Chairman's Statement

On behalf of the Board, I would like to present to the Shareholders the interim results and the interim condensed consolidated financial statements of the Group for the Reporting Period.

1 REVIEW OF OPERATING CONDITIONS

During the first half of 2025, the Group recorded an increase in net revenue of new yachts, reaching approximately €620.4 million and representing a 1.5% increase as compared to the six months ended June 30, 2024.

As far as the Group's profitability is concerned, its adjusted EBITDA amounted to €99.1 million, representing an increase of approximately 2.5% in comparison with the figure reported for the six months ended June 30, 2024 (€96.7 million). The percentages also recorded increases, with an adjusted EBITDA/net revenue of new yachts margin reaching 16.0% in comparison with 15.8% for the six months ended June 30, 2024.

1.1 Yacht Manufacturing Business

The Group upheld an innovation-driven approach to maintain its market-leading position in its core business, placing great emphasis on research and development. Leveraging the substantial investments in research and development, the Group has been continuously renewing and broadening its product portfolio with technological and design innovation, allowing it to stay abreast of the rapidly evolving preferences and expectations of its clientele.

The launch of new models for composite and made-to-measure yachts, together with a growing interest in super yachts, allowed the Group to attract new customers while also continuing to nurture the interest of the Group's loyal clients.

- The Group's net revenue of new yachts from the sales of composite yachts¹ decreased by approximately 11.6% from approximately €265.0 million for the six months ended June 30, 2024 to approximately €234.4 million for the six months ended June 30, 2025.
- The Group's net revenue of new yachts from the sales of made-to-measure yachts increased by approximately 8.6% from approximately €233.1 million for the six months ended June 30, 2024 to approximately €253.1 million for the six months ended June 30, 2025.
- The Group's net revenue of new yachts from the sales of super yachts increased by approximately 26.6% from approximately €82.5 million for the six months ended June 30, 2024 to approximately €104.4 million for the six months ended June 30, 2025.

1.2 Other Businesses

The Group's other businesses provide synergies with its yacht manufacturing business with a comprehensive portfolio, including: (i) yacht brokerage, chartering and management services; (ii) after-sales and refitting services; (iii) brand extension activities (including exclusive lounges all-over-the-world); (iv) manufacturing and installation of wooden furnishings and kinetics for nautical interiors; (v) manufacturing and sale of coastal patrol vessel by the FSD; and (vi) manufacturing and sale of Wally sailing yachts. With such businesses, we are able to cover all customers' needs

Chairman's Statement

throughout the whole yachting “customer journey”, from the purchase of luxury yachts to a complete offer of ancillary services to enhance customer satisfaction and loyalty, while providing us with real-time information about market trends and customer preferences.

For the Reporting Period, the Group's net revenue from other businesses segment reached approximately €28.5 million (€30.4 million in six months ended June 30, 2024), representing a year-on-year reduction of approximately 6.2%.

1.3 ESG Commitment of the Group

By leveraging considerable investments in research and development, the Group has continuously upgraded and expanded its product portfolio with environmentally friendly, technological, and design innovations since 2014 to keep pace with the rapidly evolving expectations of its customers.

Thanks to its innovative drive, the Group was the very first to introduce a pioneering hybrid propulsion solution to the market in 2008, and it continues to innovate in this field. In 2021, the Group launched a collaboration with Rolls-Royce Power Systems to jointly develop hybrid solutions to be installed on future yachts and in 2022, the Group extended the agreement until the end of 2027, which guarantees the supply chain's efficiency, with clear benefits for its customers. The Group also entered the E-luxury segment with the first Riva full-electric powerboat, named El-Iseo, available for sale in January 2024. Furthermore, the Group is committed to expanding its other “green” product offering across all key brands, launching and marketing more eco-friendly solutions, building on the proposition of the newly launched models (besides FSD N800, Riva El-Iseo, wallytender43X and wallytender48X and the INFYNITO range) and increasing its presence in the sailing yacht market through Wally.

With respect to sustainable development, hydrogen is attracting increasing attention as an energy source and has the potential to become a game-changer in the maritime sector as well. Building on Weichai Group's significant achievements on this front and having already installed hydrogen engines on land vehicles, it will be a crucial partner of the Group to provide the necessary know-how and experience to make hydrogen engines on yachts a reality.

In addition, with a view to reducing the environmental impact of its products, the Group is constantly seeking innovative solutions, which involve the use of eco-friendly and lighter materials.

Moreover, the Group's ESG commitment is not limited to its outstanding product offering, but also targets its shipyards. All shipyards are adjusted to the ISO 14001:2015 environmental certification, introducing innovative solutions (such as trigeneration systems) and increasingly proficient solar panels to reduce both energy consumption and emissions.

The Group firmly believes in the importance of ESG moving forward and aims to become an ESG leader in the global yacht market. As a remark, the Group has been the first in the yacht industry to publish a sustainability report in 2019 and establish the ESG Committee in 2021, which is responsible for helping the Board to devise ESG policies and strategies and reviewing and assessing its sustainability performance.

2 OUTLOOK AND PROSPECTS

Once again, the global luxury yacht industry has proven to be resilient in the face of geopolitical uncertainty, underscoring its stability and strength. In this context, the Group has continued to deliver outstanding performance, consistently gaining market share reinforcing its strategic position not only in high-value segments but also in new emerging and high-growth segments. To continue building on advantage of the expected growth trends of the global luxury yacht industry, enhancing its value proposition and strengthening its overall resilience, the Group's future plans are based on the following strategic pillars:

- The Group will enhance and expand its product offering and product mix ahead of evolving market trends and customer expectations, with the aim to consolidate its market leadership position in both the composite yachts and made-to-measure yachts segments, focusing on the segments with the highest growth potential and marginality.
- The Group will continue to invest in innovation, technologies, and products with the aim of providing a more environmentally responsible yachting experience, attributable to through the skillful use of more sustainable materials and processes aimed at reducing the environmental impact of products.
- The Group will expand its made-to-measure offering to larger alloy yachts, developing new alloy-hulled super yacht models under the iconic Riva, Pershing, and Custom Line brands.
- The Group will also broaden both its yacht brokerage, chartering and management services and its after-sales and refitting services, expanding its brand extension and licensing activities.
- Finally, the Group will keep investing in the internalization of high value-added activities to support its future growth and product portfolio expansion.

3 APPRECIATION

Finally, I would like to express my sincere appreciation to all our proven and new Shareholders, our potential investors and our customers for their care and support, as well as to all of our staff for their hard work and dedication!

Mr. Jiang Kui

Chairman and non-executive Director

PRINCIPAL ACTIVITIES AND BUSINESS REVIEW

The Group is an established leader in the global luxury yacht industry with a portfolio of iconic brands of long heritage and outstanding high-end manufacturing capabilities. As one of the oldest Italian luxury yacht producers, it has been playing an important role in steering the development of the global luxury yacht industry by acquiring and integrating other leading yacht brands and production facilities since the establishment of the business in 1968. Its seven brands — Riva, Wally, Ferretti Yachts, Pershing, Itama, CRN and Custom Line — are globally recognized as symbols of luxury, exclusivity, Italian design, quality, craftsmanship, innovation and performance. The Group designs, produces and sells luxury composite yachts, made-to-measure yachts and super yachts from 8 to 95 meters, offering the full spectrum of functionalities and an increasing range of ancillary services, catering to the personalized tastes and requirements of its clientele. With its market leadership, rich history and iconic brand portfolio, the Group is positioned as the trend-setter of the global luxury yachting industry and the ambassador of Italian nautical excellence to the world.

Owing to excellent market reaction to the models launched in previous years, for the Relevant Period, the Group recorded a net revenue of new yachts of €620.4 million, representing a 1.5% increase from €611.0 million for the six months ended June 30, 2024, and the Group's adjusted EBITDA was €99.1 million, with an increase of about 2.5% from the six months ended June 30, 2024, which was €96.7 million. Adjusted EBITDA margin was equal to 16.0%, up 20 basis points when compared to 15.8% in the six months ended June 30, 2024. The net profit was almost in line with previous year (€44.0 million for the six months ended June 30, 2024 to €43.6 million for the Relevant Period).

This excellent performance confirms the strength of the commercial and industrial strategy that the Group maintains strong negotiating power over prices, consolidates the most profitable made-to-measure segment, and absorbs fixed costs more efficiently, in addition to greater procurement economies of scale capacity.

The Group upheld an innovation-driven approach to maintain its market-leading position in its core business, placing great emphasis on research and development. Leveraging the substantial investments in research and development, the Group has been continuously renewing and broadening its product portfolio with technological and design innovation, allowing it to stay abreast of the rapidly evolving preferences and expectations of its clientele.

The launch of new models for composite and made-to-measure yachts, together with a growing interest in super yachts, allowed the Group to attract new customers while also continuing to nurture the interest of the Group's loyal clients.

The Group's other businesses provide synergy with its yacht manufacturing business with a comprehensive portfolio, including: (i) yacht brokerage, chartering and management services; (ii) after-sales and refitting services; (iii) brand extension activities (including exclusive lounges all-over-the-world); (iv) manufacturing and installation of wooden furnishings and kinetics for nautical interiors; (v) manufacturing and sale of coastal patrol vessel by the FSD; and (vi) manufacturing and sale of Wally sailing yachts. With such businesses, the Group is able to cover all customers' needs throughout the whole yachting "customer journey", from the purchase of luxury yachts to a complete offer of ancillary services to enhance customer satisfaction and loyalty, while providing it with real-time information about market trends and customer preferences.

Management Discussion and Analysis

FINANCIAL REVIEW

Order intake

In the six months ended June 30, 2025, order intake amounted to €467.3 million, a slowdown of 9.2% compared to the same period of 2024, which was €514.4 million.

The second quarter of 2025 was marked by macroeconomic challenges and geopolitical uncertainties. The quarter included April's "Liberation Day," which coincided with rising concerns over potential new import tariffs between the U.S. and the European Union. Additionally, escalating geopolitical tensions in the Middle East during mid-June 2025 added further volatility to the global landscape.

Despite these challenges, our good results driven by product mix and the strength of our brands allow us to be confident for the upcoming Boat Show Season in the month of September 2025.

This segment demonstrated a strong quarterly rebound, moving from -13.8% in first quarter of 2025 vs. first quarter of 2024, to +23.6% in second quarter of 2025 vs. second quarter of 2024, driven by nearly half of new orders coming from over 80ft (24m) vessels.

Management Discussion and Analysis

(ii) Made-to-Measure Yachts

The **made-to-measure yachts** segment totaled €237.8 million in the Relevant Period, accounting for about 50.9% of total order intake (from €256.3 million, accounting for about 49.8% of total order intake in the six months ended June 30, 2024), reflecting a challenging year-on-year comparison, as the second quarter of 2024 registered the highest quarterly order intake for this segment in the last three years.

(iii) Super Yachts

The **super yachts** segment totaled €64.9 million in the Relevant Period, accounting for about 13.9% of total order intake (from €96.5 million, accounting for about 18.8% of total order intake in the six months ended June 30, 2024). This includes two flagship super yachts, which continue to attract high interest and appreciation among our clientele. The number of units is in line with last year, though the product mix has changed — with last year's intake including one Super Yacht.

(iv) Other Businesses

The **other businesses** totaled €3.8 million in the Relevant Period, accounting for about 0.8% of total order intake (the other business segment did not collect any order in the six months ended June 30, 2024).

The following table shows the breakdown of order intake by geographic area:

Management Discussion and Analysis

Europe totaled €181.1 million in the Relevant Period, accounting for about 38.8% of total order intake (from €182.0 million, accounting for about 35.4% of total order intake in the six months period ended June 30, 2024). This region performed well, with a double-digit performance in second quarter of 2025 (+72.8% vs second quarter of 2024), benefitting from the starting of the European season with a sound demand in the high-composite segment (>80ft or >24m).

MEA totaled €130.6 million in the Relevant Period, accounting for about 27.9% of total order intake (from €167.2 million, accounting for about 32.5% of total order intake in the six months period ended June 30, 2024), a solid performance considering the challenging year-on-year comparison, driven by Turkey and the Gulf Cooperation Council (GCC) countries' booming performance in the six months period ended June 30, 2024.

APAC totaled €12.8 million in the Relevant Period, accounting for about 2.7% of total order intake (from €7.0 million, accounting for about 1.4% of total order intake in the six months period ended June 30, 2024), continuing its growth trend.

AMAS totaled €142.8 million in the Relevant Period, accounting for about 30.6% of total order intake (from €158.2 million, accounting for about 30.8% of total order intake in the six months period ended June 30, 2024). Excluding the flagship Super Yacht order of approximately €32 million in the six months period ended June 30, 2024, which significantly impacted year-on-year comparability, this region recorded a positive growth in the Composite and Made-to-measure categories.

Order backlog

As of June 30, 2025, the order backlog amounted to €1,446.0 million, slightly down 3.3% compared to June 30, 2024 (€1,495.8 million). The order backlog recorded a slight year-over-year reduction, reflecting the significant high number of deliveries of the season. A total of 133 units were delivered in the first six month ended June 30, 2025, of which 102 in second quarter, including two Super Yachts.

Management Discussion and Analysis

Net Backlog

The net backlog that is calculated as the total orders in portfolio not yet delivered net of revenues already booked stood at €760.8 million as of June 30, 2025, slightly decreased by 3.2% as compared to €785.7 million as of June 30, 2024.

Net Revenue

The Group's overall net revenue of new yachts increased by approximately 1.5% from €611.0 million for the six months ended June 30, 2024 to approximately €620.4 million for the six months ended June 30, 2025. A sound result was underpinned by a solid order backlog, with the main contribution driven by made-to-measure and super yachts.

Overall, the Group's net revenue amounted to approximately €638.3 million, with a reduction of approximately 1.3% compared to €646.4 million in the corresponding period of 2024, attributable to lower sales of pre-owned boats, also in relation to the lower available stock. The sale of pre-owned yachts represents an opportunity for trade-in offered to the Group's customers as a lever to facilitate the sale of new yachts.

The following table shows the breakdown of net revenue of new yachts sales by production type¹⁰:

The Group's raw materials and consumables used decreased by approximately 13.3% from approximately €333.3 million for the six months ended June 30, 2024 to approximately €288.8 million for the Relevant Period, primarily due to the adjustment of purchase volumes to production demand, paying attention to the management of net working capital and net financial position.

Contractors Costs

The Group's contractors costs increased by approximately 8.1% from approximately €131.7 million for the six months ended June 30, 2024 to approximately €142.4 million for the Relevant Period. Such increase was mainly attributable to the different mix of purchasing between raw materials.

The Group's costs for trade shows, events and advertising decreased by approximately 8.8% from approximately €10.2 million for the six months ended June 30, 2024 to approximately €9.3 million for the Relevant Period, mainly due to the optimization of costs by focusing communication events on those with the greatest contribution.

Rentals and Leases

The Group's rentals and leases increased by €0.3 million, or approximately 5.3%, from €5.7 million for the six months ended June 30, 2024 to €6.0 million for the Reporting Period, primarily due to (i) an increase in royalties mainly attributable to the increase in new yachts delivered; and (ii) an increase in expenses relating to short-term leases, which was generally in line with the growth of the Group's business, while the rentals and leases for low-value assets decreased.

Personnel Costs

The Group's personnel costs increased by €3.1 million, or approximately 4.1%, from €74.4 million for the six months ended June 30, 2024 to €77.5 million for the Reporting Period, primarily due to the increase in the average headcount to support the growth of the Group's business.

Management Discussion and Analysis

Other Operating Expenses

The Group's other operating expenses decreased from approximately €5.9 million for the six months ended June 30, 2024 to approximately €5.1 million for the Relevant Period, mainly due to a combined effect of the decrease of settlement agreements, re-billable costs and memberships in trade associations and the increase in cost under-accruals.

Provisions and impairment

The total provisions and impairment decreased by approximately €5.3 million from €12.8 million for the six months ended June 30, 2024 to €7.4 million for the six months ended June 30, 2025, primarily due to the achievement of an adequate amount of provisions in relation to the number of boats under warranty and the risks associated with the Group's activities.

Financial income and expenses

Net Profit

Non-IFRS Measures

To supplement the Group's consolidated income statements which are presented in accordance with IFRS, EBITDA, adjusted EBITDA, adjusted EBITDA/net revenue of new yachts, being non-IFRS measures, were also presented in this report. The Group is of the view that these measures facilitate comparison of operating performance from period to period by eliminating potential impacts of certain items and believes that these measures provide useful information to understand and evaluate the Group's consolidated income statements in the same manner as they help the Group's management. However, the Group's presentation of EBITDA may not be comparable to similar terms used by other companies. The use of these measures has limitations as an analytical tool, as such, it should not be considered in isolation from, or as substitute for analysis of, the Group's results of operations or financial condition as reported under IFRS.

Management Discussion and Analysis

The Company defines (i) EBITDA as profit after tax plus financial expenses (including the result of operating foreign exchange conversion but excluding exchange rate gains/(losses) related to financial transactions), depreciation and amortization, and income tax expenses, and less financial income and income tax benefit; (ii) adjusted EBITDA as EBITDA adjusted by adding back certain special items (other minor non-recurring events); and (iii) net revenue of new yachts as net revenue excluding revenue generated from the trading of pre-owned yachts.

REVIEW REPORT ON THE INTERIM CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (TRANSLATION FROM THE ORIGINAL ITALIAN TEXT)

To the Shareholders of
Ferretti S.p.A.

INTRODUCTION

We have reviewed the accompanying half-yearly condensed consolidated financial statements of Ferretti S.p.A. and subsidiaries (the "**Ferretti Group**"), which comprise the statement of financial position as at June 30, 2025 and the income statement, comprehensive income, statement of changes in equity and cash flow statement for the six month period then ended, and the related explanatory notes. The Directors are responsible for the preparation of the half-yearly condensed consolidated financial statements in accordance with the International Accounting Standard applicable to the interim financial reporting (IAS 34) as issued by the International Accounting Standards Board and adopted by the European Union. Our responsibility is to express a conclusion on the half-yearly condensed consolidated financial statements based on our review.

SCOPE OF REVIEW

We conducted our review in accordance with the criteria recommended by the Italian Regulatory Commission for Companies and the Stock Exchange ("**Consob**") for the review of the half-yearly financial statements under Resolution n° 10867 of July 31, 1997. A review of half-yearly condensed consolidated financial statements consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with International Standards on Auditing (ISA Italia) and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

CONCLUSION

Based on our review, nothing has come to our attention that causes us to believe that the accompanying half-yearly condensed consolidated financial statements of the Ferretti Group as at June 30, 2025 are not prepared, in all material respects, in accordance with the International Accounting Standard applicable to the interim financial reporting (IAS 34) as issued by the International Accounting Standards Board and adopted by the European Union.

2. BASIS OF PREPARATION

These unaudited interim condensed consolidated financial statements as at June 30, 2025, have been prepared in condensed form in conformity with the international accounting standard applicable to the preparation of interim financial statements (IAS 34). The unaudited interim condensed consolidated financial statements at June 30, 2025, do not contain all the information required for the annual consolidated financial statements and should therefore be read together with the consolidated financial statements at December 31, 2024.

The unaudited interim condensed consolidated financial statements have been prepared on the basis that the Group can operate as a going concern since the Company's management has verified that there are no uncertainties regarding this.

The unaudited interim condensed consolidated financial statements include the statement of financial position, that has been prepared based on the accounts as at June 30, 2025 of the controlled companies within the consolidation perimeter; the income statement, the comprehensive income statement, the cash flow statement, the statement of changes in equity and related illustrative notes, that have been prepared based on the accounts for the six months period ended June 30, 2025 of the controlled companies within the consolidation perimeter.

For the purposes of clarity and to make this document more readily understandable, all the amounts listed are stated in thousands of Euro, except when otherwise indicated.

Comments on the significant changes in the main items of the income statement and balance sheet are included in the Management Discussion and Analysis section, to which reference is made.

3. CHANGES TO THE GROUP'S ACCOUNTING POLICIES

The accounting policies adopted in the preparation of the unaudited interim condensed consolidated financial statements are consistent with those followed in the preparation of the Group's annual consolidated financial statements for the year ended December 31, 2024, except for the adoption of new standards effective as of January 1, 2025. The Group has not early adopted any standard, interpretation or amendment that has been issued but is not yet effective.

One amendment applies for the first time in six months ended June 30, 2025, but does not have an impact on the interim condensed consolidated financial statements of the Group.

Lack of exchangeability — Amendments to IAS 21

The amendments to IAS 21 The Effects of Changes in Foreign Exchange Rates specify how an entity should assess whether a currency is exchangeable and how it should determine a spot exchange rate when exchangeability is lacking. The amendments also require disclosure of information that enables users of its financial statements to understand how the currency not being exchangeable into the other currency affects, or is expected to affect, the entity's financial performance, financial position and cash flows.

3. CHANGES TO THE GROUP'S ACCOUNTING POLICIES (CONTINUED)

Lack of exchangeability — Amendments to IAS 21 (Continued)

The amendments are effective for annual reporting periods beginning on or after January 1, 2025. When applying the amendments, an entity cannot restate comparative information.

The amendments did not have impact on the Group's interim condensed consolidated financial statements.

Climate change: impacts on financial reporting, accounts and financial statement disclosures

While preparing the annual consolidated financial statements as at December 31, 2024, the management has carefully evaluated the priorities endorsed by ESMA in October with particular reference to the consistency and connectivity between the information related to the climate change-related risks and the information included in the consolidated financial statements and plans.

In the first half of 2025, the Group reaffirmed its commitment to integrating ESG (Environmental, Social, and Governance) criteria into its corporate strategies, in line with the sustainability goals outlined in the 2024 report.

The initiatives undertaken focused in particular on the development of a monitoring system for the collection of non-financial data, as well as the implementation of measures aimed at ensuring responsible environmental resource management, promoting diversity and inclusion, and adopting transparent and ethical governance practices.

During the semester, the Group also monitored several key ESG performance indicators, including energy consumption, CO2 emissions, the percentage of women in managerial positions, and the number of training hours provided to staff, in order to assess progress against the established targets.

Consistent with the findings of the 2024 financial year, no ESG-related risks emerged that could have a significant current or prospective impact on the Group's economic, equity, or financial position.

The double materiality analysis conducted in preparation for the 2024 Sustainability Report — covering key environmental, climate-related, regulatory, and reputational topics — did not reveal any critical issues likely to economically or financially affect the Group's operations. Ongoing oversight of all topics identified as material through the double materiality assessment enables the Group to maintain high standards of resilience and sustainability, in line with stakeholder expectations and the evolving regulatory landscape.

In this context, the Group has initiated a process to align with the European Sustainability Reporting Standards (ESRS), through a gap analysis aimed at identifying areas for improvement in view of the 2025 reporting cycle.

3. CHANGES TO THE GROUP'S ACCOUNTING POLICIES (CONTINUED)

Climate change: impacts on financial reporting, accounts and financial statement disclosures (Continued)

At the same time, stakeholder engagement activities continued, including surveys and thematic meetings, with the goal of gathering feedback to help guide ESG strategies.

In the second half of 2025, the Group plans to consolidate its ESG data collection system and to strengthen initiatives related to climate transition, with a particular focus on improving energy efficiency in production processes and adopting low environmental impact materials.

The following qualitative information, which is being offered to provide a better understanding of the impact of financial instruments on the Group's statement of financial position, income statement and Cash Flow Statement, is also designed to explain more clearly the Group's exposure to the different types of risks associated with financial instruments and the corresponding management policies, as required by IFRS 7.

Fair Value Measurement

The carrying amounts and fair values of Group's financial instruments, other than those whose carrying amounts are a reasonable approximation of the fair value, are as follows:

	June 30, 2025 (unaudited)		December 31, 2024 (audited)	
	Carrying amount	Fair value	Carrying amount	Fair value
Bank and other borrowings	3,743	3,743	3,592	3,592

Liability arising on business combination	554	554	2,299	2,299
Total	36,005	36,005	32,968	32,968

The management assessed that the fair values of cash and short-term deposits, trade receivables, trade payables, other current assets and other current liabilities approximate their carrying amounts largely due to the short-term maturities of these instruments, therefore they are not detailed in the above and following tables.

The fair values of financial assets and liabilities are included in the amount for which an instrument could be exchanged in a current transaction between consenting parties other than a forced or liquidation sale.

The fair values of the non-current part of bank and other borrowings have been calculated by discounting expected future cash flows using the rates currently available for instruments with similar terms, credit risk and maturities.

IFRS 7 requires that the financial instruments recognized at fair value on the consolidated statement of financial position be classified based on a hierarchical ranking that reflects the reliability of the inputs used to measure fair value. The following levels are used:

- i. Level 1 — prices quoted in an active market for the assets or liabilities that are being measured;
- ii. Level 2 — inputs other than the quoted prices of Level 1 but which are directly (prices) or indirectly (derived from prices) observable in the market;
- iii. Level 3 — inputs that are not based on observable market data.

The put and call option related to Il Massello S.r.l. has ceased due to the anticipated acquisition of the non-controlling interest for the 15% of the share capital occurred on April 15, 2025, so for the six months ended June 30, 2025 the liability arising on business combination under Level 3 for €554 thousand refer only to the value of the put and call options for the acquisition of the non-controlling interest of Fratelli Canalicchio S.p.A..

The financial debt has been calculated based on the agreements with non-controlling interests that links the price of exercise of this put/call option to the financial performance of the subsidiaries and the Net Present Value has been discounted using the rate of 9.5%.

The increase from December 31, 2024 to June 30, 2025 (Euro 71 thousand), is due to the shortening of the remaining period before the exercise of the options.

The following table presents a sensitivity analysis of the liability arising on business combination — Level 3, keeping all other variables constant.

Liquidity Risk

The liquidity risk is the risk that an entity may find it difficult to perform obligations arising from financial and trade liabilities in accordance with stipulated terms and due dates.

The Group continuously monitors the cash flow through the planning of the expected cash flows and the necessary financing sources on a weekly basis, over a monthly horizon, taking also into account the seasonality of the Group's business.

In most of the transactions, the sales policies adopted by the Group continue to call for payment of any contractually owed balances when the boat is delivered and the collection of security deposits and advances in accordance with contractually established schedules, particularly in accordance with the size of the boat.

The figures as at December 31, 2024 have been reclassified for a better comprehension.

4. FINANCIAL RISK MANAGEMENT (CONTINUED)

Liquidity Risk (Continued)

Guarantees on loans, consisting of mortgages, are described in Note 51. They are permitted guarantees on the basis of the Facility Agreement not in use as at the Reporting date, as described in Note 35.

There are no financing agreements with suppliers included in Trade and other payables.

Market and Interest Rate Risk

This is the risk that the fair value and future financial flows of a financial instrument may fluctuate due to changes in market prices. The market risk includes the following subcategories:

- Currency risk (the risk that the value of financial instruments may fluctuate due to changes in foreign exchange rates);
- Interest rate risk (the risk that the value of financial instruments may fluctuate due to changes in market interest rates);
- Price risk (the risk that the value of financial instruments may fluctuate due to changes in market prices).

The risk more specifically related to the Group's business is the risk of fluctuations in exchange rates. This risk relates to the possibility of changes in the Euro amount corresponding to the net foreign currency exposure for invoices issued, outstanding orders and, marginally, invoices payable and cash balances in foreign currency accounts.

The Group is primarily exposed to the exchange rate risk in relation to the US Dollar as a result of the sales made by the subsidiary Ferretti Group of America LLC.

During 2024 and the first half of 2025 no cash flow hedging was done in view of the exchange rate trend. In any case, as of June 30, 2025 and December 31, 2024, there were no currency forwards in place.

The following table presents a sensitivity analysis, at the end of each of the financial years, of the Group's profit before tax and equity (excluding losses carried forward) to a reasonably possible change in the exchange rate with the US dollar, keeping all other variables constant.

(in thousand Euro)	At June 30, 2025 (unaudited)		At December 31, 2024 (audited)

+5%	(735)	(12,729)	(2,455)	(14,047)

The interest risk is the risk that the value of future financial flows could fluctuate due to changes in market interest rates.

The following is a sensitivity analysis determined on the basis of the exposure as at the reporting dates June 30, 2025 and December 31, 2024 of the Group's financial debt (assuming that Euribor is above zero, considering the zero-floor condition generally applied to the Group's main borrowings).

Credit Risk

The credit risk is the risk of potential losses due to the inability of counterparties to fulfill commercial or financial obligations. This risk can arise when a counterparty defaults for technical/commercial reasons (disputes about the nature/quality of a product, interpretation of contract clauses, etc.) or when one party causes the other party to incur a loss by failing to comply with an obligation.

In light of the type of customers targeted by the Group's products and services and the commercial policies it has adopted — which envisage, in most of transactions, that the balance of the contract amount, net of advances collected, is paid before or concurrently with the delivery of the boat — the Group believes that its credit risk is not material. The payment of advances is associated with both the defined contractual due dates and the achievement of production milestones.

At the procedural level, in the limited number of cases in which the sales policies mentioned above are not applicable, the Group's receivables and the accrued advances to be paid are monitored periodically to verify compliance with contractual payment terms.

- Sale of yachts to order;
- Sale of used boats.

Regarding the sale of yachts to order (sale of composite yachts, made-to-measure yachts and super yachts), the Group considers that the only performance obligation contained in the sales contracts is the building of the vessel, with no significant accessory services or further activities.

This performance obligation is satisfied over time of construction of boats. The payment terms are agreed with the customers on a case by case basis to match cash requirements for the production. Advance payments are agreed with each customer on the basis of the time needed to construct the boats and are paid before the completion of the construction. These contracts do not include obligations for returns, refunds and other similar obligations, however the vessels are covered by a warranty which is included in a range between 12 and 24 months.

“Commissions and other costs related to revenue” mainly represents the costs incurred by the Group for the intermediation activities carried out by the dealers and brokers.

“Boat brokerage” refers to the activity related to yacht brokerage and yacht charters performed by the U.S. subsidiary Allied Marine.

“Sales of carpentry, kinematics, steel products and provision of services” relates to subsidiary Zago S.p.A. and Fratelli Canalicchio S.p.A., concerning assembly works and wooden furnishings for yachts of over 100 feet produced by third-party sites and cruise ships and automatic kinetic systems for yachts.

21. INCOME TAX

As shown in the table that follows, the “Income tax” amount for the six-month period ended June 30, 2025 was a tax expenses of €19,780 thousand, as detailed below:

<i>(in thousands Euro)</i>	30/06/2025 (unaudited)	30/06/2024 (unaudited)
Corporate income tax (IRES)	(4,734)	(3,938)
Regional tax (IRAP)	(2,656)	(2,707)
Federal taxes and other foreign taxes	(341)	(749)
Total current taxes	(7,730)	(7,394)
Prior-year taxes	(4)	(5)
Deferred taxes	(12,046)	(12,389)
Total income tax	(19,780)	(19,788)

The IRES (Imposta sul reddito delle società) taxable base of Ferretti S.p.A. and the subsidiaries Zago S.p.A. and Fratelli Canalicchio S.p.A. was positive, and therefore a provision was made for this tax based on the 24% rate currently in force in Italy.

Similarly, the IRAP (Imposta regionale sulle attività produttive) taxable base was positive. Therefore a provision was made for this tax based on the rate in force in the regions in which the value of production is calculated.

For in the United States based companies, federal and state taxes of €341 thousand are due, as a result of the taxable income generated during the period.

The amount of the deferred taxes is mainly attributable to the use of losses carryforward, amounting to €11,473 thousand (Note 31).

On December 28th, 2023, the government of Italy enacted the Pillar Two income taxes legislation effective from January 1st, 2024 (see Legislative Decree no. 209/2023 and the subsequent Ministerial Decrees, hereinafter “**the Italian Pillar Two rules**”).

21. INCOME TAX (CONTINUED)

According to the Pillar Two model rules published by the OECD, Shandong Heavy Industry Group (“**SHIG**”) — located in China for tax purposes — would qualify as Ultimate Parent Entity (“**UPE**”) as it consolidates all its subsidiaries on a line-by-line basis. As a consequence, the Pillar Two perimeter would be identified with all the entities that are included on a line-by-line method in the Consolidated Financial Statements of SHIG, including Ferretti S.p.A. and its subsidiaries (“**Ferretti sub-group**”). Even if China has not yet implemented the Pillar Two discipline, SHIG, as the UPE, will be in charge of the calculation of the jurisdictional effective tax rate according to the Pillar Two Rules as it may be the data owner for the whole Group with reference to Transitional CbCR Safe Harbours (“**TSH**”) and jurisdictional ETR calculations.

According to the Italian Pillar Two rules, Ferretti S.p.A. qualifies as the partially-owned parent entity (“**POPE**”) for Pillar Two purposes, as (i) it owns profit rights in other entities that are included in the Consolidated Financial Statements of SHIG and (ii) more than 20% of its profit rights are held by entities that are not included in this consolidation perimeter.

Under the Italian Pillar Two rules, since Ferretti S.p.A. is a POPE not fully owned by another POPE and that is located in a jurisdiction that has implemented the Pillar Two legislation, it is required to pay, in Italy, the top-up tax (if any) up to their allocable share in its subsidiaries which are located in low-taxed jurisdictions (i.e., that are taxed at an effective tax rate determined in accordance to the Italian Pillar Two rules of less than 15%).

SHIG has performed an assessment of the TSH on the basis of the OECD rules on “Safe Harbour and Penalty Relief” issued on 20.12.2022 (and the subsequent Administrative Guidances), which are intended as “qualifying international agreement on safe harbours” for the purposes of the EU Directive n. 2523/2022 (art. 32) and the Italian Pillar Two rules. This assessment is based on the group’s accounting data for the six months period ended June 30, 2025 as reported from the Group entities in the consolidation process, before making any adjustments that would eliminate income or expense attributable to intra-group transactions.

Based on six months ended June 30, 2025 financial data, no significant impact in terms of potential top up tax is expected for the Ferretti sub-group as for the financial year 2024. This preliminary assessment has been performed considering a number of technical positions based on the content of the TSH rules and other guidelines currently available. In this regard, considering the lack of specific interpretations and explanations by the OECD, the EU Directive, the Italian law, such technical positions shall be confirmed once the expected clarifications will be provided at OECD, EU and domestic level.

The group is continuing to assess the impact of the Pillar Two income taxes legislation on its future financial performance.

29. INTANGIBLE ASSETS (CONTINUED)

Impairment test on indefinite useful life intangible assets

As required by IAS 36, "Impairment of Assets," intangible assets with indefinite useful lives are not amortized, but they are tested for impairment at least once per year.

IAS 36 also requires an entity to assess at each reporting date whether there are indications of impairment for any other assets recognized in the statement of financial position.

As of June 30, 2025, in consideration of the order intake, the revenue and the adjusted EBITDA recorded by the Group in the six-month period ended June 30, 2025, the updated calculation of Discount rate — WACC and the results of the impairment test performed at December 31, 2024 (including sensitivities), the Group did not identify any impairment indicator in relation to Cash Generating Units (trademarks) and therefore no impairment test has been performed on those. As concern goodwill, please refer to what is mentioned in the following paragraph.

Goodwill

Goodwill is related to the investment in the subsidiary Zago S.p.A., the subsidiary Ferretti Group (Monaco) S.a.M. and the subsidiaries Il Massello S.r.l. and Fratelli Canalicchio S.p.A. acquired in 2022, as shown in the table below:

Fratelli Canalicchio S.p.A.	2,699	2,699
Il Massello S.r.l.	2,768	4,584
