During the six months ended 30 June 2025, the trading of computer-related components, clothes and beauty products business continued to contribute a significant percentage to our revenue. We continue to be optimistic at this business segment and will capture more market opportunities as and when appropriate. On the other hand, the sales and marketing of electronic equipment and related products was still an important source of income of the Group. In addition, the financial arm of the Group comprising of securities brokerage, placing and underwriting business and money lending business also contributed the revenue to the Group during the period. Details please refer to note 3.

LIQUIDITY AND FINANCIAL RESOURCES

As compared with 31 December 2024, the decrease in current ratio from 7.2 to 5.2 was mainly due to increase in the trade and other payables as at 30 June 2025.

As at 30 June 2025, the Group had cash on hand of approximately HK\$14.4 million, current assets of approximately HK\$278.5 million, total assets of approximately HK\$278.7 million and shareholders' equity of approximately HK\$219.3 million.

As at 30 June 2025, the authorised share capital of the Company was HK\$600,000,000, which divided into 100,000,000,000 shares of HK\$0.006 each. The authorised share capital had no change during the period.

EXCHANGE RATE

Most of sales in the current period were denominated in United States dollars, whilst the majority of the Group's expenses were denominated in United States dollars, Renminbi and Hong Kong dollars. Although the Group currently does not maintain any hedging policy to hedge against foreign exchange exposure that may arise from the above transactions, the management team continuously assess the foreign currency exposure, with an aim to minimize the impact of foreign exchange fluctuation on the Group's business operations.
