# III. BUSINESS REVIEW AND OUTLOOK

## 1. OVERALL OVERVIEW

In the first half of 2026, against the backdrop of multiple intersecting domestic and international factors, China's economy maintained stable operation, with the gross domestic product (GDP) for the first half reaching RMB69.6 trillion, representing a year-on-year increase of 4.7% at constant prices, which falls within the annual macroeconomic regulation target range. Benefiting from the continued efforts of proactive fiscal policy and prudent monetary policy, infrastructure investment received effective support, major projects were accelerated, and the leveraging effect of special-purpose bond funds was significant, driving steady growth in demand for engineering admixtures. At the same time, affected by the ongoing adjustment of the real estate sector, real estate development investment in the first half decreased by 18.0% year-on-year, while the area of newly commenced property declined by 23.4% year-on-year. Demand for admixtures in the civil construction sector continued to weaken, exerting a certain degree of constraint on overall market demand.

In response to the objective pressure on demand in the construction sector, the Group, while stabilizing its core admixture business, has leveraged its industrial chain advantages to actively expand into high-value-added fine chemical sectors, with a focus on cultivating three new product arenas, including surfactants, polyether polyols and ethylene carbonate, aiming at continuously optimizing and upgrading the business structure.

In the first half of 2026, the three major categories of new products demonstrated different growth momentum amid divergent market demand. Surfactants are essential raw materials for daily chemical and industrial applications, with broad market space both globally and domestically. Non-ionic products led the growth, while exports remained stable and positive in the first half, maintaining a net export pattern. Polyether polyols, as a core raw material for polyurethanes, have seen their role as an export pillar continue to strengthen, becoming an important channel for absorbing domestic production capacity. Ethylene carbonate, as a core solvent for lithium battery electrolytes, benefited from the continued high prosperity of the new energy and energy storage industries, with strong demand for electronic-grade products and a relatively tight supply-demand balance across the industry. The market growth potential of these three new arenas provides a solid market foundation for the Group's expansion into the fine chemical sector.

## 2. BUSINESS REVIEW

Building on its prior strategic planning and industry validation, the Group has accelerated the capacity construction and industrialization of its new products. During the Reporting Period, the Ningbo company's 60,000-ton epoxy derivative fine chemicals project commenced commercial production. The Group's product portfolio, which originally comprised cement admixtures, concrete admixtures and their in-process intermediaries, has been further expanded to include three major product series: surfactants, polyether polyols and ethylene carbonate. This marks the achievement of a preliminary milestone in the Group's exploration of the industrialization of epoxy derivative fine chemicals, with the new product system taking initial shape.

The Group has deepened its R&D and innovation in response to market demands, continuously iterating and upgrading its green and high-performance products, while providing customized products and supporting technical services to upstream and downstream customers, thereby consistently reinforcing its brand's core competitiveness. In the face of intensifying competition and accelerating consolidation in the market, the Group has leveraged its dual-category, full-chain integrated industrial chain advantages, from polyether monomers to concrete admixtures, and from alkanolamines to cement admixtures, to stabilize its existing customer base and systematically expand into incremental markets. At the same time, it has advanced the commercialization of its new fine chemical products and steadily cultivated a second growth curve. During the Reporting Period, the Group achieved operating revenue of RMB1,207.24 million, representing a year-on-year increase of 11.65%, marking a solid start in terms of revenue. However, the competition in traditional products remains intense, and the market penetration of new products needs to be accelerated.

# III. BUSINESS REVIEW AND OUTLOOK

## (I) Cement Admixture and In-process Intermediaries Business

As a major supplier in the cement admixture sector, the Group leverages its strengths in technological R&D, product portfolio and customer resources to provide green and efficiency-enhancing products as well as full-process technical services to cement enterprises. During the Reporting Period, the Group deepened its presence among existing customers and expanded into incremental markets, maintaining long-term and stable cooperation with numerous industry-leading and regionally significant cement enterprises. In the alkanolamine intermediate business, the Group closely tracked raw material price trends and effectively mitigated price fluctuation risks by flexibly adjusting procurement and sales strategies, optimizing procurement pacing and inventory management.

However, due to the continued contraction in cement demand and intensifying competition across the industrial chain, the overall downstream market experienced pressure on both volume and prices. Despite the partial offset achieved through customer penetration and procurement optimization strategies by the Group, the operating revenue from cement admixtures and alkanolamine intermediates business declined by 2.08% year-on-year.

## (II) Concrete Admixture and In-process Intermediaries Business

As a key enterprise in the domestic polyether intermediates and concrete admixtures sector, the Group has fully leveraged its integrated full-chain advantages spanning “polyether monomers — polycarboxylate mother liquor — finished concrete admixtures.” By precisely capturing downstream demand trends and focusing on core scenarios such as new infrastructure and high-quality real estate, the Group has intensified its market development efforts and steadily increased its external market share, making this business the core pillar supporting the Group’s revenue growth.

Polyether monomers are supplied on a stable basis to domestic admixture compounding enterprises and large building materials groups, with deep engagement in tendered projects of central state-owned enterprises and major infrastructure projects, leading to a continuous expansion in supply volumes. Polycarboxylate mother liquor is primarily supplied to large-scale infrastructure projects and leading admixture enterprises, with enhanced technical customization and tailored services, resulting in a steady increase in supply share to core customers. Finished concrete admixtures are offered to regional ready-mix stations and construction enterprises through integrated “product + technology” solutions, with regional coverage expanded through diversified business models, and customer stickiness steadily strengthened.

During the Reporting Period, the Group’s operating revenue from the concrete admixtures and intermediate business increased by 16.82% year-on-year.

## (III) Overseas Business

The Group has steadily advanced its strategy of “developing overseas business,” leveraging its core domestic production capacity and technological advantages to expand into overseas markets, while dynamically assessing fluctuations in raw material and shipping costs and flexibly adjusting its export strategy. In terms of business coverage, the Group has deepened its presence in regions with strong infrastructure demand, including Southeast Asia, the Middle East and Africa. Its products are now exported to 44 countries and regions, effectively improving capacity utilization and continuously refining its global footprint.

## III. BUSINESS REVIEW AND OUTLOOK

In terms of overseas production capacity, the Tashkent plant has become one of the leading admixture suppliers in Uzbekistan in terms of scale, and leverages its local base to radiate into Central Asian markets such as Tajikistan and Kyrgyzstan. The Indonesia plant, after commencing production, quickly achieved local adaptation, secured its sales base with existing customer resources, and seized infrastructure opportunities in Southeast Asia to continue expanding its market share.

During the Reporting Period, overseas local operations and export trade (encompassing business realized through localized overseas operations, direct exports and agency exports) increased by nearly 150% year-on-year.

### (IV) Commissioning of New Fine Chemical Products

The Group's three major new fine chemical products progressed as planned, with overall developments in line with expectations. Surfactants were operated under a dual-model approach combining direct sales and toll processing, with production lines and deliveries running smoothly and orderly, stable customer cooperation, and sustained and steady sales. Polyether polyols have completed the first batch of product deliveries, with production lines becoming more stable. Going forward, the focus will be on expanding sales channels and releasing production capacity. Ethylene carbonate has completed sample validation with multiple customers and is about to commence bulk sales.

During the Reporting Period, the Group's new fine chemical products business achieved operating revenue of RMB46.99 million, accounting for approximately 37% of the incremental operating revenue for the Reporting Period.

## 3. FUTURE PLAN AND PROSPECTS

2026 marks the opening year of the nation's "15th Five-Year Plan." The industry is poised to embrace two core opportunities: the deepening of the low-carbon transition and the expansion of overseas markets. At the same time, this opens up incremental space for enterprises with full-industry-chain advantages to extend into the fine chemical sector. In light of these industry opportunities and its own industrial chain foundation, the Group has adopted an overall operational direction centered on "stabilizing the domestic base, deepening overseas growth, strengthening technology-driven development, and diversifying into multiple arenas." It will reinforce the synergistic effects of its integrated industry chain, deepen its core business in green and environmentally friendly building materials, steadily cultivate new growth poles in fine chemical segments such as surfactants, polyether polyols and ethylene carbonate, and promote the coordinated development of its full product range. The Group will constantly consolidate its core competitiveness, consistently create long-term value for its shareholders, and strive to become an internationally leading benchmark enterprise in epoxy derivative fine chemicals.

During the Reporting Period, the Group's operating revenue amounted to RMB1,207.24 million, representing a period-on-period increase of 11.65%. Profit before taxation amounted to RMB57.13 million, representing a period-on-period decrease of 22.15%. Profit for the period amounted to RMB47.92 million, representing a period-on-period decrease of 21.49%. Net profit attributable to the equity shareholders of the Company amounted to RMB40.20 million, representing a period-on-period decrease of 23.23%, and basic earnings per share were RMB0.07, representing a period-on-period decrease of RMB0.02.

During the Reporting Period, the Group's revenue was derived from three streams of business: (1) cement admixture and in-process intermediaries, (2) concrete admixture and in-process intermediaries, and (3) others. A breakdown by business is as follows:

- (1) The revenue from cement admixture and in-process intermediaries amounted to RMB539.41 million for the Reporting Period, representing a decrease of 2.08% compared to the corresponding period of the previous year, mainly due to (i) the national cement output in the first half of the year, which stood at 736 million tons, a year-on-year decrease of 8% (data source: National Bureau of Statistics), leading to a decline in demands for our products; and (ii) downward adjustments in contract pricing with certain core customers for cement admixture.

## IV. MANAGEMENT DISCUSSION AND ANALYSIS

- (2) The revenue from concrete admixture and in-process intermediates amounted to RMB616.50 million for the Reporting Period, representing an increase of 16.82% compared to the corresponding period of the previous year, primarily due to (i) the Company's proactive expansion in concrete admixture and in-process intermediates, leading to an increase in market share; and (ii) the increase in market prices of raw materials, which in turn led to a corresponding increase in product prices.
- (3) The revenue from others amounted to RMB51.33 million for the Reporting Period, representing an increase of 1,788.51% compared to the corresponding period of the previous year, mainly due to the Company's new sales of surfactants and other series of products.

During the Reporting Period, the Group's products achieved a gross profit of RMB200.88 million, representing a decrease of 5.57% compared to the corresponding period of the previous year.

During the Reporting Period, the gross profit margin of admixture and in-process intermediates was 17.06%, representing a decrease of 2.5 percentage points compared to the corresponding period of the previous year, mainly due to the Company's core raw material costs kept at high levels driven by the significant and sustained upward trend in international crude oil prices resulted from factors such as geopolitical conflicts and tightening global crude oil supply, and the pass-through of such cost increases to downstream prices was subject to a time lag. Although the Company actively implemented various cost reduction measures, it was unable to fully hedge against the adverse impact of raw material price fluctuations in the market.

### 3. Other Net Income

During the Reporting Period, other operating income of the Group amounted to RMB11.06 million, representing a decrease of RMB6.77 million, or 37.98%, compared to the corresponding period of the previous year, mainly due to a year-on-year decrease in government subsidies during the Reporting Period.

### 4. Distribution Costs

During the Reporting Period, the Group's distribution costs amounted to RMB32.15 million, representing an increase of RMB4.42 million, or 15.92%, compared to the corresponding period of the previous year, mainly due to: (i) the increased staff remuneration included in distribution costs due to organizational restructuring; and (ii) a corresponding increase in sales service fees driven by the increase in sales volume.

### 5. Administrative Expenses

During the Reporting Period, the Group's administrative expenses amounted to RMB82.80 million, representing an increase of RMB1.50 million, or 1.85%, compared to the corresponding period of the previous year, remaining basically stable compared to the corresponding period of the previous year.

### 1. Non-current Assets and Current Assets

As at the end of the Reporting Period, the Group's non-current assets amounted to RMB1,388.88 million, remaining basically stable as compared to the end of the previous year.

As at the end of the Reporting Period, the Group's current assets amounted to RMB1,469.13 million, representing a decrease of 5.62% as compared to the end of the previous year, mainly due to capital expenditure on ongoing projects, repayments of bank borrowings and dividend payments, which reduced the Group's cash balance.

## IV. MANAGEMENT DISCUSSION AND ANALYSIS

### 2. Non-current Liabilities and Current Liabilities

As at the end of the Reporting Period, the Group's non-current liabilities amounted to RMB313.30 million, representing a decrease of 9.8% as compared to the end of the previous year, mainly due to the repayment of bank borrowings by its subsidiary, Ningbo Conch New Material Technology Co., Ltd.

As at the end of the Reporting Period, the Group's current liabilities amounted to RMB1,068.31 million, remaining basically stable as compared to the end of the previous year.

### 3. Equity Attributable to Equity Shareholders of the Company

As at the end of the Reporting Period, the equity attributable to equity shareholders of the Company amounted to RMB1,326.64 million, representing a decrease of 3.52% as compared to the end of the previous year, mainly due to the distribution of profits for the year 2025 in the first half of the year, which resulted in a reduction in shareholders' equity.

## (III) LIQUIDITY AND CAPITAL SOURCES

During the Reporting Period, the Group fully leveraged its funding scale advantage by strengthening fund planning management, optimizing financing structure, lowering loan interest rates, and properly arranging project financing to meet the Company's capital needs. As of 30 June 2026, the Group's cash and cash equivalents amounted to RMB343.15 million, which were mainly denominated in Hong Kong dollars and RMB.

### 1. Loans and Borrowings

## IV. MANAGEMENT DISCUSSION AND ANALYSIS

### Reasons for and Benefits of Change in Use of Net Proceeds from the Global Offering

The intended use of the proceeds from the global offering as disclosed in the Prospectus was prepared based on the Company's estimates of the then-current and future market conditions as of the date of the Prospectus. The Board continuously evaluates the plans for the use of the unutilized net proceeds and, in light of developments in global and domestic economic conditions, revises or amends such plans when necessary to determine the most effective use of the net proceeds, thereby facilitating the Group's better growth and development.

After comprehensively considering the Group's current financial condition and business plans, the Company has made the following adjustments to the use of the unutilized net proceeds. Please refer to the announcement dated 31 March 2026 and the circular dated 27 April 2026 of the Company for details.

- The remaining proceeds originally intended for “repay certain bank loans”, amounting to approximately HK\$39.4 million, are no longer needed for their originally intended purpose, as the parent company's interest-bearing bank loans have been fully repaid, and there are currently no applicable interest-bearing bank loans within the Group available for repayment.
- The remaining proceeds originally intended for “partially finance the production activities of a production plant located in Huludao, Liaoning”, amounting to approximately HK\$12.5 million, are no longer needed for their originally intended use, as the plan to establish the manufacturing plant in Huludao, Liaoning through an outward investment has been completed, such originally designated project will no longer utilize the proceeds.
- The remaining proceeds originally intended for “construct overseas production plants located in Uzbekistan and Indonesia” amount to approximately HK\$30.0 million. In view of the fact that the construction of the Uzbekistan production plant has been completed, and part of the investment in the Indonesian production plant has already been paid through the proceeds and the Group's own funds, the remaining funding requirement is estimated to be approximately HK\$8 million. In order to avoid idle funds and duplicate allocation, and after careful assessment by the Board, it is proposed to reduce the remaining net proceeds originally allocated to this project by HK\$22.0 million and reallocate that amount to the Maoming Project.
- The net proceeds originally intended for “Implement marketing initiatives”, amounting to approximately HK\$39.6 million, are no longer needed for their originally intended purpose, as the Group has already initiated relevant marketing and promotional activities using its own funds in accordance with business development needs and has achieved the expected results. In order to avoid duplicate allocation of resources and to enhance the efficiency of the use of the proceeds, and after careful assessment by the Board, such portion of the proceeds is no longer required for its originally intended use. Accordingly, it is proposed to reallocate such unutilized funds to other more urgent and strategically significant projects under construction, so as to optimise the capital allocation structure and ensure that the limited resources are deployed to maximum benefit, which is in the best interests of the Company and its shareholders as a whole.
- The net proceeds originally intended for “Enhance the extent of automation and digitalisation in production processes” amount to approximately HK\$7.9 million. In order to further improve the digital and intelligent capabilities of the production plant in Maoming City, Guangdong Province, and taking into account the construction progress of the plant, following a prudent assessment by the Board, the expected timeline for utilization is proposed to be adjusted to December 2028.

## IV. MANAGEMENT DISCUSSION AND ANALYSIS

In order to enhance the efficiency of the use of proceeds, the Company has uniformly reallocated the above-mentioned net proceeds of approximately HK\$113.5 million, which no longer have their originally intended use, together with approximately HK\$30.3 million originally set aside for general working capital, to the “Construct production plants located in Maoming, Guangdong” project. According to the project schedule of the Maoming project, the full utilization of the unutilized net proceeds allocated to the construction of the production plant in Maoming, Guangdong is expected to occur by December 2028. Such funds will be exclusively applied to land acquisition, equipment procurement, and plant construction for the Maoming project, which will help ensure the timely progress of the key project and improve the efficiency of the use of proceeds, thereby aligning with the overall best interests of the Company and its shareholders. The expansion of the Maoming project is in line with the Group’s long-term development strategy, facilitates capacity expansion and enhancement of market competitiveness, and is expected to bring better economic returns to the Group.

Save for the above changes, there have been no other changes to the use of the unutilized net proceeds. The nature of the Group’s business remains unchanged from that previously disclosed. The Group intends to apply the unutilised net proceeds according to the allocations as set out in the circular of the Company dated 27 April 2026. The Board considers that the proposed changes are fair and reasonable, will enhance the efficiency of resource utilization, and are in the overall interests of the Group and its shareholders.

## 2 Basis of preparation

This interim financial report is prepared in accordance with the applicable disclosure requirements of the Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited and complies with IAS 34, “Interim Financial Reporting”, issued by the International Accounting Standards Board. This interim financial report was authorized for issue on 28 August 2026.

Except for changes in accounting policies that will be reflected in the annual financial statements for 2026, this interim financial report is prepared based on the same accounting policies as those applied in the annual financial statements for 2025. For details of the changes in accounting policies, please refer to note 3.

The preparation of interim financial information in accordance with IAS 34 requires the management to make judgements, estimates and assumptions that affect the application of policies and the reported amounts of assets and liabilities, income and expenses from the beginning of the year to date. Actual results may differ from these estimates.

This interim financial report comprises condensed consolidated financial statements and selected explanatory notes. The notes include explanations of events and transactions that are significant to an understanding of the changes in the Group’s financial position and performance since the annual financial statements for 2025. The condensed consolidated interim financial statements and their notes do not include all the information required for full financial statements prepared in accordance with the IFRSs.

This interim financial report is unaudited but has been reviewed by the Company’s Audit Committee.

## 3 Changes in accounting policies

The Group has applied the following new and amended IFRSs issued by the International Accounting Standards Board in the interim financial report for the current accounting period:

Amendments to IFRS 9 “Financial Instruments” and IFRS 7 “Financial Instruments: Disclosures”-Amendments to the Classification and Measurement of Financial Instruments. These amendments cover three main aspects:

- These amendments clarify the timing of recognition and derecognition of financial assets or financial liabilities, and introduce an optional exception allowing an entity to derecognise a financial liability prior to the settlement date, provided that the financial liability is settled in cash using an electronic payment system and that certain conditions are met.
- In respect of the assessment of whether the contractual cash flows of a financial asset are solely payments of principal and interest on the principal amount outstanding, these amendments clarify the assessment of interest and introduce additional tests for financial assets with contingent features (for example, features linked to environmental, social and governance (“**ESG**”) considerations). These amendments also clarify the distinction between financial assets with non-recourse features and contractually linked instruments, which may change the applicable assessment.
- These amendments introduce new disclosure requirements regarding the disposal of investments in equity instruments designated as at fair value through other comprehensive income (FVOCI), and financial instruments that are not measured at fair value through profit or loss (FVPL) but contain contractual terms that could change the amount of contractual cash flows based on the occurrence or non-occurrence of a contingency that is not directly related to changes in the basic borrowing and loan risk and costs.

These amendments have had no material impact on how the Group’s results and financial position for the current or prior periods have been prepared or presented in the interim financial report. The Group has not applied any new standard or interpretation that is not yet effective for the current accounting period.

## 4 Revenue and segment reporting

### (a) Revenue

The principal activities of the Group are the research and development, production and sales of cement admixture, concrete admixture together with their respective in-process intermediaries.

#### (i) Disaggregation of revenue

Disaggregation of revenue from contracts with customers by major products is as follows:

|                                                                                                            | Six months ended 30 June |                  |
|------------------------------------------------------------------------------------------------------------|--------------------------|------------------|
|                                                                                                            | 2026<br>RMB'000          | 2025<br>RMB'000  |
| <b>Revenue from contracts with customers within the scope of IFRS 15 and recognised at a point in time</b> |                          |                  |
| — Cement admixture and in-process intermediaries                                                           | 539,412                  | 550,864          |
| — Concrete admixture and in-process intermediaries                                                         | 616,496                  | 527,719          |
| — Others                                                                                                   | 51,330                   | 2,718            |
|                                                                                                            | <b>1,207,238</b>         | <b>1,081,301</b> |

The Group's customers base is diversified. Revenue from only one customer accounted for 10% or more of the Group's revenue for the six months ended 30 June 2026, and the revenue from this customer amounted to approximately RMB313,489,000 (for the six months ended 30 June 2025: RMB289,199,700).

The Group applies the practical expedient in paragraph 121(a) of IFRS 15 of not disclosing the transaction price allocated to the remaining performance obligation as the original expected duration of substantially all the contracts of the Group is within one year or less.

### (b) Segment reporting

#### (i) Disaggregation of revenue

Information reported to the Group's most senior executive management for the purposes of resource allocation and assessment of segment performance is more focused on the Group as a whole, as all of the Group's activities are considered to be primarily dependent on the performance on admixture product. Resources are allocated based on what is beneficial for the Group in enhancing its admixture product activities as a whole rather than any specific products. Performance assessment is based on the results of the Group as a whole. Therefore, management considers that the Group has only one operating segment under the requirements of IFRS 8 "Operating segments".

## 10 Trade and other receivables (Continued)

- # During the period ended 30 June 2026, a subsidiary of the Group requested certain customers to provide bank payment guarantees in respect of their overdue trade receivables. Under this arrangement, the bank will unconditionally settle the outstanding receivables upon the expiry of the guarantee period, which is within one year. As the credit quality of the bank remained sound, no impairment loss was recognised during the period.

All of the current portion of trade and other receivables are expected to be recovered within one year.

All amounts due from related parties are unsecured, non-interest bearing and repayable on demand.

## 17 Financial instruments measured at fair value

### (i) Financial instruments measured at fair value

The following table presents the fair value of the Group's financial instruments measured at fair value at the end of the reporting period on a recurring basis, categorised into the three-level fair value hierarchy as defined in IFRS 13, "Fair value measurement". The level into which a fair value measurement is classified is determined with reference to the observability and significance of the inputs used in the valuation technique as follows:

- Level 1 valuations: Fair value measured using only Level 1 inputs i.e. unadjusted quoted prices in active markets for identical assets or liabilities at the measurement date
- Level 2 valuations: Fair value measured using Level 2 inputs i.e. observable inputs which fail to meet Level 1, and not using significant unobservable inputs. Unobservable inputs are inputs for which market data are not available
- Level 3 valuations: Fair value measured using significant unobservable inputs

During the period ended 30 June 2026, there were no transfers between Level 1 and Level 2, or transfers into or out of Level 3.

### Valuation techniques and inputs used in Level 2 fair value measurements

For wealth management products issued by banks that are measured at FVPL, the fair value is determined by net value of the products on the balance sheet date that published by commercial banks.

For bills receivable that are measured at FVOCI, the fair value is estimated as the present value of the future cash flows, discounted at the market interest rates at the balance sheet date.

### (ii) Fair values of financial assets and liabilities carried at other than fair value

The carrying amounts of the Group's financial assets and liabilities measured at amortised cost were not materially different from their fair values as at 30 June 2026.
