VOLUNTARY ANNOUNCEMENT LATEST DEVELOPMENTS REGARDING STRATEGIC COOPERATION WITH XINJIANG AIRPORT GROUP

This announcement is made by UISEE Technologies (Beijing) Co., Ltd. (the “**Company**”, together with its subsidiaries, the “**Group**”) on a voluntary basis.

The Company is pleased to announce that, owing to the excellent operational performance and technical reliability of its pre-project autonomous tractors and autonomous buses, the Company has recently successfully won another bid for ten autonomous buses and six unmanned delivery vehicles from Xinjiang Airport Group Co., Ltd., which will further expand the presence of the Group’s autonomous driving services in the airport and improve the intelligent ground transportation network of the airport.

In March this year, UISEE Technologies (Beijing) Co., Ltd. signed a strategic cooperation agreement with Xinjiang Airport Group Co., Ltd. Since the implementation of the strategic cooperation, the parties have achieved significant milestones. The official launch of the autonomous buses marked the entry of the airport’s intelligent passenger shuttle system into a phase of large-scale implementation, and realized the breakthrough of UISEE Technologies from driverless cargo and baggage transportation to passenger connection at Urumqi Tianshan International Airport.

Since the first batch of UISEE Technologies’ driverless tractor fleets were officially put into operation at Urumqi Tianshan International Airport, the total operating mileage of more than 60 autonomous tractors and autonomous buses in unmanned driving operations at the airport has exceeded 1 million kilometers. The operating hours, cargo and baggage transportation volume have also increased significantly, continuously demonstrating the stability and reliability of UISEE Technologies’ all-scenario autonomous driving technology in the complex environment of civil aviation.

Through this deepened cooperation with Xinjiang Airport Group Co., Ltd., both parties will jointly establish a close and stable cooperative relationship to advance the implantation of autonomous vehicles in civil aviation business scenarios and market expansion, realize resource sharing and complementary strengths, promote the expansion and development of both parties' businesses and products, support market expansion to stabilize market value, and achieve measurable and sustainable collaborative outcomes.

By order of the Board
UISEE Technologies (Beijing) Co., Ltd.
Mr. Wu Gansha
Chairman and Executive Director
