OVERSEAS REGULATORY ANNOUNCEMENT

Power Generation and On-grid Tariff for the First Three Quarters of 2024

This announcement is made pursuant to Rule 13.10B of the Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited.

As at 30 September 2024, the total amount of power cumulatively generated by Huadian Power International Corporation Limited* (the "**Company**") and its subsidiaries (the "**Group**") calculated on the basis of the consolidated financial statements according to the Chinese Accounting Standards for the first three quarters of the year 2024 was 168.46 million MWh, representing a decrease of approximately 2.46% as compared with that of the same period of the previous year; and the total amount of on-grid electricity sold was 157.72 million MWh, representing a decrease of approximately 2.46% as compared with that of the same period of the previous year. The decrease in the amount of power generated and on-grid electricity sold for the first three quarters of the year 2024 was mainly attributable to the increase of hydropower generation, which crowded out the on-grid electricity consumption of the Group's coal-fired power generating units. The average tariff of on-grid electricity sold by the Group for the first three quarters of the year 2024 was approximately RMB510.46 per

MWh, representing a decrease of approximately 1.46% as compared with that of the same period of the previous year.

The table below shows the amount of power generated and the on-grid electricity sold during the first three quarters of the year 2024 by each of the main generating units under operation of the Group currently
