China Agrotech Holdings Limited responded to the call of the Ministry of Agriculture and the Ministry of Science and Technology in relation to “the year of agriculture and technology” in 2003. To serve the homeland, the Group, by upholding its mission of “agriculture-oriented with technology coming first” whilst committing itself in the transformation of technology into physical production, from interdisciplinary collaboration in research and development of bio-agricultural products to specialised agricultural resources production; from provision of information of green agricultural resources networks and standardised management to provision of plant protection technology system services; from the promotion of results of agricultural production technology development to agricultural technological experts training, etc...China Agrotech Holdings Limited has been applying agricultural technologies in various aspects, such as agricultural resources research and development, agricultural resources production, agricultural resources circulation, plant protection services and overall agricultural production processes. The Group has, along the production line, successfully promoted the transformation of agricultural outcomes, upgraded the professional expertise of people engaging in agricultural services and agricultural producers’ standards in terms of technology application. The Group also provides relevant materials and technical support, so as to ensure the production of safe agricultural products. All these measures contributed to an improvement in the quality of agricultural produces in many aspects in the Mainland China.
