CHARACTERISTICS OF THE GEM OF THE STOCK EXCHANGE OF HONG KONG LIMITED (THE “STOCK EXCHANGE”)

GEM has been positioned as a market designed to accommodate small and mid-sized companies to which a higher investment risk may be attached than other companies listed on the Stock Exchange. Prospective investors should be aware of the potential risks of investing in such companies and should make the decision to invest only after due and careful consideration.

Given that the companies listed on the GEM are generally small and mid-sized companies, there is a risk that securities traded on the GEM may be more susceptible to high market volatility than securities traded on the Main Board of the Stock Exchange and no assurance is given that there will be a liquid market in the securities traded on the GEM.

Hong Kong Exchanges and Clearing Limited and the Stock Exchange take no responsibility for the contents of this interim report, make no representation as to its accuracy or completeness and expressly disclaim any liability whatsoever for any loss howsoever arising from or in reliance upon the whole or any part of the contents of this interim report.

Hanvey Group Holdings Limited (the “**Company**”), and its subsidiaries (collectively refer to as the “**Group**”) are principally engaged in the design and development, manufacturing and distribution of watch products on original design manufacturing (“**ODM**”) basis for watch manufacturers, brand owners and watch importers across the globe.

The Group derives revenue mainly from the sale of: (i) finished watches, (ii) semi-knocked-down kit, and (iii) watch parts, and provision of assembly services relating to sales of finished watches.

For the six months ended 30 June 2025 (the “**Period**”), the Group’s revenue amounted to approximately HK\$54.06 million, increased by approximately 4.34% when compared with that of the corresponding period in 2024.

The Hong Kong Trade Development Council (“**HKTDC**”) used to conduct a survey every quarter, which involves interviewing 500 local exporters from six major industries that include machinery, electronics, jewellery, watches and clocks, toys and clothing to gauge their business confidence on near-term export prospects. According to the HKTDC’s research entitled “HKTDC Export Confidence Index 2Q25: Exporter Confidence Weakens Amid US Tariff Uncertainties” dated 18 June 2025, the HKTDC Export Index (the “**Index**”) dropped from 51.6 in the second quarter of 2024 (“**2Q24**”) to 49.6 in the second quarter of 2025 (“**2Q25**”).

For 2Q25, the findings of the HKTDC Export Confidence Index indicate a significantly improved current performance, as well as a more optimistic business outlook overall. Reassuringly, all of this is underpinned by rising sales, new orders, higher prices and a likely increase in procurement activity. In the timepieces sector the index increased to 52.1 (up 10.8) in 2Q25 from 41.3 in 2Q24.

The Group will continue to adopt a prudent approach, and continue exercising stringent control over operating costs, aiming to enhance operating efficiency and improve profitability.

PROSPECTS

Looking ahead, the business environment in overseas markets remains uncertain, The risk of an economic slowdown or recession in overseas markets and the China-US tariff “trade war” was at its height, and this downbeat outcome was largely expected. Subsequent to the US imposing a 145% tariff on Chinese goods and Mainland China retaliating with 125% tariffs on US goods, a more moderate mood prevailed following the 12 May China-US joint statement committing the parties to working toward a bilateral trade deal.

On 11 June, the two nations agreed on a mutual trade agreement framework in London, although further details have yet to be confirmed. The outcome of this, as well as ongoing developments, will, no doubt, be reflected in the 3Q25 Index figures.

The watch industry faces challenges such as technological innovation, diverse consumer demands, and intensified market competition. At the same time, the solid position of traditional mechanical watches in the luxury market present great opportunities for the industry. With the Group continuing to invest in high-tech development and personalized services, the watch industry is expected to maintain steady growth in the future while further solidifying its commercial value.

For overseas markets, economic growth in Europe and the United States is projected to slow down due to the negative market outlook under high inflation. However, in the Southeast Asian market that we focus on, there is still a huge market demand of automatic mechanical watch and quartz watch. The Group will closely observe the market trend and provide designs that suit the customers and market needs.

Management Discussion and Analysis
