Management Discussion and Analysis

Business Review and Outlook

We are a leading financial services enabler for SBOs in China. We are committed to providing SBOs with comprehensive, convenient financial products and services as well as enabling financial institution partners to reach and serve SBOs efficiently. In addition, we provide consumer finance products and services for retail consumers.

As of June 30, 2025, our total outstanding balance of loans was RMB193.4 billion, representing a decrease of 17.8% from June 30, 2024, among which our outstanding balance of consumer finance loans was RMB54.5 billion, representing an increase of 29.8% from June 30, 2024. Our new loan sales increased from RMB93.3 billion in the first half of 2024 to RMB106.1 billion in the first half of 2025, among which volume of new consumer finance loans increased from RMB42.4 billion in the first half of 2024 to RMB59.3 billion in the first half of 2025.

Our risk bearing by balance as of June 30, 2025 increased to 83.5%, as compared to 56.7% as of June 30, 2024. Excluding consumer finance, our risk bearing by balance as of June 30, 2025 increased to 83.9%, as compared to 49.9% as of June 30, 2024.

In the first half of 2025, our total income increased from RMB12,034 million in the first half of 2024 to RMB14,084 million in the first half of 2025. We recorded a net loss of RMB519 million for the first half of 2025, which changed from our net loss position of RMB2,297 million in the first half of 2024.

We have a strong balance sheet position. As of June 30, 2025, our net assets stood at RMB83,110 million with RMB27,891 million of cash at bank. Our consumer finance subsidiary had a capital adequacy ratio of 14.6% and our financing guarantee subsidiary had a leverage ratio of 3.6x as of the same date. Our strong capital position demonstrates our business resilience and provides a solid foundation for us to navigate through the business cycle.

In the first half of 2025, the macroeconomic environment remained complex for SBOs. While SBOs faced pressure on profits, the Company maintained loan quality while seeing a positive upward trend in the volume of new consumer finance loans. Nevertheless, asset quality continued to improve: (i) the C-M3 flow rate remained flat at 0.9% as of June 30, 2024 and 2025, and (ii) DPD 30+ delinquency rates decreased from 5.4% as of June 30, 2024, to 4.6% as of June 30, 2025, and (iii) DPD 90+ delinquency rates decreased from 3.4% as of June 30, 2024, to 2.7% as of June 30, 2025, and we continued to implement our prudent business strategies. Our prudent approach and ongoing operational refinements will be key as we pursue sustainable future growth.

In the second half of 2025, we will target high-quality existing borrowers and refinance existing loans through “rollover financing” to extend customers’ loan terms. This approach will reduce funding costs while minimizing the outflow of loan balances, thereby boosting profitability. During this period, we will focus on identifying high-quality customers, increasing credit limits for them, lowering interest rates on cooperative loans, and improving customer retention rates. While maintaining our overall strategy of prudent management, we will optimize asset quality, mitigate risks, and enhance profitability.

Management Discussion and Analysis

Net interest income. Our net interest income increased by 5.5% from RMB6,068 million for the six months ended June 30, 2024 to RMB6,405 million for the six months ended June 30, 2025, mainly due to the increase of net interest income from our consumer finance business and microloan lending business, partially offset by the decrease in loan balance.

Guarantee income. Our guarantee income increased by 58.6% from RMB1,775 million for the six months ended June 30, 2024 to RMB2,816 million for the six months ended June 30, 2025, mainly due to the increase in the average off-balance risk-bearing loan balance.

Other income. Our other income decreased by 8.4% from RMB773 million for the six months ended June 30, 2024 to RMB708 million for the six months ended June 30, 2025, mainly due to the decreased account management fees driven by decreased collection.

Investment income. Our investment income increased by 212.4% from RMB(1,129) million for the six months ended June 30, 2024 to RMB1,269 million for the six months ended June 30, 2025, mainly due to combined impact of changes in the valuations of risk assets and a gain we recognized from the loss sharing agreement we entered into with Lufunds.

Sales and marketing expenses	2,898	2,069	289	(28.6%)

Other loss - net	299	64	9	(78.6%)
Total expenses	12,920	13,593	1,898	5.2%

Management Discussion and Analysis

Our total expenses increased by 5.2% from RMB12,920 million for the six months ended June 30, 2024 to RMB13,593 million for the six months ended June 30, 2025, mainly due to the increase in risk costs as a result of the decreased customer repayment capability along with the increased risk exposure, which partially offset the decrease in operation costs resulting from our expense control measures.

Sales and marketing expenses. Our sales and marketing expenses decreased by 28.6% from RMB2,898 million for the six months ended June 30, 2024 to RMB2,069 million for the six months ended June 30, 2025, mainly due to (i) the decreased borrower acquisition expenses as a result of the decreased new loan sales and loan balance, (ii) the decreased general sales and marketing expenses as a result of the decrease in salary as a result of optimization of our sales team.

General and administrative expenses. Our general and administrative expenses decreased by 2.6% from RMB1,024 million for the six months ended June 30, 2024 to RMB997 million for the six months ended June 30, 2025, mainly due to our expense control measures.

Operation and servicing expenses. Our operation and servicing expenses decreased by 24.1% from RMB2,699 million for the six months ended June 30, 2024 to RMB2,049 million for the six months ended June 30, 2025 due to our expense control measures and the decrease in the loan balance.

Technology and analytics expenses. Our technology and analytics expenses decreased by 12.2% from RMB540 million for the six months ended June 30, 2024 to RMB474 million for the six months ended June 30, 2025 due to our improved efficiency and the expense control measures we adopted.

Credit impairment losses. Our credit impairment losses increased by 44.8% from RMB5,426 million for the six months ended June 30, 2024 to RMB7,858 million for the six months ended June 30, 2025, mainly due to the increase in the provision of loans and receivables as a result of the increased risk bearing loan balance, partially offset by the decrease in the actual losses.

Finance costs. Our finance costs increased by 137% from RMB35 million for the six months ended June 30, 2024 to RMB83 million for the six months ended June 30, 2025, mainly due to the decrease in interest income from deposits.

Other loss - net. Our other loss was RMB64 million for the six months ended June 30, 2025, compared to RMB299 million other loss for the six months ended June 30, 2024, mainly due to the decrease of foreign exchange losses we recognized in 2025.

Income Tax Expense

Our income tax expense decreased by 28.4% from RMB1,411 million for the six months ended June 30, 2024 to RMB1,010 million for the six months ended June 30, 2025, mainly due to the decreasing overseas dividend withholding tax.

Net Loss

Our net loss was RMB519 million for the six months ended June 30, 2025, compared to the net loss of RMB2,297 million for the six months ended June 30, 2024, as a result of the aforementioned factors.

For the six months ended June 30, 2025, (i) our net cash generated from operating activities was RMB5,409 million, primarily due to collected service fees from the core retail credit and enablement business and the decrease of the loan scale, partially offset by the payment of guarantee indemnity payments; (ii) our net cash used in investing activities was RMB2,810 million, primarily due to payment for acquisition of investment assets, which exceeded proceeds from sale of investment assets; and (iii) our net cash used in financing activities was RMB1,159 million, primarily due to repayment of borrowings, partially offset by proceeds from borrowings..

For the corresponding period of 2024, (i) our net cash used in operating activities was RMB1,116 million; (ii) our net cash generated from investing activities was RMB7,158 million; and (iii) our net cash used in financing activities was RMB4,195 million.

Management Discussion and Analysis

Material Acquisitions and Disposals

From the Listing Date up to the date of this interim report, during the normal course of business, the Group subscribed for wealth management products from various independent third party financial institutions. A summary of the subscriptions, which are subject to announcement and/or Shareholders' approval requirements (as the case may be) pursuant to Chapter 14 of the Listing Rules, are set out in the 2024 Annual Report of the Company published on February 15, 2026 and further details regarding the subscription of wealth management products are set out in the Company's announcement dated February 15, 2026.

Save for the above, we did not have any material acquisitions or disposals of subsidiaries, Consolidated Affiliated Entities, associates or joint ventures during the six months ended June 30, 2025.

Future Plans for Material Investments or Capital Assets

We did not have any future plans for material investments or capital assets as of June 30, 2025.

Contingent Liabilities

Previously, we shared credit risk with our funding partners by utilizing a combination of our licensed financing guarantee subsidiary and collaborations with third-party credit enhancement providers. In the fourth quarter of 2023, we successfully completed the transformation of our business model, such that our licensed financing guarantee subsidiary provides a guarantee for each nearly every loan transaction (excluding certain consumer finance loan products and referral product) without the use of third-party credit enhancement. As of June 30, 2025, the balance of our remaining commitment under the financing guarantee contracts for which we do not consolidate the underlying loans amounted to RMB69,103 million.

Other than disclosed above, we also made disclosure in Note 25 to the financial statements on contingent liabilities.

Capital Expenditures and Capital Commitment

Our capital expenditures were RMB14 million for the six months ended June 30, 2025. These capital expenditures primarily comprised expenditures for the purchase of property and equipment and other long-term assets. We intend to fund our future capital expenditures with our existing cash balance, and anticipated cash flows from operations. We will continue to make well-planned capital expenditures to meet the expected growth of our business. As of June 30, 2025, we had no capital commitments.

Management Discussion and Analysis

Risk Management

Foreign Exchange Risk

Foreign exchange risk is the risk of loss resulting from changes in foreign currency exchange rates. Fluctuations in exchange rates between the RMB and other currencies in which we conduct business may affect our financial position and results of operations. The foreign currency risk we have assumed mainly comes from movements in the USD/RMB exchange rate.

We and our major overseas intermediate holding companies' functional currency is USD. We are mainly exposed to foreign exchange risk arising from our cash and cash equivalents and loans to subsidiaries denominated in RMB. The Group enters forward contracts to manage the exposure to foreign currency risk arising from loans to subsidiaries denominated in RMB of the overseas subsidiaries.

Our subsidiaries are mainly operating in the PRC with most of the transactions denominated in RMB. We consider that business in the PRC is not exposed to any significant foreign exchange risk as there are no significant financial assets or liabilities of these subsidiaries denominated in the currencies other than RMB.

Interest Rate Risk

Interest rate risk is the risk that the fair value/future cash flows of a financial instrument will fluctuate because of changes in market interest rates. Interest on floating rate instruments is repriced at intervals of one year or less. Interest on fixed interest rate instruments is priced at inception of the financial instruments and is fixed until maturity. Floating rate instruments expose us to cash flow interest rate risk, whereas fixed rate instruments expose us to fair value interest risk. Our interest rate risk mainly arises from fixed rate instruments including cash at bank, accounts and other receivables and contract assets, loans to customers, and accounts and other payables and contract liabilities, etc. Our interest rate risk policy requires us to manage interest rate risk by managing the maturities of interest-bearing financial assets and interest-bearing financial liabilities.

Employees and Remuneration

As of June 30, 2025, we had a total of 33,543 full-time employees, whose remuneration is determined taking into account factors such as their individual performance and contribution, professional ability and the prevailing market salary level. The following table sets forth the number of our employees by function as of June 30, 2025:

Function	Number of Employees
Sales and marketing	24,146
Credit assessment	1,029
Post-origination services	4,779
General and administrative	2,616
Technology and research	561
Other	412
Total	33,543

Management Discussion and Analysis

For the six months ended June 30, 2025, our employee benefit expenses amounted to RMB3,328 million as compared to RMB4,018 million for the six months ended June 30, 2024.

As part of our retention strategy, we offer employees competitive salaries, performance-based cash bonuses, incentive share grants and other incentives. Our management recognizes the importance of realizing personal values for our employees and promotes a transparent appraisal system for all our employees seeking career advancement across different business departments. Our appraisal system provides the basis for making human resource decisions such as base compensation, bonuses, career promotion and employee share incentive grants. In order to maintain a competitive edge, we will continue to focus on attracting and retaining qualified professionals by providing an incentive-based and market-driven compensation structure that rewards performance and results. We primarily recruit our employees through recruitment agencies, on-campus job fairs, industry referrals, internal referrals and online channels. In addition to on-the-job training, we regularly provide management, financial, technology, regulatory and other training to our employees by internally sourced speakers or externally hired consultants. Our employees may also attend external training with the approval of their supervisor.

We have adopted the 2014 Share Incentive Plan (expired and terminated in December 2024) and the 2019 Performance Share Unit Plan.

As this action remains in its preliminary stage, management is unable to estimate the possible outcome or possible loss or possible range of loss, if any, associated with the resolution of this case.

Save as disclosed in this Interim Report, there are no important events that have occurred since the end of the Reporting Period up to date of this report.

Independent Review Report

To the board of directors of Lufax Holding Ltd

(Incorporated in the Cayman Islands with limited liability)

Introduction

We have reviewed the interim financial information set out on pages 26 to 69, which comprises the interim condensed consolidated statement of financial position of Lufax Holding Ltd (the “Company”) and its subsidiaries as of June 30, 2025 and the related interim condensed consolidated statements of comprehensive income, changes in equity and cash flows for the six-month period then ended, and explanatory notes. The Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited require the preparation of a report on interim financial information to be in compliance with the relevant provisions thereof and International Accounting Standard 34 *Interim Financial Reporting* (“IAS 34”) as issued by the International Accounting Standards Board (“IASB”). The directors of the Company are responsible for the preparation and presentation of this interim financial information in accordance with IAS 34. Our responsibility is to express a conclusion on this interim financial information based on our review. Our report is made solely to you, as a body, in accordance with our agreed terms of engagement, and for no other purpose. We do not assume responsibility towards or accept liability to any other person for the contents of this report.

Scope of Review

We conducted our review in accordance with International Standard on Review Engagements 2410 *Review of Interim Financial Information Performed by the Independent Auditor of the Entity* as issued by the International Auditing and Assurance Standards Board. A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with International Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion

Based on our review, nothing has come to our attention that causes us to believe that the interim financial information is not prepared, in all material respects, in accordance with IAS 34.

3.2 New amendments adopted by the Group

The Group has adopted Lack of exchangeability - Amendments to IAS 21 for the first time for the current year's financial statements. As the currencies that the Group had transacted in and the functional currencies of overseas subsidiaries, joint ventures and associates for translation into the Group's presentation currency were exchangeable, the amendments did not have any impact on the Group's financial statements. The Group has not early adopted any standard, interpretation or amendment that has been issued but is not yet effective.

3.3 New amendments that are relevant to the Group not yet adopted by the Group

		Effective for the annual periods beginning on or after

IFRS 19 and its amendments	<i>Subsidiaries without Public Accountability: Disclosures</i>	January 1, 2027

The Group does not expect the adoption of these standards will have a material impact on the Group's operations or financial statements.

4. Critical accounting estimates and judgments

The preparation of the interim condensed consolidated financial information requires management to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets and liabilities, income and expense. Actual results may differ from these estimates.

In preparing the interim condensed consolidated financial information, the nature of significant judgments made by management in applying accounting policies and the key sources of estimation uncertainty were consistent with those described in the audited consolidated financial statements of the Company as of and for the year ended December 31, 2024.

Notes to the Interim Condensed Consolidated Financial Information (Continued)

For the six-months ended June 30, 2025

5. Financial instruments and risks

The Group's activities expose it to a variety of market risks (comprising foreign currency risk and interest rate risk), credit risk and liquidity risk. The Group's overall risk management program focuses on the unpredictability of financial markets and seeks to minimize potential adverse effects on the Group's financial performance. Risk management is carried out by the senior management of the Group.

The interim condensed consolidated financial information does not include all the information of financial risk management and disclosures required in the annual financial statements, and should be read in conjunction with the consolidated financial statements for the year ended December 31, 2024.

There were no changes in any material risk management policies during the six months ended June 30, 2025.

5.1 Measurement of expected credit loss ("ECL")

There have been no material changes in the risk management policies since December 31, 2024.

The Group has developed macro-economic forward-looking adjustment model by establishing a pool of macro-economic indicators, preparing data, filtering model factors and adjusting forward-looking elements, and the indicators include gross domestic product ("GDP"), customer price index ("CPI"), broad measure of money supply ("M1") and other macro-economic variables. Through regression analysis, the relationship among these economic indicators in history with probability of default ("PD") is determined, and PD then determined through forecasting economic indicators. The forecasting methods and critical assumptions applied had no material changes during the six months ended June 30, 2025.

The Group regularly evaluates and forecasts these macro-economic indicators to provide best estimates for the future, and regularly evaluates the results. The Group combined statistical analysis results to determine the weights of different scenarios, and also considered the range of possible outcomes represented by each scenario to determine the final macro-economic assumptions and weights for measuring the relevant expected credit loss. Similar to other economic forecasts, the estimates of economic indicators have high inherent uncertainties, actual results may have significant differences with estimates. The Group considered the estimates above represented the optimal estimation of possible outcomes. The weighted credit loss above is calculated by multiplying the expected credit loss under each scenario by relative weightings.

The impact of these economic indicators on PD varies to different businesses. 5.1 Measurement of expected credit loss (“ECL”) (Continued)

Sensitivity analysis

Expected credit losses are sensitive to the parameters used in the model, such as forecast value of the macro-economic factors, stage designation results and other factors considered in the application of significant management judgment. Changes in these parameters, assumptions, models, and judgments will have an impact on the measurement of expected credit losses.

The following table shows the changes of ECL impairment provision on loans to customers and financing guarantee liabilities related to ECL assuming that the financial assets in stage 2 had been reclassified to stage 1 due to significant improvement in credit risk.

As of June 30, 2025	4,903,359

All unrealized gains or losses of Level 3 instruments for the period are recognized in Investment income/(loss).

Fair value measurements using significant unobservable input:

The level of fair value measurement is determined by the lowest level input with material significance in the overall calculation. As such, the significance of the input should be considered from an overall perspective in the estimation of fair value.

As of December 31, 2024 and June 30, 2025, the level 3 instruments were mainly other debt investments at fair value through profit or loss. As the other debt investments are not traded in an active market, their fair values have been determined using the discounted cash flow method whereby the discount rate adjustment technique is applied. The discount rate used to determine the present value was a rate that reflects current market assessments of the time value of money and the risks specific to the assets as of each reporting date. The determination of discount rate involved critical estimates and judgments by the management.

11. Income tax expense

In December 2021, as part of its ongoing Base Erosion and Profit Shifting (BEPS) 2.0 Pillar Two initiative, the Organization for Economic Co-operation and Development (OECD) published Global Anti-Base Erosion (GloBE) Model Rules for a new global minimum tax regime. Subsequently, the OCED published various Administrative Guidance that provides further clarity on the Model Rules. In general, the global minimum tax regime is designed to achieve a minimum effective tax rate of 15% in each jurisdiction in which a multinational group subject to the regime operates. Globally, jurisdictions are in various stages of enacting the Pillar Two global minimum tax into local law.

IAS 12 *Income Taxes* provides mandatory temporary exception from recognizing and disclosing deferred tax assets and liabilities related to Pillar Two global minimum taxes. The Group has adopted and applied the temporary mandatory exception.

The Group operates in several jurisdictions, including: the Cayman Islands, the British Virgin Islands, Hong Kong, Indonesia, and the PRC. For the period from January 1, 2024 to July 29, 2024, the ultimate holding company of the Group was Lufax Holding Ltd, incorporated in the Cayman Islands. As mentioned in Note 2, as of July 30, 2024, the Company's ultimate holding company became Ping An Group, which was incorporated in the PRC.

As a subsidiary of Ping An Group, the Group is responsible for its share of Pillar Two global minimum taxes of Ping An Group for jurisdictions in which the Group operates. As of June 30, 2025, the Group has performed an assessment of the potential impact of the Pillar Two legislation, and does not expect a material exposure to Pillar Two income taxes. The Group continues to follow and evaluate the potential impact of the Pillar Two legislation on future financial performance.

(a) Cayman Islands and BVI Income Tax

The Company is incorporated under the laws of the Cayman Islands as an exempted company with limited liability under the Companies Law of the Cayman Islands and is not subject to Cayman Islands income tax. The group entities established under the BVI Business Companies Acts are exempted from BVI income taxes.

(b) Hong Kong Income Tax

Under the current Hong Kong Inland Revenue Ordinance, the Group's subsidiaries incorporated in Hong Kong are subject to 16.5% income tax on their taxable income generated from operations in Hong Kong. Additionally, according to the latest regulation, payments of dividends by the subsidiaries incorporated in Hong Kong to the Company are not subject to any Hong Kong withholding tax.

(c) Indonesia Income Tax

The Indonesia income tax rate is 22%. No Indonesia profits tax was provided for as there was no estimated assessable profit that was subject to Indonesia profits tax for the six months ended June 30, 2024 and 2025.

11. Income tax expense (continued)

(e) PRC Withholding Tax

According to the Corporate Income Tax Law, distribution of profits earned by the PRC companies since January 1, 2008 to foreign investors is subject to withholding tax of 5% or 10%, depending on the country of incorporation of the foreign investor, upon the distribution of profits to overseas-incorporated immediate holding companies. As of June 30, 2025, due to the ongoing funding needs of the Company and its overseas subsidiaries and the requirement to reduce the size of cross border lending of funds, the Company has to adjust its funding plans accordingly. As a result, domestic subsidiaries of the Group are expected to make significant dividend distributions of their historical retained earnings to overseas subsidiaries of the Company in order to satisfy the funding needs of the Company and its overseas subsidiaries. Consequently, the Group recognized a deferred tax liability in respect of the withholding tax on future dividends.

- (f) Due to the change in business strategy, deferred tax assets in relation to certain subsidiaries of the Group have not been recognized as it is not probable that future taxable profits of these subsidiaries will be available in order to utilize the tax benefits from the deductible temporary differences.
- (g) Expenses and losses not deductible for tax purposes mainly related to business entertainment expenses and advertising expenses exceeding certain threshold, as well as share-based compensation expenses, which are not tax deductible according to the relevant tax regulations.

12. Loss per share

25. Contingent liability

Owing to the nature of the Group's related business, the Group is involved in contingencies and legal proceedings in the ordinary course of business, including, but not limited to, being the plaintiff or the defendant in litigations and arbitrations. The Group may also be subject to class actions, regulatory and government investigations, including but not limited to compliance with anti-corruption and anti-bribery laws, trade sanctions laws and export control laws. Such matters could be developed into legal proceedings or enforcement actions, in which remedies could include fines, penalties, restitution or alterations in the Group's business practices, and could result in additional expenses, limitations on certain business activities and reputational damage.

Many of these matters are also highly complex. It is therefore inherently difficult to predict the magnitude or scope of potential future losses arising from these matters. No provision has been made for pending assessments, litigation, potential contractual breaches, regulatory and government investigations and actions where the outcome cannot be reasonably estimated or where management considers the likelihood of loss to be low or remote. With respect to pending litigation, management believes that any resulting liabilities would not have a material adverse effect on the financial position or operating results of the Group or any of its subsidiaries.

26. Segment report

The Group's acquisition of PAObank was completed and the PAObank became a wholly-owned subsidiary of the Group in 2024. Based on the assessment of reportable segments under IFRS 8, the Group determined that only one operating segment needs to be reported as none of the operating segments, other than the lending-related business, meets the quantitative thresholds in terms of revenue, profit or loss, and assets for the year ended 31 December 2024.

As digital banking business meets the quantitative threshold in terms of profit or loss for the six months ended June 30, 2025, segment information is reported as follows:

- | | |

| lending-related business | - Retail credit and enablement, consumer finance loan |
| Digital banking business | - Retail banking and SME banking |

The principal executive officer is the Chief Operating Decision Maker (CODM) and monitors the operating results of its business units separately for the purpose of making decisions about resource allocation and performance assessment. Segment performance is evaluated based on profit or loss and is measured consistently with profit or loss in the consolidated financial statements. However, withholding taxes are managed on a group basis and are not allocated to operating segments.
