INDUSTRY OVERVIEW

China has been one of the most populous countries and one of the fastest growing infant milk formula markets in the world. With continued urbanization and the rise in the number of women in the workplace, an increasing number of mothers in China have grown to realize the convenience and nutritional benefits offered by infant milk formula products as a supplement to and/or substitute for breast milk for their infants. According to the National Bureau of Statistics, China's birth rate dropped from 12.95‰ in 2016 to 6.77‰ in 2022, with number of newborns declining to approximately 9.6 million in 2022. According to Frost & Sullivan, an industry consulting firm, the number of children aging from zero to three decreased accordingly from approximately 50.9 million in 2016 to approximately 32.0 million in 2022, with a compound annual growth rate ("CAGR") of -7.4%. Despite the decline from 2017 to 2022, the decline in the number of newborns is expected to slow from 2023 to 2027, thanks to the supportive measures for the three-child policy. Due to factors listed below, China's infant milk formula market in terms of retail sales value is expected to remain stable.

- Growth in consumers' confidence in the quality of and preference for China's infant milk formula products. With the enhancement in the quality management regime of China's dairy industry and the increased competitiveness of Chinese dairy brands, consumers' confidence in and consumption preference for China's infant milk formula products continued to increase. Such increase will drive the production and sales of China's infant milk formula products, which could in turn better satisfy consumers' diversified and unique consumption needs.
- Growth of the high-end infant milk formula segment. Due to increasing urbanization, rising disposable income and growing health awareness, the demand for high-end infant milk formula products is expected to be the driving force of the overall infant milk formula industry in China. According to the National Bureau of Statistics, China's per capita annual disposable income in 2022 reached RMB36,883, with a CAGR of 7.3% from 2017 to 2022. Such increase will in turn increase the consumption momentum of China's high-end infant milk formula products.
- Increasing urbanization and rising disposable income. The increase in the urbanization rate and the per capita annual disposable income of Chinese residents will enhance the purchasing power of consumers, allowing them to purchase more infant milk formula products. Lower-tier cities as well as rural areas in China are becoming wealthier and more urbanized, and families in such regions are increasingly able to afford higher-quality infant milk formula products. In general, these regions have larger populations and therefore higher potential for consumption growth.

- Favorable industry policies by the PRC government:
 - The National Development and Reform Commission of China unveiled the Action Plan for the Promotion of Domestic Infant Milk Formula (國產嬰幼兒配方乳粉提升行動方案) in May 2019, aiming to increase the portion of domestically manufactured infant milk formula in China with a target to remain a 60% self-sufficient level in the industry, and to encourage the use of fresh milk in the production of infant milk formula.
 - On 22 February 2021, a series of national safety standards on infant food and infant milk formula were released by the State Healthcare Commission, such as National Standard for Infant Formula Food Safety (GB10765-2021) (食品安全國家標準嬰兒配方食品) and National Standard for Larger Infant Formula Food Safety (GB 10766-2021) (食品安全國家標準較大嬰兒配方食品). After a transition period of two years, those standards were implemented on 22 February 2023. The new national safety standards have made stricter provisions on areas such as protein, carbohydrate, microelement, which is conducive to the innovation of leading infant milk formula enterprises and the further development of infant milk formula industry.
 - On 20 July 2021, the State Council issued the Decision on Optimizing Birth Policy to Promote Long-term Balanced Development of Population (關於優化生育政策促進人口長期均衡發展的決定), proposing the implementation of the three-child policy and supporting measures to slow down the decline of birth rate. Later, the National Healthcare Security Administration issued the Notice on Supporting Maternity Insurance under the Three-Child Policy (關於做好支持三孩政策生育保險工作的通知), and the National People's Congress Standing Committee voted to pass the decision on amending the Law of Population and Family Planning, advocating on age-appropriate marriage and childbirth, which promotes childbirths. During the National People's Congress (NPC) and the Chinese People's Political Consultative Conference (CPPCC) in March 2022, the government reported the detailed implementation plan of the three-child policy, such as increasing maternity subsidies and medical security, adjustment of personal income tax on the care for children under three years old, and development of commonly affordable childcare services.
 - On 12 November 2021, the State Administration for Market Regulation published the Announcement of the State Administration for Market Regulation on the Further Regulation of Labels and Identification of Infant Milk Formula Product (市場監管總局關於進一步規範嬰幼兒配方乳粉產品標籤標識的公告) (the "SAMR Announcement"), which made further stipulations on the characteristics, such as the label's main display layout, content claim, pattern, and feeding suggestion form. In addition, it is stipulated that if the product name refers to certain animal origin, all the milk protein raw materials in the product should come from such animal species. For compound ingredients in product ingredient list (excluding compound food additives), the original ingredients must be specified. From the date of the SAMR Announcement, the registration application for the infant formula products shall be carried out according to the stipulations contained therein. With effect from 22 February 2023, labels and markings on manufactured products shall comply with the requirements of the SAMR Announcement. Products manufactured prior to this date can be sold until the expiration of their shelf life.

(Incorporated in the Cayman Islands with limited liability)

INTRODUCTION

We have reviewed the interim financial information set out on pages 31 to 61, which comprises the condensed consolidated statement of financial position of China Feihe Limited (the "Company") and its subsidiaries (the "Group") as at 30 June 2023 and the related condensed consolidated statements of profit or loss, comprehensive income, changes in equity and cash flows for the six-month period then ended, and explanatory notes. The Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited require the preparation of a report on interim financial information to be in compliance with the relevant provisions thereof and International Accounting Standard 34 Interim Financial Reporting ("IAS 34") issued by the International Accounting Standards Board.

The directors of the Company are responsible for the preparation and presentation of this interim financial information in accordance with IAS 34. Our responsibility is to express a conclusion on this interim financial information based on our review. Our report is made solely to you, as a body, in accordance with our agreed terms of engagement, and for no other purpose. We do not assume responsibility towards or accept liability to any other person for the contents of this report.

SCOPE OF REVIEW

We conducted our review in accordance with Hong Kong Standard on Review Engagements 2410 Review of Interim Financial Information Performed by the Independent Auditor of the Entity issued by the Hong Kong Institute of Certified Public Accountants. A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Hong Kong Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

CONCLUSION

Based on our review, nothing has come to our attention that causes us to believe that the interim financial information is not prepared, in all material respects, in accordance with IAS 34.

IFRS Practice Statement 2

Amendments to IAS 8 Definition of Accounting Estimates

Amendments to IAS 12 Deferred Tax related to Assets and Liabilities arising from a Single

Transaction

Amendments to IAS 12 International Tax Reform – Pillar Two Model Rules

The nature and impact of the new and revised IFRSs that are applicable to the Group are described below:

(a) Amendments to IAS 1 require entities to disclose their material accounting policy information rather than their significant accounting policies. Accounting policy information is material if, when considered together with other information included in an entity's financial statements, it can reasonably be expected to influence decisions that the primary users of general purpose financial statements make on the basis of those financial statements. Amendments to IFRS Practice Statement 2 provide non-mandatory guidance on how to apply the concept of materiality to accounting policy disclosures. The Group has applied the amendments since 1 January 2023. The amendments did not have any impact on the Group's interim condensed consolidated financial information but are expected to affect the accounting policy disclosures in the Group's annual consolidated financial statements.

30 June 2023

2. CHANGES IN ACCOUNTING POLICIES AND DISCLOSURES (Continued)

- (b) Amendments to IAS 8 clarify the distinction between changes in accounting estimates and changes in accounting policies. Accounting estimates are defined as monetary amounts in financial statements that are subject to measurement uncertainty. The amendments also clarify how entities use measurement techniques and inputs to develop accounting estimates. The Group has applied the amendments to changes in accounting policies and changes in accounting estimates that occur on or after 1 January 2023. Since the Group's policy of determining accounting estimates aligns with the amendments, the amendments did not have any impact on the financial position or performance of the Group.
- (c) Amendments to IAS 12 Deferred Tax related to Assets and Liabilities arising from a Single Transaction narrow the scope of the initial recognition exception in IAS 12 so that it no longer applies to transactions that give rise to equal taxable and deductible temporary differences, such as leases and decommissioning obligations. Therefore, entities are required to recognise a deferred tax asset (provided that sufficient taxable profit is available) and a deferred tax liability for temporary differences arising from these transactions. The amendments did not have any significant impact on the financial position or performance of the Group upon initial application.
- (d) Amendments to IAS 12 International Tax Reform Pillar Two Model Rules introduce a mandatory temporary exception from the recognition and disclosure of deferred taxes arising from the implementation of the Pillar Two model rules published by the Organisation for Economic Co-operation and Development. The amendments also introduce disclosure requirements for the affected entities to help users of the financial statements better understand the entities' exposure to Pillar Two income taxes, including the disclosure of current tax related to Pillar Two income taxes separately in the periods when Pillar Two legislation is effective and the disclosure of known or reasonably estimable information of their exposure to Pillar Two income taxes in periods in which the legislation is enacted or substantively enacted but not yet in effect. Entities are required to disclose the information relating to their exposure to Pillar Two income taxes in annual periods beginning on or after 1 January 2023, but are not required to disclose such information for any interim periods ending on or before 31 December 2023. The Group has applied the amendments retrospectively. Since the Group did not fall within the scope of the Pillar Two model rules, the amendments did not have any impact to the Group.

3. OPERATING SEGMENT INFORMATION

For management purposes, the Group is organised into business units based on their products and has two reportable operating segments as follows:

- Raw milk segment manufacture and sale of raw milk; and
- Dairy products and nutritional supplements products segment manufacture and sale of dairy products and sale of nutritional supplements

Management monitors the results of the Group's operating segments separately for the purpose of making decisions about resource allocation and performance assessment. Segment performance is evaluated based on reportable segment profit, which is measure of adjusted profit before tax. The adjusted profit before tax is measured consistently with the Group's profit before tax except that bank interest income, other interest income, non-lease-related finance costs, and share of loss of an associate are excluded from such measurement.

Segment assets exclude deferred tax assets, financial asset at fair value through other comprehensive income, long-term bank deposits, structured deposits, restricted cash, cash and cash equivalents and other unallocated head office and corporate assets as these assets are managed on a group basis.

Segment liabilities exclude interest-bearing bank and other borrowings, tax payable, deferred tax liabilities and other unallocated head office and corporate liabilities as these liabilities are managed on a group basis.

Intersegment sales and transfers are transacted with reference to the selling prices used for sales made to third parties at the then prevailing market prices.

12. BIOLOGICAL ASSETS

(a) Nature of activities

Dairy cows and goats owned by the Group are primarily held to produce milk.

The quantity of dairy cows owned by the Group as at 30 June 2023 and 31 December 2022 is shown below. The Group's dairy cows contain heifers and calves and milkable cows. Heifers and calves held as at 30 June 2023 and 31 December 2022 were dairy cows that have not had their first calves.

	30 June 2023 (Unaudited) Heads	31 December 2022 (Audited) Heads
Dairy cows Milkable cows	41,682	40,235
Heifers and calves Total dairy cows	59,631 101,313	49,202 89,437

The Group is exposed to fair value risks arising from changes in the prices of the cow's dairy products. The Group does not anticipate that the price of the cow's dairy products will decline significantly in the foreseeable future and the Directors are of the view that there are no available derivative or other contracts which the Group can enter into to manage the risk of a decline in the price of the cow's dairy products.

In general, the heifers are inseminated with semen when they reached approximately 16 months old. After approximately nine months following a successful insemination, a calf is born and the dairy cow begins to produce raw milk and the lactation period begins. A milkable cow is typically milked for approximately 305 days before an approximately 60 days' dry period.

When a heifer begins to produce milk, it would be transferred to the category of milkable cows based on the estimated fair value on the date of transfer. The sale of dairy cows is not one of the Group's principal activities and the proceeds are not included as revenue.

The Group has a policy of requiring payment in advance from customers for the sale of products (other than cash and credit card sales and sales of raw milk), except for some major customers, where the trading terms are on credit. The Group grants a defined credit period usually ranging from one to three months from the date of invoice to these customers. The Group seeks to maintain strict control over its receivables to minimise credit risk. Overdue balances are reviewed regularly by senior management. In view of the aforementioned and the fact that the Group's trade and bills receivables relate to a large number of diversified customers, there is no significant concentration of credit risk. The Group does not hold any collateral or other credit enhancements over its trade receivable balances. Trade and bills receivables are non-interest-bearing.

An ageing analysis of the trade and bills receivables as at the end of the reporting period, based on the invoice date and net of loss allowance, is as follows:

20. FAIR VALUE AND FAIR VALUE HIERARCHY OF FINANCIAL INSTRUMENTS

The carrying amounts and fair values of the Group's financial instruments, other than those with carrying amounts that reasonably approximate to fair values, are as follows:

	Carrying amounts		Fair v	alues
	30 June	31 December	30 June	31 December
	2023	2022	2023	2022
	RMB'000	RMB'000	RMB'000	RMB'000

Structured deposits	7,052,324	9,746,305	7,052,324	9,746,305
Financial liabilities				
Interest-bearing bank and other borrowings	1,352,790	1,308,630	1,352,046	1,303,990

Management has assessed that the fair values of cash and cash equivalents, restricted cash, trade and bills receivables, trade and bills payables, financial assets included in prepayments, deposits and other receivables, financial liabilities included in other payables and accruals, and amount due from a related company, approximate to their carrying amounts largely due to the short term maturities of these instruments.

The fair values of the financial assets and liabilities are included at the amount at which the instrument could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale. The following methods and assumptions were used to estimate the fair values:

The fair values of the non-current portion of interest-bearing bank and other borrowings have been calculated by discounting the expected future cash flows using rates currently available for instruments with similar terms, credit risk and remaining maturities. The changes in fair value as a result of the Group's own non-performance risk for interest-bearing bank and other borrowings as at 30 June 2023 and 31 December 2022 were assessed to be insignificant.

The fair values of the structured deposits are determined in accordance with discounted cash flow analysis. The fair values of financial assets and financial liabilities carried at amortised cost approximate to their carrying amounts.

20. FAIR VALUE AND FAIR VALUE HIERARCHY OF FINANCIAL INSTRUMENTS (Continued)

Fair value hierarchy

The following tables illustrate the fair value measurement hierarchy of the Group's financial instruments:

Structured deposits	-	9,746,305	_	9,746,305

The Group did not have any financial liabilities measured at fair value as at 30 June 2023 (31 December 2022: Nil).

During the period, there were no transfers of fair value measurements between Level 1 and Level 2 and no transfers into or out of Level 3 for financial assets and financial liabilities (year ended 31 December 2022: Nil).

The fair value of the financial asset at fair value through other comprehensive income was estimated using the market approach, with an unobservable input as the price-to-book ratio of comparable companies. A 20% (31 December 2022: 20%) increase/decrease in the price-to-book ratio of comparable companies would result in an increase/decrease in fair value by approximately RMB360,000 (31 December 2022: RMB360,000).
