#### 1. GENERAL

The Company is incorporated in the Cayman Islands as an exempted company with limited liability and its shares are listed on The Stock Exchange of Hong Kong Limited.

The Group is engaged in the manufacture and sale of rare earth products, refractory products and fluorescent products.

# 2. ADOPTION OF STATEMENTS OF STANDARD ACCOUNTING PRACTICE/CHANGES IN ACCOUNTING POLICIES

In the current year, the Group has adopted, for the first time, a number of new and revised Statements of Standard Accounting Practice ("SSAPs") issued by the Hong Kong Society of Accountants. The adoption of these SSAPs has resulted in a change in the format of presentation of the consolidated cash flow statement and the consolidated statement of changes in equity, but has had no material effect on the results for the current or prior accounting years. Accordingly, no prior year adjustment has been required.

#### Cash flow statements

In the current year, the Group has adopted SSAP 15 (Revised) "Cash Flow Statements". Under SSAP 15 (Revised), cash flows are classified under three headings – operating, investing and financing, rather than the previous five headings. Interest received, interest paid and dividends paid, which were previously presented under a separate heading, are classified as investing and financing cash flows respectively. Cash flows arising from taxes on income are classified as operating activities, unless they can be separately identified with investing or financing activities.

# 2. ADOPTION OF STATEMENTS OF STANDARD ACCOUNTING PRACTICE/CHANGES IN ACCOUNTING POLICIES (Continued)

#### **Employee benefits**

In the current year, the Group has adopted SSAP 34 "Employee benefits" which introduces measurement rules for employee benefits including retirement benefit plans. #### 3. PRINCIPAL ACCOUNTING POLICIES

The financial statements have been prepared under the historical cost convention and have been prepared in accordance with accounting principles generally accepted in Hong Kong. The principal accounting policies adopted are set out below:

#### (a) Basis of consolidation

#### 3. 主要會計政策(續)

#### (b) 物業、廠房及設備

物業、廠房及設備的折舊及攤銷乃根據以下年折舊率按其由全面運作之日期起估計其可供使用之年數並計及其估計餘值,以直線法攤銷其成本值或估值:

| 樓宇       | 5%  |
|----------|-----|
| 機器及設備    | 10% |
| 辦公室設備及裝置 | 20% |
| 汽車       | 20% |

#### 3. PRINCIPAL ACCOUNTING POLICIES (Continued)

#### (b) Property, plant and equipment

Property, plant and equipment are stated at cost or valuation less accumulated depreciation, amortisation and impairment losses.

Certain buildings are stated in the balance sheet at their revalued amount, being the fair value at the date of revaluation less any subsequent accumulated depreciation and any subsequent impairment losses. Revaluation is performed with sufficient regularity such that the carrying amount does not differ materially from that which would be determined using fair values at the balance sheet date.

Any revaluation increase arising on revaluation of buildings is credited to the revaluation reserve, except to the extent that it reverses a revaluation decrease of the same asset previously recognised as an expense, in which case the increase is credited to the income statement to the extent of the decrease previously charged. A decrease in net carrying amount arising on revaluation of an asset is dealt with as an expense to the extent that it exceeds the balance, if any, on the revaluation reserve relating to a previous revaluation of that asset. On the subsequent sale or retirement of a revalued asset, the attributable revaluation surplus is transferred to accumulated profits.

Depreciation and amortisation is provided to write off the cost or valuation of items of property, plant and equipment, over their estimated useful lives and after taking into account their estimated residual values, using the straight-line method, at the following rates per annum:

| Buildings                     | 5%  |
|-------------------------------|-----|
| Machinery and equipment       | 10% |
| Office equipment and fixtures | 20% |
| Motor vehicles                | 20% |

A reversal of impairment loss is recognised as income immediately.

#### (f) Inventories

Inventories are stated at the lower of cost and net realisable value. Cost is calculated using the weighted average method.

#### (g) Provisions

Provision is recognised when an enterprise has a present obligation (legal or constructive) as a result of a past event and it is probable (i.e. more likely than not) that an outflow of resources embodying economic benefits will be required to settle the obligation, and a reliable estimate can be made on the amount of the obligation. Provisions are reviewed at each balance sheet date and adjusted to reflect the current best estimate. Where the effect of the time value of money is material, the amount of provision is the present value of the expenditure expected to be required to settle the obligation.

#### (h) Accounts and other receivables

Accounts and other receivables are stated at cost, after provision for bad and doubtful debts.

#### (k) Taxation

The charge for taxation is based on the results for the year as adjusted for items which are non-assessable or disallowed. Timing differences arise from the recognition for tax purposes of certain items of income and expense in a different accounting period from that in which they are recognised in the financial statements. The tax effect of the timing differences, computed using the liability method, is recognised as deferred taxation in the financial statements to the extent that it is probable that a liability or an asset will crystallise in the foreseeable future.

In accordance with the relevant tax laws enacted in the PRC, all the companies of the Group established in the PRC are subject to value-added tax ("VAT"). This principal indirect tax is levied on the sales of goods and provision of certain specified services (known as "Output VAT"). Output VAT is recovered from customers with sales proceeds and is calculated at 17% or 13% of the selling price. The net VAT payable of the Group represents Output VAT minus the VAT paid on purchases of goods and certain specified services (known as "Input VAT").

Segment revenue, expenses, assets and liabilities are determined before intercompany balances and transactions within the Group are eliminated as part of the consolidation process, except to the extent that such intercompany balances and transactions are between Group enterprises within a single segment. Inter-segment pricing is based on similar terms as to those charged to external parties.
