# Message to Shareholders

Dear Shareholders,

Under the zero-COVID policy in China, the sporadic COVID-19 outbreaks in various cities in China during the first half of 2022 and the subsequent strict COVID-19 control measures have inevitably led to significant interruptions to economic activities and life in urban areas. As a result, China's gross domestic product recorded during the first half of the year amounted only to RMB56.3 trillion, representing a year-on-year increase of 2.5%, which was far below its initial growth target of 5.5% for the full year. Disruptions of international and domestic supply chains not only elevated material costs, but also interfered production and delivery schedules. Slowdown in economic growth and increasingly challenging business environment had taken their toll and resulted in shrunken consumption sentiment and purchasing power.

#### **Business Review**

With reduced corn output expectation during the 2022/23 harvest year, together with the rising commodity prices driven by the war between Russia and Ukraine, international and domestic corn prices remained at a relatively high level. The substantial capital requirement and high raw material costs made it impracticable for the Group to resume operation of its upstream production in the short run. Without the supply of feedstock from the Group's upstream production lines, it would be difficult to achieve cost-efficiency for the production of amino acids. As such, the Group's amino acids production facilities remained suspended. Notwithstanding the improvement in lysine prices during the period under review, the exhaustion of the amino acids inventory prior to the period under review had led to retreats in both sales volume and sales amount of the amino acids business segment.

During the period under review, the Group's business was further put under pressure by the lockdown of Shanghai due to the COVID-19 pandemic. The sweetener production facilities in Shanghai had been suspended for two months since April 2022. Although the Group's Shanghai production site has gradually resumed part of the production activities since end of June 2022, it has yet to return to its normal operational level.

The Group reported a net loss during the period under review, as compared to a net profit in the corresponding period last year. As explained in the Group's profit warning announcement dated 4 July 2022, the adjustment in performance was due to the absence of a one-off gain on debt restructuring recorded in the corresponding period last year.

It remained a top priority of the Group's management to continue to push forward with its debt restructuring plan so as to further reduce its financing costs. After 中國進出口銀行 (The Export-Import Bank of China\*) completed the transfer of all its rights and benefits of the loans owed by the Group to 中國信達資產管理股份有限公司吉林省分公司 (Jilin Branch of China Cinda Asset Management Co., Ltd.\*), the Group will be able to negotiate with the creditors to proceed with the final stage of its debt restructuring.

The Group maintained active discussion with the local government for the resumption of the remaining part of the land and properties located in Luyuan District, Changchun, owned by the Group. The compensation from land resumption will provide the necessary capital for the Group's debt repurchase and to meet its cash flow requirement.

#### Outlook

China's economy is encountering a series of challenges. Efficacy of production and commercial activities continued to be disturbed by impeded logistics and surging costs. Shortage in or unstable energy supply also contributed to interruptions in various manufacturing sectors. The crisis in housing mortgage repayment and a sluggish property market in China have brought along financial impact on the domestic economy, and led to more cautious market sentiment.

Although commercial activities in many parts of the world gradually resumed, looming inflation and shortage in energy and food supplies as a result of the Russo-Ukrainian conflict will continue to hinder economic recovery. Business prospects in the second half of the year is clouded by stiffened tension of the Sino-US relationship and deteriorating geopolitical situation in the Asian Pacific rim.

Strong corn prices is likely to continue to affect the Group's operational efficiency and business performance. With the gradual resumption of production at the Shanghai site, the Group expects to see moderate improvement in output and sales in the second half of the year.

The Group's debt restructuring plan is advancing accordingly, a portion of which is expected to complete before the end of this year.

I would like to express my gratitude again to our staff at all levels for their dedication and commitment, and to our shareholders, creditors and business partners for their faith in and support to the Group.

Global Bio-chem Technology Group Company Limited (the "Company") and its subsidiaries (collectively, the "Group") are principally engaged in the manufacture and sale of corn refined products, amino acids, corn sweeteners and polyol chemicals. The upstream corn refinery serves as a feedstock which breaks down corn kernels into corn starch, gluten meal, fibre and corn oil; and corn starch is further refined through a series of biochemical and/or chemical processes into a wide range of high value-added downstream products, namely, amino acids, corn sweeteners and polyol chemicals. The corn sweeteners segment is operated by Global Sweeteners Holdings Limited (Stock Code: 03889) ("GSH", together with its subsidiaries, the "GSH Group"), a non-wholly-owned subsidiary of the Group, whose shares are listed on the Main Board of The Stock Exchange of Hong Kong Limited (the "Stock Exchange").

#### **BUSINESS REVIEW**

The selling prices of the Group's products are affected by the prices of their raw materials (principally corn kernels and corn starch), the demand and supply of the products and their respective substitutes in the market and the variety of product specifications.

Following a strong rebound in 2021, during the six months ended 30 June 2022 (the "Period"), the global economy showed signs of slowdown amid the continued impact of the coronavirus disease ("COVID-19") pandemic, inflationary pressure and supply chain disruption. Although many countries were determined to resume normal business activities and ease travel restrictions to bring the economy back on track, the COVID-19 pandemic has caused structural changes in the global economy and the labour market. In addition, the outbreak of the war in Ukraine in February 2022 has disrupted food and energy supplies and led to global inflation. Skyrocketing energy and raw material costs and supply chain bottlenecks have put immense pressure on manufacturing and retail sectors. All these concerns have added uncertainty to the global economy during the Period. According to the World Bank, the global economic growth is expected to lower from 5.5% in 2021 to 4.1% in 2022 and further decrease to 3.2% in 2023. In the People's Republic of China (the "PRC" or "China"), the sudden spike in COVID-19 infection cases in major cities including Shanghai in the first quarter of 2022 caused by the highly contagious Omicron variant has led to strict lockdowns in these cities in which most of the economic activities were suspended. As a result, China's economy grew by only 2.5% during the first half of 2022 - falling behind its annual growth target of 5.5% for 2022. The operating environment of the Group remained challenging throughout the Period.

Global corn production for 2022/23 is estimated at 1,185.9 million metric tonnes ("MT") (2021/22: 1,218.8 million MT), according to the estimates from the United States Department of Agriculture in August 2022. With respect to corn price, international corn price once reached 818 US cents per bushel (equivalent to RMB2,129 per MT) in April 2022, driven by the shortage in grain supply and the increase in shipping cost intensified by the war in Ukraine. International corn price as at 30 June 2022 was 744 US cents per bushel (equivalent to RMB1,962 per MT) (30 June 2021: 720 US cents per bushel (equivalent to RMB1,831 per MT)). In the PRC, domestic corn harvest in 2022/23 is estimated to produce approximately 272.6 million MT (2021/22: approximately 272.6 million MT) of corn, with consumption volume estimated at 290.5 million MT (2021: 287.7 million MT) for 2022. It is expected that China will continue to import corn to make up for the shortfall in corn supply in 2022. During the Period, China has imported approximately 13.6 million MT of corn. It is estimated that China's corn import will reach 18.0 million MT in 2022. All these factors have contributed to the surge in domestic corn price during the Period. As a result, corn price in the PRC rose to RMB2,827 per MT (30 June 2021: RMB2,790 per MT) as at 30 June 2022. Although the profit margin of the upstream corn refinery has improved, the overall capacity utilisation of the corn refinery industry in China was about 60% during the Period due to decreased demand as a result of the lockdown measures implemented. In addition, resumption of the Group's upstream operation requires huge working capital. It is not commercially viable for the Group to resume its upstream operation. As a result, the Group has continued to suspend its upstream operation during the Period.

During the Period, global supply shortage, high corn cost and fuel prices have supported the global lysine price. Similar situation has also been found in the PRC. In order to secure the supply of pork and better manage the impact of the African Swine Fever, the PRC government has continued its effort to facilitate the husbandry industry consolidation as well as feed formula improvements. Consequently, China's pork production in 2022 is expected to increase by 5% year-on-year. On the other hand, to increase the efficiency of grains usage in feed products, 農業農村部畜牧獸醫局 (Animal Husbandry and Veterinary Bureau under the Ministry of Agriculture and Rural Affairs) has issued a guideline titled《飼 料中玉米豆粨減量替代工作方案》(Work Plan for Reduction and Replacement of Corn and Soybean Meal in Feed\*) to lower the proportion of corn and soybean used as feed and increase the proportion of feed additives such as lysine in animal feed products. These changes, together with a relatively stable outlook on the husbandry industry, have supported the PRC lysine price. During the Period, domestic lysine price has been ranging from RMB11,050 to RMB12,700 per MT (2021: RMB9,200 to RMB13,000 per MT). While the outlook on lysine market has improved, the resumption of the Group's lysine production operation would require the resumption of the Group's upstream operation for the production of feedstock based on the designed capacity of the Group's lysine production lines, which would incur huge working capital. In addition, high corn price will remain throughout 2022 considering current market conditions. The Group needs to secure sufficient fund to resume and ensure the continuous operation of its lysine segment. As such, the Group has continued to suspend its lysine operation during the Period. Consequently, an insignificant revenue has been recorded from the Group's lysine segment during the Period as most of the inventory had been sold in the previous periods.

As for the sugar market, global sugar production for 2021/22 was 174.0 million MT (2020/21: 179.0 million MT) with consumption estimated at 173.8 million MT (2020/21: 175.9 million MT). Although global supply and demand were in balance, the international sugar price continued to increase during the Period as driven by the uncertainty around the war in Ukraine and the inflation of commodity prices. As such, international sugar price increased to 18.70 US cents per pound (equivalent to RMB2,769 per MT) (end of June 2021: 17.63 US cents per pound (equivalent to RMB2,517 per MT)) by the end of June 2022. Subject to energy price fluctuation and the development of the war in Ukraine, outlook for international sugar price is currently expected to turn bearish in 2022/23 with increased production volume estimated at 177.4 million MT while consumption is projected at 174.6 million MT. In the PRC, domestic sugar production was about 9.7 million MT (2020/21: 10.7 million MT) in the 2021/22 harvest, while consumption staved at around 15.5 million MT. Domestic sugar price increased to RMB5,778 per MT (end of June 2021: RMB5,690 per MT) by the end of June 2022 as the COVID-19 pandemic has limited the imports of sugar during the first half of 2022. Nevertheless, as disclosed in the joint announcement of the Company and GSH dated 14 April 2022 and the annual report of the Company for the year ended 31 December 2021 (the "2021 Annual Report"), due to the lockdown measures implemented in Shanghai in response to the outbreak of COVID-19, the mobility of manpower across different industries was limited and caused disruptions to the logistics network. As a result, the production operation of the Group's production facilities in Shanghai has also been suspended since April 2022. The suspension of operation of the Group's production facilities in Shanghai has substantially lowered the output of the Group's corn sweeteners and negatively impacted the financial performance of the Group's corn sweeteners segment during the Period.

The operating environment for the Group's polyol chemical business continued to be challenging during the Period. The Group's research and development team is proactively looking at the possibility to restructure its product portfolio to include high value-added products in response to changing market needs. The Group will continue to observe the market and take a prudent approach before resuming its polyol chemical business.

The operating environment of the Group in the second half of 2022 is expected to remain challenging as driven by high commodity prices and energy costs. On the other hand, the COVID-19 pandemic and the geopolitical complexity will continue to add uncertainty to global economy. In the short run, the Group will continue to monitor closely the relevant COVID-19 pandemic precautionary measures imposed by the PRC government, the market conditions as well as the financial conditions of the Group and be cautious in making decisions on the Group's business strategies to optimise the operation of the Group's production facilities to secure relatively healthy cash flow while balancing its market presence. In the long run, the Group will continue to strengthen its market position by utilising its brand name, strive to provide excellent customer service and be customer-oriented to understand better their everchanging demands and product requirements, further improve cost effectiveness and product mix through continuous research and development efforts, and at the same time, optimise utilisation rate to achieve operational efficiency in response to market changes. With respect to the Group's financial position, the Group will continue to leverage on the synergies with its resourceful shareholders with state-owned enterprise background and devote its energy in facilitating the implementation of the Group's debt restructuring plan and seek opportunities with other potential investors that will bring both financial and business synergies to the Group.

#### UPDATE ON REMEDIAL MEASURES

The consolidated financial statements of the Group for the year ended 31 December 2021 was subject to the disclaimer of opinion by the external auditor (the "Auditor") of the Company as detailed in the 2021 Annual Report. The management of the Company wishes to provide the latest update on the relevant remedial measures taken or to be taken as follows, which have been considered, recommended and agreed by the audit committee (the "Audit Committee") of the Company after its critical review of the management's position for the Period:

#### Material uncertainty relating to going concern

As detailed in the 2021 Annual Report, the Auditor has raised material uncertainty relating to the ability of the Group to continue as going concern. In addition to the actions disclosed in the 2021 Annual Report, the management of the Company has taken and will take steps as outlined in note 2.2 to the condensed consolidated financial statements on page 32 to page 36 of this report to improve the financial position of the Group. Dependent on the successful and favourable outcomes of such steps, the board (the "Board") of directors (the "Directors") of the Company, including the Audit Committee, is of the view that the Group would have sufficient working capital for operation need for at least 12 months from 30 June 2022.

#### FINANCIAL PERFORMANCE

During the Period, the Group continued to suspend the operation of the production facilities as detailed in the Company's announcements dated 24 September 2019, 16 December 2019, 10 February 2020 and 29 May 2020 (collectively, the "Suspension of Operation Announcements") to minimise financial risks and secure financial resources during the time of economic uncertainty. In addition, as disclosed in the joint announcement of the Company and GSH dated 14 April 2022, the Group temporarily suspended its production facilities in Shanghai as a result of the lockdown measures implemented in Shanghai during the first half of 2022. Consequently, the sales volume of the Group had significantly dropped by approximately 59.8% during the Period. The consolidated revenue and gross profit of the Group for the Period decreased significantly by approximately 56.8% and 23.0% respectively to approximately HK\$155.6 million (2021: HK\$359.9 million) and HK\$11.7 million (2021: HK\$15.2 million) respectively. Due to the improvement in corn sweetener prices as driven by rising sugar price during the Period, the average selling price of the Group's sweetener products had increased during the Period. Such increase was sufficient to offset the increase in raw material costs. As a result, the gross profit margin of the Group increased by 3.3 percentage points to 7.5% (2021: 4.2%).

On the other hand, other income of the Group decreased significantly during the Period by approximately HK\$1,378.0 million to approximately HK\$8.5 million (2021: HK\$1,386.5 million), with the absence of the recognition of items such as the one-off gain on debt restructuring of approximately HK\$1,325.0 million recorded in the corresponding period last year subsequent to the completion of the repurchase agreements dated 26 March 2021 entered into between certain subsidiaries of the Company and GSH and 長春潤德投資集團有限公司 (Changchun Rudder Investment Group Co., Ltd.\*) ("Changchun Rudder") and the completion of the repurchase agreement dated 26 March 2021 entered into between 長春大金倉玉米收儲有限公司 (Changchun Dajincang Corn Procurement Co., Ltd.\*) ("Dajincang") and Changchun Rudder (collectively, the "Repurchase Agreements" and each, a "Repurchase Agreement"), all of which took place on 31 March 2021. As such, the Group recorded a net loss of approximately HK\$829.2 million (2021: net profit: HK\$506.3 million) and LBITDA (i.e. loss before interest, taxation, depreciation and amortisation) of approximately HK\$284.0 million (2021: EBITDA (i.e. earnings before interest, taxation, depreciation and amortisation): HK\$1,108.0 million) during the Period.

To improve the financial performance of the Group, the management of the Group will continue its efforts in (1) speeding up the process of resumption of the land and buildings owned by the Group which are located in Luyuan District, Changchun, the PRC (the "Relevant Properties") in order to reduce the financial burden of the Group; (2) actively negotiating with banks/creditors to push forward the debt restructuring plan to lower the debt level of the Group; (3) closely monitoring market changes to streamline the production processes and identify opportunities for partial resumption of production operations to improve the Group's financial conditions and operational efficiency; and (4) introducing potential investors to further strengthen the working capital and financial position of the Group.

#### **Upstream products**

(Sales amount: Nil (2021: HK\$0.8 million)) (Gross profit: Nil (2021: HK\$0.1 million))

During the Period, no sale of upstream products was recorded as the Group suspended all its upstream operations to minimise financial risks and secure financial resources during the time of economic uncertainty while most of the inventory had been sold in 2021. As a result, no revenue from the sale of corn starch and other corn refined products (2021: Nil and HK\$0.8 million) were recorded during the Period. No internal consumption of corn starch was recorded during the Period (2021: Nil).

### Amino acids

(Sales amount: HK\$0.1 million (2021: HK\$1.1 million)) (Gross profit: less than HK\$0.1 million (2021: less than HK\$0.1 million))

The amino acids segment consists of lysine, protein lysine and threonine products. During the Period, the Group continued to suspend its amino acids operation to minimise cash flow pressure of the Group. The amino acids segment recorded insignificant sales volume as most of the inventory has been exhausted prior to the Period. As a result, the revenue of the amino acids segment amounted to approximately HK\$0.1 million (2021: HK\$1.1 million) with sales volume of 4 MT (2021: 100 MT) for the Period. Consequently, the amino acid segment recorded an insignificant gross profit of less than HK\$0.1 million (2021: less than HK\$0.1 million), with a gross profit margin of 14.4% (2021: 3.4%). Although it is expected that pork production in China will gradually pick up its recovery momentum in 2022 with the support of the PRC government, the resumption of the Group's lysine production operation would require the resumption of the Group's upstream operation for the production of feedstock based on the designed capacity of the Group's lysine production lines which would incur huge working capital. In addition, corn price is expected to remain high throughout 2022. The Group will continue to closely monitor the development of the market conditions as well as the financial conditions of the Group to secure adequate working capital to resume and sustain the continuous production operation of the amino acids segment as soon as possible to the extent practicable.

#### Corn sweeteners

(Sales amount: HK\$155.0 million (2021: HK\$355.6 million)) (Gross profit: HK\$11.2 million (2021: HK\$13.5 million))

The corn sweeteners segment consists of corn syrup and corn syrup solid, and is operated by GSH.

Due to the temporary suspension of operation of the Group's production facilities in Shanghai since April 2022 together with the continued suspension of the Group's sweeteners production facilities in the Jinzhou and Xinglongshan sites, the revenue of the corn sweeteners segment decreased by approximately 56.4% to approximately HK\$155.0 million (2021: HK\$355.6 million). Such decrease was mainly attributable to the decrease in sales volume by approximately 59.6% to approximately 36,000 MT (2021: 89,000 MT). As the portion of expenses in relation to suspension of operation has been allocated to other expenses during the Period and the increase in the selling price of corn sweeteners has offset the increase in the raw material cost, the gross profit of the corn sweeteners segment dropped only by 17.0% to approximately HK\$11.2 million (2021: HK\$13.5 million) during the Period, with gross profit margin improved to 7.2% (2021: 3.8%).

#### Polyol chemicals

(Sales amount: HK\$0.5 million (2021: HK\$2.4 million)) (Gross profit: HK\$0.5 million (2021: HK\$1.5 million))

The polyol chemicals segment consists of polyol chemicals such as glycols and resins, anti-freeze products, hydrogen and ammonia. The Group had suspended most of its polyol chemicals production since March 2014. The Group has continued to utilise its polyol chemicals inventory to produce and sell a small amount of anti-freeze products during the Period.

During the Period, the revenue of polyol chemicals segment decreased by 79.2% to approximately HK\$0.5 million (2021: HK\$2.4 million). However, as substantial provision in relation to the closing inventory of polyol chemicals has been made in previous years, the polyol chemicals segment recorded a gross profit of approximately HK\$0.5 million (2021: HK\$1.5 million) with a gross profit margin of 100.0% (2021: 62.5%).

#### **Export sales**

During the Period, export sales which comprised entirely the sales of corn sweeteners accounted for 3.2% (2021: 2.0%) of the Group's total revenue. The export sales of the Group amounted to approximately HK\$5.0 million (2021: HK\$7.3 million) during the Period, representing a decline of approximately 31.5% as compared to the corresponding period last year. Such decline was mainly attributable to the suspension of most of the Group's production facilities and the exhaustion of most of the inventory prior to the Period. Consequently, no export sales of upstream products, amino acids and polyol chemicals were recorded during the Period and the corresponding period last year.

Other income and gains, operating expenses, finance costs and income tax expenses

#### Other income and gains

During the Period, other income and gains decreased by approximately 99.4% to approximately HK\$8.5 million (2021: HK\$1,386.5 million). Such difference was mainly attributable to the absence of the recognition of items such as the one-off gain on debt restructuring of approximately HK\$1,325.0 million as a result of the completion of the Repurchase Agreements in 2021.

#### Selling and distribution costs

During the Period, selling and distribution costs decreased by approximately 36.4% to approximately HK\$20.6 million (2021: HK\$32.4 million), accounting for approximately 13.3% (2021: 9.0%) of the Group's revenue. Such decrease was mainly attributable to the decrease in sales volume.

#### Administrative expenses

During the Period, administrative expenses decreased by 8.1% to approximately HK\$160.9 million (2021: HK\$175.1 million), representing 103.5% (2021: 48.6%) of the Group's total revenue. Such decrease was mainly attributable to the decrease in depreciation expense by approximately HK\$9.3 million to approximately HK\$66.7 million (2021: HK\$76.0 million) as a result of loss on properties revaluation on buildings recorded in 2021.

#### Other expenses

During the Period, other expenses increased by 1.8% to approximately HK\$294.5 million (2021: HK\$289.3 million). Such increase was mainly attributable to the provision made in respect of the compensation for legal dispute in the PRC during the Period.

#### Finance costs

During the Period, finance costs of the Group decreased by 5.8% to approximately HK\$373.4 million (2021: HK\$396.6 million), which was mainly attributable to the decrease in interest payables to suppliers subsequent to the agreements reached with creditors to reschedule the repayment plan during the Period.

#### Income tax expenses

During the Period, as all the subsidiaries of the Group recorded tax losses or the estimated assessable profits are wholly absorbed by tax losses brought forward from previous years, no income tax expenses were incurred during the Period (2021: Nil).

## (Loss) Profit shared by non-controlling shareholders

During the Period, GSH recorded a loss of approximately HK\$117.5 million (2021: profit: HK\$7.2 million), leading to loss shared by non-controlling shareholders amounted to approximately HK\$42.3 million (2021: profit shared by non-controlling shareholders: HK\$2.7 million).

## CAPITAL STRUCTURE, FINANCIAL RESOURCES AND LIQUIDITY

#### Capital structure

The capital structure of the Group consists of debts, which mainly include interest-bearing bank and other borrowings, convertible bonds and equity reserves attributable to owners of the Company which comprises issued ordinary shares and various reserves. The Board shall review the Group's cost and risks of capital on a semi-annual basis with the aim to achieve the optimal capital structure for the Group.

#### Net borrowing position

The total interest-bearing bank and other borrowings of the Group as at 30 June 2022 decreased by approximately HK\$289.5 million to approximately HK\$7,211.8 million (31 December 2021: HK\$7,501.3 million) as a result of net repayment of certain bank and other borrowings of approximately HK\$24.7 million and exchange rate adjustment of approximate HK\$264.8 million during the Period. On the other hand, the cash and bank balances and pledged bank deposits as at 30 June 2022 decreased by approximately HK\$7.5 million to approximately HK\$14.8 million (31 December 2021: HK\$22.3 million), which were mainly denominated in Renminbi and Euros with a small amount denominated in Hong Kong dollars and US dollars (31 December 2021: mainly denominated in Renminbi and Euros with a small amount denominated in Hong Kong dollars and US dollars). As a result, the net borrowings decreased to approximately HK\$7,197.0 million (31 December 2021: HK\$7,479.0 million).

### SUPPLEMENTARY INFORMATION IN RELATION TO THE PERIOD UNDER REVIEW

Updates on the suspension of operation of certain subsidiaries of the Group and the impact of COVID-19 on the Group's business

As at the date of this report, the suspensions of operation as disclosed in the Suspension of Operation Announcements remained. The management of the Group expects that the zero-COVID policy imposed by the PRC government will remain in the foreseeable future which will add uncertainty to the operating environment of the Group in case of any future outbreak of COVID-19 in the PRC. Moreover, the resumption of the Group's upstream operation requires huge working capital. As such, it is expected that the plan for the resumption of operation of the Group's production facilities in Changchun will be delayed.

Reference is made to the joint announcement of the Company and GSH dated 14 April 2022 in relation to the temporary suspension of production operation of the Group's production facilities in Shanghai as a result of the lockdown measures implemented in Shanghai in response to the outbreak of COVID-19. The lockdown measures have limited the mobility of manpower across different industries and caused disruptions to the logistics network and necessitated the temporary suspension of production operation of the Group's production facilities in Shanghai. As the COVID-19 pandemic situation in Shanghai had been brought under control with the lockdown measures lifted in stages starting from the end of May 2022, the Group has gradually resumed the operation of part of the Group's production facilities in Shanghai since June 2022.

Entering into the second half of 2022, the COVID-19 pandemic will continue to affect the global economy. The PRC is expected to face continuous challenges from shrinking demand, supply shock, inflationary pressure and global recession. In addition, the ongoing structural changes in its economy for more sustainable growth in the future is expected to add temporary pressure to many businesses. With respect to the Group's business, corn price is expected to remain high throughout 2022. Coupled with the increasingly competitive operating environment, the second half of 2022 is expected to remain challenging for the Group. The management of the Group will continue to assess the impact of the COVID-19 pandemic on the financial positions of the Group and closely monitor the market conditions and the financial conditions of the Group, and will ensure that the production operation of such subsidiaries will resume as soon as possible to the extent practicable.

#### Relocation of production facilities to the Xinglongshan site

Reference is made to the 2021 Annual Report, in relation to, among others, the relocation of production facilities of the Group to the Xinglongshan site and the resumption of the Relevant Properties.

Due to the challenging economic environment and the continued impact of the COVID-19 pandemic, the initial plan for the relocation of the Group's production facilities has been adjusted and some of the relocation projects have been put on hold in light of the continuously changing market conditions and pending the availability of capital and favourable market conditions. The Group will continue to assess the continuously changing market conditions and the progress of the resumption of the Relevant Properties so as to the update and revise the feasibility studies in respect of the relocation projects for submission to, among others, the relevant government bodies for approval. The Group will make further announcement(s) to provide shareholders and potential investors of the Company with the latest updates of the progress of relocation of production facilities to the Xinglongshan site as and when appropriate.

#### Subscription of new shares of the Company under the general mandate

As announced by the Company on 19 January 2022, the Company entered into the subscription agreement (the "2022 Subscription Agreement") with Rationale Holdings on 19 January 2022, pursuant to which Rationale Holdings has conditionally agreed to subscribe for, and the Company has conditionally agreed to allot and issue, an aggregate of 1,781,481,143 new ordinary shares (the "2022 Subscription Shares") at the subscription price of HK\$0.1345 per 2022 Subscription Share (the "2022 Subscription"). The net proceeds from the 2022 Subscription, after the deduction of relevant expenses, was approximately HK\$239,500,000. The net price of each 2022 Subscription Share is therefore estimated to be approximately HK\$0.1344. The Group will utilise a portion of the proceeds from the 2022 Subscription for the partial resumption of the Group's upstream operation in the Xinglongshan site. The Directors believe that the resumption of operation in Xinglongshan will bring in operating cash inflow to the Group in 2022. As at the date of this report, the 2022 Subscription is yet to complete. For details of the 2022 Subscription, please refer to the announcements of the Company dated 19 January 2022 and 25 January 2022.

### DISCLOSURE PURSUANT TO RULES 13.19 AND 13.21 OF THE LISTING RULES

#### **Breach of loan agreements**

(1) Reference is made to the joint announcement of the Company and GSH dated 4 May 2020. Under the various loan agreements (collectively, the "Yuancheng Loan Agreements") entered into between a subsidiary of GSH, namely, 錦州元成生化科技有限公司 (Jinzhou Yuancheng Biochem Technology Co., Ltd.\*) ("Jinzhou Yuancheng"), and each of 中國建設銀行股份有限公司錦州分行 (Jinzhou Branch of China Construction Bank\*) ("Jinzhou CCB") and 中國銀行股份有限公司錦州港支行 (Jinzhou Port Branch of Bank of China\*) ("Jinzhou BOC") for the aggregate principal amount of RMB219.9 million (the "Yuancheng Loans"), comprising of (i) the loan owed to Jinzhou CCB for the principal amount of RMB189.9 million ("Yuancheng CCB Loans") and (ii) the loan owed to Jinzhou BOC for the principal amount of RMB30.0 million ("Yuancheng BOC Loan"), Jinzhou Yuancheng was required to satisfy certain financial covenants, failure to perform or comply with any of those financial covenants would entitle Jinzhou CCB and Jinzhou BOC to, among others, declare the outstanding principal amount, accrued interest and all other sums payable under the Yuancheng Loans immediately due and payable. In addition, such breach may also trigger cross default provisions in other loan agreements entered into by the GSH Group.

Jinzhou Yuancheng has defaulted in the repayment of Yuancheng BOC Loan as detailed in the joint announcements made by the Company and GSH dated 27 April 2021. The maximum liability guaranteed by the GSH Group is RMB36.8 million, being the principal amount, together with all interests, liabilities, fees and penalty that may accrue under the Yuancheng BOC Loan.

## 2. BASIS OF PREPARATION AND ACCOUNTING POLICIES (Continued)

#### 2.2 Going concern (Continued)

(a) Active negotiations with banks and creditors for the debt restructuring plan of the Group to improve its financial position (Continued)

Moreover, as announced by the Company on 8 March 2022, 中國進出口銀行 (The Export-Import Bank of China\*) ("Export-Import Bank") has entered into transfer agreements with China Cinda to transfer all rights (including security rights) and benefits of certain loans owed by the Group with an aggregate outstanding principal amount of approximately RMB1.2 billion together with outstanding interest (the "Export-Import Bank Transferred Loans") to China Cinda. The Export-Import Bank Transferred Loans included (i) the loan under the loan agreements entered into between an indirect wholly-owned subsidiary of the Company and 中 國進出口銀行吉林省分行 (Jilin Branch of The Export-Import Bank of China\*) with an aggregate outstanding principal amount of approximately RMB648.0 million together with outstanding interest and (ii) a portion of the syndicated loan under the syndicated loan agreement entered into among an indirect wholly-owned subsidiary of the Company and Jilin Branch CCB, 中國建設銀行股份有限公司長春西安大路 支行 (Changchun Xian Road Branch of China Construction Bank Corporation\*) and Export-Import Bank with an aggregate outstanding principal amount of approximately RMB1.8 billion together with outstanding interest.

The Company will endeavour to facilitate the implementation of the next stage of the debt restructuring plan. It is currently expected that debt restructuring in relation to a portion of the loans owed by the Group and the GSH Group could be completed by the end of 2022, pending and subject to the internal approval from the respective creditors and relevant local government authorities. The Directors expect that upon the completion of the debt restructuring plan, the financial position of the Group will improve significantly.

### (b) Resumption of land and buildings located in Luyuan District, Changchun

The first phase of resumption of land and buildings owned by the Group which are located in Luyuan District, Changchun, the People's Republic of China (the "PRC" or "China") (the "Relevant Properties") under the PRC's Slum Redevelopment Policy involved the properties owned by a subsidiary of GSH (the "Dihao Resumption") with an aggregate area of land of approximately 149,249 square metres and total gross floor area of approximately 67,000 square metres. The completion of the Dihao Resumption took place in 2020 and all the compensation in the amount of approximately RMB443.0 million had been received during the first half of 2021. For details of the Dihao Resumption, please refer to the joint announcements made by the Company and GSH on 24 August 2020 and 30 September 2020.

It is expected that the resumption of the remaining part of the Relevant Properties by the local government will be conducted in stages according to the relevant government policy. The management expects that a substantial part of the remaining Relevant Properties will be resumed by the local government in 2022. The Directors believe that the proceeds from the resumption of the Relevant Properties will help to relieve the financial and cash flow pressure of the Group during the period of suspension of operation of most of the Group's production facilities.

## 2. BASIS OF PREPARATION AND ACCOUNTING POLICIES (Continued)

#### 2.2 Going concern (Continued)

#### (c) Monitoring of the Group's operating cash flows

The Group has taken various measures to minimise operating cash outflow and secure financial resources during market turbulence as a result of, among others, the coronavirus disease ("COVID-19") pandemic. During the Period, the Group has suspended the production operation of most of the Group's production facilities and consolidated its resources in higher efficiency segments.

#### (d) Financial support from the indirect major shareholder

The Group has received an updated written confirmation dated 25 April 2022 from 吉林省農業投資集團有限公司 (Jilin Agricultural Investment Group Co., Ltd.) ("Nongtou", together with its subsidiaries, the "Nongtou Group") that it would continue to provide financial support to the Group in the following 24 months on a going concern basis. Such assistance received by the Group is not secured by any assets of the Group.

Nongtou, being a state-owned enterprise, was established in August 2016 and its unaudited net assets value as at 30 June 2022 amounted to approximately RMB2,128.6 million (31 December 2021: approximately RMB2,323.5 million). It is tasked to consolidate the state-owned investments in the agricultural sector in Jilin Province. The management of the Company is of the view that Nongtou would be able to support the operations of the Group, provide synergistic effects among its various investments in the agricultural sector in Jilin Province and provide adequate and sufficient financial support to the Group.

#### (e) Introducing potential investors to the Company

The management of the Company has been looking for opportunities for cooperation and potential investment with different industrial players or investors in order to strengthen the financial positions and the business profile of the Group. As announced by the Company on 19 January 2022, the Company entered into a subscription agreement (the "2022 Subscription Agreement") with Rationale (Holdings) Investment Limited ("Rationale Holdings") on 19 January 2022, pursuant to which Rationale Holdings has conditionally agreed to subscribe for, and the Company has conditionally agreed to allot and issue, 1,781,481,143 new ordinary shares (the "2022 Subscription Shares") at the subscription price of HK\$0.1345 per 2022 Subscription Share (the "2022 Subscription"). The gross proceeds from the 2022 Subscription will amount to approximately HK\$239,610,000 and it is estimated that the net proceeds from the 2022 Subscription, after the deduction of relevant expenses, will be approximately HK\$239,500,000. The net price of each 2022 Subscription Share is therefore estimated to be approximately HK\$0.1344. The Group will utilise a portion of the proceeds from the 2022 Subscription for the resumption of operation of the Group's upstream production facilities in the Xinglongshan site so as to bring in operating cash inflow to the Group in 2022. As at the date of this report, the 2022 Subscription is yet to complete.

For the six months ended 30 June 2022

## 2. BASIS OF PREPARATION AND ACCOUNTING POLICIES (Continued)

#### **2.2** Going concern (Continued)

The validity of the going concern assumption on which the condensed consolidated financial statements are prepared is dependent on the successful and favourable outcomes of the steps being taken by the management of the Company and the development of the events as described above. The Directors proposed to procure additional working capital through the steps mentioned above. After taking into account the above steps, the internal resources, the present and expected banking facilities available, the Board, including the Audit Committee, is of the view that, the Group would have sufficient working capital for operation need for at least 12 months from 30 June 2022. Therefore, the condensed consolidated financial statements of the Group have been prepared on a going concern basis.

Should the going concern assumption be inappropriate, adjustments may have to be made to reflect the situation that assets may need to be realised at the amounts other than which they are currently recorded in the condensed consolidated statement of financial position. In addition, the Group may have to recognise further liabilities that might arise, and to reclassify non-current assets and non-current liabilities as current assets and current liabilities, respectively.

#### 2.3 Changes in accounting policies and disclosures

The accounting policies adopted in preparing the condensed consolidated financial statements for the Period are consistent with those adopted in the preparation of the Group's annual financial statements for the year ended 31 December 2021, except for the adoption of the following new/revised Hong Kong Financial Reporting Standards ("**HKFRSs**") which are relevant to the Group and are effective from the Period.

Amendments to HKAS 16
Amendments to HKAS 37
Amendments to HKFRS 3
Annual Improvements to HKFRSs

Proceeds before Intended Use Cost of Fulfilling a Contract Reference to the Conceptual Framework 2018-2020 Cycle

The adoption of the new/revised HKFRSs did not result in substantial changes to the Group's accounting policies and amounts reported for the Period and prior years.

For the six months ended 30 June 2022

### 3. OPERATING SEGMENT INFORMATION

For management purposes, the Group is organised into business units based on its products and services and has four (six months ended 30 June 2021: four) reportable operating segments as follows:

- (a) the upstream products segment engages in the manufacture and sale of corn starch, gluten meal, corn oil and other corn refined products;
- (b) the amino acids segment engages in the manufacture and sale of corn based biochemical products, including lysine and threonine;
- (c) the corn sweeteners segment engages in the manufacture and sale of corn sweeteners, including glucose, maltose, high fructose corn syrup and maltodextrin; and
- (d) the polyol chemicals segment engages in the manufacture and sale of corn based biochemical products, including polyol chemicals, anti-freeze products, hydrogen and ammonia.

The management, who is the chief operating decision-maker, monitors the results of the Group's operating segments separately for the purpose of making decisions in relation to resources allocation and performance assessment. Segment performance is evaluated based on reportable segment's profit or loss, which is a measure of adjusted profit or loss before tax. The adjusted profit or loss before tax is measured consistently with the Group's profit or loss before tax except that finance costs as well as corporate income and expenses are excluded from such measurement.

Intersegment sales and transfers are transacted with reference to the prevailing selling prices used for sales made to third parties.

### 7. INCOME TAX EXPENSES

No provision for Hong Kong profits tax has been made as the Group had no assessable profits arising in Hong Kong during the Period and the six months ended 30 June 2021.

During the Period and the six months ended 30 June 2021, no provision for the PRC enterprise income tax was made as all the subsidiaries of the Group in the PRC incurred tax losses or the estimated assessable profits are wholly absorbed by tax losses brought forward from previous years.

## 8. (LOSS) EARNINGS PER SHARE

The calculation of the basic loss per share for the Period is based on the loss attributable to owners of the Company for the Period of HK\$786,940,000 (six months ended 30 June 2021: profit attributable to owners of the Company of HK\$503,605,000) and the weighted average number of ordinary shares in issue during the Period of 8,907,405,717 (six months ended 30 June 2021: 8,907,405,717) shares.

As the assumed conversion of the convertible bonds has an anti-dilutive effect, the diluted loss per share was equal to the basic loss per share for the Period. The calculation of the diluted earnings per share for the six months ended 30 June 2021 is based on the profit for the six months ended 30 June 2021 attributable to owners of the Company of HK\$546,745,000 (as adjusted for the imputed interest on convertible bonds of HK\$43,140,000) and the weighted average number of ordinary shares in issue during the six months ended 30 June 2021 of 14,080,166,000 shares (as adjusted for the assumed full conversion of convertible bonds).

#### 9. DIVIDEND

#### 18. LITIGATIONS

#### Delayed payments to suppliers

In previous years, the Group delayed settlement of payables to suppliers due to shortage of working capital. As a result, several subsidiaries in the PRC have been involved in litigations initiated by various suppliers related to overdue payables. Up to the date of this report, a majority of the litigations have been concluded by the court and/or settled, while some of the litigations are still pending judgment. Since the Group has already recorded these payables in the condensed consolidated financial statements, the Directors are of the view that the litigations will not have any significant financial impact to the Group.

#### NON-ADJUSTING EVENTS AFTER THE REPORTING PERIOD 19.

Reference is made to the announcement of the Company dated 24 July 2022 in relation the deemed disposal of equity interest in GSH (a non-wholly owned subsidiary of the Company). On 24 July 2022, GSH entered into a conditional subscription agreement (the "GSH Subscription Agreement") with Hartington Profits Limited ("Hartington Profits"), pursuant to which Hartington Profits has conditionally agreed to subscribe for, and GSH has conditionally agreed to allot and issue to Hartington Profits, 305,517,200 new ordinary shares (the "GSH Subscription Shares") at subscription price of HK\$0.1 per GSH Subscription Share ("GSH Subscription"). Hartington Profits is wholly-owned by Mr. Kong Zhanpeng who was an executive Director, chief executive officer and chief economist of the Company until 23 May 2014, 1 October 2018 and 20 December 2019, respectively. He was also an executive director of GSH until 31 December 2018.

Upon the completion of GSH Subscription, the Company's interest in the issued share capital of GSH will be diluted from approximately 64.04% to approximately 53.37% and GSH will remain a non-wholly owned subsidiary of the Company. Financial results of GSH will continue to be consolidated in that of the Company. It is expected that no gain or loss will be recorded by the Group from the GSH Subscription. No adjustment has been made in this condensed consolidated financial statements for the Period in this regard. As at the date of this report, the completion of the GSH Subscription has yet to take place.
