Management Discussion and Analysis

BUSINESS REVIEW

The Group was principally engaged in three businesses: (i) energy business which comprised mainly the trading of energy-related products; (ii) operation of digital energy trading parks; and (iii) other business and trading of other products during the six months ended 30 June 2026 (the **“Current Period”**).

The Group’s revenue during the Current Period was approximately HK\$222.43 million, representing a decrease of approximately 18.08% as compared to approximately HK\$271.54 million for the corresponding period in 2025 (the **“Corresponding Period”**). The gross profit during the Current Period was approximately HK\$4.82 million (2025 interim: approximately HK\$8.28 million), representing a decrease of approximately 41.70% or HK\$3.46 million as compared to the Corresponding Period.

Energy Business

During the Current Period, revenue derived from the energy trading business was approximately HK\$191.41 million (2025 interim: approximately HK\$172.35 million), representing a year-on-year increase of approximately 11.06%. The increase in revenue was mainly attributable to the increased demand for our energy-related products from our customers.

During the Current Period, the Group was still facing challenges on the energy trading business due to hostile geopolitics and the military conflicts between (i) Ukraine and Russia; and (ii) Israel and Iran. In view of that, the Group has been actively implementing different strategies to minimize the impact of the challenges, including but not limited to identifying and securing new customers, expanding its market share, enhancing its product portfolio and sourcing from new suppliers. The implementation of the aforesaid strategies turns out to be effective and the performance of the energy trading business has remained relatively stable as compared with that in the Corresponding Period.

Operation of Digital Energy Trading Parks

The Group has signed cooperation agreements with various entities in 12 cities and regions of China, and successfully introduced not less than 600 enterprises into the digital energy trading parks as at the date of this report. The operation and service business of digital energy trading parks generates stable income to the Group through (1) receiving fixed service fees from enterprises in the trading parks on an annual basis; (2) receiving service fees based on the value-added services provided to the enterprises in the trading parks; and (3) applying for tax incentives or financial subsidies from local governments based on the economic benefits of the operation of the trading parks.

Management Discussion and Analysis

During the Current Period, the revenue derived from the operation of digital energy trading parks was approximately HK\$5.77 million (2025 interim: approximately HK\$6.50 million). The Company believes that the digital energy trading parks business will continue to contribute economic benefits and bring new opportunities for the energy trading business of the Group in the future.

Other Business, including Drilling Services and Trading of Other Products

On 10 August 2021, the Group has entered into a drilling service agreement of oil wells with Beijing Huaye Jinqian Petroleum Energy Technology Development Company Limited, Yanchi Branch* (北京華燁金泉石油能源技術開發有限公司鹽池分公司) (“**Beijing Huaye**”) to provide drilling services for 63 oil wells at a contract sum of over RMB748 million. As certain conditions precedent have not yet been fulfilled, the new drilling services of the 63 oil wells of the Group has been deferred and has not yet commenced as at the date of this report.

In order to further diversify its business, the Group has acquired two companies engaging in the trading of (i) agricultural products such as dry chili, sugar and corn; and (ii) deformed steel in 2024. The Group will continue to explore new investment and business opportunities for further expansion and diversification.

During the Current Period, the revenue derived from trading of agricultural products and deformed steel were approximately HK\$25.26 million and Nil, respectively (2025 interim: approximately HK\$60.90 million and approximately HK\$31.79 million, respectively). The decrease in revenue was mainly attributable to decrease of revenue derived from trading of agricultural products during the Current Period upon the disposal of subsidiaries in January 2026.

PROSPECTS

Looking forward to the remaining part of the year of 2026, the risk of stagflation in the global economy is expected to increase and the overall market conditions remain uncertain. The Group expects to face various challenges such as price fluctuation in oil and petrochemicals caused by the continuation of the military conflict between (i) Ukraine and Russia; and (ii) Israel and Iran and the global economic uncertainty.

1. Energy Business

The Group will continue to explore the opportunities of development of energy-related products and services in order to strengthen its energy business and to enhance the business competitiveness and profitability. The Group will endeavour to enter into business cooperation with sizable state-owned enterprises in order to minimise the risk of energy business. The Group will also closely monitor the global oil price fluctuation.

Management Discussion and Analysis

2. Operation of Digital Energy Trading Parks

The Group has been successful in developing the “digital energy trading parks” operation service for the petrochemical energy industry and has signed cooperative contracts with various entities in 12 cities and regions of China to co-build the Jintai Energy Digital Trading Industry Park since its commencement. The Group has introduced not less than 600 enterprises to the trading park. The Group aims to operate 30 industry digital trading parks, introducing more than 2,000 enterprises. The Group will continue to broaden its customer base to the digital energy trading parks in order to achieve a sustainable growth in the future.

3. Business Expansion

The Group will continue to explore new investment and business opportunities in various fields including but not limited to oil exploration and development.

To cope with the challenging environment, the Group will continue to identify and evaluate various development opportunities to strengthen our competitive advantages through deployment of more resources for capturing the market potentials and broaden its source of revenue so as to create value for shareholders. The Board is confident to achieve sustainable growth and bring greater returns to our shareholders in the long run.

4 ESTIMATES

The preparation of unaudited interim condensed consolidated financial statements in conformity with HKAS 34 requires management to make judgements, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets and liabilities, income and expense on a year-to-date basis. Actual results may differ from these estimates.

In preparing these unaudited interim condensed consolidated financial statements, the significant judgements made by management in applying the Group's accounting policies and the key sources of estimation uncertainty were the same as those that applied to the 2025 Audited Consolidated Financial Statements.

5 FINANCIAL RISK MANAGEMENT

There have been no changes in the risk management policies since last year end.

5.2 Liquidity risk

In the management of liquidity risk, the Group's management monitors and maintains a level of cash and cash equivalents deemed adequate by the management to finance the Group's operations and mitigate the effects of fluctuations in cash flows.

5.3 Fair value estimation

Fair value measurements are categorised into Level 1, Level 2 or Level 3 based on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to the fair value measurement in its entirety, which are described as follows:

- Quoted prices (unadjusted) in active markets for identical assets or liabilities (level 1).
- Inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices) (level 2).
- Inputs for the asset or liability that are not based on observable market data (that is, unobservable inputs) (level 3).

Financial assets and liabilities

The management considers that the carrying amounts of financial assets and financial liabilities recognised in these unaudited interim condensed consolidated financial statements approximate their fair values.

6 REVENUE AND SEGMENT INFORMATION

The Company's board of directors is the Group's chief operating decision-maker. Management has determined the operating segments based on the information reviewed by the board of directors for the purposes of allocating resources and assessing performance.

The board of directors considers the business from business lines perspective, and assesses the performance of the Group in three business segments, (1) energy business which comprises mainly the trading of energy-related products; (2) operation of digital energy trading parks; and (3) other business and trading of other products.

The accounting policies of the operating segments are the same as the Group's accounting policies. Segment profit or loss represents the profit or loss from each segment without allocation of finance income or costs, net foreign exchange gains/(losses), and the unallocated operating expenses since these activities are driven by the central function and the related income or expenses are individual between segments.

The Group's cash and cash equivalents and certain amount of right-of-use assets and trade and other receivables and prepayments are not considered to be segment assets for reporting to the board of directors as they are managed on a central basis.

The Group's borrowings, other borrowing, amounts due to non-controlling shareholders of subsidiaries, directors and related parties, convertible loan notes, derivative financial liabilities, long service payment obligation, current income tax liabilities, deferred tax liabilities and certain amount of lease liabilities and trade and other payables are not considered to be segment liabilities for reporting to the board of directors as they are managed on a central basis.

No provision for Hong Kong profits tax has been made, as the Group's subsidiaries in Hong Kong did not derive any assessable profit for the six months ended 30 June 2026 and 2025.

The Company's subsidiaries incorporated in the PRC are subject to Enterprise Income Tax ("EIT") at the rate of 25% (six months ended 30 June 2025: 25%).

Basic loss per share	(0.27)	(0.11)
Diluted loss per share	N/A	N/A

* The computation of the diluted loss per share for the six months ended 30 June 2025 does not assume the conversion of the Company's outstanding convertible loan notes, as their assumed exercise would result in a decrease in loss per share for the six months ended 30 June 2025 and therefore anti-dilutive. On 17 July 2025, the convertible loan notes matured, and according to the terms of the relevant agreements, the conversion rights lapsed upon maturity. For the six months ended 30 June 2025, the effect of dilutive potential ordinary shares of convertible loan notes was 458,575,000 shares.

The computation of the diluted loss per share for the six months ended 30 June 2026 and 2025 does not assume the exercise of the Company's share options because the exercise price of those options was higher than the average market price for shares for the six months ended 30 June 2026 and 2025.

13 DIVIDENDS

The Board of Directors did not propose any interim dividend for the six months ended 30 June 2026 (six months ended 30 June 2025: Nil).

	Unaudited 30 June 2026 HK\$'000	Audited 31 December 2025 HK\$'000
Convertible loan notes:		
Liability component	—	—
Derivative conversion option component	—	—

The Company issued HK\$110,952,907, 10% convertible loan notes ("**Convertible Notes**") at a par value of HK\$1,000,000 each on 17 July 2019. Under the terms of the Convertible Notes, (i) the Convertible Notes are denominated in Hong Kong dollars and are secured by shareholders of the Company, who have jointly and severally, unconditionally and irrevocably guaranteed the due and punctual payment of all sums expressed to be payable by the Company; (ii) the Convertible Notes entitle the holders to convert them into ordinary shares of the Company at any time between the date of issue of the Convertible Notes and their settlement date on 17 July 2020 at a conversion price of HK\$0.184 per Convertible Notes; (iii) the Company have the options to redeem all or some of the Convertible Notes at par value plus accrued interest at any time between the date of issue of the Convertible Notes and the settlement date; (iv) if the Convertible Notes have not been converted or redeemed, they will be redeemed on 17 July 2020 at par; and (v) interest of 10% will be paid annually up until the settlement date.

On 4 May 2020, a convertible notes holder signed a deed of assignment to transfer all rights and obligation of the Convertible Notes to another party ("**the New Noteholder**").

On 16 July 2020, the Company and the New Noteholder signed a supplemental deed to revise the terms of the Convertible Notes under which the Convertible Notes would be redeemed on 17 July 2021 at a conversion price of HK\$0.1340 per Convertible Notes. The fair value of the Convertible Notes at 16 July 2020 was estimated to be HK\$110,953,000, which was valued by an independent financial advisor. The fair value of the Convertible Notes comprises the liability component and the equity component amounted to HK\$97,767,000 and HK\$13,186,000 respectively.

19 CONVERTIBLE LOAN NOTES AND DERIVATIVE FINANCIAL LIABILITIES

(Continued)

On 4 August 2021, the Company and the New Noteholder signed the second supplementary agreement to revise the terms of the Convertible Notes. Pursuant to this supplementary agreement, the Convertible Notes will be redeemed on 17 July 2022 and the interest on the notes is charged at 10% per annum until the settlement date. Except for the above mentioned, all other terms of the Convertible Notes remain unchanged.

The Convertible Notes matured on 17 July 2022 and were not repaid by the Company or converted into shares of the Company upon their maturity, which was default and then was reclassified to amount due to a shareholder upon their maturity. Default interest was accrued at 14% per annum in accordance with the terms of the convertible loan notes since 17 July 2022 and was included in the amount due to a shareholder.

As at 31 December 2022, the amount due to a shareholder represented principal outstanding of the default convertible loan notes and related accrued interests, which was secured by guarantee given by the shareholders of the Company and repayable on demand.

On 5 May 2023, the shareholders of the Company passed the ordinary resolutions approving the third supplemental agreement with the New Noteholder to revise the terms of the Convertible Notes. Pursuant to this supplemental agreement, the Convertible Notes would be redeemed on 17 July 2025 and the interest on the notes was charged at 8% per annum until the settlement date. Except for the above, all other terms of the Convertible Notes remain unchanged.

Upon the modification of the terms of the Convertible Notes on 5 May 2023, the Convertible Notes contain liability component and derivative conversion option component. The early redemption option held by the Company is regarded as embedded derivative closely related to the economic characteristics and risks of the host contract, therefore, the early redemption option is not separated from liability component. As at 5 May 2023, the fair value of the derivative component amounted to HK\$904,000 was valued by an independent financial advisor and the effective rate applied for the liability component carried at amortised cost is 7.5% per annum.

19 CONVERTIBLE LOAN NOTES AND DERIVATIVE FINANCIAL LIABILITIES

(Continued)

During the year ended 31 December 2023, the gain on modification of the Convertible Notes amounted to HK\$1,364,000, which represents the excess of the carrying amount of the liability component of the Convertible Notes at the date of modification over the fair value of the Convertible Notes at that date, was treated as deemed contribution from a shareholder and recognised in capital reserve.

The Convertible Notes matured on 17 July 2025 and were neither repaid by the Company nor converted into shares upon maturity, which was default, and then was reclassified to other borrowing (Note 18) upon their maturity. Default interest was accrued at 14% per annum in accordance with the terms of the convertible loan notes since 17 July 2025.

On 19 May 2026, the Company and the New Noteholder entered into a new supplemental agreement ("**Fourth Supplemental Agreements**") to revise the terms of the Convertible Notes. Pursuant to Fourth Supplemental Agreement, the parties have conditionally agreed that, as at 18 July 2025, all accrued and unpaid interest on the amount due by the Company to the New Noteholder was approximately HK\$30,028,000; and the original principal amount of the Convertible Note was approximately HK\$123,291,000. Further, interest shall be accrued at the rate of 8% per annum from 19 July 2025 onwards. The maturity date of the amount due to the shareholder shall be extended to 17 July 2027 and the principal and interest payment date shall be revised to 17 July 2027. Except for the above, all other terms of the Convertible Notes remain unchanged.

The Fourth Supplemental Agreement is subject to certain conditions precedent to be fulfilled by the contracting parties, including the approval by the shareholders of the Company at an extraordinary general meeting ("**EGM**"). As of 30 June 2026, such conditions had not been fulfilled, and the date of the EGM had not yet been determined.

Subsequent to the end of the reporting period, the Company published an announcement on 21 August 2026 convening an EGM to be held on 10 September 2026 to consider and, if thought fit, approve the resolutions relating to the Fourth Supplemental Agreement and other matters. As at the date of approval of these unaudited interim condensed consolidated financial statements, the EGM had not yet been held and the Fourth Supplemental Agreement had not become effective.
