#### 1. 緒言

二零零七年的中國經濟仍然保持高速增長,雖然面臨通脹壓力持續加大的問題,但依然呈現出增長較快、結構優化、效益提高、民生改善這樣一種良好的局面。國內消費市場空前活躍,增速加快,隨著居民收入水平的不斷提高和消費意識的不斷加強,城鄉居民消費結構快速升級。

由於本集團所需的主要原材料如麵粉、 棕櫚油、PET粒子等價格仍然不斷上漲, 給集團的成本壓力依然很大,減少了利 潤成長的空間。但面對這些壓力,在保 證食品安全和滿足消費者需求的前提 下,本集團採取優化管理體系、精進生 產管理及有效控制成本的策略,業績報 續創新高至3,215,404千美元,較去年同 期上升37.9%;股東應佔溢利同比上升 30.8%至194,837千美元,每股盈利為 3.49美仙均續創新高。

#### 1. Introduction

China's economy in the year 2007 continued to be on the fast track. Although the increasing inflation pressure remained a great concern for the economy, the growth was one of the fastest years in its recent economic history and its economic structure, efficiency and the well-being of the people were improved. Domestic consumption bloomed and accelerated. Average income level and spending power continued to get better, resulting in the enhancement of urban and rural consumption patterns.

Capitalizing on the booming economy, the Group actively innovated its products and incessantly explored and opened up new markets. While steadfastly securing Master Kong's leading position in both instant noodle and ready-to-drink ("RTD") tea products, we managed to leapfrog to the number one position in bottled water by market share. The results of our bakery business segment turned into profit, thanks to the new strategy. The refrigeration segment also made its strategic adjustment to cope with the changing market conditions. Thanks to the strenuous work of our various business segments, the Group's turnover achieved a new high and performed outstandingly. Hence we are confident and filled with hope that our future business will continue to thrive.

Prices of the Group main raw materials such as flour, palm oil and PET resin continued to rise, putting tremendous pressure on the Group's production costs and profitability. At the same time having to set our priorities on food safety standard and consumer satisfaction, the Group adopted a strategy that had improved its management system, refined its production management and effectively controlled its costs. Thus, our business results achieved another new high. For the year 2007, the Group's total turnover amounted to a new high of US\$3,215.404 million, up 37.9% from the previous year. This results in profit attributable to equity holders of US\$194.837 million, up 30.8% from that of a year ago. Earnings per share was US3.49 cent.

#### 2. 股息

本集團二零零七年整體表現卓越,於評估 整體管理營運、資本投資、營運資金及現 金流量後,本人建議董事局增加末期股息 之金額,以感謝股東們對本集團的支持。 因此,董事局將於二零零八年六月二日舉 行之股東大會上,建議派付末期股息每股 1.62美仙於二零零八年六月二日名列本公 司股東名冊上之本公司股東,(即於二零 零八年五月二十六日或以前買進本公司股 票及於二零零八年五月二十八日下午四時 三十分之前辦理股票過戶登記手續之股 東),末期派息總額為90,537千美元;連 同已於二零零八年三月十四日派發每股 1.07美仙的特別股息,二零零七年度每股 將共獲派股息2.69美仙,總派息額將為 150,336千美元。去年之末期股息分別為 每股1.38美仙及1.07美仙,總派息額為 136,923千美元。

#### 2. Dividend

Owing to the Group's 2007 excellent results and considerating the overall operation, capital expenditures, working capital requirements and cash flow of the Group, I recommend to the Board to provide a return to our shareholders for their support by increasing the final dividend payout this year. The Board will recommend at the Annual General Meeting to be held on 2 June 2008 the payment of a final dividend of US1.62 cents per share totaling US\$90.537 million to shareholders whose names appear on the register of members on 2 June 2008 (shareholders who bought the Company's shares on or before 26 May 2008 should ensure that transfers are lodged with the Company's Registrar in Hong Kong for registration no later than 4:30 p.m. on 28 May 2008). Together with the USI.07 cents special dividend per share which was paid on 14 March 2008, total dividend per share for the year 2007 will be US2.69 cents and total amount of dividend will be US\$150.336 million. Final dividend and special dividend in last year was US1.38 cents and US1.07 cents respectively. The total amount of dividend in last year was US\$136.923 million.

#### 3. 產業規劃

中國市場機會多,但競爭也隨著市場機會的增多而越來越激烈,居民消費結構的不斷調整以及中國城鄉差別越來越小的趨勢表明,農村市場將是未來盈利增加的最主要陣地,集團也將在廣闊的農村市場不斷拓展,繼續精耕細作的策略,不斷提升康師傅產品在三級市場的市場佔有率。

結合集團現有資源,本集團將繼續發揮自身優勢,堅守方便麵、飲品和糕期以配合顧難略,適時不可以,以配合顧難。如此,以配合顧難。如此,以配合顧難,以可以不可以,以可以不可以,以可以,以可以,以與實力。未來,本集團的人。,以與實力。未來,本集團的人。,以與實力。未來,本集團的人。,以與實現「全球最大中式方便食力,以與實現「全球最大中式方便食力,以與實現「全球最大中式方便食力,以與實別,以與實別,是數品集團」的目標。

#### 3. Industry Planning

There are always opportunities in China's market but competitions also become keener. Consumers' practices continued to adjust and the difference between the consumers in urban and rural areas has narrowed. The market in the rural areas will contribute to our profit increase. In view of this, the Group has never stopped developing its business in this very broad and spread-out market but worked intensely to increase the market shares of Master Kong's products.

By consolidating its existing resources, the Group will endeavor to leverage on its own edge to carry out its development strategies that are specially formulated for its instant noodle, beverage and bakery businesses. We will time the market with product flavors that meet market needs. Through product innovation, we enhance product vitality. While the Group will continue to expand with a rapid pace, it will at the same time actively enhance management quality and zealously develop the market. Thus, the Group will not only be expanded but also be robust. Therefore our competitive edge will become our strength. Going forward the Group will further strengthen the leading positions of Master Kong's various products in China's market. Hinging on our best competitive edge, we will grab market shares to solidify our objective of becoming "the biggest Group for Chinese Instant Food and Beverage in the World".

With a leading position in China's food industry, Master Kong has always endeavored to identify delicacies from all places and studied the eating and drinking habits of consumers in China. We innovate and improve our products in order to come up with the right tastes. With its strength, Master Kong is now forging a grand blueprint that will merge delicacies from all parts of China into one that will make Master Kong a kingdom of food that represents the culture of Chinese delicacies. According to the December 2007 report published by ACNielsen based on sales, the Group had market shares of 47.0%, 51.9% and 15.4% for instant noodle products, RTD tea products and bottled water products respectively. The value of the "Master Kong" branding has hence increased from US\$412 million in 2006 to US\$726 million in 2007 — an increase of 76%. The performance that Master Kong demonstrated in 2007 has laid a solid foundation for the betterment of our future prosperity.

#### 5. Quality Assurance

It has all along been the Group's belief that food safety is of essence to an enterprise. Hence we have incessantly pursued higher and higher standards for product quality. All manufacturing plants within the Group have been awarded ISO 9001 certification, Food Safety Management System QS certification and the "C" mark certification for the exempting from measurement inspection. In the meantime, we have aimed to become a big international food product manufacturer. 2007 was the year that the Group continued to actively participate in evaluating programs that rate food safety credibility. We continued to invest in advanced testing and inspection instruments in order to enhance our standard of quality inspection. We strongly believe that food safety concerns the well being of consumers and the survival of an enterprise and commitment to food safety standards is our social responsibility.

#### 6. 社會貢獻

實現「永續經營」打造「百年企業」是集團上 下的共同願景,我們在做好企業的同時, 從來沒有忘卻及時回饋社會的責任,以樹 立良好的企業形象。二零零七年我們持續 支持中國體育事業,並連續第六年冠名 「康師傅」足球隊,贊助天津泰達足球俱樂 部,而天津康師傅足球隊也不負眾望,獲 得了「2007年中國足球超級聯賽」第六名 的好成績。此外,我們亦積極參加了「希 望工程」等一系列救助貧困兒童的活動, 還積極參與了南方罕見雪災的救助工作, 此舉不但拉近了我們與消費者之間的距 離,而且更增強了「康師傅」品牌的美譽 度。

#### 6. Social Contribution

It has been the Group's concerted will to achieve an "everlasting operation" and to forge a "centennial enterprise". We also actively participated in a series of activities that help children in poverty, such as the "Project of Hope". #### **Instant Noodle Business**

The rising raw material costs worldwide have affected the development of manufacturing industries in China. With the high prices of palm oil

The Group's mainstream noodle flavor — the "Hong Shao Niu Rou Mian (soy-braised beef flavor noodle)" — has gained wide popularity among consumers throughout China. Other

series of flavors such as the "Xiang La Niu Rou (Spicy Beef)", the "La Xuan Feng (Spicy Whirlwind)", the "Hai Lu Xian Hui (The Mixed Taste of Sea and Land Foods)", etc. have successfully established their image as trendy delicacies. New flavors rolled out to meet the tastes of various consumers in different locations included "Ben Bang Shao", "You Po La Zi", "Lao Hou Jing Soup". Also launched simultaneously were the "Lao Hou Sheng Yang" series of flavors. Concerning auxiliary brands, the launch of "Shimianbafan Gan Ban Mian" further solidified Master Kong's leading position in the rapidly growing mixed fried noodle market segment. "Mianba La Mian" has effectively satisfied consumers who crave for quality noodle. "Jin Shuang La Mian" and "Hao Zi Wei" have made their foray in the medium/low-end market segments. Thus, through the careful planning of product introductions, our noodle business flourished.

在平價麵市場,我們以福滿多為主要品牌經 營。超級福滿多與「五月天」攜手,全面唱響 「年輕就要對味」,吸引年輕人市場。金牌福 滿多全力打造金牛品牌。在二/三/四級市 場投入福滿多一碗香及福滿多公司品牌產 品。在乾脆麵市場,推出福香脆大塊包,提 升品牌附加價值。通過精進優化的產品佈 局,有效帶動本集團在平價麵市場的成長。

In the low price noodle market segment, we have made "Fumanduo" a primary brand. The "Super Fumanduo" aims to attract young consumers while the "Gold Mark Fumanduo" forges the "Jin Niu (Taurus)" brand. For the 2nd/3rd/4th level markets we launched the "Fumanduo Yi Wan Xiang" and the "Fumanduo" corporate brand products. In the dry and crispy segment, the "Fu Xiang Cui Da Kuai Bao" was launched to increase the brand's added value. Thus, the improved and refined product introductions has worked to grow the Group's low price market.

根據ACNielsen 二零零七年十 二月最新的零研數據顯示,「康 師傅」方便麵銷售量與銷售額的 市場佔有率分別為34.5%及 47.0%,其中高價容器麵銷售 額的佔有率為66%,高價袋面 銷售額的佔有率是66%,穩居 市場領先地位十餘年。

在生產方面,透過高效率工廠 的建設,以及導入TPM、5S等 改善活動對現有工廠的生產力

進行優化,使生產效率有效提升,緩解因原 物料及薪資上漲所帶來的生產成本壓力。

According to December 2007's latest survey carried out by ACNielsen on retails, Master Kong's sales volume and turnover of instant noodles respectively shared 34.5% and 47.0% of the market, among which noodles with high-end containers represented 66% of the market turnover and high-end packet noodles shared 66% of the market turnover, steadfastly securing the leading position for more than ten years.

The construction of higher efficiency manufacturing plants as well as the adoption of the TPM and 5S improvement tools have improved

productivity effectively and increased production efficiency, thus alleviated the pressure on production costs from the rising raw material prices and labor cost.

本集團之方便麵業務仍然維持快速成長,在產 品有味、品牌有利及服務有質的策略下,依靠 提升產品價值、優化產品組合、通路精耕細 作、建設高效率工廠、推動TPM等生產優化活 動,以及強化管理機制等手段,有效地因應環 境挑戰,掌握環境機遇,使本集團持續穩固方 便麵市場的領導地位。

二零零七年方便麵業務的銷售額為1,488,086 千美元,較去年同期上升41.5%,佔本集團總 營業額的46.3%;雖然方便麵主要原材料棕櫚 油及麵粉價格在第四季度分別較去年同期上升 66%及10%,期內(1)本集團高毛利的容器麵 及高價袋麵的銷售額達到45.5%的成長,(2)透 過精進生產效率有效控制生產成本,及(3)年 內適時調整銷售價格,令本集團方便麵業務全 年的毛利率僅較去年下降1.3個百分點至 25.4%;銷售毛利則較去年上升34.7%。本公 司股東應佔溢利較去年同期上升了26.6%至 94,167千美元。

The Group's instant noodle business continued to grow rapidly thanks to the good taste, the edge of brand image and quality service. By gearing up its product value, perfecting its product mix, intensively cultivating its distribution channels, building higher efficiency production plants, promoting activities such as TPM that fine tune production, and strengthening management mechanism, the Group has effectively coped with the challenging environment and grasped the opportunities, to be the leader in the instant noodle market.

In 2007, turnover for instant noodle business amounted to US\$1,488.086 million, grew by 41.5% from previous year and represented 46.3% of the Group's total turnover. Although the price of main raw material of palm oil and flour increased 66% and 10% respectively in the fourth quarter, during the year, the gross margin of instant noodle only decreased by 1.3ppt. to 25.4% and gross profit increased by 34.7% compared with last year. The performance was mainly because of: (1) the adjustment on products mix, thus sales value for high-end container noodles and highend packet noodles have grown by 45.5%; (2) the effective control of operating costs through enhancement of production efficiency; and (3) the agile pricing mechanism. Profit attributable to equity holders of instant noodle business was US\$94.167 million, grew by 26.6%.

In 2007, the Group's RTD tea series maintained their leading positions in the non-carbonated beverage market. While simultaneously forging a tea specialist image, we incorporated some trendy elements — the new bottle shape for green tea, new packing, the deployment of the hot balloon activity to create public attention, activating brand image and the intense communication with consumers — to effectively build a further lead over major competitors. The flagship Master Kong ice tea was used as the basis for vigorous brand promotion activities including using music as a mean to expand the ice tea market and maintain its dominating leading position.

Through the allocation of resources, narrowing the distance between the production and the target market locations and the rapid expansion of our distribution network, our bottled water made its vigorous penetration in the market. "Fresh and natural" mineralized water has been well recognised and liked by the mass consumers.

The competition in the fruit juice market turned out to be even keener. In pursuit of trendy life style, nutrition and health are the main considerations of the young consumers. With this in mind, we have selected a celebrity - Liang Jing Ru, whose image is healthy, trendy and

The rapid growth of China's economy has resulted in rapid urbanization. Consumption structure is upgrading. Hence, the market for domestic consumption remains to be of great potential. In 2007, the food and beverage industry sustained its long-term growth. Mergers and acquisitions, food safety and the Olympic Game became the hot topics. This year we are going to have the 2008 Olympic Game while 2010 will be the year for World Expo in China. These events will put China in the international limelight. To grasp this opportunity, we will increase our investment and actively expand our production capacities in beverages and instant noodles. We will also review our noncore business investment in order to rationalize the allocation of our existing resources. Competitive products will be further explored in order to strengthen the Group's operations.

### **Auditors' responsibility** (Continued)

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on our judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, we consider internal control relevant to the Group's preparation and true and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control. An audit also includes evaluating the appropriateness of accounting polices used and the reasonableness of accounting estimates made by the directors, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

## **Opinion**

In our opinion the consolidated financial statements give a true and fair view of the state of the Group's affairs as at 31 December 2007 and of its profit and cash flows for the year then ended in accordance with Hong Kong Financial Reporting Standards and have been properly prepared in accordance with the disclosure requirements of the Hong Kong Companies Ordinance.

#### 金融資產減值

於各結算日,本集團均會評估是否 有客觀證據證明金融資產(按公允價 值列賬及在損益賬處理的金融資產 除外)出現減值現象。金融資產之減 值虧損按攤銷成本列賬, 並以資產 之賬面值與其按金融資產之原有實 際利率折算之預期未來現金流之現 值間之差異計算。金融資產的減值 虧損於收益表中確認。

就按成本列賬之可供出售金融資產 而言,減值虧損金額乃按金融資產 之賬面值與按類似金融資產之現有 市場回報率折算之預計未來現金流 現值間之差異計算。其相關減值虧 損不可撥回。

### 有息借貸及應付賬款

所有貸款及借款(包括貿易及其他應 付款項)最初按成本列賬,即按已收 代價扣除交易成本之公允價值確 認。其後以實際利率計算攤銷成本 列賬,如折現影響並不重大,按成 本列賬。

### (i) Financial instruments (Continued)

Impairment of financial assets

At each balance sheet date, the Group assesses whether there is objective evidence that financial assets, other than those at fair value through profit or loss, are impaired. The impairment loss of financial assets carried at amortised cost is measured as the difference between the assets' carrying amount and the present value of estimated future cash flow discounted at the financial asset's original effective interest rate. The impairment loss is recognised in the income statement.

For an available-for-sale financial asset that is carried at cost, the amount of impairment loss is measured as the difference between the carrying amount of the financial asset and the present value of estimated future cash flows discounted at the current market rate of return for a similar financial asset. Such impairment loss shall not be reversed.

Interest-bearing borrowings and payables

All loans and borrowings include trade and other payables are initially recognised at cost, being the fair value of the consideration received, net of transaction costs incurred. Loans and borrowings are subsequently measured at amoritsed cost using effective interest method, unless the effect of discounting would be insignificant, in which case they are stated at cost.

### (j) Cash equivalents

For the purpose of the consolidated cash flow statement, cash equivalents represent short-term highly liquid investments which are readily convertible into known amounts of cash and which are subject to an insignificant risk of changes in value, net of overdraft, if any.

### (k) Revenue recognition

Revenue is recognised when it is probable that the economic benefits will flow to the Group and when the revenue and costs, if applicable, can be measured reliably.

Sale of goods is recognised on transfer of risks and rewards of ownership, which generally coincides with the time when the goods are delivered to customers and title has been passed.

### (I) Foreign currency translation

Items included in the financial statements of each of the Group's entities, including the Company, subsidiaries and associates, are measured using the currency of the primary economic environment in which the entity operates ("functional currency"). The consolidated financial statements are presented in United States Dollars (US\$), which is the Company's presentation currency.

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in the income statement.

- (a) 於各資產負債表呈列的資產及 負債乃按有關結算日的收市滙 率換算;

(I) Foreign currency translation (Continued)

On consolidation, the results and financial position of all the group entities that have a functional currency different from the presentation currency are translated as follows:

- (a) assets and liabilities for each balance sheet presented are translated at the closing rate at the date of that balance sheet:
- (b) income and expenses for each income statement are translated at average exchange rates;
- (c) all resulting exchange differences are recognised as a separate component of equity.

#### (m) Inventories

Inventories are stated at the lower of cost and net realisable value. Cost, which comprises all costs of purchase and, where applicable, costs of conversion and other costs that have been incurred in bringing the inventories to their present location and condition, is calculated using the weighted average cost method. Net realisable value represents the estimated selling price in the ordinary course of business less the estimated costs necessary to make the sale.

#### (n) 非金融資產的減值

倘本集團估計某項資產或即賺取現 金單位之可收回金額低於其賬面 值,則該項資產之賬面值須減低至 其可收回價值。減值虧損將即時確 認為開支。

倘若某項減值虧損期後撤回,則該 項資產或即賺取現金單位之賬面值 須增加至重新估計之可收回價值, 惟增加後之賬面值不得超過在以往 年度並無減值虧損而釐定之賬面 值。若減值虧損撤回時將即時確認 為收益。

#### (o) 借貸成本資本化

### 4. Principal Accounting Policies (Continued)

#### (n) Impairment of non-financial assets

At each balance sheet date, the Group reviews internal and external sources of information to determine whether the carrying amounts of its property, plant and equipment, lease premium for land, and intangible assets have suffered an impairment loss or impairment loss previously recognised no longer exists or may be reduced. If any such indication exists, the recoverable amount of the asset is estimated, based on the higher of its fair value less costs to sell and value in use. Where it is not possible to estimate the recoverable amount of an individual asset, the Group estimates the recoverable amount of the smallest group of assets that generates cash flows independently (i.e. a cash-generating unit).

If the recoverable amount of an asset or a cash-generating unit is estimated to be less than its carrying amount, the carrying amount of the asset or cash-generating unit is reduced to its recoverable amount. Impairment losses are recognised as an expense immediately.

A reversal of impairment losses is limited to the carrying amount of the asset or cash-generating unit that would have been determined had no impairment loss been recognised in prior years. Reversal of impairment losses is recognised as income immediately.

### (o) Capitalisation of borrowing costs

Borrowing costs incurred, net of any investment income on the temporary investment of the specific borrowings, that are directly attributable to the acquisition, construction or production of qualifying assets, i.e. assets that necessarily take a substantial period of time to get ready for their intended use or sale, are capitalised as part of the cost of those assets. Capitalisation of such borrowing costs ceases when the assets are substantially ready for their intended use or sale. All other borrowing costs are recognised as an expense in the period in which they are incurred.

### 4. Principal Accounting Policies (Continued)

#### (p) Operating leases

Leases where substantially all the risks and rewards of ownership of assets remain with the lessor are accounted for as operating leases. Rentals payable and receivable under operating leases are recognised as an expense and revenue on the straight-line basis over the lease term. Lease incentives received are recognised in the income statement as an integral part of the net consideration agreed for the use of the leased asset. Contingent rentals are recognised as expenses in the accounting period in which they are incurred.

#### (q) Government grants

Government grants represent incentive grants from the relevant PRC authorities in respect of the running of business by the Group in certain development zones and to encourage the furtherance of such business. Government grants are recognised at their fair value where there is reasonable assurance that the grants will be received and all attached conditions will be complied with.

Where the grant relates to an asset, the fair value is credited to a deferred income account and is released to the income statement over the expected useful life of the relevant asset by equal annual instalments. Government grants other than those related to assets are recognised as other income in the income statement to match the related costs on a systematic basis.

#### (r) Employee benefits

#### Defined contribution plans

The obligations for contributions to defined contribution retirement scheme are recognised as an expense in the income statement as incurred and are reduced by contributions forfeited by those employees who leave the scheme prior to vesting fully in the contributions. The assets of the scheme are held separately from those of the Group in an independently administered fund.

#### Defined benefit plans

The defined benefit plans are generally funded by payments from employees and the Group, taking into account of the recommendations of the independent qualified actuaries using the projected unit credit method. The Group's obligation in respect of defined benefit plans is calculated separately for each plan by estimating the amount of future benefit that employees have earned in return for their services in the current and prior periods, which is discounted to the present value and reduced by the fair value of any plan assets.

The amount recognised in the balance sheet represents the present value of the defined benefit obligation as adjusted for unrecognised actuarial gains and losses and unrecognised past service cost, and reduced by the fair value of plan assets. Any asset resulting from this calculation is limited to the net total of any cumulative unrecognised net actuarial losses and past service costs, plus the present value of any future refunds from the plan or reductions in future contributions to the plan. If there is no change or a decrease in the present value of the economic benefits, the entire net actuarial gains or losses with the past service cost of the current period is recognised immediately.

#### (s) 税項

税項支出乃根據本年度業績就免課 税或不可扣減項目作調整並按於結 算日已制定或實際會制定之税率作 出計算。

遞延税項乃採用負債法,就資產與 負債之税項計算準則與其於賬目之 賬面值兩者不同引致之短暫時差作 出全數撥備。然而,倘若遞延税項 資產和負債乃自進行交易時不影響 會計或應課税溢利的資產或負債的 初始確認(如屬業務合併的一部份則 除外),則不會計入遞延税項。

#### 4. Principal Accounting Policies (Continued)

#### (r) Employee benefits (Continued)

Defined benefit plans (Continued)

Actuarial gains and losses arising from experience adjustments and changes in actuarial assumptions, which exceed 10% of the greater of the present value of the Group's defined benefit obligations and the fair value of plan assets are amortised over the expected average remaining working lives of the participating employees. Past service cost is recognised immediately to the extent that the benefits are already vested and otherwise is amortised on a straight-line basis over the average period until the benefits become vested.

#### (s) Taxation

The charge for current income tax is based on the results for the year as adjusted for items that are non-assessable or disallowed. It is calculated using tax rates that have been enacted or substantively enacted by the balance sheet date.

Deferred tax is provided, using the liability method, on all temporary differences at the balance sheet date between the tax bases of assets and liabilities and their carrying amounts in the financial statements. However, if the deferred tax arises from initial recognition of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither the accounting profit nor taxable profit or loss, it is not accounted for.

The deferred tax liabilities and assets are measured at the tax rates that are expected to apply to the period when the asset is recovered or the liability is settled, based on tax rates and tax laws that have been enacted or substantively enacted at the balance sheet date. Deferred tax assets are recognised to the extent that it is probable that future taxable profit will be available against which the deductible temporary differences, tax losses and credits can be utilised.

#### (u) Segment reporting

A segment is a distinguishable component of the Group that is engaged either in providing products or services (business segment), or in providing products or services with a particular economic environment (geographical segment), which is subject to risks and rewards that are different from those of other segments.

In accordance with the Group's internal financial reporting system, the Group has chosen business segment information as the primary reporting format and geographical segment information as the secondary reporting format for the purposes of these financial statements.

Segment revenue, expenses, results, assets and liabilities include items directly attributable to a segment as well as those that can be allocated on a reasonable basis to that segment. For example, segment assets may include inventories, trade receivables and property, plant and equipment. Segment revenue, expenses, assets and liabilities are determined before intra-group balances and intra-group transactions are eliminated as part of the consolidation process. Inter-segment pricing are principally on a cost plus basis.

Segment capital expenditure is the total cost incurred during the year to acquire segment assets (both tangible and intangible) that are expected to be used for more than one period.

Unallocated items mainly comprise interest-bearing borrowings, tax balances, corporate and financing expenses.

### 使用年限及物業、機器及設備之減值 (續)

為了判斷資產是否減值及有跡象顯示減 值虧損不再存在,董事須判斷資產減 值,尤其是評估:(1)是否已發生可能影 響資產價值之事件或其事件影響資產價 值不再存在;(2)按持續使用資產之業務 而估計未來之現金流量經折算後之淨現 值能否支持該項資產之賬面值;以及(3) 使用適當的主要假設於預計現金流量, 包括是否應用適當折現率於該等現金流 量預測。倘改變管理層用以確定減值程 度之假設,包括現金流量預測中採用之 折現率或增長率假設,足以對減值測試 中使用的淨現值產生重大影響。

#### 可供出售金融資產減值

### 6. Critical Accounting Estimates and Judgements (Continued)

### Useful lives and impairment of property, plant and equipment (Continued)

In determining whether an asset is impaired or the event previously causing the impairment no longer exists, the directors have to exercise judgement in the area of asset impairment, particularly in assessing: (1) whether an event has occurred that may affect the asset value or such event affecting the asset value has not been in existence; (2) whether the carrying value of an asset can be supported by the net present value of future cash flows which are estimated based upon the continued use of the asset or derecognition; and (3) the appropriate key assumptions to be applied in preparing cash flow projections including whether these cash flow projections are discounted using an appropriate rate. Changing the assumptions selected by management to determine the level of impairment, including the discount rates or the growth rate assumptions in the cash flow projections, could materially affect the net present value used in the impairment test.

#### Impairment of available-for-sale financial assets

The directors assess at each balance sheet date whether there is any objective evidence that available-for-sale financial assets is impaired. In determining whether an investment in an equity instrument is impaired, the directors uses their experienced judgement to assess information about significant changes with an adverse effect that have taken place in the economic environment in which the invested company operates which indicates that the cost of the equity investment may not be recovered.

### 33.資本管理

本集團管理資本的目標是保障本集團能 夠持續經營,從而為股東提供回報及其 他利益相關者提供利益。

本集團根據經濟狀況的改變,透過有效 地運用債務及平衡股東權益,積極地定 期檢討及管理資本架構。此外,本集團 也會考慮市場上現行的借款利率、日後 的資本開支及投資機會。本集團此管理 政策與二零零六年一致。

本集團透過負債資產比率來監控資本(包括各項權益),負債資產比率的計算方法 是以淨負債作為本集團股東溢利的比 率。

### 32. Related Party Transactions (Continued)

As of 31 December 2007, an associate and the holding companies of a minority shareholder of subsidiaries of the Company have provided guarantees to the Group's bankers for US\$4,320,000 and US\$17,530,000 respectively (2006: US\$7,050,000 and US\$83,568,000) for securing banking facilities granted to the Group.

### 33. Capital Management

The Group's objectives when managing capital are to safeguard the Group's ability to continue as a going concern in order to provide returns for shareholders and benefits for other stakeholders.

The Group actively and regularly reviews and manages its capital structure through the optimization of the debt and equity balance and makes adjustments to capital structure according to changes in economic conditions for achieving its objectives. Changing of borrowing rate in the market, future capital expenditures and investment opportunities are taken into consideration. The Group's strategy remains unchanged from 2006.

The Group monitors its capital, which comprises all equity components, using a gearing ratio which is calculated on the basis of net debt as a ratio of the Group's shareholders equity.

截至二零零七年十二月三十一日止年度 For the year ended 31 December 2007

### 34.金融風險因素

本集團經營活動面臨市場風險(包括外滙風險、價格風險和利率風險)、信貸風險和流動資金風險。為降低本集團金融風險,董事會採用一系列保守的風險管理對策。董事會檢討並同意採用風險管理對策如下:

#### 外滙風險

本集團的功能貨幣為人民幣,因多數之交易也在中國發生。本集團向海外供應 商購買機器、原材料和部份之銀行借貸 也以外幣結算。本集團在適當時候採用 外匯合約以降底外匯風險。

於二零零六年十二月三十一日及二零零七年十二月三十一日,本集團以外幣(主要為美元及歐元)計值的銀行結餘及借款詳情載於附註24及26。

於結算日,本集團管理層對於外幣匯率在可預見的未來的變動情況作出謹慎的預測,預期歐元將繼續走強,在未來的一年內,歐元/人民幣將下降約4%(2006:上升4%),而美元/人民幣預期下降約11%(2006:7%)。倘所有其他變量保持不變,此預計之利率變動將會影響本集團之本年度溢利及保留溢利增加約 美元 6,130,000(2006:美元6,631,000)。

#### 股票價格風險

本集團持有之買賣投資及可供出售金融 資產分別以公允價值及原值扣除減值虧 損計量。故本集團面臨股本價格風險。 管理層持續監察市場狀況及被投資公司 財務狀況的變動以管理此風險。於結算 日,本集團並無股票價格風險。

### 34. Financial Risk Management

The Group's activities and operations expose it to market risk (including foreign currency risk, equity price risk and interest rate risk), credit risk and liquidity risk. The board of directors generally adopts conservative strategies on its risks management and limits the Group's exposure to these risks to a minimum. The board of directors reviews and agrees policies for managing each of these risks and they are summarised below:

### Foreign currency risk

The Group's functional currency is RMB since most of the transactions take place in the PRC. Foreign currency risk is arising from its purchases of machinery and raw materials from overseas suppliers and its borrowings denominated in foreign currencies. The Group enters into currency option contracts to reduce foreign exchange risk, if appropriate.

Details of the Group's bank balances and borrowings denominated in foreign currencies, mainly in USD and EURO as at 31 December 2006 and 2007 are set out in notes 24 and 26 respectively.

At balance sheet date, the management reasonably estimated the exchange rate of EUR will be continuously strong. It is estimated by management that EUR/RMB will be weakened by 4% (2006: strengthened by 4%) and US\$/RMB weakened by 11% (2006: 7%) in the near future. The estimated change in foreign exchange rates, with all other variables held constant, would increase the group's profit after tax and retained profits by approximately US\$6,130,000 (2006:US\$6,631,000).

#### Equity price risk

The Group's held for trading investments are measured at fair value and the available-for-sale financial assets are measured at cost less impairment losses. Therefore, the Group is exposed to equity price risk. The management manages this exposure by on-going monitoring of changes in the market condition and financial condition of the investee companies. At the balance sheet date, the Group had no significant equity price risk.

截至二零零七年十二月三十一日止年度

For the year ended 31 December 2007

### 34.金融風險因素(續)

#### 利率風險

本集團主要面對的利率風險是來自銀行借貸,所取得的浮動利率貸款令本集團面對現金流量利率風險,而固定利率貸款則帶來公平評價利率風險。本集團管理利息成本的政策是採取定息和浮息組成之貸款組合,並維持62%之貸款為定息貸款。

於結算日,本集團管理層對於借款利率 在可預見的未來的變動情況作出謹慎的 預測,預期美元/外幣貸款利率將繼續 下滑約20點子左右,而人民幣一年期貸 款利率則會持續加息約9.6點子左右。倘 所有其他變量保持不變,此預計之利率 變動將會影響本集團之本年度溢利及保 留溢利增加約美元276,000(2006:美元 894,000)。

#### 信貸風險

本集團的信貸風險主要來自於應收帳款 及其他應收帳款,集團管理層已設立了 針對應收帳款及其他應收帳款的信用審 批制度與政策,當客戶要求之信用金額 超過一般標準時,需進行特別審批程 序。

於結算日,本集團並無重大的集中信貸 風險,其最大之信貸風險主要來自資產 負債表內各金融資產之賬面值。

#### 流動資金風險

本集團針對於流動資金風險管理之目標 為擁有足夠現金儲備以及維持充裕之已 承諾信貸融資額度。並且,本集團定期 監察現在及預期之流動資金需求,尤其 在資本開支及預付債項等方面的資金需 求。於結算日及可預見的未來,董事預 期本集團並無流動資金風險。

### 34. Financial Risk Management (Continued)

#### Interest rate risk

The Group's exposure to the risk of changes in market interest rates relates primarily to the Group's long-term borrowings with floating interest rates. The Group's policy is to manage its interest cost using a mix of fixed and variable rate debts. The Group's strategy of maintaining more than 62% of its borrowings are at a fixed rate of interest remains unchanged.

At balance sheet date, it is estimated by management if a general decrease of 20 basis points and increase of 9.6 basis point in bank borrowings of USD / foreign currency and short-term bank borrowings in RMB in the near future, the estimated change in interest rate, with all other variables held constant, would increase the group's profit for the year and retained profits by approximately US\$276,000 (2006:US\$894,000).

#### Credit risk

The Group's credit risk is primarily attributable to trade and other receivables. Specific policy and procedures have been decided by management to assess the credit risk of trade and other receivable. Individual credit evaluations are performed on all customers requiring credit over a certain amount.

At the balance sheet date, the Group had no significant concentrations of credit risk. The maximum exposure to credit risk is represented by the carrying amount of each financial asset in the balance sheet.

#### Liquidity risk

The Group's objectives when managing liquidity risk are to maintain sufficiency reserves of cash and adequate committed credit facilities to the Group. Also, the Group's policy is to regularly monitor current and expected liquidity requirements, in particular relating to capital expenditure and repayments of debts. At balance sheet date, the board of directors expected that Group had no significant liquidity risk in the near future.
