CHAIRMAN'S STATEMENT

On behalf of the board (the "Board") of directors (the "Directors") of Tao Heung Holdings Limited (the "Company") together with its subsidiaries ("Tao Heung" or the "Group"), I would like to present the annual results of the Group for the year ended 31 December 2015.

Over the past year, consumption sentiment in Mainland China and Hong Kong weakened in the face of economic uncertainties on both sides of the border. This was underscored at the end of the year when the Chinese government reported GDP growth of 6.9% for 2015, a level not seen since 1990. Hong Kong did not fare much better, with GDP growth of around 2.4%. The downward trend again reminded us, as if we needed reminding, that we are living in challenging times.

Of course peaks and troughs come and go, and the Group has seen its fair share of economic cycles. As a company that will be celebrating its 25th anniversary in 2016, it fully understands that foresight,

perseverance, determination and adaptability are not only essential, but also the determinants of success.

Hong Kong: Our home and foundation

In Hong Kong, all of these attributes were used to underpin our position in a market that has experienced internal and external pressures. While the economy is an ongoing concern, so too are weakening consumption sentiment and limited availability of prime restaurant spaces. To tackle the former, we have sought to inject new life into the segment by creating innovative dishes that appeal to the palate and the pocketbook. We have also continued to offer renowned promotions such as "HK\$1 Chicken",

"Half price Storm" and "Fo Tiao Qiang" which are synonymous with the Tao Heung brand. With regards to the latter, we were among the first to downsize our premises, hence we are also among the first to complete such efforts. Though we continue to operate 71 outlets in Hong Kong, the operating area has been reduced by 7.4% and 3.2% when compared with 2013 and 2014 respectively. Despite of this, turnover has declined modestly when compared with the 2014 reporting period, while more encouragingly, earnings before interest, taxes, depreciation and amortisation (EBITDA) have risen as has profit attributable to owners of the parent. The conclusion of our downsizing efforts have also enabled us to reduce our susceptibility to rising labour costs and labour shortages, though both concerns were less serious during the past year.

While the Group is associated with Chinese cuisine, we are also continuing to make our presence felt through alternative fare. The comfort foods offered by "RingerHut" and "T CAFÉ 1954" have enabled us to cater for a younger demographic, and thereby welcome new generations of customers into the fold. Of course, to reach customers young and old there is Tai Cheong Bakery. With products that range from Chinese pastries and Western cakes to seasonal treats, and a network of 28 outlets covering all corners of the city, we are indeed reaching out to customers from all walks of life.

CHAIRMAN'S STATEMENT

Mainland China: the Changing Tide

Even though Hong Kong remains our foundation, Mainland China represents our springboard; allowing us to seize opportunities to come. Such opportunities were, however, more difficult to capture in the past year as the continuing influx of upscale restaurant operators to the middleclass segment directly impacted on the Group. Moreover, the growing number of shopping centres being developed in cities has led to a rising number of new restaurants. Compounding matters has been the impact of e-commerce on the retail sector. With an increasing number of consumers electing to shop online, this has resulted in the departure of retail stores that are unable to compete, and in their place are often F&B players. In reaction, we have adopted a business model similar to that used in Hong Kong. Correspondingly, our objective has been to operate smaller scale restaurants that offer more novel dining experiences and which appeal to a younger generation of restaurant-goers. New openings in Shanghai, Shenzhen and Wuhan during the past year have followed this model and performed favourably, contributing to the rise in revenue. With a total of 45 restaurants now operating in Mainland China, up from 37 in 2014, the operations continue to account for a rising proportion of total revenue – reaching 35.6% in 2015 – the eighth consecutive year of growth.

Representing our third year of ownership is the Bakerz 180 bakery chain, which benefited from an expanded network; rising from 8 since 2013 to 22 outlets by year end.

The consolidation of its presence in first-tier cities including Guangzhou and Shenzhen underscores our commitment to develop the bakery chain which, despite being in a developmental stage, possesses immense growth potential and is set to benefit from greater economies of scale.

25 years: A new starting point

As the new year ushers in the 25th anniversary of the Group, we are both excited by the prospects of celebrating this momentous occasion, and greatly motivated to build on our success so that the next 25 years will be equally fruitful, if not more so.

With Hong Kong being our home, we will bring our celebrations to the public by implementing associated marketing campaigns that also help to further raise the brand equity of Tao Heung. Though we have completed downsizing our many restaurants, we will continue to look for new opportunities to strengthen our footing in this important market so that we can accommodate the needs of our customers even better.

In Mainland China, we view the changing restaurant landscape as being a new opportunity for the Group, since our ability to adapt to change will drive further growth. Indicative of this adaptability is the introduction of smaller scale restaurants now underway in the country which, if Hong Kong is a fair gauge, will likewise result in higher efficiency and broader appeal, particularly among the young. And like Hong Kong, we anticipate that with the introduction of new menus focusing on our hero products

which are temptingly presented, as well as dining options that include our beverage and juice corner, still greater excitement will be brought to the local restaurant scene.

As we embark on endeavours to further consolidate our position in the market, we will continue to draw on our strengths in management, infrastructure and financial stability. By doing so, we will also be opening the way to new opportunities for sustaining the Group's growth, which is fundamental for protecting the interests of our stakeholders.

In our commitment to deliver fair returns to the Group's shareholders, the Board has resolved to declare a final dividend of HK6.0 cents per share, which, combined with an interim dividend of HK6.0 cents already paid, amounts to a total dividend of HK12.0 cents for the financial year, representing an annual payout ratio of 71.6%.

Appreciation

On behalf of the Board, I wish to take this opportunity to express my immense appreciation to the management team and the entire workforce for their commitment and diligence during the past year. Also, I would like to offer my gratitude to all of our customers, business partners and shareholders for their unwavering support.

MANAGEMENT DISCUSSION AND ANALYSIS

Review

The Board is pleased to announce the annual results of the Group for the year ended 31 December 2015. Over the past year, the Group witnessed its operations in Hong Kong and Mainland China experience downward pressure as the respective two economies weakened, with the latter expanding at its slowest rate since 2011. With consumption sentiment already on the wane, yet a further blow came when stock markets experienced major sell-offs in the second half year. In the face of such challenges, the Group prudently optimised its operations on both sides of the border, with the Hong Kong business achieving a modest turnaround in real terms while revenue derived from the Mainland China operation rose modestly.

Financial Results

For the year ended 31 December 2015, total revenue of HK\$4,546.5 million was recorded, up from HK\$4,489.2 million for last year. The Hong Kong operation remained the principal revenue contributor of the Group, accounting for 64.4% (2014: 66.1%) of total revenue, with the Mainland China operation accounting for 35.6% (2014: 33.9%) of total revenue. Gross profit margin is maintained at a similar level with last year, attributed to stable food prices, efficient control over food wastage and effective food chain management. Profit attributable to owners of the parent fell to HK\$171.3 million (2014: HK\$207.4 million), due largely to poor sentiments of the PRC consumption market and policies that impacted on business and banquet spending. The management has devised strategies to tackle the situation and believes performance will gradually improve moving forward.

Hong Kong Operations

Hong Kong operations recorded revenue of HK\$2,925.7 million (2014: HK\$2,968.3 million) for the reporting year, a modest decline of 1.4% year-on-year. Earnings before interest, taxes, depreciation and amortisation (EBITDA) have risen by 10.7% to HK\$334.2 million (2014: HK\$301.9 million), while profit attributable to owners of the parent increased by 16.9% to HK\$167.5 million (2014: HK\$143.3 million). The bottom line improvement is a result of the Group's continuous efforts in streamlining operations and controlling costs over the years.

During the year, the operating environment in Hong Kong remained challenging, with a fluctuating stock market and decline in Mainland visitor arrivals, spending sentiment has been deteriorating. However, with Tao Heung's restaurants mostly positioned to target the mass market segment, the Group has nevertheless benefited from the economic downturn as consumers choose value-for-money options when dining out. And even though the total operating area has been reduced from approximately 716,000 sq. ft. in 2013 to approximately 663,000 sq. ft. by the close of 2015, representing an almost 7.4% and 3.2% reduction when compared with 2013 and 2014 respectively, revenue has remained at a similar level with 2014, proving also that the Group's on-going marketing efforts to boost customer traffic have paid off.

MANAGEMENT DISCUSSION AND ANALYSIS

Downsizing of the Group's Hong Kong outlets due to landlords subdividing properties to boost profits in the past few years has recently been completed. The process has enabled the Group to create a much leaner and more efficient restaurant network, releasing pressure from the labour shortage. As at 31 December 2015, the Group operated a total of 71 outlets (2014: 72 outlets), which include four Tao Square restaurants that target the middleclass segment, three "RingerHut" restaurants serving Japanese ramen, and one "T CAFÉ 1954" café offering casual dining options. With regards to Tai Cheong Bakery, a total of 28 outlets are in operation as at year-end (2014: 27); revenue increased modestly by 5.9% to HK\$112.0 million.

Cost control has been another key area of focus of the management. During the year, food cost stayed relatively stable, while rental and staff costs both accounted for a lower proportion of turnover, attributable largely to the management's efforts to streamline operations and boost efficiency. The Group's effective cost management strategies were key to the improved performance of the Hong Kong business during the year. The management believes that the most difficult time has passed and looks forward to continual improvements in the Hong Kong operations.

Mainland China Operations

Mainland China operations recorded revenue increase of 6.6% to HK\$1,620.8 million (2014: HK\$1,520.9 million) during the year. Yet excluding the one-off written off and impairment of items of property, plant and equipment of HK\$13.5 million, EBITDA slipped to HK\$218.3 million (2014: HK\$252.7 million); while profit attributable to owners of the parent was HK\$12.2 million (2014: HK\$64.1 million). The poor spending sentiment, fierce competition in the market and unfavourable policies were main factors for the drop in segment profit.

While the significant economic slowdown directly impacted on the performance of the Group, still other factors weighed on its business in Mainland China, including rising competition from new restaurant openings due to increased availability of retail space, as a result of the surging popularity of online shopping together with the increasing number of shopping centres being opened in major metropolitan hubs. Also, a greater number of restaurant operators have migrated from the upscale premium to the middleclass and mass market segments since austerity measures were implemented by the PRC government. In addition, recent policies aimed at fighting corruption nationwide have also caused a reduction in the scale and number of dinner banquet bookings among the Groups outlets. Despite the aforementioned challenges, revenue from the Mainland China operation remained stable, which can be attributed to the careful expansion of the Group's restaurant network – standing at 45 as at year end (2014: 37 restaurants).

During the year, new restaurants were opened in Wuhan, Shenzhen, Guangzhou and Shanghai with positive market response. In an effort to move away from the traditional large-scale banquet-style outlets, these new establishments are of relatively smaller scale and followed a casual-dining style, targeting middleclass and younger demographic groups. Menus were also updated with more casual items and less focus on expensive business and formal dining items. Responses from customers so far have been encouraging and the management is planning to move forward with such a business model. It is worth noting as well that the relocation and refurbishment of two flagship restaurants in Shenzhen and Guangzhou earlier in the year have been completed and operations have recommenced.

Bakerz 180 met its target of operating 22 outlets by the end of 2015, up from 18 as at the close of 2014. Although it remained in a developmental stage, it has continued to generate increasingly higher revenue, reaching HK\$35.9 million (2014: HK\$27.3 million) for the year, an increase of 31.5%, but still making a loss at its developmental stage. The management remains confident about the prospects of Bakerz 180 as the PRC is a huge market for reasonably-priced quality bakery products. Moreover, having reached a consignment agreement with PARKnSHOP during the first half year, which enabled the Group to benefit from lower investment costs. This has also allowed the Group to leverage the supermarket operator's extensive network for market expansion.

MANAGEMENT DISCUSSION AND ANALYSIS

Logistics Centres

The logistics centres in Tai Po and Dongguan represent key components of the Group's vertical integration backbone. Each facility has reached a monthly food processing capacity of 1,050 tonnes, thus effectively supporting all of the Group's restaurants and bakery arms in Hong Kong and Mainland China. Providing added support is Dongguan Phase 2 which was completed in January 2015, and is now fully operational. It is primarily involved in the processing of dim sum and Chinese baked goods.

Representing a pilot project aimed at capitalising on the production capacity available at its Dongguan facilities, the Group established a self-owned retail point adjacent to the logistics centre for selling pre-packed chilled and frozen products, breads and other baked goods directly to end-user customers in the area. The response from customers has been satisfactory.

Poultry and Peripheral Business

The poultry and peripheral business generated supplementary income amounting to HK\$114.8 million (2014: HK\$90.7 million) and HK\$143.3 million (2014: HK\$153.9 million) respectively during the reporting year. The satisfactory results reflect more favourable prices for pork complemented by stable poultry prices. It cannot be overemphasised that the poultry farm is an important asset as it ensures the Group is provided with a steady and safe supply of quality poultry.

Financial Resources and Liquidity

As at 31 December 2015, the Group's total assets increased to approximately HK\$2,671.7 million (2014: approximately HK\$2,617.1 million) while the total equity was approximately HK\$1,788.0 million (2014: approximately HK\$1,804.2 million).

As at 31 December 2015, the Group had cash and cash equivalents of approximately HK\$397.5 million. After deducting total interest-bearing bank borrowings of approximately HK\$279.5 million, the Group had a net cash surplus position of approximately HK\$118.0 million.

As at 31 December 2015, the Group's gearing ratio (defined as total interest-bearing bank borrowings plus finance lease payable divided by total equity attributable to owners of the parent) was 15.7% (2014: 10.9%).

Capital Expenditure

Capital expenditure for the year ended 31 December 2015 amounted to approximately HK\$393.0 million and capital commitments as at 31 December 2015 amounted to approximately HK\$56.3 million. The capital expenditure were mainly for the renovation of the Group's new and existing restaurants and construction of Phase 2 of Dongguan Logistics Centre while the capital commitments relate to new and existing restaurants.

Contingent Liabilities

As at 31 December 2015, the Group had contingent liabilities in respect of bank guarantees given in lieu of rental and utility deposits amounting to approximately HK\$23.8 million (2014: approximately HK\$25.3 million).

MANAGEMENT DISCUSSION AND ANALYSIS

Foreign Exchange Risk Management

The Group's sales and purchases for the year ended 31 December 2015 were mostly denominated in Hong Kong Dollars ("HK\$") and Renminbi ("RMB").

The RMB is not a freely convertible currency. Future exchange rates of the RMB could vary significantly from the current or historical exchange rates as a result of controls that could be imposed by the PRC government. The exchange rates may also be affected by economic developments and political changes domestically and internationally, and the demand and supply of the RMB. The appreciation or devaluation of the RMB against HK\$ may have impact on the operation results of the Group.

The Group currently does not have a foreign currency hedging policy. However, management monitors the foreign exchange exposure and arranges foreign exchange forward contracts to minimize foreign currency exposure when appropriate.

Human Resources

As at 31 December 2015, the Group had 9,433 employees. In order to attract and retain high quality staff and to enable smooth operation within the Group, the Group offers competitive remuneration packages (with reference to market conditions and individual qualifications and experience) and various in-house as well as external training courses. The remuneration packages are subject to review on a regular basis.

In addition, the Group also adopted the Pre-IPO Share Option Scheme and Share Option Scheme, where eligible employees are entitled to various share options to subscribe for the ordinary shares in the Company for their past and potential contribution to the growth of the Group. As at 31 December 2015, approximately 3,520,000 options were outstanding under the Pre-IPO Share Option Scheme and no share options have been exercised during the year. Also, as at 31 December 2015, no options have been granted or agreed to be granted pursuant to the Share Option Scheme.

Pledge of Assets

As at 31 December 2015, the Group pledged its bank deposits of approximately HK\$13.1 million, leasehold land and buildings of approximately HK\$87.7 million and investment properties of approximately HK\$18.5 million to secure the banking facilities granted to the Group.

MANAGEMENT DISCUSSION AND ANALYSIS

Prospects

Though the economic environment in Hong Kong and Mainland China remains challenging, management is cautiously optimistic about the Group's future, having taken decisive actions early on to create a lean and strong foundation that can weather through ups and downs of the economy. While looking to reap the benefits of its early efforts, the management will at the same time continue to closely monitor developing trends and initiate strategies that ensure the Group is adaptive to change, particularly as it marks its 25th anniversary in 2016.

In respect of the Hong Kong operations, the management trusts that having implemented a downsizing strategy early on, it is on track to profit from a leaner and more efficient restaurant network; and the past year's performance substantiates this. With the 25th anniversary of the Group on the horizon, the management will use the occasion to further bolster the brand equity of Tao Heung, and thereby sustain growth momentum. In the pipeline are associated marketing initiatives that supplement other popular campaigns, such as the venerable "HK\$1 Chicken" promotion. Still another initiative will include offering exceptional discounts on signature Tao Heung dishes during different period. Aside from such efforts, the management will continue to cautiously expand its presence in the city with the opening of between one and two Chinese restaurants, as well as up to two RingerHut restaurants to appeal to those wanting convenient Japanese cuisine.

The Tai Cheong bakery operation will likewise have a modest increase in shops; possibly reaching the 30 mark by the close of 2016 – presently at 28. Besides expanding the bakery's presence locally, the management has established a joint venture to operate Tai Cheong outlets in Singapore and Malaysia, with plans to have the first outlet in Singapore opened in the first half of 2016.

Though the Mainland China operations grew at a slower pace as the economic downturn worsened, compounded by intense competition and lacklustre consumption sentiment, the management remains confident about the Group's prospects in the country. The management will adjust its strategy, placing greater emphasis on casual dining targeting the non-business middleclass market segment, such as families and younger generations with increasing spending power. Correspondingly, new menus will be introduced that offer modern Chinese cuisine, as well as greater flexibility in selecting food items during the course of the day. The transformation process will also involve the separation of large-scale restaurants into banquet and themed restaurants to bolster efficiency, control costs and better allocate manpower. With the transformation on track, the management will not only vary its operation strategy, but also focus on rationalising the workflow of restaurants in order to reduce associated operating costs. Besides optimising the existing network, a modest increase of between four and five restaurants is envisaged, including one new restaurant in Shanghai and Wuxi respectively.

Aside from developing its core business, the Group will also look to achieve progress in its other interests. Recognising that direct retail food distribution represents a logical means of optimising utilisation of its logistics centres, the management will closely monitor developments at the new retail point in Dongguan and consider the feasibility of opening additional points in the future. Also, regarding the Bakerz 180 bakery chain, the management will continue to invest and develop the business in view of the large demand that exists among the population at large.

While celebrating the Group's 25th anniversary will be a highlight in the coming year, the management will at the same time regard the occasion as an important opportunity for breaking new ground. Having steadily amassed all of the key components essential for building a successful Chinese restaurant empire, such as efficient restaurant network, complementary production and logistics support, and corresponding peripheral businesses, the management will leverage all of these competitive edges to grasp emerging opportunities, and thereby access new revenue streams and deliver greater returns to the Group's shareholders.

REPORT OF THE DIRECTORS

Continuing Connected Transactions

On 20 November 2015 (after trading hours), the Company or its designated subsidiaries entered into a master supply agreement with Baker Limited and its subsidiary ("Baker Group"), which are non wholly-owned subsidiaries of the Company. The Company will supply or procure to supply products to Baker Group and vice versa for their daily consumption in the course of their respective business for the period from 21 November 2015 to 31 December 2017. The execution of the master supply agreement constitutes a continuing connected transaction of the Company under the Listing Rules. Details of the transactions were disclosed in an announcement of the Company published on 20 November 2015.

During the period from 21 November 2015 to 31 December 2015, the purchases of food and other operating items from Baker Group amounted to approximately HK\$993,000 while sales to Baker Group amounted to approximately HK\$123,000.

The Independent Non-executive Directors of the Company have reviewed the continuing connected transactions set out above and have confirmed that these continuing connected transactions were entered into:

- (i) in the ordinary course of business of the Group;
- (ii) on normal commercial terms or on terms no less favourable to the Group than terms available to or from independent third parties; and
- (iii) in accordance with the relevant agreement governing them on terms that are fair and reasonable and in the interests of the shareholders of the Company as a whole.

Ernst & Young, the Company's auditors, were engaged to report on the Group's continuing connected transactions in accordance with Hong Kong Standard on Assurance Engagements 3000 (Revised) *Assurance Engagements Other Than Audits or Reviews of Historical Financial Information* and with reference to Practice Note 740 *Auditor's Letter on Continuing Connected Transactions under the Hong Kong Listing Rules* issued by the Hong Kong Institute of Certified Public Accountants. Ernst & Young have issued their unqualified letter containing their findings and conclusions in respect of the continuing connected transactions disclosed above by the Group in accordance with Rule 14A.56 of the Listing Rules.

REPORT OF THE DIRECTORS

The auditors have reported to the Directors that (i) nothing has come to their attention that causes them to believe that the disclosed continuing connected transactions have not been approved by the Company's Board of Directors; (ii) for transactions involving the provision of services by the Group, nothing has come to their attention that causes them to believe that the transactions were not, in all material respects, in accordance with the pricing policies of the Company; (iii) nothing has come to their attention that causes them to believe that the transactions were not entered into, in all material respects, in accordance with the relevant agreement governing such transactions; and (iv) with respect to the aggregate amount of the continuing connected transactions, nothing has come to their attention that causes them to believe that the disclosed continuing connected transactions have exceeded the maximum aggregate annual value disclosed in the announcement dated 20 November 2015 made by the Company in respect of the disclosed continuing connected transactions.

Save as disclosed above, the Group leases a warehouse from Ms. Chan Sai Ying, spouse of Mr. Chung Wai Ping. Under the arrangement, the Group is required to pay Ms. Chan Sai Ying a monthly rent of HK\$4,000 based on normal commercial terms or on terms no less favourable to the Group than terms available from independent third parties. Such transaction is exempt from the reporting, announcement or independent shareholders' approval requirements under Rule 14A.76 of the Listing Rules and the details of the transaction included herein are for information only.

Sufficiency of Public Float

Based on information that is publicly available to the Company and within the knowledge of the directors, at least 25% of the Company's total number of issued shares were held by the public as at the date of this report.

Auditors

Ernst & Young retire and a resolution for their reappointment as auditors of the Company will be proposed at the forthcoming annual general meeting.

ON BEHALF OF THE BOARD

Chung Wai Ping

INDEPENDENT AUDITORS' REPORT

To the shareholders of Tao Heung Holdings Limited

(Incorporated in the Cayman Islands with limited liability)

We have audited the consolidated financial statements of Tao Heung Holdings Limited (the "Company") and its subsidiaries set out on pages 32 to 98, which comprise the consolidated statement of financial position as at 31 December 2015, and the consolidated statement of profit or loss, the consolidated statement of comprehensive income, the consolidated statement of changes in equity and the consolidated statement of cash flows for the year then ended, and a summary of significant accounting policies and other explanatory information.

Directors' Responsibility for the Consolidated Financial Statements

The directors of the Company are responsible for the preparation of consolidated financial statements that give a true and fair view in accordance with Hong Kong Financial Reporting Standards issued by the Hong Kong Institute of Certified Public Accountants and the disclosure requirements of the Hong Kong Companies Ordinance, and for such internal control as the directors determine is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express an opinion on these consolidated financial statements based on our audit. Our report is made solely to you, as a body, and for no other purpose. We do not assume responsibility towards or accept liability to any other person for the contents of this report.

We conducted our audit in accordance with Hong Kong Standards on Auditing issued by the Hong Kong Institute of Certified Public Accountants. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditors' judgement, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditors consider internal control relevant to the entity's preparation of consolidated financial statements that give a true and fair view in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by the directors, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

INDEPENDENT AUDITORS' REPORT

Opinion

In our opinion, the consolidated financial statements give a true and fair view of the financial position of the Company and its subsidiaries as at 31 December 2015, and of their financial performance and cash flows for the year then ended in accordance with Hong Kong Financial Reporting Standards and have been properly prepared in compliance with the disclosure requirements of the Hong Kong Companies Ordinance.

The above table lists the subsidiaries of the Company which, in the opinion of the directors, principally affected the results for the year or formed a substantial portion of the net assets of the Group. To give details of other subsidiaries would, in the opinion of the directors, result in particulars of excessive length.

NOTES TO FINANCIAL STATEMENTS

31 December 2015

2.1 Basis of Preparation

These financial statements have been prepared in accordance with Hong Kong Financial Reporting Standards (“HKFRSs”) (which include all Hong Kong Financial Reporting Standards, Hong Kong Accounting Standards (“HKASs”) and Interpretations) issued by the Hong Kong Institute of Certified Public Accountants, accounting principles generally accepted in Hong Kong and the disclosure requirements of the Hong Kong Companies Ordinance. They have been prepared under the historical cost convention, except for investment properties, biological assets and a derivative financial instrument which have been measured at fair value. These financial statements are presented in Hong Kong dollars (“HK\$”) and all values are rounded to the nearest thousand except when otherwise indicated.

BASIS OF CONSOLIDATION

The consolidated financial statements include the financial statements of the Company and its subsidiaries (collectively referred to as the “Group”) for the year ended 31 December 2015. A subsidiary is an entity (including a structured entity), directly or indirectly, controlled by the Company. Control is achieved when the Group is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee (i.e., existing rights that give the Group the current ability to direct the relevant activities of the investee).

When the Company has, directly or indirectly, less than a majority of the voting or similar rights of an investee, the Group considers all relevant facts and circumstances in assessing whether it has power over an investee, including:

- (a) the contractual arrangement with the other vote holders of the investee;
- (b) rights arising from other contractual arrangements; and
- (c) the Group’s voting rights and potential voting rights.

The financial statements of the subsidiaries are prepared for the same reporting period as the Company, using consistent accounting policies. The results of subsidiaries are consolidated from the date on which the Group obtains control, and continue to be consolidated until the date that such control ceases.

Profit or loss and each component of other comprehensive income are attributed to the owners of the parent of the Group and to the non-controlling interests, even if this results in the non-controlling interests having a deficit balance. All intra-group assets and liabilities, equity, income, expenses and cash flows relating to transactions between members of the Group are eliminated in full on consolidation.

The Group reassesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control described above. A change in the ownership interest of a subsidiary, without a loss of control, is accounted for as an equity transaction.

If the Group loses control over a subsidiary, it derecognises (i) the assets (including goodwill) and liabilities of the subsidiary, (ii) the carrying amount of any non-controlling interest and (iii) the cumulative translation differences recorded in equity; and recognises (i) the fair value of the consideration received, (ii) the fair value of any investment retained and (iii) any resulting surplus or deficit in profit or loss. The Group’s share of components previously recognised in other comprehensive income is reclassified to profit or loss or retained profits, as appropriate, on the same basis as would be required if the Group had directly disposed of the related assets or liabilities.

NOTES TO FINANCIAL STATEMENTS

31 December 2015

2.2 Changes in Accounting Policies and Disclosures

The Group has adopted the following revised standards for the first time for the current year's financial statements.

Amendments to HKAS 19 *Defined Benefit Plans: Employee Contributions*
Annual Improvements 2010-2012 Cycle
Annual Improvements 2011-2013 Cycle

The adoption of the above revised standards has had no significant financial effect on the financial statements.

In addition, the Company has adopted the amendments to the Rules Governing the Securities on the Stock Exchange (the "Listing Rules") issued by the Stock Exchange relating to the disclosure of financial information with reference to the Hong Kong Companies Ordinance (Cap. 622) during the current financial year. The main impact to the financial statements is on the presentation and disclosure of certain information in the financial statements.

2.3 Issued But Not Yet Effective Hong Kong Financial Reporting Standards

The Group has not applied the following new and revised HKFRSs, that have been issued but are not yet effective, in these financial statements.

HKFRS 9	<i>Financial Instruments</i> ²
Amendments to HKFRS 10 and HKAS 28 (2011)	<i>Sale or Contribution of Assets between an Investor and its Associate or Joint Venture</i> ⁴
Amendments to HKFRS 10, HKFRS 12 and HKAS 28 (2011)	<i>Investment Entities: Applying the Consolidation Exception</i> ¹
Amendments to HKFRS 11	<i>Accounting for Acquisitions of Interests in Joint Operations</i> ¹
HKFRS 14	<i>Regulatory Deferral Accounts</i> ³
HKFRS 15	<i>Revenue from Contracts with Customers</i> ²
Amendments to HKAS 1	<i>Disclosure Initiative</i> ¹
Amendments to HKAS 16 and HKAS 38	<i>Clarification of Acceptable Methods of Depreciation and Amortisation</i> ¹
Amendments to HKAS 16 and HKAS 41	<i>Agriculture: Bearer Plants</i> ¹
Amendments to HKAS 27 (2011)	<i>Equity Method in Separate Financial Statements</i> ¹
<i>Annual Improvements 2012-2014 Cycle</i>	Amendments to a number of HKFRSs ¹

¹ Effective for annual periods beginning on or after 1 January 2016

² Effective for annual periods beginning on or after 1 January 2018

³ Effective for an entity that first adopts HKFRSs for its annual financial statements beginning on or after 1 January 2016 and therefore is not applicable to the Group

⁴ The original date of 1 January 2016 has been deferred/removed and early adoption of the amendments continues to be permitted

The Group is in the process of making an assessment of the impact of the new and revised HKFRSs upon initial application but is not yet in a position to state whether these new and revised HKFRSs would have a significant impact on the Group's results of operations and financial position.

2.4 Summary of Significant Accounting Policies

INVESTMENTS IN ASSOCIATES

An associate is an entity in which the Group has a long term interest of generally not less than 20% of the equity voting rights and over which it is in a position to exercise significant influence. Significant influence is the power to participate in the financial and operating policy decisions of the investee, but is not control or joint control over those policies.

The Group's investments in associates are stated in the consolidated statement of financial position at the Group's share of net assets under the equity method of accounting, less any impairment losses. Adjustments are made to bring into line any dissimilar accounting policies that may exist. The Group's share of the post-acquisition results and other comprehensive income of associates is included in the consolidated statement of profit or loss and consolidated other comprehensive income, respectively. In addition, when there has been a change recognised directly in the equity of the associate, the Group recognises its share of any changes, when applicable, in the consolidated statement of changes in equity. Unrealised gains and losses resulting from transactions between the Group and its associates are eliminated to the extent of the Group's investments in the associates, except where unrealised losses provide evidence of an impairment of the asset transferred. Goodwill arising from the acquisition of associates is included as part of the Group's investments in associates.

If an investment in an associate becomes an investment in a joint venture or vice versa, the retained interest is not remeasured. Instead, the investment continues to be accounted for under the equity method. In all other cases, upon loss of significant influence over the associate, the Group measures and recognises any retained investment at its fair value. Any difference between the carrying amount of the associate upon loss of significant influence and the fair value of the retained investment and proceeds from disposal is recognised in profit or loss.

BUSINESS COMBINATIONS AND GOODWILL

Business combinations are accounted for using the acquisition method. The consideration transferred is measured at the acquisition date fair value which is the sum of the acquisition date fair values of assets transferred by the Group, liabilities assumed by the Group to the former owners of the acquiree and the equity interests issued by the Group in exchange for control of the acquiree. For each business combination, the Group elects whether to measure the non-controlling interests in the acquiree that are present ownership interests and entitle their holders to a proportionate share of net assets in the event of liquidation at fair value or at the proportionate share of the acquiree's identifiable net assets. All other components of non-controlling interests are measured at fair value. Acquisition-related costs are expensed as incurred.

When the Group acquires a business, it assesses the financial assets and liabilities assumed for appropriate classification and designation in accordance with the contractual terms, economic circumstances and pertinent conditions as at the acquisition date. This includes the separation of embedded derivatives in host contracts of the acquiree.

If the business combination is achieved in stages, the previously held equity interest is remeasured at its acquisition date fair value and any resulting gain or loss is recognised in profit or loss.

NOTES TO FINANCIAL STATEMENTS

31 December 2015

2.4 Summary of Significant Accounting Policies (continued)

BUSINESS COMBINATIONS AND GOODWILL (CONTINUED)

Any contingent consideration to be transferred by the acquirer is recognised at fair value at the acquisition date. Contingent consideration classified as an asset or liability is measured at fair value with changes in fair value recognised in profit or loss. Contingent consideration that is classified as equity is not remeasured and subsequent settlement is accounted for within equity.

Goodwill is initially measured at cost, being the excess of the aggregate of the consideration transferred, the amount recognised for non-controlling interest and any fair value of the Group's previously held equity interests in the acquiree over the identifiable net assets acquired and liabilities assumed.

After initial recognition, goodwill is measured at cost less any accumulated impairment losses. Goodwill is tested for impairment annually or more frequently if events or changes in circumstances indicate that the carrying value may be impaired. The Group performs its annual impairment test of goodwill as at 31 December. For the purpose of impairment testing, goodwill acquired in a business combination is, from the acquisition date, allocated to each of the Group's cash-generating units, or groups of cash-generating units, that are expected to benefit from the synergies of the combination, irrespective of whether other assets or liabilities of the Group are assigned to those units or groups of units.

Impairment is determined by assessing the recoverable amount of the cash-generating unit (group of cash-generating units) to which the goodwill relates. Where the recoverable amount of the cash-generating unit (group of cash-generating units) is less than the carrying amount, an impairment loss is recognised. An impairment loss recognised for goodwill is not reversed in a subsequent period.

Where goodwill has been allocated to a cash-generating unit (or group of cash-generating units) and part of the operation within that unit is disposed of, the goodwill associated with the operation disposed of is included in the carrying amount of the operation when determining the gain or loss on the disposal. Goodwill disposed of in these circumstances is measured based on the relative value of the operation disposed of and the portion of the cash-generating unit retained.

NOTES TO FINANCIAL STATEMENTS

31 December 2015

2.4 Summary of Significant Accounting Policies (continued)

FAIR VALUE MEASUREMENT

The Group measures its investment properties, biological assets and a derivative financial instrument at fair value at the end of each reporting period. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either in the principal market for the asset or liability, or in the absence of a principal market, in the most advantageous market for the asset or liability. The principal or the most advantageous market must be accessible by the Group. The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Group uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

Level 1 – based on quoted prices (unadjusted) in active markets for identical assets or liabilities

Level 2 – based on valuation techniques for which the lowest level input that is significant to the fair value measurement is observable, either directly or indirectly

Level 3 – based on valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

For assets and liabilities that are recognised in the financial statements on a recurring basis, the Group determines whether transfers have occurred between levels in the hierarchy by reassessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

IMPAIRMENT OF NON-FINANCIAL ASSETS

Where an indication of impairment exists, or when annual impairment testing for an asset is required (other than inventories, deferred tax assets, financial assets, investment properties and goodwill), the asset's recoverable amount is estimated. An asset's recoverable amount is the higher of the asset's or cash-generating unit's value in use and its fair value less costs of disposal, and is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets, in which case the recoverable amount is determined for the cash-generating unit to which the asset belongs.

An impairment loss is recognised only if the carrying amount of an asset exceeds its recoverable amount. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. An impairment loss is charged to the statement of profit or loss in the period in which it arises in those expense categories consistent with the function of the impaired asset.

NOTES TO FINANCIAL STATEMENTS

31 December 2015

2.4 Summary of Significant Accounting Policies (continued)

IMPAIRMENT OF NON-FINANCIAL ASSETS (CONTINUED)

An assessment is made at the end of each reporting period as to whether there is an indication that previously recognised impairment losses may no longer exist or may have decreased. If such an indication exists, the recoverable amount is estimated. A previously recognised impairment loss of an asset other than goodwill is reversed only if there has been a change in the estimates used to determine the recoverable amount of that asset, but not to an amount higher than the carrying amount that would have been determined (net of any depreciation/amortisation) had no impairment loss been recognised for the asset in prior years. A reversal of such an impairment loss is credited to the statement of profit or loss in the period in which it arises.

RELATED PARTIES

A party is considered to be related to the Group if:

- (a) the party is a person of a close member of that person's family and that person
 - (i) has control or joint control over the Group;
 - (ii) has significant influence over the Group; or
 - (iii) is a member of the key management personnel of the Group or of a parent of the Group;

or

- (b) the party is an entity where any of the following conditions applies:
 - (i) the entity and the Group are members of the same group;
 - (ii) one entity is an associate or joint venture of the other entity (or of a parent, subsidiary or fellow subsidiary of the other entity);
 - (iii) the entity and the Group are joint ventures of the same third party;
 - (iv) one entity is a joint venture of a third entity and the other entity is an associate of the third entity;
 - (v) the entity is a post-employment benefit plan for the benefit of employees of either the Group or an entity related to the Group;
 - (vi) the entity is controlled or jointly controlled by a person identified in (a);
 - (vii) a person identified in (a)(i) has significant influence over the entity or is a member of the key management personnel of the entity (or of a parent of the entity); and
 - (viii) the entity, or any member of a group of which it is a part, provides key management personnel services to the Group or to the parent of the Group.

NOTES TO FINANCIAL STATEMENTS

31 December 2015

2.4 Summary of Significant Accounting Policies (continued)

PROPERTY, PLANT AND EQUIPMENT AND DEPRECIATION

Property, plant and equipment, other than construction in progress, are stated at cost less accumulated depreciation and any impairment losses. The cost of an item of property, plant and equipment comprises its purchase price and any directly attributable costs of bringing the asset to its working condition and location for its intended use.

Expenditure incurred after items of property, plant and equipment have been put into operation, such as repairs and maintenance, is normally charged to the statement of profit or loss in the period in which it is incurred. In situations where the recognition criteria are satisfied, the expenditure for a major inspection is capitalised in the carrying amount of the asset as a replacement. Where significant parts of property, plant and equipment are required to be replaced at intervals, the Group recognises such parts as individual assets with specific useful lives and depreciates them accordingly.

Depreciation is calculated on the straight-line basis to write off the cost of each item of property, plant and equipment to its residual value over its estimated useful life. The principal annual rates used for this purpose are as follows:

Leasehold land under finance leases	Over the lease terms
Buildings	Over the shorter of the lease term and 2% – 5%
Leasehold improvements	10% – 33 $\frac{1}{3}$ %
Furniture, fixtures and equipment	20% – 33 $\frac{1}{3}$ %
Motor vehicles	20% – 25%

Where parts of an item of property, plant and equipment have different useful lives, the cost of that item is allocated on a reasonable basis among the parts and each part is depreciated separately. Residual values, useful lives and the depreciation method are reviewed, and adjusted if appropriate, at least at each financial year end.

An item of property, plant and equipment including any significant part initially recognised is derecognised upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss on disposal or retirement recognised in the statement of profit or loss in the year the asset is derecognised is the difference between the net sales proceeds and the carrying amount of the relevant asset.

Construction in progress represents buildings, plant and machinery and leasehold improvements under construction or installation, which are stated at cost less any impairment losses, and are not depreciated. Cost comprises the direct costs of purchase, construction and installation during the period of construction or installation. Construction in progress is reclassified to the appropriate category of property, plant and equipment when completed and ready for use.

INVESTMENT PROPERTIES

Investment properties are interests in land and buildings held to earn rental income and/or for capital appreciation, rather than for use in the production or supply of goods or services or for administrative purposes; or for sale in the ordinary course of business. Such properties are measured initially at cost, including transaction costs. Subsequent to initial recognition, investment properties are stated at fair value, which reflects market conditions at the end of the reporting period.

Gains or losses arising from changes in the fair values of investment properties are included in the statement of profit or loss in the year in which they arise.

Any gains or losses on the retirement or disposal of an investment property are recognised in the statement of profit or loss in the year of the retirement or disposal.

INTANGIBLE ASSET (OTHER THAN GOODWILL)

Intangible assets acquired separately are measured on initial recognition at cost. The cost of intangible assets acquired in a business combination is the fair value at the date of acquisition. The useful lives of intangible assets are assessed to be either finite or indefinite. Intangible assets with finite lives are subsequently amortised over the useful economic life and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortisation period and the amortisation method for an intangible asset with a finite useful life are reviewed at least at each financial year end.

Trademark

Purchased trademark is stated at cost less any impairment losses and is amortised on the straight-line basis over its estimated useful life of 17 years.

LEASES

Leases that transfer substantially all the rewards and risks of ownership of assets to the Group, other than legal title, are accounted for as finance leases. At the inception of a finance lease, the cost of the leased asset is capitalised at the present value of the minimum lease payments and recorded together with the obligation, excluding the interest element, to reflect the purchase and financing. Assets held under capitalised finance leases, included prepaid land lease payments under finance leases, are included in property, plant and equipment, and depreciated over the shorter of the lease terms and the estimated useful lives of the assets. The finance costs of such leases are charged to the statement of profit or loss so as to provide a constant periodic rate of charge over the lease terms.

Leases where substantially all the rewards and risks of ownership of assets remain with the lessor are accounted for as operating leases. Where the Group is the lessor, assets leased by the Group under operating leases are included in non-current assets, and rentals receivable under the operating leases are credited to the statement of profit or loss on the straight-line basis over the lease terms. Where the Group is the lessee, rentals payable under operating leases net of any incentives received from the lessor are charged to the statement of profit or loss on the straight-line basis over the lease terms.

Prepaid land lease payments under operating leases are initially stated at cost and subsequently recognised on the straight-line basis over the lease terms. When the lease payments cannot be allocated reliably between the land and buildings elements, the entire lease payments are included in the cost of the land and buildings as a finance lease in property, plant and equipment.

FINANCIAL ASSETS

Initial recognition and measurement

Financial assets are classified, at initial recognition, as loans and receivables. When financial assets are recognised initially, they are measured at fair value plus transaction costs that are attributable to the acquisition of the financial assets.

All regular way purchases and sales of financial assets are recognised on the trade date, that is, the date that the Group commits to purchase or sell the asset. Regular way purchases or sales are purchases or sales of financial assets that require delivery of assets within the period generally established by regulation or convention in the marketplace.

Subsequent measurement of loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. After initial measurement, such assets are subsequently measured at amortised cost using the effective interest rate method less any allowance for impairment. Amortised cost is calculated by taking into account any discount or premium on acquisition and includes fees or costs that are an integral part of the effective interest rate. The effective interest rate amortisation and the loss arising from impairment are recognised in the statement of profit or loss.

DERECOGNITION OF FINANCIAL ASSETS

A financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is primarily derecognised (i.e., removed from the Group's consolidated statement of financial position) when:

- the rights to receive cash flows from the asset have expired; or
- the Group has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a "pass-through" arrangement; and either (a) the Group has transferred substantially all the risks and rewards of the asset, or (b) the Group has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

When the Group has transferred its rights to receive cash flows from an asset or has entered into a pass-through arrangement, it evaluates if and to what extent it has retained the risk and rewards of ownership of the asset. When it has neither transferred nor retained substantially all the risks and rewards of the asset nor transferred control of the asset, the Group continues to recognise the transferred asset to the extent of the Group's continuing involvement. In that case, the Group also recognises an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Group has retained.

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the Group could be required to repay.

IMPAIRMENT OF FINANCIAL ASSETS

The Group assesses at the end of each reporting period whether there is objective evidence that a financial asset or a group of financial assets is impaired. An impairment exists if one or more events that occurred after the initial recognition of the asset have an impact on the estimated future cash flows of the financial asset or the group of financial assets that can be reliably estimated. Evidence of impairment may include indications that a debtor or a group of debtors is experiencing significant financial difficulty, default or delinquency in interest or principal payments, the probability that they will enter bankruptcy or other financial reorganisation and observable data indicating that there is a measurable decrease in the estimated future cash flows, such as changes in arrears or economic conditions that correlate with defaults.

Financial assets carried at amortised cost

For financial assets carried at amortised cost, the Group first assesses whether impairment exists individually for financial assets that are individually significant, or collectively for financial assets that are not individually significant. If the Group determines that no objective evidence of impairment exists for an individually assessed financial asset, whether significant or not, it includes the asset in a group of financial assets with similar credit risk characteristics and collectively assesses them for impairment. Assets that are individually assessed for impairment and for which an impairment loss is, or continues to be, recognised are not included in a collective assessment of impairment.

The amount of any impairment loss identified is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future credit losses that have not yet been incurred). The present value of the estimated future cash flows is discounted at the financial asset's original effective interest rate (i.e., the effective interest rate computed at initial recognition).

The carrying amount of the asset is reduced through the use of an allowance account and the loss is recognised in the statement of profit or loss. Interest income continues to be accrued on the reduced carrying amount using the rate of interest used to discount the future cash flows for the purpose of measuring the impairment loss. Loans and receivables together with any associated allowance are written off when there is no realistic prospect of future recovery and all collateral has been realised or has been transferred to the Group.

If, in a subsequent period, the amount of the estimated impairment loss increases or decreases because of an event occurring after the impairment was recognised, the previously recognised impairment loss is increased or reduced by adjusting the allowance account. If a write-off is later recovered, the recovery is credited to the statement of profit or loss.

FINANCIAL LIABILITIES

Initial recognition and measurement

Financial liabilities are classified, at initial recognition, as financial liabilities at fair value through profit or loss or loans and borrowings, as appropriate.

All financial liabilities are recognised initially at fair value and, in the case of loans and borrowings, net of directly attributable transaction costs.

The Group's financial liabilities include trade payables, other payables, accruals, a derivative financial instrument, interest-bearing bank borrowings, a finance lease payable and amounts due to non-controlling shareholders of subsidiaries.

2.4 Summary of Significant Accounting Policies (continued)

FINANCIAL LIABILITIES (CONTINUED)

Subsequent measurement

The subsequent measurement of financial liabilities depends on their classification as follows:

Financial liabilities at fair value through profit or loss

Financial liabilities at fair value through profit or loss include financial liabilities held for trading and financial liabilities designated upon initial recognition as fair value through profit or loss.

Financial liabilities are classified as held for trading if they are acquired for the purpose of repurchasing in the near term. The category includes derivative financial instruments entered into by the Group that are not designated as hedging instruments in hedge relationships as defined by HKAS 39. Separated embedded derivatives are also classified as held for trading unless they are designated as effective hedging instruments. Gains or losses on liabilities held for trading are recognised in the statement of profit or loss. The net fair value gain or loss recognised in the statement of profit or loss does not include any interest charged on these financial liabilities.

Financial liabilities designated upon initial recognition as at fair value through profit or loss are designated at the date of initial recognition and only if the criteria in HKAS 39 are satisfied.

Loans and borrowings

After initial recognition, interest-bearing loans and borrowings are subsequently measured at amortised cost, using the effective interest rate method unless the effect of discounting would be immaterial, in which case they are stated at cost. Gains and losses are recognised in the statement of profit or loss when the liabilities are derecognised as well as through the effective interest rate amortisation process.

Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the effective interest rate. The effective interest rate amortisation is recognised in the statement of profit or loss.

Financial guarantee contracts

Financial guarantee contracts issued by the Group are those contracts that require a payment to be made to reimburse the holder for a loss it incurs because the specified debtor fails to make a payment when due in accordance with the terms of a debt instrument. A financial guarantee contract is recognised initially as a liability at its fair value, adjusted for transaction costs that are directly attributable to the issuance of the guarantee. Subsequent to initial recognition, the Group measures the financial guarantee contract at a higher of: (i) the amount of the best estimate of the expenditure required to settle the present obligation at the end of the reporting period; and (ii) the amount initially recognised less, when appropriate, cumulative amortisation.

NOTES TO FINANCIAL STATEMENTS

31 December 2015

2.4 Summary of Significant Accounting Policies (continued)

DERECOGNITION OF FINANCIAL LIABILITIES

A financial liability is derecognised when the obligation under the liability is discharged or cancelled, or expires.

When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a derecognition of the original liability and a recognition of a new liability, and the difference between the respective carrying amounts is recognised in the statement of profit or loss.

OFFSETTING OF FINANCIAL INSTRUMENTS

Financial assets and financial liabilities are offset and the net amount is reported in the statement of financial position if there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, or to realise the assets and settle the liabilities simultaneously.

DERIVATIVE FINANCIAL INSTRUMENTS

Initial recognition and subsequent measurement

The Group uses derivative financial instruments, such as forward currency contract to hedge its foreign currency risk. Such derivative financial instruments are initially recognised at fair value on the date on which a derivative contract is entered into and are subsequently remeasured at fair value. Derivatives are carried as assets when the fair value is positive and as liabilities when the fair value is negative.

Any gains or losses arising from changes in fair value of derivatives are taken directly to the statement of profit or loss.

Current versus non-current classification

Derivative instruments that are not designated as effective hedging instruments are classified as current or non-current or separated into current and non-current portions based on an assessment of the facts and circumstances (i.e. the underlying contracted cash flows).

- Where the Group expects to hold a derivative as an economic hedge (and does not apply hedge accounting) for a period beyond 12 months after the end of the reporting period, the derivative is classified as non-current (or separated into current and non-current portions) consistently with the classification of the underlying item.
- Embedded derivatives that are not closely related to the host contract are classified consistently with the cash flows of the host contract.
- Derivative instruments that are designated as, and are effective hedging instruments, are classified consistently with the classifications of the underlying hedge item. The derivative instruments are separated into current portions and non-current portions only if a reliable allocation can be made.

2.4 Summary of Significant Accounting Policies (continued)

BIOLOGICAL ASSETS

Biological assets are living animals and are measured on initial recognition and at the financial year end at their fair value less costs to sell. The fair value of biological assets is measured at the market prices in the local market. A gain or loss arising on initial recognition of a biological asset at fair value less costs to sell and from a change in fair value less costs to sell of a biological asset shall be included in the statement of profit or loss for the period in which it arises.

INVENTORIES

Inventories are stated at the lower of cost and net realisable value. Cost is determined on the first-in, first-out basis. Net realisable value is based on estimated selling prices less any estimated costs to be incurred to completion and disposal.

CASH AND CASH EQUIVALENTS

For the purpose of the consolidated statement of cash flows, cash and cash equivalents comprise cash on hand and demand deposits, and short term highly liquid investments that are readily convertible into known amounts of cash, are subject to an insignificant risk of changes in value, and have a short maturity of generally within three months when acquired, less bank overdrafts which are repayable on demand and form an integral part of the Group's cash management.

For the purpose of the consolidated statement of financial position, cash and cash equivalents comprise cash on hand and at banks, including term deposits, which are not restricted as to use.

PROVISIONS

A provision is recognised when a present obligation (legal or constructive) has arisen as a result of a past event and it is probable that a future outflow of resources will be required to settle the obligation, provided that a reliable estimate can be made of the amount of the obligation.

When the effect of discounting is material, the amount recognised for a provision is the present value at the end of the reporting period of the future expenditures expected to be required to settle the obligation. The increase in the discounted present value amount arising from the passage of time is included in finance costs in the statement of profit or loss.

INCOME TAX

Income tax comprises current and deferred tax. Income tax relating to items recognised outside profit or loss is recognised outside profit or loss, either in other comprehensive income or directly in equity.

Current tax assets and liabilities are measured at the amount expected to be recovered from or paid to the taxation authorities, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period, taking into consideration interpretations and practices prevailing in the countries/jurisdictions in which the Group operates.

Deferred tax is provided, using the liability method, on all temporary differences at the end of the reporting period between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes.

NOTES TO FINANCIAL STATEMENTS

31 December 2015

2.4 Summary of Significant Accounting Policies (continued)

INCOME TAX (CONTINUED)

Deferred tax liabilities are recognised for all taxable temporary differences, except:

- when the deferred tax liability arises from the initial recognition of goodwill or an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss; and
- in respect of taxable temporary differences associated with investments in subsidiaries and associates, when the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not reverse in the foreseeable future.

Deferred tax assets are recognised for all deductible temporary differences, the carryforward of unused tax credits and any unused tax losses. Deferred tax assets are recognised to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, the carryforward of unused tax credits and unused tax losses can be utilised, except:

- when the deferred tax asset relating to the deductible temporary differences arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss; and
- in respect of deductible temporary differences associated with investments in subsidiaries and associates, deferred tax assets are only recognised to the extent that it is probable that the temporary differences will reverse in the foreseeable future and taxable profit will be available against which the temporary differences can be utilised.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilised. Unrecognised deferred tax assets are reassessed at the end of each reporting period and are recognised to the extent that it has become probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply to the period when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

Deferred tax assets and deferred tax liabilities are offset if a legally enforceable right exists to set off current tax assets against current tax liabilities and the deferred taxes relate to the same taxable entity and the same taxation authority.

GOVERNMENT GRANTS

Government grants are recognised at their fair value where there is reasonable assurance that the grant will be received and all attaching conditions will be complied with. When the grant relates to an expense item, it is recognised as income on a systematic basis over the periods that the costs, which it is intended to compensate, are expensed. Where the grant relates to an asset, the fair value is credited to a deferred income account and is released to the statement of profit or loss over the expected useful life of the relevant asset by equal annual instalments.

REVENUE RECOGNITION

Revenue is recognised when it is probable that the economic benefits will flow to the Group and when the revenue can be measured reliably, on the following bases:

- (a) from restaurant operations, when catering services have been provided to customers;
- (b) from the sale of food and other items, when the products are sold to customers and the significant risks and rewards of ownership have been transferred to the buyer, provided that the Group maintains neither managerial involvement to the degree usually associated with ownership, nor effective control over the food and the products sold;
- (c) from poultry farm operations, when the livestock or the slaughtered chicken are sold to customers and the significant risks and rewards of ownership have been transferred to the buyer, provided that the Group maintains neither management involvement to the degree usually associated with ownership, nor effective control over the stock sold;
- (d) rental income, on a time proportion basis over the lease terms;
- (e) interest income, on an accrual basis using the effective interest method by applying the rate that exactly discounts the estimated future cash receipts over the expected life of the financial instrument or a shorter period, when appropriate, to the net carrying amount of the financial assets;
- (f) sponsorship income, when there is reasonable assurance that the sponsorship income will be received and all attaching conditions will be complied with. Where the sponsorship income relates to an asset, the fair value is credited to a deferred income account and is released to the statement of profit or loss over the expected useful life of the relevant asset by equal annual instalments; and
- (g) government grants, where there is reasonable assurance that the government grant will be received and all attaching conditions will be complied with, as further explained in the accounting policies for "government grants" above.

SHARE-BASED PAYMENTS

The Company operates share option schemes for the purpose of providing incentives and rewards to eligible participants who contribute to the success of the Group's operations. Employees (including directors) of the Group receive remuneration in the form of share-based payments, whereby employees render services as consideration for equity instruments ("equity-settled transactions").

The cost of equity-settled transactions with employees for grants after 7 November 2002 is measured by reference to the fair value at the date at which they are granted. The fair value is determined by an external valuer using a binomial model.

NOTES TO FINANCIAL STATEMENTS

31 December 2015

2.4 Summary of Significant Accounting Policies (continued)

SHARE-BASED PAYMENTS (CONTINUED)

The cost of equity-settled transactions is recognised in employee benefit expense, together with a corresponding increase in equity, over the period in which the performance and/or service conditions are fulfilled. The cumulative expense recognised for equity-settled transactions at the end of each reporting period until the vesting date reflects the extent to which the vesting period has expired and the Group's best estimate of the number of equity instruments that will ultimately vest. The charge or credit to the statement of profit or loss for a period represents the movement in the cumulative expense recognised as at the beginning and end of that period.

Service and non-market performance conditions are not taken into account when determining the grant date fair value of awards, but the likelihood of the conditions being met is assessed as part of the Group's best estimate of the number of equity instruments that will ultimately vest. Market performance conditions are reflected within the grant date fair value. Any other conditions attached to an award, but without an associated service requirement, are considered to be non-vesting conditions. Non-vesting conditions are reflected in the fair value of an award and lead to an immediate expensing of an award unless there are also service and/or performance conditions.

For awards that do not ultimately vest because non-market performance and/or service conditions have not been met, no expense is recognised. Where awards include a market or non-vesting condition, the transactions are treated as vesting irrespective of whether the market or non-vesting condition is satisfied, provided that all other performance and/or service conditions are satisfied.

Where the terms of an equity-settled award are modified, as a minimum an expense is recognised as if the terms had not been modified, if the original terms of the award are met. In addition, an expense is recognised for any modification that increases the total fair value of the share-based payments, or is otherwise beneficial to the employee as measured at the date of modification.

Where an equity-settled award is cancelled, it is treated as if it had vested on the date of cancellation, and any expense not yet recognised for the award is recognised immediately. This includes any award where non-vesting conditions within the control of either the Group or the employee are not met. However, if a new award is substituted for the cancelled award, and is designated as a replacement award on the date that it is granted, the cancelled and new awards are treated as if they were a modification of the original award, as described in the previous paragraph.

The dilutive effect of outstanding options is reflected as additional share dilution in the computation of earnings per share.

OTHER EMPLOYEE BENEFITS

Retirement benefit schemes

The Group operates a defined contribution Mandatory Provident Fund retirement benefit scheme (the "MPF Scheme") under the Hong Kong Mandatory Provident Fund Schemes Ordinance for those employees who are eligible to participate in the MPF Scheme. Contributions are made based on a percentage of the employees' basic salaries and are charged to the statement of profit or loss as they become payable in accordance with the rules of the MPF Scheme. The assets of the MPF Scheme are held separately from those of the Group in an independently administered fund. The Group's employer contributions vest fully with the employees when contributed into the MPF Scheme.

The employees of the Group's subsidiaries which operate in Mainland China are required to participate in a central pension scheme operated by local municipal government. These subsidiaries are required to contribute a certain percentage of their payroll costs to the central pension scheme. The contributions are charged to the statement of profit or loss as they become payable in accordance with the rules of the central pension scheme.

DIVIDENDS

Final dividends are recognised as a liability when they are approved by the shareholders in a general meeting. In prior years, final dividends proposed by the directors were classified as a separate allocation of retained profits within the equity section of the statement of financial position, until they have been approved by the shareholders in a general meeting.

Interim dividends are simultaneously proposed and declared, because the Company's memorandum and articles of association grant the directors the authority to declare interim dividends. Consequently, interim dividends are recognised immediately as a liability when they are proposed and declared.

FOREIGN CURRENCIES

These financial statements are presented in Hong Kong dollars, which is the Company's functional currency. Each entity in the Group determines its own functional currency and items included in the financial statements of each entity are measured using that functional currency. Foreign currency transactions recorded by the entities in the Group are initially recorded using their respective functional currency rates prevailing at the dates of the transactions. Monetary assets and liabilities denominated in foreign currencies are translated at the functional currency rates of exchange ruling at the end of the reporting period. Differences arising on settlement or translation of monetary items are recognised in the statement of profit or loss.

Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was measured. The gain or loss arising on translation of a non-monetary item measured at fair value is treated in line with the recognition of the gain or loss on change in fair value of the item (i.e., translation difference on the item whose fair value gain or loss is recognised in other comprehensive income or profit or loss is also recognised in other comprehensive income or profit or loss, respectively).

NOTES TO FINANCIAL STATEMENTS

31 December 2015

2.4 Summary of Significant Accounting Policies (continued)

FOREIGN CURRENCIES (CONTINUED)

The functional currencies of certain overseas subsidiaries are currencies other than the Hong Kong dollar. As at the end of the reporting period, the assets and liabilities of these entities are translated into Hong Kong dollars at the exchange rates prevailing at the end of the reporting period and their statements of profit or loss are translated into Hong Kong dollars at the weighted average exchange rates for the year. The resulting exchange differences are recognised in other comprehensive income and accumulated in the exchange fluctuation reserve. On disposal of a foreign operation, the component of other comprehensive income relating to that particular foreign operation is recognised in the statement of profit or loss.

Any goodwill arising on the acquisition of a foreign operation and any fair value adjustments to the carrying amounts of assets and liabilities arising on acquisition are treated as assets and liabilities of the foreign operation and translated at the closing rate.

For the purpose of the consolidated statement of cash flows, the cash flows of overseas subsidiaries are translated into Hong Kong dollars at the exchange rates ruling at the dates of the cash flows. Frequently recurring cash flows of overseas subsidiaries which arise throughout the year are translated into Hong Kong dollars at the weighted average exchange rates for the year.

3. Significant Accounting Judgements and Estimates

The preparation of the Group's financial statements requires management to make judgements, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and their accompanying disclosures, and the disclosure of contingent liabilities. Uncertainty about these assumptions and estimates could result in outcomes that could require a material adjustment to the carrying amounts of the assets or liabilities affected in the future.

JUDGEMENTS

In the process of applying the Group's accounting policies, management has made the following judgements, apart from those involving estimations, which have the most significant effect on the amounts recognised in the financial statements:

Operating lease commitments – Group as lessor

The Group has entered into operating leases on its investment property portfolio. The Group has determined, based on an evaluation of the terms and conditions of the arrangements, that it retains all the significant risks and rewards of ownership of these properties which are leased out on operating leases.

NOTES TO FINANCIAL STATEMENTS

31 December 2015

3. Significant Accounting Judgements and Estimates (continued)

JUDGEMENTS (CONTINUED)

Classification between investment properties and owner-occupied properties

The Group determines whether a property qualifies as an investment property, and has developed criteria in making that judgement. Investment property is a property held to earn rentals or for capital appreciation or both. Therefore, the Group considers whether a property generates cash flows largely independently of the other assets held by the Group. Some properties comprise a portion that is held to earn rentals or for capital appreciation and another portion that is held for use in the production or supply of goods or services or for administrative purposes. If these portions could be sold separately or leased out separately under a finance lease, the Group accounts for the portions separately. If the portions could not be sold separately, the property is an investment property only if an insignificant portion is held for use in the production or supply of goods or services or for administrative purposes. Judgement is made on an individual property basis to determine whether ancillary services are so significant that a property does not qualify as an investment property.

Income taxes

The Group is subject to income taxes in different jurisdictions. Significant judgement is involved in determining the provision for income taxes. Determining income tax provisions involves judgement on the future tax treatment of certain transactions and interpretation of tax rules. The Group carefully evaluates tax implications of transactions and tax provisions are set up accordingly. The tax treatment of such transactions is reconsidered periodically to take into account all changes in tax legislation, interpretations and practices in respect thereof.

There are certain transactions and computations for which the ultimate tax determination is uncertain during the ordinary course of business. The Group recognises liabilities for expected tax issues based on estimates of whether additional taxes will be due. Where the final tax outcome of these matters is different from the amounts that were initially recognised, such differences will impact the income tax and deferred tax provisions in the period in which such determination is made.

ESTIMATION UNCERTAINTY

The key assumptions concerning the future and other key sources of estimation uncertainty at the end of the reporting period, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are described below.

Useful lives and residual values of items of property, plant and equipment

In determining the useful lives and residual values of items of property, plant and equipment, the Group has to consider various factors, such as technical or commercial obsolescence arising from changes or improvements in provision of services, or from a change in the market demand for the product or service output of an asset, the expected usage of the asset, the expected physical wear and tear, the care and maintenance of the asset, and legal or similar limits on the use of the asset. The estimation of the useful life of the asset is based on the experience of the Group with similar assets that are used in a similar way. Adjustment of depreciation is made if the estimated useful lives and/or the residual values of items of property, plant and equipment are different from previous estimation. Useful lives and residual values are reviewed at the end of each reporting period, based on changes in circumstances.

NOTES TO FINANCIAL STATEMENTS

31 December 2015

3. Significant Accounting Judgements and Estimates (continued)

ESTIMATION UNCERTAINTY (CONTINUED)

Impairment of goodwill

The Group determines whether goodwill is impaired at least on an annual basis. This requires an estimation of the value in use of the cash-generating units to which the goodwill is allocated. Estimating the value in use requires the Group to make an estimate of the expected future cash flows from the cash-generating units and also to choose a suitable discount rate in order to calculate the present value of those cash flows. Further details are given in note 16.

Impairment of non-financial assets (other than goodwill)

The Group assesses whether there are any indicators of impairment for all non-financial assets at the end of each reporting period. Indefinite life intangible assets are tested for impairment annually and at other times when such an indicator exists. Other non-financial assets are tested for impairment when there are indicators that the carrying amounts may not be recoverable. An impairment exists when the carrying value of an asset or a cash-generating unit exceeds its recoverable amount, which is the higher of its fair value less costs of disposal and its value in use. The calculation of the fair value less costs of disposal is based on available data from binding sales transactions in an arm's length transaction of similar assets or observable market prices less incremental costs for disposing of the asset. When value in use calculations are undertaken, management must estimate the expected future cash flows from the asset or cash-generating unit and choose a suitable discount rate in order to calculate the present value of those cash flows.

Estimation of fair value of investment properties

Investment properties are stated at their fair values. The fair value at the end of each reporting period was based on a valuation on these properties estimated by the directors or conducted by an independent firm of professionally qualified valuers using property valuation techniques which involve making assumptions on certain market conditions. Favourable or unfavourable changes to these assumptions would result in changes in the fair values of the Group's investment properties and the corresponding adjustments to the gain or loss recognised in the statement of profit or loss or other comprehensive income.

Estimation of fair value of biological assets

The fair value of biological assets is determined at the end of each reporting period by independent valuers according to a market value assessment. The valuer has made reference to the market-determined prices, cultivation area, species, growing conditions, cost incurred and/or the professional valuation.

Impairment allowances on loans and receivables

The Group regularly reviews its loans and receivables to assess impairment. In determining whether a loan or receivable or a group of loans and receivables is impaired and impairment losses are incurred, the Group considers, inter alia, whether there is any observable data indicating that there is a measurable decrease in the estimated future cash flows from its loans and receivables. This requires the Group to make estimates about expected future cash flows, and hence they are subject to uncertainty.

NOTES TO FINANCIAL STATEMENTS

31 December 2015

3. Significant Accounting Judgements and Estimates (continued)

ESTIMATION UNCERTAINTY (CONTINUED)

Deferred tax assets

Deferred tax assets are recognised for unused tax losses to the extent that it is probable that future taxable profit will be available against which the losses can be utilised. Significant management judgement is required to determine the amount of deferred tax assets that can be recognised, based upon the likely timing and level of future taxable profits together with future tax planning strategies.

4. Operating Segment Information

The Group is principally engaged in the provision of food catering services through a chain of restaurants. Information reported to the Group's chief operating decision maker (i.e. the chief executive officer) for the purpose of resources allocation and performance assessment focuses on the operating results of the Group as a whole as the Group's resources are integrated and no discrete operating segment financial information is available. Accordingly, no operating segment information is presented.

13. Property, Plant and Equipment (continued)

The Group's lands included in property, plant and equipment with an aggregate net carrying amount of HK\$76,411,000 (2014: HK\$77,955,000) are situated in Hong Kong and are held under the following lease terms:

	2015 HK\$'000	2014 HK\$'000
– Long term lease	26,336	26,367
– Medium term leases	50,075	51,588
	76,411	77,955

At 31 December 2015, the net carrying amounts of the Group's property, plant and equipment held under a finance lease included in furniture, fixtures and equipment were HK\$556,000 (2014: HK\$775,000).

As at 31 December 2015, the leasehold land and buildings with an aggregate net carrying amount of approximately HK\$87,691,000 (2014: HK\$38,994,000) situated in Hong Kong were pledged to secure the banking facilities granted to the Group (note 28).

During the year, the Group's management identified certain branches which continued to be under-performed and estimated corresponding recoverable amounts of its property, plant and equipment. Based on these estimates, an impairment loss of HK\$10,348,000 (2014: NIL) was recognised to write down the carrying amounts of these property, plant and equipment to their recoverable amounts of HK\$9,367,000 as at 31 December 2015. The estimates of the recoverable amounts were based on the value in use of these property, plant and equipment determined using a discount rate of 5.1%.

Carrying amount at 1 January	17,300	14,850
Net gain from a fair value adjustment	4,600	2,450
Carrying amount at 31 December	21,900	17,300

The Group's investment properties consist of eleven car parking spaces and one residential property in Hong Kong. The directors of the Company have determined that the investment properties consist of two classes of asset, i.e., car parking spaces and residential property, based on the nature, characteristics and risks of each property. The Group's investment properties were revalued on 31 December 2015 based on valuations performed by DTZ Debenham Tie Leung Limited, an independent professionally qualified valuer, at HK\$21,900,000. Each year, the Group appoints an external valuer to be responsible for the external valuations of the Group's properties. Selection criteria include market knowledge, reputation, independence and whether professional standards are maintained. The Group has discussions with the valuer on the valuation assumptions and valuation results once a year when the valuation is performed for annual financial reporting.

The investment properties are leased to third parties under operating lease arrangements, further summary details of which are included in note 36(A) to the financial statements.

At 31 December 2015, the Group's investment properties with a total carrying amount of HK\$18,500,000 (2014: HK\$14,700,000) were pledged to secure the banking facilities granted to the Group (note 28).

FAIR VALUE HIERARCHY

All investment properties were classified under Level 3 in the fair value hierarchy. During the year, there were no transfers of fair value measurements between Level 1 and Level 2 and no transfers into or out of Level 3 (2014: Nil).

Details of fair value hierarchy are set out in note 2.4 of the financial statements.

Reconciliation of fair value measurements categorised within Level 3 of the fair value hierarchy:

	Car parking spaces HK\$'000	Residential property HK\$'000	Total HK\$'000
Carrying amount at 1 January 2014:	12,100	2,750	14,850
Net gain from a fair value adjustment recognised in profit or loss	2,200	250	2,450
Carrying amount at 31 December 2014 and 1 January 2015:	14,300	3,000	17,300
Net gain from a fair value adjustment recognised in profit or loss	4,200	400	4,600
Carrying amount at 31 December 2015	18,500	3,400	21,900

NOTES TO FINANCIAL STATEMENTS

31 December 2015

15. Investment Properties (continued)

FAIR VALUE HIERARCHY (CONTINUED)

Below is a summary of the valuation technique used and the key inputs to the valuation of investment properties:

	Valuation technique	Significant unobservable inputs	Value	
			2015	2014
Car parking spaces	Income capitalisation approach	Estimated rental value (per car parking space per month)	HK\$5,300	HK\$4,600
		Capitalisation rate	3.75%	4.25%
Residential property	Income capitalisation approach	Estimated rental value (per sq. ft. per month)	HK\$18.5	HK\$16
		Capitalisation rate	3.00%	3.00%

A significant increase/decrease in the estimated rental value would result in a significant increase/decrease in the fair value of the investment properties. A significant increase/decrease in the capitalisation rate would result in a significant decrease/increase in the fair value of the investment properties.

16. Goodwill

IMPAIRMENT TESTING OF GOODWILL

Goodwill acquired through business combinations is allocated to the following cash-generating units (the "Cash-generating Units") for impairment testing:

- Restaurant operations;
- Bakery operations;
- Property investment; and
- Poultry farm operations.

NOTES TO FINANCIAL STATEMENTS

31 December 2015

16. Goodwill (continued)

The carrying amount of goodwill allocated to each of the Cash-generating Units is as follows:

	2015 HK\$'000	2014 HK\$'000
Restaurant operations	16,766	16,766
Bakery operations	7,072	7,072
Property investment	61	61
Poultry farm operations	16,004	16,727
	39,903	40,626

The recoverable amounts of the Cash-generating Units have been determined based on a value in use calculation using cash flow projections based on financial budgets covering a five-year period approved by senior management. The discount rate applied to cash flow projections is 5.1% (2014: 8.5%), and the cash flows beyond the five-year period are extrapolated using an average growth rate of 2% (2014: 2%).

Assumptions were used in the value in use calculation of the Cash-generating Units for the years ended 31 December 2015 and 2014. The following describes each key assumption on which management has based its cash flow projections to undertake impairment testing of goodwill:

Budgeted gross margins – The basis used to determine the value assigned to the budgeted gross margins is the average gross margins achieved in the year immediately before the budget year, increased for expected efficiency improvements, and expected market development.

Discount rates – The discount rates used are before tax and reflect specific risks relating to the relevant units.

19. Biological Assets (continued)

The numbers of biological assets at the end of the reporting period are summarised as follows:

	2015	2014
Immature chicken breeders	38,320	36,567
Mature chicken breeders	122,316	116,964
Broilers	274,912	241,011
Pig breeders	724	1,065
Pig commodities	5,264	6,691
	441,536	402,298

Analysed for reporting purposes as:

	2015 HK\$'000	2014 HK\$'000
Current assets	15,049	16,743
Non-current assets	3,600	4,041
At the end of the reporting period	18,649	20,784

The immature chicken breeders and mature chicken breeders are primarily held for further growth for the production of broilers and are classified as current assets. The immature breeders are primarily bred for further growth into mature breeders. The breeder hogs are primarily held to produce biological assets. Breeder hogs are classified as non-current assets.

In accordance with the valuation report issued by Stern Appraisal Limited, an independent professionally qualified valuer, the fair value less costs to sell is determined with reference to the market-determined prices, cultivation area, species, growing conditions, cost incurred and/or the professional valuation. Each year, the Group appoints an external valuer to be responsible for the external valuations of the Group's biological assets. Selection criteria include market knowledge, reputation, independence and whether professional standards are maintained. The Group has discussions with the valuer on the valuation assumptions and valuation results once a year when the valuation is performed for annual financial reporting.

NOTES TO FINANCIAL STATEMENTS

31 December 2015

19. Biological Assets (continued)

FAIR VALUE HIERARCHY

The biological assets were classified under Level 3 in the fair value hierarchy. During the year, there were no transfers of fair value measurements between Level 1 and Level 2 and no transfers into or out of Level 3 (2014: Nil).

Below is a summary of the valuation technique used and the key inputs to the valuation of biological assets:

	Valuation technique	Significant unobservable inputs	Range	
			2015	2014
Biological assets	Market approach	Estimated selling price (per kg/unit)	RMB24 to RMB2,420	RMB17 to RMB1,275

A significant increase/decrease in the estimated selling price would result in a significant increase/decrease in the fair value of the biological assets.

20. Deferred Tax

The movements in deferred tax assets and liabilities during the year are as follows:

DEFERRED TAX ASSETS

	Depreciation in excess of related depreciation allowance HK\$'000	Losses available for offsetting against future taxable profits HK\$'000	Total HK\$'000
At 1 January 2014	39,537	33,881	73,418

20. Deferred Tax (continued)

DEFERRED TAX LIABILITIES

	Depreciation allowance in excess of related depreciation HK\$'000	Withholding tax HK\$'000	Total HK\$'000
At 1 January 2014	13,953	8,103	22,056
Deferred tax charged/(credited) to the statement of profit or loss during the year (note 10)	(2,808)	69	(2,739)
Exchange differences	(5)	–	(5)
Gross deferred tax liabilities at 31 December 2014 and 1 January 2015	11,140	8,172	19,312
Deferred tax charged/(credited) to the statement of profit or loss during the year (note 10)	(1,663)	383	(1,280)
Exchange differences	(32)	–	(32)
Gross deferred tax liabilities at 31 December 2015	9,445	8,555	18,000

For presentation purposes, certain deferred tax assets and liabilities have been offset in the statement of financial position. The following is an analysis of the deferred tax balances of the Group for financial reporting purposes:

	2015 HK\$'000	2014 HK\$'000
Net deferred tax assets recognised in the consolidated statement of financial position	87,532	84,140
Net deferred tax liabilities recognised in the consolidated statement of financial position	(16,943)	(18,267)
	70,589	65,873

Deferred income tax assets are recognised for tax losses carrying forwards to the extent that realisation of the related tax benefits through the future taxable profits is probable. The Group also has tax losses arising in Hong Kong of HK\$77,294,000 (2014: HK\$77,251,000), subject to the agreement by the Hong Kong Inland Revenue Department that are available indefinitely for offsetting against future taxable profits of the companies in which the losses arose. The Group also has tax losses arising in Mainland China of HK\$36,630,000 (2014: HK\$17,680,000) that will expire in one to five years for offsetting against future taxable profits. Deferred tax assets have not been recognised in respect of these losses as they have arisen in subsidiaries that have been loss-making for some time and it is not considered probable that future taxable profits will be available against which the tax losses can be utilised.

NOTES TO FINANCIAL STATEMENTS

31 December 2015

20. Deferred Tax (continued)

Pursuant to the PRC Corporate Income Tax Law, a 10% withholding tax is levied on dividends declared to foreign investors from the foreign investment enterprise established in Mainland China. The requirement is effective from 1 January 2008 and applies to earnings after 31 December 2007. A lower withholding tax rate may be applied if there is a tax treaty between Mainland China and the jurisdiction of the foreign investors. For the Group, the applicable rate is 5% or 10%. The Group is therefore liable for withholding taxes on dividends distributed by those subsidiaries established in Mainland China in respect of earnings generated from 1 January 2008. At 31 December 2015, deferred tax liabilities of HK\$8,555,000 (2014: HK\$8,172,000) have been recognised for withholding taxes that would be payable on the unremitted earnings that are subject to withholding taxes of the Group's subsidiaries established in Mainland China.

There are no income tax consequences attaching to the payment of dividends by the Company to its shareholders.

21. Inventories

	2015 HK\$'000	2014 HK\$'000
Food and beverages, and other operating items for restaurant and bakery operations	134,701	139,527
Frozen poultry farm products	4,822	4,262

	144,265	147,834

NOTES TO FINANCIAL STATEMENTS

31 December 2015

22. Trade Receivables

The Group's trading terms with its customers are mainly on cash and credit card settlement. The Group also grants a credit period between 30 to 90 days to certain customers. The Group seeks to maintain strict control over its outstanding receivables to minimise credit risk. Overdue balances are reviewed regularly by senior management. In view of the aforementioned and the fact that the Group's trade receivables relate to a large number of diversified customers, there is no significant concentration of credit risk. The Group does not hold any collateral or other credit enhancements over its trade receivable balances. Trade receivables are non-interest-bearing.

An aged analysis of the trade receivables as at the end of the reporting period, based on the invoice date, is as follows:

	2015 HK\$'000	2014 HK\$'000
Within 1 month	16,188	20,406
1 to 3 months	5,124	7,929
Over 3 months	4,423	4,635
	25,735	32,970

An aged analysis of the trade receivables as at the end of the reporting period, based on the payment due date, that are not individually nor collectively considered to be impaired, is as follows:

	2015 HK\$'000	2014 HK\$'000
Neither past due nor impaired	13,764	15,110
Less than 1 month past due	5,098	9,045
1 to 3 months past due	2,582	4,132
Over 3 months past due	4,291	4,683
	25,735	32,970

Receivables that were neither past due nor impaired mainly relate to credit card receivables from banks for whom there was no recent history of default.

Receivables that were past due but not impaired relate to a number of independent customers that have a good track record with the Group. Based on past experience, the directors of the Company are of the opinion that no provision for impairment is necessary in respect of these balances as there has not been a significant change in credit quality and the balances are still considered fully recoverable.

NOTES TO FINANCIAL STATEMENTS

Less:		
Pledged deposits for short term bank borrowings	(13,083)	(13,591)
Cash and Cash equivalents	397,453	336,903

At the end of the reporting period, the cash and bank balances of the Group denominated in RMB amounted to HK\$253,492,000 (2014: HK\$250,150,000). The RMB is not freely convertible into other currencies, however, under Mainland China's Foreign Exchange Control Regulations and Administration of Settlement, Sale and Payment of Foreign Exchange Regulations, the Group is permitted to exchange RMB for other currencies through banks authorised to conduct foreign exchange business.

Cash at banks earns interest at floating rates based on daily bank deposit rates. Short term time deposits are made for varying periods of between one day and six months depending on the immediate cash requirements of the Group, and earn interest at the respective short term time deposit rates. The bank balances and pledged deposits are deposited with creditworthy banks with no recent history of default.

NOTES TO FINANCIAL STATEMENTS

31 December 2015

32. Share Option Schemes

The Company operates a pre-initial public offering share option scheme (the "Pre-IPO Share Option Scheme") and a share option scheme (the "Share Option Scheme") (collectively, the "Schemes") for the purpose of providing incentives and rewards to eligible participants who contributed to the success of the Group's operations and to motivate eligible participants to work towards enhancing the value of the Group for the benefits of the Group and the shareholders as a whole. The principal terms of the Pre-IPO Share Option Scheme are similar to the terms of the Share Option Scheme except that (i) no further options could be granted under the Pre-IPO Share Option Scheme upon the listing of the Company; and (ii) the exercise price of the share options and the vesting period are different as further detailed below.

Eligible participants of the Schemes include the Company's directors, including executive directors, non-executive directors and independent non-executive directors, employees of the Group and any advisors, consultants, distributors, contractors, suppliers, agents, customers, business partners, joint venture business partners, promoters or service providers of any member of the Group who, in the opinion of the board of directors, have contributed or will contribute to the Group. The Schemes became effective on 9 June 2007 and, unless otherwise cancelled or amended, will remain in force for 10 years from that date.

The maximum number of unexercised share options currently permitted to be granted under the Schemes is an amount equivalent, upon their exercise, to 10% of the shares of the Company in issue on the listing date of the Company on 29 June 2007 (the "Listing Date"). The maximum number of shares issuable under share options to each eligible participant in the Schemes within any 12-month period is limited to 1% of the shares of the Company in issue at any time. Any further grant of share options in excess of this limit is subject to shareholders' approval in advance in a general meeting.

Share options granted under the Schemes to a director, chief executive or substantial shareholder of the Company, or to any of their associates, are subject to approval in advance by the independent non-executive directors of the Company. In addition, any share options granted to a substantial shareholder or an independent non-executive director of the Company, or to any of their associates, in excess of 0.1% of the shares of the Company in issue on the date of such grant or with an aggregate value (based on the closing price of the Company's shares at the date of grant) in excess of HK\$5 million, within any 12-month period, are subject to shareholders' approval in advance in a general meeting.

The offer of a grant of share options under the Schemes may be accepted within 28 days from the date of offer, upon payment of a nominal consideration of HK\$1 in total by the grantee. The exercise period of the share options granted is determinable by the directors, and may commence from the date of the offer of the share options and ends on a date which is not later than 10 years from the date of the offer of the share options or the expiry date of the Schemes, if earlier.

The exercise price of the share options under the Pre-IPO Share Option Scheme is 50% of the final offer price of the shares issued in connection with the Company's international placing and initial public offering (i.e., HK\$1.59 per share) and the share options are exercisable in the following manner:

Vesting period of the relevant percentage of the options	Maximum percentage of options exercisable
From the second anniversary of the Listing Date to the day immediately preceding the third anniversary of the Listing Date (both days inclusive)	30
From the third anniversary of the Listing Date to the day immediately preceding the fourth anniversary of the Listing Date (both days inclusive)	30
From the fourth anniversary of the Listing Date to the day immediately preceding the fifth anniversary of the Listing Date (both days inclusive)	40

NOTES TO FINANCIAL STATEMENTS

31 December 2015

32. Share Option Schemes (continued)

The exercise price of the share options under the Share Option Scheme is determinable by the board of directors, but may not be less than the higher of (i) the Stock Exchange closing price of the Company's shares on the date of offer of the share options; (ii) the average Stock Exchange closing price of the Company's shares for the five trading days immediately preceding the date of offer and (iii) the nominal value of the Company's shares.

Share options do not confer rights on the holders to dividends or to vote at shareholders' meetings.

The following share options granted under the Pre-IPO Share Option Scheme were outstanding during the year:

	2015		2014	
	Weighted average exercise price HK\$ per share	Number of options '000	Weighted average exercise price HK\$ per share	Number of options '000
At 1 January	1.59	3,800	1.59	4,340
Forfeited during the year	1.59	(280)	1.59	(540)
At 31 December	1.59	3,520	1.59	3,800

The exercise prices and exercise periods of the share options outstanding under the Pre-IPO Share Option Scheme as at the end of the reporting period are as follows:

	Number of options '000	Exercise price HK\$ per share	Exercise period
2015	3,520	1.59	29 June 2009 to 28 June 2017
2014	3,800	1.59	29 June 2009 to 28 June 2017

No share options were granted during the year (2014: Nil) and forfeited share options with an aggregate carrying amount of HK\$540,000 (2014: HK\$1,041,000) were transferred from share option reserve to retained profits during the year.

At 31 December 2015, the Company had 3,520,000 (2014: 3,800,000) share options outstanding under the Pre-IPO Share Option Scheme, which represented approximately 0.34% of the Company's shares in issue as at that date. The exercise in full of the outstanding share options would, under the present capital structure of the Company, result in the issue of 3,520,000 (2014: 3,800,000) additional ordinary shares of the Company and additional share capital of HK\$352,000 (2014: HK\$380,000) and share premium of HK\$5,245,000 (2014: HK\$5,662,000) (before share issue expenses).

No share options were granted under the Share Option Scheme during the year (2014: Nil).

At the date of approval of these financial statements, the Company had 3,220,000 share options outstanding under the Pre-IPO Share Option Scheme, which represented approximately 0.32%, of the Company's shares in issue as at that date.

The amounts of the Group's reserves and the movements therein for the current and prior years are presented in the consolidated statement of changes in equity on page 36 of the financial statements.

CAPITAL RESERVE

The capital reserve represents the waiver of an amount due to a shareholder of the Company amounting to approximately HK\$110,748,000 pursuant to a declaration dated 31 December 2006 and a deed of release dated 12 March 2007.

OTHER RESERVE

The other reserve of the Group represents (i) the aggregate of the nominal value of the paid-up capital of the subsidiaries acquired; and (ii) the difference between the acquisition of equity interests attributable to these then non-controlling shareholders and the nominal value of the shares of a former holding company and an existing subsidiary of the Group issued in exchange therefor prior to the listing of the Company's shares.

34. Note to the Consolidated Statement of Cash Flows

MAJOR NON-CASH TRANSACTION

The Group has entered into rental agreements in respect of its restaurant properties under operating leases. Pursuant to the terms and conditions of the rental agreements, the Group is required to restore the restaurant properties to the conditions as stipulated in the rental agreements. Accordingly, the Group has accrued and capitalised the estimated restoration cost of HK\$1,097,000 (2014: HK\$1,318,000) for such obligations during the year.

35. Contingent Liabilities

At the end of the reporting period, contingent liabilities not provided for in the financial statements were as follows:

	2015 HK\$'000	2014 HK\$'000
Bank guarantees given in lieu of utility and property rental deposits	23,809	25,303

NOTES TO FINANCIAL STATEMENTS

31 December 2015

36. Operating Lease Arrangements

(A) AS LESSOR

The Group leases its investment properties (note 15) to third parties under operating lease arrangements, with leases negotiated for terms ranging from one month to three years. Certain leases are terminable with notice periods given by either the Group or the lessees. The terms of the leases generally also require the tenants to pay security deposits and provide for periodic rent adjustments according to the then prevailing market conditions.

At 31 December 2015, the Group had total future minimum lease receivables under non-cancellable operating leases with its tenants falling due as follows:

	2015 HK\$'000	2014 HK\$'000
Within one year	34	50

(B) AS LESSEE

The Group leases certain of its office premises and restaurant and bakery properties under operating lease arrangements, with lease terms ranging from one to fifty years and certain of the leases contain renewal options.

At 31 December 2015, the Group had total future minimum lease payments under non-cancellable operating leases falling due as follows:

	2015 HK\$'000	2014 HK\$'000
Within one year	348,071	343,125
In the second to fifth years, inclusive	729,721	708,600
Beyond five years	430,179	474,945
	1,507,971	1,526,670

The operating leases of certain restaurant and bakery properties also call for additional rentals, which will be based on a certain percentage of revenue of the operations being undertaken therein pursuant to the terms and conditions as stipulated in the respective rental agreements. As the future revenue of these restaurants could not be accurately determined as at the end of the reporting period, the relevant contingent rental has not been included.

NOTES TO FINANCIAL STATEMENTS

31 December 2015

37. Commitments

In addition to the operating lease commitments detailed in note 36(B) above, the Group had the following capital commitments at the end of the reporting period:

	2015 HK\$'000	2014 HK\$'000
Contracted, but not provided for:		
Leasehold improvements, furniture, fixtures and equipment	28,250	22,502
Buildings	28,005	43,907
	56,255	66,409

38. Related Party Transaction

In addition to the transactions and balances detailed elsewhere in these financial statements, the Group had the following transaction with a related party during the year:

	2015 HK\$'000	2014 HK\$'000
Rental expense to a related party	48	48

Note:

The rental expense to a related party, Ms. Chan Sai Ying, who is the spouse of Mr. Chung Wai Ping, was charged based on mutually agreed terms at a monthly fixed amount of HK\$4,000 (2014: HK\$4,000).

The related party transaction mentioned above constitutes a continuing connected transaction as defined in Chapter 14A of the Listing Rules.

39. Financial Instruments by Category

The carrying amounts of each of the categories of financial instruments as at the end of the reporting period are as follows:

FINANCIAL ASSETS

	2015 HK\$'000	2014 HK\$'000
Loans and receivables:		
Rental deposits	112,102	106,978
Trade receivables	25,735	32,970

Financial liabilities included in other payables and accruals	282,062	274,806
Interest-bearing bank borrowings	279,472	193,527
Finance lease payable	556	775
Due to non-controlling shareholders of subsidiaries	22,747	23,255
	744,668	662,388
	745,909	668,609

40. Fair Value and Fair Value Hierarchy of Financial Instruments

Management has assessed that the fair values of trade receivables, financial assets included in prepayments, deposits and other receivables, pledged deposits, cash and cash equivalents, trade payables, the current portions of financial liabilities included in other payables and accruals, interest-bearing bank borrowings and a finance lease payable approximate to their carrying amounts largely due to the short term maturities of these instruments.

The Group's management is responsible for determining the policies and procedures for the fair value measurement of financial instruments. At each reporting date, management analyses the movements in the values of financial instruments and determines the major inputs applied in the valuation. The valuation is reviewed and approved by management. The valuation process and results are discussed with the audit committee twice a year for interim and annual financial reporting.

The fair values of the financial assets and liabilities are included at the amount at which the instrument could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale. The following methods and assumptions were used to estimate the fair values:

The fair values of rental deposits, the non-current portions of financial liabilities included in other payables and accruals, interest-bearing bank borrowings, a finance lease payable and amounts due to non-controlling shareholders of subsidiaries have been calculated by discounting the expected future cash flows using rates currently available for instruments with similar terms, credit risk and remaining maturities. The Group's own non-performance risk for finance lease payable and interest-bearing bank borrowings as at 31 December 2015 was assessed to be insignificant. In the opinion of the directors, their carrying amounts are not significantly different from their respective fair values.

NOTES TO FINANCIAL STATEMENTS

31 December 2015

40. Fair Value and Fair Value Hierarchy of Financial Instruments (continued)

The Group enters into derivative financial instruments with a creditworthy bank with no recent history of default. Derivative financial instruments, including forward currency contracts, are measured using valuation techniques similar to forward pricing models, using present value calculations. The models incorporate various market observable inputs including the credit quality of counterparties, foreign exchange spot and forward rates curves. The carrying amount of forward currency contracts are the same as their fair values.

FAIR VALUE HIERARCHY

The following table illustrates the fair value measurement hierarchy of the Group's financial instruments:

Liabilities measured at fair value:

As at 31 December 2015

	Fair value measurement using			Total HK\$'000
	Quoted prices in active markets (Level 1) HK\$'000	Significant observable inputs (Level 2) HK\$'000	Significant unobservable inputs (Level 3) HK\$'000	
Derivative financial instrument	–	1,241	–	1,241

As at 31 December 2014

	Fair value measurement using			Total HK\$'000
	Quoted prices in active markets (Level 1) HK\$'000	Significant observable inputs (Level 2) HK\$'000	Significant unobservable inputs (Level 3) HK\$'000	
Derivative financial instrument	–	6,221	–	6,221

During the year, there were no transfers of fair value measurements between Level 1 and Level 2 and no transfers into or out of Level 3 for financial liabilities (2014: Nil).

41. Financial Risk Management Objectives and Policies

The main risks arising from the Group's financial instruments are interest rate risk, credit risk, foreign currency risk and liquidity risk. The board of directors reviews and agrees policies for managing each of these risks periodically and they are summarised below.

INTEREST RATE RISK

Interest rate risk is the risk that the future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Group's exposure to the risk of changes in market interest rates relates primarily to the Group's interest-bearing bank borrowings with floating interest rates. The Group's policy is to obtain the most favourable interest rates available for its borrowings.

For Hong Kong dollar floating-rate borrowings, assuming that the amount of liability outstanding at the end of the reporting period was outstanding for the whole year with all other variables held constant, a 50 basis point increase/decrease in interest rates at 31 December 2015 and 2014 would have decreased/increased the Group's profit before tax by HK\$1,397,000 and HK\$968,000, respectively.

CREDIT RISK

The Group's major exposure to credit risk arises from default of trade receivables, with a maximum exposure equal to their carrying amounts in the consolidated statement of financial position. The Group has no significant concentrations of credit risk with respect to its restaurant and bakery operations as it has a large number of diversified customers. In addition, receivable balances are monitored on an ongoing basis and the Group's exposure to bad debts is not significant.

The credit risk of the Group's other financial assets, which mainly comprise cash and bank balances, time deposits, deposits and other receivables, arises from default of the counterparties, with a maximum exposure equal to the carrying amounts of these instruments.

FOREIGN CURRENCY RISK

The Group operates in Hong Kong and Mainland China and is exposed to foreign exchange risk arising mainly from transactions in RMB. Foreign exchange risk arises from future commercial transactions, recognised assets and liabilities and net investments in operations in Mainland China. The RMB is not a freely convertible currency. Future exchange rates of the RMB could vary significantly from the current or historical exchange rates as a result of controls that could be imposed by the PRC government. The exchange rates may also be affected by domestic and international economic and political changes, and the demand and supply of the RMB. The appreciation or devaluation of the RMB against the Hong Kong dollar may also have an impact on the operating results of the Group.

In addition, the Group's foreign exchange position is monitored on an ongoing basis in order to minimise the impact from the fluctuation of foreign currency. The Group currently does not maintain a foreign currency hedging policy. However, management monitors the foreign exchange exposure and will consider hedging significant foreign currency exposure should the need arise.

41. Financial Risk Management Objectives and Policies (continued)

LIQUIDITY RISK

The Group's objective is to ensure that there are adequate funds to meet commitments associated with its financial liabilities and to maintain a balance between continuity of funding and flexibility through the use of bank loans and a finance lease. Cash flows of the Group are closely monitored by senior management on an ongoing basis. In addition, banking facilities have been put in place for contingency purposes.

The maturity profile of the Group's financial liabilities at the end of the reporting period, based on the contractual undiscounted payments, is as follows:

	2015			
	Repayable on demand/ no fixed terms of repayment HK\$'000	Less than 1 year HK\$'000	1 to 5 years HK\$'000	Total HK\$'000
Trade payables	–	159,831	–	159,831

41. Financial Risk Management Objectives and Policies (continued)

LIQUIDITY RISK (CONTINUED)

Note:

Included in the above interest-bearing bank borrowings are term loans with a carrying amount of HK\$605,000 (2014: HK\$1,227,000), which loan agreements contain a repayment on demand clause giving the bank the unconditional right to call in the loans at any time. Therefore, for the purpose of the above maturity profile, the total amount is classified as "repayable on demand".

Notwithstanding the above clause, the directors do not believe that the loans will be called in their entirety within 12 months, and they consider that the loans will be repaid in accordance with the maturity dates as set out in the loan agreements. This evaluation was made considering: the financial position of the Group at the date of approval of the financial statements; the Group's compliance with the loan covenants; the lack of events of default; and the fact that the Group has made all previously scheduled repayments on time.

In accordance with the terms of the loans which contain a repayment on demand clause, the maturity profile of the interest-bearing bank borrowings as at the end of the reporting period, based on the contractual undiscounted payments and ignoring the effect of any repayment on demand clause, is as follows:

	Less than 1 year HK\$000	1 to 5 years HK\$000	Over 5 years HK\$000	Total HK\$000
As at 31 December 2015	196,371	88,275	–	284,646
As at 31 December 2014	115,156	84,440	24	199,620

CAPITAL MANAGEMENT

The primary objectives of the Group's capital management are to safeguard the Group's ability to continue as a going concern and to maintain healthy capital ratios in order to support its business and maximise shareholders' value.

The Group manages its capital structure and makes adjustments to it in light of changes in economic conditions and business strategies. To maintain or adjust the capital structure, the Group may adjust the dividend payment to shareholders, return capital to shareholders or issue new shares. The Group is not subject to any externally imposed capital requirements. No changes were made in the objectives, policies or processes for managing capital during the years ended 31 December 2015 and 31 December 2014.

The Group monitors capital using a gearing ratio, which is total borrowings to total shareholders' equity. Total borrowings includes interest-bearing bank borrowings and a finance lease payable. Total shareholders' equity comprises all components of equity attributable to owners of the parent. The Group's policy is to maintain the gearing ratio at a reasonable level. The gearing ratios as at the end of the reporting periods were as follows:

	2015 HK\$'000	2014 HK\$'000
Total borrowings	280,028	194,302
Total equity attributable to owners of the parent	1,781,846	1,787,416
Gearing ratio	15.7%	10.9%
