INTERIM RESULTS ANNOUNCEMENT FOR THE SIX MONTHS ENDED JUNE 30, 2025 AND DISTRIBUTION OF INTERIM DIVIDEND FOR THE SIX MONTHS ENDED JUNE 30, 2025

PUBLICATION OF INTERIM RESULTS

The board of directors (the “**Board of Directors**”) of GF Securities Co., Ltd. (the “**Company**”) hereby announces the unaudited interim results of the Company and its subsidiaries for the six months ended June 30, 2025. This announcement, containing the full text of the 2025 interim report of the Company, complies with the relevant requirements of the Rules Governing the Listing of Securities (the “**Hong Kong Listing Rules**”) on The Stock Exchange of Hong Kong Limited (the “**Hong Kong Stock Exchange**”) in relation to information to accompany preliminary announcements of interim results.

The 2025 interim report of the Company will be published on the respective websites of Hong Kong Exchanges and Clearing Limited at www.hkexnews.hk and the Company at www.gf.com.cn by the end of September 2025.

INTERIM DIVIDEND FOR 2025

At the Company's 2024 annual general meeting of shareholders (the “**2024 Annual General Meeting**”), the Proposal to the General Meeting to Authorize the Board of Directors to Decide on the Interim Profit Distribution for 2025 was considered and approved, authorizing the Board of Directors to formulate the 2025 interim profit distribution plan. Pursuant to the authorization granted at the 2024 Annual General Meeting, the Board of Directors, at its meeting, approved the following plan for distributing the Company's 2025 interim cash dividend (the “**2025 Interim Dividend**”) to shareholders of the Company (the “**Shareholders**”):

- (1) Based on the number of shares of the Company (the “**Share(s)**”) on the record date for dividend distribution, a cash dividend of RMB1.00 (tax inclusive) will be distributed for every 10 Shares held. Cash dividends of H Shares are distributed in Hong Kong dollars, the actual amount of which is calculated based on the average central parity exchange rate of Renminbi to Hong Kong dollar announced by the People's Bank of China over five working days (i.e. August 22, August 25 to August 28, 2025) prior to the date of the Board meeting (i.e. $\text{RMB}0.912162 = \text{HKD}1.00$). Accordingly, the 2025 Interim Dividend payable per 10 H Shares for 2025 is approximately HKD1.096296 (tax inclusive).

- (2) The Company will distribute the 2025 Interim Dividend to H Shareholders on Wednesday, October 22, 2025. The 2025 Interim Dividend will be paid to H Shareholders whose names appear on the Company's register of members on Thursday, September 18, 2025. To determine the identity of the Shareholders entitled to receive the 2025 Interim Dividend, the H Share register of members of the Company will be closed during the period from Monday, September 15, 2025 to Thursday, September 18, 2025 (both days inclusive), during which no share transfer will be registered. The record date for determining the Shareholders' entitlement to the 2025 Interim Dividend will be Thursday, September 18, 2025. In order to be entitled to receive the 2025 Interim Dividend, all share certificates, together with the transfer documents, must be lodged with the Company's H Share registrar, Computershare Hong Kong Investor Services Limited, at Shops 1712-1716, 17th Floor, Hopewell Centre, 183 Queen's Road East, Wan Chai, Hong Kong, on or before 4:30 p.m. on Friday, September 12, 2025.
- (3) The Company has appointed Computershare Hong Kong Trustees Limited as the receiving agent (the "**Receiving Agent**") in Hong Kong and will pay to the Receiving Agent the declared dividends of the Company for payment to the H Shareholders. The dividends will be paid by the Receiving Agent and the dividend warrants will be posted by Computershare Hong Kong Investor Services Limited, the Company's H Share registrar, by ordinary mail to H Shareholders who are entitled to receive the dividends at their own risk on Wednesday, October 22, 2025.
- (4) Time arrangements of the record date, ex-entitlement date and 2025 Interim Dividend payment date for investors of Northbound Trading of Shenzhen Connect are consistent with those for A Shareholders. Time arrangements of the record date, ex-entitlement date and 2025 Interim Dividend payment date for Southbound Trading investors are consistent with those for H Shareholders of the Company. For details of dividend distribution on A Shares, please refer to the announcement to be separately published by the Company on the Shenzhen Stock Exchange. The relevant announcement will also be published on the website of the Hong Kong Stock Exchange in the form of an overseas regulatory announcement in accordance with Rule 13.10B of the Hong Kong Listing Rules.
- (5) Matters relating to withholding and payment of income tax:
- I. Withholding and payment of enterprise income tax for overseas non-resident enterprise Shareholders

Pursuant to the Enterprise Income Tax Law of the People's Republic of China (《中華人民共和國企業所得稅法》) and its implementation regulations and other relevant rules and regulations, the Company is required to withhold and pay enterprise income tax at the rate of 10% before distributing the 2025 Interim Dividend to non-resident enterprise Shareholders appearing on the H Share register of members of the Company. Any Shares registered in the name of non-individual registered Shareholders, including HKSCC Nominees Limited, other nominees, trustees or other organizations and groups, will be treated as being held by non-resident enterprise Shareholders and therefore will be subject to the withholding of the enterprise income tax.

Upon receipt of such dividends, a non-resident enterprise Shareholder may apply to the competent tax authorities for relevant treatment under the tax treaties (arrangements) in person or through a proxy or a withholding agent and provide evidence in support of its status as a beneficial owner as defined in the tax treaties (arrangements). Upon verification by the competent tax authorities, the difference between the tax levied and the amount of tax payable as calculated at the tax rate under the tax treaties (arrangements) will be refunded.

II. Withholding and payment of individual income tax for overseas resident individual Shareholders

Pursuant to the Individual Income Tax Law of the People's Republic of China (《中華人民共和國個人所得稅法》) and its implementation regulations and other relevant rules and regulations, the Company is required to withhold and pay individual income tax before distributing the 2025 Interim Dividend to individual Shareholders appearing on the H Share register of members of the Company (the “**Individual H Shareholders**”). However, Individual H Shareholders may be entitled to certain tax preferential treatments pursuant to the tax treaties between the PRC and the countries (regions) in which the Individual H Shareholders are domiciled and the tax arrangements between Mainland China and Hong Kong (Macau). In this regard, the Company will implement the following arrangements in relation to the withholding and payment of individual income tax for Individual H Shareholders:

- for Individual H Shareholders who are Hong Kong or Macau residents or domiciled in a country (region) which has entered into a tax treaty with the PRC stipulating a tax rate of 10% on dividends, the Company will withhold and pay individual income tax at the rate of 10% on behalf of the Individual H Shareholders in the distribution of 2025 Interim Dividend;
- for Individual H Shareholders who are domiciled in a country (region) which has entered into a tax treaty with the PRC stipulating a tax rate of less than 10% on dividends, the Company will temporarily withhold and pay individual income tax at the rate of 10% on behalf of the Individual H Shareholders in the distribution of 2025 Interim Dividend;
- for Individual H Shareholders who are domiciled in a country (region) which has entered into a tax treaty with the PRC stipulating a tax rate of more than 10% but less than 20% on dividends, the Company will withhold and pay individual income tax at the effective tax rate stipulated in the relevant tax treaty on behalf of the Individual H Shareholders in the distribution of 2025 Interim Dividend;
- for Individual H Shareholders who are domiciled in a country (region) which has entered into a tax treaty with the PRC stipulating a tax rate of 20% on dividends, or a country (region) which has not entered into any tax treaties with the PRC, or under any other circumstances, the Company will withhold and pay individual income tax at the rate of 20% on behalf of the Individual H Shareholders in the distribution of 2025 Interim Dividend.

If any of Individual H Shareholders considers that the tax rate adopted by the Company for the withholding and payment of individual income tax on his/her behalf is not the same as the tax rate stipulated in any tax treaty between the PRC and the country (region) in which he/she is domiciled, please submit promptly to the H Share registrar of the Company, Computershare Hong Kong Investor Services Limited, a letter of entrustment and all application materials showing that he/she is a resident of a country (region) which has entered into a tax treaty with the PRC. The Company will then submit the above documents to competent tax authorities who will proceed with subsequent tax related arrangements.

III. Withholding of income tax for H Shareholders via Southbound Trading

Pursuant to the Notice on Relevant Taxation Policies Concerning the Pilot Interconnected Mechanism for Trading on the Shenzhen Stock Market and the Hong Kong Stock Market (Cai Shui [2016] No. 127) (《關於深港股票市場交易互聯互通機制試點有關稅收政策的通知》(財稅[2016]127 號)) promulgated on December 5, 2016:

- for dividends received by Mainland individual investors from investing in the H Shares of the Company via Shenzhen-Hong Kong Stock Connect, the Company will withhold and pay individual income tax at the rate of 20% on their behalf. The same shall apply to the income tax on dividends received by Mainland securities investment funds from investing in the H Shares of the Company via Shenzhen-Hong Kong Stock Connect; and
- for dividends received by Mainland corporate investors from investing in the H Shares of the Company via Shenzhen-Hong Kong Stock Connect, the Company will not withhold and pay the income tax on their behalf and the Mainland corporate investors shall file the tax returns on their own. Dividends of resident enterprises in the PRC obtained as they have continuously held H Shares for 12 months will be exempted from enterprise income tax according to laws.

Should the H Shareholders have any doubt in relation to the aforesaid arrangements, they are recommended to consult their tax advisors on relevant tax impact of holding and disposal of H shares in Mainland China, Hong Kong and other countries (regions).

By Order of the Board

MANAGEMENT DISCUSSION AND ANALYSIS

MANAGEMENT DISCUSSION AND ANALYSIS

I. DEVELOPMENT OF THE INDUSTRY IN WHICH THE GROUP OPERATES

In the first half of 2025, the securities market increased resilience and reinforced a steady upward trend. Firstly, the stock market endured an external impact beyond expectation with an upsurge in major indices. In the first half of 2025, Wind All China Index, SSE Composite Index, SZSE Component Index, ChiNext Index and SSE STAR 50 Index increased by 5.83%, 2.76%, 0.48%, 0.53% and 1.46%, respectively. Among them, the turnover of Wind All China Index reached RMB162.66 trillion, representing a year-on-year increase of 61.15%. Secondly, the domestic monetary environment remained loose, the bond market subdued first and then rose, and the size of issuance was stable with an upward trend. In the first half of 2025, the total issued amount of various types of bonds reached RMB44.34 trillion, representing a year-on-year increase of 15.82%, and the China-Bond New Composite Index (total value) rose by 1.05%. Thirdly, equity financing resumed a clear rising momentum. In the first half of 2025, a total of 120 rounds of equity financing¹ in the A share market were completed, and achieved RMB669.318 billion in financing amount, representing a year-on-year increase of 10.09% and 562.05%, respectively. Among them, 48 IPOs were completed with financing amount of RMB38.002 billion, representing a year-on-year increase of 11.63% and 25.54% respectively; 72 rounds of refinancing were completed with financing amount of RMB631.316 billion, representing a year-on-year increase of 9.09% and 791.36%, respectively. Fourthly, the new issuance of public funds slowed down, and the total management size continued its growing trend. In the first half of the year, the issuance of newly established funds amounted to 517.44 billion units, representing a year-on-year decrease of 21.37%. As at the end of June 2025, the total size of public funds under management in China reached RMB34.39 trillion, representing an increase of 4.75% compared to the end of 2024.

¹ Including IPO, additional issuance, placement of shares, preferred shares, convertible bonds, of which additional issuance includes issuance of shares to purchase assets, and the statistics were measured on issue date basis.

MANAGEMENT DISCUSSION AND ANALYSIS

Although facing a complicated and changing external environment, China insisted on stimulating internal forces to tackle with the changing landscape with precision. The orientation of high quality development of the economy was clear, and the macroeconomic conditions were stabilized with progress. In the first half of 2025, GDP achieved growth of 5.3%, forming a solid economic foundation for the sound operation of the capital market. The Third Plenary Session of the 20th Central Committee of the Communist Party of China put forward a reform blueprint, and the Central Financial Work Conference proposed for the first time to accelerate the target and requirements of developing the nation into a financial power, creating ample space for developing a high quality capital market. The Political Bureau of the Central Committee emphasized at the meeting in April to “continue to stabilize and invigorate the capital market” and further proposed to “enhance the attractiveness and inclusiveness of the domestic capital market, reinforce the stable and upward trend of the capital market” at the meeting in July, fully demonstrating that the Central Committee of the Party had attached high importance to stability of the capital market. The CSRC closely monitored the main theme of risk prevention, strong regulation and facilitated high quality development in order to continue promoting the effective implementation of the new “Nine Guidelines for Capital Market” and the capital market “1+N” policy. A series of ionic reforms, such as market entry of long-term and medium-term funds, reform of public funds and “1+6” policy measures of STAR Market, made breakthroughs, and a full set of policies in the form of “combination punches” strongly secured the stability with progress condition of the capital market.

The CSRC has determined 7 key tasks for the near future at the mid-year work conference, pursuant to which the core work is to accumulate stabilizing forces continuously, increase the driving energy for progress, continue to stabilize and invigorate the capital market, better serve the economy to continue the rising and upward trend and the overall plan of Chinese style modernization. Under the fully innovative capital market ecology, continuous implementation of the internally generated stabilization mechanism of the capital market and the steady progress of opening the high-level system features, the securities industry is always supported by politics and people, continues to position at functional achievements as prime objective, anchors the strategic orientation of main responsibilities and main business, and deeply performs financial services to meet fundamental requirements of the real economy. It will focus on the strategic layout of the “Five Major Areas” to establish the functional, intensive, professional and characteristic new model of development, drive transformation and upgrade of the industry by nurturing new quality productivity to fully meet the strategic requirements of Chinese style modernization.

During the Reporting Period, each of the main operating indicators of the Company had been in the forefront of the industry.

5. Use of proceeds

(1) General use of proceeds

There was no use of proceeds from the issue of A Shares of the Company during the Reporting Period.

The use of proceeds from the issue of H Shares of the Company is set out below:

The Company issued H Shares which were listed on the Main Board of the Hong Kong Stock Exchange on April 10, 2015 after being approved by the CSRC on March 5, 2015 by issuing the Reply for Approving GF Securities Co., Ltd. to Issue Overseas Listed Foreign Shares (Zheng Jian Xu Ke [2015] No. 347), and being approved at the 8th meeting of the eighth session of the Board of Directors and the second extraordinary general meeting in 2014 of the Company. A total of 1,479,822,800 H Shares were issued at the price of HKD18.85 per share through both public offering and international placement. Subsequently, the Company issued 221,973,400 additional H Shares at the price of HKD18.85 per share on April 13, 2015 because of the exercise of the over-allotment option. Through this offering, the Company issued a total of 1,701,796,200 H Shares and raised a total of HKD32.079 billion. The net amount was approximately RMB25.059 billion after settlement of exchange and deduction of the issuance cost.

According to the H Share Prospectus of the Company, about 50% of the net proceeds raised from the issuance of H Shares would be used for the wealth management business, about 20% for the investment management business, investment banking business and transaction and institution business, and about 30% for the international business. The above raised net proceeds would be used for replenishing the working capital and investing in the assets with good liquidity in short term to preserve or increase the value, when they were temporarily not required for the above purposes.

As at June 30, 2025, RMB12.504 billion out of the proceeds raised from the issuance of H Shares was used for the wealth management business to mainly develop margin financing and securities lending business and build a strategic Internet financial platform and wealth management platform; RMB4.986 billion was used for the investment management business, investment banking business and transaction and institution business to mainly increase the asset size under the investment management, increase input into the seed funds, innovate and develop investment management products, and participate in various financial products markets as a market maker and provide liquidity support; RMB7.569 billion was used for the international business to mainly increase input into the investment management, transaction and institution businesses in Hong Kong. The Company has used up all the proceeds from the H Shares issuance pursuant to the H Share prospectus.

For details, please refer to the note “53. Change of scope of consolidation” to the condensed consolidated financial statements.

Explanation on the status of principal subsidiaries

GF Qianhe recorded a significant year-on-year change in net profit for the period, which was mainly affected by fluctuations in investment income.

IX. STRUCTURED ENTITIES CONTROLLED BY THE COMPANY

Please refer to the note “53.1 Consolidated structured entities” to the condensed consolidated financial statements.

X. RISK EXPOSURE AND RESPONSIVE MEASURES OF THE COMPANY

1. **During the Reporting Period, the major risks affecting the Company’s business operations including: liquidity risk, market risk, credit risk, compliance risk, operational risk, information technology risk, reputation risk etc. and were mainly reflected in the following aspects:**

(1) Liquidity risk

Liquidity risk refers to the risk of our failure to obtain sufficient funds at a reasonable cost and in a timely manner to pay our debts as they fall due, perform other payment obligations and satisfy the capital requirements to carry out our businesses in the ordinary course. Liquidity risks of the Group include but are not limited to: mismatch of asset and liability structures, difficulty in asset realization, operating loss, deferred payment or breach of contract by counterparties, as well as liquidity risks transformed from credit risk, market risk, reputation risk and other categories of risks. As the Company’s capital strength increases and the product portfolio is increasingly enriched, the products represent a diversified, complicated and international developing tendency and the risk type and the maturity structure faced by the asset end becomes increasingly complicated, the Company needs to rationalize the maturity structure of its assets and liabilities and take various measures to ensure the safety of liquidity, such as active management of liquidity reserve, liquidity risk control and emergency response mechanism against liquidity risks.

MANAGEMENT DISCUSSION AND ANALYSIS

(2) Market risk

Market risk refers to the risk of loss in the Company's financial assets resulting from adverse changes in the market price (price of equity securities, interest rates, exchange rates or commodity price, etc.). Such risks can be classified into equity price risk, interest rate risk, exchange rate risk and commodity price risk and other risks based on different type of subject assets. The market risks faced by the Group mainly concentrate on equity price risk and interest rate risk, which are mainly reflected in the Company and subsidiaries' proprietary investment in equity securities, proprietary investment in fixed-income securities, transactions of derivatives in exchange-traded and OTC markets and market making on the NEEQ, etc. with their own fund. With further opening of the capital market of China and the progressive implementation of the Company's strategy of internalization, various market risks to be borne by the Company are increasing due to the rapid expansion of its business scope and the cross-border flow of capital. Meanwhile, affected by factors such as continued geographical conflicts and expected changes in overseas monetary policy adjustments, the financial market has increased volatility, and the Company has become more difficult to manage market risks.

(3) Credit risk

Credit risk refers to the potential losses resulting from the failure of an issuer or counterparty to perform its obligations under a contract, or arising from variations in the market value of debts due to changes in credit ratings or inability to perform contractual obligations. The credit risk faced by the Group at present mainly concentrates on transactions of bond investment, OTC transactions of derivatives, margin financing and securities lending, agreed repurchase business, repurchase business on stock pledge, financial leasing business, margin financing business, repurchase brokerage business on bond pledge as well as other businesses that the Company or its subsidiaries shall bear or have payment commitment. With the promotion of leverage and continuous development of innovative businesses by securities companies, the credit risks to be borne by the Company become more and more complicated and the credit risk exposure increases day by day. In addition, the prospect of certain industries was declining, leading to frequent risk events, significant fluctuations in the value of collateral and restrictions on disposal, which brought about greater challenges to the credit risk management of the Group in the future.

(4) Compliance risk

Compliance risk refers to the risk of being held legally liable, subject to regulatory actions, disciplined, or suffering financial or reputational loss because of the violation of laws, regulations and rules.

MANAGEMENT DISCUSSION AND ANALYSIS

(5) Operational risk

Operational risk is the risk of direct or indirect loss caused by imperfect or problematic internal procedures, personnel, systems and external events. Each department and business line of securities firms (including front business department and the middle and back office supporting department) face operational risk, characterized by wide coverage and diversity, frequent occurrence but difficult to control, including daily business process flaws with high occurring frequency but relatively low loss, and unexpected events with low frequency of occurrence and significant loss. Meanwhile, as the Group's innovative businesses constantly increase, the business process becomes increasingly complicated. If the Company fails to timely identify the operational risks in each of its business lines and daily operations and to take effective mitigation measures, it may materialize operational risks due to unreasonable process setting and ineffective design or implementation of risk control measures.

(6) Information technology risk

Information technology has significantly enhanced the Company's operational efficiency and competitiveness. The Company's investment management business, trading and institution business, wealth management business, investment banking business, etc. as well as the middle and back end office management all rely on the support of its information system. Information technology plays an important role in promoting the Company's business, while it also brings certain risk exposure. System establishment and operation will be greatly affected by the quality of electronic equipment and system software, the operation and maintenance of corporate systems, performance of application software business operation, the level of industry service providers, virus and hacker attacks, data loss and leakage, abnormal access to operating authorization, infrastructure, natural disasters, etc.

(7) Reputation risk

Reputation risk refers to the risk of the damage of its brand value or adverse effect on its normal operation and even effect on market stability and social stability caused by the negative evaluation of the securities company by investors, issuers and regulators, self-discipline organization, social public and the media due to the operation or external events of the Company, the relevant behaviors such as the violation of the provisions of integrity, professional ethics, business practices, industry rules and regulations by workers. The Company's operation and management behaviors related to reputation risk mainly include: strategic planning or adjustment, change of equity structure, adjustment of internal organization or change of core personnel; design, provision or promotion of business investment activities and products and services; major defects in internal control design, implementation and system control or major operating loss events; judicial matters and supervision investigation and punishment; false reports by the news media or false comments on the Internet; customer complaints and improper remarks or behaviors related to the Company; improper remarks or behaviors of the staff, violation of honesty regulations, professional ethics, business norms, industry rules and regulations, etc.

MANAGEMENT DISCUSSION AND ANALYSIS

2. Counter-measures that the Company has adopted or plans to adopt for the above risks

(1) *Establish overall risk management system of GF Securities*

In recent year, based on external regulatory requirements and internal risk management requirements, the Company has established and continuously optimized overall risk management system and conducted risk management work by focusing on some key factors, such as “risk management culture, risk management governance framework, risk management mechanism and implementation and risk management infrastructure”. CHANGES IN SHAREHOLDINGS AND PARTICULARS ABOUT SHAREHOLDERS

Note 1: A shareholder has a “long position” if such shareholder has an interest in shares, including interests through holding, writing or issuing financial instruments (including derivatives) under which: (i) such shareholder has a right to take the underlying shares; (ii) such shareholder is under an obligation to take the underlying shares; (iii) such shareholder has a right to receive money if the price of the underlying shares increases; or (iv) such shareholder has a right to avoid or reduce a loss if the price of the underlying shares increases.

Note 2: A shareholder has a “short position” if such shareholder borrows shares under a securities borrowing and lending agreement, or holds, writes or issues financial instruments (including derivatives) under which: (i) such shareholder has a right to require another person to take the underlying shares; (ii) such shareholder is under an obligation to deliver the underlying shares; (iii) such shareholder has a right to receive money if the price of the underlying shares declines; or (iv) such shareholder has a right to avoid or reduce a loss if the price of the underlying shares declines.

Note 3: Jilin Aodong held 240,274,200 H Shares of the Company and held 36,868,800 H Shares of the Company through its wholly-owned subsidiary, namely Aodong International (Hong Kong) Industrials Co., Limited (敖東國際(香港)實業有限公司), amounting to a total of 277,143,000 H Shares, representing 3.64% of the total share capital of the Company.

Note 4: Liaoning Cheng Da held 115,300,000 H Shares of the Company and held 1,473,600 H Shares of the Company through Chengda Steel Hong Kong Co., Limited (成大鋼鐵香港有限公司), which is a wholly-owned subsidiary of Liaoning Chengda Steel Co., Ltd. (遼寧成大鋼鐵貿易有限公司) (a wholly-owned subsidiary of Liaoning Cheng Da), amounting to a total of 116,773,600 H Shares, representing 1.54% of the total share capital of the Company. Therefore, Liaoning Cheng Da and Liaoning Chengda Steel Co., Ltd. were deemed to have interests in the shares held by Chengda Steel Hong Kong Co., Limited.

Note 5: Zhongshan Public Utilities held 116,918,400 H Shares of the Company through its wholly-owned subsidiary, Public Utilities International (Hong Kong) Investment Company Ltd. (公用國際(香港)投資有限公司), representing 1.54% of the total share capital of the Company. Zhongshan Investment Holdings Group Company Limited (中山投資控股集團有限公司) held 48.73% of the issued shares of Zhongshan Public Utilities. Therefore, Zhongshan Investment Holdings Group Company Limited and Zhongshan Public Utilities were deemed to have interests in the shares held by Public Utilities International (Hong Kong) Investment Company Ltd.

Note 6: The labor union committee of GF Securities Co., Ltd. held a total of 272,500,600 H Shares of the Company, representing 16.01% of the H Share capital of the Company.

Note 7: Under Part XV of the SFO, forms disclosing of interests shall be submitted by shareholders of the Company upon satisfaction of certain conditions. Changes of Shareholders' shareholdings in the Company are not required to inform the Company and the Hong Kong Stock Exchange, except for the satisfaction of certain conditions. Therefore, there could be differences between substantial Shareholders' latest shareholdings in the Company and the shareholding information as reported to the Hong Kong Stock Exchange.

Note 8: The relevant percentages are calculated based on 1,701,796,200 H Shares and/or 5,904,049,311 A Shares of the Company in issue as at June 30, 2025.

Save as disclosed above, the Company is not aware of any other person (other than the Directors, Supervisors and chief executive of the Company) having any interests or short positions in the shares or underlying shares of the Company as at June 30, 2025 required to be recorded in the register pursuant to section 336 of the SFO.

CHANGES IN SHAREHOLDINGS AND PARTICULARS ABOUT SHAREHOLDERS

To the Board of Directors of GF Securities Co., Ltd.

(Established in the People's Republic of China with limited liability)

INTRODUCTION

We have reviewed the accompanying interim financial information set out on pages 134 to 228, which comprises the condensed consolidated statement of financial position of GF Securities Co., Ltd. (the "Company") and its subsidiaries (the "Group") as at 30 June 2025 and the related condensed consolidated statement of profit or loss, comprehensive income, changes in equity and cash flows for the six-month period then ended, and explanatory notes. The Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited require the preparation of a report on interim financial information to be in compliance with the relevant provisions thereof and International Accounting Standard 34 *Interim Financial Reporting* ("IAS 34") as issued by the International Accounting Standards Board. The directors of the Company are responsible for the preparation and presentation of interim financial information in accordance with IAS 34. Our responsibility is to express a conclusion on this interim financial information based on our review. Our report is made solely to you, as a body, in accordance with our agreed terms of engagement, and for no other purpose. We do not assume responsibility towards or accept liability to any other person for the contents of this report.

SCOPE OF REVIEW

We conducted our review in accordance with International Standard on Review Engagements 2410, "*Review of Interim Financial Information Performed by the Independent Auditor of the Entity*" as issued by the International Auditing and Assurance Standards Board. A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with International Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

REPORT ON REVIEW OF INTERIM FINANCIAL INFORMATION

CONCLUSION

Based on our review, nothing has come to our attention that causes us to believe that the accompanying interim financial information is not prepared, in all material respects, in accordance with IAS 34.

NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

30 June 2025

1. GENERAL INFORMATION OF THE GROUP

With the approval of the People's Bank of China, Guangdong Development Bank (廣東發展銀行) (now known as China Guangfa Bank) established a securities department on 9 April 1991. With the approval of the Guangdong Administration for Industry and Commerce, GF Securities Co., Ltd. (the "Company") was duly established as the Securities Department of Guangdong Development Bank (廣東發展銀行證券業務部) on 21 May 1993. On 25 January 1994, the Company was converted into Guangdong Guangfa Securities Company (廣東廣發證券公司), whose capital was contributed by Guangdong Development Bank with its own funds. On 26 December 1996, the Company was converted into a limited liability company and changed its name to Guangfa Securities Limited Liability Company (廣發證券有限責任公司). On 26 August 1999, the Company was spun off from Guangdong Development Bank as required by the sectoral regulation of the financial industries under PRC laws. On 25 July 2001, the Company was converted into a joint stock company and changed its name to GF Securities Co., Ltd. (廣發證券股份有限公司). On 12 February 2010, the Company was listed on the Shenzhen Stock Exchange by completing a reverse takeover of Yan Bian Road Construction Co., Ltd. (延邊公路建設股份有限公司) ("Yan Bian Road"), with the stock code 000776. On 10 April 2015, the Company issued H Shares which were listed on the Main Board of The Stock Exchange of Hong Kong Limited (the "Hong Kong Stock Exchange").

The registered office of the Company is located at Room 618, 2 Tengfei 1st Road, Sino-Singapore Guangzhou Knowledge City, Huangpu District, Guangzhou, Guangdong, People's Republic of China ("PRC").

The Company and its subsidiaries (collectively referred to as the "Group") are principally engaged in securities business, the proxy sale of securities investment funds, the provision of futures intermediary services for futures companies, securities investment fund custodian, fund raising, fund sales, asset management, project and investment management, commodity futures brokerage, financial futures brokerage and futures investment advisory, etc.

The condensed consolidated financial statements are presented in Renminbi ("RMB"), which is also the functional currency of the Company.

The unaudited condensed consolidated financial statements were approved by the Board of Directors (the "Board") on 29 August 2025.

NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

2. BASIS OF PREPARATION AND CHANGES ON ACCOUNTING POLICIES

Basis of preparation

The condensed consolidated financial statements have been prepared in accordance with International Accounting Standard 34 (“IAS 34”) *Interim Financial Reporting* as issued by the International Accounting Standards Board (“IASB”) as well as with the applicable disclosure requirements of Appendix 16 to the Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited (the “Listing Rules”). The condensed consolidated financial statements do not include all the information and disclosures required in the annual financial statements, and should be read in conjunction with the Group’s annual financial statements for the year ended 31 December 2024.

Except as described below, the principal accounting policies adopted in the preparation of the condensed consolidated financial statements are consistent with those used in the Group’s annual financial statements for the year ended 31 December 2024.

Changes in accounting policies

The accounting policies adopted in the preparation of the condensed consolidated financial statements are consistent with those followed in the preparation of the Group’s annual consolidated financial statements for the year ended 31 December 2024, except for the adoption of the following amended IFRS/CAS Accounting Standard for the first time for the current period’s financial information.

Amendments to IAS 21

Lack of Exchangeability

In addition, The Ministry of Finance of the People’s Republic of China issued implementation Questions&Answers on the accounting treatment for standard warehouse receipt transactions on July 8, 2025, clarifying that contracts for trading standard warehouse receipts on futures exchanges without physical delivery should be treated as financial instruments and accounted for in accordance with the China’s Accounting Standards for Business Enterprises No. 22 – Recognition and Measurement of Financial Instruments. For contracts where standard warehouse receipts are obtained and then sold within a short period, sales revenue should not be recognized. Instead, the difference between the sales proceeds and the carrying amount of the sold standard warehouse receipts should be recognized as net investment gains. The standard warehouse receipts held at period-end that remain unsold should be classified as other current assets.

The Group has implemented the above Q&A provisions. For standard warehouse receipt contracts which meeting the specific conditions mentioned above, the difference between sales proceeds and the carrying amount of the sold standard warehouse receipts is recognized as net investment gains, with no sales revenue recognized. The Group has accordingly adjusted and restated the comparative financial information.

The adoption of the amended accounting policies mentioned above does not have a significant impact on the Group’s interim condensed consolidated financial statements.

	1,313,731	382,052

Under the Enterprise Income Tax Law of the PRC (the "EIT Law") and the Implementation Regulation of the EIT Law, the tax rate of the Company and its main subsidiaries in the PRC is 25%.

Hong Kong Profits Tax was calculated at 16.5% of the estimated assessable profits. Tax arising in other jurisdictions is calculated at the applicable tax rates in the relevant jurisdictions.

On 28 May 2025, the Inland Revenue (Amendment) (Minimum Tax for Multinational Enterprise Groups) Bill 2024 was passed by the Legislative Council of Hong Kong. The Global Minimum Tax and the Hong Kong Minimum Top-up Tax was implemented in Hong Kong with effect from 1 January 2025. The Group expects that the implementation of the above legislation will have no significant impact on the Group's financial condition and operating results.

15. EARNINGS PER SHARE

The calculation of earnings per share attributable to owners of the Company is based on the following data:

	Six months ended 30 June	
	2025 (unaudited)	2024 (unaudited)
Earnings for the purpose of basic earnings per share:		
Profit for the period attributable to owners of the Company (RMB in thousand)	6,469,748	4,362,372
Less: Profit for the period attributable to other equity instrument holders of the Company (RMB in thousand)	474,909	444,560
	<u>5,994,839</u>	<u>3,917,812</u>
Profit for the period attributable to ordinary shareholders of the Company (RMB in thousand)	<u>5,994,839</u>	<u>3,917,812</u>
Weighted average number of ordinary shares outstanding (in thousands of shares)	<u>7,605,846</u>	<u>7,605,846</u>
Earnings per share (RMB)		
– Basic	<u>0.79</u>	<u>0.52</u>
– Diluted	<u>0.79</u>	<u>0.52</u>

There were no potential dilutive ordinary shares outstanding for the six months ended 30 June 2025 and 30 June 2024.

The calculation of the basic earnings per share is based on the profit for the period attributable to ordinary shareholders of the Company by the weighted average number of ordinary shares outstanding, the Company cancelled its treasury shares on 25 February 2025 as detailed in Note 47, which did not have an impact on the calculation of earnings per share for the current period nor for the comparative period.

28. FINANCIAL ASSETS AT FAIR VALUE THROUGH PROFIT OR LOSS – *continued*

- (i) During the period, the Group classified the following financial assets at fair value through profit or loss: debt instruments that do not qualify for measurement at either amortised cost or FVTOCI; equity instruments that are held for trading, and equity instruments for which the Group has not elected to recognise fair value gains and losses through other comprehensive income.
- (ii) The Group has committed to hold some of its investments in asset management schemes managed by the Group for specified periods due to contractual or regulatory requirements, the amount of which was RMB55.02 million as at 30 June 2025 (31 December 2024: RMB26.40 million).
- (iii) These investments include private funds, asset management schemes and other products launched and managed by the Group and other financial institutions. The Group's interests in these asset management schemes managed by the Group are not individually significant.
- (iv) Securities and funds traded on the Shanghai Stock Exchange and the Shenzhen Stock Exchange are included in the "Listed outside Hong Kong" category.
- (v) Unlisted securities mainly comprise unlisted funds, debt securities traded on the Interbank Bond Market, unlisted equity instruments, convertible debt instruments, convertible preference shares, as well as private funds, asset management schemes and other products launched by financial institutions.

As at 30 June 2025, the equity securities of the Group included restricted shares of approximately RMB2,107.98 million (31 December 2024: RMB316.42 million). The restricted shares are listed with a legally enforceable restriction on these securities that prevents the Group from disposing of them within the specified period.

As at 30 June 2025, the Group entered into securities lending arrangements with clients that resulted in the transfer of financial assets at fair value through profit or loss ("FVTPL") (including equity securities and exchange traded funds) with a total fair value of RMB462.82 million (31 December 2024: RMB257.13 million) to clients. These securities continued to be recognised as financial assets of the Group.

Fair value of the Group's financial assets at fair value through profit or loss is determined in the manner described in note 52.

46. OTHER EQUITY INSTRUMENTS – continued

As approved by the CSRC, the Company issued ten batches of perpetual subordinated bonds. The Company has options to redeem the bonds at principal amounts plus any accrued interest (all deferred interest payments and accreted interest thereon included) on the fifth interest payment date or any interest payment date afterwards. The coupon rates for the perpetual subordinated bonds are fixed in the first 5 years. If the Company does not use the right of redemption, the coupon rates will be repriced every 5 years from the 6th year. The perpetual bonds “21 GF Y1”, “22 GF Y1”, “22 GF Y2”, “22 GF Y3”, “23 GF Y1”, “23 GF Y2”, “23 GF Y3”, “23 GF Y4”, and “24 GF Y1” shall reset their coupon rates based on the current benchmark rate plus the initial spread plus 300 basis points; and the perpetual bond “24 GF Y2” shall reset its coupon rate based on the current benchmark rate plus the initial spread plus 200 basis points. The current basis rate is defined as the average yields of 5 years treasury bonds from the interbank fixed rate bond yield curve published on the China Bond website 5 working days before the interest repricing date.

The issuer has the right to defer interest payments, unless “mandatory interest payment events” have been triggered, so that at each interest payment date, the issuer may choose to defer the current interest payment, as well as any previously deferred interest payments and accreted interest thereon, to the next payment date, without being subject to any limitation with respect to the number of deferrals. Mandatory interest payment events are limited to dividend distributions to ordinary equity holders and reductions of registered capital 12 months before the interest payment date. When the mandatory interest payment events occur, the Company cannot defer the payment of the current interest as well as any previously deferred interest and accreted interest thereon.

The perpetual subordinated bonds issued by the Company are classified as equity instruments and presented under equity in the consolidated statement of financial position of the Group.

51. FINANCIAL INSTRUMENTS RISK MANAGEMENT

51.1 Risk management policies and organisation structure

(1) Risk management policies

The objective of risk management of the Group is to strike for an appropriate balance between risks and revenue and to minimise the negative effect of the risks on the Group's operating results to the lowest level, so as to ensure that the risks borne by the Company match well with the regulatory standards, development strategies, capital capability and its risk tolerance and to maximise yields for shareholders and other equity investors. In pursuit of such objective of risk management, the basic strategies of the Group are to identify and analyse the risks with which the Group is facing, to implement risk management within the range of risk tolerance and risk limit setting and to identify, assess, measure, monitor, report and address the risks comprehensively and accurately on a timely basis. The Group has adhered to the Three Ideas about Risk Management which are “to manage risks cautiously”; “the three departments cooperate with each other and each focuses on specific aspects”; and “be people-oriented”, and follow the Five Basic Principles which are “comprehensive management; objectiveness and fairness; checks and balance; separate and well-defined duties and power; openness and transparency”.

The risks to which the Group is exposed to in daily operating activities mainly include market risk, credit risk and liquidity risk. The Group has established policies and procedures accordingly to identify and analyse the risks. The Group has set up appropriate risk indicators, risk limits, risk criteria and internal control process. The Group also monitors and manages the risks with an information system on a continuous basis.

51. FINANCIAL INSTRUMENTS RISK MANAGEMENT – *continued*

51.1 Risk management policies and organisation structure – *continued*

(2) *Structure of the risk-management organization*

The Group adopts a four-level risk management organization structure system, namely “board of directors and its subordinated risk management committee, management executives and relevant professional committees, various control and supporting departments, and business departments”. First-line risk management organisations or staff have been set up in all major business departments of the Company. Organisations and staff of all levels perform their authorised risk management duties with clear segregation of duties and emphasis on mutual collaboration. The business department, risk management department, compliance and legal affairs department and internal auditing department cooperate with each other and each focuses on specific aspects, and they perform risk assessment before the projects are implemented, on-going control, investigation and evaluation after completion. They also continuously monitor and manage various risks faced by the Group at various levels and in a comprehensive manner, and contribute to the sustainable development of the business of the Company.

The risk management department is primarily responsible for conducting independent evaluation and monitoring of market risk, credit risk and liquidity risk of the Group and establishing the operational risk management system and coordinating with other departments to manage operational risk, money laundering risk, model risk and reputation risk; assessing, monitoring, reporting on and advising on the management of the Company's venture capital; and handling daily routine of the Risk Control Committee of the Company as a standing body of the Risk Management Committee. The compliance and legal department is the Group's function department for compliance and legal risk management, primarily responsible for formulating the Group's management policies in respect of compliance and legal risk, conducting independent evaluation and monitoring of compliance and legal risks, organizing and carrying out money laundering risk management, prevention and control in accordance with the Company's anti-money laundering management policy, coordinating with other departments to manage operational risk and performing compliance inspection and management on operational administration activities and code of conduct of the employees of the Group. The auditing department is the third defensive line of risk control. It is responsible for the checking, supervision, evaluation, and relative internal auditing consultation of internal control, risk management, governance procedures, and operating management performance.

51. FINANCIAL INSTRUMENTS RISK MANAGEMENT – *continued*

51.2 Credit risk

Credit risk is the probability that the market value of debts may change due to the fact that the issuer or counterparty fails to perform the obligations specified in the contract or due to the change in credit rating and performance capability, thereby causing loss to the Group. The credit risk the Group is exposed to mainly relates to the following assets: (i) fixed income financial assets; (ii) financing businesses such as advances to customers, financial leasing receivables and financial assets held under resale agreements (mainly referring to securities transactions with repurchase agreements and stock-pledged repos); and (iii) over-the-counter derivative financial assets.

Fixed income financial assets include bank balances, clearing settlement funds, deposits with exchanges and non-bank financial institutions, accounts receivable and bonds. Credit risk mainly includes the risk caused by its counterparties and securities issuer's default risk. The maximum credit risk exposure equals to the carrying amounts of these instruments.

In terms of the financing business, the credit risk exposure of margin financing and securities lending, securities transactions with repurchase agreements and stock-pledged repos is derived from the default risk of counterparties due to their failure to repay the principal and interest of debts when due. As at 30 June 2025, the average ratio of guarantee maintained for all the clients who have liabilities in margin financing and securities lending of the Group was 265.85% (31 December 2024: 254.28%), the average coverage ratio of contract performance for clients of security transactions with repurchase agreements was 292.98% (31 December 2024: 343.23%), and the average coverage ratio of contract performance for clients of the stock-pledged repos business (the fund lender was the securities company) was 293.28% (31 December 2024: 284.97%). The collateral provided is sufficient and the credit risk of the financing business is managed at an acceptable level.

The credit risk of over-the-counter derivative transactions is mainly the counterparty default risk in conducting over-the-counter derivative transactions such as forward, swaps and options.

The credit risk of the bond investments is mainly mitigated by means of credit rating management, transaction limits, position limits, exposure limits on issuers.

51. FINANCIAL INSTRUMENTS RISK MANAGEMENT – *continued*

51.2 Credit risk – *continued*

The credit risk of the financing business of the Group is mainly managed through the following measures: (i) the establishment of customer due diligence requirements and business admission criteria, the review on the creditworthiness and business qualification of counterparties prior to the conduction of business, and the preliminary identification and assessment of business credit risks; (ii) the establishment of layered approval process, guarantees and other elements of transactions, and the adoption of tailored risk mitigating measures; and (iii) the continuous post-transaction tracking and management on counterparties, guarantees and the actual performance of transaction agreements, the collection of transaction-related information on a regular basis and assessment of risks, risk inspections and stress testing conducted on a regular or irregular basis to implement asset risk classification, enhancement of asset risk classification management, as well as timely actions adopted upon the occurrence of risk events.

In terms of managing counterparty credit risks of over-the-counter derivative transactions, the Group applies the following measures: (i) strengthening due diligence of counterparties, improving the mechanism for regular return visits and specifying the admission criteria for various types of business counterparties through internal credit rating management; (ii) controlling the counterparty credit risk exposure through credit limit, single transaction size, total business scale and identical client management; (iii) mitigating counterparty risk through collateral, guarantees, netting agreements, etc., for over-the-counter derivative transactions not using Central Counterparty (CCP) settlement; and (iv) timely monitoring changes in counterparty credit exposure based on market changes and stress testing results and preventing the excess or further deterioration of counterparty credit risk exposure through mark-to-market monitoring, margin calls, margin closeout and loss recovery measures.

During the report period, the Group's impairment assessment was based on an expected credit loss model. The Group applies the simplified approach to measure ECLs on accounts receivable and contract assets that do not contain a significant financing component according to accounting policies and the general approach to measure ECLs on other financial assets such as bank balances, clearing settlement funds, advances to customers, financial assets held under resale agreements, deposits with exchanges and non-bank financial institutions, debt instruments at fair value through other comprehensive income, debt instruments at amortised cost and financial leasing receivables. Under the simplified approach, the Group measures the loss allowance at an amount equal to the lifetime ECL. Under the general approach, the Group measures the allowance of financial assets in the following three stages based on the change in credit risk since initial recognition: Stage 1: 12-month ECL, Stage 2: Lifetime ECL — not credit-impaired and Stage 3: Lifetime ECL — credit-impaired.

The Group considers both quantitative and qualitative information and analysis based on the Group's historical experience and expert credit risk assessment when determining whether the risk of default has increased significantly since initial recognition.

Criteria for judging significant increases in credit risk

The Group assesses whether or not the credit risk of the relevant financial instruments has increased significantly since the initial recognition at the end of the reporting period. While determining whether the credit risk has significantly increased since initial recognition or not, the Group takes into account the reasonable and substantiated information that is accessible without exerting unnecessary cost or effort, including qualitative and quantitative analysis based on the historical data of the Group, external credit risk rating, and forward-looking information. Based on the single financial instrument or the combination of financial instruments with similar characteristics of credit risk, the Group compares the risk of default of financial instruments at the end of the reporting period with that on the initial recognition date in order to figure out the changes of default risk in the expected lifetime of financial instruments.

The Group considers a financial instrument to have experienced a significant increase in credit risk when one or more of the following quantitative or qualitative criteria have been met:

- Quantitative criteria mainly includes the case where debtor's defaulting days have been over certain days by the end of the reporting period; and the case where mark-to-market ratios are unable to meet certain criteria.
- Qualitative criteria mainly refer to a significant adverse change in debtor's operation or financial status or their collateral, or debtor being listed on the watch-list.

For the securities financing business, the Group considers a financial instrument to have experienced a significant increase in credit risk when one or more of the following quantitative or qualitative criteria have been met:

- The ratio of the guarantee maintained lower than 130% for 5 consecutive trading days (inclusive);
- The debtor's principal or interest overdue for more than 5 trading days;
- The ratio of the guarantee maintained lower than 100%; or
- Other circumstances in which the Group considers that credit risk experienced a significant increase.

For debt securities investments, the Group uses the internal rating method to estimate the probability of default (PD) and the change of rating is the main criterion for assessing significant increase in credit risks. Debt securities investments are considered to have significant increase in credit risks and classified under Stage 2 if the latest internal rating of the issuers of debt securities has undergone two notches of downward migration or more, compared with those ratings as at the acquisition date; or if the rating of the issuers or the debt securities is downgraded by the rating institution in Mainland China, and the downgraded level is below A+(inclusive), or below AA- and the outlook is negative. The aforesaid downgrade usually indicates that there has been a significant change in the issuer's main financial indicators, or that the rights of the issuer's major assets have been restricted, such as mortgage, pledge, judicial seizure or freezing, which has a material adverse impact on the issuer's performance ability.

Definition of credit-impaired financial asset

The standard adopted by the Group to determine whether a credit impairment occurs is consistent with the internal credit risk management objectives of the relevant financial instrument, taking into account quantitative and qualitative criteria. When a financial instrument meets one or more of the following criteria as follows, it will be defined as credit-impaired and classified under Stage 3:

- Significant financial difficulty of the issuer of debt securities or the debtor;
- The issuers or debtors of debt securities are in breach of contract, such as defaults on interest or becoming overdue on interest or principal payments;
- The creditor of the debtor, for economic or contractual reasons relating to the debtor's financial difficulty, having granted to the debtor a concession that the creditor would not otherwise consider;
- It is becoming probable that the issuers or debtors will enter bankruptcy or other financial restructuring;
- The disappearance of an active market for that financial asset because of financial difficulties of the issuers or debtors of debt securities; or
- The purchase or origination of a financial asset at a deep discount that reflects the incurred credit losses.

The Group considers a financial instrument to be credit-impaired and classified under Stage 3 when one or more of the following quantitative or qualitative criteria have been met:

- The securities financing asset is past due for 22 trading days or more;
- The ratio of the guarantee maintained below 100% for ten consecutive trading days (inclusive);
- The internal rate of securities financing assets below D; or
- Other circumstances in which the Group considers that credit impairment has occurred.

Parameters of ECL measurement

According to whether there is a significant increase in credit risk and whether there is an impairment of assets, the Group measures the impairment loss for different assets with ECL of 12 months or the entire lifetime respectively. The key measuring parameters of ECL include PD, loss given default (LGD) and exposure at default (EAD). The Group takes into account the quantitative analysis of historical statistics (such as ratings of counterparties, manners of guarantees and types of collateral, and repayments) and forward-looking information in order to establish the model of PD, LGD and EAD.

Relative definitions are as follows:

- PD refers to the possibility that the debtor will not be able to fulfil its obligations of repayment over the next 12 months or throughout the entire remaining lifetime. The Group's PD is adjusted based on the results of the Internal Rating Model of GF Securities Co., Ltd., taking into account the forward-looking information to reflect the debtor's PD under the current macroeconomic environment.
- LGD refers to the Group's expectation of the extent of the loss resulting from the default exposure. Depending on the type of counterparty, the method and priority of the recourse, and the type of collateral, the LGD varies. LGD is the percentage of the loss of EAD when default occurs, calculated based on the next 12 months or throughout the entire remaining lifetime.
- EAD is the amount that the Group should be reimbursed at the time of the default in the next 12 months or throughout the entire remaining lifetime.

Forward-looking information

The assessment of a significant increase in credit risk and the calculation of ECL both involve forward-looking information. Through the analysis of historical data, the Group identifies the key economic indicators that affect the credit risk and ECL of various business types, mainly the China Coincident Index.

The Group preliminarily forecasts key economic indicators under optimistic, neutral and pessimistic scenarios through statistical analysis. Considering the forecasts of domestic and foreign financial institutions for the future economic situation, the Group applies experts' judgement in this process and determines the impact of these economic indicators on PD and LGD. The impact of these economic indicators on PD and LGD varies for different businesses. The Group evaluates and forecasts these economic indicators at least annually, and represents its best estimate for the future and regularly monitors the results of the evaluation.

During the report period, based on statistical analysis and expert judgement, also considering the range of possible outcomes represented by each scenario, the Group determined the final macroeconomic scenarios and weights.

As with any economic forecasts, the projections and likelihoods of occurrence are subject to a high degree of inherent uncertainty and therefore the actual outcomes may be significantly different to those projected. The Group considers these forecasts to represent its best estimate of the possible outcomes as at the financial statement date.

51.3 Market risk

Market risks faced by the Group refer to the risk that causes loss of the Group's each business as a result of unfavourable changes in market prices, including equity securities price risk, interest rate risk, exchange rate risk and commodity price risk.

In order to manage market risks effectively, the Group determines the policy for the maximum market exposure the Group is willing to assume, based on the risk preference, capital position and risk tolerance. Taking its business development plan, business scale and other factors into account, the Group disaggregates risk limits into different investment units through risk limit authorisation management system and each investment unit operates business within the range of risk limit authorisation. When concretely operating the business, the Group comprehensively manages market risks faced by various types of business by means of admission management, size control, concentration, Value at Risk (VaR), sensitivity analysis, stress testing, risk assessment and monitoring of profit and loss. The front desk serves as the first line management directly responsible for market risks, which dynamically manages the market risks resulting from the portion of positions held and actively takes actions to reduce risk exposure or performs risk hedging when the risk exposure is high.

The Risk Management Department is independent of business departments when performing market risk management duty and it sustainably optimises the Group's market risk framework, comprehensively evaluates and dynamically monitors the market risk exposure and changes of the Group and business departments and continuously communicates risk information directly with teams of business departments to discuss risk status and extreme loss scenarios. Meanwhile, market risk conditions and their changes of the Company as a whole and each business department are reported in a timely manner to the Company's management through regular risk reporting.

The Risk Management Department uses a series of quantitative methods to estimate possible losses resulting from market risks, including VaR, sensitivity analysis, stress testing and Expected Shortfall (ES). The Group's VaR is measured using the historical simulation method with a confidence level of 95%. Meanwhile, the Group disaggregates combined VaR based on types of market risk factors in order to have a command of the contribution made by various risk factors to combined market risk. The Group is clearly aware that VaR involves certain limitations because it is a risk indicator. Possible losses in extreme cases, such as significant adverse changes on market price and severe risk events, are estimated by means of stress testing or ES, etc.

Interest rate risk

Interest rate risk is the risk of fluctuation in the Group's financial position and cash flows arising from movements in interest rates. The Group's interest-bearing assets mainly include bank balances, clearing settlement funds, deposits with exchanges and non-bank financial institutions and fixed-income investments. Interest-bearing financial liabilities mainly include borrowings, short-term financing payables, due to banks and other financial institutions, financial assets sold under repurchase agreements, accounts payable to brokerage clients and bonds payable. Fixed-income investments of the Group mainly include government bonds, financial bonds, interbank negotiable certificates of deposit, medium-term notes, high-quality short-term papers, corporate bonds, asset-backed securities, treasury bond futures, interest rate swaps and standard bond forward. In order to manage interest rate risks, the Group uses VaR, stress testing and sensitivity indicators (duration, convexity and DV01, etc.) to measure and monitor the interest rate risk on a daily basis.

Sensitivity analysis

The sensitivity analysis below has been determined based on the exposure to interest rates for interest-bearing assets and liabilities. Assuming interest-bearing assets and liabilities outstanding at the end of the respective reporting period were outstanding for the whole period and other variables held constant, the analysis is to show the impact on profit before income tax and other comprehensive income before income tax due to a 100 basis points increase or decrease in the relevant interest rates. Currency risk

Currency risk is the risk of fluctuation in the fair value of financial instruments or future cash flows arising from adverse movements in foreign exchange rates. The Group's currency risk primarily relates to the Group's operating activities, whose settlements and payments are denominated in foreign currencies different from the Group's functional currency, and its net investment in foreign subsidiaries. Currently, the currency risk arising from the Group's assets and liabilities denominated in foreign currencies is monitored and managed through exposure and VaR, and hedged by foreign currency derivatives. The currency risk of the Group is relatively manageable.

Price risk

Price risk is primarily about the unfavourable changes of share prices of equity investments, financial derivative instrument prices, and commodity prices that cause financial loss during the Group's on-balance and off-balance business. The Group is exposed to price risk which arises from price fluctuation of the financial assets at fair value through profit or loss and the financial assets at fair value through other comprehensive income, mainly including equity investments, shares (with share index included), funds and commodities and related financial derivative instruments such as swaps, futures and options. Other than daily monitoring the investment position, trading and earnings indicators, the Group mainly uses VaR, sensitivity indicators, stress testing indicators in the daily risk monitoring of price risk.

51.4 Liquidity risk

Liquidity risk of a securities company refers to the risk of failure to obtain sufficient funds at a reasonable cost and in a timely manner to pay the debts as they fall due, perform other payment obligations and satisfy the capital requirements to carry out businesses in the ordinary course. During the Group's ordinary course of business, the triggers of liquidity risk include poor operations, lack of asset liquidity, significant mismatch of asset and liability terms, limitation on financing channels, unreasonableness of financing liability term structure, insufficiency of market liquidity, adverse impacts on the Group's reputation and effects of other risk types to liquidity risk. Liquidity risk events have strong diffusion and are widespread. Once liquidity risk events occur, the Group must respond in a short time to make emergency decisions and disposal.

51.4 Liquidity risk – *continued*

As at 30 June 2025, cash and bank deposits held by the Group amounted to RMB149.43 billion (31 December 2024: RMB161.82 billion), and financial assets such as monetary funds, government bonds and short-term financing bills amounted to RMB149.86 billion (31 December 2024: RMB95.22 billion), providing a strong capability of quick liquidation to meet the foreseeable demands on financing liabilities and businesses. Therefore, the Group considers the exposure to liquidity risk to be insignificant.

The Group implements stable liquidity risk preference management strategy to guarantee that the Company will have adequate liquidity reserve and fundraising capability under the normal situation and pressure state through scientific asset-liability management and fund management, multi-level liquidity reserve, effective liquidity emergency disposal and monitoring and pre-warning about the liquidity risk index to prevent liquidity risk. Measures for liquidity risk management include the following: the Group established a frame for liquidity risk management with the liquidity coverage ratio (LCR) and net stable funding ratio (NSFR) as the core indicator strictly according to the requirements of *Guidelines for the Liquidity Risk Management of Listed Companies* 《證券公司流動性風險管理指引》, and based on the control and projection of LCR and NSFR, each of the operational activities is assured to be complied with the requirements of liquidity risk management as stated in the regulatory requirements; asset allocation and arrangement of structure of assets and liabilities based on flexible adjustments to protect the Company from risk of maturity mismatch; established a multiple system of quality assets with on-going control and maintained an adequate liquidity reserve; constructed a system for risk limits, which includes capital leverage, maturity structure and concentration of financial liabilities and liquidity reserve, and performed routine monitoring and report on indicators; regularly or irregularly evaluated liquidity risk stress testing and carried out liquidity risk drill, optimised and perfected liquidity risk emergency disposal processes and mechanism of the Company.

51.4 Liquidity risk – *continued*

Currently, the Group has set up two departments for liquidity risk management, namely treasury department and risk management department. The treasury department is mainly responsible for coordinating sources of funds, addressing capital needs, formulating and optimising financial strategies, implementing liquidity management during daytime and taking initiative to prevent liquidity risks. The risk management department is responsible for performing independent identification, evaluation, measuring and monitoring of liquidity risks of the Group together with management of market risks and credit risks, and paying attention on an on-going basis to the conversion of other types of risk to liquidity risk. The Group uses concentration control, trading limit control and monitoring of the market liquidity of financial instruments held by the Group to address the liquidity risk of financial instruments. In order to meet the regulatory requirements, the Group has set up a multi-level, omni-directional and information-based management system to monitor and control the overall liquidity risk.

52. FAIR VALUE OF FINANCIAL INSTRUMENTS

52.1 Fair value hierarchy

For financial reporting purposes, fair value measurements are categorised into Level 1, 2 or 3 based on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to the fair value measurement in its entirety, which are described as follows:

Level 1: Inputs are quoted prices (unadjusted) in active market for identical assets or liabilities than the entity can access at the measurement date

Level 2: Inputs are inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly

Level 3: Inputs are unobservable inputs for the asset or liability

There were no significant transfers between Level 1 and Level 2 as at 30 June 2025 and 31 December 2024.

52.4 Valuation techniques used and the qualitative information of key parameters for recurring fair value measurement categorised within Level 2

For debt instruments at fair value through profit or loss and at fair value through other comprehensive income whose value is available on the bond pricing system of related registration and clearing institutions on the valuation date, the fair value is measured using the latest valuation results published by the bond pricing system.

For private funds, asset management schemes and other investments without an available value in active markets that are classified as financial instruments at fair value through profit or loss or financial assets at fair value through other comprehensive income, the fair value is determined by most recent transaction price, the net asset value (NAV) provided by managers and valuation techniques. The inputs of those manager-provided NAV and valuation techniques include the market value of underlying investment portfolio, yield curves, liquidity discount by China Securities Index Company Limited, etc., which are all observable.

For derivative financial instruments without an active market, the fair value is determined by discounting the future cash flows using market interest rates or exchange rates of similar derivative instruments, based on the terms and maturities of each contract. For equity return swaps, the fair value is determined by reference to the returns calculated from the public quotation of the underlying investment of the relevant contracts.

During the period ended 30 June 2025, there were no significant changes of valuation techniques for Level 2.

52.5 Valuation techniques used and the qualitative and quantitative information of key parameters for recurring fair value measurements categorised within Level 3

For instruments, such as restricted shares, unlisted equity investments, debt instruments, other investments, financial liabilities and derivatives, the Group adopts the quotation from counterparties or valuation techniques to determine the fair value. Valuation techniques include discounted cash flow analysis, net value model, discounted market prices, market multiples and Black Scholes model, etc. The fair value measurement of these financial instruments may involve unobservable inputs such as future cash flow, net value of underlying investment, market multiples, volatility and liquidity discount. The fair values of the financial instruments in Level 3 were not significantly sensitive to a reasonable change in these unobservable inputs.

During the period ended 30 June 2025, there were no significant changes of valuation techniques for Level 3.
