Dear Sirs/Madam,

INSTRUCTIONS

We refer to your instruction for us to value various properties (the “**Properties**”) held by China Agri-Products Exchange Limited (the “**Company**”) or its subsidiaries (together referred as the “**Group**”) located in the People’s Republic of China (the “**PRC**”). We confirm that we have carried out site inspections, made relevant enquiries and obtained such further information as we consider necessary for the purpose of providing you with our opinion of market value of the Properties as at 30 April 2025 (the “**Valuation Date**”).

This letter which forms part of our valuation report explains the basis and methodologies of valuation, clarifying assumptions, valuation considerations, title investigations and limiting conditions of this valuation.

BASIS OF VALUATION

The valuation is our opinion of the market value (“**Market Value**”) which we would define as intended to mean the estimated amount for which an asset or liability should exchange on the valuation date between a willing buyer and a willing seller in an arm-length’s transaction after proper marketing wherein the parties had each acted knowledgeably, prudently and without compulsion.

Market Value is understood as the value of an asset or liability estimated without regard to costs of sale or purchase and without offset for any associated taxes or potential taxes.

The market value is the best price reasonably obtainable in the market by the seller and the most advantageous price reasonably obtainable in the market by the buyer. This estimate specifically excludes an estimated price inflated or deflated by special terms or circumstances such as atypical financing, sale and leaseback arrangements, joint ventures, management agreements, special considerations or concessions granted by anyone associated with the sale, or any element of special value.

VALUATION METHODOLOGY

The income approach provides an indication of value by converting projected cash flows to a single current value. Under the income approach, the value of an asset is determined by reference to the value of income, cash flow or cost savings generated by the asset.

We have valued the properties on the basis of capitalization of the market rent. Direct comparison method which is adopted for assessment of market rent based on the principle of substitution, where comparison is made based on rent realized on actual rent and/or asking rent of comparable properties. Comparable properties of similar size, scale, nature, character and location are analysed and carefully weighed against all the respective advantages and disadvantages of each property in order to arrive at a fair comparison of capital values.

VALUATION CONSIDERATIONS

In valuing the Properties, we have complied with all the requirements contained in Chapter 5, Practice Note 12 to the Rules Governing the Listing of Securities issued by The Stock Exchange of Hong Kong Limited and the International Valuation Standards.

VALUATION ASSUMPTION

In our valuation, unless otherwise stated, we have assumed that:

- i. the Properties will continue to be used in its present existing state in the business of the Group for which they were designed, built and erected;
- ii. no deleterious or hazardous materials or techniques have been used in the construction of the Properties;
- iii. the Properties are connected to main services and sewers which are available on normal terms; and
- iv. The Group is entitled to occupy, use and lease the Properties freely in the market when assessing the reference value.

TITLE INVESTIGATION

We have been shown copies of various documents relating to the property interest. However, we have not examined the original documents to verify the existing titles to the property interest or any amendment which does not appear on the copies handed to us. We have relied considerably on the information given by the Group's PRC legal advisers, Henan Shensheng Law Firm (河南申慎律師事務所), concerning the validity of the titles to the property interests.

LIMITING CONDITIONS

We have conducted on-site inspections in May 2025 by Ms. Liu Jing (MSc in Geo-information Science).

During the course of our inspections, we did not note any serious defects. However, no mechanical or structural survey has been made and we are therefore unable to report whether the Properties are free from rot, infestation or any other defects. No tests were carried out on any of the services.

We have not carried out detailed on-site measurement to verify the correctness of the areas in respect of the Properties but have assumed that the areas shown on the documents handed to us are correct. All dimensions, measurements and areas are approximate.

We have relied to a very considerable extent on the information provided by the Group and have accepted advices given to us on such matters, in particular, but not limited to particulars of occupancy, size and floor areas and all other relevant matters in the identification of the Properties.

We have had no reason to doubt the truth and accuracy of the information provided to us by the Group. We have also been advised by the Group that no material fact has been omitted from the information supplied. We consider that we have been provided with sufficient information to reach an informed view, and we have no reason to suspect that any material information has been withheld.

We do not accept a liability for any interpretation which we have placed on such information which is more properly the sphere of the legal advisers of the Group. Neither have we verified the correctness of any information supplied to us concerning the Properties.

REMARKS

We have valued the Properties in Renminbi (RMB).

We enclose herewith the "summary of values" and "Property Particulars and Opinion of Value".

Yours faithfully,
For and on behalf of
RHL Appraisal Limited
