2022 ANNUAL REPORT

* For identification purposes only

▶▶▶ PREMIER R&D SERVICE PROVIDER FOR THE LIFE SCIENCES INDUSTRY

About ▶▶▶ Pharmaron

Pharmaron (Stock Code: 300759.SZ/3759.HK) is a premier R&D service provider for the life sciences industry. Founded in 2004, Pharmaron has invested in its people and facilities and established a broad spectrum of research, development and manufacturing service capabilities throughout the entire drug discovery, preclinical and clinical development process across multiple therapeutic modalities, including small molecules, biologics and CGT products. With around 20,000 employees, and operations in China, U.S., and U.K., Pharmaron has an excellent track record in the delivery of R&D solutions to its partners in North America, Europe, Japan and China.

▶▶▶ Chairman's Statement

Dear Shareholders:

On behalf of the Board of Directors of Pharmaron and its subsidiaries (collectively, the "Company"), I would like to express my sincere gratitude for your trust and support. Let me present you the business performance results of the Company for the year ended December 31, 2022.

The Company successfully completed its listing on both Shenzhen Stock Exchange and Hong Kong Stock Exchange in 2019, which are not only milestone events in the Company's history, but also set up new stage for the company's further development with the help of domestic and overseas capital markets. Over the past three years, despite added complications from a global pandemic, the Company has overcome numerous challenges and difficulties, achieved leap-forward development. The revenue has grown from 3.76 billion (RMB) in 2019 to 10.27 billion (RMB) in 2022. The total number of employees has increased from 7,393 to 19,481 over the same period of time. After established our first two business platforms, Laboratory Services and Chemistry, Manufacturing and Control (CMC), we also have built Clinical Development, Biologics & CGT capabilities over the past three years. With the four service platforms, we now offer our global clients end-to-end research, development and manufacturing services expanding from small molecules to multiple modalities including biologics and cell and gene therapy (CGT) drugs to cover the entire process of drug discovery, preclinical, clinical development and manufacturing.

Complex international environment, widespread inflation in Europe and the United States, as well as outbreak of Omicron, all of these made 2022 an unusual and difficult year. However, we had continued to nourish our "Employee Number One and Clients Centered" culture, firmly implemented our strategies and plans and maintained the high growth momentum.

I. STRENGTHENING THE END-TO-END, FULLY INTEGRATED SERVICE PLATFORM TO SUPPORT GLOBAL DRUG INNOVATION

a. Supporting global and China drug innovation

Cultivating global and China drug innovation market, our life science R&D service platform continued providing service offerings globally, having more than 800 new clients introduced in 2022. The revenue structure became further optimized with 21.12% YoY increase from the top 20 clients, representing 29.64% of the total revenue comparing to 33.75% in 2021. With extensive experience in global R&D services, coupled with cutting edge technologies, state-of-the-art facilities, supported by a quality system of international standards, we helped our clients' projects advance rapidly from early stage of R&D to clinical stage. In 2022, we participated in a total of 652 drug discovery projects. The small molecule CDMO platform (CMC service) offered process R&D and manufacturing services for 1,079 drug molecules and intermediates, including 809 at preclinical stage, 230 at clinical phase I and II, 24 at clinical phase III, and 16 process validation and commercialization. On the other hand, we supported 87 IND or NDA projects, including 79 projects for global filing in China and the US or other countries. We had extensive technical cooperation with clients and made joint publications from research results, including 24 articles published in peer-reviewed international scientific journals, such as *J. Med. Chem.*, *Bioorg. Med. Chem. Lett.* and *J. Pharm. Sci.*, etc., and 29 granted or submitted domestic and international patent applications (13 of which Pharmaron invented and owns the IP rights and 16's IP rights owned by our clients with Pharmaron scientists as co-inventors) in 2022.

b. Enhancing the end-to-end, fully integrated services platform

In 2022, we further consolidated our small molecule R&D platform and strengthened our competitive advantage in Laboratory Services. As for the small molecule CDMO platform, our first commercial manufacturing facility in Shaoxing became operational. Meantime, through acquisitions, the international commercial production platform has been established across UK, US and China. We also put great efforts in establishing our biologics and CGT service platforms, having made significant progresses in building biologics discovery and CDMO service capabilities. Bioprocess R&D unit began to offer services to our clients, meanwhile the GMP manufacture facility is to be operational in Q3 2023. Cell and Gene therapy (CGT) laboratory services in the U.S. and gene therapy CDMO services in the U.K. complement each other that, in conjuncture with the other well established capabilities in bioscience area in Pharmaron, allows us to establish an integrated service system, which has begun to receive attention from the industry. Domestic and oversea clinical research service has been further integrated, and the brand of "Pharmaron Clinical" has been established in China. Our overseas clinical service for infectious drugs and vaccines has been recognized by the industry, and the overall competitiveness has been improved.

c. Strengthening further the competitive advantage of the integrated drug R&D service platform

Since its establishment, the Company has been committed to taking advantage of the integrated service platforms, improving the efficiency of new drug discovery and development, shortening the new drug discovery and development cycle, and creating value for our customers. Vertically, we have strengthened the synergistic effect of one discipline across different stages of the entire new drug discovery and development process to achieve seamless connection. Horizontally, we strengthened the synergy between multiple disciplines at the same stage of the process, thus having improved service quality by disciplines involved, enriched service content, and promoted mutual support between the disciplines. In addition, by creating an effective project management system, we built a cooperative network grid across teams, regions and disciplines, hoping that the three of which could upgrade the integrated platform that could generate synergies through the three-dimensional interactions. In 2022, on top of the existing foundation, we focused on strengthening cross-regional and cross-border management, hence creating synergies that provided more efficient and effective customized services to our clients.

II. CONTINUING TO INVEST IN OUR TALENT POOL AND TECHNOLOGIES TO SUPPORT OUR LONG-TERM AND SUSTAINABLE GROWTH

In 2022, we continued to strengthen our technical capability cultivation and talent pool building as part of our development strategy, to improve our core competitiveness and prepare for the long-term development of the company.

a. Talent Development

To meet the business development and the company's strategic needs, we have focused on the construction of the talent team. We attracted outstanding talents from China and abroad, established a "Pharmaron Learning" program as part of the on-job learning platform, and focused on cultivating young talents having the potential for further development. In addition, we actively strengthened the training of management personnel, through both internal and external channels, to enhance cohesion and working passion. Through proactive recruitment, training, development and promotion, we will be able to share the vision and mission with the talents, and retain and expand the talent pool to form a talent echelon of senior, middle and junior employees and get ready for the long-term development of the Company.

b. Investment in technology

In 2022, the Company continued to increase its investment in technology by identifying and implementing new science and technology while keeping pace with policies and regulations. In chemical technologies, the Company remained committed to improving the efficiency of synthesis and applying the latest and most practical technical means to promote the development of green chemistry, including High-throughput experimentation (HTE), flow chemistry, biocatalysis, and DNA-encoded library technology. The Company has made significant efforts in developing and applying new biotechnologies, including development of *in vitro* human-derived bioassay platforms, such as micro-organ models, 3D spheroids and organoids, and tissue chips. These technologies have the potential to reduce the use of animals and improve the success rate of translational medicine, contributing to the development of green biology.

The external environment in the year of 2023 may be more complex with more uncertainties. We will continue to embrace our dreams. Guided by our mission, we dive into our main business, and take the initiative to tackle the challenges with wisdom and courage. We must have self-confidence, self-reflection, self-discipline and self-improvement, and as always, respect safety, science and life. We remain committed to deeply understanding our customers' needs and responding quickly to help them succeed in new drug discovery and development and contribute to human health!

On behalf of the Board of Directors and our hard-working employees, once again I would like to express my sincere appreciation to our shareholders who have trusted and supported us!

Pharmaron Beijing Co., Ltd.

Dr. Lou Boliang

Chairman and Chief Executive Officer

March 30, 2023

▶▶▶ Financial Highlights

	Year ended December 31,		Change %
	2022 RMB'000	2021 RMB'000	
Revenue	10,266,288	7,443,770	37.9
Gross profit	3,749,276	2,672,044	40.3
Profit attributable to owners of the parent	1,374,604	1,661,029	(17.2)
Non-IFRSs adjusted net profit attributable to owners of the parent	1,834,271	1,461,985	25.5
Net cash flows generated from operating activities	2,142,816	2,058,044	4.1

- During the Reporting Period, the Group recorded aggregate revenue of approximately RMB10,266.3 million, representing an increase of approximately RMB2,822.5 million, or 37.9%, as compared to the year ended December 31, 2021.
- During the Reporting Period, the profit attributable to owners of the parent was approximately RMB1,374.6 million, representing a decrease of approximately 17.2% as compared to the year ended December 31, 2021.
- During the Reporting Period, the net cash flows generated from operating activities was approximately RMB2,142.8 million, representing an increase of approximately 4.1% as compared to the year ended December 31, 2021.
- The Board proposed to declare a final dividend as follows:
 - (i) a cash dividend of RMB3.0 (inclusive of tax) per 10 shares or an aggregate of approximately RMB357.4 million for the year ended December 31, 2022; and
 - (ii) 5 new Shares for every 10 existing Shares to be issued out of reserve to all Shareholders.

A. BUSINESS REVIEW

1. Principal Business

The Company is a leading fully-integrated pharmaceutical R&D services platform with global operations to accelerate drug innovation for our customers, providing fully-integrated drug research, development and manufacturing services throughout the research and development cycle. The Company keeps strengthening the integration of its service offerings both vertically and horizontally, continuously investing in building new service capabilities and improving management efficiency to meet the needs of the market and customers. Vertically, the Company is strengthening the seamless integration of the same discipline across different pharmaceutical R&D stages. Horizontally, the Company is strengthening the integration of different disciplines at the same pharmaceutical R&D stages, improving the science and technology of each discipline, expanding the service offerings, and promoting the interdisciplinary collaborations. In addition, the Company has made efforts to expand from the well-established small molecules drug R&D service platforms to the R&D service capabilities for Biologics and CGT services, and committed to becoming a global leader in pharmaceutical R&D services across multiple therapeutic modalities. Through continuous investment and optimization and integration in the past few years, the Company's two mature platforms, laboratory services and CMC (small molecule CDMO) services, saw continual improvement in service capabilities, capacity and operational efficiency; on the other hand, two new platforms, clinical development services and biologics and CGT services, have completed initial construction and integration of service capabilities, and the business scale and operational efficiency will be gradually optimized in the future. In addition, the Company will further develop the global footprints of its fully-integrated services platform to provide customers with interdisciplinary and global service solutions, making full use of the Company's global scientific research talent network and meet customers' regional strategic needs.

2. Operating Models

Our principal business is categorized into four business segments: laboratory services, CMC (small molecule CDMO) services, clinical development services, and Biologics and CGT services, mainly covering the following services:

(1) Laboratory services

Laboratory services of the Company include laboratory chemistry and bioscience services.

Laboratory chemistry is the root of our business, making it the core in the development of the Company. Laboratory chemistry services include medicinal chemistry, synthetic chemistry, analytical and purification chemistry, and computer-aided drug design (CADD). Laboratory chemistry provides customers with chemistry services such as design and synthesis of compound library, discovery of hit and lead compounds, design and/or synthesis and optimization of lead compounds, and chiral and non-chiral separation and purification.

Bioscience services include *in vitro* and *in vivo* DMPK/ADME, *in vitro* biology and *in vivo* pharmacology, safety assessment and U.S. laboratory services. Bioscience services provide customers with drug discovery services such as target validation, structure activity relationship studies, candidate compound identification, and drugability studies. The Company's U.S. laboratory services provide customers with DMPK/ADME and bioanalysis required in the discovery and development of small molecule pharmaceutical products and in the areas of ophthalmology and medical devices.

(2) CMC (small molecule CDMO) services

Our experienced CMC (small molecule CDMO) services team provides customers with small molecule APIs process development and manufacturing, material science/pre-formulation, formulation development and manufacturing, and analytical development services to

support pre-clinical and other stages of clinical development and commercial manufacturing needs. The process development and manufacturing team provides such services as discovery and development of efficient and green synthetic routes, optimization of existing synthetic routes, and process scale-up; the material science/preformulation team provides services for crystal screening, process development, and early formulation development; the formulation development team designs, modifies, and prepares oral formulations to satisfy preclinical, clinical, and commercial needs; and the analytical development team provides comprehensive analytical support for process development and manufacturing of APIs and pharmaceutical products.

The CMC (small molecule CDMO) services of the Company mainly provide pharmaceutical companies with chemical and formulation process development and manufacturing services with capabilities and capacities to cover the needs in all clinical and commercial stages. The cGMP API and drug product manufacturing facilities of the Company have had the qualification to manufacture products to support clinical trials in global markets, including U.S., China and EU. Our quality assurance system follows the guidelines of the International Conference on Harmonization of Technical Requirements for Registration of Pharmaceuticals for Human Use (ICH Guidelines) and supports the development and manufacture of APIs and pharmaceuticals meeting the regulatory requirements from FDA, NMPA and EMA, and can also support the preparation of complete regulatory data packages and documentation for regulatory filings and cGMP audits in U.S., EU, and Asia.

(3) Clinical development services

Our clinical development services include overseas and domestic clinical development services.

The overseas clinical development services include radiolabelled science services and early stage clinical trial services. The radiolabelled science services of the Company help customers synthesize ^{14}C and tritium ^3H radiolabelled compounds and use for DMPK/ADME studies of various compounds in human, so as to accelerate their clinical development process. Through the independent early clinical R&D center with 96 beds in Maryland, U.S., the Company provides customers with clinical research services including comprehensive FIH studies, vaccine development/infectious challenge studies, comprehensive ^{14}C drug absorption, distribution and excretion trial, TQT/cardiac safety, and cross-ethnic bridging studies.

Domestic clinical development services include clinical research services and site management services, covering different service needs of clinical research. Among which, clinical research services mainly include: regulatory affairs and product registration, medical affairs, medical monitoring, clinical operations, data management and biostatistics, bioanalysis, pharmacovigilance, quantitative pharmacology, etc.; site management services include CRC services, hospital research and selection, SSU (Study Start Up) rapid start-up, healthy and patient volunteer recruitment and management, quality assurance and its training, post-marketing studies, etc.

The Company's bioanalytical platforms in China and U.S. are able to support

the bioanalysis of clinical trials of small molecules and biologics around the world. In addition, with the collaboration among the domestic and overseas clinical development services and the pre-clinical service offerings, it allows the Company to simultaneously submit IND applications for customers' drug candidates to regulatory agencies in China, U.S. and EU.

(4) Biologics and CGT services

Biologics and CGT services include biologics discovery, development and manufacturing services (CDMO), CGT lab services and Gene Therapy CDMO services.

Biologics discovery services include biologics plasmid design, cell screening, target biologics expression and purification, analytical method development, and analysis of products, primarily serving various needs for cells and proteins, including mAbs, at the early stage of research and development.

For biologics development and manufacturing services (CDMO), the Company is accelerating the build-up of the biologics CDMO service platform. It is expected that the biologics drug development and manufacturing facility with a facility of nearly 70,000 m² will be put into operation in 2023. After the project is completed, it will be able to provide services including cell line supply and cell culture development, upstream and downstream process development, formulation development and fill-and-finish process development, supported by analytics with method development, as well as drug substance and product manufacturing services armed with 200L to 2,000L production capacity to support projects from pilot to commercial stage production.

Biologics and CGT lab services include analytical method development and validation for various proteins, cells, and DNA and RNA products. The analytical platform also provides services in evaluation of activity, toxicity, tissue distribution and viral shedding, as well as quantitative analysis of gene and cell products, in compliance with GLP/GCP/GMP regulations during the pre-clinical and clinical development and marketing stages.

Gene therapy CDMO services include plasmid synthesis containing therapeutic genes, cell line development, cell bank establishment, plasmid and cell production process development, formulation process development, manufacturing of products, analytical method development and validation, product-related impurities identification and analysis, stability evaluation, product analysis and GMP batch release, etc., covering the entire gene therapy CDMO process, to support the needs for pre-clinical safety evaluation, Phase I, II and III clinical trials, and post-marketing product life cycle management. The facility has been licensed by MHRA, the UK pharmaceutical administration authority, for the manufacture of biologics and CGT products.

B. FINANCIAL REVIEW

1. Overall Operation Results

In 2022, despite the international geopolitical tensions, and inflationary pressures in Europe and America, the Company maintained focus on executing the development plan made at the beginning of the year, and overcame

numerous difficulties with the joint efforts of all employees in this uncertain year. The Company was able to maintain the strong momentum of overall revenue growth, and elevate business and operational efficiency of mature segments continuously. Although the new business is still in the investment stage, capacity building and integration have been preliminary completed and is expected to gradually contributing to the Group's performance in the future. During the Reporting Period, the Company realized revenue of RMB10,266.3 million, with a year-on-year growth of 37.9%; with delay to a certain extent in profit growth during the investment stage of new business, the Company realized gross profit of RMB3,749.3 million; gross margin was 36.5%, with an increase of 0.6 percentage points over last year; the Company realized the Non-IFRSs adjusted net profit attributable to equity shareholders of the Company of RMB1,834.3 million, with a year-on-year growth of 25.5%. Mainly affected by the significant decrease in non-recurring gains or losses in 2022 compared with 2021, the Company realized the net profit attributable to owners of the parent of RMB1,374.6 million, with a decrease of RMB286.4 million over last year. During the same period, the Company maintained a good growth in the backlog, and as at December 31, 2022, the Company total backlog represents a 30% growth as compared to December 31, 2021. With the growth in business demand, the Company continuously expanded its talent pool. As of December 31, 2022, the total number of employees reached 19,481, including 17,406 R&D, production technology and clinical services staff, accounting for 89.3% of the total number of employees in the Company, with a year-on-year increase of 3,951 employees.

In 2022, the Company continued to adhere to the “Customer Centric” corporate philosophy, with approximately 90% of the revenue coming from a large, diverse, loyal and repeated customer base that includes the global top 20 pharmaceutical companies, among which the revenue of such customers from the global top 20 pharmaceutical companies accounted for 14.6% of the revenue of the Company, including 36.0% from listed biopharmaceutical companies and 49.4% from private biopharmaceutical companies and research institutes. In addition, the Company actively expanded its customer base, introducing about 800 new customers in 2022. In 2022, the revenue from customers in North America accounted for 64.7%, revenue from customers in EU (including U.K.) accounted for 14.5%, revenue from customers in China accounted for 18.3%, and revenue from customers in other regions accounted for 2.5%. With the increase in number of customers, the Company further optimized its revenue structure by reducing the revenue concentration of the top 20 customers from 33.8% in 2021 to 29.6% in 2022. While the revenue concentration decreased, the average revenue from the top 20 customers increased by 21.1% when compared with 2021. The advantages of the fully-integrated service strategy have been further validated, and customer loyalty was further improved.

Adhering to the strategy of building a fully-integrated service platform, the Company expanded its service capabilities to meet its business needs, further improved its international services platform and continuously strengthened new services expansion through both internal construction and external merger & acquisition, continually providing new impetus for the mid-and long-term growth of the Company. During the Reporting Period, the Company’s capital expenditure

for internal construction was RMB2,949.9 million. The external merger & acquisition mainly includes improving the laboratory animal supply system and expanding the geographic footprint of CMC (small molecule CDMO) late-stage manufacturing capacity, and the capital expenditure for the relevant merger & acquisition projects and other equity investments was RMB1,359.7 million. With the expansion of global footprint, the Company owns 11 operating facilities and has more than 1,500 employees in U.K. and U.S.. In 2022, the revenue of the overseas subsidiaries accounted for 12.1% of the revenue of the Company.

While business is developing rapidly, the Company continued to strengthen its ESG management system construction, establish ESG governance policies, clarify ESG governance responsibilities and integrated sustainable development goals into the Company’s strategy and governance. In addition to the disclosed five-year environmental goals, the Company further leveraged on the commitment to the scientific carbon target project, comprehensively reviewed the carbon footprint of the Company and its value chain, actively responded to international climate initiative, and publicly promised to mitigate the risk of climate change in the future. Following the latest development of climate science, the Company has set carbon reduction targets, formulated reasonable and feasible energy conservation and emission reduction measures, explored the best path for optimizing and upgrading the enterprise energy structure, and worked with value chain partners to promote environmental conservation from goals to practice. In the 12th China Securities Golden Bauhinia Awards, the Company won the award of “Best ESG Practice Listed Company”, which reflected the affirmation of the capital market for the Company’s ESG effort.

2. Operation results of each business segment

(1) Laboratory services

During the Reporting Period, the laboratory services segment realized revenue of RMB6,244.7 million, with a year-on-year growth of 36.8%; and gross margin of 44.9%, with an increase of 1.5 percentage points over last year. The customers in North America, Europe (including U.K.), China and other regions accounted for 73.5%, 12.7%, 11.4%, and 2.4%, respectively, of the laboratory service revenue.

To meet the business needs, the Company continued to expand and improve its R&D team. As of December 31, 2022, the Company employed 9,336 employees in its laboratory services business, with an increase of 2,200 employees compared with that of December 31, 2021. The Company has nearly 6,200 laboratory chemists and technicians in laboratory chemistry, being one of the world's leading laboratory chemistry groups in terms of size and expertise. During the Reporting Period, the Company further strengthened the global services network of laboratory services, and provided customers with more flexible and comprehensive laboratory services through the collaboration of laboratory service teams in China, U.K. and U.S..

Benefited from the improvement of technical capabilities and capacities of different biosciences service segment and the seamless integration with laboratory chemistry services, laboratory chemistry services grew rapidly in 2022 and bioscience services have also made significant progress. *In vivo* and *in vitro* drug metabolism and pharmacokinetic services encompass the whole process

of drug discovery, among which *in vivo* drug metabolism services fully cover pharmacokinetic screening tests from small animals to large animals, including rodents, dogs, monkeys and other experimental animals. *In vitro* drug metabolism services have improved the 3D cell model for *in vitro* drug screening platform and high-throughput automatic screening platform, and actively explored the physiology-based pharmacokinetic model (PBPK) technology platform. For *in vivo* and *in vitro* biology, the Company continues to strengthen the team and scientific research innovation, and maintains a rapid development trend. The *in vitro* biology department has built an internationally competitive *in vitro* efficacy and *in vitro* primary safety evaluation system. While consolidating and strengthening the established services offering, the *in vitro* biology team has made intensive efforts in new technical fields, such as gene editing, protein degradation and *in vitro* cardiac safety evaluation, and brought new technologies, such as RNA shearing regulation and NanoString digital gene detection, to the biology R&D platform. The *in vivo* pharmacology service platform closely follows the frontiers of science and establishes a new R&D platform to meet the needs of the scientific research market, continuously enriching the research and development capabilities, demonstrated by building a small animal living imaging platform, a radiotherapy platform, a drug-resistant tumor model screening and a central nervous system disease model. During the Reporting Period, the bioscience service team already has an experienced talented team, including nearly 3,200 scientists and technicians. The proportion of bioscience service revenue in laboratory service revenue further increased to 49.0% (the proportion of bioscience service revenue has exceeded 50% in the second half of 2022).

With a global R&D team and quality system in place, the Company helps customers rapidly advance their R&D projects from preclinical to clinical in many countries by providing comprehensive drug discovery and development services. During the Reporting Period, the Company participated in 652 drug discovery projects. Also, the Company contributed to the development of global innovative drug R&D by applying our long-accumulated expertise in pharmaceutical R&D and conducted studies for 87 investigational new drugs (IND) or new drug applications (NDA) filing for our Chinese customers, of which 79 projects applied simultaneously in multiple jurisdictions (including China, U.S. and EU), an integrated service package for IND enabling R&D services to gain greater customer recognition.

The Company continued expanding the laboratory facilities to meet the growing business demand. During the Reporting Period, the Company continued the second part of the 42,000 m² Phase II construction of Campus I in Ningbo. In addition, construction has also begun on the 105,000 m² laboratory at the Xi'an Campus, which is expected to be commissioned in 2024. In order to further expand the Company's capacities for safety assessment, DMPK and pharmacology, the Company commenced the construction of a 140,000 m² animal testing facility in Phase I of Campus III in Ningbo, which is expected to be operational gradually in the second half of 2023. In addition, more than 70,000 m² of laboratory space in Beijing and Qingdao has commenced operation gradually from 2022.

(2) CMC (small molecule CDMO) services

During the Reporting Period, the CMC (small molecule CDMO) services realized revenue of RMB2,406.7 million, with a year-on-year growth of 37.8%; and gross margin of 34.6%, with a decrease of 0.2 percentage points when compared with last year. The customers in North America, Europe (including U.K.), China and other regions accounted for 63.2%, 20.7%, 13.7%, and 2.4%, respectively, of the CMC (small molecule CDMO) service revenue. To meet the growing demand for CMC (small molecule CDMO) services, the Company is actively expanding its CMC (small molecule CDMO) service team. As of December 31, 2022, the Company had 3,978 employees engaged in CMC (small molecule CDMO) services, representing an increase of 1,357 employees as compared to December 31, 2021.

With the seamless integration of the Company's fully-integrated R&D service platform and the coordination of different service segments, over 80% of CMC (small molecule CDMO) revenue came from the existing customers of drug discovery services (laboratory chemistry and biological sciences). In addition, through international operation, we strengthened the capabilities of our fully integrated services platform and provided customized services and solutions with the cutting-edge technology to our customers by utilizing the R&D resources of our global service network. Our process development teams in China and U.K. cooperated closely to provide customized solutions in an innovative hybrid mode, gaining recognition from more and more customers and achieving growth in order quantity and

quality. The services covered 1,079 drug molecules or intermediates, including 809 projects in preclinical stage, 230 projects in Phase I-II clinical trials, 24 projects in Phase III clinical trial, and 16 projects in process validation and commercialization stage.

With our strategy to extend CMC (small molecule CDMO) services downstream to late-stage clinical and commercial manufacturing services, we have almost successfully completed the construction of the Shaoxing Phase I facility with an area of 81,000 m² and reactor volume of 600 m³ and have commenced operation gradually in 2022. In addition, the Company acquired Aesica Pharmaceuticals Limited (now “Pharmaron Manufacturing Services (UK) Ltd”) in Cramlington, U.K. and API manufacturing facility (“Pharmaron Manufacturing Services (US) LLC”) in Coventry, Rhode Island, U.S. in January and July of 2022 respectively. These two facilities can provide cGMP API manufacturing services from pilot to commercial scale and have been inspected and approved by MHRA, FDA and a number of regulatory agencies. Together with the recently launched commercial stage API manufacturing capacity in Shaoxing, the manufacturing facilities in Cramlington and Coventry will provide us with distinctive opportunities to rapidly expand our chemistry and manufacturing service capabilities in China, U.K., and U.S., which further strengthen our global end-to-end chemistry and manufacturing service offerings and diversify our global service networks. In 2022, approximately 80% of CMC (small molecule CDMO) revenue was generated from preclinical to Phase II clinical trial stages. With the advancement of related projects and the expansion of the Company’s CMC (small molecule CDMO) manufacturing capacity at the later stage, the revenue contribution from the later stage business is expected to gradually increase.

During the Reporting Period, the Company continued to strengthen its quality management by adhering to the highest international quality control standards to pave the way for further development of CMC (small molecule CDMO) services. The manufacturing facilities in Cramlington in U.K. successfully passed the GMP inspection of MHRA by 2022. In addition, our QA team continued to provide customers with a variety of flexible audit methods, including remote online audit and combination of online and offline audits. We completed 108 QA audits for customers including the global top 20 pharmaceutical enterprises, and all the audits were passed, among which, the Shaoxing plant received 5 QA audits for customers. In addition, the Company was committed to continuously improving the Environment Health and Safety (EHS) management by setting higher standard for employee’s health protection and safety operation.

(3) Clinical development services

During the Reporting Period, the clinical development services enjoyed rapid growth and realized revenue of RMB1,393.6 million, with a year-on-year growth of 45.7%; and gross margin of 11.5%, representing an increase of 1.2 percentage points as compared to the same period of last year. The customers in North America, Europe (including U.K.), China and other regions accounted for 25.7%, 12.3%, 58.7% and 3.3%, respectively, of the clinical development service revenue. The Company further increased the talent pool in clinical development service to support the growth strategy. As of December 31, 2022, the Company had 3,602 employees in clinical development services, including 3,186 employees in clinical research services in China and 416 employees in foreign clinical research services, representing an increase of 245 employees as compared to December 31, 2021.

The Company established Pharmaron Clinical, and began to further reorganize and strengthen the clinical development capabilities of its subsidiaries and departments into Pharmaron Clinical so as to optimize the organizational structure of the teams, greatly enhanced team cohesion and management of each clinical service segment from the Company, so as to provide customers with higher quality, more comprehensive and more efficient integrated clinical development services, helping the Company establish the brand of "Pharmaron Clinical". On December 30, 2022, Pharmaron Clinical was selected as the 2022 Best Clinical CRO Company (New and Sharp) by "The Second Session of the China Biopharmaceutical Industry Innovation Billboard".

During the Reporting Period, clinical services in China achieved rapid services growth through brand recognition from the integration, the team building and customer accumulation of the previous year, with a revenue growth of 65.5%. As of December 31, 2022, Pharmaron Clinical had more than 800 ongoing projects for clinical trial services in China. In addition, there were approximately 600 cooperation hospitals and clinical trial centers in more than 120 cities in China for clinical research site management service, and there were more than 1,100 ongoing projects. In August 2022, Pharmaron Clinical passed the physical inspection by the expert group from Center for Food and Drug Inspection of NMPA (CFDI) for the various clinical trial projects performed. Given that the competitiveness of China's clinical business has been strengthened in domestic clinical

trials of various service areas, the services of Pharmaron have been recognized by more and more customers. In addition, the overall competitiveness of overseas clinical services has been improved, and the clinical trial ability of infectious drugs has been recognized by the industry. The integrated platform of "radioisotope compound synthesis – clinical – analysis", established by effectively combining the advantages in radiolabel technology and clinical basis in U.K. and U.S., has been widely recognized by customers. Through close cooperation between domestic and overseas clinical teams, the Company has already begun to take orders for domestic clinical trial projects from overseas customers.

(4) *Biologics and CGT services*

During the Reporting Period, the Biologics and CGT services segment realized revenue of RMB195.1 million and gross margin of -27.7%. The customers in North America, Europe (including U.K.), China and other regions accounted for 86.5%, 11.9%, 1.5%, and 0.1%, respectively, of the biologics and CGT service revenue. The loss of Biologics and CGT services segment was mainly due to high operating cost because the biologics and gene therapy CDMO services were still in the investment stage and the overseas operators were affected by inflation in EU and U.S..

As of December 31, 2022, the Company had 490 employees engaged in Biologics and CGT services, representing an increase of 149 employees as compared to December 31, 2021.

During the Reporting Period, the Company continued to build the domestic biologics CDMO platform. As the Company's biologics development and production service center (covering nearly 70,000 m²), the Phase I of Campus II in Ningbo is expected to undertake large molecule GMP production service projects in the third quarter of 2023. After the completion of the project, the Company will be able to provide development services for cell line and cell culture process, upstream and downstream process development, formulation development and fill-and-

finish process development and analytics method development, as well as drug substances and product manufacturing services with 200L to 2,000L production capacity to support the project from pilot to commercial stage production.

In addition, the Company accelerated the establishment of CGT services capabilities. Through the integration of the CGT testing services in the U.S. and the gene therapy CDMO services in the U.K., the Company established an end-to-end CGT services platform as illustrated in the chart below:

End-to-End Cell & Gene Therapy Services Overview

Discovery (Candidate Screening)	Proof-of-Concept (Non-GLP)	Preclinical - IND Enabling (GLP/Non-GLP)	Clinical Development (IND – BLA/MAA)
<i>In Vivo</i> Screening (In life: rodents)	Efficacy, PK/PD Studies (In life: rodents)	IND Enabling GLP Toxicology (Rodents and larger species)	Process Compatibility and Stability for Clinical Trial
Discovery Bioanalysis (Expression/Activity)	Preclinical PK/PD Bioanalysis	GLP Bioanalysis (Biodistribution, Shedding)	Clinical PK Sample Bioanalysis Clinical Shedding
Immunogenicity Humoral (ADA)	Immunogenicity Humoral (ADA, NAb)	Immunogenicity Cellular (ELISpot)	Clinical Sample Bioanalysis Immunogenicity, Biomarkers
<i>In Vitro</i> Screening (Cell Lines)	R&D/Working Cell Bank	GMP Cell Bank Production	Process Characterization and Validation
Analytical R&D Testing	Potency Assay R&D Development	Potency Assay Development & Qualification/Other analytical	Potency Assay GMP Qualification
Candidate Cloning	R&D Manufacturing (Plasmid, DS)	DS & DP Process/ Formulation Development & Manufacturing	Clinical Batch Manufacturing

For Gene Therapy Products

Since 2020, the Company's CGT testing services have gained customer recognition with rapid increase in market share. Being the potency release testing service provider for the first approved gene therapy product on the U.S. market, the Company has built a team that has had extensive experience in developing and validating assays to support CGT preclinical discovery work, preclinical *in*

vitro and *in vivo* proof-of-concept studies (GLP and non-GLP), GLP toxicology studies and GMP CGT product lot release testing for clinical and commercial purposes. The Company has developed and validated various assays encompassing non-viral and viral vectors, including all AAV serotypes. Currently, the Company has more than 50 CGT programs at various stages

for analytical release testing, including 19 potency assays for clinical studies and 2 potency assays for commercial manufacture. In addition, our CGT testing services further expand to the *in vitro* and *in vivo* pharmacology and safety assessment for CGT products, including highly specialized ophthalmologic models for CGT products. For the safety assessment services, over 40 non-GLP and GLP toxicology studies for CGT products either have been completed or are in progress at the Company.

Since the acquisition of Pharmaron Biologics UK in 2021, the Company has continuously strengthened the construction of its gene therapy CDMO services capabilities and currently established an integrated gene therapy CDMO services platform, including plasmid development and manufacturing, development and manufacturing of viral vector with extensive purification toolbox and the completed analytical testing capabilities for QC/QA of gene therapy products. For the plasmid development and manufacturing, the Company has proprietary cell line and plasmid technology and optimized production processes for GMP plasmid manufacturing up to 500L scale. For the development and manufacturing of viral vector, the Company has suspension based upstream production platform with SUBs ranging from 50L to 500L and the downstream extensive purification toolbox which includes chromatography-based and ultracentrifugation-based purification technologies for maximum flexibility and ensures product quality. This scalable and approvable multiple AAV production platform had delivered over 100 runs including manufacturing of full scale GMP products. For the analytical and QC/QA capabilities, the Company's analytical and QC/QA platform, which is equipped with high throughput analytical technologies, covers all relevant critical quality attributes (CQA) of viral vector, which includes identity/purity, empty/full ratio, titre,

structure and potency, and has extensive experience in communicating with FDA, EMA, MHRA and other regulatory agencies. The Company's gene therapy CDMO service began to take third-party customer orders from 2021 and currently has around 29 gene therapy CDMO projects across different services offerings and R&D stages.

3. Profit for the Reporting Period

Mainly affected by the significant decrease in non-recurring gains or losses in 2022 compared with 2021, the Company realized the net profit attributable to owners of the parent of RMB1,374.6 million, with a decrease of RMB286.4 million over last year.

4. Basic and Diluted Earnings Per Share

The basic earnings per share for the Reporting Period was approximately RMB1.1625, decreased by 16.9% as compared to approximately RMB1.3988 for the year ended December 31, 2021. The diluted earnings per share for the Reporting Period was approximately RMB1.1608, decreased by 15.2% as compared to approximately RMB1.3691 for the year ended December 31, 2021.

5. Non-IFRSs Adjusted Net Profit for the Period Attributable to Owners of the Parent

To supplement the financial statements prepared by us, we use non-IFRSs adjusted net profit attributable to owners of the parent as an additional financial measure. We define non-IFRSs adjusted net profit attributable to owners of the parent as net profit before certain expenses/(gains) as set out in the table below.

The Company believes that the consideration of the non-IFRSs adjusted net profit attributable to owners of the parent by eliminating the impact of certain incidental, non-cash or non-operating items is useful for better understanding and assessing underlying business performance and operating trends for the Company's management, shareholders and potential investors.

The non-IFRSs adjusted net profit attributable to owners of the parent is not an alternative to (i) profit before tax or net profit (as determined in accordance with IFRSs) as a measure of our operating performance, (ii) cash flows from operating, investing and financing activities as a measure of our ability to satisfy our cash needs, or (iii) any other measures of performance or liquidity. In addition, the presentation of the non-IFRSs adjusted net profit attributable to owners of the parent is not intended to be considered in isolation or as a substitute for the financial information prepared and presented in accordance with the IFRSs. Shareholders and potential investors should not view the non-IFRSs adjusted net profit attributable to owners of the parent on a stand-alone basis or as a substitute for results under the IFRSs, or as being comparable to results reported or forecasted by other companies.

	Year ended December 31, 2022 RMB'000	Year ended December 31, 2021 RMB'000
Profit attributable to owners of the parent	1,374,604	1,661,029
Add:		
Share-based compensation expenses	157,145	56,769
Convertible Bonds related losses/(gains)	142,013	(12,852)
Foreign exchange related losses/(gains)	77,670	(23,415)
Realized and unrealized losses/(gains) from equity investments	82,839	(219,546)
Non-IFRS adjusted net profit attributable to owners of the parent	1,834,271	1,461,985

6. Cash Flows

During the Reporting Period, the net cash flows generated from operating activities was approximately RMB2,142.8 million, representing an increase of approximately 4.1% as compared to the year ended December 31, 2021.

During the Reporting Period, net cash flows used in investing activities of the Group amounted to approximately RMB2,208.5 million, representing a decrease of approximately RMB3,049.6 million or 58.0% as compared to the year ended December 31, 2021. The decrease was mainly due to the disposal of time deposits over three months and some medium-risk and low-risk wealth management products from a number of reputable international banks.

During the Reporting Period, net cash flows used in financing activities of the Group amounted to approximately RMB1,417.3 million, representing a decrease of approximately RMB5,078.7 million or 138.7% as compared to the year ended December 31, 2021. The decrease was mainly due to the amount of funds raised by convertible bonds received in the year ended December 31, 2021.

7. Liquidity and Financial Resources

The Group has maintained a sound financial position during the Reporting Period. As at December 31, 2022, the Group's cash and cash equivalents amounted to approximately RMB1,448.2 million. For the Reporting Period, net cash flows generated from operating activities of the Group amounted to approximately RMB2,142.8 million.

The Group recorded total current assets of approximately RMB6,536.0 million as at December 31, 2022 (December 31, 2021: approximately RMB8,643.5 million) and total current liabilities of approximately RMB3,912.4 million as at December 31, 2022 (December 31, 2021: approximately RMB2,982.0 million). The current ratio (calculated by dividing the current assets by the current liabilities) of the Group was approximately 1.7 as at December 31, 2022 (December 31, 2021: approximately 2.9).

8. Borrowings and Gearing Ratio

As at December 31, 2022, the Group aggregated interest-bearing bank borrowings of approximately RMB1,451.1 million. Among the total borrowings, approximately RMB737.7 million will be due within one year and approximately RMB713.3 million will be due after one year. The principal amount of floating interest rate borrowings was RMB1,135.5 million.

As at December 31, 2022, the gearing ratio, calculated as total liabilities over total assets, was 47.1%, as compared with 44.0% as at December 31, 2021.

9. Pledge of Assets

As at December 31, 2022, the Group mortgaged property, plant and equipment with a net carrying amount of approximately RMB408.1 million (December 31, 2021: approximately RMB422.5 million); and the mortgaged right-of-use assets had a net carrying amount of approximately RMB118.9 million (December 31, 2021: approximately RMB135.3 million).

Those pledged assets above have been used to secure the Group's interest-bearing bank borrowings.

Besides, as at December 31, 2022, the Group pledged deposits of approximately RMB49.3 million (December 31, 2021: approximately RMB17.2 million) to issue letters of credit and for environmental protection.

10. Final Dividend

The Board proposed to declare a final dividend as follows: (i) a cash dividend of RMB3.0 (inclusive of tax) per 10 shares or an aggregate of approximately RMB357.4 million for the year ended December 31, 2022; (ii) 5 new Shares for every 10 existing Shares to be issued out of reserve to all Shareholders.

The aforesaid proposal is subject to the consideration and approval at the AGM. If the distribution proposal is approved at the AGM, it is expected that the final dividend for the year ended December 31, 2022 will be paid in 60 days after AGM to the shareholders.

Details regarding the closure of the register of members of the Company and declaration and payment of dividends will be announced separately.

11. Contingent Liabilities

As at December 31, 2022, the Group did not have any material contingent liabilities.

12. Treasury Policies

Currently, the Group follows a set of funding and treasury policies to manage its capital resources, foreign currencies and cash flows and prevent related risks. The Group applied its cash flows generated from operating activities, bank loans and the proceeds of convertible bonds and new shares to satisfy its operational and investment needs.

The Group has transactional currency exposures. Such exposures arise from sales or purchases by operating units and financing activities in currencies other than the units' functional currencies. The Group is mainly exposed to the foreign currency of the US dollar. During the Reporting Period, the Group used forward currency contracts to hedge against part of our exposure to foreign currency risk.

13. Change of H Share registrar and transfer office

With effect from December 28, 2022, the Company's H Share registrar and transfer office in Hong Kong has been changed to Tricor Investor Services Limited. Please refer to the announcement of the Company dated November 25, 2022 for further details.

14. Miscellaneous

(1) Expand the capacity of CMC (small molecule CDMO)

a. Acquisition of 100% equity interests of Aesica Pharmaceuticals Limited

In January 2022, Pharmaron UK Limited completed an acquisition of 100% equity interests in Aesica Pharmaceuticals Limited (now "Pharmaron Manufacturing Services

(UK) Ltd”) in Cramlington, U.K., for approximately GBP57.8 million (approximately RMB498.2 million). The facility has a reactor volume of over 100 m³ and can provide cGMP API manufacturing services from pilot to commercial scale. The facility has been inspected and approved by a number of regulatory bodies including the FDA and MHRA. This acquisition further enhanced the overall capacity of the small molecule CDMO service platform of the Company.

b. Shaoxing plant officially put into operation

In 2022, the Shaoxing small-molecule API manufacturing facility of the Company was gradually put into operation. The Shaoxing manufacturing facility is committed to the development, optimization and commercial production application of innovative drug manufacturing processes, providing domestic and foreign customers with more flexible, larger scale and greener production services for API and high-end pharmaceutical intermediates, and facilitating the clinical development of new drugs and commercialization advancement of products for customers. The successful Shaoxing manufacturing facility, combined with the Company’s existing high-end intermediate and API manufacturing facility located in Tianjin and U.K., respectively, further strengthens the Company’s global production network layout for small-molecule drug process development and production, and further consolidates the one-stop service of chemistry and production, to meet the needs of domestic and foreign customers for different production scale and different product process development and production.

c. Acquisition of Coventry API manufacturing facility in Rhode Island, the United States

In July 2022, Pharmaron Manufacturing Services (US) LLC completed an acquisition of a Coventry API manufacturing facility located in Rhode Island, the United States, for approximately USD31.5 million (approximately RMB210.6 million). The manufacturing facility is equipped with advanced manufacturing facilities and can provide cGMP API manufacturing services from pilot to commercial scale. The facility has been inspected by a number of regulatory agencies including the FDA and EMA and has rich industry experience. The manufacturing facility in Coventry enriches our global service network.

(2) Restructuring of Pharmaron Clinical

In 2022, the Company further integrated the clinical development capabilities of its subsidiaries and departments through Pharmaron Clinical to optimize the organizational structure of the experts and management teams. During the Reporting Period, Pharmaron Clinical completed the restructuring of Enyuan Pharmaceutical Technology (Beijing) Co., Ltd. (恩遠醫藥科技(北京)有限公司) and Pharmaron CPC, Inc. (an early-stage clinical trial center in Baltimore, U.S.), which strengthened the capabilities of Pharmaron Clinical in quantitative pharmacology, registration affairs, medical affairs, clinical operations, etc, and further enhanced the close cooperation between the PRC and the U.S. so as to provide one-stop solutions for customers for the purpose of carrying out clinical research and complementary trials within the PRC and the U.S..

During the Reporting Period, as part of the restructuring of Pharmaron Clinical, the Company exercised pre-emptive rights to acquire aggregate 23.2280% of equity interest in Pharmaron Clinical held by WU Yu, LI Xianghao and LIU Yang. Meanwhile, the Company increased the capital of Pharmaron Clinical by RMB700 million. The ratio of shareholding in Pharmaron Clinical increased from 55.8856% to 81.5759% held by the Company, which enhanced our control in Pharmaron Clinical and assisted Pharmaron Clinical to build a fully-integrated clinical development service platform. In addition, Pharmaron Clinical increased the capital by RMB230 million to Beijing LinkStart Biotechnology Co., Ltd. (北京聯斯達醫藥科技發展有限公司), a wholly-owned subsidiary of Pharmaron Clinical, in order to assist Beijing LinkStart Biotechnology Co., Ltd. in providing customers with higher quality clinical R&D services.

(3) Restructuring of biologics platform

As part of the Company's medium to long-term development strategies, the Company continued to strengthen the construction of its R&D service capabilities of biologics and CGT services. In order to build a fully integrated biologics and CGT service platform, the Company increased the capital of Pharmaron (Ningbo) Biologics Co., Ltd. by RMB2.4 billion, and began to integrate the biologics and CGT R&D service capabilities of its various subsidiaries and departments through Pharmaron (Ningbo) Biologics Co., Ltd.. In addition, Pharmaron (Ningbo) Biologics Co., Ltd. is also planning to undertake equity financing, in order to further the establishment of R&D service capabilities and improve the operational capabilities for biologics and CGT segment. For details, please refer to the Company's announcement dated November 30, 2022.

(4) Acquisition of 100% Equity Interest in Anikeeper

On March 28, 2022, the Company entered into an agreement with Ms. Chen Jing (陳靜), Mr. Chen Xuejun (陳學軍) and Anikeeper, in relation to the sale and purchase of 100% equity interest in Anikeeper. The acquisition of Anikeeper was completed in April 2022 at the consideration of RMB85.2 million. Upon completion of the acquisition, Anikeeper has become a wholly-owned subsidiary of the Company and the financial results of Anikeeper will be consolidated into the Company's financial results. Please refer to the relevant announcements dated March 27, 2022, April 19, 2022 and May 6, 2022 for further details.

(5) 2021 Profit Distribution Plan

On May 31, 2022, the 2021 Profit Distribution Plan of the Company was approved at the annual general meeting of the Company. Pursuant to the 2021 Profit Distribution Plan, the Company would (i) pay a cash dividend of RMB0.45 (inclusive of tax) per Share; and (ii) issue five Capitalization Shares for every ten existing Shares out of reserve to the Shareholders whose names appear on the register of members of the Company on June 13, 2022 (the "Record Date"), which represented a total increase of 397,022,543 Shares comprising 330,014,293 A Shares and 67,008,250 H Shares, based on the Company's total share capital of 794,045,086 Shares comprising 660,028,586 A Shares and 134,016,500 H Shares as at the Record Date. The implementation of the 2021 Profit Distribution Plan was completed on July 5, 2022 and as a result, a total of 330,014,293 A Shares and 67,008,250 H Shares were issued on June 14, 2022 and July 5, 2022, respectively. Please refer to the circular of the Company dated May 6, 2022 and the relevant announcement of the Company dated May 31, 2022 for further details.

(6) Cessation of office and appointments of independent non-executive directors of the Company

With effect from the conclusion of the extraordinary general meeting of the Company held on September 23, 2022, Mr. Dai Lixin (“Mr. Dai”) and Ms. Chen Guoqin (“Ms. Chen”) ceased to be independent non-executive Directors of the Company in light of the expirations of their respective six-year consecutive terms of offices, as required according to the Rules for Independent Directors of Listed Companies of the China Securities Regulatory Commission.

Immediately following Mr. Dai’s and Ms. Chen’s respective cessations of office, Mr. Dai ceased to be a member of the strategy committee of the Company, and Ms. Chen also ceased to be the chairwoman of the nomination committee and the remuneration and appraisal committee of the Company, and a member of the audit committee of the Company.

Ms. Li Lihua (“Ms. Li”) and Mr. Zhou Qilin (“Mr. Zhou”) had been appointed as independent non-executive directors of the Company at the EGM to fill in the vacancies to be left open by the planned cessations of office of Mr. Dai and Ms. Chen. Ms. Li is the chairwoman of the nomination committee and the remuneration and appraisal committee of the Company, and a member of the audit committee of the Company, and Mr. Zhou is a member of the strategy committee of the company. Please refer to the announcements of the Company dated August 29, 2022 and September 23, 2022 and the circular of the Company dated September 7, 2022 for further details.

C. TECHNICAL INVESTMENT RESULTS

In 2022, the Company continued to increase its investment in technology by identifying and implementing new science and technology and keeping pace with policies and regulations. The Company made great efforts to build technology platforms for sustainable development, especially in upgrading technology and promoting innovation in “green chemistry” and “green biology”.

In chemical technologies, the Company has been committed to improving the efficiency of synthesis and applying the latest and most practical technical means to promote the development of green chemistry. The technology platforms described below illustrate such commitment from us:

- 1. High-throughput experimentation (HTE) platform for reaction condition screening:** With the state-of-the-art automated HTE equipment and analytical instrumentation, the HTE platform rapidly identifies the best possible reaction condition by using 24/48/96-well parallel reactors to screen hundreds of conditions in 24 hours, providing solutions to critical steps in target synthesis. By further reducing individual reaction quantity and increasing the number of parallel conditions for single reaction, this platform screened more than 350,000 conditions for over 6,400 reactions in 2022. Through analysis of experimental results, the screening conditions were further customized, which led to significant increase in screening success rate.

2. Flow chemistry (also known as continuous production technology):

In 2022, the Company introduced continuous photochemistry, Online-Mass for online monitoring, and other new technologies, further improving its technical capability. In 2022, the continuous technology was applied to more than 100 PDM scaling up and production projects, effectively solving issues related to safety, high temperature and high pressure, stability, selectivity, and other chemical problems that were not straightforward, giving remarkable results. In terms of capacity building, in 2022 at Tianjin Plant, the Company built the whole process continuous process technology platform of non-GMP production from reaction to workup with online monitoring of PAT, realizing projects of ton-scale production. Meanwhile, the continuous production for GMP manufacture is also being constructed rapidly, where the kilogram-scale production lab is expected to be ready for operation in mid-2023 and the fully continuous large-scale production plant (including continuous hydrogenation) is expected to be opened in the second half of 2023.

3. Biocatalysis: Biocatalysis refers to the application of biological enzymes to catalyze chemical reactions. Enzymes are nature occurring catalysts that have higher catalytic efficiency, about 107-1,012 times higher than the general chemical catalysts. Biocatalysts are non-toxic, low energy consumption, high stereoselectivity, and environment friendly. It is an essential technology for "green chemistry" and "green manufacture". Since the establishment of the biocatalysis department in 2020, we have produced about 3,000 catalytic enzymes, including over 600 genetically modified mutant enzymes. As we are more experienced and mature, we worked more efficiently in 2022 with over 700 new enzymes developed. Based on our enzyme screening and

directed-evolution platforms, we also provided services for our clients to identify high selective enzymes for chiral compound synthesis and production. We are going to clone and produce more biocatalytic enzymes, to optimize the enzyme screening and evolution platforms, to build the larger scale enzyme production plant. We expect the production plant will be in operation in the second half of 2023.

4. DNA-encoded chemical library technology platform:

In 2022, the platform had been fully upgraded. Currently, we have hundreds of libraries of over 15 billion new small molecule drug-like compounds with novel and unique chemical structures in our collections. Many DNA-encoded chemical probes and DNA-encoded compound libraries were effectively synthesized for diverse clients' projects. Many series of biologically active compounds were successfully discovered using the Pharmaron's DEL libraries selected for screening against many customers' protein targets of interest. We have continuously expanded and optimized the technological capabilities of Pharmaron's DNA-encoded compound library platform by closely tracking the cutting-edge DEL technologies and developing original technical methodologies. Through our innovative research and development, we have submitted 19 patent applications to the Chinese Patent Office, and six research articles have also been published by peer reviewed journals.

In biotechnology, the Company has made significant efforts in developing and applying new technologies. These efforts include exploring new fields to enrich or consolidate service offerings, such as developing *in vitro* human-derived bioassay platforms, like micro-organ models, 3D spheroids and organoids, and tissue chips. This reduces the use of animals and improves translational medicine, contributing to the development of green biology.

- 1. Chemical proteomics platform:** The chemical proteomics use small molecule-based chemical probes to interact with proteomes to reveal the identities of target proteins and the small molecules interacting with the proteins within cells or tissues. It involves multiple disciplines including medicinal chemistry, biology, bioinformatics, pharmacology, and mass spectrometry. Chemical proteomics platform can not only discover potential novel targets of drug action and reveal possible off-targets, also identify novel hits, which provides a new and highly efficient approach to drug discovery. In 2022, the Company further optimized the platform, especially for different types of sample preparation, improving the sensitivity of the experiment and reducing the amount of samples required.
- 2. 3D spheroid and organoid models:** Using human-derived 3D spheroid and organoid as *in vitro* models to evaluate drug efficacy and safety in preclinical studies is more clinically meaningful. The Company has successfully established nearly 200 cases of human-derived 3D-spheroid models for drug screening. For tumor organoids, the Company has successfully developed robust methodologies for the construction of various tumor organoids including colon cancer, gastric cancer, lung cancer, esophageal cancer, etc., while a strict quality control process has been developed and implemented to ensure the quality of the organoids. The Company will continue the construction of the corporate biobank including tumor organoids and other organoids of human-nature in 2023, while developing a testing platform for high-throughput drug screening to support the services of preclinical drug efficacy and safety liability detection.
- 3. Gene editing technologies:** in 2022, we introduced a number of advanced gene editing technologies, which significantly improved the experimental success rate and shortened the turnaround time, covering expression regulation of targeted proteins, protein overexpression and suppression with or without inducers. We provided services in gene knockout, gene knock-in and targeted mutation to our clients and helped complete early target validation and compound efficacy screening. In 2023, the Company will continue to optimize delivery methods and editing means, and apply gene editing technology to human primary culture cells, thus providing data with more clinically relevant information for functional validation of biological targets and safety assessment. In addition, we will establish a range of Crispr-sgRNA library screening systems, and apply them to cell lines, primary cells and organoids.
- 4. Imaging technologies:** We have established *in-vitro* cell based imaging and *in-vivo* animal-based imaging. 1) Cellular imaging-based high-content technologies enable multiparametric and multifaceted assessment of drug efficacy and safety, and have been favored by the industry in recent years. In 2022, we completed the first run of high-throughput campaign of compound library screening project aimed to evaluate the protein translocation driven by treatment of test articles in engineered cell lines genetically expressing fluorescently tagged proteins. 2) The *in vivo* imaging system (IVIS) can help monitor the tumor growth in the orthotopic and metastatic models in-life. Currently, we have established 270 luciferase-expressed tumor cell lines and 112 orthotopic or metastatic tumor models, which cover 30 different cancer types and have been widely utilized in tumor pharmacodynamic studies and related fields. Meanwhile, we have provided service for dozens of clients to evaluate the blood-brain-barrier permeability and antitumor effect of test articles by utilizing 31 orthotopic and metastatic brain tumor models, providing valuable data and imaging information to dozens of clients.

D. CORE COMPETITIVENESS ANALYSIS

The Company provides customers with fully-integrated services covering drug research, development and manufacturing services for innovative pharmaceutical products throughout the research and development cycle. With this end-to-end and fully-integrated business model, we gain significant competitive advantages in deepening customer collaboration, establishing core technical expertise and professional team building which enable us to better support our customers' innovative R&D programs.

1. Leading fully-integrated pharmaceutical R&D services platform with strong capabilities and comprehensive service offerings across the globe.

The Company is committed to building a R&D and manufacturing service platform across multiple therapeutic modalities (including small molecule, Biologics and CGT products) throughout drug discovery, pre-clinical and clinical development process. The Company has a well-established and fully integrated R&D and manufacturing service platform for small molecule drugs, and has initially completed the construction and integration of our Biologics and CGT service platform. In addition, the Company is in a leading position in drug discovery, pre-clinical and early clinical-stage research, and has expanded its capabilities downstream to late clinical-stage development and commercial manufacturing. In the process of expanding its R&D services, the Company has successfully evolved from a pure laboratory chemistry service provider to an end-to-end pharmaceutical R&D services platform with operations in China, U.S. and U.K..

The Company has established comprehensive expertise in different R&D stages, so as to assist customers in accelerating their R&D programs and cater to a full spectrum of customers'

needs. With our professional project management capabilities, we are able to utilize our full integrated services platform to cater for the customers' needs. Vertically, the Company is strengthening the seamless integration of the same discipline across different pharmaceutical R&D stages. Horizontally, the Company is strengthening the integration of different disciplines at the same pharmaceutical R&D stages, improving the science and technology of each discipline, expanding the services offering, and promoting the interdisciplinary collaborations. With the integration and collaboration between our discovery and development service platforms, we have accumulated a profound understanding of the unique scientific challenges involved in our customers' new pharmaceutical R&D projects, which will facilitate us to move projects forward more efficiently and in turn maximize the benefits of our customers. The Company's profound industry knowledge, strong execution capability and end-to-end solutions will shorten the drug discovery and development cycle and reduce the associated risks for our customers.

As a fully-integrated pharmaceutical R&D service provider, the Company's comprehensive pharmaceutical R&D services platform has the following five core competences:

(1) Comprehensive chemistry platform throughout the entire drug R&D and commercial stages

As a fully-integrated service provider for the research, development and manufacturing of small molecule pharmaceutical products, the Company's expertise and advantage in chemistry technology is crucial throughout the whole drug R&D process.

With the comprehensive chemical technology platform covering compound design (including CADD), design and synthesis of a compound library, medicinal chemistry, synthetic chemistry, analytical chemistry, early process chemistry, and process chemistry and GMP API manufacturing, the Company can satisfy customers' demand for pharmaceutical R&D and manufacturing in each stage of the pharmaceutical R&D process, including laboratory synthesis process at the drug discovery stage, scale up process development from pre-clinical to clinical stage as well as GMP manufacturing up to commercial stage, which fully cater to the diversified needs of different types of customers. In addition to providing R&D services for the compound synthesis process, combined with its formulation development services, the Company is able to provide customers with fully-integrated pharmaceutical R&D and manufacturing solutions from initial compounds to finished dosages.

(2) *DMPK/ADME service platform throughout the entire drug R&D process*

The Company provides DMPK/ADME services covering the whole R&D process from drug discovery to development. The early DMPK/ADME studies are of great importance as they can provide a key basis for our customers to determine their late-stage drug development strategy. Radioisotopic analysis technology is critical as an important drug metabolism analysis technology during the clinical stage. Following the approval of the radioisotopic use license at the Company's clinical center in U.S. in early 2018, the Company is the only pharmaceutical R&D service provider that offers integrated pharmaceutical R&D

solutions, which cover radioisotope compound synthesis and human ADME studies using regular isotope analysis technology or high-sensitivity AMS technology. In addition, with acquisition of Absorption Systems, the Company broadened its global service network and further strengthen its leading position in discovery and development DMPK platform.

(3) *Comprehensive integrated platform from drug discovery to POC ("proof of concept")*

From inception, the Company has committed to the establishment of integrated services platform from drug discovery to proof of concept stage, which covers compound design, compound library synthesis, synthetic and medicinal chemistry, biology, DMPK, pharmacology, toxicology, drug safety assessment, radiolabelled chemistry and DMPK, clinical pharmacology, clinical bioanalysis, clinical data statistics, chemical process development and API manufacturing and formulation and drug product manufacturing.

With this comprehensive integrated services platform, the Company has undertaken many integrated research projects, and achieved a considerable number of milestones. In addition, the Company can also provide a customized service package at a particular stage of drug R&D process, such as an integrated service package for IND enabling which includes preclinical safety assessment, early process development and manufacturing, pharmacology, DMPK and clinical proposal. With this comprehensive IND enabling solutions and the ability to support IND filing for different jurisdictions, it provides flexibility to the customers, accelerates their drug development process and reduces their overall R&D costs.

(4) Fully-integrated clinical development services in China

As a significant component of our Company's fully integrated service platform, domestic clinical development platform covers various functions, including regulatory and registration services, medical affairs, medical monitoring, clinical operations, data management and biostatistics, bioanalysis, pharmacovigilance, quantitative pharmacology, site management services, healthy and patient volunteer recruitment and management, and quality assurance, which provides customers with complete, efficient, end-to-end Phase I, II, III and IV clinical development services. Through internal capability building, organic growth and external acquisitions over the years and our effort in integrating different functions and processes and optimizing the team and organization structure, we have built a sizeable and highly competitive clinical development services platform in China, offering high-quality clinical development services of new small molecule drugs, biologics and medical devices for domestic and oversea customers.

Leveraging on the technical capabilities and established reputation of our preclinical R&D platform, the clinical R&D services platform collaborates with the pre-clinical and business development teams to get involved in clinical study planning discussion with customers as early as possible, so as to provide more comprehensive customer services and at the same time, and generate business opportunity for the clinical development services. Also, the medical affair, regulatory affairs, bioanalytical, quantitative pharmacology and biostatistics departments of the clinical

development services work closely with the pre-clinical R&D team for planning of IND-enabling. These high quality interactions between pre-clinical and clinical teams accelerate projects progressing in high quality from pre-clinical to clinical stage, allowing our customers to fully enjoy the benefits of the Company's fully integrated service platform.

Together with the Company's U.S. clinical pharmacology center, data management and biostatistical, bioanalytical and clinical CRO operation and project management teams who are well versed with clinical development process and culture in both China and U.S., we are able to provide a faster and convenient gateway for domestic customers to present their R&D program globally.

(5) An integrated platform for "laboratory testing-IND enabling-process development and manufacturing" of gene therapy products

In recent years, with the rapid advancement of gene and cell therapy technologies and their application for rare and incurable diseases as well as vaccines that have had significant impact on public health systems, the R&D of cell and gene therapies and disease prevention methods are flourishing. These gene and cell products play an irreplaceable role in the global medical and public health systems. Through acquisition and integration of related resources and platforms, the Company has completed the establishment of an integrated services platform of "laboratory testing – IND enabling – process development and manufacturing" for gene therapy products. With the acquisition in 2020, the Company established a complete and industry leading analytics platform

for biologics and CGT products that are in compliance with ICH guidelines of biologics and CGT products of GLP/GCP/GMP. In 2021, the Company acquired capabilities in Pharmaron Biologics UK, which increases the gene therapy product development and GMP manufacturing in U.K.. By combining both the analytics and CMC platforms in gene therapy products with our safety assessment center which has been inspected and/or certified for GLP compliance by NMPA, FDA and OECD regulatory authorities, the Company offers customers a complete pre-clinical IND enabling solution for CGT products, as well as clinical testing material manufacturing and clinical sample analysis services for CGT products.

2. Global operations, profound experience in pharmaceutical R&D and state-of-the art technologies to provide customized solutions

The Company operates globally through our 20 operating facilities, clinical and manufacturing facilities in China, U.K. and U.S., of which 11 operating facilities are from overseas. The Company's profound experience in global pharmaceutical R&D, together with its global operations and world-class technical capabilities offers our customers a unique value proposition and customized solutions that combines our technical expertise in different geographic locations and efficient services with seamless integration.

Through our global operation, the Company has established a services network and strategic presence in global life science hubs which enhances the customer communication and our understanding of customer needs. Further, by carrying out our R&D services under different jurisdictions, it provides flexibility to customize our services solutions that best suit our customers' geographic and

strategic needs. For example, the clinical pharmacology team in U.S. has worked seamlessly with our Chinese team to help customers in China for the preparation and filing of IND application and conducted the first-in-human (FIH) studies in U.S.. In addition, the Company's experience in regulatory filings in various jurisdictions and its service model of providing customers with total solution enable our customers to file IND applications for their drug candidates in China, U.S., or EU in parallel, which makes the IND applications of our customers more flexible and efficient.

On the other hand, it is the Company's core strategy for each international acquisition to effectively integrate with our global services platform and brought in the world class talent and facilities into our integrated services platform to further strengthen our overall services capabilities and increase the efficiency of our services. These strategies complement each other to effectively improve the Company's international operation capability and bring high value-added services to customers.

While the chemical reactors with a total volume of 600 m³ in the Shaoxing plant have been put into operation, the facility in Cramlington, U.K. and the API facility in Coventry, Rhode Island, U.S., which were acquired by the company, have also been integrated and put into operation, realizing the international capacity service of our CMC (small molecule CDMO) platform from early clinical stage to late commercialization of the whole portfolio of solutions. By combining the process chemistry team in Hoddesdon, U.K., we are able to provide end-to-end API production services to our customers in China, U.S. and U.K. in a more flexible, larger scale and greener manner at the same time, bringing our international API production service capabilities to the next level and further enriching our global service network.

By adhering to the long-standing growth strategy of building “end-to-end, fully integrated and global” services platform, it facilitates cross-regional and multiple regulatory jurisdictional collaboration for cross-disciplinary and cross-R&D stages projects. Meanwhile, with efficient project management and cross-cultural communication, it facilitates the collaborations among teams, regions and disciplines to maximize the interests of our customers.

3. Committed to utilizing innovative technologies to meet evolving R&D needs and increase efficiency

Since inception, the Company has put great emphasis on technology and innovation to fuel the constant grow of the business and satisfy the evolving R&D needs. It develops new technologies through multiple measures such as internal research and development, collaboration with academic and professional institutions, customer collaboration and acquisitions. In recent years, the Company has been strategically developing new technologies and capabilities in chemistry and bioscience areas, and committed to further strengthening of the integrated services platform. In the chemical technology area, the Company focuses on the application of the chemical reaction screening platform, flow chemical technology, biocatalysis technology and DNA-encoded chemical library technology platform; in the biotechnology area, the Company had established chemoproteomics platform, 3D spheroid and organoid model, gene editing technologies and imaging technologies.

4. Dedicated, stable and visionary management teams, experienced talent pools with progressive corporate culture

The Company’s management team is led by Dr. LOU Boliang, our chairman and chief executive officer. With over 30 years of experience in the pharmaceutical industry,

he is highly respected in the industry for his excellent leadership that contributes to the Company’s rapid development. The Company’s senior management team has been with us for more than 10 years. The Company has nearly 100 senior scientific and technical leaders, 2 of whom were named as National Talents and 15 named as Beijing Talents. Members of our highly skilled, experienced and international management team possess diverse expertise and extensive knowledge, and have significantly contributed to the growth of the Company’s institutional knowledge base. The Company focuses on its home-grown scientific team consisting of selected, young and promising scientists, which enables us to form a cohesive and vibrant mid-level management team composed of over 3,300 technical managers and high-caliber scientific research talents across all scientific disciplines of the Company. In addition, the Company’s visionary management team has established a highly experienced and skilled talent pool with strong execution efficiency. As of December 31, 2022, the Company had over 17,406 R&D, production technology and clinical services staff in China, U.K. and U.S.. The highly professional technical team ensures the Company’s continuous provision of high-quality R&D services for customers. The open platform for talent development ensures that the Company will continuously attract talents from around the globe.

The Company is committed to its corporate philosophy of “Employee First and Customer Centric” which put strong emphasis on employee training and improves all mechanisms so as to integrate their career development into the Company’s overall development strategy. In order to develop and train our talents, the Company provides training to our employees through our in-house training system including the “Pharmaron College”, visiting scholar programs at renowned laboratories and institutions and holds various seminars, forums and

academic symposiums regularly, through which our team members acquire updates on the most advanced technology and techniques of the industry. In addition, the Company has developed training programs with the world renowned universities and research institutes for high-caliber scientific research talent. The above measures have greatly improved the scientific research capabilities and cohesion of the Company and its employees. Furthermore, we respect and value every single customer so as to ensure R&D quality by tackling each technical challenges and complete every single task with integrity and scientific rigor.

Our dedicated, stable and visionary management team, experienced talent pool and outstanding corporate culture lay a solid foundation for the Company's long-term success.

5. Reputable, loyal and expanding customer base that contributes to our sustainable growth and business collaboration

The Company has a large, diverse and loyal customer base including the global top 20 pharmaceutical companies and numerous reputable biotech companies. In 2022, the Company introduced approximately 800 new customers, with approximately 90% of revenue contributed by the Company's large, diverse and loyal repeat customers. The Company's fully-integrated solution and deep understanding of customers' needs allow it to provide customized pharmaceutical R&D services for customers according to their needs. With further progress made in the existing customers' projects, the loyal and growing customer base will enable us to develop new services in drug development and at the early clinical stage.

The Company benefits from its strategic partnership with specific customers. Through know how sharing and training provided during our deep collaboration with these customers, the Company is able to further improve technical capabilities and enhance service excellence, thereby creating a virtuous cycle. With our strong technical expertise, advanced technological infrastructure, profound industry knowledge, strong execution capability and quality customer services, the Company is able to become our customers' strategic partner and help them form their drug development or R&D outsourcing strategies, which in turn reinforces our close relationships with such customers. In addition to our strong scientific capabilities, the Company puts emphasis on areas like environmental protection, health, safety and intellectual property protection. The Company takes such measures as establishing the intellectual property protection system and building the information system to ensure that our customers' intellectual properties are well protected, and is widely recognized and trusted by customers in this respect. The Company's high-quality services enable us to accumulate a good reputation among our existing customers, and to further expand our customer base by acquiring new customers through word-of-mouth referrals.

E. OUTLOOK FOR 2023

1. Industry competition and development

The Company is engaged in pharmaceutical research, development and manufacturing services which provides fully integrated services to support customers' R&D for innovative pharmaceutical products throughout the research and development cycle. Its business is closely related to the development of the pharmaceutical industry and pharmaceutical R&D outsourcing market.

(1) Trend on the global and Chinese drug R&D and manufacturing spending

With the accelerated growth of aging population globally, the expansion of the chronic disease patients population and the increase in the total investment in medical and healthcare industry in various countries, the global and Chinese pharmaceutical markets continue to develop, which in turn drives the continuous increase of the pharmaceutical R&D and manufacturing spending. In the future, the spending on research, development and manufacturing are expected to maintain solid growth both globally and in China. According to Sullivan's forecast, the size of the global pharmaceutical R&D and manufacturing spending was approximately US\$599.9 billion in 2022, and it is estimated that the global pharmaceutical R&D and manufacturing spending will increase to US\$813.4 billion by 2027, representing an expected CAGR of 6.3% from 2022 to 2027; of which, the pharmaceutical R&D and manufacturing spending in China was approximately RMB617.2 billion in 2022, and it is estimated that pharmaceutical R&D and manufacturing spending in China will increase to RMB1,027.8 billion by 2027, representing an expected CAGR of 10.7% from 2022 to 2027.

(2) Trend on the global and Chinese drug R&D and manufacturing outsourcing services market

Under the pressure of increasing R&D costs and patent cliff, as well as the internal R&D capacity limitation, pharmaceutical companies gradually turn to pharmaceutical R&D and manufacturing outsourcing services with an aim to reduce their overall R&D costs and improve their R&D efficiency. The increasing trend of pharmaceutical R&D and manufacturing spending also provides a solid foundation for the growth of outsourcing services for R&D and manufacturing. According to Sullivan's forecast, the total size of global pharmaceutical R&D and manufacturing outsourcing services was approximately US\$157.2 billion in 2022, and it is estimated that such size will increase to US\$267.5 billion by 2027, representing an expected CAGR of 11.2% from 2022 to 2027. In addition, with the continuous improvement of the capabilities and capacities of Chinese drug R&D and manufacturing outsourcing service providers and the continuous increase in drug R&D and manufacturing spending in China, the market share of Chinese services providers in the global drug R&D and manufacturing outsourcing service market is also increasing. According to Sullivan's forecast, the size of Chinese drug R&D and manufacturing outsourcing services accounted for approximately 13.0% of the global market in 2022, and it is estimated that such size will increase to RMB408.7 billion by 2027, which represent 22.7% of the global market.

a. Trend on the drug discovery R&D services

Drug discovery is a multidisciplinary and systematic work and process. According to Sullivan's forecast, the size of global drug discovery CRO service market was estimated to be US\$18.0 billion in 2022, representing

a outsourcing penetration rate of 46.7% (market size of drug discovery CRO service over the addressable market of drug discovery spending). It is estimated that the size of global drug discovery service market will increase to US\$35.9 billion by 2027, representing an expected CAGR of 14.8% from 2022 to 2027, and the penetration rate of global drug discovery R&D service market will reach 65.1%; meanwhile, the size of China's drug discovery R&D CRO service market was estimated to be RMB21.4 billion in 2022, accounting for approximately 17.7% of the total global size. It is estimated that the size of China's drug discovery R&D service market will increase to RMB61.1 billion by 2027 with the market share increase to 25.3% of the total global market.

b. Trend on the pharmaceutical development and manufacturing services

Pharmaceutical development and manufacturing (CDMO) services cover the whole process from preclinical, clinical, registration to commercial manufacturing. According to Sullivan's forecast, the size of global pharmaceutical CDMO service market was estimated to be US\$74.9 billion in 2022. It is estimated that the size of global pharmaceutical CDMO service market will increase to US\$157.3 billion by 2027, representing an expected CAGR of 16.0% from 2022 to 2027; meanwhile, the size of China's pharmaceutical CDMO service market was estimated to be RMB66.6 billion in 2022, accounting for 13.2% of the global pharmaceutical CMO service market. It is estimated that the size of China's pharmaceutical CDMO service market will increase to RMB223.9 billion by 2027 with the market share increase to 21.2% of the total global market.

c. Trend on the clinical development services

Clinical development services cover Phase I to Phase III clinical trials and post-market studies of pharmaceutical products. According to Sullivan's forecast, the size of global drug clinical development services market reached US\$54.7 billion in 2022, with outsourcing penetration rate of 44.3% (market size of clinical development CRO service over the addressable market of clinical development spending). The size of global market is expected to reach US\$81.8 billion by 2027, representing an expected CAGR of 8.4% from 2022 to 2027, and the outsourcing penetration rate will rise to 48.4%; meanwhile, the market for China's drug clinical development outsourcing services was estimated to be RMB39.7 billion in 2022, accounting for 10.8% of the global clinical development services market. With the growth of the Chinese pharmaceutical industry, it is expected that the size of China's clinical development services will reach RMB122.3 billion by 2027, during which the CAGR of service scale will be 25.2%, and the market share increase to 22.2% of the total global market.

2. Outlook and strategy of the Company's future development

The Company adheres to our core growth strategy to build and improve our global end-to-end drug R&D services platform that is fully-integrated with highest international standard. In addition to continuously strengthen our leading position in the small molecule integrated R&D services, the Company has initially completed the establishment and integration of R&D service capabilities for biologics and CGT products. For the small molecule integrated R&D service platform, through continued expanding and training our talent pools, investing in cutting-edge technologies, upgrading our service capabilities

and strengthening the management capabilities for global multidisciplinary collaborations, the Company will further improve the fully-integrated services platform and provide customers with tailored, more flexible and efficient solutions. Cater to the specific needs of domestic and oversea customers, the Company establishes multidisciplinary and collaborative services teams for customers in a timely manner to address customers' R&D needs, so as to help customers successfully and efficiently advance their pharmaceutical R&D programs. For the new therapeutic modalities such as biologics and CGT products, the Company will leverage its existing strengths to actively expand its customer base, gradually enhance its business scale and operational management efficiency, giving into play the role of a global end-to-end and integrated service platform for biologics and CGT products as the pillar of the Company's overall business, and is committed to becoming a global leader in pharmaceutical R&D services across multiple therapeutic modalities.

We will adhere to the business development strategy that puts emphasis on both domestic and oversea markets. With our established effort in developing oversea market and our large customers base with solid relationship, we will continuously improve the capabilities of our R&D service platform in order to provide higher service quality and expand our collaboration with our customers. Also, we will take advantage of our brand reputation and develop and introduce our services to more customers. For the domestic market, we will pay more attention to cultivating the domestic market and adopt a specific market strategy to address the domestic needs.

3. Main operational plan of the Company for 2023

Adhere to our growth strategy of building an "end-to-end, fully integrated and global" pharmaceutical R&D service platform, the Company will focus on the following works in 2023:

(1) Strengthen its leading position in the small molecule R&D service area

After years of efforts, the Company has built a small molecule pharmaceutical R&D and manufacturing service platform broadly covering the full process from drug discovery to preclinical and clinical development. In 2023, the Company will continue to deepen its efforts in strengthening its leading position in small molecule R&D services and further enhance its competitiveness globally. On one hand, we will continue to invest in new technology in small molecule services to ensure our leading position; on the other hand, we will continue to expand and deepen our services offerings. Specifically, in 2023, we will continue to treat laboratory chemistry as the core business and cornerstone of our growth strategy, actively expanding geographically while improving our global program management system, expanding our service networks in the pharmaceutical R&D hotspots in China, and continuing to promote the construction of Xi'an campus and Chongqing laboratory. We will also further strengthen the synergy and integration between laboratory chemistry and small molecule CDMO, and vigorously develop one-stop chemistry and manufacturing services globally. For bioscience services, while we continuously strengthen our bioscience services in the discovery stage, we will expand our services offerings based on customers' needs and make significant scientific and technical advancement assisted by cutting-edge technologies invested. In order to further extend the Company's bioscience service capacity, we will continue to promote the construction of the Phase I of the Campus III in Ningbo.

(2) Continue improving biologics and CGT service platform

For building the biologics service platform, in 2023, we will accelerate the build-up of the CDMO service platform for biologics,

further develop our biologics discovery service capabilities by expanding our team, hence broadening our services offerings. We will also accelerate the construction of biologics development and manufacturing facilities in Ningbo (Campus II in Ningbo) and establish a quality system that meets the highest international standard.

For cell and gene therapies service platform, in 2022, we had initially integrated our CGT testing services in U.S. with our gene therapy CDMO services in U.K.. In 2023, we will take advantage of positive synergies, actively expand our customer base by leveraging our existing strengths, and gradually increase our business scale and operations management efficiency, so as to further develop our CGT services platform to meet the needs of our domestic and international customers.

(3) Continue to improve the fully integrated clinical development service platform

Through a series of integration, the clinical development service platform in China will further strengthen the clinical development service capability of each subsidiary and department and enhance team cohesion. For our overseas clinical development services, we will continue to strengthen our healthy volunteer-based early clinical research services and expand to patient clinical studies for oncology and other therapeutic areas. In 2023, the company will give full play to the brand effect of "Pharmaron Clinical" to improve our market competitiveness and industry influence.

(4) Continue to strengthen our talent pool to support our long-term and sustainable growth

Talents are the foundation of innovation and the key to strengthening our core competitiveness. It is our long-standing

human resources strategy to build an inclusive and open development platform to attract and train our talent pool. In 2023, we will continue to attract high calibre R&D talents globally, improve the company's benefits system to maximize the retention of talents in key positions, and further expand and enhance our multi-dimensional and comprehensive training system. In 2023, we will focus on the training of our middle and senior level of managers, and strengthen the business etiquette training and customized business English training on the basis of professional training to strengthen the quality internally and shape the image externally, so as to provide strong support to the future growth of the Company.

(5) Further enhance management capabilities

In 2023, the Company will continue to take production safety and information security as the top priority in our daily operation so as to protect the health of employees and safeguard information and intellectual property of our customers. We will continue to provide high quality services and products to our customers by adhering to the highest international quality standards.

With the expansion of services offering and geographic footprint of our fully integrated services platform to provide customers with interdisciplinary and global service solutions, a professional, systematic and scientific project management system is essential to support the business growth. In 2023, we will strategically emphasize the importance of project management, adhere to "transparent, timely, professional and efficient" project management goals, and build an efficient project management system to create value for our customers by effectively utilizing and linking the integrated service platform for new drug development.

(6) Continue to expand domestic and overseas market shares

For the overseas market growth, we will continue to maintain our solid relationships with our existing customer base, analyze and explore in-depth customer needs, expand our service offerings, increase customer loyalty through ensuring service quality, and introduce new customers with the help of our reputation and brand influence. For the domestic market, we will implement a China market strategy based on the characteristics of Chinese market, continue to expand customer base to better understand and address the domestic needs, emphasize team building and service quality building to improve our competitiveness in the domestic market.

4. Potential risks

(1) Risk of declining demand in pharmaceutical R&D service market

The Company is a leading fully-integrated pharmaceutical R&D service platform with global operations to accelerate drug innovation for our customers. While the global pharmaceutical industry is expected to keep growing driven by such factors as an aging population, higher disposable income and increased spending on healthcare, there is no guarantee, however, that the pharmaceutical industry will grow at the rate we project. If the growth of the global pharmaceutical market slows down in the future, customers may suspend their pharmaceutical R&D projects or reduce their pharmaceutical R&D budget, which will have an adverse impact on the Company's business performance and prospects. The Company will continue to implement its strategies, improve its scientific research capabilities and service quality and enhance its market competitiveness.

(2) Risk of losing scientific and technological talents and senior management members

The Company has established a talent team with extensive experience and strong

execution capability, which possesses the ability to provide customers with high-quality services in a timely manner and keep up with the cutting-edge technology and latest development of pharmaceutical R&D. However, there is a limited supply of qualified R&D personnel with requisite experience and expertise and such qualified personnel are also highly-sought after by large pharmaceutical companies, biotech start-ups and scientific research institutes. If the Company fails to maintain competitiveness in attracting and retaining excellent scientific and technological personnel in the future, we may not be able to provide customers with high-quality services, which could have a material adverse impact on its business.

The Company will optimize and improve the human resource management system, further strengthen efforts in various aspects such as attraction, assessment, training and incentives, and constantly improve the long-term incentive mechanism (including equity incentives) for all kinds of talent, striving to establish a talent team with first-class caliber that can adapt to international competition.

(3) Risks regarding intellectual property protection

Protection of intellectual property rights associated with customers' R&D services is critical to all of our customers. The service agreements and confidentiality agreements signed between the Company and our customers typically require the Company to exercise all reasonable precautions to protect the integrity and confidentiality of our customers' information. Any unauthorized disclosure of our customers' intellectual property or confidential information could subject the Company to liability for breach of contract and result in significant damage to our reputation, which could have a material adverse impact on the Company's business and operating results.

The Company will continuously improve the existing confidentiality policy, software and hardware, and continue to carry out internal training for employees to enhance their awareness of confidentiality and intellectual property protection.

(4) Risks regarding policies and regulation

There are strict laws, regulations and industry standards in many countries or regions to which drugs are intended to be ultimately sold (such as China, U.S., U.K. and several EU countries) to regulate drug development and manufacturing. The pharmaceutical regulatory authorities of these countries (e.g., FDA or NMPA) also conduct planned or unplanned facility inspections over drug development and manufacturing agencies (e.g., our customers and us) to ensure that relevant facilities meet regulatory requirements. During the past periods, the Company has passed the inspection of relevant regulatory authorities on drug discovery, development and manufacturing processes and facilities in all major aspects. If the Company fails to continuously meet the requirements of regulatory policies or fails to pass the on-site inspection by regulatory authorities in the future, it may be disqualified or subject to other administrative penalties, resulting in the termination of cooperation by our customers.

In addition, the operation of the Company is subject to national and regional laws on environmental protection, health and safety, including but not limited to the use of hazardous chemicals that are flammable, explosive and toxic and the treatment of pollutants (waste gas, waste water, waste residue or other pollutants). If the relevant environmental protection policies become more stringent in the future, the Company's costs for environmental compliance will rise.

The Company will monitor the trend of applicable policies and regulations to ensure its continuous fulfilment of regulatory policy requirements.

(5) Risk of international policy changes

We are a pharmaceutical R&D service platform with well-established global operations and a substantial portion of our customers are pharmaceutical and biotechnology companies outside of China. The demand for our services by these customers may be impacted by trade policies promulgated by respective local governments against Chinese pharmaceutical R&D service providers as a result of the rise in trade protectionism and unilateralism in recent years. In the event the trade tension between China and other major countries continue to escalate, or any such countries impose restrictions or limitations on pharmaceutical R&D outsourcing, our business and results of operations may be adversely affected. We have been expanding our service capabilities in overseas markets from 2015 with an aim to mitigate any potential impact such policy changes may have on our business.

(6) Risk of failure to obtain the licenses required for carrying out businesses

The Company is subject to a number of laws and regulations on pharmaceutical R&D and manufacturing. These laws and regulations require that the Company obtain a number of approvals, licenses and permits from different competent authorities to operate our business, some of which are subject to regular renewal. The Company has and will continue to strictly monitor its licensing management. If the Company fails to obtain the approval, license and permit required for its operations, it will have to suspend its operation as ordered by the relevant regulatory authorities.

(7) Risks regarding exchange rates

The Company's exchange currency risk mainly relates to USD, GBP and EUR. During the Reporting Period, the Company's income from overseas customers took up a much higher portion than that from domestic customers, and a considerable portion of our income came from sales denominated in USD. However, most of the Company's personnel and operating facilities are located in China, and the relevant operating costs and expenses are denominated in RMB. In recent years, as affected by China's political and economic conditions, trade tensions between U.S. and China, international economic and political developments, as well as the decision of the Chinese government to further promote the reform of the RMB exchange rate system and enhance the flexibility of RMB exchange rates, the exchange rates between RMB and USD and other currencies fluctuate.

In response to the risk of exchange rate fluctuations, the Company has reduced and will continue to reduce such risk through hedging transactions.

(8) Risks regarding market competition

The global pharmaceutical R&D service market for innovative drugs is highly competitive. The Company is committed to becoming a multi-therapy drug R&D service company that boasts the capabilities of laboratory services, CMC (small molecule CDMO) services, clinical development services and biologics and CGT services. Therefore, the Company expects to compete with domestic and international competitors at specific stages of pharmaceutical R&D. At the same time, the Company also competes with the discovery, trial, development and commercial manufacturing departments within pharmaceutical companies. As more competitors enter the market, level of competition is expected to escalate. The Company is confronted with market

competition in terms of service quality, breadth of integrated service, timeliness of delivery, R&D service strength, intellectual property protection, depth of customer relationship, price, etc.

(9) Risks regarding technological innovation

With the continuous market development and innovation of R&D technologies, advanced technologies are vital for the Company to maintain its leading position in the industry. The Company shall keep up with the development direction of new technologies and processes to maintain our leading position in the industry. The Company will continue to invest a large amount of human and capital resources to develop new technologies and upgrade our service platform. If target companies with new technologies appeal to us, the Company will consider acquisitions to inject new service capabilities into our platform.

(10) Risks regarding service quality

Service quality and customer satisfaction are one of the important factors for the Company to maintain performance growth. The Company's pharmaceutical research, development and production services mainly provide customers with experimental data and samples, which serve as an important basis for customers to carry out subsequent R&D and manufacturing. Meanwhile, our customers have the right to review the standard operating procedures and records of the Company's services, and check the facilities used to provide services to them. If the Company fails to maintain high service quality, or the experimental data or samples we provide are defective, or our service facilities fail to pass customers' review, the Company may face liquidated damages and suffer loss of customers due to reputation damage, which will have an adverse impact on the Company's business.

F. OTHER INFORMATION

1. Employee Remuneration and Relations

As at December 31, 2022, the Group had a total of 19,481 employees, as compared to 14,923 employees as at December 31, 2021. The Group provides employees with competitive remuneration and benefits, and the Group's remuneration policies are formulated according to the assessment of individual performance and are periodically reviewed. The Group provides employees with opportunities to work on cutting-edge drug development projects with world-class scientists, as well as offer opportunities to continue academic learning in the Group's Pharmaron College.

2. Purchase, Sale or Redemption of the Company's Listed Securities

At the extraordinary general meetings held on January 14, 2022, the Shareholders have approved a special resolution to repurchase (at the repurchase price of RMB17.85 per Share) and cancel a total of 132,012 Restricted A Shares under the 2019 A Share Incentive Scheme due to the resignation of 2 participants. The repurchase and cancellation were completed in May 2022.

3. Significant Investments and Future Plans for Material Investments or Capital Assets

The Group has no significant investment, or plan authorized by the Board for other material investments or additions of capital assets during the Reporting Period.

4. Material Acquisitions and Disposal of Subsidiaries, Associates and Joint Ventures

As at December 31, 2022 there was no significant investment held by the Company, nor were any material acquisitions or disposals of subsidiaries, associates and joint ventures during the Reporting Period.

5. Material Events after the Reporting Period

Save as disclosed above, there are no material events affecting the Company after the Reporting Period and up to the date of this announcement.

▶▶▶ Profile of Directors, Supervisors and Senior Management

Below are the brief profiles of the current Directors, Supervisors and senior management of the Group.

DIRECTORS

The Board currently comprises 11 Directors, of which three (3) are executive Directors, four (4) are non-executive Directors and four (4) are independent non-executive Directors. The following table sets forth information in respect of our Directors:

Name	Age	Position	Date of Appointment as Director
Dr. LOU Boliang	59	Chairman, chief executive officer and executive Director	October 27, 2016
Mr. LOU Xiaoqiang	54	Chief operating officer, president and executive Director	October 27, 2016
Ms. ZHENG Bei	55	Executive vice president and executive Director	October 27, 2016
Mr. CHEN Pingjin	52	Non-executive Director	October 13, 2017
Mr. HU Baifeng	41	Non-executive Director	October 13, 2017
Mr. LI Jiaqing	49	Non-executive Director	October 27, 2016
Mr. ZHOU Hongbin	49	Non-executive Director	October 27, 2016
Mr. TSANG Kwan Hung Benson	58	Independent non-executive Director	November 28, 2019
Mr. YU Jian	48	Independent non-executive Director	July 23, 2020
Ms. LI Lihua	58	Independent non-executive Director	September 23, 2022
Mr. ZHOU Qilin	65	Independent non-executive Director	September 23, 2022

SUPERVISORS

Our Supervisory Committee consists of three (3) Supervisors. The following table sets forth information in respect of our Supervisors:

Name	Age	Position	Date of Appointment as Supervisors
Dr. YANG Kexin	60	Chairman of the Supervisory Committee	October 27, 2016
Ms. FENG Shu	37	Supervisor	December 11, 2020
Ms. ZHANG Lan	41	Employee representative Supervisor	October 27, 2016

EXECUTIVE DIRECTORS

Dr. LOU Boliang (樓柏良), aged 59, is the chairman, chief executive officer and an executive Director of our Company. Dr. LOU co-founded our Group together with Mr. LOU and Ms. ZHENG in July 2004. He is primarily responsible for the overall management, strategic planning and corporate development of our Group. He is also actively involved in formulating our business development strategy and developing strategic relationship with our customers. He also serves as a director of most of the subsidiaries of our Group. Dr. LOU is the brother of Mr. LOU and the brother-in-law of Ms. ZHENG.

Since November 2006, Dr. LOU has been a director of Pharmaron Holdings Limited, which was our business and asset holding vehicle prior to the restructuring in connection with our A Share Offering.

Dr. LOU has over 30 years of experience in the life sciences and biotech industry. Prior to founding our Group, Dr. LOU worked at several life sciences and biotech companies such as Cytel Corporation, Ontogen Corporation and Advanced SynTech (formerly known as Helios Pharmaceuticals, Inc.).

Dr. LOU obtained a master's degree and a doctorate degree in science at the Shanghai Institute of Organic Chemistry (中國科學院上海有機化學所) in May 1986 and May 1989, respectively. From 1990 to 1994, he conducted post-doctoral research at the University of Montreal in Canada.

Dr. LOU's awards and recognitions include:

- President's Special Award of the Chinese Academy of Sciences (1989);
- Beijing Overseas Returnee Entrepreneur Award (2008); and
- Bo-Da Contribution Award from the Office of Beijing Economic and Technological Development Area (BDA) (2010).

Mr. LOU Xiaoqiang (樓小強), aged 54, is the chief operating officer, president and an executive Director of our Company. Mr. LOU co-founded our Group together with Dr. LOU and Ms. ZHENG in July 2004. Mr. LOU is primarily responsible for the overall operations of the business of our Group. In particular, Mr. LOU is responsible for the execution of our Group's growth strategy both in China and globally. He also serves as a director at several subsidiaries of our Group. Mr. LOU is the brother of Dr. LOU and the husband of Ms. ZHENG.

From March 2007 to January 2016, Mr. LOU was a director of Pharmaron Holdings Limited.

Prior to joining our Group, he worked in sales and management roles at various electronics companies. For more details, please refer to the paragraphs headed "Directors, Supervisors and Senior Management – Executive Directors" of the Prospectus.

Mr. LOU obtained a bachelor's and a master's degree in material science and engineering from Beijing University of Aeronautics and Astronautics (北京航空航天大學) in July 1990 and March 1993, respectively. Mr. LOU obtained a master's degree in business administration from the China-Europe International Business School (中歐國際工商學院) in September 2009.

Ms. ZHENG Bei (鄭北), aged 55, is the executive vice president and an executive Director of our Company. Ms. ZHENG co-founded our Group together with Dr. LOU and Mr. LOU in July 2004. Ms. ZHENG is primarily responsible for the administration and asset management of our Group. In particular, she is responsible for the facilities expansion of our Group. Ms. ZHENG is the wife of Mr. LOU and the sister-in-law of Dr. LOU.

From March 2007 to January 2016, Ms. ZHENG was a director of Pharmaron Holdings Limited. For more details of Ms. ZHENG's previous experience, please refer to the paragraphs headed "Directors, Supervisors and Senior Management – Executive Directors" of the Prospectus.

Ms. ZHENG received her master's degree in law from Peking University (北京大學) in July 1992.

NON-EXECUTIVE DIRECTORS

Mr. CHEN Pingjin (陳平進), aged 52, is our non-executive Director. Mr. CHEN is primarily responsible for providing guidance on corporate strategy and governance to our Group. Mr. CHEN joined our Group on October 13, 2017.

Since April 2016, Mr. CHEN has served as a deputy general manager of Gold Stone Investment Co., Ltd. (金石投資有限公司) ("Gold Stone Investment"), a subsidiary of CITIC Securities Co., Ltd. (中信證券股份有限公司), a company listed on the Shanghai Stock Exchange (stock code: 600030) where he has successively served various roles from December 2006 to March 2016.

Mr. CHEN obtained his bachelor's degree in electrical engineering from East China Jiaotong University (華東交通大學) in July 1992. He obtained his master's degree in information economics from Beijing Jiaotong University (北京交通大學) (formerly known as Northern Jiaotong University (北方交通大學)) in April 1998.

Mr. HU Baifeng (胡柏風), aged 41, is our non-executive Director. Mr. HU is primarily responsible for providing guidance on corporate strategy and governance to our Group. Mr. HU joined our Group on October 27, 2016 and was our Supervisor from October 2016 to October 2017.

Since March 2018, he has served as a board director of Ampleon Cooperatief UA, a company primarily engaged in the financial holdings business in the Netherlands. Since February 2017, Mr. HU has served as a director of Gold Stone Investment. From May 2014 to January 2017, Mr. HU served as a director at CITIC M&A Fund. From 2006 to 2013, he worked at the investment department of several companies.

Mr. HU obtained his bachelor's degree in economics from Hunan University (湖南大學) in June 2003. He obtained his master's degree in economics from the University of Ottawa in Canada in October 2005.

Mr. LI Jiaqing (李家慶), aged 49, is our non-executive Director. Mr. LI is primarily responsible for providing guidance on corporate strategy and governance to our Group. Mr. LI joined our Group on March 12, 2007.

From March 2007 to January 2016, Mr. LI was a director of Pharmaron Holdings Limited. Since 2007, he has served as a managing director of Legend Capital. From December 2011 to February 2018, he served as a director of Wuxi Lead Intelligent Equipment Co., Ltd. (無錫先導智能裝備股份有限公司), a company listed on the Shenzhen Stock Exchange (stock code: 300450). From March 2011 to February 2014, he served as a supervisor of Shanghai Amarsoft Information Technology Co., Ltd. (上海安碩信息技術股份有限公司), a company listed on the Shenzhen Stock Exchange (stock code: 300380). From September 2010 to April 2018, Mr. LI served as a director of Yunnan Hongxiang Yixintang Pharma Co., Ltd. (雲南鴻翔一心堂藥業(集團)股份有限公司), a company listed on the Shenzhen Stock Exchange (stock code: 002727). From 2001 to 2007, he successively served as vice president of investment, senior vice president of investment, and executive director of Legend Capital.

Mr. LI obtained his dual bachelor's degree in mechanical engineering and economic management and a master's degree in management from Tsinghua University (清華大學) in July 1996 and July 1999, respectively. He obtained his master's degree in business administration from the Engineering School of Paris in France in June 2001.

Mr. ZHOU Hongbin (周宏斌), aged 49, is our non-executive Director. Mr. ZHOU is primarily responsible for providing guidance on corporate strategy and governance to our Group. Mr. ZHOU joined our Group on October 27, 2016.

Since September 2015, he has served as a director of Milkyway Chemical Supply Chain Service Co., Ltd. (密爾克衛化工供應鏈服務股份有限公司), a company listed on the Shanghai Stock Exchange (stock code: 603713). Since June 2015, he has served as a supervisor of Guangzhou Kingmed Diagnostics Group Co., Ltd. (廣州金域醫學檢驗集團股份有限公司), a company listed on the Shanghai Stock Exchange (stock code: 603882). Since April 2015, he has served as a managing director of Legend Capital. From 2005 to 2015, he successively served as investment manager, investment vice president, investment director and executive director of Legend Capital.

Mr. ZHOU obtained his bachelor's degree in urban construction and master's degree in engineering from Wuhan University (武漢大學) in July 1994 and June 1997, respectively. He obtained his doctorate degree in management from Fudan University (復旦大學) in July 2000.

INDEPENDENT NON-EXECUTIVE DIRECTORS

Mr. TSANG Kwan Hung Benson (曾坤鴻), age 58, was appointed as an independent non-executive Director on August 15, 2019 (effective from the Listing Date). Mr. TSANG is primarily responsible for supervising and providing independent advice to the Board.

Since March 2019, he has served as the director of Hongsen Investment Management Limited, the general partner of Hongsen Investment Fund L.P. which started operation since January 2020. Since July 2018, he has served as an independent director and chairman of the audit committee of Athenex Inc., a company listed in the United States (NASDAQ: ATNX). From July 2017 to August 2020, he has served as a director of the board of Puritek Canada Inc., the Canadian investment arm of Puritek China Company. From July 2014 to August 2020, he has served as a director of the board of Hydraservices Inc., a waste management and odour control solutions company based in Canada. From October 2017 to December 2018, he served as an executive-in-residence adviser at ShangPharma Innovation Inc., an early stage pharmaceutical company based in the United States. From March 2010 to June 2015, he served as the chief financial officer of ATA Inc., a large scale computer-based testing service provider listed in the United States (NASDAQ: ATAI). From November 2010 to March 2013, he served as an independent director at ShangPharma Corp., a pharmaceutical R&D contract service organization company previously listed in the United States (NYSE: SHP), which was privatized in September 2013.

From July 2006 to February 2009, he served as the chief financial officer of Wuxi Pharma Tech Cayman Inc., a pharmaceutical R&D contract service organization company previously listed in the United States (NYSE: WX), which was privatized in December 2015. From 1988 to 2006, Mr. TSANG served in finance and audit roles at various companies.

Mr. TSANG obtained his Chartered Accountant certificate in Canada and Hong Kong in 1991 and 1993, respectively. He is a member (non-practising) of the Hong Kong Institute of Certified Public Accountants. He obtained his bachelor's degree in commerce and his master's degree in business administration at McMaster University in Canada in June 1987 and May 1988, respectively.

Mr. YU Jian (余堅), aged 48, was appointed as an independent non-executive Director on July 23, 2020. Mr. YU is primarily responsible for supervising and providing independent advice to the board.

Mr. YU has extensive experience in finance and accounting. He has served as independent director of Milkyway Chemical Supply Chain Services Co., Ltd. (密爾克衛化工供應鏈服務股份有限公司) since September 2015. He has served as independent director of Pengxin International Mining Co., Ltd. (鵬欣環球資源股份有限公司) since May 2015. Since October 2008, he has worked in the Teaching and Research Department of Shanghai National Accounting Institute (上海國家會計學院) as an associate professor, and engaged in teaching and research in financial management. He served as the financial director of Infoservice Information Technology Co., Ltd. (上海英孚思為信息科技有限公司) from January to September 2008. He served as the financial director of Shanghai Chengtuo Land Group Co., Ltd. (上海城投置地集團有限公司) from January 2006 to January 2008. He served as the financial director of Shanghai Transportation Investment Group Co., Ltd. (上海交通投資集團有限公司) from December 2004 to January 2006. He served as the financial director of Shanghai Pulan Investment Management Co., Ltd. (上海普蘭投資管理有限公司) from August 2002 to December 2004. From March 1999 to February 2002, he served successively as the financial supervisor of the Planning and Finance Department, deputy head of the audit and supervision department, and deputy head of the project investment department in the headquarters of Shanghai Chengtuo Group Corporation (上海城投集團).

Mr. YU is a CPA, and obtained his bachelor's degree in economics from Zhejiang Institute of Finance (浙江財經學院) in July 1996. Mr. YU obtained his master's degree in management from Shanghai University of Finance and Economics (上海財經大學) in January 1999. He obtained his PhD in management from Shanghai University of Finance and Economics (上海財經大學) in July 2005.

Ms. LI Lihua (李麗華), aged 58, was appointed as an independent non-executive Director on September 23, 2022. Ms. LI is primarily responsible for supervising and providing independent advice to the board.

Ms. LI has been a lawyer at Beijing Huamao & Guigu Law Firm (北京市華貿硅谷律師事務所) since October 2017. From March 1996 to March 2017, Ms. LI served as a lawyer at Beijing Yongshen Law Firm (北京市永申律師事務所), Beijing Guangsheng Law Firm (北京市廣盛律師事務所), and Beijing Zhong Yi Law Firm (北京市眾一律師事務所), respectively. From October 2016 to July 2020, Ms. LI served as an independent non-executive director of the Company. Ms. LI obtained her master's degree in law from Peking University (北京大學) in July 1995.

Mr. ZHOU Qilin (周其林), aged 65, was appointed as an independent non-executive Director on September 23, 2022. Mr. ZHOU is primarily responsible for supervising and providing independent advice to the board.

Mr. ZHOU is an academician of the Chinese Academy of Sciences, professor and doctoral supervisor of Nankai University. Mr. ZHOU graduated from the Department of Chemistry of Lanzhou University in 1982. In the same year, he was admitted to the Shanghai Institute of Organic Chemistry, Chinese Academy of Sciences, and obtained his doctor degree in 1987. From 1988 to 1996, he worked as a postdoctoral fellow in East China University of Science and Technology, Max-Planck Institute in Germany, Basel University in Switzerland, and Trinity University in the United States. From 1996 to 1999, Mr. ZHOU was an associate professor, professor and doctoral supervisor of East China University of Science and Technology respectively. In 1997, he received the grant from the National Outstanding Youth Fund. In 1999, Mr. ZHOU was appointed as the Distinguished Professor of "Chang Jiang Scholars Program" by the Ministry of Education, and is a professor at the School of Chemistry, Nankai University now. Mr. ZHOU was elected academician of the Chinese Academy of Sciences in 2009.

Mr. ZHOU has long been engaged in the research of organometallic chemistry, organic synthesis, asymmetric catalysis, bioactive compounds and chiral drug synthesis. He developed a new class of chiral spiro catalysts. This kind of catalysts showed excellent catalytic efficiency and enantioselectivity in many asymmetric synthesis reactions, and have been successfully used in the production of chiral drugs. Mr. ZHOU has published more than 280 research papers and 16 books and chapters and applied for 15 invention patents. In 2005, he was awarded the Organic Synthesis Creation Award by Organic Chemistry Committee of Chinese Chemical Society. In 2006, Mr. ZHOU was awarded the Huang Yaozeng Organometallic Chemistry Award by the Chinese Chemical Society. He won the First Prize of Natural Science in Tianjin twice in 2007 and 2013. In 2012, he was awarded the "Chiral Chemistry Award" by Chinese Chemical Society. In 2018, he won the Future Science Prize Physical Sciences. In 2019, he won the First Prize of National Natural Science. In 2020, he was awarded the title of "National Advanced Worker".

SUPERVISORS

Dr. YANG Kexin (楊珂新), aged 60, was appointed as the chairman of the Supervisory Committee on October 27, 2016 and is primarily responsible for the overall operation of the Supervisory Committee and supervision of the performance of the Directors and senior management members. Dr. YANG joined our Group on July 1, 2004 and is currently our vice president of chemical technology.

Dr. YANG obtained his master's degree in organic chemistry at Lanzhou University (蘭州大學) in June 1986. He obtained his doctorate degree in organic chemistry at the University of Calgary in Canada in November 1992.

Ms. FENG Shu (馮書), aged 37, was appointed as a Supervisor on December 11, 2020. Ms. FENG is primarily responsible for the supervision of the performance of the Directors and senior management members.

From February 2016 to May 2017, she served as Vice President and Senior Vice President of CITIC M&A Fund Management Co., Ltd.* (中信併購基金管理有限公司) ("CITIC M&A Fund"), which is a substantial shareholder of the Company. Since May 2017, she has worked at Goldstone Investment Co., Ltd.* (金石投資有限公司) ("Goldstone Investment"), the sole shareholder of CITIC M&A Fund, and currently serves as the Director at Goldstone Investment; since August 2019, she has served as the Director, the Head of Strategy and Business Development, the Executive Director of Private Equity of CLSA Capital Partners (HK) Limited and a Member of the Investment Committee of CLSA Capital Partners (HK) Limited.

Ms. FENG obtained her bachelor's degree from Zhejiang University (浙江大學) and a master's degree from Baylor University in the U.S..

Ms. ZHANG Lan (張嵐), aged 41, was appointed as the employee representative Supervisor on October 27, 2016 and is primarily responsible for the supervision of the performance of the Directors and senior management members. Ms. ZHANG joined our Group on April 5, 2006 and currently serves as the director of the asset management team of the Company.

Ms. ZHANG obtained her bachelor's degree in English at Tangshan Teacher's College (唐山師範學院) in Hebei, China in June 2005.

SENIOR MANAGEMENT

CHAIRMAN & CEO

Boliang LOU, Ph.D.

Dr. LOU Boliang (樓柏良), aged 59, is the chairman, chief executive officer and an executive Director of our Company. Dr. LOU co-founded our Group together with Mr. LOU and Ms. ZHENG in July 2004. He is primarily responsible for the overall management, strategic planning and corporate development of our Group. He is also actively involved in formulating our business development strategy and developing strategic relationship with our customers. He also serves as a director of most of the subsidiaries of our Group. Please see section headed "Profile of Directors, Supervisors and Senior Management – Executive Directors" for more details.

PRESIDENT & COO

Larry LOU, EMBA, M.Eng

Mr. LOU Xiaoqiang (樓小強), aged 54, is the chief operating officer, president and an executive Director of our Company. Mr. LOU co-founded our Group together with Dr. LOU and Ms. ZHENG in July 2004. Mr. LOU is primarily responsible for the overall operations of the business of our Group. In particular, Mr. LOU is responsible for the execution of our Group' growth strategy both in China and globally. He also serves as a director at several subsidiaries of our Group. Please see section headed "Profile of Directors, Supervisors and Senior Management – Executive Directors" for more details.

EXECUTIVE VICE PRESIDENT

Bei ZHENG, M.A.

Ms. ZHENG Bei (鄭北), aged 55, is the executive vice president and an executive Director of our Company. Ms. ZHENG co-founded our Group together with Dr. LOU and Mr. LOU in July 2004. Ms. ZHENG is primarily responsible for the administration and asset management of our Group. In particular, she is responsible for the facilities expansion of our Group. Please see section headed "Profile of Directors, Supervisors and Senior Management – Executive Directors" for more details.

CHIEF SCIENTIFIC OFFICER

Hua YANG, Ph.D.

Dr. YANG Hua (陽華), aged 60, is our chief scientific officer. He joined our Group in July 2007 as our chief scientific officer and is primarily responsible for the overall research and scientific development strategy for the integrated services platform of our Group. Since March 2017, he has also served as a director of one of our subsidiaries.

Prior to joining our Group, he successively served in various roles, including assistant director, at AstraZeneca R&D Montreal. Since joining our Group in 2007, Dr. YANG has extensively engaged in the service R&D platform building, encompassing discovery, preclinical and clinical development and their integration.

Dr. YANG obtained his doctorate degree at The Victoria University of Manchester (currently known as the University of Manchester) in England in November 1990. He also conducted his post-doctoral research at the University of Montreal in Canada. Dr. YANG is a co-author and co-inventor for 46 peer-reviewed scientific publications and patent applications.

CHIEF FINANCIAL OFFICER

Gilbert LI, CFA, CPA

Mr. LI Shing Chung Gilbert (李承宗), aged 44, is our chief financial officer and secretary of our Board. He joined our Group in January 2008 as our financial controller and was appointed as our chief financial officer in January 2015. He was appointed as the secretary of the Board in October 2016 and is primarily responsible for the overall financial function of our Group. In particular, he is responsible for the financing and M&A activities of our Group. Mr. LI also serves as a supervisor or director at several subsidiaries of our Group.

Prior to joining our Group, Mr. LI had served at various roles in accounting and financial areas. From 2000 to 2003, he served as assistant manager of KPMG, a multinational financial audit, tax and advisory firm.

Mr. LI obtained his bachelor's degree in business administration from the Hong Kong University of Science and Technology in November 2000. Mr. LI obtained his master's degree in business administration from the China Europe International Business School (中歐國際工商學院) in July 2012. Mr. LI is a member of the Hong Kong Institute of Certified Public Accountants and the American Institute of Certified Public Accountants and a Chartered Financial Analyst.

▶▶▶ Corporate Governance Report

The Board is pleased to present the corporate governance report of the Company for the year ended December 31, 2022 (the “year”).

CORPORATE PURPOSE, VALUES, STRATEGY AND CULTURE

The Company aims to improve the efficiency of pharmaceutical research and development of global partners by providing fully integrated services before the clinical research and development of new drugs. By helping partners to successfully develop new drugs and contributing Pharmaron’s wisdom to human health, the Company will implement its development strategies as pharmaceutical research, development and manufacturing services which provides fully integrated services to support customers’ R&D for innovative pharmaceutical products throughout the research and development cycle, and it regards “Employee First and Customer Centric” as the core of its corporate culture.

CORPORATE GOVERNANCE

The Board of Directors (the “Board”) of the Company strives to maintain a high standard of corporate governance and believes that effective and reasonable corporate governance practices are essential to the development of the Group and at the same time protect and enhance shareholders’ rights.

The Company’s corporate governance practices are based on the principles and code provisions set out in the Appendix 14 Corporate Governance Code (the “CG Code”) to the Rules Governing the Listing of Securities on the Stock Exchange (the “Stock Exchange”) (the “Listing Rules”).

Save as disclosed herein, the Company has complied with the code provisions as set out in the CG Code for the period from January 1, 2022 to December 31, 2022 (the “Related Period”).

THE BOARD

Duties and Delegation of Authority to the Management

The Board must be accountable to shareholders and lead the Company in a responsible and effective manner. The Board implements the resolutions made at the general meetings, determines the Company’s business plans, investment plans and the establishment of the Company’s internal management departments, formulates the Company’s annual financial budget plans, final account plans, and profit distribution plans, and employs senior management personnel.

To oversee particular aspects of the Company’s affairs, the Board has established four Board committees including the Strategy Committee, the Audit Committee, the Nomination Committee and the Remuneration and Appraisal Committee, and has granted these special committees with their respective responsibilities. The Board has granted various responsibilities to each Board committee, and the responsibilities are set out in their respective working rules.

The Board has delegated power and responsibility to the senior management to carry out daily management, administration and operation of the Company. Authorized functions and tasks are reviewed regularly. The management of the Company will also provide sufficient advice to the Board and Board committees in a timely manner for directors to make informed decisions.

All directors perform their duties in good faith, act in the best interests of the Company, comply with applicable laws and regulations, and always act in the interests of the Company and shareholders.

In 2023, the Board will sustain efforts in strengthening the corporate governance standardization, and promote the improvement of internal control and internal audit systems to establish strict and effective internal control and risk control systems in strict accordance with laws and regulations, such as the Company Law, New Securities Law, Rules Governing the Listing of Shares on the ChiNext Market of Shenzhen Stock Exchange, and the Rules Governing the Listing of Securities on the Stock Exchange of Hong Kong Limited. At the same time, the Board will also strengthen communication with shareholders, and listen to their reasonable suggestions to improve corporate governance. The Board will, in light of the Company's particular conditions, standardize the Company's operations through business integrity, transparent management, and constant improvements to the corporate governance structure, so as to maximize the interests of all shareholders and the Company.

Corporate Governance Function of the Board

The Board is responsible for performing the corporate governance functions set out in Code Provision A.2.1 of Part 2 of the CG Code. These functions include, as a minimum, the following contents:

- (1) to develop and review the Company's policies and practices on corporate governance;
- (2) to review and monitor the training and continuous professional development of directors and senior management;
- (3) to review and monitor the Company's policies and practices on compliance with legal and regulatory requirements;
- (4) to develop, review and monitor the code of conduct and compliance manual (if any) applicable to employees and directors; and
- (5) to review the Company's compliance with the CG Code and disclosure in the annual report.

Board Structure

As at the date of this annual report, the second session of the Board consists of eleven directors and one chairman. The Board members consist of three executive Directors, four non-executive Directors and four independent non-executive Directors.

The Board members as at the end of the Reporting Period and up to the date of this annual report are as follows:

Executive Directors:

Dr. LOU Boliang (*Chairman, Chief Executive Officer and Executive Director*)
 Mr. LOU Xiaoqiang (*Chief Operating Officer, President and Executive Director*)
 Ms. ZHENG Bei (*Executive Vice President and Executive Director*)

Non-Executive Directors:

Mr. CHEN Pingjin
 Mr. HU Baifeng
 Mr. LI Jiaqing
 Mr. ZHOU Hongbin

Independent Non-Executive Directors:

Ms. LI Lihua (Appointed on September 23, 2022)
 Mr. ZHOU Qilin (Appointed on September 23, 2022)
 Mr. TSANG Kwan Hung Benson
 Mr. YU Jian

Mr. DAI Lixin and Ms. CHEN Guoqin ceased to be the independent non-executive Directors on September 23, 2022 in light of the expirations of their respective six-year consecutive terms of offices. They have respectively confirmed that they have no claim against the Company in respect of their resignations and have no disagreement with the Board. They have respectively further confirmed that there is no matter relating to their resignations that need to be brought to the attention of the Shareholders in connection with their respective resignations. Ms. LI Lihua and Mr. ZHOU Qilin were appointed as independent non-executive Directors on September 23, 2022.

Pursuant to the Articles of Association, Directors shall be elected or removed from office by Shareholders at a Shareholders' general meeting. Each term of office of a Director shall be three years. Director may be re-elected and re-appointed upon expiry of his/her term of office.

The biographies of all Directors are set out under the section headed "Profile of Directors, Supervisors and Senior Management" of this annual report. Dr. LOU Boliang is the brother of Mr. LOU Xiaoqiang and the brother-in-law of Ms. ZHENG Bei. Mr. LOU Xiaoqiang is the brother of Dr. LOU Boliang and the spouse of Ms. ZHENG Bei. Ms. ZHENG Bei is the spouse of Mr. LOU Xiaoqiang and the sister-in-law of Dr. LOU. Save as disclosed above, there are no material relationships among members of the Board (including financial, business, family or other material or relevant relationships).

Board Diversity and Workforce Diversity Policy

Our Company seeks to achieve board diversity through the consideration of a number of factors, including but not limited to gender, age, cultural and educational background, ethnicity, professional experience, skills, knowledge and length of service. All Board appointments will be based on meritocracy, and candidates will be considered against objective criteria, having due regard for the benefits of diversity on the Board.

Pursuant to the CG Code, the Board has adopted the Board Diversity Policy. The Company understands and believes that the board diversity is of great benefit to the improvement of the Company's performance. In order to achieve sustainable and balanced development, the Company considers the increasing diversity of the Board as a key element to support its achievement of strategic objectives and sustainable development. All Board appointments will be based on meritocracy, and candidates will be considered having due regard for the benefits of diversity on

the Board. The Company is committed to selecting the best candidate to serve as a Board member. The selection of candidates will be based on a range of diversified factors, including but not limited to gender, age, cultural background and ethnicity in addition to educational background, professional experience, skills, knowledge and length of service. The final decision will be based on the strengths of the candidate and the contributions the candidate makes to the Board. The composition of the Board (including gender, age, and length of service) will be disclosed annually in the corporate governance report.

The Company's Board consists of 11 members, of whom 9 are male and 2 are female. The Board members have a wide range of academic backgrounds, skills, knowledge and experience. The academic backgrounds cover chemistry, business management, law, information economics, economics, materials science and engineering, business administration, management and various other disciplines; skills, knowledge and experience include scientific research, corporate management, investment, legal services, risk management, finance and auditing. The Board of the Company has reviewed the members, structure and composition of the Board on March 25, 2022, and considers that the Board structure is reasonable, and the directors have experience and skills in various aspects and fields to help the Company maintain a high level of operations.

The Nomination Committee is responsible for ensuring the diversity of the Board. The Nomination Committee will monitor the implementation of the diversity policy and review the Board Diversity Policy from time to time to ensure its continued effectiveness and make recommendations to the Board. The Board has reviewed the Board Diversity Policy on March 25, 2022 and considers that the Board Diversity Policy has been implemented effectively.

The following figure shows the diversification of second session of the Board as of December 31, 2022:

Note: 1. Y-axis represents percentage

2. Economics include: economics, information economics; Management include: business administration, management, economic management, business, commercial management; Engineering course include: materials science and engineering, urban construction, electric engineering, engineering, mechanical engineering

As at December 31, 2022, 46% of the Group's employees (including senior management) were male and 54% were female, representing a relatively even gender balance. We hope to create more equal job positions and work environment to maintain the Group's gender balance. The gender balance plan means equal employment opportunities for male and female employees based on their required academic qualifications, experience and skills, as well as equal opportunities for male and female candidates for senior management positions. In addition, we may face problems in the human resources market as to whether the supply of individuals in different genders can match the required academic qualifications, experience and skills for positions within the Group. Despite these challenges, we will continue to pursue the goal of gender balance.

Chairman and Chief Executive Officer

Pursuant to Code Provision C.2.1 of Part 2 of the CG Code, the roles of chairman and chief executive officer shall be separate and performed by different individuals.

Up to the date of this annual report, there is no distinction between the positions of chairman and chief executive officer of the Company, and Dr. LOU Boliang ("Dr. LOU") currently holds both positions. Dr. LOU is responsible for the overall management, strategic planning and corporate development of the Group.

In view of Dr. LOU's experience, personal profile and his roles in our Company as mentioned above and that Dr. LOU has assumed the role of chief executive officer of our Company since our commencement of business, the Board considers it beneficial to the business prospect and operational efficiency of our Company that upon Listing, Dr. LOU acts as the chairman of the Board and continues to act as the chief executive officer of our Company. While this will constitute a deviation from Code Provision C.2.1 of the CG Code as set out in Appendix 14 to the Listing Rules, the Board believes that this structure will not impair the balance of power and authority between the Board and the management of our Company, given that: (i) decision to be made by our Board requires approval by at least a majority of our Directors; (ii) Dr. LOU and the other Directors are aware of and undertake to fulfil their fiduciary duties as Directors, which require, among other things, that he acts for the benefit and in the best interests of our Company and will make decisions for our

Company accordingly; and (iii) the balance of power and authority is ensured by the operations of the Board which comprises experienced and high caliber individuals who meet regularly to discuss issues affecting the operations of our Company. Moreover, the overall strategic and other key business, financial, and operational policies of our Company are made collectively after thorough discussion at both Board and senior management levels. The Board will continue to review the effectiveness of the corporate governance structure of our Company in order to assess whether separation of the roles of chairman of the Board and chief executive officer is necessary.

Independent Non-Executive Directors

The Board at all times met the requirements of Rules 3.10(1) and 3.10(2) of the Listing Rules relating to the appointment of at least three independent non-executive Directors with at least one independent non-executive Director possessing appropriate professional qualifications or accounting or related financial management expertise. In addition, under Rule 3.10A of the Listing Rules, independent non-executive Directors shall represent at least one-third of the Board. As at the date of this annual report, the second session of the Board has 4 independent non-executive Directors, accounting for four-elevenths of Board members, and the 4 independent non-executive directors have professional qualifications in chemical science, law, finance and accounting respectively. Therefore, the Company has complied with the relevant regulations.

Pursuant to the Articles of Association, the term of office of independent non-executive Directors is the same as that of other directors of the Company. Director may be re-elected and re-appointed upon expiry of his/her term of office, but the term of re-appointment shall not exceed six years. The Company's independent non-executive Directors shall have more than five years of legal, economic or other work experience necessary to perform the duties of independent non-executive Directors, master the basic knowledge of company operations, be familiar with the rules of the place where the Company's shares are listed, and ensure sufficient time and energy to perform duties.

The Nomination Committee of the second session of the Board has assessed the independence and qualifications of each independent non-executive Director in accordance with the Rules Governing the Listing of Securities on the Stock Exchange of Hong Kong Limited, the Self-regulatory Guidelines for Listed Companies No. 2 of Shenzhen Stock Exchange – Standardized Operation of Listed Companies on the ChiNext Market, and the Company's Work Rules for the Nomination Committee, and received the annual confirmation of independence from each of the independent non-executive Directors pursuant to Rule 3.13 of the Listing Rules. After assessing their independence, the Company considers that all independent non-executive Directors meet the independence required by the Listing Rules.

Review of the mechanism for the Board to obtain independent views

The Board of the Company has a balanced composition of executive Directors, non-executive Directors and independent non-executive Directors, and has a high level of independence. The Board strictly comply with the requirements of the Listing Rules on the composition of Board committees to ensure that each Board committee can obtain independent views. The Board has reasonable structure, appropriate size and balanced skills, knowledge, experience and gender of the Board members. The term of office of each independent non-executive Director is balanced, which is conducive to maintaining a balance between the number of Directors who have a deep understanding of the Company and the number of Directors who have new views and new insights. Each independent non-executive Director will inform the Company as soon as practicable if there is any change of his/her personal particulars that may affect his/her independence. No remuneration was paid to independent non-executive Directors in respect of share options, share grants or other equity interests with performance related elements, in order to maintain their objectivity and independence in the Board. On August 29, 2022, the mechanism for the Company's Board to obtain independent views was reviewed. The Board considers that the mechanism for the Board of the Company to obtain independent views is effective.

Appointment, Re-election and Removal of Directors

The system and procedures for the appointment, re-election and removal of Directors are set out in the Articles of Association of the Company. Pursuant to the Articles of Association, Directors shall be elected or removed from office by Shareholders at a Shareholders' general meeting. Each term of office of a Director shall be three years. Director may be re-elected and re-appointed upon expiry of his/her term of office. Before the expiration of a Director's term, his/her duties shall not be released by the Shareholders' general meeting without reason. The Shareholders' general meeting may, in compliance with relevant laws, administrative regulations, and relevant regulations of the securities regulatory authority of the place where the Company's shares are listed, remove any director whose term has not expired by ordinary resolution, but this does not affect the director's claims for damages pursuant to any contract.

During the year, in accordance with the requirements of the Independent Directors Rules for Listed Companies issued by the CSRC and the Articles of Association of the Company, Mr. DAI Lixin and Ms. CHEN Guoqin will cease to be independent non-executive Directors of the Company upon expiration of their respective terms of office. Mr. DAI Lixin will cease to be a member of the Strategy Committee of the Company, Ms. CHEN Guoqin will cease to be the chairperson of the Nomination Committee and the Remuneration and Appraisal Committee, and a member of the Audit Committee of the Company. At the extraordinary general meeting of the Company held on September 23 2022, Ms. LI Lihua and Mr. ZHOU Qilin were appointed as independent non-executive Directors of the Company to fill the vacancies that were left open due to the cessation of office of Mr. DAI Lixin and Ms. CHEN Guoqin. Ms. LI Lihua is the chairperson of the Nomination Committee and the Remuneration and Appraisal Committee and a member of the Audit Committee of the Company, and Mr. ZHOU Qilin is a member of the Strategy Committee of the Company.

Each of the current directors has entered into a service contract with the Company for a term of three years, counting from the date of obtaining the relevant shareholders' approval for appointment, and terminating in accordance with their respective terms.

None of the Directors or Supervisors has or is proposed to enter into a service contract with any member of our Group, other than contracts expiring or determinable by the relevant employer within one year without the payment of compensation (other than statutory compensation).

Board Meetings

Pursuant to the Articles of Association, the Board shall hold at least four meetings each year, which shall be convened by the Chairman and notified to all the directors and supervisors fourteen days prior to the meeting. Meetings of the board of directors shall be held only if more than half of the directors are present. If a director is unable to attend the meeting in person, he/she may appoint another director to attend the meeting on his/her behalf by a written power of attorney specifying the name of the agent, the delegation matters, the scope of authorization and the period of validity. However, directors may not vote on any board resolution that approves a contract, transaction or arrangement or any other relevant Resolution in which he/she or any of his/her close associates (as defined in the applicable Listing Rules in force from time to time) have a significant interest. Board meetings are held on site as a principle. A director who fails to attend a Board meeting or to entrust a representative to attend is deemed to have waived his/her voting right at the relevant meeting. The Board shall make minutes of the decisions on the matters considered at the meeting, and the directors present at the meeting shall sign the minutes of the meeting.

All directors have full and timely access to all relevant information about the meeting matters, and can seek independent professional advice and services from the Company secretary and senior management. After making a reasonable request to the Board, any director may, where appropriate, request independent professional advice at the expense of the Company.

During the year, the Board held six meetings on March 25, 2022, April 15, 2022, April 28, 2022, July 22, 2022, August 29, 2022 and October 27, 2022, respectively.

Directors' Training and Professional Development

During the year, all directors have received directors' training in writing or by attending lectures. The Directors' training is mainly about (i) anti-corruption training; (ii) special training for Corporate Governance organized by the Listed Companies Association of China; (iii) 2022 Listed Companies Regulatory Work Conference in Beijing organised

by Beijing Securities Regulatory Bureau and (iv) continuous supervision training for 2021 by Orient Securities Investment Banking Co., Ltd.

Directors keep receiving the latest news on the development of statutory and regulatory systems and business conditions, prompting them to perform their duties. The Company also arranges training for directors when necessary to ensure that the directors have a proper understanding of the Group's business and operations, and fully understand the duties and obligations of directors under the Listing Rules and relevant statutory requirements.

The personal training records received by the directors during the year are summarized as follows:

Model Code for Securities Transactions by Directors and Supervisors

The Company has adopted the Model Code for Securities Transactions by Directors of Listed Issuers (the "Model Code") set out in Appendix 10 to the Listing Rules of the Stock Exchange as the Company's code of conduct for directors and supervisors in securities transactions. After making specific inquiries to all directors and supervisors, the directors and supervisors each confirmed that they have complied with the required rules set out in the Model Code during the Related Period.

Pursuant to Code B.13 of the Model Code, directors have also requested that any employee of the Company or director or employee of a subsidiary of the Company who may obtain inside information about the securities of the Company as a result of serving or being employed by the Company or a subsidiary shall not trade in securities of the Company as prohibited by the Model Code (just as a director).

Special Board Committees

Pursuant to the CG Code, the Board has established four special committees including the Strategy Committee, the Audit Committee, the Nomination Committee and the Remuneration and Appraisal Committee, and has granted these special committees with their respective responsibilities. The composition, main duties and work of these special committees during the year are set out below:

Strategy Committee

From January 1, 2022 to September 22, 2022, the second session of the Strategy Committee consist of Dr. LOU Boliang (chairman and executive Director), Mr. LOU Xiaoqiang (executive Director), Mr. CHEN Pingjin (non-executive Director), Mr. LI Jiaqing (non-executive Director) and Mr. DAI Lixin (independent non-executive Director). From September 23, 2022 to the date of this annual report, the second session of the Strategy Committee consist of Dr. LOU Boliang (chairman and executive Director), Mr. LOU Xiaoqiang (executive Director), Mr. CHEN Pingjin (non-executive Director), Mr. LI Jiaqing (non-executive Director) and Mr. ZHOU Qilin (independent non-executive Director) with Dr. LOU being the chairman of the Strategy Committee. The main duties of the Strategy Committee include but are not limited to:

The main duties of the Strategy Committee are to review the Company's long-term development strategy and major investment decisions and to make recommendations on such matters. Details are as follows: (i) researching and recommending on long-term development strategy of our Company; (ii) researching and recommending on significant capital expenditure, investment and financing projects of our Company; (iii) researching and recommending on major capital operation (including but not limited to the increase or reduction of registered share capital, issuance of bonds, subsidiary merger, separation, dissolution or change of company form, profit distribution plan and make up for losses program), asset management project, and annual financial budget plan of our Company; (iv) researching and recommending on significant matters relating to the development of our Company; (v) monitoring the above matters and assessing, examining and recommending on significant changes; and (vi) performing such other duties determined by the Board and stipulated in the listing rules or regulatory rules of the place where the shares of our Company are listed.

During the year, the Strategy Committee held two meetings where the following matters were considered:

- (1) The fourth meeting of the Strategic Committee of the second session of the Board was held on March 25, 2022 to consider and approve the Resolution on the 2021 Environmental, Social and Corporate Governance Report of the Company.
- (2) The fifth meeting of the second session of Strategic Committee of the Board was held on October 27, 2022 to consider and approve the Resolution on the Setting Science Based Target of Carbon emission and its corresponding working plan.

Audit Committee

From January 1, 2022 to September 22, 2022, the Audit Committee of the second session of the Board consists of Mr. YU Jian (chairman), Ms. CHEN Guoqin and Mr. TSANG Kwan Hung Benson. From September 23, 2022 to the date of this annual report, the Audit Committee of the second session

of the Board consists of Mr. YU Jian (chairman), Ms. LI Lihua and Mr. TSANG Kwan Hung Benson. All members of the Audit Committee are independent non-executive Directors.

The Audit Committee is mainly responsible for reviewing and supervising the Company's financial reports and audit work, including: (i) proposing to engage or replace its external auditor and supervising and evaluating the work of the external auditor; (ii) directing internal audit work and supervising the establishment, improvement and implementation of the Company's internal audit system; (iii) coordinating the communication between the management, internal auditor and external auditor; (iv) reviewing the Company's financial information and its disclosure and expressing opinions; (v) assessing the effectiveness of internal controls and supervising financial reporting systems, risk management, and monitoring systems, reviewing the Company's internal control system, and auditing and supervising major connected transactions; and (vi) other duties as conferred by the Board and other matters stipulated in related laws and regulations. The Audit Committee held six meetings during the year. The Audit Committee considered the following matters:

(1) The tenth meeting of the Audit Committee of the second session of the Board was held on March 25 2022 to consider and approve Proposal on the 2021 Audit Report on Internal Control of the Company, the Proposal on the 2021 Work Report of the Internal Control and Internal Audit Department and the Report on the Inspection of Material Matters of the Company for the Second Half of 2021, the Proposal on the 2021 Final Financial Report, the Proposal on the Full Text and Summary of the 2021 Annual Report and the 2021 Annual Results Announcement of the Company, the Proposal on the 2021 Profit Distribution and Capitalization Issue Plan, the Proposal on the Appointment of Domestic Financial and Internal Control Auditor of the Company for 2022, the Proposal on the Appointment of Overseas Accounting Firm for 2022, the Proposal on the Special Audit Statement on the Occupation of Funds by the Controlling Shareholder and Other Related Parties of the Company, the Proposal on the Confirmation of Ordinary

Related Party Transactions for 2021, the Proposal on the Confirmation of the Hedging Product Transaction for 2021 and Estimating Hedging Product Transaction Quota in 2022, the Proposal in relation to the Acquisition of 100% Equity Interest in Domestic Company and Related Party Transaction, the Proposal in relation to the Provision of Financial Assistance by the Company for Staff House Purchase, the Proposal in relation to the Confirmation of Connected Legal Persons, Connected Natural Persons and Connected Persons of the Company, the Proposal in relation to the Review of the Company's Compliance with the Corporate Governance Code and the Proposal in relation to the Summary of Audit Work for 2021.

- (2) The eleventh meeting of the Audit Committee of the second session of the Board was held on April 28, 2022 to consider and approve the Proposal on 2022 First Quarterly Report of the Company and Proposal on Report on Internal Control and Internal Audit.
- (3) The twelfth meeting of the Audit Committee of the second session of the Board was held on July 28 2022 to consider and approve the Proposal on the signing of the revised limited partnership agreement in relation to the investment in Ningbo Kangjun Zhongyuan Equity Investment Partnership (Limited Partnership).
- (4) The thirteenth meeting of the Audit Committee of the second session of the Board was held on August 29 2022 to consider and approve the Proposal on the Work Report on the First Half of 2022 of the Internal Control and Internal Audit Department and on the Inspection Report on Material Matters, Proposal on the Full Text and Summary of the Semi-annual Report and 2022 Interim Results Announcement and Proposal on Confirmation of Connected Legal Persons, Connected Natural Persons and Connected Persons of the Company.
- (5) The fourteenth meeting of the Audit Committee of the second session of the Board was held on October 27 2022 to consider and approve the Proposal on the Work Report of Internal Control

Department, Proposal on the 2022 Third Quarterly Report of the Company and Proposal on the Acquisition of Certain Equity Interests in and Increase of Capital in Controlling Subsidiaries and Connected Transactions.

- (6) The fifteenth meeting of the Audit Committee of the second session of the Board was held on December 23 2022 to consider and approve the Proposal on the 2022 Audit Plan.

The Audit Committee has reviewed and confirmed the audited consolidated financial statements set out in this annual report, and discussed with the management on the Company's financial statements and internal controls. The Audit Committee is of the opinion that the preparation of these financial statements complies with applicable accounting standards and regulations and has made appropriate disclosures.

The Audit Committee is also aware of the Group's existing risk management and internal control systems, and is aware that these systems will be reviewed annually.

Nomination Committee

From January 1, 2022 to September 22, 2022, the Nomination Committee of the second session of the Board consists of Ms. CHEN Guoqin (chairperson), Dr. LOU Boliang, Ms. ZHENG Bei, Mr. YU Jian and Mr. TSANG Kwan Hung Benson. From September 22, 2022 to the date of this annual report, the Audit Committee of the second session of the Board consists of Ms. LI Lihua (chairperson), Dr. LOU Boliang, Ms. ZHENG Bei, Mr. YU Jian and Mr. TSANG Kwan Hung Benson. Among them, independent non-executive Directors serve as the chairperson and make up the majority.

The main duties of the Nomination Committee are as follows: (i) reviewing at least once a year the structure, number and composition of the Board (including skills, knowledge and experience), and making recommendations on any changes to the Board in line with the Company's strategy; (ii) making recommendations to the Board on the size and composition of the Board based on the Company's operating activities, assets scale and shareholding structure; (iii) studying the selection criteria and procedures of directors and senior management and making recommendations to the Board; (iv) extensively searching for qualified candidates as directors and senior management, identifying qualified candidates

as directors and providing advice to the Board on the nomination of candidates; (v) reviewing and making recommendations on candidates as directors and senior management; (vi) evaluating the independence of independent non-executive Directors; (vii) making recommendations to the Board on the appointment or re-appointment of directors and the succession plan of directors (especially the chairman and chief executive officer); and (viii) other duties as conferred by the Board.

The procedures for the appointment, re-election and removal of directors are set out in the Articles of Association. The Nomination Committee will identify individuals suitably qualified to become directors and make recommendations to the Board on the selection of individuals. The Nomination Committee will determine the composition of board members based on a range of diversity perspectives, including but not limited to gender, age, cultural and educational background, ethnicity, professional experience, skills, knowledge and length of service. The Nomination Committee will also make recommendations to the Board of Directors on the appointment or reappointment of directors and succession planning for directors (in particular the Chairman of the Board of Directors), taking into account the Company's corporate strategy and mix of skills, knowledge, experience and diversity needed in the future.

During the year, the Nomination Committee held two meetings. The Nomination Committee considered the following matters:

- (1) The second meeting of the Nomination Committee of the second session of the Board was held on March 25, 2022, and considered and approved the Resolution on evaluating the independence of independent non-executive Directors.
- (2) The third meeting of the Nomination Committee of the second session of the Board was held on August 29 2022, and considered and approved the Resolution on nomination and by-election of independent non-executive directors of the second session of the Board.

Remuneration and Appraisal Committee

From January 1 to September 22, 2022, the Remuneration and Appraisal Committee of the second session of Board consists of Ms. CHEN Guoqin (chairperson), Dr. LOU Boliang, Mr. LOU

Xiaoqiang, Mr. TSANG Kwan Hung Benson and Mr. YU Jian. From September 23, 2022 to the date of this annual report, the Remuneration and Appraisal Committee of the second session of Board consists of Ms. LI Lihua (chairperson), Dr. LOU Boliang, Mr. LOU Xiaoqiang, Mr. TSANG Kwan Hung Benson and Mr. YU Jian. As at the date of this annual report, the Remuneration and Appraisal Committee of the second session of Board consists of Ms. Lihua LI (chairperson), Dr. LOU Boliang, Mr. LOU Xiaoqiang, Mr. TSANG Kwan Hung Benson and Mr. YU Jian. Among them, independent non-executive Directors serve as the chairman and make up the majority.

The main duties of the Remuneration and Appraisal Committee are as follows: (i) making recommendations to the Board on the Company's policy and structure for all directors' and senior management remuneration and on the establishment of a formal and transparent procedure for developing remuneration policy; (ii) formulating remuneration plans or schemes (remuneration plans or schemes mainly include but are not limited to performance evaluation standards, procedures and the major evaluation system, and main schemes and systems for rewards and penalties, etc.), based on the main scope, responsibilities, importance of management positions of directors and senior management personnel, and the corporate policies and goals set by the Board, and reviewing and approving management's remuneration proposal; (iii) evaluating the remuneration level of the Company's senior management based on the industry's remuneration level provided by the market; (iv) recommending to the Board the remuneration of individual executive directors and senior management personnel, including non-pecuniary benefits, pension rights and compensation amounts (including compensation for loss or termination of office or appointment); (v) making recommendations to the Board on the remuneration of non-executive Directors; (vi) considering the remuneration paid by similar companies, the time and responsibilities required, and the conditions of employment for other positions within the Company; (vii) reviewing and approving compensation to executive Directors and senior management for their loss or termination of their positions or appointments to ensure that such compensation is consistent with the terms of the contract and is otherwise fair and reasonable; (viii) reviewing and approving compensation arrangements relating to dismissal or removal of directors for misconduct to ensure that they are consistent with contractual terms and are otherwise reasonable and appropriate; (ix) ensuring that no director or any of his/her associates can participate in determining his/her own remuneration; (x) reviewing the performance of the Company's

directors and senior management personnel, conducting annual performance reviews, and issuing a special report to the Board; and (xi) other duties as conferred by the Board.

The procedures for the appointment, re-election and removal of directors are set out in the Articles of Association. The Nomination Committee will identify individuals suitably qualified to become directors and make recommendations to the Board on the selection of individuals. The Nomination Committee will determine the composition of board members based on a range of diversity perspectives, including but not limited to gender, age, cultural and educational background, ethnicity, professional experience, skills, knowledge and length of service. The Nomination Committee will also make recommendations to the Board of Directors on the appointment or reappointment of directors and succession planning for directors (in particular the Chairman of the Board of Directors), taking into account the Company's corporate strategy and mix of skills, knowledge, experience and diversity needed in the future.

During the year, the Remuneration and Appraisal Committee held two meetings. In the two meetings, the following matters were considered:

- (1) The sixth meeting of the Remuneration and Appraisal Committee of the second session of the Board was held on March 25, 2022, and considered and approved the Resolution on the Remuneration Program of the Company's Directors, Resolution on the Remuneration Program of the Company's Senior Management, and Resolution on the Performance Evaluation of the Company's Senior Management, the Resolution on the 2022 Restricted A Shares Incentive Plan for 2022 (Draft) of Pharmaron Beijing Co., Ltd. and its Abstract, Resolution on Deliberating the Measures for Management of the 2022 Restricted A Shares Incentive Plan for 2022 of Pharmaron Beijing Co., Ltd., and Resolution on Verifying the List of Incentive Targets Granted by the Company's 2022 Restricted A Shares Incentive Plan for 2022 of Pharmaron Beijing Co., Ltd..
- (2) The seventh meeting of the Remuneration and Appraisal Committee of the second session of the Board was held on July 28, 2022, and considered and approved the Resolution on Fulfilment of Conditions for Vesting within the First Vesting Period and Temporary Non-listing under the 2021 Restricted A Shares Incentive Plan for 2021 of Pharmaron Beijing Co., Ltd..

REMUNERATION OF DIRECTORS, SUPERVISORS, AND SENIOR MANAGEMENT

Pursuant to Code Provision E.1.5 of Part 2 of the CG Code, the annual remuneration of the senior management (including Directors and Supervisors) of the Company by band for the year ended December 31, 2022 is set out below:

Remuneration Band (HKD)	Number of Individuals
0–1,000,000	12
2,000,001–2,500,000	6
2,500,001 above	0

DIRECTOR NOMINATION POLICY

According to the Articles of Association, the methods and procedures to nominate directors are as follows: (i) the candidates for Directors (excluding independent Directors) of the Board shall be nominated by the Board or shareholder(s) severally or jointly holding more than 3% of the total number of the voting shares of the Company, and shall be elected at a general meeting of the Company; (ii) the candidates for independent Directors shall be nominated in such a way and procedure as specified by laws, administrative regulations, departmental rules, listing rules of the stock exchange where the Company's shares are listed or the Articles of Association; and (iii) the written notice on the intention for nominating candidates for Directors and candidates' willingness to accept the nominations shall be sent to the Company no earlier than the issue date of the notice of the general meeting and no later than the 7th day prior to the convention of the general meeting. The Company shall give relevant nominees and candidates for Directors at least seven days to submit the aforesaid notice and document (this period is calculated from the day after the issue date of the notice of the general meeting). The candidates for Directors who accept the nominations shall promise that the information publicly disclosed about them is true and complete, and that they will diligently fulfill the duties as Directors if elected.

According to the Terms of Reference of the Nomination Committee of the Board, the procedures for electing and appointing Directors and senior management are as follows: (i) the Nomination Committee shall proactively communicate with relevant departments of the Company to understand the demand for new Directors and senior management and work out written reports; (ii) the Nomination Committee may extensively seek for candidates for Directors and senior management within the Company, the Company's subsidiaries/ associated corporations/joint ventures as well as in the recruitment market; (iii) to collect the information on occupation, education background, job title, detailed work experience and all concurrent positions of the proposed candidates, and work out written reports; (iv) to seek the consent of the proposed candidates for nomination; otherwise, they shall not be put on the list of candidates for Directors and senior management; (v) to convene the meeting of the Nomination Committee, and check the eligibility according to the qualifications required for Directors and senior management; (vi) to submit the recommendation and relevant materials about the candidates for Directors and senior management to the Board one or two months prior to the election of new Directors and the appointment of new senior management members; and (vii) to follow up other matters according to decisions and feedback of the Board.

REMUNERATION POLICY

The Company endeavors to improve the measures for managing the remuneration of Directors, Supervisors, and senior management. The remuneration system for the Company's Directors, Supervisors, and senior management adheres to the principle of unifying incentives and constraints in combination with market regulation.

Directors receive remunerations in different forms, including salaries and subsidies.

During the year, no remuneration was paid to, or receivable by, our Directors, Supervisors or any of the five highest paid individuals as an inducement to join or upon joining our Company or as a compensation for loss of office. Further, none of the Directors, Supervisors or the five highest paid individuals has waived or agreed to waive any remuneration arrangements.

The Company establishes a remuneration management system that matches its strategies, and attracts and retains talents who satisfy the requirements, to enhance its competitiveness and the motivation of employees. The remuneration of employees mainly consists of the basic salary, post salary, welfare benefit, and monthly (topic)/quarterly/year-end bonus. Based on the formulation and decomposition of annual operating targets, the Company establishes an objective assessment system and specifies efficiency indicators for each department. Under the system, the monthly (topic)/quarterly/year-end bonus is determined based on the Company's monthly, quarterly, and annual operating benefits and the completion of indicators by each department.

DIVIDEND POLICY

Pursuant to the Articles of Association, the Board may declare dividends in the future after taking into account the Company's results of operations, financial condition, cash requirements and availability, and other factors as it may deem relevant at such time. Although the calculation of the Company's net profit and undistributed profit is in accordance with PRC GAAP, which may differ from the numbers calculated under IAS, the Company does not expect such difference to be

material and to have any substantive impact on its dividend policy. Any declaration and payment as well as the amount of dividends will be subject to the Company's Articles of Association, applicable PRC laws, and approval by the Company's Shareholders. Under the Articles of Association, when the Company makes a profit in the current year and the accumulated undistributed profit is positive, the Company shall give priority to the distribution of cash dividends provided that there is no material capital expenditure or investment in the next 12 months. The total amount of the cash dividends distributed shall be at least 20% of the total dividends in the same distribution.

SUPERVISORY COMMITTEE

As at the date of this annual report, the Supervisory Committee consists of three members, two of whom are elected by shareholders and one by employees. The term of office of Supervisors is three years, and Supervisors can be re-elected upon the expiration of the term of office.

According to the Articles of Association, the Supervisory Committee convenes one meeting at least every six months. The Chairman of the Supervisory Committee is responsible for convening the meeting.

As at the date of this annual report, the Supervisory Committee consists of the following members:

Dr. YANG Kexin
Ms. FENG Shu
Ms. ZHANG Lan

The list and biographies of the Supervisors of the Company are set out in section headed "Profile of Directors, Supervisors, and Senior Management" of this annual report. Save as disclosed herein, there are no other significant relationships among the members of the Supervisory Committee.

The Supervisory Committee shall be accountable to the general meeting and the Supervisory Committee shall perform the following duties: (i) to review the Company's reports prepared by the Board and to provide comments in writing; (ii) to review the Company's financial condition; (iii) to examine the financial information such as the financial reports, business reports, and plans for distribution of profit to be submitted by the Board to the general meetings, to engage certified public accountants or practicing auditors in the name of the Company to assist in the review whenever queries arise; (iv) to supervise the conducts of the Directors and senior management in discharge of their duties and to advise on the dismissal of any Director and senior management who are in breach of laws, administrative regulations, the Articles of Association, or resolutions of the general meetings; (v) to demand rectification from the Directors and senior management of the Company where their conducts are detrimental to the interests of the Company; (vi) to propose to convene an extraordinary general meeting, and to convene and preside over the general meeting where the Board fails to perform its duties to convene or preside over a general meeting as required under the Company Law; (vii) to propose motions at a general meeting; (viii) to take legal actions against Directors and senior management in accordance with Article 151 of the Company Law; (ix) to conduct investigations whenever queries or unusual conditions in the operation of the Company arise and, if necessary, to engage professional institutions such as accounting firms and law firms to assist in their work with expenses to be borne by the Company; and (x) other duties as stipulated by the Articles of Association.

As at the date of this annual report, the Supervisory Committee convened a total of six meetings.

COMPANY SECRETARY

Ms. MAK Po Man Cherie ("Ms. MAK") has acted as the secretary of the Company since August 28, 2019.

Ms. MAK is the Vice President of SWCS Corporate Services Group (Hong Kong) Limited and is responsible for advising the Board on corporate governance and ensure compliance with the Board's policies and procedures, applicable laws, and rules and regulations. Ms. MAK confirms that she received no less than 15 hours of professional trainings in accordance with Rule 3.29 of the Hong Kong Listing Rules during the year.

The main contact person of Ms. MAK in the Company is Mr. LI Shing Chung Gilbert, the chief financial officer and secretary of the Board.

FINANCIAL REPORTING

The Board is accountable to the Shareholders and is committed to presenting comprehensive and timely information to the Shareholders on assessment of the Company's performance, financial position, and prospects.

The responsibility of Ernst & Young, as the Company's external auditor to the Financial Statements, is set out in section headed "Independent Auditor's Report" of this annual report.

RESPONSIBILITIES OF DIRECTORS CONCERNING FINANCIAL STATEMENTS

All Directors of the Company had committed their responsibilities for the preparation of the financial statements of the Company for the year ended December 31, 2022.

The Board was not aware of any material uncertainties relating to events or conditions that might cast significant doubt upon the Group's ability to continue as a going concern and the Board prepared the financial statements on a going concern basis.

AUDITORS' REMUNERATION

The Company engaged Ernst & Young and Ernst & Young Hua Ming LLP as its international auditor and domestic auditor respectively. For the year ended December 31, 2022, the details of the remuneration payable by the Company to the auditors for the audit services and non-audit services were as follows:

Services	Remuneration (RMB' 000)
Audit services	5,480.0
Non-audit services (Note)	4,860.0
Total	10,340.0

Note: Non-audit services comprise Due Diligence services, taxation services rendered by the auditors.

INTERNAL CONTROL AND RISK MANAGEMENT

The Board is fully responsible for evaluating and determining the nature and extent of the risks that the Company is willing to take in achieving its strategic objectives. The Board is also responsible for strengthening and standardizing the Company's internal management, enhancing the Company's self-discipline, realizing corporate governance goals, and improving the quality of information disclosure, managerial and administrative expertise, and capabilities of forestalling and defusing various risks, to push forward the Company's standardized operations and sustainable development. According to the Company Law of the People's Republic of China, Securities Law of the People's Republic of China, Accounting Law of the People's Republic of China, Audit Law of the People's Republic of China, Audit Regulations of the People's Republic of China, No. 2 Self-Regulatory Guidelines of Shenzhen Stock Exchange for Listed Companies – the Guidelines of the Shenzhen Stock Exchange for the Standardized Operation of Companies Listed on the ChiNext Board, Rules Governing the Listing of Stocks on Stock Exchanges, Basic Standard for Enterprise Internal Control, CG Code in Appendix 14 of the Hong Kong Listing Rules, and other laws and regulations and the Articles and Association, and in light of the actual management needs of the Company, the Company has formulated and adopted the Risk Management System, Early Warning System for Major Risks and Emergency Response System, Internal Control Management System, and Internal Audit Management System.

The Company's risk management system is designed to improve the risk prevention capabilities, enhance competitiveness, and advance the sustainable and healthy development of the Company. The internal audit system is intended to improve the quality and efficiency of internal audit, perfect the Company's mechanisms for supervision and risk control, and step up the Company's self-improvement and development. To strengthen the Company's management of major risks and emergencies, the mechanism for early warning and emergency response has been established to minimize losses, maintain the Company's normal operating order, and protect the legitimate interests of investors. The systems aim at managing rather eliminating the risk of failure to achieve business objectives and providing reasonable assurance of no material misstatement or loss.

FUNCTIONAL STRUCTURE OF RISK MANAGEMENT AND INTERNAL CONTROL

The Company implements hierarchical risk management. The Company's organizational system for comprehensive risk management includes: the Board, the Audit Committee and the Internal Control and Internal Audit Department, the general manager office, the Risk Management Working Group, and branches and subsidiaries of other functional departments. Branches and subsidiaries may establish an organizational system for risk management in light of the actual situation.

Being the Company's highest leading body in charge of comprehensive risk management, the Board is responsible for the effectiveness of comprehensive risk management. The Directors are also responsible for establishing, improving, and earnestly implementing the internal control system and evaluating the effectiveness of the system. The Board acknowledges its responsibility for the Company's risk management and internal control systems, and is responsible for reviewing the effectiveness of such systems.

The Audit Committee and the Internal Control and Internal Audit Department are mainly responsible for studying and proposing a supervision and evaluation system for comprehensive risk management, establishing systems relating to supervision and evaluation, conducting supervision and evaluation, and issuing supervision and evaluation reports. The general manager office is the executive bodies of the Company in charge of risk management. The internal auditors of the Internal Control and Internal Audit Department implements the internal audit function of the Company and reports directly to the Audit Committee. The Audit Committee and the internal auditors are also responsible for supervising the establishment and implementation of the Company's internal control.

The Risk Management Working Group, whose members are mainly from the Company's main business and functional areas, is the leading organization of the Company in charge of risk management. It is responsible for planning, advancing, organizing, coordinating, and supervising the risk management of various departments/enterprises. The various departments/enterprises of the Company are the executive bodies of the Company in charge of specific risk management.

The internal control staff of the Internal Control and Internal Audit Department is responsible for leading and organizing each department/branch and subsidiary to identify internal control problems, urge efforts to do resolve the problems, and continuously optimize the Company's internal control system.

The internal auditors of the Company shall supervise and evaluate the risk management carried out by the Company and the effects of the risk management at least once a year, and the supervision and evaluation reports shall be directly submitted to the Board or the Audit Committee. In addition, the Company checks its internal control voluntarily on a regular basis every year, and the internal auditors evaluate the implementation effects of the internal control. Major matters, including the Company's acquisition and sale of assets, connected transactions, engaging in derivative transactions, providing financial assistance, providing guarantee for others, using proceeds, and entrusting wealth management, are necessary items for the plan of inspection and supervision of internal control. They also provide convenience for the Board to make judgments on the effectiveness of the Company's monitoring and risk management.

The general manager office and the various departments/enterprises of the Company are the executive bodies of risk management and risk control. They are responsible for collecting, analyzing, and feeding back problems detected in risk management and informing the Risk Management Working Group of the problems in time.

SPECIFIC PROCEDURES FOR IDENTIFYING, EVALUATING, AND MANAGING MAJOR RISKS

1. Risk identification

Risk identification refers to the process of identifying possible risks in the Company's enterprises, various important business activities, and important business processes and the types of the risks.

2. Risk analysis

Risk analysis refers to the clear definition and description of the risks identified and their characteristics as well as the analysis and description of the likelihood and conditions of risks. By using a combination of qualitative and quantitative methods, the Company analyzes and ranks the risks identified based on the likelihood and impact of the risks, and determines key risks to be controlled in priority.

3. Risk evaluation

Risk evaluation refers to the evaluation of the impact of risks on the Company's attainment of goals, the value of risks, and so on.

4. Risk response

The Company shall implement dynamic management of the information about risks and conducts risk identification, analysis, and evaluation on a regular or irregular basis, to reevaluate new risks and changes in existing risks.

5. Risk management strategy

The Company's Risk Management Working Group calls on relevant departments to weigh risks and returns and determine risk response strategies based on the results of risk evaluation and in combination with risk tolerance. Through a reasonable analysis of risks, the Company will know exactly the risk preferences of Directors, managers and other senior management personnel, and employees in key positions. Accordingly, the Company will take appropriate control measures to avoid significant losses to its operations due to personal risk preferences. The Company shall use a combination of countermeasures of risks such as risk aversion, risk reduction, risk sharing, and risk tolerance to achieve effective control of risks.

6. Risk monitoring and improvement

The Company shall establish a channel for communicating risk management information, which runs through the entire risk management process and links superiors and subordinates, departments, and business units, to ensure timely, accurate, and complete information communication, thus laying a foundation for the supervision and improvement of risk management. Relevant departments and enterprises of the Company shall conduct self-inspection and inspection of risk management on a regular basis to detect and fix defects in a timely manner. The self-inspection and inspection can be carried out together with internal control inspection.

PROCESSING AND PUBLISHING INSIDE INFORMATION

The Company has formulated and adopted the Information Disclosure Regulations concerning the procedures for handling and publishing inside information and internal control, to promote the Company's standardized operations, regulate information disclosure behavior, strengthen information disclosure management, ensure the truthfulness, accuracy, completeness, timeliness, and fairness of information disclosure, and protect the legitimate rights and interests of the Company and its investors. The Company is aware of its responsibilities under the Securities and Futures Ordinance and the Hong Kong Listing Rules, the most important principle of which is that if the Company determines relevant information as inside information, it shall publish the information as soon as reasonably practicable while paying close attention to applicable laws and regulations when handling the information.

REGULATIONS FOR EVALUATION AND MANAGEMENT OF INTERNAL CONTROL

The Company has formulated the Regulations for Evaluation and Management of Internal Control according to the Company Law of the People's Republic of China, Rules Governing the Listing of Stocks on the Shenzhen Stock Exchanges, the Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited, Basic Standard for Enterprise Internal Control, Practice Note on the Evaluation of Internal Control of Enterprises, and other laws and regulations and normative documents and in line with the Company's actual circumstances. This aims to standardize the evaluation of Company's internal control, detect defects in internal control in a timely manner, and propose and implement improvement plans, thus ensuring the effective operation of internal control. The evaluation of internal control described in the regulations refers to the process implemented by the Board and management of the Company to comprehensively evaluate the effectiveness of the Company's internal control, draw an evaluation conclusion, and issue an evaluation report. The effectiveness of internal control refers to the reasonable guarantee provided through the establishment and implementation of internal control for the realization of control objectives.

ANNUAL REVIEW

On March 30, 2023, the twenty-fourth meeting of the second session of the Board of Directors reviewed the risk management and internal control during the year. The results of the internal control, internal audit, and risk management during the year showed the following highlights:

- (1) According to the identification of significant defects in internal control over financial reporting of the Company, the Company did not have any significant defect in internal control over financial reporting as at the base date of internal control evaluation report. The Company has maintained, in all material respects, effective internal control over financial reporting in accordance with the requirements of the internal control standard and system and related regulations.
- (2) According to the identification of significant defects in internal control over non-financial reporting of the Company, no significant defects in internal control over non-financial reporting were found as at the base date of internal control evaluation report.
- (3) From the base date of internal control evaluation report to the issuing date of the internal control evaluation report, factors affecting the conclusion of internal control effectiveness evaluation did not occur.

The Board believes that the Company is free from significant risk monitoring errors and major risk. The Company has strictly complied with the provisions on risk management and internal control in the CG Code and the Board evaluates that the Company's risk management and internal control systems are effective and adequate.

AMENDMENTS TO THE ARTICLES OF ASSOCIATION

During the Reporting Period, due to the increase in the total share capital and registered capital of the Company as a result of the completion of the implementation of the 2021 profit distribution plan, and the receipt of suggestions from the Market Supervision and Administration Bureau, the Beijing Securities Regulatory Bureau and other authorities on the amendments and improvements to certain articles of the Articles of Association, the Company amended and improved the Articles of Association in accordance with the requirements of relevant laws and regulations and based on the actual situation of the Company. The Company considered and approved the revised Articles of Association at the EGM held on September 23 2022, and an up to date version of the Company's Articles of Association is available on the websites of the Company and the Hong Kong Stock Exchange.

SHAREHOLDERS' RIGHTS

To safeguard shareholder interests and rights, separate resolutions shall be proposed for each substantially separate issue at general meetings, including the election of individual Directors. All resolutions put forward at general meetings will be voted on by poll pursuant to the Listing Rules and poll results will be posted on the websites of the Company and of the Stock Exchange after each general meeting.

PROCEDURES FOR SHAREHOLDERS TO CONVENE AN EXTRAORDINARY GENERAL MEETING

According to the Articles of Association, shareholder(s) individually or jointly holding a total of 10% or more of the shares carrying the right to vote at the meeting sought to be held may sign one or more written requests of identical form and substance requesting the Board to convene an extraordinary general meeting or a class meeting and stating the subject of the meeting. The aforesaid number of shares shall be calculated in accordance with the shares held on the day on which the written request is made by the shareholders. The Board shall, in accordance with the provisions of laws, administrative regulations, listing rules of the stock exchange where the Company's shares are listed, and the Articles of Association, submit a written feedback on approval or disapproval of the convening of an extraordinary general meeting or class meeting within ten days after receiving the above-mentioned written request.

PROCEDURES FOR MAKING ENQUIRIES TO THE BOARD

The Shareholders' communication policy of the Company aims to maintain transparency and provide timely information of the major development of the Group to Shareholders and investors. General meetings of the Company are formal channels for communication between Shareholders and the Board. The members of the Board will make themselves available at the general meetings to have direct communication with the Shareholders.

Shareholders may also send their enquiries and concerns to the Board by addressing them to the Board office of the Company at the following address:

Address: 6 Tai-He Road, Economic Technological Development Area, Beijing, the PRC
 Postal code: 100176
 Tel: 86 010-57330087
 Fax: 86 010-57330087

PROCEDURE FOR SUBMITTING PROPOSALS AT GENERAL MEETINGS

According to the Articles of Association, if the Company plans to convene a general meeting, the shareholders holding more than 3% of the shares of the Company separately or jointly may raise a temporary proposal and submit it to the convener in writing ten days before the general meeting is convened. The convener shall, within two days after the receipt of the proposal, issue a supplementary notice to inform the general meeting of the contents of the temporary proposal. The proposal contents shall fall into the terms of reference of the general meeting. There shall be definite topics and specific matters for resolution. The proposal shall comply with the relevant provisions of laws, administrative regulations, listing rules of the stock exchange where the Company's shares are listed, and the Articles of Association.

COMMUNICATION WITH INVESTORS AND INVESTOR RELATIONSHIP

The Board values the investor relation management, complies with the relevant requirements of Securities Law, Articles of Association, the Rules Governing the Meeting of the Board and regulates the operation. The Board has established Information Disclosure Management, Investor Relation Management System, and other regulatory systems to standardize and optimize the investor relation management.

During the Reporting Period, the Board of Directors made timely, truthful, accurate and complete information disclosure and received an "A" rating in the information disclosure assessment by Shenzhen Stock Exchange, which helps the Company establish a good corporate image. While earnestly performing statutory information disclosure obligations, the Company launched investor relation activities in various forms to provide investors with information which they were interested in, to promote the transparency of the Company's corporate operation, and to build mutual understanding and trust. Meanwhile, the Company absorbed advice provided by investors in the course of information delivery and collected feedback from investors to boost benign interactions between the Company and investors.

In investor relation activities, the secretary to the Board and the securities department of the Company were responsible for investor relation management. Work assumed by them included: answering telephone calls through investor hotlines in time; answering online questions raised by investors on the EasyIR platform of the Shenzhen Stock Exchange; holding online illustration meetings on the Company's performance and answering questions raised by investors; receiving delegations of investors and securities analysis agencies; participating in investor promotion activities; and providing particulars about the Company, information disclosure, and corporate governance through the website of the Company (<http://www.pharmaron.com>), the website of CNINFO (<http://www.cninfo.com.cn>), and the website of the Hong Kong Stock Exchange (<https://www.hkex.com.hk/>). In 2022, the Company held 8 research events and received nearly 2,400 institutional investors and individual investors, facilitating communication between domestic and foreign investors and the Company.

In 2023, the Company will continue strengthening investor relation management in Shenzhen and Hong Kong. The Board will urge relevant departments and personnel to manage investor relations based on the needs of investors, and strengthen contact and communication with investors through various channels, such as non-deal road shows, results presentation, hotline and emails for investors, investor interaction platforms, field research and online briefings. This will help investors deepen their understanding and recognition of the Company and promote long-term, stable and good interaction between the Company and investors. The Board will make appropriate arrangements for reception of target audience, such as institutional investors and news media, to visit the Company for on-site discussion and survey, and for maintaining properly the confidentiality of undisclosed information. The Company will renew efforts to strengthen the protection of legitimate rights and interests of investors in strict accordance with the relevant provisions of the Securities Law on investor protection. The Company will communicate with investors through online and offline channels such as the publicity and education on investor rights protection, hotlines and online platforms. While popularizing risk knowledge to investors to raise

their awareness of risk prevention, the Company will answer questions from investors and treat all domestic and foreign investors fairly, openly and impartially, thereby ensuring the legal rights of investors and safeguarding their rights to suggestions and inquiries. In addition, the Company will continue improving its corporate governance and strive to improve its corporate governance mechanism, to secure the legitimate rights and interests of investors.

SHAREHOLDERS' COMMUNICATION POLICY

The Company considers that effective communication with shareholders is essential for enhancing investor relations and investor understanding of the Company's business performance and strategies. The Company has adopted a Shareholders' Communication Policy. The Board has reviewed the Shareholders' Communication Policy on March 25 2022 and the Board considers that the implementation of the Shareholders' Communication Policy is effective.

The Shareholders' Communication Policy includes the following:

The Company is committed to providing the shareholders of the Company and other stakeholders (including potential investors) with balanced and understandable information about the Company. The Board of the Company maintains an on-going dialog with shareholders and encourages them to communicate actively with the Company through telephone, mail and general meetings. Corporate Communications will be provided to shareholders and non-registered holders of securities of the Company in both English and Chinese versions (or where permitted, in a single language) in a timely manner in accordance with the requirements of the Hong Kong Listing Rules. Shareholders and non-registered holders of securities of the Company shall have the right to select the language version (s) (either Chinese or English) of the Corporate Communications or the means of receipt (in printed form or by electronic means) of the Corporate Communications. The Company regularly reviews the implementation and effectiveness of this policy annually to ensure its effectiveness.

The Board is pleased to present this annual report for the year 2022 and the audited consolidated financial statements of the Group for the year ended December 31, 2022.

PRINCIPAL ACTIVITIES

The Company is a leading fully-integrated pharmaceutical R&D services platform with global operations to accelerate drug innovation for our customers. The principal activity of the Group is to provide contract research, development and manufacturing services for innovative pharmaceutical products throughout the research and development cycle and the services are organised in four major categories: laboratory services, CMC (small molecule CDMO) services, clinical development services, and biologics and CGT services.

The activities and particulars of the Company's principal subsidiaries are shown under note 1 to the consolidated financial statements. An analysis of the Group's revenue and operating profit for the year by principal activities is set out in the section headed "Management Discussion and Analysis" in this annual report and note 4 and note 5 to the consolidated financial statements.

BUSINESS REVIEW

The description of principal risks and uncertainties that the Group may be facing, a fair review of the Group's business during the year, and the probable future business development of the Group are provided in the Corporate Governance Report and the Management Discussion and Analysis section on pages 56 to 76 and on pages 14 to 45 respectively of this annual report.

Also, the financial risk management objectives and policies of the Group can be found in note 50 to the consolidated financial statements. An analysis of the Group's performance during the year using financial key performance indicators is provided in the Financial Highlights on page 8 of this annual report. In addition, discussions on the relationships with its staff, customers and suppliers is also contained in the Environmental, Social and Governance Report of the Company dated April 28, 2023. Discussions on the Group's environmental policies and compliance with relevant laws and regulations which have a significant impact on the Group are contained in the Environmental, Social and Governance Report of the Company dated April 28, 2023.

ENVIRONMENTAL PROTECTION

The Group is subject to certain environmental laws and regulations in the PRC. The Group has established an environmental, safety and health department to ensure compliance with applicable legal requirements and internal standards regarding environmental protection. Our measures and procedures to ensure compliance with applicable legal requirements includes (i) adopting protective measures at our facilities, (ii) promulgating safety operation procedures relating to various aspects of our integrated services, such as the use and storage of chemicals and operation of equipment, (iii) conducting regular safety and compliance inspections of our facilities, and (iv) engaging professional waste-disposal companies to manage the disposal of hazardous and biohazardous waste.

To the best of the Group's knowledge, during the year ended December 31, 2022, the Group had complied with the applicable environment laws and regulations in the PRC in all material respects. Please refer to the Environmental, Social and Governance Report of the Company dated April 28, 2023 which was prepared in compliance with the provisions set out in the ESG Reporting Guide in Appendix 27 to the Listing Rules.

FINANCIAL SUMMARY

A summary of the published results, assets and liabilities of the Group's for the last five financial years is set out in the section headed "Financial Summary" in this annual report. This summary does not form part of the audited consolidated financial statements.

PROPERTY, PLANT AND EQUIPMENT

Details of the movements in the property, plant and equipment of the Group during the reporting period are set out in note 14 to the consolidated financial statements.

MAJOR CUSTOMERS AND SUPPLIERS

For the year ended December 31, 2022, the percentage of the major customers and suppliers in the Group's total sales and purchase are as follow:

	Percentage in the Group's total	
	Sales	Purchases
Largest customer	4.3%	–
Total of the five largest customers	13.0%	–
Largest supplier	–	2.2%
Total of the five largest suppliers	–	8.9%

None of the Directors or any of their close associates (as defined under the Listing Rules) or any shareholders of the Company (which, to the best knowledge of the Directors, owns more than 5% of the Company's issued share capital) has any beneficial interest in the Group's five largest suppliers or the Group's five largest customers.

USE OF PROCEEDS FROM THE GLOBAL OFFERING

Upon completion of the global offering of its H Shares (the "Global Offering"), the Company raised net proceeds of approximately RMB4,522.7 million. As at December 31, 2022, the net proceeds from the Global Offering had been fully utilized in accordance with the purposes set out in the prospectus of the Company dated November 14, 2019. The table below sets out the actual applications of the net proceeds up to December 31, 2022.

Use of proceeds	Percentage of allocation of net proceeds	Allocation of net proceeds (RMB million)	Utilized amount as at December 31, 2022 (RMB million)	Unutilized net proceeds as at December 31, 2022 (RMB million)	Expected timeline for utilizing the net proceeds from the Global Offering
Expand capacities and capabilities in laboratory and manufacturing facilities in the PRC	30.0%	1,356.8	1,356.8	-	Had been fully utilized by December 31, 2022
• upgrading and expanding our Ningbo facility	19.5%	881.9	881.9	-	Had been fully utilized by December 31, 2022
• upgrading and expanding our Tianjin facility	4.5%	203.5	203.5	-	Had been fully utilized by December 31, 2022
• upgrading and expanding other manufacturing facilities	6.0%	271.4	271.4	-	Had been fully utilized by December 31, 2022
Fund further expansion of businesses in the U.S. and U.K.	10.0%	452.3	452.3	-	Had been fully utilized by December 31, 2022
Establish pharmaceutical R&D services platform for discovery and development of biologics	20.0%	904.5	904.5	-	Had been fully utilized by December 31, 2022
Expand clinical development services	15.0%	678.4	678.4	-	Had been fully utilized by December 31, 2022
Expand our capacity and capabilities through acquisitions of CRO and CMO companies and businesses	15.0%	678.4	678.4	-	Had been fully utilized by December 31, 2022
General corporate and working capital	10.0%	452.3	452.3	-	Had been fully utilized by December 31, 2022
Total	100%	4,522.7	4,522.7	-	

INFORMATION RELATING TO AND USE OF PROCEEDS FROM CONVERTIBLE BONDS

On June 18, 2021, the Company issued the Series 1 Bonds and Series 2 Bonds in an aggregate principal amount of US\$300 million and RMB1,916 million, respectively. The Series 1 Bonds and Series 2 Bonds are convertible in the circumstances set out in their respective terms and conditions into H Shares at an initial Series 1 Bonds Conversion Price and the initial Series 2 Bonds Conversion Price of HK\$250.75 per H Share and HK\$229.50 per H Share (subject to adjustments), respectively. The closing price of the H Shares was HK\$177.50 on June 8, 2021, being the date of the initial announcement of the proposed issuance of the Convertible Bonds. Assuming full conversion of the Series 1 Bonds and Series 2 Bonds at such initial conversion price, the Series 1 Bonds and the Series 2 Bonds will be convertible into approximately 9,282,711 H Shares (with an aggregated nominal value of RMB9,282,711) and 10,137,685 H Shares (with an aggregated nominal value of RMB10,137,685), respectively. The Convertible Bonds were offered to no less than six independent placees (who are independent individual, corporate and/or institutional investors). For details of the Convertible Bonds, please refer to the announcements of the Company dated June 8, 2021, June 9, 2021, June 11, 2021, June 18, 2021 and June 21, 2021.

Pursuant to the terms and conditions of the Convertible Bonds, the Series 1 Bonds Conversion Price and the Series 2 Bonds Conversion Price are subject to adjustment for, among other things, profit distributions and capitalization of reserves made by the Company. The Company had distributed cash dividends and conducted capitalization of reserve for the year ended December 31, 2021 (the "2021 Capitalization of Reserve"). As a result of the approval of the 2021 Capitalization of Reserve by the Shareholders at the 2021 annual general meeting of the Company, with effect from June 14, 2022, the Series 1 Bonds Conversion Price and Series 2 Bonds Conversion Price were adjusted from HK\$250.75 per H Share to HK\$166.42 per H Share and from HK\$229.50 per H Share to HK\$152.32 per H Share, respectively (the "Adjusted Conversion Price") pursuant to the terms and conditions of the Convertible Bonds. Taking into account the implementation of the 2021 Capitalization of Reserve, and assuming full conversion of the Convertible Bonds at the respective Adjusted Conversion Price, the H Shares that may be convertible and issuable under the Convertible Bonds will increase from approximately 19,420,396 H Shares (with an aggregated nominal value or RMB19,420,396 to approximately 29,260,954 H Shares (with an aggregated nominal value or RMB29,260,954), representing 14.56% of the total issued H share capital of the Company (i.e. 201,024,750 H Shares) as at the date of this annual report and approximately 12.71% of the enlarged total issued H share capital of the Company (i.e. 230,285,704 H Shares) resulting from the full conversion of the Convertible Bonds. The additional 9,840,558 (with an aggregated nominal value or RMB9,840,558) H Shares issuable in the event of a full conversion of the Convertible Bonds after the adjusted conversion price becoming effective shall be allotted and issued by the Company pursuant to the Convertible Bonds-Related Specific Mandate sought and granted at the 2021 annual general meeting of the Company held on May 31, 2022. Please refer to the announcement of the Company dated June 13, 2022 for further details.

As of December 31, 2022, the principal amount of the Series 1 Bonds and Series 2 Bonds which are outstanding is US\$300 million and RMB1,916 million, respectively.

There were no redemption or conversion of the Conversion Bonds during the Reporting Period.

The following table sets out the shareholding structure of the Company upon full conversion of the Convertible Bonds with reference to the shareholding structure of the Company as at December 31, 2022 and assuming no further issuance of Shares by the Company.

Shareholders	Class of Shares	As at December 31, 2022		Upon full conversion of the Series 1 Bonds only at the adjusted conversion price of HK\$166.42 per H Share		Upon full conversion of the Series 2 Bonds only at the adjusted conversion price of HK\$152.32 per H Share		Upon full conversion of the Convertible Bonds at the respective adjusted conversion prices

Notes:

- The number of Shares has been increased following the implementation of the 2021 Profit Distribution Plan under which 5 Capitalization Shares were issued for every existing 10 Shares held by the Shareholders on June 13, 2022 (being the relevant record date) by way of capitalization of reserve which was approved by the Shareholders during the 2021 annual general meeting of the Company held on May 31, 2022. The number of Shares and the approximate percentage of the total issued share capital stated above have taken into account the implementation of the capitalization of reserve.
- Dr. LOU Boliang, Mr. LOU Xiaoqiang and Ms. ZHENG Bei are regarded as our Founders and they have entered into a voting rights agreement on October 19, 2018 (which formalizes their pre-existing voting arrangement), pursuant to which they have agreed to reach consensus on any proposal presented to the Board and the general meeting of the shareholders of the Company for voting (the "Voting Agreement"). Pursuant to the Voting Agreement, Dr. LOU Boliang, Mr. LOU Xiaoqiang and Ms. ZHENG Bei are concert parties and they are deemed to be interested in each other's interests in the Company under the SFO. Mr. LOU Xiaoqiang and Ms. ZHENG Bei are also spouses.
- For further details in relation to the shareholdings of the respective substantial shareholders of A Shares and H Shares, please refer to the section headed "Interests of Substantial Shareholders in the Shares and Underlying Shares" on page 87 to 91 of this annual report.
- The approximate percentages of (i) the A Shares, (ii) the H Shares, and (iii) the total issued share capital are rounded to the nearest two decimal places and may not add up to 100% due to rounding.

Directors' Report

The Board considers that the issue of the Convertible Bonds represents an opportunity to obtain a pool of readily available funds that can better support business expansion of the Company in the long run and facilitate the overall development and expansion of the Group.

The net proceeds, after deduction of fees, commissions and expenses payable, was approximately RMB3,776.0 million. As at December 31, 2022, the balance of unutilized net proceeds amounted to approximately RMB831.9 million. The net proceeds from the Convertible Bonds have been and will be utilized in accordance with the purposes set out in the announcement of the Company dated June 21, 2021. The table below sets out the planned applications of the net proceeds and actual usage up to December 31, 2022.

Use of proceeds	Percentage of allocation of net proceeds	Allocation of net proceeds (RMB million)	Utilized amount as at December 31, 2022 (RMB million)	Unutilized net proceeds as at December 31, 2022 (RMB million)	Expected timeline for utilizing the net proceeds
Expanding capacities and capabilities of the Group's pharmaceutical process development and manufacturing facilities (i.e. CMC services) for small molecule drugs	33.3%	1,258.7	1,112.7	146.0	Expected to be fully utilized by December 31, 2024
Expanding the Group's R&D and manufacturing service platform for biologics	33.3%	1,258.7	704.2	554.5	Expected to be fully utilized by December 31, 2024
Expanding capabilities of the Group's laboratory services in drug safety assessment	13.3%	503.4	372.0	131.4	Expected to be fully utilized by December 31, 2024
Expanding capacities and capabilities of the Group's laboratory and manufacturing facilities in U.K.	10.0%	377.6	377.6		Had been fully utilized by December 31, 2022
Replenishing working capital and other general corporate purposes	10.0%	377.6	377.6	-	Had been fully utilized by December 31, 2022
Total	100%	3,776.0	2,944.1	831.9	

Note: Any discrepancies in the table between the total and the sum of the amounts listed are due to rounding.

An analysis of the impact on the earnings per share if the Convertible Bonds were fully converted into H Shares as at December 31, 2022 is set out in Note 13 to the financial statements in this annual report.

RESULTS AND DIVIDEND

The consolidated results of the Group for the Reporting Period are set out on pages 116 to 230 of this annual report.

The Board proposed to declare a final dividend as follows (i) a cash dividend of RMB0.3 (inclusive of tax) per Share or an aggregate of approximately RMB357.4 million (inclusive of tax) for the year ended December 31, 2022; (ii) 5 new Shares for every 10 existing Shares to be issued out of reserve to all Shareholders. The aforesaid proposal is subject to the consideration and approval at the AGM. If the distribution proposal is approved at the AGM, it is expected that the final dividend for the year ended December 31, 2022 will be paid in 60 days after AGM to the shareholders whose names appear on the register of members of the Company on Wednesday, June 28, 2023 (the "Record Date").

The final dividend distribution shall be calculated based on the total number of Shares in issue as of the Record Date and the final cash dividend distribution shall be based on RMB0.3 per Share (inclusive of tax). In order to qualify for the final dividend, the holders of H Shares must lodge all share certificates accompanied by the transfer documents with the Company's H Share Registrar, Tricor Investor Services Limited (address: 17/F, Far East Finance Centre, 16 Harcourt Road, Hong Kong) before 4:30 p.m. on Tuesday, June 20, 2023. For the purpose of ascertaining the holders of H Shares who qualify for the final dividend, the register of members for H Shares will be closed from Wednesday, June 21, 2023 to Wednesday, June 28, 2023, both days inclusive, during which period no transfer of H Shares will be effected.

The final dividend will be denominated and declared in RMB. The holders of A Shares will be paid in RMB and the holders of H Shares will be paid in Hong Kong dollars. The actual amount declared in HK dollars is converted based on the average benchmark exchange rate of Renminbi against HK dollars as promulgated by the People's Bank of China for the five business days preceding the date of the AGM.

To the best of the Company's knowledge, no shareholder has waived or agreed to waive any dividends.

In accordance with the Enterprise Income Tax Law of the People's Republic of China (中華人民共和國企業所得稅法) and its implementation regulations which came into effect on January 1, 2008, the Company is required to withhold and pay enterprise income tax at the rate of 10% on behalf of the non-resident enterprise Shareholders whose names appear on the register of members for H Shares when distributing the cash dividends. Any H Shares not registered under the name of an individual Shareholder, including HKSCC Nominees Limited, other nominees, agents or trustees, or other organizations or groups, shall be deemed as Shares held by non-resident enterprise Shareholders. Therefore, on this basis, enterprise income tax shall be withheld from dividends payable to such Shareholders. If holders of H Shares intend to change its Shareholder status, please enquire about the relevant procedures with your agents or trustees. The Company will strictly comply with the law or the requirements of the relevant government authority and withhold and pay enterprise income tax on behalf of the relevant Shareholders based on the register of members for H Shares as of the Record Date.

If the individual holders of H Shares are Hong Kong or Macau residents or residents of the countries which had an agreed tax rate on 10% for the cash dividends to them with the PRC under the relevant tax agreement, the Company should withhold and pay individual income tax on behalf of the relevant Shareholders at a rate of 10%. Should the individual holders of H Shares be residents of the countries which had an agreed tax rate of less than 10% with the PRC under the relevant tax agreement, the Company shall withhold and pay individual income tax on behalf of the relevant Shareholders at a rate of 10%. In that case, if the relevant individual holders of H Shares wish to reclaim the extra amount withheld due to the application of 10% tax rate, the Company can apply for the relevant agreed preferential tax treatment provided that the relevant Shareholders submit the evidence required by the notice of the tax agreement to Computershare Hong Kong Investor Services Limited. The Company will assist with the tax refund after the approval of the competent tax authority. Should the individual holders of H Shares be residents of the countries which had an agreed tax rate of over 10% but less than 20% with the PRC under the tax agreement, the Company shall withhold and pay the individual income tax at the agreed actual rate in accordance with the relevant tax agreement. In the case that the individual holders of H Shares are residents of the countries which had an agreed tax rate of 20% with the PRC, or which has not entered into any tax agreement with the PRC, or otherwise, the Company shall withhold and pay the individual income tax at a rate of 20%.

TAX RELIEF AND EXEMPTION

The Company is not aware of any tax relief or exemption available to the Shareholders of the Company by reason of their holding of the Company's securities.

SHARE CAPITAL

Details of the movements in the share capital of the Company during the year are set out in note 39 to the consolidated financial statements.

RESERVES

Details of movements in the reserves of the Group and the Company during the year are set out in the consolidated statement of changes in equity and note 41 and note 51 to the consolidated financial statements, respectively.

DISTRIBUTABLE RESERVES

As at December 31, 2022, the Company's distributable reserves, calculated in accordance with PRC rules and regulations, were RMB3,008.2 million.

DIRECTORS AND SUPERVISORS

The Directors and Supervisors during the year and as of the date of this annual report are as follows:

Executive Directors

Dr. LOU Boliang (樓柏良) (*Chairman*)
Mr. LOU Xiaoqiang (樓小強)
Ms. ZHENG Bei (鄭北)

Non-executive Directors

Mr. CHEN Pingjin (陳平進)
Mr. HU Baifeng (胡柏風)
Mr. LI Jiaqing (李家慶)
Mr. ZHOU Hongbin (周宏斌)

Independent Non-executive Directors

Mr. DAI Lixin (戴立信) (ceased on Sep 23, 2022)
Ms. CHEN Guoqin (陳國琴) (ceased on Sep 23, 2022)
Mr. LI Lihua (李麗華) (appointed on Sep 23, 2022)
Ms. ZHOU Qilin (周其林) (appointed on Sep 23, 2022)
Mr. TSANG Kwan Hung Benson (曾坤鴻)
Mr. Yu Jian (余堅)

Supervisors

Dr. YANG Kexin (楊珂新) (*Chairperson*)
Ms. Feng Shu (馮書)
Ms. ZHANG Lan (張嵐)

Biographical details of the Directors, the Supervisors and the senior management of the Group as of the date of this annual report are set out on pages 46 to 55 in the section headed "Profile of Directors, Supervisors and Senior Management" of this annual report.

DIRECTORS' AND SUPERVISORS' INTERESTS IN TRANSACTION, ARRANGEMENT OR CONTRACTS OF SIGNIFICANCE

The Group has not entered into any transaction agreement or contract of significant in which the Group's Directors and Supervisors, or any entity connected with such Directors or Supervisors, have direct or indirect material interests during the Reporting Period.

CONTROLLING SHAREHOLDERS' INTERESTS IN CONTRACTS OF SIGNIFICANCE

None of the Controlling Shareholders, or any of its subsidiaries, has or had a material interest, either directly or indirectly, in any contract of significance, whether for the provision of services or otherwise, to the business of the Group to which the Company or any of its subsidiaries was a party during the Reporting Period.

DIRECTORS' INTERESTS IN COMPETING BUSINESS

During the Reporting Period, none of the Directors or their respective associates (as defined under the Listing Rules) had engaged in or had any interest in any business which competes or may compete, either directly or indirectly, with the business of the Group.

EMOLUMENTS OF THE DIRECTORS AND THE FIVE HIGHEST PAID INDIVIDUALS

The remuneration committee determines or makes recommendation to the Board (as case may be) on the remuneration and other benefits payable to the Directors and Supervisors by the Group. The committee regularly oversees the remuneration of all Directors and Supervisors to ensure that their remuneration and compensation are at an appropriate level. The Group maintains competitive remuneration packages with reference to the industry standard and according to the business development of the Group, and determines remuneration of the Directors and Supervisors based on their qualifications, experience and contributions, to attract and retain its Directors and Supervisors as well as to control costs.

Details of emoluments of Directors, Supervisors and the top 5 highest paid individuals are set out in note 9 and note 10 to the consolidated financial statements.

PERMITTED INDEMNITY PROVISION

The Company has purchased appropriate liability insurance for its Directors and Supervisors which provides proper protection for the Directors and Supervisors.

DIRECTORS', SUPERVISORS' AND CHIEF EXECUTIVES' INTERESTS IN THE SHARES OF THE COMPANY

As of December 31, 2022, the interests and short positions of the Directors, the Supervisors and the chief executives of the Company in the Shares, underlying shares and debentures of the Company or any of its associated corporations (within the meaning of Part XV of the SFO) as notified to the Company and the Stock Exchange pursuant to Divisions 7 and 8 of Part XV of the SFO (including interests and short positions which he/she is keen to taken or deemed to have under such provisions of the SFO), or as recorded in the registered maintained by the Company under section 352 of the SFO, or as notified to the Company and the Stock Exchange pursuant to the Model Code were as follows:

(康龍化成(成都)臨床研究服務有限公司)("Pharmaron Clinical")	October 27, 2022	Prior to the equity transfer and the capital increase, Pharmaron Clinical is a non-wholly owned subsidiary of the Company and was held as to 55.8856%, 14.3794%, 12.7755%, 7.3080%, 6.0003% and 3.6512% by the Company, Mr. Yu Wu, Xiamen Longtaikanglin, Mr. Li Xianghao, Mr. Liu Yang and the minority shareholders of Pharmaron Clinical. As such, the Company, Mr. Yu Wu and Xiamen Longtaikanglin are substantial shareholders of Pharmaron Clinical, respectively. Mr. Yu Wu and Mr. Liu Yang are also the directors of Pharmaron Clinical and Mr. Li Xianghao is the brother-in-law of Mr. Yu Wu. Mr. Liu Yang is also the general partner of Xiamen Longtaikanglin. Therefore, each of Mr. Yu Wu, Mr. Li Xianghao and Mr. Liu Yang is a connected person at the subsidiary level of the Company.	The Company, Mr. Yu Wu, Mr. Li Xianghao and Pharmaron Clinical entered into an Equity Transfer Agreement, pursuant to which the Company agreed to acquire, and Mr. Yu Wu and Mr. Li Xianghao agreed to sell, in aggregate, 21.6874% of equity interests in Pharmaron Clinical at a consideration of approximately RMB506.79 million, of which approximately RMB107.83 million which represented the unpaid capital contribution of Mr. Yu Wu and Mr. Li Xianghao as of the date of the Equity Transfer Agreement was deducted by the Company from the initial consideration of the equity transfer in accordance with the provisions under the Equity Transfer Agreement. In addition, the Company, Mr. Liu Yang and Pharmaron Clinical also entered into an Equity Transfer Agreement, pursuant to which the Company agreed to acquire, and Mr. Liu Yang agreed to sell, in aggregate, 1.5406% of equity interests in Pharmaron Clinical at a consideration of approximately RMB36.00 million.	RMB434.96 million

Connected transaction	Date	Connected person	Description and purpose of the transaction	Actual transaction value for the year ended December 31, 2022
Capital Increase Agreement in relation to the subscription for the increased registered capital of RMB147.94 million, RMB14.79 million and RMB2.42 million in Pharmaron Clinical by the Company, Mr. Howe Li and Xiamen Longtaikanglin, respectively.	October 27, 2022	Prior to the equity transfer, Pharmaron Clinical is a non-wholly owned subsidiary of the Company and was held as to 55.8856%, 14.3794%, 12.7755%, 7.3080%, 6.0003% and 3.6512% by the Company, Mr. Yu Wu, Xiamen Longtaikanglin, Mr. Li Xianghao, Mr. Liu Yang and the minority shareholders of Pharmaron Clinical. As such, the Company and Xiamen Longtaikanglin are substantial shareholders of Pharmaron Clinical, respectively. Therefore, Xiamen Longtaikanglin is a connected person at the subsidiary level of the Company.	The Company entered into the Capital Increase Agreement with Mr. Howe Li, Xiamen Longtaikanglin, Mr. Liu Yang, the shareholders holding an aggregate of 3.6512% of equity interests in Pharmaron Clinical as at the date of the Capital Increase Agreement and Pharmaron Clinical in relation to the Capital Increase in Pharmaron Clinical, pursuant to which the registered capital of Pharmaron Clinical will increase from RMB536.81 million to RMB701.96 million, and the Company has conditionally agreed to subscribe for the increased registered capital of RMB147.94 million in Pharmaron Clinical. Meanwhile, each of Mr. Howe Li and Xiamen Longtaikanglin has also conditionally agreed to subscribe for the increased registered capital of RMB14.79 million and RMB2.42 million in Pharmaron Clinical.	RMB700 million

The detailed terms of the connected transaction mentioned above are as follows:

Acquisition Agreement in relation to the acquisition of 100% equity interest in Anikeeper

On March 28, 2022, the Company entered into an agreement with Ms. Chen Jing (陳靜), Mr. Chen Xuejun (陳學軍) and Anikeeper, pursuant to which the Company conditionally agreed to purchase, and Ms. Chen Jing (陳靜), Mr. Chen Xuejun (陳學軍) shall conditionally agree to sell, 100% equity interest in Anikeeper. The initial consideration of the Acquisition was RMB83.6 million, which may be subject to adjustment in the event that Anikeeper's assets, liabilities and working capital position as of the completion date of the acquisition differs from that as of December 31, 2021. The acquisition of Anikeeper was completed in April 2022. Upon completion of the Acquisition, Anikeeper has become a wholly-owned subsidiary of the Company and the financial results of Anikeeper has been consolidated into the Company's financial results.

Anikeeper is a limited company established in the PRC and is principally engaged in the breeding and sales of laboratory animals such as mice for use in scientific experiments, and consultation services in relation to its products. Therefore, as the Company needs laboratory animals for the provision of pharmacology services, such acquisition allows the Company to further strengthen its capabilities in quality control of experimental animals, optimize its experimental animal supply system, and enhance its capabilities in the bioscience area such as drug safety assessment.

For details, please refer to the relevant announcements of the Company dated March 27, 2022, April 19, 2022 and May 6, 2022.

Equity Transfer Agreements in relation to the transfer of 23.228% equity interests in Pharmaron (Chengdu) Clinical Services Co., Ltd.

As part of the restructuring of Pharmaron Clinical as disclosed in the annual report of the Company for the year ended December 31, 2021 and the interim report of the Company for the six months ended June 30, 2022, on October 27, 2022, the Company entered into the following equity transfer agreements, pursuant to which the Company exercised its pre-emptive rights and agreed to acquire, and the vendors under the respective equity transfer agreements agreed to sell, in aggregate, 23.2280% equity interests in Pharmaron Clinical at a total consideration of approximately RMB542.79 million.

- the Company, Mr. Yu Wu, Mr. Li Xianghao and Pharmaron Clinical entered into the Equity Transfer Agreement I, pursuant to which the Company agreed to acquire, and Mr. Yu Wu and Mr. Li Xianghao agreed to sell, in aggregate, 21.6874% of equity interests in Pharmaron Clinical at a consideration of approximately RMB506.79 million.
- the Company, Mr. Liu Yang and Pharmaron Clinical entered into the Equity Transfer Agreement II, pursuant to which the Company agreed to acquire, and Mr. Liu Yang agreed to sell, in aggregate, 1.5406% of equity interests in Pharmaron Clinical at a consideration of approximately RMB36.00 million.

For details, please refer to the announcement of the Company dated October 27, 2022.

Capital Increase Agreement in relation to the subscription for the increased registered capital in Pharmaron Clinical

On October 27, 2022, the Company also entered into a capital increase agreement with Mr. Howe Li, Xiamen Longtaikanglin, Mr. Liu Yang, the minority shareholders of Pharmaron Clinical holding an aggregate of 3.6512% of equity interests in Pharmaron Clinical and Pharmaron Clinical in relation to the capital increase in Pharmaron Clinical, pursuant to which the registered capital of Pharmaron Clinical increased from RMB536.81 million to RMB701.96 million, and the Company conditionally agreed to subscribe for the increased registered capital of RMB147.94 million in Pharmaron Clinical at the consideration of RMB700.00 million. Meanwhile, each of Mr. Howe Li and Xiamen Longtaikanglin has also conditionally agreed to subscribe for the increased registered capital of

RMB14.79 million and RMB2.42 million in Pharmaron Clinical at the consideration of RMB70.00 million and RMB11.45 million, respectively. All the contribution of the Capital Increase in excess of the newly increased registered capital will be credited to the capital reserve of Pharmaron Clinical. For details, please refer to the announcement of the Company dated October 27, 2022.

The implementation of the equity transfer agreements and the capital increase agreement can further strengthen the Company's control over Pharmaron Clinical, enhance the integrated clinical R&D service capability, and develop a solid integrated clinical R&D service platform. It further increases the capital adequacy ratio of Pharmaron Clinical, hence satisfying the capital needs for developing the principal business of Pharmaron Clinical, which maximizes Shareholders' interests.

Continuing connected transactions

Continuing connected transaction	Date	Connected person	Description and purpose of the transaction	Annual cap for the year ended December 31, 2022	Actual transaction value for the year ended December 31, 2022
Study Animals Procurement Framework Agreement	October 28, 2020	Beijing Anikeeper Biotech Co., Ltd (北京安凱毅博生物技術有限公司) ("Anikeeper"), a company held as to 75% and 25% by Ms. Chen and Mr. Chen, respectively. Commissioned Experiments and Research Framework Agreement	May 28, 2021	Ningbo Newbay Technology Development Co., Ltd. (寧波新灣科技發展有限公司) ("Newbay Technology"), a company in which Mr. LOU Xiaoqiang and Mr. ZHOU Hongbin acts as its director and is voluntarily treated as a connected person of the Company.	Our Group shall provide certain pharmaceutical research and development, manufacturing, clinical research and other technical services to Newbay Technology and its subsidiaries.	RMB50.0 million	RMB47.5 million

The detailed terms of the non-exempt continuing connected transaction mentioned above are as follows:

Study Animals Procurement Framework Agreement

On October 28, 2020, the Company and Anikeeper entered into the new study animal procurement framework agreement for a term of 3 years from October 28, 2020 to December 31, 2022, pursuant to which the Company would purchase study animal from Anikeeper to be used for scientific experiments. The Company and Anikeeper will enter into separate purchase order which will set out the specific terms and conditions according to the principles in the new study animals procurement framework agreement.

Pricing

As a general principle, the prices for the laboratory animals will be on normal commercial terms, negotiated on arm's length basis, on similar basis as the Group conducts businesses with other independent third party suppliers and shall be on terms no less favourable to the Group than those offered by independent third party suppliers.

Unless agreed by both parties after arm's length negotiations, the prices for the transactions contemplated under the new study animals procurement framework agreement shall be calculated and determined based on the unit price list as set out in the new study animals procurement framework agreement. In addition to the general principle disclosed above, the Group has taken into account the following factors when determining the unit price list: (i) market prices of similar laboratory animals offered by other independent third party suppliers; (ii) breeds, quantities, weight and size of laboratory animals; (iii) feeding conditions of the laboratories animals; and (iv) delivery method. Any deviation from the unit price list shall be subject to further negotiations between the Company and Anikeeper, and the execution of supplemental agreement to reflect the same.

The unit price list is applicable to similar transactions conducted by the Company with other independent third party suppliers. Hence, the terms of the purchases by the Group from Anikeeper will be no less favourable to the Group than those offered by independent third party suppliers.

Annual caps

For the years ended December 31, 2020, 2021 and 2022, the total amount incurred by us for the purchase of study animal under the study animals procurement framework agreement were approximately RMB10 million, RMB15 million and RMB20 million, respectively.

The acquisition of Anikeeper was completed in April 2022. Upon completion of the Acquisition, the Study Animals Procurement Framework Agreement has no longer been in force, and Anikeeper has become a wholly-owned subsidiary of the Company. The financial results of Anikeeper has been consolidated into the Company's financial results.

Commissioned Experiments and Research Framework Agreement

On May 28, 2021, the Company and Newbay Technology entered into the commissioned experiments and research framework agreement for a term from May 28, 2021 to December 31, 2023, pursuant to which the Group would provide certain pharmaceutical research and development, manufacturing, clinical research and other technical services to Newbay Technology and its subsidiaries (the "Newbay Group"). For details of the commissioned experiments and research framework agreement, please refer to the announcement of the Company dated May 28, 2021.

Pricing

Services fees will be charged at rates no less favorable than rates at which our Group charges independent third parties for comparable transactions and will be determined by the relevant parties through arm's length negotiations based on a number of factors applicable to all customers, including but not limited to the nature, complexity, and value of tasks completed by the Group at each stage under each work order, the materials required to complete the tasks, the fees charged for historical transactions of similar nature and the then prevailing market rates.

Annual caps

For the year ended December 31, 2021 and 2022, the total service fees receivable by the Group from the Newbay Group for the services under the commissioned experiments and research framework agreement were approximately RMB17.5 million and RMB47.5 million, respectively.

For the year ending December 31, 2023, the total service fees receivable by the Group from the Newbay Group for the services under the commissioned experiments and research framework agreement are expected not to exceed RMB60 million, respectively.

Review by and confirmation of independent non-executive Directors of the Company

The independent non-executive Directors have reviewed the above continuing connected transactions, and after due and careful enquiry with the management of the Group, confirmed that such transactions were:

- (i) carried out in the ordinary and usual course of business of the Group;
- (ii) made on normal commercial terms or better; and
- (iii) carried out according to the terms in the relevant transaction agreements, which are fair and reasonable, and in the interests of the Shareholders as a whole.

The independent non-executive Directors are satisfied that they have received and reviewed sufficient information to give the confirmations above.

Confirmation of the auditor

The Company's auditor was engaged to report on the Group's continuing connected transactions in accordance with Hong Kong Standard on Assurance Engagements 3000 (Revised) "Assurance Engagements Other than Audits or Reviews of Historical Financial Information" and with reference to Practice Note 740 "Auditor's Letter on Continuing Connected Transactions under the Hong Kong Listing Rules" issued by the Hong Kong Institute of Certified Public Accountants. The auditor has issued an unqualified letter containing the findings and conclusions in respect of the above mentioned continuing connected transactions in accordance with Rule 14A.56 of the Listing Rules. A copy of the auditor's letter has been provided by the Company to the Stock Exchange.

The auditors of the Group had informed the Board and confirmed nothing has come to their attention that cause them to believe that the continuing connected transactions:

- (i) have not been approved by the Board;
- (ii) were not, in all material respects, in accordance with the pricing policies of the Group if the transactions involve the provision of goods or services by the Group;
- (iii) are not carried out in accordance with the related transaction agreement in any material respects; and
- (iv) exceed the annual cap.

In respect of the above mentioned non-exempt connected transactions, the Directors also confirmed that the Company has complied with the disclosure requirements under Chapter 14A of the Listing Rules.

Save as disclosed above, there was no connected transaction or continuing connected transaction of the Group which has to be disclosed in accordance with the Listing Rules during the Report Period. For details, please refer to the abovementioned announcements of the Company.

RELATED PARTY TRANSACTIONS

Details on related party transactions for the Reporting Period are set out in note 47 to the consolidated financial statements. Save as disclosed in the paragraph headed "Connected Transactions" in this annual report, the related party transactions as set out in note 47 to the consolidated financial statements are not regarded as connected transactions or were exempt from reporting, announcement and shareholders' approval requirements under the Listing Rules.

PRE-EMPTIVE RIGHTS

There is no provision for the pre-emptive rights in the Articles of Association of the Company or under the laws of the PRC being the jurisdiction in which the Company was incorporated, which would oblige the Company to offer new Shares on a pro-rata basis to its existing shareholders.

PURCHASE, SALE, REDEMPTION OR CANCELLATION OF LISTED SECURITIES

At the extraordinary general meetings held on January 14, 2022, the Shareholders have approved the special resolution to repurchase (at the repurchase price of RMB17.85 per Share) and cancel a total of 132,012 Restricted A Shares due to the resignation of two participants. The Company completed the repurchase and cancellation of the 132,012 Restricted A shares in May, 2022.

EQUITY-LINKED AGREEMENT

During the Reporting Period, other than the share incentive arrangements as set out in the section under "Share Incentive Scheme" set out on page 99 of this annual report and note 40 to the consolidated financial statements on pages 206 to 211 of this annual report, the Company has not entered into any equity-linked agreement.

DONATIONS

During the Reporting Period, the Company made donations of RMB9.8 million.

SUBSIDIARIES

Details of the Company's principal subsidiaries as of December 31, 2022 are set out in note 1 to the consolidated financial statements.

MANAGEMENT CONTRACTS

No contracts concerning the management and administration of the whole or any substantial part of the business of the Company were entered into or existed for the year ended December 31, 2022.

CORPORATE GOVERNANCE

The Company is committed to maintaining high standards of corporate governance practices. The Board is of the opinion that the Company has complied with the applicable code provisions under the CG Code throughout the Reporting Period. Principal corporate governance practices adopted by the Company are set out in the section headed "Corporate Governance Report" on pages 56 to 76 of this annual report.

SUFFICIENCY OF PUBLIC FLOAT

According to the information that is publicly available to the Company and within the knowledge of the Board, as of the date of this annual report, the Company has maintained the public float as required under the Listing Rules.

CONTINUING DISCLOSURE OBLIGATIONS PURSUANT TO THE LISTING RULES

The Company does not have any other disclosure obligations under Rules 13.20, 13.21 and 13.22 of the Listing Rules.

SHARE INCENTIVE SCHEME

2019 A Share Incentive Scheme

(i) Purpose of the 2019 A Share Incentive Scheme

In order to establish and improve long-term corporate incentive systems of our Group, attract and retain talent, motivate the employees of our Group, effectively align the interests of our Shareholders, our Group and the employees of our Group and enabling the respective parties to become aware of our Group's long-term development, and to promote the realization of the development strategies of our Group, the 2019 A Share Incentive Scheme was approved by Shareholders' meeting of the Company and became effective on August 15, 2019.

(ii) Category of grantees and participants of the 2019 A Share Incentive Scheme

The total number of grantees who had granted and who had taken up the relevant Restricted A Shares under the 2019 A Share Incentive Scheme was 227, which included (i) senior-level management of our Company (not including members of our senior management); (ii) mid-level managers and backbone members of our technicians; and (iii) basic-level managers and other technicians.

None of the Directors, supervisors, members of senior management, shareholders who individually or collectively hold more than 5% of the Shares of the Company, de facto controllers, or the spouses, parents or children of such de facto controllers of the Company, or their respective associates has been the grantee of any awards granted pursuant to the 2019 A Share Incentive Scheme.

(iii) Maximum entitlements of each participant and maximum number of Restricted A Shares to be issued by the Company under the 2019 A Share Incentive Scheme

None of the grants under the 2019 A Share Incentive Scheme was subject to approval by the shareholders of the Company. The grants under the 2019 A Share Incentive Scheme would not result in the awards granted and to be granted to each individual grantee in the 12-month period up to and including the date of such grant in aggregate to exceed 1% of the Shares in issue.

Pursuant to the 2019 A Share Incentive Scheme, the maximum number of Restricted A Shares to be issued by the Company is 5,651,359 A Shares, representing approximately 0.47% of the Company's total number of issued Shares at the time of this annual report, amongst which 4,521,087 A Shares would be granted by way of Restricted A Shares and the remaining 1,130,272 A Shares were reserved for share incentive grants.

Such scheme limit of options corresponding to 1,130,272 A Shares ("Approved Limit") under the 2019 A Share Incentive Scheme was initially approved by the Shareholders. Pursuant to the 2019 A Share Incentive Scheme, in the event that the scope of grantees of the share options are not confirmed within 12 months upon the shareholders' approval of the 2019 A Share Incentive Scheme on August 15, 2019, the Approved Limit shall lapse and no more options may be granted. As a result, since the scope of grantees of the share options was not confirmed within the prescribed timeline, the Approved Limit was lapsed on August 15, 2020.

As such, no new shares under the Approved Limit of the Company has been issued as of the date of this annual report, and no share incentives have been granted under the 2019 A Share Incentive Scheme during the Reporting Period.

(iv) Grant price and the basis of determining the grant price

The grant price of the Restricted A Shares was RMB17.85, and it was not lower than the higher of the following: (i) 50% of the average trading price of the A Shares on the trading day preceding July 29, 2019, the date of announcement of the 2019 A Share Incentive Scheme, and (ii) 50% of the average trading prices of the A Shares for the last 60 trading days preceding the date of announcement of the 2019 A Share Incentive Scheme.

(v) Particulars of movements of unvested awards during the Reporting Period

As of the date of this annual report, a total of 4,077,387 Restricted A shares, which was all granted prior to the Reporting Period, have been subscribed by eligible employees. These granted Restricted A Shares have a contractual term of no more than four years with 40%, 30% and 30% of the awards unlocking upon meeting certain unlocking conditions.

All awards under the 2019 A Share Incentive Scheme have been vested to the relevant participants prior to the Reporting Period, and the relevant A Shares have been issued. As of the date of this annual report, (i) the conditions for unlocking a total of 2,622,171 Restricted A Shares have been fulfilled (of which 1,509,337 Shares have been listed for trading and 1,112,834 Shares have been listed for trading on May 13, 2022), and (ii) a total of 1,669,260 Restricted A Shares are subject to lock-up restrictions, where the Restricted A Shares held by such relevant participants shall not be transferred, pledged for guarantees or used for repayment of debt. All of such Restricted A Shares are expected to be unlocked by May 15, 2023.

The first grant of Restricted A Shares under the 2019 A Share Incentive Scheme was completed prior to the Reporting Period, and there was no grant of Restricted A Shares during the Report Period. Since the Approved Limit have lapsed, no relevant awards have been granted during the Reporting Period and no shares of the Company will be allotted and issued under the reserved share incentives pursuant to the 2019 A Share Incentive Scheme.

(vi) Remaining validity period of the 2019 A Share Incentive Scheme

The 2019 A Share Incentive Scheme shall remain effective from the date of the initial Grant of the Restricted Shares through the date on which all the Restricted A Shares have been unlocked or cancelled, or all of the share options granted have been exercised or cancelled, but in any event shall not be more than 48 months. As such, the remaining life of the 2019 A Share Incentive Scheme is 10 months.

(vii) Others

At the extraordinary general meetings held on January 14, 2022, the Shareholders have approved a special resolution to repurchase (at the repurchase price of RMB17.85 per Share) and cancel a total of 132,012 Restricted A Shares under the 2019 A Share Incentive Scheme due to the resignation of 2 participants. The repurchase and cancellation were completed in May, 2022. On May 13, 2022, 1,112,834 Restricted A Shares under the second unlocking period pursuant to the first grant of the 2019 A Share Incentive Scheme were unlocked for listing and circulation. As of the date of this annual report, a total of 342,376 Restricted A Shares have been repurchased by the Company and 2,622,171 Restricted A Shares have been unlocked for listing and circulation.

2021 A Share Incentive Scheme

(i) Purpose of the 2021 A Share Incentive Scheme

In order to further perfect the Company's corporate governance structure, establish and improve the Company's long-term incentive mechanism, attract and retain the Company's core management, mid-level management, core technical personnel, basic-level management and technical personnel, fully mobilize their enthusiasm and creativity, effectively strengthen the cohesion of the core team and the competitiveness of the Company, align the interests of the shareholders, the Company and the core staff members, bring their attention to the long-term development of the Company and ensure that the Company's development strategy and business goals shall be realized, the 2021 A Share Incentive Scheme was approved by Shareholders during the extraordinary general meeting of the Shareholders on July 12, 2021.

(ii) Category of grantees and participants of the 2021 A Share Incentive Scheme

As of the date of this annual report, the total number of grantees who have been granted and who have taken up the relevant Restricted A Shares under the 2021 A Share Incentive Scheme is 185, including core management of the Company, mid-level managements and core technical personnel and basic-level management and technical personnel. All eligible participants must have an employment or labour relationship with the Company or its subsidiaries when a grant under the 2021 A Share Incentive Scheme is made and during the assessment period of the 2021 A Share Incentive Scheme. The total number of Shares to be granted to any participants under all the fully effective share incentive schemes of the Company shall not exceed 1% of the total share capital of the Company.

None of the Directors, supervisors, members of senior management, non-PRC employee, shareholders who individually or collectively hold more than 5% of the Shares of the Company, de facto controllers, or the spouses, parents or children of such de facto controllers of the Company, or their respective associates has been the grantee of any awards granted pursuant to the 2021 A Share Incentive Scheme.

(iii) Maximum entitlements of each participant and maximum number of Restricted A Shares to be issued by the Company under the 2021 A Share Incentive Scheme

None of the grants under the 2021 A Share Incentive Scheme was subject to approval by the shareholders of the Company. The grants under the 2021 A Share Incentive Scheme would not result in the awards granted and to be granted to each individual grantee in the 12-month period up to and including the date of such grant in aggregate to exceed 1% of the Shares in issue.

Pursuant to the 2021 A Share Incentive Scheme, the maximum number of Restricted A Shares to be issued by the Company was 774,200 A Shares. As a result of the implementation of the 2021 Capitalization of Reserve, and pursuant to the Management Measures for Share Incentives of Listed Companies and the 2021 A Share

Incentive Scheme, the number of Restricted Shares to be granted under the 2021 A Share Incentive Scheme from 774,200 A Shares to 1,161,300 A Shares, representing approximately 0.1% of the Company's total number of issued Shares at the time of this annual report.

(iv) Grant price and the basis of determining the grant price

The grant price of the Restricted A Shares under the 2021 A Share Incentive Scheme shall be RMB70.47 per A Share (subject to adjustment). Pursuant to the Shenzhen Listing Rules and the Management Measures, the pricing method for the Restricted A Shares under the 2021 A Share Incentive Scheme is independent pricing, and the share price is the 50% of average trading price of the Company's shares for 120 trading days prior to the date of the announcement of the 2021 A Share Incentive Scheme, which is RMB70.47 per share:

1. 50% of the average trading price of the Company's shares on the trading day immediately preceding the date of the announcement on the adoption of the 2021 A Share Incentive Scheme amongst other things (i.e. June 9, 2021), being RMB92.57 per A Share;
2. 50% of the average trading price of the Company's shares for the 20 trading days immediately preceding the date of the announcement on the adoption of the 2021 A Share Incentive Scheme amongst other things (i.e. June 9, 2021), being RMB89.86 per A Share;
3. 50% of the average trading price of the Company's shares for the 60 trading days immediately preceding the date of the announcement on the adoption of the 2021 A Share Incentive Scheme amongst other things (i.e. June 9, 2021), being RMB77.47 per A Share; and
4. 50% of any one of the average trading price of the Company's shares for the 120 trading days immediately preceding the date of the announcement on the adoption of the 2021 A Share Incentive Scheme amongst other things (i.e. June 9, 2021), being RMB70.47 per A Share.

The grant price was determined in accordance with the price references abovementioned. This was also determined with a view to stabilize talents and effectively incentivize employees under different cycles and business environments which may allow the Company to gain advantage in the competitive industry that it operates in. The Board has also taken into consideration the level of difficulty of the performance targets which eligible participants must achieve for the restricted A Share(s) to be attributed, and considers that this is in balance with the substantial discount in the grant price.

As a result of the implementation of the 2021 Capitalization of Reserve, and pursuant to the Management Measures for Share Incentives of Listed Companies and the 2021 A Share Incentive Scheme, grant price of Restricted A Shares granted under the 2021 A Share Incentive Scheme from RMB70.17 to RMB46.48.

(v) Particulars of movement of unvested awards during the Reporting Period

The granted Restricted A Shares shall be vested in four tranches, with 25%, 25%, 25% and 25% of total shares vesting on each anniversary date after the vesting commencement date upon meeting certain performance conditions.

Set out below are details of the unvested awards and movements of the number of the unvested awards under the 2021 Share Incentive Scheme during the Reporting Period:

Category of grantee	Date of grant	Vesting period	Grant price	Number of unvested awards as at January 1, 2022	Cancelled or lapsed before the 2021 Capitalization of Reserve	Vested before the 2021 Capitalization of Reserve	Adjustment due to the 2021 Capitalization of Reserve	Cancelled or lapsed after the 2021 Capitalization of Reserve	Vested after the 2021 Capitalization of Reserve	Number of unvested awards as at December 31, 2022
Employees	July 27, 2021	<p><i>First tranche:</i></p> <ul style="list-style-type: none"> 25% to be vested from the first trading day after the expiry of 12 months following the grant date until the last trading day within the 24 months following the grant date <p><i>Second tranche:</i></p> <ul style="list-style-type: none"> 25% to be vested from the first trading day after the expiry of 24 months following the grant date until the last trading day within the 36 months following the grant date <p><i>Third tranche:</i></p> <ul style="list-style-type: none"> 25% to be vested from the first trading day after the expiry of 36 months following the grant date until the last trading day within the 48 months following the grant date <p><i>Fourth tranche:</i></p> <ul style="list-style-type: none"> 25% to be vested from the first trading day after the expiry of 48 months following the grant date until the last trading day within the 60 months following the grant date 	RMB46.48	774,200	0	0	387,100	129,600	0	1,031,700

Notes:

- (1) The grant price was adjusted as a result of the implementation of the 2021 Profit Distribution and the 2021 Capitalization of Reserve.

No awards were granted under the 2021 Share Incentive Scheme during the Reporting Period.

(vi) Remaining validity period of the 2021 A Share Incentive Scheme

The 2021 A Share Incentive Scheme is valid until the date on which all Restricted A Shares available for issue under the 2021 A Share Incentive Scheme have been attributed or forfeited, and such period shall not exceed 60 months from the grant date (i.e. the date on which the Restricted A Shares are granted to a eligible participant as determined by the Board for the purposes of the 2021 A Share Scheme). As such, the remaining life of the 2021 A Share Incentive Scheme is 43 months.

(vii) Others

As a result of the implementation of the 2021 Capitalization of Reserve, and pursuant to the Management Measures for Share Incentives of Listed Companies and the 2021 A Share Incentive Scheme, on July 28, 2022, the Board has also resolved to vest a total of 257,925 Restricted A shares of the Company to 185 eligible employees under the 2021 A Share Incentive Scheme. Further, upon the corresponding adjustment as a result of the implementation of the 2021 Capitalization of Reserve, 129,600 Restricted A Shares initially granted to 19 eligible employees have been cancelled due to the forfeiture by the relevant eligible employees as a result of resignations or other personal reasons.

2022 A Share Incentive Scheme**(i) Purpose of the 2022 A Share Incentive Scheme**

In order to further perfect the Company's corporate governance structure, establish and improve the Company's long-term incentive mechanism, attract and retain the Company's core management, mid-level management and core technical personnel, basic-level management and technical personnel, fully mobilize their enthusiasm and creativity, effectively strengthen the cohesion of the core team and the competitiveness of the Company, align the interests of the shareholders, the Company and the core staff members, bring their attention to the long-term development of the Company and ensure that the Company's development strategy and business goals shall be realized, the Shareholders have resolved to adopt the 2022 A Share Incentive Scheme during the annual general meeting of the Shareholders on May 31, 2022.

(ii) Category of grantees and participants of the 2022 A Share Incentive Scheme

The total number of the eligible participants for the grant proposed under the 2022 A Share Incentive Scheme shall be 379. All eligible participants must have an employment or labour relationship with the Company or its subsidiaries when a grant under the 2022 A Share Incentive Scheme is made and during the assessment period of the 2022 A Share Incentive Scheme.

None of the Directors, supervisors, members of senior management, non-PRC employee, shareholders who individually or collectively hold more than 5% of the Shares of the Company, de facto controllers, or the spouses, parents or children of such de facto controllers of the Company, or their respective associates has been the grantee of any awards granted pursuant to the 2022 A Share Incentive Scheme.

(iii) Maximum entitlements of each participant and maximum number of Restricted A Shares to be issued by the Company under the 2022 A Share Incentive Scheme

None of the grants made under the 2022 A Share Incentive Scheme was subject to approval by the shareholders of the Company. The grants made under the 2022 A Share Incentive Scheme would not result in the awards granted and to be granted to each individual grantee in the 12-month period up to and including the date of such grant in aggregate to exceed 1% of the Shares in issue.

Pursuant to the 2022 A Share Incentive Scheme, the maximum number of Restricted A Shares to be issued by the Company was 1,548,800 A Shares. As a result of (i) resignations or voluntary waive of Restricted A Shares of certain eligible employees, and (ii) the implementation of the 2021 Capitalization of Reserve, the number of Restricted A Shares to be issued by the Company has been adjusted from 1,548,800 A Shares to 2,203,200 A Shares, representing approximately 0.18% of the Company's total number of issued Shares at the time of this annual report, pursuant to the Management Measures for Share Incentives of Listed Companies and the 2022 A Share Incentive Scheme.

The cumulative total number of underlying Shares involved under the fully effective share incentive schemes of the Company shall not exceed 20% of the total share capital of the Company as at the date of which the 2022 A Share Incentive Scheme was approved. The total number of Shares to be granted to any participants under all the fully effective share incentive schemes of the Company shall not exceed 1% of the total share capital of the Company.

(iv) Grant price and the basis of determining the grant price

The grant price of the Restricted A Shares under the 2022 A Share Incentive Scheme was RMB58.38 per A Share (subject to adjustment). Pursuant to the Shenzhen Listing Rules and the Management Measures, the grant price of the Restricted A Shares shall be not less than the par value of the Shares, and in principle not less than the higher of:

1. 50% of the average trading price of the Company's A Shares for one trading day immediately preceding the date of the announcement with respect to the adoption of the 2022 A Share Incentive Scheme (i.e. March 27, 2022), being RMB58.38 per A Share; and
2. 50% of the average trading price of the Company's A Shares for the 20 trading days immediately preceding the date of the announcement with respect to the adoption of the 2022 A Share Incentive Scheme (i.e. March 27, 2022), being RMB55.06 per A Share.

The grant price was determined in accordance with the price references abovementioned. This was also determined with a view to stabilize talents and effectively incentivize employees under different cycles and business environments which may allow the Company to gain advantage in the competitive industry that it operates in. The Board has also taken into consideration the level of difficulty of the performance targets which Participants must achieve for the restricted share(s) to be attributed.

As a result of the implementation of the 2021 Capitalization of Reserve, the grant price has been adjusted from RMB58.38 per A Share to RMB38.62 per A Share, pursuant to the Management Measures for Share Incentives of Listed Companies and the 2022 A Share Incentive Scheme

(v) **Particulars of awards granted during the Reporting Period and movement of unvested awards during the Reporting Period**

Set out below are details of (i) the awards granted under the 2022 A Share Incentive Scheme and (ii) the unvested awards and the movements of the number of unvested awards under the 2022 Share Incentive Scheme during the Reporting Period:

Awards granted under the 2022 A Share Incentive Scheme

Category of grantee	Date of grant	Vesting period	Number of granted shares	Grant price	Performance targets
Employees	July 28, 2022	<p><i>First tranche:</i></p> <ul style="list-style-type: none"> 25% to be vested from the first trading day after the expiry of 12 months following the grant date until the last trading day within the 24 months following the grant date <p><i>Second tranche:</i></p> <ul style="list-style-type: none"> 25% to be vested from the first trading day after the expiry of 24 months following the grant date until the last trading day within the 36 months following the grant date <p><i>Third tranche:</i></p> <ul style="list-style-type: none"> 25% to be vested from the first trading day after the expiry of 36 months following the grant date until the last trading day within the 48 months following the grant date <p><i>Fourth tranche:</i></p> <ul style="list-style-type: none"> 25% to be vested from the first trading day after the expiry of 48 months following the grant date until the last trading day within the 60 months following the grant date 	2,203,200	RMB38.62	<p><i>First tranche:</i></p> <ul style="list-style-type: none"> 20% increase in relation to the Company's revenue for the year ended December 31, 2022 as compared to the year ended December 31, 2021 <p><i>Second tranche:</i></p> <ul style="list-style-type: none"> 40% increase in relation to the Company's revenue for the year ended December 31, 2023 as compared to the year ended December 31, 2021 <p><i>Third tranche:</i></p> <ul style="list-style-type: none"> 60% increase in relation to the Company's revenue for the year ended December 31, 2024 as compared to the year ended December 31, 2020 <p><i>Fourth tranche:</i></p> <ul style="list-style-type: none"> 80% increase in relation to the Company's revenue for the year ended December 31, 2025 as compared to the year ended December 31, 2020

Movement of the number of unvested awards under the 2022 A Share Incentive Scheme

Category of grantee	Date of grant	Vesting period	Grant price	Number of unvested awards as at the date of which the 2022 A Share Incentive Scheme was approved by the Shareholders at the 2021 AGM (i.e. May 31, 2022)	Cancelled or lapsed before the 2021 Capitalization of Reserve	Vested before the 2021 Capitalization of Reserve	Adjustment due to the 2021 Capitalization of Reserve	Cancelled or lapsed after the 2021 Capitalization of Reserve	Vested after the 2021 Capitalization of Reserve	Number of unvested awards as at December 31, 2022
Employees	July 28, 2022	<p><i>First tranche:</i></p> <ul style="list-style-type: none"> 25% to be vested from the first trading day after the expiry of 12 months following the grant date until the last trading day within the 24 months following the grant date <p><i>Second tranche:</i></p> <ul style="list-style-type: none"> 25% to be vested from the first trading day after the expiry of 24 months following the grant date until the last trading day within the 36 months following the grant date <p><i>Third tranche:</i></p> <ul style="list-style-type: none"> 25% to be vested from the first trading day after the expiry of 36 months following the grant date until the last trading day within the 48 months following the grant date <p><i>Fourth tranche:</i></p> <ul style="list-style-type: none"> 25% to be vested from the first trading day after the expiry of 48 months following the grant date until the last trading day within the 60 months following the grant date 	RMB38.62	1,548,800	80,000	0	734,400	0	0	2,203,200

Notes:

- (1) The grant price was adjusted as a result of the implementation of the 2021 Profit Distribution and the 2021 Capitalization of Reserve.

None of the grantees is a director or connected person of the Company and none of the abovementioned grants was subject to approval by the shareholders of the Company. The abovementioned grants would not result in the awards granted and to be granted to each individual grantee in the 12-month period up to and including the date of such grant in aggregate to exceed 1% of the Shares in issue.

(vi) Remaining validity period of the 2022 A Share Incentive Scheme

The 2022 A Share Incentive Scheme shall be valid until the date on which all Restricted A Shares have been attributed or forfeited, and such period shall not exceed 60 months. As such, the remaining life of the 2022 A Share Incentive Scheme is 55 months.

The total number of Shares that might be issued in respect of awards granted under all share incentive schemes of the Company during the year ended December 31, 2022 divided by the weighted average number of Shares for the year ended December 31, 2022 was 0.89%.

OTHER EMPLOYEE INCENTIVES

First H Share Award and Trust Scheme

The Shareholders have resolved to adopt the First H Share Award and Trust Scheme during the extraordinary general meeting of the Shareholders on December 11, 2020.

The source of the award shares under the First H Share Award and Trust Scheme shall be H Shares to be acquired by the trustee through on-market transactions at the prevailing market price in accordance with the instructions of the Company and the relevant provisions of the relevant scheme rules.

The H Share Scheme is comprised of two parts, namely (i) the Employee Share Award Plan and (ii) the Share Bonus Plan.

(i) Purpose of First H Share Award and Trust Scheme

The purposes of the Employee Share Award Plan are:

1. to attract, motivate and retain skilled and experienced personnel to strive for the future development and expansion of the Group by providing them with the opportunity to own equity interests in the Company;
2. to deepen the reform on the Company's remuneration system and to develop and constantly improve the interests balance mechanism among the Shareholders, the operational and executive management; and
3. to (a) recognize the contributions of the leadership of the Company including the Directors and long standing employees of the Company; (b) encourage, motivate and retain the leadership of the Company and long standing employees whose contributions are beneficial to the continual operation, development and long-term growth of the Group; and (c) provide additional incentive for the leadership of the Company and long standing employee by aligning the interests of the leadership of the Company to that of the Shareholders and the Group as a whole.

The purposes of the Share Bonus Plan are:

1. to reward and motivate key employees responsible for increments in the Company's performance;
2. to strengthen employees' initiative in striving for the enhancement of the Company's performance; and
3. to align the interests of employees with that of the Shareholders.

(ii) Category of grantees and participants of the First H Share Award and Trust Scheme

Eligible employees who may participate in the First H Share Award and Trust Scheme include eligible employees for the Employee Share Award Plan, and eligible employees for the Share Bonus Plan. Eligible employees of the Employee Share Award Plan include any individual, being a Director, senior management, key operating team member, employee, or consultant, who is a full-time PRC or non-PRC employee of any members of the Group. Eligible employees of the Share Bonus Plan include any individual, being a Director, senior management, or key operating team member, who is a full-time PRC or non-PRC employee of any members of the Group.

None of the Directors, supervisors, members of senior management, non-PRC employee, shareholders who individually or collectively hold more than 5% of the Shares of the Company, de facto controllers, or the spouses, parents or children of such de facto controllers of the Company, or their respective associates has been the grantee of any awards granted pursuant to the First H Share Award and Trust Scheme.

(iii) Maximum entitlements of each participant and maximum number of H Shares to be granted by the Company under the First H Share Award and Trust Scheme

None of the grants made under the First H Share Award and Trust Scheme was subject to approval by the shareholders of the Company. The grants made under the First H Share Award and Trust Scheme would not result in the awards granted and to be granted to each individual grantee in the 12-month period up to and including the date of such grant in aggregate to exceed 1% of the Shares in issue.

Pursuant to the First H Share Award and Trust Scheme, the maximum number of H Shares that can be purchased on the market by the trustee appointed by the Company for the purpose of servicing the First H Share Award and Trust Scheme shall not exceed 11,910,000 H Shares, representing approximately 1% of the Company's total number of issued H Shares as at the date of this annual report, which was adjusted from 7,940,000 to 11,910,000 H Shares as a result of the 2021 Capitalization of Reserve.

As of December 31, 2022, 11,631,387 H Shares had been purchased by the trustee appointed by the Company through on-market transactions at the prevailing market price in accordance with the instructions of the Company and the relevant provisions of the relevant scheme rules.

The Company shall not make any further grant of award which will result in the aggregate number of H Shares underlying all grants made pursuant to the First H Share Award and Trust Scheme, deducting award shares that have been forfeited in accordance with the First H Share Award and Trust Scheme, to exceed the scheme limit without Shareholders' approval

(iv) Particulars of awards granted during the Reporting Period and movement of unvested awards during the Reporting Period

Unless otherwise specified in the award letter approved by the Board or the delegatee of the Board, and subject to the vesting conditions set out in the scheme rules of the First H Share Award and Trust Scheme, all awards under the Employee Share Award Plan shall be vested in four equal tranches (i.e., 25%, 25%, 25% and 25%), and all awards under the Share Bonus Plan shall be vested in two equal tranches (i.e., 50% and 50%). Such awards will be vested on each anniversary date after the commencement of the vesting period which shall be determined by the Board or the delegatee of the Board in its sole and absolute discretion upon meeting certain sales performance conditions.

Set out below are details of (i) the awards granted under the First H Share Award and Trust Scheme and (ii) the unvested awards and the movements of the number of unvested awards under the First H Share Award and Trust Scheme during the Reporting Period:

Awards granted under the First H Share Award and Trust Scheme

Category of grantee	Date of grant	Vesting period	Number of granted shares	Grant price	Performance targets
Employees	April 1, 2022	<i>First tranche:</i> • 25% to be vested from the first trading day after the expiry of 12 months following the grant date until the last trading day within the 24 months following the grant date	751,110	N/A	<i>First tranche:</i> • 30% increase in relation to the Company's revenue for the year ended December 31, 2021 as compared to the year ended December 31, 2019
Employees	May 31, 2022	<i>Second tranche:</i> • 25% to be vested from the first trading day after the expiry of 24 months following the grant date until the last trading day within the 36 months following the grant date <i>Third tranche:</i> • 25% to be vested from the first trading day after the expiry of 36 months following the grant date until the last trading day within the 48 months following the grant date <i>Fourth tranche:</i> • 25% to be vested from the first trading day after the expiry of 48 months following the grant date until the last trading day within the 60 months following the grant date	7,588,450	N/A	<i>Second tranche:</i> • 45% increase in relation to the Company's revenue for the year ended December 31, 2022 as compared to the year ended December 31, 2019 <i>Third tranche:</i> • 60% increase in relation to the Company's revenue for the year ended December 31, 2023 as compared to the year ended December 31, 2019 <i>Fourth tranche:</i> • 75% increase in relation to the Company's revenue for the year ended December 31, 2024 as compared to the year ended December 31, 2019

None of the grantees is a director or connected person of the Company or one of its five highest paid individuals during the Reporting Period, and none of the abovementioned grants was subject to approval by the shareholders of the Company.

(v) Remaining validity period of the First H Share Award and Trust Scheme

The First H Share Award and Trust Scheme shall be valid and effective for a term commencing on the date on which the Shareholders and the Board approved the First H Share Award and Trust Scheme (the "Adoption Date"), and ending on the business day immediately prior to the 10th anniversary of the Adoption Date, and after which no further awards will be granted, and thereafter for so long as there are any non-vested award shares granted hereunder prior to the expiration of the First H Share Award and Trust Scheme, in order to give effect to the vesting of such award shares or otherwise as may be required in accordance with the provisions of the rules of the First H Share Award and Trust Scheme. As such, the remaining life of the First H Share Award and Trust Scheme is 96 months.

(vi) Others

On April 15, 2022, 76 Selected Participants are entitled to vest 25% of the H Shares granted to them under the first grant of the First H Share Award and Trust Scheme in 2020. The total number of vested H Shares was 183,075. Out of the 76 Selected Participants, 4 of them left the Company due to resignation and termination of labor contract and as such, 21,188 H Shares initially granted to such Selected Participants had been deemed to be returned shares and shall be held by the trustee appointed by the Company (the "Trustee") for the purpose of the trust constituted by the trust deed to service the First H Share Award and Trust Scheme. Further, 42,300 H Shares initially granted to 5 Selected Participants who were no longer entitled to vest under the First H Share Award and Trust Scheme have also been deemed to be returned shares and shall be held by the Trustee.

On June 10, 2022, in accordance with the First H Share Award and Trust Scheme and relevant regulations of the Hong Kong Stock Exchange, the Company adjusted the number of granted but unvested Award Shares to each selected participant awarded under the employee share award plan in 2020 (unless forfeited on or before June 2, 2022) according to the 2021 Profit Distribution Plan, on the basis of 5 Shares for every 10 Shares held.

On July 28, 2022, the Board approved amendments to certain amendments to the First H Share Award and Trust Scheme in order to further implement the First H Share Award and Trust Scheme and fulfil the incentive purposes thereof, without prejudice to the interests of the Company and the Shareholders as a whole. The Board considered the actual operating situation of the Company and market practice and as a result, the First H Share Award and Trust Scheme Limit and other relevant provisions were amended in order to reflect the increase in the number of issued Shares as a result of the implementation of the 2021 Capitalization of Reserve and certain housekeeping amendments were also incorporated (the "Amendments"). In particular, following the adoption of the Amendments, the First H Share Award and Trust Scheme Limit has been increased from 7,940,000 to 11,910,000, provided that the Board or the Delegatee may further adjust the First H Share Award and Trust Scheme Limit pursuant to the relevant provisions of the First H Share Award and Trust Scheme. For details, please refer to the announcement of the Company dated July 28, 2022.

For the year ended December 31, 2022, the Group had recorded share-based compensation expenses of RMB127,248,000 (the year ended December 31, 2021: 26,269,000) in relation to the First H Share Award and Trust Scheme.

The total number of Shares granted to any participants under all the fully effective share incentive schemes of the Company shall be 11,910,000, which represents approximately 1% of the total share capital of the Company as of the date of this annual report.

CLOSURE OF THE REGISTER OF MEMBERS

For the purpose of determining the entitlement to attend and vote at the AGM and the Second H Shares Class Meeting of 2022, the register of members of the Company will be closed from Tuesday, May 30, 2023 to Friday, June 2, 2023, both days inclusive, during which period no transfer of Shares will be effected. In order to determine the identity of the Shareholders who are entitled to attend and vote at the AGM and the Second H Shares Class Meeting of 2022, all share transfer documents accompanied by the relevant share certificates must be lodged with the Company's H Share Registrar, Tricor Investor Services Limited at 17/F, Far East Finance Centre, 16 Harcourt Road Hong Kong not later than 4:30 pm on Monday, May 29, 2023.

For the purpose of determining the entitlement to the proposed final dividend, the register of members of the Company will be closed from Wednesday, June 21, 2023 to Wednesday, June 28, 2023, both days inclusive, during which period no transfer of Shares will be effected. In order to qualify for receiving the proposed final dividend (subject to the approval by the Shareholders at the AGM), all completed share transfer documents accompanied by the relevant share certificates must be lodged with the Company's H Share Registrar, Tricor Investor Services Limited at 17/F, Far East Finance Centre, 16 Harcourt Road, Hong Kong not later than 4:30 pm on Tuesday, June 20, 2023.

COMPLIANCE WITH RELEVANT LAWS AND REGULATIONS

There was no incident of non-compliance with relevant laws and regulations that had a significant impact on the Group during the Reporting Period.

AUDITOR

There has been no change in auditors during the Reporting Period. The consolidated financial statements for the Reporting Period have been audited by Ernst & Young, who are proposed for reappointment at the forthcoming AGM.

By order of the Board

▶▶▶ Independent Auditor's Report

To the shareholders of Pharmaron Beijing Co., Ltd.

(Incorporated in the People's Republic of China with limited liability)

OPINION

We have audited the consolidated financial statements of Pharmaron Beijing Co., Ltd. (the "Company") and its subsidiaries (the "Group") set out on pages 116 to 230 which comprise the consolidated statement of financial position as at December 31, 2022, and the consolidated statement of profit or loss, the consolidated statement of comprehensive income, the consolidated statement of changes in equity and the consolidated statement of cash flows for the year then ended, and notes to the consolidated financial statements, including a summary of significant accounting policies.

In our opinion, the consolidated financial statements give a true and fair view of the consolidated financial position of the Group as at December 31, 2022, and of its consolidated financial performance and its consolidated cash flows for the year then ended in accordance with International Financial Reporting Standards ("IFRSs") issued by the International Accounting Standards Board (the "IASB") and have been properly prepared in compliance with the disclosure requirements of the Hong Kong Companies Ordinance.

BASIS FOR OPINION

We conducted our audit in accordance with Hong Kong Standards on Auditing ("HKSAAs") issued by the Hong Kong Institute of Certified Public Accountants ("HKICPA"). Our responsibilities under those standards are further described in the *Auditor's responsibilities for the audit of the consolidated financial statements* section of our report. We are independent of the Group in accordance with the HKICPA's *Code of Ethics for Professional Accountants* (the "Code"), and we have fulfilled our other ethical responsibilities in accordance with the Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

KEY AUDIT MATTERS

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the consolidated financial statements of the current period. These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. For each matter below, our description of how our audit addressed the matter is provided in that context.

We have fulfilled the responsibilities described in the *Auditor's responsibilities for the audit of the consolidated financial statements* section of our report, including in relation to these matters. Accordingly, our audit included the performance of procedures designed to respond to our assessment of the risks of material misstatement of the consolidated financial statements. The results of our audit procedures, including the procedures performed to address the matters below, provide the basis for our audit opinion on the accompanying consolidated financial statements.

Key audit matter	How our audit addressed the key audit matter
<i>Impairment of trade receivables and contract assets</i>	
<p>At December 31, 2022, the net carrying amounts of trade receivables and contract assets were RMB1,881,882,000 and RMB332,601,000, respectively, net of accumulated impairment losses of RMB57,643,000 and RMB4,107,000, respectively.</p> <p>Management of the Group calculated the expected credit loss for trade receivables and contract assets by applying simplified approach under IFRS 9. The provision matrix considered migration rate, historical loss ratio and forward-looking adjustments.</p> <p>The assumptions applied in determining the expected credit loss required significant management judgement and estimates. Therefore, we identified the impairment of trade receivables as a key audit matter.</p> <p>The related disclosures are included in notes 25 and 26 to the consolidated financial statements.</p>	<p>Our procedures in relation to the impairment of trade receivables and contract assets included:</p> <ol style="list-style-type: none"> (1) Evaluating and testing the internal controls over impairment test of trade receivables and contract assets; (2) Assessing the appropriateness of the credit loss provision methodology; (3) Evaluating the appropriateness of the inputs that management used in the provision matrix, such as migration rate, historical loss ratio and forward-looking adjustments, and then recalculating the expected loss; (4) Testing the accuracy of ageing on a sampling basis over the billing and collection cycle; (5) Performing confirmation procedure and inspecting cash receipts from customers subsequent to the financial year end on a sampling basis; and (6) Evaluating the adequacy of the disclosures.
<i>Impairment of goodwill acquired in business combinations</i>	
<p>At December 31, 2022 the carrying amount of goodwill was RMB2,687,865,000.</p> <p>The management of the Group performed impairment test at least on an annual basis and adjusted the carrying amount of based on the test result. The assumptions applied in the impairment test required significant management estimates, including revenue growth rates, gross profit margins and discount rates. There are significant uncertainties in these estimates, which are affected by management's judgement on the future market and economic environment, and the recoverable amount of goodwill can be affected by the adoption of different estimates and assumptions. Therefore, we identified the impairment of goodwill as a key audit matter.</p> <p>The related disclosure is included in note 16 to the consolidated financial statements.</p>	<p>Our procedures in relation to the impairment of goodwill acquired in business combinations included:</p> <ol style="list-style-type: none"> (1) Evaluating the key internal controls over impairment test of goodwill; (2) Evaluating the basis of goodwill allocation to cash-generating units ("CGU") and evaluating the rationality; (3) Evaluating the reasonableness of the valuation model with the assistance of our internal valuation specialists; (4) Evaluating the appropriateness of key assumptions and estimates including revenue growth rates and gross margin rates with historical data and supporting evidence; (5) Evaluating the appropriateness of discount rate by comparing to the similar companies in the same industry; and (6) Evaluating the adequacy of the disclosure.

OTHER INFORMATION INCLUDED IN THE ANNUAL REPORT

The directors of the Company are responsible for the other information. The other information comprises the information included in the Annual Report, other than the consolidated financial statements and our auditor's report thereon.

Our opinion on the consolidated financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the consolidated financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the consolidated financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

RESPONSIBILITIES OF THE DIRECTORS FOR THE CONSOLIDATED FINANCIAL STATEMENTS

The directors of the Company are responsible for the preparation of the consolidated financial statements that give a true and fair view in accordance with IFRSs issued by the IASB and the disclosure requirements of the Hong Kong Companies Ordinance, and for such internal control as the directors determine is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, the directors of the Company are responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors of the Company either intend to liquidate the Group or to cease operations or have no realistic alternative but to do so.

The directors of the Company are assisted by the Audit Committee in discharging their responsibilities for overseeing the Group's financial reporting process.

AUDITOR'S RESPONSIBILITIES FOR THE AUDIT OF THE CONSOLIDATED FINANCIAL STATEMENTS

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Our report is made solely to you, as a body, and for no other purpose. We do not assume responsibility towards or accept liability to any other person for the contents of this report.

Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with HKSAAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with HKSAAs, we exercise professional judgement and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the directors.
- Conclude on the appropriateness of the directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to cease to continue as a going concern.
- Evaluate the overall presentation, structure, and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision, and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with the Audit Committee regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide the Audit Committee with a statement that we have complied with relevant ethical requirements regarding independence and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, actions taken to eliminate threats or safeguards applied.

From the matters communicated with the Audit Committee, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

The engagement partner on the audit resulting in this independent auditor's report is Cheong Ming Yik.

▶▶▶ Notes to the Consolidated Financial Statements

Year ended December 31, 2022

1. CORPORATE INFORMATION

Pharmaron Beijing Co., Ltd. was incorporated and registered in the People's Republic of China ("PRC") on July 1, 2004. With the approval of the China Securities Regulatory Commission, the Company completed its initial public offering and was listed on the Shenzhen Stock Exchange (stock code: 300759.SZ) on January 28, 2019. On November 28, 2019, the Company was listed on the Main Board of the Stock Exchange of Hong Kong Limited (the "HKSE") (stock code: 3759.HK). The address of the registered office is 8th Floor, Block 1, 6 Taihe Road, Beijing Economic Technological Development Area, Beijing, China.

The Company is a leading fully integrated pharmaceutical R&D services platform with global operations to accelerate drug innovation for our customers. The principal activity of the Company and its subsidiaries (together, the "Group") is to provide contract research, development, and manufacturing services for innovative pharmaceutical products throughout the research and development cycle and the services are organised in four major categories: laboratory services, chemistry, manufacturing and controls CMC (small molecule CDMO) services, clinical development services and biologics and CGT services.

* These subsidiaries were registered as limited liability companies under PRC law.

The English names of the companies registered in the PRC represent the best efforts made by the management of the Company in directly translating the Chinese names of these companies as no English names have been registered.

The above table lists the subsidiaries of the Company which, in the opinion of the directors, principally affected the results for the year or formed a substantial portion of the net assets of the Group.

2.1 BASIS OF PREPARATION

The consolidated financial statements of the Group have been prepared in accordance with International Financial Reporting Standards (“IFRS”), which comprise all standards and interpretations approved by the International Accounting Standards Board (the “IASB”), and International Accounting Standards and Standing Interpretations Committee interpretations approved by the International Accounting Standards Committee and the disclosure requirements of the Hong Kong Companies Ordinance.

The consolidated financial statements have been prepared under the historical cost convention, except for biological assets which are measured at fair value less costs to sell, equity investments at fair value through profit or loss, derivative financial instruments, financial assets and financial liabilities at fair value through profit or loss which have been measured at fair value. The consolidated financial statements are presented in Renminbi (“RMB”) and all values are rounded to the nearest thousand except when otherwise indicated.

Basis of consolidation

The consolidated financial statements include the financial statements of the Company and its subsidiaries for the year ended December 31, 2022. A subsidiary is an entity (including a structured entity), directly or indirectly, controlled by the Company. Control is achieved when the Group is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee.

Generally, there is a presumption that a majority of voting rights results in control. When the Company has, directly or indirectly, less than a majority of the voting or similar rights of an investee, the Group considers all relevant facts and circumstances in assessing whether it has power over an investee, including:

- a. the contractual arrangement with the other vote holders of the investee;
- b. rights arising from other contractual arrangements; and
- c. the Group’s voting rights and potential voting rights.

The financial statements of the subsidiaries are prepared for the same reporting period as the Company, using consistent accounting policies. The results of subsidiaries are consolidated from the date on which the Group obtains control and continue to be consolidated until the date that such control ceases.

Profit or loss and each component of other comprehensive income (OCI) are attributed to the owners of the parent of the Group and to the non-controlling interests, even if this results in the non-controlling interests having a deficit balance. When necessary, adjustments are made to the financial statements of subsidiaries to bring their accounting policies into line with the Group’s accounting policies. All intragroup assets and liabilities, equity, income, expenses and cash flows relating to transactions between members of the Group are eliminated in full on consolidation.

The Group reassesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control. Consolidation of a subsidiary begins when the Group obtains control over the subsidiary and ceases when the Group loses control of the subsidiary. Assets, liabilities, income, and expenses of a subsidiary acquired or disposed of during the year are included in the consolidated financial statements from the date the Group gains control until the date the Group ceases to control the subsidiary.

2.1 BASIS OF PREPARATION (CONTINUED)

Basis of consolidation (continued)

The Group reassesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control described above. A change in the ownership interest of a subsidiary, without a loss of control, is accounted for as an equity transaction.

If the Group loses control over a subsidiary, it derecognises (i) the assets (including goodwill) and liabilities of the subsidiary, (ii) the carrying amount of any non-controlling interest and (iii) the cumulative translation differences recorded in equity; and recognises (i) the fair value of the consideration received, (ii) the fair value of any investment retained and (iii) any resulting surplus or deficit in profit or loss. The Group's share of components previously recognised in other comprehensive income is reclassified to profit or loss or retained profits, as appropriate, on the same basis as would be required if the Group had directly disposed of the related assets or liabilities.

2.2 CHANGES IN ACCOUNTING POLICIES AND DISCLOSURES

The Group has adopted the following revised IFRSs for the first time for the current year's financial statements.

Amendments to IFRS 3	<i>Reference to the Conceptual Framework</i>
Amendments to IAS 16	<i>Property, Plant and Equipment: Proceeds before Intended Use</i>
Amendments to IAS 37	<i>Onerous Contracts – Cost of Fulfilling a Contract</i>
<i>Annual Improvements to IFRSs 2018-2020</i>	<i>Amendments to IFRS 1, IFRS 9, Illustrative Examples accompanying IFRS 16, and IAS 41</i>

The nature and the impact of the revised IFRSs that are applicable to the Group are described below:

- (a) Amendments to IFRS 3 replace a reference to the previous Framework for the Preparation and Presentation of Financial Statements with a reference to the Conceptual Framework for Financial Reporting (the "Conceptual Framework") issued in March 2018 without significantly changing its requirements. The amendments also add to IFRS 3 an exception to its recognition principle for an entity to refer to the Conceptual Framework to determine what constitutes an asset or a liability. The exception specifies that, for liabilities and contingent liabilities that would be within the scope of IAS 37 or IFRIC-Int 21 if they were incurred separately rather than assumed in a business combination, an entity applying IFRS 3 should refer to IAS 37 or IFRIC-Int 21 respectively instead of the Conceptual Framework. Furthermore, the amendments clarify that contingent assets do not qualify for recognition at the acquisition date. The Group has applied the amendments prospectively to business combinations that occurred on or after 1 January 2022. As there were no contingent assets, liabilities and contingent liabilities within the scope of the amendments arising in the business combination that occurred during the year, the amendments did not have any impact on the financial position and performance of the Group.

2.2 CHANGES IN ACCOUNTING POLICIES AND DISCLOSURES (CONTINUED)

- (b) Amendments to IAS 16 prohibit an entity from deducting from the cost of an item of property, plant and equipment any proceeds from selling items produced while bringing that asset to the location and condition necessary for it to be capable of operating in the manner intended by management. Instead, an entity recognises the proceeds from selling any such items, and the cost of those items as determined by IAS 2 Inventories, in profit or loss. The Group has applied the amendments retrospectively to items of property, plant and equipment made available for use on or after 1 January 2021. Since there was no sale of items produced prior to the property, plant and equipment being available for use, the amendments did not have any impact on the financial position or performance of the Group.
- (c) Amendments to IAS 37 clarify that for the purpose of assessing whether a contract is onerous under IAS 37, the cost of fulfilling the contract comprises the costs that relate directly to the contract. Costs that relate directly to a contract include both the incremental costs of fulfilling that contract (e.g., direct labour and materials) and an allocation of other costs that relate directly to fulfilling that contract (e.g., an allocation of the depreciation charge for an item of property, plant and equipment used in fulfilling the contract as well as contract management and supervision costs). General and administrative costs do not relate directly to a contract and are excluded unless they are explicitly chargeable to the counterparty under the contract. The Group has applied the amendments prospectively to contracts for which it has not yet fulfilled all its obligations at 1 January 2022 and no onerous contracts were identified. Therefore, the amendments did not have any impact on the financial position or performance of the Group.
- (d) *Annual Improvements to IFRSs 2018-2020* sets out amendments to IFRS 1, IFRS 9, Illustrative Examples accompanying IFRS 16, and IAS 41. Details of the amendments that are expected to be applicable to the Group are as follows:

IFRS 9 *Financial Instruments*: clarifies the fees that an entity includes when assessing whether the terms of a new or modified financial liability are substantially different from the terms of the original financial liability. These fees include only those paid or received between the borrower and the lender, including fees paid or received by either the borrower or lender on the other's behalf. The Group has applied the amendment prospectively from 1 January 2022. As there was no modification or exchange of the Group's financial liabilities during the year, the amendment did not have any impact on the financial position or performance of the Group.

2.3 ISSUED BUT NOT YET EFFECTIVE INTERNATIONAL FINANCIAL REPORTING STANDARDS

The Group has not adopted the following standards that have been issued but are not yet effective in the consolidated financial statements:

Amendments to IFRS 10 and IAS 28 (2011)	<i>Sale or Contribution of Assets between an Investor and its Associate or Joint Venture³</i>
Amendments to IFRS 16	<i>Lease Liability in a Sale and Leaseback²</i>
IFRS 17	<i>Insurance Contracts¹</i>
Amendments to IFRS 17	<i>Insurance Contracts^{1, 5}</i>
Amendment to IFRS 17	<i>Initial Application of IFRS 17 and IFRS 9 – Comparative Information⁶</i>
Amendments to IAS 1	<i>Classification of Liabilities as Current or Non-current (the “2020 Amendments”)^{2, 4}</i>
Amendments to IAS 1	<i>Non-current Liabilities with Covenants (the “2022 Amendments”)²</i>
Amendments to IAS 1 and IFRS Practice Statement ²	<i>Disclosure of Accounting Policies¹</i>
Amendments to IAS 8	<i>Definition of Accounting Estimates¹</i>
Amendments to IAS 12	<i>Deferred Tax related to Assets and Liabilities arising from a Single Transaction¹</i>

¹ Effective for annual periods beginning on or after January 1, 2023

² Effective for annual periods beginning on or after January 1, 2024

³ No mandatory effective date yet determined but available for adoption

⁴ As a consequence of the 2022 Amendments, the effective date of the 2020 Amendments was deferred to annual periods beginning on or after 1 January 2024.

⁵ As a consequence of the amendments to IFRS 17 issued in October 2020, IFRS 4 was amended to extend the temporary exemption that permits insurers to apply IAS 39 rather than IFRS 9 for annual periods beginning before 1 January 2023.

⁶ An entity that chooses to apply the transition option relating to the classification overlay set out in this amendment shall apply it on initial application of IFRS 17.

The Group is in the process of making an assessment of the impact of these new and revised IFRSs upon initial application. So far, the Group considers that, these new and revised IFRSs are unlikely to have significant impact on the Group’s results of operations and financial position.

2.4 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Investments in associates and joint ventures

An associate is an entity, in which the Group has a long-term interest of generally not less than 20% of the equity voting rights and over which it is in a position to exercise significant influence. Significant influence is the power to participate in the financial and operating policy decisions of the investee, but is not control or joint control over those policies.

A joint venture is a type of joint arrangement whereby the parties that have joint control of the arrangement have rights to the net assets of the joint venture. Joint control is the contractually agreed sharing of control of an arrangement, which exists only when decisions about the relevant activities require the unanimous consent of the parties sharing control.

The Group's investments in associates and joint ventures are stated in the consolidated statement of financial position at the Group's share of net assets under the equity method of accounting, less any impairment losses. Adjustments are made to bring into line any dissimilar accounting policies that may exist.

The Group's share of the post-acquisition results and other comprehensive income of associates and joint ventures is included in the consolidated statement of profit or loss and other comprehensive income respectively. In addition, when there has been a change recognised directly in the equity of the associate or joint venture, the Group recognises its share of any changes, when applicable, in the consolidated statement of changes in equity. Unrealised gains and losses resulting from transactions between the Group and its associates or joint ventures are eliminated to the extent of the Group's investments in the associates or joint ventures, except where unrealised losses provide evidence of an impairment of the assets transferred. Goodwill arising from the acquisition of associates or joint ventures is included as part of the Group's investments in associates or joint ventures.

If an investment in an associate becomes an investment in a joint venture or vice versa, the retained interest is not remeasured. Instead, the investment continues to be accounted for under the equity method. In all other cases, upon loss of significant influence over the associate or joint control over the joint venture, the Group measures and recognises any retained investment at its fair value. Any difference between the carrying amount of the associate or joint venture upon loss of significant influence or joint control and the fair value of the retained investment and proceeds from disposal is recognised in profit or loss.

When an investment in an associate or a joint venture is classified as held for sale, it is accounted for in accordance with IFRS 5 *Non-current Assets Held for Sale and Discontinued Operations*.

Business combinations and goodwill

Business combinations are accounted for using the acquisition method. The consideration transferred is measured at the acquisition date fair value which is the sum of the acquisition date fair values of assets transferred by the Group, liabilities assumed by the Group to the former owners of the acquiree and the equity interests issued by the Group in exchange for control of the acquiree. For each business combination, the Group elects whether to measure the non-controlling interests in the acquiree that are present ownership interests and entitle their holders to a proportionate share of net assets in the event of liquidation at fair value or at the proportionate share of the acquiree's identifiable net assets. All other components of non-controlling interests are measured at fair value. Acquisition-related costs are expensed as incurred.

2.4 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Business combinations and goodwill (continued)

The Group determines that it has acquired a business when the acquired set of activities and assets includes an input and a substantive process that together significantly contribute to the ability to create outputs.

When the Group acquires a business, it assesses the financial assets and liabilities assumed for appropriate classification and designation in accordance with the contractual terms, economic circumstances and pertinent conditions as at the acquisition date. This includes the separation of embedded derivatives in host contracts of the acquiree.

If the business combination is achieved in stages, the previously held equity interest is remeasured at its acquisition date fair value and any resulting gain or loss is recognised in profit or loss.

Any contingent consideration to be transferred by the acquirer is recognised at fair value at the acquisition date. Contingent consideration classified as an asset or liability is measured at fair value with changes in fair value recognised in profit or loss. Contingent consideration that is classified as equity is not remeasured and subsequent settlement is accounted for within equity.

Goodwill is initially measured at cost, being the excess of the aggregate of the consideration transferred, the amount recognised for non-controlling interests and any fair value of the Group's previously held equity interests in the acquiree over the identifiable net assets acquired and liabilities assumed. If the sum of this consideration and other items is lower than the fair value of the net assets acquired, the difference is, after reassessment, recognised in profit or loss as a gain on bargain purchase.

After initial recognition, goodwill is measured at cost less any accumulated impairment losses. Goodwill is tested for impairment annually or more frequently if events or changes in circumstances indicate that the carrying value may be impaired. The Group performs its annual impairment test of goodwill as at December 31. For the purpose of impairment testing, goodwill acquired in a business combination is, from the acquisition date, allocated to each of the Group's cash-generating units, or groups of cash-generating units, that are expected to benefit from the synergies of the combination, irrespective of whether other assets or liabilities of the Group are assigned to those units or groups of units.

Impairment is determined by assessing the recoverable amount of the cash-generating unit (group of cash-generating units) to which the goodwill relates. Where the recoverable amount of the cash-generating unit (group of cash-generating units) is less than the carrying amount, an impairment loss is recognised. An impairment loss recognised for goodwill is not reversed in a subsequent period.

Where goodwill has been allocated to a cash-generating unit (or group of cash-generating units) and part of the operation within that unit is disposed of, the goodwill associated with the operation disposed of is included in the carrying amount of the operation when determining the gain or loss on the disposal. Goodwill disposed of in these circumstances is measured based on the relative value of the operation disposed of and the portion of the cash-generating unit retained.

2.4 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Fair value measurement

The Group measures its derivative financial instruments, equity investments at fair value through profit or loss, financial assets and liabilities at fair value through profit or loss and biological assets at the end of each reporting period. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either in the principal market for the asset or liability, or in the absence of a principal market, in the most advantageous market for the asset or liability. The principal or the most advantageous market must be accessible by the Group. The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Group uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the consolidated financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 – based on quoted prices (unadjusted) in active markets for identical assets or liabilities
- Level 2 – based on valuation techniques for which the lowest level input that is significant to the measurement is observable, either directly or indirectly
- Level 3 – based on valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

For assets and liabilities that are recognised in the consolidated financial statements on a recurring basis, the Group determines whether transfers have occurred between levels in the hierarchy by re-assessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

Impairment of non-financial assets

Where an indication of impairment exists, or when annual impairment testing for an asset is required (other than inventories, contract assets, deferred tax assets, financial assets, investment properties and non-current assets/a disposal group classified as held for sale), the asset's recoverable amount is estimated. An asset's recoverable amount is the higher of the asset's or cash-generating unit's value in use and its fair value less costs of disposal, and is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets, in which case the recoverable amount is determined for the cash-generating unit to which the asset belongs. In testing a cash-generating unit for impairment, a portion of the carrying amount of a corporate asset (e.g., a headquarters building) is allocated to an individual cash-generating unit if it can be allocated on a reasonable and consistent basis or, otherwise, to the smallest group of cash-generating units.

2.4 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Impairment of non-financial assets (continued)

An impairment loss is recognised only if the carrying amount of an asset exceeds its recoverable amount. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. An impairment loss is charged to profit or loss in the period in which it arises in those expense categories consistent with the function of the impaired asset.

An assessment is made at the end of each reporting period as to whether there is an indication that previously recognised impairment losses may no longer exist or may have decreased. If such an indication exists, the recoverable amount is estimated. A previously recognised impairment loss of an asset other than goodwill is reversed only if there has been a change in the estimates used to determine the recoverable amount of that asset, but not to an amount higher than the carrying amount that would have been determined (net of any depreciation) had no impairment loss been recognised for the asset in prior years. A reversal of such an impairment loss is credited to profit or loss in the period in which it arises unless the asset is carried at a revalued amount, in which case the reversal of the impairment loss is accounted for in accordance with the relevant accounting policy for that revalued asset.

Related parties

A party is considered to be related to the Group if:

- (a) the party is a person or a close member of that person's family and that person
 - (i) has control or joint control over the Group;
 - (ii) has significant influence over the Group; or
 - (iii) is a member of the key management personnel of the Group or of a parent of the Group;

or

- (b) the party is an entity where any of the following conditions applies:
 - (i) the entity and the Group are members of the same group;
 - (ii) one entity is an associate or joint venture of the other entity (or of a parent, subsidiary or fellow subsidiary of the other entity);
 - (iii) the entity and the Group are joint ventures of the same third party;
 - (iv) one entity is a joint venture of a third entity and the other entity is an associate of the third entity;
 - (v) the entity is a post-employment benefit plan for the benefit of employees of either the Group or an entity related to the Group;
 - (vi) the entity is controlled or jointly controlled by a person identified in (a);
 - (vii) a person identified in (a)(i) has significant influence over the entity or is a member of the key management personnel of the entity (or of a parent of the entity); and
 - (viii) the entity, or any member of a group of which it is a part, provides key management personnel services to the Group or to the parent of the Group.

2.4 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Property, plant and equipment and depreciation

Property, plant and equipment, other than construction in progress, are stated at cost less accumulated depreciation and any impairment losses. The cost of an item of property, plant and equipment comprises its purchase price and any directly attributable costs of bringing the asset to its working condition and location for its intended use.

Expenditure incurred after items of property, plant and equipment have been put into operation, such as repairs and maintenance, is normally charged to profit or loss in the period in which it is incurred. In situations where the recognition criteria are satisfied, the expenditure for a major inspection is capitalised in the carrying amount of the asset as a replacement. Where significant parts of property, plant and equipment are required to be replaced at intervals, the Group recognises such parts as individual assets with specific useful lives and depreciates them accordingly.

Depreciation is calculated on the straight-line basis to write off the cost of each item of property, plant and equipment to its residual value over its estimated useful life. The principal annual rates used for this purpose are as follows:

Category	Estimated useful life	Estimated residual value
Buildings	20-39 years	0-5%
Laboratory equipment	3-10 years	0-3%
Transportation equipment	5-10 years	0-5%
Furniture, fixtures and equipment	3-8 years	0-5%
Leasehold improvements	3-30 years	0%
Land	Indefinite useful life	0%

Where parts of an item of property, plant and equipment have different useful lives, the cost of that item is allocated on a reasonable basis among the parts and each part is depreciated separately. Residual values, useful lives and the depreciation method are reviewed, and adjusted if appropriate, at least at each financial year end.

An item of property, plant and equipment including any significant part initially recognised is derecognised upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss on disposal or retirement recognised in profit or loss in the year the asset is derecognised is the difference between the net sales proceeds and the carrying amount of the relevant asset.

Construction in progress represents a building under construction, which is stated at cost less any impairment losses, and is not depreciated. Cost comprises the direct costs of construction and capitalised borrowing costs on related borrowed funds during the period of construction. Construction in progress is reclassified to the appropriate category of property, plant and equipment when completed and ready for use.

2.4 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Intangible assets (other than goodwill)

Intangible assets acquired separately are measured on initial recognition at cost. The cost of other intangible assets acquired in a business combination is the fair value at the date of the acquisition. The useful lives of other intangible assets are assessed to be finite. Other intangible assets with finite lives are subsequently amortised over the useful economic life and assessed for impairment whenever there is an indication that the other intangible asset may be impaired. The amortisation period and the amortisation method for another intangible asset with a finite useful life are reviewed at least at each reporting period end.

The principal estimated useful lives of other intangible assets are as follows:

Category	Estimated useful life	Estimated residual value
Software (i)	3-10 years	0%
Patents (ii)	10-20 years	0%
Client relationship (iii)	9-10 years	0%

- (i) Softwares have an amortisation period of three to ten years based on the estimated useful lives.
- (ii) Patents have an amortisation period of ten to twenty years based on the period covered by their licenses.
- (iii) Client relationships have an amortisation period of nine to ten years based on estimated beneficial period considering industry experience, customer retention rate and others.

Research and development costs

All research costs are charged to the statement of profit or loss as incurred.

Expenditure incurred on projects to develop new products is capitalised and deferred only when the Group can demonstrate the technical feasibility of completing the intangible asset so that it will be available for use or sale, its intention to complete and its ability to use or sell the asset, how the asset will generate future economic benefits, the availability of resources to complete the project and the ability to measure reliably the expenditure during the development. Product development expenditure which does not meet these criteria is expensed when incurred.

2.4 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Biological assets

Biological assets mainly include cynomolgous and macaque non-human primates for experiment, beagles, and rats, which are classified as current assets and macaque non-human primates for breeding, which are classified as non-current assets of the Group. Biological assets are measured on initial recognition and at the end of the reporting period at their fair value less costs to sell, with any resultant gain or loss recognised in the consolidated statement of profit or loss for the period in which it arises. The fair value of monkeys is determined by using the market method through direct comparison or analysis of the recent trading prices of the same or similar assets, and is determined independently by a professional valuer.

Leases

The Group assesses at contract inception whether a contract is, or contains, a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

Group as a lessee

The Group applies a single recognition and measurement approach for all leases, except for short-term leases and leases of low-value assets. The Group recognises lease liabilities to make lease payments and right-of-use assets representing the right to use the underlying assets.

(a) *Right-of-use assets*

Right-of-use assets are recognised at the commencement date of the lease (that is the date the underlying asset is available for use). Right-of-use assets are measured at cost, less any accumulated depreciation and any impairment losses, and adjusted for any remeasurement of lease liabilities. The cost of right-of-use assets includes the amount of lease liabilities recognised, initial direct costs incurred, and lease payments made at or before the commencement date less any lease incentives received. Right-of-use assets are depreciated on a straight-line basis over the shorter of the lease terms and the estimated useful lives of the assets as follows:

Office premises	2 to 24 years
Laboratory equipment	3 to 8 years
Transportation equipment	3 years
Furniture, fixtures and equipment	3 to 5 years
Land use rights	42 to 50 years

If ownership of the leased asset transfers to the Group by the end of the lease term or the cost reflects the exercise of a purchase option, depreciation is calculated using the estimated useful life of the asset.

2.4 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Leases (continued)

Group as a lessee (continued)

(b) Lease liabilities

Lease liabilities are recognised at the commencement date of the lease at the present value of lease payments to be made over the lease term. The lease payments include fixed payments (including in-substance fixed payments) less any lease incentives receivable, variable lease payments that depend on an index or a rate, and amounts expected to be paid under residual value guarantees. The lease payments also include the exercise price of a purchase option reasonably certain to be exercised by the Group and payments of penalties for termination of a lease, if the lease term reflects the Group exercising the option to terminate the lease. The variable lease payments that do not depend on an index or a rate are recognised as an expense in the period in which the event or condition that triggers the payment occurs.

In calculating the present value of lease payments, the Group uses its incremental borrowing rate at the lease commencement date because the interest rate implicit in the lease is not readily determinable. After the commencement date, the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made. In addition, the carrying amount of lease liabilities is remeasured if there is a modification, a change in the lease term, a change in lease payments (e.g., a change to future lease payments resulting from a change in an index or rate) or a change in assessment of an option to purchase the underlying asset.

(c) Short-term leases and leases of low-value assets

The Group applies the short-term lease recognition exemption to its short-term leases of machinery and equipment (that is those leases that have a lease term of 12 months or less from the commencement date and do not contain a purchase option). It also applies the recognition exemption for leases of low-value assets to leases of office equipment and laptop computers that are considered to be of low value.

When the Group enters into a lease in respect of a low-value asset, the Group decides whether to capitalise the lease on a lease-by-lease basis. Lease payments on short-term leases and leases of low-value assets are recognised as an expense on a straight-line basis over the lease term.

Group as a lessor

When the Group acts as a lessor, it classifies at lease inception (or when there is a lease modification) each of its leases as either an operating lease or a finance lease.

Leases in which the Group does not transfer substantially all the risks and rewards incidental to ownership of an asset are classified as operating leases. When a contract contains lease and non-lease components, the Group allocates the consideration in the contract to each component on a relative stand-alone selling price basis. Rental income is accounted for on a straight-line basis over the lease terms and is included in revenue in the statement of profit or loss due to its operating nature. Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and recognised over the lease term on the same basis as rental income. Contingent rents are recognised as revenue in the period in which they are earned.

2.4 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Leases (continued)

Group as a lessor (continued)

Leases that transfer substantially all the risks and rewards incidental to ownership of an underlying asset to the lessee, are accounted for as finance leases.

Investments and other financial assets

Initial recognition and measurement

Financial assets are classified, at initial recognition, as subsequently measured at amortised cost, fair value through other comprehensive income, and fair value through profit or loss.

The classification of financial assets at initial recognition depends on the financial asset's contractual cash flow characteristics and the Group's business model for managing them. With the exception of trade receivables that do not contain a significant financing component or for which the Group has applied the practical expedient, the Group initially measures a financial asset at its fair value plus, in the case of a financial asset not at fair value through profit or loss, transaction costs. Trade receivables that do not contain a significant financing component or for which the Group has applied the practical expedient are measured at the transaction price determined under IFRS 15 in accordance with the policies set out for "Revenue recognition" below.

In order for a financial asset to be classified and measured at amortised cost or fair value through OCI, it needs to give rise to cash flows that are solely payments of principal and interest (SPPI) on the principal amount outstanding. Financial assets with cash flows that are not SPPI are classified and measured at fair value through profit or loss, irrespective of the business model.

The Group's business model for managing financial assets refers to how it manages its financial assets in order to generate cash flows. The business model determines whether cash flows will result from collecting contractual cash flows, selling the financial assets, or both. Financial assets classified and measured at amortised cost are held within a business model with the objective to hold financial assets in order to collect contractual cash flows, while financial assets classified and measured at fair value through other comprehensive income are held within a business model with the objective of both holding to collect contractual cash flows and selling. Financial assets which are not held within the aforementioned business models are classified and measured at fair value through profit or loss.

All regular way purchases and sales of financial assets are recognised on the trade date, that is, the date that the Group commits to purchase or sell the asset. Regular way purchases or sales are purchases or sales of financial assets that require delivery of assets within the period generally established by regulation or convention in the marketplace.

Subsequent measurement

The subsequent measurement of financial assets depends on their classification as follows:

Financial assets at amortised cost (debt instrument)

Financial assets at amortised cost are subsequently measured using the effective interest method and are subject to impairment. Gains and losses are recognised in the statement of profit or loss when the asset is derecognised, modified or impaired.

2.4 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Investments and other financial assets (continued)

Subsequent measurement (continued)

Financial assets at fair value through profit or loss

Financial assets at fair value through profit or loss are carried in the consolidated statement of financial position at fair value with net changes in fair value recognised in the statement of profit or loss.

This category includes derivative instruments and equity investments which the Group had not irrevocably elected to classify at fair value through other comprehensive income. Dividends on equity investments classified as financial assets at fair value profit or loss are also recognised as other income in profit or loss when the right of payment has been established, it is probable that the economic benefits associated with the dividend will flow to the Group and the amount of the dividend can be measured reliably.

A derivative embedded in a hybrid contract, with a financial liability or non-financial host, is separated from the host and accounted for as a separate derivative if the economic characteristics and risks are not closely related to the host; a separate instrument with the same terms as the embedded derivative would meet the definition of a derivative; and the hybrid contract is not measured at fair value through profit or loss. Embedded derivatives are measured at fair value with changes in fair value recognised in the statement of profit or loss. Reassessment only occurs if there is either a change in the terms of the contract that significantly modifies the cash flows that would otherwise be required or a reclassification of a financial asset out of the fair value through profit or loss category.

A derivative embedded within a hybrid contract containing a financial asset host is not accounted for separately. The financial asset host together with the embedded derivative is required to be classified in its entirety as a financial asset at fair value through profit or loss.

Derecognition of financial assets

A financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is primarily derecognised (i.e., removed from the Group's consolidated statement of financial position) when:

- the rights to receive cash flows from the asset have expired; or
- the Group has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a "pass-through" arrangement; and either (a) the Group has transferred substantially all the risks and rewards of the asset, or (b) the Group has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

When the Group has transferred its rights to receive cash flows from an asset or has entered into a pass-through arrangement, it evaluates if, and to what extent, it has retained the risk and rewards of ownership of the asset. When it has neither transferred nor retained substantially all the risks and rewards of the asset nor transferred control of the asset, the Group continues to recognise the transferred asset to the extent of the Group's continuing involvement. In that case, the Group also recognises an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Group has retained.

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the Group could be required to repay.

2.4 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Impairment of financial assets

The Group recognises an allowance for expected credit losses (“ECLs”) for all debt instruments not held at fair value through profit or loss. ECLs are based on the difference between the contractual cash flows due in accordance with the contract and all the cash flows that the Group expects to receive, discounted at an approximation of the original effective interest rate. The expected cash flows will include cash flows from the sale of collateral held or other credit enhancements that are integral to the contractual terms.

General approach

ECLs are recognised in two stages. For credit exposures for which there has not been a significant increase in credit risk since initial recognition, ECLs are provided for credit losses that result from default events that are possible within the next 12 months (a 12-month ECL). For those credit exposures for which there has been a significant increase in credit risk since initial recognition, a loss allowance is required for credit losses expected over the remaining life of the exposure, irrespective of the timing of the default (a lifetime ECL).

At each reporting date, the Group assesses whether the credit risk on a financial instrument has increased significantly since initial recognition. When making the assessment, the Group compares the risk of a default occurring on the financial instrument as at the reporting date with the risk of a default occurring on the financial instrument as at the date of initial recognition and considers reasonable and supportable information that is available without undue cost or effort, including historical and forward-looking information. The Group considers that there has been a significant increase in credit risk when contractual payments are more than 30 days past due.

The Group considers a financial asset in default when contractual payments are 90 days past due. However, in certain cases, the Group may also consider a financial asset to be in default when internal or external information indicates that the Group is unlikely to receive the outstanding contractual amounts in full before taking into account any credit enhancements held by the Group. A financial asset is written off when there is no reasonable expectation of recovering the contractual cash flows.

Financial assets at amortised cost are subject to impairment under the general approach and they are classified within the following stages for measurement of ECLs except for trade receivables and contract assets which apply the simplified approach as detailed below.

Stage 1 – Financial instruments for which credit risk has not increased significantly since initial recognition and for which the loss allowance is measured at an amount equal to 12-month ECLs

Stage 2 – Financial instruments for which credit risk has increased significantly since initial recognition but that are not credit-impaired financial assets and for which the loss allowance is measured at an amount equal to lifetime ECLs

Stage 3 – Financial assets that are credit-impaired at the reporting date (but that are not purchased or originated credit-impaired) and for which the loss allowance is measured at an amount equal to lifetime ECLs

Simplified approach

For trade receivables and contract assets that do not contain a significant financing component or when the Group applies the practical expedient of not adjusting the effect of a significant financing component, the Group applies the simplified approach in calculating ECLs. Under the simplified approach, the Group does not track changes in credit risk, but instead recognises a loss allowance based on lifetime ECLs at each reporting date. The Group has established a provision matrix that is based on its historical credit loss experience, adjusted for forward-looking factors specific to the debtors and the economic environment.

2.4 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Financial liabilities

Initial recognition and measurement

Financial liabilities are classified, at initial recognition, as financial liabilities at fair value through profit or loss, loans and borrowings, or payables, as appropriate.

All financial liabilities are recognised initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs.

The Group's financial liabilities include trade payables, other payables and accruals, interest-bearing bank borrowings, convertible bonds and financial liabilities at fair value through profit and loss.

Subsequent measurement

The subsequent measurement of financial liabilities depends on their classification as follows:

Financial liabilities at fair value through profit or loss

Financial liabilities at fair value through profit or loss include financial liabilities held for trading, financial liabilities as contingent consideration of an acquirer in a business combination to which IFRS 3 applies and financial liabilities designated upon initial recognition as at fair value through profit or loss.

Financial liabilities are classified as held for trading if they are incurred for the purpose of repurchasing in the near term. This category also includes derivative financial instruments entered into by the Group that are not designated as hedging instruments in hedge relationships as defined by IFRS 9. Separated embedded derivatives are also classified as held for trading unless they are designated as effective hedging instruments. Gains or losses on liabilities held for trading are recognised in the statement of profit or loss. The net fair value gain or loss recognised in the statement of profit or loss does not include any interest charged on these financial liabilities.

Financial liabilities designated upon initial recognition as at fair value through profit or loss are designated at the initial date of recognition, and only if the criteria in IFRS 9 are satisfied. Gains or losses on liabilities designated at fair value through profit or loss are recognised in the statement of profit or loss, except for the gains or losses arising from the Group's own credit risk which are presented in other comprehensive income with no subsequent reclassification to the statement of profit or loss. The net fair value gain or loss recognised in the statement of profit or loss does not include any interest charged on these financial liabilities.

Financial liabilities at amortised cost (loans and borrowings)

After initial recognition, interest-bearing loans and borrowings are subsequently measured at amortised cost, using the effective interest rate method unless the effect of discounting would be immaterial, in which case they are stated at cost. Gains and losses are recognised in profit or loss when the liabilities are derecognised as well as through the effective interest rate amortisation process.

Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the effective interest rate. The effective interest rate amortisation is included in finance costs in the statement of profit or loss.

2.4 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Financial liabilities (continued)

Convertible bonds

The component of convertible bonds that exhibits characteristics of a liability is recognised as a liability in the statement of financial position, net of transaction costs. On issuance of convertible bonds, the fair value of the liability component is determined using a market rate for an equivalent non-convertible bond; and this amount is carried as a long-term liability on the amortised cost basis until extinguished on conversion or redemption. The remainder of the proceeds is allocated to the conversion option that is recognised and included in shareholders' equity, net of transaction costs. The carrying amount of the conversion option is not remeasured in subsequent years. Transaction costs are apportioned between the liability and equity components of the convertible bonds based on the allocation of proceeds to the liability and equity components when the instruments are first recognised.

If the conversion option of convertible bonds exhibits characteristics of an embedded derivative, it is separated from its liability component. On initial recognition, the derivative component of the convertible bonds is measured at fair value and presented as part of derivative financial instruments. Any excess of proceeds over the amount initially recognised as the derivative component is recognised as the liability component. Transaction costs are apportioned between the liability and derivative components of the convertible bonds based on the allocation of proceeds to the liability and derivative components when the instruments are initially recognised. The portion of the transaction costs relating to the liability component is recognised initially as part of the liability. The portion relating to the derivative component is recognised immediately in the statement of profit or loss.

Derecognition of financial liabilities

A financial liability is derecognised when the obligation under the liability is discharged or cancelled, or expires.

When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a derecognition of the original liability and a recognition of a new liability, and the difference between the respective carrying amounts is recognised in the statement of profit or loss.

Offsetting of financial instruments

Financial assets and financial liabilities are offset and the net amount is reported in the statement of financial position if there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, or to realise the assets and settle the liabilities simultaneously.

2.4 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Derivative financial instruments and hedge accounting

Initial recognition and subsequent measurement

The Group uses derivative financial instruments, such as forward currency contracts, to hedge its foreign currency risk. Such derivative financial instruments are initially recognised at fair value on the date on which a derivative contract is entered into and are subsequently remeasured at fair value. Derivatives are carried as assets when the fair value is positive and as liabilities when the fair value is negative.

Any gains or losses arising from changes in fair value of derivatives are taken directly to the statement of profit or loss, except for the effective portion of cash flow hedges, which is recognised in other comprehensive income and later reclassified to profit or loss when the hedged item affects profit or loss.

For the purpose of hedge accounting, hedges are classified as:

- fair value hedges when hedging the exposure to changes in the fair value of a recognised asset or liability or an unrecognised firm commitment; or
- cash flow hedges when hedging the exposure to variability in cash flows that is either attributable to a particular risk associated with a recognised asset or liability or a highly probable forecast transaction, or a foreign currency risk in an unrecognised firm commitment; or
- hedges of a net investment in a foreign operation.

At the inception of a hedge relationship, the Group formally designates and documents the hedge relationship to which the Group wishes to apply hedge accounting, the risk management objective and its strategy for undertaking the hedge.

The documentation includes identification of the hedging instrument, the hedged item, the nature of the risk being hedged and how the Group will assess whether the hedging relationship meets the hedge effectiveness requirements (including the analysis of sources of hedge ineffectiveness and how the hedge ratio is determined). A hedging relationship qualifies for hedge accounting if it meets all of the following effectiveness requirements:

- There is “an economic relationship” between the hedged item and the hedging instrument.
- The effect of credit risk does not “dominate the value changes” that result from that economic relationship.
- The hedge ratio of the hedging relationship is the same as that resulting from the quantity of the hedged item that the Group actually hedges and the quantity of the hedging instrument that the Group actually uses to hedge that quantity of hedged item.

Hedges which meet all the qualifying criteria for hedge accounting are accounted for as follows:

2.4 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Derivative financial instruments and hedge accounting (continued)

Cash flow hedges

The effective portion of the gain or loss on the hedging instrument is recognised directly in other comprehensive income in the cash flow hedge reserve, while any ineffective portion is recognised immediately in the statement of profit or loss. The cash flow hedge reserve is adjusted to the lower of the cumulative gain or loss on the hedging instrument and the cumulative change in fair value of the hedged item.

The amounts accumulated in other comprehensive income are accounted for, depending on the nature of the underlying hedged transaction. If the hedged transaction subsequently results in the recognition of a non-financial item, the amount accumulated in equity is removed from the separate component of equity and included in the initial cost or other carrying amount of the hedged asset or liability. This is not a reclassification adjustment and will not be recognised in other comprehensive income for the period. This also applies where the hedged forecast transaction of a non-financial asset or non-financial liability subsequently becomes a firm commitment to which fair value hedge accounting is applied.

For any other cash flow hedges, the amount accumulated in other comprehensive income is reclassified to the statement of profit or loss as a reclassification adjustment in the same period or periods during which the hedged cash flows affect the statement of profit or loss.

If cash flow hedge accounting is discontinued, the amount that has been accumulated in other comprehensive income must remain in accumulated other comprehensive income if the hedged future cash flows are still expected to occur. Otherwise, the amount will be immediately reclassified to the statement of profit or loss as a reclassification adjustment. After the discontinuation, once the hedged cash flow occurs, any amount remaining in accumulated other comprehensive income is accounted for depending on the nature of the underlying transaction as described above.

Current versus non-current classification

Derivative instruments that are not designated as effective hedging instruments are classified as current or non-current or separated into current and non-current portions based on an assessment of the facts and circumstances (i.e., the underlying contracted cash flows).

- Where the Group expects to hold a derivative as an economic hedge (and does not apply hedge accounting) for a period beyond 12 months after the end of the reporting period, the derivative is classified as non-current (or separated into current and non-current portions) consistently with the classification of the underlying item.
- Embedded derivatives that are not closely related to the host contract are classified consistently with the cash flows of the host contract.
- Derivative instruments that are designated as, and are effective hedging instruments, are classified consistently with the classification of the underlying hedged item. The derivative instruments are separated into current portions and non-current portions only if a reliable allocation can be made.

2.4 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Treasury shares

Own equity instruments which are reacquired and held by the Company or the Group (treasury shares) are recognised directly in equity at cost. No gain or loss is recognised in the statement of profit or loss on the purchase, sale, issue or cancellation of the Group's own equity instruments.

Inventories

Inventories are stated at the lower of cost and net realisable value. Cost is determined on a weighted average cost basis and, in the case of work in progress and finished goods, comprises direct materials, direct labour and an appropriate proportion of overheads. Net realisable value is based on estimated selling prices less any estimated costs to be incurred to completion and disposal.

Cash and cash equivalents

For the purpose of the consolidated statements of cash flows, cash and cash equivalents comprise cash on hand and demand deposits, and short term highly liquid investments that are readily convertible into known amounts of cash, are subject to an insignificant risk of changes in value, and have a short maturity of generally within three months when acquired, less bank overdrafts which are repayable on demand and form an integral part of the Group's cash management.

For the purpose of the consolidated statement of financial position, cash and cash equivalents comprise cash on hand and at banks, including term deposits, and assets similar in nature to cash, which are not restricted as to use.

Provisions

A provision is recognised when a present obligation (legal or constructive) has arisen as a result of a past event and it is probable that a future outflow of resources will be required to settle the obligation, provided that a reliable estimate can be made of the amount of the obligation.

When the effect of discounting is material, the amount recognised for a provision is the present value at the end of the reporting period of the future expenditures expected to be required to settle the obligation. The increase in the discounted present value amount arising from the passage of time is included in finance costs in the statement profit or loss.

A contingent liability recognised in a business combination is initially measured at its fair value.

Subsequently, it is measured at the higher of (i) the amount that would be recognised in accordance with the general policy for provisions above and (ii) the amount initially recognised less, when appropriate, the amount of income recognised in accordance with the policy for revenue recognition.

2.4 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Income tax

Income tax comprises current and deferred tax. Income tax relating to items recognised outside profit or loss is recognised outside profit or loss, either in other comprehensive income or directly in equity.

Current tax assets and liabilities are measured at the amount expected to be recovered from or paid to the taxation authorities, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of each reporting period, taking into consideration interpretations and practices prevailing in the countries in which the Group operates.

Deferred tax is provided, using the liability method, on all temporary differences at the end of each reporting period between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes.

Deferred tax liabilities are recognised for all taxable temporary differences, except:

- when the deferred tax liability arises from the initial recognition of goodwill or an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss; and
- in respect of taxable temporary differences associated with investments in subsidiaries, associates and joint ventures, when the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not reverse in the foreseeable future.

Deferred tax assets are recognised for all deductible temporary differences, and the carryforward of unused tax credits and any unused tax losses. Deferred tax assets are recognised to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carryforward of unused tax credits and unused tax losses can be utilised, except:

- when the deferred tax asset relating to the deductible temporary differences arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss; and
- in respect of deductible temporary differences associated with investments in subsidiaries, associates and joint ventures, deferred tax assets are only recognised to the extent that it is probable that the temporary differences will reverse in the foreseeable future and taxable profit will be available against which the temporary differences can be utilised.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilised. Unrecognised deferred tax assets are reassessed at the end of each reporting period and are recognised to the extent that it has become probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be recovered.

2.4 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Income tax (continued)

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply to the period when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of each reporting period.

Deferred tax assets and deferred tax liabilities are offset if and only if the Group has a legally enforceable right to set off current tax assets and current tax liabilities and the deferred tax assets and deferred tax liabilities relate to income taxes levied by the same taxation authority on either the same taxable entity or different taxable entities which intend either to settle current tax liabilities and assets on a net basis, or to realise the assets and settle the liabilities simultaneously, in each future period in which significant amounts of deferred tax liabilities or assets are expected to be settled or recovered.

Government grants

Government grants are recognised at their fair value where there is reasonable assurance that the grant will be received and all attaching conditions will be complied with. When the grant relates to an expense item, it is recognised as income on a systematic basis over the periods that the costs, for which it is intended to compensate, are expensed.

Where the grant relates to an asset, the fair value is credited to a deferred income account and is released to the statement of profit or loss over the expected useful life of the relevant asset by equal annual instalments or deducted from the carrying amount of the asset and released to the statement of profit or loss.

Revenue recognition

Revenue from contracts with customers

The Group recognises revenue when (or as) a performance obligation is satisfied, i.e. when “control” of the goods or services underlying the particular performance obligation is transferred to the customer.

A performance obligation represents a good or service (or a bundle of goods or services) that is distinct or a series of distinct goods or services that are substantially the same.

Control is transferred over time and revenue is recognised over time by reference to the progress towards complete satisfaction of the relevant performance obligation if one of the following criteria is met:

- the customer simultaneously receives and consumes the benefits provided by the Group’s performance as the Group performs;
- the Group’s performance creates and enhances an asset that the customer controls as the Group performs; or
- the Group’s performance does not create an asset with an alternative use to the Group and the Group has an enforceable right to payment for performance completed to date.

Otherwise, revenue is recognised at a point in time when the customer obtains control of the distinct good or service.

2.4 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Revenue recognition (continued)

Revenue from contracts with customers (continued)

For contracts that contain more than one performance obligations, the Group allocates the transaction price to each performance obligation on a relative stand-alone selling price basis.

The stand-alone selling price of the distinct good or service underlying each performance obligation is determined at contract inception. It represents the price at which the Group would sell a promised good or service separately to a customer. If a stand-alone selling price is not directly observable, the Group estimates it using appropriate techniques such that the transaction price ultimately allocated to any performance obligation reflects the amount of consideration to which the Group expects to be entitled in exchange for transferring the promised goods or services to the customer.

The Group has different contractual arrangements with different customers under two different charge models: full-time-equivalents ("FTE") or fee-for-services ("FFS") model.

Certain laboratory and CMC (small molecule CDMO) services are under the FTE model. For services under the FTE model, a dedicated team of employees are provided to a customer's project for a specific time and charge the customer at fixed rate per employee. The customer simultaneously receives and consumes benefits provided by the Group's performance. Therefore, the revenue is recognised over time at the amount to which the Group has the right to invoice for the performance completed to date (i.e. FTE billable amounts, which are calculated based on the number of employees assigned to the project and the time employees worked), usually in the form of a monthly or quarterly statement. Under the FTE model, the Group measures its progress by using units produced/services transferred to the customer to date (output method).

Certain laboratory, CMC (small molecule CDMO), clinical development services and biologics and CGT services are under the FFS model, and the revenue is recognised at a point in time when the Group transfers the control for services/deliverable units at a point in time and has right to payment from the customers for the services performed upon finalisation, delivery and acceptance of the deliverable units.

Certain of the revenue from laboratory and clinical development services are under the FFS model, and the revenue is recognised over time, as the Group's performance has created an asset with no alternative use and the Group has an enforceable right for payments for performance completed to date. The selection of the method to measure progress towards completion requires judgement and is based on the nature of the products or services to be provided. Depending on which better depicts the transfer of value to the customer, the Group generally measures its progress using either cost-to-cost (input method) or units produced/services transferred to the customer to date (output method).

Under the input method, the Group uses the known cost measure of progress when it best depicts the transfer of value to the customer which occurs as the Group incurs costs on its contract, under the cost-to-cost measure of progress, the extent of progress towards completion is measured based on the ratio of costs incurred to date to the total estimated costs at completion of the performance obligation. Revenue is recorded proportionally as costs are incurred. Under the output method, the units produced/services transferred to the customer to date are measured to the extent of progress towards completion, based on discrete services or time-based increments.

2.4 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Revenue recognition (continued)

Revenue from other sources

Rental income arising from leases on investment properties is accounted for on a straight-line basis over the lease terms and is included in revenue.

Other income

Interest income from a financial asset is recognised when it is probable that the economic benefits will flow to the Group and the amount of income can be measured reliably. Interest income is accrued for each period, by reference to the principal outstanding and at the effective interest rate applicable, which is the rate that exactly discounts the estimated future cash receipts through the expected life of the financial asset to that asset's net carrying amount on initial recognition.

Dividend income is recognised when the shareholders' right to receive payment has been established, it is probable that the economic benefits associated with the dividend will flow to the Group and the amount of the dividend can be measured reliably.

Contract assets

A contract asset is the right to consideration in exchange for goods or services transferred to the customer. If the Group performs by transferring goods or services to a customer before the customer pays consideration or before payment is due, a contract asset is recognised for the earned consideration that is conditional. Contract assets are subject to impairment assessment, details of which are included in the accounting policies for impairment of financial assets.

Contract liabilities

A contract liability is recognised when a payment is received or a payment is due (whichever is earlier) from a customer before the Group transfers the related goods or services. Contract liabilities are recognised as revenue when the Group performs under the contract (i.e., transfers control of the related goods or services to the customer).

Contract costs

Other than the costs which are capitalised as inventories, property, plant and equipment and intangible assets, costs incurred to fulfil a contract with a customer are capitalised as an asset if all of the following criteria are met:

- (a) the costs relate directly to a contract or to an anticipated contract that the Group can specifically identify;
- (b) the costs generate or enhance resources of the Group that will be used in satisfying (or in continuing to satisfy) performance obligations in the future; and
- (c) the costs are expected to be recovered.

The capitalised contract costs are amortised and charged to the statement of profit or loss on a systematic basis that is consistent with the transfer to the customer of the goods or services to which the asset relates. Other contract costs are expensed as incurred.

2.4 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Share-based payments

The Group operate several share incentive schemes for the purpose of providing incentives and rewards to eligible participants who contribute to the success of the Group's operations. Employees (including directors) of the Group receive remuneration in the form of share-based payments, whereby employees render services in exchange for equity instruments ("equity-settled transactions").

The cost of equity-settled transactions with employees is measured by reference to the fair value at the date on which they are granted. The fair value is computed based on their most recent post-money valuations. The cost of equity-settled transactions is recognised in employee benefit expense, together with a corresponding increase in equity, over the period in which the performance and service conditions are fulfilled. The cumulative expense recognised for equity-settled transactions at the end of each reporting period until the vesting date reflects the extent to which the vesting period has expired and the Group's best estimate of the number of equity instruments that will ultimately vest. The charge or credit to the consolidated statement of profit or loss for a period represents the movement in the cumulative expense recognised as at the beginning and end of that period.

Service and non-market performance conditions are not taken into account when determining the grant date fair value of awards, but the likelihood of the conditions being met is assessed as part of the Group's best estimate of the number of equity instruments that will ultimately vest. Market performance conditions are reflected within the grant date fair value. Any other conditions attached to an award, but without an associated service requirement, are considered to be non-vesting conditions. Non-vesting conditions are reflected in the fair value of an award and lead to an immediate expensing of an award unless there are also service and/or performance conditions.

For awards that do not ultimately vest because non-market performance and/or service conditions have not been met, no expense is recognised. Where awards include a market or non-vesting condition, the transactions are treated as vesting irrespective of whether the market or non-vesting condition is satisfied, provided that all other performance and/or service conditions are satisfied.

Where the terms of an equity-settled award are modified, as a minimum an expense is recognised as if the terms had not been modified, if the original terms of the award are met. In addition, an expense is recognised for any modification that increases the total fair value of the share-based payments, or is otherwise beneficial to the employee as measured at the date of modification.

Where an equity-settled award is cancelled, it is treated as if it had vested on the date of cancellation, and any expense not yet recognised for the award is recognised immediately. This includes any award where non-vesting conditions within the control of either the Group or the employee are not met. However, if a new award is substituted for the cancelled award, and is designated as a replacement award on the date that it is granted, the cancelled and new awards are treated as if they were a modification of the original award, as described in the previous paragraph.

The dilutive effect of outstanding options is reflected as additional share dilution in the computation of earnings per share.

2.4 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Other employee benefits

Retirement benefits

The employees of the Group's subsidiaries which operate in Mainland China are required to participate in a central pension scheme operated by the local municipal government. The Group is required to contribute a certain percentage of their payroll costs to the central pension scheme. The contributions are charged to profit or loss as they become payable in accordance with the rules of the central pension scheme.

Employee benefits to all eligible employees of the overseas subsidiaries are made in accordance with the rules set forth in the collective labour agreement, and recorded as an expense in the period they are due as a charge to profit or loss.

Borrowing costs

Borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, i.e., assets that necessarily take a substantial period of time to get ready for their intended use or sale, are capitalised as part of the cost of those assets. The capitalisation of such borrowing costs ceases when the assets are substantially ready for their intended use or sale. Investment income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowing costs capitalised. All other borrowing costs are expensed in the period in which they are incurred. Borrowing costs consist of interest and other costs that an entity incurs in connection with the borrowing of funds.

Dividends

Final dividends are recognised as a liability when they are approved by the shareholders in a general meeting. Proposed final dividends are disclosed in the notes to the financial statements.

Foreign currencies

These financial statements are presented in RMB, which is the Company's functional currency. Each entity in the Group determines its own functional currency and items included in the financial statements of each entity are measured using that functional currency. Foreign currency transactions recorded by the entities in the Group are initially recorded using their respective functional currency rates prevailing at the dates of the transactions. Monetary assets and liabilities denominated in foreign currencies are translated at the functional currency rates of exchange ruling at the end of the reporting period. Differences arising on settlement or translation of monetary items are recognised in the statement of profit or loss.

Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was measured. The gain or loss arising on translation of a non-monetary item measured at fair value is treated in line with the recognition of the gain or loss on change in fair value of the item (i.e., translation differences on the item whose fair value gain or loss is recognised in other comprehensive income or profit or loss are also recognised in other comprehensive income or profit or loss, respectively).

2.4 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Foreign currencies (continued)

In determining the exchange rate on initial recognition of the related asset, expense or income on the derecognition of a non-monetary asset or non-monetary liability relating to an advance consideration, the date of initial transaction is the date on which the Group initially recognises the non-monetary asset or non-monetary liability arising from the advance consideration. If there are multiple payments or receipts in advance, the Group determines the transaction date for each payment or receipt of the advance consideration.

The functional currencies of certain overseas subsidiaries are currencies other than RMB. As at the end of each reporting period, the assets and liabilities of these entities are translated into the presentation currency of the Company at the exchange rates prevailing at the end of each reporting period and their statements of profit or loss are translated into RMB at the exchange rates that approximate to those prevailing at the dates of the transactions.

The resulting exchange differences are recognised in other comprehensive income and accumulated in the exchange fluctuation reserve. On disposal of a foreign operation, the component of other comprehensive income relating to that particular foreign operation is recognised in profit or loss.

Any goodwill arising on the acquisition of a foreign operation and any fair value adjustments to the carrying amounts of assets and liabilities arising on acquisition are treated as assets and liabilities of the foreign operation and translated at the closing rate.

For the purpose of the consolidated statement of cash flows, the cash flows of overseas subsidiaries are translated into RMB at the exchange rates ruling at the dates of the cash flows. Frequently recurring cash flows of overseas subsidiaries which arise throughout the year are translated into RMB at the weighted average exchange rates for the year.

3. SIGNIFICANT ACCOUNTING JUDGEMENTS AND ESTIMATES

The preparation of the Group's consolidated financial statements requires management to make judgements, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and their accompanying disclosures, and the disclosure of contingent liabilities. Uncertainty about these assumptions and estimates could result in outcomes that could require a material adjustment to the carrying amounts of the assets or liabilities affected in the future.

Judgements

In the process of applying the Group's accounting policies, management has made the following judgements, apart from those involving estimations, which have the most significant effect on the amounts recognised in the consolidated financial statements:

Determining the timing of satisfaction of performance obligations

The Group has different contractual arrangements with different customers. In determining the timing of satisfaction of performance obligations, management reviews the contract terms of each individual contract.

For certain types of revenue under the FFS model, the directors of the Company have determined that performance obligations are satisfied over time. Significant judgement is required in determining whether the terms of the Group's contracts with customers in relation to certain types of revenue under the FFS model create an enforceable right to payment for the Group.

Determining the method for measuring progress towards complete satisfaction of performance obligations

Depending on which better depicts the transfer of value to the customer, the directors of the Company make judgement to measure the progress of the projects using either the input method or the output method.

Determining significant influence over entities in which the Group holds less than 20% equity interests

The Group's certain investments in associates are accounted for under the equity method of accounting if the Group has significant influence over these entities by way of participation in the policy-making process, despite the fact that the Group's direct or indirect equity interests in these associates were lower than 20%.

Deferred tax assets

Deferred tax assets are recognised for all deductible temporary differences and unused tax losses to the extent that it is probable that taxable profit will be available against which the losses can be utilised. Significant management judgement is required to determine the amount of deferred tax assets that can be recognised, based upon the likely timing and level of future taxable profits together with future tax planning strategies. The carrying amount of deferred tax assets relating to recognised tax losses at December 31, 2022 was RMB79,656,000 (2021: RMB16,403,000). The amount of unrecognised tax losses and unrecognised temporary differences at December 31, 2022 was RMB1,543,930,000 (2021: RMB908,902,000). Further details are contained in note 21 to the financial statements.

3. SIGNIFICANT ACCOUNTING JUDGEMENTS AND ESTIMATES (CONTINUED)

Estimation uncertainty

The key assumptions concerning the future and other key sources of estimation uncertainty at the end of each reporting period, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are described below.

Impairment of goodwill

The Group determines whether goodwill is impaired at least on an annual basis. This requires an estimation of the value in use of the cash-generating units to which the goodwill is allocated. Estimating the value in use requires the Group to make an estimate of the expected future cash flows from the cash-generating units and also to choose suitable discount rates in order to calculate the present value of those cash flows. The carrying amount of goodwill at December 31, 2022 was RMB2,687,865,000 (2021: RMB2,096,265,000). Further details are given in note 16.

Share-based payments

The Group measures the cost of equity-settled transactions with employees by reference to the fair value of the equity instruments at the date at which they are granted. Details of share-based payments are contained in notes 40.

The share-based compensation expense is measured based on the fair value of the share incentives as calculated under the Black-Scholes pricing model. The Group is responsible for determining the fair value of the restricted shares granted to employees. The key assumptions used to determine the fair value of the share unit incentives at the grant date and the re-measurement dates include share price on the measurement date, expected volatility and risk-free interest rate. Changes in these assumptions could significantly affect the fair value of share incentives and hence the amount of compensation expenses the Group recognises in our consolidated financial statements.

The cost of equity-settled transactions is recognised in employee benefit expense, together with a corresponding increase in equity, over the period in which the performance and service conditions are fulfilled. The cumulative expense recognised for equity-settled transactions at the end of each reporting period until the vesting date reflects the extent to which the vesting period has expired and the Group's best estimates of the number of equity instruments that will ultimately vest. The charge or credit to the consolidated statement of profit or loss for a period represents the movement in the cumulative expense recognised as at the beginning and end of that period.

Fair value of biological assets

The Group's biological assets are valued at fair value less costs to sell. The fair value of biological assets is determined based on the market-determined prices as at each year end adjusted with reference to the species, age, and growing condition to reflect differences in stages of growth of biological. Any changes in the estimates may affect the fair value of the biological assets significantly. The management reviews the assumptions and estimates periodically to identify any significant change in fair value of biological assets. Further details are given in note 20 to the financial statements.

3. SIGNIFICANT ACCOUNTING JUDGEMENTS AND ESTIMATES (CONTINUED)

Estimation uncertainty (continued)

Provision for expected credit losses on trade receivables and contract assets

The Group uses a provision matrix to calculate ECLs for trade receivables and contract assets. The provision rates are based on days past due for groupings of various customer segments that have similar loss patterns.

The provision matrix is initially based on the Group's historical observed default rates. The Group will calibrate the matrix to adjust the historical credit loss experience with forward-looking information. For instance, if forecast economic conditions (i.e., gross domestic products) are expected to deteriorate over the next year which can lead to an increased number of defaults in the manufacturing sector, the historical default rates are adjusted. At each reporting date, the historical observed default rates are updated and changes in the forward-looking estimates are analysed.

The assessment of the correlation among historical observed default rates, forecast economic conditions and ECLs is a significant estimate. The amount of ECLs is sensitive to changes in circumstances and forecast economic conditions. The Group's historical credit loss experience and forecast of economic conditions may also not be representative of a customer's actual default in the future. The information about the ECLs on the Group's trade receivables and contract assets is disclosed in notes 25 and 26.

Fair value of financial instruments

If the market for a financial instrument is not active, the Group estimates fair value by using a valuation technique. Valuation techniques include using recent prices in arm's length market transactions between knowledgeable and willing parties, if available, reference to the current fair value of another instrument that is substantially the same, or discounted cash flow analyses and option pricing models. To the extent practicable, valuation technique makes the maximum use of market inputs. However, where market inputs are not available, management needs to make estimates on such unobservable market inputs.

Impairment of non-financial assets (other than goodwill)

The Group assesses whether there are any indicators of impairment for all non-financial assets at the end of each reporting period. Other non-financial assets are tested for impairment when there are indicators that the carrying amounts may not be recoverable. An impairment exists when the carrying value of an asset or a cash-generating unit exceeds its recoverable amount, which is the higher of its fair value less costs of disposal and its value in use. The calculation of the fair value less costs of disposal is based on available data from binding sales transactions in an arm's length transaction of similar assets or observable market prices less incremental costs for disposing of the asset. When value in use calculations are undertaken, management must estimate the expected future cash flows from the asset or cash-generating unit and choose a suitable discount rate in order to calculate the present value of those cash flows.

3. SIGNIFICANT ACCOUNTING JUDGEMENTS AND ESTIMATES (CONTINUED)

Estimation uncertainty (continued)

Valuation of the embedded derivatives in convertible bonds

The fair value for the embedded derivatives in convertible bonds are established by using valuation techniques. The valuation model is sensitive to changes in certain key inputs including volatility of share prices and risk-free rate that require significant management estimates. Any changes in the estimates and assumptions will affect the fair values of the embedded derivatives in convertible bonds. The carrying amount of embedded derivatives is disclosed in Note 32 and Note 37.

Inventories and contract costs

The Group assesses periodically if cost of inventories and contract cost may not be recoverable based on an assessment of the net realizable value of inventories and contract cost. Allowances are applied to inventories and contract cost where events or changes in circumstances indicate that the net realizable value is lower than the cost of inventories or contract cost. The identification of obsolete inventories requires the use of judgment and estimates on the conditions and usefulness of the inventories and in the case of contract cost, the net realizable value has been determined based on the contracted selling price to be recognised upon the completion of the contract cost less all estimated remaining costs to completion and costs necessary to provide the service. Where the expectation is different from the original estimate, such difference will impact the carrying value of the inventories and contract cost in the year in which such estimate changes.

Useful lives and residual values of property, plant and equipment

The Group determines the estimated useful lives, residual values and related depreciation charges for its property, plant and equipment. This estimate is based on the historical experience of the actual useful lives of property, plant and equipment of similar nature and functions. The Group will increase the depreciation charge where useful lives are less than previously estimated lives, or will write-off or write-down technically obsolete or non-strategic assets that have been abandoned or sold.

Useful lives and residual values of other intangible assets

The Group's management determines the useful lives, residual values and related amortisation charges for its other intangible assets. This estimate is based on the historical experience of the actual useful lives of other intangible assets of similar nature and functions and may vary significantly as a result of technical innovations and keen competitions from competitors, resulting in higher amortisation charge and/or write-off or write-down of technically obsolete assets when useful lives are less than previously estimated. The Group will increase the amortisation charges where useful lives are less than previously estimated lives, or will write-off or write-down technically obsolete or non-strategic assets that have been abandoned or sold.

4. OPERATING SEGMENT INFORMATION

For management purposes, the Group is organised into business units based on their services and has five reportable business segments as follows:

- The laboratory services segment includes laboratory chemistry (including medicinal chemistry, synthetic chemistry, analytical and purification chemistry, and computer-aided drug design (CADD)) and bioscience services (including *in vitro* and *in vivo* DMPK/ADME, *in vitro* biology and *in vivo* pharmacology, safety assessment and U.S. laboratory services)
- The CMC (small molecule CDMO) services segment includes process development and manufacturing, materials science/pre-formulation, formulation development and manufacturing, and analytical development services
- The clinical development services segment includes overseas clinical development services (including radiolabelled science services and early stage clinical trial services) and domestic clinical development services (including clinical research services and site management services)
- The Biologics and CGT services segment includes biologics discovery, development and manufacturing services (CDMO), CGT lab and Gene therapy CDMO services
- The “Others” segment

Segment revenue and results

The following is an analysis of the Group’s revenue and results by reportable segments.

Year ended December 31, 2022	Laboratory services RMB'000	CMC (small molecule CDMO) services RMB'000	Clinical development services RMB'000	Biologics and CGT services RMB'000	Others RMB'000	Total RMB'000
Segment revenue	6,244,662	2,406,722	1,393,573	195,143	26,188	10,266,288
Segment results	2,805,164	831,739	159,685	(54,142)	6,830	3,749,276
Unallocated amounts:						
Other income and gains						425,786
Other expenses						(222,296)
Selling and distribution expenses						(230,070)
Administrative expenses						(1,551,660)
Research and development costs						(282,325)
Impairment losses on financial and contract assets, net of reversal						(21,157)
Finance costs						(167,312)
Share of losses of associates						(33,851)
Group’s profit before tax						1,666,391

4. OPERATING SEGMENT INFORMATION (CONTINUED)**Segment revenue and results (continued)**

The following is an analysis of the Group's revenue and results by reportable segments. (continued)

Year ended December 31, 2021	Laboratory services RMB'000	CMC (small molecule CDMO) services RMB'000	Clinical development services RMB'000	Biologics and CGT services RMB'000	Others RMB'000	Total RMB'000
Segment revenue	4,565,801	1,746,168	956,358	150,966	24,477	7,443,770
Segment results	1,979,967	607,952	98,567	(20,905)	6,463	2,672,044
Unallocated amounts:						
Other income and gains						489,843
Other expenses						(13,792)
Selling and distribution expenses						(155,617)
Administrative expenses						(908,210)
Research and development costs						(151,775)
Impairment losses on financial and contract assets, net of reversal						(10,269)
Finance costs						(83,073)
Share of losses of associates						71,845
Group's profit before tax						1,910,996

Management monitors the results of the Group's business segments separately for the purpose of making decisions about resource allocation and performance assessment. No analysis of segment assets and liabilities is presented as management does not regularly review such information for the purposes of resource allocation and performance assessment. Therefore, only segment revenue and segment results are presented.

4. OPERATING SEGMENT INFORMATION (CONTINUED)

Geographical information

(a) Revenue

	2022 RMB'000	2021 RMB'000
North America	6,644,016	4,778,853
Mainland China	1,483,241	1,274,974
Europe	1,880,537	1,163,111
Asia (except Mainland China)	233,482	192,874
Others	25,012	33,958
	10,266,288	7,443,770

The revenue information above is based on the locations of the customers.

(b) Non-current assets

	2022 RMB'000	2021 RMB'000
Mainland China	9,528,332	6,680,284
Europe	2,150,894	1,386,584
North America	1,811,597	1,318,092
Asia (except Mainland China)	28,599	35,004
	13,519,422	9,419,964

The non-current asset information above is based on the locations of the assets and excludes equity investments at fair value through profit or loss and deferred tax assets.

Information about major customers

No revenue from sales to a single customer amounted to 10% or more of the Group's revenue during each reporting period.

5. REVENUE

An analysis of revenue is as follows:

	2022 RMB'000	2021 RMB'000
Revenue from contracts with customers	10,266,288	7,442,167
Revenue from other sources	–	1,603
	10,266,288	7,443,770

Revenue from contracts with customers

(a) Disaggregated revenue information

Segments	2022 RMB'000	2021 RMB'000
Types of services		
Laboratory services	6,244,662	4,565,801
CMC (small molecule CDMO) services	2,406,722	1,746,168
Clinical development services	1,393,573	956,358
Biologics and CGT services	195,143	150,966
Others	26,188	22,874
Total revenue from contracts with customers	10,266,288	7,442,167
Timing of revenue recognition		
Services transferred at a point of time	5,468,284	4,047,238
Services transferred over time	4,798,004	3,394,929
Total revenue from contracts with customers	10,266,288	7,442,167

(b) Performance obligations

The Group has different contractual arrangements with different customers under two different charge methods: Full-Time-Equivalent (“FTE”) or Fee-For-Service (“FFS”) model.

All services under the FTE model, revenue is recognised over time at the amount to which the Group has the right to invoice for services performed. Therefore, under practical expedients allowed by IFRS 15, the Group does not disclose the value of unsatisfied performance obligations under the FTE model.

Similarly, for certain services under the FFS model, revenue is recognised over time and contracts are generally within an original expected length of one year or less. Therefore, the practical expedients are also applied.

6. OTHER INCOME AND GAINS AND OTHER EXPENSES

	2022 RMB'000	2021 RMB'000
Other income		
Interest income	35,213	64,407
Government grants and subsidies related to		
– Assets (i)	12,525	11,912
– Income (ii)	47,348	54,689
	95,086	131,008
Other gains		
Gains on fair value change of equity investment at fair value through profit or loss	–	68,517
Gains on fair value change of biological assets	245,589	69,026
Gains on disposal of an equity investment at fair value through profit or loss	72,475	59,455
Gains on termination of lease contracts	603	219
Gains on financial assets at fair value through profit or loss	7,150	52,522
Gains on derivative financial instruments	–	7,500
Gains resulting from transfer of an investment in associates to equity investments at fair value through profit or loss	–	25,452
Gains on fair value change of financial liabilities at fair value through profit or loss	–	72,854
Gains on financial assets at amortised cost	2,647	–
Others	2,236	3,290
	330,700	358,835
	425,786	489,843
Other expenses		
Foreign currency loss, net	(42,392)	(3,155)
Losses on disposal of property, plant and equipment	(1,817)	(1,590)
Losses on derivative financial instruments	(2,179)	–
Losses on fair value change of equity investment at fair value through profit or loss	(118,678)	–
Losses on fair value change of financial liabilities at fair value through profit or loss	(30,534)	–
Others	(26,696)	(9,047)
	(222,296)	(13,792)

6. OTHER INCOME AND GAINS AND OTHER EXPENSES (CONTINUED)

- (i) The Group has received certain government grants related to assets to invest in laboratory equipment and plant. The grants related to assets were recognised in profit and loss over the useful lives of relevant assets. Details of these grants related to assets are set out in note 38.
- (ii) The government grants and subsidies related to income have been received to compensate for the Group's research and development expenditures. Some of the grants related to income have future related costs expected to be incurred and require the Group to comply with conditions attached to the grants and the government to acknowledge the compliance of these conditions. These grants related to income are recognised in the statement of profit or loss on a systematic basis over the periods that the costs, which it is intended to compensate, are expensed.

Other government grants related to income that are receivable as compensation for expenses or losses already incurred or for the purpose of giving immediate financial support to the Group with no future related costs are recognised in profit or loss in the period in which they become receivable.

7. FINANCE COSTS

	2022 RMB'000	2021 RMB'000
Interest expenses on bank and other borrowings	48,867	46,589
Interest expenses on convertible bond – debt component	111,479	57,120
Interest expenses on lease liabilities	31,358	14,030
Total interest expenses	191,704	117,739
Less: Interest capitalised	(24,392)	(34,666)
	167,312	83,073

8. PROFIT BEFORE TAX

The Group's profit before tax is arrived at after charging/(crediting):

	Notes	2022 RMB'000	2021 RMB'000
Depreciation of property, plant and equipment	14	590,336	451,229
Depreciation of right-of-use assets	15	144,142	101,484
Depreciation of investment property		–	344
Amortisation of other intangible assets	17	31,585	24,616
Staff costs* (including directors' and chief executive's remuneration):			
Salaries and other benefits		3,573,842	2,506,164
Pension scheme contributions, social welfare and other welfare**		1,000,285	686,739
Share-based compensation expenses		177,175	67,529
Gains resulting from transfer of an investment in associates to equity investments at fair value through profit or loss		–	(25,452)
Gains on fair value change of financial assets at fair value through profit or loss		(7,150)	(52,522)
Losses/(gains) on fair value change of equity investments at fair value through profit or loss		118,678	(68,517)
Gains on fair value change of biological assets	20	(245,589)	(69,026)
Gains on financial assets at amortised cost		(2,647)	–
Losses/(gains) on fair value change of financial liabilities at fair value through profit or loss	32	30,534	(72,854)
Gains on disposal of an equity investment at fair value through profit or loss		(72,475)	(59,455)
Impairment losses on inventories, net of reversal		3,917	2,842
Impairment losses on financial and contract assets, net of reversal		21,157	10,269
Foreign currency loss, net		42,392	3,155
Losses/(gains) on derivative financial instruments		2,179	(7,500)
Auditor's remuneration		4,850	4,760

* The staff costs for the year are included in "Cost of sales", "Administrative expenses", "Selling and distribution expenses" and "Research and development costs" in the consolidated statement of profit or loss.

** There are no forfeited contributions that may be used by the Group as the employer to reduce the existing level of contributions.

9. DIRECTORS' AND CHIEF EXECUTIVE'S REMUNERATION

Details of the emoluments paid or payable to the directors and the chief executive of the Company for the services provided to the Group during each reporting period are as follows:

2022	Fees RMB'000	Salaries RMB'000	Performance related bonuses RMB'000	Social welfare benefits RMB'000	Total RMB'000
Chief executive and executive director: Dr. Boliang LOU	–	2,100	–	99	2,199
Executive directors: Mr. Xiaoqiang LOU	–	1,800	–	99	1,899
Ms. Bei ZHENG	–	1,600	–	55	1,655
Non-executive directors: Mr. Pingjin CHEN	–	–	–	–	–
Mr. Baifeng HU	–	–	–	–	–
Mr. Jiaqing LI	–	–	–	–	–
Mr. Hongbin ZHOU	–	–	–	–	–
Independent non-executive directors Mr. Lixin DAI (ii)	225	–	–	–	225
Ms. Guoqin CHEN (ii)	225	–	–	–	225
Mr. Jian YU	300	–	–	–	300
Mr. TSANG Kwan Hung Benson	300	–	–	–	300
Ms. Lihua LI (i)	76	–	–	–	76
Mr. Qilin ZHOU (i)	76	–	–	–	76
	1,202	5,500	–	253	6,955

(i) Ms. Lihua LI and Mr. Qilin ZHOU were appointed as directors of the Company on September 23, 2022.

(ii) Ms. Guoqin CHEN and Mr. Lixin DAI resigned on September 23, 2022.

9. DIRECTORS' AND CHIEF EXECUTIVE'S REMUNERATION (CONTINUED)

Details of the emoluments paid or payable to the directors and the chief executive of the Company for the services provided to the Group during each reporting period are as follows: (continued)

2021	Fees RMB'000	Salaries RMB'000	Performance related bonuses RMB'000	Social welfare benefits RMB'000	Total RMB'000
Chief executive and executive director:					
Dr. Boliang LOU	–	2,100	6,000	91	8,191
Executive directors:					
Mr. Xiaoqiang LOU	–	1,800	5,000	91	6,891
Ms. Bei ZHENG	–	1,600	4,000	91	5,691
Non-executive directors:					
Mr. Pingjin CHEN	–	–	–	–	–
Mr. Baifeng HU	–	–	–	–	–
Mr. Jiaqing LI	–	–	–	–	–
Mr. Hongbin ZHOU	–	–	–	–	–
Independent non-executive directors					
Mr. Lixin DAI	220	–	–	–	220
Ms. Guoqin CHEN	220	–	–	–	220
Mr. Jian YU	220	–	–	–	220
Mr. TSANG Kwan Hung Benson	220	–	–	–	220
	880	5,500	15,000	273	21,653

There was no arrangement under which a director or the chief executive waived or agreed to waive any remuneration during each reporting period.

10. FIVE HIGHEST PAID EMPLOYEES

The five individuals with the highest emoluments in the Group during the year included three (2021: three) directors disclosed above, details of whose remuneration are set out as above in note 9. Details of the remuneration of the remaining highest paid employees who are neither a director nor chief executive of the Company for the reporting periods are as follows:

	2022 RMB'000	2021 RMB'000
Salaries	3,600	3,600
Performance related bonuses	–	8,000
Social welfare benefits	205	182
	3,805	11,782

The number of non-director and non-chief executive highest paid employees whose remuneration fell within the following bands is as follows:

	Number of employees	
	2022	2021
RMB1,000,001 to RMB2,000,000	2	–
RMB4,000,001 to RMB5,000,000	–	1
RMB6,000,001 to RMB7,000,000	–	1
	2	2

11. INCOME TAX EXPENSE

	2022 RMB'000	2021 RMB'000
Current tax	293,293	282,098
Deferred tax	20,961	8,821
	314,254	290,919

Under the Law of the PRC on Enterprise Income Tax (the "EIT Law") and Implementation Regulation of the EIT Law, the EIT rate of the PRC subsidiaries is 25% unless subject to tax exemption set out below.

The Company was accredited as a "High and New Technology Enterprise" in 2017 which was subsequently renewed in 2020 and as an "Advanced Technology Enterprise" in 2015 which was subsequently renewed in 2020, and therefore the Company was entitled to a preferential EIT rate of 15% for the year ended December 31, 2022. These qualifications are subject to review by the relevant tax authority in the PRC for every three years.

11. INCOME TAX EXPENSE (CONTINUED)

Pharmaron Xi'an Co., Ltd. was accredited as an "Advanced Technology Enterprise" in 2018 and the qualification was subsequently renewed in 2020, and therefore Pharmaron Xi'an Co., Ltd. was entitled to a preferential EIT rate of 15% for the year ended December 31, 2022. This qualification is subject to review by the relevant tax authority in the PRC for every three years.

Pharmaron (Beijing) TSP Service Co., Ltd. was accredited as an "Advanced Technology Enterprise" in 2015 and the qualification was renewed in 2020 and as an "High and New Technology Enterprise" in 2020, and therefore Pharmaron (Beijing) TSP Service Co., Ltd. was entitled to a preferential EIT rate of 15% for the year ended December 31, 2022. These qualifications are subject to review by the relevant tax authority in the PRC for every three years.

Pharmaron (Ningbo) Technology Development Co., Ltd. was accredited as an "Advanced Technology Enterprise" in 2020 and the qualification was renewed in 2022, and therefore Pharmaron (Ningbo) Technology Development Co., Ltd. was entitled to a preferential EIT rate of 15% for the year ended December 31, 2022. This qualification is subject to review by the relevant tax authority in the PRC annually.

Pharmaron (Tianjin) Process Development and Manufacturing Co., Ltd. was accredited as an "High and New Technology Enterprise" in 2020, and therefore Pharmaron (Tianjin) Process Development and Manufacturing Co., Ltd. was entitled to a preferential EIT rate of 15% for the year ended December 31, 2022. This qualification is subject to review by the relevant tax authority in the PRC for every three years.

Beijing LinkStart Biotechnology Co., Ltd. was accredited as an "High and New Technology Enterprise" in 2020, and therefore Beijing LinkStart Biotechnology Co., Ltd. was entitled to a preferential EIT rate of 15% for the year ended December 31, 2022. This qualification is subject to review by the relevant tax authority in the PRC for every three years.

RAMED (Beijing) Medical Technology Co., Ltd. was accredited as an "High and New Technology Enterprise" in 2020, and therefore RAMED (Beijing) Medical Technology Co., Ltd. was entitled to a preferential EIT rate of 15% for the year ended December 31, 2022. This qualification is subject to review by the relevant tax authority in the PRC for every three years.

Enyuan Pharmaceutical Technology (Beijing) Co., Ltd. was accredited as an "High and New Technology Enterprise" in 2020, and therefore Enyuan Pharmaceutical Technology (Beijing) Co., Ltd. was entitled to a preferential EIT rate of 15% for the year ended December 31, 2022. This qualification is subject to review by the relevant tax authority in the PRC for every three years.

The group entities incorporated in the U.S. were subject to the federal corporate tax at a rate of 21% and the state income tax at a rate ranging from 0% to 10% as at December 31, 2021 and 2022.

The group entities incorporated in the U.K. were subject to tax at a rate of 19% for the years ended December 31, 2021 and 2022.

The group entities incorporated in Japan were subject to the national corporate tax at a rate of 23.2% and the local corporate tax at a rate of 2.4% as at December 31, 2021 and 2022.

11. INCOME TAX EXPENSE (CONTINUED)

The group entities incorporated in Hong Kong were subject to Hong Kong profits tax at a rate of 16.5% on the estimated assessable profits for the years ended December 31, 2021 and 2022.

The Group's tax provision in respect of other jurisdictions has been calculated at the applicable tax rates in accordance with the prevailing practices of the jurisdictions in which the Group operates.

The tax charge for the reporting period can be reconciled to the profit before tax per the consolidated statement of profit or loss as follows:

	2022 RMB'000	2021 RMB'000
Profit before tax	1,666,391	1,910,996
Tax at tax rates of 15%	249,959	286,649
Effect of different tax rates of subsidiaries	(51,613)	(1,389)
Profit attributable to associates	(4,821)	(10,656)
Income not subject to tax	(18,976)	(29,728)
Non-deductible expenses	52,139	8,326
Additional deductible allowance for research and development ("R&D") expenses	(19,474)	(9,023)
Utilisation of tax losses and other deductible temporary differences previously not recognised as deferred tax assets	(1,328)	(16,994)
Unrecognised deductible temporary differences and tax losses	124,446	64,722
Others	(16,078)	(988)
	314,254	290,919

12. DIVIDENDS

	2022 RMB'000	2021 RMB'000
Proposed final – RMB0.30 (2021: RMB0.45) per ordinary share	357,367	357,380

On May 31, 2022, the Company's shareholders approved the 2021 Profit Distribution Plan at annual general meeting, pursuant to which a final dividend of RMB0.45 (inclusive of tax) per share in respect of the year ended December 31, 2021 was declared to both holders of A shares and H shares and aggregate dividend amounted to RMB357,380,000 (inclusive of tax). Except for the dividend declared to the holders of restricted A shares that would be paid no earlier than the unlocking date, the rest of the dividend was paid in 2022.

The Board proposed to declare a final dividend as follows (i) a cash dividend of RMB0.30 (inclusive of tax) per share or an aggregate of approximately RMB357,367,000 (inclusive of tax) for the year ended December 31, 2022; and (ii) 5 new shares for every 10 existing shares to be issued to all shareholders.

The proposed final dividend for the year ended December 31, 2022 is subject to the approval of the Company's shareholders at the forthcoming AGM.

13. EARNINGS PER SHARE ATTRIBUTABLE TO ORDINARY EQUITY HOLDERS OF THE PARENT

The calculation of basic earnings per share is based on the profit for the year attributable to ordinary equity holders of the parent, and the weighted average number of ordinary shares of 1,182,022,557 (2021: 1,187,233,160) in issue during the year, as adjusted to reflect the rights issue during the year.

The weighted average number of ordinary shares used in the calculation of diluted earnings per share is based on the number of ordinary shares used in the basic earnings per share calculation adjusted for the dilutive effect of share options and restricted A shares issued by the Company. For the year ended December 31, 2022, the calculation of the diluted earnings per share is based on the profit for the year attributable to ordinary equity holders of the parent, adjusted to reflect the dilutive impact of the share options and restricted A shares and the convertible bonds issued by the Company.

The calculations of basic and diluted earnings per share are based on:

	2022 RMB'000	2021 RMB'000
Earnings:		
Profit attributable to ordinary equity holders of the parent	1,374,604	1,661,029
Less: Cash dividends attributable to the shareholders of restricted shares expected to be unlocked in the future	(501)	(334)
Earnings for the purpose of calculating basic earnings per share	1,374,103	1,660,695
Effective of diluted potential ordinary shares:		
Add: Cash dividends attributable to the shareholders of restricted shares expected to be unlocked in the future	501	334
Interest on convertible bonds	–	57,120
Issuance expenses of convertible bonds	–	2,882
Less: Fair value gain on convertible bonds-embedded derivative component	–	(72,854)
Earnings for the purpose of calculating diluted earnings per share	1,374,604	1,648,177

13. EARNINGS PER SHARE ATTRIBUTABLE TO ORDINARY EQUITY HOLDERS OF THE PARENT (CONTINUED)

	2022	2021
Number of shares:		
Weighted average number of ordinary shares in issue during the year, used in the basic earnings per share calculation	1,182,022,557	1,187,233,160
Effect of diluted potential ordinary shares:		
Effective of restricted shares units and share awards issued by the Company	2,124,971	16,572,225
Weighted average number of ordinary shares in issue during the year, used in the diluted earnings per share calculation	1,184,147,528	1,203,805,385

Approved by the board of directors' meeting held on 28 March, 2022 and shareholders' meeting held on 31 May, 2022, the share premium amounting to RMB397,023,000 was converted into share capital on the basis of 5 Shares for every 10 Shares transferred to all shareholders as at 31 May, 2022 ("Share Capital Conversion").

The computation of basic and diluted earnings per share for the year ended December 31, 2021 is based on the weighted average number of shares assumed to have been issued after taking into account the retrospective adjustment of the Share Capital Conversion.

In 2022, the computation of diluted earnings per share does not assume the conversion of the Company's outstanding convertible bonds since their assumed exercise would result in an antidilutive effect in earnings per share.

14. PROPERTY, PLANT AND EQUIPMENT

Impairment testing of goodwill

Goodwill acquired through business combinations is allocated to the following cash-generating units for impairment testing:

- Pharmaron (Chengdu) Clinical Services Co., Ltd. business cash-generating unit*;
- Pharmaron (Germantown) Lab Services Inc. business cash-generating unit;
- Pharmaron (Ningbo) Technology Development business cash-generating unit;
- Pharmaron (Exton) Lab Services LLC business cash-generating unit;
- Pharmaron Biologics (UK) Ltd business cash-generating unit;
- Biomedical Research (GZ), Ltd. business cash-generating unit;
- AniKeeper (Zhanjiang) Biotech Co., Ltd. business cash-generating unit;
- Pharmaron Manufacturing Services (UK) Ltd. business cash-generating unit;
- Beijing Anikeeper Biotech Co.,Ltd. business cash-generating unit; and
- Coventry API manufacturing facility business cash-generating unit.

* In 2022, the Group integrated the clinical service of Nanjing Sirui business cash-generating unit, Beijing LinkStart business cash-generating unit, RAMED (Beijing) Medical Technology business cash-generating unit, Enyuan Pharmaceutical Technology (Beijing) Co., Ltd. business cash-generating unit, and DeltaMed (Hangzhou) Co., Ltd. business cash-generating unit and CPC business cash-generating unit into Pharmaron (Chengdu) Clinical Services Co., Ltd. As of December 31, 2022, the integration is completed considering: (1) unified synergy in management of human resources, performance review, finance and budget; (2) unified deployment of business development, procurement, and operations; (3) unified decision-making on assets use or disposal, therefore, goodwill impairment testing is conducted based on Pharmaron (Chengdu) Clinical Services Co., Ltd. business cash-generating unit as a whole.

16. GOODWILL (CONTINUED)

Impairment testing of goodwill (continued)

Pharmaron (Germantown) Lab Services Inc. business cash-generating unit

The recoverable amount of the Pharmaron (Germantown) Lab Services Inc. cash-generating unit was determined based on a value in use calculation using cash flow projections based on financial budgets covering a five-year period approved by senior management. The discount rate applied to the cash flow projections was 13% (2021: 16%) and cash flows beyond the five-year period were extrapolated using a growth rate of 2.5%. This growth rate is based on the relevant industry growth forecasts and does not exceed the average long-term growth rate for the relevant industry. These calculations use pre-tax cash flow projections based on financial budgets approved by management.

Pharmaron (Ningbo) Technology Development business cash-generating unit

The recoverable amount of the Pharmaron (Ningbo) Technology Development business cash-generating unit was determined based on a value in use calculation using cash flow projections based on financial budgets covering a five-year period approved by senior management. The discount rate applied to the cash flow projections was 18% (2021: 18%) and cash flows beyond the five-year period were extrapolated using a growth rate of 2.5%. This growth rate is based on the relevant industry growth forecasts and does not exceed the average long-term growth rate for the relevant industry. These calculations use pre-tax cash flow projections based on financial budgets approved by management.

Pharmaron (Exton) Lab Services LLC business cash-generating unit

The recoverable amount of the Pharmaron (Exton) Lab Services LLC business cash-generating unit was determined based on a value in use calculation using cash flow projections based on financial budgets covering a five-year period approved by senior management. The discount rate applied to the cash flow projections was 18% (2021: 17%) and cash flows beyond the five-year period were extrapolated using a growth of 2.5%. This growth rate is based on the relevant industry growth forecasts and does not exceed the average long-term growth rate for the relevant industry. These calculations use pre-tax cash flow projections based on financial budgets approved by management.

Pharmaron (Chengdu) Clinical Services Co., Ltd. business cash-generating unit

The recoverable amount of the Pharmaron (Chengdu) Clinical Services Co., Ltd. business cash-generating unit was determined based on a value in use calculation using cash flow projections based on financial budgets covering a five-year period approved by senior management. The discount rate applied to the cash flow projections was 18% and cash flows beyond the five-year period were extrapolated using a growth of 2.5%. This growth rate is based on the relevant industry growth forecasts and does not exceed the average long-term growth rate for the relevant industry. These calculations use pre-tax cash flow projections based on financial budgets approved by management.

Biomedical Research (GZ), Ltd. business cash-generating unit

The recoverable amount of the Biomedical Research (GZ), Ltd. business cash-generating unit was determined based on a value in use calculation using cash flow projections based on financial budgets covering a five-year period approved by senior management. The discount rate applied to the cash flow projections was 15% (2021: 14%) and cash flows beyond the five-year period were extrapolated using a growth of 2.5%. This growth rate is based on the relevant industry growth forecasts and does not exceed the average long-term growth rate for the relevant industry. These calculations use pre-tax cash flow projections based on financial budgets approved by management.

16. GOODWILL (CONTINUED)

Impairment testing of goodwill (continued)

AniKeeper (Zhanjiang) Biotech Co., Ltd. business cash-generating unit

The recoverable amount of the AniKeeper (Zhanjiang) Biotech Co., Ltd. business cash-generating unit was determined based on a value in use calculation using cash flow projections based on financial budgets covering a five-year period approved by senior management. The discount rate applied to the cash flow projections was 15% (2021: 14%) and cash flows beyond the five-year period were extrapolated using a growth of 2.5%. This growth rate is based on the relevant industry growth forecasts and does not exceed the average long-term growth rate for the relevant industry. These calculations use pre-tax cash flow projections based on financial budgets approved by management.

Pharmaron Manufacturing Services (UK) Ltd. business cash-generating unit

The recoverable amount of the Pharmaron Manufacturing Services (UK) Ltd. business cash-generating unit was determined based on a value in use calculation using cash flow projections based on financial budgets covering a five-year period approved by senior management. The discount rate applied to the cash flow projections was 16% and cash flows beyond the five-year period were extrapolated using a growth of 2.5%. This growth rate is based on the relevant industry growth forecasts and does not exceed the average long-term growth rate for the relevant industry. These calculations use pre-tax cash flow projections based on financial budgets approved by management.

Beijing Anikeeper Biotech Co.,Ltd. business cash-generating unit

The recoverable amount of the Beijing Anikeeper Biotech Co.,Ltd. business cash-generating unit business cash-generating unit was determined based on a value in use calculation using cash flow projections based on financial budgets covering a five-year period approved by senior management. The discount rate applied to the cash flow projections was 12% and cash flows beyond the five-year period were extrapolated using a growth of 2.5%. This growth rate is based on the relevant industry growth forecasts and does not exceed the average long-term growth rate for the relevant industry. These calculations use pre-tax cash flow projections based on financial budgets approved by management.

Pharmaron Biologics (UK) Ltd business cash-generating unit

The recoverable amount of the Pharmaron Biologics (UK) Ltd business cash-generating unit was determined based on a value in use calculation using cash flow projections based on financial budgets covering a nine-year period approved by senior management due to the continuous business integration to achieve stable profitability. The discount rate applied to the cash flow projections was 15% (2021: 16%) and cash flows beyond the nine-year period were extrapolated using a growth of 2.5%. This growth rate is based on the relevant industry growth forecasts and does not exceed the average long-term growth rate for the relevant industry. These calculations use pre-tax cash flow projections based on financial budgets approved by management.

Coventry API manufacturing facility business cash-generating unit

The recoverable amount of the Coventry API manufacturing facility business cash-generating unit business cash-generating unit was determined based on a value in use calculation using cash flow projections based on financial budgets covering an eight-year period approved by senior management due to the continuous business integration to achieve stable profitability. The discount rate applied to the cash flow projections was 17% and cash flows beyond the eight-year period were extrapolated using a growth of 2.5%. This growth rate is based on the relevant industry growth forecasts and does not exceed the average long-term growth rate for the relevant industry. These calculations use pre-tax cash flow projections based on financial budgets approved by management.

16. GOODWILL (CONTINUED)**Impairment testing of goodwill (continued)**

The carrying amount of goodwill allocated to each of the cash-generating units is as follows:

	2022 RMB'000	2021 RMB'000
Pharmaron (Chengdu) Clinical Services Co., Ltd. business	601,900	–
CPC business	–	98,485
Nanjing Sirui business	–	61,172
Beijing LinkStart business	–	158,931
RAMED (Beijing) Medical Technology business	–	36,429
Enyuan Pharmaceutical Technology (Beijing) Co., Ltd. business	–	21,365
DeltaMed (Hangzhou) Co., Ltd. business	–	216,421
Pharmaron (Germantown) Lab Services Inc. business	27,765	25,417
Pharmaron (Ningbo) Technology Development business	6,542	6,542
Pharmaron (Exton) Lab Services LLC business	828,610	758,546
Pharmaron Biologics (UK) Ltd business	604,193	619,474
Biomedical Research (GZ), Ltd. business	23,631	23,631
AniKeeper (Zhanjiang) Biotech Co., Ltd. business	69,852	69,852
Pharmaron Manufacturing Services (UK) Ltd. business	371,948	–
Beijing Anikeeper Biotech Co., Ltd. business	66,857	–
Coventry API manufacturing facility business	86,567	–
	2,687,865	2,096,265

Assumptions were used in the value in use calculation of the Pharmaron (Germantown) Lab Services Inc. business, Pharmaron (Ningbo) Technology Development business, Pharmaron (Exton) Lab Services LLC business, Pharmaron Biologics (UK) Ltd business, Biomedical Research (GZ), Ltd. business, AniKeeper (Zhanjiang) Biotech Co., Ltd. business, Pharmaron (Chengdu) Clinical Services Co., Ltd. business, Pharmaron Manufacturing Services (UK) Ltd. business, Beijing Anikeeper Biotech Co.,Ltd. business, Coventry API manufacturing facility business for December 31, 2022 and 2021. The following describes each key assumption on which management has based its cash flow projections to undertake impairment testing of goodwill:

Budgeted gross margins – The basis used to determine the value assigned to the budgeted gross margins is the average gross margins achieved in the year immediately before the budget year, increased for expected efficiency improvements, and expected market development.

Discount rates – The discount rates used are before tax and reflect specific risks relating to the relevant units.

Revenue growth rate – The revenue growth rate is based on historical sales and expected growth rates of the pharmaceutical market according to published industry research.

The values assigned to the key assumptions on the market development of the Pharmaron (Germantown) Lab Services Inc. business, Pharmaron (Ningbo) Technology Development business, Pharmaron (Exton) Lab Services LLC business, Pharmaron Biologics (UK) Ltd business, Biomedical Research (GZ), Ltd. business, AniKeeper (Zhanjiang) Biotech Co., Ltd. business, Pharmaron (Chengdu) Clinical Services Co., Ltd. business, Pharmaron Manufacturing Services (UK) Ltd. business, Beijing Anikeeper Biotech Co.,Ltd. business, Coventry API manufacturing facility business and discount rates are consistent with external information sources.

Management of the Group assessed that any reasonably possible change in any of these assumptions would not cause the carrying amounts of these cash-generating units to exceed their respective recoverable amounts as at December 31, 2022.

17. OTHER INTANGIBLE ASSETS

	Software RMB'000	Patents RMB'000	Client relationship RMB'000	Total RMB'000
December 31, 2022				
Cost at January 1, 2022, net of accumulated amortisation	26,508	5,102	195,553	227,163
Additions	29,067	407	–	29,474
Amortisation provided during the year	(6,828)	(1,366)	(23,391)	(31,585)
Exchange realignment	600	383	7,113	8,096
At December 31, 2022	49,347	4,526	179,275	233,148
December 31, 2021				
Cost at January 1, 2021, net of accumulated amortisation	22,428	6,022	161,526	189,976
Additions	10,283	–	–	10,283
Acquisition of subsidiaries (note 42)	5	–	53,800	53,805
Amortisation provided during the year	(6,050)	(808)	(17,758)	(24,616)
Exchange realignment	(158)	(112)	(2,015)	(2,285)
At December 31, 2021	26,508	5,102	195,553	227,163

Notes to the Consolidated Financial Statements

Year ended December 31, 2022

18. INVESTMENTS IN ASSOCIATES

	2022 RMB'000	2021 RMB'000
Share of net assets	629,972	452,606

As of December 31, 2022, details of each of the Group's associates are as follows:

Name of entity	Particulars of issued shares held	Place of incorporation	Percentage of ownership interest attributable to the Group	Principal activity
Kangjun Investment Management (Beijing) Co., Ltd.	Ordinary shares	PRC/Mainland China	30.00%	Investment management
Beijing Kangjun Ningyuan Equity Investment Partnership Enterprise (Limited Partnership)	Ordinary shares	PRC/Mainland China	21.28%	Investment management
Ningbo Kangjun Zhongyuan Equity Investment Partnership Enterprise (Limited Partnership)	Ordinary shares	PRC/Mainland China	18.57%	Investment management
AccuGen Group	Ordinary shares	Cayman Islands	50.00%	Genetic and cell research

The following table illustrates the aggregate financial information of the Group's associates that are not individually material:

	2022 RMB'000	2021 RMB'000
Share of the associates' total comprehensive income/(loss) for the year	(33,851)	71,845
Aggregate carrying amount of the Group's investments in the associates	629,972	452,606

19. EQUITY INVESTMENTS AT FAIR VALUE THROUGH PROFIT OR LOSS

	2022 RMB'000	2021 RMB'000
Listed equity investments, at fair value	19,992	165,725
Unlisted equity investments, at fair value	52,711	31,817
Unlisted fund investments, at fair value	166,345	112,521
	239,048	310,063

The above listed equity investments represent investments in Zentalis Pharmaceuticals, LLC ("Zentalis") (formerly known as Zeno Pharmaceuticals, Inc.). Zentalis was listed on Nasdaq on April 3, 2020 and its fair value measurement was based on the quoted prices as of December 31, 2022.

20. BIOLOGICAL ASSETS**(a) Nature of the Group's agricultural activities**

The biological assets of the Group are mainly including cynomolgous and macaque non-human primates for experiment, beagles, and rats, which are classified as current assets, and cynomolgous and macaque non-human primates for breeding, which are classified as non-current assets of the Group.

The Group is exposed to the following operational risks:

(i) Regulatory and environmental risks

The Group is subject to laws and regulations in the location in which it operates breeding. The Group has established environmental policies and procedures aiming at complying with local environmental regulations and legislations. Management performs regular reviews to identify environmental risks to ensure that the systems in place are adequate to manage these risks.

(ii) Climate, disease and other natural risks

The Group's biological assets are exposed to the risk of damage from climatic changes, diseases and other natural forces. The Group has extensive processes in place aiming at monitoring and mitigating those risks, including regular inspections, disease controls, surveys and insurance.

20. BIOLOGICAL ASSETS (CONTINUED)

(b) Fair value of biological assets

The values of the Group's biological assets at the year-end were as follows:

As of December 31, 2022	Non-human primates for breeding RMB'000	Non-human primates for experiment RMB'000	Total RMB'000
January 1, 2022	143,233	332,715	475,948
Acquisition of subsidiaries (note 42)	1,096	2,126	3,222
Breeding costs	–	12,160	12,160
Purchases	–	24,822	24,822
Gain arising from changes in fair value less costs to sell of biological assets	30,164	215,425	245,589
Transfer	10,734	(10,734)	–
Decrease due to disposal	(7,211)	(6,874)	(14,085)
Decrease due to sales	–	(9,334)	(9,334)
Decrease due to experiments	–	(63,027)	(63,027)
December 31, 2022	178,016	497,279	675,295

As of December 31, 2021	Non-human primates for breeding RMB'000	Non-human primates for experiment RMB'000	Total RMB'000
January 1, 2021	–	–	–
Acquisition of subsidiaries	124,234	169,646	293,880
Breeding costs	–	3,204	3,204
Purchases	–	137,003	137,003
Gain arising from changes in fair value less costs to sell of biological assets	13,094	55,932	69,026
Transfer	7,243	(7,243)	–
Decrease due to disposal	(1,338)	(1,544)	(2,882)
Decrease due to sales	–	(12,665)	(12,665)
Decrease due to experiments	–	(11,618)	(11,618)
December 31, 2021	143,233	332,715	475,948

As at December 31, 2022 and 2021, no biological assets of the Group were pledged.

20. BIOLOGICAL ASSETS (CONTINUED)**(b) Fair value of biological assets (continued)**

Analysed for reporting purposes as:

	2022 RMB'000	2021 RMB'000
Current	497,279	332,715
Non-current	178,016	143,233
Total	675,295	475,948

(c) Fair value measurement

The Group's biological assets as of December 31, 2022 and 2021 were valued by an independent qualified professional valuer unrelated to the Group.

The Group uses the following hierarchy for determining and disclosing the fair values of biological assets:

Level 3 – based on valuation techniques for which any inputs which have a significant effect on the recorded fair value are not based on observable market data (unobservable inputs).

	Level 3 RMB'000
As at December 31, 2022	675,295
As at December 31, 2021	475,948

20. BIOLOGICAL ASSETS (CONTINUED)**(d) Description of valuation techniques used and key inputs to valuation on biological assets**

The following table shows the valuation techniques used in the determination of fair values within Level 3 of the hierarchy, as well as the key unobservable inputs used in the valuation.

Type	Valuation approach	Key unobservable inputs	Inter-relationship between key unobservable inputs and fair value measurements
Cynomolgous and macaque non-human primates for experiment	Comparable market method	Recent transaction prices and adjustment coefficients based on biological asset characteristics (including age, variety, health status, etc.)	The higher the change in the adjustment coefficient, the higher the fair value.
Cynomolgous and macaque non-human primates for breeding	Comparable market method	Recent transaction prices and adjustment coefficients based on biological asset characteristics (including age, variety, health status, etc.)	The higher the change in the adjustment coefficient, the higher the fair value.

21. DEFERRED TAX

The movements in deferred tax assets are as follows:

	2022				
	Losses available for offsetting against future taxable profits RMB'000	Impairment provision for assets RMB'000	Deferred income RMB'000	Others RMB'000	Total RMB'000
At January 1, 2022	16,403	5,958	17,157	15,454	54,972
Deferred tax credited to profit or loss during the year	63,253	2,178	1,861	22,432	89,724
Deferred tax assets at December 31, 2022	79,656	8,136	19,018	37,886	144,696

	2021				
	Losses available for offsetting against future taxable profits RMB'000	Impairment provision for assets RMB'000	Deferred income RMB'000	Others RMB'000	Total RMB'000
At January 1, 2021	5,818	5,303	16,165	13,385	40,671
Deferred tax credited to profit or loss during the year	10,585	655	992	2,069	14,301
Deferred tax assets at December 31, 2021	16,403	5,958	17,157	15,454	54,972

Notes to the Consolidated Financial Statements

Year ended December 31, 2022

21. DEFERRED TAX (CONTINUED)

The movements in deferred tax liabilities are as follows:

	2022				
	Fair value gain arising from acquisition of subsidiaries RMB'000	Accelerated tax depreciation RMB'000	Fair value gain arising from financial instruments RMB'000	Fair value gain arising from biological assets RMB'000	Total RMB'000
At January 1, 2022	53,165	105,843	14,090	39,579	212,677
Deferred tax (credited)/charged to profit or loss during the year	(5,432)	92,902	(1,558)	24,774	110,686
Acquisition of subsidiaries (note 42)	19,206	–	–	–	19,206
Credit to other comprehensive income	–	–	3,476	–	3,476
Exchange realignment	875	–	–	–	875
Deferred tax liabilities at December 31, 2022	67,814	198,745	16,008	64,353	346,920

	2021				
	Fair value gain arising from acquisition of subsidiaries RMB'000	Accelerated tax depreciation RMB'000	Fair value gain arising from financial instruments RMB'000	Fair value gain arising from biological assets RMB'000	Total RMB'000
At January 1, 2021	44,292	75,485	19,364	–	139,141
Deferred tax (credited)/charged to profit or loss during the year	(5,597)	30,358	(7,538)	5,899	23,122
Acquisition of subsidiaries	14,375	–	–	33,680	48,055
Credit to other comprehensive income	–	–	2,264	–	2,264
Exchange realignment	95	–	–	–	95
Deferred tax liabilities at December 31, 2021	53,165	105,843	14,090	39,579	212,677

21. DEFERRED TAX (CONTINUED)

As at December 31, 2022, certain deferred tax assets and liabilities with an amount of RMB85,907,000 (2021: RMB39,377,000) have been offset in the statement of financial position. The following is an analysis of the deferred tax balances of the Group for financial reporting purposes:

	2022 RMB'000	2021 RMB'000
Net deferred tax assets recognised in the consolidated statement of financial position	58,789	15,595
Net deferred tax liabilities recognised in the consolidated statement of financial position	261,013	173,300

In accordance with PRC laws and regulations, tax losses could be carried forward for five years to offset against future taxable profits. According to the Notice 2018 No.76 of the Ministry of Finance, from January 1, 2018, the enterprises that have the qualifications of High and New Technology Enterprise will be able to make up for the losses that have not been completed in the previous five years before the qualification year. Therefore, certain PRC companies' longest tax loss carried-over period is extended from 5 years to 10 years. For the Group's subsidiaries in the U.S. and the U.K., losses can be carried over indefinitely. Deferred tax assets relating to unutilised tax losses are recognised to the extent that it is probable that sufficient taxable profit will be available to allow such deferred tax assets to be utilised.

The Group had unrecognised temporary differences and unused tax losses available for offsetting against future profits in respect of certain subsidiaries in the U.S. and the U.K. of RMB1,543,931,000 and RMB908,902,000 as at December 31, 2022 and 2021, respectively, and the deferred tax assets have not been recognised. Deferred tax assets have not been recognised in respect of these losses as they have arisen in subsidiaries that have been loss-making for some time and it is not considered probable that taxable profits will be available against which the tax losses can be utilised.

22. OTHER NON-CURRENT ASSETS

	2022 RMB'000	2021 RMB'000
Prepayment for purchase of property, plant and equipment	372,891	171,511
Deposits	66,018	24,482
Financial assets at amortised cost	139,292	–
	578,201	195,993

As at December 31, 2022 and 2021, the financial assets included in other non-current assets of the Group were considered to be of low credit risk and thus the Group has assessed that the ECLs for deposits are immaterial under the 12-month expected credit loss method.

23. INVENTORIES

	2022 RMB'000	2021 RMB'000
Raw materials and consumables	361,572	181,700

As at December 31, 2022, the inventories were net of a write-down of approximately RMB17,359,000 (2021: RMB13,442,000).

24. CONTRACT COSTS

	2022 RMB'000	2021 RMB'000
Costs to fulfill contracts	182,610	165,625

25. TRADE RECEIVABLES

	2022 RMB'000	2021 RMB'000
Trade receivables – third parties	1,939,525	1,267,340
Allowance for impairment	(57,643)	(38,491)
	1,881,882	1,228,849

The Group's trading terms with its customers are mainly on credit. The credit period is generally one month, extending up to three months for major customers. Each customer has a maximum credit limit. The Group seeks to maintain strict control over its outstanding receivables to minimise credit risk. Overdue balances are reviewed regularly by senior management. In view of the aforementioned and the fact that the Group's trade receivables related to various diversified customers, there is no significant concentration of credit risk. The Group does not hold any collateral or other credit enhancements over its trade receivable balances. The balances of trade receivables are non-interest-bearing.

Included in the trade receivables was an amount due from related parties of RMB7,471,000 as at December 31, 2022 (2021: RMB7,366,000), which was repayable on credit terms similar to those offered to the major customers of the Group.

An ageing analysis of gross carrying amount of the trade receivables as at the end of each reporting period, based on the invoice date, is as follows:

	2022 RMB'000	2021 RMB'000
Within 1 year	1,890,865	1,218,971
1 year to 2 years	22,133	27,892
More than 2 years	26,527	20,477
	1,939,525	1,267,340

25. TRADE RECEIVABLES (CONTINUED)

The movements in the loss allowance for impairment of trade receivables are as follows:

	2022 RMB'000	2021 RMB'000
At beginning of year	38,491	34,106
Impairment losses, net	20,296	9,478
Write-offs	(2,204)	(4,773)
Exchange realignment	1,060	(320)
	57,643	38,491

The Group applies the simplified approach to providing for expected credit losses prescribed by IFRS 9, which permits the use of the lifetime expected credit loss provision for all trade receivables.

An impairment analysis is performed at the end of each reporting period using a provision matrix to measure expected credit losses. The provision rates are based on days past due for groupings of various customer segments with similar loss patterns. The calculation reflects the probability-weighted outcome, the time value of money and reasonable and supportable information that is available at the end of each reporting period about past events, current conditions, and forecasts of future economic conditions. Generally, trade receivables are written off if past due for more than two years and are not subject to enforcement activity.

Set out below is the information about the credit risk exposure on the Group's trade receivables using a provision matrix:

	2022		
	Expected credit loss rate	Gross carrying amount RMB'000	Expected credit losses RMB'000
Within 1 year	1.20%	1,890,865	22,732
1 to 2 years	37.88%	22,133	8,384
Over 2 years	100.00%	26,527	26,527
		1,939,525	57,643

	2021		
	Expected credit loss rate	Gross carrying amount RMB'000	Expected credit losses RMB'000
Within 1 year	0.79%	1,218,971	9,596
1 to 2 years	30.18%	27,892	8,418
Over 2 years	100.00%	20,477	20,477
		1,267,340	38,491

26. CONTRACT ASSETS

	2022 RMB'000	2021 RMB'000
Contract assets	336,708	198,223
Allowance for impairment	(4,107)	(3,242)
	332,601	194,981

The contract assets primarily relate to the Group's right to consideration for the work completed and not billed. The contract assets are transferred to trade receivables when the rights become unconditional.

Included in the trade receivables was an amount due from related parties of RMB5,194,000 as at December 31, 2022 (2021: RMB2,077,000), which was repayable on credit terms similar to those offered to the major customers of the Group.

The expected timing of recovery or settlement is generally within one year.

The movements in the loss allowance for impairment of contract assets are as follows:

	2022 RMB'000	2021 RMB'000
At beginning of year	3,242	2,470
Impairment losses, net	861	791
Exchange realignment	4	(19)
	4,107	3,242

The Group has applied the simplified approach to providing for expected credit losses prescribed by IFRS 9, which permits the use of the lifetime expected loss provision for all contract assets. To measure the ECLs, contract assets have been grouped based on shared credit risk characteristics and the days past due. The ECLs below also incorporate forward-looking information. The impairment as of the end of each reporting period was determined as follows:

	2022	2021
Expected credit loss	1.22%	1.64%
Gross carrying amount (RMB'000)	336,708	198,223
Impairment (RMB'000)	(4,107)	(3,242)

27. PREPAYMENTS, OTHER RECEIVABLES AND OTHER ASSETS

	2022 RMB'000	2021 RMB'000
Financial assets at amortized cost (i)	610,591	1,079,712
Prepayments	23,039	24,952
Deposits and other receivables	30,717	29,774
Prepaid expenses	102,094	62,498
Tax recoverable	266,854	235,673
Others	3,921	8,582
	1,037,216	1,441,191

(i) Financial assets at amortized cost are mainly including the reverse-repurchase products of Chinese government bonds with fixed interest rates.

As at the end of the reporting period, other receivables of the Group were considered to be of low credit risk and thus the Group has assessed that the ECLs for other receivables were immaterial under the 12-month expected loss method.

28. FINANCIAL ASSETS AT FAIR VALUE THROUGH PROFIT OR LOSS

The Group entered into a series of wealth management products with banks and other financial institutions. The investments are principal-guaranteed by the relevant financial institutions. The expected rates of return ranged from 1.75%-4.12% per annum for the year (2021: 2.33%-4.66%), which were determined by reference to the returns of the underlying investment portfolio.

29. DERIVATIVE FINANCIAL INSTRUMENTS

	2022 RMB'000	2021 RMB'000
Current assets		
Derivatives under hedge accounting		
Cash flow hedges – Foreign currency forward contracts	50,890	15,092
Other derivatives		
Foreign currency forward contracts	–	1,582
	50,890	16,674

29. DERIVATIVE FINANCIAL INSTRUMENTS (CONTINUED)

	2022 RMB'000
Current liabilities	
Derivatives under hedge accounting	
Cash flow hedges – Foreign currency forward contracts	29,438
Other derivatives	
Foreign currency forward contracts	597
	30,035

Cash flow hedges – Foreign currency risk

Foreign currency forward contracts are designated as hedging instruments in cash flow hedges of foreign currency rate risk arising from forecast sales in USD. The balances of foreign currency forward contract vary with the level of expected foreign currency sales and changes in foreign currency forward rates.

There is an economic relationship between the hedged items and the hedging instruments as the terms of the foreign currency forward contracts match the terms of the expected highly probable forecast transactions. The Group has established a hedge ratio of 1:1 for the hedging relationships as the underlying risks of the foreign currency forward contracts are identical to the hedged risk components. The cash flow hedges were assessed to be highly effective.

Hedge ineffectiveness can arise from:

- Differences in the timing of the cash flows of the forecasted sales and the hedging instruments;
- Changes to the forecasted amounts of cash flows of hedged items and hedging instruments.

29. DERIVATIVE FINANCIAL INSTRUMENTS (CONTINUED)

The Group holds the following foreign currency forward contracts:

	Less than 6 months USD'000	6 to 12 months USD'000	Total USD'000
As at December 31, 2022			
Foreign currency risk			
– Foreign currency forward contracts	317,000	110,000	427,000
Average forward rates (USD/RMB)	6.8278	7.0823	6.8934

	1,497,484	3,543,820

The RMB is not freely convertible into other currencies, however, under Mainland China's Foreign currency Control Regulations and Administration of Settlement and Sale and Payment of Foreign currency Regulations, the Group is permitted to exchange RMB for other currencies through banks authorised to conduct foreign currency business.

Cash at banks earns interest at floating rates based on daily bank deposit rates. Short term time deposits are made for varying periods of between seven days and twelve months depending on the immediate cash requirements of the Group, and earn interest at the respective short term time deposit rates. The bank balances and deposits are deposited with creditworthy banks with no recent history of default. The carrying amounts of the cash and cash equivalents approximate to their fair values.

Pledged deposits earn interest at interest rates stipulated by the respective financial institutions. Pledged deposits represent the amounts pledged to issue letters of credit and deposits for environmental protection.

31. INTEREST-BEARING BANK BORROWINGS

	2022			2021		
	Effective interest rate (%)	Maturity	RMB'000	Effective interest rate (%)	Maturity	RMB'000
Current						
Bank loans – secured (a)	–	–	–	3.970~4.650	2022	56,446
Bank loans – unsecured	1.580-3.250	2023	737,712	1.080~4.275	2022	425,856
			737,712			482,302
Non-current						
Bank loans – secured (a)	4.060~4.650	2027~2032	639,342	3.970~4.650	2026~2030	876,095
Bank loans – unsecured	4.275	2024	74,000	4.275	2024	80,000
			713,342			956,095
			1,451,054			1,438,397

Analysis into:

	2022 RMB'000	2021 RMB'000
Bank loans and other borrowings repayable:		
Within one year	737,712	482,302
In the second year	149,348	128,723
In the third to fifth years, inclusive	330,422	644,193
Beyond five years	233,572	183,179
	1,451,054	1,438,397

- (a) As at December 31, 2022, the bank loans with an amount of RMB639,342,000 (2021: RMB932,541,000) were secured by certain assets, such as building, land, property, plant and equipment and right-of-use assets.
- (b) Except for the secured bank loan amounting to RMB348,230,000 which is denominated in United States dollars, all borrowings are in Renminbi.

32. CONVERTIBLE BONDS

On June 18, 2021 (the "Issue Date"), the Company issued two series of five-year zero coupon convertible bonds due 2026 in an aggregate principal amount of USD300,000,000 (the "Series 1 Bonds") and RMB1,916,000,000 (the "Series 2 Bonds"), respectively (together, the "Convertible Bonds"). The conversion right attaching to any bond may be exercised, at the option of the bondholder, at any time on or after the 41st day after the Issue Date up to the close of business on the date falling 10 working days prior to June 18, 2026 (the "Maturity Date") of each respective series (both days inclusive) into fully paid ordinary H shares with a nominal value of RMB1.00 each at an initial conversion price of HKD250.75 per share for Series 1 Bonds and HKD229.50 per share for Series 2 Bonds, respectively, with a fixed exchange rate of HKD7.7588 to USD1.00 and a fixed exchange rate of HKD1.2143 to RMB1.00, respectively, but could be subject to certain adjustments, as applicable.

Pursuant to the terms and conditions of the Bonds, the price at which H Shares will be issued upon conversion is subject to adjustment for, among other things, capital distributions and capitalization of profits or reserves made by the Company. As a result of the approval of the payment of the 2021 Profit Distribution and the Capitalization of Reserve by the Shareholders at the annual general meeting of the Company on May 31, 2022, the conversion price of the Series 1 Bonds and Series 2 Bonds has been adjusted from HKD \$250.75 per H Share to HK\$166.42 per H Share, and from HK\$229.50 per H Share to HK\$152.32 per H Share, respectively, with effect from June 14, 2022, being the day immediately after the Record Date for determining H Shareholders' entitlement to the Capitalization of Reserve and 2021 Profit Distribution. Save as disclosed above, all other terms of the Series 1 Bonds and Series 2 Bonds remain unchanged.

On the Maturity Date, unless previously redeemed, converted or purchased and cancelled, the Company will redeem each Series 1 Bonds at 100% of its principal amount and each Series 2 Bonds at the USD equivalent of 107.76% of its principal amount, respectively.

The Company will, at the option of the holder of any bond, redeem all or some only of that holder's bonds on June 18, 2024 at, in respect of the Series 1 Bonds, 100%, and in respect of the Series 2 Bonds, the USD equivalent of 104.59% of their outstanding principal amount.

On giving not less than 30 nor more than 60 days' notice to the bondholders, the trustee and the principal agent (which notice will be irrevocable), the bonds may be redeemed by the Company in whole, but not in part, on the date specified in the optional redemption notice at, in respect of the Series 1 Bonds, the principal amount, and in respect of the Series 2 Bonds, the USD equivalent of the early redemption amount, (i) in respect of the Series 1 Bonds only at any time after June 18, 2024 but prior to the Maturity Date, subject to certain conditions as specified in the terms and conditions, or (ii) in respect of both Series at any time if, the aggregate principal amount of the bonds outstanding is less than 10% of the aggregate principal amount originally issued.

The Series 1 Bonds comprise two components:

- (a) Debt component was initially measured at fair value. It is subsequently measured at amortised cost using the effective interest method after considering the effect of the transaction costs.
- (b) Embedded derivative component comprises conversion options and early redemption options (not closely related to the debt component), which was initially and subsequently measured at fair value.

32. CONVERTIBLE BONDS (CONTINUED)

The Series 2 Bonds comprise two components:

- (a) Debt component was initially measured at fair value. It is subsequently measured at amortised cost using the effective interest method after considering the effect of the transaction costs.
- (b) Equity component comprises conversion options. It was initially measured at fair value and subsequently kept unchanged.

The total transaction costs that are related to the issue of the Convertible Bonds were allocated to the debt component, derivative component and equity component in proportion to their respective fair values.

The convertible bonds issued during the year have been split into the liability and equity components as follows:

	Debt component RMB'000	Embedded derivative component RMB'000	Equity component RMB'000	Total RMB'000
Issue of convertible bonds	3,467,090	81,559	198,554	3,747,203
Exchange adjustments	162,350	–	–	162,350
Interest charge	111,479	–	–	111,479
Losses arising on changes of fair value	–	30,534	–	30,534
As at December 31, 2022	3,740,919	112,093	198,554	4,051,566

	Debt component RMB'000	Embedded derivative component RMB'000	Equity component RMB'000	Total RMB'000
Issue of convertible bonds	3,490,689	154,413	201,728	3,846,830
Transaction costs	(64,225)	(3,390)	(3,174)	(70,789)
Transaction costs charged into profit or loss immediately	–	3,390	–	3,390
Exchange adjustments	(16,494)	–	–	(16,494)
Interest charge	57,120	–	–	57,120
Gains arising on changes of fair value	–	(72,854)	–	(72,854)
As at December 31, 2021	3,467,090	81,559	198,554	3,747,203

No conversion or redemption of the Convertible Bonds has occurred up to December 31, 2022 (2021:nil).

As at December 31, 2022 and 2021, the embedded derivative component was measured at fair value with reference to valuation report issued by an independent qualified professional valuer unrelated to the Group. The changes in fair value are recognised in profit or loss during the year.

33. TRADE PAYABLES

Trade payables are non-interest-bearing and normally settled on terms of one to three months.

An ageing analysis of the trade payables as at the end of each reporting period, based on the invoice date, is as follows:

	2022 RMB'000	2021 RMB'000
Within 1 year	398,448	309,449
Over 1 year	7,900	6,085
	406,348	315,534

The amount of trade payables due to a related party was nil as at December 31, 2022 (2021: RMB4,000).

34. OTHER PAYABLES AND ACCRUALS

	2022 RMB'000	2021 RMB'000
Staff payroll and welfare payables	648,791	548,082
Payables for acquisition of plant and equipment	674,245	343,598
Payables for acquisition of equity interests in subsidiaries	14,758	271,336
Accrued expenses	136,781	80,843
Other tax payable	42,399	32,854
Obligations of purchasing the restricted shares under 2019 Pharmaron A share incentive scheme	18,562	21,419
Others	60,739	29,778
	1,596,275	1,327,910

35. CONTRACT LIABILITIES

	2022 RMB'000	2021 RMB'000
Short-term advances of delivery of services	832,140	679,621

Included in the contract liabilities was an amount due to related parties of RMB1,261,000 as at December 31, 2022 (2021: RMB2,267,000), which was repayable on credit terms similar to those offered by the related party to their major customers.

36. LEASE LIABILITIES

	2022 RMB'000	2021 RMB'000
Current		
Lease liabilities	164,034	95,292
Non-current		
Lease liabilities	760,515	284,338
	924,549	379,630

The movements of the lease liabilities during each reporting period are as follows:

	2022 RMB'000	2021 RMB'000
Carrying amount at 1 January	379,630	270,533
New leases	709,064	209,185
Additions as a result of acquisition of a subsidiary (note 42)	1,266	9,129
Accretion of interest recognised during the year	31,358	14,030
Payments	(216,913)	(124,553)
Revision of a lease term arising from a change in the non-cancellable period of a lease	(6,899)	(2,271)
Charges on value-added tax	6,724	3,824
Exchange realignment	20,319	(247)
Carrying amount at 31 December	924,549	379,630

The amounts recognised in profit or loss in relation to leases are as follows:

	2022 RMB'000	2021 RMB'000
Interest on lease liabilities	31,358	14,030
Depreciation charge of right-of-use assets	144,142	101,484
Total amount recognised in profit or loss	175,500	115,514

37. FINANCIAL LIABILITIES AT FAIR VALUE THROUGH PROFIT OR LOSS

	2022 RMB'000	2021 RMB'000
Convertible bonds – Embedded derivative component (note 32)	112,093	81,559

38. DEFERRED INCOME

	2022 RMB'000	2021 RMB'000
Government grants	152,374	149,439

	2022 RMB'000	2021 RMB'000
At the beginning of the year	149,439	158,128
Government grants received	15,460	3,223
Credited to profit or loss	(12,525)	(11,912)
At the end of the year	152,374	149,439

The Group received government grants for capital expenditure incurred for the acquisition of plant and equipment. The amounts are deferred and amortised over the estimated useful lives of the respective assets.

39. SHARE CAPITAL

	2022 RMB'000	2021 RMB'000
Issued and fully paid: 1,191,224,554 (2021: 794,177,098) ordinary shares	1,191,225	794,177

A summary of movements in the Company's share capital is as follows:

	Number of Shares in issue	Share capital RMB'000
At 1 January 2021	794,387,462	794,387
Repurchase and cancellation of restricted A shares	(210,364)	(210)
At December 31, 2021 and January 1, 2022	794,177,098	794,177
Restricted A shares granted	156,925	157
Cancellation of restricted A shares	(132,012)	(132)
Share dividend	397,022,543	397,023
At December 31, 2022	1,191,224,554	1,191,225

	Treasury shares RMB'000
At 1 January 2021	45,475
Repurchased	280,303
Vested	(3,755)
Cancelled	(19,838)
Dividends	(360)
At 31 December 2021	301,825
Repurchased	391,028
Vested	(2,346)
Cancelled	(21,959)
Dividends	(501)
At 31 December 2022	668,037

40. SHARE OPTION SCHEME

2019 Pharmaron A Share Incentive Scheme

On August 15, 2019, the shareholders' meeting of the Company passed a resolution to issue up to 5,651,359 A Shares of the Company under the 2019 Pharmaron A Share Incentive Scheme consisting of Restricted A shares and share options. On October 24, 2019, 4,077,387 restricted A shares of the Company were approved for eligible employees to subscribe at the price of RMB17.85 per A Share and the grant date was October 30, 2019. As of November 5, 2019, 4,077,387 A Shares were subscribed by eligible employees and a consideration of RMB72,781,000 was received by the Company. These granted restricted A Shares have a contractual term of no more than four years and will be unlocked over a three-year period, with 40%, 30% and 30% of the awards unlocking on the first, second and third anniversary dates of the A Share registration date upon meeting certain annual performance conditions. Pursuant to the black-out period provisions of the 2019 Pharmaron A Share Incentive Scheme, employees shall not transfer the A Shares which fulfil the unlocking conditions to any third party in any form within six months from each unlocking anniversary date.

The following share units were outstanding under this scheme during the year:

	2022		2021	
	Subscription price RMB per share	Number of restricted A shares '000	Subscription price RMB per share	Number of restricted A shares '000
At 1 January	17.85	1,113	17.85	2,432
Forfeited during the year	17.85	(70)	17.85	(206)
Exercised during the year	–	–	17.85	(1,113)
Share dividend	–	557	–	–
At 31 December	11.90	1,600	17.85	1,113

The fair value of the award shares under the 2019 A Share Incentive Scheme as at the grant date was determined using the Black-Scholes model by factoring the black-out period into the option pricing model. The fair value and corresponding inputs into the model were as follows:

A Share Incentive Scheme	
Grant date A Share price (RMB)	53.43
Expected volatility in the black-out period	64.89%
Expected life (years)	–
Risk-free interest rate	1.30%

For the year ended December 31, 2022, the Group has recorded share-based compensation expenses of RMB7,445,000 (2021: RMB19,344,000) in relation to the 2019 Pharmaron A Share Incentive Scheme.

40. SHARE OPTION SCHEME (CONTINUED)**2021 Pharmaron A Share Incentive Scheme**

On July 12, 2021, the shareholders' meeting of the Company passed a resolution to issue up to 774,200 A Shares of the Company under the 2021 Pharmaron A Share Incentive Scheme consisting of Restricted A shares. On June 9, 2021, the shareholders' meeting of the Company passed a resolution to grant 774,200 A Shares of the Company under the 2021 Pharmaron A Share Incentive Scheme consisting of Restricted A shares. On July 27, 2021, 774,200 restricted A shares of the Company were approved to grant eligible employees at the price of RMB70.17 per A Share and the grant date was July 27, 2021. These granted restricted A Shares have a contractual term of no more than five years and will be unlocked over a four-year period, with 25%, 25%, 25% and 25% of the awards unlocking on the first, second, third and fourth anniversary dates of the A Share registration date upon meeting certain annual performance conditions. Pursuant to the black-out period provisions of the 2021 Pharmaron A Share Incentive Scheme, employees shall not transfer the A Shares which fulfil the unlocking conditions to any third party in any form within six months from each unlocking anniversary date.

The following share units were outstanding under this scheme during the year:

	2022		2021	
	Subscription price RMB per share	Number of restricted A shares '000	Subscription price RMB per share	Number of restricted A shares '000
At 1 January	70.17	774	–	–
Granted during the year	–	–	70.17	774
Forfeited during the year	70.17	(231)	–	–
Exercised during the year	70.17	(157)	–	–
Share dividend	–	388	–	–
At 31 December	46.78	774	70.17	774

The fair value of the award shares under the 2021 Pharmaron A Share Incentive Scheme as at the grant date was determined using the Black-Scholes model by factoring the black-out period into the option pricing model. The fair value and corresponding inputs into the model were as follows:

A Share Incentive Scheme	
Grant date A Share price (RMB)	186.50
Expected volatility in the black-out period	19.80%
Expected life (years)	0.58-3.58
Risk-free interest rate	1.50%

For the year ended December 31, 2022, the Group has recorded share-based compensation expenses of RMB21,784,000 (2021: RMB18,273,000) in relation to the 2021 Pharmaron A Share Incentive Scheme.

40. SHARE OPTION SCHEME (CONTINUED)**2022 Pharmaron A Share Incentive Scheme**

On May 31, 2022, the Shareholders have resolved to adopt the 2022 Pharmaron A Share Incentive Scheme, pursuant to which, the maximum number of restricted A shares to be issued by the Company is 1,548,800 A shares, representing approximately 0.20% of the Company's total number of issued shares at the time of the adoption of the scheme. The granted Restricted A Shares shall be vested over a four-year period, with 25%, 25%, 25% and 25% of total shares vesting on each anniversary date after the vesting commencement date upon meeting certain performance conditions. As a result of (i) resignations or voluntary forfeiture of Restricted A Shares of certain eligible employees, and (ii) the implementation of the 2021 Capitalization of Reserve, the number of Restricted A Shares to be issued by the Company has been adjusted from 1,548,800 A Shares to 2,203,200 A Shares, and the grant price has been adjusted from RMB58.38 per A Share to RMB38.62 per A Share, pursuant to the Management Measures for Share Incentives of Listed Companies and the 2022 A Share Incentive Scheme.

The following share units were outstanding under this scheme during the year:

	2022	
	Subscription price RMB per share	Number of restricted A shares '000
At 1 January	–	–
Granted during the year	38.62	2,203
At 31 December	38.62	2,203

The fair value of the award shares under the 2022 Pharmaron A Share Incentive Scheme amounting to RMB85,088,000 as at the grant date was determined using the Black-Scholes model by factoring the black-out period into the option pricing model. The fair value and corresponding inputs into the model were as follows:

2022 Pharmaron A Share Incentive Scheme	
Grant date A Share price (RMB)	82.38
Expected volatility in the black-out period	21.12%
Risk-free interest rate	1.50
Expected life (years)	0.58-3.58

For the year ended December 31, 2022, the Group has recorded share-based compensation expenses of RMB18,999,000 in relation to the 2022 Pharmaron A Share Incentive Scheme.

40. SHARE OPTION SCHEME (CONTINUED)

The First H Share Award and Trust Scheme

The Company adopted a H share award and trust scheme (the "H Share Scheme"), comprised of the Employee Share Award Plan (the "ESAP") and the Share Bonus Plan, for the purpose of providing incentives and rewards to eligible participants who contribute to the success of the Group's operations. Eligible participants of the H Share Scheme include any individual, being a Director, senior management, key operating team member, employee, or consultant, who is a full-time PRC or non-PRC employee of any members of the Group.

The H Share Scheme was approved in the 2020 third extraordinary general meeting ("EGM") of the Company on December 11, 2020 and, unless otherwise cancelled or amended, will remain in force for 10 years from that date.

On December 14, 2020, the extraordinary general meeting ("EGM") of the Company passed a resolution to grant 776,100 H Shares of the Company to 81 eligible employees under the H Share Scheme. The awards shall be vested over a four-year period, with 25%, 25%, 25% and 25% of total options vesting on each anniversary date after the vesting commencement date upon meeting certain sales performance conditions. Awards under the Share Bonus Plan shall be vested in two equal tranches (i.e., 50% and 50% on each anniversary date after the vesting commence date upon meeting certain profit performance conditions).

The fair value of the award shares under the H Share Scheme amounting to RMB58,091,000 as at the grant date was determined using the Black-Scholes model by factoring the black-out period into the option pricing model. The fair value and corresponding inputs into the model were as follows:

ESAP granted on December 14, 2020	
Grant date H Share price (HKD)	105.70
Expected volatility in the black-out period	53.00%
Expected life (years)	0.17-2.17
Risk-free interest rate	0.06%

On April 1, 2022, the Management Committee of the H Share Scheme has resolved to grant awards of a total of 751,110 H Shares to 44 eligible employees and none of whom is (i) a director of the Company and (ii) one of the five highest paid individuals during the Reporting Period. The above number of the shares granted in two grants has been adjusted accordingly according to the impact of the Company's 2021 Profit Distribution Plan. All of the relevant granted H Shares shall be vested over a four-year period, with 25%, 25%, 25% and 25% of total shares vesting on each anniversary date after the respective vesting commencement date upon meeting certain vesting conditions.

40. SHARE OPTION SCHEME (CONTINUED)**The First H Share Award and Trust Scheme (continued)**

The fair value of the award shares under the H Share Scheme amounting to RMB33,447,000 as at the grant date was determined using the Black-Scholes model by factoring the black-out period into the option pricing model. The fair value and corresponding inputs into the model were as follows:

ESAP granted on April 1, 2022	
Grant date H Share price (HKD)	65.85
Expected volatility in the black-out period	61.45%
Expected life (years)	0.25-3.25
Risk-free interest rate	0.53%

On May 31, 2022, the management committee of the H Share Scheme has further resolved to grant awards of a total of 7,588,450 H Shares to 131 eligible employees and none of whom is (i) a director of the Company and (ii) one of the five highest paid individuals during the Reporting Period. The above number of the shares granted in two grants has been adjusted accordingly according to the impact of the Company's 2021 Profit Distribution Plan. All of the relevant granted H Shares shall be vested over a four-year period, with 25%, 25%, 25% and 25% of total shares vesting on each anniversary date after the respective vesting commencement date upon meeting certain vesting conditions.

The fair value of the award shares under the H Share Scheme amounting to RMB336,168,000 as at the grant date was determined using the Black-Scholes model by factoring the black-out period into the option pricing model. The fair value and corresponding inputs into the model were as follows:

ESAP granted on May 31, 2022	
Grant date H Share price (HKD)	62.75
Expected volatility in the black-out period	62.58%
Expected life (years)	0.42-3.42
Risk-free interest rate	0.53%

For the year ended December 31, 2022, the Group has recorded share-based compensation expenses of RMB127,248,000 (2021:RMB26,269,000) in relation to the H Share Scheme.

40. SHARE OPTION SCHEME (CONTINUED)

The First H Share Award and Trust Scheme (continued)

The following H shares options were outstanding under the H Share Scheme during the year:

	2022 '000	2021 '000
At 1 January	765	776
Granted during the year	8,090	–
Share dividend	510	–
Exercised during the year	(183)	–
Forfeited during the year	(64)	(11)
At 31 December	9,118	765

As at December 31, 2022, the Company had 9,263,000 awarded shares outstanding under the share award scheme, which represented approximately 0.78% of the Company's shares in issue.

During the year ended December 31, 2022, the Group had purchased 8,473,000 of its own shares with market price of RMB391,028,000 through the trustee from the open market and had been deducted from equity as treasure shares (2021: 280,303,000).

Share Incentive Plan of Subsidiaries

In 2021, certain subsidiaries of the Group, whose revenue, profits or total assets accounted for less than 75% of the Company in any of the three preceding financial years, granted 857,000 share-based incentives to eligible employees to attract and motivate personnel and promote the success of the subsidiaries.

The Group recognised share-based compensation expenses of RMB1,698,000 (2021: RMB3,643,000) during the year ended December 31, 2022.

41. RESERVES

(i) Statutory reserve

In accordance with the Company Law of the People's Republic of China, the companies in the PRC are required to allocate 10% of the statutory after tax profits to the statutory reserve until the cumulative total of the reserve reaches 50% of the companies registered capital. Subject to approval from the relevant PRC authorities, the statutory reserve may be used to offset any accumulated losses or increase the registered capital of the companies. The statutory reserve is not available for dividend distribution to shareholders of the PRC subsidiaries.

(ii) Capital reserve

The capital reserve of the Group represents the reserve arisen pursuant to the reorganisation of subsidiaries.

(iii) Exchange fluctuation reserve

The exchange fluctuation reserve represents exchange differences arising from the translation of the financial statements of foreign operations whose functional currencies are different from the Group's presentation currency.

42. BUSINESS COMBINATIONS

On January 7, 2022, the Group acquired 100% equity interest of Pharmaron Manufacturing Services (UK) Ltd. (formerly known as Aesica Pharmaceuticals Limited), at a cash consideration of GBP57,751,000 (equivalent to RMB498,243,000) and Pharmaron Manufacturing Services (UK) Ltd. became a subsidiary of the Group. Pharmaron Manufacturing Services (UK) Ltd. principally engages in manufacturing of small molecule APIs.

The fair values of the identifiable assets and liabilities of Pharmaron Manufacturing Services (UK) Ltd. as at the date of acquisition were as follows:

	Notes	Fair value recognised on acquisition RMB'000
Property, plant and equipment	14	162,157
Right-of-use assets	15	1,320
Inventories		23,962
Trade receivables		10,804
Contract assets		3,002
Prepayments, other receivables and other assets		10,473
Pledged deposits		10,785
Cash and cash equivalents		17,878
Trade payables		(11,612)
Contract liabilities		(24,330)
Other payables and accruals		(70,552)
Lease liabilities	36	(1,266)
Deferred tax liabilities	21	(16,664)
Total identifiable net assets at fair value		115,957
Goodwill on acquisition	16	382,286
Satisfied by cash		498,243

An analysis of the cash flows in respect of the acquisition of the subsidiaries is as follows:

Cash consideration	(498,243)
Cash and cash equivalents acquired	28,663
Net outflow of cash and cash equivalents included in cash flows generated in investing activities	(469,580)

Since the acquisition, Pharmaron Manufacturing Services (UK) Ltd. contributed RMB50,915,000 to the Group's revenue and caused a loss of RMB140,686,000 to the consolidated profit of the year ended December 31, 2022.

42. BUSINESS COMBINATIONS (CONTINUED)

Had the combination taken place at the beginning of the year, the revenue of the Group and the profit of the Group for the year would have been RMB10,266,288,000 and RMB1,666,391,000 respectively.

On April 8, 2022, the Group acquired 100% equity interest of Beijing Anikeeper Biotech Co.,Ltd. (Anikeeper), at a cash consideration of RMB85,242,000 and Anikeeper became a subsidiary of the Group. Anikeeper mainly provides laboratory animal breeding, breeding and sales, laboratory animal import agent and special strain conservation breeding, preclinical tumour pharmacodynamics experiments and consulting and other services.

The fair values of the identifiable assets and liabilities of Beijing Anikeeper Biotech Co., Ltd. as at the date of acquisition were as follows:

	Notes	Fair value recognised on acquisition RMB'000
Property, plant and equipment	14	215
Right-of-use assets	15	121
Biological assets – non-current	20	1,096
Other non-current assets		124
Trade receivables		2,724
Financial assets at fair value through profit or loss		11,957
Inventories		96
Biological assets – current	20	2,126
Prepayments, other receivables and other assets		991
Cash and cash equivalents		182
Trade payables		(398)
Contract liabilities		(36)
Other payables and accruals		(475)
Deferred tax liabilities	21	(338)
Total identifiable net assets at fair value		18,385
Goodwill on acquisition	16	66,857
Satisfied by cash		85,242

42. BUSINESS COMBINATIONS (CONTINUED)

An analysis of the cash flows in respect of the acquisition of a subsidiary is as follows:

	RMB'000
Cash consideration	(85,242)
Cash and cash equivalents acquired	182
<hr/>	
Net outflow of cash and cash equivalents included in cash flows generated in investing activities	(85,060)

Since the acquisition, Anikeeper contributed RMB9,174,000 to the Group's revenue and a profit of RMB4,192,000 to the consolidated profit of the Group for the year ended December 31, 2022.

Had the combination taken place at the beginning of the year, the revenue of the Group and the profit of the Group for the year would have been RMB10,270,551,000 and RMB1,668,246,000 respectively.

On July 1, 2022, the Group acquired Coventry API manufacturing facility located in Rhode Island, the U.S., at a cash consideration of USD31,500,000 (equivalent to RMB210,618,000). The manufacturing facility is equipped with advanced manufacturing facilities and can provide cGMP API manufacturing services from pilot to commercial scale.

The fair values of the identifiable assets and liabilities of Coventry API manufacturing facility as at the date of acquisition were as follows:

	Notes	Fair value recognised on acquisition RMB'000
Property, plant and equipment	14	129,714
Deferred tax liabilities	21	(2,204)
<hr/>		
Total identifiable net assets at fair value		127,510
<hr/>		
Goodwill on acquisition	16	83,108
<hr/>		
Satisfied by cash		210,618

42. BUSINESS COMBINATIONS (CONTINUED)

An analysis of the cash flows in respect of the acquisition of a subsidiary is as follows:

	RMB'000
Cash consideration	(210,618)
Cash and cash equivalents acquired	–
Net outflow of cash and cash equivalents included in cash flows generated in investing activities	(210,618)

Since the acquisition, Coventry API manufacturing facility contributed nil to the Group's revenue and caused a loss of RMB74,782,000 to the consolidated profit of the Group for the year ended December 31, 2022.

Had the combination taken place at the beginning of the year, the revenue of the Group and the profit of the Group for the year would have been RMB10,266,288,000 and RMB1,666,391,000 respectively.

43. NOTES TO THE CONSOLIDATED STATEMENT OF CASH FLOWS

(a) Major non-cash transactions

During the year, the Group entered into lease arrangements with a total capital value at the inception of the leases of RMB709,064,000 (2021: RMB209,185,000) as at December 31, 2022.

(b) Changes in liabilities arising from financing activities

	Interest-bearing bank borrowings RMB'000	Lease liabilities RMB'000	Convertible bonds RMB'000
At January 1, 2022	1,438,397	379,630	3,467,090
Changes from financing cash flows	(80,896)	(216,913)	–
New leases	–	709,064	–
Increase arising from acquisition of subsidiaries (note 42)	–	1,266	–
Reassessment and revision of lease terms	–	(6,899)	–
Interest expense	48,867	31,358	111,479
Charges on value-added tax	–	6,724	–
Foreign currency movements	44,686	20,319	162,350
At December 31, 2022	1,451,054	924,549	3,740,919

43. NOTES TO THE CONSOLIDATED STATEMENT OF CASH FLOWS (CONTINUED)

(b) Changes in liabilities arising from financing activities (continued)

	Interest-bearing bank borrowings RMB'000	Lease liabilities RMB'000	Convertible bonds RMB'000
At January 1, 2021	780,957	270,533	–
Changes from financing cash flows	639,660	(124,553)	3,776,041
Equity component of convertible bonds	–	–	(198,554)
Embedded derivative component of convertible bonds	–	–	(151,023)
Addition	–	209,185	–
Acquisition of subsidiaries	–	9,129	–
Decrease due to termination of lease contracts	–	(2,271)	–
Interest expense	46,589	14,030	57,120
Charges on value added tax	–	3,824	–
Foreign currency movements	(28,809)	(247)	(16,494)
At December 31, 2021	1,438,397	379,630	3,467,090

(c) Total cash outflow for leases

	2022 RMB'000	2021 RMB'000
Within financing activities	225,949	141,445

44. CONTINGENT LIABILITIES

As at the end of each reporting period, neither the Group nor the Company had any significant contingent liabilities.

45. PLEDGE OF ASSETS

Details of the Group's interest-bearing bank loans and other borrowings, which are secured by the assets of the Group, are included in note 31 to the consolidated financial statements.

46. COMMITMENTS

(a) Capital commitments

	2022 RMB'000	2021 RMB'000
Contracted, but not provided for:		
Property, plant and equipment	1,204,653	1,019,139
Capital contributions payable to associates	125,894	854,675
	1,330,547	1,873,814

47. RELATED PARTY TRANSACTIONS

In addition to the transactions and balances detailed elsewhere in the consolidated financial statements, the Group had the following material transactions with related parties during the year:

(a) Transactions with related parties:

	2022 RMB'000	2021 RMB'000
Entities controlled by the close family members of the directors		
Purchases of raw materials (i)	2,573	8,249
Rental cost (ii)	1,875	–
Entities in which the directors act as key management personnel		
Provision of pharmaceutical R&D service (iii)	52,860	26,043
Rental income (iv)	117	117
Associate		
Provision of pharmaceutical R&D service (iii)	–	282

(i) The purchases from related parties were made according to the published prices and conditions similar to those offered to the major customers of the suppliers.

(ii) The rental cost from related parties was an office rent from Ningbo Kanghui Technology Development Co., Ltd..

(iii) The R&D service fees were made according to the price list for similar nature and quantity of services provided to other clients.

(iv) The rental income from related parties was an office rent to Kangjun Investment Management (Beijing) Co., Ltd..

(b) Compensation of key management personnel of the Group:

	2022 RMB'000	2021 RMB'000
Salaries and other benefits	12,642	12,245
Performance-related bonus	750	23,750
	13,392	35,995

Further details of directors' and the chief executive's emoluments are included in note 9 to the financial statements.

(c) Outstanding balances with related parties

Details of the Group's trade balances with its related parties as at the end of each reporting period are disclosed in notes 25, 26, 33 and 35 to the financial statements.

48. FINANCIAL INSTRUMENTS BY CATEGORY

The carrying amounts of each of the categories of financial instruments as at the end of each reporting period are as follows:

As at December 31, 2022	Financial assets at fair value through profit or loss			Total RMB'000
	Financial assets at amortised cost RMB'000	Equity investments at fair value through profit or loss RMB'000	Mandatorily designated as such RMB'000	
Equity investments at fair value through profit or loss	–	239,048	–	239,048
Financial assets at fair value through profit or loss	–	–	694,472	694,472
Trade receivables	1,881,882	–	–	1,881,882
Derivative financial instruments	–	–	50,890	50,890
Financial assets included in other non-current assets	207,957	–	–	207,957
Financial assets included in prepayments, other receivables and other assets	641,308	–	–	641,308
Pledged deposits	49,255	–	–	49,255
Cash and cash equivalents	1,448,229	–	–	1,448,229
	4,228,631	239,048	745,362	5,213,041

Financial liabilities	Financial liabilities at fair value through profit or loss RMB'000	Financial liabilities at amortised cost RMB'000	Total RMB'000
Trade payables	–	406,348	406,348
Financial liabilities included in other payables and accruals	–	882,884	882,884
Interest-bearing bank borrowings	–	1,451,054	1,451,054
Convertible bonds debt component	–	3,740,919	3,740,919
Financial liabilities at fair value through profit or loss	112,093	–	112,093
Derivative financial instruments	30,035	–	30,035
	142,128	6,481,205	6,623,333

48. FINANCIAL INSTRUMENTS BY CATEGORY (CONTINUED)

The carrying amounts of each of the categories of financial instruments as at the end of each reporting period are as follows: (continued)

As at December 31, 2021	Financial assets at fair value through profit or loss			Total RMB'000
	Financial assets at amortised cost RMB'000	Equity investments at fair value through profit or loss RMB'000	Mandatorily designated as such RMB'000	
Equity investments at fair value through profit or loss	–	310,063	–	310,063
Financial assets at fair value through profit or loss	–	–	1,537,947	1,537,947
Trade receivables	1,228,849	–	–	1,228,849
Derivative financial instruments	–	–	16,674	16,674
Financial assets included in other non-current assets	24,482	–	–	24,482
Financial assets included in prepayments, other receivables and other assets	1,109,486	–	–	1,109,486
Pledged deposits	17,243	–	–	17,243
Cash and cash equivalents	3,526,577	–	–	3,526,577
	5,906,637	310,063	1,554,621	7,771,321

Financial liabilities	Financial liabilities at fair value through profit or loss RMB'000	Financial liabilities at amortised cost RMB'000	Total RMB'000
Trade payables	–	315,534	315,534
Financial liabilities included in other payables and accruals	–	731,832	731,832
Interest-bearing bank and other borrowings	–	1,438,397	1,438,397
Convertible bonds debt component	–	3,467,090	3,467,090
Financial liabilities at fair value through profit or loss	81,559	–	81,559
	81,559	5,952,853	6,034,412

49. FAIR VALUE AND FAIR VALUE HIERARCHY OF FINANCIAL INSTRUMENTS

The carrying amounts of the Group's financial instruments approximate to their fair values.

Management has assessed that the fair values of cash and cash equivalents, trade receivables, financial assets included in prepayments, other receivables and other assets, current interest-bearing bank and other borrowings, trade payables, financial liabilities included in other payables and accruals approximate to their carrying amounts largely due to the short-term maturities of these instruments.

The fair value of the non-current portion of interest-bearing bank borrowings has been calculated by discounting the expected future cash flows using rates currently available for instruments with similar terms, credit risk and remaining maturities.

The changes in fair value as a result of the Group's own non-performance risk for interest-bearing bank borrowings as at the end of each reporting period were assessed to be insignificant.

The Group's corporate finance team is responsible for determining the policies and procedures for the fair value management of financial instruments. The corporate finance team reports directly to the chief financial officer and the board of directors. At each reporting date, the corporate finance team analyses the movements in the values of financial instruments and determines the major inputs applied in the valuation. The valuation is reviewed and approved by the chief financial officer. The valuation process and results are discussed with the board of directors for annual financial reporting.

The fair values of the financial assets and liabilities are included at the amount at which the instrument could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale. The following methods and assumptions were used to estimate the fair values:

For the fair value of the unlisted equity investments at fair value through profit or loss, management has estimated the potential effect of using reasonably possible alternatives as inputs to the valuation model.

The Group invests in some wealth management products issued by banks. The Group has estimated the fair values of these unlisted investments by using a discounted cash flow valuation model based on the market interest rates of instruments with similar terms and risks.

The Group enters into derivative financial instruments including forward currency contracts which are measured using valuation techniques similar to forward pricing, using present value calculations. The models incorporate various market unobservable inputs.

The fair value of the derivative component of the convertible bonds were measured with reference to valuation report issued by a third-party professional valuer.

49. FAIR VALUE AND FAIR VALUE HIERARCHY OF FINANCIAL INSTRUMENTS (CONTINUED)

Below is a summary of significant unobservable inputs to the valuation of financial instruments together with a relationship of unobservable inputs to fair value as at December 31, 2022 and 2021:

	Valuation technique	Significant unobservable inputs (level 3)	Range	Relationship of unobservable inputs to fair value
Equity investments at fair value through profit or loss	Valuation multiples	Average EV/R&D multiple of peers	2.3-8.9	The higher the multiple, the higher the fair value
Fund investments at fair value through profit or loss	Net asset value of underlying investments	Net asset value		The higher net asset value, the higher the fair value
Convertible bonds – Embedded derivative component	Binominal option pricing with the volatilities and risk-free rates as key inputs	Expected volatility/Risk-free rate		The higher the expected volatility, the higher the fair value. The lower risk-free rate, the higher the fair value.

Fair value hierarchy

The following tables illustrate the fair value measurement hierarchy of the Group's financial instruments:

Assets measured at fair value

	Significant Observable inputs (level 1) RMB'000	Significant observable inputs (level 2) RMB'000	Significant unobservable inputs (level 3) RMB'000	Total RMB'000
As at December 31, 2022				
Equity investments at fair value through profit or loss	19,992	–	219,056	239,048
Derivative financial instruments (assets)	–	50,890	–	50,890
Financial assets at fair value through profit or loss	–	694,472	–	694,472
	19,992	745,362	219,056	984,410
As at December 31, 2021				
Equity investments at fair value through profit or loss	83,946	81,779	144,338	310,063
Financial assets at fair value through profit or loss	–	1,537,947	–	1,537,947
Derivative financial instruments (assets)	–	16,674	–	16,674
	83,946	1,636,400	144,338	1,864,684

49. FAIR VALUE AND FAIR VALUE HIERARCHY OF FINANCIAL INSTRUMENTS (CONTINUED)

Fair value hierarchy (continued)

Assets measured at fair value (continued)

The movements in fair value measurements within Level 3 during the year are as follows:

Equity investments at fair value through profit or loss	2022 RMB'000	2021 RMB'000
At 1 January	144,338	24,621
Purchase	67,789	95,191
Transferred from an investment in associates to equity investments at fair value through profit or loss	–	31,817
Transfer out	–	(38,489)
Fair value gain	6,984	31,373
Exchange realignment	(55)	(175)
	219,056	144,338

Liabilities measured at fair value

	Significant observable inputs (level 1) RMB'000	Significant observable inputs (level 2) RMB'000	Significant unobservable inputs (level 3) RMB'000	Total RMB'000
As at December 31, 2022				
Derivative financial instruments (liabilities)	–	30,035	–	30,035
Convertible bonds – Embedded derivative component	–	–	112,093	112,093
	–	30,035	112,093	142,128

	Significant observable inputs (level 1) RMB'000	Significant observable inputs (level 2) RMB'000	Significant unobservable inputs (level 3) RMB'000	Total RMB'000
As at December 31, 2021				
Convertible bonds – Embedded derivative component	–	–	81,559	81,559

49. FAIR VALUE AND FAIR VALUE HIERARCHY OF FINANCIAL INSTRUMENTS (CONTINUED)

Fair value hierarchy (continued)

Transfer within hierarchy

Since Imago BioSciences, a joint-stock company of the Group, was listed on Nasdaq on July 16, 2021, and its open market transaction price can be obtained from the active market, but its shares are restricted from sale for 6 months after listing date. Therefore, the Group changed its fair value hierarchy from the level 3 to the level 2, and further to the level 1 after the black-out period.

50. FINANCIAL RISK MANAGEMENT OBJECTIVES AND POLICIES

The Group's principal financial instruments, other than derivatives, comprise lease liabilities, interest-bearing bank and other borrowings, and cash and short-term deposits. The main purpose of these financial instruments is to raise finance for the Group's operations. The Group has various other financial assets and liabilities such as trade receivables and trade payables, which arise directly from its operations.

The main risks arising from the Group's financial instruments are interest rate risk, foreign currency risk, credit risk and liquidity risk. The board of directors reviews and agrees policies for managing each of these risks and they are summarised below.

The Group's accounting policies in relation to derivatives are set out in note 2.3 to the financial statements.

Interest rate risk

The Group's exposure to the risk of changes in interest rates relates primarily to its interest-bearing bank loans and other borrowings with a floating interest rate.

The following table demonstrates the sensitivity to reasonably possible changes in interest rate, with all other variables held constant, of the Group's profit before tax (mainly the impact on floating rate borrowings) and the Group's equity.

	Increase/ (decrease) in basis points	(Decrease)/ increase in profit before tax RMB'000	(Decrease)/ increase in equity RMB'000
Year ended December 31, 2022	100/(100)	(11,355)/11,355	(9,652)/9,652
Year ended December 31, 2021	100/(100)	(13,340)/13,340	(11,340)/11,340

50. FINANCIAL RISK MANAGEMENT OBJECTIVES AND POLICIES (CONTINUED)**Foreign currency risk**

The Group has transactional currency exposures. Such exposures arise from sales or purchases by operating units and financing activities in currencies other than the units' functional currencies.

In addition, the Group has currency exposures from its interest-bearing bank borrowings.

The following table details the Group's sensitivity to a 5% increase and decrease in the relevant foreign currencies against the functional currency, of the Group's profit before tax and the Group's equity excluding the impact of retained earnings due to the changes of exchange fluctuation reserve. The sensitivity analysis includes only outstanding foreign currency denominated monetary items and adjusts their translation at the end of each reporting period for a 5% change in foreign currency rates.

	Increase/(decrease) in profit before tax RMB'000	Increase/(decrease) in equity RMB'000
Year ended December 31, 2022		
if RMB weakens against USD	10,968	9,323
if RMB strengthens against USD	(10,968)	(9,323)

	Increase/(decrease) in profit before tax RMB'000	Increase/(decrease) in equity RMB'000
Year ended December 31, 2021		
if RMB weakens against USD	3,337	2,836
if RMB strengthens against USD	(3,337)	(2,836)

Credit risk

The Group trades only with recognised and creditworthy third parties. It is the Group's policy that all customers who wish to trade on credit terms are subject to credit verification procedures. In addition, receivable balances are monitored on an ongoing basis and the Group's exposure to bad debts is not significant.

Maximum exposure and year-end staging

The tables below show the credit quality and the maximum exposure to credit risk based on the Group's credit policy, which is mainly based on past due information unless other information is available without undue cost or effort, and year-end staging classification as at the end of each reporting period. The amounts presented are gross carrying amounts for financial assets.

* For trade receivables and contract assets to which the Group applies the simplified approach for impairment, information based on the provision matrix is disclosed in notes 25 and 26 to the financial statements, respectively.

Further quantitative data in respect of the Group's exposure to credit risk arising from trade receivables are disclosed in note 25 to the consolidated financial statements.

50. FINANCIAL RISK MANAGEMENT OBJECTIVES AND POLICIES (CONTINUED)**Liquidity risk**

The Group monitors and maintains a level of cash and cash equivalents deemed adequate by the management of the Group to finance the operations and mitigate the effects of fluctuations of cash flows.

The maturity profile of the Group's financial liabilities as at the end of each reporting period, based on the contractual undiscounted payments, is as follows:

2022	Less than 1 year RMB'000	1 to 5 years RMB'000	Over 5 years RMB'000	Total RMB'000
Interest-bearing bank borrowings	767,482	560,077	257,362	1,584,921

	1,691,413	5,072,563	292,165	7,056,141

50. FINANCIAL RISK MANAGEMENT OBJECTIVES AND POLICIES (CONTINUED)

Equity price risk

Equity price risk is the risk that the fair values of equity securities decrease as a result of changes in the levels of equity indices and the values of individual securities. The Group is exposed to equity price risk arising from individual equity investments included equity investments at fair value through profit of loss (note 19) as at December 31, 2022. The Group's listed investments are listed on Nasdaq and are valued at quoted market prices at the end of the reporting period.

If the prices of the respective equity investments had been changed based on the 10% higher/lower, the profit for the year ended December 31, 2022 would have increased/decreased by RMB1,999,000 (2021: 16,573,000), as a result of the changes in fair value of financial assets at FVTPL.

Capital management

The primary objectives of the Group's capital management are to safeguard the Group's ability to continue as a going concern and to maintain healthy capital ratios in order to support its business and maximize shareholders' value.

The Group manages its capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of the underlying assets. To maintain or adjust the capital structure, the Group may adjust the dividend payment to shareholders, return capital to shareholders or issue new shares. The Group is not subject to any externally imposed capital requirements. No changes were made in the objectives, policies or processes for managing capital during the years ended December 31, 2022 and 2021.

The Group monitors capital using a gearing ratio, which is total liabilities divided by total assets. The gearing ratios as at the end of the reporting periods were as follows:

	Year ended December 31,	
	2022	2021
	RMB'000	RMB'000
Total assets	20,492,556	18,389,124
Total liabilities	9,652,689	8,093,817
Gearing ratio	47.10%	44.01%

Notes to the Consolidated Financial Statements

Year ended December 31, 2022
