## CHARACTERISTICS OF GEM (“GEM”) OF THE STOCK EXCHANGE OF HONG KONG LIMITED (THE “STOCK EXCHANGE”)

GEM has been positioned as a market designed to accommodate small and mid-sized companies to which a higher investment risk may be attached than other companies listed on the Stock Exchange. Prospective investors should be aware of the potential risks of investing in such companies and should make the decision to invest only after due and careful consideration.

Given that the companies listed on GEM are generally small and mid-sized companies, there is a risk that securities traded on GEM may be more susceptible to high market volatility than securities traded on the Main Board of the Stock Exchange and no assurance is given that there will be a liquid market in the securities traded on GEM.

Hong Kong Exchanges and Clearing Limited and the Stock Exchange take no responsibility for the contents of this report, make no representation as to its accuracy or completeness and expressly disclaim any liability whatsoever for any loss howsoever arising from or in reliance upon the whole or any part of the contents of this report.

This report, for which the board (the “**Board**”) of directors (the “**Directors**”) of Niche-Tech Semiconductor Materials Limited (the “**Company**”) collectively and individually accept full responsibility, includes particulars given in compliance with the Rules Governing the Listing of Securities on GEM (the “**GEM Listing Rules**”) for the purpose of giving information with regard to the Company and its subsidiaries (together, the “**Group**”). ## MANAGEMENT DISCUSSION AND ANALYSIS

### BUSINESS REVIEW

The Group is an established semiconductor packaging materials manufacturer specializing in the development, manufacture, and sales of the bonding wire and encapsulant with headquarters in Hong Kong and production facilities in Shantou, the PRC.

During the three months ended 31 March 2023 (the “**Period**”), the Group continued to sell its products directly to more than 600 customers, including renowned manufacturers of LEDs, camera modules, and ICs primarily in the PRC. During the Period, the Group’s sales and gross profit decreased by approximately 20.5% and 22.5%, respectively against the corresponding period of 2022. The main reason for such decrease was due to the relaxation of COVID-19 control measures and restrictions in the PRC which led to an outbreak of COVID-19 during the Period.

During the Period, the Group has continued to focus on the innovation of materials for advanced semiconductors which could be applied to Insulated Gate Bipolar Transistor (“**IGBT**”), Mini-LED, artificial intelligence and 5G industries.

### FINANCIAL OVERVIEW

#### Revenue

The Group’s revenue principally represented income derived from its main products, namely bonding wire and encapsulant. During the Period, the Group recorded a revenue of approximately HK\$46.7 million, decreased by 20.5% from approximately HK\$58.7 million during the three months ended 31 March 2022. The revenue of bonding wire products recorded a decrease of 13.2% to approximately HK\$25.5 million (three months ended 31 March 2022: approximately HK\$29.4 million) while the revenue of encapsulant products recorded a decrease of 27.0% to approximately HK\$19.5 million (three months ended 31 March 2022: approximately HK\$26.7 million). Due to the relaxation of COVID-19 controls and restrictions at the end of December 2022, the virus spread rapidly across the country and economic activity was affected by the soaring number of infections in late December 2022 and early January 2023.

## MANAGEMENT DISCUSSION AND ANALYSIS

### Cost of sales and gross profit

The Group's cost of sales mainly comprised direct material costs, direct labour costs and manufacturing overhead. During the Period, the Group's cost of sales decreased by 19.7% to approximately HK\$34.9 million (three months ended 31 March 2022: approximately HK\$43.4 million), which was in line with the decrease in revenue for the Period. The gross profit of the Group decreased by 22.5% to approximately HK\$11.8 million for the Period (three months ended 31 March 2022: approximately HK\$15.3 million). Gross profit margin slightly decreased to approximately 25.3% for the Period (three months ended 31 March 2022: 26.0%).

### Other income, other gains and losses

Other income, other gains and losses mainly comprised government subsidy income and net foreign exchange gains or loss. The Group recorded a net gain of approximately HK\$0.8 million during the Period (three months ended 31 March 2022: approximately HK\$0.4 million).

### Expenses

Selling and distribution expenses decreased by 41.2% to approximately HK\$2.6 million for the Period (three months ended 31 March 2022: approximately HK\$4.5 million). The decrease was mainly due to: (i) the decrease in shipment cost as a result of decrease in sales volume; and (ii) the decrease in sales commission paid due to the decrease in sales revenue.

Administrative expenses for the Period decreased by approximately HK\$0.6 million to approximately HK\$6.9 million (three months ended 31 March 2022: approximately HK\$7.5 million).

### Profit and other comprehensive income for the period

Summing up the combined effects of the foregoing, profit attributable to owners of the Company for the Period was approximately HK\$1.5 million (three months ended 31 March 2022: approximately HK\$2.1 million). The earnings before interest, taxes, depreciation of plant and equipment and amortization of intangible assets for the Period were approximately HK\$7.4 million (three months ended 31 March 2022: approximately HK\$8.3 million).

## MANAGEMENT DISCUSSION AND ANALYSIS

### FUTURE STRATEGIES AND PROSPECTS

Stepping into second quarter of 2023, along with the relaxation of COVID-19 control measures and economic recovery measures in China and other countries, the global market is expected to recover progressively. However, in view of the after-effects of the pandemic and the complex political issues amongst several countries, the Group expects the global macro-economy to remain volatile in the coming months. Amid the uncertainties in global economy, the Group remains cautiously optimistic of the industry and the Group's future development.

According to Precedence Research, the growth rate of the global semiconductor material market is expected to reach 6.3% in 2023, and the overall scale will reach a record high of US\$485.8 billion. As a reputable technology-focused manufacturer, the Group is well-equipped with the capabilities of keeping abreast of the latest industry trend through continuous R&D capabilities.

As for the PRC market, the demand of semiconductors is expected to recover gradually, and the market will progressively adapt to the new normal of minimising the relentless impact of pandemic, due to the PRC government encouraging policies to boost economic growth. Therefore, the market's demand for bonding wires and encapsulants is expected to grow in the coming years. The Directors are optimistic about the long-term prospects of the industry and the Group's future development. The Group will launch three series of new products of Die Attach Adhesive, namely Non-conductive Epoxy Based Adhesive, Non-conductive Silicon Based Adhesive and Electrical Conductive Silver Adhesive for LED applications as scheduled, and will extend the product application to cover other semiconductors and the 5G industry after formulary modification to seize opportunities arising from the growing 5G industry. Besides, the Group has developed a new copper alloy bonding wire specially for the Power IC and IGBT products, which has been tried and accredited by top customers in the PRC. One of the top ten PRC Semiconductor Power IC companies has placed orders for heavy copper alloy bonding wire with the Company. The new products are expected to contribute to the Group's revenue in the coming years.

With the rapidly growing 5G networks, the Group is investing more resources in developing upstream packaging materials for the 5G sector, which is likely to be another driver of growth for the Group. Nevertheless, the COVID-19 crisis still exists, and the international situation is also filled with uncertainty.

## MANAGEMENT DISCUSSION AND ANALYSIS

Under this challenging and unstable economic climate, the Group will continue to carry out its proven business strategies and expand its customer base by delivering high-quality and advanced products to meet their changing needs. As for the mini-LED display, the Group will continue the development of and/or seek for new technologies to provide our customers with more enhanced products to meet customer demands for enhancing their competitiveness. The Group is also considering expanding its customer base from commercial application to home application products. The expanded application will not only cover commercial applications such as LED display screens in airport and shopping malls, but will also include domestic electronic applications. Meanwhile, the Group will take various cost control actions and adopt flexible business approaches, in order to improve the economic efficiency of the Group and sustain its long-term business growth.
