VOLUNTARY ANNOUNCEMENT

AWARDED SECOND PRIZE OF THE STATE SCIENCE AND TECHNOLOGY PROGRESS AWARD

This announcement is made by EACON Group Co., Ltd (the "**Company**") to provide the shareholders and potential investors of the Company with the latest information on the business development of the Company.

The board of directors (the "**Board**") of the Company is pleased to announce that the project titled "Key Technologies and Applications for Green, Intelligent, Safe and Efficient Mining of Large-Scale Open-Pit Mines", which the Company participated in completing as the second completing entity, was awarded the Second Prize of the State Science and Technology Progress Award. The Company is one of the award-winning entities of the project and was presented with the State Science and Technology Progress Award certificate issued by the Central Committee of the Communist Party of China and the State Council of the People's Republic of China on July 8, 2026.

The State Science and Technology Awards are the highest-level government science and technology awards in the field of science and technology in the People's Republic of China, and are intended to reward organizations and individuals that have made outstanding contributions in science and technology advancement activities. Among them, the State Science and Technology Progress Award is principally granted to scientific and technological achievements that have achieved significant results in technological innovation, transformation of scientific and technological achievements and promotion and application, and have generated significant economic or social benefits. This award fully demonstrates that the Company's technological innovation capabilities and industry influence in the fields of mine intelligence and autonomous driving have received national-level recognition.

The project made major breakthroughs in three core technologies, namely multi-factor ecological overall optimization of open-pit mines, large-scale autonomous driving fleet control, and precise prevention and control of landslide disasters, realizing coordinated mining that is optimized, ecological, intelligent, safe and efficient. The achievement has provided new methods, new technologies and new equipment for the development of mineral resources in China, and has promoted China's open-pit mining technology and industry to realize a leap from following, to keeping pace, and then to leading.

The Board hereby states that the technological achievements involved in the award-winning project are closely related to the Company's core product – mining autonomous driving solutions, covering key technological areas such as autonomous driving perception, decision-making and control, intelligent dispatching and safety management. The Company has disclosed in its prospectus the core technologies, research and development capabilities and technological achievements related to mining autonomous driving solutions.

The Board believes that this award reflects national-level recognition of the Company's relevant technological strengths and innovation capabilities, which will help enhance the Company's brand awareness, market competitiveness and industry influence, and will have a positive impact on the Company's future business development.

Shareholders and potential investors of the Company are advised to exercise caution when dealing in the securities of the Company.

By order of the Board
EACON Group Co., Ltd
Lan Shuisheng
