#### Dear Valued Shareholders,

On behalf of the board of directors of Success Universe Group Limited (the "Company", together with its subsidiaries, the "Group"), I would like to present the annual report of the Company for the year ended 31 December 2024.

2024 witnessed resilience and steady advancement in the global economy, mixed with challenges such as elevated interest rates, geopolitical tensions and trade uncertainties. According to the Organisation for Economic Co-operation and Development (OECD), most of the G20 member countries are projected to achieve real gross domestic product (GDP) growth in 2025. Notably, the travel and hospitality sectors have experienced a remarkable resurgence, fuelled by a revival in international tourism. Global arrivals have reached record highs, with numerous destinations surpassing pre-pandemic visitor levels, resulting in significant increases in traveller spending. Supported by China's stable economic performance, with GDP growth of 5.0% in line with government targets, and favourable policies promoting connectivity within the Greater Bay Area, Macau's tourism has seen continuous growth in visitation, exceeding official projections.

Macau, establishing itself as the "World Centre of Tourism and Leisure", has further strengthened its status as a premier global destination by diversifying its entertainment offerings. The emergence of the concert economy and its designation as a City of Performing Arts have enriched its entertainment landscape, broadening nongaming options that complement both the hospitality and gaming industries. The Group is pleased to observe Macau's ongoing economic recovery, characterized by the cultivation of internationally competitive industries, marking a new phase in the city's growth.

#### 致尊貴的股東:

# SOLIDIFYING POSITION TO EMBARK ON A NEW CHAPTER

In 2024, the entertainment and hospitality industry in Macau continued its upward trajectory, with Macau's gross gaming revenue rising by 23.9% to approximately MOP226.8 billion. The growth was fuelled by a significant rise in tourist arrivals, reaching approximately 34.9 million, marking a 23.8% year-on-year increase. Macau has been solidifying its position as a vibrant hub for music and sports events, hosting world-class performances and high-profile concerts that attracted diverse tourists from Mainland China and around the globe. Ponte 16, the flagship investment project of the Group, has been committed to enhancing its gaming, hospitality and entertainment offerings, providing a dynamic experience that caters to the evolving needs of tourists and guests while integrating local culture and the arts to further enrich the city's cultural landscape. Ponte 16 has been collaborating closely with the Macau government to organise events aimed at promoting the local community while bolstering the overall development of Macau's tourism industry.

# 穩固根基,展新篇章

# Chairman's Statement (Continued) 主席報告(續)

Enhanced infrastructure and strategic travel initiatives further facilitated tourism growth in 2024 for Macau. Key infrastructure projects, such as the Shenzhen-Zhongshan Link and the Macau LRT Henggin Line, have significantly improved connectivity to and within the region. Additionally, travel initiatives, including the Central Government's extension of the Individual Visit Scheme to 59 cities, the introduction of multiple-entry permits, and Macau's "tourism+" and other development strategies, have collectively boosted visitation throughout the year. Strategically located in the Inner Harbour area near Macau's major ports of entry, Ponte 16 is dedicated to preserving and showcasing Macau's diverse cultural heritage. As a world-class integrated casino-entertainment resort, Ponte 16 continues to expand its partnerships with local retailers and attractions, offering distinctive services and products that enhance visitors' experience and highlight Macau's cultural legacy.

The year 2024 marked the 25th anniversary of Macau's return to China. The visit of Chinese President Xi Jinping to Macau in December 2024 underscored the continued evolution of Macau as a global hub for tourism and leisure, and the well-regulated development of its gaming industry. Furthermore, the appointment of Mr. Sam Hou Fai as the sixth-term Macau Chief Executive signalled a shared commitment to economic diversification beyond the gaming focus, encouraging concessionaires to invest in non-gaming projects. Ponte 16 has been in line with the Macau government by incorporating non-gaming elements into its offerings to enrich Macau's holistic development. In particular, with the aim of revitalizing Inner Harbour Pier 16 and contributing to a more diversified future for Macau, the outline of Ponte 16's Phase 3 development project has integrated the initiative to feature a blend of cultural and artistic offerings.

二零二四年,澳門迎來回歸祖國25周年。中國國家主席習近平先生於二零二四年十二月訪澳時對澳門持續蛻變為世界的遊休閒中心,以及其博彩業有序規範內,以及其博彩業有序規範不進程給予肯定。此外,岑浩輝先生澳門行政長官,竟經濟多元,並鼓勵承批公司投資於非博配受。此外,為活化十六浦一直與澳門整體發展,並對澳門多元化發展內中,為活化十六來作出與門整體發展。其中,為活化十六來作出與轉份之元素。以與藝術之元素。

# PRIMED TO EMBRACE THE OPPORTUNITIES ARISING

The global tourism industry experienced a remarkable resurgence in 2024, achieving a near-full recovery by regaining 99% of pre-pandemic levels with 1.4 billion international travellers. The rebound was driven by the robust post-pandemic demand and the steady recovery of destinations across Asia, according to UN Tourism (formerly known as the United Nations World Tourism Organisation). The aviation sector's recovery, marked by the restoration and expansion of air routes, indicates an increasing connectivity across China, Africa, and the Americas. The recent revival of Canada-China flights, for example, highlights a significant rise in air travel to Asia, catering to the growing needs of business travellers, tourists, and international students. As one of the largest Canadian travel agencies, Jade Travel Ltd. ("Jade Travel") is well-positioned to capitalise on the growing trend by strengthening its partnerships with online travel portals, agencies and airlines. Its proactive system upgrades aim to offer more integrated services and enhanced customer experiences, further bolstering its ticketing business to expand its customer base and meeting the rising tourism and ticketing demand. Leveraging its reputation and network within the Asia community, Jade Travel also aims to explore a wider and more diversified customer base, seizing emerging opportunities. With the tourism industry poised for a continued growth in 2025, Jade Travel anticipates a promising future on the horizon.

Hong Kong, as a prominent financial hub, continues to demonstrate resilience amid challenges. With declining interest rates and anticipated economic stimulus in Mainland China, Hong Kong's commercial property market is expected to show early signs of stabilization. The Group remains committed to a disciplined investment strategy, actively evaluating and optimising its strategies to align with shifting market conditions. By maintaining a balanced portfolio, the Group aims to achieve consistent returns while effectively managing risks. Underpinned by its robust business model and strategic initiatives, the Group maintains a cautiously optimistic outlook for the future, poised itself to capitalise on emerging opportunities.

# Management Discussion and Analysis 管理層討論及分析

## **OVERVIEW**

The year 2024 marked a pivotal moment for the global economy, characterised by significant recovery. Gross domestic product ("GDP") in China grew by 5.0%, which was in line with the Central Government's annual economic target established at the year's outset. Both Hong Kong and Macau sustained their growth momentum from 2023, with Macau achieving impressive increases of 23.9% in Macau's gross gaming revenue ("GGR") and 23.8% in tourist visitation, highlighting the robust resurgence of its entertainment and hospitality sectors.

Beyond China, the global economic landscape remained resilient yet challenging in 2024. Inflation continued to decline towards central bank targets, and global GDP growth remained stable despite persistent headwinds. Geopolitical risks, notably policy uncertainties associated with the administration of the new United States of America (the "USA" or "U.S.") president, presented potential obstacles to credit easing and global economic growth. Additionally, ongoing geopolitical tensions in the Middle East further added to the global uncertainties. This increasingly complex operational environment poses challenges across various sectors, hindering broader economic recovery efforts.

Navigating this dynamic landscape, the Group remains committed to a disciplined and agile investment strategy, continuously evaluating and refining its approach to align with market condition shifts. This strategic focus positions the Group to capitalise on emerging opportunities while ensuring resilience in an ever-evolving economic landscape.

The following discussion should be read in conjunction with the consolidated financial statements and the related notes included in this report.

# 概覽

二零二四年為全球經濟之關鍵時刻, 年內復甦顯著。中國國內生產總值增長 5.0%,符合中央政府在年初所制定之 年度經濟目標。香港及澳門均延續二零 二三年之增長勢頭,其中,澳門博彩毛 收入攀升23.9%,旅客人數亦同步增長 23.8%,展現出其娛樂和酒店業之強韌 復原力。

除中國以外,全球經濟形勢於二零二四年在繼續展現韌性之餘,亦充滿挑戰。儘管不利因素猶存,通脹率仍穩步朝着中央銀行之目標下降,全球國內生產總值增長亦保持穩定。與此同時,地緣政治屬統施政所帶來之政策不確定性,對信總統施政所帶來之政策不確定性,對信鎖點及全球經濟增長構成潛在阻力。此外,中東地區之地緣政治局勢持續緊張,進一步增加全球不確定性。日益複雜的經營環境對各行各業造成挑戰,並阻礙經濟實現更大範圍之復甦。

在此變化多端之環境下,本集團始終秉 持嚴謹而靈活之投資策略,因應市況變 化不斷評估及修正投資方針。此策略使 本集團得以把握新興機遇,同時確保在 不斷演變之經濟環境中保持韌性,穩步 前行。

以下討論應與本報告所載之綜合財務報 表及相關附註一併閱讀。

Many destinations surpassed pre-pandemic international visitor levels, driving robust growth in traveller spending. The Asia-Pacific region showcased a rapid rebound, with arrivals reaching 87% of pre-pandemic levels, an improvement from 66% at the end of 2023. Overall, international arrivals surged by 33% in 2024, representing an increase of 78 million visitors compared to the previous year, despite ongoing geopolitical tensions impacting some potential travellers. According to the International Air Transport Association (IATA) analysis, falling inflation, moderating ticket prices and low unemployment rate in member countries of The Organization for Economic Cooperation and Development (OECD) fuelled travel demands. Passenger volume in 2024 exceeded the 2019 peak by 0.5%, with growth observed across all regions. China's annual passenger volume and load factor reached historical highs, increasing by 12.3% compared to 2023. Meanwhile, strong travel demands from Western Europe and North America further bolstered the global tourism recovery, boosting traveller spending and overall sector growth.

In the relatively high-interest rate environment, Hong Kong's commercial property market has been facing headwinds. This, combined with persistently high supply levels and elevated vacancy rates, led to a significant decline in property prices. According to Jones Lang LaSalle, the overall vacancy rate for Grade A office spaces reached 13.1% in 2024, marking its highest level in 25 years, driven largely by new completions in Central and surrounding areas. Market-wide rents decreased by 8.6%, with Central experiencing a more pronounced decline of 12.0% due to increased competition from new developments.

Macau's tourism sector showed robust growth in 2024, welcoming approximately 34.9 million visitors, representing a 23.8% increase year-on-year ("YOY"), according to the Statistics and Census Service (DSEC) of Macau. The majority of arrivals were from Mainland China, which rose by 28.6% to approximately 24.5 million. This surge was driven by favourable policies from the Central Government and initiatives by the Macau government aimed at enhancing accessibility. In April 2024, the introduction of the Henggin-Macao multipleentry visa policies facilitated multiple trips for Mainland Chinese tourists within a week. Furthermore, the Central Government expanded the individual visit scheme to include eight additional cities in Mainland China, bringing the total to 59 as of May 2024. Infrastructure improvements, including the Henggin Line of the Light Rapid Transit (LRT) officially opened in early December 2024, further enhanced connectivity to Macau, attracting a wider audience and boosting tourism. During the National Day Golden Week in 2024, Macau recorded an average of about 141,000 daily visitor arrivals, representing a 22.9% increase compared to 2023 and 1.9% higher than 2019, setting a new record for the holiday period. International visitors also increased significantly, reaching 2.4 million, reflecting a 66% increase YOY, and underscoring the industry's efforts to position Macau as a preferred travel destination.

Tesla operates in a cyclical industry that is sensitive to political and regulatory uncertainty, including with respect to trade and the environment, all of which can be compounded by inflationary pressures, rising energy prices, interest rates fluctuations and the liquidity of enterprise customers. For example, inflationary pressures have increased across the markets in which it operates. In an effort to curb this trend, central banks in developed countries raised interest rates rapidly and substantially. impacting the affordability of vehicle lease and finance arrangements. Further, sales of vehicles in the automotive industry also tend to be cyclical in many markets, which may expose it to increased volatility as Tesla expands and adjusts its operations. Moreover, as additional competitors enter the marketplace and help bring the world closer to sustainable transportation, Tesla will have to adjust and continue to execute well to maintain its momentum. Additionally, its supplier's liquidity and allocation plans may be affected by current challenges in the North American automotive industry, which could reduce its access to components or result in unfavourable changes to cost. These macroeconomic and industry trends have had, and will likely continue to have, an impact on the pricing of, and order rate for its vehicles, and in turn its operating margin. Changes in government and economic incentives or tariffs may also impact its sales, cost structure and the competitive landscape. Tesla will continue to adjust accordingly to such developments, and Tesla believes its ongoing cost reduction, including improved production innovation and efficiency at its newest factories and lower logistics costs, and focuses on operating leverage will continue to benefit it in relation to its competitors, while its new products will help enable future growth.

Tesla經營的行業存在週期性,對貿易與 環境等政治及監管不確定因素非常敏 感,更可能面對通脹、能源價格攀升、利 率波動以及企業客戶流動性等壓力。舉 例而言,Tesla所在市場的通脹壓力普遍 上升。為遏抑通脹,多個已發展國家的央 行急速大幅上調利率,對普羅大眾負擔 汽車租賃與融資安排的能力造成影響。 再者,許多市場的汽車行業銷情亦各有 週期,令Tesla在拓展及調整業務之時面 對更大的波動。此外,在越來越多競爭 者加入市場,一同將可持續交通運輸工 具推廣至全世界的環境下,Tesla將須隨 機應變並勵精圖治,以保持增長動力。 再者,其供應商之流動性及分配計劃可 能會受到北美汽車業當前之挑戰影響, 從而可能降低其取得零部件的機會或出 現不利之成本變動。上述宏觀經濟與行 業趨勢已經且將可能繼續影響Tesla汽車 定價與訂單數量,繼而侵蝕其經營利潤。 政府及經濟獎勵或關稅變動亦可能會對 其銷售、成本結構及競爭形勢造成影響。 於推出新產品以推動未來增長的同時, Tesla將繼續因時制宜,恪守成本減省措 施,包括提升新廠房的生產創意與效率, 並降低物流成本,以及聚焦於自身強項, 相信將能在競爭對手中脫穎而出。

As the production increases, Tesla must work constantly to similarly increase vehicle delivery capability so that it does not become a bottleneck on its total deliveries. As Tesla expands its manufacturing operations globally, Tesla will also have to continue to increase and staff its delivery, servicing and charging infrastructure accordingly, maintain its vehicle reliability and optimise its supercharger locations to ensure cost effectiveness and customer satisfaction. In particular, as other automotive manufacturers have announced their agreements with Tesla to utilise its superchargers, Tesla must correspondingly expand its network in order to ensure adequate availability to meet customer demands. Tesla also remains focused on continued enhancements of the capability and efficiency of its servicing operations.

#### **PROSPECTS**

Looking ahead to 2025, the Group maintains a cautiously optimistic outlook on the business and global landscape. The International Monetary Fund's World Economic Outlook projects steady global growth of 3.3% in both 2025 and 2026, following an estimated 3.2% growth in 2024. However, the change in the USA presidency introduces policy uncertainty regarding trade, fiscal, monetary and regulatory measures, potentially impacting global economy sentiment and growth. Escalating geopolitical tensions and conflicts may pose risks to global markets. Conversely, China has set a clear growth target of approximately 5% for 2025, supported by improvements in export strength and recent policy easing measures aimed at stabilizing the economy. The Central Government is committed to implementing a moderately loose monetary policy in 2025, adjusting its pace and intensity as needed, alongside a more proactive fiscal policy to sustain its growth trajectory.

#### **PROSPECTS (CONTINUED)**

The Hong Kong commercial property market is currently encountering significant challenges, with vacancy rates reaching historic highs since 2019, particularly in core business districts. This trend is driven by several factors, including weak economic performance, declining demand, shifting tenant preferences and the impact of rising interest rates. While Hong Kong's 14.8% vacancy rate in 2024 appears high, it is comparable to similar levels in other major cities like London (10%), Sydney (12%), and New York (28%), according to Savills. The market expects that falling rents in prime areas will lead to new dynamics, as the narrowing rent gap between core and non-core locations may encourage some businesses to relocate to central business districts, indicating resilient underlying demand. The Group maintains an optimistic outlook for Hong Kong's commercial property market recognising the enduring strength and exceptional value of its commercial real estate underpinned by the city's unparalleled global connectivity and its position as a leading financial hub in the Asia-Pacific region. The Group is confident that its investment portfolio is solid and will continue to provide stable and resilient returns, despite current market fluctuations.

#### 前景(續)

香港商用物業市場目前正面臨重大挑 戰,空置率達二零一九年以來的歷史新 高,尤以核心商業區為甚。此趨勢源於多 項因素,包括經濟表現不振、需求持續下 降、租戶喜好轉變以及利率攀升的影響。 根據第一太平戴維斯的資料,雖然香港 二零二四年之空置率14.8%看似偏高, 但與倫敦(10%)、悉尼(12%)及紐約(28%) 等其他主要城市之類似水平相若。市場 預期黃金地段租金下跌將帶來新動力, 原因在於核心地段與非核心地段之租金 差距收窄,可能鼓勵部分企業遷往中央 商業區,顯示市場仍存在強韌的基本需 求。本集團認為,香港擁有無可比擬的全 球連繫,坐享亞太區首屈一指的金融中 心地位,令香港之商用物業具備長久優 勢及非凡價值,因此,本集團對香港商用 物業市場的前景仍然樂觀,並深信其投 資組合穩健,即使目前市場波動,該組合 將繼續提供長期穩定回報。

Additionally, the Group participated in the Earth Hour campaign organised by the World Wide Fund for Nature (WWF)-Hong Kong in 2024, demonstrating its support for building a sustainable environment and raising awareness of the climate crisis and protection of natural habitats and biodiversity.

#### **Enriching a Green Office Culture (continued)**

During the Reporting Year, the Group was honoured with the "Governance Excellence Award" at the inaugural Greater Bay Area (GBA) Listed Companies ESG 100 Green Advancement Awards. This recognition underscores the Group's steadfast commitment to transparency, accountability, and adherence to the high standards of governance, aligning with its broader ESG objectives. It also serves as a testament to the Group's efforts in maintaining exceptional corporate practices while contributing to the sustainable development of the Greater Bay Area and beyond.

#### **Monitoring Energy Use and Emissions**

To contribute to combating climate change, the Group is devoted to tackling its greenhouse gas ("GHG") emissions by reducing the use of electricity and fuel in office operation and transportation. A forward plan has been established to achieve a 10% reduction in both energy intensity and GHG intensity by 2030, using 2024 as the baseline year. The Group continuously tracks and integrates energy and GHG data from its activities, ensuring effective implementation of reduction strategies to meet its sustainability targets.

Since 2016, the Group has been utilising LED lighting in its Hong Kong head office to maximise energy efficiency. The Group also actively promotes energy conservation among employees by encouraging them to switch off lights and air-conditioners after office hours.

於報告年度內,本集團榮獲首屆大灣區上市公司ESG 100綠色發展大獎的「年度企業管治獎」。此獎項突顯本集團對透明度、問責及遵守高管治標準的堅定承諾,與本集團整體環境、社會及管治目標一致。此獎項亦證明本集團在維持卓越企業常規的同時,亦為大灣區及其他地區的可持續發展作出貢獻。

#### 監察能源使用及排放

為了抵抗氣候變化,本集團致力透過減少辦公室運作及運輸的電力及燃料消耗,以應對其溫室氣體(「溫室氣體」)排放。本集團已制訂前瞻性規劃,以二零二四年為基準,於二零三零年或之前將能源密度及溫室氣體密度減少10%。本集團持續監察並整合其活動的能源及溫室氣體數據,確保有效落實減排措施,達成其可持續發展目標。

本集團自二零一六年開始在香港總辦事處使用LED照明,以最大程度地提高能源效益。本集團亦積極鼓勵員工在辦公時間結束後熄燈及關閉空調,推動僱員節省能源。

## Monitoring Energy Use and Emissions (continued)

As part of its sustainability initiative, the Group has implemented measures to streamline its printing infrastructure by phasing out the use of individual desktop printers and replacing them with energy-efficient centralised printers across its offices. This transition not only reduces energy consumption, but also minimises paper waste, toner cartridge usage, and supports the Group's recycling initiatives. By adopting centralised printers, the Group fosters a greener and more cost-efficient workplace while prioritising environmental sustainability. The Group actively promotes video conferencing to reduce the need for business travel, thereby lowering GHG emissions. The Group will continue to explore and implement measures to reduce its carbon footprint and contribute to a more sustainable future.

#### **Managing Waste**

Given the Group's office-based business model, paper is the primary source of waste generation. The Group adopts green purchasing practices for sustainable office supplies to reduce waste. Since 2013, the Group has been using refillable stationery products and Forest Stewardship Council (FSC) certified paper for printing the Company's annual and interim reports. Since 2017, the Group's head office has transitioned to lighter-weight paper as a more environmentally friendly alternative. Starting from 2021, the Group has further enhanced its environmental efforts by using plant-based soy ink for printing and gradually reduced the printing quantity of the corporate materials including annual report, interim report and circular. Jade Travel has also embraced e-marketing and communication practices to minimise paper consumption and transit towards eco-friendly and paperless operations.

作為可持續發展行動的其中一環,本集 團已採取措施精簡打印設備,於各辦公 室中逐步以具能源效益的中央打印機取 代個人桌面打印機。此舉不但降低能耗, 亦同時減少廢紙、碳粉耗量,並有助本集 團實施回收。透過採用中央打印設備, 本集團令工作環境更環保及更具成本外, 本集團積極推廣視像會議,以減少差旅 需求,以助減少溫室氣體排放。本集團將 繼續探索及推行措施減少其碳足印,為 推動可持續發展的未來出一分力。

#### 管理廢棄物

鑑於本集團的業務模式以辦公室為主, 紙張為廢棄物的主要來源。本集團對可 持續辦公用品實行綠色採購措施以減少 廢棄物。本集團自二零一三年起一直 用可填充替換的文具,並於印製本公司 年報及中期報告時使用獲森林管理委司 會(FSC)認證的紙張。自二零一七年起, 集團的總辦事處亦轉用較輕較環保的 張。二零二一年以來,本集團為進一步加 強其環境工作,使用植物性的大豆油 進行印刷,並逐步降低企業文件的印 數量,包括年報、中期報告及通函。Jade Travel亦採用電子營銷及通訊方法,致力 減少用紙,轉向環保及無紙化運作。

## SUPPORTING GREEN OPERATION (CONTINUED)

#### **Managing Waste (continued)**

The Group is targeting to achieve a recycling rate of 20% by 2030. To further enhance waste reduction and promote the circular economy, the Group adheres to the "4Rs of Environmental Protection" concept (i.e., Reduce, Reuse, Recycle and Replace). Jade Travel has established waste collection and recycling segregation facilities to support the circular economy principle and promote sustainable resource management within its operations.

As Jade Travel's offices are managed by the building management, information on general waste and intensity is unavailable. Due to the nature of its business, the Group does not produce hazardous waste during its operation. The Group will continue to monitor its waste management performance and explore opportunities to reduce waste generation and enhance recycling efforts.

#### **Mitigating Climate Change Risks**

The Group remains committed to minimising the impacts of climate change and complying with climate-related policies and regulations. Guided by the recommendations of the Task Force on Climate-Related Financial Disclosures ("TCFD"), the Group identified and assessed significant physical and transition risks during the Reporting Year. This process included implementing targeted mitigation measures and uncovering climate-related opportunities that align with the Group's strategic priorities.

本集團現時以於二零三零年或之前實現 20%回收率為目標。為進一步減廢及推 廣循環經濟,本集團依循「環保四用」原則 (即減少使用、重複使用、循環再用及替 代使用)。Jade Travel亦已設立廢物收集 及回收分類設施,支持循環經濟原則,在 其業務中推廣可持續的資源管理。

由於Jade Travel辦事處由大廈管理處管理,故未能提供有關一般廢棄物及密度的資料。由於業務性質關係,本集團於營運時並無產生任何有害廢棄物。本集團將繼續監察其管理廢棄物的績效,並探索減少產生廢棄物及加強回收工作的機會。

#### 應對氣候變化風險

本集團繼續致力減輕氣候變化造成的影響,並遵守氣候相關政策及法規。於報告年度內,本集團已參照氣候相關財務披露工作小組的建議,識別出及評估重大實體及過渡風險。此流程包括實施符合本集團策略優次的針對性緩和措施及揭示氣候相關機遇。

#### **Physical Risks**

Extreme weather events, such as typhoons and heatwaves, have been identified as the most prominent and material acute physical risks to the Group's business operations. To enhance resilience and mitigate these impacts, the Group has instituted comprehensive contingency plans tailored to such events. For example, specific procedures have been implemented to address emergencies during typhoons, ensuring the safety of customers and employees. Clear roles and responsibilities in customer service during emergencies ensure seamless communication and safe travel for customers, demonstrating the Group's commitment to service excellence under challenging conditions.

Long-term climate changes, including rising mean temperatures and shifts in precipitation patterns, constitute chronic physical risks for the Group. These gradual yet persistent changes could lead to operational challenges, such as increased cooling costs or flooding risks in certain locations. To address these chronic risks, the Group is exploring adaptive strategies, such as enhancing energy efficiency and improving company safety measures. By proactively managing chronic physical risks, the Group aims to ensure the resilience of its operations in a changing climate.

颱風及熱浪等極端天氣已被識別為本集 團業務營運的最主要及嚴重逼切的實體 風險。為提高韌性及減輕該等影響,本 集團已針對該等事件制訂全面的應變計 劃。例如,本集團已實施特定程序應對風 暴期間的緊急情況,確保客戶及僱員安 全。在緊急情況下,清晰的客戶服務角色 及職責可確保與客戶的通訊無誤及旅程 安全,體現本集團無懼挑戰,致力提供卓 越服務的承諾。

#### Transition Risks

Policy and legal risks represent one of the material transition risks for the Group as it navigates evolving climate-related regulations. Stringent requirements, particularly those applicable to Hong Kong listed companies, are anticipated to increase operational costs. For instance, the updated mandates issued by the Stock Exchange introduce enhanced climate-related disclosures effective from 1 January 2025 for selected companies. Meeting these new reporting obligations will likely require additional investments in human capital and increased expenditure for training employees on updated disclosure requirements and independent assurance processes.

In addition to the policy and legal, technology, market and reputational risks could also potentially impact the Group's business operations. The rapid pace of technological innovation in the low-carbon economy possess risks. Failure to adopt emerging technologies, such as energy-efficient systems or renewable energy solutions, could result in higher operational costs and reduced competitiveness. To mitigate technology risk, the Group continuously evaluates and integrates advanced technologies that align with its sustainability objectives. Shifting market dynamics, or market risks, include changing customer preferences towards low-carbon options, which may impact the Group's competitiveness. To address market risks, the Group actively monitors market trends and aligns its business strategies with the demands of a low-carbon economy. Reputational risk arises as stakeholders increasingly prioritise corporate responsibility. Failure to meet sustainability expectations could harm the Group's reputation. Negative perceptions around insufficient climate actions or transparency could deter investors, customers and partners. By proactively addressing climate-related risks and disclosing progress transparently, the Group aims to maintain stakeholder trust and solidify its reputation in sustainability.

#### 過渡風險

政策及法律風險是本集團在面對不斷演變的氣候相關法規時所面對的重大過渡風險之一。嚴格的規定(尤其是適用於香港上市公司的規定)預計將增加營運水。例如,聯交所發布的最新法規要求特定公司引入經加強的氣候相關資訊或特定公司引入經加強的氣候相關資訊或求時之一月一日起生效。符合新報告要求將可能需要額外的人力資及增加支出,以為僱員提供關於最新披露規定的培訓及進行獨立鑒證程序。

除政策及法律風險外,技術、市場及聲譽 風險亦可能對本集團的業務營運構成潛 在影響。低碳經濟的技術創新快速發展 存在風險。未能採用新興技術(如能源效 益系統或可再生能源解決方案),可能導 致營運成本上升及競爭力下降。為減輕 技術風險,本集團持續評估及整合符合 可持續發展目標的先進技術。客戶轉投 低碳選擇等市場動態轉變或市場風險可 能會影響本集團的競爭力。為應對市場 風險,本集團積極留意市場趨勢,並根據 低碳經濟的需求調整其業務策略。聲譽 風險源於持份者日益重視企業責任。未 能達到可持續發展的期望可能會損害本 集團的聲譽。對於氣候行動或透明度不 足的負面印象,可能會使投資者、客戶及 合作夥伴卻步。透過主動應對氣候相關 風險及開誠布公的程序,本集團冀能維 持持份者的信心,並鞏固其在可持續發 展方面的聲譽。

#### **Opportunities**

While the Group may face notable physical and transition risks on its journey toward carbon neutrality, this pathway may also offer significant opportunities for resource efficiency, technological innovation, and reputation enhancement in the markets in which it operates.

With digitalisation currently being one of the most significant megatrends in the global business environment, the digitalisation of Jade Travel's online booking service platform could present opportunities by increasing resource efficiency and leveraging innovative technology. By digitalising its operations, including Jade Travel's online booking platform, the Group can reduce its carbon footprint and streamline processes. The shift to digital technology not only minimises paper-based transactions but also optimises operational efficiency, reinforcing the Group's commitment to sustainability. Furthermore, the digital transformation of Jade Travel enables the Group to gain deeper insights into customer behaviours and preferences through data analytics. This positions the Group to develop innovative products and services tailored to the demands of a low-carbon economy. By staying ahead of emerging trends and adapting to evolving consumer expectations, the Group can simultaneously address climate-related risks and seize opportunities for sustainable growth by introducing new products such as eco-friendly travel options and new travel destinations in response to changing weather patterns. # AUDITORS' RESPONSIBILITIES FOR THE AUDIT OF THE CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Group to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Plan and perform the group audit to obtain sufficient appropriate audit evidence regarding the financial information of the entities or business units within the Group as a basis for forming an opinion on the group financial statements. We are responsible for the direction, supervision and review of the audit work performed for purposes of the group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, actions taken to eliminate threats or safeguards applied.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditors' report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

The consolidated financial statements are presented in Hong Kong dollars ("HK\$"), which is the same as the functional currency of the Company. All values are rounded to the nearest thousand ("HK\$'000") except when otherwise indicated.

#### **Basis of measurement**

The measurement basis used in the preparation of the consolidated financial statements is the historical cost basis except that investment properties and financial assets at fair value through profit or loss ("FVTPL") are stated at their fair value as explained in notes 2(g) and 2(j) to the consolidated financial statements respectively.

Historical cost is generally based on the fair value of the consideration given in exchange for goods and services.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in orderly transactions between market participants at the measurement date. regardless of whether that price is directly observable or estimated using another valuation technique. In estimating the fair value of an asset or liability, the Group takes into account the characteristic of the asset or liability if market participants would take those characteristics into account when pricing the asset or liability at the measurement date. Fair value for measurement and/or disclosure purposes in these consolidated financial statements is determined on such a basis. except for share-based payment transactions that are within the scope of HKFRS 2 "Sharebased Payment", leasing transactions that are accounted for in accordance with HKFRS 16 "Leases", and measurements that have some similarities to fair value but are not fair value, such as net realisable value in HKAS 2 "Inventories" or value in use in HKAS 36 "Impairment of Assets".

## (b) Basis of preparation of the consolidated financial statements (continued)

#### **Basis of measurement (continued)**

In addition, for financial reporting purposes, fair value measurements are categorised into Level 1, 2 or 3 based on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to the fair value measurement in its entirety, which are described as follows:

- Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date;
- Level 2 inputs are inputs, other than guoted prices included within Level 1, that are observable for the asset or liability, either directly or indirectly; and
- Level 3 inputs are unobservable inputs for the asset or liability.

The preparation of consolidated financial statements in conformity with HKFRSs requires management to make judgements, estimates and assumptions that affect the application of policies and reported amounts of assets, liabilities, income and expenses. The estimates and associated assumptions are based on historical experience and various other factors believed to be reasonable under the circumstances, the results of which form the basis of making the judgements about carrying amount of assets and liabilities not readily apparent from other sources. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period or in the period of the revision and future periods if the revision affects both current and future periods.

Judgements made by management in the application of HKFRSs that have significant effect on the consolidated financial statements and estimates with a significant risk of material adjustment in the next year are discussed in note 5.

#### (c) Basis of consolidation

The consolidated financial statements incorporate the financial statements of the Company and entities (including structured entities) controlled by the Company and its subsidiaries. Control is achieved when the Company:

- has power over the investee;
- is exposed, or has rights, to variable returns from its involvement with the investee; and
- has the ability to use its power to affect its return.

The Group reassesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more or the three elements of control listed above.

When the Group has less than a majority of the voting rights of an investee, it has power over the investee when the voting rights are sufficient to give it the practical ability to direct the relevant activities of the investee unilaterally. The Group considers all relevant facts and circumstances in assessing whether or not the Group's voting rights in an investee are sufficient to give it power, including:

- the size of the Group's holding of voting rights relative to the size and dispersion of holdings of the other vote holders;
- potential voting rights held by the Group, other vote holders or other parties;
- right arising from other contractual arrangements; and
- any additional facts and circumstances that indicate that the Group has, or does not have, the current ability to direct the relevant activities at the time that decisions need to be made, including voting patterns at previous shareholders' meetings.

Consolidation of a subsidiary begins when the Group obtains control over the subsidiary and ceases when the Group loses control of the subsidiary. Specifically, income and expense of a subsidiary acquired or disposed of during the year are included in the consolidated statement of profit or loss and other comprehensive income from the date the Group gains control until the date when the Group ceases to control the subsidiary.

All amounts previously recognised in other comprehensive income in relation to that subsidiary are accounted for as if the Group had directly disposed of the related assets or liabilities of the subsidiary (i.e. reclassified to profit or loss or transferred to another category of equity as specified/permitted by applicable HKFRSs). #### (d) Investments in associates and joint ventures

An associate is an entity over which the Group has significant influence. Significant influence is the power to participate in the financial and operating policy decisions of the investee but is not control or joint control over those policies.

A joint venture is a joint arrangement whereby the parties that have joint control of the arrangement have rights to the net assets of the joint arrangement. Joint control is the contractually agreed sharing of control of an arrangement, which exits only when decisions about the relevant activities require unanimous consent of the parties sharing control.

The results and assets and liabilities of associates or a joint venture are incorporated in these consolidated financial statements using the equity method of accounting, except when the investment, or a portion thereof, is classified as held for sale, in which case it is accounted for in accordance with HKFRS 5 "Non-current Assets Held for Sale and Discontinued Operations". Under the equity method, an investment in an associate or a joint venture is initially recognised in the consolidated statement of financial position at cost and adjusted thereafter to recognise the Group's share of the profit or loss and other comprehensive income of the associate or joint venture. When the Group's share of losses of an associate or a joint venture exceeds the Group's interest in that associate or joint venture (which includes any long-term interests that, in substance, form part of the Group's net investment in the associate or joint venture), the Group discontinues recognising its share of further losses. Additional losses are recognised only to the extent that the Group has incurred legal or constructive obligations or made payments on behalf of the associate or joint venture.

### (d) Investments in associates and joint ventures (continued)

An investment in an associate or a joint venture is accounted for using the equity method from the date on which the investee becomes an associate or a joint venture. On acquisition of the investment in an associate or a joint venture, any excess of the cost of the investment over the Group's share of the net fair value of the identifiable assets and liabilities of the investee is recognised as goodwill, which is included within the carrying amount of the investment. Any excess of the Group's share of the net fair value of the identifiable assets and liabilities over the cost of the investment, after reassessment, is recognised immediately in profit or loss in the period in which the investment is acquired.

The Group assesses whether there is an objective evidence that the interest in an associate or a joint venture may be impaired. When any objective evidence exists, the entire carrying amount of the investment (including goodwill) is tested for impairment in accordance with HKAS 36 as a single asset by comparing its recoverable amount (higher of value in use and fair value less costs of disposal) with its carrying amount. Any impairment loss recognised is not allocated to any asset, including goodwill, that forms part of the carrying amount of the investment. Any reversal of that impairment loss is recognised in accordance with HKAS 36 to the extent that the recoverable amount of the investment subsequently increases.

## (d) Investments in associates and joint ventures (continued)

When the Group ceases to have significant influence over an associate or joint control over a joint venture, it is accounted for as a disposal of the entire interest in the investee with a resulting gain or loss being recognised in profit or loss. When the Group retains an interest in the former associate or joint venture and the retained interest is a financial asset within the scope of HKFRS 9, the Group measures the retained interest at fair value at that date and the fair value is regarded as its fair value on initial recognition. The difference between the carrying amount of the associate or joint venture and the fair value of any retained interest and any proceeds from disposing of the relevant interest in the associate or joint venture is included in the determination of the gain or loss on disposal of the associate or joint venture. In addition, the Group accounts for all amounts previously recognised in other comprehensive income in relation to that associate or joint venture on the same basis as would be required if that associate or joint venture had directly disposed of the related assets or liabilities. Therefore, if a gain or loss previously recognised in other comprehensive income by that associate or joint venture would be reclassified to profit or loss on the disposal of the related assets or liabilities, the Group reclassifies the gain or loss from equity to profit or loss (as a reclassification adjustment) upon disposal/partial disposal of the relevant associate or joint venture.

Intangible assets with indefinite useful lives are not amortised. The intangible asset and its status are reviewed annually to determine whether events and circumstances continue to support indefinite useful life. Should the useful life of an intangible asset change from indefinite to finite, the change would be accounted for prospectively from the date of change and in accordance with the policy for amortisation of intangible assets with finite lives as set out above.

### (f) Intangible assets (other than goodwill) (continued)

Cryptocurrencies purchased and held by the Group include Bitcoins, which are accounted for as intangible assets under the cost model. The Group has ownership of and control over the cryptocurrencies held and employs third party custodian services to monitor them.

The cryptocurrencies held by the Group are considered to have indefinite life, given there is no foreseeable limit to the period over which the relevant cryptocurrencies are expected to generate net cash inflows for the Group. They are not subject to amortisation and are tested annually for impairment, or more frequently if events or changes in circumstances indicate that they might be impaired. The accounting policies applied for impairment of cryptocurrencies are consistent with those for impairment of non-financial assets, as described in note 2(i). Cryptocurrencies that suffered an impairment are reviewed for possible reversal of the impairment at the end of each reporting period. The increased carrying amount of cryptocurrencies attributable to a reversal of an impairment loss, which is recognised in profit or loss, will not exceed the carrying amount that would have been determined had no impairment loss been recognised for the cryptocurrencies in prior accounting periods.

### (f) Intangible assets (other than goodwill) (continued)

The recoverable amount of cryptocurrencies are determined based on fair value less costs of disposal. In determining the fair values, the relevant available markets are identified by the Group, and the Group considers accessibility to, and activity within those markets in order to identify the principal cryptocurrency markets for the Group. The fair value of cryptocurrencies traded in active markets (such as trading and exchange platforms) is based on quoted market prices at the end of the reporting period. A market is regarded as active if guoted prices are readily and regularly available from an exchange and those prices represent actual and regularly occurring market transactions on an arm's length basis. Therefore, the fair value used for assessment of recoverable amount in impairment tests is determined as quoted prices (unadjusted) in active markets for cryptocurrencies.

#### **Derecognition of intangible assets**

An intangible asset is derecognised on disposal, or when no future economic benefits are expected from use or disposal. Gains and losses arising from derecognition of an intangible asset, measured as the difference between the net disposal proceeds and the carrying amount of the asset, are recognised in profit or loss when the asset is derecognised.

### (g) Investment properties

Investment properties are properties held to earn rentals and/or for capital appreciation (including property under construction for such purposes). Investment properties are measured initially at cost, including any directly attributable expenditure. Subsequent to initial recognition, investment properties are measured at fair value, adjusted to exclude any prepaid or accrued operating lease income. Gains or losses arising from changes in the fair value of investment properties are included in the profit or loss in the period in which they arise.

Construction costs incurred for investment properties under construction are capitalised as part of the carrying amount of the investment properties under construction.

An investment property is derecognised upon disposal or when the investment property is permanently withdrawn from use and no future economic benefits are expected from the disposal. The lease payments include:

- the amount expected to be payable by the Group under residual value guarantees;

Lease modifications

The Group accounts for a lease modification as a separate lease if:

- the modification increases the scope of the lease by adding the right to use one or more underlying assets; and
- the consideration for the leases increases by an amount commensurate with the stand-alone price for the increase in scope and any appropriate adjustments to that stand-alone price to reflect the circumstances of the particular contract.

For a lease modification that is not accounted for as a separate lease, the Group remeasures the lease liability based on the lease term of the modified lease by discounting the revised lease payments using a revised discount rate at the effective date of the modification.

The Group accounts for the remeasurement of lease liabilities by making corresponding adjustments to the relevant right-of-use asset.

When the modified contract contains a lease component and one or more additional lease or non-lease components, the Group allocates the consideration in the modified contract to each lease component on the basis of the relative stand-alone price of the lease component and the aggregate stand-alone price of the non-lease components.

#### The Group as a lessor

Classification and measurement of leases Leases for which the Group is a lessor are classified as finance or operating leases. Whenever the terms of the lease transfer substantially all the risks and rewards of ownership to the lessee, the contract is classified as a finance lease. All other leases are classified as operating leases.

Amounts due from lessees under finance leases are recognised as receivables at the commencement date at amounts equal to the Group's net investment in the leases, measured using the interest rate implicit in the respective lease. Initial direct costs (other than those incurred by manufacturer or dealer lessors) are included in the initial measurement of the net investments in the leases. Interest income is allocated to accounting periods so as to reflect a constant periodic rate of return on the Group's net investment outstanding in respect of the leases.

Rental income from operating leases is recognised in profit or loss on a straight-line basis over the term of the relevant lease. Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased asset, and such costs are recognised as an expense on a straight-line basis over the lease term except for investment properties measured under fair value model.

Interest and rental income which are derived from the Group's ordinary course of business are presented as revenue.

## (i) Impairment on property, plant and equipment, right-of-use assets, investments in subsidiaries, associates and joint ventures and intangible assets other than goodwill

At the end of the reporting period, the Group reviews the carrying amounts of its property, plant and equipment, right-of-use assets, investments in subsidiaries, associates and joint ventures and intangible assets with finite useful lives to determine whether there is any indication that these assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the relevant asset is estimated in order to determine the extent of the impairment loss (if any). Intangible assets with indefinite useful lives and intangible assets not yet available for use are tested for impairment at least annually, and whenever there is an indication that they may be impaired.

The recoverable amount of property, plant and equipment, right-of-use assets, investments in subsidiaries, associates and joint ventures and intangible assets are estimated individually. When it is not possible to estimate the recoverable amount individually, the Group estimates the recoverable amount of the CGU to which the asset belongs.

In testing a CGU for impairment, corporate assets are allocated to the relevant CGU when a reasonable and consistent basis of allocation can be established, or otherwise they are allocated to the smallest group of CGUs for which a reasonable and consistent allocation basis can be established. The recoverable amount is determined for the CGU or group of CGUs to which the corporate asset belongs, and is compared with the carrying amount of the relevant CGU or group of CGUs.

### MATERIAL ACCOUNTING POLICY 2. **INFORMATION (CONTINUED)**

## (i) Impairment on property, plant and equipment, right-of-use assets, investments in subsidiaries, associates and joint ventures and intangible assets other than goodwill (continued)

Recoverable amount is the higher of fair value less costs of disposal and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset (or a CGU) for which the estimates of future cash flows have not been adjusted.

If the recoverable amount of an asset (or a CGU) is estimated to be less than its carrying amount, the carrying amount of the asset (or a CGU) is reduced to its recoverable amount. For corporate assets or portion of corporate assets which cannot be allocated on a reasonable and consistent basis to a CGU, the Group compares the carrying amount of a group of CGUs, including the carrying amounts of the corporate assets or portion of corporate assets allocated to that group of CGUs, with the recoverable amount of the group of CGUs. In allocating the impairment loss, the impairment loss is allocated first to reduce the carrying amount of any goodwill (if applicable) and then to the other assets on a pro-rata basis based on the carrying amount of each asset in the unit or the group of CGUs. The carrying amount of an asset is not reduced below the highest of its fair value less costs of disposal (if measurable), its value in use (if determinable) and zero. The amount of the impairment loss that would otherwise have been allocated to the asset is allocated prorata to the other assets of the unit or the group of CGUs. An impairment loss is recognised immediately in profit or loss.

## (i) Impairment on property, plant and equipment, right-of-use assets, investments in subsidiaries, associates and joint ventures and intangible assets other than goodwill (continued)

Where an impairment loss subsequently reverses, the carrying amount of the asset (or CGU or a group of CGUs) is increased to the revised estimate of its recoverable amount, but so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset (or a CGU or a group of CGUs) in prior years. A reversal of an impairment loss is recognised immediately in profit or loss.

#### **Financial instruments** (i)

Financial assets and financial liabilities are recognised when a group entity becomes a party to the contractual provisions of the instrument. All regular way purchases or sales of financial assets are recognised and derecognised on a settlement date basis. Regular way purchases or sales are purchases or sales of financial assets that require delivery of assets within the time frame established by regulation or convention in the market place.

Financial assets and financial liabilities are initially measured at fair value except for trade receivables arising from contracts with customers who are initially measured in accordance with HKFRS 15. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at FVTPL) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at FVTPL are recognised immediately in profit or loss.

The effective interest method is a method of calculating the amortised cost of a financial asset or financial liability and of allocating interest income and interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash receipts and payments (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the financial asset or financial liability, or, where appropriate, a shorter period, to the net carrying amount on initial recognition.

Impairment of financial assets subject to impairment assessment under HKFRS 9

The Group performs impairment assessment under expected credit losses ("ECL(s)") on financial assets (including trade and other receivables as well as amounts due from associates and a joint venture) which are subject to impairment assessment under HKFRS 9. The amount of ECLs is updated at each reporting date to reflect changes in credit risk since initial recognition.

Lifetime ECL represents the ECL that will result from all possible default events over the expected life of the relevant instrument. In contrast, 12-month ECL represents the portion of lifetime ECL that is expected to result from default events that are possible within 12 months after the reporting date. Assessments are done based on the Group's historical credit loss experience, adjusted for factors that are specific to the debtors, general economic conditions and an assessment of both the current conditions at the reporting date as well as the forecast of future conditions.

For all other financial instruments, the Group recognises lifetime ECL when there has been a significant increase in credit risk since initial recognition. The measurement of ECLs is a function of the probability of default, loss given default (i.e. the magnitude of the loss if there is a default) and the exposure at default. The assessment of the probability of default and loss given default is based on historical data adjusted by forward-looking information as described above. As for the exposure at default, for financial assets, this is represented by the assets' gross carrying amount at the reporting date; for financial guarantee contracts, the exposure includes the amount drawn down as at the reporting date, together with any additional amounts expected to be drawn down in the future by default date determined based on historical trend, the Group's understanding of the specific future financing needs of the debtors, and other relevant forward-looking information.

Derecognition of financial assets

The Group derecognises a financial asset only when the contractual rights to the cash flows from the asset expire, or when it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another entity. If the Group neither transfers nor retains substantially all the risks and rewards of ownership and continues to control the transferred asset, the Group recognises its retained interest in the asset and an associated liability for amounts it may have to pay. If the Group retains substantially all the risks and rewards of ownership of a transferred financial asset, the Group continues to recognise the financial asset and also recognises a collateralised borrowing for the proceeds received.

On derecognition of a financial asset measured at amortised cost, the difference between the asset's carrying amount and the sum of the consideration received and receivable is recognised in profit or loss.

On derecognition of an investment in a debt instrument classified as at FVTOCI, the cumulative gain or loss previously accumulated in the revaluation reserve is reclassified to profit or loss.

### Equity instruments

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities. Equity instruments issued by the Group are recognised at the proceeds received, net of direct issue costs.

Repurchase of the Company's own equity instruments is recognised and deducted directly in equity. No gain or loss is recognised in profit or loss on the purchase, sale, issue or cancellation of the Company's own equity instruments.

## Financial liabilities

All financial liabilities are measured subsequently at amortised cost using the effective interest method or at FVTPL.

However, financial liabilities that arise when a transfer of a financial asset does not qualify for derecognition or when the continuing involvement approach applies, and financial guarantee contracts issued by the Group, are measured in accordance with the specific accounting policies set out below.

Financial liabilities measured subsequently at amortised cost

Financial guarantee contracts

A financial guarantee contract is a contract that requires the issuer to make specified payments to reimburse the holder for a loss it incurs because a specified debtor fails to make payments when due in accordance with the terms of a debt instrument. Financial guarantee contract liabilities are measured initially at their fair values. It is subsequently measured at the higher of:

- the amount initially recognised less, when appropriate, cumulative amortisation recognised over the guarantee period.

## Foreign exchange gains and losses

For financial liabilities that are denominated in a foreign currency and are measured at amortised cost at the end of each reporting period, the foreign exchange gains and losses are determined based on the amortised cost of the instruments. For defined contribution retirement benefit plans including the long service payment ("LSP") under the Hong Kong Employment Ordinance, the cost of providing benefits is determined using the projected unit credit method, with actuarial valuations being carried out at the end of each annual reporting period. In determining the present value of the Group's defined benefit obligations and the related current service cost and, where applicable, past service cost, the Group attributes benefit to periods of service under the plan's benefit formula. However, if an employee's service in later years will lead to a materially higher level of benefit than earlier years, the Group attributes the benefit on a straight-line basis from:

the date when service by the employee first leads to benefits under the plan (whether or not the benefits are conditional on further service) until the date when further service by the employee will lead to no material amount of further benefits under the plan, other than from further salary increases.

The retirement benefit obligation recognised in the consolidated statement of financial position represents the actual deficit or surplus in the Group's defined benefit plans. Any surplus resulting from this calculation is limited to the present value of any economic benefits available in the form of refunds from the plans or reductions in future contributions to the plans.

Discretionary contributions made by employees or third parties reduce service cost upon payment of these contributions to the plan.

When the formal terms of the plans specify that there will be contributions from employees or third parties, the accounting depends on whether the contributions are linked to service, as follows:

#### **(I) Income tax (continued)**

## (ii) Deferred tax (continued)

Deferred tax liabilities are recognised for taxable temporary differences associated with investments in subsidiaries and interests in associates and joint ventures, except where the Group is able to control the reversal of the temporary difference and it is probable that the temporary difference will not reverse in the foreseeable future. Deferred tax assets arising from deductible temporary differences associated with such investments and interests are only recognised to the extent that it is probable that there will be sufficient taxable profits against which to utilise the benefits of the temporary differences and they are expected to reverse in the foreseeable future.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realised, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

#### **(I) Income tax (continued)**

## (ii) Deferred tax (continued)

The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Group expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

For the purposes of measuring deferred tax for leasing transactions in which the Group recognises the right-of-use assets and the related lease liabilities, the Group first determines whether the tax deductions are attributable to the right-of-use assets or the lease liabilities.

For leasing transactions in which the tax deductions are attributable to the lease liabilities, the Group applies HKAS 12 requirements to the lease liabilities, and the related assets separately. The Group recognises a deferred tax asset related to lease liabilities to the extent that it is probable that taxable profit will be available against which the deductible temporary difference can be utilised and a deferred tax liability for all taxable temporary differences.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to set off current tax assets against current tax liabilities and when they relate to income taxes levied to the same taxable entity by the same taxation authority.

## (ii) 遞延稅項(續)

遞延稅項負債及資產之 計量反映本集團預期如 何於報告期末收回或清 償有關資產及負債賬面 值之稅務影響。

就計量本集團確認使用 權資產及相關租賃負債 之租賃交易之遞延稅項 而言,本集團首先確定扣 減稅項是否歸屬於使用 權資產或租賃負債。

就租賃交易之扣減稅項 歸屬於和賃負債而言,本 集團將香港會計準則第 12號之規定分別應用於 租賃負債及相關資產。如 有可能獲得應課稅溢利 對銷可用之可扣稅暫時 差額,則本集團會確認與 租賃負債相關之遞延稅 項資產,並就所有應課稅 暫時差額確認遞延稅項 負債。

當有在法律上可強制執 行權利將即期稅項資產 對銷即期稅項負債,且相 關資產及負債與同一稅 務部門向同一課稅實體 徵收之所得稅有關,則對 銷遞延稅項資產及負債。

#### MATERIAL ACCOUNTING POLICY 2. **INFORMATION (CONTINUED)**

#### **(I) Income tax (continued)**

#### (iii) Current and deferred tax for the year

Current and deferred tax are recognised in profit or loss, except when they relate to items that are recognised in other comprehensive income or directly in equity, in which case, the current and deferred tax are also recognised in other comprehensive income or directly in equity respectively. Where current tax or deferred tax arises from the initial accounting for a business combination, the tax effect is included in the accounting for the business combination.

#### (m) Provisions

Provisions are recognised when the Group has a present obligation (legal or constructive) as a result of a past event, it is probable that the Group will be required to settle that obligation, and a reliable estimate can be made of the amount of the obligation.

The amount recognised as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation. When a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows (where the effect of the time value of money is material).

When some or all of the economic benefits required to settle a provision are expected to be recovered from a third party, a receivable is recognised as an asset if it is virtually certain that reimbursement will be received and the amount of the receivable can be measured reliably.

### (n) Contingent assets/liabilities

#### **Contingent assets**

Contingent assets arise from unplanned or other unexpected events that give rise to the possibility of an inflow of economic benefits to the Group and they are not recognised in the consolidated financial statements. The Group assesses continually the development of contingent assets. If it has become virtually certain that an inflow of economic benefits will arise, the Group recognises the asset and the related income in the consolidated financial statements in the reporting period in which the change occurs.

#### (ii) Contingent liabilities

A contingent liability is a present obligation arising from past events but is not recognised because it is not probable that an outflow of resources embodying economic benefits will be required to settle the obligation.

Where the Group is jointly and severally liable for an obligation, the part of the obligation that is expected to be met by other parties is treated as a contingent liability and it is not recognised in the consolidated financial statements.

The Group assesses continually to determine whether an outflow of resources embodying economic benefits has become probable. If it becomes probable that an outflow of future economic benefits will be required for an item previously dealt with as a contingent liability, a provision is recognised in the consolidated financial statements in the reporting period in which the change in probability occurs, except in the extremely rare circumstances where no reliable estimate can be made.

#### (o) Revenue recognition

The Group recognises revenue when (or as) a performance obligation is satisfied, i.e. when "control" of the goods or services underlying the particular performance obligation is transferred to the customer. A performance obligation represents a goods or service (or a bundle of goods or services) that is distinct or a series of distinct goods or services that are substantially the same.

Control is transferred over time and revenue is recognised over time by reference to the progress towards complete satisfaction of the relevant performance obligation if one of the following criteria is met:

- the customer simultaneously receives and consumes the benefits provided by the Group's performance as the Group performs;
- the Group's performance creates and enhances an asset that the customer controls as the Group performs; or
- the Group's performance does not create an asset with an alternative use to the Group and the Group has an enforceable right to payment for performance completed to date.

Otherwise, revenue is recognised at a point in time when the customer obtains control of the distinct goods or service.

#### (o) Revenue recognition (continued)

A contract asset represents the Group's right to consideration in exchange for goods or services that the Group has transferred to a customer that is not yet unconditional. It is assessed for impairment in accordance with HKFRS 9. In contrast, a receivable represents the Group's unconditional right to consideration, i.e. only the passage of time is required before payment of that consideration is due.

A contract liability represents the Group's obligation to transfer goods or services to a customer for which the Group has received consideration (or an amount of consideration is due) from the customer. A contract asset and a contract liability relating to the same contract are accounted for and presented on a net basis.

For contracts that contain more than one performance obligations, the Group allocates the transaction price to each performance obligation on a relative stand-alone selling price basis.

#### (p) Foreign currencies (continued)

The Group's major financial instruments include amounts due from associates and a ioint venture, financial assets at FVTPL, trade and other receivables, restricted/pledged bank deposits with maturity over three months, cash and cash equivalents, bank loans, loan from a director and controlling shareholder, financial quarantee contract, trade and other payables and lease liabilities. Details of the financial instruments are disclosed in respective notes.

This note presents information about the Group's exposure to each of the above risks, the Group's objectives, policies and processes for measuring and managing risk, and the Group's management of capital.

#### Credit risk and impairment assessment (i)

Credit risk refers to the risk that the Group's counterparties default on their contractual obligations resulting in financial losses to the Group. The Group does not hold any collateral or other credit enhancement to cover its credit risks associated with its financial assets

The Group's credit risk exposures are primarily attributable to bank balances and restricted/pledged bank deposits, trade receivables, deposit and other receivables and amounts due from associates and a joint venture. The carrying amounts of these balances represent the Group's maximum exposure to credit risk in relation to financial assets.

### (i) Credit risk and impairment assessment (continued)

In respect of bank balances and restricted/ pledged bank deposits, the credit risk is considered to be low as the counterparties are reputable banks. The existing counter parties do not have defaults in the past. Therefore, ECL rate of cash at bank is assessed to be close to zero and no provision was made as of 31 December 2024 and 2023.

The Group applies the simplified approach to provide for ECLs prescribed by HKFRS 9, which permits the use of the lifetime ECL provision for all trade receivables. To measure the ECLs, trade receivables have been grouped based on shared credit risk characteristics. The Group has performed historical analysis and identified the key economic variables impacting credit risk and ECL. It considers available reasonable and supportive forward-looking information.

As at 31 December 2024 and 2023, trade receivables, deposit and other receivables as well as amounts due from associates and a joint venture that are individually significant have been separately assessed for impairment. The Group makes periodic assessments on the recoverability of the trade receivables, deposit and other receivables as well as amounts due from associates and a joint venture based on the background and reputation of the customers and debtors, historical settlement records and past experience.

就銀行結餘及受限制/ 已抵押銀行存款而言,信 貸風險被視為很低,乃由 於對手方為知名銀行。現 有對手方過去並無違約 記錄。因此,於二零二四 年及二零二三年十二月 三十一日,銀行現金之預 期信貸虧損比率為近乎 零,且並無作出撥備。

本集團應用香港財務報 告準則第9號所訂明之簡 化方法就預期信貸虧損 作出撥備,該規定允許對 所有應收貿易賬款採用 全期預期信貸虧損撥備。 為計量預期信貸虧捐,應 收貿易賬款已按共有信 貸風險特徵分類。本集團 已進行歷史分析,並確定 影響信貸風險及預期信 貸虧損之主要經濟變數。 其考慮可取得之合理可 靠前瞻性資料。

於二零二四年及二零 二三年十二月三十一日, 個別重大之應收貿易賬 款、按金及其他應收賬款 以及應收聯營公司及一 間合營企業款項已就減 值作出獨立評估。本集團 根據客戶及債務人之背 景及聲譽、過往結算記錄 及過往經驗,定期評估應 收貿易賬款、按金及其他 應收賬款以及應收聯營 公司及一間合營企業款 項之可收回程度。

## Credit risk and impairment assessment (continued)

Majority of the Group's revenue is received from individual customers in relation to sales of air tickets and service fee income from provision of travel-related services. The Group's trade receivables majority arise from sales of air tickets to the customers. As at the end of the year, the top five customers and the largest customer accounted for approximately 1.4% and 1.4% (2023: approximately 4.9% and 4.3%) of the Group's trade receivables balance respectively. In view of the history of business dealings with the customers and the sound collection history of the receivables due from them, management believes that there is no material credit risk inherent in the Group's outstanding receivables balance due from these debtors saved for the debtor related to the impaired trade receivables disclosed in the below. Management makes periodic assessment on the recoverability of the trade and other receivables based on historical payment records, the length of overdue period, the financial strength of the debtors and whether there are any disputes with the debtors.

本集團大部份收益乃來 自向個人客戶銷售機票 以及提供旅遊相關服務 收取之服務費收入。本集 團大部份應收貿易賬款 來自向客戶銷售機票。 於年末,五大客戶及最大 客戶分別佔本集團應收 貿易賬款結餘約1.4%及 1.4%(二零二三年:約 4.9%及4.3%)。鑒於與該 等客戶之業務往來記錄 及應收彼等之應收賬款 的收回記錄良好,管理層 相信本集團應收該等債 務人之尚未收回應收賬 款結餘本身並無重大信 貸風險,惟下文披露與已 減值應收貿易賬款有關 之債務人除外。管理層根 據債務人之過往付款記 錄、逾期時間、債務人之 財政實力及與債務人是 否有任何糾紛,定期評估 應收貿易賬款及其他應 收賬款之可收回程度。

Individual credit evaluations are performed on all of the Group's customers requiring credit over a certain amount. These evaluations focus on the customer's past history of making payments when due and current ability to pay, and take into account information specific to the customer as well as pertaining to the economic environment in which the customer operates. Trade receivables are due within 30 days from the date of billing. Normally, the Group does not obtain collateral from customers.

The Group measures loss allowances for trade receivables at an amount equal to lifetime ECLs, which is calculated using a provision matrix. As the Group's historical credit loss experience does not indicate significantly different loss patterns for different customer segments, the loss allowance based on past due status is not further distinguished between the Group's different customer bases.

The Group provided allowance for expected credit losses on trade receivables in amount of approximately HK\$29,000 (2023: approximately HK\$137,000) for the year ended 31 December 2024.

Trade receivables are written-off when there is no reasonable expectation of recovery. Indicators that there is no reasonable expectation of recovery include, amongst others, the failure of a debtor to engage in a repayment plan with the Group, and a failure to make contractual payments for a period greater than agreed contract terms.

Impairment losses on trade receivables are presented as net impairment losses within operating profit. Subsequent recoveries of amounts previously written-off are credited against the same line item.

Expected loss rates are based on actual loss experience over the past 1 year. These rates are adjusted to reflect differences between economic conditions during the period over which the historic data has been collected, current conditions and the Group's view of economic conditions over the expected lives of the trade receivables.

Further quantitative disclosures in respect of the Group's exposure to credit risk arising from trade receivables are set out in note 21 to the consolidated financial statements.

The management monitored the financial background and creditability of those debtors on an ongoing basis. The Group seeks to minimise its risk by dealing with counterparties which have good credit history. Majority of the trade receivables that are neither past due nor impaired have no default payment history. In this regard, the Directors consider that the Group's credit risk is significantly reduced.

For deposits and other receivables as well as amounts due from associates and a joint venture, management makes periodic collective assessments as well as individual assessment on the recoverability of other receivables based on historical settlement records and past experience. The Directors believe that there is no material credit risk inherent in the Group's outstanding balances.

#### (ii) Liquidity risk

Liquidity risk is the risk that the Group will not be able to meet its financial obligations as they fall due. The Group's policy is to regularly monitor its current and expected liquidity requirement and its compliance with lending covenants, to ensure that it maintains sufficient reserves of cash and adequate committed lines of funding from major financial institutions to meet its liquidity requirements in the short and long-term.

The following table details the remaining contractual maturities at the end of the reporting period of the Group's nonderivative financial liabilities, which are based on the contractual maturity date. The amounts disclosed in the table are the contractual undiscounted cash flows (including interest payments computed using contractual rates or, if floating, based on rates current at the end of the reporting period) and the earliest date the Group can be required to pay:

> There is a clause for repayment on demand under the facility letters regarding the bank loans granted to the Group. Thus, the bank loans are categorised into the time band of "within 1 year or on demand" in the above maturity analysis. As at 31 December 2024, the aggregate undiscounted principal amount and interest of bank loans was approximately HK\$277,836,000 (2023: approximately HK\$325,497,000). Taking into account of the Group's financial position, the Directors believe that the bank exercising its discretionary rights to demand immediate repayment is remote and such bank loans shall be repaid one year after the end of the reporting period in accordance with the scheduled repayment dates set out in the loan agreements. For the year ended 31 December 2024, the aggregate principal and interest cash outflows will be in the amount of approximately HK\$277,836,000 (2023: approximately HK\$325,497,000) calculated with weighted average effective interest rate.

> As at 31 December 2024 and 2023, it was not probable that the counterparties to the financial guarantee will claim under the contracts. Consequently, there is no amount recognised for the financial guarantee contract in the consolidated financial statements for the year ended 31 December 2024 (2023: nil).

#### (iv) Interest rate risk (continued)

The Group's cash flow interest rate risk relates primarily to floating-rate borrowings. The Group's income and operating cash flows are substantially independent of changes in market interest rates. The Group currently does not have any interest rate hedging policy. However, the management monitors interest rate exposure and will consider hedging significant interest rate exposure should the need arise.

Sensitivity analysis on interest rate risk Regarding the cash flow interest rate risk, the sensitivity analysis set out below has been determined based on the exposure to interest rates for non-derivative instruments at the end of the reporting period. For variable-rate borrowings, the analysis is prepared assuming the amount of liability outstanding at the end of the reporting period was outstanding for the whole year. A 50 basis point increase or decrease is used when reporting interest rate risk internally to key management personnel and represents management's assessment of the reasonably possible change in interest rates.

#### (iv) Interest rate risk (continued)

Sensitivity analysis on interest rate risk (continued)

If interest rates had been 50 basis point higher/lower and all other variables were held constant, the Group's loss for the year ended 31 December 2024 would increase/ decrease by approximately HK\$2,233,000 (2023: approximately HK\$2,398,000). This is mainly attributable to the Group's exposure to interest rates on its floating rate borrowings.

#### Interest rate benchmark reform

As listed in note 26, several of the Group's interest-bearing bank loans based on Hong Kong interbank offered rate ("HIBOR") will or may be subject to the interest rate benchmark reform. The Group is closely monitoring the market and managing the transition to new benchmark interest rates, including announcements made by the relevant interbank offered rate (IBOR) regulators, risks arising from the interest rate benchmark reform and the progress in completing the transaction to alternative benchmark.

#### **HIBOR**

While the Hong Kong Dollar Overnight Index Average ("HONIA") has been identified as an alternative to HIBOR, there is no plan to discontinue HIBOR. The multirate approach has been adopted in Hong Kong, whereby HIBOR and HONIA will coexist.

### 5. ACCOUNTING ESTIMATES AND **JUDGEMENTS**

## (a) Key sources of estimated uncertainty

In the process of applying the Group's accounting policies which are described in note 2, management has made certain key assumptions concerning the future, and other key sources of estimated uncertainty at the end of the reporting period, that may have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, as discussed below:

#### (i) Impairment of property, plant and equipment and land and buildings

The recoverable amount of an asset is the greater of its net selling price and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset, which requires significant judgement relating to the level of revenue and the amount of operating costs. The Group uses all readily available information in determining an amount that is a reasonable approximation of the recoverable amount, including estimates based on reasonable and supportable assumptions and projections of revenue and operating costs. Changes in these estimates could have a significant impact on the carrying amount of the assets and could result in additional impairment charge or reversal of impairment in future periods.

This valuation uses cash flow projections based on financial estimates covering an eight-year period (i.e. the end of gaming concession (31/12/2032)), and a pre-tax discount rate of approximately 7.0% (2023: approximately 8.3%). As at 31 December 2024, in view of impairment indicators to specify, the Group performed impairment assessment on associates. Determining whether impairment loss should be recognised requires an estimation of the recoverable amount of the relevant associate which is the higher of value in use and fair value less costs of disposal. The value in use calculation requires the management of the Group to estimate the present value of the estimated cash flows expected to arise from dividends to be received from the associates and the proceeds from the ultimate disposal of the investment taking into account. In cases where the actual cash flows are less or more than expected, or change in facts and circumstances which result in revision of future cash flows estimation or discount rate, further recognition of impairment may arise, which would be recognised in profit or loss for the period in which such further recognition takes place.

#### 5. ACCOUNTING ESTIMATES AND **JUDGEMENTS (CONTINUED)**

#### (b) Critical accounting judgements in applying the Group's accounting policies

In determining the carrying amounts of some assets and liabilities, the Group makes assumptions for the effects of uncertain future events on those assets and liabilities at the end of each reporting period. These estimates involve assumptions about such items as cash flows and discount rates used. The Group's estimates and assumptions are based on historical experience and expectations of future events and are reviewed periodically. In addition to assumptions and estimations of future events, judgements are also made during the process of applying the Group's accounting policies.

#### (i) Impairment test for interests in associates

Management has considered the above assumptions and valuation and also taken into account the business plan going forward. The valuation depends upon an estimate of future cash flows from the interests in associates and other key assumptions, which are based on the Directors' best estimates. The valuation is sensitive to these parameters. Changes in these parameters could lead to a material revision of the valuation which may have effects on the net assets and results of the Group.

Determining whether the Group is acting as a principal or an agent requires considering of all relevant facts and circumstances, including whether (i) the nature of its promise is a performance obligation to provide the specified goods or services to the customer or to arrange for the other party to provide those goods or services; (ii) the Group obtains control of each specific goods or service before that goods or service is transferred to the customer; and (iii) the Group has latitude in establishing prices.

The Group's management performs the assessment based on the above mentioned factors and reaches the conclusion that the Group acts as a principal in the provision of travel-related services and in sales of air tickets when all the factors set above are fulfilled and recognises the sales on a gross basis accordingly. For the year ended 31 December 2024, the Group recognised impairment loss of approximately HK\$36.102.000 (2023: nil) for the leasehold land and building by considering the recoverable amount having regard to the change in the property market conditions in Hong Kong.

The recoverable amount of the leasehold land and building has been determined based on the fair value less cost of disposal and the valuation of leasehold land and building was performed by the Valuer. The fair value of leasehold land and building located in Hong Kong is determined using combination of income capitalisation method and direct comparison method by reference to recent sales price of comparable properties on a price per saleable square foot basis and rental value per saleable square foot. The leasehold land and building was classified as level 3 under the fair value hierarchy.

截至二零二四年十二月三十一日止 年度,因應香港物業市況轉變而考 慮可收回金額後,本集團已就租賃 土地及樓宇確認減值虧損約港幣 36,102,000元 (二零二三年:無)。

租賃土地及樓宇之可收回金額乃基 於公平值減出售成本釐定,而租賃 土地及樓宇之估值乃由估值師進 行。位於香港之租賃土地及樓宇之 公平值乃經參考可比較物業按每平 方呎實用面積價格得出之近期售價 及每平方呎實用面積租金價值,結 合使用收入資本化法及直接比較法 釐定。租賃土地及樓宇被分類至公 平值架構級別下之第三級。

### 15. PROPERTY, PLANT AND EQUIPMENT 15. 物業、廠房及設備(續) (CONTINUED)

For the year ended 31 December 2024, the Group has pledged the leasehold land and building with carrying amount of approximately HK\$169.7 million (2023: approximately HK\$212.8 million) to secure bank loans granted to the Group (note 26).

For the year ended 31 December 2024, additions/ modifications to the right-of-use assets including capitalised lease payments amounted to approximately HK\$1,430,000 (2023: approximately HK\$418,000), due to renewal of leases of office.

Details of total cash outflow of leases are set out in the consolidated statement of cash flows.

For the year ended 31 December 2024, the Group leases some properties as office. Lease contracts were entered into for fixed term of two to three years. Lease terms were negotiated on an individual basis and contained a wide range of different terms and conditions. In determining the lease term and assessing the length of the non-cancellable period, the Group applied the definition of a contract and determined the period for which the contract was enforceable.

截至二零二四年十二月三十一日止 年度,本集團已抵押賬面值約港幣 169,700,000元 (二零二三年:約港 幣212,800,000元) 之租賃土地及樓 宇,作為本集團獲授銀行貸款之抵 押品(附註26)。

截至二零二四年十二月三十一日止 年度,由於重續辦公室和賃,故添 置/修改使用權資產(包括資本化 租賃付款) 約港幣1,430,000元 (二零 二三年:約港幣418,000元)。

截至二零二四年十二月三十一日止 年度,本集團租賃若干物業作辦公 室。所訂立的租賃合約之固定期限 為兩至三年。租賃期乃按個別基準 協商,並包含廣泛之條款及條件。 於釐定租賃期及評估不可撤銷期間 之期限時,本集團應用合約之定義 並確定合約可強制執行之期間。

#### **Trademark**

The trademark named as "Jade Tours" is a wellknown travel agency brand registered in Canada. The Directors assessed that the trademark is having indefinite useful lives because the trademark was expected to contribute to net cash inflow indefinitely and can be renewed by the Group at minimal cost.

In accordance with HKAS 36, the Group completed its annual impairment test for the trademark by comparing its recoverable amount to its carrying amount as at 31 December 2024 and 2023. The Group has conducted a valuation of the trademark based on the value in use calculations. With reference to the valuations carried out by the Valuer, the recoverable amount of the trademark is higher than its carrying amount. The recoverable amount of trademark is higher than its carrying amount as at 31 December 2024 and 2023. Therefore, no further impairment loss has been recognised for the year ended 31 December 2024 (2023: reversal of impairment loss HK\$2,002,000). Any adverse change in the assumptions used in the calculation of the recoverable amount would result in change in the amount of impairment.

#### 16. 無形資產(續)

#### 商標

「Jade Tours」商標名稱乃加拿大知 名註冊旅遊代理品牌。由於商標預 期可無限期貢獻現金流入淨額,並 可由本集團以微不足道之成本續 新,故董事評估商標之可使用年期 為無限。

根據香港會計準則第36號,本集團 將商標於二零二四年及二零二三 年十二月三十一日之可收回金額 與賬面值作比較,藉以完成對商標 之年度減值測試。本集團已根據使 用價值計算方法為商標進行估值。 參考估值師進行之估值,商標之可 收回金額高於賬面值。於二零二四 年及二零二三年十二月三十一日, 商標之可收回金額高於賬面值。故 此,截至二零二四年十二月三十一 日上年度並無確認進一步減值虧損 (二零二三年:減值虧損撥回港幣 2,002,000元)。計算可收回金額時 使用之假設如有任何不利變動,將 可能導致減值金額有變。

For the year ended 31 December 2024 截至二零二四年十二月三十一日止年度

#### 16. INTANGIBLE ASSETS (CONTINUED)

#### Trademark (continued)

The valuation of the trademark is based on the relief-from-royalty method and uses cash flow projections based on financial estimates covering a five-year period, the expected sales deriving from the trademark in the travel CGU and a pre-tax discount rate of approximately 21% (2023: approximately 24%). The cash flows beyond the five-year period are extrapolated using a steady 3% (2023: 3%) growth rate. This growth rate does not exceed the long-term average growth rate for travel markets in which the Group operates. The values assigned to the above assumptions reflect past experience and are consistent with management plans for focusing operations in these markets. Management believes that the assumption is reasonably achievable.

#### **Client List**

The Directors assessed that the client list is having 15 years of useful lives from the date of acquisition. The carrying amount of the client list was fully impaired in the year ended 31 December 2014. The recognition of impairment loss is mainly contributed by the increase in contributory charge of fixed assets. The client list is wholly written-off for the year ended 31 December 2023.

#### 16. 無形資產(續)

#### 商標(續)

商標之估值按免納專利權使用費方 法計算,並採用根據涵蓋五年期之 財務估計、預期來自旅遊現金產生 單位之商標之銷售額及除稅前貼現 率約21% (二零二三年:約24%) 得 出之現金流量預測進行。超逾五年 期之現金流量則採用穩定增長率 3% (二零二三年:3%) 推算。有關 增長率並不超過本集團經營所在旅 遊市場之長期平均增長率。上述假 設之相關價值反映過往經驗,並與 管理層專注於該等市場業務之計劃 相符。管理層相信該假設可合理實 踐。

#### 客戶名單

董事評估客戶名單之可使用年期為 自收購日期起計15年。客戶名單之 賬面值已於截至二零一四年十二月 三十一日止年度全面減值。確認減 值虧損主要來自固定資產之繳納支 出增加。客戶名單於截至二零二三 年十二月三十一日止年度全數撇 銷。

For the year ended 31 December 2024 截至二零二四年十二月三十一日止年度

#### 16. INTANGIBLE ASSETS (CONTINUED)

#### **Cryptocurrencies**

In 2021, the Group purchased an aggregate of approximately 23.4 units of Bitcoin, a cryptocurrency, at an aggregate consideration of equivalent to approximately HK\$10.1 million on an open market cryptocurrency exchange platform. The Directors consider the economic lives of cryptocurrency are indefinite as they lack of physical form and there is no limit to their useful life. The Group accounts for all cryptocurrencies held as indefinite-lived intangible assets in accordance with HKAS 38 "Intangible Assets" and adopts the cost model for the measurement. The cryptocurrencies are initially recorded at cost and are subsequently remeasured on the consolidated statement of financial position at cost, net of any impairment losses incurred since acquisition.

In accordance with HKAS 36, the Group completed its annual impairment test for the cryptocurrencies by comparing the carrying amount with the recoverable amount at the end of each reporting period. The recoverable amount is determined in fair value less cost of disposal. In 2022, as FTX, one of cryptocurrency exchange platform in USA, ("FTX") group entities, including FTX, had filed a voluntary petition for bankruptcy protection in the USA on 11 November 2022, the cryptocurrencies were unlikely to be withdrawn from FTX and thus, a total impairment loss equivalent to approximately HK\$8,529,000 was recognised on the Group's cryptocurrencies for the year ended 31 December 2022.

#### 加密貨幣

於二零二一年,本集團於公開市場 上之加密貨幣交易平台購入合共約 23.4單位之加密貨幣比特幣,總代 價相等於約港幣10,100,000元。董 事認為,加密貨幣由於並無實際形 態,且可使用年期並無限制,故並 無確定經濟年期。本集團按照香港 會計準則第38號「無形資產」將持有 之所有加密貨幣入賬列作無限期無 形資產,並應用成本模式計量。加 密貨幣初步按成本入賬,其後於綜 合財務狀況表按成本扣除自收購以 來產生之任何減值虧損重新計量。

按照香港會計準則第36號,本集團 將加密貨幣於各報告期末之賬面值 與可收回金額作比較,藉以完成對 加密貨幣之年度減值測試。可收回 金額按公平值減出售成本而釐定。 於二零二二年,由於FTX(「FTX」,美 國加密貨幣交易平台之一)之集團 實體(包括FTX)於二零二二年十一 月十一日在美國提出申請破產保護 之自願呈請,因此不大可能從FTX 提取加密貨幣,故於截至二零二二 年十二月三十一日止年度就本集團 之加密貨幣確認合共相等於約港幣 8,529,000元之減值虧損。

A significant increase/(decrease) in estimated rental value per saleable square foot in isolation would result in a significantly higher/(lower) fair value of the investment properties. #### (c) Goodwill

Because goodwill is included in the carrying amount of the interests in associates and is not separately recognised, it is not tested for impairment separately by applying the requirements for impairment testing in HKAS 36. Instead, the entire carrying amount of the interests in associates is tested for impairment as set out in note 18(d) below.

(d) The amounts due from associates are unsecured, interest-free and have no fixed terms of repayment. Their carrying amounts are not materially different from their fair value.

The Group completed its annual impairment test for interests in associates by comparing the recoverable amount of interests in associates to its carrying amount as at 31 December 2024 and 2023. The Group has engaged the Valuer to carry out a valuation of the interests in associates as at 31 December 2024 based on the value in use calculations. This valuation uses cash flow projections based on financial estimates covering an eight-year period (i.e. the end of gaming concession (31/12/2032)), and a pre-tax discount rate of approximately 7.0% (2023: approximately 8.3%). The cash flows beyond the above mentioned period are extrapolated using a steady 2.2% (2023: 2.1%) growth rate for the casino and hotel industries in which are operated by associates. The values assigned to the above assumptions reflect past experience and are consistent with management plans for focusing operations in these markets. Management believes that the assumption is reasonably achievable.

#### 37. CAPITAL RISK MANAGEMENT

The Group's primary objectives when managing capital are to safeguard the Group's ability to continue as a going concern, so that it can continue to provide returns for shareholders and benefits for other stakeholders and to maintain an optimal capital structure to reduce the cost of capital.

The Group actively and regularly reviews and manages its capital structure to maintain a balance between the higher shareholders returns that might be possible with higher level of borrowings and the advantages and security afforded by a sound capital position, and makes adjustments to the capital structure in light of changes in economic conditions.

The Group monitors its capital structure on the basis of debt-to-capital ratio. For this purpose, the Group defines debt as total borrowings which are bearing variable interest rate such as bank loans (note 26), lease liabilities (note 27) together with loan from a director and controlling shareholder (note 28), and net of cash and cash equivalents (note 24). Capital represents total equity attributable to owners of the Company in the consolidated statement of financial position.

The Group's strategy was to maintain the debt-tocapital ratio as low as feasible. In order to maintain or adjust the ratio, the Group may adjust the amount of dividends paid to shareholders, return capital to shareholders, issue new shares or sell assets to reduce debt. As at 31 December 2024, the debt-to-capital ratio is approximately 38% (2023: approximately 48%).

#### 37. 資本風險管理

本集團管理資本之主要目的乃保障 本集團能夠持續經營,從而可繼續 為股東帶來回報及為其他持份者帶 來利益,並維持優良資本架構,以 減低資本成本。

本集團積極及定期檢討及管理其資 本架構,以在維持較高股東回報(可 能帶來較高借貸水平) 與穩健資本 狀況所帶來之好處及保障之間取得 平衡,以及因應經濟狀況轉變而調 整資本架構。

本集團按債務對資本比率監控其資 本架構。為此,本集團將債務界定 為按浮動利率計息(如銀行貸款(附 註26)、租賃負債(附註27)連同一 名董事兼控股股東貸款(附註28), 扣除現金及現金等值項目(附註 24)) 之借貸總額。資本指綜合財務 狀況表內之本公司股東應佔權益總 值。

本集團之策略為盡力將債務對資本 比率維持於低水平。為維持或調整 該比率,本集團可能調整向股東派 付之股息金額、向股東退還資本、 發行新股或出售資產減低債務。於 二零二四年十二月三十一日,債務 對資本比率約為38%(二零二三年: 約48%)。
