CHAIRMAN'S STATEMENT

Dear Shareholders,

The year 2023 witnessed economic recovery after the smooth transition in COVID response phase, and it was a crucial year in implementing the "14th Five-Year Plan". Faced with a grave and complex market situation in the industry where the Company operates, and the challenging tasks of reform and development, the Company, focusing on the goal of high-quality development, worked to overcome obstacles and pressed ahead with a pioneering spirit. Thanks to the joint efforts of the Board of Directors, the management team and all employees, progress was achieved and stability ensured in both scale and quality of development of the Company, and solid advances were made in pursuing high-quality development.

We could not have made such accomplishments over the past year without unremitting support from our Shareholders. On behalf of the Board, I would like to extend sincere gratitude to all the Shareholders, the public, our customers and all the employees for your care and support!

In 2023, the Company kept a close eye on the evolving market so that we could leverage opportunities to promote innovations, enhance stability and pursue advancement. Further, we pursued breakthroughs in developing emerging businesses more quickly. Thanks to those, we registered a year-on-year increase of 9.85% in operating revenue and 25.48% in net profits, with progress in key operation indicators.

The Company inspired enthusiasm for innovation, enabling the Company to enjoy significant advantages in terms of guiding role of technology. We won the Silver Award of the 2023 China Best Design Award for our tunnel bridge screen cleaner, shipped seven new products to customers, completed installation of 11 upgraded products for the Railway Bureau, and improved weak links with 11 core technologies.

The Company proactively responded to and pursued changes in three markets where we operate. To be specific, we stabilized and achieved progress in the railway market, made breakthroughs in several areas in the urban rail market, and increased efforts to develop overseas market.

CHAIRMAN'S STATEMENT

Aiming to grow us into a world-class enterprise, we enhanced our foundation with focus on value creation. To be specific, we concentrated our efforts on the four criteria for world-class enterprises, namely, superior product, uppermost brand, perfect innovation and effective governance. To create superior products is to pursue excellent products. We consolidated our hard power by launching the "High-quality Product Program" in the principle of "Quality First". To develop uppermost brand is to establish another hallmark of China. We developed new image by driving the brand "going global" program through "going global" of high-quality products and services. To achieve perfect innovation is to intensify self-dependent innovation. We boosted driving force of the Company by building innovation platforms, increasing investment in innovations and creating favorable innovation environment. To exercise effective governance is to improve vitality and efficiency. We further deepened reform, enhanced modern enterprise system with Chinese characteristics, and promoted intensive development, professional operation and lean management to consolidate our new advantages.

The year 2024 marks the 75th anniversary of the founding of the People's Republic of China, and also the 70th anniversary of the establishment of the Company. We will spare no efforts to advance the long-term high-quality development of the Company. To this end, we will continue overcome obstacles with perseverance and act in an innovative and practical manner as we indeed know that the last leg of a journey marks the halfway point.

GENERAL MANAGER'S STATEMENT

Dear Directors,

I am pleased to present the consolidated results of the Company for the year ended 31 December 2023, and I would like to express my most sincere gratitude to all Directors for your continual care and support to the Company.

In 2023, the Company made significant progress and achievements in various aspects of operation and development and realized steady development. During the year, we seized the opportunities to tap into the operating potential in various markets. We pursued breakthroughs in developing emerging businesses more quickly. Thanks to those, we attained steady enhancement in the overall operating efficiency and quality of operations amidst the severe market situation. We implemented the strategy of development driven by technology innovation, increased investments in technology research and development, optimized product and technology layout, further focused core R&D resources on breakthroughs in key projects and challenging projects, and stepped up efforts in technology innovation and product upgrading, laying a solid foundation for the Company's sustainable development. We continued to deepen management reform, strengthen internal control, drive innovations in management and business model, improve product quality, enhance brand building, prioritize cultivation and introduction of talents, strengthen team building, and improve quality and skills of employees, bringing about continuous enhancement of our operational efficiency. We also focus on fulfilling our social responsibilities. To this end, we continuously created jobs, actively participated in charitable undertakings related to the village revitalization, strived for Role Model Organization, and conducted volunteer service activities, etc.. Based on those, we made positive contributions to serving the social and economic development.

In the future, we will continue to adhere to the concept of responsibility to the society, Shareholders and employees, and uphold the core values of "Honesty and innovation forever, quality and morality together". We will maintain the development stability, fully adapt ourselves to changes, and adopt a more open and pragmatic attitude to consolidate the large railway track maintenance machinery business, which is one of our core businesses. We will also actively explore diversified ways to enhance efficiency, and continuously improve our core competitiveness, brand influence and market position. We will further pay attention to customer needs and market changes, actively promote technology innovation and business expansion, and optimize our products and services so as to provide customers with more quality, efficient and convenient solutions. At the same time, we will improve our internal management and team building, and promote lean operations and lean management to drive our operational efficiency and profitability.

GENERAL MANAGER'S STATEMENT

Finally, on behalf of the management of the Company, I would like to express my most sincere gratitude to the Directors, the Board and the Supervisory Committee for their care and assistance, the partners and customers for their trust and support, as well as to all the employees of the Company for their unremitting efforts and hard work. We will continue to work hard and make greater contributions to the development of CRCCE!

MANAGEMENT DISCUSSION AND ANALYSIS

REVENUE

	Year ended 31 December	
	2023	2022
	(RMB million)	(RMB million)
Sales of machinery	1,439.46	1,203.06
Sales of parts and components	827.89	698.89
Maintenance of railway track maintenance machinery	564.06	571.87
Railway line maintenance services	152.22	238.73
Mechanical design services	102.62	100.52
Revenue from other business	13.73	8.84
Total revenue	3,099.98	2,821.92

In 2023, the Group seized opportunities and tapped into operational potential to pursue breakthroughs in emerging businesses more quickly amid the complicated and volatile market. Thanks to those, the Group registered a year-on-year growth in terms of the overall operating results, with annual operating revenue hitting RMB3,099.98 million, representing a year-on-year increase of 9.85%.

In 2023, the Group further built up strength and quality of large railway track maintenance machinery sales business, which represents our core business. The Group fully implemented the strategy of driving the development through technology innovations, allocated more core research and development resources to key projects and challenging projects, and accelerated commercialisation of findings of research, development and design, as well as marketing of new products. During the reporting period, the Group attained sales revenue of RMB487.54 million from new products, which comprised RMB217.13 million from China's railway market, RMB57.41 million from the urban rail market and RMB213 million from the overseas market. The Company stepped up efforts to develop differentiated products and auxiliary & upgraded products for large railway track maintenance machineries and secured sales contracts in relation to those products. During the year ended 31 December 2023, the Group's revenue from sales of machinery and equipment increased by RMB236.4 million or 19.65% from the corresponding period last year.

The Group optimized technical services, continued to improve response speed and service quality, and pressed ahead with in-depth resource integration on China Railway Mall platform, thus effectively expanding market share in the parts and components market. In 2023, the Group's revenue from sales of parts and components increased by RMB129 million or 18.46% from the corresponding period last year.

MANAGEMENT DISCUSSION AND ANALYSIS

In 2023, the Group endeavored to enhance the value-added service capacity of remanufacturing and continued to strengthen the overhauling business, which represents our fundamentals. In 2023, the Group's revenue from railway track maintenance machinery decreased by RMB7.81 million or 1.37% from the corresponding period last year, which was within a reasonable range of fluctuation.

In 2023, maintenance construction services of the Company remained stable. During the year, the Group's revenue from maintenance construction services for railway lines decreased by RMB86.51 million or 36.24% from the corresponding period last year. The decrease in the construction business was attributable to the shift of construction business priority and the efforts to enhance quality and efficiency.

In 2023, the Company deepened the management of its design segment and strengthened business sharing and synergy, resulting in an increase in revenue from mechanical design services by RMB2.1 million or 2.09% from the corresponding period last year.

COST OF SALES

The Group's cost of sales amounted to RMB2,613.1 million for the year ended 31 December 2023, representing an increase of RMB454.43 million or 21.05% as compared with RMB2,158.67 million for the corresponding period last year. The increase was mainly due to the fluctuating international supply chain caused by swan events such as COVID-19, international conflicts, and the increasing product manufacturing costs, which was caused by the rising purchase price of imported parts and shipping costs and the roaring cost of raw materials and labour in China.

GROSS PROFIT

The total gross profit of the Group was RMB486.88 million for the year ended 31 December 2023, representing a decrease of RMB176.37 million or 26.59% as compared with RMB663.25 million for the corresponding period last year. For the year ended 31 December 2023, the gross profit margin of the Group was 15.71%, representing a decrease of 7.79 percentage points as compared with 23.5% for the corresponding period last year. This was mainly due to the change in the gross profit structure of each business segment.

OTHER GAINS

The Group's other gains were RMB7.89 million for the year ended 31 December 2023, representing a decrease of RMB20.6 million or 72.31% as compared with RMB28.49 million for the corresponding period last year. Other gains are mainly subsidies granted by government authorities in relation to R&D projects of the Company.

MANAGEMENT DISCUSSION AND ANALYSIS

SELLING EXPENSES

The Group's selling expenses were RMB191.46 million for the year ended 31 December 2023, representing an increase of RMB61.86 million or 47.73% as compared with RMB129.6 million for the corresponding period last year, primarily due to the increase in the Company's after-sales service fees incurred in overseas market and the increase in sales investment to match the growth of sales volume.

ADMINISTRATIVE EXPENSES

The Group's administrative expenses were RMB172.26 million for the year ended 31 December 2023, representing a decrease of RMB14.26 million or 7.65% as compared with RMB186.52 million for the corresponding period last year, mainly due to the improved internal management of the Group and its intensified efforts to cut costs and enhance efficiency.

RESEARCH AND DEVELOPMENT EXPENSES

The Group's research and development expenses were RMB358.95 million for the year ended 31 December 2023, representing an increase of RMB97.9 million or 37.5% as compared with RMB261.05 million for the corresponding period last year, as the Company continued to increase investment in research and development. As at 31 December 2023, the Group had approximately 500 personnel in its R&D team. The Company secured the approval from China Railway for the second-generation switch tamper and efficient cleaning machine projects, and also made breakthroughs in core devices such as the lifting and pulling device and the electrical system of the tamper.

FINANCIAL GAINS

The Group's financial gains were RMB14.24 million for the year ended 31 December 2023, representing a decrease of RMB21.54 million or 60.20% as compared with RMB35.78 million for the corresponding period last year, primarily due to the decrease in net foreign exchange gains from fluctuations in exchange rate.

IMPAIRMENT LOSSES

The Group recorded impairment losses of RMB-28.96 million for the year ended 31 December 2023, mainly due to successful collection of trade receivables as the Company recovered business arrears of substantial amounts incurred in previous years and accordingly reversed the bad debt provided thereon in 2023.

MANAGEMENT DISCUSSION AND ANALYSIS

NET OTHER BUSINESS EXPENSES

The Group's net other business expenses increased by RMB19.38 million from RMB-17.33 million for the year ended 31 December 2022 to RMB2.05 million for the year ended 31 December 2023.

PROFIT BEFORE TAX

The Group's profit before tax was RMB137.09 million for the year ended 31 December 2023, representing an increase of RMB13.42 million or 10.85% as compared with RMB123.67 million for the corresponding period last year, which was the combined effects of the increase in sales volume following the Group's market development efforts, internal management improvement and earnest implementation of the cost reduction and efficiency enhancement initiatives, as well as gains from disposal of assets of the Group requisitioned and relocated by the government.

INCOME TAX EXPENSE

The Group's income tax expense was RMB-8.05 million for the year ended 31 December 2023, representing a decrease of RMB16.04 million from RMB7.99 million for the corresponding period last year. The decrease in income tax expense was mainly due to the tax adjustment and the change in deductible temporary differences of enterprise income tax in accordance with the tax law.

The Company was entitled to the preferential tax policy of the western development and was subject to the preferential enterprise income tax rate of 15%.

Ruiweitong Company was accredited as a high and new technology enterprise in 2021 and received approvals from the relevant government authorities for being entitled to the preferential enterprise income tax rate of 15%.

Other subsidiaries established by the Group in mainland China were subject to the enterprise income tax rate of 25%.

PROFIT ATTRIBUTABLE TO OWNERS OF THE COMPANY

The Group's profit attributable to owners of the Group reached RMB145.04 million for the year ended 31 December 2023, representing an increase of RMB29.4 million or 25.42%, from RMB115.64 million for the corresponding period last year. The increase in the profit attributable to owners of the Company was mainly due to the combined effects of the increase in sales volume following the Group's market development efforts, internal management improvement and earnest implementation of the cost reduction and efficiency enhancement initiatives, as well as gains from disposal of assets of the Group requisitioned and relocated by the government.

MANAGEMENT DISCUSSION AND ANALYSIS

PROFIT ATTRIBUTABLE TO NON-CONTROLLING INTERESTS

The Group's profit attributable to non-controlling interests was RMB0.10 million for the year ended 31 December 2023, representing an increase of RMB0.07 million from the corresponding period last year. In 2022, the Company and Zhengzhou Railway Equipment Manufacturing Co., Ltd. (鄭州鐵路裝備製造有限公司) jointly established Zhengzhou CRCC Equipment Technology Co., Ltd. (鄭州鐵建裝備科技有限公司), and Zhengzhou Railway Equipment Manufacturing Co., Ltd., as a non-controlling interest holder, was entitled to its share of profit in Zhengzhou CRCC Equipment Technology Co., Ltd.

BASIC EARNINGS PER SHARE

Basic earnings per share increased from RMB0.08 for the year ended 31 December 2022 to RMB0.1 for the year ended 31 December 2023.

LIQUIDITY AND SOURCE OF CAPITAL

Cash flows and working capital

The Group's needs for working capital were mainly satisfied by cash generated from operations. As at 31 December 2023, the closing balance of the Group's cash and cash equivalents amounted to RMB1,457.6 million and the net increase in cash and cash equivalents was RMB294.45 million, which was mainly due to the increase in cash received from sales of goods and provision of labour services in 2023, and the compensations received for assets requisitioned and relocated by the government.

Net cash inflow from operating activities

For the year ended 31 December 2023, the Group's net cash inflow from operating activities was RMB86.57 million, primarily due to the Company's enhanced efforts in recovery of loans.

Net cash inflow from investing activities

For the year ended 31 December 2023, the Group's net cash inflow from investing activities was RMB244.81 million. The cash inflow from investing activities was mainly due to the cash amount of RMB267.64 million received for disposal of fixed assets, intangible assets and other long-term assets.

MANAGEMENT DISCUSSION AND ANALYSIS

Net cash outflow from financing activities

For the year ended 31 December 2023, the Group's net cash outflow from financing activities was RMB37.85 million, mainly representing the dividend payment of RMB37.85 million.

Liquidity

The Board believes that the Group has sufficient liquidity to meet the Group's present requirements for liquid funds.

COMMITMENTS

The Group's commitments as at the dates indicated are set out as follows:

Capital commitments

	31 December 2023 (RMB million)	31 December 2022 (RMB million)
Contracted but not provided for	5.94	12.13

INDEBTEDNESS

The Group had no debts as at 31 December 2023.

PLEDGE

The Group had no pledge as at 31 December 2023.

MANAGEMENT DISCUSSION AND ANALYSIS

GEARING RATIO

The Group monitors capital management by using the gearing ratio, which is net debt divided by the adjusted capital plus net debt. Net debt includes bank borrowings and other borrowings, trade and bills payables, financial liabilities included in other payables and accruals less cash and cash equivalents and pledged deposits. Capital includes equity attributable to owners of the Company. The Group's gearing ratio was 16.54% as at 31 December 2022 and 22.34% as at 31 December 2023.

CONTINGENT LIABILITIES

The Group had no material contingent liability as of 31 December 2023.

MARKET RISKS

The Group is subject to various market risks, including foreign exchange risks and inflation risks in the course of daily business operation.

FOREIGN EXCHANGE RISKS

The majority of the Group's businesses are located in the PRC and most of the transactions are settled in RMB, with certain sales, procurement and German subsidiaries settled in foreign currencies including Euro and CHF. The fluctuation in exchange rates of these foreign currencies against RMB would have an impact on the operating results of the Group. The Group did not enter into any hedging transactions for the purpose of mitigating its foreign exchange risks.

POLICY RISKS

Products of the Group are primarily applied in China's railway, urban rail and energy markets, where changes in policies will have an impact on the operation of the Company. The Group mitigated or eliminated possible adverse risks of policy changes through measures such as strengthening macroeconomic analysis and proactively expanding market share.

MANAGEMENT DISCUSSION AND ANALYSIS

PENSION SCHEME

Employees engaged by the Company and its PRC-incorporated subsidiaries participate in the social insurance and housing provident fund schemes established by local PRC governments. The Company and its PRC-incorporated subsidiaries are required to contribute to such schemes subject to a certain percentage of the employees' salaries, and are not legally liable for post-retirement benefits.

During the year ended 31 December 2023, the Group did not have the right to utilize the forfeited contributions to the above social insurance and provident fund schemes to reduce the existing level of contributions, and therefore no contribution was utilized. The Group did not have any defined benefit plan for the year ended 31 December 2023.

The division of responsibilities among the general meetings, the Board, specialized committees of the Board and the management is distinct, and each of them is assigned with clearly defined responsibilities, which established a mechanism of clear authorities and responsibilities, operation regulation, mutual balance and checks and balances for our authority body, decision-making body, supervisory body and management team. The Board has delegated the execution and daily operations of the Company’s business to the management. However, clear directions are given to the management as to the matters that must be approved by the Board before decisions are made on behalf of the Company. The Company will continue to improve its corporate governance mechanism, exercise discipline in the fulfilment of corporate duties, and strengthen information disclosure in practice.

CORPORATE GOVERNANCE REPORT

II. CORPORATE CULTURE

Our corporate culture comprises our corporate mission, corporate vision, corporate core values, corporate spirit and general principles of conduct.

Our corporate mission is “providing solid support to railway”, which is a vivid description of functions of our products and also our solemn commitment to the historical responsibility. Large railway track maintenance machinery is an important guarantee for the safe operation of railway as heavy-duty trains were running on them at high speed, and it is an indispensable part of our efforts to “provide solid support to railway”. We, as a railroad maintenance machinery manufacturing and repair base boasting the largest production and sales volume in China, shoulder the historic mission. All the employees of the Company have been enhancing their commitment to the mission because they fully recognize the significant impact of their work on the national economic artery, and the important role of products manufactured by them on the safe operation of the railway.

Our corporate vision is to become a world-leading provider of intelligent equipment solutions for large railway track maintenance construction. Remaining focus on large railway track maintenance machinery business, the Company will further consolidate our leading position in the domestic large railway track maintenance machinery industry through original innovations, integrated innovations and absorption and re-innovation of imported technologies.

Our core value concepts are innovation and integrity. We pursue development with innovation as the fundamental driving force, and gain customers and market share by upholding integrity. We aim to manufacture large railway track maintenance machinery relying on high-quality employees, which represents our foremost value orientation. We establish a linkage between the machinery and employees because we believe that high-quality machineries would be impossible if we have no high-quality employees.

Our corporate values are “pursuit of excellent products and outstanding employees while remaining commitment to innovation and integrity”. To realize the core values, the key is to fulfil the responsibility with dedication, deliver solid results through hard work, attain progress through innovations, and achieve win-win outcome. To fulfil the responsibility with dedication represents the foundation for implementing the values. To deliver solid results through hard work is the approach towards the values. To attain progress through innovations indicate the direction in which we should implement the values. To achieve win-win outcome is the result of our implementation of the values.

DIRECTORS' REPORT

The Board hereby presents to the Shareholders the Directors' Report and the audited financial statements of the Company prepared in accordance with the China Accounting Standards for Business Enterprises for the year ended 31 December 2023.

PRINCIPAL BUSINESS

The Company is mainly engaged in the research, development, manufacture and sale of large railway track maintenance machines, parts and components sales and services, overhaul services, railway line maintenance services as well as engineering and technical services within the field of track vehicle.

There was no material change in the nature of the Company's main business during the reporting period.

OPERATING RESULTS

The financial and operating results of the Company for the year ended 31 December 2023 can be found in the section headed "Management Discussion and Analysis" in this report.

MAJOR RISKS AND UNCERTAINTIES

The Board is ultimately responsible for the sufficient risk control measures of the Company, so as to directly and effectively reduce the major risks faced by the Company during the business operation. The Board delegates part of its responsibilities to each of the function departments.

The Company's business operation and financial position may be affected by the following major risks:

Regulatory risks

The majority of the Company's core businesses are subject to the regulatory requirements of the following laws, regulations and departmental rules:

- Railway Law of the PRC promulgated by the Standing Committee of the National People's Congress on 7 September 1990 and amended on 27 August 2009 and 24 April 2015;
- Regulation on Administration of Railway Safety promulgated by the State Council on 17 August 2013 and enforced on 1 January 2014;
- Measures for Railway Engineering Machinery Parts Management (《鐵路工務機械車配件管理辦法》) promulgated by China State Railway Group Co., Ltd. on 31 August 2017 and implemented on 1 March 2018;

DIRECTORS' REPORT

- Measures for License for Design, Manufacture, Maintenance and Import of Railway Locomotives and Vehicles promulgated by the Ministry of Transport on 3 February 2019 and enforced on 5 March 2019;
- Rules for the Implementation of License for Design, Manufacture, Maintenance and Import of Railway Locomotives and Vehicles promulgated and enforced by the State Railway Administration on 28 April 2019.

In 2023, the Company also paid close attention to the legislative developments of the industry while operating in compliance with the regulatory requirements under the abovementioned laws, regulations and departmental rules. Throughout the Year and up to the date of this report, the Group has complied with relevant laws and regulations that have a significant impact on the business and operations of the Group in material aspects. If there are any changes to applicable laws, rules and regulations, the Group will notify relevant employees and relevant operating units of the same from time to time.

Policy risks

The business and financial performance of the Company may be affected by changes in the PRC governmental policies in respect of the large railway track maintenance machinery industry; any decrease in public spending on, or any change in public procurement policies or industry standards relating to China's rail transportation system could materially affect our business.

Market risks

The Company's market risks are mainly from its major customers and major suppliers:

Most of the Company's revenue comes from major customers. Therefore, the loss of one or more major customers or customer groups or changes in their orders or the terms of the contracts may have a material adverse impact on the Company's business. The market uncertainties caused by the reform of China State Railway Group Co., Ltd., being a major customer of the Company, may have a material impact on the business of the Company.

The largest supplier of the Company is Zhuzhou Times Electronic Technology Co., Ltd.* (株洲時代電子技術有限公司), the purchase from whom is attributable to approximately 9.79% of the Company's total purchase for this year, and the purchase attributable to our five largest suppliers amounted to approximately 30.31% of our total purchase for this year. Significant changes in the relationship between the Company and its major suppliers may have a material adverse impact on the business of the Company.

In addition, other market risks, including foreign exchange risk and interest rate risk, also have an impact on the business and operation of the Company, details of which are set out in Note IX to the financial statements of this report.

Operating risks

Operating risks generally include risks resulting from inadequate internal processes and the risks resulting from human errors in internal operations or other reasons. For example, defective products resulting from human errors in internal operations may lead to product claims or incur losses against the Company.

In order to manage these risks, the Company has established a mature internal control system and improved business processes, so as to minimize the adverse effects of such risks on the Company.

ENVIRONMENTAL POLICY

The Company will perform its social responsibilities and strictly implement the Environmental Protection Law of the PRC and other requirements under applicable laws and regulations on environmental protection from the perspective of corporate sustainability and development, as well as carry out solid environmental protection technical renovation work and regulate the environmental protection indexes. In particular, the Company will standardize the management of operation and maintenance of environmental facilities, and improve the efficiency of environmental protection facilities, so as to ensure efficient operation and standard emission. Adhering to the principle of "safety and reliability, mature technology and being cost-effective", the Company will continue to optimize and refine the process of the technological improvement, and advance the implementation of environmental technical renovation in a continuous manner.

BUSINESS MODEL AND DIRECTION OF STRATEGY

The Company insists on the market-oriented principle of development and is committed to creating sustainable value for the Shareholders in order to achieve sustainable development. Manufacturing and sales of large railway track maintenance machines, parts and components sales and services, overhaul services, railway line maintenance services as well as engineering and technical services within the field of track vehicle are the major sources of income of the Company. The key strategies of the Company include:

DIRECTORS' REPORT

Financial Services Framework Agreement with CRCC Finance

On 30 November 2022, the Company renewed the financial services framework agreement (the “**Financial Services Framework Agreement**”) with CRCC Finance (a subsidiary of CRCC), pursuant to which, CRCC Finance agreed to provide deposit services to the Group for the term commencing from 1 January 2023 and ending on 31 December 2025. For details, please refer to the announcement of the Company dated 30 November 2022.

The main pricing policies of the Financial Services Framework Agreement were as follow:

Pursuant to the Financial Services Framework Agreement, CRCC Finance shall accept deposits from the Group at interest rates not lower, and thus no less favorable than the prevailing interest rates offered by major PRC commercial banks for deposits of similar nature.

The Group and CRCC Finance will enter into specific agreements to set out specific terms with respect to the financial services contemplated under the Financial Services Framework Agreement in accordance with the above principal terms thereunder.

As of 31 December 2023, CRCC Finance was a connected person of the Company by virtue of being a subsidiary of CRCC. Therefore, the transactions contemplated under the Financial Services Framework Agreement constituted continuing connected transactions of the Company under the Listing Rules.

DIRECTORS' REPORT

The Company convened the 2nd meeting of the third session of the Board on 30 November 2022, on which it considered and approved the resolutions on the continuing connected transactions in relation to the Financial Services Framework Agreement, agreed on the renewal of the Financial Services Framework Agreement between the Company and CRCC Finance and the maximum daily balance of deposits (including accrued interest) under the agreement to be placed by the Group with CRCC Finance for the three years of 2023, 2024 and 2025 to be RMB30 million.

During the year ended 31 December 2023, the maximum daily balance of deposits (including accrued interest) placed by the Group with CRCC Finance under the Financial Services Framework Agreement was RMB29.30 million, not exceeding the annual cap of RMB30 million as approved by the Board.

Products and Services Procurement Framework Agreement with CRCC

The Company and CRCC entered into the products and services procurement framework agreement dated 31 July 2020 (the “**Products and Services Procurement Framework Agreement**”). Pursuant to the agreement, the Company and/or its subsidiaries agreed to purchase products and services from CRCC and/or its associates for the term commencing from 1 January 2021 and ending on 31 December 2023, including:

- (I) materials and equipment required by the Company and/or its subsidiaries in their productions and sales;
- (II) construction services;
- (III) assets and equipment leasing services;
- (IV) railway line usage services;
- (V) maintenance services;
- (VI) other paid services.

For details, please refer to the announcement of the Company dated 31 July 2020.

DIRECTORS' REPORT

The principal pricing policies of the Products and Services Procurement Framework Agreement were as follows:

- (i) Where there are market prices for the relevant products and services, the prices shall be determined with reference to the prevailing market prices, which are the prices charged by CRCC and/or its associates for providing the same type of products and services to an independent third party customer on normal commercial terms. In determining the prevailing market prices for the relevant products and services, the Company will make reference to the quotations offered by at least two independent third party suppliers for providing the same or similar products or services. The Company will also take into account the following factors to ensure that the prices offered by CRCC and/or its associates will be no less favourable than those available to the Company from the independent third party suppliers for purchasing the same type of products or services, including the costs of the relevant products or services, quality requirements, market conditions, and time arrangement;
- (ii) Where there are no market prices for the relevant products and services that are aimed at meeting the Group's specific business requirements, the prices shall be determined according to the agreed prices between the parties. The agreed prices will be calculated based on the actual costs incurred in providing such products and services, which include the costs of raw materials, accessories, depreciation, salary, energy, required technology and equipment maintenance, plus reasonable profits. CRCC and/or its associates will charge a mark-up rate generally not higher than 15% for all transactions under the Products and Services Procurement Framework Agreement, which is the same mark-up rate charged to an independent third party customer. The Board is of the view that such mark-up rate is fair and reasonable, on normal commercial terms and not prejudicial to the interest of the Company's minority Shareholders.

As of 31 December 2023, CRCC was the controlling Shareholder of the Company which directly and indirectly held approximately 65% of the issued share capital of the Company, and thus CRCC and its associates constituted connected persons of the Company. Therefore, the transactions under the Product Sales and Paid Services Framework Agreement constituted continuing connected transactions of the Company under the Listing Rules.

IV. Labor Standards

The Company considers compliance as our minimum responsibility. In 2023, the Company collected and conducted risk assessment on a total of 48 laws and regulations applicable to human resource systems, including national laws, administrative regulations, national and industrial standards and normative requirements. The Company also conducted compliance evaluation, and translated into various rules and regulations and well-defined working procedures in a specific form. During the reporting period, the Company has complied with the relevant laws and regulations in relation to employment and labor practices that have a significant impact on the Company.

The Company adopts a zero-tolerance policy on the employment of child labor and forced labor, and the Company's strict internal systems such as the "Regulations on Employment Management" demonstrate our prohibition of using child labor and forced labor in strict compliance with the international standards and relevant domestic regulations. Child labor or forced labor is forbidden throughout the operation of the Company, including any supplier or subcontractor.

There are specific requirements for the ages of the candidates in the "Administration Measures on Employee Recruitment" of the Company, and the identity information of the candidates is reviewed and the recruitment of child labor is strictly forbidden. The Company creates a safe and healthy working environment for its employees, provides labor protection, pays reasonable remuneration and provides various benefits, and prohibits forced labor. The union organization of the Company plays an active role in safeguarding the interests of employees.

The "Administration Measures on the Labor Contract for Employees" of the Company specifies that the Company establishes and terminates contractual labor relationships with our employees in accordance with national laws and regulations. The Company guarantees that all employees are entitled to the holidays and festivals and weekends as required by the state and paid leave such as annual leave, family leave, leave for marriage or funeral and family planning leave, and other leave agreed in labor contracts and collective contracts. The Company adopts a working system of 8 hours a day and 40 hours a week. However, due to production or other special circumstances, we ensure that, without violating the national regulations, the Company insists on arranging our employees to extend their working hours on a voluntary basis according to the overtime procedure without prejudice to their health.

PART III OPERATION PRACTICE

I. Supply Chain Management

1. *Supplier management*

The Company has established a series of strict supplier assessment mechanisms and practice policies. The Company selects and re-assesses appropriate, capable and responsible suppliers with reference to their prices, safety management, environmental protection capabilities, inspection capabilities, infringement histories, production capacities, delivery cycles, after-sales services, and assurance abilities. The management of suppliers during their whole life circles has been substantially achieved, covering the development, identification, risk, performance, termination and document management of suppliers.

2. *Identification of environmental and social risks of suppliers*

In the process of identifying suppliers, the Company maintains stringent audit over the certification of three systems of suppliers, namely quality, environment, and occupational health/safety systems, as well as required certifications of management system (such as IRIS, TS1696 and EN15085). The Company gives priority to suppliers with three-system certification qualifications (within the validity period). In principle, manufacturing enterprises without three-system certification will not be admitted as qualified suppliers of the Company. In case of special industries, suppliers should hold the qualification certificates issued by relevant national departments (such as national industrial product production license, hazardous chemicals production license, business license, special equipment manufacturing license and road transportation license), and such qualification certificates must be true and valid.

In the process of supplier admission and selection, the Company will inspect and verify their credit rating, business nature, business scope, information of Shareholders and capital contributions, information of directors, supervisors and executives, registration information of industrial and commercial changes, registration information of equity pledge, publicity information in annual reports throughout the years, major litigation or dispute, preservation measures taken by the court, administrative punishment and major noncompliance or default, and make judgements over their contract performance risk, so as to obtain the latest updates of partners and conduct dynamic assessment and management over the credit standing and risks of partners.

ENVIRONMENTAL, SOCIAL AND GOVERNANCE REPORT

3. Selection of environmentally friendly products and services of suppliers

The Company supports and encourages suppliers to provide environmentally friendly products and services. In the process of entering into contracts with suppliers, the Company requires them to execute safety and environmental protection agreements to guarantee that they provide environmentally friendly products and services.

In the process of supplier evaluation, the review team, according to the annual on-site review plan of suppliers, evaluates the suppliers in terms of technical production capacity, qualification documents, product quality, on-site management and services with respect to the six management elements of “personnel, machine, material, method, environment and testing”. The Company integrates the sustainable development concept into the supply chain, advocates green procurement and production, and strives to achieve consistency between suppliers and the Company in terms of corporate social responsibility, so as to improve the overall performance of the industry. The Company will terminate cooperation with suppliers who violate the environmental or social policies of the Company or the contractual requirements until they make improvements.

4. Supplier selection and engagement

ENVIRONMENTAL, SOCIAL AND GOVERNANCE REPORT

The Company implements the above selection process for all suppliers and conducts satisfaction assessment on a quarterly basis. In order to form a positive cycle, the admission and exit channels of suppliers are established based on the results of assessment. This improves the quality of the Company's qualified suppliers and guarantees that the materials, projects and services purchased by the Company meet the requirements of quality, technology, service, delivery, cost, environment and occupational health/safety. We gradually improve the self-management capability of our suppliers through establishing specific systems, thus promoting mutual development. The breakdown of existing suppliers of the Company is as follows:

Potential suppliers:	1,201 (574 suppliers are applying for potential supplier qualification, and other 627 suppliers are either disqualified or alternative suppliers)
Temporary suppliers:	831
Grade III good suppliers:	273
Grade II excellent suppliers:	39
Grade I strategic supplier:	1

5. Breakdown of suppliers

II. Product Responsibility

As a leader in the market of large railway track maintenance machinery, the Company is committed to providing high quality products and services and complying with business ethics and ethical rules, and we are devoted to responsible conducts during the sales and provision of products and services.

1. Quality certification

The Company attaches great importance to the standardization and systematization of quality management, and conducts continuous improvement and operation. In 1998, the Company introduced and continued to implement ISO9001 quality management standards, established a quality management system covering the whole process of production, business operation and management development of its product portfolios and accessories, and promoted constant and effective operation. In 2012, the Company introduced the EN15085-2 international welding quality standard, ISO/IEC 17025 and CNAS-CL01 laboratory accreditation standard, and extended to the whole quality control process of the Company's welding and quality testing, so as to improve the process capability and product quality. In 2020, the Company established and operated a quality assurance system covering the Company's small track maintenance machinery products according to the requirements of railway CRCC-14W-003, 005 and CRCC-00W-001 standards, standardized and improved the quality control of industry-certified products to ensure product quality. In October 2020, the Company launched and implemented ISO/TS 22163:2017 (formerly known as IRIS) management system standard for railway and rail transit industry, so as to further improve the quality assurance level of the Company's railway and rail transit maintenance machinery products, ensure market access and competition of products, and enhance the comprehensive competitiveness, build the standardized management and control platform, align the Company's quality management with international and domestic standards, and continuously improve the quality management level and guarantee the product quality.

In order to fully ensure and verify the Company's capacity to constantly provide products and services that meet the needs of the market and users, the Company strictly complies with the national system certification and supervision requirements, and regularly receives the examination of qualification accreditation authorities each year. It obtained and maintained professional system certificates, thereby providing strong support and guarantee for the Company's product admission and participation in domestic and international market competition, enhancing the comprehensive competitiveness and promoting the healthy and sustainable development of the Company.

ISO 9001 Quality Management System Certificate

ENVIRONMENTAL, SOCIAL AND GOVERNANCE REPORT

CRCC Product Certificate:

2. Quality assurance and service system

The Company has been implementing “integrated” quality control systems such as ISO/TS 22163 (IRIS) railway and rail transit industry management system, ISO9001 quality system, CRCC product certification system, EN15085 welding system and CNAS laboratory certification system. Innovation was made on quality management mode based on the actual conditions of the Company, and was promoted and implemented. The Company has established a quality management system integrating group management and control and developed over 100 documents relating to management and control system, such as management and control manual, process management standards and relevant quality management system. The Company also improved and perfected the quality management department, established a management mechanism for quality targets, organized the signing of quality assurance and responsibility letters, and assigned the targets level by level and then conducted performance appraisal on each level. The Company carried out standardized management of the processes involving the Company’s products which include marketing, material and component purchase, production organization and control, quality testing and acceptance, complete machine acceptance, product delivery and service in strict compliance with the requirements of the system, and conducted quality control during the whole processes, making sure that the products manufactured by the Company can meet quality requirements and the requirements of users. The Company has established a quality safety risk management system based on the standard of Guidelines on Comprehensive Risk Management of Enterprises Controlled by Central Government and developed an operation and management mechanism for quality safety risks covering the processes such as product design, supply chain management, manufacturing, after-sales services, quality monitoring and assessment. The control of quality risk point in respect of key working procedures, special processes and the “eight prevention” of products (e.g. the prevention of crack, the prevention of separation, the prevention of burning/hot bearing, the prevention of breakage, the prevention of explosion, the prevention of fire, the prevention of split and the prevention of runaway train) were strengthened. Guidance on operation process was followed strictly, and innovative mode for spot check and control was required for critical quality monitoring. The Company improved exception reporting of process quality and the emergency management mechanism of railway traffic accidents and comprehensively promoted quality safety risk management and control, ensuring the quality safety of complete machines and the safety of railway transportation, as well as the consistent fulfilment of its mission of “providing solid support to railway”.

ENVIRONMENTAL, SOCIAL AND GOVERNANCE REPORT

In order to ensure the control over unqualified products, the Company has formulated the Control Procedure for Unqualified Products to control the entire process of identification, review, recall and disposal of unqualified products, so as to prevent unexpected use and delivery, and ensure the quality inspection of production raw and auxiliary materials, purchased materials (including purchased and outsourced parts), self-made parts, various finished products, semi-finished products and final products, as well as control over the unqualified products identified by users after delivery.

During the reporting period, the Company did not identify any cases of sold or shipped products subject to recall for safety and health reasons.

3. Management approach

In order to improve corporate operation and management capability and promote healthy and sustainable corporate development, the Company highly values management innovation and development. Based on the actual conditions, the Company has established and implemented a quality spot check and management mode, comprehensively implemented the process quality control of key points and quality risk control, which effectively improved the production and operation efficiency of the Company. Standardized and efficient operation was achieved by establishing and implementing multiple professional systems and a management and control system featuring integrated group management and control. Under the establishment and implementation of the refined management model of “Four Dimensions and Three Highs”, the Company manufactured quality large railway track maintenance machinery from four dimensions, e.g. “design, purchase, production, service” and built a comprehensive product quality management and control system featuring “high standards, high performance and high quality”. Supported by key technologies from technology platforms such as postdoctoral workstation for large railway track maintenance machinery, high-tech industrialization bases for large railway track maintenance machinery applied in national railways, international technology cooperation demonstration bases and the National Railway Large Railway Track Maintenance Machinery Engineering and Technology Research Center, and making full use of the skill innovation and the leading of craftsmen of cross-functional organizations including Kunming Craftsmen Workroom and Yunling Chief Technician Workroom, the Company manufactured quality large railway track maintenance machinery for the international market, with a view to strengthening the competitiveness of railway engineering machinery manufacturing and service in the international market, and improving the management level of the Company in a comprehensive way.

During the reporting period, the Company has complied with relevant laws and regulations on product liability which have a significant impact on the Company, and there have been no violations of health and safety, advertising, labeling, and privacy issues related to products and services.

ENVIRONMENTAL, SOCIAL AND GOVERNANCE REPORT

4. *Service system*

Under the service concept of “leaving no regret to customers”, the Company strengthens user training and after-sales service, provides customers with product use training and perfect after-sales services, and enhances customer satisfaction. The Company established a user training management system, and set up a training center for large railway track maintenance machinery. The Company organizes user training according to product services and customer needs, and provides complete machine product operation, use, maintenance management and other business training for all railway system users, ensuring the operation safety and construction effect of large railway track maintenance machinery and equipment. Adhering to the principle of “responding quickly and taking immediate action”, the Company formed professional teams for after-sales services and arranged full-time service personnel, established an efficient and high-quality service mechanism, united personnel of research and development, production and process technicians to jointly provide customers with a full range of services such as completion acceptance, services within and out of warranty period, technical guidance, etc. The Company established the project control mechanism with products as the main line of business and implemented full life cycle management of the products, fulfilling the service needs of the customers. The Company has a sound customer complaint handling mechanism in place, to act as a smooth user information communication and feedback channel and to receive user information in a timely manner with active response and handling. The Company conducts unscheduled user visits and exchanges and regular customer satisfaction surveys, investigating on the Company’s overall service, product supply, training services and after-sales services, product performance, product quality, supply of important parts and other services, in order to capture the customer needs in time, collect user opinions or suggestions extensively and handle the issues. The Company keeps improving the product quality and services, maintains a good quality reputation of the Company and enhances customer satisfaction.

In order to improve the customer complaint acceptance and handling mechanism, the Company has established a customer complaint channel covering complaint lodging, acceptance, classification, handling, follow-up and settlement, to clear up the communication and feedback channels for users, and accept user information in a timely manner and provide positive response and handling. The Company organizes occasional user visits and exchanges and regular customer satisfaction surveys to investigate the Company’s overall service, product supply, training service and after-sales service, product performance, product quality, supply of crucial components and other services, timely cater for customer demand, extensively collect and handle user opinions or suggestions, continuously improve the Company’s product quality and service, maintain its sound quality reputation and enhance customer satisfaction.

During the reporting period, the Company did not record any customer complaint.

ENVIRONMENTAL, SOCIAL AND GOVERNANCE REPORT

The Company has established the control procedure over customer property (including customer property, intellectual property rights, personal data, etc.) to strictly control the whole process covering identification, verification, use and disposal of customer property, so as to ensure the effective control of the customer property used by the Company.

5. *Protection and safeguarding of intellectual property rights*

The Company attaches great importance to the protection and maintenance of intellectual property rights. It has formulated the Measures for the Administration of Intellectual Property Rights, set up a flexible group for intellectual property rights, and adopted the following measures: Firstly, it conducts thorough collection of scientific and technological information and cutting-edge technologies, regularly monitors the patent dynamics of competitors, develops analysis reports, conducts risk analysis on risky patents and R&D personnel, and puts forward plans for prevention. Secondly, it strengthens special assignment in early warning, layout and protection of intellectual property rights. Thirdly, it conducts search and analysis of intellectual property rights throughout the whole process of R&D projects (including project initiation, R&D and after-sales stages), gains insight into existing technologies in advance, evades infringement in product design, and prepares dispute response measures in advance. Fourthly, it carries out patent exploration and layout in the R&D stage of key products, and applies for patent protection for innovative technologies in time. Fifthly, it holds special trainings on intellectual property rights in a systemic and hierarchical manner each year to improve the intellectual property protection for independently developed products. Sixthly, it investigates into the laws and policies of intellectual property rights in the overseas market where products are sold, searches for the intellectual property rights of related products, and conducts early warning analysis to establish the intellectual property rights layout and protection in the overseas market. Seventhly, relevant departments launch cooperation in terms of production, office equipment and software to timely monitor and prevent infringement.

ENVIRONMENTAL, SOCIAL AND GOVERNANCE REPORT

PART IV ANTI-CORRUPTION

I. Fulfilling Supervision Responsibilities

In 2023, the Commission for Discipline Inspection of the Company further improved the comprehensive and strict governance over the Party and enhanced the “three not” mechanism (namely, employees do not have the audacity, opportunity, or desire to become corrupt). The commission, by focusing on the central task of improving production and operation through reform and development, continuously intensified supervision and execution, and promoted the role of development. The commission continued to put more efforts in Party conduct, clean governance and anti-corruption within the Company, offering strong disciplinary safeguard for the Company to pursue high-quality development.

First, various systems and mechanisms were improved through intensified implementation. The annual Party conduct and clean governance conference was held, in which the experience and shortcomings were summarized with respect to the Company’s work in 2022, and arrangements for key tasks for 2023 were made on the basis of the key areas and challenging areas of production and operation.

Second, the Commission for Discipline Inspection reported to the Party Committee of the Company. Members of the leadership maintained their work diaries on the basis of assuming two duties at the single post. Party organizations directly under the Party Committee of the Company were subjected to annual performance assessment with respect to Party building. Middle-level leaders were required to submit reports on their performance of duties and integrity, and they were also required to report their income and wedding ceremonies and funerals, as well as to sign the undertaking of integrity. Moreover, suppliers were required to sign integrity guarantee contract with the Company. By doing so, the responsibility system for Party conduct and clean governance was further enhanced in the Company.

Third, through the identification and prevention and control of integrity risks of new organizations and the supervision and inspection of key business systems such as tender-based procurement, research and development, outsourced processing, etc., the Company fully enhanced and revised the Manual for Prevention of Integrity Risks, bringing about the continuous reinforcement of the integrity risk prevention and control system.

Fourth, integrity education was strengthened, leading to increasing awareness of integrity of all employees. Campaigns such as preventive education about anti-corruption and effective implementation of Regulations on Letters and Visits were conducted to boost high-quality development of the Company through intensified discipline building and increased awareness of rules. Leaders and holders of key positions were organized to attend an education and warning campaign in the First Prison of Yunnan Province. As a part of the campaign, typical cases were presented to those leaders and holders in order to interpret and reiterate the relevant laws and disciplines.

ENVIRONMENTAL, SOCIAL AND GOVERNANCE REPORT

Fifth, the Commission for Discipline Inspection regularly launched reminder-based supervision. The commission issued reminder of integrity immediately before New Year's Day, Spring Festival, May Day, Mid-Autumn Festival, National Day and other holidays, and cracked down the four forms of decadence by supervising the use of company cars and entertainment inside and outside the Company.

Sixth, the commission conducted supervision over decision about significant matters, appointment and dismissal of important officials, and arrangements for material projects in an innovative mode characterized by monthly supervision and quarterly reporting, with focus on pain points that restrict production and development, and inadequacies and weak areas affecting high-quality development.

Seventh, continuous and dynamic special rectifications were launched. The commission specially rectified "employees running businesses" and "business dealings between enterprises run by relatives and other specific related persons of employees and the enterprise", "illegal affiliation" and "turning public properties into private properties" on a rolling and quarterly basis.

Eighth, the commission participated in the whole process of selection of candidate representatives of the Party Congress of the Company, appointment of officers, consideration, inspection and supervision over nomination of candidates of excellent employees, and then issued integrity evaluation opinions.

Ninth, the commission intensified the daily supervision over the management and business. Focusing on the selection of tender negotiation jury, supplier access, initiation of infrastructure and equipment and facilities maintenance projects, disposal of sluggish materials, as well as outstanding youth awards, party expenses, etc., the commission conducted more than 310 audits with respect to the relevant processes.

Tenth, the commission further improved the supervision system. It conducted internal inspections and special supervisions. The commission proactively sought opinions and suggestions from audit, legal compliance, finance and other functional departments before the commencement of such inspection and supervision. The commission acted in a problem-oriented manner so that inspections and supervisions become more targeted.

Eleventh, the commission, through suggestions & complaints box or its email, received complaint letters and whistle-blowing. It attached importance to each whistle-blowing, and ensured that each whistle-blowing is handled properly. The commission enforced strict accountability system and issued the notice of any identified non-compliance with the disciplines throughout the Company so that each of the employees gets to know its increasingly tough stance on violations of disciplines.

ENVIRONMENTAL, SOCIAL AND GOVERNANCE REPORT

II. Internal Monitoring System of the Company

1. It covers the establishment of the supervision work system of various governance entities and auditing, disciplinary inspection, supervision, inspections, legal, financial and other departments, including the establishment of institutions and the relevant provisions of supervision duties:

The disciplinary inspection and supervision agency of the Company includes the Discipline Inspection Committee (5 members), the Discipline Inspection Committee Work Department (3 full-time personnel), 3 disciplinary committees of subsidiaries, and part-time disciplinary personnel.

According to the requirements of the new situation, the Company revised the Rules for the Inspection Leadership Group and Organization under the Party Committee of CRCCE, Handbook for Prevention of Integrity Risks, the Measures for the Administration of Letters, and other work regulations, publicized the Company's anti-corruption policies and related measures in various ways, advocated a loyal and diligent corporate culture, and assisted employees to correctly handle conflicts of interest and resist the temptation of illegitimate interests. The Company also conducts education and training on state laws, regulations and integrity ethics for all employees each year, requiring them to abide by state laws and regulations, industry standards, professional ethics norms and regulations of the Company.

During the reporting period, efforts made by the Company to combat bribery, blackmail, fraud and money laundering were as follows:

- (iii) promoting the procedure-based and standardized publicity of integrity education, and developed the integrity education into the annual Key Points of Party Conduct Construction and Anti-corruption; and employing new media approaches, such as OA system, WeChat and SMS to publicize the integrity education;

ENVIRONMENTAL, SOCIAL AND GOVERNANCE REPORT

- (iv) establishing integrity records for cadres, implementing the dynamic management for the integrity of cadres of the middle-level and higher-level, requiring members of the leadership team and cadres above the middle level to sign “undertaking letter on clean practice” and report personal income, and sending anti-corruption notices via WeChat to management (of middle level and above) before important festivals and holidays;
- (v) focusing on the supervision and discipline innovation, establishing integrity contracts to prevent the violations of disciplines and laws, requiring agents and suppliers of all businesses to sign integrity contract with the Company, and terminating cooperation with and blacklisting agents and suppliers breaching regulations and disciplines immediately; and
- (vi) receiving whistleblowing letters, attaching importance to handling reports, and striving for effective settlement for each report; strictly implementing the accountability mechanism, and reporting wrongdoings throughout the Company to inform everyone and exert pressure.

The Company prevents the occurrence of litigation cases related to corruption through the following measures:

- (i) enhancing the red line awareness of the laws and regulations. The Company organizes Directors and management personnel and employees to learn the Regulations of the Communist Party of China on Disciplinary Actions and the Oversight Law of the People’s Republic of China, and organizes all the staff in the Company to study the “Regulations on Violations of Disciplines and Rules of Employees” of CRCC, and the secretary of the Commission for Discipline Inspection gave special learning sessions on education on anti-corruption for the leaders and cadres;
- (ii) enhancing the warning education for key personnel. We regularly organize key personnel such as leaders and cadres of the middle-level and above, personnel of finance, bidding and procurement and logistics, to receive warning education;
- (iii) enhancing daily supervision. Taking the control of the Party Committee as the center, we promote the implementation of the “Two Responsibilities” under the principle of strict governance of the Party. We delegate responsibility and impose pressure at all levels; enforce strict assessment by signing the Agreement on Responsibility for Party Conduct and Clean Governance with the secondary Party Committee each year. We urge the functional departments to strengthen the supervision on the business in their responsibility and hold the responsible functional departments accountable for problems causing serious impacts and major losses due to their insufficient supervision; and release prevention and control manual on anti-corruption risks to enhance the daily supervision on anti-corruption risks arising from key sections and key personnel;

ENVIRONMENTAL, SOCIAL AND GOVERNANCE REPORT

- (iv) establishing integrity records for cadres. We collect the basic information, resume, main members of the family, audits involved, clues and handling of the whistleblowing-related issues of the leaders and cadres of the middle-level above, and implement the dynamic management to effectively strengthen the daily supervision on leaders and cadres, and consolidate the foundation of anti-corruption work;
- (v) seriously implementing the system of discipline and accountability and strengthening the investigation and punishment of violations of disciplines. We create a high-pressure environment of discipline and accountability, and issue effective warnings to prevent the occurrence of litigation cases related to corruption.

2. *Establishment and implementation of internal supervision system*

The Company revised and improved the Handbook for Prevention of Integrity Risks, the Measures for the Administration of Letters and Whistleblowing and other work regulations, and conducted online and offline training and learning activities in the form of central group learning at Party Committee, "Three Meetings and One Lesson" at Party branch, team meetings, departmental meetings, etc., and strengthened publicity and education to inform every employee and strictly implemented the rules and regulations.

- (ii) Continuing to promote the acceptance of clean production qualified enterprises. The Company was awarded the “Qualified Enterprise for Cleaner Production in Yunnan Province” at the end of 2021.
- (iii) Attaching importance to the emergency management of environmental emergencies. The Company has established a comprehensive emergency management system comprising comprehensive plan, special emergency plan and on-site disposal plan. The Emergency Plan for Environmental Emergencies formulated by the Company has been filed with Kunming Ecological Environment Bureau. It carried out emergency drills each year to improve the Company’s emergency response capability for environmental emergencies. In 2023, a government-enterprise joint emergency response exercise for environmental emergencies was jointly conducted with the Kunming Bureau of Ecology and Environment.
- (iv) Implementing standardized management of hazardous wastes. The Company focused on monitoring hazardous wastes, established management system, put hazardous wastes at a fixed point, and assigned special personnel to be in charge, leading to a clear standing book. In 2023, the Company’s management satisfied with the assessment requirements of standardized management of hazardous wastes of Kunming Environmental Protection Bureau;
- (v) Disclosing the Company’s pollutant discharge data and information, regularly publishing the environmental monitoring results on the national pollutant monitoring platform, and accepting public supervision;

During the reporting period, there were no major environmental or climate-related issues that had or might have an impact on the Company.

ENVIRONMENTAL, SOCIAL AND GOVERNANCE REPORT

II. Emission Management

1. Waste emission

The Company insists on reducing the emission of pollutants and wastes and strictly complies with international conventions and domestic laws and regulations related to air pollution. The Company has also formulated a number of regulations to strictly control the placement and disposal of waste coatings, used packaging, and production waste, and to continuously improve environmental management practices and measures to reduce waste generation and increase recycling.

1. Waste and its emission control

The Company strictly complies with the requirements of national laws, regulations and specifications. The Company has established various systems in respect of wastewater, exhaust gas and waste discharge. Compliance assessment is conducted annually, the results of which are in compliance with laws and regulations. From 2014 to 2023, the Company had not violated environmental laws and regulations. In 2022, the Company renewed the pollutant discharge permit. Three wastes discharge met with relevant standards in 2023, with emissions (concentration) falling within the scope of the pollutant discharge permit as approved.

During the reporting period, the Company proposed to achieve standard discharge of wastewater, waste and noise, and recycle no less than 90% of wastewater.

The major pollutants discharged from the Company's exhaust gas are benzene, toluene and xylene. The major pollutants discharged from wastewater are chemical oxygen demand, ammonia nitrogen and total phosphorus. During the reporting period, wastewater disposed of, recycled and discharged by the Company was 223,240 tons, 221,878 tons and 1,362 tons, respectively. The wastewater recycling rate reached 99.4%, meeting the waste reduction target for 2023. The Company discharged 0.0347891 tons of chemical oxygen demand, 0.00181569 tons of ammonia nitrogen, 0.9984 kg of benzene, 0.9984 kg of toluene, 0.99844 kg of xylene, and 387.94 kg of total non-methane hydrocarbon.

According to the requirements of the Company's pollutant discharge permit, the Company organizes environmental monitoring every year, and the monitoring results are all up to standard and meet the total emission requirements. The Company's wastewater pH, SS, COD, BOD, NH₃-N, PO₄-P, LAS and petroleum emissions meet the Class I standard A under the Discharge Standard of Pollutants for Urban Sewage Treatment Plant, the dust and benzene series emissions in the air emissions meet the Class II standard under the Integrated Emission Standard of Air Pollutants, and the noise at the factory boundary meets the Class II standard under the Noise Standard for Industrial Enterprises at the Factory Boundary.

ENVIRONMENTAL, SOCIAL AND GOVERNANCE REPORT

Statistics of total greenhouse gas generated from the consumption of gasoline and diesel oil during the Company's production process in 2023 are summarized as follows:

Category	Activity data	Greenhouse gas	Emission (tCO ₂ e)
Diesel oil	541.85 tons	CO ₂	1,908.23
		CH ₄	1.10
		N ₂ O	24.90
Gasoline	0 ton	CO ₂	0
		CH ₄	0
		N ₂ O	0

Statistics of various kinds of waste goods and materials during the Company's production process in 2023 are summarized as follows:

General waste (non-hazardous):

Category	Weight (ton)
Steel scrap	851.972
Iron scurf	354.08
Aluminium scrap	8.43
Waste wire	14.17
Oxidizing slag	88.2
Waste wooden boards	8 vehicle trips
Waste oil barrels	443 pieces

ENVIRONMENTAL, SOCIAL AND GOVERNANCE REPORT

Hazardous waste (harmful):

Category	Weight (ton)
Waste spongy filter	11.505
Emulsion	29.20
Waste paints	4.93
Waste paint pot	18.903
Mineral oils	77.03
Resin barrel	15.21
Activated carbon	0.65
Waste battery	7.92

Pursuant to the requirements under its pollutant discharge permit, the Company organizes environmental monitoring annually, and the results of each emission and the total amount of emission met relevant standards. The Company complied with first class A standard of the "Discharge Standard of Pollutants for Municipal Wastewater Treatment Plant" for the emission of pH, SS, COD, BOD, NH₃-N, PO₄-P, LAS of wastewater and gasoline, the second class standard of "Integrated Emission Standard of Air Pollutants" for the emission of dust and benzene series of exhaust gas, and type II standard of "Emission Standard for Industrial Enterprises Noise at Boundary" for noise at boundary.

2. *Waste prevention measures and technology*

The Company requires and encourages all employees to act responsibly and to promote environmental protection in the Company's supply chain and related markets. Large railway track maintenance machineries are mostly provided with advanced exhaust gas emission treatment equipment to ensure that the environmental performance of products and systems meets high requirements and relevant operating standards, and the Company continues to pay attention to the research and development of environmental protection equipment and environmental protection technologies. The Company understands and monitors the impact of the Company's daily operations on the environment by continuously monitoring and announcing the Company's organized exhaust emissions. The Company has introduced large-scale ventilation and dust removal systems, welding fume purifier, sewage treatment and reclaimed water reuse systems to reduce smoke and dust emissions and land pollution, implemented 6S management on production sites and improved the stacking and management of materials or wastes.

ENVIRONMENTAL, SOCIAL AND GOVERNANCE REPORT

During the reporting period, the Company mainly conducted the followings with respect to discharge:

(i) Wastewater treatment

The Company has a sewage treatment station which treats wastewater with A/O2 method with daily treatment capacity of 800 cubic meters. Reclaimed water will be discharged upon reaching first class level A standard of "Wastewater Discharge Standard", and most of it will be reused in the Company's greening, dust reduction, car washing and so on, and the rest will be discharged to East Baisha River after meeting relevant standard. In 2023, Kunming City carried out the transformation of the rain and sewage diversion system, and the Company was included in the scope of the transformation. After the completion of the transformation in 2024, the pre-treatment of the Company's production wastewater will meet the standard and will be directly discharged into the urban sewage drainage network system of the city.

(ii) Exhaust gas treatment

General dust is discharged into high-altitude air through centrifugal air compressor after being filtered by dust extractor of the equipment, and more than 90% of the dust will be reduced. Welding fume is generally treated by layered air-supplying method, of which the treatment system is comprised of air treatment system (dust extracting), secondary air stream supplying system and controlling system. With a filter core made of durable polyester which is of low absorbability for viscous materials, the dust extractor reaches efficiency of 99.9%.

As for spray painting, the Company adopts integrated equipment with functions of spray painting, drying and purification, through which painting mist is filtered, absorbed and purified through an organic exhaust gas purification device with segmented two-stage dry filter cotton + activated carbon fiber during the process of air purification, and then discharged upon meeting with relevant standards. In 2023, the Company renovated the paint spraying system of the general remanufacturing factory. The air was purified through the three-stage filtration process involving dry philtre cotton + activated carbon fiber organic exhaust gas purification device + catalytic combustion, and the paint mist was emitted after meeting the standards through adsorption and purification. After the renovation, the emission of VOC exhaust gas will be greatly reduced.

ENVIRONMENTAL, SOCIAL AND GOVERNANCE REPORT

(iii) Boundary noise treatment

The Company applies measures to reduce noises by erecting high-noise equipment on the vibration-damping foundation, equipping draught fans with flexible joints and inlet and outlet pipes of pump, installing silencers for tubes of draught fans and air compressors, erecting closed solid walls in workshops equipped with equipment generating great noise, and planting plants with great noise reduction effect outside the walls to form planting strip in order to reduce the grade of noise.

During the reporting period, the Company adopted the following methods to dispose of waste materials:

General waste materials: Firstly, the Company strengthened the trainings for waste materials management personnel, learned about state laws and regulations, relevant systems and operating procedures, and mastered emergency measures. Secondly, the Company signed letter of responsibility with key units regarding environmental protection, clarified the assessment content and rewards and punishments, and organized the assessment. Thirdly, the Company maximized classification and recycling of recyclable waste materials to reduce the number of new raw materials to be purchased and mitigate the environmental burden caused by processing waste. Fourthly, the Company engages a third-party organization to regularly monitor and publicize the Company's important environmental indicators and occupational hazards each year.

ENVIRONMENTAL, SOCIAL AND GOVERNANCE REPORT

Hazardous waste materials: Firstly, the Company implemented clean production, adopted clean energy, advanced technology and equipment, and purchased emulsion, mineral oil and filter cotton with good quality and in line with national environmental protection requirements, so as to prolong the service life of materials and control the generation of hazardous wastes from the source. Secondly, the Company improved the conversion rate of materials, and reduced and replaced the use of hazardous substances to cut down on the amount of hazardous waste. Thirdly, the Company adopted the approach of classified collection, fixed-point storage, and special management to prevent leakage of hazardous wastes. Fourthly, the Company established hazardous waste storage system to standardize the storage of hazardous wastes. Fifthly, the Company entrust qualified units to dispose of hazardous wastes in a timely manner: it signed a disposal agreement with Yunnan Dadi Fengyuan Environmental Protection Co., Ltd. for non-hazardous disposal of waste paint barrels, waste paint, waste paint residue, waste emulsion, waste filter cotton, waste activated carbon and waste asbestos; signed a disposal agreement with Yunnan Tonglei Renewable Resources Co., Ltd. for non-hazardous disposal of waste mineral oil and oily waste; signed a disposal agreement with Yunnan Haizhou Renewable Resources Co., Ltd. for non-hazardous disposal of waste batteries; and signed the Sales Contract for Waste Materials with Yunnan Rongting Trading Co., Ltd. to dispose of scrap iron and scrap renewable resources generated in the production process. Sixthly, the Company organizes company-level emergency handling drills regularly each year or under the guidance of local government departments to improve the Company's response capability for environmental emergencies.

During the reporting period, there were no environmental emergencies for which the Company was held accountable.

ENVIRONMENTAL, SOCIAL AND GOVERNANCE REPORT

III. Management of Use of Energy

1. *Energy conservation and consumption reduction*

Adhering to the aim of constructing a resource-saving and eco-friendly enterprise, the Company actively made efforts towards energy saving and emissions reduction, with focus on limiting production of high energy consumption and high pollutant while developing energy-saving and eco-friendly industries as well as promoting uses of energy-saving products. The Company vigorously developed new high-tech and high value-added products of high-end underground equipment series to facilitate continuous reduction in energy consumption per unit of output value and energy consumption per unit product of the enterprise. In compliance with national and industrial requirements such as the Environmental Protection Law of the People's Republic of China, Energy Conservation Law of the People's Republic of China, Air Pollution Prevention Law of the People's Republic of China, Water Law of the People's Republic of China, Water Pollution Prevention Law of the People's Republic of China, Law of the People's Republic of China on Prevention and Control of Environmental Pollution by Solid Wastes and Measures for the Administration of Energy Efficiency Labels, the Company rolled out reasonable adjustment to corporate structure, product structure and energy consumption structure, eliminated backward production capacity and reduced pollutant discharge in order to become a green corporation.

The Company advocates adopting the systems of "lower cost and higher efficiency" and "energy conservation and emission reduction" among our employees, and formulated documents such as "Administration Measures on Energy Conservation and Emission Reduction", "Regulations on Use of Energy of the Company", "Administration Measures on Waste Disposal" and etc., to supervise the use of energy of the Company. We strive to enhance our energy utilization efficiency, reduce operation cost and prevent environment pollution.

ENVIRONMENTAL, SOCIAL AND GOVERNANCE REPORT

Statistics of total energy consumption during the production process of the Company in 2023 are summarized as follows:

<u>Category</u>	<u>Total consumption</u>	<u>Unit consumption</u>
Electricity	17.7291 million kwh (including 4.66364 million kwh of PV electricity)	56,400 kwh/unit
Gasoline	0 ton	0 ton
Diesel oil	613.45 tons	2.52 ton/unit
Lubricating oil	81.7 tons	0.31ton/unit
Water	288,063 m ³	1,262.13m ³ /unit

(Note: The above statistics are in accordance with Yunnan Province Energy Statistical Report System, and the data of water and electricity represent consumption during core production, auxiliary production and subsidiary production.)

ENVIRONMENTAL, SOCIAL AND GOVERNANCE REPORT

Statistics of total consumption of packaging materials during the production process of the Company in 2023 are summarized as follows:

No.	Material	Model and Specification	Unit	Consumption
1	Wooden box for export	1,100*950*950	piece	1,420
2	Ordinary carton	250 mm × 150 mm × 200 mm	piece	850
3	Packaging plywood	12mm	square meter	4,630
4	Packaging plywood	18mm	square meter	5,050
5	Ink graffiti remover (ZEP)	WRITE AWAY	barrel	85
6	Scotch tape	60mm	roll	362
7	Tin strap	18mm*50KG	roll	30
8	Rustproof bag	1,150 × 1,150 × 1,150	box	126
9	Steel nail row	ST-64	box	310
10	Woven bag with double inner membrane	120*152	piece	380
11	Composite vapor phase antirust protective film TL-024	1m × 100 m	roll	92
12	Canvas guard	2,400 × 1,100 × 1,100	piece	260
13	Canvas guard	300 × 100	piece	143
14	Ordinary carton	600 × 300 × 300	piece	560
15	Rust remover (ZEP)	147,024 (3.78KG/barrel)	barrel	53
16	Long-acting anticorrosive coating (ZEP)	13OZ/bottle	barrel	142
17	Powerful oil remover for aviation	20OZ/bottle	barrel	28
18	Compressed carton	150 × 100 × 100	piece	720

Note: The Company produces customized products, so it is impossible to count the quantity of packaging materials per production unit.

ENVIRONMENTAL, SOCIAL AND GOVERNANCE REPORT

2. *Comprehensive management*

In strict accordance with the requirements of relevant documents of local government, the Company submits statements and summary reports to the Statistics Bureau of Guandu District of Kunming as scheduled, and accepts irregular inquiries from the Economic and Trade Bureau/Statistics Bureau and Water Saving Office of Kunming and Guandu District. It actively organizes the National Energy Conservation Publicity Week and the National Low Carbon Day each year, and formulates summary report and submits as required. The Company prepared and issued the Notice on Energy Saving Control Target in the 14th Five-Year Period and the Management Measures for Energy Conservation and Emission Reduction of the Company. All energy-consuming units shall submit energy consumption reports every month as required, so as to monitor the whole process of energy consumption. The Company's energy management personnel will inspect the safety of energy equipment and facilities and the energy conservation of key energy-consuming equipment in each production and energy-consuming unit on an ad hoc basis, severely punish the responsible person for the situation found in the inspection that affected the Company's power consumption safety and caused energy waste, and impose assessment on the units causing energy waste for several times.

3. *Management results*

(i) *Achievement of energy-saving indicators*

As of 31 December 2023, the Company's comprehensive energy consumption was 3,312.11 tons of standard coal, and the comprehensive energy consumption was 0.01102873 tons of standard coal/RMB10,000 output, representing a decrease of 25% as compared with the comprehensive energy consumption of 0.0147 tons of standard coal/RMB10,000 output in 2022 (base period), and a decrease of 18.1% from the goal of comprehensive energy consumption of 0.013465 tons of standard coal/RMB10,000 output set for 2023.

In 2023, the Company achieved the goal of comprehensive energy consumption of 0.013465 tons of standard coal/RMB10,000 output.

ENVIRONMENTAL, SOCIAL AND GOVERNANCE REPORT

(ii) *Achievement of total carbon emission control target*

The Company's total carbon emission control target for 2023 is 1,680.56 tons. As of 31 December 2023, the Company's total carbon emission was 1,835.18 tons, after deducting carbon assets of 4,531.31 tons from photovoltaic power plants and trees in 2023, the Company's actual carbon emission was – 2,696.13 tons (surplus).

The photovoltaic power stations of the Company generated electricity of 7.08524 million kWh in 2023, creating 4,322.70 tons of carbon assets for the Company. In particular, the Company utilized 4.663640 million kwh of PV electricity, accounting for 66% of the total electricity generated from PV power stations. Calculated on the basis of the average grid tariff of RMB0.7/kwh and the average PV tariff of RMB0.213/kwh, the electricity saving for the Company amounted to RMB2.271193 million.

The Company takes concrete actions to realize the development philosophy of "Lucid waters and lush mountains are invaluable assets" by actively aligning our corporate action with China's goal of achieving "peak carbon" emission by 2030 and becoming "carbon neutral" by 2060 and issuing the "Notice on Energy Conservation Control Targets during the 14th Five-Year Period". The greening rate is as high as 30% within areas of the Company, and the Company has invested in the planting of 9,583 trees with a crown of 5 meters or more, and therefore the Company has been honored with the titles of "Gardening Unit of Kunming City" and "Gardening Unit of Yunnan Province".

ENVIRONMENTAL, SOCIAL AND GOVERNANCE REPORT

(iii) Achievement of water efficiency target

As of 31 December 2023, the Company consumed 87,999 tons of production water, and the water efficiency was 0.293 tons of production water/RMB10,000 output, reaching the water efficiency target of 0.3 tons of production water/RMB10,000 output set for 2023.

The Company established two sewage treatment stations, of which the daily processing capacity of the stations in district 44 of the Company's headquarters in Kunming and Beijing Ruiweitong Company are 800 tons and 50 tons respectively. The Company actively promoted the implementation of reuse of grey water, which was mainly for large-scale road maintenance machinery raining test, cleaning, dust reduction as well as greening, etc. As of 31 December 2023, a total of 221,878 m³ of grey water was used during the Year.

During the "14th Five-Year Plan" period, the Company will continue to strengthen environmental protection, further enhance the sense of responsibility and mission of ecological civilization construction required of listed companies, and resolutely win the battle of pollution prevention and control.

During the reporting period, the Company did not encounter any difficulties in searching water fit for purpose.

AUDITOR'S REPORT

Xin Kuai Shi Bao Zi [2024] No. ZG10108

TO THE SHAREHOLDERS OF CRCC HIGH-TECH EQUIPMENT CORPORATION LIMITED

I. OPINION

We have audited the accompanying financial statements of CRCC High-Tech Equipment Corporation Limited (the "Company"), which comprise the consolidated balance sheet and the balance sheet of the parent as at 31 December 2023, the consolidated income statement and income statement of the parent, the consolidated cash flow statement and the cash flow statement of the parent, and the consolidated statement of changes in owners' equity and statement of changes in owners' equity of the parent for the year then ended, and notes to the financial statements.

In our opinion, the accompanying financial statements present fairly, in all material respects, the consolidated and parent's financial position of the Company as at 31 December 2023, and the consolidated and parent's results of operations and cash flows for the year then ended in accordance with Accounting Standards for Business Enterprises.

II. BASIS FOR OPINION

We conducted our audit in accordance with China Standards on Auditing. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the code of ethics for professional Accountants of the Chinese Institute of Certified Public Accountants and we have fulfilled our other ethical responsibilities. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

III. KEY AUDIT MATTERS

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current period. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

AUDITOR'S REPORT

The key audit matter we identified in our audit is summarized as follows:

Key audit matters	How these matters were addressed in the audit
<p>(I) Recognition of revenue</p>	
<p>For accounting policies on revenue recognition, please refer to Note III (XXIV); and for a disclosure on revenue, please refer to Note V (XXXVII). As shown in Note V (XXXVII) of the financial statements regarding operating revenue and operating costs, the revenue of the Company mainly comes from the sales of track maintenance machinery, maintenance of track maintenance machinery, sales of parts and components and railway line construction maintenance services. The operating revenue of the Company for 2023 was RMB3.10 billion, an increase of 9.85% from the operating revenue of RMB2.822 billion in the same period last year. Single sales contracts entered into by the Company involve significant amount, and recognition of revenue requires judgement from the management, the authenticity and completeness of which has a significant impact on its operating results and financial statements. Therefore, we consider revenue recognition as a key audit matter.</p>	<p>Our audit procedures for the revenue recognition mainly include:</p> <ol style="list-style-type: none"> 1. understanding and evaluating the design and effectiveness of operation of the key internal control by the management relevant to revenue recognition; 2. selecting samples to review the sales contracts, judging the composition of the contract performance obligations and the timing of transfer of control rights, to assess whether the policy and timing to recognise the Company's sales revenue meet the requirements under the Accounting Standards for Business Enterprises; 3. selecting, on the basis of procedures of external confirmations for accounts receivable and revenue, samples of revenue transactions recorded for the current period, and checking the supportive documents relevant to revenue recognition, and verifying the sales contracts, sales order, machinery ex-factory hand-over letters, customer's receipt, export customs declaration, etc. in order to check the authenticity of revenue recognised; 4. performing analytical procedures on revenue and cost, including: analysis on fluctuation in revenue, cost, gross profit margin for each month of the current period, in order to check the reasonableness of revenue recognised; 5. Analyzing major revenue resources based on revenue sources and fluctuations in gross profit margin, and inspecting whether such fluctuations were in line with the actual operating condition of the Company; 6. Selecting samples of revenue transactions recorded around the balance sheet date and checking the sales order, customer's receipt, and other supportive documents, in order to evaluate whether the revenue is recorded in an appropriate accounting period.

AUDITOR'S REPORT

IV. OTHER INFORMATION

Management of the Company (the "management") is responsible for the other information. The other information comprises all of the information included in the 2023 annual report of the Company, other than the financial statements and our auditor's report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of the other information, we are required to report that fact. We have nothing to report in this regard.

V. RESPONSIBILITIES OF THE MANAGEMENT AND THOSE CHARGED WITH GOVERNANCE FOR THE FINANCIAL STATEMENTS

The management is responsible for preparing the financial statements in accordance with the requirements of Accounting Standards for Business Enterprises to achieve a fair presentation, and designing, implementing and maintaining necessary internal controls, so that financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the management is responsible for assessing the Company's ability to continue as a going concern, disclosing, matters related to going concern (if applicable) and using the going concern assumption, unless the management either intends to liquidate CRCCE or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Company's financial reporting process.

VI. AUDITOR'S RESPONSIBILITIES FOR THE AUDIT OF THE FINANCIAL STATEMENTS

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinions. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with auditing standards will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in aggregate, they could reasonably be expected to affect the economic decisions of users made based on the financial statements.

AUDITOR'S REPORT

In the process of performing audit work in accordance with auditing standards, we exercise professional judgment and maintain professional skepticism throughout the audit. At the same time, we also perform the following tasks:

- (I) Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- (II) Obtain an understand of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of CRCCE's internal control.
- (III) Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- (IV) Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, we should express a non-qualified opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- (V) Evaluate the overall presentation (including the disclosures), structure and contents of the financial statements, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- (VI) Obtain sufficient and appropriate audit evidence regarding the financial information of the entities or business activities within the Company to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

AUDITOR'S REPORT

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and communicate with them all relationships and other matters that may reasonably be perceived to affect our independence and, where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that are of most significance in the audit of the financial statements of the current period and therefore constitute the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

(II) Accounting period

The accounting year is from 1 January to 31 December of each calendar year.

NOTES TO FINANCIAL STATEMENTS

(Amounts expressed in RMB unless otherwise specified)

III. SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (continued)

(III) Operating Cycle

The Company's operating cycle is 12 months.

(IV) Functional currency

The Company adopts Renminbi or RMB as its functional currency. RMB is the currency of the primary economic environment in which the Company and its domestic subsidiaries operate. The overseas subsidiaries of the Company may determine their own functional currencies based on their specific economic environments. The Group adopts RMB to prepare its financial statements.

(V) Accounting treatment of business combinations under common control and not under common control

Business combinations under common control: The assets and liabilities acquired by acquirer through business combination shall be measured at the carrying value of the assets, liabilities (including goodwill arising from the acquisition of the acquiree by ultimate controlling party) of the acquiree in the consolidated financial statements of the ultimate controlling party at the date of combination. The difference between the carrying amount of the net assets obtained and the carrying amount of the consideration paid for the combination (or total nominal value of the issued shares) is adjusted to capital premium in capital reserve. If the capital reserve is not sufficient to absorb the difference, any excess shall be adjusted against retained earnings.

Business combinations not under common control: The cost of combination is the assets paid, the liabilities incurred or committed and fair value of the equity securities issued by the acquirer for acquisition of control over the acquiree on the date of acquisition. Where the cost of combination is higher than the fair value of the identifiable net assets acquired from the acquirer in business combination, such difference shall be recognized as goodwill; where the cost of combination is less than the fair value of the identifiable net assets acquired from the acquiree in business combination, such difference shall be charged to current profit or loss. Each of the identifiable assets, liabilities and contingent liabilities of the acquiree, which are acquired in the combination and meet the criteria for recognition, shall be measured at fair value on the date of acquisition.

The direct relevant expenses incurred for the business combinations are recognized as the profit or loss in the period when the costs are incurred; the transaction costs for the equity securities or debt securities issued for business combination shall be recognized as the initial recognition amount of equity securities or debt securities.

NOTES TO FINANCIAL STATEMENTS

(Amounts expressed in RMB unless otherwise specified)

III. SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (continued)

(VI) Preparation method of consolidated financial statements

1. *Judgement criteria for common control and significant influence*

The scope of consolidation of the consolidated financial statements is determined on the basis of control, and the scope of consolidation comprises the Company and all of its subsidiaries. Control refers to the power of a company over the investee, the rights to enjoy variable returns from its involvement in relevant activities of the investee, and the ability to use its power over the investee to affect the amount of its returns.

2. *Consolidation procedures*

When preparing the consolidated financial statements, the Company considers the entire enterprise group as a single accounting entity and presents the overall financial position, operating results and cash flows of the enterprise group based on the consistent accounting policies. The impact of internal transactions between the Company and its subsidiaries, and among its subsidiaries, shall be offset. If internal transactions indicate impairment losses on relevant assets, such losses shall be recognized in full. Any inconsistent accounting policies and accounting period adopted by a subsidiary will be subject to necessary adjustments to align with those of the Company when preparing the consolidated financial statements.

Owners' equity, net profit or loss of the current period and comprehensive income attributable to minority shareholders of the current period of subsidiaries are stated separately under owners' equity in the consolidated balance sheet, net profit in the consolidated income statement and total comprehensive income respectively. Loss of the current period assumed by minority shareholders of a subsidiary in excess of minority shareholders' share of owners' equity in that subsidiary at the beginning of the period is offset against minority interests.

NOTES TO FINANCIAL STATEMENTS

(Amounts expressed in RMB unless otherwise specified)

III. SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (continued)

(VI) Preparation method of consolidated financial statements (continued)

2. Consolidation procedures (continued)

(1) Addition of subsidiary or business

During the reporting period, if there is an addition of subsidiary or business due to business combination under common control, the operating results and cash flow of the subsidiary or business combination from the beginning of the period to the end of the reporting period will be included in the consolidated financial statements, and the amounts at the beginning of the period in the consolidated financial statements and relevant items in the comparative statements will also be adjusted as if the reporting entity after combination had been existing since the control of the ultimate controlling party started.

Where control over the investee under common control is obtained due to reasons such as increase in investments, for equity investment held before the control over the acquiree is obtained, profit or loss, other comprehensive income and other changes in net assets recognized from the later of the acquisition of the original equity interest and the date when the acquirer and the acquiree are placed under common control until the date of combination are offset against retained profit at the beginning of the period of the comparative financial statements or profit or loss of the period respectively.

During the reporting period, if there is an addition of subsidiary or business due to business combination not under common control, it shall be included, from the date of purchase, in the consolidated financial statements based on the fair value of each of the identifiable assets, liabilities or contingent liabilities determined on the date of purchase.

Where control over the investee not under common control is obtained due to reasons such as increase in investments, for the equity interest of the acquiree held before the date of purchase, the Company re-measures the equity interest at its fair value as at the date of purchase, and any difference between the fair value and its book value will be accounted for as investment gains of the period. Other comprehensive income that will be reclassified into losses and profits and other changes in owners' equity under equity accounting with respect to the equity interest in the acquiree held before the date of purchase are transferred to investment gains of the period to which the date of purchase belongs.

III. SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (continued)

(VI) Preparation method of consolidated financial statements (continued)

2. Consolidation procedures (continued)

(2) Disposal of subsidiaries

1 General disposal

When control over the investee is lost due to the disposal of part of the equity investment or other reasons, the Company re-measures the remaining equity investment after the disposal at fair value as at the date on which control is lost. The difference between the sum of the consideration received from equity disposal and the fair value of the remaining equity interest and the sum of the net assets of the subsidiary proportionate to the original shareholding accumulated from the date of purchase or combination and goodwill is included in investment gains of the period during which the control is lost. Other comprehensive income that will be reclassified into losses and profits and other changes in owners' equity under equity accounting with respect to the equity investment in the original subsidiary are transferred to investment gains of the period during which the control is lost.

III. SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (continued)

(VI) Preparation method of consolidated financial statements (continued)

2. Consolidation procedures (continued)

(2) Disposal of subsidiaries (continued)

2 Stepwise disposal of subsidiary

In respect of stepwise disposal of equity investment in a subsidiary through multiple transactions until control is lost, if the terms, conditions and economic effects of the transactions of equity investment in the subsidiary satisfy one or more of the following conditions, the transactions are normally accounted for as a package of transactions:

- I. these transactions are entered into simultaneously or after considering the effects of each other;
- II. these transactions constitute a complete commercial result as a whole;
- III. one transaction is conditional upon at least one of the other transactions;
- IV. one transaction is not economical on its own but is economical when considering together with other transactions.

(2) Disposal of subsidiaries (continued)

2 Stepwise disposal of subsidiary (continued)

Where the transactions constitute a package of transactions, the Company accounts for the transactions as a transaction of disposal of a subsidiary resulting in the loss of control; the difference between the amount received each time for disposal before control is lost and the net assets of such subsidiary corresponding to the disposal of investment is recognized as other comprehensive income in the consolidated financial statements, and upon loss of control, is transferred to profit or loss of the period during which control is lost.

Where the transactions do not constitute a package of transactions, before the loss of control, the transactions are accounted for based on partial disposal of equity investment in a subsidiary that does not involve loss of control; when control is lost, they are accounted for using the general method for disposal of subsidiaries.

(VII) Foreign currency transactions and translation of financial statements denominated in foreign currency

1. *Foreign currency transactions*

Foreign currency transactions shall be translated into RMB at the exchange rate on the last day of each quarter.

Balance sheet date foreign currency monetary items shall be translated using the spot exchange rate at the balance sheet date. The resulting exchange difference are recognized in profit or loss for the current period, except for those differences related to a specific-purpose borrowing denominated in foreign currency for acquisitions and construction of the qualified assets, which should be capitalized as cost of the borrowings.

2. *Translation of financial statements denominated in foreign currency*

For the translation of financial statements of foreign operation denominated in foreign currency, the assets and liabilities in the balance sheets are translated at the spot exchange rates on the balance sheet date; except for “retained earnings” item, all items under owner’s equity are translated at the spot exchange rates when incurred. The income and expense items in the income statement are measured at the spot exchange rate on the date of transaction (or: translation at the exchange rate determined by a systematic and reasonable method, which is approximate to the spot exchange rate on the date of transaction). Reminder: If this method is adopted, the exchange rate shall be specified clearly).

On disposal of foreign operations, exchange differences in financial statements denominated in foreign currencies related to the foreign operation shall be transferred from owner’s equity items to profit or loss from disposal for the current period.

(VIII) Classification of joint arrangements and accounting treatment for joint operations

Joint arrangements can be classified into joint operations and joint ventures

Joint operations represent the joint arrangement that a party to a joint arrangement has rights to the assets, and obligations for the liabilities, relating to such arrangement.

The Company recognizes the following items in relation to its share of benefits in joint operations:

- (1) the assets held solely by the Company and those jointly held on a pro-rate basis;
- (2) the liabilities assumed solely by the Company and those jointly assumed on a pro-rata basis;
- (3) the income generated from the sale of the products of the joint operation attributable to the Company;
- (4) the income generated by the joint operation from the sale of products on a pro-rata basis;
- (5) the expenses incurred solely by the Company and those incurred by the joint operation on a pro-rata basis.

The Company's investment in joint ventures are accounted for using equity method, please refer to the note "III. (XIV) Long-term Equity Investments".

(IX) Recognition standard for cash and cash equivalents

Cash represents the Company's cash on hand and deposits that can be used readily for payments. Cash equivalents represent investments that satisfy four conditions, namely short-term, highly liquid, readily convertible to known amounts of cash, and subject to an insignificant risk of changes in value.

(X) Financial Instruments

One of the financial asset, financial liabilities or equity instrument is recognized when the Company becomes a party to the contract of the financial instruments.

1. Classification of financial instruments

According to the business model of the Company for management of financial assets and the contractual cash flow characteristics of financial assets, financial assets are classified at the initial recognition as financial assets measured at amortized cost, or financial assets measured at fair value through other comprehensive income, or other financial assets that are measured at fair value through current profit or loss.

The Company shall classify financial assets that meet the following conditions and are not designated as financial assets at fair value through current profit or loss as financial assets measured at amortized cost:

- The objective of the business model is to collect contractual cash flows;
- The contractual cash flows are solely payment of the principal and the interest based on the outstanding principal amount.

(X) Financial Instruments (continued)

1. Classification of financial instruments (continued)

The Company shall classify financial assets that meet the following conditions and are not designated as financial assets at fair value through current profit or loss as financial assets (debt instruments) measured at fair value through other comprehensive income:

- The objective of the business model for managing such financial assets is both to collect contractual cash flows and to dispose of the financial assets;
- The contractual cash flows are solely payment of the principal and the interest based on the outstanding principal amount.

For an investment in equity instruments not held for trading purposes, the Company may irrevocably designate it as financial assets (equity instruments) measured at fair value through other comprehensive income at the initial recognition. This designation is made on an investment-by-investment basis and the relevant investment meets the definition of equity instrument from the perspective of the issuer.

All financial assets not classified as measured at amortized cost and fair value through other comprehensive income as described above are classified as financial assets measured at fair value through current profit or loss. On initial recognition, the Company may irrevocably designate a financial asset that otherwise meets the requirements to be measured at amortized cost or at fair value through other comprehensive income as at fair value through current profit or loss if doing so eliminates or significantly reduces an accounting mismatch.

Financial liabilities, at initial recognition, are classified into financial liabilities at fair value through current profit or loss and financial liabilities measured at amortized cost.

(X) Financial Instruments (continued)

1. *Classification of financial instruments (continued)*

When meeting any of the following criteria, the Company may, at initial recognition, designate a financial liability as measured at fair value through current profit or loss:

- 1) Such designation would eliminate or significantly reduce a measurement or recognition inconsistency.
- 2) A group of financial liabilities or financial assets and financial liabilities is managed and its performance is evaluated on a fair value basis, in accordance with a documented risk management or investment strategy, and information about the group is provided internally on that basis to the entity's key management personnel.
- 3) The financial liabilities include embedded derivatives which can be split separately.

2. Recognition basis and measurement method of financial instruments

(1) Financial assets measured at amortized cost

Financial assets measured at amortized cost, including bills receivable and accounts receivable, other receivables, long-term receivables, and debt investments, are initially measured at fair value plus relevant transaction costs. Accounts receivable that do not contain significant financing components and accounts receivable that the Company has decided not to consider for a financing component of no more than one year are initially measured at the contractual transaction price.

Interest calculated under the effective interest method during the period of holding is included in current profit or loss.

When recovering or disposing, the difference between the price obtained and the book value of the financial asset is included in current profit or loss.

(2) Financial assets (debt instruments) measured at fair value through other comprehensive income

Financial assets (debt instruments) measured at fair value through other comprehensive income, including financing receivables and other debt investments, are initially measured at fair value plus relevant transaction costs. These financial assets are subsequently measured at fair value, with changes in fair value are included in other comprehensive income except for interest, impairment losses or gains and exchange gains or losses calculated using the effective interest method.

On derecognition, the accumulated gain or loss previously recognized in other comprehensive income is transferred out from other comprehensive income and recognized in current profit or loss.

(3) *Financial assets (equity instruments) measured at fair value through other comprehensive income*

Financial assets (equity instruments) measured at fair value through other comprehensive income, including other equity instrument investments, are initially measured at fair value, and relevant transaction costs are included in the initial recognition amount. Such financial assets are subsequently measured at fair value, and changes in fair value are included in other comprehensive income. The dividends received are included in current profit or loss.

Upon derecognition, the accumulated gain or loss previously recognized in other comprehensive income is transferred from other comprehensive income to retained earnings.

(4) *Financial assets at fair value through current profit or loss*

Financial assets measured at fair value through current profit or loss, including held-for-trading financial assets, derivative financial assets and other non-current financial assets, are initially measured at fair value with relevant transaction costs included in current profit or loss, such financial assets are subsequently measured at fair value through current profit or loss. Such financial liabilities are subsequently measured at fair value. Changes in fair value are recognized in current profit or loss.

(5) Financial liabilities measured at fair value through current profit or loss

Financial liabilities measured at fair value through current profit or loss, including held-for-trading financial liabilities, derivative financial liabilities, etc., are initially measured at fair value with relevant transaction costs recognized in current profit or loss. Such financial liabilities are subsequently measured at fair value. Changes in fair value are recognized in current profit or loss.

Upon derecognition, the difference between the carrying amount and the consideration paid is recognized in current profit or loss.

(6) Financial liabilities measured at amortized cost

Financial liabilities measured at amortized cost, including short-term loans, bills payable, accounts payable, other payables, long-term borrowings, bonds payable and long-term payables, are initially measured at fair value plus relevant transaction costs.

Interest calculated under the effective interest method during the period of holding is included in current profit or loss.

3. *Basis for derecognition of financial assets and basis for derecognition and measurement of transfer of financial assets*

The Company derecognizes a financial asset if it meets one of the following conditions:

- the contractual rights to receive the cash flows from the financial asset expire;
- the financial asset has been transferred, and substantially all the risks and rewards of ownership of the financial asset have been transferred to the transferee;
- the financial asset has been transferred, and the Company neither transferred nor retained substantially all rewards related to the ownership of the financial assets, but did not retain its control over the said financial assets.

If the Company revises or renegotiates the contract with the counterparty and such revision or renegotiation constitutes a substantial modification, the original financial asset is derecognised and a new financial asset is recognized in accordance with the revised terms.

When transferring a financial asset, if the Company retains substantially all risks and rewards of ownership of the financial asset, the Company shall continue to recognize such asset.

When judging whether the transfer of a financial asset meets the above criteria for derecognition, the substance-over-form principle shall be applied.

III. SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (continued)

(X) Financial Instruments (continued)

3. *Basis for derecognition of financial assets and basis for derecognition and measurement of transfer of financial assets (continued)*

The Company differentiates the transfer of a financial asset as full transfer or partial transfer. If the full transfer of a financial asset meets the criteria for derecognition, then the difference between the following two included in current profit or loss:

- (1) the book value of the financial asset transferred;
- (2) the sum of the consideration received from the transfer and the total amount of the fair value changes that is directly charged or credited to owners' equity (if the asset transferred is a financial asset (debt instruments) at fair value through other comprehensive income).

When the partial transfer of a financial asset meets the criteria for derecognition, the entire book value of the financial asset transferred shall be allocated between the part derecognized and the part to be recognized based on their respective fair value, with the difference between the following two included in current profit or loss:

- (1) The book value of the part that is derecognized;
- (2) The sum of the consideration attributable to the part derecognized and the total amount of the fair value changes that is directly charged or credited to owners' equity and attributable to the part derecognized (if the asset transferred is a financial asset (debt instruments) at fair value through other comprehensive income).

If the transfer of a financial asset does not meet the criteria for derecognition, the financial asset shall continue to be recognized and the consideration received is recognized as a financial liability.

(X) Financial Instruments (continued)

4. *Derecognition of financial liabilities*

If all or part of the current obligations of a financial liability have been discharged, the financial liability or part of it will be derecognized; if the Company signs an agreement with the creditor to replace the existing financial liability with new financial liability of substantially different contractual terms, the existing financial liability shall be derecognized while the new financial liability shall be recognized.

If substantial changes are made to the contractual terms (in whole or in part) of the existing financial liability, the existing financial liability (or part of it) shall be derecognized, and the financial liability after the modification of terms shall be recognized as a new financial liability.

When a financial liability is derecognized in whole or in part, the difference between the book value of the financial liability derecognized and the consideration paid (including the non-cash assets transferred out or the new financial liability assumed) shall be included in current profit or loss.

If the Company repurchases part of a financial liability, the book value of the entire financial liability is allocated between the part that continues to be recognized and the part that is derecognized on the repurchase date based on their respective relative fair value. The difference between the book value assigned to the part derecognized and the consideration paid (including the non-cash assets transferred out or the new financial liability assumed) shall be included in current profit or loss.

(X) Financial Instruments (continued)

5. *Determination of fair value of financial assets and financial liabilities*

As for financial instruments with an active market, their fair values are determined by quoted prices in the active market. As for financial instruments without an active market, their fair values are determined by using valuation techniques. At the time of valuation, the Company adopts valuation techniques that are applicable in the current circumstances and sufficiently supported by available data and other information, and selects inputs that are consistent with the characteristics of the assets or liabilities considered by the market participants in the transactions of the relevant assets or liabilities, and prioritizes the use of relevant observable inputs. Unobservable inputs are used only if the relevant observable inputs are unavailable or not reasonably available.

6. *Test and accounting methods for impairment of financial assets*

The Company performs impairment accounting on financial assets measured at amortized cost, financial assets measured at fair value through other comprehensive income (debt instruments) and financial guarantee contracts based on expected credit losses.

The probability-weighted amount of the difference in present value between the contractual cash flow of receivable from contracts and the cash flow expected to be received, weighted with the risk of default, will be measured by taking into account of reasonable and valid information on, among other things, past events, current status and the forecast of future economic conditions to recognize the expected credit losses.

6. *Test and accounting methods for impairment of financial assets (continued)*

For accounts receivable and contract asset formed by the transactions regulated in the Accounting Standards for Business Enterprises No. 14—Revenue whether contain significant financing components or otherwise, the Company always measures the loss provision at the lifetime expected credit loss.

For lease receivables derived from transactions specified in the Accounting Standards for Business Enterprises No. 21—Lease, the Company chooses to always measures the loss provisions at the lifetime expected credit loss.

For other financial instruments, the Company assesses the changes in credit risk of relevant financial instruments since initial recognition on each balance sheet date.

In determining changes in the risk of default during the expected lifetime of a financial instrument and assessing whether the credit risk of a financial instrument has increased significantly since initial recognition, the Company compares the risk of default occurring on the financial instrument assessed at the balance sheet date with that assessed at the date of initial recognition. Usually, if it is overdue for more than 30 days, the Company will consider that the credit risk of the financial instrument has increased significantly, unless there is conclusive evidence to prove that the credit risk on a financial instrument has not increased significantly since initial recognition.

III. SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (continued)

(X) Financial Instruments (continued)

6. *Test and accounting methods for impairment of financial assets (continued)*

For a financial instrument with lower credit risk on the balance sheet date, the Company assumes that its credit risk on a financial instrument has not increased significantly since the initial recognition.

If the credit risk of a financial instrument has increased significantly since the initial recognition, the Company measures the loss provisions according to the lifetime expected credit loss of the financial instrument; if the credit risk on a financial instrument has not increased significantly since the initial recognition, the Company measures the loss provisions at an amount equal to 12-month expected credit losses of the financial instrument. The resulting increase in or reversal of loss provision shall be included in current profit or loss as impairment losses or gains. For financial assets (debt instruments) measured at fair value through other comprehensive income, the loss allowance is recognized in other comprehensive income, and the impairment loss or gain is recognized in profit or loss for the current period, without reducing the carrying amount of the financial assets presented in the balance sheet.

Where the Company no longer reasonably expects contractual cash flows of a financial asset to be fully or partially recoverable, the book balance of the financial asset is directly written down.

(XI) Inventory

1. *Classification and costs of inventories*

Inventories are classified into goods in transit, raw materials, goods in stock, goods in process, finished goods, distributed goods and commissioned processing materials.

Inventories are initially measured at cost, which comprises purchase costs, processing costs and other expenses incurred in bringing the inventories to their current location and condition.

2. *Measurement for inventories delivered*

Upon delivery, inventories are measured with the weighted average method.

3. *Inventory system*

The perpetual inventory system is adopted.

4. *Amortization of low-value consumables and packaging materials*

- (1) Low-value consumables are amortized using the immediate write-off method.
- (2) Packaging materials are amortized using the immediate write-off method.

(XI) Inventory (continued)

5. Recognition criteria and provision method of provision for impairment of inventories

As at the balance sheet date, inventories are stated at the lower of cost and net realizable value. When the cost of inventories is higher than their net realizable value, a provision for impairment of inventories shall be made. Net realizable value is the estimated selling price of the inventories in the ordinary course of business deducting the estimated costs upon completion, the estimated selling expenses and the related taxes.

Net realizable value of commodity stocks directly held for sale including finished goods, goods-in-stock and held-for-sale raw materials, during the normal course of production and operation, shall be determined by their estimated selling prices less estimated selling expenses and relevant tax fee; the net realizable value of inventory materials which needed to be processed, during the normal course of production and operation, shall be determined by the estimated selling price of the finished products which are produced during operation less the estimated costs to be incurred upon completion, estimated selling costs and relevant tax fees; the net realizable value of inventories held for fulfillment of the sales contracts or labour contracts shall be calculated based on the contracted price. If the quantity of inventories held exceeds the ordered quantity under the sales contract, the net realizable value of the excess of the inventories is generally calculated based on the normal selling prices.

The categories and basis of determination, and different categories of inventories where the Group makes provision for decline in value of inventories on a collective basis

Inventory	Basis for determination of portfolio	Basis for determining net realizable value
Raw materials	Same category	Estimated selling price less estimated costs to completion, estimated selling expenses and related taxes
Products in progress	Same category	Estimated selling price less estimated costs to completion, estimated selling expenses and related taxes

If the net realizable value of the inventory is higher than its book value due to the disappearance of the factors that previously wrote down the value of the inventory after the withdrawal of the inventory depreciation provision, it shall be reversed within the amount of the inventory depreciation provision that has been originally withdrawn, and the reversed amount shall be recorded into the current profit and loss.

(XII) Contract assets

1. *Recognition and standard of contract assets*

The Company presents contract assets in the balance sheet based on the relationship between performance obligations and customer payments. The consideration that the Company has the right (and this right depends on factors other than passage of time) to receive for goods transferred to customers is listed as contract assets. A contract asset and a contract liability relating to the same contract are accounted for and presented on a net basis. The right of the Company to charge the customer unconditionally (only depends on the passage of time) is listed as a receivable individually.

2. *Determination method and accounting method for expected credit loss of contract assets*

(XIII) Holding for sale and discontinued operation

1. *Holding-for-sale*

A non-current asset or disposal group is classified as asset held-for-sale when the book amount of the asset is recovered principally through a disposal (including an exchange of non-monetary assets with commercial substance) rather than through continuing use.

The Company recognizes non-current assets or disposal groups which meet the following conditions as assets held for sale:

- (1) The assets or disposal groups must be available for sale immediately under the current conditions according to the usual terms of the sale of such assets or disposal groups in similar transactions;
- (2) The assets are highly likely to be sold, namely, the Company has been offered a resolution with one disposition of the assets and obtained a firm purchase commitment and the disposition will be completed within 1 year. If regulation needs to be approved by the relevant authorities or supervision department of the Company, such approval has been obtained.

For non-current asset (excluding financial asset, deferred income tax asset and asset formed by employee benefits) or disposal group which are classified as held-for-sale, if the book value of the non-current asset or disposal group is higher than the net amount after deducting the disposal cost from its fair value, the book value is reduced to the net amount after deducting the disposal cost from its fair value. The reduced amount is recognized as an asset impairment loss and accounted for as profit and loss for the current period, with provision for impairment loss on held-for-sale assets.

(XIII) Holding for sale and discontinued operation (continued)

2. *Discontinued operations*

A discontinued operation is a component that satisfies one of the following conditions and can be distinguished separately, and that component has been disposed of by the Company or classified by the Company as held for sale:

- (1) such component represents a separate major line of business or geographical area of operations;
- (2) such component is part of a single coordinated plan to dispose of a separate major line of business or geographical area of operations;
- (3) such component is a subsidiary acquired exclusively with a view to resale.

The profits or losses from continuing operations and discontinued operations are presented in the income statement, respectively. The profits or losses from discontinued operations such as impairment losses and reversed amounts, and the profits or losses of disposal shall be presented as the profits or losses from discontinued operations. For discontinued operations presented in the current period, the information originally presented as the profits or losses from continuing operations in the current financial statements shall be presented as the profits or losses from discontinued operations during comparable accounting periods again.

(XIV) Long-term equity investments

1. *Judgement criteria for joint control and significant influence*

Joint control refers to the control shared over an arrangement in accordance with the relevant stipulations, and the decision-making of related activities of the arrangement shall not be made before the party sharing the control right agrees the same. Where the Company exercises joint control over the investee with other parties to the joint venture and enjoys the right on the investee's net assets, the investee is a joint venture of the Company.

Significant influence refers to the power to participate in making decisions on the financial and operating policies of an enterprise, but not the power to control, or jointly control with other parties, the formulation of such policies. Where the Company is able to exert significant influence over the investee, the investee is its associate.

(XIV) Long-term equity investments (continued)

2. *Determination of initial investment cost*

(1) *Long-term equity investments acquired through business combination*

For a long-term equity investment in subsidiaries resulting from a business combination involving entities under common control, the initial investment cost of long-term equity investments is its share of the book value of the own' equity of the acquiree in the financial statements of the ultimate controlling party on the date of combinations. The difference between initial investment cost of long-term equity investment and the carrying value of paid consideration is to adjust share premium in the capital reserve. If the balance of share premium in the capital reserve is insufficient, any excess is adjusted to retained earnings. In connection with imposing control over the investee under joint control as a result of additional investment and other reasons the difference between initial investment cost of long-term equity investment according to the aforesaid principle, and the sum of the carrying value of long-term equity investment before combination and the carrying value of newly paid consideration for additional shares acquired on the date of combination is to adjust share premium. If the balance of share premium is insufficient, any excess is adjusted to retained earnings.

For a long-term equity investment in subsidiaries resulting from a business combination involving entities not under common control, the cost of the combination determined on the date of acquisition shall be taken as the initial investment cost of the long-term equity investment. In connection with imposing control over the investee not under joint control as a result of additional investment and other reasons, the initial investment cost shall be the sum of the carrying value of the equity investment originally held and the newly increased investment cost.

The initial investment cost of a long-term equity investment obtained by the Company by means of issuance of equity securities shall be the fair value of the equity securities issued.

3. *Subsequent measurement and recognition of profit or loss*

(1) *Long-term equity investment accounted for by cost method*

Long-term equity investments in subsidiaries are accounted for using cost method unless the investments meet the conditions of held-for-sale. Except for the actual consideration paid for the acquisition of investment or the declared but not yet distributed cash dividends or profits which are included in the consideration, investment gains are recognized as the Company' share of the cash dividends or profits declared by the investee.

3. *Subsequent measurement and recognition of profit or loss (continued)*

(2) *Long-term equity investment accounted for by equity method*

Long-term equity investments in associates and jointly controlled entities are accounted for using equity method. Where the initial investment cost of a long-term equity investment exceeds the Company's share of the fair value of the investee's identifiable net assets at the acquisition date, no adjustment shall be made to the initial investment cost; where the initial investment cost is less than the Company's share of the fair value of the investee's identifiable net assets at the acquisition date, the difference shall be charged to current profit or loss and the cost for long-term equity investment shall be adjusted.

The Company recognizes the investment income and other comprehensive income according to its shares of net profit or loss and other comprehensive income realized by the investee respectively, and simultaneously makes adjustment to the carrying value of long-term equity investments. The carrying value of long-term equity investment shall be reduced by attributable share of the profit or cash dividends for distribution declared by the investee. In relation to other changes of owner's equity (the "**Other Changes of Owner's Equity**") except for net profits and losses, other comprehensive income and profit distribution of the investee, the carrying value of long-term equity investment shall be adjusted and included in owner's equity.

The Company's share of net profit or loss, other comprehensive income and Other Changes of Owner's Equity of an investee is determined based on the fair value of identifiable assets of the investee at the time when the investment is obtained, and according to the accounting policies and accounting period of the Company, recognition shall be made to the net profit of the investee after the adjustment and other comprehensive income, etc.

The unrealized profit or loss resulting from transactions between the Company and its associates or joint venture shall be eliminated in, based on which investment income or loss shall be recognized. Any losses resulting from transactions, which are attributable to impairment of assets, shall be fully recognized, except for the disposal of assets that consist of operations.

The Company discontinues recognizing its share of net losses of the investee after the carrying amount of the long-term equity investment and any long-term interest that is in substance forms part of the Company's net investment in the associate or the joint venture is reduced to zero, except to the extent that the Company has an obligation to assume additional losses. For disposal of long-term equity investments, the difference between the book value and the actual price shall be included into the current profit or loss.

For partial disposal of long-term equity investment accounted by equity method, if the remaining equity is still accounted by equity method, the other comprehensive income recognized by the original equity method shall be carried forward on the same basis as the corresponding proportion of invested unit's direct disposal of relevant assets or liabilities. and other changes in owner's equity shall be carried forward to the current profit and loss according to the proportion.

In case the joint control or significant influence over the investee is lost for disposing part of equity investments or other reasons, the remaining equity will be changed to be accounted for according to the recognition and measurement principles of financial instruments. The difference between the fair value and the book value on the date of the loss of joint control or significant influence shall be included in the current profit and loss. As other comprehensive income recognized based on measurement of the original equity investment under the equity method, accounting treatment shall be made on the same basis as would be required if the investee had directly disposed of the assets or liabilities related thereto when measurement under the equity method is terminated. Owner's equity recognized from the investee's changes in other owner's equity other than net profit or loss, other comprehensive income and profit distribution shall all transferred to the current profit and loss when the equity method confirmed is no longer adopted.

(XV) Investment property

Investment property is held to earn rentals or for capital appreciation or both which include leased land use rights; land use rights held for sale after appreciation; leased buildings (including buildings after self-completion of construction or development for the purpose of leasing and buildings that is being constructed or developed for the purpose of leasing in future).

Subsequent expenses related to the investment property shall be included in the cost of the investment property, if the related economic benefits are likely to flow into the enterprise, and the cost can be reliably measured. Otherwise, they should be included in the current profit and loss upon occurrence.

The Company's existing investment property is measured at cost. The investment property measured at cost buildings held for leasing shall adopt the same depreciation policy for fixed assets of the Company, land use rights held for leasing shall adopt the same amortization policy for the intangible assets.

(XVI) Fixed assets

1. *Recognition and initial measurement of fixed assets*

Fixed assets are tangible assets that are held for use in production or supply of goods or services, for rental to others, or for administrative purposes, and have a useful life of more than one accounting year. Fixed asset is recognized when it meets the following conditions:

- (1) it is probable that the economic benefits associated with the fixed asset will flow to the enterprise;
- (2) its cost can be reliably measured.

Fixed assets are initially measured at cost (and taking into account the effect of estimated costs of disposal).

For subsequent expenses related to fixed assets, if the related economic benefits are likely to flow into the enterprise and its cost could be reliably measured, such expenses are included in the cost of the fixed asset; and the carrying amount of the replaced part will be derecognized. All other subsequent expenses are included in current profit or loss upon occurrence.

2. *Methods for depreciation*

Fixed assets are depreciated by categories using the straight-line method, and the annual depreciation rates are determined by categories based upon their estimated useful lives and their estimated residual values. For fixed assets that have been provided for impairment, the depreciation amount is determined based on the book value after deducting the impairment provision in the future period and the remaining useful life. Where the parts of a fixed asset have different useful lives or cause economic benefits for the enterprise in different ways, different depreciation rates or depreciation methods shall apply, and each part is depreciated separately.

(XVI) Fixed assets (continued)

2. *Methods for depreciation (continued)*

The depreciation methods, useful life of depreciation, residual value rate and annual depreciation rate of each category of fixed assets are as follows:

Category	Useful life (Years)	Residual value rate (%)	Annual depreciation rate (%)
House and buildings	20-35	5	2.71-4.75
Engineering equipment	10-25	5	3.80-9.50
Motor vehicles	5-10	5	9.50-19.00
Production equipment	5-10	5	9.50-19.00
Measurement and experimental equipment	5	5	19.00
Other fixed assets	3-5	5	19.00-31.67

3. *Disposal of fixed assets*

A fixed asset is derecognized on disposal or when no future economic benefits are expected from using or disposal. The amount of proceeds on sale, transfer, retirement or damage of a fixed asset net of its carrying amount and related taxes and expenses is recognized in current profit or loss.

(XVII) Construction in progress

Construction in progress is measured at actual cost. Actual cost comprises construction costs, installation costs, borrowing costs that are eligible for capitalization and other costs necessary to bring the construction in progress ready for their intended use. Construction in progress is transferred to fixed assets when the assets are ready for their intended use, and depreciation begins from the following month.

(XVIII) Borrowing costs

1. *Criteria for recognition of capitalized borrowing costs*

The Company's borrowing costs that are directly attributable to the acquisition, construction or production of a qualifying asset are capitalized into the cost of relevant assets. Other borrowing costs are recognized as expenses in profit or loss in the period in which they are incurred.

Qualifying assets include fixed assets, investment property and inventories that necessarily take a substantial period of time for acquisition, construction or production to get ready for their intended use or sale.

(XVIII) Borrowing costs (continued)

2. Capitalization period of borrowing costs

The capitalization period refers to the period beginning from the commencement of capitalizing borrowing costs to the date of ceasing capitalization, excluding the period of suspension of capitalization.

Capitalization of borrowing costs begins when the following conditions are fully satisfied:

- (1) expenditures for the assets (including cash paid, non-currency assets transferred or interest-bearing liabilities assumed for the acquisition, construction or production of qualifying assets) have been incurred;
- (2) borrowing costs have been incurred;
- (3) acquisition, construction or production that are necessary to enable the asset get ready for their intended use or sale have commenced.

Capitalization of borrowing costs shall cease when the qualifying asset under acquisition, construction or production gets ready for intended use or sale.

3. Suspension of capitalization period

Capitalization of borrowing costs shall be suspended during periods in which the acquisition, construction or production of a qualifying asset is interrupted abnormally, and the interruption is for a continuous period of more than 3 months; if the interruption is a necessary step for making the qualifying asset under acquisition, construction or production ready for the intended use or sale, the capitalization of the borrowing costs shall continue. The borrowing costs incurred during such period of interruption shall be recognized in current profit or loss. When the acquisition, construction or production of the asset resumes, the capitalization of borrowing costs continues.

(XVIII) Borrowing costs (continued)

4. Capitalization rate and calculation of capitalization amount of borrowing costs

As to specific borrowings for the acquisition, construction or production of qualifying assets, borrowing costs from the specific borrowings actually incurred in the current period minus the interest income earned on the unused borrowing loans as a deposit in the bank or the investment income earned from temporary investment will be used to determine the amount of borrowing costs for capitalization.

As to general borrowings for the acquisition, construction or production of qualifying assets, the to-be-capitalized amount of borrowing costs on the general borrowing shall be calculated and determined by multiplying the weighted average asset disbursement of the part of the accumulative asset disbursements minus the specific borrowings and the capitalization rate of the said general borrowings. The capitalization rate shall be calculated and determined according to the weighted average effective interest rate of general borrowings.

During the capitalization period, exchange differences related to the principal and interest on a specific-purpose borrowing denominated in foreign currency are capitalized as part of the cost of the qualifying asset. The exchange differences related to the principal and interest on foreign currency borrowings other than a specific-purpose borrowing are included in the current profits and losses when incurred.

(XIX) Intangible assets

1. *Measurement of intangible assets*

(1) *Intangible assets are initially measured at cost upon acquisition by the Company*

The costs of an externally purchased intangible asset include the purchase price, relevant tax expenses, and other expenditures directly attributable to bringing the asset ready for its intended use.

(2) *Subsequent measurement*

The Company shall analyze and judge the useful life of intangible assets upon acquisition.

As for intangible assets with a finite useful life, they are amortized over the term in which economic benefits are brought to the firm; if the term in which economic benefits are brought to the firm by an intangible asset cannot be estimated, the intangible asset shall be taken as an intangible asset with indefinite useful life, and shall not be amortized.

Expenditures incurred in the development stage are recognized as intangible assets only when all of the following conditions are satisfied, and the expenditures in the development stage that does not meet all of the following conditions are recognized in profit or loss for the period:

- (1) the technical feasibility of completing the intangible asset so that it will be available for use or for sale;
- (2) the intention to complete the intangible asset for use or for sale;
- (3) the ways in which the intangible asset generates economic benefits, including there is evidence that the products produced using the intangible asset has a market or the intangible asset itself has a market, or if the intangible asset is for internal use, there is evidence that proves its usefulness;
- (4) the availability of adequate technical, financial and other resources to complete the development and the ability to use or sell the intangible asset;
- (5) the expenditures attributable to the development phase of the intangible asset could be reliably measured.

If the expenditures cannot be distinguished between the research phase and development phase, all of which should be included in the current profit or loss.

(XX) Impairment of long-term assets

Long-term assets such as long-term equity investments, investment property measured under cost method, fixed assets, construction in progress, right-to-use assets, use of intangible assets and oil and gas assets with a finite useful life are tested for impairment if there is any indication that such assets may be impaired at the balance sheet date. If the result of the impairment test indicates that the recoverable amount of the asset is less than its carrying amount, a provision for impairment and an impairment loss are recognized for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs to sell and the present value of the future cash flows expected to be derived from the asset. Provision for asset impairment is determined and recognized on the individual asset basis. If it is not possible to estimate the recoverable amount of an individual asset, the recoverable amount of a group of assets to which the asset belongs is determined. A group of assets is the smallest group of assets that is able to generate independent cash inflows.

Goodwill formed by business merger, intangible assets with indefinite useful lives and intangible assets that are not yet ready for use are tested for impairment at least at the end of each year regardless of whether there is any sign of impairment.

When the Company performs impairment test on goodwill, the Company shall, as of the purchase day, allocate on a reasonable basis the carrying value of the goodwill formed by merger of enterprises to the relevant asset groups, or if there is a difficulty in allocation, to allocate it to the set of asset groups. The related asset groups or the set of asset groups refers to these ones that can benefit from the synergies of a business combination.

III. SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (continued)

(XX) Impairment of long-term assets (continued)

For the purpose of impairment test on the relevant asset groups or the set of asset groups containing goodwill, if any evidence shows that the impairment of asset groups or set of asset groups related to goodwill is possible, an impairment test will be made firstly on the asset groups or set of asset groups not containing goodwill, thus calculating the recoverable amount and comparing it with the relevant carrying value so as to recognize the corresponding impairment loss. Then, the Company will conduct impairment tests on the asset groups or set of asset groups that includes goodwill and compare its carrying value against its recoverable amount. If the recoverable amount is lower than its carrying value, the amount of impairment loss is first offset against the carrying value of the goodwill allocated to the asset groups or set of asset groups, then, based on the proportion of the carrying value of other assets in the asset groups or set of asset groups other than goodwill, offset against the carrying value of other assets proportionally.

Once the above asset impairment loss is recognized, it will not be reversed in subsequent accounting periods.

(XXI) Contract liabilities

The Company presents contract assets or contract liabilities in the balance sheet based on the relationship between performance obligations and customer payments. A contract liability represents the obligation to transfer goods or services to a customer for which the Company has received a consideration or an amount of consideration that is due from the customer. A contract asset and a contract liability relating to the same contract are accounted for and presented on a net basis.

III. SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (continued)

(XXII) Employee benefits

1. *Accounting treatment methods of short-term benefits*

In the accounting period in which employees provide service for the Company, short-term benefits actually incurred are recognized as liabilities and charged to current profit or loss or cost of relevant assets.

With regard to the social insurance and housing provident funds contributed and labour union expenses and employee education expenses paid as required by regulations, the Company should calculate and recognize the corresponding employee benefits payables according to the appropriation basis and proportion as stipulated by relevant requirements in the accounting period in which employees provide service.

At the time of actual occurrence, the Company's employee benefits are recorded in the current profit or loss or costs of relevant assets as incurred. The non-currency welfare expenses are measured at fair value.

2. *Accounting for post-employment benefits*

(1) *Defined contribution plan*

The Company will pay basic pension insurance and unemployment Insurance for the staff in accordance with the relevant provisions of the local government. During the accounting period when the staff provided service, the Company will calculate the amount payable in accordance with the local stipulated basis and proportions which will be recognized as liabilities, and the liabilities would be charged into current profit or loss or costs of relevant assets. In addition, the Company will participate in the corporate annuity scheme and supplementary pension insurance approved by the local government. The Company will make annuity contributions in proportion to its employees' total salaries to the annuity scheme or local social institutes. The payment would be charged into current profit or loss or costs of relevant assets.

(2) Defined benefit plan

In respect of the defined benefit scheme, the Company shall attribute the welfare obligations under the defined benefit scheme in accordance with the estimated accrued benefit method to the service period of relevant employee, and record the obligation in profit loss for the current period or costs of related assets.

The deficit or surplus generated from the present value of obligations of the defined benefit scheme minus the fair value of the assets of defined benefit scheme is recognized as net liabilities or net assets of a defined benefit scheme. When the defined benefit Scheme has surplus, the Company will measure the net assets of the defined benefit scheme at the lower of the surplus of defined benefit scheme and the upper limit of the assets.

All defined benefit plans obligations, including the expected duty of payment within 12 months after the end of annual reporting period during which the staff provided service, are discounted based on the market yield of government bonds matching the term and currency of defined benefit plan obligations or corporate bonds of high quality in the active market on the balance sheet date.

The service cost incurred by the defined benefit scheme and the net interest of the net liabilities and net assets of the defined benefit scheme would be charged to current profit or loss or relevant costs of assets. The changes arising from the re-measurement of the net liabilities or net assets of the defined benefit scheme would be included in other comprehensive income and are not reversed to profit or loss in a subsequent accounting period; when the previously defined benefits plan is terminated, such amount previously included in other comprehensive income shall be transferred to undistributed profit.

When the defined benefit scheme is settled, the gain or loss is recognized based on the difference between the present value of obligations under the defined benefit scheme and the settlement price at the balance sheet date.

(XXII) Employee benefits (continued)

3. Accounting treatment of termination benefits

When the Company provides employees with termination benefits, the staff remuneration liabilities arising from termination benefits are recognized and recorded in current profit or loss whichever of the following is earlier: when the Company cannot unilaterally revoke such termination benefits provided due to dissolution of labour relationship plan or lay-off proposal; when the Company recognizes such cost or expenses associated with the restructuring involving the payment of termination benefits.

(XXIII) Estimated liabilities

The estimated liabilities are initially measured at the best estimate of expenditure required for the performance of relevant present obligations.

The Company shall take into consideration the risks, uncertainties, time value of money and other factors relating to the contingencies in determining the best estimate. If the time value of money is significant, the best estimates shall be determined after discount of relevant future cash outflows.

If there is a successive range of the required expenditure, and the likelihood of occurrence of various results within the range is the same, the best estimate is determined by the intermediate value. In other cases, the best estimate is handled as follows:

- Where the contingency is related to individual item, the best estimate should be determined as the most likely amount.
- Where the contingency is related to a number of items, the best estimate should be calculated and determined according to the various possible results and the relevant probabilities.

NOTES TO FINANCIAL STATEMENTS

III. SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (continued)

(XXIII) Estimated liabilities (continued)

When all or part of the expenditures necessary for the settlement of an estimated liability is expected to be compensated by a third party, the compensation should be separately recognized as an asset only when it is virtually certain that the compensation will be received. The amount recognized for the compensation should not exceed the carrying amount of estimated liabilities.

The Company reviews the carrying amount of estimated liabilities on balance sheet date. If there is clear evidence that the carrying amount does not reflect the current best estimate, the carrying amount is adjusted to the best estimate.

(XXIV) Revenue

1. *Accounting policies for revenue recognition and measurement*

The Company recognizes revenue when the performance obligation in a contract is fulfilled, namely the customer obtains control of relevant goods or services. Control of a good or service refers to the ability to direct the use of the good or service, and obtain substantially all of the benefits from the goods or services.

If the contract contains two or more performance obligations, the Company allocates the transaction price to each individual performance obligation on the contract commencement date based on the relative proportion of the individual selling prices of the goods or services promised in each individual performance obligation. The Company measures revenue based on the transaction price allocated to each individual performance obligation.

NOTES TO FINANCIAL STATEMENTS

(Amounts expressed in RMB unless otherwise specified)

III. SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (continued)

(XXIV) Revenue (continued)

1. *Accounting policies for revenue recognition and measurement (continued)*

The transaction price is the amount of consideration to which the Company expects to be entitled in exchange for transferring promised goods or services to a customer, excluding amounts collected on behalf of third parties and those expected to be refunded to the customer. The Company considers the terms of the contract and its customary business practices to determine the transaction price. When determining the transaction price, the Company considers the effects of variable consideration, the existence of a significant financing component in the contract, non-cash consideration and consideration payable to a customer. The Company determines the transaction price that includes variable considerations based on the amount not exceeding the revenue accumulatively recognized which is not likely to be significantly reversed when the relevant uncertainty disappears. Where there are significant financing elements in the contract, the Company recognizes the transaction price at an amount that reflects the price that a customer would have paid for the promised goods or services if the customer had paid cash for those goods or services when (or as) they transfer to the customer. The difference between the transaction price and the amount of contract consideration is amortized using an effective interest method over the contract term.

When one of the following conditions is satisfied, the Company is considered to have fulfilled an obligation within a certain period of time. Otherwise, the Company is considered to have fulfilled an obligation at a certain point in time:

- At the same time when the Company fulfills the obligation, the customer immediately obtains and consumes the economic benefits brought about by the Company's performance.
- The customers can control the goods under construction in the course of the Company's performance.
- Goods produced in the course of the Company's performance are irreplaceable. In addition, during the entire contract period, the Company has the right to collect the payments for the cumulatively completed parts of performance.

NOTES TO FINANCIAL STATEMENTS

(Amounts expressed in RMB unless otherwise specified)

III. SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (continued)

(XXIV) Revenue (continued)

1. *Accounting policies for revenue recognition and measurement (continued)*

Where fulfillment of a performance obligation takes place over a certain period of time, revenue should be recognized as performance takes place, excluding the stage of performance cannot be determined. The Company considers the nature of the goods or services and adopts the output method or the input method to determine the fulfillment progress of the performance. When the fulfillment progress of the performance cannot be determined reasonably, but is expected to recover the costs incurred, the Company should recognize revenue only to the extent of the cost until a reliable measure of fulfillment progress can be made.

For a performance obligation satisfied at a point in time, the Company shall recognize revenue when the customer obtains control of relevant goods or services. In judging whether customers obtain control of promised goods or services, the Company considers the following Indications:

- The Company enjoys the right to collect cash on the goods or services, that is, the customer has the obligation to pay for the goods or services at the present time.
- The Company has transferred the legal ownership of the commodity to the customer, that is, the customer has the legal ownership of the commodity.
- The Company has transferred the goods in kind to the customers, that is, the customers have actually taken possession of the goods.

1. *Accounting policies for revenue recognition and measurement (continued)*

- The Company has transferred the main risks and rewards in the ownership of the commodity to its customers, that is, the customers have acquired the main risks and rewards in the ownership of the commodity.
- The customer has accepted the goods or services.

The Company determines whether it is a principal or an agent when engaging in the transaction based on whether it has control over the goods or services before transferring them to the customer. If the Company can control the goods or services before transferring the goods or services to the customer, the Company is the main responsible person and recognizes the income according to the total consideration received or receivable; otherwise, the Company is the agent and recognizes the income according to the amount of commission or handling fee expected to which the Company is entitled to.

2. *Disclosure of specific revenue recognition method and measurement method by business type*

Sales of mechanical equipment:

For the sales of large railway track maintenance machinery, the Group recognises revenue at the time when the control of the good is transferred. (XXV) Contract costs

Contract costs comprise contract performance costs and contract acquisition costs.

The costs incurred by the Company for the performance of the contract which does not fall under the scope of the standards relating to inventories, fixed assets and intangible assets are recognized as an asset as contract performance costs when the following conditions are met:

- The cost is directly related to a current or expected contract.
- The cost increases the resources of the Company to fulfill its performance obligations in the future.
- The cost is expected to be recovered.

If the incremental cost incurred by the Company in obtaining the contract can be expected to be recovered, the contract acquisition cost shall be recognized as an asset.

Assets related to the cost of the contract are amortized on the same basis as the revenue recognition of the goods or services related to the asset; however, if the amortization period of the contract acquisition cost is less than one year, the Company will include it into the current profit or loss when it incurs.

For assets related to contract costs whose carrying amount is higher than the difference between the following two items, the Company will make provision for impairment for the excess and recognize it as asset impairment loss:

1. The remaining consideration expected to be obtained by the transfer of goods or services related to the asset;
2. The cost expected to be incurred for the transfer of the relevant goods or services.

If the above-mentioned excess is higher than the book value of such assets as a result of any subsequent change of impairment factors in the previous period, the provision for impairment of assets previously made shall be reversed and included in profit or loss for the period as incurred to the extent the book value of the reversed asset shall not exceed the book value of the asset on the date of the reverse assuming no provision for impairment is made.

(XXVI) Government grants

1. Types

Government grants are monetary assets and non-monetary assets obtained by the Company from the government for free, and are divided into government grants related to assets and government grants related to revenue.

3. Accounting treatment

Asset-related government grants shall be used to offset the carrying amount of relevant asset or recognized as deferred income. The amount recognized as deferred income shall be recorded in current profit or loss by installments in a reasonable and systematic way over the useful life of the relevant assets (the government grants related to the Company's daily activities shall be included in other income; and the government grants unrelated to the Company's daily activities shall be included in non-operating income);

Government grants related to revenue that are used to compensate relevant costs or losses of the Company in subsequent periods are recognized as deferred income and recorded in current profit or loss when such costs and losses are recognized (government grants related to the Company's daily activities shall be included in other income; government grants unrelated to the Company's daily activities shall be included in non-operating income) or offset relevant costs or losses; and the grants used to compensate relevant costs or losses that have incurred by the Company are recorded directly in current profit or loss (government grants related to the Company's daily activities shall be included in other income; government grants unrelated to the Company's daily activities shall be included in non-operating income) or offset relevant costs or losses.

The interest subsidies for policy-related preferential loans obtained by the Company are divided into two types and subject to accounting treatment separately:

- (1) Where the interest subsidies are appropriated from the fiscal funds to the lending bank and then the bank provides loans to Company at a policy-based preferential interest rate, the Company will recognize the amount of borrowings received as the initial value and calculate the borrowing costs according to the principal amount and the policy-based preferential interest rate.
- (2) Where the interest subsidies are paid directly to the Company, the Company will use such interest subsidies to offset the corresponding borrowing costs.

III. SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (continued)

(XXVII) Deferred tax assets and deferred tax liabilities

Income tax comprises current and deferred income tax. Current tax and deferred tax are recognized in profit or loss except to the extent that they relate to a business combination or items recognized directly in equity (including other comprehensive income).

Deferred tax assets and deferred tax liabilities are recognized based on the differences (temporary differences) between the tax bases and the carrying amount of assets and liabilities.

Deferred income tax assets are recognized to the extent that it is probable that future taxable profits will be available against which deductible (temporary) differences can be utilized. For deductible losses and tax credits that can be reversed in the future period, deferred tax assets shall be recognized to the extent that it is probable that taxable profit will be available in the future to offset the deductible losses and tax credits.

Save for exceptions, deferred income tax liabilities shall be recognized for the taxable temporary difference.

The exceptions for not recognition of deferred income tax assets and liabilities include:

- the initial recognition of the goodwill;
- a transaction or event that is neither a business combination nor affects accounting profit and taxable profit (or deductible losses) when it occurs, and a transaction or business in which the assets and liabilities initially recognized do not result in transactions or events that generate equal taxable temporary differences and deductible temporary differences.

Deferred tax liabilities are recognized for temporary differences arising from investments in subsidiaries, joint ventures and associates, except where the Company is able to control the timing of the reversal of the temporary difference, and it is probable that the temporary difference will not reverse in the foreseeable future. When it is probable that the temporary differences arising from investments in subsidiaries, joint ventures and associates will be reversed in the foreseeable future and that the taxable profit will be available in the future against which the temporary differences can be utilised, the corresponding deferred tax assets are recognized.

III. SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (continued)

(XXVII) Deferred tax assets and deferred tax liabilities (continued)

On the balance sheet date, deferred tax assets and deferred tax liabilities are measured at the applicable tax rates during the period when the relevant assets are expected to be recovered or the relevant liabilities are expected to be settled in accordance with the provisions of the tax law.

On the balance sheet date, the Company reviews the book value of deferred income tax assets. The carrying amount of deferred tax assets is written down to the extent that it is no longer probable that sufficient taxable profits will be available in future periods to allow the benefit of deferred tax assets to be utilized. Such reduction is reversed to the extent that it becomes probable that sufficient taxable profits will be available.

When the Group has a legally enforceable right to set-off and intends either to settle on a net basis or to acquire the income tax asset and settle the income tax liability simultaneously, current income tax assets and current income tax liabilities shall be presented as the net amount after offsetting.

At the balance sheet date, deferred tax assets and deferred tax liabilities are offset if all of the following conditions are met:

- When the taxable entity has the legal right to set off current income tax assets and current income tax liabilities on a net basis;
- When the deferred income tax assets and deferred income tax liabilities are related to income tax to be paid by the same entity liable to pay tax to the same tax authority, or related to different entities liable to pay tax but the relevant entities intend to settle on a net basis or to acquire the income tax assets and settle the income tax liabilities simultaneously in the future period in which significant deferred income tax assets and liabilities would be reversed.

(XXVIII) Lease

A lease is a contract that conveys the right to use an asset for a period of time in exchange for consideration. At inception of a contract, the Company assesses whether a contract is, or contains, a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of one or more identified asset(s) for a period of time in exchange for consideration.

For a contract that contains multiple separate lease, the Company separates the contract and accounts for each lease component as a lease separately. For a contract that contains lease and non-lease components, the lessee and lessor separate the lease and non-lease components.

III. SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (continued)

(XXVIII) Lease (continued)

1. The Company as a lessee

(1) Right-of-use assets

At the commencement date of lease term, the Company recognizes right-of-use assets for leases (excluding short-term leases and leases of low-value assets). Right-of-use assets are measured initially at cost. Such cost comprises:

- The amount of the initial measurement of lease liability;
- Lease payments made at or before the inception of the lease less any lease incentives already received (if there is a lease incentive);
- Initial direct costs incurred by the Company;
- The costs of the Company expected to be incurred for dismantling and removing the leased asset, restoring the site on which the leased asset is located or restoring it to the condition as agreed in the terms of the lease, except those incurred for the production of inventories.

The Company subsequently depreciates right-of-use assets using the straight-line method. If there is reasonable certainty that the Company will obtain the ownership of a leased asset at the end of the lease term, the Company depreciates the right-of-use asset from the commencement date to the end of the useful life of the underlying asset; otherwise, the Company depreciates the leased asset from the commencement date to the earlier of the end of the useful life of the right-of-use asset or the end of the lease term.

The Company determines whether the right-of-use assets have been impaired in accordance with the principles described in the note "III. (XX) Impairment of Long-term Assets" and conducts accounting treatment for impairment loss identified.

(XXVIII) Lease (continued)

1. The Company as a lessee (continued)

(2) Lease liabilities

At the commencement date of lease term, the Company recognizes lease liabilities for leases (excluding short-term leases and leases of low-value assets). Lease liabilities are initially measured based on the present value of outstanding lease payment. Lease payment includes:

- Fixed payments (including in-substance fixed payments), less any lease incentives (if there is a lease incentive);
- Variable lease payment that are based on an index or a rate;
- Amounts expected to be payable under the guaranteed residual value provided by the Company;
- The exercise price of a purchase option if the Company is reasonably certain to exercise that option;
- Payments of penalties for terminating the lease option, if the lease term reflects that the Company will exercise that option.

(Amounts expressed in RMB unless otherwise specified)

III. SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (continued)

(XXVIII) Lease (continued)

1. The Company as a lessee (continued)

(2) Lease liabilities (continued)

The Company adopts the interest rate implicit in the lease as the discount rate. If that rate cannot be determined reasonably, the Company's incremental borrowing rate is used.

The Company shall calculate the interest expenses of lease liabilities over the lease term at the fixed periodic interest rate, and include it into profit or loss in the period or cost of relevant assets.

Variable lease payments not included in the measurement of lease liabilities are charged to profit or loss in the period or cost of relevant assets in which they actually arise.

After the commencement date of lease term, if the following circumstances occur, the Company re-measures the lease liability and adjusts the carrying value of the right-of-use asset accordingly. If the carrying value of the right-of-use asset has been reduced to zero, the lease liability still needs to be further reduced. The Company accounts for the difference in the current profit or loss:

- When there is a change in the assessment results of the purchase, extension or termination option, or when the actual exercise of the aforementioned options is inconsistent with the original valuation result, the Company re-measures the lease liabilities in accordance with the lease payments after changes and the present value calculated using the revised discount rate;
- When there is a change in substance fixed payments, the amount expected to be payable under the guaranteed residual value or the index or rate arising from the confirmation of lease payments, the Company re-measures the lease liabilities in accordance with the lease payments after changes and the present value calculated using the initial discount rate. However, if the lease payments change is due to a change in a floating interest rate, in which case a revised discount rate is used.

III. SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (continued)

(XXVIII) Lease (continued)

1. The Company as a lessee (continued)

(3) Short-term leases and leases of low-value assets

The right-of-use asset and lease liability are not recognized by the Company for short-term leases and leases of low-value assets, and the relevant lease payments are included in profit or loss in the period or costs of relevant assets in each period of the lease term on a straight-line basis. Short-term leases are defined as leases with a lease term of not more than 12 months from the commencement date and excluding a purchase option. Leases of low-value assets are defined as leases with underlying low value when new. The Group treats a single lease asset with a value of no more than RMB100,000.00 when it is a new asset as a low-value asset lease. If the Company subleases or expects to sublease the leased assets, the original lease is not a low-value asset lease.

(4) Lease change

The Company will account for the lease change as a separate lease if the lease changes and meets the following conditions:

- The lease change expands the scope of lease by increasing the rights to use one or more leased assets;
- The increased consideration and the individual price of the expanded part of the lease are equivalent to the amount adjusted for the contract.

If the lease change is not accounted for as a separate lease, the Company shall re-allocate the consideration of a changed contract, re-determine the lease term, and re-measure the lease liabilities by the present value calculated from the changed lease payments a revised discount rate on the effective date of the lease change.

III. SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (continued)

(XXVIII) Lease (continued)

1. *The Company as a lessee (continued)*

(4) *Lease change (continued)*

If the lease change results in a narrower lease or a shorter lease term, the Company reduces the carrying value of the right-of-use asset accordingly, and recognises the related gains or losses that partially terminate or completely terminate the leases into the current profit and loss. For other lease change that cause the lease liabilities to be remeasured, the Company adjusts the carrying value of the right-of-use assets accordingly.

2. *The Company as a lessor*

At the commencement date of lease term, the Company classifies leases as financing leases and operating leases. A financing lease is a lease that transfers substantially all the risks and rewards incidental to ownership of a leased asset, irrespective of whether the ownership of the asset is eventually transferred. An operating lease is a lease other than a finance lease. As a sub-leasing lessor, the Company classifies the subleases based on the right-of-use assets of the original leases.

(1) *Accounting treatment of operating leases*

The lease payments derived from operating leases are recognized as rental income on a straight-line basis over the respective lease terms. Initial direct costs relating to operating leases to be incurred by the Company shall be capitalized and then included in the current income by stages at the same base as the recognition of rental income over the lease term. The variable lease payments not included in the measurement of lease payments shall be recognized in profit or loss in the period in which they are occurred. Where there is a modification in an operating lease, the Company accounts for it as a new lease from the effective date of the modification, and the amount of lease receipts received or receivable in advance relating to the pre-modification lease is treated as receipts under the new lease.

III. SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (continued)

(XXVIII) Lease (continued)

2. The Company as a lessor (continued)

(2) Accounting treatment of financing leases

At the commencement date of lease term, the Company recognizes financing lease receivable and derecognizes the underlying assets. The Company initially measures financing lease receivable in the amount of net investment in the lease. Net investment in the lease is the sum of present value of unguaranteed residual value and the lease payments receivable at the commencement date of lease term, discounted at the interest rate implicit in the lease.

The Company calculates and recognizes interest income in each period during the lease term, based on a constant periodic interest rate. The derecognition and impairment of financing lease receivable are accounted for in accordance with the note "III. (X) Financial Instruments".

Variable lease payments not included in the measurement of the net investment in the lease are included in profit or loss in the period in which they are occurred.

Accounting treatment of lease changes when a financial lease is changed and the following conditions are simultaneously met, the Company accounts for the lease change as a separate lease:

- The change expands the scope of lease by adding the right to use one or more leased assets;
- The increased consideration and the individual price of the expanded part of the lease are equivalent to the amount adjusted for the contract.

(XXVIII) Lease (continued)

2. *The Company as a lessor (continued)*

(2) *Accounting treatment of financing leases (continued)*

Where a change in a financial lease is not accounted for as a separate lease, the Company deals with the lease after the change according to the following situation:

- In case where the lease would have been classified as an operating lease assuming the modification became effective at the commencement date of the lease, the Company accounts for it as a new lease from the effective date of the modification and the net investment in the lease prior to the effective date of the modification is taken as the carrying amount of the leased assets;
- In case where the lease would have been classified as a finance lease assuming the modification became effective at the commencement date of the lease, the Company conducts accounting treatment in accordance with the policy regarding the modification or renegotiation of contracts described in the note "III. (X) Financial instruments".

3. *Sale and leaseback transactions*

The Company determines whether the asset transfer in the sale and leaseback transaction is a sale in accordance with principles described in note "III. (XXIV) Revenue".

(1) *As a lessee*

If the asset transfer in the sale and leaseback transaction is a sale, the Company, as a lessee, measures the right-of-use assets formed by the sale and leaseback based on the part of the book value of the original assets related to the use rights obtained from the leaseback, and recognize relevant gains or losses only for the right to transfer to the lessor.

(XXVIII) Lease (continued)

3. Sale and leaseback transactions (continued)

(1) As a lessee (continued)

After the commencement date of the lease term, the subsequent measurement of the right-of-use assets and lease liabilities and lease changes are detailed in the note "III. (XXVIII) Lease 1. The Company as the lessee". In the subsequent measurement of the lease liabilities arising from the sale and leaseback, the Company determines whether the lease payment or the changed lease payment method will not lead to the recognition of gains or losses related to the right of use obtained by the leaseback.

If the transfer of assets in the sale and leaseback transaction is not a sale, the Company, as the lessee, continues to recognize the transferred assets and recognizes a financial liability equal to the transfer income. For details of accounting treatment for financial liabilities, please see the note "III. (X) Financial Instruments".

(2) As a lessor

If the transfer of assets in the sale and leaseback transaction is a sale, the Company, as a lessor, accounts for asset purchase, and accounts for asset lease in accordance with policies in the aforementioned "2. The Company as a lessor"; if the transfer of assets in the sale and leaseback transaction is not a sale, the Company, as a lessor, does not recognize the transferred assets, but recognizes a financial asset equal to the transfer income. For details of accounting treatment for financial assets, please see the note "III. (X) Financial instruments".

III. SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (continued)

(XXIX) Fair value measurement

The Group measures the relevant assets and liabilities at fair value based on the following assumptions:

- The sales of assets or transfer of liabilities by the market participant on the measurement date belongs to the orderly transaction under the current market conditions.
- Such orderly transaction is carried out in the major market of relevant assets or liabilities. If the major market does not exist, it is assumed that such transaction is carried out in the market most beneficial to relevant assets or liabilities.
- The assumption used by the market participant in order to maximize the benefits at the time of pricing such assets or liabilities.

According to the property of the said transaction and the characteristic of the said assets or liabilities, the Group recognizes the transaction value as the fair value of initial recognition.

If other relevant accounting standards require or permit the Company to conduct initial measurement on the relevant assets or liabilities at the said fair value, and the transaction value is different from the fair value, the Company will include relevant gains or losses in the current profit or loss, unless otherwise specified in other relevant accounting standards.

For the measurement of non-financial assets at fair value, the capability of the market participant in bringing about economic interest via the best use of such assets, or the capability in selling such assets to the other market participant for bringing about economic interest with the best use of such assets should be taken into account.

The valuation techniques which are applicable to the current situation and have sufficient usable data and other information support are taken into account by the Group for the adoption of valuation technique. Relevant observable input values are preferentially adopted for valuation techniques, and the unobservable input values can be used only when the observable input values are unable or unpractical to be obtained.

III. SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (continued)

(XXIX) Fair value measurement (continued)

Input values used in the fair value measurement are divided into three levels:

- Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the Company can access on the measurement date.
- Level 2 input values refer to input values that are directly or indirectly observable for relevant assets or liabilities, other than Level 1 input values.
- Level 3 input values are unobservable input values for relevant assets or liabilities.

The fair value measurement is categorized in its entirety in the same level of the fair value hierarchy as the lowest level input that is significant to the entire measurement.

(XXX) Discontinued operations

A discontinued operation is a component that satisfies one of the following conditions and can be distinguished separately, and that component has been disposed of by the Company or classified by the Company as held for sale:

- (1) such component represents a separate major line of business or geographical area of operations;
- (2) such component is part of a single coordinated plan to dispose of a separate major line of business or geographical area of operations;
- (3) such component is a subsidiary acquired exclusively with a view to resale.

The profits or losses from continuing operations and discontinued operations are presented in the income statement, respectively. The profits or losses from discontinued operations such as impairment losses and reversed amounts, and the profits or losses of disposal shall be presented as the profits or losses from discontinued operations. For discontinued operations presented in the current period, the information originally presented as the profits or losses from continuing operations in the current financial statements shall be presented as the profits or losses from discontinued operations during comparable accounting periods again.

(XXXI) Segment reporting

The Company determines operating segments based on its internal organizational structure, management requirements and internal reporting system, and determines reportable segments and disclose segment information by operating segments.

The operating segments refer to the Company's components that simultaneously meet the following conditions: (1) the components can generate income and incur expenses in daily activities; (2) the Management of the Company can regularly evaluate the operating results of this component to decide the allocatable resources and assess its performance; (3) The Company can obtain relevant accounting information such as the financial positions, operating results and cash flows of this component. If two or more operating segments have similar economic characteristics and meet certain conditions, they can be merged into one operating segment.

(XXXII) Safety expense and maintenance expense

The Group provided for safety expense and maintenance expense according to the relevant regulations of the Notice on Printing and Distributing the "Administrative Measures for the Provision and Utilization of Safety production expenses" (Cai Zi [2022] No. 136), issued by the Ministry of Finance.

Provisions for safety production expenses and maintenance expense are included in the cost of related products or profit or loss of the current period and included in the "special reserve" account correspondingly.

When the provisions are utilized within the prescribed scope, if the expenditures are revenue in nature, those expenditures are offset directly against the special reserve; if the fixed assets are formed, the expenditures will be accumulated in "construction in progress" and transferred to fixed assets when the relevant safety project is completed and ready for its intended use. At the same time, the special reserve is reduced according to the cost of the fixed asset formed and the accumulated depreciation of the same amount is provided. The fixed asset will no longer be depreciated in future periods.

(XXXIII) Changes in significant accounting policies and accounting estimates

1. Changes in significant accounting policies

- (1) *The Company implemented the provisions of the Accounting Standards for Business Enterprises Interpretation No. 16: "The accounting treatment of the initial recognition exemption is not applicable to the deferred income tax related to assets and liabilities arising from a single transaction".*

On 30 November 2022, the Ministry of Finance issued the Accounting Standards for Business Enterprises Interpretation No. 16 (Cai Kuai [2022] No.31, hereinafter referred to as "**Interpretation No.16**"). "The accounting treatment of the initial recognition exemption is not applicable to the deferred income tax related to assets and liabilities arising from a single transaction" took effect from 1 January 2023.

Interpretation No. 16 stipulates that for a single transaction that is not a business combination, does not affect accounting profit or taxable income (or deductible losses) at the time of the transaction, and the assets and liabilities initially recognized result in equal amount of taxable temporary differences and deductible temporary differences (including a single transaction in which the lessee initially recognizes lease liabilities and includes in the right-of-use assets at the beginning of the lease term, and a single transaction in which the estimated liabilities are recognized and included in the cost of the relevant assets due to the existence of decommissioning obligations such as fixed assets), the exemption from the initial recognition of deferred income tax liabilities and deferred income tax assets shall not apply, and the enterprise shall, at the time of the transaction, recognize the corresponding deferred income tax liabilities and deferred income tax assets in accordance with the relevant provisions of Accounting Standards for Business Enterprises No. 18-Income Tax.

For individual transactions that occur between the beginning of the earliest period in which the financial statements are presented for the first time to the date of implementation and that apply the provisions, and the lease liabilities and right-of-use assets recognized due to the individual transactions that apply the provisions at the beginning of the earliest period in which the financial statements are presented, as well as the estimated liabilities related to the decommissioning obligations and the corresponding assets recognized, resulting in taxable temporary differences and deductible temporary differences, the enterprise shall make adjustments in accordance with the provisions.

(XVII) Goodwill (continued)

1. *Movement of goodwill (continued)*

The goodwill acquired in the business combination has been allocated to the mechanical design services asset group, namely the CIDEON Company asset group (including goodwill), for impairment testing. As at 31 December 2023, the Group assessed the recoverable amount of the asset group. The recoverable amount of the asset group was determined based on the present value of the estimated future cash flows of the asset group. The future cash flows were determined on the basis of financial budgets approved by the management for a five-year period. Key assumptions used in estimating future cash flows are:

Forecast period of the mechanical design services asset group: 2024-2028, with a discount rate of 9.61%;

Growth rate in the forecast period: 1.5-2%; net profit margin in the forecast period: 3.34%;

and growth rate of operating revenue in the stable period: 0%,

As at 31 December 2023, the CIDEON Company asset group was impaired by RMB78,879,632.06.

Total	289,791,440.82	183,148,936.83

2. Significant contract liabilities aged over one year

As of 31 December 2023, the Group had no significant contract liabilities aged over one year.

3. Amount and reasons for significant changes in carrying amount during the reporting period

The increase in the carrying amount of contract liabilities in the year was mainly due to the Group's receipt in advance for sales of goods in accordance with the contract with customers, and the decrease in contract liabilities in the Year was mainly due to the recognition of revenue based on the performance progress and the delivery of goods, which was then offset against the contract liabilities.

IX. RISKS RELATED TO FINANCIAL INSTRUMENTS

(I) Various risks arising from financial instruments

The Company is exposed to various financial risks in the course of its business: credit risk, liquidity risk and market risk (including foreign exchange risk, interest rate risk and other price risk). The risks associated with these financial instruments and the risk management policies adopted by the Company to reduce these risks are as follows:

The Board of Directors is responsible for planning and establishing the Company's risk management structure, formulating the Company's risk management policies and related guidelines, and supervising the implementation of risk management measures. The Company has developed risk management policies to identify and analyze the risks confronting the Company. These risk management policies clearly stipulate specific risks, covering many aspects such as market risk, credit risk and liquidity risk management. The Company regularly evaluates the market environment and changes in the Company's business activities to determine whether to update the risk management policy and system. The Company's risk management is carried out by the risk management committee in accordance with the policies approved by the Board of Directors. The risk management committee works closely with other business departments of the Company to identify, evaluate and avoid related risks. The internal audit department of the Company conducts regular audits on risk management control and procedures, and reports the audit results to the audit committee of the Company.

IX. RISKS RELATED TO FINANCIAL INSTRUMENTS (continued)

(I) Various risks arising from financial instruments (continued)

The Company diversifies the risk of financial instruments through appropriate diversified investment and business portfolios, and formulates corresponding risk management policies to reduce the risk of concentration in a single industry, specific region or specific counterparties.

1. Credit risk

Credit risk refers to the risk where the counterparty fails to discharge its obligation under the terms of the financial instrument and causes a financial loss to the Group.

The Company's credit risk mainly arises from cash and bank balances, bills receivable, accounts receivable, receivables at FVTOCI, contract assets, other receivables and financial guarantee contract, as well as the debt instrument investments and derivative financial assets at fair value through profit or loss that are not included in the impairment assessment etc.

The Group expects that there is no significant credit risk associated with cash and bank balances since they are deposited at state-owned banks and other medium or large-scale listed banks. The Company does not expect that there will be any significant losses from non-performance by these counterparties.

In addition, the Group has policies to limit the credit exposure on bills receivable, accounts receivable, receivables financing, contract assets and other receivables. The Group assesses the credit quality of and sets credit limits on its customers by taking into account their financial position, the availability of guarantee from third parties, their credit history and other factors such as current market conditions. In respect of customers with a poor credit history, the Group will use written payment reminders, or shorten or cancel credit periods, to ensure the overall credit risk of the Group is limited to a controllable extent.

2. Liquidity risk

Liquidity risk is the risk that an enterprise may encounter deficiency of funds in meeting obligations settled with cash or other financial assets delivery.

The Company's policy is to ensure it has sufficient cash to settle the debts when they fall due. The Company's finance department centralized control on liquidity risk. Through monitoring cash balance, readily realizable marketable securities and the rolling forecasts of cash flow for the next 12 months, the finance department will ensure it has sufficient funds to settle its debts under all reasonably foreseeable circumstances. while maintaining sufficient headroom on its undrawn committed borrowing facilities from major financial institutions so that the Group does not breach borrowing limits or covenants on any of its borrowing facilities to meet the short-term and long-term liquidity requirements.

IX. RISKS RELATED TO FINANCIAL INSTRUMENTS (continued)

(I) Various risks arising from financial instruments (continued)

3. Market risk

Market risk, including foreign exchange rate risk, interest rate risk and foreign currency risk, refers to the risk that the fair value or future cash flow of a financial instrument will fluctuate because of the changes in market price.

(1) Interest rate risk

Interest rate risk refers to the risks of fluctuation in the fair value or future cash flows of financial instruments due to changes in market interest rate.

Fixed-rate and floating-rate interest-bearing financial instruments expose the Company to fair value interest rate risk and cash flow interest rate risk, respectively. The Company determines the ratio of fixed-rate instruments to floating-rate instruments based on market conditions and maintains an appropriate mix of fixed-rate and floating-rate instruments through regular review and monitoring. When necessary, the Company uses interest rate swap instruments to hedge interest rate risk.

As at 31 December 2023 and 31 December 2022, the Group did not have any balance of interest-bearing borrowings.

(2) Exchange rate risk

Exchange rate risk refers to the risk that fair value or future cash flows of financial instruments fluctuate due to variations in foreign exchange rate.

The Company continuously monitors the scale of foreign currency transactions and foreign currency assets and liabilities to minimize its exposure to foreign exchange risks. In addition, the Company may enter into forward foreign exchange contracts or currency swap contracts to avoid exchange rate risks. During the current period and the previous period, the Company did not enter into any forward foreign exchange contracts or currency swap contracts.

NOTES TO FINANCIAL STATEMENTS

IX. RISKS RELATED TO FINANCIAL INSTRUMENTS (continued)

(I) Various risks arising from financial instruments (continued)

3. Market risk (continued)

(2) Exchange rate risk (continued)

The exchange rate risk the Company is exposed to mainly arises from financial assets and financial liabilities denominated in US dollars or Euro. The foreign currency financial assets and liabilities held by the Group were converted to RMB as follows:

The exchange rate risk the Company is exposed to mainly arises from financial assets and financial liabilities denominated in Euro. The foreign currency financial assets and liabilities held by the Group were converted to RMB as follows:

Item	Closing balance			Closing balance for the previous year		
	Euro	Other foreign currencies	Total	Euro	Other foreign currencies	Total

IX. RISKS RELATED TO FINANCIAL INSTRUMENTS (continued)

(I) Various risks arising from financial instruments (continued)

3. Market risk (continued)

(3) Other price risks

Other price risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices other than exchange rate risk and interest rate risk.

The Company's other price risk arises primarily from investments in various types of equity instruments, which are subject to the risk of changes in the price of equity instruments.

As at 31 December 2023, with all other variables held constant, if the value of the equity instruments increases or decreases by 0.5%, the Company's net profit and other comprehensive income will increase or decrease by RMB0 and RMB1,513,144.50, respectively. The management believes that 0.5% reasonably reflects the reasonable range of possible fluctuation of the value of equity instruments in the upcoming year.

X. DISCLOSURE OF FAIR VALUE

Input values used in the fair value measurement are divided into three levels:

Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the Company can access on the measurement date.

Level 2 input values refer to input values that are directly or indirectly observable for relevant assets or liabilities, other than Level 1 input values.

Level 3 input values are unobservable input values for relevant assets or liabilities.

The fair value measurement is categorized in its entirety in the same level of the fair value hierarchy as the lowest level input that is significant to the entire measurement.

NOTES TO FINANCIAL STATEMENTS

(Amounts expressed in RMB unless otherwise specified)

X. DISCLOSURE OF FAIR VALUE (continued)

(II) Basis for determining the market price of recurring and non-recurring level 1 fair value measurement items

The Group's other investments in equity instruments measured at level 1 fair value at the end of the period are publicly issued shares of Zhuzhou CRRC Times Electric Co., Ltd. held by the Company not for short-term trading, and the fair value at the end of the period represents the share price as of 31 December 2023.

(III) Valuation techniques used in and the qualitative and quantitative information of key parameters for recurring and non-recurring level 2 fair value measurement items

The receivables financing measured at the level 2 fair value held by the Company are notes receivable. The discounted cash flow method is used to determine the fair value, and the discount rate of bank acceptance bills for the same period is used as the discount rate.

XIV. CAPITAL MANAGEMENT

The primary objectives of the Company's capital management are:

- to ensure the Company's abilities of going concern, therefore, the Company can provide continued returns to shareholders and other stakeholders.
- pricing the products and services according to the risk level, so as to provide sufficient returns to shareholders.

The Company has set a capital amount that is proportional to the risk. The capital structure is adjusted according to the change of economic environment and the risk characteristics of the target assets. In order to maintain or adjust the capital structure, the Company may adjust the amounts of dividends paid to shareholders, the capital returned to shareholders, otherwise, issue new shares or sell assets to reduce liabilities.

The Group monitors capital using a gearing ratio, which is net debt divided by the adjusted capital plus net debt. Net debt includes net amount of bills payable, accounts payable and other payables minus cash. Capital refers to capital attributable to shareholders of the parent. The Group's gearing ratio at each balance sheet date was as follows:

	Closing balance	Closing balance for the previous year
Total debts	3,182,554,086.83	2,658,751,627.45

XV. OTHER IMPORTANT MATTERS

(I) Correction of accounting errors in prior period

During the reporting period, there was no correction of prior accounting errors.

(II) Segment information

1. Financial information of reportable segments

The Group is mainly engaged in the manufacture of products in the large-scale railway track maintenance machinery industry and the provision of related services. The management determines the reporting segments based on the Group's internal organizational structure, management requirements and internal reporting system, under which, the management decides to allocate resources and evaluate the performance. Relevant internal reports are disclosed in accordance with the accounting policies and measurement basis used when reporting to the management, and such accounting policies and measurement basis are consistent with those used for the preparation of these financial statements. Since the resource allocation and performance evaluation of the Group are based on the overall operation of the manufacture of large-scale railway track maintenance machinery and equipment and the provision of related services, which is also the only operating segment reported internally by the Group, no segment reporting information is presented separately.
