The Group has commenced an assessment of the impact of these new and amended standards and interpretations issued but is not yet in a position to state whether they would have significant impacts on its results of operations and financial position.

#### 4. ESTIMATES

The preparation of interim condensed consolidated financial information requires management to make judgements, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets and liabilities, income and expense. Actual results may differ from these estimates.

In preparing this interim condensed consolidated financial information, the significant judgements made by management in applying the Group's accounting policies and the key sources of estimation uncertainty were the same as those that applied to the Group's annual financial statements as at 31 December 2024.

#### 5. FINANCIAL RISK MANAGEMENT AND FINANCIAL INSTRUMENTS

##### (a) Financial risk factors

The Group's activities expose it to a variety of financial risks: market risk (including foreign exchange risk, fair value and cash flow interest risk), credit risk and liquidity risk.

The interim condensed consolidated financial information does not include all financial risk management information and disclosures required in the annual financial statements, and should be read in conjunction with the Group's annual financial statements as at 31 December 2024.

There have been no changes in the risk management policies since 31 December 2024.

##### (b) Fair value estimation

The carrying value of all financial assets less impairment provision are assumed to approximate their fair values. The fair value of financial liabilities for disclosure purposes is estimated by discounting the future contractual cash flows at the current market interest rate that is available to the Group for similar financial instruments.

## INTERIM REPORT

### 5. FINANCIAL RISK MANAGEMENT AND FINANCIAL INSTRUMENTS (CONTINUED)

#### (b) Fair value estimation (Continued)

The financial instruments measured at fair value are disclosed by the following measurement hierarchy:

- (i) Quoted prices (unadjusted) in active markets for identical assets or liabilities (level 1).
- (ii) Inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices) (level 2).
- (iii) Inputs for the asset or liability that are not based on observable market data (that is, unobservable inputs) (level 3).

At the end of the reporting period, listed investment classified as financial assets at fair value through profit or loss, derivative financial instruments and unlisted investment classified as financial assets at fair value through other comprehensive income that are measured at fair value are classified under level 1, level 2 and level 3 respectively.

There were no transfers between levels 1, 2 and 3 during the period.

### 5. FINANCIAL RISK MANAGEMENT AND FINANCIAL INSTRUMENTS (CONTINUED)

#### (b) Fair value estimation (Continued)

##### (i) Financial instruments in level 1

The fair value of financial instruments traded in active markets is based on quoted market prices at the balance sheet date. A market is regarded as active if quoted prices are readily and regularly available from an exchange, dealer, broker, industry group, pricing service, or regulatory agency, and those prices represent actual and regularly occurring market transactions on an arm's length basis. The quoted market price used for financial assets held by the Group is the current bid price. These instruments are included in level 1.

##### (ii) Financial instruments in level 2

The fair value of financial instruments that are not traded in an active market (for example, over-the-counter derivatives) is determined by using valuation techniques. These valuation techniques maximise the use of observable market data where it is available and rely as little as possible on entity specific estimates. If all significant inputs required to fair value an instrument are observable, the instrument is included in level 2.

All the resulting fair value estimates of the Group's forward foreign currency contracts are included in level 2.

## INTERIM REPORT

### 5. FINANCIAL RISK MANAGEMENT AND FINANCIAL INSTRUMENTS (CONTINUED)

#### (b) Fair value estimation (Continued)

##### (iii) Financial instruments in level 3

If one or more of the significant inputs is not based on observable market data, the instrument is included in level 3.

Specific valuation techniques used to value financial instruments include:

- Quoted market prices or dealer quotes for similar instruments.
- The fair value of forward foreign exchange contracts is determined using forward exchange rates at the balance sheet date, with the resulting value discounted back to present value.
- Other techniques, such as discounted cash flow analysis, are used to determine fair value for the remaining financial instruments.

All the resulting fair value estimates of the Group's unlisted investment are included in level 3.

There were no other changes in valuation techniques during the period.

### 6. SEGMENT INFORMATION

The Chief Operation Decision-Maker ("CODM") has been identified as directors of the Company. The CODM reviews the Group's internal reporting in order to assess performance and allocate resources. It determined the operating segments based on these reports. The Group is currently organised into two operating segments – Trading and Distribution and OEM Manufacturing. These segments are the basis on which the Group reports its principal activities information.

## MANAGEMENT DISCUSSION AND ANALYSIS

### INTERIM DIVIDEND

The Board of Directors resolved not to recommend any interim dividend for the six months ended 30 June 2025 (2024: HK\$ nil).

### BUSINESS REVIEW

The Group's turnover for the first half of 2025 amounted to HK\$1.8 billion, representing an increase of approximately 8.6% compared to the corresponding period last year. For the first half of 2025, the Group recorded a net loss attributable to owners of the Company of HK\$11.0 million, a significant improvement from the net loss attributable to owners of the Company of HK\$84.1 million in the same period last year. This positive outcome was primarily driven by the strong performance of the Trading and Distribution Division, strategic response to persistent geopolitical headwinds and the prevailing volatility in the global economic landscape within the OEM Manufacturing Division, as well as a reduction in net financing costs attributable to lower interest expenses on bank borrowings amid an overall decrease in interest rates.

The turnover of the Group's Trading and Distribution Division for the first half of 2025 was HK\$0.9 billion, representing an increase of approximately 25.7% compared to the same period last year. This was mainly due to increased demand for products distributed by the Trading and Distribution Division's subsidiaries in both Taiwan and the PRC, as the customers sought to expand inventory levels and increase capital expenditure. As a result, the Trading and Distribution Division achieved an operating profit of HK\$69.1 million as compared to an operating profit of HK\$14.5 million for the corresponding period last year.

## MANAGEMENT DISCUSSION AND ANALYSIS

The turnover of the Group's OEM Manufacturing Division slightly decreased by approximately 4.2% to HK\$0.88 billion for the first half of 2025 compared to the same period last year. The OEM Manufacturing Division's operating loss was reduced to HK\$58.5 million for the first half of 2025 as compared to an operating loss of HK\$84.7 million for the corresponding period last year. This was primarily attributable to persistent geopolitical headwinds and continued volatility in the global economic landscape, which collectively impacted market sentiment and demand across key regions. The reduction in operating loss was largely driven by the effective implementation of its operational cost reduction plan and ongoing initiatives to enhance operational efficiency.

### FINANCE

The Group has committed bank and other financing facilities totaling HK\$2,580 million, of which HK\$775 million was drawn down on 30 June 2025. As at 30 June 2025, the Group's consolidated net borrowings amounted to HK\$116 million and its total equity amounted to HK\$1,472 million, resulting in a net gearing ratio of 7.9%. The net gearing ratio was calculated as net debt divided by total equity. Net debt is calculated as total bank borrowings and lease liabilities less cash and cash equivalents and short-term bank deposits.

Most of the Group's sales were conducted in the same currencies as the corresponding purchase transactions. Foreign exchange contracts were used to hedge exposures where necessary.

### CAPITAL STRUCTURE

The Group's capital structure consists of bank borrowings, cash and cash equivalents, short-term bank deposits and equity attributable to owners of the Company, comprising issued share capital and reserves.

## MANAGEMENT DISCUSSION AND ANALYSIS

### HUMAN RESOURCES

As of 30 June 2025, the Group had a total of 3,428 employees, of whom 175 were based in Hong Kong, 2,446 in the PRC and 807 overseas. The remuneration of the Group's employees is mainly based on their performance and experience, taking into account current industry practices. Provident fund scheme, medical allowances, and in-house and external training programs are available to employees. Share options and discretionary bonuses may be provided to employees according to the performance of the individual and the Group. The remuneration policy and package of the Group's employees are regularly reviewed.

### PROSPECTS

Despite the uncertain economic outlook shaped by ongoing global geopolitical tensions and evolving monetary policies, demand for products distributed by the Trading and Distribution Division is expected to remain largely stable throughout the second half of 2025. This outlook is based on current business inquiries and planned dispatch timelines associated with customer orders driven, which are driven by production capacity expansion initiatives.

The OEM Manufacturing Division anticipates a moderate increase in turnover during the second half of 2025, compared to the first half of the year. This growth is underpinned by the continued scaling of production at the OEM Manufacturing Division's manufacturing facility in Mexico, which is progressing toward higher operational efficiency. This anticipated increase in throughput is expected to improve fixed cost absorption and enhance overall cost effectiveness. Furthermore, the OEM Manufacturing Division remains focused on executing cost reduction measures aimed at boosting labor productivity and minimizing indirect overhead expenses.

Looking ahead, the Group will continue to uphold its long-term sustainable strategy by reinforcing strategic resilience and maintaining close alignment with evolving customer needs. Building on previous initiatives, the Group is committed to further reducing overall operational costs through active streamlining of underperforming business units and optimizing internal resources to maximize efficiency.
