# Management Discussion and Analysis

## INDUSTRY OVERVIEW

China has been one of the most populous countries in the world. With continued urbanization and the rise in the number of women in the workplace, an increasing number of mothers in China have grown to realize the convenience and nutritional benefits offered by infant milk formula products as a supplement to and/or substitute for breast milk for their infants. According to the National Bureau of Statistics, China's birth rate dropped from 10.48‰ in 2019 to 6.77‰ in 2024, with number of newborns declining to approximately 9.5 million in 2024. According to Frost & Sullivan, an industry consulting firm, the number of children aging from zero to three decreased accordingly from approximately 47.1 million in 2019 to approximately 28.1 million in 2024. Despite the decline from 2019 to 2024, the number of newborns is expected to improve from 2024 to 2027, thanks to the newborn supporting and subsidy measures. Due to the factors listed below, China's infant milk formula market in terms of retail sales value is expected to remain stable.

- Growth in consumers' confidence in the quality of and preference for China's infant milk formula products. With the enhancement in the quality management regime of China's dairy industry and the increased competitiveness of Chinese dairy brands, consumers' confidence in and consumption preference for China's infant milk formula products continued to increase. Such increase will drive the production and sales of China's infant milk formula products, which could in turn better satisfy consumers' diversified and unique consumption needs.
- Growth of the high-end infant milk formula segment. Due to increasing urbanization, rising disposable income and growing health awareness, the demand for high-end infant milk formula products is expected to be the driving force of the overall infant milk formula industry in China. According to the National Bureau of Statistics, China's per capita annual disposable income in 2024 reached RMB41,314, with a compound annual growth rate of 6.1% from 2019 to 2024. Such increase will in turn increase the consumption momentum of China's high-end infant milk formula products.
- Increasing urbanization and rising disposable income. The increase in the urbanization rate and the per capita annual disposable income of Chinese residents will enhance the purchasing power of consumers, allowing them to purchase more infant milk formula products. Lower-tier cities as well as rural areas in China are becoming wealthier and more urbanized, and families in such regions are increasingly able to afford higher-quality infant milk formula products. In general, these regions have larger populations and therefore higher potential for consumption growth.
- Favorable industry policies by the PRC government:
  - o The National Development and Reform Commission of China unveiled the Action Plan for the Promotion of Domestic Infant Milk Formula (國產嬰幼兒配方乳粉提升行動方案) in May 2019, aiming to increase the portion of domestically manufactured infant milk formula in China with a target to remain a 60% self-sufficient level in the industry, and to encourage the use of fresh milk in the production of infant milk formula.

## Management Discussion and Analysis

- o On 22 February 2021, a series of national safety standards on infant food and infant milk formula were released by the State Healthcare Commission, such as National Standard for Infant Formula Food Safety (GB10765-2021) (食品安全國家標準嬰兒配方食品) and National Standard for Larger Infant Formula Food Safety (GB 10766-2021) (食品安全國家標準較大嬰兒配方食品). After a transition period of two years, those standards were implemented on 22 February 2023. The new national safety standards have made stricter provisions on areas such as protein, carbohydrate, microelement, which is conducive to the innovation of leading infant milk formula enterprises and the further development of infant milk formula industry.
- o On 20 July 2021, the State Council issued the Decision on Optimizing Birth Policy to Promote Long-term Balanced Development of Population (關於優化生育政策促進人口長期均衡發展的決定), proposing the implementation of the three-child policy and supporting measures to slow down the decline of birth rate. Later, the National Healthcare Security Administration issued the Notice on Supporting Maternity Insurance under the Three-Child Policy (關於做好支持三孩政策生育保險工作的通知), and the National People's Congress Standing Committee voted to pass the decision on amending the Law of Population and Family Planning, advocating on age-appropriate marriage and childbirth, which promotes childbirths. During the National People's Congress (NPC) and the Chinese People's Political Consultative Conference (CPPCC) in March 2022, the government reported the detailed implementation plan of the three-child policy, such as increasing maternity subsidies and medical security, adjustment of personal income tax on the care for children under the age of three, and development of commonly affordable childcare services.
- o On 12 November 2021, the State Administration for Market Regulation published the Announcement of the State Administration for Market Regulation on the Further Regulation of Labels and Identification of Infant Milk Formula Product (市場監管總局關於進一步規範嬰幼兒配方乳粉產品標籤標識的公告) (the “**SAMR Announcement**”), which made further stipulations on the characteristics, such as the label's main display layout, content claim, pattern, and feeding suggestion form. In addition, it is stipulated that if the product name refers to certain animal origin, all the milk protein raw materials in the product should come from such animal species. For compound ingredients in product ingredient list (excluding compound food additives), the original ingredients must be specified. From the date of the SAMR Announcement, the registration application for the infant formula products shall be carried out according to the stipulations contained therein. With effect from 22 February 2023, labels and markings on manufactured products shall comply with the requirements of the SAMR Announcement. Products manufactured prior to this date can be sold until the expiration of their shelf life.
- o On 10 July 2023, the State Administration for Market Regulation published the Amendment to the Measures for the Administration of Formula Registration of Infant Milk Formula Product (《嬰幼兒配方乳粉產品配方註冊管理辦法》), which further tightens the registration conditions of infant milk formula products and ensures the quality and food safety of infant milk formula products. The Amendment came into force on 1 October 2023.

## Management Discussion and Analysis

- o In October 2024, the General Office of the State Council issued the Several Measures on Accelerating the Improvement of the Childbirth Support Policy System and Promoting the Development of a Childbirth-Friendly Society (關於加快完善生育支持政策體系推動建設生育友好型社會的若干措施). The document proposed specific measures in various aspects, including enhancing childbirth service support, strengthening the childcare service system, reinforcing support in education, housing, and employment, and fostering a childbirth-friendly social environment. These measures aimed to reduce the costs of childbirth, parenting, and education while creating a societal atmosphere that respects and supports childbirth.
- o On 14 March 2025, Hohhot officially issued and implemented the Implementing Opinions on Promoting Population Gathering and Promoting High-Quality Population Development (關於促進人口集聚推動人口高質量發展的實施意見) (the “**Opinions**”). The Opinions, in the context of the implementation of an active childbirth and parenting support policy, proposed a one-time childcare subsidy of RMB10,000 for families having one child and settling in Hohhot, RMB50,000 for families having two children and settling in Hohhot, and RMB100,000 for families having three or more children and settling in Hohhot.
- o In July 2025, China issued the Implementation Programme for the Childcare Subsidy System (育兒補貼制度實施方案). Starting from 1 January, 2025, all families with one child, two children, or three children can receive a subsidy of RMB3,600 per year until the child reaches the age of three. Infants born before 1 January, 2025 and under the age of three are also eligible under the policy and can receive the corresponding subsidy based on the number of months. This policy is a significant national livelihood policy that directly distributes cash subsidies nationwide to families with children, which will help reduce the cost of raising children and is expected to benefit over 20 million families with infants each year.
- o In August 2025, the General Office of the State Council issued the Opinions on Gradually Implementing Free Preschool Education (關於逐步推行免費學前教育的意見), clearly stating that starting from the autumn semester of 2025, the tuition fees for the first year of preschool education for children in public kindergartens will be waived. For private kindergartens approved by the education department, the reduction of tuition fees will be implemented in accordance with the standards of the same type of public kindergartens. The Opinion also emphasizes ensuring assistance for disadvantaged children, the payment of teachers’ salaries, and the standardized operation of kindergartens, aiming to gradually reduce the cost of family education and promote the popularization and inclusiveness of preschool education.

The Group's revenue decreased by 9.4% from RMB10,094.9 million for the six months ended 30 June 2024 to RMB9,150.5 million for the six months ended 30 June 2025, primarily because (i) in order to implement its strategy of "Fresh, Extracted and Active Nutrition", the Group reduced the channel inventory of infant formula products to maintain the freshness and quality of products on the shelves; and (ii) the Company actively fulfilled its corporate social responsibility by providing childbirth subsidies to consumers.

### Finance Costs

Finance costs decreased by 37.6% from RMB26.2 million for the six months ended 30 June 2024 to RMB16.4 million for the six months ended 30 June 2025, primarily due to the decrease of the interest-bearing borrowings.

Our income tax expense decreased by 35.1% from RMB1,118.0 million for the six months ended 30 June 2024 to RMB726.1 million for the six months ended 30 June 2025 as a result of a decrease in our profit before tax for the six months ended 30 June 2025.

We also prepare a monthly cash flow plan and forecast, which is submitted for approval by our Chief Financial Officer and Vice President of Finance Department, to ensure that we are able to maintain an optimum level of liquidity and meet our working capital needs.

In addition, we also used cash to purchase wealth management products. The underlying financial assets of the wealth management products generally are a basket of assets with a combination of money market instruments such as money market funds, interbank lending and time deposits, debt, bonds and other assets such as assets in insurance, trust fund plans and letters of credit. We form our portfolio of wealth management products with the view of achieving (i) a relatively low level of risk, (ii) good liquidity and (iii) an enhanced yield. ## INTRODUCTION

We have reviewed the interim financial information set out on pages 31 to 59, which comprises the condensed consolidated statement of financial position of China Feihe Limited (the “**Company**”) and its subsidiaries (the “**Group**”) as at 30 June 2025 and the related condensed consolidated statements of profit or loss, comprehensive income, changes in equity and cash flows for the six-month period then ended, and explanatory notes. The Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited require the preparation of a report on interim financial information to be in compliance with the relevant provisions thereof and International Accounting Standard 34 *Interim Financial Reporting* (“**IAS 34**”) as issued by the International Accounting Standards Board.

The directors of the Company are responsible for the preparation and presentation of this interim financial information in accordance with IAS 34. Our responsibility is to express a conclusion on this interim financial information based on our review. Our report is made solely to you, as a body, in accordance with our agreed terms of engagement, and for no other purpose. We do not assume responsibility towards or accept liability to any other person for the contents of this report.

## SCOPE OF REVIEW

We conducted our review in accordance with Hong Kong Standard on Review Engagements 2410 *Review of Interim Financial Information Performed by the Independent Auditor of the Entity* as issued by the Hong Kong Institute of Certified Public Accountants. A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Hong Kong Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

## CONCLUSION

Based on our review, nothing has come to our attention that causes us to believe that the interim financial information is not prepared, in all material respects, in accordance with IAS 34.

# Notes to the Interim Condensed Consolidated Financial Information

## 1. BASIS OF PREPARATION

The interim condensed consolidated financial information for the six months ended 30 June 2025 has been prepared in accordance with International Accounting Standard (“IAS”) 34 *Interim Financial Reporting* and the applicable disclosure requirements of the Rules Governing the Listing of Securities on the Stock Exchange of Hong Kong Limited (the “**Listing Rules**”).

The interim condensed consolidated financial information does not include all the information and disclosures required in the annual consolidated financial statements, and should be read in conjunction with the Group’s annual consolidated financial statements for the year ended 31 December 2024.

## 2. CHANGES IN ACCOUNTING POLICIES AND DISCLOSURES

The accounting policies adopted in the preparation of the interim condensed consolidated financial information are consistent with those applied in the preparation of the Group’s annual consolidated financial statements for the year ended 31 December 2024, except for the adoption of the following amended IFRS Accounting Standard for the first time for the current period’s financial information:

Amendments to IAS 21	<i>Lack of Exchangeability</i>
----------------------	--------------------------------

The nature and impact of the amended IFRS Accounting Standard are described below:

Amendments to IAS 21 specify how an entity shall assess whether a currency is exchangeable into another currency and how it shall estimate a spot exchange rate at a measurement date when exchangeability is lacking. The amendments require disclosures of information that enable users of financial statements to understand the impact of a currency not being exchangeable. As the currencies that the Group had transacted with and the functional currencies of group entities for translation into the Group’s presentation currency were exchangeable, the amendments did not have any impact on the interim condensed consolidated financial information.

### 3. OPERATING SEGMENT INFORMATION

For management purposes, the Group is organised into business units based on their products and has two reportable operating segments as follows:

- Raw milk segment – manufacture and sale of raw milk; and
- Dairy products and nutritional supplements products segment – manufacture and sale of dairy products and sale of nutritional supplements

Management monitors the results of the Group's operating segments separately for the purpose of making decisions about resource allocation and performance assessment. Segment performance is evaluated based on reportable segment profit, which is measure of adjusted profit before tax. The adjusted profit before tax is measured consistently with the Group's profit before tax except that bank interest income, other interest income, non-lease-related finance costs, and share of losses of associates are excluded from such measurement.

Segment assets exclude deferred tax assets, financial asset at fair value through other comprehensive income, long-term bank deposits, structured deposits, restricted cash, cash and cash equivalents and other unallocated head office and corporate assets as these assets are managed on a group basis.

Segment liabilities exclude interest-bearing bank and other borrowings, tax payable, deferred tax liabilities and other unallocated head office and corporate liabilities as these liabilities are managed on a group basis.

Intersegment sales and transfers are transacted with reference to the selling prices used for sales made to third parties at the then prevailing market prices.

The calculation of the diluted earnings per share amounts is based on the profit for the period attributable to ordinary equity holders of the parent and the total of (i) the weighted average number of ordinary shares outstanding during the period, as used in the basic earnings per share calculation, and (ii) the weighted average number of ordinary shares assumed to have been issued at no consideration on the deemed exercise of all dilutive potential ordinary shares into ordinary shares.

## 11. BIOLOGICAL ASSETS

### (a) Nature of activities

Dairy cows owned by the Group are primarily held to produce milk.

The quantity of dairy cows owned by the Group as at 30 June 2025 and 31 December 2024 is shown below. The Group's dairy cows contain heifers and calves and milkable cows. Heifers and calves held at 30 June 2025 and 31 December 2024 were dairy cows that have not had their first calves.

	30 June 2025 Heads (Unaudited)	31 December 2024 Heads (Audited)
Dairy cows		
Milkable cows	51,452	49,330
Heifers and calves	56,987	57,966
Total dairy cows	108,439	107,296

The Group is exposed to fair value risks arising from changes in prices of the dairy products. The Group does not anticipate that the price of the dairy products will decline significantly in the foreseeable future and the Directors are of the view that there are no available derivative or other contracts which the Group can enter into to manage the risk of a decline in the price of the dairy products.

In general, the heifers are inseminated with semen when they reach approximately 16 months old. After approximately 9 months following a successful insemination, a calf is born and the dairy cow begins to produce raw milk and the lactation period begins. A milkable cow is typically milked for approximately 305 days before an approximately 60 days' dry period.

When a heifer begins to produce milk, it would be transferred to the category of milkable cows based on the estimated fair value on the date of transfer. The sale of dairy cows is not one of the Group's principal activities and the proceeds are not included as revenue.

The Group has a policy of requiring payment in advance from customers for the sale of products (other than cash and credit card sales and sales of raw milk), except for some major customers, where the trading terms are on credit. The Group grants a defined credit period usually ranging from one to three months from the date of invoice to these customers. The Group seeks to maintain strict control over its receivables to minimise credit risk. Overdue balances are reviewed regularly by senior management. In view of the aforementioned and the fact that the Group's trade and bills receivables relate to a large number of diversified customers, there is no significant concentration of credit risk. The Group does not hold any collateral or other credit enhancements over its trade receivable balances. Trade and bills receivables are non-interest-bearing.

An ageing analysis of the trade and bills receivables as at the end of the reporting period, based on the invoice date and net of loss allowance, is as follows:

### 19. FAIR VALUE AND FAIR VALUE HIERARCHY OF FINANCIAL INSTRUMENTS (Continued)

Management has assessed that the fair values of cash and cash equivalents, restricted cash, trade and bills receivables, trade and bills payables, financial assets included in prepayments, deposits and other receivables, and financial liabilities included in other payables and accruals, approximate to their carrying amounts largely due to the short term maturities of these instruments.

The fair values of the financial assets and liabilities are included at the amount at which the instrument could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale. The following methods and assumptions were used to estimate the fair values:

The fair values of the non-current portion of interest-bearing bank borrowings have been calculated by discounting the expected future cash flows using rates currently available for instruments with similar terms, credit risk and remaining maturities. The changes in fair value as a result of the Group's own non-performance risk for interest-bearing bank borrowings as at 30 June 2025 and 31 December 2024 were assessed to be insignificant.

The fair values of the structured deposits are determined in accordance with discounted cash flow analysis. The fair values of financial assets and financial liabilities carried at amortised cost approximate to their carrying amounts.

## 19. FAIR VALUE AND FAIR VALUE HIERARCHY OF FINANCIAL INSTRUMENTS (Continued)

### Fair value hierarchy

The following tables illustrate the fair value measurement hierarchy of the Group's financial instruments:

#### Assets measured at fair value:

	Fair value measurement using			Total RMB'000
	Quoted prices in active markets (Level 1) RMB'000	Significant observable inputs (Level 2) RMB'000	Significant unobservable inputs (Level 3) RMB'000	
At 30 June 2025 (unaudited)				
Financial asset at fair value through other comprehensive income	–	–	1,800	1,800
Structured deposits	–	10,386,931	–	10,386,931
	–	10,386,931	1,800	10,388,731
At 31 December 2024 (audited)				
Financial asset at fair value through other comprehensive income	–	–	1,800	1,800
Structured deposits	–	9,681,736	–	9,681,736
	–	9,681,736	1,800	9,683,536

The Group did not have any financial liabilities measured at fair value as at 30 June 2025 (31 December 2024: Nil).

During the period, there were no transfers of fair value measurements between Level 1 and Level 2 and no transfers into or out of Level 3 for financial assets and financial liabilities (year ended 31 December 2024: Nil).

The fair value of the financial asset at fair value through other comprehensive income was estimated using the market approach, with an unobservable input as the price-to-book ratio of comparable companies. A 20% (31 December 2024: 20%) increase/decrease in the price-to-book ratio of comparable companies would result in an increase/decrease in fair value by approximately RMB360,000 (31 December 2024: RMB360,000).
