9. FINANCIAL RISK MANAGEMENT (Continued)

(a) Market risk (Continued)

(i) Market price risk (Continued)

The Sub-Fund held 186 out of 186 (31 December 2022: 193 out of 193) constituent securities comprising the S&P New China Sectors (A-shares Capped) Index. The Sub-Fund is therefore exposed to substantially the same market price risk as the S&P New China Sectors (A-shares Capped) Index.

Sensitivity analysis in the event of a possible change in the index as estimated by the Manager.

As at 30 June 2023, if the S&P New China Sectors (A-shares Capped) Index were to increase by 10% (31 December 2022: 20%) with all other variables held constant, this would increase the operating profit for the year by approximately HKD 62,283,507 (31 December 2022: HKD90,685,126). Conversely, if the S&P New China Sectors (A-shares Capped) Index were to decrease by 10% (31 December 2022: 20%), this would decrease the operating profit for the year by an equal amount..

(ii) Interest rate risk

Interest rate risk arises from the effects of fluctuations in the prevailing levels of market interest rates on the fair value of financial assets and liabilities and future cash flow.

As at 30 June 2023 and 31 December 2022, interest rate risk arises only from bank balances. As the bank balances held by the Sub-Fund is short term in nature and interest arising from these interest bearing assets are immaterial, the Manager considers that changes in their fair value and future cash flows in the event of a change in market interest rates will not be material. As a result, the Manager considers sensitivity analysis of interest rate risk is not necessary to be presented.

(iii) Currency risk

Currency risk is the risk that the value of financial instruments will fluctuate due to changes in foreign exchange rates.

The Sub-Fund has assets and liabilities denominated in currencies other than HKD, the functional currency of the Sub-Fund. The Sub-Fund is therefore exposed to currency risks as the value of the assets and liabilities denominated in other currencies will fluctuate due to change in exchange rates.

The Sub-Fund has not entered into any foreign exchange hedging transactions for the purpose of managing its exposure to foreign exchange movement (both monetary and non-monetary). The Manager monitors the Sub-Fund's monetary and non-monetary foreign exposure on a daily basis.

Assets and liabilities denominated in United States Dollar are not considered as subject to currency risk as it is currently pegged to the HKD within a narrow range.

The following table shows the approximate changes in the Sub-fund's net assets in response to a reasonable possible changes in the RMB exchange rate as at 30 June 2023 and 31 December 2022, with all other variables held constant.

(b) Credit and counterparty risk

Credit and counterparty risk is the risk that an issuer or counterparty will be unable or unwilling to meet a commitment that it has entered into with the Sub-Fund.

The Sub-Fund limits its exposure to credit and counterparty risk by carrying out the majority of its investment transactions and contractual commitment activities with well-established broker-dealers, banks and regulated exchanges with high credit ratings.

All transactions in listed securities are settled or paid for upon delivery using approved and reputable brokers. In addition, the Sub-Fund places bank balances with reputable financial institutions. As such, the Manager does not consider the Sub-Fund to be exposed to significant credit and counterparty risk.

As at 30 June 2023, the Sub-Fund placed bank balances of HKD1,194,703 (31 December 2022: HKD590,560) and investments of HKD618,558,160 (31 December 2022: HKD357,871,840) with The Hongkong and Shanghai Banking Corporation Limited ("HSBC"), which is the custodian of the Sub-Fund. As at 30 June 2023 and 31 December 2022, the credit ratings of the Sub-Fund's custodian are at or above investment grade.

The Sub-Fund measures credit risk and expected credit losses using probability of default, exposure at default and loss given default. Management consider both historical analysis and forward looking information in determining any expected credit loss. As at 30 June 2023 and 31 December 2022, deposit reserve, dividend receivable, interest receivable, other receivables and bank balances are held with counterparties with high credit ratings and are due to be settled within 1 month. Management consider the probability of default to be close to zero as the counterparties have a strong capacity to meet their contractual obligations in the near term. As a result, no loss allowance has been recognised based on 12-month expected credit losses as any such impairment would be wholly insignificant to the Sub-Fund.

The maximum exposure to credit risk as at 30 June 2023 and 31 December 2022 is the carrying amount of the financial assets as shown on the statement of financial position.

(c) Liquidity risk

Liquidity risk is the risk that the Sub-Fund may not be able to generate sufficient cash resources to settle its obligations in full as they fall due or can only do so on terms that are materially disadvantageous.

The Sub-Fund is exposed to daily redemptions of units in the Sub-Fund. The Sub-Fund invests the majority of its assets in securities that are traded in an active market which can be readily disposed of.

The table below analyses the Sub-Fund's financial liabilities into relevant maturity groupings based on the remaining period at the reporting date to the contractual maturity date. The amounts in the table are the contractual undiscounted cash flows. Balances due within 12 months equal their carrying balances, as the impact of discounting is not significant.

Units are redeemed on demand at the unitholder's option. As at 30 June 2023, there were 2 (31 December 2022: 2) nominee accounts holding more than 10% of the Sub-Fund's unit.

The Sub-Fund manages its liquidity risk by investing in securities that it expects to be able to liquidate within 7 days or less. The following table illustrates the expected liquidity of assets held:

	Less than 1 month <i>HKD</i>	1 to 12 months <i>HKD</i>	No stated maturity <i>HKD</i>	Total <i>HKD</i>

(d) Fair value estimation

The Sub-Fund classifies fair value measurements using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The fair value hierarchy has the following levels:

- Quoted prices (unadjusted) in active markets for identical assets or liabilities that the Sub-Fund can access at the measurement date (level 1).
- Inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices) (level 2).
- Inputs for the asset or liability that are not based on observable market data (that is, unobservable inputs) (level 3).

The level in the fair value hierarchy within which the fair value measurement is categorised in its entirety is determined on the basis of the lowest level input that is significant to the fair value measurement in its entirety. For this purpose, the significance of an input is assessed against the fair value measurement in its entirety. If a fair value measurement uses observable inputs that require significant adjustment based on unobservable inputs, that measurement is a level 3 measurement. Assessing the significance of a particular input to the fair value measurement in its entirety requires judgment, considering factors specific to the asset or liability.

The determination of what constitutes "observable" requires significant judgment by the Sub-Fund. The Sub-Fund considers observable data to be that market data that is readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market.

(d) Fair value estimation (Continued)

The following table analyses within the fair value hierarchy the Sub-Fund's financial assets (by class) measured at fair value at 30 June 2023 and 31 December 2022:

¹Amount is less than HKD1.

Investments whose values are based on quoted market prices in active markets, and therefore classified within level 1, include active listed equities. The Sub-Fund does not adjust the quoted price for these instruments.

Financial instruments that trade in markets that are not considered to be active but are valued based on quoted market prices, dealer quotations or alternative pricing sources supported by observable inputs are classified within level 2. Management has used best estimation and assessed all available information and considers that the last traded price is the best estimation of the fair value of level 2 investments.

As at 30 June 2023 and 31 December 2022, there was no investment held by the Sub-Fund which has been suspended for trading and classified in level 2.

Investments classified within level 3 have significant unobservable inputs, as they trade infrequently or do not trade. As at 30 June 2023, there was one (31 December 2022: one) investment held by the Sub-Fund classified in level 3.

On 25 May 2022, the Sub-Fund received an unlisted rights of trust interest from Kangmei Pharmaceutical Co., Ltd that had no active trading market. The Manager has assessed the fair value and considered that there is high uncertainty of the future settlement of the unlisted rights of trust. Therefore, the Manager has marked its fair value to HKD nil.

During the period ended 30 June 2023 and 31 December 2022, there was no investment transferred from level 1 to level 3.

Transfers between levels of the fair value hierarchy are deemed to have occurred at the beginning of the reporting period.

The assets and liabilities included in the condensed statement of financial position, other than investments, are carried at amortised cost. The carrying value of these financial assets and liabilities are considered by the Manager to approximate their fair value as they are short term in nature and the effect of discounting is immaterial. There are no other assets and liabilities not carried at fair value but for which fair value is disclosed.

(e) Capital risk management

The Sub-Fund's capital is represented by the redeemable units outstanding. The Sub-Fund's objective is to provide investment results that correspond generally to the performance of the respective index. The Manager:

- Redeem and issue new units on a daily basis in accordance with the constitutive documents of the Sub-Fund:
- Exercise discretion when determining the amount of distributions of the Sub-Fund to the unitholders;
 and
- Suspend the creation and redemption of units under certain circumstance as currently disclosed in the Prospectus of the Sub-Fund.
