### 3. APPLICATION OF AMENDMENTS TO HONG KONG FINANCIAL REPORTING STANDARDS

In the current interim period, the Group has applied the following amendments to HKFRSs issued by the HKICPA, which are mandatorily effective for the annual period beginning on 1 January 2025 for the preparation of the Group's condensed consolidated financial statements:

### 4. REVENUE AND SEGMENT INFORMATION

Information reported to the Executive Directors of the Company, being the chief operating decision maker ("**CODM**"), for the purposes of resource allocation and assessment of segment performance focuses on the performance of each group company.

In prior years, the Group had three reportable segments: (i) manufacture and sale of dyeing and finishing machines; (ii) manufacture and sale of stainless steel casting products; and (iii) trading of stainless steel supplies.

During the period ended 30 June 2025, the CODM started to review information under a new reporting structure, and segment reporting is updated to conform to this change. The Group's management is of the view that this change of segment disclosure better reflects the Group's updated business strategies, the development phases of various businesses and the financial performance, and better aligns with the Group's resource allocation.

The updated reportable segments comprise (i) manufacture and sale of dyeing and finishing machines; and (ii) manufacture and sale of stainless steel casting products and stainless steel supply chain, which is aggregated by the former manufacture and sale of stainless steel casting products and trading of stainless steel supplies segments. The Group's management periodically reviews their developments, and dynamically adjust resource allocation and strategies.

## **BUSINESS REVIEW** *(Continued)*

### **Manufacture and sale of dyeing and finishing machines** *(Continued)*

Internally, we have implemented prudent supervision of its financial position and other initiatives to enhance inventory control, stringent management of trade receivables and more reasonable disposal of assets in order to maintain adequate cash flow. We have formulated plans for production capacity according to actual demand, strengthened the supply chain management capabilities, reinforced the manufacturing processes, optimised the process structures and improved the production bottlenecks. The Group will continue to be efficiency-driven, focusing more on intelligent manufacturing processes, improving production capacity, and conducting transformation in its digital factories. Notwithstanding the fact that the Group has already moderately reduced its workforce, the layoffs mainly involved non-production staff, and resources have been invested in further training of skilled workers, which has achieved cost savings as well as improvement in output quality. Moreover, the Group will consider to increase the proportion of subcontracting to supplement our existing labour force, so that we can have better control of our fixed labour costs and have the flexibility to meet emergency orders.

On the market side, we should strengthen marketing efforts to respond to the market change promptly, focusing on key projects, increasing added value in products, comprehensive improvement in distribution channels in various countries, accelerating development of new customers, and implementing strategic expansion in emerging markets.

As a leading dyeing and finishing equipment manufacturer in the world, the Group has always been focusing on the research and development of dyeing and finishing machinery and will continue to increase its investment in technological research and development with a view to providing customers with more cost-effective products. The Group firmly believes that only by continuously innovating and addressing customers' pain points in actual use, providing them with practical benefits and enhancing their return on assets, can desire of customers to upgrade their equipment be stimulated.

## **BUSINESS REVIEW** *(Continued)*

### **Manufacture and sale of stainless steel casting products and stainless steel supply chain**

For the six months ended 30 June 2025, this business segment recorded a revenue of approximately HK\$226,000,000, accounting for 21% of the Group's revenue and representing an increase of 12% as compared to approximately HK\$201,000,000 for the corresponding period last year. Operating profit for the Period amounted to approximately HK\$22,000,000, while the operating profit for the corresponding period last year was approximately HK\$7,000,000. During the Period, the Group has continued to optimise its organisational structure through effective management measures and strengthened efforts in implementing cost reduction and efficiency enhancement, enabling the gross profit margin returned to its previous normal level.

The main products of stainless steel casting products business are high-quality castings and machined parts made of stainless steel, dual-phase steel and nickel-based alloys, which are being widely used in industrial equipment for valves, pumps, chemical, oil, natural gas and food industries. The main customers are from Europe, the United States, Japan and China. Over the past few years, the management team has been working hard to broaden customer base and explore potential collaboration opportunities, and has laid down a solid foundation for long-term development of this business segment in the future by focusing on the development of unique and high-end casting products, which are expected to be the growth engine of the segment. Given the uncertainties surrounding the prevailing macroeconomic environment, we will continue to upgrade and transform our production facilities, moderately increase automation, optimise the production processes to partially hedge the soaring energy and labour costs, thereby enhancing capacity and operational efficiency to support the development of a casting product mix that delivers higher output value.

For stainless steel supply chain business, the Group has been engaged in the trading of stainless steel supplies since 1988 and has established a strong relationship with some of the world's leading steel mills. As such, the Group is able to provide reliable quality and diversified stainless steel supplies to end-customers, as well as procure stainless steel raw materials for the Group's dyeing and finishing machines business and effectively control procurement costs. The Group will continue to adopt a prudent approach in running this business. It will take appropriate actions to mitigate market risks, adjust selling prices and inventory level appropriately and in a timely manner based on market analysis and its judgment, in order to improve the inventory turnover ratio while minimising the risk on price fluctuations. At the same time, the Group will strengthen the credit management of sales and trade receivables in order to lower the risk of bad debts and improve its cash flow position.

The Group remains optimistic about this business segment and the Board believes that the market demand for quality stainless steel castings and stainless steel materials will continue to grow in the medium to long term, the operating revenue of this business segment will maintain a moderate growth, bring sustained profit contribution to the Group.
