

Corporate profile

3

Xiamen International Port Co., Ltd (“Xiamen Port Co” or the “Company”) and its subsidiaries (collectively referred to as the “Group”) is the largest port terminal operator in Xiamen, PRC. It is also the only company providing full scale ancillary value-added port services in Xiamen. The Group is principally engaged in container loading and unloading and storage for international and domestic trade, bulk/general cargo loading and unloading and ancillary value-added port services, including port-related logistics, tugboat services, shipping agency and tallying in Xiamen. The Group operates two international container terminals, namely the Hai Tian container terminal and XICT container terminal. In the Dongdu terminal, the Group also provide services for container loading and unloading in respect of domestic trade and bulk/general cargo loading and unloading in respect of both international and domestic trade. The Group currently operates an aggregate of 13 berths, capable of accommodating the largest container vessels. Shipping routes have been developed from the container terminals to Europe, United States, the Mediterranean, Australia, Southeast Asia and Japan. The container terminals are also connected to major domestic shipping routes. The facilities within the port area and the container storage facilities (including warehouses and stacking yards) outside the port area take up an aggregate area of approximately 1.4 million square meters and 0.3 million square meters respectively.
