7 RISK MANAGEMENT (continued)

(a) Credit risk management (continued)

The Group recognises that sound credit risk management is essential to business growth and maximisation of the return on Group's resources employed. The management has laid down credit policies in forms of Credit Manual and other policy papers, which formulate the necessary credit risk management process to identify, measure, monitor and control risks inherent in the operation of various lending business. This process ensures prudence in lending and enables potential problems to be detected and tackled as early as practicable, thereby minimising business loss.

High-level credit policies of the Group are set, reviewed and constantly updated by the Credit Committee, the General Management Committee, and the Board to take balanced accounts of the dynamic market situation, regulatory development, the Group's usual prudent lending practices and the latest business strategies. They also review the efficiency of credit approval processes and delegate credit approval authorities.

Contained in the Credit Manual is also the credit approval matrix for sanctioning lending propositions. To uphold a high degree of professionalism in the exercise of credit approval authorities, credit approvers are selected by Credit Committee with level of authority commensurate with the individual credit officer's area of responsibilities, exposure and experience level. To maintain objectivity and balance, the Group adopts a "dual approval" system whereby credit proposition generally requires joint-approval by at least two credit approvers or otherwise requires approval by Credit Committee.

Credit Risk Management Department is the centralised department in the Group mandated to carry out credit policies. The department performs independent credit assessment, post-approval credit administration and other credit control functions to ensure that the credit process complies with credit policies and guidelines laid down by the Management. Apart from the independent credit assessment and matrix approval process, regular credit audits are conducted on specific loan portfolio or operating units in the credit process. To maintain its independence, Credit Risk Management has a direct reporting line to Risk Management Department, which in turn reports to a Deputy General Manager independent of business.

7 RISK MANAGEMENT (continued)

(a) Credit risk management (continued)

The management spares no efforts in monitoring the quality and behavior of the loan portfolio. The Group's internal credit risks grading system was first introduced in the the last quarter of 2000 to track the health of the Group's loan portfolio. The grading system expands beyond HKMA's standard 5-grades system and incorporates a 15-tier classification system by weighing borrowers' financial, management, ownership, industrial and other characteristics. With internal data being constantly enriched through years of experience, it is expected that the Group could make further use of statistics in the internal credit risk grading system to profile and track down credit risk migration and to measure loan default probabilities etc.

(b) Liquidity risk management

Liquidity risk is the risk that the Group cannot meet its financial obligations as and when they fall due. Liquidity risk management is therefore to ensure that there is adequate cash flows to meet all financial obligations in both normal and contingency circumstances in a costeffective manner whereas at the same time complies with all regulatory requirements. To manage liquidity risk, the Group has established the Asset and Liquidity Management Policy which is reviewed by the Group's Asset and Liability Management Committee (the "ALCO") and approved by the Board of Directors. Liquidity is also managed and forecasted on a daily basis to enable Treasury and Markets Department and ALCO to react proactively according to fluctuations in market conditions and implement contingency plans on a timely basis. The Group continues to explore and diversify funding channels to capitalise on opportunities for the Group's business expansion. The elevation of the Group's profile, being a member of ICBC Group, has created more rooms and capabilities in liquidity management. During the year, the Group issued HK\$2,926,000,000 and US\$440,000,000 certificates of deposit to secure longer term funding.

The liquidity position remained strong throughout the year of 2003 with average liquidity ratio at 41.3% (2002: 35.9%), which was well above the statutory requirement of 25%.

7 RISK MANAGEMENT (continued)

The Group's adjusted Tier 1 and total capital adequacy ratios were 9.7% and 16.7%, respectively at 31st December 2003.

(d) Market risk management

Market risk is the risk that market rates and prices on assets, liabilities and off-balance sheet positions change, thus causing profits or losses. Generally, the Group's market risk is associated with its positions in foreign exchange, debt securities, equity securities and derivatives in the trading book. Most off-balance sheet derivative positions arise from the execution of customer-related orders and positions taken to hedge other elements of the trading book.

Market risk exposure for different types of transactions is managed within risk limits and guidelines approved by the ALCO. Exposures are measured and monitored on the basis of limits like outstanding positions and stoploss amounts. General risk monitoring is carried out by an independent Middle Office Department, which ensures all trading activities are executed within approved limits. The Group's market risk exposures are reviewed by the ALCO, to which all exceptions to limits are reported. Internal Audit also performs regular review and testing to ensure compliance with all internal guidelines.

(e) Interest rate risk management

Interest rate risk is the risk that the Group's position may be adversely affected by a change in market interest rates. The Group's interest rate risk arises mainly from the timing differences in the maturity mismatch and repricing of interest bearing assets and liabilities.

The Group manages its interest rate risk by way of entering into on-balance sheet and off-balance sheet interest rate hedging instruments. The strategy is continually reviewed by the ALCO based on market and interest rate conditions.

(f) Foreign exchange risk management

Foreign exchange risk is the risk that the net exposure positions in foreign currencies will adversely affect the Group as a result of a change in exchange rates. The Group has very limited foreign exchange exposure as there are various limits on foreign exchange positions. The foreign exchange positions are managed by Treasury and Markets Department within established limits approved by the ALCO.

Foreign currency funding used to fund Hong Kong dollar assets is normally hedged using currency swaps or forward exchange contracts to mitigate the foreign exchange risk.

(g) Operational risk management

Operational risk is the risk of unexpected financial losses attributable to human error, fraud, unauthorised activities, system failure and natural disaster. It is inherent to every business organisation and covers a wide spectrum of issues. Such risk is mitigated through the implementation of comprehensive internal control system, adequate insurance cover, offshore computer back-up sites and thorough contingency plans with periodic drills. Internal Audit also plays an important role in detecting any deviations from operating procedures and identifying weaknesses at all operating levels independently and objectively.

(h) Legal and compliance risk management

Legal and compliance risk is the prospective risk arising from unenforceable contracts and violations of, or nonconformance with, laws and regulations. Over the past year, the Group took significant steps to further enhance controls regarding legal and compliance risk. The Legal & Compliance Department was established in November 2001 to handle relevant legal and compliance issues concerning the Group. With the issuance of Compliance Policy and monthly Compliance Bulletin, together with the provision of regular compliance training, all staff is kept abreast of the latest legal and regulatory developments. The Legal & Compliance Department also performs compliance checking and provides advice on new products and corporate issues to ensure compliance in all aspects.
