risks that may occur during the Company's operation.

## VII. EXPLANATION OF THE SUPERVISORY COMMITTEE ON DISCOVERY OF THE COMPANY'S RISKS

□ Applicable ✓ Not applicable

Please refer to the internal control audit report published on the SSE website (www.sse.com.cn) on the same day for details.

Whether to disclose the audit report of internal control: Yes

Opinion type of internal control audit report: Standard report without reserved opinions

#### XII. RISK MANAGEMENT AND INTERNAL CONTROL

#### (I) Accountability and Audit

Directors acknowledge their responsibility for preparing the consolidated financial statements of the Company for the year ended 31 December 2020. The Directors consider that the Group has adequate resources to continue in business for the foreseeable future and are not aware of material uncertainties that may cast significant doubt on the Company's ability to continue as a going concern.

The Board is responsible for presenting a balanced, clear and understandable assessment of annual and interim reports, inside information announcements and other disclosures required under the Listing Rules and other statutory and regulatory requirements.

The management has provided the Board with such explanation and information necessary to enable the Board to carry out an informed assessment of the Company's consolidated financial statements which are put to the Board for approval.

#### (II) Risk Management and Internal Control Systems

#### 1. Risk management and internal control management responsibilities

The Board of the Company is responsible for determining the overall risk management objectives, risk tolerance, major risk management solutions and internal control construction implementation plans of the Company and is accountable to the general meeting for the effectiveness of overall risk management and internal control. The management of the Company is responsible for organizing, establishing and improving the Company's overall risk management and internal control system. The legal compliance department of the Company is responsible for the construction and overall operation of the overall risk management and internal control system as well as the organization, coordination and centralized management of overall risk management and internal control. The audit department of the Company is responsible for evaluating the effectiveness of overall risk management and internal control, and conducting internal control audit and supervision. Such risk management and internal control management are designed to manage rather than eliminating the risk of failure to meet business objectives and to only provide a reasonable, but not absolute, assurance that there will be no material misrepresentations or losses.

#### 2. Risk management and internal control management systems and procedures

The Company has formulated the Measures for the Administration of Overall Risk Management and Internal Control of the Company and the Measures for the Administration of Risk Evaluation of the Company. In accordance with the regulations, the legal compliance department of the Company conducts a comprehensive risk evaluation on the whole system of the Company at the beginning of each year to examine the effectiveness of overall risk management and control in the previous year and identify the major risks that will be faced in the next year and the countermeasures taken by it. The audit department of the Company conducts an internal control assessment at the beginning of each year to assess the effectiveness of internal control of the whole system, identify any internal control defects and implement the rectification of internal control defects. The legal compliance department and audit department of the Company report to the Audit and Risk Management Committee on risk management and internal control, including but not limited to the effectiveness and defects of internal control of the Company, overall risk evaluation results and management and control measures.

#### 3. Non-compliance report policy and procedure

The discipline inspection and supervision department of the Company is responsible for accepting reports on corrupt practices of internal staff of the Company, the violation of the Company's rules and regulations, the dereliction of duty or malfeasance, etc., and carrying out investigation and handling in accordance with the Interim Provisions on Handling the Violation of Discipline and Non-compliance by Staff of the Company. Employees, customers, suppliers and other stakeholders of the Company can obtain the report telephone number from the official website of CRSC. Specifically, in accordance with the Implementation Measures for Handling Complaints about Tender and Bidding of the Company, it takes the lead in forming an investigation team to conduct investigations into complaints about the tender and bidding of equipment and materials of CRSC and their handling, and makes decisions on handling and gives replies, etc. according to law pursuant to permissions.

#### 4. Key business risks and internal control

In accordance with the requirements of the Guidelines for Overall Risk Management of Central Enterprises of SASAC, the Company implements risk management in the operation of all its businesses and effectively manages and controls its business activities through the internal control system and the internal control process. In accordance with the Measures for the Administration of Rules and Regulations of Stock Company, the legal compliance department of the Company is responsible for the construction and improvement of the internal control system and evaluating and improving the effectiveness, operability and system coordination of the Company's internal rules and regulations each year. In accordance with the Interim Measures for Investment Management of Stock Company, the Interim Measures for Investment Management of Stock Company and other regulations, the relevant business departments of the Company conduct special risk evaluations on important management activities such as investment and generate special risk evaluation reports as an important basis for decision making.

#### 5. Overall situation of risk management and internal control for 2020

In 2020, the legal compliance department and the audit department of the Company organized all functional departments and enterprises of all levels to conduct overall risk evaluations, internal control assessments, rationalize internal control system and procedure, and continue to improve the internal control system, conduct investigations on special risk, track the implementation of major risk control measures, and give risk warning at the beginning of the year in accordance with the regulations and the requirements of the Board of Directors and management of the Company and organized special risk evaluations on and took countermeasures against each major project in order to improve the Company's overall risk management and internal control system and procedure continue to be effective and internal control measures are effectively implemented. For the year ended 31 December 2020, the Board has reviewed the Company's risk management and internal control system through the legal compliance department and the audit department and considers that the system is still effective and sufficient.

Meanwhile, the Audit and Risk Management Committee has reviewed the effectiveness of the Group's risk management and internal control systems, covering annual material risks and response measures, financial monitoring, internal control and risk management system. The Audit and Risk Management Committee has also considered the adequacy of the Group's resources, employee qualifications and experience in respect of accounting and financial reporting functions, and has reported the relevant matters to the Board. No significant defect in internal control was identified in relevant review.

#### 6. Handling and releasing inside information

In accordance with the Company's information disclosure management regulation, the Company has defined the scope of inside information and relevant staff, established a sensitive information submission and release approval mechanism and reviewed the content of the list on a regular basis so as to quickly identify and promptly report any material which may constitute inside information. When receiving any material which may constitute inside information disclosure management department will immediately evaluate the information and monitor the information before the release of the information to ensure that only a small number of those who need to know the information receive such information and ensure that these persons are well aware of their confidentiality responsibility. If such material is judged to be inside information, the information disclosure management department will coordinate the release of inside information as soon as possible through the electronic publication system operated by the Stock Exchange.

#### XIII. SPECIAL ARRANGEMENT OF CORPORATE GOVERNANCE SUCH AS VIE STRUCTURE

Not applicable.

#### XIV. EXTERNAL AUDITOR AND AUDITOR'S REMUNERATION

For the year ended 31 December 2020, the remuneration paid/payable to the Company's independent auditor, Ernst & Young Hua Ming LLP, is set out below:

#### Amount (RMB in thousand)

| Interim review       | 1,600 |
|----------------------|-------|
| Annual audit         | 6,900 |
| Non-auditor services | 500   |
| Total fees           | 9,000 |

#### XV. AMENDMENTS TO THE ARTICLES OF ASSOCIATION OF THE COMPANY

On 25 March 2020, the Board considered and approved, among other things, the proposal to amend the Articles of Association of the Company. In light of the Company's initial public offering of A shares and actual conditions of listing on the STAR Market SSE, and according to the requirements of the Official Reply of the State Council regarding Adjusting the Application of Provisions to Matters Including the Notice Period for Convention of Shareholders' Meetings by Overseas Listed Companies (No. 97 [2019] of the State Council), in the spirit of caution, suitability and necessity, the Board proposed to amend relevant provisions of the Articles of Association on registered capital and registration of change of the register of members, notice period and convening procedure of the general meeting. The amended Articles of Association has been approved by shareholders by a special resolution at the 2019 annual general meeting of the Company, and took effect from 12 June 2020. The full text of the Articles of Association has been published on the websites of the Stock Exchange and the Company. For details, please refer to the announcement dated 25 March 2020 and the circular dated 15 May 2020 published by the Company on the website of the Stock Exchange.

#### **XVI. DIVIDEND POLICY**

The dividend policy of the Company has been defined in the Articles of Association of the Company. According to the Articles of Association, the Company shall withdraw 10% of profits as the statutory reserve fund of the Company when the Company distributes the annual profits after taxation. If the statutory reserve fund of the Company is insufficient to make up for the losses of the preceding year, the profits of the current year shall first be used to make up for the said losses before any statutory reserve fund is withdrawn as per above. After statutory reserve fund is withdrawn by the Company out of the profits after taxation, discretionary reserve fund may also be withdrawn out of the same as per a resolution made at a general meeting.

The Company may distribute dividends in the form of cash, shares or other forms as permitted by laws and regulations and the regulatory rules in the place where the shares are listed. cash dividends and other monies paid by the Company to A shareholders shall be paid in RMB. Cash dividends and other monies paid by the Company to holders of overseas-listed foreign shares shall be stated and announced in RMB and paid in foreign currency. Foreign currency needed by the Company to pay cash dividends and other monies to holders of overseas-listed foreign shares shall be obtained pursuant to relevant state regulations on foreign exchange. In distributing dividends to shareholders, the Company shall withhold and pay taxes payable by the shareholders for their dividend income pursuant to PRC tax laws.

After the profit distribution plan has been resolved at the shareholders' general meeting of the Company, the Board of the Company shall compete the dividends (or shares) distribution within 2 months after the convention of the Shareholders' general meeting.

#### **XVII. JOINT COMPANY SECRETARIES**

Ms. QIU Wei and Ms. NG Wing Shan are the joint company secretaries of the Company. Ms. NG Wing Shan serves as the assistant vice president of SWCS Corporate Services Group (Hong Kong) Limited and her main contact person is Ms. QIU. Ms. NG and Ms. QIU undertook no less than 15 hours of relevant professional training for the year ended 31 December 2020.

#### **AUDIT REPORT**

Ernst & Young Hua Ming (2021) Shen Zi No.61172338\_A02 China Railway Signal & Communication Corporation Limited\*

To the Shareholders of China Railway Signal & Communication Corporation Limited

#### I. OPINION

We have audited the financial statements of China Railway Signal & Communication Corporation Limited ("CRSC"), which comprise the consolidated and company balance sheets as at 31 December 2020, and the consolidated and company income statements, the statements of changes in shareholders' equity and the cash flow statements for the year then ended, and notes to the financial statements.

In our opinion, the accompanying financial statements of CRSC give a true and fair view, in all material respects, of the consolidated and company financial position as of 31 December 2020, and the consolidated and company financial performance and cash flows for the year then ended in accordance with Accounting Standards for Business Enterprises.

#### II. BASIS FOR OPINION

We conducted our audit in accordance with China Standards on Auditing. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of CRSC in accordance with the China Code of Ethics for Certified Public Accountants ("the Code"), and we have fulfilled our other ethical responsibilities in accordance with the Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

#### III. KEY AUDIT MATTER

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the financial statements for the current year. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. For each matter below, our description of how our audit addressed the matter is provided in that context.

We have fulfilled the responsibilities described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report, including in relation to these matters. Accordingly, our audit included the performance of procedures designed to respond to our assessment of the risks of material misstatement of the financial statements. The results of our audit procedures, including the procedures performed to address the matters below, provide the basis for our audit opinion on the accompanying financial statements.

#### AUDIT REPORT (Continued)

Ernst & Young Hua Ming (2021) Shen Zi No.61172338\_A02 China Railway Signal & Communication Corporation Limited\*

#### III. KEY AUDIT MATTER (Continued)

Key audit matters

#### How our audit addressed the key audit matters

#### Revenue from construction contract

The revenue of China Railway Signal & Communication Corporation Limited is mainly derived from construction contracts for which CRSC recognises revenue according to performance progress. Recognition of revenue in accordance with performance progress may involve significant management judgements and estimates, including estimated contract revenue, estimated contract costs, and work progress. When conditions change, the relating judgements and estimates may vary. During the execution of contracts, the management of China Railway Signal & Communication Corporation Limited evaluated and revised the estimated contract revenue and estimated contract costs based on factors such as scope of contract delivery and estimation to completion. The recognition of revenue from construction contract has a significant effect on financial statements.

For the accounting policies and the disclosure of information for the recognition of construction contract revenue, please refer to Note V.38 and Note VII.61 to the financial statements.

We tested and evaluated the internal control of revenue recognition of China Railway Signal & Communication Corporation Limited. We obtained major construction contracts, reviewed key contract terms and evaluated the rationality of estimated contract revenue and estimated contract costs.

We performed sampling inspection of relevant documents to review contract costs incurred; recalculated the performance progress and revenue based on incurred costs and estimated contract costs; carried out cut-off test procedures to check whether relevant contract costs are recorded in the appropriate accounting period; and underwent an analytical review process for the gross profit margin of major construction contracts.

#### AUDIT REPORT (Continued)

Ernst & Young Hua Ming (2021) Shen Zi No.61172338\_A02 China Railway Signal & Communication Corporation Limited\*

#### III. KEY AUDIT MATTER (Continued)

#### Impairment of account receivable and contract assets

CRSC recognises provision for impairment of accounts receivable and contract assets based on expected credit losses, which involves significant judgements and estimations of the management. Specific factors considered by the management in its recoverability analysis include ageing, customers' repayment plans, historical settlement records, credit ratings and historical repayment records, and other qualitative and quantitative data available to the management. The management also evaluated the expected changes in the credit risk of the debtor based on the above data combined with economic policies, macroeconomic indicators, industry risks and other factors, and considered forward-looking information. The balance of accounts receivable and contract assets of CRSC was significant, and the impairment of accounts receivable and contract assets had significant impacts on the financial statements.

For the accounting policies and the disclosure of information for provision for impairment of accounts receivable and contract assets, please refer to Note V.10, 16 and Note VII.5, 10 to the financial statements.

We tested and evaluated the internal control of CRSC's accrual process for provision for impairment of accounts receivable and contract assets, reviewed the management's analysis and evaluation of historical data of receivables and analysis of historical settlement of contract assets, and checked relevant supporting documents for selected samples to review the accuracy of the ageing of receivables.

For individual recognition of impairment provision for receivables and contract assets, we realised the reasons for the management's judgement and evaluated the rationality of the impairment provision.

For the recognition of impairment provision for receivables and contract assets by reference to the credit risk portfolio, we reviewed the management's settings for the credit risk portfolio, evaluated the rationality of the impairment loss rate in combination with the consideration of historical audit experience and forward-looking information, and selected samples to review the rationality of the credit risk portfolio classification and impairment provision.

#### AUDIT REPORT (Continued)

#### IV. OTHER INFORMATION

The management of CRSC is responsible for the other information. The other information comprises the information included in the Annual Report, but does not include the financial statements and our independent auditor's report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

## V. RESPONSIBILITIES OF THE MANAGEMENT AND THOSE CHARGED WITH GOVERNANCE FOR THE FINANCIAL STATEMENT

The management of CRSC is responsible for the preparation of the financial statements that give a true and fair view in accordance with Accounting Standard for Business Enterprises, and for designing, implementing and maintaining the necessary internal control to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the management is responsible for assessing CRSC's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the management either intends to liquidate CRSC or to cease operations or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing CRSC's financial reporting process.

#### VI. AUDITOR'S RESPONSIBILITIES FOR THE AUDIT OF THE FINANCIAL STATEMENTS

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an independent auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with China Standards on Auditing will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

#### AUDIT REPORT (Continued)

Ernst & Young Hua Ming (2021) Shen Zi No.61172338\_A02 China Railway Signal & Communication Corporation Limited\*

#### VI. AUDITOR'S RESPONSIBILITIES FOR THE AUDIT OF THE FINANCIAL STATEMENTS (Continued)

As part of an audit in accordance with China Standards on Auditing, we exercise professional judgement and maintain professional skepticism throughout the audit. We also:

- (1) Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- (2) Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances.
- (3) Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the management.
- (4) Conclude on the appropriateness of the management' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention to users of financial statements in our independent auditor's report on the related disclosures in the financial statements or, if such disclosures are inadequate, to issue unqualified opinion. Our conclusions are based on the information obtained up to the date of our independent auditor's report. However, future events or conditions may cause CRSC to cease to continue as a going concern.
- (5) Evaluate the overall presentation (including the disclosures), structure and content of the financial statements, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- (6) Obtain sufficient and appropriate audit evidence regarding the financial information of the entities or business activities within CRSC to express an opinion on the financial statements. We are responsible for the direction, supervision and performance of the group audit, and remain full responsible for our audit opinion.

#### AUDIT REPORT (Continued)

Ernst & Young Hua Ming (2021) Shen Zi No.61172338\_A02 China Railway Signal & Communication Corporation Limited\*

#### VI. AUDITOR'S RESPONSIBILITIES FOR THE AUDIT OF THE FINANCIAL STATEMENTS (Continued)

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit and deserve attention.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statements of the current year and are therefore the key audit matters. We describe these matters in our independent auditor's report unless laws or regulations precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

2019

Annual Report 2020

January to December 2020

Year ended 31 December 2020 RMB

### **III. CORPORATE INFORMATION**

#### 1. Company profile

#### ✓ Applicable □ Not applicable

China Railway Signal & Communication Corporation Limited (the "Company") is a joint stock company limited liability company jointly sponsored on 29 December 2010 by China Railway Signal & Communication Corporation (renamed as China Railway Signal and Communication (group) Corporation Limited in 2017, hereinafter referred to as the "CRSC Group") as the promoter, in association with China National Machinery Industry Corporation, China Chengtong Holdings Group Ltd., China Reform Holdings Corporation Ltd., and CICC Jiacheng Investment Management Co., Ltd. (these four companies are collectively referred to as the "Other Promoters") approved by the State-owned Assets Supervision and Administration Commission of the State Council (國務院國有資產監督管理委員會) (the "SASAC") via Guo Zi Gai Ge [2010] No. 876 on 17 August 2010 in accordance with the relevant provisions of laws and administrative regulations of the PRC. The Company's headquarters are at 20th floor of Block A, CRSC Building, 1 Compound Automobile Museum South Road, Fengtai District, Beijing.

Upon approval of the China Securities Regulatory Commission's Reply on Issuance of Overseas Listed Foreign Shares by China Railway Signal & Communication Corporation Limited (Zheng Jian Xu Ke [2015] No. 1630), the Company has issued 1,789,819,000 H Shares with a nominal value of RMB1 each at an issue price of HK\$6.30 per share that were listed on the Hong Kong Stock Exchange from July to September 2015. The total amount of funds raised before deducting the issuance expenses was approximately HK\$11,275,859,700 and such H Shares commenced for trading on the Main Board of the Hong Kong Stock Exchange in August and September 2015. The Company's four state-owned shareholders, the CRSC Group, China National Machinery Industry Corporation, China Chengtong Holdings Group Ltd. and China Reform Holdings Corporation Ltd., converted a total of 178,982,000 state-owned legal person shares to H Shares during August and September 2015, which were then transferred to the National Council for Social Security Fund of the People's Republic of China.

According to the China Securities Regulatory Commission's Approval for Consent to the Registration of China Railway Signal & Communication Corporation Limited's Initial Public Offering (Zheng Jian Xu Ke [2019] No. 1135), as of 16 July 2019, the Company has issued 1,800,000,000 ordinary shares with a nominal value of RMB1 each at an issue price of RMB5.85 per share that were listed on the Sci-Tech innovation board of the Shanghai Stock Exchange. The total amount of funds raised before deduction of issuance expenses was RMB10,530,000,000.00 and such ordinary shares were commenced for trading on the Shanghai Stock Exchange's Sci-Tech innovation board on 22 July 2019.

As of 31 December 2020, the Company has accumulatively issued a total issued share capital of 10,589,819,000 shares with the accumulated share capital amounting RMB10,589,819,000.

Year ended 31 December 2020 RMB

### III. CORPORATE INFORMATION (Continued)

### 1. Company profile (Continued)

The Company and its subsidiaries (collectively referred to as the "Group") are mainly engaged in the following businesses: design and integration of rail transportation control system which mainly include the provision of comprehensive planning for investigation, design and control systems for rail transportation control system; equipment manufacturing of rail transportation control system which mainly includes production and sales of signal systems, communication systems, infrastructure equipment, information systems and other products; and system implementation services for rail transportation control system which include provision of construction, installation, testing, operation and maintenance services for rail transportation control system; and provision of services relating to municipal engineering projects and other construction projects.

The parent company and the ultimate controlling party of the Company is the CRSC Group based in the PRC.

The financial statements were approved by resolution by the Board of Directors of the Company on 26 March 2021.

### 2. Scope of consolidated financial statements

✓ Applicable □ Not applicable

The scope of consolidation of the consolidated financial statements was determined on the basis of control. For changes during this year, please refer to Note IX. 1.

# IV. BASIS OF PREPARATION OF THE FINANCIAL STATEMENTS

### 1. Basis of preparation

The financial statements have been prepared in accordance with Accounting Standards for Business Enterprises – Basic Standards issued by the Ministry of Finance and the specific accounting standards, application guidelines, interpretations and other relevant provisions (collectively referred to as the "Accounting Standards for Business Enterprises") promulgated and revised thereafter.

The financial statements are presented on a going concern basis.

The financial statements have been prepared under the historical cost as the pricing principle, except for certain financial instruments. If the assets are impaired, the corresponding provisions for impairment shall be made in accordance with related requirements.

# IV. BASIS OF PREPARATION OF THE FINANCIAL STATEMENTS (Continued)

### 2. Continuing operations

✓ Applicable □ Not applicable

There were no events or circumstances that resulted in material doubts about the Group's ability of continuing operations within 12 months since the end of the Reporting Period.

# V. SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES

Specific accounting policies and accounting estimates are as following:

✓ Applicable □ Not applicable

According to the characteristics of its production and operation, the Group formulated a series of specific accounting policies and made accounting estimates, the detail of which are mainly reflected in:

### 1. Statement of compliance with accounting Standards for Business enterprises

The financial statements present fairly and fully the financial position at 31 December 2020 and operating results and cash flows of the Company and the Group as of 2020 in accordance with Accounting Standards for Business Enterprises.

### 2. Accounting period

The accounting year of the Company is from 1 January to 31 December of each calendar year.

### 3. Operating cycle

### ✓ Applicable □ Not applicable

Operating cycle refers to the period from the purchase of assets of an enterprise for the purpose of processing to the realization of cash or cash equivalents. The Group's operating cycle is usually 12 months.

### 4. Functional currency

The functional currency of and the currency adopted for the preparation of these financial statements by the Group is RMB. Unless otherwise stated, all financial statements are denominated in RMB.

Year ended 31 December 2020 RMB

### V. SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (Continued)

5. Accounting methods for business combinations involving entities under common control and business combinations involving entities not under common control

### ✓ Applicable □ Not applicable

Business combinations are classified into business combinations involving entities under common control and business combinations involving entities not under common control.

### (1) Business combinations involving entities under common control

A business combination involving entities under common control is a business combination in which all of the combining entities are ultimately controlled by the same party or parties both before and after the combination, and that control is not transitory. For a business combination involving entities under common control, the party that, on the combination date, obtains control of another entity participating in the combination is the acquirer, while the other entity participating in the combination is the acquiree. The combination date is the date on which the acquirer effectively obtains control of the acquiree.

Assets and liabilities (including the goodwill recognised by the ultimate controlling party in acquisition of the acquiree) that are obtained by the acquirer in a business combination shall be measured at their carrying amounts at the date of combination as recorded by the ultimate controlling party. The difference between the carrying amount of the net assets obtained and the carrying amount of the consideration paid for the combination (or the aggregate face value of the shares issued as consideration) shall be adjusted to share premium under capital reserve and the balance of the capital reserve transferred under the original system. If the capital reserve is not sufficient to absorb the difference, any excess shall be adjusted against retained earnings.

### (2) Business combinations involving entities not under common control

A business combination involving entities not under common control is a business combination in which all of the combining entities are not ultimately controlled by the same party or parties both before and after the combination. For a business combination involving entities not under common control, the party that, on the acquisition date, obtains control of another entity participating in the combination is the acquirer, while the other entity participating in the combination is the acquirer. The acquisition date is the date on which the acquire effectively obtains control of the acquiree.

The acquiree's identifiable assets, liabilities and contingent liabilities acquired by the acquirer in a business combination involving entities not under common control shall be measured at their fair values on the acquisition date.

Year ended 31 December 2020 RMB

# V. SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (Continued)

- 5. Accounting methods for business combinations involving entities under common control and business combinations involving entities not under common control (Continued)
  - (2) Business combinations involving entities not under common control (Continued)

Goodwill is measured at cost being the excess of the aggregate of the fair value of the consideration transferred (or the fair value of the equity securities issued) and any fair value of the acquirer's previously held equity interest in the acquiree over the acquirer's interest in the fair value of the acquiree's net identifiable net assets. If the aggregate of the fair value of consideration transferred (or the fair value of the equity securities issued) and any fair value of the acquirer's previously held equity interest in the acquiree is lower than the acquirer's interest in the fair value of the acquiree's net identifiable net assets, the difference is, after reassessment of the fair value of each identifiable asset, liability and contingent liability acquired from the acquiree and the fair value of consideration transferred (or the fair value of the equity securities issued) and any fair value of the acquirer's previously held equity interest in the acquire from the acquiree and the fair value of the acquirer's previously held equity interest in the equity securities issued) and any fair value of the acquirer's previously held equity interest in the acquiree, recognised in profit or loss for the current period.

### 6. Preparing methods of consolidated financial statements

### ✓ Applicable □ Not applicable

The scope of consolidation in the consolidated financial statements is determined on the basis of control, including the financial statements of the Company and all of its subsidiaries. Subsidiaries refer to the entities controlled by the Company (including an enterprise, a separable part of the invested company, and the structured entities controlled by the Company, etc.).

When preparing the consolidated financial statements, the subsidiaries shall adopt the accounting year and accounting policies consistent with the Company. Assets, liabilities, equity, revenues, expenses and cash flows arising from all transactions between companies within the Group are eliminated in full on combinations.

When the amount of loss for the period attributable to the minority shareholders of a subsidiary exceeds the minority shareholders' portion of the opening balance of initial owners' equity of the subsidiary, the excess amount is still allocated against minority interests.

For a subsidiary that is acquired in a business combination involving enterprises not under common control, the operating results and cash flows of the acquiree shall be included in the consolidated financial statements from the date on which the Group obtains control, until the Group ceases its control. In the preparation of the consolidated financial statements, the financial statements of the subsidiaries shall be adjusted based on the fair values of the identifiable assets, liabilities and contingent liabilities determined on the acquisition date.

Year ended 31 December 2020 RMB

### V. SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (Continued)

### 6. Preparing methods of consolidated financial statements (Continued)

For a subsidiary that is acquired in a business combination involving enterprises under common control, the operating results and cash flows of the acquiree shall be included in the consolidated financial statements from the beginning of the period of combination. In the preparation of the comparative consolidated financial statements, the relative items of the previous financial statements shall be adjusted, and treated as if the reporting entity formed after the combination has existed since the ultimate controlling party began to implement the control.

If changes in relevant facts and circumstances gives rise to one or more changes in controlling factors, the Group will reassess whether it controls the investee.

Changes in the equity of the minority shareholders without a loss of control is accounted for as an equity transaction.

### 7. Accounting treatment of joint arrangement and joint operations

### ✓ Applicable □ Not applicable

A joint arrangement is either a joint operation or a joint venture. A joint operation is a joint arrangement whereby the parties that have joint control of the arrangement have rights to the assets, and obligations for the liabilities, relating to the arrangement. A joint venture is a joint arrangement whereby the parties that have joint control of the arrangement have rights to the net assets of the arrangement.

A party of joint venture recognises its interest in a joint operation: its assets held separately and its share of any assets held jointly; its liabilities, assumed separately and its share of any liabilities assumed jointly; its revenue from the sale of its share of the output arising from the joint operation; its share of the revenue from the sale of the output by the joint operation; and its expenses incurred separately and its share of any expenses incurred jointly.

### 8. Recognition Standard for cash and cash equivalents

Cash comprises the Group's cash on hand and deposits that can be withdrawn on demand at any time; Cash equivalents are short-term, highly liquid investments held by an enterprise, that are readily convertible into known amounts of cash and which are subject to an insignificant risk of changes in value.

Year ended 31 December 2020 RMB

# V. SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (Continued)

### 9. Foreign currency transactions and foreign currency translations

✓ Applicable □ Not applicable

The Group translates the amounts of foreign currency transactions into its functional currency.

Foreign currency transactions are initially recorded using the functional currency spot exchange rate ruling at the date of transactions. At the balance sheet date, monetary items denominated in foreign currencies are translated into functional currencies at the spot exchange rates ruling at the balance sheet date. All differences are recognised in profit or loss, except those related to a specific-purpose borrowing denominated in foreign currency that qualify for capitalisation for the purpose of acquisition or construction of qualifying assets. Non-monetary items denominated in foreign spot exchange rates at the transaction dates and do not change the amounts of functional currency. Non-monetary items denominated in foreign currencies that are measured at fair value are translated using the foreign exchange spot rate at the date the fair value is determined; the exchange differences are recognised in profit or loss or other comprehensive income depending on the nature of the non-monetary items.

For foreign operations, the Group translates its functional currencies into RMB in preparing the financial statements. All assets and liabilities in the balance sheet are translated at the spot exchange rates ruling at the balance sheet date; the shareholders' equity, with the exception of "retained earnings", is translated at the spot exchange rates ruling at the transaction dates; income and expenditure in the statement of profit or loss are translated at the spot exchange rates at the transaction dates. Exchange fluctuations arising from the translations mentioned above are recognised as other comprehensive income. When an overseas business is disposed of, the component of other comprehensive income related to the overseas business will be transferred to profit or loss in the same period and part of the disposal will be calculated according to the disposal ratio.

Foreign currency cash flows and cash flows of overseas subsidiaries are translated into RMB at the spot exchange rates ruling at the dates of the cash flows. The effect of changes in exchange rates on cash is presented as a reconciled item separately in the statement of cash flows.

### 10. Financial instruments

#### ✓ Applicable □ Not applicable

Financial instruments refer to contracts that form the financial assets of an enterprise and form financial liabilities or equity instruments of other units.

Year ended 31 December 2020 RMB

# V. SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (Continued)

### 10. Financial instruments (Continued)

### Recognition and derecognition of financial instruments

The Group recognises a financial asset or a financial liability when it becomes a party to the contractual provisions of a financial instrument.

A financial asset (or part of a financial asset, or a portion of a group of similar financial assets) is derecognised if it meets the following conditions, that is, it is written off from its account and balance sheet:

- (1) The rights to receive cash flows from financial assets expire;
- (2) Transfer the right to receive cash flows from financial assets, or undertake the obligation to pay the full amount of received cash flows to third parties in a timely manner under the "pass-through agreement"; and (a) transfer substantially all the risks and rewards of ownership of the financial asset, or (b) abandon the control of the financial asset, although the Group does not substantially transfer or retain almost all of the risks and rewards of ownership of the financial asset.

If the liability of a financial liability has been fulfilled, revoked or expired, the financial liability shall be derecognised. If an existing financial liability is replaced by another financial liability of the same creditor with substantially different terms, or if the terms of the existing liability are substantially all modified, such replacement or modification shall be deemed to have derecognised the original liability and to have recognised the new liability, the difference of which shall be included in the profit or loss for the period.

Financial assets traded in regular ways are recognised and derecognised on a trading date. Trading of financial assets in regular ways refers to the collection or delivery of financial assets within the time limit stipulated by regulations or common practices in accordance with the contractual terms. Trading day is the date on which the Group undertakes to buy or sell the financial assets.

### Classification and measurement of financial assets

The financial assets of the Group are classified upon the initial recognition based on the business model of the Group's corporate management financial assets and the characteristics of the financial assets' contractual cash flows: financial assets measured at fair value through profit or loss (FVTPL), financial assets measured at amortised cost, and financial assets measured at fair value through other comprehensive income (FVTOCI). All affected financial assets would be reclassified if and only if the Group changes its business model for managing financial assets.

Year ended 31 December 2020 RMB

# V. SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (Continued)

### 10. Financial instruments (Continued)

### Classification and measurement of financial assets (Continued)

Financial assets are measured at fair value at initial recognition. However, if the accounts receivable or bills receivable arising from the sale of goods or the provision of services do not contain significant financing components or do not consider financing components not exceeding one year, the financial assets shall be initially measured at the transaction price.

For financial assets measured at fair value through profit or loss, the related transaction costs are directly recognised in profit or loss for the period. Transaction costs of other types of financial assets are included in the value initially recognised.

Subsequent measurement of financial assets depends on their classification:

### Debt instrument investments measured at amortised cost

Financial assets are classified as financial assets measured at amortised cost if they meet the following conditions: the business model for managing the financial assets is to collect contractual cash flows; the contractual terms of the financial assets stipulate that cash flows on a specific date are solely for the payments of the principals and interest incurred from the outstanding principal amount. Such financial assets are recognised as interest income using the effective interest rate method. The gains or losses arising from derecognition, modification or impairment are recognised in profit or loss for the period.

### Debt instrument investments measured at fair value through other comprehensive income

Financial assets are classified as financial assets measured at fair value through other comprehensive income if they meet the following conditions: the Group's business model for managing the financial assets is to both collect contractual cash flows and sell the financial assets; the contractual terms of the financial assets stipulate that cash flows on a specific date are solely for the payments of the principals and interest incurred from the outstanding principal amounts. Such financial assets are recognised as interest income using the effective interest rate method. Other changes in fair values are included in other comprehensive income except for interest income, impairment losses and exchange differences which are recognised in profit or loss for the period. When the financial assets are derecognised, the cumulative gains or losses previously recognised in other comprehensive income are transferred from it and included in profit or loss for the period.

Year ended 31 December 2020 RMB

# V. SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (Continued)

### 10. Financial instruments (Continued)

### Classification and measurement of financial assets (Continued)

### Equity instrument investments measured at fair value through other comprehensive income

The Group irrevocably chooses to designate certain non-trading equity instrument investments as financial assets measured at fair value through other comprehensive income, and only the relevant dividend income (excluding dividend income explicitly recovered as part of investment cost) is included in profit or loss for the period. Subsequent changes in fair value are included in other comprehensive income with no impairment provision required. When the financial assets are derecognised, the cumulative gains or losses previously recognised in other comprehensive income are transferred from it and included in retained earnings.

### Financial assets measured at fair value through profit or loss

Financial assets other than the above-mentioned financial assets measured at amortised cost and financial assets measured at fair value through other comprehensive income are classified as financial assets at fair value through profit or loss. For such financial assets, fair value is used for subsequent measurement, and all changes in fair value are recognised in profit or loss for the period.

### Classification and measurement of financial liabilities

Upon initial recognition, financial liabilities of the Group are classified as financial liabilities at fair value through profit or loss and other financial liabilities. For financial liabilities measured at fair value through profit or loss, the relevant transaction fee is directly recognised in profit or loss for the period, and the related transaction fee of other financial liabilities is included in their initial amount recognised.

Subsequent measurement of financial liabilities depends on their classification:

### Financial liabilities measured at fair value through profit or loss

Financial liabilities measured at fair value through profit or loss include financial liabilities held for trading (including derivatives that are financial liabilities) and those designated as financial liabilities at fair value through profit or loss upon initial recognition. Held-for-trading financial liabilities (including derivatives that are financial liabilities) are subsequently measured at fair value. Except for hedging accounting, all changes in fair value are recognised in profit or loss for the period. Financial liabilities designated to be measured at fair value through profit or loss are subsequently measured at fair value. Changes in fair value caused by changes in the Group's own credit risk are recognised in other comprehensive income, while other changes in fair value are included in profit or loss for the period. When changes in fair value caused by changes in the Group's own credit risk included in other comprehensive income may result in or enlarge accounting mismatches in profit or loss, the Group shall include all changes in fair value (including the amount of impact of changes in its own credit risk) in profit or loss for the period.

Year ended 31 December 2020 RMB

# V. SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (Continued)

### 10. Financial instruments (Continued)

Classification and measurement of financial assets (Continued)

Financial liabilities measured at fair value through profit or loss (Continued)

Only if one of the following conditions is met can financial liabilities be designated as financial liabilities at fair value through profit or loss at initial recognition:

- (1) It can eliminate or significantly reduce accounting mismatch.
- (2) The financial instrument portfolio is managed, evaluated and reported to key management on fair value basis according to the documented written risk management or investment strategy.
- (3) Hybrid instruments that contain one or more embedded derivatives, unless the embedded derivatives have no significant effect on the cash flow of the hybrid instrument, or the embedded derivatives should obviously not be separated from the related hybrid instruments.
- (4) Hybrid instruments containing embedded derivatives that need to be separated but cannot be measured individually after it has been acquired or on the subsequent dates of balance sheet.

A financial liability designated as financial liabilities measured at fair value through profit or loss for the period by enterprises at initial recognition shall not be reclassified as other financial liabilities; other financial liabilities shall not be re-designated as financial liabilities measured at fair value through profit or loss for the period after initial recognition.

### Other financial liabilities

For such financial liabilities, subsequent measurement is made at amortised cost using effective interest method.

### Impairment of financial assets

Based on expected credit losses, the Group performs impairment testing on the financial assets at amortised cost, debt instrument investments measured at fair value through other comprehensive income, lease receivables, contract assets, loan commitments, and financial guarantee contracts and recognises loss allowance.

For receivables that do not contain significant financing components and contractual assets, the Group uses a simplified measurement approach to measure loss allowance at the full lifetime expected credit loss.

Year ended 31 December 2020 RMB

### V. SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (Continued)

### 10. Financial instruments (Continued)

### Impairment of financial assets (Continued)

For lease receivables, receivables that contain significant financing components and contractual assets, the Group uses a simplified measurement approach to measure loss allowance at the full lifetime expected credit loss.

In addition to the above-mentioned financial assets, loan commitments and financial guarantee contracts using the simplified measurement method, the Group assesses whether its credit risk has increased significantly since the initial recognition on each balance sheet date. If the credit risk has not increased significantly since the initial recognition, it is at the first stage, and the Group measures loss allowance according to the amount of expected credit losses during the next 12 months and calculates the interest income according to the book balance and the actual interest rate; if the credit risk has increased significantly since the initial recognition, but no credit impairment has occurred, it is at the second stage, and the Group measures loss allowance at the full lifetime expected credit loss and calculates the interest income according to the book balance and the actual interest rate. If credit impairment occurs after the initial recognition, it is at the third stage, and the Group measures loss allowance at the full lifetime expected credit loss and calculates the interest income according to the book balance and the actual interest rate. If credit impairment occurs after the initial recognition, it is at the third stage, and the Group measures loss allowance at the full lifetime expected credit loss and calculates the interest income according to the amortised cost and the actual interest rate. For financial instruments with relatively low credit risk only on the balance sheet date, the Group assumes that their credit risk has not increased significantly since the initial recognition.

The Group evaluates the expected credit losses of financial instruments on individual items and portfolios. Taking into account the credit risk characteristics of different customers, the Group evaluates the expected credit losses of receivables based on the combination of aging.

Please refer to Note X.3 for the Group's criteria for judging the significant increase in credit risk, the definition of credit-impaired assets, the assumption of measuring expected credit losses, and disclosures.

When the Group no longer reasonably expects to be able to recover all or part of the contractual cash flows of the financial assets, the Group will write down the carrying amount of the financial assets directly.

### Offsetting of financial instruments

If the following conditions are met, financial assets and financial liabilities are presented in the balance sheet with the net amount after offsetting each other; there is a currently enforceable legal right to offset the recognised amount; net settlement, or simultaneous realisation of the financial assets and settlement of the financial liabilities is planned.

Year ended 31 December 2020 RMB

# V. SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (Continued)

#### 10. Financial instruments (Continued)

#### Financial guarantee contracts

A financial guarantee contract is a contract by which the issuer pays a specified amount to a contract holder who has suffered a loss when the specific debtor fails to pay the debt when due in accordance with terms of the debt instrument. Financial guarantee contracts are measured at fair value at initial recognition. Except for the financial guarantee contracts that are designated as financial liabilities at fair value through profit and loss, the other financial guarantee contracts are subsequently measured after initial recognition according to the amount of expected credit loss allowance determined on the balance sheet date and the balance of the initial recognition amount after deducting the accumulated amortisation amount recognised according to the revenue recognition principle, whichever is higher.

#### Derivative financial instruments

The Group uses derivative financial instruments, such as forward contracts, forward commodity contracts and interest rate swaps, to hedge exchange rate risk, commodity price risk and interest rate risk, respectively. Derivative financial instruments are initially measured at fair value at the date when the derivative contracts are entered into and are subsequently measured at their fair values. Derivative financial instruments with a positive fair value are recognised as an asset, and that with a negative fair value is recognised as a liability.

Other than hedging accounting, gains or losses arising from changes in the fair value of derivatives are directly recognised in profit or loss for the period.

#### Transfer of financial assets

The Group derecognises a financial asset when it has transferred substantially all the risks and rewards of ownership of the financial asset to the transferee; the Group does not derecognise the financial asset when it retains substantially all the risks and rewards of ownership of the financial asset.

If the Group neither transfers nor retains substantially all the risks and rewards of ownership of financial assets, the related accounting treatments of such financial assets are as follows: if the control of the financial assets is abandoned, the financial asset are derecognised and the assets and liabilities arising are recognised. If the control of the financial assets is not abandoned, the relevant financial assets are recognised according to the extent to which they continue to be involved in the transferred financial asset and the related liabilities are recognised accordingly.

If the transferred financial assets continue to be involved through the provision of financial guarantee method, the assets that continue to be involved are recognised according to carrying amount of the financial assets and the financial guarantee amount, whichever is lower. The amount of the financial guarantee is the maximum amount of the consideration received that will be required to be repaid.

Year ended 31 December 2020 RMB

### V. SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (Continued)

11. Bills receivable

Methods for determining and accounting of ECL of bills receivable

□ Applicable ✓ Not applicable

### 12. Accounts receivable

Method for determining and accounting of expected credit loss of accounts receivable

✓ Applicable  $\Box$  Not applicable

Please refer to Note V. 10.

### 13. Receivable for financing

✓ Applicable □ Not applicable

### 14. Other receivables

Methods for determining and accounting of ECL of other receivables

✓ Applicable □ Not applicable

Please refer to Note V. 10.

### 15. Inventories

✓ Applicable □ Not applicable

The Group's inventories include commodities, raw materials, semi-finished goods and turnover materials.

Inventories are initially measured at cost. Cost of inventories comprises costs of purchase, costs of processing and other costs. The actual cost of inventories transferred out is determined using the weighted average method. Turnover materials include low value consumables and packing materials, which are amortised using immediate write off.

Inventories are accounted for using the perpetual inventory system.

Year ended 31 December 2020 RMB

# V. SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (Continued)

#### 15. Inventories (Continued)

At the balance sheet date, inventories are measured at the lower of cost and net realisable value. If the cost is higher than the new realizable value, provision for impairment of inventories is made and recognized in profit or loss for the period. If the factors that give rise to the provision in prior years are not in effect in the current year, as a result that the net realisable value of inventories is higher than their carrying amount, the original amount of the written-down is reversed within previously impaired amount and the reversed amount is included in profit or loss for the period.

Net realisable value is the estimated selling price in the ordinary course of business less the estimated costs of completion, the estimated selling expenses and relevant taxes. Provision is considered on a category basis for inventories in large quantity and with relatively low unit prices and on an individual basis for all other inventories.

### 16. Contract assets

### (1). Method and standard for determination of contract assets

#### ✓ Applicable □ Not applicable

The Group lists contract assets or contract liabilities in the balance sheet based on the relationship between performance obligations and customer payments. The Group will present the net amount after offsetting the contract assets with the contract liabilities under the same contract.

Contractual assets are the right to receive consideration for goods or services that have been transferred to a customer, and that right depends on other factors beyond the passage of time.

#### (2). Methods for determining and accounting of ECL of contract assets

### 20. Long-term receivables

Methods for determining and accounting of ECL of long-term receivables

✓ Applicable □ Not applicable

Please refer to Note V.10.

### 21. Long-term equity investments

✓ Applicable □ Not applicable

Long-term equity investments include equity investments in subsidiaries, joint ventures and associates.

Long-term equity investments are initially measured at its initial investment cost when acquired. For a long-term equity investment acquired through business combination involving enterprises under common control, the initial investment cost is the attributable share of the carrying amount of the owners' equity of the acquiree in the ultimate controlling party's consolidated financial statements on the date of combination. The difference between initial investment cost and the carrying amount of the consolidated consideration is adjusted to capital reserve (if the balance of capital reserve is not sufficient to absorb the difference, any excess shall be adjusted to retained earnings). For other comprehensive income before the combination date, the same basis as direct disposal of the related assets or liabilities of the investee is adopted when the investment is disposed of. Shareholders' equity recognised as a result of changes in Shareholders' equity other than net profit or loss, other comprehensive income and profits distribution of the investee is transferred to profit or loss for the period when the investment is disposed of. Among which, after the disposal, the long-term equity investments will still be carried forward in proportion, and if it is converted into financial instruments after the disposal, it will be carried forward in full. For a longterm equity investment acquired through business combination not involving enterprises under common control, the combination cost is taken as the initial investment cost (if the business combination not involving enterprises under common control is realised step by step through multiple transactions, the initial investment cost will be the sum of the carrying amount of the equity investment held by the acquiree prior to the acquisition date and the new investment cost on the acquisition date). The combination cost includes the sum of the assets paid by the purchaser, the liabilities incurred or assumed, and the fair value of the issued equity securities. For other comprehensive income held before the acquisition date and recognised as a result of the adoption of the equity method, the same basis as direct disposal of the related assets or liabilities of the invest is adopted when the investments are disposed of. Shareholders' equity recognised as a result of changes in Shareholders' equity other than net profit or loss, other comprehensive income and profit distribution of the investee is transferred to the profit or loss for the period when the investment is disposed of. Among which, after the disposal, the long-term equity investments will still be transferred in proportion, and if it is converted into financial instruments after the disposal, it will be transferred in full.

Year ended 31 December 2020 RMB

# V. SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (Continued)

#### 21. Long-term equity investments (Continued)

In addition to the long-term equity investments acquired by the long-term investment formed by business combination, the initial investment cost is determined according to the following methods: if acquired by cash payment, the actual purchase price and the expenses, taxes and other required expenditures directly related to the long-term equity investment will be take as the initial investment cost; if acquired through issuing equity securities, the fair value of the issued equity instruments will be taken as the initial investment cost.

The long-term equity investments that the Company can exercise control over the investee is accounted for using the cost method in the Company's individual financial statements. Control refers to having the power to the investee to enjoy variable returns by participating in the relevant activities of the investee and having the ability to use the power of the investee to influence the amount of returns.

Under the cost method, a long-term equity investment is measured at initial investment cost. When additional investment is made or the investment is recouped, the cost of the long-term equity investment shall be adjusted. The cash dividends or profits declared by the Investee are recognised as investment income for the period.

When the Group has joint control or significant influence over the investee, the long-term equity investments shall be accounted for using the equity method. Joint control is the contractually agreed sharing of control over an arrangement, and exists only when the decision making about the relevant activities requires the unanimous consent of the parties sharing control. Significant influence is the power to participate in the financial and operating policy decisions of the investee but is not control or joint control over those policies.

Under the equity method, where the initial investment cost of a long-term equity investment exceeds the Group's share of the fair value of the investee's identifiable net assets at the time of acquisition, it will be classified as the initial investment cost of the long-term equity investment. Where the initial investment cost of the long-term investment is less than the Group's share of the fair value of the investee's identifiable net assets at the time of acquisition, it will be net assets at the time of investment, the difference is recognised in profit or loss for the period, and the cost of the long-term equity investment is adjusted accordingly.

Year ended 31 December 2020 RMB

### V. SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (Continued)

#### 21. Long-term equity investments (Continued)

Under the equity method, after a long-term equity investment is acquired, the Group recognises its share of the net profit or loss and other comprehensive income of the investee for the period as investment income or loss and other comprehensive income for the period, respectively, and adjusts the carrying amount of the long-term equity investment. When recognizing the share of the net profit or loss of the investee to be entitled, based on the fair value of the investee's identifiable assets at the time of acquiring the investment, in accordance with the Group's accounting policies and accounting periods, the Group will offset the profits or losses arising from internal transactions between associates and joint ventures to calculate the portion attributable to the investor in proportion to be enjoyed (but if the losses of internal transaction are asset impairment losses, they shall be fully recognised). The net profit of the investee is recognised after the adjustment, except that the assets that are invested or sold constitute businesses. The portion to be enjoyed shall be calculated according to the profit or cash dividend declared to be distributed by the investee, and the carrying amount of the long-term equity investment shall be reduced accordingly.

The Group discontinues recognising its share of net losses of the investee after the carrying amount of the long-term equity investment together with any long-term interests that in substance form part of its net investment in the investee is reduced to zero, except that the Group has incurred obligations to assume additional losses. For changes in shareholders' equity other than net profit or loss, other comprehensive income and profit distribution of the investee, the carrying amount of long-term equity investment shall be adjusted and recognised in shareholders' equity.

For disposal of a long-term equity investment, the difference between the carrying amount and the actual price is recognised in profit or loss for the period. For long-term equity investments under the equity method, if the equity method is adopted due to the termination of the disposal, other comprehensive income related to the original equity method is accounted for on the same basis as the investee's directly disposes of the related assets or liabilities. Shareholders' equity recognised as a result of changes in Shareholders' equity other than net profit or loss, other comprehensive income and profit distribution of the investee is all transferred to profit or loss for the period; under the equity method, other comprehensive income related to the original equity method is accounted for on the same basis as the investee's direct disposal of relevant assets or liabilities, and is transferred to the profit or loss for the period in proportion. Shareholders' equity recognised as a result of changes in Shareholders' equity recognised as a result of changes in profit or loss, other comprehensive income related to the original equity method is accounted for on the same basis as the investee's direct disposal of relevant assets or liabilities, and is transferred to the profit or loss for the period in proportion. Shareholders' equity recognised as a result of changes in Shareholders' equity other than net profit or loss, other comprehensive income and profit distribution of the investee is transferred to the profit or loss for the period is accounted for on the same basis as the period in proportion.

Year ended 31 December 2020 RMB

# V. SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (Continued)

### 22. Investment properties

✓ Applicable □ Not applicable

### (1). In respect of investment properties measured at cost:

An investment property is a property held to earn rentals or for capital appreciation or for both purposes. It includes leased land use rights and leased buildings.

An investment property is measured initially at cost. Subsequent expenditures incurred for such investment properties are included in the cost of the investment properties when it is probable that economic benefits associated with an investment property will flow to the Group and the cost can be measured reliably. Otherwise, they are recognised in profit or loss for the period in which they are incurred.

The Group uses the cost model for subsequent measurement of investment properties, and adopts a depreciation or amortisation policy for the investment properties which is consistent with that for buildings and land use rights.

### 23. Fixed assets

#### (1). Recognition criteria

### ✓ Applicable □ Not applicable

A fixed asset is recognised only when it is probable that economic benefits associated with the asset will flow to the Group and the cost of the asset can be measured reliably. Subsequent expenditures incurred for the fixed asset that meet the recognition criteria shall be included in the cost of the fixed asset, and the carrying amount of the component of the fixed asset that is replaced shall be derecognised. Otherwise, such subsequent expenditures shall be recognised in profit or loss for the period in which they are incurred.

Fixed assets are initially measured at cost, and taking into account the impact of factors such as projected disposal costs. The purchase cost of a fixed asset comprises its purchase price, related taxes and any directly attributable expenditure for bringing the asset to its working condition for its intended use.

Year ended 31 December 2020 RMB

# V. SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (Continued)

23. Fixed assets (Continued)

### (2). Depreciation method

# ✓ Applicable □ Not applicable

Depreciation is calculated on the straight-line basis to write off the cost of each item of fixed assets to its residual value over its estimated useful life. The estimated useful lives, estimated residual value and annual depreciation rates of fixed assets are as follows:

| Categories              | Depreciation method | Useful life<br>(year) | Residual value rate | Annual<br>depreciation<br>rate |
|-------------------------|---------------------|-----------------------|---------------------|--------------------------------|
| Houses and buildings    | Average age method  | 20-40 years           | 3%-10%              | 2.25%-4.85%                    |
| Machinery equipment     | Average age method  | 5-10 years            | 3%-10%              | 9.00%-19.40%                   |
| Means of transportation |                     |                       |                     |                                |
| vehicles                | Average age method  | 5-8 years             | 3%-10%              | 11.25%-19.40%                  |
| Electronic equipment    |                     |                       |                     |                                |
| and others              | Average age method  | 3-10 years            | 3%-10%              | 9.00%-32.33%                   |

The Group reviews the useful life, estimated net residual value of a fixed asset and the depreciation method applied at least once at each year-end, and make adjustments when necessary.

# (3). The basis, valuation and depreciation method for the fixed assets acquired under financing leases

□ Applicable ✓ Not applicable

### 24. Construction in progress

✓ Applicable □ Not applicable

Construction in progress is recognised based on the actual construction expenditures incurred. It includes all types of expenditures necessary to be incurred during the construction period, capitalised borrowing costs on related borrowings before the asset is ready for intended use, and other relevant expenditures.

Construction in progress is transferred to fixed assets, intangible assets and investment properties when the asset is ready for its intended use.

Year ended 31 December 2020 RMB

# V. SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (Continued)

### 25. Borrowing costs

✓ Applicable □ Not applicable

Borrowing costs refer to interest and other related costs arising from the Group's borrowing. Borrowing costs include interest, amortisation of discounts or premiums, ancillary expenses and exchange differences arising from foreign currency borrowings.

Borrowing costs directly attributable to the acquisition, construction or production of a qualifying asset are capitalised when such costs fulfil the conditions of capitalisation, whereas other borrowing costs are recorded in profit or loss for the period. Qualifying assets are assets (fixed assets, inventories, etc.) that necessarily take a substantially long period of time for acquisition, construction or production to get ready for their intended use or sale.

The capitalisation of borrowing costs commences only when all of the following conditions are satisfied:

- (1) Expenditures for the asset have been incurred;
- (2) Borrowing costs have been incurred; and
- (3) Activities relating to the acquisition, construction or production of the asset that are necessary to bring the asset to get ready for its intended use or sale have commenced.

Capitalisation of borrowing costs ceases when the qualifying asset being acquired, constructed or produced becomes ready for its intended use or sale. Any borrowing costs subsequently incurred shall be recognised in profit or loss for the period in which they are incurred.

During the capitalisation period, the amount of interest to be capitalised for each accounting period shall be determined as follows:

- for specific borrowings, the borrowing costs eligible for capitalisation are the actual interest costs incurred during the current period deducted by any temporary interest or investment income;
- (2) for general borrowings, the borrowing costs eligible for capitalisation are determined by applying a capitalisation rate to the excess amounts of cumulative expenditures on the asset over the weighted average of cumulative expenditures on the asset of specific borrowings multiplying the weight average rate of general borrowings.

Year ended 31 December 2020 RMB

### V. SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (Continued)

### 25. Borrowing costs (Continued)

Capitalisation of borrowing costs shall be suspended during periods in which the acquisition, construction or production of qualifying assets is interrupted abnormally for a continuous period of more than three months except the necessary procedures for the assets to get ready for their intended use or sale. The borrowing costs incurred during the suspension period shall be recognised as expenses in profit or loss for the period until the acquisition, construction or production of the asset is resumed.

### 26. Biological assets

□ Applicable ✓ Not applicable

### 27. Oil and gas assets

□ Applicable ✓ Not applicable

### 28. Right-of-use assets

✓ Applicable □ Not applicable

The Group's right-of-use assets include buildings, means of transportation vehicles.

On the commencement date of the lease term, the Group recognises its right to use the leased assets over the lease term as right-of-use assets, the amount of which includes: the amount of the initial measurement of the lease liability; any lease payments made at or before the commencement date of the lease term less any lease incentives already received; any initial direct costs incurred by the lessee; an estimate of costs to be incurred by the lessee in dismantling and removing the leased asset, restoring the site on which it is located or restoring the leased asset to the condition required by the terms and conditions of the lease. The Group depreciates the right-of-use assets by using the straight-line method. If it is reasonable to determine the ownership of the leased asset at the expiration of the lease term, the Group shall depreciate the leased assets can be obtained at the expiry of the lease term, the Group shall depreciate the leased assets over the remaining useful life of the lease term, the assets, whichever is shorter.

The Group shall remeasure lease liabilities according to the present value of the changed lease payments and adjust the book value of the right-of-use assets accordingly. However, if the carrying amount of the right-of-use assets is reduced to zero, yet there is still a further reduction in the measurement of the lease liabilities, the Group recognises any remaining amount of the remeasurement in profit or loss for the period.

Year ended 31 December 2020 RMB

# V. SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (Continued)

#### 29. Intangible assets

### (1). Valuation methods, useful life and impairment test

### ✓ Applicable □ Not applicable

Intangible assets are recognised only when it is probable that the economic benefits associated with the asset will flow into the Group and the costs can be measured reliably. Intangible assets are measured initially at cost. Intangible assets acquired through business combination not involving enterprises under common control with a fair value that can be reliably measured are recognised separately as intangible assets and measured at fair value.

The useful life of the intangible assets shall be determined according to the period over which it is expected to generate economic benefits for the Group. An intangible asset shall be regarded as having an indefinite useful life when there is no foreseeable limit to the period over which the asset is expected to generate economic benefits for the Group.

The useful lives of each category of intangible assets are as follows:

| Item                   | Useful life |
|------------------------|-------------|
| Land use rights        | 50 years    |
| Patents                | 5-8 years   |
| Software               | 5 years     |
| Unfinished contract    | 2-3 years   |
| Customer relationships | 5-9 years   |

Land use rights obtained by the Group are usually accounted for as intangible assets. The land use rights of the self-developed buildings including plants are measured as intangible assets and buildings are measured as fixed assets, respectively. With respect to the land use rights purchased together with buildings, the acquisition cost is allocated between the two parts proportionately, or otherwise, is wholly accounted for as fixed assets.

Intangible assets with finite useful lives are amortised over their useful lives using the straight-line method. The Group reviews the useful lives and the amortisation method for intangible assets with finite useful lives at least once at each year-end, and makes adjustments when necessary.

Year ended 31 December 2020 RMB

### V. SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (Continued)

- 29. Intangible assets (Continued)
  - (2). Accounting policies for internal research and development expenditure

### ✓ Applicable □ Not applicable

The Group classifies the expenditure in an internal research and development project into expenditure at the research phase and expenditure at the development phase. Expenditure at the research phase is recognised in profit or loss for the period in which it is incurred. Expenditure at the development phase is capitalised when the Group can demonstrate all of the followings: the technical feasibility of completing the intangible asset so that it will be available for use or sale; the intention to complete the intangible asset and use or sell it; how the intangible asset will generate probable future economic benefits. Among other things, the Group can demonstrate the existence of a market for the output of the intangible asset or the intangible asset itself or, if it is to be used internally, the usefulness of the intangible asset; the availability of adequate technical, financial and other resources to complete the development and the ability to use or sell the intangible asset; and its ability to measure reliably the expenditure attributable to the intangible asset during its development. Expenditure at the development phase that does not meet the above criteria is recognised in profit or loss for the period in which it is incurred.

### 30. Long-term impairment of assets

### ✓ Applicable □ Not applicable

The Group determines the impairment of assets other than inventories, contract assets, deferred income taxes and financial assets based on the following methods:

The Group assesses at the balance sheet date whether there is any indication that the assets may be impaired. If any indication exists that such assets may be impaired, the Group estimates the recoverable amount of the asset and performs impairment tests. Goodwill arising in a business combination and an intangible asset with an indefinite useful life shall be tested for impairment at least at each year end, irrespective of whether there is any indication that the asset may be impaired. Intangible assets that have not been ready for intended use are tested for impairment each year.

The recoverable amount of an asset is the higher of its fair value less costs to sell and the present value of the future cash flows expected to be derived from the asset. The Group estimates the recoverable amount on an individual basis. If it is difficult to estimate the recoverable amount of an individual asset, the Group determines the recoverable amount of the asset group to which the asset belongs. Identification of an asset group shall be based on whether major cash inflows generated by the asset group are independent from the cash inflows from other assets or asset groups.

Year ended 31 December 2020 RMB

# V. SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (Continued)

### 30. Long-term impairment of assets (Continued)

When the recoverable amount of an asset or asset group is less than its carrying amount, the carrying amount shall be reduced to its recoverable amount by the Group. The reduced amount is recognised in profit or loss for the current period. A provision for impairment loss of the asset is recognised accordingly.

For the purpose of impairment testing for goodwill, the carrying amount of goodwill acquired in a business combination is allocated from the acquisition date on a reasonable basis to each of the related asset groups; if it is difficult to allocate to the related asset groups, it is allocated to each of the related set of asset groups. Each of the related asset groups or set of asset groups is an asset group or set of asset groups that is able to benefit from the synergies of the business combination and is not larger than a reportable segment determined by the Group.

In testing an asset group or a set of asset groups including goodwill for impairment, if there is indication of impairment, the Group shall first test the asset group or the set of asset groups excluding goodwill for impairment. It shall determine and compare the recoverable amount with the related carrying amount and recognise any impairment loss. After that, the Group shall test the asset group or set of asset groups including goodwill for impairment. The carrying amount of the related asset group or set of asset group is compared to its recoverable amount. If the recoverable amount of the asset group or set of asset groups is lower than its carrying amount, an impairment loss is first reduced by the carrying amount of the goodwill allocated to the asset group or set of asset groups and then, the carrying amount of other assets (excluding goodwill) within the asset group or set of asset groups pro rata based on the carrying amount of each asset.

Once the above impairment loss is recognised, it shall not be reversed in subsequent accounting periods.

### 31. Long-term prepayments

✓ Applicable □ Not applicable

Long-term prepayments are amortised on the straight-line basis. The amortisation period is as follows:

**Amortisation period** 

Costs of improvements to fixed assets under operating leases

2-5 years

Year ended 31 December 2020 RMB

# V. SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (Continued)

### 32. Contract liabilities

### Methods for determining contract liabilities

### ✓ Applicable □ Not applicable

Contractual liabilities are the obligation spent to transfer goods or services to customers at a price received or receivable, such as amounts that the business has received prior to the transfer of promised goods or services.

The Group will present the net amount after offsetting the contract assets with the contract liabilities under the same contract.

### 33. Employee benefits

Employee compensation includes short-term compensation, and after-service benefits, termination benefits and other long-term employee benefits provided in various forms of consideration other than share-based payment given by the Group in exchange for service rendered by employees or compensations for the termination of employment relationship. The benefits that the Group provides to the spouse, children and dependents of the employees, the late employees' family and other beneficiaries also shall be deemed as employee benefits.

### (1). Accounting methods for short-term remuneration

### ✓ Applicable □ Not applicable

During an accounting period when employees render services, short-term remuneration actually incurred are recognised as a liability, and charged to profit or loss or in related costs of assets for the current period.

### (2). Accounting methods for post-employment benefits

### ✓ Applicable □ Not applicable

### Post-employment benefits (defined contribution plan)

If employees of the Group participate in the basic pension insurance and unemployment insurance plans managed by local governments, the relevant expenditures are recorded in the relevant asset costs or profit or loss for the current period when incurred. In addition, the Group provides an annuity plan for its eligible employees in accordance with the Labour Law. The Group's withdrawals and deposits for its employees are calculated based on a certain percentage of the total salary of the employees and the length of service.

Year ended 31 December 2020 RMB

# V. SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (Continued)

#### 33. Employee benefits (Continued)

#### (2). Accounting methods for post-employment benefits (Continued)

#### Post-employment benefits (defined benefit plans)

In addition to the above-mentioned benefit plans, the Group provides supplementary retirement benefits to its retired employees. These plans include monthly pension benefits, medical reimbursement benefits, annual medical insurance premiums and funeral benefits for employees after their retirement. The amount of the subsidies is determined based on the period during which the employee serves the Group and the relevant subsidy benefit policy.

These benefit plans beyond the scope of overall planning are considered to be based on a defined benefit plan. The defined benefit plan is calculated annually by an independent actuary using the projected unit credit method. The present value of the defined benefit obligations determined at the market yield of the government bonds during the defined benefit obligation period, and discounted over estimated future cash outflow. If there is an asset in the defined benefit plan, the present value of the defined benefit obligation period, and discounted over estimated benefit obligation minus the fair value of the asset of the defined benefit plan will be recognised as the net liability or net asset of the defined benefit plan. The change in the net liability or net asset of the defined benefit plan, and changes due to re-measurement of net liability or net asset of the defined benefit plan for other comprehensive income.

Any remeasurement caused by the defined benefit plans, including actuarial gains or losses, changes in the impact of the asset cap (net of the amounts included in the net interest on defined benefit plan obligation) and return on the asset in the plan (net of the amounts included in the net interest on defined benefit plan obligation) is recognised in the balance sheet immediately and recorded in shareholders' equity through other comprehensive income in the accounting period the re-measurement occurred, and shall not be reversed to profit or loss in the subsequent accounting periods.

The previous service costs should be recognised as current expenses at the earlier of the following dates: when the Group modifies the defined benefit plans; and when the Group recognises relevant restructuring costs or termination benefits.

Net interest equals to the net liability or asset in defined benefit plan multiply by the discount rate. The Group recognised changes in the net defined benefit plan obligation as management expenses in the statement of profit or loss and other comprehensive income. Those changes include service costs, including current service costs, previous service costs and gains and losses on settlement, and net interest, including the interest income of the asset in the plan, interest expenses of the obligation under the plan and interest of the impact of the asset cap.

Year ended 31 December 2020 RMB

### V. SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (Continued)

- 33. Employee benefits (Continued)
  - (3). Accounting methods for termination benefits

### ✓ Applicable □ Not applicable

The Group recognises a liability for employee remuneration arising from termination benefits, and charged to current profit or loss at the earlier of the following dates: when the Group can no longer withdraw the offer of those benefits unilaterally due to proposed termination of employment or proposal for rundown; and when the entity recognises costs or expenses for restructuring that related to the payment of termination benefits.

For the employee's internal retirement plan, the Group will use the salary of the early retired employee to be paid by the enterprise on a monthly basis and the social insurance premium as the termination benefits from the period when the employee stops providing the service to the normal retirement date, and account for them adopting the same principle as the above-mentioned termination benefits. The specific terms of each termination benefit and the employee's internal retirement plan vary according to the relevant employee's position, service years and regions and other factors.

### (4). Accounting methods for other long-term employee benefits

### ✓ Applicable □ Not applicable

Other long-term employee benefits provided to employees shall be recognised in accordance with the relevant provisions of post-employment benefits and used to measure net liabilities or net assets of other long-term employee benefits, but the changes are recognised in profit or loss for the period or related asset costs.

### 34. Lease liabilities

### ✓ Applicable □ Not applicable

On the commencement date of the lease term, the Group recognises the present value of the lease payments that have not been paid as lease liabilities, except for short-term leases and low-value asset leases. In calculating the present value of the lease payments, the Group uses the leased interest rate as the discount rate; if the interest rate of the lease cannot be determined, the lessee's incremental borrowing rate is used as the discount rate. The Group calculates interest expenses of lease liabilities in each period of the lease term based on the constant periodic interest rate and recognises the interest expenses in profit or loss for the current period, except for those that are stipulated to be recognised in related asset costs. The variable lease payments that are not included in the measurement of the lease liabilities are recognised in profit or loss when incurred, except for those that are stipulated to be recognised in ecognised in related asset costs.

Year ended 31 December 2020 RMB

# V. SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (Continued)

### 34. Lease liabilities (Continued)

After the commencement date of the lease term, in the event of change in the actual fixed payment amount, change in the amount expected to be payable under a residual value guaranteed, change in the index or ratio used to determine the lease payment, or change in the assessment results or actual exercise rights of the call option, renewal option or termination option, the Group re-measures the lease liability based on the present value of the changed lease payments.

### 35. Provisions

### ✓ Applicable □ Not applicable

Except for contingent consideration and contingent liabilities assumed in business combinations involving enterprises not under common control, the Group recognises an obligation related to a contingency as a provision when all of the following conditions are satisfied:

- (1) the obligation is a present obligation assumed by the Group;
- (2) it is probable that an outflow of economic benefits from the Group will be required to settle the obligation; and
- (3) the amount of the obligation can be measured reliably.

A provision is initially measured at the best estimate of the expenditure required to settle the related present obligation, with a comprehensive consideration of factors such as the risks, uncertainty and time value of money relating to a contingency. The carrying amount of a provision is reviewed at each balance sheet date. If there is clear evidence that the carrying amount does not reflect the current best estimate, the carrying amount is adjusted to the best estimation.

### 36. Share-based payment

□ Applicable ✓ Not applicable

### 37. Preference shares, perpetual bonds and other financial instruments

✓ Applicable □ Not applicable

The perpetual bonds issued by the Group have no maturity date. After the maturity date, the Group has the right to make unlimited renewals. For coupon interest of perpetual bonds, the Group has the right to make deferred payment. Those that the Group has no contractual obligation to pay cash or other financial assets shall be classified as equity instruments.

Year ended 31 December 2020 RMB

### V. SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (Continued)

#### 38. Revenue

(1). Accounting policies adopted for revenue recognition and measurement

#### ✓ Applicable □ Not applicable

The Group recognises revenue when a performance obligation is satisfied, i.e. when "control "of the goods or services underlying the particular performance obligation is transferred to the customer. Acquiring "control" of the goods or services means being able to dominate the use of the goods or the provision of the services and obtain almost all of the economic benefits therefrom.

#### Sales agreement of goods

The sales agreement of goods entered into between the Group and its customers usually only includes the performance obligations of the transferred goods. The Group usually recognises the revenue at the time of transfer of control, taking into account the following factors: obtaining the current collection rights of the goods, transfer of the key risks and rewards of the ownership of the goods, transfer of the legal ownership of the goods, transfer of physical assets of goods and customers' acceptance of the goods.

#### Service agreement

The service agreement entered into between the Group and its customers usually includes performance obligations such as technology development. As the services provided by the Group during the performance of the agreement have irreplaceable uses, and during the entire contract period, the Group has the right to take the revenue from the completion of performance of the agreement accumulated to date as the performance obligation performed within a certain period of time, and recognise the revenue based on the performance progress, except where the performance progress cannot be reasonably determined. The Group determines the performance progress cannot be reasonably determined with the input method. When the performance progress cannot be reasonably determined by the Group are expected to be compensated, the revenue will be recognised based on the amount of costs incurred, until the performance progress can be reasonably determined.

Year ended 31 December 2020 RMB

# V. SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (Continued)

#### 38. Revenue (Continued)

(1). Accounting policies adopted for revenue recognition and measurement (Continued)

#### Construction contract

The construction contract entered into between the Group and its customers usually includes performance obligations such as construction services. As the customers can control the assets under construction in the performance of the Group, the Group considers them as performance obligations within a certain period of time, and recognises the revenue based on the performance progress, except where the performance progress cannot be reasonably determined. The Group determines the performance progress for the services provided in accordance with the input method and the costs occurred. When the performance progress cannot be reasonably determined, if the costs incurred by the Group are expected to be compensated, the revenue will be recognised based on the amount of costs incurred, until the performance progress can be reasonably determined.

### Significant financing component

If the contract includes significant financing component, the Group determines the transaction price based on the amount payable under the assumption that the customer pays that amount payable in cash when "control" of the goods is obtained by the customer. By discounting the nominal amount of the contract consideration to the discount rate of the current selling price of the goods, the difference between the transaction price determined and the contract consideration of the contract consideration to the contract period using effective interest rate method.

If the Group expects that the period between when the Group transfers a promised good to a customer and when the customer pays for that good will be one year or less, the Group needs not to consider the significant financing component.

Year ended 31 December 2020 RMB

### V. SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (Continued)

- 38. Revenue (Continued)
  - (1). Accounting policies adopted for revenue recognition and measurement (Continued)

#### Quality assurance obligation

According to the contractual agreement, legal provisions, etc., the Group provides quality assurance for the goods sold or assets constructed. For assurance-type quality assurance to the customers to ensure that the goods sold meet the established standards, the Group performs accounting treatment in accordance with Note VII. 50. For service-type quality assurance for a separate service provided in addition to ensuring to the customers that the goods sold meet the established standards, the Group considers it as a single performance obligation, and according to the relative proportion of the individual selling prices for providing quality assurance for goods and services, amortises part of the transaction price to the service-type quality assurance, and recognises the revenue when the customer obtains control of the service. In assessing whether the quality assurance provides a separate service in addition to ensuring to the customers that the goods sold meet the established standards, the Group considers whether the quality assurance is a statutory requirement, a quality assurance period and the nature of the Group's commitment to perform its tasks and other factors.

### Principal/agent

For the Group to obtain control of the goods or other assets from a third party and then transfer it to the customer, the Group has the right to determine the price of the goods traded at its own discretion, that is, the Group is a principal if it controls the specified good before that good is transferred to a customer, and the revenue shall be recognised based on the total consideration received or receivable; otherwise, the Group is an agent, and the revenue shall be recognised based on the amount of commission or handling fee that is expected to be charged, and such amount shall be determined based on the net amount of the total consideration received or receivable after deducting the prices payable to other related parties or according to the established commission amount or proportion.

Year ended 31 December 2020 RMB

## V. SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (Continued)

#### 38. Revenue (Continued)

(1). Accounting policies adopted for revenue recognition and measurement (Continued)

#### Change in contract

When there is a change to the construction contract entered into between the Group and its customers:

- If the change in contract adds a clearly distinguishable construction service and contract price, and the new contract price reflects the individual selling price of the new construction service, the Group will consider the change in contract as a separate contract for accounting treatment;
- (2) If the change in contract does not fall within the circumstances stated in item (1) above, and the transferred construction service and the construction service which has not been transferred can be clearly distinguished at the date of change in contract, the Group considers it as termination of the original contract, and at the same time, the non-performance part of the original contract and the modified part of the contract will be combined into a new contract for accounting treatment;
- (3) If the change in contract does not fall within the circumstances stated in item (1) above, and the transferred construction service and the construction service which has not been transferred cannot be clearly distinguished at the date of change in contract, the Group will make the modified part of the contract as an integral part of the original contract for accounting treatment, of which the impact on the recognised revenue as a result of such change will be adjusted as the revenue for the period on the date of change in contract.
- (2). Differences between the accounting policies for revenue recognition due to different business models adopted by similar business
  - □ Applicable ✓ Not applicable

## 39. Assets related to contract costs

✓ Applicable □ Not applicable

The Group's assets relating to contract costs include costs of obtaining a contract and costs to fulfil a contract. The assets are presented as inventories, other current assets and other non-current assets based on its liquidity.

Year ended 31 December 2020 RMB

### V. SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (Continued)

#### 39. Assets related to contract costs (Continued)

The Group shall recognise as an asset the incremental costs of obtaining a contract with a customer if the entity expects to recover those costs, unless the asset amortisation period does not exceed one year.

If the costs incurred in fulfilling a contract with a customer are not within the scope of other standards (for example, inventories, fixed assets or intangible assets), the Group shall recognise an asset from the costs incurred to fulfil a contract only if those costs meet all of the following criteria:

- (1) the costs relate directly to a current or anticipated contract that the entity can specifically identify, including direct labour cost, directly material cost, manufacturing overheads (or similar expenditure), costs that are explicitly chargeable to the customer under the contract and other costs that are incurred only because of the contract;
- (2) the costs enhance resources of the entity that will be used in satisfying performance obligations in the future;
- (3) the costs are expected to be recovered.

The Group amortises the asset relating to contract costs on a basis that is consistent with the revenue recognition relating to the asset and recognises it in profit or loss.

The Group shall recognise an impairment loss in profit or loss to the extent that the carrying amount of an asset relating to contract costs exceeds:

- the remaining amount of consideration that the entity expects to receive in exchange for the goods to which the asset relates;
- (2) the costs that relate directly to providing those goods.

If the factors of impairment in the previous period have changed, and the difference between (1) minus (2) is higher than the book value of the asset, it should be transferred back to the original provision for impairment of assets, and included in the current profit or loss, but the reversed book value of the subsequent asset shall not exceed the book value of the asset on the date of reversal, assuming no provision for impairment.

Year ended 31 December 2020 RMB

## V. SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (Continued)

#### 40. Government grants

#### ✓ Applicable □ Not applicable

Government grants are recognised only when the attached conditions are met and they can be received. Government grants are measured at the amount received or receivable when in the form of a monetary asset, and at fair value when in the form of a non-monetary asset. Where the fair value is not reliably determinable, the government grants are measured at the nominal amount.

Government documents stipulate that if the long-term assets are obtained by acquisitions, constructions or other forms, the grants should be recognised as the government grants related to assets. If the government documents are unclear, they should be judged on the basis of the basic conditions necessary for obtaining such grants, if the long-term assets are obtained by acquisitions, constructions or other forms, the grants should be recognised as the government grants related to assets, and the others should be recognised as income-related government grants.

For government grants related to income, where the grant is a compensation for related expenses or losses to be incurred in the subsequent periods, the grant is recognised as deferred income, and included in profit or loss over the periods in which the related costs are recognised or adjusted against the relevant cost; where the grant is a compensation for related expenses or losses already incurred by the Group, the grant is recognised immediately in profit or loss for the current period or is adjusted against the relevant cost.

Government grants related to assets are adjusted against the book value of the assets or recognised as deferred income and evenly distributed in profit or loss over the useful period of related assets in a reasonable and systematic way. Government grants measured at their nominal amounts shall be recognised immediately in profit or loss for the current period. If the relevant assets are sold, transferred, disposed of or ruined before their useful life ends, the undistributed relevant deferred income shall be transferred to the gain from asset disposal for the current period.

#### 41. Deferred tax assets/deferred tax liabilities

#### ✓ Applicable □ Not applicable

Income tax comprises current and deferred tax. Income tax is recognised as income tax expense or income in profit or loss for the current period, except for the adjusted goodwill resulting from a business combination or those relating to a transaction or event which is included directly in shareholders' equity, they are included in the shareholder's equity.

Current income tax liabilities or assets for the current and prior periods are measured at the amount of income tax expected to be paid or recovered according to the requirements of tax laws.

Year ended 31 December 2020 RMB

### V. SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (Continued)

#### 41. Deferred tax assets/deferred tax liabilities (Continued)

For temporary differences between the carrying amounts of assets and liabilities at the balance sheet date and tax bases, and temporary differences between the carrying amounts and the tax bases of items which have not been recognised as assets and liabilities but the tax bases of which can be determined for tax purposes, deferred taxes are provided using the liability method of the balance sheet.

A deferred tax liability is recognised for all taxable temporary differences, except:

- (1) where the taxable temporary differences arise from the initial recognition of goodwill, or the initial recognition of an asset or liability in a transaction which contains both of the following characteristics: (i) the transaction is not a business combination; and (ii) at the time of the transaction, it affects neither accounting profit nor taxable profit or deductible loss.
- (2) in respect of taxable temporary differences associated with investments in subsidiaries, associates and joint ventures, where the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not be reversed in the foreseeable future.

A deferred tax asset is recognised for deductible temporary differences, carryforward of unused deductible tax losses and tax credits, to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carryforward of deductible tax losses and tax credits can be utilised, except:

- (1) where the deferred tax asset arises from a transaction that is not a business combination and, at the time of the transaction, neither the accounting profit nor taxable profit or deductible loss is affected.
- (2) in respect of the deductible temporary differences associated with investments in subsidiaries, associates and joint ventures that satisfy all of the following conditions simultaneously, a deferred tax asset is only recognised to the extent that it is probable that the temporary differences will be reversed in the foreseeable future and taxable profit will be available for deducting against the deductible temporary differences in the future.

At the balance sheet date, deferred tax assets and deferred tax liabilities are measured at the tax rates that are expected to apply to the period when the asset is realised or the liability is settled, according to the requirements of tax laws. The measurement of deferred tax assets and deferred tax liabilities reflects the tax consequences of the manner by which the Group expects to recover the assets or settle the liabilities at the balance sheet date.

The carrying amount of deferred tax assets is reviewed at the balance sheet date and reduced to the extent that it is no longer probable to obtain sufficient taxable profit in future periods to deduct the income of deferred income tax assets. Deferred tax assets which have not been recognised are reassessed at the balance sheet date and are recognised to the extent that it is probable to have sufficient taxable profit available to deduct all or part of the deferred tax asset to be recovered.

Year ended 31 December 2020 RMB

## V. SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (Continued)

#### 41. Deferred tax assets/deferred tax liabilities (Continued)

When all of the following conditions are satisfied simultaneously, the deferred income tax assets and deferred income tax liabilities are listed in the net amount after offsetting: the Group has a legal right to settle current tax assets and income tax liabilities on a net basis; the deferred income tax assets and deferred income tax liabilities are related to the income tax payable by the same tax payer to the same taxation authority or related to different tax payers, but during the period when each of the significant deferred income tax assets and deferred income tax assets and deferred income tax assets and current income tax liabilities is reversed, the tax payer involved intends to settle the current income tax asset and current income tax liability on a net basis, or simultaneously obtain assets and pay off the debts.

#### 42. Leases

#### (1). Accounting method for operating leases

✓ Applicable □ Not applicable

#### **Recognition of lease**

At inception of a contract, the Group assesses whether a contract is, or contains, a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of one or more identified assets for a period of time in exchange of consideration. To determine whether the right to control the use of identified assets within a certain period of time under a contract has been transferred, the Group assesses whether a client in the contract has the right to use almost all of the economic benefits arising from the use of the identified assets during the period of use, and has the right to dominate the use of identified assets during this period of use.

#### Recognition of separate lease

Where a contract concurrently contains multiple separate leases, the Group splits the contract and conducts accounting treatment for all separate leases respectively. Where the following conditions are concurrently met, use of the rights of identified assets shall constitute a separate lease in the contract:

- (1) A lessee may earn profits from separate use of the assets or joint use with other resources readily available;
- (2) There is no high dependence or high correlation between the assets and other assets in the contract.

Year ended 31 December 2020 RMB

## V. SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (Continued)

#### 42. Leases (Continued)

(1). Accounting method for operating leases (Continued)

#### Split of leased and non-leased parts

Where a contract concurrently includes both leased and non-leased parts, the Group, as the lessor, shall split the leased and non-leased parts and conduct accounting treatment.

#### Assessment of lease term

The lease term is the period during which the Group has the right to use the leased asset and is irrevocable. The Group has the option to renew the lease, that is, it has the right to choose to renew the lease, and reasonably determine that the option will be exercised. The lease term also includes the period covered by the option to renew the lease. The Group has the option to terminate the lease, that is, it has the right to choose to terminate the lease of the asset but reasonably determine that the option will not be exercised. The lease term includes the period covered by the option to terminate the lease term includes the period covered by the option to terminate the lease. In the event of a major event or change within the Group's controllable scope, and affecting whether the Group reasonably determines that the option will be exercised, the Group reasesses whether it reasonably determines that it will exercise the option to renew the lease, call option or not to exercise the option to terminate the lease.

#### As a lessee

For the general accounting treatment of the Group as a lessee, please refer to Note V. 28 and Note V. 34.

#### Modification of lease

Modification of lease is the modification of lease scope, lease consideration, and lease term beyond the original contract terms, including the addition or termination of the rights of use of one or more leased assets, and the extension or shortening of the lease period stipulated in the contract.

If the modification of lease happens and meets the following conditions, the Group will conduct accounting treatment for the modification of lease as a separate lease:

- the modification of lease expands the scope of lease by increasing the rights of use of one or more leased assets;
- (2) the increased consideration and the individual price of the expanded part of lease are equivalent after adjustment is made in accordance with the contract situation.

Year ended 31 December 2020 RMB

## V. SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (Continued)

#### 42. Leases (Continued)

(1). Accounting method for operating leases (Continued)

#### As a lessee (Continued)

#### Modification of lease (Continued)

If accounting treatment for the modification of lease as a separate lease is not conducted, the Group shall redetermine the lease term on the effective date of modification of lease and discount the modified lease payments using the revised discount rate, in order to remeasure the lease liabilities. When calculating the present value of the lease payments after modification, the Group adopts the interest rate contained in the lease for the remaining lease periods as the discount rate; if the lease interest rate contained in the lease for the remaining lease periods cannot be readily determined, the Group's incremental borrowing increase shall then be used as the discount rate on the effective date of modification of lease.

In view of the consequences of the above adjustment of the lease liabilities, the Group conducts accounting treatment based on each of the following cases accordingly:

- (1) if the modification of lease results in a narrower scope of lease or a shorter lease term, the Group reduces the book value of the right-of-use assets to reflect the partial or complete termination of the lease. The Group recognises the gain or loss relevant to the partial or complete termination of the leases in the current profit or loss;
- (2) for other modification of lease, the Group adjusts the book value of the right-of-use assets accordingly.

#### Short-term leases and low-value asset leases

On the commencement date of the lease term, the Group shall recognise leases with a lease term of less than 12 months and not including a call option as a short-term lease; single leases with a value of less than RMB50,000 when being a new asset are recognised as low-value asset leases. If the Group subleases or expects to sublease the leased assets, the original leases shall not be recognised as low-value asset lease. The Group chooses not to recognise short-term leases and low-value asset leases as right-of-use assets and lease liabilities. During each period over the lease term, short-term leases and low-value asset leases shall be recognised in the related asset cost or current profit and loss on a straight-line basis.

Year ended 31 December 2020 RMB

## V. SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (Continued)

#### 42. Leases (Continued)

(1). Accounting method for operating leases (Continued)

#### As a lessor

On the commencement date of the lease term, all leases with risks and rewards incident to the ownership of the leased assets are substantially transferred into finance leases, and all other leases are operating leases. The Group classifies the sublease with reference to the right-of-use assets arising from the original lease as a sub-lessor.

#### As a lessor of a finance lease

At the commencement date, the Group recognises finance lease receivables and derecognises financial leased assets. The Group initially measures finance lease receivables in the amount of net investment in the lease. Net investment in the lease is the sum of unguaranteed residual value and the present value of lease payments not received at the commencement date being discounted at the interest rate contained in the lease.

The Group calculates and recognises interest income in each period during the lease term based on a constant periodic rate of interest. The variable lease payments that are not included in the measurement of the net investment in the lease are recognised in profit or loss when incurred.

### As the lessor of a finance lease

Lease payments under an operating lease are recognised in current profit or loss on a straight-line basis in each period over the lease term. Contingent rents are recognised in profit or loss in the period in which they actually arise.

In case of modification of an operating lease changes, the Group shall treat it as a new lease from the effective date of modification, and the amount of the advance receipt or receivable related to the lease before the modification shall be regarded as the collection amount of the new lease.

### (2). Accounting method for financing leases

□ Applicable ✓ Not applicable

(3). Methods for determining and accounting of lease under new lease standards

✓ Applicable □ Not applicable

Please refer to Note V. 42(1) for details.

Year ended 31 December 2020 RMB

## V. SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (Continued)

#### 43. Other significant accounting policies and estimates

✓ Applicable □ Not applicable

#### (1) Hedge accounting

In respect of the methods of hedge accounting, the Group's hedging is classified as:

- 1) fair value hedge, which is a hedge of the exposure to changes in fair value of a recognised asset or liability or an unrecognised firm commitment (excluding foreign exchange risk).
- 2) cash flow hedge, which is a hedge of the exposure to variability in cash flows that is attributable to a particular risk associated with a recognised asset or liability, or a highly probable forecast transaction; or a foreign currency risk in an unrecognised firm commitment.
- 3) hedge of net investment in overseas operations.

At the inception of a hedge relationship, the Group officially designates the hedge relationship and prepares formal written documentation of the hedge relationship, risk management objectives and risk management strategies. The documentation includes identification of the hedging instrument, the hedged item, the nature of the risk being hedged and how the Group will assess the hedging instrument's effectiveness. Hedge effectiveness is the extent to which the changes in cash flow of hedging instruments can offset the cash flow of hedged items caused by hedged risk. Such hedges are assessed on an ongoing basis to meet the requirements for hedge effectiveness on the initial designated date and beyond.

If the hedging instrument expires or is sold, terminated or exercised (but the rollover or replacement of part of a hedging instrument under the hedging strategy is not treated as an expiration or a contract termination), or due to a change in the risk management objective, the hedging relationship no longer meets the risk management objective, or when the hedging no longer meets other conditions of the hedge accounting method, the Group terminates the use of hedge accounting.

Where the hedging relationship no longer meets the hedging effectiveness requirements due to the hedging ratio, but the risk management objectives for the designated hedging relationship have not changed, the Group rebalances the hedging relationship.

Year ended 31 December 2020 RMB

## V. SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (Continued)

- 43. Other significant accounting policies and estimates (Continued)
  - (1) Hedge accounting (Continued)

Hedges which meet the criteria for hedge accounting are accounted for as follow:

#### Cash flow hedge

The effective portion of the gain or loss on the hedging instrument is recognised directly in other comprehensive income in the cash flow hedge reserve, while any ineffective portion is recognised immediately in the statement of profit or loss and other comprehensive income.

If an anticipated transaction under hedge is subsequently recognised as non-financial assets or non-financial liabilities, or an anticipated transaction of non-financial assets or non-financial liabilities forms a definitive undertaking in fair value hedging, cash flow hedging reserve previously recognised in other comprehensive income shall be transferred out and included in the amount of initial recognition of such assets or liabilities. In respect of the remaining cash flow hedge, if an anticipated sale occurs in the same period when the expected cash flow under hedge affects profit or loss, cash flow hedging reserve recognised in other comprehensive income shall be transferred out and included in current profit or loss.

When stops using hedging accounting for cash flow hedge, if the hedged future cash flow is still expected to occur, the amount previously included in other comprehensive income will not be transferred out until the expected transaction occurs or the commitment is confirmed to be fulfilled. If the hedged future cash flow is expected to no longer occur, the amount of accumulated cash flow hedging reserve recognised in other comprehensive income shall be transferred out and included in current profit and loss.

Year ended 31 December 2020 RMB

# V. SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (Continued)

#### 43. Other significant accounting policies and estimates (Continued)

(1) Hedge accounting (Continued)

#### Cost of hedging

The Group separates the intrinsic value and time value of an option contract and designates as the hedging instrument only the change in intrinsic value of an option; or separates the forward element from the spot element of a forward contract and designates as the hedging instrument only the change in the value of the spot element; or separates the foreign currency basis spread of the financial instruments and designates as the hedging instrument only the financial instruments and designates as the hedging instrument only the financial instruments and designates as the hedging instrument only the financial instruments which foreign currency basis spread is separated, the Group recognises the time value of an option, forward element of a forward contract and the part of the hedged items that are relevant to the fair value changes of foreign currency basis spread of the financial instrument into other comprehensive income. If the characteristics of the hedged items are related to the transaction, the same accounting treatment with the cash flow hedge reserve shall be applied. If the characteristics of the hedged items are related to the period of time, the above fair value change shall be amortised on a systematic and reasonable basis over the time when the hedged item affects the profit or loss or other comprehensive income, transferred from other comprehensive income to profit or loss for the current period.

#### (2) Profit distribution

The Company's cash dividends are recognised as liabilities upon approval by the Shareholders' general meeting.

#### (3) Production safety expenses

Production safety expenses provided for as required were included in cost of product or the current profit and loss, and credited in special reserve. And the funds are treated separately depending on whether fixed assets are resulted when being used: funds related to expenditure is offset against special reserve directly while those forming fixed assets will consolidate expenditure incurred and recognized as fixed assets when such assets are ready for their intended use, at the same time offsetting equivalent amounts in the special reserve and recognizing equivalent amounts of accumulated depreciation.

Year ended 31 December 2020 RMB

### V. SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (Continued)

#### 43. Other significant accounting policies and estimates (Continued)

#### (4) Fair value measurement

The Group measures listed equity investment instruments at fair value at the end of each reporting period. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place in the principal market for the asset or liability or in the most advantageous market for the asset or liability when a principal market is absent. The principal or the most advantageous market must be accessible to by the Group. The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Group uses valuation techniques that are appropriate in the circumstances and for which sufficient data and other supporting information are available to measure fair value, giving priority to the use of relevant observable inputs, and using unobservable inputs only when observable inputs are unavailable or not feasible to obtain.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole: Level 1-Quoted (unadjusted) market prices in active markets for identical assets or liabilities; Level 2-Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable; Level 3-Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable; Level 3-Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

For assets and liabilities that are recognised in the financial statements on a recurring basis, the Group determines whether transfers have occurred between levels in the hierarchy by re-assessing categorisation at the end of each reporting period.

Year ended 31 December 2020 RMB

## V. SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (Continued)

#### 44. SIGNIFICANT ACCOUNTING JUDGMENTS AND ESTIMATES

The preparation of the financial statements requires management to make judgements, estimations and assumption that affect the reported amounts and disclosures of revenues, expenses, assets and liabilities, and the disclosure of contingent liabilities at the balance sheet date. However, uncertainty about these assumptions and estimations could result in outcomes that could require a material adjustment to the carrying amounts of the assets or liabilities affected in the future.

#### Judgements

In the process of applying the Group's accounting policies, management has made the following judgements which have the most significant effect on the amounts recognised in the financial statements:

#### Operating leases - the Group as lessor

The Group has entered into operating leases on its investment property portfolio. The Group has determined, based on an evaluation of the terms and conditions of the arrangements, that it retains all the significant risks and rewards of ownership of these properties which are leased out on operating leases.

#### Determination of progress towards completion of the performance of obligations for construction contracts

The Group uses the input method to determine the progress towards completion of the performance obligations for the construction contracts. To be specific, the Group determines the progress towards completion of the performance obligations on the basis of the percentage of the accumulative actual construction costs incurred to the expected total costs. The accumulative actual costs include the direct and indirect costs incurred during the process of transferring goods to the customers. The Group believes that the construction contract price with the customers is determined on the basis of the construction costs, and the actual construction service. The Group determines the progress of contract performance based on the proportion of the cumulative actual construction costs to the estimated total costs, and recognizes revenue accordingly. In view of the long duration of construction contracts, which may span several accounting periods, the Group will review and revise the budget as the construction contracts progress, and adjust the income recognition amount accordingly.

#### Estimation uncertainty

The key assumptions concerning the future and other key sources of estimation uncertainty at the balance sheet date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the future accounting periods, are described below.

Year ended 31 December 2020 RMB

### V. SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (Continued)

#### 44. SIGNIFICANT ACCOUNTING JUDGMENTS AND ESTIMATES (Continued)

#### Estimation uncertainty (Continued)

#### Construction contracts and labour service results

The Group recognises revenue based on the percentage of completion of individual contracts providing construction contracts and labour services. The management estimates the percentage of project completion based on the actual costs involved in the total budgeted costs and also estimates the relevant contract revenue. Due to the nature of the activities carried out in the contracts, the dates of the activities and the dates of completion of the activities are usually classified into different accounting periods. The Group will review and revise the budget and contract cost estimates as the contracts progress (if the actual contract revenue is less than the estimated or actual contract costs, provision for the estimated contract losses is to be made).

#### Impairment of financial instruments and contract assets

The Group has adopted the expected credit loss model to evaluate the impairment of financial instruments and contract assets. The application of the expected credit loss model requires significant judgement and estimates and the consideration of all reasonable and soundly based information, including forward-looking information. In making such judgement and estimates, the Group estimates the projected movements of the debtor's credit risk according to past repayment records, economic policies, macro-economic indicators and industry risks, etc. Differences in estimates may have an impact on the provision for Impairment. A provision for impairment may not be equal to the actual amount of impairment losses in the future.

#### Impairment of non-current assets other than financial assets (excluding goodwill)

The Group assesses whether there are any indicators of impairment for non-current assets other than financial assets as at the balance sheet date. Intangible assets with indefinite useful lives are tested for impairment annually and at other times when such an indicator exists. Other non-current assets other than financial assets are tested for impairment when there are indicators that the carrying amounts may not be recoverable. An impairment exists when the carrying value of an asset or asset group exceeds its recoverable amount, which is the higher of its fair value less costs to sell and its present value of future cash flows. The calculation of the fair value less costs to sell is based on available data from binding sales transactions in an arm's length transaction of similar assets or observable market prices less incremental costs for disposing of the asset. When value in use calculations are undertaken, management must estimate the expected future cash flows from the asset or asset group and choose a suitable discount rate in order to calculate the present value of those cash flows.

Year ended 31 December 2020 RMB

# V. SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (Continued)

#### 44. SIGNIFICANT ACCOUNTING JUDGMENTS AND ESTIMATES (Continued)

#### Estimation uncertainty (Continued)

#### Impairment of goodwill

Goodwill is tested for impairment at least annually. For the purpose of impairment testing, the present value of future cash flows, which are generated from asset groups or sets of asset groups considered together with allocated goodwill, is estimated. The Group estimates the present value of future cash flows from asset groups or sets of asset groups by forecasting the related cash flow and selecting a suitable discount rate.

#### Fair value of non-listed equity investments

Non-listed equity investments are valued as expected future cash flows based on the current discount rate of other financial instruments with similar contractual terms and risk characteristics. This requires the Group to estimate future cash flows, credit risks, fluctuations and discount rates and is therefore uncertain.

#### Impairment of inventories

The Group determines the write-down for obsolescence of inventories. These estimates are made with reference to aged inventory analyses, projections of expected future sales of goods and management experience and judgement. Based on this review, write-down of inventories will be made when the carrying amounts of inventories decline below their estimated net realizable values. Due to changes in market conditions, actual sales of goods may be different from estimation and profit or loss in the current period could be affected by differences in this estimation.

#### Development expenditures

Determination of the capitalisation amount requires estimation of future cash flows of the related assets, choosing a suitable discount rate and estimation of beneficial useful lives in order to calculate the present value by management.

#### Deferred tax assets

Deferred tax assets are recognised for all unused tax losses to the extent that it is probable that taxable profit will be available against which the losses can be utilised. Significant management judgement is required to determine the amount of deferred tax assets that can be recognised, based upon the likely timing and level of future taxable profits together with future tax planning strategies.

Year ended 31 December 2020 RMB

### V. SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (Continued)

#### 44. SIGNIFICANT ACCOUNTING JUDGMENTS AND ESTIMATES (Continued)

#### Estimation uncertainty (Continued)

#### Measurement of defined benefit scheme obligations

The Group has recognised the supplementary retirement benefits under the defined benefit scheme as a liability. The estimated amount of these welfare expenses and liabilities shall be calculated and paid on the basis of various assumptions. These assumptions include the discount rate, the growth rate of welfare expenses during relevant period, as well as other factors. Deviations between actual results and actuarial assumptions will affect the accuracy of the relevant accounting estimates. Although the management believes that the above assumptions are reasonable, any changes in assumptions shall still affect the estimated liabilities of the relevant supplementary pension insurance and other external welfare plans.

#### Useful lives and residual values of fixed assets

The useful lives of fixed assets are estimated based on historical experience of the Group with similar assets used in a similar way. If useful lives of the fixed assets are estimated to be shorter than previously estimated, the Group will increase the depreciation rates accordingly, or dispose of those assets that are idle or technically obsolete.

In determining the useful lives and net residual values of fixed assets, the Group periodically reviews the changes in market conditions, estimated physical wear and tear, and the maintenance of an asset. The estimation of the useful life of the asset is based on historical experience of the Group with similar assets that are used in a similar way. The depreciation amount will be adjusted if the estimated useful lives and/ or the net residual values of fixed assets are less than previous estimation. Useful lives and net residual values are reviewed, at the end of each reporting period, based on changes in circumstances.

#### Quality guarantee

The Group will make a reasonable estimate of the warranty rate for the contract combination with similar characteristics based on historical warranty data and current warranty conditions, taking into account all relevant information such as product improvement and market changes. The estimate of the warranty rate may not be equal to the actual warranty rate in the future. The Group re-evaluates the warranty rate at least on each balance sheet date and determines the estimated liabilities based on the re-evaluated warranty rate.

Year ended 31 December 2020 RMB

# V. SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (Continued)

#### 44. SIGNIFICANT ACCOUNTING JUDGMENTS AND ESTIMATES (Continued)

#### Estimation uncertainty (Continued)

#### Lessee's incremental borrowing rate

For a lease whose rate cannot be readily determined, the Group adopts lessee's incremental borrowing rate as the discount rate in estimating the present value of the lease payment. When determining the incremental borrowing interest rate, the Group uses the observable interest rate as a reference basis for determining the incremental borrowing rate according to the economic environment in which it is located and, on this basis, adjusts the reference interest rate according to the specific circumstances of the lease business, such as its own conditions, the underlying asset's condition, the lease term and the amount of the lease liability for obtaining an appropriate incremental borrowing rate.

#### 45. CHANGES IN SIGNIFICANT ACCOUNTING POLICIES AND ESTIMATES

(1). Changes in significant accounting policies

✓ Applicable □ Not applicable

#### Changes in presentation of financial statement

To meet the requirements of Q&A On The Implementation of Accounting Standards For Business Enterprises issued by the Ministry of Finance in December 2020, the group reclassifies the contract asset impairment loss originally included in "credit impairment loss" in the income statement to "contract asset impairment loss", and retroactively adjusts the comparative data accordingly. The impact of the change of accounting policy has no impact on the merger and the company's net profit and owner's equity.

Year ended 31 December 2020 RMB

#### VII. NOTES TO ITEMS IN THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)

#### 6. Receivables for financing

✓ Applicable □ Not Applicable

Unit: Yuan Currency: RMB

| Item                        | Closing balance  | Opening balance  |
|-----------------------------|------------------|------------------|
| Bank acceptance bills       | 863,523,297.58   | 805,952,389.88   |
| Commercial acceptance bills | 1,366,601,160.03 | 672,695,454.66   |
| Total                       | 2,230,124,457.61 | 1,478,647,844.54 |

As at 31 December 2020, the ownership of notes receivable with book value of RMB52,492,742.32 (as at 31 December 2019, book value of RMB67,084,139.66) was restricted, see Note VII. 81.

Pledged bills receivable are as follows:

| Item                        | Closing balance | Opening balance |
|-----------------------------|-----------------|-----------------|
| Bank acceptance bills       | 2,561,294.29    | 5,824,991.90    |
| Commercial acceptance bills | 49,931,448.03   | 61,259,147.76   |
| Total                       | 52,492,742.32   | 67,084,139.66   |

The Group endorses or discounts some of the bank acceptance bills in the daily fund management. The business model for managing the above-mentioned acceptances receivable is aimed at both collection of contractual cash flow and the sale. As a result, the Group reclassifies the notes receivable as financial assets measured at fair value through other comprehensive income, and states them as receivables for financing.

Year ended 31 December 2020 RMB

#### VII. NOTES TO ITEMS IN THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)

#### 6. Receivables for financing (Continued)

The bills receivable that has been endorsed or discounted but have not expired on the balance sheet date are listed as follows:

|                                     | 2020           |                  | 2019           |                  |
|-------------------------------------|----------------|------------------|----------------|------------------|

As at the balance sheet date, large-amount prepayments with an age of over one year are as follows:

Unit: Yuan Currency: RMB

#### Amount

53,334,566.91

Total prepayments of the top five debtors aged more than one year

Reasons for delayed settlement of significant prepayments with an age of over one year:

The above large prepayments aged more than one year are not settled in time mainly due to relevant projects were not completed or the materials and equipment were not received.

Year ended 31 December 2020 RMB

#### VII. NOTES TO ITEMS IN THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)

- 10. Contract assets (Continued)
  - (3). Provision for impairment of contract assets in the period (Continued)

Contract assets of the Group are derived from provision of construction services to customers and recognition of revenue over a period of time. At time of settlement of project-related payments, any such contract asset turns into the unconditional right to collect payments and is transferred into the receivables.

In 2020, the Group updated progress in the fulfillment of construction contracts and service providing contracts. Part of the fulfillment progress has not yet been settled, therefore results in the increase in the carrying amount of contract assets of 9.11%; in 2019, significant changes in the gross carrying amount of the contract assets that affect the changes in the provision for loss include the settlement of primary land development project in Tongren, which resulted in a decrease in the gross carrying amount by 3.12% and accordingly a decline in the Lifetime ECL.

As at 31 December 2020, the ECL rate of the contract assets was 0.33% (31 December 2019: 0.32%).

If provisions for bad debts are made as per the general model of ECL, please make disclosure with reference to other receivables:

The Company completed its investment in Shandong Railway Development Fund Co., Ltd. on 28 January 2019, with the investment return to be paid by Shandong Development Fund as per 10% off the benchmark interest rate for more-than-5-year loans issued by PBoC (the prevailing interest rate 4.9%\*0.9=4.41%), and the interest was commenced on a phased basis from the date on which such investment capital was received, subject to adjustment according to interest rate of the central bank in the end period. At the end of the tenth anniversary of the date on which the project cooperation is commenced (i.e., 28 January 2029), Shandong Railway Development Fund Co., Ltd. will receive the equity equivalent to the Company's original capital contribution in lump sum. Therefore, the Company mainly holds the investment for the purpose of obtain contractual cash flows, and cash flows generated on specific dates are solely for the payment of the investment principal and interests incurred from the outstanding amount, and they fall into financial assets measured at amortized cost, therefore, the investment is stated as debt investment.

The Company has assessed that its credit risk has not significantly increased since the initial recognition on the balance sheet date, therefore the Company did not make provision for impairment according to the amount equivalent to the ECL for the next 12 months.

- Note 1: The Group signed repurchase agreements in relation to municipal engineering investment and construction with the relevant government bodies, under which those bodies authorize companies of the Group undertaking "build-transfer" projects to implement the investment and financing functions on their behalf to develop municipal projects. Those companies shall, after the completion of the "build-transfer" projects to such bodies, and then those agencies shall pay the repurchase price within the time limit specified in the repurchase agreement.
- Note 2: The Group signed construction and franchise agreements in relation to municipal engineering with the relevant government bodies, under which those bodies authorize companies of the Group undertaking "build-operate-transfer" projects to implement the investment and financing functions on their behalf develop municipal projects and maintain franchised operation. Those companies shall, after the end of the franchise period, hand over the projects to such bodies, and then those agencies shall pay the repurchase price within the time limit specified in the repurchase agreement.

The Group evaluated whether or not the credit risk of the said long-term receivables has been significantly increased since the initial recognition on each balance sheet date. If such credit risk has not significantly increased since the initial recognition, the Group made provisions for loss at the amount equivalent to ECL for the next 12 months; and if the credit risk has significantly increased since the initial recognition has occurred, the Company made provisions for loss at the amount equivalent to the lifetime ECL.

As at 31 December 2020, the Group's long-term receivables of RMB4,092,306,736.92 (31 December 2019: RMB3,586,890,185.27), which were formed by the earning rights of the franchise pledged and all proceeds thereunder it, were used to obtain long-term loans of RMB1,900,360,668.00 (31 December 2019: RMB1,664,299,760.80) (Notes VII.45 and 81).

Key information of joint ventures and associates (Continued)

#### Other explanation

- Note 1: On 14 April 2020, CRSC Institute of Smart City Research & Design, a subsidiary of the Company, and Aerospace Harmony Wisdom Technologies Co., Ltd. jointly established CRSC Smart Technology. As of 31 December 2020, the Company has actually contributed RMB675,000. According to the company's articles of association, Aerospace Harmony Wisdom Technologies Co., Ltd. holds 55% of the shares, and CRSC Institute of Smart City Research & Design holds 45% of the shares. The voting rights are exercised in proportion to the actual paid-in capital (the proportion of voting rights) and the resolution at the general meeting must be approved by Shareholders representing more than two-thirds of the voting rights, therefore CRSC Institute of Smart City Research & Design and Aerospace Harmony Wisdom Technologies Co., Ltd. jointly control CRSC Smart Technology.
- Note 2: On 21 January 2020, the Company paid the third registered capital of RMB90,048,700 for Siping Pipeline, and the capital contribution requirement has been completed. As of 31 December 2020, the Company has invested a total of RMB224,763,900, accounting for 20% of the total registered capital of the project company. According to the company's articles of association, the company's board of directors shall be composed of five directors, and the CRSCE shall appoint two directors. One person shall have one vote when voting on the resolution of the board, and resolutions must be approved by more than two-thirds of all directors. Based on the above considerations, the Company classified it as an associate company.
- Note 3: On 19 October 2020, CRSCD, a subsidiary of the Company, and five other companies including Beijing Smartchip Microelectronics Technology Company Limited jointly established Zhongguancun Chipsea Optimal Technology Co., Ltd. (中關村芯海擇優科技有限公司). The registered capital of the company is RMB100 million, and the proportions of the six parties are: 35%, 20%, 15%, 10%, 10% and 10%, wherein CRSCD accounts for 20% with subscribed and contributed capital of RMB20 million. As of 31 December 2020, CRSCD has completed a total investment of RMB20 million in accordance with the investment agreement. According to the company's articles of association, except for special matters that need to be unanimously approved, resolutions on other matters are approved by more than 2/3 of the voting rights held by all Shareholders at the general meeting, and the voting rights are exercised in proportion to the actual paid-in capital. The company's board of directors shall be composed of five directors, and CRSCD shall appoint one director. One person shall have one vote when voting on the resolution of the board, and all resolutions must be approved by more than two-thirds of all directors. Based on the above considerations, the Company classified it as an associate company.
- Note 4: On 27 September 2020, CRSCS, a subsidiary of the Company, Mars (Shanghai) Information Technology Co., Ltd. (馬邇斯(上海)信息科技有限公司) and Shanghai Chenghui Industrial Partnership (Limited Partnership) (上海澄輝實業合夥企業(有限合夥)) jointly established China United Investment (Shanghai) Digital Technology Co., Ltd. (中聯投(上海)數字科技有限公司). The registered capital of the company is RMB100 million, and the shareholding proportions of the three parties are: 50%, 30% and 20%. As of 31 December 2020, CRSCS has completed the first investment of RMB6 million in accordance with the investment agreement. According to the company's articles of association, the company's board of directors shall be composed of five directors, and CRSCS shall appoint one director. One person shall have one vote when voting on the resolution of the board, and all resolutions must be approved by more than three-fifths of all directors. Based on the above considerations, the Company classified it as an associate company.

As of 31 December 2020 and 31 December 2019, the ability of investees in which the Group hold long-term equity investments to transfer funds to the Group has not been restricted.

#### 28. Goodwill (Continued)

(4). Explain the process of goodwill impairment test, key parameters (e.g. forecast period growth rate, stable period growth rate, profit rate, discount rate, forecast period, etc. in case of present value of expected future cash flow, if applicable) and the recognition method of goodwill impairment loss

#### ✓ Applicable □ Not applicable

The Group allocates the carrying amount of goodwill of CRSC CASCO to the asset group that can benefit from the synergies of the business combination, and performs impairment test on this basis. The recoverable amount of the asset group is determined based on the higher of its net fair value less costs of disposal and the present value of estimated future cash flows of the asset group; indicating that the asset group is not impaired if either of which is more than the carrying amount of the asset group.

The asset group of CRSC CASCO in this year is consistent with the asset group determined at the acquisition date and the goodwill impairment test in previous years. The determination of an asset group is based on whether the main cash inflow of the asset group is independent of other assets, as well as the way for the enterprise management to manage production and operation activities, and the decision-making method for the continued use or disposal of assets. In this year, CRSC CASCO confirmed that CRSC CASCO asset group portfolio was the smallest unit of asset groups with the combination of goodwill and its relevant assets based on the cash flow generated from goodwill. The cash flow generated from this asset group is independent of other assets or other asset groups, and the recoverable amount of the asset group is the present value of the estimated future cash flows of CRSC CASCO. The amounts of key assumptions of the asset group related to impairment tests were consistent with the Group's historical experience and external information. The key assumptions made by management in determining the present value of the cash flow forecast are as follows:

|  | 31 December 2020 | 31 December 2019 |
|--|------------------|------------------|
| Forecast period                                      | 5 years          | 5 years          |
| Discount rate  | 16.99%           | 17.48%           |
| Average growth rate of income in the forecast period | 5.00%            | 5.00%            |

As at 31 December 2020 and 31 December 2019, the goodwill of the CRSC CASCO asset group has not been impaired and therefore no provision for impairment was required.

Year ended 31 December 2020 RMB

### VII. NOTES TO ITEMS IN THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)

#### 28. Goodwill (Continued)

(4). Explain the process of goodwill impairment test, key parameters (e.g. forecast period growth rate, stable period growth rate, profit rate, discount rate, forecast period, etc. in case of present value of expected future cash flow, if applicable) and the recognition method of goodwill impairment loss (Continued)

The Group conducted impairment test on the allocation of goodwill resulting from the acquisition of CRSC Wanquan, Zhengzhou Zhong'an, Zhengzhou Zhongyuan, First Construction and Changsha Design Institute to the asset group. The combination of asset groups is the combination which the goodwill combined with smallest asset groups related to it, and the cash flow generated from this asset group was independent from other assets or other asset groups, which was consistent with the combination of asset groups determined at the date of purchase and during the impairment test for prior years. The recoverable amount was determined according to the present value of the expected future cash flows of those subsidiaries, and the expected future cash flows were determined according to the cash flow forecast based on the 5-year financial budget approved by the management. The pre-tax discount rates used in the cash flow forecast were 16.99%, 14.43%, 14.43% and 15.00% respectively (17.48%, 15.07%, 15.07%, 15.07% and 19.52% respectively in 2019). After testing, the management of the Group believes that the goodwill generated by the acquisition of CRSC Wanquan, Zhengzhou Zhong'an, Zhengzhou Zhongyuan, First Construction and Changsha Design Institute has not been impaired, so no provision for impairment is required.

Assumptions were used to calculate the present value of the expected future cash flows of CRSC CASCO, CRSC Wanquan, Zhengzhou Zhong'an, Zhengzhou Zhongyuan, First Construction and Changsha Design Institute as at 31 December 2020 and 31 December 2019. The following details the key assumptions made by the management in determining the cash flow forecast for goodwill impairment test:

Budget gross margin-The determination basis was to appropriately increase the average gross margin that was realized in the year before the budget year on the basis of the expected efficiency improvement and the expected market development.

Discount rate-The discount rate adopted was the pre-tax discount rate that reflects the specific risks of the relevant asset group.

The amounts of key assumptions of the asset group related to impairment tests were consistent with the Group's historical experience and external information.

Year ended 31 December 2020 RMB

#### 49. Long-term employee benefits payable

✓ Applicable □ Not Applicable

#### (1). Statement on long-term employee benefits payable

✓ Applicable □ Not applicable

Unit: Yuan Currency: RMB

| Item  | Closing balance | Opening balance |
|---|-----------------|-----------------|
| Net liabilities under defined benefit plans (supplemental |                 |                 |
| retirement benefit)                                       | 599,609,000.00  | 683,080,000.00  |
| Long-term dismissal benefits (internal retirement plan)   | 22,396,000.00   | 30,375,000.00   |
| Less: Remunerations payable within one year               | 47,921,000.00   | 53,209,000.00   |
| Total   | 574,084,000.00  | 660,246,000.00  |

The Group provides an integrated external supplemental retirement benefit plan (defined benefit plans) for its retired employees. These plans include monthly pension benefits, medical reimbursement benefits, annual medical insurance premiums, and funeral benefits for employees who are retired. The amount of the subsidy is determined based on the period during which the employee serves the Group and the relevant subsidy and welfare policy.

Some employees of the Group have gone through internal retirement. The internal retirement payables are accrued in the relevant legal entities within the Group during the period in which the Group has entered into relevant agreements/documents with relevant employees or informing individual employees of the specific internal retirement terms. The specific terms of internal retirement vary depending on factors such as the position of the relevant employee, length of service and the region of service.

The plan is subject to interest rate risk, risk of changes in life expectancy of pension beneficiaries, and stock market risks.

The Group's supplementary retirement benefits and internal retirement payable in each year are calculated by the independent actuary, Towers Watson Management Consulting, using the projected unit credit method.

# VII. NOTES TO ITEMS IN THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)

- 49. Long-term employee benefits payable (Continued)
  - (2). Changes in defined benefit plans (Continued)

The following table provides a quantitative sensitivity analysis on the key assumptions used:

2020

#### Unit: Yuan Currency: RMB

|   | Increase<br>(%) | Obligations<br>under defined<br>benefit plans<br>Increase/<br>(decrease) | Decrease (%) | Obligations<br>under defined<br>benefit plans<br>Increase/<br>(decrease) |
|---|-----------------|--|--------------|--|
| Discount rate<br>Average growth rate of | 0.25            | -16,957,000.00   | 0.25         | 17,797,000.00  |
| medical expenses                        | 1.00            | 31,842,000.00  | 1.00         | -26,477,000.00   |

#### 2019

Unit: Yuan Currency: RMB

|   |          | Obligations    |              | Obligations    |
|---|----------|----------------|--------------|----------------|
|   |          | under defined  |              | under defined  |
|   |          | benefit plans  |              | benefit plans  |
|   | Increase | Increase/      |              | Increase/      |
|   | (%)      | (decrease)     | Decrease (%) | (decrease)     |
| Discount rate<br>Average growth rate of medical | 0.25     | -20,114,000.00 | 0.25         | 21,142,000.00  |
| expenses  | 1.00     | 40,455,000.00  | 1.00         | -33,431,000.00 |

The above sensitivity analysis is to infer the impact of reasonable change occurring to the key assumptions on the balance sheet date on the obligations under the defined benefit plans. Sensitivity analysis is made on the basis of changes in significant assumptions while other assumptions remain unchanged. Since changes in assumptions are often not isolated from each other, sensitivity analysis might not represent actual changes in the obligations under defined benefit plans.

#### 50. Estimated liabilities (Continued)

Other descriptions (including the relevant important assumptions and estimates of the significant estimated liabilities) are as follow:

Note: The Group estimates the quality guarantee deposits according to the sales revenue and the estimated warranty rate taking into account the different stages of the product life cycle of different products. The estimated rate of warranty occurrence is based on the historical experience data of the actual occurrence of warranty for the same type of products, and may be estimated according to significant changes due to the different stages of product life cycle of different products and similar products. As at the balance sheet date, the quality guarantee deposits that the Group expects to incur in the future under the above method shall be included into the profit or loss for the period.

Explanation about surplus reserve, including changes (increase or decrease) during the period, and reasons for such changes:

According to the Company Law and the Articles of Association of the Company, the Company shall withdraw statutory surplus reserve fund at 10% of its net profit. If the accumulative amount of the statutory surplus reserve is more than 50% of the Company's registered capital, the statutory surplus reserve fund shall no longer be withdrawn.

After the Company withdraws the statutory surplus reserve fund, it can withdraw discretionary surplus reserve fund. Upon approval, the discretionary surplus reserve can be used to make up for losses of the preceding year or increase share capital.

(4). Explanation about allocation to the remaining performance obligations

□ Applicable ✓ Not applicable

Other explanation:

Typically, the construction contracts or service rendering contracts provided by the Group as a whole constitutes a single performance obligation and is a performance obligation performed within a certain period of time. As at 31 December 2020, some of the Group's construction contracts or service rendering contract are still in the process of performance. The transaction price allocated to the outstanding (or partially outstanding) performance obligations is related to the performance progress of the corresponding construction contract or service rendering contract, and will be recognized as revenue on the basis of the performance progress in the future performance period of the corresponding construction contract or service rendering contract.

#### 62. Taxes and surcharges

Other explanation:

#### ✓ Applicable □ Not Applicable

The Group's income tax has been provided at the applicable rate on the estimated profits assessable arising in the PRC during the period. Taxes on profits assessable elsewhere have been calculated at the applicable rates of tax prevailing in the countries/regions in which the Group operates, based on existing legislation, interpretations and practices in respect thereof.

Share of tax attributable to joint ventures and associates in 2020 were RMB10,163,585.19 (2019: RMB6,417,416.22) and RMB4,140,227.01 (2019: RMB4,424,014.38), respectively. These shares of tax are included in the "income from investments in joint ventures and associates" in the consolidated income statement.

Year ended 31 December 2020 RMB

Explanation of changes in scope of consolidation due to other reasons (e.g. incorporation of new subsidiaries, and liquidation of subsidiaries, etc.) and relevant information:

✓ Applicable □ Not Applicable

On 31 March 2020, CRSC Innovation Zhejiang Construction Investment (通號創新浙江建設投資有限公司) ("Zhejiang Construction Investment", a former third-tier subsidiary of the Company) absorbed and merged CRSC Communications Construction Co., Ltd. (通號交通建設有限公司) ("CRSC Communications", a former second-tier subsidiary of the Company). Zhejiang Construction Investment is now a second-tier subsidiary of the Company and CRSC Communications became a third-tier subsidiary of the Company.

On 30 April 2020, CRSC Material Group Company Ltd. (通號物資集團有限公司) ("Material Group", a former second-tier subsidiary of the Company) was transferred to CRSC Engineering Group Company Ltd. (通號工程局集團有限公司) and became a third-tier subsidiary of the Company. CRSC (Beijing) Bid Ltd. (通號(北京)招標有限公司) (a former second-tier subsidiary of Material Group, namely a former third-tier subsidiary of the Company) became a second-tier subsidiary of the Company.

Year ended 31 December 2020 RMB

## VIII. CHANGES ON SCOPE OF CONSOLIDATION (Continued)

#### 5. Changes in scope of consolidation due to other reasons (Continued)

On 30 April 2020, CRSC Institute of Smart City Research & Design Co., Ltd. (通號智慧城市研究設計 院有限公司) ("Smart City Research & Design", a former second-tier subsidiary of the Company) was transferred to CRSC Communication & Information Group Company Ltd. (通號通信信息集團有限公司) (a second-tier subsidiary of the Company). Consequently, Smart City Research & Design became a third-tier subsidiary of the Company.

On 30 June 2020, CRSC Railway vehicles Co., Ltd. (通號軌道車輛有限公司) ("CRSC Railway vehicles", a former second-tier subsidiary of the Company) was transferred to CRSC (Changsha) Rail Transit Control Technology Company Limited (通號(長沙)軌道交通控制技術有限公司) (a second-tier subsidiary of the Company). Consequently, CRSC Railway vehicles became a third-tier subsidiary of the Company.

In 30 June 2020, Xi'an Quanlutonghao Equipment Research Co., Ltd. (西安全路通號器材研究有限公司) and Xi'an Tonghao Railway Signal Product Inspection Station Co., Ltd. (西安通號鐵路信號產品檢驗站有限公司), subsidiaries of CRSC Inspection Co., Ltd. ("CRSC Inspection", a former second-tier subsidiary of the Company), were transferred to CRSC (Xi'an) Rail Industry Group Co., Ltd. and CRSC Research & Design Institute Group Co., Ltd., second-tier subsidiaries of the Company, respectively. CRSC Inspection was cancelled in September 2020.

## X. RISKS RELATED TO FINANCIAL INSTRUMENTS (Continued)

#### 2. Transfer of financial assets

#### Transferred financial assets that are not derecognized in their entirety

As at 31 December 2020, the book value of bank acceptance bills and commercial acceptance bills that the Group has endorsed or discounted to suppliers for settlement of trade payables were RMB179,206,712.21 and RMB211,897,708.43 respectively (31 December 2019: RMB88,668,931.24 and RMB268,535,267.23). The Group believed that almost all risks and rewards have been retained, including related default risks. Therefore, it continued to recognise the full carrying amounts of the Endorsed Bills and the associated trade payables settled. Subsequent to the endorsement, the Group no longer reserves the right to use it, including the right to sell, transfer or pledge it to other third parties. The aggregate carrying amount of the trade payables settled by the endorsed bills as at 31 December 2020 was RMB391,104,420.64 (31 December 2019: RMB357,204,198.47).

# Transferred financial assets that are derecognised in their entirety in which continuing involvement exists

As at 31 December 2020, the Group have endorsed bank acceptance bills to certain of its suppliers in order to settle the trade payables due to such suppliers with a carrying amount of RMB934,167,212.36 (31 December 2019: RMB541,594,787.67). As at 31 December 2020, the derecognized bills had a maturity of one to twelve months. In accordance with the Law of Negotiable Instruments, the holders of the derecognized bills have the right of recourse against the Group if the accepting banks default (the "Continuing Involvement"). In the opinion of the Group, the Group has transferred substantially all risks and rewards relating to the Derecognised Bills. Accordingly, it has derecognised the carrying amounts of such Derecognised Bills and the associated trade payables. The maximum exposure to loss from the Group's Continuing Involvement in the Derecognised Bills and the undiscounted cash flows to repurchase these Derecognised Bills is equal to their carrying amounts. In the opinion of the Group's Continuing Involvement in the Derecognised Bills are not significant.

In 2020, the Group did not recognise any profit or loss on the date of transfer of the derecognised bills. The Group had no current or accumulated gains or expenses related to continuing involvement of financial assets which had been derecognized. The endorsement and discount happen evenly throughout the year.

Year ended 31 December 2020 RMB

## X. RISKS RELATED TO FINANCIAL INSTRUMENTS (Continued)

#### 3. Risk of financial instruments

The Group is faced with risks of various financial instruments in daily activities, which mainly include credit risk, liquidity risk and market risk (including exchange rate risk and interest rate risk). The main financial instruments of the Group include monetary funds, equity investment, borrowings, accounts receivable, receivables for financing, bills payable and accounts payable and others. The risks associated with these financial instruments and the risk management strategies adopted by the Group to mitigate these risks are described below.

The Board of Directors shall be responsible for planning and establishing the risk management framework of the Group, formulating the Group's risk management policies and relevant guidelines, and supervising the implementation of risk management measures. The Group has formulated risk management policies to identify and analyse risks the Group faced with. These risk management policies specify specific risks and cover market risks, credit risks, liquidity risk management and many other aspects. The Group regularly evaluates changes in the market environment and the Group's business activities to determine whether to update risk management policies and systems. The risk management of the Group shall be carried out by the Risk Management Committee in accordance with the policies approved by the Board. The Risk Management Committee works closely with other business units of the Group to identify, assess and hedge relevant risks. The internal audit department of the Group conducts regular audits on risk management control and procedures and reports the audit results to the Group's Audit Committee.

The Group diversifies the risk of financial instruments through various appropriate investments and business portfolios, and reduces the risk of concentration in any single industry, specific region or specific counterparty by formulating corresponding risk management policies.

## Credit risk

Credit risk is the risk that one party to a financial instrument will cause a financial loss for the other party by failing to discharge an obligation.

The Group only deals with recognized and reputable third parties. According to the Group's policy, credit review is required for all customers who seek to carry out credit-based transactions. In addition, the Group continuously monitors the balance of accounts receivable to ensure that the Group is not exposed to significant bad debt risks. For transactions that are not settled in the bookkeeping base currency of the relevant business entity, the Group does not provide credit-based transaction conditions unless specifically approved by the credit control department of the Group.

Financial assets of the Group include monetary funds, account receivable, other equity instruments investment and other receivables. The credit risk of these financial assets originates from the default of the counterparty. The maximum risk exposure is equal to the book value of these instruments.

Year ended 31 December 2020 RMB

## X. RISKS RELATED TO FINANCIAL INSTRUMENTS (Continued)

#### 3. Risk of financial instruments (Continued)

#### Credit risk (Continued)

As the Group only deals with recognized and reputable third parties, no collateral is required. Credit risk is centrally managed by customers/counterparties, geographic regions and industries. Customers owing accounts receivables to the Group were widely engaged in different sectors and industries, therefore, there was no concentration of significant credit risks within the Group. The Group did not hold any collateral or other credit enhancement against the balance of accounts receivable.

#### Criteria for judgment of significant increase in credit risk

On each balance sheet date, the Group assessed whether or not the credit risk of relevant financial instruments has increased significantly since initial recognition. In determining whether or not the credit risk has increased significantly since the initial recognition, the Group considered that the reasonable and reliable information could be obtained without unnecessary extra costs or efforts, including qualitative and quantitative analysis based on the Group's historical data, external credit risk rating and forward-looking information. Based on a single financial instrument or a combination of financial instruments with similar credit risk characteristics, the Group compared the risk of default of financial instruments as at the balance sheet date with the risk of default on the initial recognition date to determine the changes in the default risk of financial instruments during their expected lifetime.

The Group believed that the credit risk of financial instruments has increased significantly when one or more of the following quantitative and qualitative criteria or upper limit indicators are triggered:

- The quantitative criteria are satisfied if the probability of default for the remaining lifetime on the reporting date rises by more than a certain proportion compared with the probability of default at time of the initial recognition;
- Qualitative criteria mainly comprise material adverse changes in the debtor's business or financial position, and alert list of customers;
- The upper limit indicator is defined as the debtor's contract payment (including principal and interest) has been overdue for more than 30 days.

Year ended 31 December 2020 RMB

## X. RISKS RELATED TO FINANCIAL INSTRUMENTS (Continued)

3. Risk of financial instruments (Continued)

Credit risk (Continued)

#### Definition of assets with credit impairment

In order to determine whether or not credit impairment has occurred, the Group adopted the definition criteria consistent with the internal credit risk management objectives for relevant financial instruments, while considering both quantitative and qualitative indicators. When the Group evaluated whether or not the debtor suffers from credit impairment, it mainly considered the following factors:

- the issuer or debtor is in material financial difficulties;
- the debtor violates the contract, such as default or overdue payment of interest or principal, etc.;
- the creditor gives concessions that it would not make under any other circumstance based on economic or contractual considerations related to the debtor's financial difficulties;
- the debtor is likely to go bankrupt or undergo other financial restructuring;
- financial difficulties of the issuer or debtor result in the disappearance of the active market of the financial asset;
- purchase or generate a financial asset at a substantial discount, which reflects the fact that credit impairment has occurred.

Credit impairment of financial assets might be caused by the combined action of multiple events, but not necessarily by separately identifiable events.

Year ended 31 December 2020 RMB

## X. RISKS RELATED TO FINANCIAL INSTRUMENTS (Continued)

3. Risk of financial instruments (Continued)

Credit risk (Continued)

#### Parameters for Measuring Expected Credit Loss

Depending on whether credit risk has increased significantly and whether credit impairment has occurred, the Group measures impairment provision for different assets with the expected credit loss for 12 months or the entire lifetime period, respectively. The key parameters for expected credit loss measurement include default probability, default loss rate and default risk exposure. Considering the quantitative analysis and forward-looking information of historical statistical data (such as counterparty ratings, guarantees and collateral types, repayment methods and others), the Group establishes a default probability, default loss rate and default probability, default loss rate and default probability.

The relevant definitions are as follows:

- Probability of default (PD) refers to the possibility that the debtor will not be able to fulfill its obligations of repayment over the next 12 months or throughout the entire remaining lifetime. The Group's PD is adjusted based on the results of the historical mobility model of receivables, taking into account the forward-looking information to reflect the debtor's PD under the current macroeconomic environment;
- Loss given default (LGD) refers to the Group's expectation of the extent of the loss resulting from the default exposure. Depending on the type of counterparty, the method and priority of the recourse, and the type of collaterals, the LGD varies. The LGD is the percentage of loss of risk exposure at the time of default, calculated over the next 12 months or over the entire remaining lifetime;
- Exposure at default (EAD) is the amount that the Group should be reimbursed at the time of the default in the next 12 months or throughout the entire remaining lifetime.

Both the assessment of a significant increase in credit risk and the calculation of ECL involve forwardlooking information. Through the analysis of historical data, the Group identified the key economic indicators that affect the credit risk of each business type and ECL.

See Notes VII. 5, 8 and 10 for the risk exposure information of receivables, other receivables and contract assets.

See Notes VII. 5, 8, 10, 16 and 12 for the quantitative data of credit risk exposure of the Group due to receivables, other receivables, contract assets, long-term receivables and non-current assets due within one year (long-term receivables).

Year ended 31 December 2020 RMB

## X. RISKS RELATED TO FINANCIAL INSTRUMENTS (Continued)

#### 3. Risk of financial instruments (Continued)

#### Liquidity risk

The Group manages its risk of fund deficiency using a recurring liquidity planning tool. This tool considers the maturity of both its financial instruments and estimated cash flows from the Group's operations.

The Group sets its objective as maintaining a balance between continuity and flexibility in funding through the comprehensive use of several financing methods such as notes settlement and bank borrowings, as well as optimizing financing structure through the appropriate combination of long and short-term financing. The Group has obtained banking facilities from several commercial banks to fund the working capital requirements and capital expenditure.

The management of the Company monitors the liquidity position of the Company on an ongoing basis to ensure the availability of sufficient liquid funds to meet all obligations as they fall due and to make the most efficient use of the Company's financial resources.

The table below summarizes the maturity profile of the Group's financial liabilities based on the undiscounted contractual cash flows:

## Market risk

#### Interest rate risk

The Group's exposure to the risk of changes in market interest rates relates primarily to the Group's borrowings and deposit and bank current deposit in large amount with floating interest rates.

The Group regularly reviews and monitors the mix of fixed and floating interest rate in order to manage its interest rate risk. Borrowings and monetary funds are stated at amortized cost and are not revalued on a periodic basis. Floating rate interest income and expenses are credited/charged to the profit or loss as earned/incurred.

As at 31 December 2020, floating interest rate loans and fixed interest rate loans accounted for 83.4% and 16.6% of the Group's borrowings respectively. The management would adjust the floating rate assets based on changes in the market interest rates to reduce the material impact arising from interest rate risk.

Year ended 31 December 2020 RMB

## X. RISKS RELATED TO FINANCIAL INSTRUMENTS (Continued)

#### 3. Risk of financial instruments (Continued)

Market risk (Continued)

#### Interest rate risk (Continued)

If there was a general increase/decrease in the interest rate of bank and other borrowings with floating interest rates by 1 percentage point, with all other variables held constant, the consolidated net profits and other comprehensive income net of tax would have decreased/increased by approximately RMB6,639,227.51 for 2020 (2019: RMB7,857,374.10), and there is no impact on other components of the consolidated equity, except for retained earnings, of the Group. The sensitivity analysis above has been determined assuming that the change in interest rates had occurred as at 31 December 2020 and the exposure to interest rate risk has been applied to those financial instruments in existence at that date. The estimated 1% of increase or decrease represents management's assessment of a reasonably possible change in interest rates over the period from the year until the date of balance sheet of the next year.

If there was a general increase/decrease in the interest rate of bank and other borrowings with floating interest rates by 0.1 percentage point, with all other variables held constant, the consolidated net profits and other comprehensive income net of tax would have decreased/increased by approximately RMB12,639,216.00 for 2020 (2019: RMB14,189,729.00),and there is no impact on other components of the consolidated equity, except for retained earnings, of the Group. The sensitivity analysis above has been determined assuming that the change in interest rates had occurred as at 31 December 2020 and the exposure to interest rate risk has been applied to those financial instruments in existence at that date. The estimated 0.1 percentage point of increase or decrease represents management's assessment of a reasonably possible change in interest rates over the period from the year until the date of balance sheet of the next year.

#### Foreign currency risk

As a result of its significant business operations in Mainland China, the Group's revenue, expenses and over 95% of the financial assets and liabilities are denominated in RMB. The effect of the fluctuations in the exchange rates of RMB against foreign currencies on the Group's results of operations is therefore minimal and the Group has not entered into any hedging transactions as at 31 December 2020 and 31 December 2019 in order to reduce the Group's exposure to foreign currency risk in this regard.

## X. RISKS RELATED TO FINANCIAL INSTRUMENTS (Continued)

3. Risk of financial instruments (Continued)

Market risk (Continued)

#### Foreign currency risk (Continued)

The sensitivity analysis above has been determined assuming that the change in foreign exchange rates had occurred as at 31 December 2020 and 31 December 2019 and the exposure to foreign currency risk has been applied to those monetary assets and liabilities in existence at that date. The estimated percentage increase or decrease represents management's assessment of a reasonable possible change in foreign exchange rates over the period from the year until the date of balance sheet of the next year.

## 4. Capital management

The Group's primary objectives for capital management are to safeguard the Group's ability to continue as a going concern and keep the capital ratio at a healthy level, so that it can support business development and maximize the value of Shareholders.

The Group manages its capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of the underlying assets. In order to maintain or adjust the capital structure, the Group may adjust the profit distribution to Shareholders, return capital to Shareholders, issue new shares or sell assets to reduce debts. The Group is not bound by external compulsory capital requirements. In 2020 and 2019, no changes were made in the objectives, policies or processes for managing capital.

The Group monitors its capital using the asset-liability ratio, which is the ratio of total liabilities to total assets. The gearing ratios as at the balance sheet date are as follows:

|                   | 31 December 2020   | 31 December 2019  |
|-------------------|--------------------|-------------------|
| Total assets      | 105,328,082,320.59 | 97,512,591,304.36 |
| Total liabilities | 61,030,744,806.19  | 54,787,913,723.34 |
| gearing ratio     | 57.94%             | 56.19%            |

Year ended 31 December 2020 RMB

Year ended 31 December 2020 RMB

## XI. DISCLOSURE OF FAIR VALUE (Continued)

#### 3. Fair value valuation

The following is a comparison of the book value and fair value of various types of financial instruments other than lease liabilities and financial instruments with small differences between book value and fair value:

Unit: Yuan Currency: RMB

|   | Carrying amount   |                  | Fair value        |                  |
|---|-------------------|------------------|-------------------|------------------|
|   | 31 December 2020  | 31 December 2019 | 31 December 2020  | 31 December 2019 |
| Long-term receivables                                 | 8,384,707,579.19  | 6,422,130,017.28 | 8,760,069,666.00  | 6,533,734,597.00 |
| Financial assets included in other non-current assets | 174,209,713.82    | 176,054,896.48   | 165,847,397.98    | 168,071,500.22   |
| Long-term and short-term loans                        | 2,615,945,060.53  | 2,333,511,381.19 | 2,618,206,742.81  | 2,356,113,853.48 |
| Long-term payables                                    | 77,846,656.30     | 74,981,014.21    | 75,668,169.69     | 73,643,282.52    |
|   | 11,252,709,009.84 | 9,006,677,309.16 | 11,619,791,976.48 | 9,131,563,233.22 |

The management has assessed the cash and bank balances, bills and accounts receivable, other receivables, short-term loans, bills and accounts payable and other payables. In each case, the fair value and book value are similar due to short remaining period.

On each balance sheet date, the Group analyzes the changes in the value of financial instruments and determines the key inputs to which the valuation applies.

The fair values of long-term receivables, long-term loans, long-term payables, and bonds payable determined by discounting the future cash flows using rates currently available for other instruments with similar terms, credit risk and remaining maturities. As at 31 December 2020 and 31 December 2019, the fair value of long-term receivables and long-term payables was similar to the book value, and the Group's own non-performance risk for long-term and short-term borrowings was assessed to be insignificant.

For financial instruments traded in an active market, the Group determines its fair value based on its active market quotation; and for financial instruments that are not traded in an active market, the Group uses valuation techniques to determine their fair values. The valuation models used are mainly cash flow discount models and market comparable company models. The input values of valuation techniques mainly include risk-free interest rates, benchmark interest rates, exchange rates, credit spreads, liquidity premiums, EBITDA multipliers, and lack of liquidity discounts etc.

Year ended 31 December 2020 RMB

## XI. DISCLOSURE OF FAIR VALUE (Continued)

## 3. Fair value valuation (Continued)

The Group signed the derivative financial instrument contracts with more than one counterparties (mainly refer to financial institutions with higher credit rating). Derivative financial instruments (including forward exchange contracts and return swaps) are measured using the valuation techniques of forward pricing, swap model and present value method. The model covers multiple input values of observable market, including credit quality of counterparty, spot and forward exchange rate and interest rate curve. The book value and fair value of forward exchange contract and return swap are the same. As at 31 December 2020, the market-to-market value of the derivative financial assets is the net value after offsetting the credit valuation of default risk attributable to derivative instrument counterparty after adjustment. The change of counterparty credit risk had no significant impact on the assessment on hedging effectiveness of the designated derivative hedging instrument in the hedging relationship and other financial instrument measured at fair value.

The fair value measurement of Level 3 uses cash flow discount method, and the unobservable input value is the weighted average cost of capital and the growth rate of long-term income.

#### 4. Adjustment and level transformation of fair value measurement

In 2020 and 2019, there was no transfer of the fair value measurement of financial assets and financial liabilities between Level 1 and Level 2, nor was there any transfer to or out of Level 3.

Year ended 31 December 2020 RMB

#### XII. RELATED PARTIES AND CONNECTED TRANSACTIONS (Continued)

- 5. Related party transactions (Continued)
  - (7) Emolument of key management (Continued)

#### Notes:

- Note 1: The total pre-tax remunerations include basic salary, seniority wage, post salary, performance-based salary, bonus, and meeting allowance, etc. These remunerations of Executive directors in 2019 contain incentive payment for executive directors in 2016 to 2018 when they were holding a post in the Company (Mr. YANG Yongsheng was holding a post from 2016 to2018, whose term of office was less than 3 years).
- Note 2: Mr. XU Zongxiang was appointed as an executive director effective from February 2020.
- Note 3: Mr. KONG Ning was appointed as a supervisor effective since February 2020 and chairman of the Supervisory Committee since March 2020.
- Note 4: Ms. TIAN Liyan resigned as chairman of the Supervisory Committee since February 2020.
- Note 5: Ms. LI Tienan was appointed as a supervisor from February 2020. She received no emoluments for the year ended 31 December 2020, because she did not receive any remuneration in the capacity as a supervisor.
- Note 6: Mr. Yin Gang resigned as executive director in November 2019.
- Note 7: Mr. WU Zuowei was appointed as a supervisor since 25 May 2018 and resigned as supervisor since February 2020. He received no emoluments for the year ended 29 February 2020, because he did not receive any remuneration in the capacity as a supervisor.

#### Five highest paid employees

An analysis of the number of five highest paid employees within the Group for the year is as follows:

|   | 2020 | 2019 |
|---|------|------|
| Non-director and non-supervisor employees | 5    | 5    |

Ν

Year ended 31 December 2020 RMB

## XII. RELATED PARTIES AND CONNECTED TRANSACTIONS (Continued)

### 5. Related party transactions (Continued)

#### (7) Emolument of key management (Continued)

Details of the remuneration of the above non-director and non-supervisor highest paid employees are as follows:

|                                      | 2020          | 2019          |
|--------------------------------------|---------------|---------------|
|                                      |               |               |
| Basic salary                         | 5,824,200.00  | 5,445,600.00  |
| Performance bonus                    | 5,866,429.52  | 4,814,894.70  |
| Total pre-tax remunerations          | 11,690,629.52 | 10,260,494.70 |
| Social insurance premium and housing |               |               |
| provident fund                       | 534,903.55    | 571,732.40    |
| Supplementary pension insurance      | 370,779.60    | 321,800.40    |
|                                      |               |               |

- Note 1: CRSC Construction Group Co., Ltd. (通號建設集團有限公司), a subsidiary of the Group, entered into an equity interest transfer agreement with China Railway Signal and Communication (group) Corporation Limited (中國 鐵路通信信號集團有限公司), the parent of the Company, on 10 June 2019 to sell its 100% equity interests in CRSC Real Estate Co., Ltd. (通號置業有限公司) (including the subsidiaries: CRSC Foshan Real Estate (通號 佛山置業) and CRSC Guizhou Real Estate (通號貴州置業)) at RMB253,896,600.00. The disposal date is 30 June 2019. Therefore, CRSC Real Estate Co., Ltd. (通號置業有限公司) was no longer included in the scope of consolidation of the Group since 1 July 2019. This is a connected transaction between the Group and the controlling shareholder, China Railway Signal and Communication (Group) Corporation Limited.
- Note 2: As of 31 December 2020, the Group's receivables from and payables to related parties were interest-free, unsecured and have no fixed repayment period.

Year ended 31 December 2020 RMB

- 5. Discontinuing operations
  - $\Box$  Applicable  $\checkmark$  Not applicable

Year ended 31 December 2020 RMB

### XVI. OTHER SIGNIFICANT EVENTS (Continued)

#### 6. Segment information

(1). Basis for determining and accounting policies of reportable segments

#### ✓ Applicable □ Not applicable

For management purposes, the Group is divided into the business unit based on the products and services. The group has the following 3 reportable segment:

- the rail transportation control system segment mainly provides specialized "three-in-one" services of design and integration, equipment manufacturing and system delivery services for rail transportation control systems;
- (2) General construction contracting segment mainly includes municipal project contracting and the construction services of other projects;
- (3) other segments mainly engage in trading and etc.

Management manages the operating results of each business unit separately for the purpose of making decisions about resources allocation and performance assessment. Segment performance is evaluated based on reporting segment profit. The indicator is consistent with the total profit of the Group.

Inter-segment transfer pricing is determined by reference to prices adopted in sales or supplying of labor services to third parties.

Year ended 31 December 2020 RMB

  - (1) Lease arrangement (Continued)
    - 2 As a lessee

#### Supplementary information on lease expenses

The Group adopted simplified treatment for short-term lease and low-value assets leases and had not recognized right-of-use assets and lease liabilities. The short-term lease, low-value assets and variable lease payments that are not included in the measurement of the lease liabilities were credited in expenses, as follows:

Unit: Yuan Currency: RMB

|   | 2020          | 2019           |
|---|---------------|----------------|
| Interest expense of lease liabilities<br>Short-term lease expenses subject to simplified<br>treatment and included in current profits and | 7,800,474.53  | 8,841,977.74   |
| losses  | 79,891,527.32 | 109,173,774.73 |
| Total cash outflow related to lease   | 83,636,649.91 | 95,817,093.91  |

#### Leases committed but not yet commenced

The expected annual cash outflows in the future for leases committed but not yet commenced by the Group are as follows:

|                                     | Uni           | t: Yuan Currency: RMB |
|-------------------------------------|---------------|-----------------------|

#### 2. Return on net assets and earnings per share (Continued)

Earnings per share

|                            | 2020      | 2019      |
|----------------------------|-----------|-----------|
|                            | RMB/share | RMB/share |
| Basic earnings per share   |           |           |
| Continuous operation       | 0.34      | 0.38      |
| Diluted earnings per share |           |           |
| Continuous operation       | 0.34      | 0.38      |

The basic earnings per share is calculated by dividing the current net profit attributable to the ordinary shareholders of the Company by the weighted average number of outstanding ordinary shares.

The numerator of diluted earnings per share are determined on the basis of the current net profit attributable to the ordinary shareholders of the Company after adjusting the following factors: (1) interest on diluted potential ordinary shares recognized as expenses in the current period; (2) the income or expenses that will be generated during the conversion of diluted potential ordinary shares; and (3) the income tax impact related to the above adjustments.

The denominator of diluted earnings per share is equal to the sum of the following two items: (1) the weighted average of the issued ordinary shares of the parent when calculating the basic earnings per share; and (2) the weighted average number of ordinary shares increased on the assumption that dilutive potential ordinary shares are converted into ordinary shares.

When calculating the weighted average number of ordinary shares increased by the conversion of diluted potential ordinary shares into issued ordinary shares, the diluted potential ordinary shares issued in the previous period are assumed to be converted at the beginning of the current period; and diluted potential ordinary shares issued in the current period are assumed to be converted on the issue date.
