## III. BUSINESS OUTLOOK

It is expected that the PRC government will continue to strengthen its structural reform with more specific and powerful policies. Green development is expected to become a new norm, while de-leveraging, merger and acquisition and corporate reorganization are expected to be further developed, creating a better operating environment for the steel industry. The “reflective review” on iron and steel capacity reduction and the curtailment of crude steel output will become important tasks in the second half of 2021. Both of them aim to principally focus on the curtailment of crude steel output churned out by enterprises with lower environmental performance, high energy consumption and relatively outdated technique and equipment by upholding the principles of marketization and law on the basis of consolidating and improving the results of iron and steel capacity reduction. Meanwhile, the introduction of the dual carbon targets of “carbon peak” and “carbon neutrality” will have a far-reaching effect on the steel industry, procuring steel companies to actively seek high-quality green and low-carbon development and move towards green and sustainable development featuring reasonable product portfolio, advanced technology and equipment, excellent quality and brand, high intelligentization, strong competitiveness and low carbon. Being a “green factory”, the Group will proactively make modifications to enable ultra-low emission and strive to realize transformation into the green and low-carbon style as soon as possible, taking the initiative to compete in the future. On the demand side, the growth in steel demand is expected to remain steady, as the infrastructure sector is expected to remain active, and the price of structural steel may benefit from the reduced output of crude steel. As supply and demand for steel become more balanced, this creates a greater and healthier market development space for the Group to grow and expand.

## MANAGEMENT DISCUSSION AND ANALYSIS

For ordinary steel products, the PRC Government is expected to increase investment in infrastructure projects in order to stabilize the economy and to improve weak links. As a project lasts for three to five years, the projects verified last year and this year are expected to provide short-term support to the demand. With the objective of producing specialized hot rolled ribbed bars, steel enterprises are expected to strive to improve the quality of construction materials to meet the needs of government investment in railways, roads and water resources and capitalize on these major projects. This is expected to drive strong demands in the medium and high-end market of construction materials. Although the growth in real estate has slowed down, it will maintain steady development as guided by the persistent policy of “three types of stability”, and the scale of existing projects in progress and subsequent stable market development can still guarantee the demand for ordinary steel. The Group is expected to continue to follow the market trend, use steel price as guidance, and capitalize on its production capability to switch between production of ordinary steel and special steel to maximize revenue.

For special steel products, the Group is expected to develop high-end special steel products, focus on the development of special steel new products (high-end bearing steel, steel for marine engineering, mould steel, spring steel and steel for special use), utilize the national science and innovation platform to reach a market-leading position in industry technology research and development, increase the proportion of special steel production, utilize the Group’s competitive advantages, and enhance the long-term profitability of the Group. The Group is continues to deepen the strategic co-operation with the Chinese Academy of Science, leverage on the scientific research achievements of the Academy, continuously improve research and development capabilities in relation to special steel new products, speed up the shift to new growth drivers as well as the transformation and upgrade of products, and use technology innovation to achieve high quality development.

Apart from product development, the Group is expected to increase research and development investment. The Group established five research and development units in different sectors (such as, special steel research, railway steel research and bearing steel research). Every year, there are research and development projects which can lead to the development of new products that carry intellectual property rights, which provides strong technical support to the research and development of the six sectors of special steel new products. Through specialized research and development, improvement on products, and the commitment to protecting the environment and increasing productivity, the Group is expected to continue to maintain a good revenue level.

## NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

### 17. CONTINGENT LIABILITIES

On 19 January 2021, the Group and Xiwang Group and its certain subsidiaries entered into the guarantee agreement (the “**Guarantee Agreement**”) in relation to the provision of guarantee services, which was effective from 1 January 2021 to 31 December 2023. Xiwang Group is the ultimate holding company of the Company. Therefore, Xiwang Group is a connected person of the Company under the Listing Rules.

Pursuant to the Guarantee Agreement, the Group agreed to provide the Xiwang Group and its certain subsidiaries with guarantee services under which the Group shall undertake to guarantee and bear any obligations and liabilities of Xiwang Group and its certain subsidiaries under the loan agreements to be entered between the lenders and Xiwang Group and/or its certain subsidiaries, in accordance with the terms of the specific guarantee agreements to be entered between the lenders and the Group. It was agreed that any loans repaid by the Group for and on behalf of Xiwang Group (and its certain subsidiaries) pursuant to the Guarantee Agreement shall be deemed to be a repayment of (i) the loans payable by the Group to Xiwang Group or its certain subsidiaries; or (ii) other amounts payable by the Group to Xiwang Group or its certain subsidiaries. It was also agreed that if the guarantee amount to be provided by the Group to Xiwang Group and its certain subsidiaries under the Guarantee Agreement exceeds the aggregate outstanding amount due from the Group to Xiwang Group, (i) the Group reserves the right to unilaterally terminate the specific guarantee(s) for an amount no less than the amount exceeding the aggregate outstanding amount due from the Group to Xiwang Group; and (ii) a guarantee fee of 0.5% per annum on the aggregate outstanding amount due from the Group to Xiwang Group shall be payable by Xiwang Group and/or its certain subsidiaries to the Group for the amount exceeding the aggregate outstanding amount due from the Group to Xiwang Group. Xiwang Group also undertook that it shall always continue to provide guarantees and loans to the Group and cannot unilaterally terminate any one of them without the Group’s consent.

As the Group has obtained a significant amount of loans from Xiwang Group for business operation, the provision of guarantee services to Xiwang Group by entering into the Guarantee Agreement would enhance the financing capacity of Xiwang Group, which in turn would promote Xiwang Group to provide more financial supports to the Group in the form of loans or financing guarantees.

It was agreed under the Guarantee Agreement that the guarantee amount to be provided by the Group to Xiwang Group and its certain subsidiaries under the Guarantee Agreement shall not exceed the aggregate outstanding amount due from the Group to Xiwang Group and shall be subject to a maximum cap of RMB5.0 billion for each of the three years ending 31 December 2021, 2022 and 2023. As of 31 December 2020, the actual guarantee amount was approximately RMB4.2 billion. During the term of the agreement, the transaction amount did not exceed the annual cap as set out in the agreement. For details of the Guarantee Agreement, please refer to the announcement of the Company dated 19 January 2021 and the circular of the Company dated 26 February 2021.

## NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

### 20. FAIR VALUE AND FAIR VALUE HIERARCHY OF FINANCIAL INSTRUMENTS

The carrying amounts of the Group's and the Company's financial instruments approximate to their fair values.

Management has assessed that the fair values of cash and cash equivalents, pledged deposits, trade and bills receivables, financial assets included in other receivables and other assets, trade and bills payables, financial liabilities included in other payables and accruals, the current portion of interest-bearing bank and other borrowings approximated to their respective carrying amounts largely due to the short term maturities of these instruments. The Group's finance department is responsible for determining the policies and procedures for the fair value measurement of financial instruments. The finance department reports directly to the senior management and the audit committee. At each reporting date, the finance department analyses the movements in the values of financial instruments and determines the major inputs applied in the valuation. The valuation is reviewed and approved by the senior management. The valuation process and results are discussed with the audit committee twice a year for interim and annual financial reporting.

The fair values of the financial assets and liabilities are included at the amount at which the instrument could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale. The following methods and assumptions were used to estimate the fair values:

The fair values of the non-current portion of borrowings of interest-bearing bank and other borrowings and other long term payable have been calculated by discounting the expected future cash flows using rates currently available for instruments with similar terms, credit risk and remaining maturities. The Group's own non-performance risk for borrowings from the ultimate holding company, interest-bearing bank and other borrowings and other long term payable as at 30 June 2021 was assessed to be insignificant.

As 30 June 2021, the unlisted equity investment designated at fair value through other comprehensive income, has been estimated using a market-based valuation technique on assumptions that are not supported by observable market prices or rates. The valuation requires the directors to determine comparable public companies (peers) based on industry, size, leverage and strategy, and calculates an appropriate price multiple, such as price-to-book ("**P/B**") ratio (excluding goodwill) multiple, for each comparable company identified. The directors believe that the estimated fair values resulting from the valuation technique, which are recorded in the consolidated statement of financial position, and the related changes in fair values, which are recorded in other comprehensive income, are reasonable, and that they were the most appropriate values at the end of the reporting period.

### 20. FAIR VALUE AND FAIR VALUE HIERARCHY OF FINANCIAL INSTRUMENTS

(Continued)

Below is a summary of significant unobservable inputs to the valuation of financial instruments together with a quantitative sensitivity analysis as at 30 June 2021:

	<b>Valuation technique</b>	<b>Significant unobservable input</b>	<b>Range</b>	<b>Sensitivity of fair value to the input</b>
Unlisted equity investment	Valuation multiples	Average P/B ratio multiple of peers	0.66	5% increase/decrease in multiple would result in increase/ decrease in fair value by RMB3,268,000
		Discount for lack of marketability	15.80%	5% increase/decrease in discount would result in decrease/ increase in fair value by RMB631,500

The discount for lack of marketability represents the amounts of premiums and discounts determined by the Group that market participants would take into account when pricing the investments.
