VOLUNTARY ANNOUNCEMENT
STRATEGIC COOPERATION WITH THE STANDARD ROBOTS – EXPANDING DEPLOYMENT ACROSS THE ROBOTICS INDUSTRY CHAIN

This announcement is made by SY Holdings Group Limited (the "**Company**", together with its subsidiaries, the "**Group**") on a voluntary basis.

The board of directors (the "**Directors**") of SY Holdings Group Limited (the "**Board**") hereby announces that the Group has recently entered into a strategic cooperation with Standard Robots (Wuxi) Co., Ltd. (the "**Standard Robots**"), a world-leading industrial intelligent robotics company (the "**Strategic Cooperation**"). The two parties will carry out in-depth cooperation focusing on three key areas: supply chain services, industrial ecosystem linkage, and Artificial Intelligence (the "**AI**") applications.

STRATEGIC COLLABORATION

As the Standard Robots' preferred partner, the Group will leverage its proprietary AI Agents to connect with the industrial ecosystem of Standard Robots and conduct data analysis through AI Agent, thereby enabling more flexible order facilitation and supply chain services for Standard Robots' upstream and downstream enterprises. The Group's service model, which is rooted in industrial connectivity and driven by data, mainly relies on technological means such as big data analysis, large model inference, and industrial Internet of Things to capture transaction data in real time across key segments such as research and development (the "**R&D**"), production, procurement, and sales. This allows the Group to precisely and efficiently address supply chain needs for enterprises along the value chain.

While deeply engaged in national pillar industries such as infrastructure, pharmaceuticals, and commodities, the Group is also actively laying out strategic emerging industries including e-commerce, robotics, and AI applications, and has established strategic cooperative relationships with over 10 Fortune Global 500 companies. As of June 2025, after 11 years of investment in R&D and industrial ecosystem linkage, the Group has facilitated over RMB270 billion in order facilitation and working capital solutions for more than 19,000 small and medium enterprises (the "**SMEs**"). Through the Strategic Cooperation, leveraging its strong industrial connectivity capabilities and solid customer base, the Group will assist Standard Robots in promoting and applying its robotic solutions across more industries, accurately connecting with high-quality potential customers and unlocking greater business opportunities.

With the in-depth advancement of China's Belt and Road Initiative, international expansion has become a key strategic path for many enterprises. In recent years, in response to the growing demand in overseas markets, Standard Robots has continuously expanded its overseas sales and service networks, with its overseas market revenue proportion steadily increasing. The Group is also actively exploring overseas markets and has established cooperative relationships with leading cross-border e-commerce platforms in Southeast Asia, supporting Chinese brands and merchants in their global expansion. Through the Strategic Cooperation, both parties will jointly pursue overseas market opportunities to create new momentum for business growth and performance enhancement.

In terms of AI applications and computing power support, against the backdrop of the explosive development of AI large model applications, computing power has become a strategic resource and the focus of technological competition, directly affecting robots' data processing capabilities, task execution efficiency, and intelligence level. Through existing access to Xuelang Computing Center, NVIDIA AI Computing Center, and Sugon Advanced Computing Center, the Group will provide Standard Robots with robust AI computing support. This will further reinforce Standard Robots' leadership in industrial embodied intelligence technologies.

ABOUT THE STANDARD ROBOTS

Standard Robots is a global leader in industrial embodied intelligence and a pioneer in smart robotics. With a strong focus on R&D and production systems, it offers comprehensive solutions that seamlessly integrate 100% self-developed hardware, software, and algorithms–creating high technical barriers to entry. Its technologies address complex intelligent manufacturing demands in high-tech industries and are widely adopted in electronics, semiconductors, photovoltaics, lithium batteries, new energy, biopharma, and automotive sectors. Standard Robots delivers end-to-end smart logistics and deployment solutions, and leverages cutting-edge AI to drive automation and digital transformation in manufacturing.

REASONS AND BENEFITS OF THE STRATEGIC COOPERATION

The Strategic Cooperation is driven by the explosive growth of China's robotics sector. Under the combined impetus of government policy and market demand, the number of robotics companies in China surpassed 450,000 in 2024, representing over 200% growth since 2020. According to CCID Consulting, the industry is projected to reach RMB400 billion in size between 2026 and 2030, making China the largest robotics market globally. The Board believes that Standard Robots brings strong capabilities in core technologies and top-tier customer relationships, while the Group contributes digital and intelligent services in "AI + supply chain". The complementary strengths of both parties are well-aligned with the current wave of industrial upgrading. For the Group, the Strategic Cooperation represents a strategic breakthrough in the robotics sector, enabling access to a high-potential emerging industry ecosystem and supporting customer acquisition, scale expansion, and profit growth. It also lays a solid foundation for the continued high growth of the Group's platform-based technology services.

Looking ahead, the Group will continue to deepen its cooperation with Standard Robots and jointly explore cutting-edge technologies. The Strategic Cooperation is expected to support the Group's deployment in the robotics value chain, accelerate industrial digital transformation, and help ecosystem partners gain more orders, faster capital turnover, and stronger profitability–collectively injecting momentum into the upgrade of China's manufacturing and robotics sectors.

Shareholders of the Company and potential investors are advised to exercise caution when dealing in the shares of the Company.

By order of the Board
SY Holdings Group Limited
Tung Chi Fung
Chairman

Hong Kong, 7 July 2025

As at the date of this announcement, the Board comprises two Executive Directors: Mr. Tung Chi Fung and Ms. Wang Ying; one Non-Executive Director: Mr. Lo Wai Hung; and four Independent Non-Executive Directors: Mr. Fong Heng Boo, Mr. Tang King San Terence, Ms. Chan Yuk Ying Phyllis and Mr. Sun Wei Yung Kevin.

If there is any inconsistency in this announcement between the Chinese and English versions, the English version shall prevail.
